

Street clearances for encroachment structures – WCC Transport Assets Unit 16 Aug 2011

Street clearances for encroachment structures – WCC Transport Assets Unit 16 Aug 2011

Note – Top edge of balcony balustrade must be shaped without a flat top edge. This is to prevent objects, such as a drinking glass, being placed and then knocked or blown off onto the street below.

Balcony to not extend in front of a line measured at an angle of 135° from the neighbours common front boundary. This is for privacy, sunlight, view, and security reasons.
