TROLLEY BUS ELECTRICAL NETWORK UPGRADE

START DATE: 03 AUGUST 15

Wellington Cable Car Limited (WCCL) owns and operates the Wellington Trolley Bus overhead electrical network and contracts Transfield Services Limited (TSL) as the service provider for faults, maintenance and repairs.

The material state of the Trolley Bus overhead traction network within Constable Street, and Crawford Road is in very poor condition and progressive replacement of this section has been identified as essential for continued safe operation of the network. The works to be undertaken will be in two stages. Constable Street (Stage 1) is expected to take 4 weeks to complete, and the length of Crawford Road (Stage 2) is expected to take 8 weeks to complete. As part of the works, Transfield Services Limited will replace the defective overhead system components comprising the cross-spans, fittings and contact wire.

There will be a need to undertake some night work at the main intersections to minimise disruption to traffic flow but the majority of replacements will be during the working week with temporary traffic management in place.

No work will be undertaken on Saturdays and WCCL/TSL will minimise any disruptions to businesses and shopping areas.

If there are any queries regarding this work please call (0800 223 455) or email overhead@wellingtoncablecar.co.nz
