# **Residents Monitoring Survey**

April 2023

### Introduction

- The Residents Monitoring Survey (RMS) is an annual survey undertaken by the Wellington City Council (WCC) Research and Evaluation team (R/E team).
- The survey asks a representative sample of Wellington City residents about their engagement and satisfaction with the Council's provision and delivery of services and facilities, as well as Council Controlled Organisations (CCOs). The survey also asks residents about their behaviours and overall perceptions of Wellington.
- The aim of the RMS is to provide statistically representative results on residents' satisfaction with the Council's services and facilities and perceptions of the city.
- The results provide an indication of how the Council is performing from a resident's perspective and allows the Council to monitor and track progress against its Annual Plan and Long-Term Plan. The results also present the opportunity to understand residents' perceptions, measure trends and changes over time, assess existing operational activities of the Council and identify opportunities for improving satisfaction and overall performance.
- This report outlines the results to all questions asked in the Residents' Monitoring Survey 2023. It highlights differences over time, and describes differences by key demographic areas of interest (for example age, gender, ward). Results are presented in graphs with short accompanying text.

**Note:** While this survey provides the opportunity to understand what Wellington residents think about the Council and the city, it is important to note that the results reflect a snapshot of residents' perceptions at one point in time. There are many factors that contribute to an individual's perceptions and so it cannot be assumed that all opinions of all Wellington residents have been captured via this survey methodology. Further research would be necessary to provide a more in-depth and comprehensive understanding of the reasons behind particular results and perceptions.

## Methodology

- The latest RMS was conducted in February 2023 with the Capital Views Wellington City Council research panel. This panel is recruited and managed by PublicVoice on behalf of the Council.
- Due to the number of questions asked, the survey was conducted in two parts using the online survey tool Voxco. In 2023, part one was 17 minutes long, and part two was 20 minutes long.
- The Research and Evaluation Team were responsible for entire survey process including questionnaire design, survey scripting, survey distribution and quota monitoring. Once the survey was complete, the Research and Evaluation team were responsible for data analysis and reporting.
- For each survey a separate random sample of approximately 2,000 residents was drawn from the Capital Views panel initially. During the fieldwork quotas were monitored and additional booster samples were randomly selected to gather more responses from groups of the population that were underrepresented. In total each survey was sent to around 2,900 residents (with a 36-38% response rate for each part).
- The final sample size for 2023 was 1,071 for part one and 1,067 for part two, which were post-weighted to be representative by age, gender and ward. The maximum margin of error at 95% confidence level was 3.0% for both part one and two. This indicates that we can conclude with 95% confidence that the sample results reflect that of the population give or take 3.0%.

#### **Reporting notes:**

- Throughout the report 'don't know' responses are generally excluded from the analysis in scale type questions. This is to stay consistent with previous tracking.
- Where 'don't know' responses have been excluded, it is identified in the notes at the bottom of the slide. Where the excluded responses exceed 10% of the sample for that question, this has also been identified.
- Throughout this report scale type questions are reported using the 'top two' and 'bottom two' boxes. These numbers are calculated by summing the unrounded underlying figures and as such the top/bottom two boxes sometimes do not match the sum of the rounded underlying figures. i.e. 25.4% + 15.4% = 40.8% would appear as 25% + 15% = 41%.

# **City Perceptions**

## **Overall Wellington perceptions**

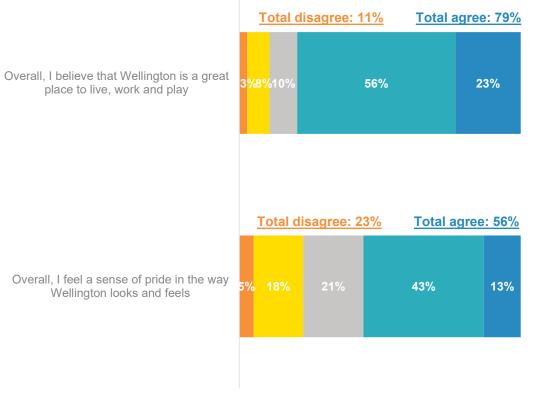

- Around four out of five (79%) residents agreed that overall Wellington is a great place to live, work and play.
- There was less agreement that respondents felt a sense of pride in the way Wellington looks and feels (56% agreed).
- Agreement with both of these statements fell between 2020 and 2021 however, the results have remained stable in 2022 and 2023.

#### **Demographic differences**

## City centre attributes

- Respondents were asked how much they agreed or disagreed with a range of attributes of Wellington's central city.
- The highest level of agreement was with the statements that the city is easy to get to (64% agreed) and an easy place to use (62%). About half (55%) agreed that the city centre was an easy place to enjoy, while under half (42%) agreed that it is lively and attractive.
- There is still more agreement than disagreement with all of these attributes, and agreement with all attributes has remained relatively steady from the 2022 survey. However, compared to 2020 agreement with the statements that Wellington's City Centre is "an easy place to enjoy" and "lively and attractive" has fallen 16% and 27% respectively.
- Agreement that the city centre was an easy place to get to and an easy place to use also fell between 2020 and 2021, trending slightly downward since.

#### **Demographic differences**

- Respondents aged 60+ were less likely to agree that the city centre is lively and attractive (34%).
- Respondents with dependant children were less likely to agree that the city centre was an easy place to get to (56% vs 67% for those without dependents).
- Respondents from the Lambton ward were more likely to agree with all four statements about the city centre.

## Local suburb attributes

- Respondents were asked how much they agree or disagreed with a range of attributes about their local suburb.
- There was the highest level of agreement with the statements that their local suburb is well utilised and public areas in their local suburb feel safe (73% and 70% respectively). Over half (61%) agreed that their suburb was lively and attractive, while less than half (45%) agreed that their local suburb was well designed.
- Results were largely consistent with previous years with some small down movements compared to last year, with no changes of greater than 4%.

#### **Demographic differences**

• Respondents in the Lambton Ward were less likely to agree that their local suburb feels safe (55%), while respondents from the Onslow-Western ward were more likely to agree (87%).

## Governance

### Overall satisfaction with the Council's decision making

- There was more dissatisfaction than satisfaction with how the Council makes decisions, about one in four (41%) of respondents dissatisfied and one in five (17%) satisfied.
- The level of satisfaction rose compared to 2022 (12% to 17%), while the levels seen in 2021 were already lower than had been observed in the past (>30% to 16%).\*

#### **Demographic differences**

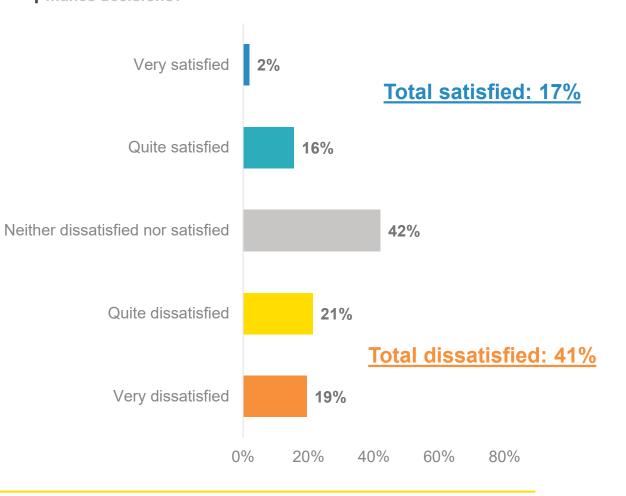

- Males were more likely than females to respond as very or quite dissatisfied (46% vs 35%). However females were more likely to be 'on the fence' with 49% neutral compared to 36% of males.
- Under 30s were more likely to be satisfied (25%) than over 30s. While respondents 60+ were more likely to be dissatisfied (52%).
- Respondents from the Eastern ward were more likely to be dissatisfied (57%), while respondents from the Lambton ward were more likely to be satisfied (26%).

\*In the 2022 survey the wording for this question was changed slightly to emphasise the fact we are interested in respondents' satisfaction with the **process** of decision making, rather than the specific outcome. This should be kept in mind when comparing 2022 results to previous results.

Pre-2022 question: Overall how satisfied are you with how Council makes decisions? From 2022 question: The understanding of how Council and Councillors make decisions is important.

Overall, how satisfied are you with the process by which Council makes decisions?

Overall, how satisfied are you with **the process by which Council makes decisions?** 

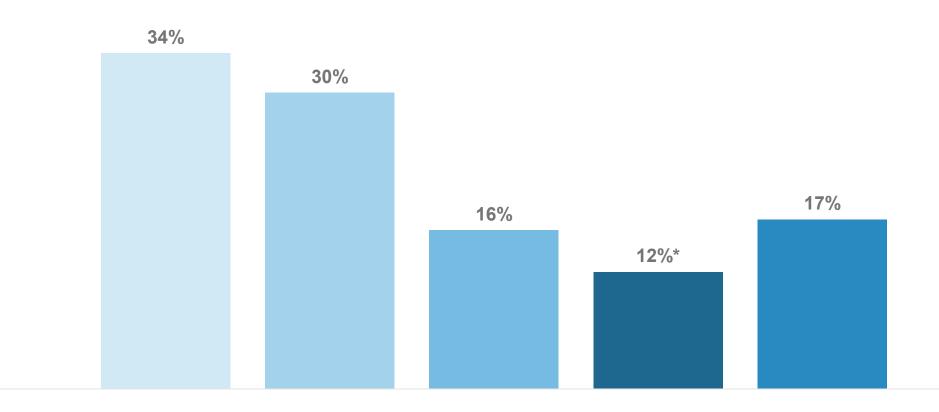

Base: all respondents (excluding 'don't know');

Note: 20% of sample responded "don't know" and have been excluded from this analysis.

### Satisfaction with the Council decision making – tracking

Overall, how satisfied are you with the process by which Council makes decisions?\* **Total satisfied** 

2019 2020 2021 2022 2023

Base: all respondents (excluding 'don't know'). Note: 20% and 16% of the 2023 and 2022 samples respectively responded "don't know" and have been excluded from this analysis \*Prior to 2022 the question was worded as "Overall, how satisfied are you with how Council makes decisions?".

## The Council's decision making

- Respondents were asked how much they agreed or disagreed with various statements about Wellington City Council's decision making process.
- Agreement was highest with the statement "I believe I have the opportunity to participate in city decision-making" where 43% agreed and 33% disagreed.
- There were balanced levels of agreement and disagreement for the statements relating to the Council offering adequate opportunities for residents to have their say in the Council activities and the Council proactively informing residents about the city.
- There was almost twice as much disagreement than agreement with the remaining statements related to respondents understanding how the Council makes decisions and that the Council makes decisions that are in the best interest of the city.
- Agreement was generally higher across all the statements compared to 2022 however, we saw in the 2021 survey that agreement with these statements was generally lower, and in some cases significantly lower, than previous years.

#### **Demographic differences**

• There were no demographic differences for this question.

### The Council's decision making – tracking

Please rate your level of agreement with the following statements...total agree

■2014 ■2015 ■2016 ■2017 ■2018 ■2019 ■2020 ■2021 ■2022 ■2023

### Reasons for dissatisfaction with the Council's decision making

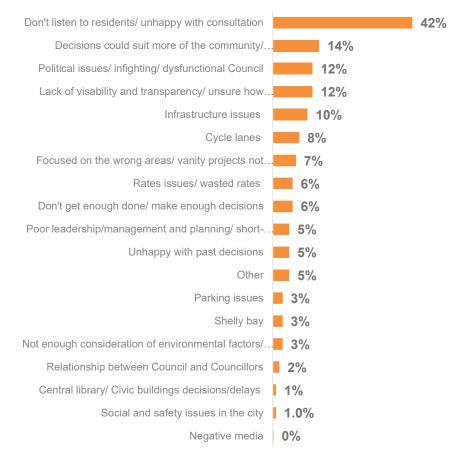

- Around two-fifths (42%) of respondents who were dissatisfied with how council makes decisions said it was because they felt the council does not listen to residents or they were unhappy with consultation processes.
- Similar proportions (12-14%) said decisions could suit more of the community; political issues related to the council like infighting and general dysfunction; and the lack of transparency of decision making or being unsure of how the decision making process worked were the reasons for their dissatisfaction.
- There were a range of other reasons identified by around 10% or less of dissatisfied respondents many of these related to specific decisions or perceived issues facing the city rather than anything related to the process of decision making.

#### **Demographic differences**

• There were no demographic difference for this question.

*Why are you dissatisfied with the process by which Council makes decisions?* 

Base: Respondents who said they were 'quite dissatisfied' or 'very dissatisfied' with how the Council makes decisions (n=298)

### Overall satisfaction with the Council's performance

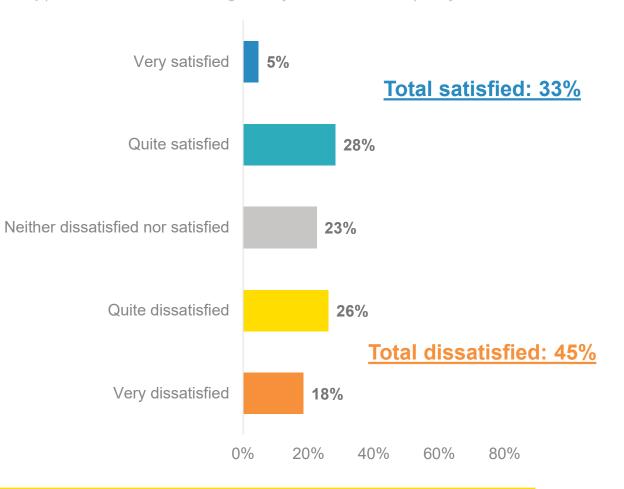

- A new question for 2023 we ask respondents how they perceived the overall . performance of the Wellington City Council over the past year.
- Compared with the earlier satisfaction with decision making question we can see a higher level of satisfaction with performance in general. However there is still a little more dissatisfaction than satisfaction.
- For context, similar ask in residents' surveys for various cities in NZ\* in 2022 • showed levels of satisfaction ranging from 32%-55% and levels of dissatisfaction ranging from 21%-32%.

#### **Demographic differences**

- Respondents from the Eastern Ward were more likely to be dissatisfied with overall performance (53%), as were respondents 60+ (54%), homeowners (49%) and respondents with, or those that support someone with a permanent or temporary disability (53%).
- Respondents from the Lambton Ward were more likely to be satisfied with Council performance (41%), as were respondents under 30 (41%) and renters (41%).

\*Cities included were those with readily available residents' satisfaction reports including Christchurch, Nelson, Dunedin, Tauranga and Napier City Councils.

Overall, how satisfied or dissatisfied have you been with the performance of the Wellington City Council over the past year?

Base: all respondents (excluding 'don't know');

Note: 20% of sample responded "don't know" and have been excluded from this analysis.

## Accessing information from the Council

- Overall, about half of respondents (49%) agreed it was generally easy to access information from Wellington City Council.
- In terms of accessing the Council's information via different channels, the website was seen as the easiest (72% agreed it was easy to access the Council information via the Council website). Followed by libraries and social media (64% and 56% respectively agreed it was easy using these channels). About a third (30%) agreed accessing the Council's information via newspapers was easy.
  - 'Don't know' responses were high, particularly for newspapers, social media, and the Council libraries results show the views of those who did have an opinion, so these 'don't know' responses are excluded from the analysis.
- Agreement that it was easy to access information from Wellington City Council via the various channels asked about was generally higher across the board this year compared to 2022, except for via newspapers. Agreement that it was generally easy to access information from Wellington City Council was still lower than 2021 but is trending slightly upwards.

#### **Demographic differences**

- Younger respondents (under 30s) were more likely than older respondents (over 30s) to agree that the Council information is easy to access via the Council website (84% vs 66%) and social media (69% vs 46%).
- Females were more likely than males to agree that is was easy to access Council information via social media (61% vs 51%).

# Community and Safety

## Neighbour interaction

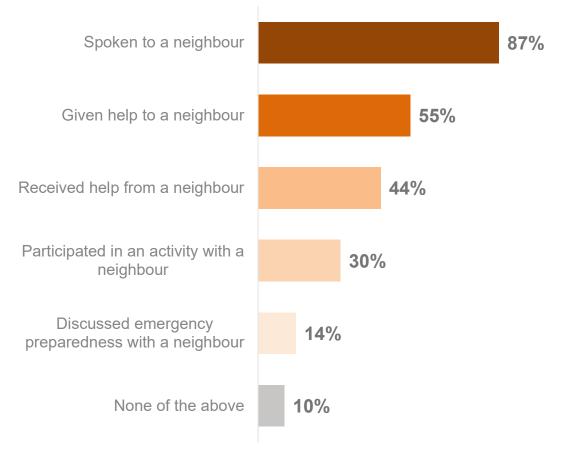

- The large majority of respondents (87%) had at least spoken to a neighbour in the past year.
- Close to half had either given help (55%) or received help (44%) from a neighbour.
- Less common was participating in activities with neighbours (30%) or discussing emergency preparedness (14%)
- The proportion of respondents who said they had received help, given help, or participated in an activity with a neighbour in the past year has slightly increased or stabilised since 2022.

#### **Demographic differences**

- Respondents over 30 and respondents with dependent children were more likely to have interacted with their neighbours in each of these ways.
- Respondents from the Lambton Ward and renters reported lower levels of neighbour interactions

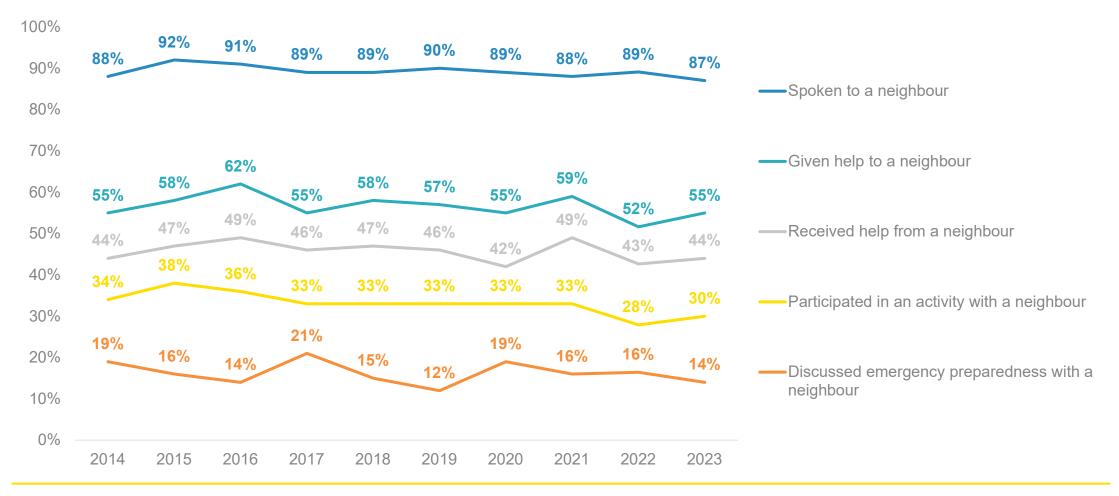

Thinking about interactions with your neighbour(s), have you engaged in any of the following over the last 12 months?

## Neighbour interaction – tracking

9

Thinking about interactions with your neighbour(s), have you engaged in any of the following over the last 12 months?

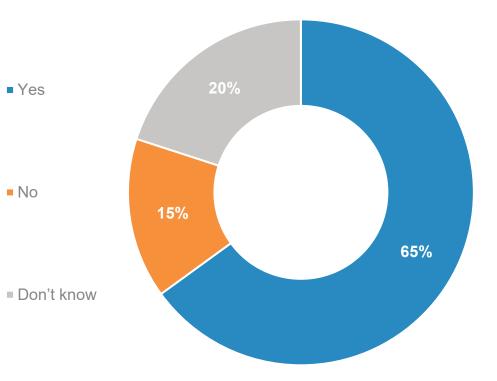

## Relying on a neighbour in an emergency

- Almost two-thirds (65%) of respondents believed they could rely on their neighbours following a natural disaster. While 15% thought they could not and 20% were unsure.
- Results appear relatively stable over the last five years.

#### **Demographic differences**

- Older respondents were more likely to say they could rely on their neighbours in an emergency (43% for under 30s, 65% for 30-44s, 75% for 45-59s and 86% for 60+).
- Respondents with dependent children were more likely to say they could rely on neighbours in an emergency (78% compared to 60% for those without dependents).
- Respondents from the Lambton Ward were less likely to say they could rely on their neighbours after an emergency (53%).
- Renters were less likely to say they could rely on their neighbours after an emergency (36%).

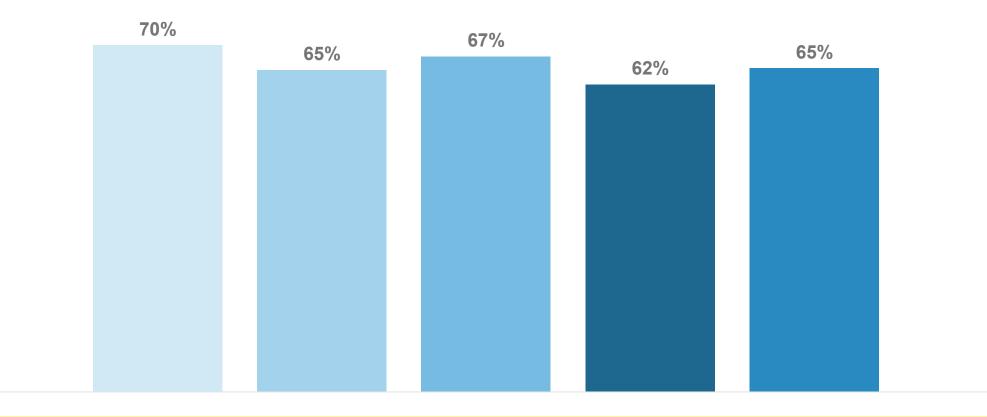

Do you feel you could rely on your neighbour(s) for support following a natural disaster or other significant emergency?

## Safety in Wellington

- Almost all respondents felt safe in their own home after dark (96%) while the vast majority felt safe in the CBD during the day (90%).
- Respondents were asked how safe they felt after dark in their neighbourhood and in the CBD the vast majority felt safe after dark in their neighbourhood (86%), half as many felt safe in the CBD after dark (43%).
  - Females were less likely than males to feel safe in the CBD after dark (39% vs 48%) and their neighbourhoods after dark (82% vs 91%)
  - Respondents who said they had either a permanent or temporary disability were less likely to feel safe in the CBD after dark (27%)
  - Renters were less likely to feel safe in their neighbourhood after dark (77% vs 89% of homeowners)
  - Under 30s were less like than over 30s to feel safe in their neighbourhood after dark (78% vs 89%)
  - Lambton Ward residents were less likely to feel safe in their neighbourhood after dark (77%)
  - Onslow-Western Ward residents were more likely to feel safe in their neighbourhood after dark (93%)
- With the exception of safety at home, safety ratings have trended down since 2019, however the trend is marginal for CBD during the day and neighbourhood after dark. The same cannot be said for perceptions of safety in the CBD after dark which has experienced more significant declines (76% in 2019 compared to 43% in 2023). However, safety ratings appear have stabilised between 2022 and 2023.
- Respondents were asked to identify what makes them feel unsafe in their neighbourhood or the city (from a list of options). The most commonly selected reasons were "threatening people/people behaving dangerously" (62%), "alcohol and drug problems" (53%) and "poorly lit or dark places" (57%)
- Across all the issues asked about the two that have trended up the most over the past three years are "threatening people/people behaving dangerously",
   "alcohol and drug problems". Both have remained relatively steady compared to the 2021 and 2022 surveys, but are up 20% and 13% respectively compared to 2020.

### Reasons for feeling unsafe – trends

*The following list identifies things that can make people feel unsafe in their neighbourhoods or city. Which of the following, if any, do you find particularly concerning in Wellington at present?* 

Base: all respondents; 2020 figures have been recalculated as previously they were calculated excluding 'don't know' responses

## Healthy homes attributes

- About two-thirds of respondents (67%) said their home was never or rarely damp.
- Over half said their home was never or rarely hard to heat (63%). While around half (49%) said their home was never or rarely cold.
- There has been some level of variability in this measure since tracking began, and the timing of the survey which has been in both winter and summer months is likely to have played some role in that. The longer term trend of these measures appears to be flat.

#### **Demographic differences**

- Respondents aged 45 and over were more likely than respondents under 45 to answer 'never' or 'rarely' for all three of these healthy homes attributes.
- Homeowners were more likely to answer 'never' or 'rarely' for all three attributes compared to renters.
- Men were more likely than Women to answer 'never' or 'rarely' for all three of these healthy homes attributes.

# Cultural Wellbeing

?

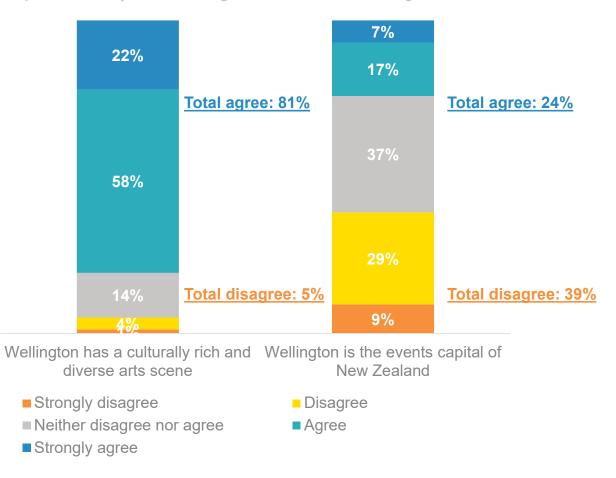

# Arts and culture opportunities in Wellington

- There was strong agreement (81%) with the statement *"Wellington has a culturally rich and diverse arts scene".*
- There was more disagreement than agreement that *"Wellington is the events capital of New Zealand"* with 24% agreeing and 39% disagreeing.
- Agreement that Wellington has a rich and diverse arts scene has seen small but consistent falls in agreement since 2018 while a very high proportion still agree with this statement, agreement is 12% lower compared to 2018.
- Agreement that Wellington is the events capital has dropped compared to last year, and tracking shows that agreement levels are down significantly compared to the mid 2010s where around 50% thought we were the events capital.

### **Demographic differences**

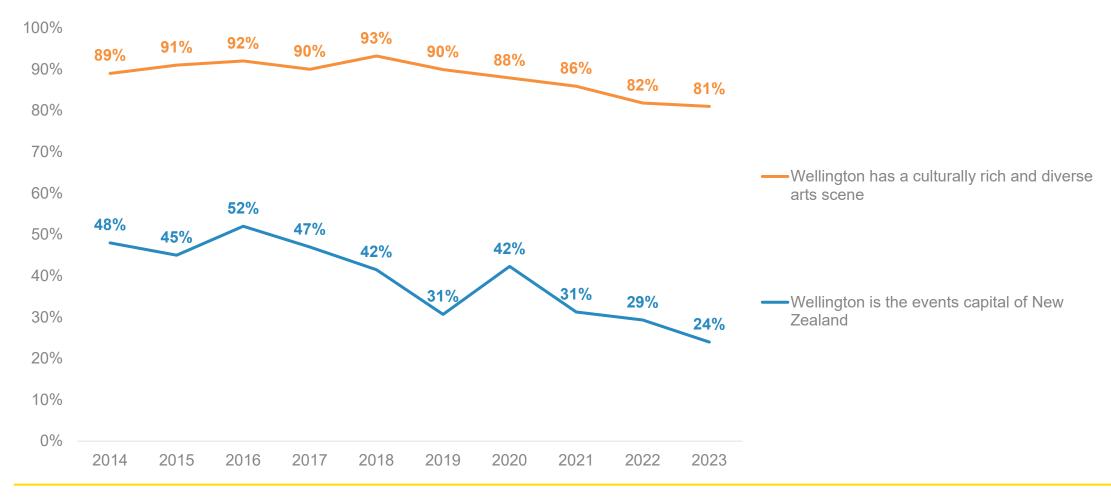

• There were no demographic differences for this question.

Thinking generally about opportunities for arts and culture in Wellington... Please rate your level of agreement with the following statements:

## Arts and culture opportunities in Wellington - tracking

# Participation in cultural or arts activities

- Almost nine in ten respondents (87%) said they participated or engaged with a cultural or arts activity in Wellington at least yearly.
  - The majority of this group said they participated at least once a month (31%) or once every six months (33%).
- Participation has remained relatively steady compared to previous years.

### **Demographic differences**

- Respondents who said they had a permanent or temporary disability were more likely to say they never participated in cultural or arts activities in Wellington (10%).
- The same was true for respondents with household income under \$50k (10% 'never').

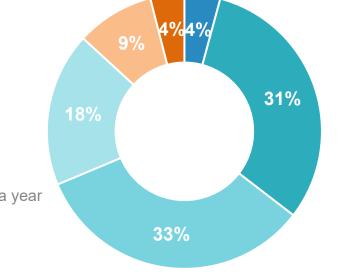

In general, how frequently do you attend, participate or engage with cultural or arts activities in Wellington?

- At least once month
- Once every 6 months

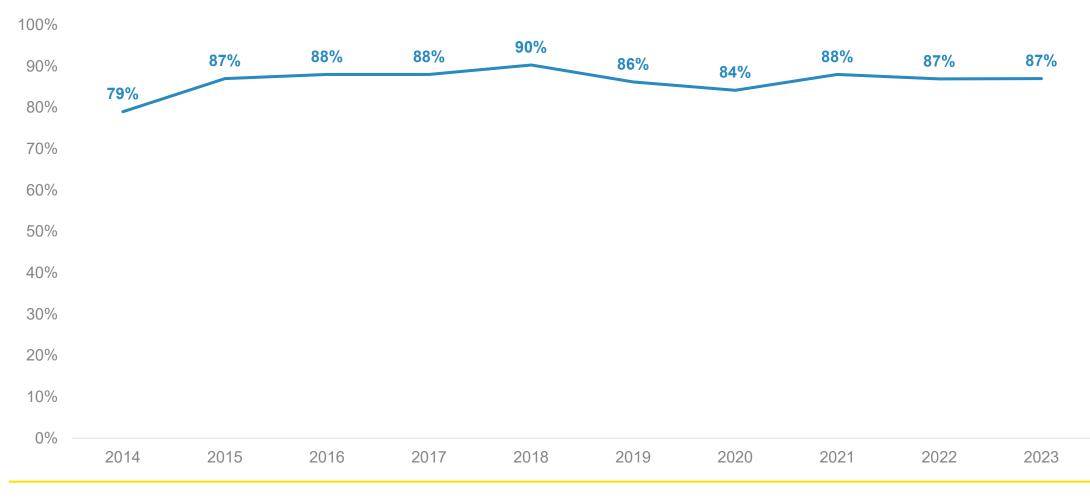

At least once a week

- At least once a year
- Less often than once a year
- Never

## Participation in cultural or arts activities – tracking

# Māori culture in the city

- All four statements relating to Māori culture and te Reo being recognised, visible and the Council taking an active role in revitalising te Reo Māori and Māori culture in the city received a similar level of agreement (around 50-62%).
- Tracking for these statements only goes back to 2022 due to a change in wording but compared to last year, agreement with all four statements has improved.
- As previously seen there were high levels of uncertainty with both statements relating to the work the Council is doing to revitalise Māori culture and te Reo, with 18%-18% answering 'don't know' (and hence being excluded from the analysis) and about a third of the remaining respondents giving a neutral rating on the agreement scale.

### **Demographic differences**

• There were no demographic differences for these questions.

### Wellington museums and galleries awareness and visitation

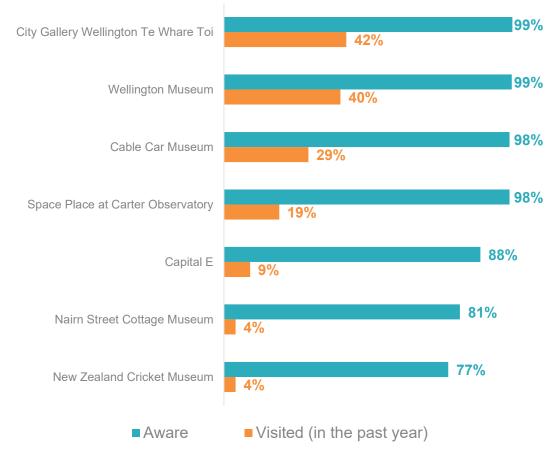

- The vast majority of respondents (90%+) were aware of Wellington Museum, Cable Car Museum, Te Whare Toi, and Carter Observatory
- Awareness of Capital E is slightly lower (88%), while about four fifths were aware of Nairn Street Cottage and New Zealand Cricket Museums.
- Visitation was highest for Wellington Museum and Te Whare Toi (40% and 42% respectively).
- About a third said they had visited Cable Car Museum in the past year and 19% had visited Carters Observatory.
- Visitation is trending upwards for everywhere except Wellington Museum and Te Whare Toi which remain mostly the same.
- Visitation remained mostly consistent with last year's survey, with many trending slightly upwards.

#### **Demographic differences**

- Respondents aged 30-44 were more likely to say they had visited Capital E and Space Place.
- Respondents with dependent children were more likely to say they had visited Capital E and Carter Observatory.
- Respondents from the Northern Ward were less likely to say they has visited Te Whare Toi.

Nairn Street Cottage Museum and New Zealand Cricket Museum not included as sample size low over past few years.

# Recreation

# Sport and recreation facilities usage

- Kilbirnie Recreation Centre and Ākau Tangi were the most used facilities (19% ٠ and 14% of respondents had used each one respectively).
- Usage was largely unchanged across all the facilities over the last couple years. •
- Around two-thirds (65%) had not used any of the facilities listed.

### **Demographic differences**

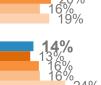

- Usage mostly differed by Ward as you would expect:
  - Eastern Ward respondents were more likely to use the Kilbirnie Recreation Centre (35%) and Ākau Tangi (24%).
  - Northern Ward respondents were more likely to use the Tawa and . Nairnville Recreation Centre (13% and 10% respectively).
  - Onslow-Western Ward respondents were more likely to use Karori and . Nairnville Recreation Centres (15% for each).
  - Southern Ward respondents were more likely to use Kilbirnie Recreation • Centre (30%).
  - Lambton Ward respondents were more likely to have used none of these . facilities (78%).
  - Respondents aged 30-44 were higher users across multiple centres (and therefore less likely to select "none of these").
  - Respondents with dependent children were more likely to have use each . facility.

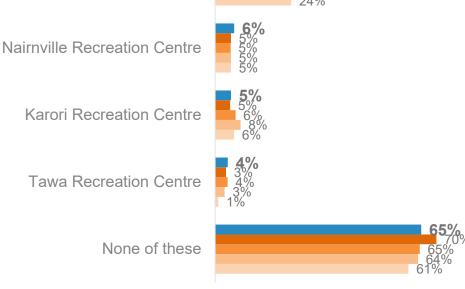

Over the past 12 months, have you used any of the following Wellington City Council recreation facilities?

**Kilbirnie Recreation Centre** 

Ākau Tangi (previously ASB Sports Centre)

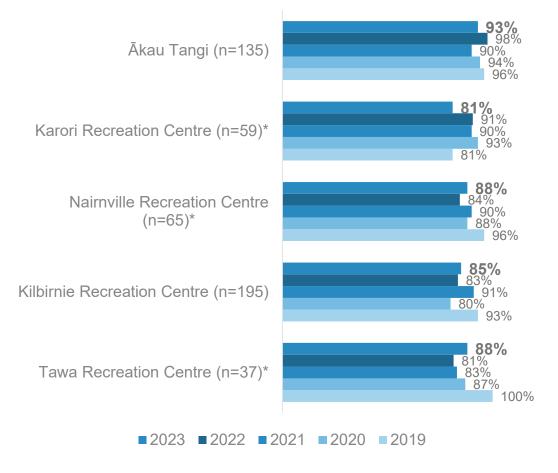

■ 2023 ■ 2022 ■ 2021 ■ 2020 ■ 2019

# Sport and recreation facilities satisfaction

- Respondents who had used each facility were asked to rate their level of satisfaction with them.
- Satisfaction was consistently high across all the facilities. •
- It is difficult to determine any up or downward trends, or demographic differences, given the expected variation in results with low sample sizes (as low as n=37 for Tawa and n=195 for Kilbirnie).

Have you used any of the following Wellington City Council recreation facilities? **Total satisfied** 

# Wellington City Council pool usage

- Wellington Regional Aquatic Centre was the most used pool by respondents in the past year (23%).
- Freyberg and Keith Spry had similar levels of usage, While Karori, Thorndon, Khandallah and Tawa recorded slightly lower levels of usage.
- Over half (56%) had not used any of the WCC pools listed.
- Usage was largely unchanged compared to previous years.

### **Demographic differences**

- Usage mostly differed by Ward as you would expect:
  - Eastern Ward respondents were more likely to use Wellington Regional Aquatic Centre (49%).
  - Lambton Ward respondents were more likely to use Freyberg (20%).
  - Northern Ward respondents were more likely to use Tawa (17%) or Keith Spry (28%).
  - Onslow-Western Ward respondents were more likely to use Karori (23%), Khandallah (12%) or Thorndon (12%)
  - Southern Ward respondents were more likely to use Wellington Regional Aquatic Centre (38%)
- Respondents aged 30-44 were generally higher users across a number of facilities and hence less likely to answer "none of these" (44%).
- Respondents with dependent children were more likely to use all of the pools listed except for Freyberg.

Over the past 12 months, have you used any of the following Wellington City Council pools?

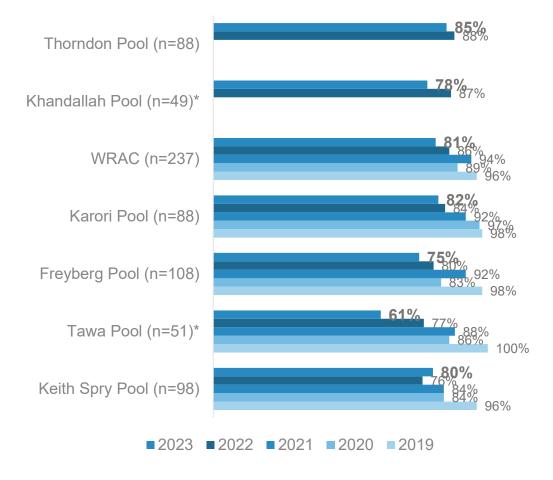

### **23%** Wellington Regional Aquatic Centre, Kilbirnie **Freyberg Pool** Keith Spry Pool **8%**1% Thorndon Pool Karori Poo Khandallah Poo Tawa Poo 56% None of these 58% ■ 2023 ■ 2022 ■ 2021 ■ 2020 ■ 2019

# Wellington City Council pool satisfaction

- Respondents who had used each pool were asked to rate their level of satisfaction with them.
- Satisfaction was consistently high across all the facilities (three-quarters or ٠ more satisfied with each) except Tawa Pool, where satisfaction has dropped to 61%.
- It is difficult to determine any up or downward trends due to small sample sizes, • however satisfaction scores with Tawa Pool in particular appear to have fallen at least to some degree compared to 2021 and earlier.

Please rate your level of satisfaction with the Council pools that you have used in the past 12 months: **Total satisfied** 

# Wellington City Council pool affordability

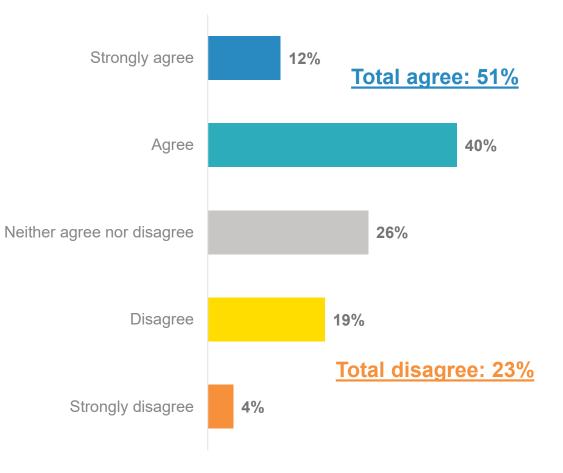

- About half of respondents (51%) agreed that pool admission charges were affordable.
- About one in five disagreed and 26% were neutral.
- This result is steady compared to the last couple surveys, but is a little lower than when the question was first asked in 2019.

### **Demographic differences**

• Respondents with dependent children were more likely to agree that pool admission charges were affordable.

To what extent do you agree or disagree that Wellington City Council pool admission charges are affordable?

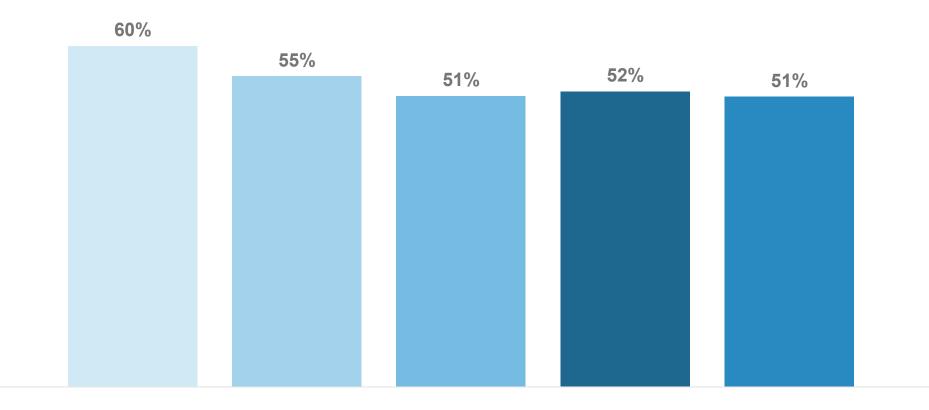

Base: all respondents (excluding 'don't know'); \*high proportion of don't know responses (38%) which are excluded from analysis

## Wellington City Council pool affordability – tracking

**?** To what extent do you agree or disagree that Wellington City Council pool admission charges are affordable? Total agree

2019 2020 2021 2022 2023

Base: all respondents (excluding 'don't know'); \*high proportion of don't know responses (36% in 2022) which are excluded from analysis

# Wellington City Council sportsground usage

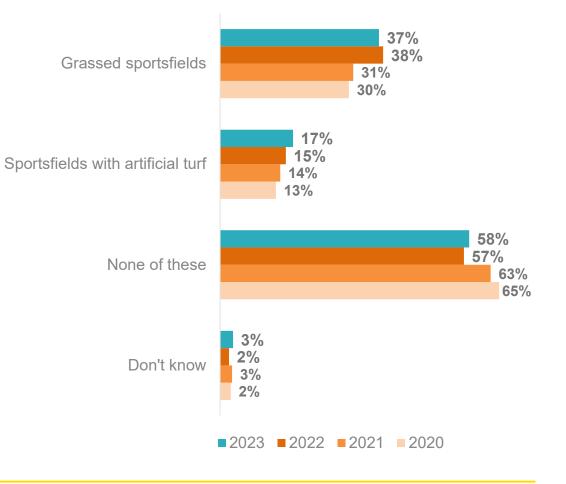

- More than a third of respondents (37%) had used grassed sportsground in the past year, half as many had used artificial turf sportsgrounds (17%).
- Usage of artificial turf sportsfields appears to be trending up slowly, usage of grassed sportsfields remained steady.

### **Demographic differences**

- Respondents from Onslow-western Ward were more likely to have used a grassed sportsfield (48%), while Lambton Ward respondents were more likely to have not used either type of sportsfield (70%).
- Respondents with dependent children were more likely to have used both types
   of sportsfields
- Males were also more likely to have used both types of sportsfields.

Have you used any Wellington City Council sportsground in the past 12 months?

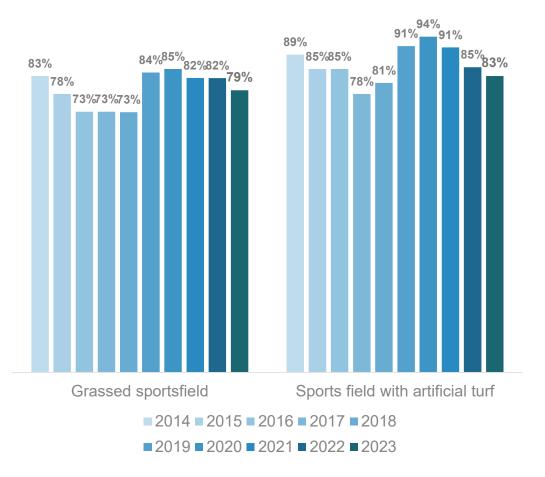

# Wellington City Council sportsground satisfaction

- Satisfaction was high with users of both types of sportsgrounds.
- Satisfaction with sportsfields has remained mostly steady. Given the smaller sample size for satisfaction with artificial turf sportsfields we expect to see more variability in results.

### **Demographic differences**

• There were no demographic differences for this question.

How satisfied were you with the sportsfield(s) that you used: total satisfied

# Wellington City Council community facilities usage

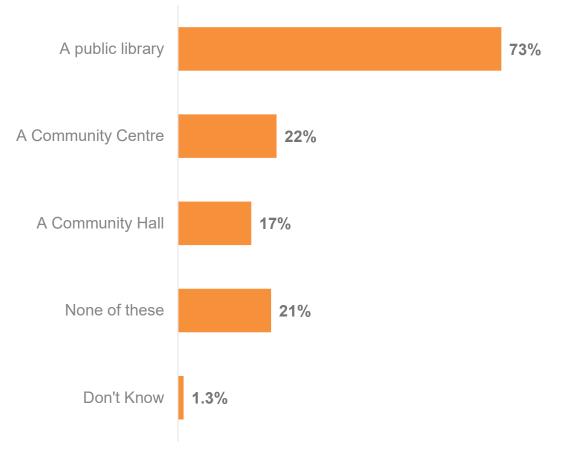

- Libraries were by far the most used with 73% of respondents saying they had • used one in the past year.
- Public library usage has remained steady over the past few years. •
- Both community hall and community centre usage were tracking slowly up until • the 2021 survey, but have dropped down a little over the last two years.

### **Demographic differences**

- Respondents with dependent children were more likely to say they have used a public library (82%) and community centre (31%).
- Females were more likely to say they had used a community centre (27%).
- Respondents who said they support someone with a permanent or temporary ٠ disability were more likely to say they had used a community centre (39%).

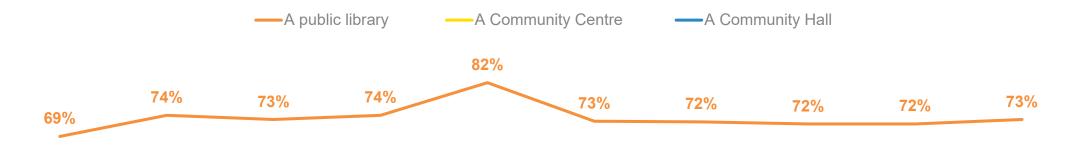

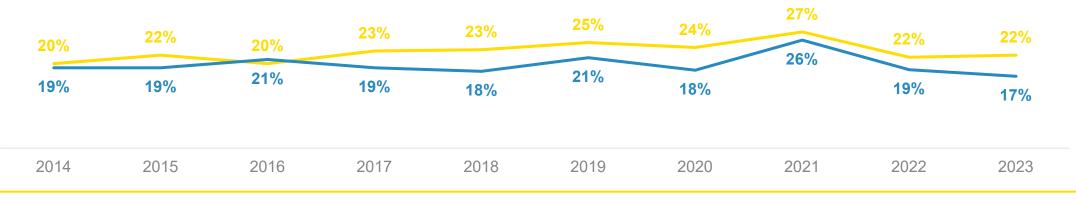

Have you used or physically visited any of the following Wellington City Council community facilities in the past 12 months?

## Wellington City Council community facilities usage - tracking

Have you used or physically visited any of the following Wellington City Council community facilities in the past 12 months?

# Community facilities experience

- Satisfaction was consistently high across the community facilities with around 80% satisfied and 5% or less dissatisfied with their experience at each facility.
- Satisfaction is slightly up for all facilities compared to 2022, when this question was first asked.

### **Demographic differences**

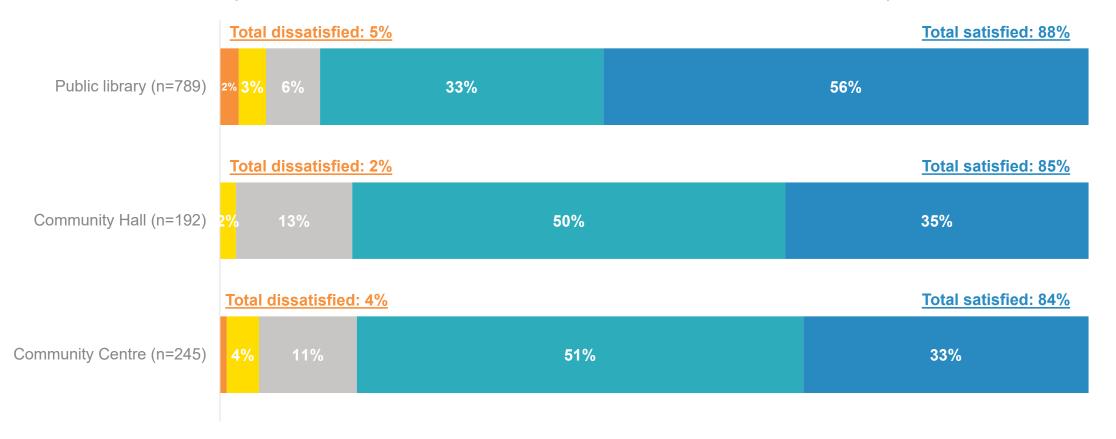

• There were no demographic differences for this question.

# Community facilities experience

 $\mathbf{O}$ 

How satisfied were you with the Wellington City Council community facilities that you visited/used?

■ Very dissatisfied ■ Quite dissatisfied ■ Neither dissatisfied nor satisfied ■ Quite satisfied ■ Very satisfied

2023

## Community facilities experience – tracking

How satisfied were you with the Wellington City Council community facilities that you visited/used? (Total satisfied)

2022

# Library usage frequency (among library users)

- Among respondents who had visited the library at all in the past year, almost ۰ one in five said they did so at least weekly on average.
- More than half of library users said they visited monthly or more on average ٠ (59%) - this visitation frequency has remained steady since 2020.

### **Demographic differences**

Library user respondents with dependent children were more likely to visit the library at least monthly (72%).

?

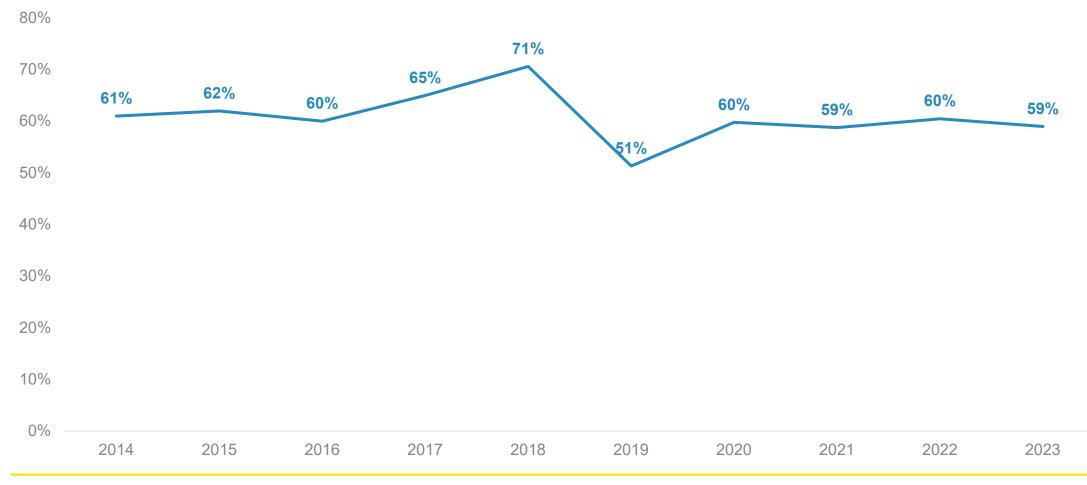

On average, how often would you use or visit a Wellington City Council library?

Base: Respondents who had used a public library in the past 12 months (n=790)

## Library usage frequency (among library users) – tracking

Base: Respondents who had used a public library in the past 12 months (n=793)

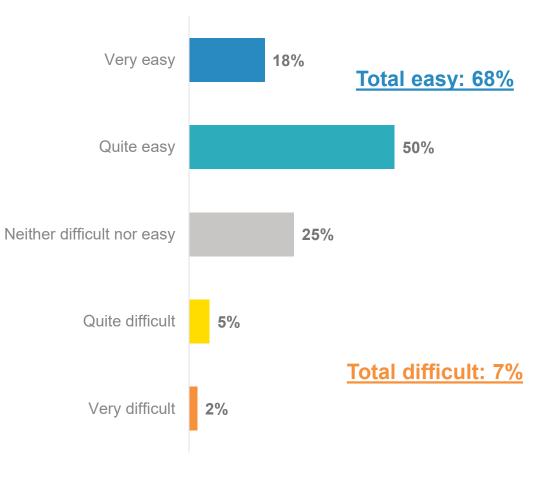

## Access to Wellington City Council facilities and programmes

- About two-thirds (68%) of respondents felt that Wellington City Council's • recreational facilities and programmes were generally easy to access.
- Less than one in ten found them difficult to access. ٠
- Results for this question have remained relatively flat since tracking began, ٠ however results post 2018 have tended to be higher than results prior.

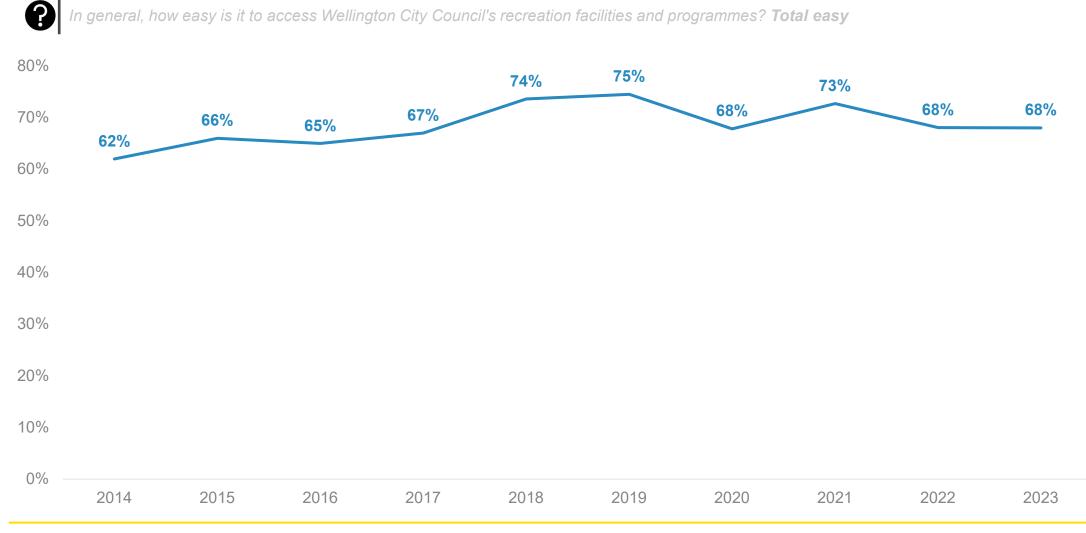

### **Demographic differences**

Respondents who did not have or support anyone with a permanent or temporary disability were more likely to say that WCC's recreational facilities and programmes were easy to access (73% vs 55% for those that have a disability and 64% for those that support someone with a disability).

*In general, how easy is it to access Wellington City Council's recreation facilities and programmes?* 

## Access to Wellington City Council facilities and programmes – tracking

Base: all respondents (excluding 'don't know'); high proportion of don't know responses (24% in 2023) which are excluded from analysis

## Wide range of recreational facilities

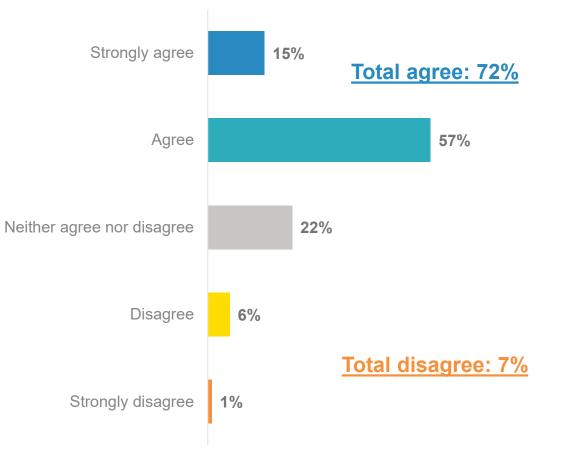

- Almost three quarters (72%) of respondents agreed that Wellington offers a ٠ wide range of recreational activities.
- About one in ten disagreed with this statement. •
- Agreement with this statement has trended down over the last few years with ٠ 85% agreeing in 2017. However, there has been no real change since 2021.

### **Demographic differences**

There were no demographic difference for this question.

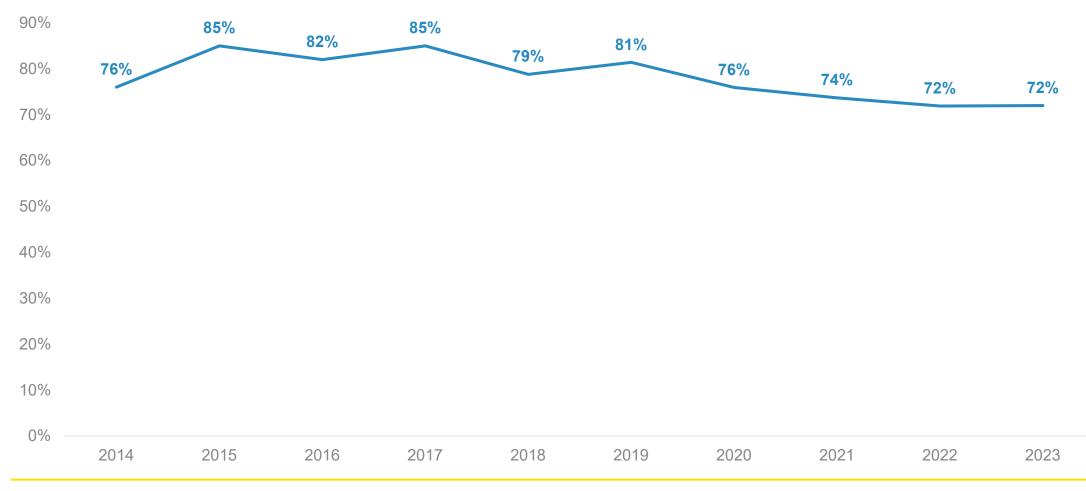

In general, to what extent do you agree or disagree that Wellington offers a wide range of recreational activities?

## Wide range of recreational activities – tracking

In general, to what extent do you agree or disagree that Wellington offers a wide range of recreational activities? **Total agree** 

Base: all respondents (excluding 'don't know')

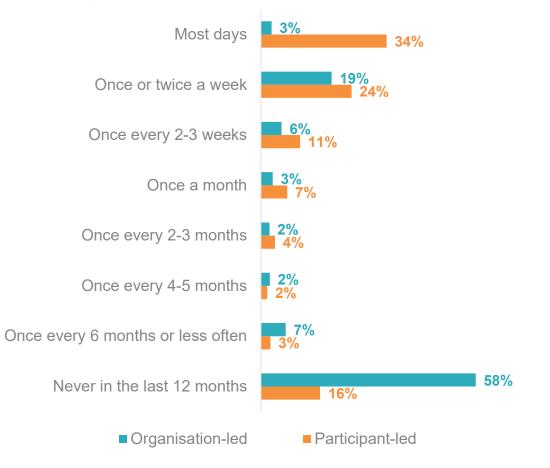

## Participation in sport and recreation

- Respondents were generally more likely to have participated in participant-led sport or recreation in the past year than organisation-led (84% had participated at some point during the past year compared to 42% for organisation-led sport).
- Once or twice a week was the most common participation frequency for organisation-led sport and recreation (19%) while participant led sport or recreation was most commonly practiced nearly every day (34%).
- Organisation-led sport and recreation was much less likely to be a daily occurrence compared to participant-led.
- Participation in organisation-led sport and recreation remained steady compared to previous years, while participant-led sport and recreation is up to 84% (compared to 69% in 2022).\*

#### **Demographic differences**

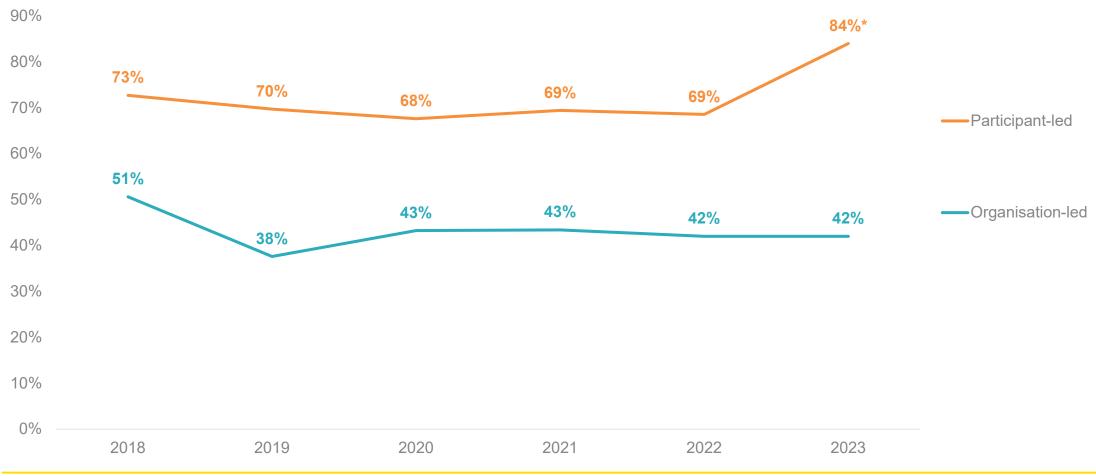

- Respondents with dependent children were more likely to say they participated in organisation-led sport at least monthly (40%)
- Renters were less likely than homeowners to say they participated in organisation-led sport at least monthly (20% vs 35%)
- Respondents with higher household incomes (\$100k+) were more likely to say they taken part in participant-led sport at least monthly (80%).

\* The structure of the question was changed in 2023 to make it more simplified (remove a lot of unnecessary introduction text before the question). The description of "participant-led" remained the same as previously, but it was potentially made clearer to respondents by removing this unnecessary introduction text. This may or may not be playing a role in the increase seen here. Using the definitions outlined above; on average how often have you participated in organised or informal sport and active recreation in the past 12 months?

### Participation in sport and recreation – tracking

Using the definitions outlined above; on average how often have you participated in organised or informal sport and active recreation in the past 12 months? **Participated in the past 12 months** 6

Base: all respondents

\* The structure of the question was changed in 2023 to make it more simplified (remove a lot of unnecessary introduction text before the question). The description of "participant-led" remained the same as previously, but it was potentially made clearer to respondents by removing this unnecessary introduction text. This may or may not be playing a role in the increase seen here.

### Barriers to participation in organisation-led sport and recreation ?

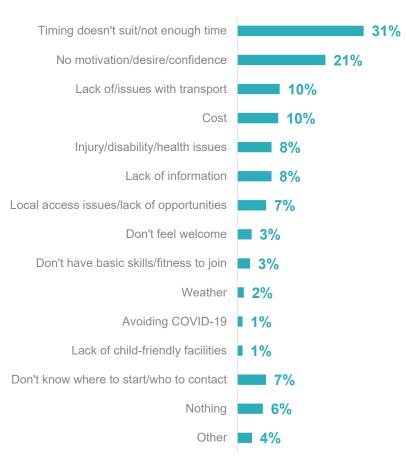

- Timing and no motivation/desire/confidence were the main barriers people face to participating in sport and recreation, with over half (52%) saving one of these was the main barrier for them.
- Other barriers were identified by 10% or less of respondents. ٠

#### **Demographic differences**

- Respondents with dependent children were more likely to say that they did not have enough time (45%).
- Respondents with a permanent or temporary disability were more likely to identify this as a barrier (35%).
- Respondents under 30 were more likely to say they lack of information was a barrier (22%).

What if anything, makes it difficult for you to participate in organisation-led sport and recreation?

Base: Optional question, n=401, multiple choice question, percentages add to more than 100%

participating in participant-led sports and recreation.

### Barriers to participation in participant-led sport and recreation

# Environment

## Green space usage

- Local parks and reserves and the waterfront were the most used green/ open spaces by our respondents around eight in ten said they used these spaces at least monthly.
- Beaches and coastal areas, green spaces/parks in the central city, walkways and trails, forested areas, and the outer green belt were also all regularly used by our respondents (71%, 70%, 56% and 56% respectively used the spaces at least monthly).
- Some of the least used spaces (by between a quarter and a third of respondents) were botanic gardens, playgrounds and streams.
- Skate parks were the least used at least monthly (5%).
- We saw the monthly usage of all spaces trending up in our tracking, particularly between 2018 and 2021, and continuing this year after a levelling off in 2022. The exceptions being walkways and trails which declined, and forested areas and the outer green belt which continues to trend flat.

#### **Demographic differences**

- There was a large amount of variation between monthly usage across respondents from different wards, ages and family makeup. Full details of these have been highlighted on a following slide.
- In general younger respondents (aged 18-44) were higher monthly users as were respondents with dependent children.
- Across the wards, Northern Ward respondents were lower uses of almost all spaces with the exception of playgrounds and streams.

### Green space satisfaction – tracking

Overall, how satisfied are you with the quality and maintenance of these green and/or open spaces? Total satisfaction

Base: respondents who had used each space in the past 12 months (excluding 'don't know'); \*high proportion of don't know responses (above 10%) which are excluded from analysis

## Forest, greenbelt, walkways and trails usage

6

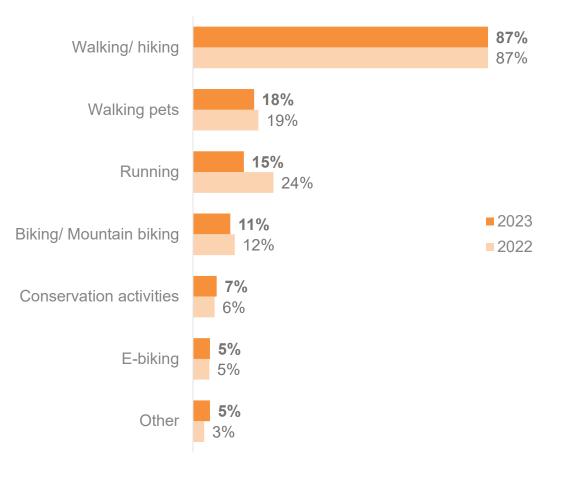

- By far the most common ways respondents had used forest areas, greenbelt, walkways and trails was for walking and hiking (87%).
- 15% had used these spaces for running and a fifth had used them for dog walking.
- Other uses such as mountain biking and conservation activities were less common.
- Usage of these areas was unchanged compared to 2022, with the exception of running which appears lower than the previous survey.

#### **Demographic differences**

- Younger respondents (aged 18-44) were more likely than older respondents (aged 45+) to use these spaces for walking/hiking (91% vs 82%) or running (20% vs 9%).
- Males were more likely than females to use these spaces for biking/ mountain biking (16% vs 6%).
- Respondents with dependent children were more likely to use these spaces for walking pets or biking/mountain biking (26% and 18%).
- Respondents from the Southern Ward were more likely to have used these spaces for conservation activities (15%).

In which of the following ways have you used Wellington's forested areas, outer green belt and/or walkways and trails in the past 12 months?

Transport

## Ease of accessing green and/or open spaces

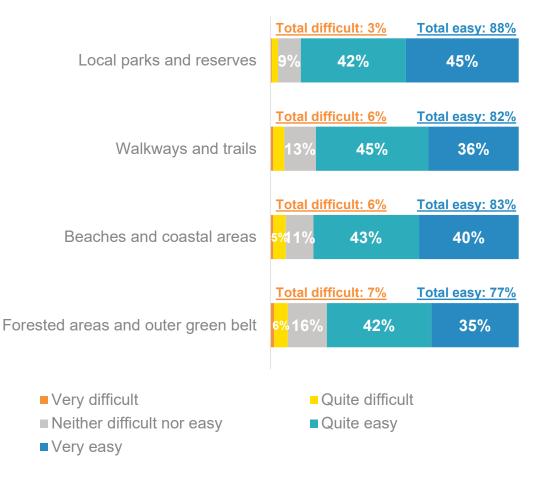

- More than three-quarters of respondents agreed that all of the green and/or open spaces asked about were easy to access.
- Ease of access ratings have remained steady compared to last year.

#### **Demographic differences**

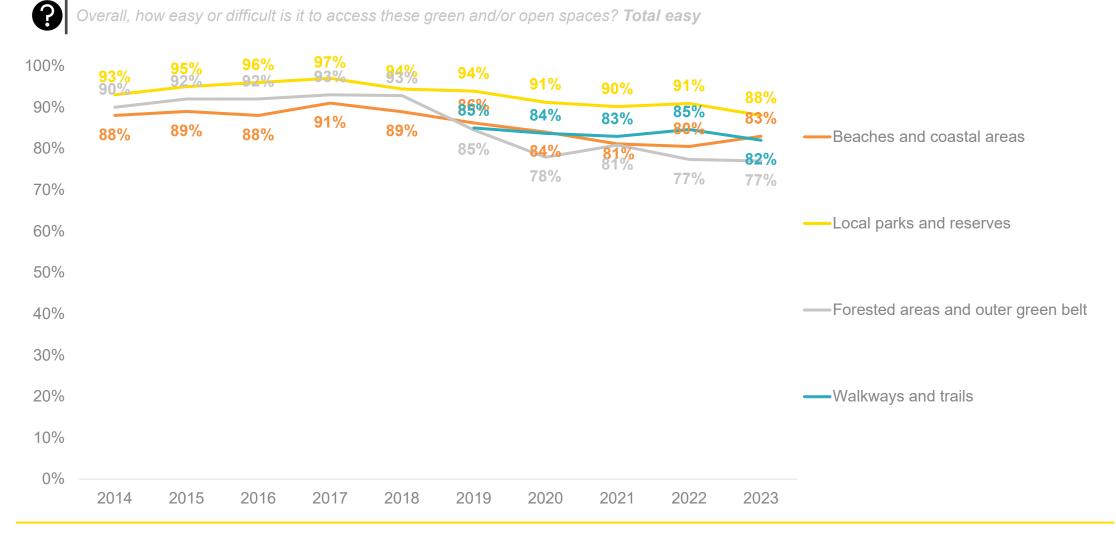

• Respondents with a permanent or temporary disability were less likely to say they each of the green and/or open spaces were easy to access (between 57% and 70% for each).

Overall, how easy or difficult is it to access these green and/or open spaces?

### Ease of accessing green and/or open spaces – tracking

## Wellington's connection to the environment

- Almost all respondents agreed that Wellington's connection with nature ٠ improves quality of life (93%).
- There was less, but still majority, agreement that our natural environment is ٠ appropriately managed and protected (61%)
- A quarter (25%) agreed that Wellington is an eco-city. •
- We saw agreement that our natural environment was appropriately managed and that Wellington is an eco city fall between 2020 and 2021 - agreement with the former has trended down since while the latter has trended up.

#### **Demographic differences**

There were no demographic differences for this question.

# **Urban Development**

## Urban development activities

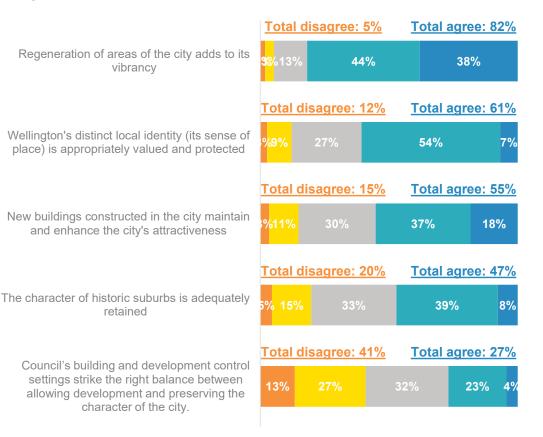

- Respondents were asked how much they agree or disagree with a range of statements relating to Wellington City Council's wide portfolio of urban development activities and potential impacts of that development.
- There was the highest level of agreement with the statements that regeneration of areas of the city adds to its vibrancy (82% agreed).
- Agreement with two of these statements have trended down over the past four surveys (since 2019)
  - Agreement that our local identity is appropriately valued and protected has fallen from 80% in 2019, but remained steady over 2022/23
  - While agreement that character of historic suburbs is adequately retained has fallen from 63% in 2019.
- 2021 results showed a significant decline in agreement that Council is striking the right balance between allowing development and preserving the character of the city (from 48% agreement in 2019 to 21% in 2021) agreement with this statement has improved slightly in the last two years, reaching 27% this year.

#### **Demographic differences**

• Respondents aged 18-44 and respondents from the Lambton Ward were more likely to agree that new buildings constructed in the city maintain or enhance the city's attractiveness (64% and 66% respectively).

## Heritage in Wellington

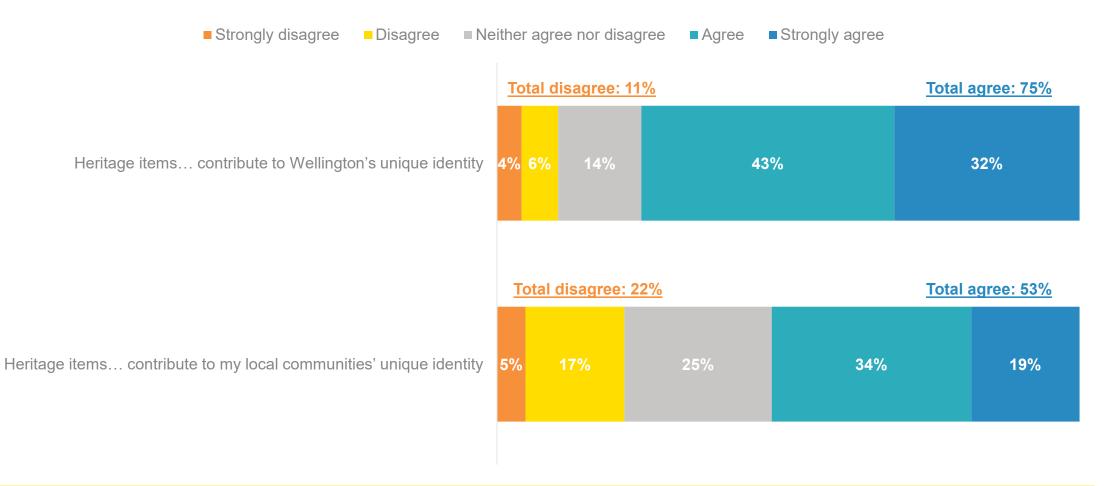

- Respondents were asked how much they agreed or disagreed with statements about how heritage items contribute to Wellington's unique character.
- Three-quarters (75%) agree that "Heritage items contribute to Wellington's unique identity" (75% agreed only 11% disagreed), while more than half agreed that "Heritage items contribute to my local communities' unique identity" (53% agreed, 22% disagreed).
- While the majority do still agree with both of these statements we have seen a steady decline in the level of agreement since 2019 with 17%-23% less agreement in 2023 compared to 2019.
- We also asked respondents how they viewed the level of value and protection given to heritage items in Wellington and in their local communities, opinion was split similarly on both counts. The largest proportion of respondents believed that heritage items were given the right amount of value and protection (40% for Wellington items and 38% for local community items).

#### **Demographic differences**

- Females were more likely than males to say that heritage items contribute to Wellington's and their local community's unique identity (82% vs 68% and 62% vs 44%, respectively).
- Respondents from the Norther Ward were less likely to say that heritage items contribute to their local communities unique identity (42%).

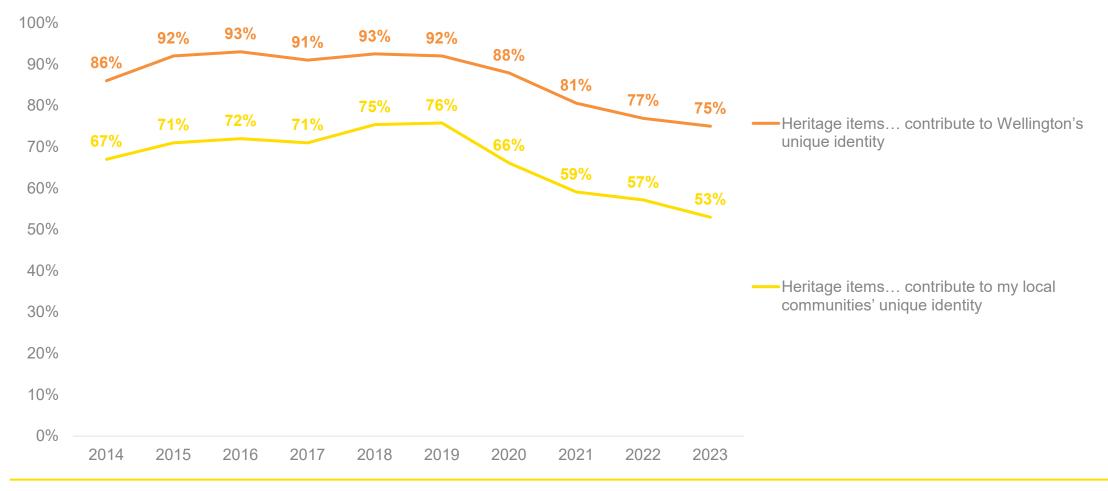

## Contribution of heritage items in Wellington

Council protects and manages Wellington's significant heritage items, including buildings, infrastructure, monuments, and sites of significance, statues and other landmarks, to leave a lasting legacy for generations to enjoy. Please rate your level of agreement with the following statements:

# **Civil Preparedness**

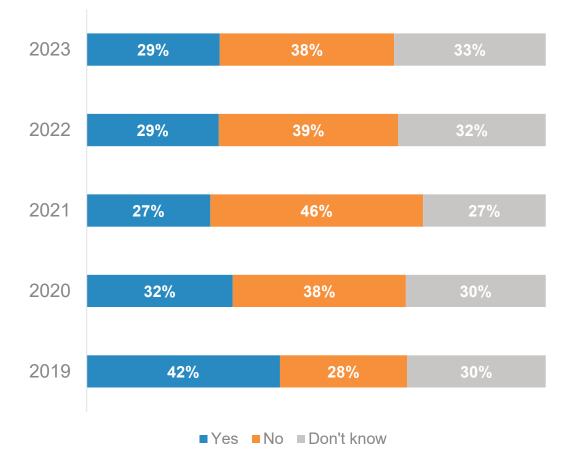

### Wellington City Council progress on building resilience issues 6

- Almost a third (29%) believe that Wellington City Council is making adequate • progress on addressing building resilience-related issues in the city, while over a third (38%) did not think that was the case.
- Belief that we are making adequate progress on these issue is still significantly ٠ lower than it was back in 2019.

#### **Demographic differences**

There were no demographic differences for this question.

Do you believe that Wellington City Council is making adequate progress on addressing building resilience-related issues in the city?

6

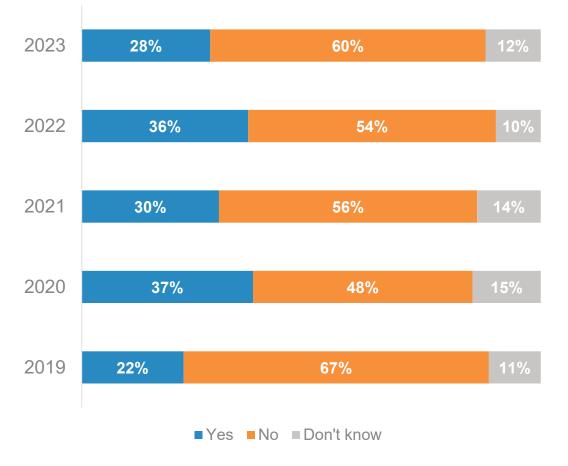

## **Resilience information received**

- Over a quarter (28%) recalled receiving some Wellington-specific resilience information in the past 12 months.
- This measure continues to show a lot of variability but that could well be inline with the amount of information on this topic that has been distributed in the year prior to each survey being run.

#### **Demographic differences**

• There were no demographic differences for this question.

Do you recall receiving Wellington-specific resilience information in the past 12 months? (E.g. earthquake preparedness information via digital, media or community channels).

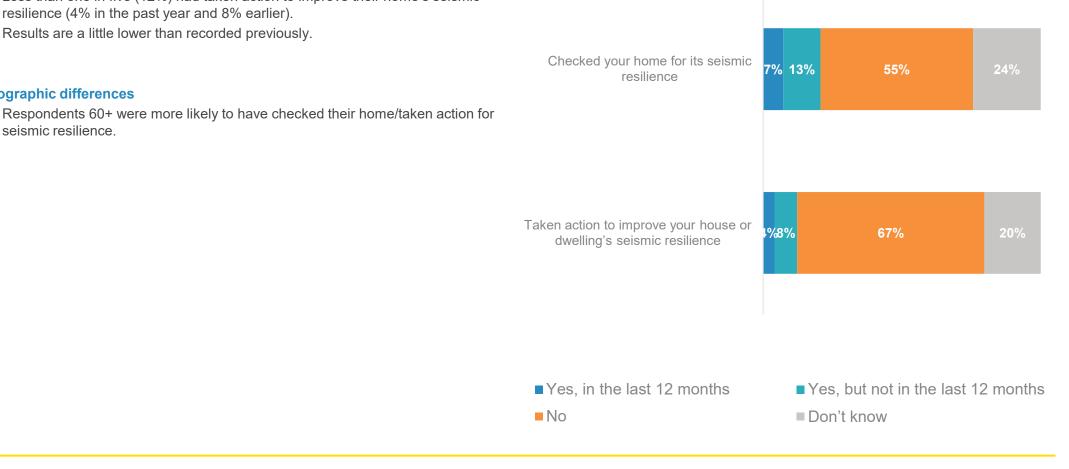

### Checking and taking action on seismic resilience

- Around a fifth of respondents (20%) said they or their landlord had checked their ٠ home for seismic resilience (7% in the last year, 13% earlier).
- Less than one in five (12%) had taken action to improve their home's seismic ٠ resilience (4% in the past year and 8% earlier).
- Results are a little lower than recorded previously. ٠

### ?

Thinking about your current home, have you (or your landlord) ever?

## **Emergency item access**

- Three-quarters of respondents said they had access to emergency items in their ٠ home or their workplace (where applicable).
- Less than half (43%) of those who had a place of education said they had ٠ access to emergency items there.
- About a third (33%) had access to emergency items in the motor vehicle they ٠ used more often.
- Results from this question have remained relatively steady compared to • previous surveys.

#### **Demographic differences**

- Older respondents were more likely to say they have emergency item access in . their home (65% of under 30s, 82% of 30-59s and 93% of 60+).
- Respondents aged 60+ were more likely to say they have access to emergency ٠ items in their motor vehicle (50%).
- Respondents from the Lambton Ward were less likely to say they have ٠ emergency item access in their home (64%) while those from the Onslow-Western Ward were more likely (92%).

## Safety in an earthquake

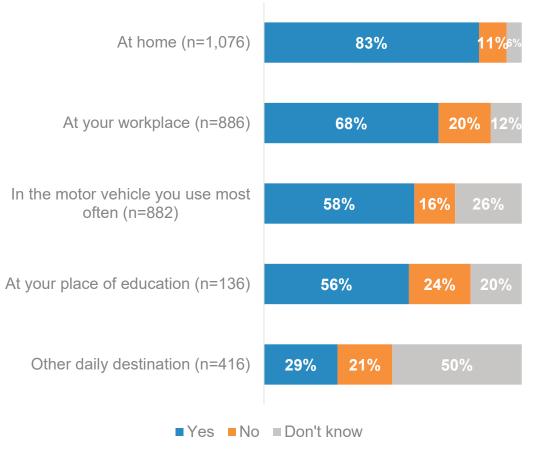

- The large majority of respondents (83%) said they would feel physically safe at home in the event of a moderate earthquake.
- Between a half and two-thirds (56-68%) said they would feel safe at their workplace, motor vehicle and place of education (where applicable) in a moderate earthquake.
- Results for this question have remained steady over the last few surveys.
  - Note: The results recorded for safety at place of education are lower than 2022, but given the much smaller sample size for this location (n=136) a higher level of variation in results is expected.

#### **Demographic differences**

- Older respondents were more likely to feel safe in their home in the event of a moderate earthquake (74% of under 30s, 84% of 30-59s and 94% of 60+).
- Homeowners were more likely to feel safe in their home in the event of a moderate earthquake compared to renters (90% vs 68%).
- Respondents from the Onslow-Western Ward were more likely to feel safe in their home in the event of a moderate earthquake (90%).
- Respondents from the Lambton Ward were less likely to feel safe in their home in the event of a moderate earthquake (76%).
- Males were more likely than females to feel safe in every location except at the place of education in the event of a moderate earthquake.

# Transport

## Getting around the city

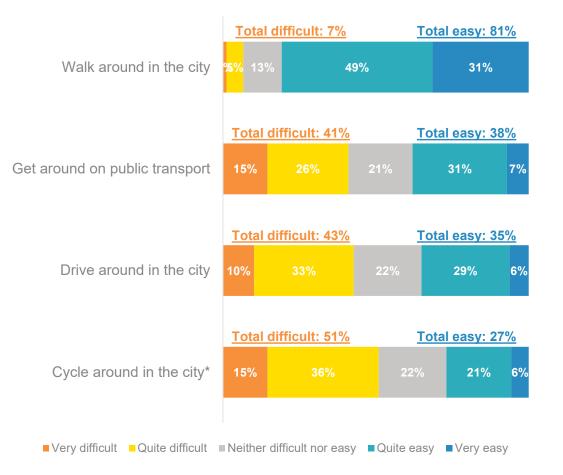

- Walking around the city was viewed as considerably easier than the other forms of transport asked about with 81% of respondents stating that walking around the city was easy.
- Around a third (38%) found public transport easy to get around the city on.
- About a third (35%) found driving around the city easy while about a quarter (27%) said cycling around the city was easy.
- Views on the ease of cycling around the city have increased 10% compared to 2022, this was after a steady downward trend in the measure since 2017.
- While the vast majority still believe walking around the city was easy, this rating has fallen from a high in 2019 where 93% said it was easy to walk around the city.
- Views on the ease of driving around the city remained steady compared to 2022 with an overall flat trend back to 2019. However, this measure has declined from a high of 51% back when tracking began in 2014.
- Views on the ease of getting around on public transport have fallen significantly compared to 2022 (down from 53% to 38%). Perceptions are now similar to the levels recorded in 2019 which was around the time of the major public transport overhaul.

#### **Demographic differences**

• Respondents 60+ were more likely to say that getting around the city on public transport was easy (55%)

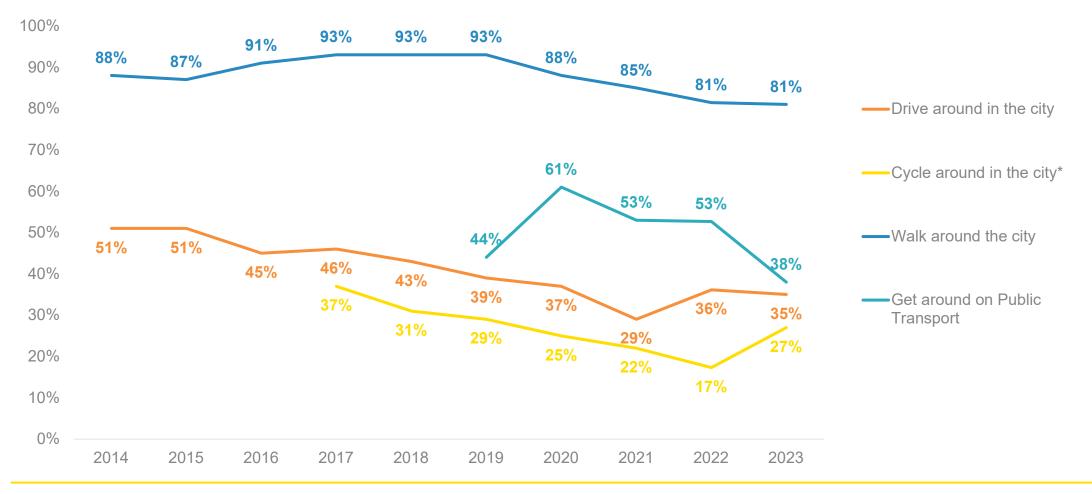

Thinking about the city's transport system and moving around the city. How easy is it to...?

### Getting around the city – tracking

## Footpath and cycleway satisfaction

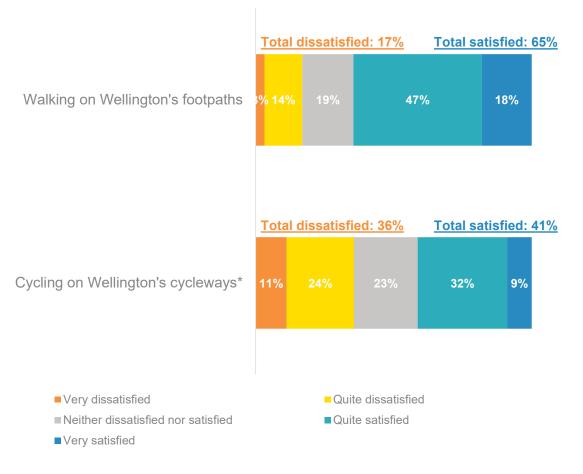

- About two-thirds of respondents (65%) were satisfied with walking on Wellington's footpaths.
- There was more satisfaction than dissatisfaction amongst respondents for cycling on Wellington's cycleways (36% dissatisfied, 41% satisfied).
  - This analysis excluded 55% of respondents who could not give an opinion of cycling on Wellington's cycleways.
- Satisfaction with walking on Wellington's footpaths has remained steady compared to 2022, however there does appear to be a downward trend in satisfaction going back to 2019 this would be consistent with an earlier result that shown a downward trend in the perceived ease of walking around the city.
- Satisfaction with cycling on Wellington's cycleways is a little higher than 2022, which would be consistent with the result seen in the perceived ease of cycling around the city.

## Main mode of transport for commuting

- Among respondents who travel into central Wellington on most weekdays similar proportions said their main mode of travelling was by bus, car or walking (29%, 28% and 21% respectively).
- Bicycle and trains were the main mode for around one in ten or less.
- There is a fair amount of variation in these results over time so it is difficult to determine any definitive trends.

#### **Demographic differences**

- Main method of travel varied significantly by ward as you would expect with Northern Ward respondents more likely to use the train, Southern ward respondents more likely to bike, Lambton Ward respondents more likely to walk, Eastern Ward respondents were more likely to bus and Onslow-Western Ward respondents were more likely to drive.
- Respondents under 30 and over were more likely to bus (41%) and less likely to drive (15%).
- Respondents with dependent children were more likely to drive (39%).

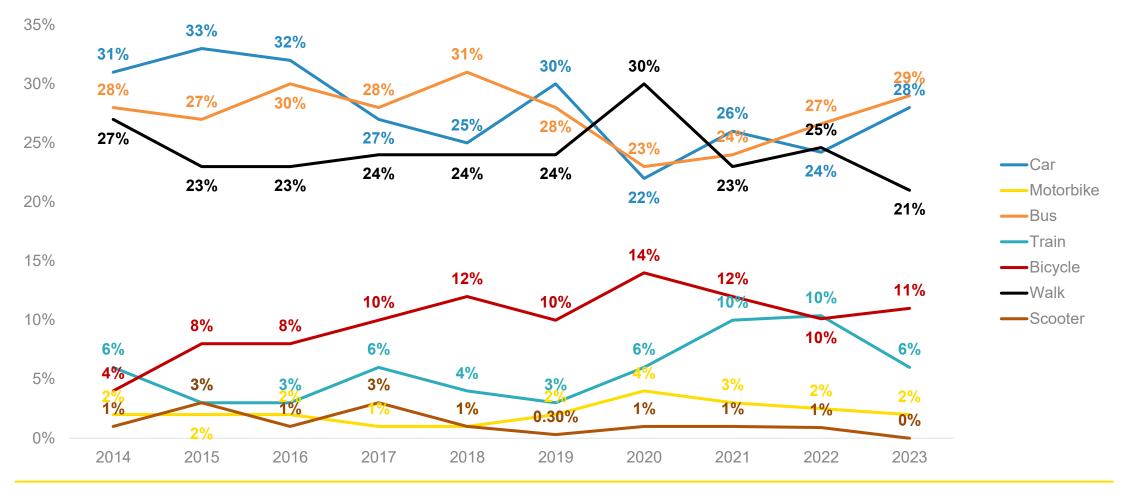

### Main mode of transport for commuting – tracking

What is your main method of travelling to Wellington on these occasions?

Base: Respondents who travel into central Wellington most weekdays (n=564)

### Are peak travel volumes acceptable?

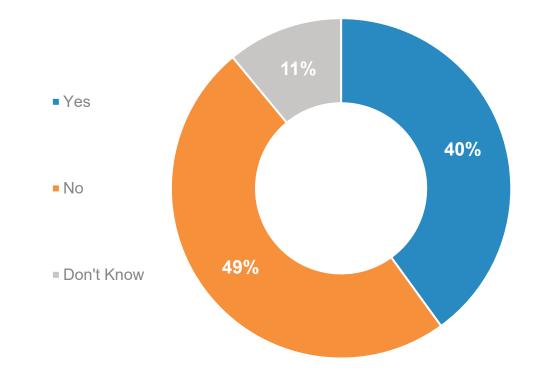

- Four in ten (40%) respondents who travel into or through central Wellington ٠ during peak times believed that peak travel volumes were acceptable.
- This measure increased significantly in 2022 compared to 2021 likely related • to the impact of covid on traffic volumes but has come back slightly this year.

#### **Demographic differences**

There were no demographic differences for this question.

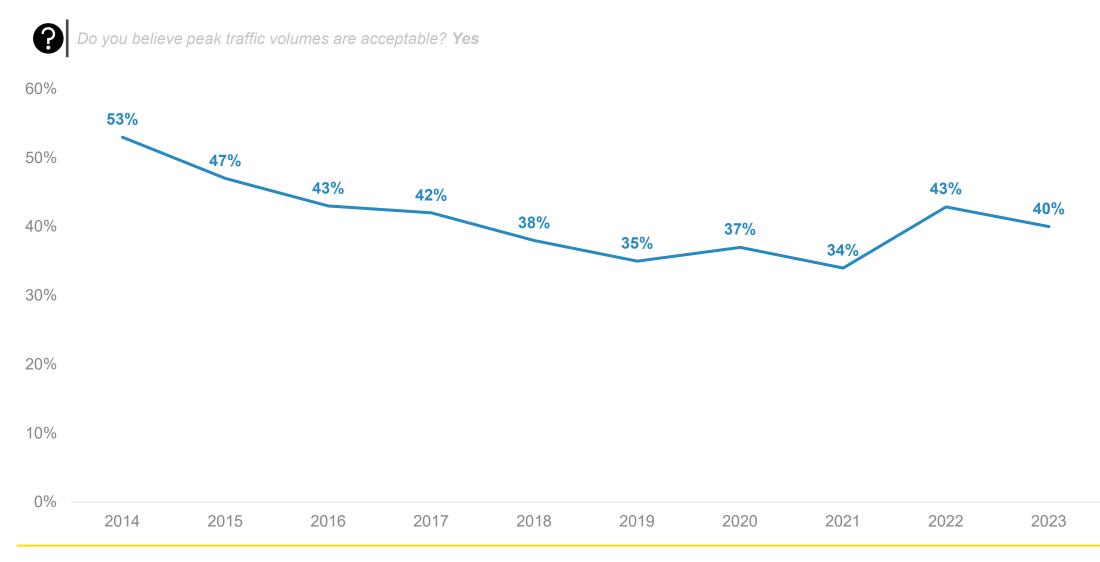

Do you believe peak traffic volumes are acceptable?

Base: respondents who travel into or through central Wellington during weekday peak traffic times, that is between 7-9am or 4-6pm? (n=586)

## Kitchen food scrap disposal

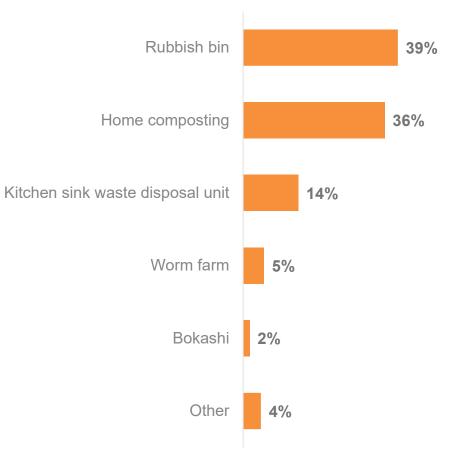

- More than a third or respondents said they main method for disposing of kitchen food scraps was in the rubbish bin.
- Around a third (36%) said their main method was through home composting.
- About one in ten (14%) said they used a kitchen waste disposal unit and one in 20 or fewer used a worm farm or bokashi bin as their main method for food scrap disposal.

#### **Demographic differences**

- Respondents from the Lambton Ward, respondents under 30 and renters were were more likely to mainly dispose of their food scraps in the rubbish bin (and less likely via home composting).
- Respondents from Onslow-Western Ward, respondents aged 60+ and homeowners were all more likely to mainly dispose of their food scraps through home composting (and less likely via the bin)

What is your main method of disposing of kitchen food scraps?

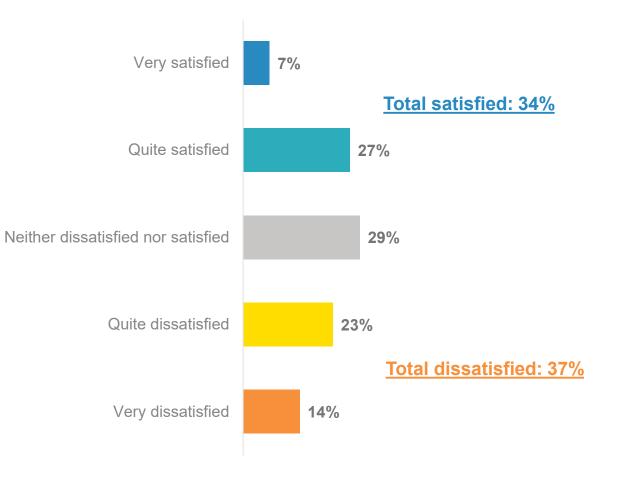

## Stormwater management satisfaction

- Views were very much split on storm water management in the city. Similar proportions were satisfied (34%) and dissatisfied (37%), while a third were neither satisfied nor dissatisfied.
  - 13% of respondents were also excluded from the analysis as they did not have a view (selected 'don't know').
- Satisfaction with this has been trending down since tracking began in 2016. However this years results has seen that trend continue to flatten off compared to 2021. However, satisfaction levels are still much lower than when tracking began in 2016 (68%).

#### **Demographic differences**
