
Project title: Scoring stage
Strategy area: Economic Development

Scoring Stage

A business case on the possible development of a scoring stage/orchestral recording and rehearsal facility is being undertaken using existing 2005/06 budgets. A feasibility study has already been undertaken, and in December 2005, at the Councillor Workshop on new initiatives, Councillors asked that a business case be prepared. The business case will establish what role, if any, the Council would have in the establishment and operations of such a facility. Officers anticipate the results of the business case being available in May/June 2006. In the event that this proposal proceeds, no funding is likely to be required until 2007/08.
