Discharge timing Continuous Intermittent

Over what periods of the day is the discharge occurring? _____

Flow _____
(what is the estimated daily flow?)

Composition _____
(what are the main pollutants)

Pre-treatment

Pre-treatment of waste _____
(Grease traps, interceptors, pH adjusting tanks etc)

How often is it emptied or cleaned? _____

Applicant

Name (printed) _____

Signature of applicant _____ Date _____

Wellington City Trade Waste Bylaw 2004

The Wellington City Council makes this Bylaw under the authority of, and in accordance with, the provisions of the Local Government Act 2002 and the Bylaw Act 1910.

The purpose of the Bylaw is to control trade waste discharges into the wastewater system to protect:

- sewers, pumping stations, wastewater treatment plants and other related wastewater system structures;
- workers operating in or with the wastewater system
- the environment by ensuring the necessary resource consents are met.

The Bylaw has set the limits on different physical and chemical characteristics of wastewater. A list of common characteristics, as well as their limits and charges for consent holders is below:

Limits on different wastewater characteristics under Wellington City Trade Waste Bylaw

| Characteristics | Limit |
|--------------------|-------------------------|
| Flow | 5m ³ per day |
| pH value | 6-10 |
| BOD ₍₅₎ | 600g/m ³ |
| Suspended solids | 600g/m ³ |
| Oil and grease | 100g/m ³ |

Consent fee is based on waste water characteristics and flow

| Risk Category | Fee |
|---------------|-----------|
| Application | \$161.25 |
| High risk | \$1612.50 |
| Medium risk | \$806.25 |
| Low risk | \$268.75 |
| Minimal risk | \$86 |
