

Proposed Prince of Wales Park-Omāroro reservoir – Notice of Requirement

In accordance with sections 95A(2)(b) and 168A(1A) of the Resource Management Act 1991 (the applicant having requested public notification) Wellington City Council publicly notifies this Notice of Requirement for the Prince of Wales Park/Omāroro water reservoir:

- Site address:** Prince of Wales Park, Brooklyn
(legally described as Part Lot 2 DP10337)
- Applicant:** Wellington City Council
c/o - Beca
PO Box 3942
Wellington 6140
Attn: Mhairi Rademaker
- Description of proposal:** The construction, operation and maintenance of a 35,000m³ water reservoir within the Town Belt.
- Service request number:** SR394052

Wellington City Council intends to designate an area within Prince of Wales Park to provide for a public work, being the construction, operation and maintenance of a 35,000m³ water reservoir within the Town Belt. The reservoir is required to service Wellington's low-level water supply zone which provides potable water to about 70,000 residents and a range of significant commercial, industrial and critical community facilities.

Wellington Water Limited will carry out the construction, operation and maintenance of the Omāroro Reservoir on behalf of the City Council.

The public work is the construction, operation and maintenance of the Prince of Wales/Omāroro Reservoir including all activities associated with the construction, operation and maintenance of:

- The reservoir structure and pipe tunnel
- Access to the reservoir and pipe tunnel
- Associated connections to the bulk water supply, local water supply, and local stormwater networks
- All construction activities associated with the proposed raising and reinstatement of the upper and lower Prince of Wales Park playing fields.

The proposed reservoir structure will have (about):

- A capacity of 35,000m³
- A footprint of 3800m² (reservoir)/4000m² (reservoir and pipe tunnel)
- An internal diameter of 67m
- A wall height of 12.1m and a total height of 15.5m.

The construction period is expected to be two to three years.

The reservoir is designed to be buried, with the exception of two small access hatches on the roof of the reservoir and a 2.5m x 2.5m doorway and a 10m-wide service access to the reservoir's buried service and pipe tunnel.
