

# Option D

## Slowing Karori Road

Artist impression: Option D - View west along Karori Road

**Option D** introduces temporary traffic calming interventions to reduce the speed of vehicles on Karori Road through the town centre area.

Slower vehicle speeds will make the town centre a safer and more comfortable environment for pedestrians. Temporary interventions will allow the community to test the interventions and ensure they contribute to a slower traffic environment before more permanent improvements are made.

Future improvements will include public transport, walking and cycling to enhance the experience of Karori Road.
