Neighbourhood Centre Zone

NCZ	Neighbourhood Centre Zone
------------	----------------------------------

P1 Sch1

Introduction

The purpose of the Neighbourhood Centre Zone is to provide for predominantly for small-scale commercial activities and community activities that service the needs of the immediate residential neighbourhood and support the role and function of other Centre Zones in the hierarchy of centres.

The Neighbourhood Centre Zone includes a range of small commercial centres across Wellington that provide a neighbourhood function in the City's hierarchy of centres. The Neighbourhood Centre Zone is the lowest in the hierarchy due to its make-up of small spot zones for very small commercial clusters. Neighbourhood centres service the surrounding residential neighbourhood and offer small-scale convenience-based retail for day-to-day needs. These Centres tend to have easy pedestrian access for locals and have some community services and small-scale offices.

High quality building design is a focus for the Neighbourhood Centres Zone. The transition to more intensive use in some neighbourhood centres will result in changes to existing amenity values in the centres and their surrounds. Consequently, redevelopment will be supported by a range of measures to promote good design and environmental outcomes, and address amenity issues. Accordingly, most building activities will require a resource consent and an assessment against the Centres and Mixed Use Design Guide. To enable intensification around existing neighbourhood centres, some of these will have increased building heights.

There is an identified need for residential intensification within and around neighbourhood centres. Accordingly, residential activity is permitted above ground floor within these centres. To support a mix of activities within the zone, activities that have off-site effects, such as industrial activities and different retail formats, will need to be managed. There is however a desire for larger scale retail to locate in centres, where these are of an appropriate form and scale, rather than at out-of-centre locations, to support the vitality ~~and viability~~ of centres.

Development of larger sites in the Ngaio neighbourhood centre is required to be integrated and coordinated to act as a catalyst for positive change and demonstrate density done well.

Other relevant District Plan provisions

There may be a number of provisions that apply to an activity, building, structure or site. Resource consent may therefore be required under rules in this chapter as well as other chapters. Unless specifically stated in a rule, resource consent is required under each relevant rule. The steps to determine the status of an activity are set out in the General Approach chapter.

Objectives
