Definitions:

Dig out – *a repair to a small section of the road structure*

Pre-seal repairs – *structural repairs to small sections of the road. We usually combine this with repairing or replacing sections of the pedestrian footpath, kerb and channel. This work is done two to three months before the surfacing work. This gives the road repairs time to settle and cure.*

Sump – *road drain*

TTM – *temporary Traffic Management*

TSL – *Temporary Speed Limit*
