5.6 SECTOR 6: WRIGHT HILL / SANCTUARY

5.6.1 OVERVIEW

Wright Hill forms a southern edge to the Karori Basin and the progressive restoration of this area will contribute to the overall quality of the area’s landscape. The hill is also a significant heritage site. It has extensive World War II fortifications which were built between 1942 and 1949 to service a 9.2 inch battery gun. The full history of the fortress is recorded in the Wright Hill Conservation Plan which is administered by the Wright Hill Fortress Restoration Society.

Wright Hill is one of only two hilltops accessible by car (the short walk from the car park is also accessible by wheelchair) and provides one of the most impressive views of the city.

Being largely north-facing and windswept, Wright Hill is only slowly regaining a natural vegetation cover and has probably the most advanced infestation of Darwin’s barberry in the city. A reasonably well developed track network, which includes sections of the Sanctuary Perimeter Track, exists on Wright Hill. This is being greatly improved with the addition of a well constructed multiple use track linking to Karori Stream and Makara Peak. This addition enables continuous walking and riding from the South Coast to Karori Park.

Wright Hill and Karori Sanctuary are contiguous areas forming one of the largest expanses of indigenous vegetation in the Outer Green Belt and a major ecological hub for this part of the city. Its vegetation is not as well advanced or impressive as that in Otari-Wilton’s Bush, but in ecological terms it will increase in significance and importance. A number of important bush remnant occurring on private land, and the recently established Long Gully Bush Reserve (Wellington Natural Heritage Trust, Inc), are included within the concept area for this part of the Outer Green Belt.

Karori Wildlife Sanctuary was conceived a decade ago and the trust was established in 1995. The sanctuary occupies the 252 hectare valley (the headwaters of Kaiwharawhara Stream) that was one of the city’s original water catchment areas. Now retired from its original purpose, the valley is encircled by an 8.6 kilometre pest proof fence. Following the removal of all introduced mammalian pests a series of reintroductions of rare and endangered native birds has been undertaken.

Also underway is the natural restoration of the forest, which will, in time, allow much larger populations of birds to be supported, than is the case at present. The sanctuary complements Otari-Wilton’s Bush perfectly in terms of a wider Outer Green Belt vision where plants and animals will again flourish in their natural state across a large sweep of the city environment.

The sanctuary’s former role as a water collection area can be seen in the two dams, the historic buildings, and other structures, now on display (and in some cases meticulously restored by the sanctuary trust). Other historical points of interest in the valley include several gold mining adits (a mine with a horizontal entrance) and diverse conifer plantings associated with the early settlement period.

While the land is owned by the Council, it is controlled and managed by the sanctuary trust and there is an entry fee and only one point of public entry (off Waiapu Road in Wellington’s Outer Green Belt Management Plan – May 2004 139
Karori). In this respect it is unique in the Outer Green Belt. The creation of the sanctuary involved the subdivision of the original title into one main sanctuary area and a number of smaller buffer areas to be managed as reserves by the sanctuary trust in accordance with this Plan and any subsequent plans or agreements. The main sanctuary area already has its own management plan prepared by the trust, and this will be periodically updated.

The Perimeter Track, which traverses both the trust and Wellington City Council managed areas, is one of the most important recreation tracks in the city and part of the north-south Outer Green Belt link. The two organisations manage this facility jointly, according to Wellington City Council track standards.

5.6.2 ISSUES AND OBJECTIVES

5.6.2.1 Ecological linkages, streams and bush regeneration

This sector, while not containing any primary bush remnants, presents important opportunities to develop the Outer Green Belt ecological corridor concept. The unique purpose of the sanctuary will have a major ‘spillover’ benefit for the wider area. In addition, improvements to water quality and fish habitat will provide a major contribution to the community’s vision for the Kaiwharawhara Stream.

Wright Hill is a potential receiving area for birds moving out of Karori Sanctuary, and a corridor connecting the sanctuary to areas further north and west. However, it is compromised in this role by the relatively slow improvement in its vegetation and the continuing presence of exotic weeds and mammalian pests.

To the east, this sector is contiguous with Polhill Gully (part of the Inner Town Belt cluster) and the closest large area of native bush to the central city.

Details of the formal arrangements between the trust and the Council about use and management of the sanctuary lands, are contained in separate documents (the key document is the Heads of Agreement to Lease, 16 December 1999). This Plan mainly provides an overview of this partnership and describes the Outer Green Belt context for the sanctuary.

Objectives

1. To develop the sector as a major component of the Outer Green Belt ecological corridor, the major ecological hub for the southern part of the city and the natural headwaters of Kaiwharawhara Stream.

2. To continue to work in partnership with the Karori Wildlife Sanctuary Trust to advance the specific goals for the sanctuary while working to maximise the flow-on benefits to the surrounding ecosystem.

3. To recognise the threat of Darwin’s barberry to the restoration goals within the sector and the threats to the wider Outer Green Belt, and to continue to give priority to its management and monitoring.

4. To work with private landowners to enhance ecological linkages through the valley area.
5.6.2.2 Access

In recent years the importance of the track network in this sector has become evident. This network is not as old as in other areas, as much of the land was, until relatively recently, unavailable to the public for recreational use.

Now it is one of the best used track networks, particularly for running and mountain biking (except within the actual sanctuary) and is a gateway to other areas in Sectors 5 and 7 and a link with the central city / Inner Town Belt track networks.

The main issue is the need to review this network against some clear criteria or principles, as anticipated in the Open Space Access Plan, to list any deficiencies, and define future construction and maintenance standards for each track.

Objective

To continue to develop and improve the track network for recreation and management purposes applying, as appropriate, any future Wellington City Council track standards.

5.6.2.3 Heritage

The heritage features of both Wright Hill and Karori Wildlife Sanctuary are well recognised and have clear management regimes. There is considerable potential to increase the profile of these areas as part of both tourism and local recreation initiatives.

Objective

To recognise and protect the historic sites and natural heritage of the sector by:

- supporting the Wright Hill Fortress Society in its maintenance, restoration and caretaking of the fortress
- supporting the Karori Wildlife Sanctuary Trust as a strategic partner in the promotion of the area’s natural and cultural heritage
- actively promoting the area as part of a network of historic sites along the Outer Green Belt
- promoting the profile of Wright Hill and Karori Sanctuary as tourist destinations
- treating the areas surrounding Karori Sanctuary as a priority for pest management.
Sector Six - Future Initiatives

- Manage Darwin’s Barberry & encourage bush regeneration
- Establish & manage buffer reserves
- Improve recreation links to Makara Park
- Promote tourism & heritage attraction
- Continue ecological restoration
- Improve recreation links to Makara Park
5.6.3 MANAGEMENT AREA POLICIES

Area 6.1 - Wright Hill

Long term vision

- Wright Hill is managed as a significant high point and viewing area within the Outer Green Belt. It is highly accessible at its summit because of the close proximity of the road-end carpark, and access track.
- Wright Hill is restored as a part of a wider indigenous forest ecosystem, complementing Karori Wildlife Sanctuary and adjoining areas within and beyond the Outer Green Belt.
- The local track network is a key component in the wider track network, well linked to the adjoining areas and maintained according to defined standards.
- The historic fortifications continue to be recognised and maintained as an important historical feature of Wellington, and promoted and enjoyed as a key visitor destination.

Land status

Please refer to the accompanying map and table.

Management programme

- Develop a clear programme to manage Darwin’s barberry.
- Maintain other pests to appropriate levels, consistent with the area’s special role in relation to Karori Wildlife Sanctuary.
- Support the implementation of the Wright Hill Fortress Conservation Plan.
- Encourage and support the work of the it Fortress Restoration Society.
- Continue to develop the track network and maintain according to defined standards.

Public access and enjoyment

- Public access for walking and mountain biking will be provided for as the main recreation activities on the overall track network.
- Public vehicular access on Wright Hill Road will be maintained to allow easy access to the summit for viewing. The track from the carpark to the summit viewing area will be maintained to a wheelchair accessible standard.

| Section 15 is presently held as Crown Land by the Department of Conservation in terms of Section 62 of the Conservation Act. Ownership of this land is currently being disputed (July 1991) by Telecom Corporation of New Zealand Limited. The company has lodged a claim for the land with the Treasury pursuant to an Agreement for Sale and Purchase between the Crown and Telecom dated 31 March 1987 (Designated for Telecommunication and Radiocommunication & Ancillary Purposes (Designation T17, map ref 11). This land is also identified as a Heritage area in the District Plan. Monitor progress and outcome of claim. Seek protection under Reserves Act 1977. |

| 6.1.16 | 2482 |
| Part Section 2 Upper Kaiwharawhara District | 58/488 | 3.4313 ha | Not a reserve | Open Space B |
| Recently purchased by WCC for inclusion within the Wrights Hill collection of reserves. Sale of the land was conditional upon the land being protected as reserve within two years, which is consistent with the Council’s reasons for purchase. Protect as scenic reserve as a matter of urgency to comply with the sale and purchase agreement. |
Area 6.2 - Karori Wildlife Sanctuary

Long-term vision

- Development of a conservation site of international significance which, through the provision of public access and advocacy, enhances understanding and commitment to conservation and New Zealand’s natural heritage.
- An ecological ‘reservoir’ for the wider area.
- Restoration of the upper catchment of the Kaiwharawhara ecosystem, including the return of:
  - uncommon, rare and threatened plants, birds, invertebrates lizards and tuatara, frogs, bats and fish.
- A successful and sustainable tourism destination for visitors to Wellington.
- A sustainable partnership with Karori Wildlife Sanctuary Trust in support of these outcomes.

Land status

Please refer to the accompanying map and table.

Management programme

- Support the implementation of the *Karori Wildlife Sanctuary Management Plan*.
- Completion and maintenance of the track network, including shared management of the Perimeter Track and interpretation outside the fence.
- Improve the local network of tracks at the northern end of the sanctuary outside the perimeter fence and in the vicinity of Birdwood Reserve.
- Complete the establishment of the perimeter buffer reserves and a clear management regime, consistent with this Plan.
- Complete the formalisation of management for this land through the lease of the land to the trust.

Public access and enjoyment

- Public access within Karori Sanctuary is for walking and other passive recreational activities associated with the viewing and enjoyment of native flora, fauna and heritage.
- The sanctuary trust charges a fee for one-off visits, but unlimited access during open hours can be obtained with the purchase of a sanctuary trust membership to the Sanctuary Trust.
- Public access is provided for walking and mountain biking on the Perimeter Track. Mountain biking is allowed on all other tracks outside the Sanctuary fence unless stated otherwise.
- Special permission may be granted on a one-off basis for properly organised tours in off-road vehicles on the Perimeter Track between Wright Hill and the Polhill Wind Turbine, subject to the general policies in this Plan and any assessment criteria or conditions the Council may wish to impose, and approval from the sanctuary trust.
