

Great Harbour Way and the Wellington Waterfront Development Plan

Alastair Smith

Great Harbour Way concept

• Safe, enjoyable and efficient shoreline walking and cycling route around Wellington Harbour

• Now part of WCC and GWRC walking and cycling plans

GHW on Wellington Waterfront

- Wellington Waterfront a key part of GHW but:
 - Narrow portions cause pedestrian/cycle conflicts
 - Cycling/walking route poorly defined
 - Lack of connection at ends
 - No cycle friendly access to city at intermediate points
 - Problems with vehicle movements and parked vehicles

Narrow portion at Shed 5

Lack of connection at ends

Waterfront Plan should

- Define a walking/cycling corridor, following as close as possible to the shoreline
- Connect route with the rest of GHW
- Provide connections with city at intermediate points
- Reduce vehicle parking and movements
