Aspects of the application that you support or oppose:

As noted in the Owners Statement, a considerable sum of money has been spent on restoring and strengthening this significant building. The advertising sign was a distinctive feature well-liked by many Wellingtonians, especially the time and weather information, and it is commendable that the Owners wish to restore it to working order with modern digital technology - similar to the signage on the overbridge across Waterloo Quay at Sky Stadium.

Aspects of the application that you are neutral towards:

The reasons for my / our submission are:

I like the proposal and feel that the Owners are treating a heritage building with respect and deserve to earn some money by re-instating a well-liked feature of this building.

The decision I / we would like Wellington City Council to make is:

Not a condition, but I would ask WCC to urge the Owners to have a Time and Temperature display permanently on the sign, say at the left hand side as you look at it from Post Office Square, with the balance of the sign available for paid advertising or community notices as suggested. Or perhaps advertising displays could alternate say every 20 seconds or so with a larger time & temperature display.

I am very supportive of the sign and inparticular the references to weather and time.

Aspects of the application that you are neutral towards:

The reasons for my / our submission are:

I regularly exercise around the Wellington waterfront and would love to be able to know these details as a "public notice" and amenity which is currently missing along the entire Waterfront area. It was a feature of the Wellington landscape for a long time and its return would be well received by residents, workers and visitors passing through this area of the City.

I am writing to support the application from the NZ Fruitgrowers Federation Charitable Trust to erect an electronic billboard to the existing framework on the roof of the Huddart Parker Building at 2 Jervois Quay.

In particular the citizens of Wellington have greatly missed the time and temperature sign on the building since it was removed at least 10 years ago.

I sincerely hope that you give your consent to this application

Submission statements (use additional pages if required)

The aspects of the application that I support/~~oppose~~ are:

The reinstatement of the clock and temperature gauge on the roof of the Huddart Parker Building is long overdue (more than 10 years)

The erection of a new electronic billboard will once again be very useful for vehicular traffic drivers or people on foot travelling south past the NZ Post Building. My estimate would be that several thousand people ^{will} check the time and temperature daily.

The reasons for my submission are:

Many Wellingtonians have mourned the absence of the clock and temperature gauge since its disappearance more than 10 years ago. There are very few (if any) similar displays in ~~the~~ the Wellington CBD.

The clock and the temperature gauge on the roof of the Huddart Parker building were a recognisable feature of the central city skyline, that did not detract from the overall aesthetics. That useful purpose has not changed since the earthquake strengthening & refurbishment work has been completed. The application should be granted to fully complete the restoration project and acknowledge the investment the building owner has made.

Message Ref: Electronic billboard 2 Jervois Quay

Project No: SR513399

Kia ora,

Thank you for the opportunity to submit on the proposal to install an electronic billboard on the roof of 2 Jervois Quay.

We oppose the proposal in its current form for the following reasons:

- Incompatibility with the character of the building and Post Office Square
- Dominance effect
- Contrary to the objectives and policies in the District Plan and inconsistent with the Design Guide for Signs in the District Plan

Integration with the building and site

- We acknowledge the detailed history and description of the building as outlined as part of the heritage assessment by archifact (and originally published on wellingtoncityheritage.org.nz).
- The assessment of environmental effects as part of the heritage assessment states that as the billboard will be 'clearly separate and legibly unrelated from the Chicago-style architectural detailing' the proposed billboard it will not detract from the architecture of the building. We consider that, as the billboard is proposed on the roof of the building this will be read as one and that the billboard will be read as an element of the building that is in contrast with its existing character.
- We disagree with the statement that the proposed billboard does not detract from the character of the building as signage was already established on the building in 1963. We consider that the style, technology and illumination of the original billboards cannot be compared to the current proposal. As the original signage was visually permeable and non-digital it better fitted with the Chicago-style architecture of the building at the time.
- We consider that the photomontages in the application document do not give an accurate representation of the actual end result. A digital billboard in this location will most likely require a deeper depth to accommodate the electronics as well as additional flashing to the sides, which will have further impact on the visibility and integration with the façade.
- We acknowledge that the dimensions and placement of the proposed billboard appear to approximately align with the window pattern in the front façade. However, we consider that this does

not mitigate the incompatibilities of the proposed billboard with the host building, in terms of lighting (and potential colours of advertising), size and material.

Dominance in the street scape and loss of visual amenity

- Post Office Square marks a gateway into a more people focused area of the city and acts as an intersection of pedestrian movements (between the city and the railway station and between the centre and the waterfront due to its connection with Queens Wharf) and is in itself a popular coffee/lunch spot. The heritage buildings along two of its edges reinforce this human scale character.
- We consider that the architectural style of the Huddart Parker building brings a significant contribution to the character of Post Office Square. The height of the Huddart Parker building, as a landmark feature on the square, strikes a comfortable balance with the dimensions of the square. A solid luminous billboard on the roof of this building would effectively increase the height of the building, which would have an adverse effect on the perception of comfort and human scale-effect that the building has on the Square and detract from the character and visual amenity as it is currently perceived when travelling along Jervois Quay from the north.
- The above effects are contrary to the objectives and policies, and Design Guide for Signs in the District Plan.

Overall, we seek the current consent application be declined. We could accept signage in this location if it was better aligned with the character of the Huddart Parker building and did not dominate the street scape.

Hi Krystle,

That's weird. It shows ticks in both those sets of boxes when I open the document at this end (including the version returned with your email).

To avoid any ongoing confusion by relying on box-ticking, I confirm

- we oppose the application,
- we wish to speak in support of the submission, and
- if others make a similar submission we will consider presenting a joint case with them at hearing.

Many thanks,

Morgan

Hi Morgan

Thank you for your submission for 2 Jervois Quay.

Before check if your late submission can be accepted can you please amend your submission form - unfortunately there is no tick in the boxes advising if you support or oppose the application and no tick in the 'oral submission at the hearing' section of the form.

Kind regards
