The intersection of Broderick and Moorefield roads will feature a new, longer bridge over the railway line, with extra lanes and a right-hand turning bay.

This will improve traffic flow and allow for future double-tracking into Johnsonville Railway Station.

Bus turning will be made easier by widening the road slightly. Some commuter parking near the railway station will be lost. Extra commuter parking has been provided on Fraser Avenue at Raroa Station.

On the north side, the road will be widened to allow for extra lanes. Cycle waiting areas will also be added along with a new shared path on the west side of Moorefield Road.

Indicative timeline
August 2014–June 2015
Construction of bridge
Upgrade of Moorefield Road intersection
New signals at Gothic Street
