Visits to facilities: ASB centre (peak)	243,073	317,208	(23%)	There has been a change to the peak and off peak times. ASB Peak attendance down due to lower bookings on Friday evenings and Sundays. Programme development in growth stage for this time.

Occupancy rates (%) of Wellington City Council Community Centres and Halls	34%	55%	(39%)	There has been a change to the methodology for calculating occupancy rates, which now combines the measure for community centres and community halls. With the change in the calculation we do not expect to be able to meet this target.
Dog control - complaints received (% of registered dogs)	3%	2%	(30%)	Dog complaints are high again this month. There is no clear pattern to the complaints or any obvious trend indicated by the types of complaints. Slight increase in complaint numbers over the same period last year may indicate seasonality.
Percentage of inspections carried out for high risk premises (category 3) carried out during high trading hours.	45%	25%	79%	This result has increased due to reallocation of inspection resources to monitor liquor premises at peak trading. This is a proactive response to changes and expectations under new legislation, and is a new joint monitoring initiative with key partners NZ Police and Regional Public Health. It is anticipated that the Council will continue to exceed the target as a result of this approach.

⁵ Areas where performance varied from budgeted expectations by more than 10%.

APPENDIX 1

Percentage of planned inspections carried out for high risk (category 3) premises	64%	75%	(15%)	The remaining premises will be inspected during the final quarter. Inspections are behind target partly due to training three new staff on liquor licensing, as well as a shift in focus to food inspections and VIP audits that were required to be completed for billing by week 2 of May 2014.

Some work programmes have required rescheduling due to the need to respond to the impact of the 2013 storm and earthquake events. Savings have been achieved in some areas due to favourable material prices and consolidation of works into the roading corridor contract. The Hataitai bus tunnel seismic strengthening has been reprogrammed with construction now due to start in the 2014/15 financial year. Results from the bin trial led to a decision not to significantly rollout implementation leading to further savings.
