

Managing the Council's landfill liabilities

The Council will actively consider opportunities, including new technologies and investment, to reduce greenhouse gas emissions and liabilities from its wholly-owned landfill operations.

Such opportunities will be coordinated with and/or included in the Council's Waste Management and Minimisation Plans as appropriate.

Any new initiatives identified will be considered by Council along with all other new initiative proposals, either as part of the Draft

Annual Plan process or LTCCP processes. Analysis of the costs and benefits of such initiatives will follow the framework discussed above.

In general, the Council will recover the costs of any such initiatives by way of user fees and costs on refuse bags.

Despite initiatives to reduce emissions, some emission liabilities will almost certainly remain. The costs of these will be fully recovered from users by way of landfill fees and costs on refuse bags. Where
