Tilia Tree

T.R.E.E. MISSION LOG I.D. TLTR

The plants of this planet are very interesting and different from planet Ena. The leaf absorbs sunlight through a process called photosynthesis.

Can you help Explorer Ayla draw a leaf?

END TRANSMISSION LOG I.D. TLATR

Fragrant Garden

T.R.E.E. MISSION LOG I.D. FGDA

Bees collect _____ from flowers and use this to make _____.

The plants like this because they use the bees to spread _____ which helps the plants reproduce.

END TRANSMISSION LOG I.D. FDGA

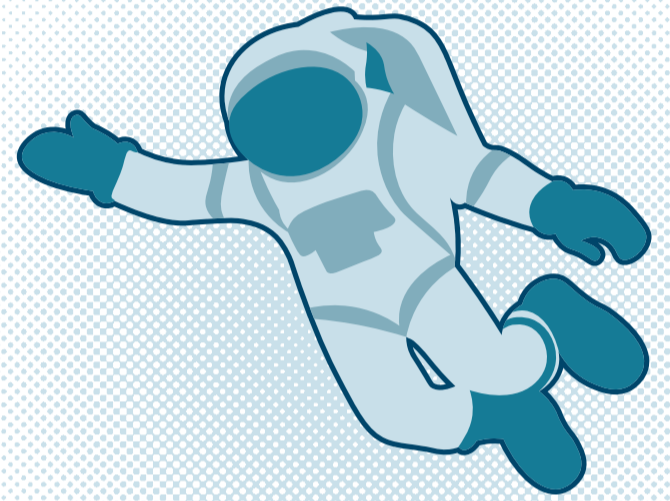

Red Garden

T.R.E.E. MISSION LOG I.D. REDG

These plants aren't green, they're red! What causes the colours?

Can you draw lines to connect the colour with the right pigment?

Red	Chlorophyll
Yellow	Anthocyanins
Green	Carotene

END TRANSMISSION LOG I.D. REDG

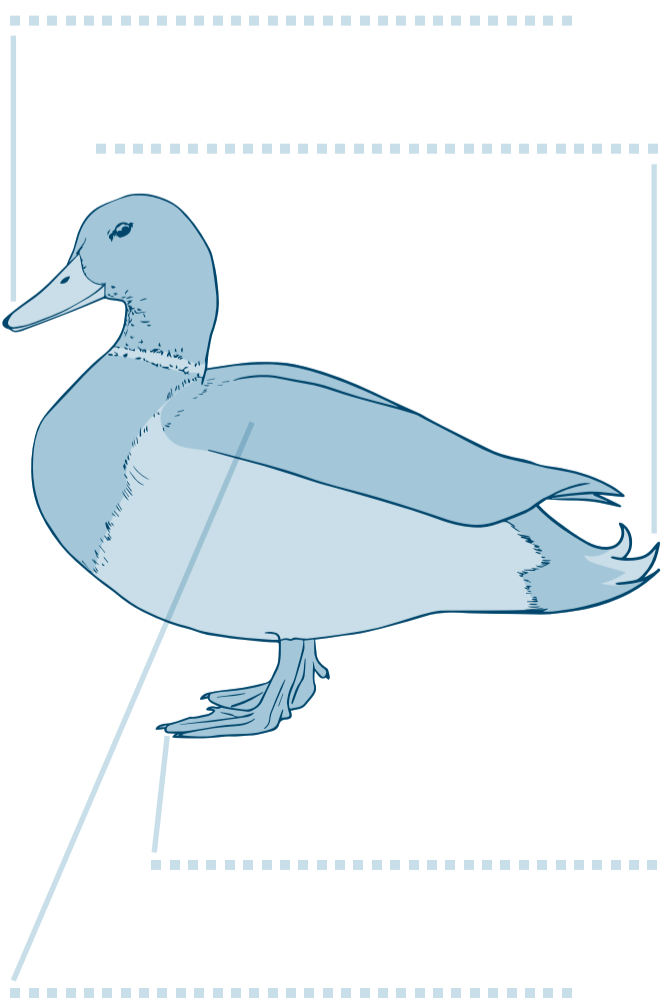

Duck Pond

T.R.E.E. MISSION LOG I.D. DPND

Planet Ena doesn't have ducks.

Can you help Explorer Ayla record the parts of a duck?

END TRANSMISSION LOG I.D. DPND

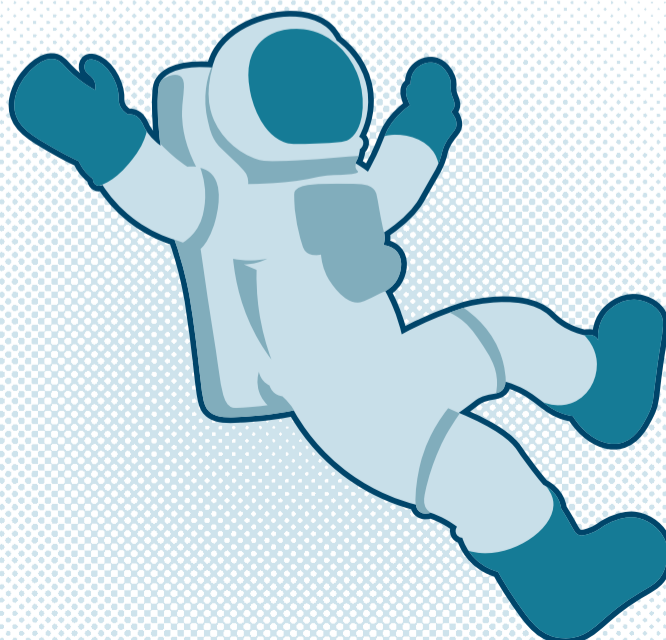

Fragrant Garden

T.R.E.E. MISSION LOG I.D. FGDB

Bees love the smell of flowers.

Can you help Explorer Ayla find 3 types of fragrant flowers in the local garden?

1.
2.
3.

END TRANSMISSION LOG I.D. FGDB

Gardens Gallery

T.R.E.E. MISSION LOG I.D. GDGL

Bees are a fascinating species. They perform an important function in helping to pollinate plants.

Can you help Explorer Ayla record an image of a bee by doing a rubbing?
