- Q5. **Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?** No
- Q6. **If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer?** not answered
- Q7. **Oral forum time** not answered
- Q8. **Oral hearing time** not answered
- Q9. **Which of these options do you prefer? (3 waters decision)** Option 3. Accelerated (\$3.3bn investment – higher rates and debt).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** Option 2. Take ownership (Council's preferred option, \$32m investment).
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 3: High investment programme (\$120m capital investment - Council's preferred option)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 2. Medium investment with savings (\$25.4m investment, lower rates and debt).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** None of these options.
- Q14. **Which of these options do you prefer? (Central Library decision)** None of these options.
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 3. Sludge minimisation through Council funding (\$147m to \$208m capital investment, above debt limit, and higher rates)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Central Library  
Sludge and waste minimisation  
Te Ngākau funding for future work

**Q17. Your comments on the big decisions (optional)**

Retain MOB building, strengthen, and bowl CAB. Bowl CAB and the central library, redesign and develop this space together. (oh we let an ex councilor get a heritage sticker on the library building...) Sludge minimisation – higher rates or a levy against each ratepayer- whats the difference to my bottom line? Do the one that's cheaper to Joe Public. Great to see an core infrastructure focus LTP! Ka pai!!

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

I somewhat support the proposed budget.

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Increase funding to Parks horticulture ops programmes - some of our street planting and parks are looking scruffy, weedy and suffering from a lack of maintenance funding - Waitangi Park being a prime example.

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library  
None of these

---

**Q17. Your comments on the big decisions (optional)**

Three waters infrastructure: it is noted that no funding is provided for densification outside the inner city. Cycleways: Wellington is basically not designed for cycleways with its narrow roads resulting in large cost overruns of present projects. Although born a cyclist, I prefer low ranking for such projects; we can't afford the proposed rates increase. While climate change is an urgent issue, present proposals have too many uncertainties. But future planning and data gathering should continue to propose cost effective measures. We can't afford the proposed rates increase. Central Library: While I support the retention of the Central Library at its present site, I am scared that this will be another project with a large cost overrun. None of these: I wish the Khandallah Park and Swimming Pool upgrade to go ahead. WCC should seek more Central Government funding support for social housing. Lengthening of airport runway should be funded by the company, not by WCC ratepayers.

---

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

---

**Q19. Do you support the proposed budget?**

I strongly oppose the proposed budget.

---

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

I support decreasing spend in the current budget.

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

I wish the Khandallah Park and Swimming Pool upgrade to go ahead. WCC should seek more Central Government funding support for social housing. Lengthening of airport runway should be funded by the company, not by WCC ratepayers. Councillors should not be allowed to pursue vanity projects at the expense of ratepayers.

Investment in three waters infrastructure  
Cycleways  
Central Library

---

**Q17. Your comments on the big decisions (optional)**

3 waters - I support moves to remove this area of work from individual councils to a specialised Water Agency Cycleways - In area of change pushback will be natural. WCC shouldnt lose their nerve & continue the great work to-date supported by central government funding. Increased public education especially for the business community to better understand the population changes. The key issue for many is around PARKING & reframing the narrative from cycle lanes to dealing with parking options across the city would assist Library / Civic Buildings - In all the planning options a key consideration should be that city offices will never be full again. The world has changed for good with people now having a taste of the new flexible work options can offer. The days of 0000's of public servants & head office workers (including WCC staff) coming into the CBD are over !!!

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Looking ahead the funding model for LG is broken - continued rates increases based on property values is unsustainable. Growing older populations many on fixed incomes will not be able to cover these increases. WCC should be working with LGNZ & Govt to be a leader to the 'change debate'.

Cycleways

---

**Q17. Your comments on the big decisions (optional)**

Stop building cycle ways in Wellington. Wellington is a pedestrian city and there is no money being spent on pathways. In many areas around the city there are places where there are no paths at all and pedestrians are forced to walk on roads. Also the focus needs to be on developing a free and/or heavily subsidised public transport service. All Children and students should have free access to public transport. There is far too much emphasis on bicycles which are not appropriate for many people. Whereas public transport is suitable for most people.

I support increasing spend in the current budget.

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Stop the increase in parking fees for cars in Wellington. It will allow more businesses to flourish in the CBD. Currently it feels like WCC are constantly punishing people for having to take their cars into the city. Lower parking fees will allow for more spending at businesses in the CBD.

Investment in three waters infrastructure  
Cycleways

**Q17. Your comments on the big decisions (optional)**

General Wellington is a rapidly growing capital city, but is geographically constrained and facing significant infrastructural investment challenges; alongside a stated 'climate emergency'. Decisions made now will shape future living and economic opportunities and need to ensure a sound foundation for the city's development. The city needs a clear vision and determination to deliver to meet our future needs and create a vibrant future. A key risk is taking leadership and not merely looking backwards at old technology to solve our future problems. Changes, such as 'densification' of our suburbs must retain the liveability of our neighbourhoods, by keeping and extending links, networks, biodiversity and green spaces and the ambience of suburban centres. Cycleways As a 60-year-old working in the central city who lives in Khandallah I have recently changed to cycling to work 95% of the time. I had formerly used public transport but find cycling more convenient and healthier to get to my place of work across the CBD. I have also noted a significant increase in the numbers of my fellow cyclists due partly to the convenience of e-bikes. It is also a cheaper and more practical option than perpetually investing in more infrastructure to incentivise use of cars; especially for those who live close enough to be able to use alternative access networks to the central city. The cycleway network is good in some areas, but is patchy and is particularly dangerous in the central city. It needs to be better integrated and connected, without parts of the network suddenly stopping and starting (eg along Featherston St across Whitmore). Certain areas of the 'cycleways' are intrinsically dangerous (eg the Hutt Rd northbound where cycles are squeezed between angle parked cars reversing out and busy vehicle traffic; and crossing the southbound vehicle lane to get onto the cycleway at the Tinakori Rd intersection). My preferred option is option 3, although I seek better connections not just to the CBD but also through it. 3 Waters Infrastructure investment is a key, if often neglected and under-promoted, role of local government. I support better long term investment; but note that this aspect of local government should operate as an internalised service delivery; asset management model. Where necessary, the Council should be able to borrow against the value of the infrastructure to fund and pay off that investment; possibly by taking out infrastructure bonds or by similar funding arrangements. This should have a long term asset management approach and be funded by residents in terms of the services required. I would also like to ensure that adequate provision is made for stormwater management, so favour a combination of options 2 and 3, with greater emphasis on stormwater, but perhaps not as much as proposed in option 4. Related to this, I would like to see better integration of water sensitive urban design incorporated into the Council's RMA and infrastructure asset management plans to ensure that development appropriately caters for the effects of brownfields urban development and densification. If not, the current moderate high value of the Council's reserves and waterways will likely be irreversibly impacted, or which would be very costly to remediate, as Auckland is now finding through the 'daylighting' of its streams. This means controlling ground infiltration, esplanade provisions and maintaining riparian margins to reduce impacts of urbanisation, especially in suburban Wellington.

not answered

---

Our debt levels for this plan, including the value of uninsured assets, range from 134 percent to 239 percent of our annual income. Our proposed limit is 225 percent.

We think this is a sensible limit on our borrowing to ensure that the impact on affordability of rates is maintained and leaves enough 'headroom' to ensure we can repay our debt, and respond to expected but unfunded and unexpected future events and opportunities.

**Do you support the proposed 10-year budget?**

	I strongly support the proposed budget
	I somewhat support the proposed budget
	Neutral
	I somewhat oppose the proposed budget
	I strongly oppose the proposed budget
	Don't know

**Question 9.a) – If you stated in Question 1 that you are neutral or do not support the proposed budget. Do you support increasing or decreasing spend?**

	I support increasing spend in the current budget
	I support decreasing spend in the current budget
	I support keeping the budget the same but with some changes
	Don't know

**Question 10 – Any other feedback on what is proposed for the 10-year Plan**

**Future decisions**

The Consultation Document also signals other decisions that are coming up in the time of this plan, but that we do not have enough information on at this stage for a detailed consultation.

**Other projects**

We also have many other services and projects detailed in our Statements of Service Provision.

**Council Fees and charges**

We have also made changes to some of our fees and user charges. More information on these are available on our website: <https://wgtn.cc/ltp> and available at our libraries and service centre.

**Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

<p>WCC LTP document: "What else are we planning in the next ten years?" - Page 57 of the WCC LTP document under 5. Social and Recreation refers to the planned divestment of the Wadestown Community Centre.</p> <p>We submit that we must retain and not sell the Wadestown Community Centre until a new Wadestown Community Centre can be built. The Wadestown</p>
--

Community and the majority of Wadestown Community groups, as well as both Residents associations in Wadestown support WCC retaining the Wadestown Community Centre and removing the divestment option from the WCC Long Term Plan.

We greatly appreciate the recent LTP amendment regarding the Wadestown Community Centre, and support from WCC councillors to retain proceeds of any future sale of the Community Centre in Wadestown, and potentially contribute the money towards a new Wadestown Community Centre.

At the time of our discussions with WCC Councillors about the LTP a few months ago, both Highland Park Residents (HPPA) and Wadestown Residents (WRA) Associations in principle supported the sale of the community building and property. We were of the understanding that WCC was highly likely to pursue the disposal of the Community Centre and our best option was to accordingly seek to retain the sale proceeds for the future benefit of our community and towards construction of a new Wadestown Community Centre.

Recent feedback from the majority of Wadestown Community groups indicates current users of the Wadestown Community Centre and other interested community groups etc are very keen to maintain the status quo and not to sell the Community Centre until a viable alternative and fit for purpose facility is accessible.

HPPA and WRA support this view and intend to present an LTP submission seeking to remove the proposed sale of the Wadestown Community Centre from the LTP. Local community groups are also keen to seek options for greater use of the Community Centre for family and Community related events.

Wadestown has few Community buildings suitable and easily accessible for family and community events. Various clubs and hobbies regularly occur at the centre, many of which would likely cease if the building is sold. For example, the Wadestown Toy library is hosted at the centre and values the building for social connections between local families with young children. The Wadestown Music box Group values the centre for teaching children musical instruments and connecting local families; few other venues are available for this purpose. The WCC Community Advocate based at the Wadestown library has a list of the main users of the centre.

These and other community activities are not possible or cost effective at the few other Community venues locally. The two local Wadestown churches and their church halls are available for meetings and community presentations, however for several reasons they are not suitable for many of the current community centre activities or users.

Both churches are private organisations who through their goodwill and community spirit allow limited access by other community members. It is entirely feasible that either church building could close or be unavailable for community use in future. HPPA recently hosted a 3 hour long public meeting at one of the church halls, at the cost of \$30 plus per hour. Most community groups cannot afford on-going costs for using a venue like this, when they pay a minimal cost for the Community centre, and there are few other suitable venue options in the suburb.

For my final comments, while the current Wadestown Community Centre building and property are not entirely fit for purpose as an accessible and multi-purpose community facility due to being sited on a steep urban / residential street, the building and its role as a community centre are highly valued and very suitable our communities needs for the foreseeable future. We appreciate there will be some general on-going costs incurred by WCC for retaining the Community Centre, however we believe it is hugely important to maintain this facility for our community.

We welcome the opportunity to discuss this further, and we would welcome your guidance and support towards our community retaining the Wadestown Community Centre until a replacement facility can be established.

Kind regards,

Greg Hyland  
HPPA  
Chairperson

Thank you very much for your submission!

- Q4. **What organisation are you submitting on behalf of?** not answered
- Q5. **Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?** No
- Q6. **If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer?** not answered
- Q7. **Oral forum time** not answered
- Q8. **Oral hearing time** not answered
- Q9. **Which of these options do you prefer? (3 waters decision)** Option 3. Accelerated (\$3.3bn investment – higher rates and debt).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** Option 2. Take ownership (Council's preferred option, \$32m investment).
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** Option 1. Demolish and site developed through long-term lease (Council's preferred option).
- Q14. **Which of these options do you prefer? (Central Library decision)** Option 1. Strengthen now by temporarily exceeding debt limit (Council's preferred option, additional 0.79% to rates).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 4. Sludge minimisation through alternate funding (Council's preferred option, \$147m to \$208m capital investment funded through a levy, no additional rates increase)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Cycleways

**Q17. Your comments on the big decisions (optional)**

Investment in three Waters I would prefer to see much more focus on funding water sensitive urban design options both in new developments and existing infrastructure. This can save money in the long term by reducing pressure on pipes etc. Cycleways Even in Option 4 there does not seem to be a high enough prioritization of temporary infrastructure (tactical urbanism etc.) in the first year. Auckland has shown this has been great for getting the conversations happening - and it would be a huge quick win to install a number of temporary cycle ways.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

I somewhat support the proposed budget.

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

Cycleways

---

Q17. Your comments on the big decisions (optional)

We need to prioritise comprehensive infrastructure on key corridors like Feathers ton St in town and Courtnaey Place. It is difficult to cycle e.g. from the waterfront to Cuba St. Let's be bold and create a great system.

--	--

**Q17. Your comments on the big decisions (optional)**

I support the submission by Sustainability Trust, Generation Zero, the Poo Breakfast Club, Cycle Wellington and also the submission made by myself and other zero waste advocates that can also be access here: <http://therubbishtrip.co.nz/wp-content/uploads/2021/05/Joint-Submission-on-WCC-LTP.pdf> I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031. I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users. I support doubling the Cycling Minor Works Budget to \$2 million per year. I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements. I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere. I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements. I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects. I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects. I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels. I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent. I support the council increasing rates further to fund essential infrastructure for cycling. I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225%. I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital. I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change.

<p><b>Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)</b></p>	<p>not answered</p>
---	---------------------

<p><b>Q19. Do you support the proposed budget?</b></p>	<p>Neutral.</p>
--	-----------------

<p><b>Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?</b></p>	<p>I support increasing spend in the current budget.</p>
---	--

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

I think that WCC can meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC commits to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making. I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

---

Investment in three waters infrastructure  
Wastewater laterals  
Cycleways  
Te Atakura (climate change)  
Central Library  
Sludge and waste minimisation  
Te Ngākau funding for future work

---

**Q17. Your comments on the big decisions (optional)**

The role of a local council is to fund and manage local roads, pavements, footpaths and the three waters. Very nice to have are sportsgrounds, swimming pools and libraries (the latter of which should be treated a region-wide resource rather than just a local council one). Almost everything else, particularly funds intended to be spent on climate change and race-based ideas have no place in local government, especially a council pushing against its debt ceiling. If the debt ceiling can be amended it becomes merely a guideline for the next bunch of "put it on the rates" councillors rather than ensuring council is spending within its budget.

---

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library

**Q17. Your comments on the big decisions (optional)**

3 waters - Favour option 3, but only after gather information to make investment decisions wisely. And should be combined with water metering as this is proven to reduce consumption and hence investment needs. Also fairer to have user pays.  
Cycleways - Go for high volume at low cost by doing what has been done on Crawford Rd rather than massive rebuilds as per Oriental Bay and Cobham Drive. Combine with bus lanes and add bus lanes so both active and public transport prioritised and can run on time, Climate change - Central Government's ETS will control total NZ emissions. What WCC can do is facilitate behaviours by enabling active and public transport through buslanes and cycleways and reducing the cost of subdividing and building infill housing. ie provide the basic infrastructure so residents can best manage their own emissions. Central library - demolish / sell with rest of civic precinct. The pop-up libraries are working well and smaller, but more such areas matches needs of people who are using less physical books but with downsizing office space want quiet inside public areas to read etc. Council doesn't need to own office buildings.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

I somewhat oppose the proposed budget.

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

I support decreasing spend in the current budget.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

The Council is facing big investment for basic water and transport infrastructure. It needs to look at how it can save costs in all its activities to limit rates increases to what ratepayers can afford. Vanity projects such as massive expenditure on existing library building and school of music should be halted and projects focused on essentials. Water metering is an extremely effective means of improving efficiency and need for expansion capex in 2 of 3 waters. Need to have a close look at how the whole consenting process can be streamlined and made cheaper - supply-side action is needed to address housing affordability. Given big 3 waters capex is well-overdue and will benefit future generations for many years - an increase over 225% Debt to Income caused by that and not commercial property investment is ok

---

I support decreasing spend in the current budget.

Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?

not answered

---

- Q1. **Full name:** Anna Pendergrast
- Q2. **Phone number:** [Redacted]
- Q3. **Are you making this submission as an individual or on behalf of an organisation?** Individual
- Q4. **What organisation are you submitting on behalf of?** not answered
- Q5. **Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?** Yes
- Q6. **If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer?**  
Oral forum (informal, 60min facilitated table discussion with 2 to 3 Councillors and other submitters)  
Oral Hearing (formal hearing with set times to speak to full Council, 5mins per individual, 10mins per organisation)
- Q7. **Oral forum time** Morning
- Q8. **Oral hearing time** Morning
- Q9. **Which of these options do you prefer? (3 waters decision)** Option 2. Enhanced investment (\$2.4bn - the Council's preferred option).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** Option 2. Take ownership (Council's preferred option, \$32m investment).
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 3: High investment programme (\$120m capital investment - Council's preferred option)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** Option 2. Proceed with base build proposal for public purposes (higher debt and rates)
- Q14. **Which of these options do you prefer? (Central Library decision)** Option 1. Strengthen now by temporarily exceeding debt limit (Council's preferred option, additional 0.79% to rates).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 3. Sludge minimisation through Council funding (\$147m to \$208m capital investment, above debt limit, and higher rates)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Sludge and waste minimisation  
Te Ngākau funding for future work

**Q17. Your comments on the big decisions (optional)**

I found making this submission quite difficult, as there was not a huge amount of detail about some of the options. Further, it seemed like the criteria that was given most weight was staying under the council's self-imposed debt limit. I would have like to seen options that allowed higher borrowing, especially as experts in this area have supported allowing higher borrowing at low interest rates. My comments on specific 'big decisions' are below: Three waters infrastructure: I was surprised and angered to see that money put aside for depreciation of the asset was spent elsewhere by the council over a long period. This short-sighted "out of sight, out of mind" approach is unacceptable. I expect a significant shift in how these assets are managed. I want to see the maintenance of these assets prioritised, replacement infrastructure built to enable easy inspection, and technology used to help assess the state of the network and model options for future investment. Te Ngākau Civic Precinct, Council Office Buildings: I chose option 2 here, but to be honest, didn't have the information I needed to make a properly informed decision. I don't think that Wellingtonians can make a proper decision without more information. For example, in scenario 1, would the council be looking at leasing space back for council use -- and if so, what would be the operational cost? If the Council could borrow more, would option 2 be the preferred option? In option 1, what is the risk that no business would be interested in the lease of the space, especially with the Council controlling the design brief? In option 2, what are the risks of significant damage in future earthquakes given the fact they will not be able to be 100% of the NBS?) Sludge minimisation: I support the investment in new infrastructure as per options 3 and 4. However, I am not sure about the funding mechanism. There was not enough information about the funding mechanism under the Infrastructure Funding and Financing Act for me to make a decision. I worry that if Option 4 is picked, and alternative funding is not approved, then this will open the door for a public-private partnership, which I do not agree with, or pause work on this completely until the next LTP project.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

I somewhat oppose the proposed budget.

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

I support increasing spend in the current budget.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

not answered

- Q14. **Which of these options do you prefer? (Central Library decision)** None of these options.
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 4. Sludge minimisation through alternate funding (Council's preferred option, \$147m to \$208m capital investment funded through a levy, no additional rates increase)

Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below

Cycleways

---

Q17. Your comments on the big decisions (optional)

There needs to be a "connected" cycleway system from the suburbs and through the city. At present cyclists have a hit and mainly miss system of cycleways. There are no decent cycleways in the central city connecting through and across to make a excellent cycle network. Coming from Lyall Bay in the eastern suburbs I can see eventually there could be a decent cycleway along the waterfront. However when I get to the central city their is only the shared area of an over used waterfront. Where is the cycleway along the Quays and how do I as a cyclist get through the city? Something radicle needs to happen to make a cycle network rather than cyclists doing trying to traverse the central city in a very unsafe set of streets made for cars.

None of these

---

**Q17. Your comments on the big decisions (optional)**

Why are we forced to choose such myopic options with zero technical content available? This is an awful consultation process. Our city is an embarrassment and becoming worse by the day due to utter incompetence and lack of vision / capability by city leaders. I am an avid cyclist but also a driver and our transport networks are pathetic - as a runner taking my life in my hands with cyclists, walkers and car fumes when I brave Mt Vic tunnel on foot - this is absurd. LGWM is a distant (and unlikely) dream yet there is nothing here about making our streets look something better than a 3rd world ghetto. The only transport / road / street project delivered by any of WCC/NZTA/GWRC of any note in the last 10 years is MPA/Arras tunnel and that is a disgrace. The only streetscape project done is Lower Bond Street - why are we some prehistoric? The city is abysmal, it's no surprise our crime rate is spiraling. Does anyone at council understand the benefits and value of investing in streetscape for economic spend and social impact? Perhaps read the UK research from CABI Commission for Architecture and Built Environment 'Paving the Streets in Gold'. I am sorry this is so negative but it's painful living here these days, our city is not dying, it is dead, and as one-time advocates, we've had enough of the chronic inertia. As professionals (civil engineer and medical doctor) it's getting to the end of our time residing here given it's so depressing and hard to imagine any meaningful change in the next 10 years as we continue our backwards momentum (especially given our unparalleled geographic gifts and our wonderful and tenacious private sector). It's devastating to watch my city and my home throw all of its spectacular potential into our beautiful harbour. Do you really have any pride at all in our once wonderful city? It's a laughing stock, and council have to shoulder that.

---

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

---

**Q19. Do you support the proposed budget?**

I strongly oppose the proposed budget.

---

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

I support keeping the budget the same but with some changes.

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

I've made my comments on the issues and concerns earlier in this response. This blinkered consultation is a really poor process, but that seems to be consistent with anything related to the running of our once wonderful but now terminal capital city.

---

## Wellington City Council

May 2021

### Submission on the proposed WCC 2021-32 LTP

#### WELLINGTON'S WATERS WOES AND THE MARINE RESERVE

Wellington, surrounded by sea on three sides, treasures our waters and respects the life within them. The sea and marine life is an important part of our culture, our identity and heritage. So why do we find ourselves with polluted beaches and streams resulting from failing water infrastructure and regulatory non compliance?

Taputeranga Marine Reserve is easily accessible and unfortunately it's proximately to a major urban area, could also be its biggest drawback. Four "emergency" sewage discharge, all sorts of nasties through the stormwater outfalls and toxic leachate from the several active and closed landfills in Happy Valley and former Houghton Bay landfill, all end up in what should ideally be a 'protected' marine reserve.

For years sewage has been getting into the city's stormwater system every time it rains heavily, and pipe breakages (as well as constructed overflows) have resulted in raw sewage pouring into the streams, our harbours and coast -even without any urban growth. These illegal discharges are culturally abhorrent, ruin recreational use of coast, and harm aquatic life and marine mammals.

Data for Wellington Harbour show contaminants above guidelines for aquatic life. Contaminants in sewage put people at risk when swimming or diving. Pollution and discharges impact not just the ecology and environment but the mauri life force and the kaitiakitanga role marine reserves offer.

When the marine reserve was gazetted, the removal of discharges was a condition of the Government's approval. In a long expired Memorandum of Understanding (MoU) with the Department of Conservation the city council committed itself to an "aspirational goal of eliminating wastewater discharges in the Marine Reserve in the longer term". Disappointingly, nothing happened over the decade after the memorandum was signed. The sewer and stormwater discharges remain unconsented, and non complying with the Marine Reserves Act- and now the National Policy Statement for Freshwater Management 2020 (NPS-FWM).

In fact, the situation seems to have deteriorated to where we are now- broken and failing pipes, more overflows of untreated sewage to the CMA compared to 2011, no action to manage or treat stormwater within the catchment....

It is a national disgrace to see the sewage pollution of the marine reserve and the coastal environments around the city.

In December 2019 and early 2020 several high-profile pipe failures, particularly in the wastewater network, drew attention to the poor condition, the lack of investment, and lack of oversight in Wellington's drainage assets and services. Finally there is public, media and councillor attention

about the state of, and under investment in, Wellington's underground pipes carrying water, sewage and stormwater and the swimmability (or not) of our beaches.

The organisations -Wellington Water and WCC- that allowed the pollution of the environment, that ignored the piped networks over the past decade are showing responsibility. *(To be honest the GWRC with regulatory responsibilities for the consenting and compliance of three water assets and discharges, and enforcement role for non complying or non consented discharges are still asleep at the wheel.)*

It is a hopeful sign to see Council acknowledge their investment and commitment to pipes has been missing over the last 15years, that the networks are ageing and deteriorating, leading pipe failure and leakage and will be illegal under the NPS-FWM.

It's time to deal with this mess effectively now. Which is why FOTMR request the Council proceed with **Option 3 Accelerated investment in three waters infrastructure**, to improve the condition and reliability of the network and for targeted growth investment - the majority of investment in the wastewater network.

Drainage networks require significant upgrades for further development- specifically infill in the CBD - to occur. Infill development is required to avoid sprawl and meet decarbonisation goals, yet the size and scale of infill is limited by Wellington's drainage system being at capacity; it cant take anymore toilets being connected.

The Council's growth agenda and a healthy environment are not mutually exclusive. However, the two do pose complex asset and development and funding planning challenges. Urban development that is not aligned with asset management programmes, and vice versa and a conventional approach to water management will most certainly lead to irrevocable negative environmental, financial and social impacts.

Taking an integrated, catchment scale approach to managing and delivering water services, investment and expenditure should focus on planning controls (including greywater use, setbacks, onsite detention, WSUD) and targeted capex investments to address service level shortfalls.

The LTP needs to pragmatically and prudently balance the protection of the environment, anticipated and planned growth and the lifecycle of assets, whilst meeting stricter legislation, tāngata whenua values and community expectations, achieving carbon zero - Te Atakura, climate adaptation, and political and financial challenges- and being mindful of engineering capability and deliverability challenges.

It will take time and considerable investment to fix the issues, but the aspiration for the council and expectations from residents is that in the long run there should be no sewage discharge into Taputeranga Marine Reserve or to any marine and freshwater environment.

Wellingtonians are ecologically conscious. There is a social awareness and support of the values of our relationship and connection with a healthy natural environment. Every community group and individual we have been talking to is prepared to help this expectation become reality.

- Q14. **Which of these options do you prefer? (Central Library decision)** Option 1. Strengthen now by temporarily exceeding debt limit (Council's preferred option, additional 0.79% to rates).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 4. Sludge minimisation through alternate funding (Council's preferred option, \$147m to \$208m capital investment funded through a levy, no additional rates increase)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Cycleways  
Te Atakura (climate change)  
Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

I am in full support of all actions taken by the Wellington City Council to minimize Wellington's greenhouse gas emissions. I support significant and swift reduction in carbon and methane emissions and acknowledge that this will mean sacrifices on all of our parts. I am willing to play my part in this.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

Don't know.

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

More decisive climate action is needed

- Q3. **Are you making this submission as an individual or on behalf of an organisation?** Individual
- Q4. **What organisation are you submitting on behalf of?** not answered
- Q5. **Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?** Yes
- Q6. **If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer?** Oral Hearing (formal hearing with set times to speak to full Council, 5mins per individual, 10mins per organisation)
- Q7. **Oral forum time** not answered
- Q8. **Oral hearing time** Morning
- Q9. **Which of these options do you prefer? (3 waters decision)** Option 3. Accelerated (\$3.3bn investment – higher rates and debt).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** Option 2. Take ownership (Council's preferred option, \$32m investment).
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** Option 2. Proceed with base build proposal for public purposes (higher debt and rates)
- Q14. **Which of these options do you prefer? (Central Library decision)** Option3. Strengthen now by increasing rates further (additional 1.79% rates increase).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 3. Sludge minimisation through Council funding (\$147m to \$208m capital investment, above debt limit, and higher rates)

Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below

Cycleways

Q17. Your comments on the big decisions (optional)

not answered

Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)

Q19. Do you support the proposed budget?

Neutral.

Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?

I support increasing spend in the current budget.

Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?

Charge more for car parking across the city, including residential. Raise the borrowing limit and pay for things properly now.

# Long Term Plan 2021 Submission

Alex Dyer

9 May 2021

Kia ora koutou,

Thank you for the opportunity to respond to the long term plan. Thank you to all involved in their work that goes into making Wellington the best it can be. I don't doubt we all care deeply to see Te Whanganui-a-Tara and it's people thrive into the future.

# This is it!

This is the 10 years where change must occur to unlock the full potential of a connected, safe, comfortable network of cycling in Wellington. This is the decade that our actions must deliver a survivable, and prosperous future for our children and the hope for future generations to come.

I support **Option 4** committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031. Not doing anything and everything we can **now** is no longer an option like it might have been in previous decades. The years and years of prevaricating the need to take cycling investment seriously have caught up to us. In a similar way that our water infrastructure is in dire need of attention, so too are our streets.

We would not be in this situation if it were not thanks to the shortsightedness of so many councils and governments before us. We cannot keep pushing cycling back. This is it. This is where we demonstrate how seriously we take the need to prioritise people moving in healthy, sociable, and equitable ways more in Wellington city.

This is the time we prioritise building mobility infrastructure that supports active everyday journeys by children, elderly, caregivers, the disabled, and health and other essential workers.

This is our chance to have nice things. Nice things are: clean air, quiet neighbourhoods, warm affordable housing, accessible amenities, thriving natural ecosystems, happy sociable communities, and healthy people. This chance to build back better with more space for people to ride bikes for their everyday needs contributes significantly to all these nice things.

This opportunity needs the support of the following initiatives:

- Double the cycling minor works budget to \$2 million per year.
- Creating a new dedicated funding category to deliver rapid changes to the urban environment, such as low-traffic neighbourhoods, parklets and other innovating streets improvements and tactical urbanism methodologies.
- Ring-fence the Option 4 cycling budget so that money allocated for cycling is only used on delivering streets that are safe for cycling.
- Hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements.
- Streamline council consultation processes and reduce the time, resources and budget spent to deliver cycling projects. I would like to see larger projects on full network connections consulted on instead of more smaller consultations. Small sections and issues should be handled through traffic resolutions and minor improvements methods.
- Increase parking fees and charge for more parking across the city - especially on-street residential car storage - to encourage mode-shift.
- Do not defer \$7 million of spending on footpath upgrades.

**This is it! This is the prudent way to invest!**

Not investing heavily in unlocking a healthy mobility future would be a shockingly bad fiscal decision. [Council's own messaging reiterates](#) that every dollar spent on better cycling and active mobility brings returns of \$20. The question is not should Council invest more, the question is: **How can we not??** Using this guidance; the difference of return on investment between Option 3 and Option 4 would mean Wellingtonians would miss out on around \$2B dollars worth of benefits. Given the financial pressures that are mounting for our city and our people, we must exploit this huge opportunity.

As a ratepayer, I strongly support increased rates further to fund essential cycling infrastructure and other interventions that reduce our car dependency. I **expect the council** to take on additional debt by raising it's debt-to-revenue ratio limit above 225%. I understand there are future risks that our city will face. It is my conclusion that we will be

less able to mitigate them by remaining in a worse, fragile state now. An essential means of improving our capacity to adapt to future challenges is to improve our ongoing fitness.

Investing now is like having a healthy workout routine and maintaining general body fitness. It means we will be better placed to recover if fitness or injury strikes. I am more supportive of investing in fences at the tops of cliffs than more, and more ambulances.

I would like to see more reallocation of existing road space in order to minimise the costs of cycling projects. There are benefits other than cycling by reducing car parking and excess driving space. Congestion on current roading infrastructure is a good thing. It is clear evidence that we have oversubscribed to supporting car journeys and must turn to traditional other mobility solutions in order to keep our city moving.

I would like to see council setting and reaching for ambitious goals such as a target kilometers of new cycleways delivered and a target percentage increase in cycling mode share every year. These targets should be set higher than existing baseline levels. We need to see 10's of kilometres of cycling infrastructure rather than the current annual average. I understand that the recommendation from public health experts is to aim for a mode share of 15% cycling by 2030.

I would like to see clearer separation of project objectives and outcomes attributed to appropriate budgets. For instance, it is more fitting that the seawall components of any major corridor improvements along the Wellington south coast come from the climate change adaptation and mitigation budget, rather than from cycleways. The same separation of outcomes should likewise be costed appropriately. Not doing this adds confusion, and fuels arguments from naysayers that providing for cycling is an expensive business. Most times where extra expenses of providing safe space for bikes is due to maintaining space for heavy vehicles. If they were not making streets dangerous and unhealthy, extra infrastructure would not be required.

This is where we're at:

My daughter started intermediate this year. She & I have really enjoyed cycling to & from school in Island Bay last year. She has done the Pedal Ready courses & is really good on the bike. I am heartbroken that she is not able to cycle to & from SWIS.

Even before I became a father I had become involved in the advocacy of safer, more comfortable streets for people of all ages & abilities to engage in active transport here in Wellington. I could see this day coming so I got involved & did what I could to change things for the better.

In that time I have seen successive cycling-friendly councils elected. 'cycling Mayors'. Cycling progressive councillors, and numerous transport projects undertaken with varying levels of success. There have been some very encouraging developments in that time...

Crawford Rd is great. I truly love the Island Bay Cycleway, & really love the agreed improvements, even if there remain some unfortunate compromises to local opposition.

I am in awe of the impressive design & engineering effort around Pt. Jerningham so far, and think it will be great when that connects well through all of Evans Bay. That whole stretch, I anticipate, will be a truly world-class bike riding experience.

Old Hutt Road has seen improvements over the last few years. There is much more space, a generally better surface for riding and various goodies (& baddies) along the way.

They say you measure what you care about, and I take heart that WCC are actually counting trips by people riding bikes. And the data is showing encouraging trends. Many people will choose to ride if they're afforded space and infrastructure that enables them to.

But after 12 years of advocacy, and much effort by many people across all of Wellington, and from many different backgrounds, and despite many good intentions, this city has let my daughter down by effectively ceasing her ability to engage in her own mobility, under her own steam.

It's absolutely not because I don't have confidence in her ability. And I like to believe the majority of people driving ARE responsible and well-meaning. But my family can't feel comfortable with her moving through heavy flows of dangerous polluting heavy private motorised vehicles every day to and from school.

I resent anyone who might perceive my parental anxiety as being over-protective - or 'helicopter'. I want my children to engage widely with our urban environment with their own agency. Being blasé about our dangerous mobility environment is not a sign of progressive parenting. It is a sign of a lack of empathy for kids and parents.

If my family, aware of these barriers, face such injustices and an inability to maintain active transport habits; how many others face this? How many others are forced into car dependency at an early age - only to reflect 20 years later how they stopped riding in their early teens?

Things ARE changing. We are improving. But this change needs a hurry on. It's not fast enough. It still does not have strong enough leadership to push past the many structural barriers we have embedded in society to practically ensure car dependency. Let's change this.

**This is it. [Let's unite against car dependency.](#)**

Investment in three waters infrastructure  
Cycleways  
Central Library

---

**Q17. Your comments on the big decisions (optional)**

The 3 water infrastructure is crucial, it is crumbling and not coping with the current load, let alone any future increase in loads. Cycleways. Many towns and city's have successfully implemented cycling networks very inexpensively and designs that work for all road users. Hawkes Bay is a good example. Unfortunately the extremist cycling group in Wellington that you all bow down to want a gold plated option that heavily impacts on other users. You need to find a balance that works for all. The central library should be demolished and re built.

---

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

---

**Q19. Do you support the proposed budget?**

I strongly oppose the proposed budget.

---

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

I support decreasing spend in the current budget.

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Reduce cycling spending, infrastructure is more important. I oppose the increase in parking fees and the reducing amount of parking our CBD is struggling now, this will kill the CBD. I mainly work from home but come into the CBD for meetings and to access services. With the cost increasing and it getting harder to find a park, I am starting to use services outside the CBD and where possible conduct meetings over the internet.

---

Q17. **Your comments on the big decisions (optional)**

It is not a viable option just to continue spending. The numbers in the plan are hard to decipher. Council should seriously consider pulling out of things that should be funded by central government, e.g social housing. Owning assets is not necessary to provide services. And any decision about waste water should wait until the three waters reform is completed.

Cycleways  
Sludge and waste minimisation

---

**Q17. Your comments on the big decisions (optional)**

Cycleways: I expected public transport to have at least had a mention in the important issues, as it is important to Te Atakura. GWRC and LGWM responsibility aside, bus travel needs equal support from WCC to cycleways, and an efficient public transport system is more important in getting people, esp people who can't cycle to work, eg with kids to drop off at day care etc, out of cars. Sludge and waste minimisation: I don't agree to a levy for this being paid by ratepayers. It's not clear if this levy would be in perpetuity, or for how long till the project is paid off. I understood from the info that it would kick in after four years? There was not enough clarity about how long this annual levy would be paid for, so no I didn't go for that option.

---

Q17. Your comments on the big decisions (optional)

Cycling infrastructure can be very cheap to build -- we just need to reprioritise existing roadway space from cars to bikes and to public transport. An increase in cycling naturally leads to a decrease in car traffic, which reduces traffic congestion, reduces parking demand, reduces emissions, reduces long-term healthcare costs. Even if you never ride a bike, you should still support building cycling infrastructure, so that fewer drivers will be competing for road space with you.

---

Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan) not answered

---

Q19. Do you support the proposed budget? I somewhat support the proposed budget.

---

Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?

Cycling infrastructure would be great to build, but it's also important to have housing types that make cycling appealing -- any zoning or urban planning should allow for more high-density housing (apartments, complete with built-in cycling storage space) to be built, especially along major transport corridors (which should have protected cycle lanes covering their whole length!).

- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 3: High investment programme (\$120m capital investment - Council's preferred option)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** Option 1. Demolish and site developed through long-term lease (Council's preferred option).
- Q14. **Which of these options do you prefer? (Central Library decision)** Option 1. Strengthen now by temporarily exceeding debt limit (Council's preferred option, additional 0.79% to rates).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 3. Sludge minimisation through Council funding (\$147m to \$208m capital investment, above debt limit, and higher rates)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Sludge and waste minimisation  
Te Ngākau funding for future work

---

**Q17. Your comments on the big decisions (optional)**

While interest rates are so low and out pipes, sludge and water situation is so dire, I am keen to see debt levels increased to accelerate the improvements in all these spaces. I am also keen to ensure Civic square retains its charm and limit the amount of branding that may occur there with leasing the ground floor. Likewise limiting outdoor seating space if cafes or bars are permitted in the area. It is one of the few sheltered spaces Wellingtonians can go to truly clear their minds on a lunch break, away from the corporate hustle and bustle of Willis Street, Lambton Quay and Midland Park - let's try and keep it this way.

---

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

---

**Q19. Do you support the proposed budget?**

I somewhat oppose the proposed budget.

---

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

I support increasing spend in the current budget.

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

not answered

---

Central Library

Te Ngākau funding for future work

**Q17. Your comments on the big decisions (optional)**

Reimagining the Civic Square and Library is a unique opportunity to build an iconic centre of the city. I am a card-carrying member of Heritage New Zealand, but in this instance I think demolishing all of the properties and starting from a blank canvas would be preferable. The Central Library is, from my understanding, a flawed facility for a library and though I think people would like to see the nikau sculptures retained the cost to rehabilitate the entire building don't - to me - seem worthwhile.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

I strongly support the proposed budget.

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

With recent developments in electric bikes, I think the city would do well to aggressively pursue bike infrastructure/connectivity.

Investment in three waters infrastructure  
Cycleways

**Q17. Your comments on the big decisions (optional)**

I support Council investing whatever is required in three waters infrastructure so as to provide for denser housing development throughout the city. It is simply unacceptable during a housing crisis that sites are going underdeveloped because the infrastructure isn't there to service them. I support the accelerated development of a network of cycleways because they save lives, they are critical to reducing the land-waste and danger of our addiction to cars, and they enable healthier, more satisfying journeys around Wellington.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

I somewhat support the proposed budget.

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

I think the plan and budget could be bolder. Wellington is clearly suffering from decades of under-investment in infrastructure, and associated underdevelopment, leading to unaffordable housing, social exclusion and homelessness. I think the Council should adopt a growth mind-set, and use whatever borrowing or rates increases are necessary to facilitate rapid development of the city's infrastructure, particularly three waters and cycleways.

Wastewater laterals  
Central Library

Q17. **Your comments on the big decisions (optional)**

Kia ora. I don't feel best placed to speak to most of these technical issues, but as a student who moved to Wellington last year from Auckland I can attest to the importance of a quick rebuild of a prominent central library and sufficient water investment. In Auckland the central library is a well known location people suggest as meeting places etc, and now as a student I'm sure that many of us would engage with a central library if it was there. I'm vaguely aware of alternative libraries but there definitely isn't good knowledge of these. Greater engagement with a central library would also expose people to the face of the council, likely improving (particularly young, disabled, and old) people's democratic engagement. On waste water, I'm not privy to the technicals but it's widely felt that the Council's screwed up water infrastructure and it really does damage trust in the Council. Also, the harbour is a huge attraction to young people especially new students in the Summer months and it's really disappointing that people can't be confident of the safety of jumping in off the waterfront or swimming at oriental. These are the little things that make the Welly uni experience! Also disruptive roadworks for water breakages are really annoying!

Q18. **You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

I think it's great to see a youth strategy and the other social whatever one! Also, glad to see a lanaced approach with rates and debt. I'm worried of the effect of rates increases on rents for students and housing affordability but it seems that incomes are the primary driver of rent rises rather than costs, and the proposed funding is all really important!

Q17. **Your comments on the big decisions (optional)**

I would like to see the Wellington city council give much more consideration to the skateboarding community, It doesn't cost a lot to keep us happy. A simple concrete ledge with some metal edging, smooth ground and a slopped bank incorporated into a public walkway or park area goes such a long way for a skateboarder. We don't necessarily need massive new expensive skateparks built everywhere but simple obstacle additions added around local community's would really make kids and adults alike happy. So please do try keep us in mind on future local area upgrades and reach out to the skateboard communities before construction. Cheers!

Cycleways  
Te Atakura (climate change)

---

**Q17. Your comments on the big decisions (optional)**

I support the council to make bold, ambitious decisions to tackle climate change now and create a healthier city for our future. Please, definitely choose the accelerated option for climate change response. It matters a huge amount to myself and especially my children that we take serious action on this. Also, on cycleways, having lived in a city with good cycleways (Melbourne), I really support investing as much as we can as soon as possible to encourage people to see cycling as a safe, enjoyable means of transport. Dedicated cycleways away from roads make a massive difference. I loved cycling in Melbourne. I have never cycled anywhere since moving to Wellington - I don't feel safe on the roads with the buses.

---

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Now is the time to make bold decisions to set us up for the future. Interest rates are low, ratepayers have huge assets in their properties and many will have benefitted from increased property prices and low interest rates. We can afford to spend more now, for a better future.

---

Cycleways

Te Atakura (climate change)

Te Ngākau funding for future work

**Q17. Your comments on the big decisions (optional)**

The cycleways that have been built have not resulted in any significant increase in cycling. But rather than take that at face value, perhaps a usage exercise should be undertaken before any more money is wasted on things that won't get used. Climate change - the problem is this costs money, and there is nothing like enough funding available to make any significance difference. Te Ngakau future work. I am completely opposed to any plans that involve the School of Music moving into the area. Staff don't want it, students don't want it, and neither the Council nor the University can afford it. Students don't just do music - well over half are also enrolled in papers taught at Kelburn. Most evenings there is a stream of large, heavy instruments moving and out of the existing site - so unless parking will be available (and private vehicles will actually be permitted in the area) that will not be possible. I have worked with a few School groups over the years and if the School moves into the city those groups will simply cease to exist.

Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?

Strongly support the cycleways being prioritised. You are doing a great job under very difficult circumstances!

---

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

I think that despite the limitations on funding, now is the time to seriously invest in Wellington's infrastructure. Interest rates are at an all time low, climate change is a crisis in which costs are only going to increase over time and the water infrastructure has been ignored and taken for granted for far too long. Also, once I fully understood what happens with our sewage right now I was more than slightly horrified. We're piping sludge across town? And we're incentivised to keep adding waste to our landfill as a result? That's truly horrifying. As soon as any earthquake happens we're seriously stuffed, and we're not taking action to reduce methane emissions. Let's get that sorted out as soon as humanly possible!! That's why I've voted in favour of the major investment for three waters - to find out what the situation is for a start, and then seriously start to deal with it! Also, Climate change - well yes - meet your targets. That's a given. And build the best cycle and walking network you can, now. The more people that start cycling and walking the fewer cars on the road and the more space there will be left for those who really need to drive. Let's just do it Wellington. And Yes, I am a ratepayer. I will struggle to afford the increase in rates, but I'll struggle to afford any really large fix to our pipes later and no-one can afford the impacts of a 3 degree temperature increase due to climate change. So please get on with it.

Cycleways

**Q17. Your comments on the big decisions (optional)**

You pour endless time, money and energy into poorly designed cycleways only a minority of rate payers actually want and a bunch of cycling zealots continually push for. Do your job as a council. Fix the pipes, run the city effectively and address the congestion issues without punishing drivers and serving a few privileged cyclists. I swear to God you come across more like a bicycle obsessed religious organisation than a professional council working in everyone's best interest and serving the people you are supposed to represent. While spending hundreds of millions on cycleways only a vocal minority want, you underserve the youth of Wellington who need more and better and safer skate, scooter and bike facilities. Please find below my long term recommendations for skate/scooter/bike facilities. That as I understand it, you have no budget for, while bankrolling hundreds of millions in a cycle obsessed campaign of ruining Wellington's already challenging to drive on roads. This city is crumbling while you obsessed over cycle lanes. Perhaps fix the dangerous atrocity that is the island bay cycleway and spend some money on the youth and their activities before more and more poorly designed hodge podge cycleways are built for old rich white people in lycra. My long-term recommendations: 1. The city-wide skatepark be developed into a world-class facility open to all skill levels and used for international competition and as an elite training facility and skate school for beginners. 2. Either the city-wide skatepark or one of the medium sized skateparks be located indoors. 3. New urban design include skateable spots so that the central city becomes a world-class skate city along the lines of popular "skate" cities like Barcelona. 4. Current skateparks are redeveloped to make them fit for purpose and ramps or other facilities are placed indoors or under shelter wherever possible. 5. Skateparks include lighting and public toilets to make them safer and more accessible to women, girls and gender diverse communities. 6. Funding for skate schools such as Waa Hine skate and Girl Skate NZ to further encourage the participation of women, girls and gender diverse communities. Our immediate recommendations: 1. Incorporate a world class skate facility into the Grenada North Sports Hub development or the Kilbirnie Park redevelopment. This could be indoors, see Olympic level and international competition as well as provide a training facility and skate school. 2. Expand Waitangi Park by re-designing the mini ramps and extending the surrounding area. 3. Fund the Tawa skatepark, which has already been designed. 4. Incorporate smaller indoor mini ramps into upcoming projects like the Alex Moore Park Sports Hub building or the redevelopment of Aro Valley community facilities (an adequate size would be approximately 9 x 6 metres). 5. Complete the Rongotai skatepark (there is a full park design but only one-third was built). 6. Give Treetops and Owen Street DIY spots Council designation as skateparks and funding to include toilet facilities, lights, seating and bins, while allowing for skaters to develop their own skate facilities (thereby keeping the DIY aesthetic). 7. Develop the unused large grass area behind the Karori ramps into a "street" skatepark area. 8. Replace the disused Nairnville ramp with a new fit for purpose mini-ramp. 9. Incorporate skate spots into urban design when opportunities arise and follow through on Council policy to incorporate five skateable "spots" around central Wellington and include an assessment of skate opportunities in the design brief of all new public space upgrades.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

I strongly oppose the proposed budget.

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

I support decreasing spend in the current budget.

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Do your job. Focus on fixing the crumbling infrastructure and running/improving the services you provide and make the central city a safer place again. I have lived here for most of my adult life and Wellington is going rapidly down hill while you pour hundred of millions into poorly designed cycleways very few people want and use. This city is in decline, and that rests firmly at the feet of a council known for infighting, impotence and entranced agendas. As evidenced by the crumbling infrastructure, pipes leaking onto footpaths and roads all over the city, pot holed and deteriorating roads, vanity projects, skyrocketing rated irrational decision making and bylaws. 10% organic refuse in rubbish bags and no parking with 2 wheels up on a kerb despite the reality of Wellington's narrow streets. You are either completely cynical or completely disconnected from reality. I dont know which is more terrifying. Fix this crumbling city, focus on the basics and stop wasting our money on cycleways the majority of dont want or use. Be professionals. Do the unglamorous fundamentals, do your job. Not your agenda. Thats what we pay you for.

Investment in three waters infrastructure  
Te Atakura (climate change)  
Sludge and waste minimisation  
Te Ngākau funding for future work

**Q17. Your comments on the big decisions (optional)**

Given Wellington is particularly prone to earthquakes, and because they're so old, I'm really behind spending on getting these up to scratch! I also really support initiatives to get us doing what we can to make sure the impacts of climate change are reduced. I was shocked to understand how much sludge goes to the dump from the water treatment plant so really endorse improving on this! While the buildings in civic square are beautiful, I'd rather we spent money on the things above so sadly support demolition :(

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

While buses are so bad, I feel hesitant to support parking increases. I also worry how this will affect people who rely on cars for accessibility reasons. I'm sad that things have got so bad in terms of water infrastructure for example and that we haven't picked up our game on climate change but am glad we're looking these challenges in the face. I want to make sure that we don't forget about our disabled community members when we plan for the future and acknowledge indigenous/te so Māori experience and expertise in looking after our environment. I don't agree with increases for Toi Poneke space users, many organisations are already running on the smell of an oily rag and even small increases can hurt. It's painful to have rates increases which is why I really support being pragmatic in what we spend the money on (sadly for me, personally I would be gutted if we tried to spend money on buildings that are so EQ prone in Te Ngakau for example) Thanks for your work, I particularly appreciated the overview documents to get a "TI;Dr" on decisions.

Central Library

Te Ngākau funding for future work

**Q17. Your comments on the big decisions (optional)**

I agree with a suggestion that the two buildings on civic square should be demolished and the sites added to the civic square as park, with the insurance used to fund the library rebuild. There is too little public flat open space in the central city and the need for it will grow as the population density in the inner city increases. WCC needs to prioritise more green flat open rec space in the central city - there's hardly even a basketball court, let alone any proper children's play areas. The Avalon playground puts anything in WCC area to shame.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

Neutral.

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

I support increasing spend in the current budget.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

As mentioned, what I'm not seeing in any of this is a priority given to recreational flat green open spaces in the inner city. It's turning into a ghetto of high-rise apartments/ slums with no rec spaces, hardly even a basketball court for all these new residents. No one else but council can provide these - instead of facilitating yet more buildings, why not more parks? e.g. why not make Civic Square bigger? Let's think like Lisbon - a network of connecting squares, instead of more car parks. This would really make us attractive to pedestrians, residents, shoppers and therefore businesses too. Also, why not more proper children's play areas? Avalon puts WCC to shame. Likewise Christchurch. The child play areas in WCC are small, dull, and too few. Again, a relatively low cost thing that would make a huge difference to the friendliness of our city to its most important residents.

Investment in three waters infrastructure  
Cycleways

**Q17. Your comments on the big decisions (optional)**

Major expenditure on three waters is long overdue- we cannot afford to have further failures of major pipes especially sewage pipes. I do not consider the current Council is competent to design and implement further cycleways. The Island Bay and now Brooklyn cycleways were poorly consulted, poorly designed and not fit for long term use. Until better processes are developed to democratically consult on cycleways I suggest the Council put a hold on any further cycleways being constructed.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

I strongly oppose the proposed budget.

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

I support keeping the budget the same but with some changes.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

**Q17. Your comments on the big decisions (optional)**

The Social Change Collective ran a workshop for approximately 50 young Wellingtonians on 6 May, to help them to uncover their vision for Wellington's future. Our network's vision is for liveable, affordable sustainable cities. Young people in Wellington know that there is precious little time left to adjust our cities to become climate-resilient. We are aware of decades of under-investment in our infrastructure and community spaces. We want to be able to swim safely in our waterways, spend time in community spaces like our Library, safely use active modes of transport like cycling, and have peace of mind that our future is being protected against climate change. Our network supported the Long Term Plan's overall objectives of increased infrastructure investment to tackle the big problems of growth, climate change, housing, transport, and waste minimisation now rather than later. Participants supported the most ambitious options for cycleways, Te Atakura, and three waters infrastructure. We questioned why the overall rates and debt levels weren't specifically consulted on. In our view, it has never been cheaper or a better time to raise debt to renew our critical infrastructure and prepare for the future. We support spreading the cost of investment over the lifespan of assets through debt. It is cheaper to invest now than to delay and produce capacity bottle-necks. But it's not all about finances. Given that the council has declared a climate emergency, we questioned why each proposal isn't transparently assessed against its climate impact, in the same way that fiscal cost is clearly labelled. We ask Councillors to make this a truly long-term plan by considering the impacts decisions today will have on us - the rangatahi of Wellington, who will bear the impacts one way or another.

**Results of a workshop with approximately 50  
young Wellingtonians on Wellington City  
Council's Long Term Plan**

✓ community spaces  
✓ accessibility

## Library and Civic Square

Do people have access to facilities?

Pop up libraries are cool but quite corporate/stark. Access for community services like CAB

don't want to ↑ rental prices more

Should we strengthen it now (2025 opening) or a little later (2028 opening)?

↳ 2028 - later, therefore have money to spend on other issues that are more pressing.

Should we pay for its restrengthening through debt or rates?

An increase in rates will impact renters while paying for it through debt would negatively impact renters.

What does the central library mean to you?

accessibility + inclusion of lower socio-economic status people who have a

The physical space wouldn't mean as much to me as making sure the groups that are supported are supported

Option 1: Strengthen now by temporarily exceeding the debt limit (preferred)	Option 2: Council to strengthen Central Library later	Option 3: Strengthen now by increasing rates further
This option repairs the building's structural issues to the highest extent possible. It includes base isolating the building. Base isolation means the building would likely be safe to occupy during and after a significant earthquake. The building's heritage value will be retained, and it will integrate more with Te Ngākau Civic Precinct. In this option our debt level will remain at 225%, but Council has agreed to accept the breach in the first three years of this plan to enable the project to be completed. This breach will be mitigated by any capital not spent being used for the library project rather than on new projects. Our debt level will be back below our limit by year 4 - 2024/25	This option will repair the building's structural issues in the same manner as in Option 1, however this option does not exceed the Council's debt limit. As in Option 1 the full costs of this project will fall to Council, but in this option the project would be delayed until a period of the Long-term Plan when there is sufficient borrowing capacity for the project to go ahead. This means Council would remain under its debt limit with this option. In this option the Central Library would reopen in 2028, instead of 2025.	This option will repair the building's structural issues in the same manner as in Option 1, and allows for the remediation to happen as per the original timeframe (open 2025). However, this option does include an extra 3% rates increase above the 12.5% in year 1. The increase in rates will allow the Council to rapidly pay down more of the additional debt that it has taken on.

★★	★★★	★★★
----	-----	-----

There are too few free community spaces - wifi,...

Two buildings in Civic Square need strengthening. Should the Council demolish and sell a long-term ground lease? Sell it outright? Or retain it and strengthen it (at considerable cost)?

Is the heritage value of these buildings important to you? What is your vision for Civic Square?

the current plan for the town hall is for a venue space + when the venue is done for orchestra Wellington to be done there we need spaces between 500-800 (mid size venues) and more spaces for community etc/local art accessible + rehearsal spaces.

## Sewage sludge & waste

Sewage sludge makes up 20% of what goes to the Southern Landfill. The Council actually needs household waste (4-1 ratio) to mix with the sludge. If we continue as normal, we need to expand our waste at a greater rate than we might like!

Other materials / research into this?

important step to addressing/minimising waste

Does investing in a waste water treatment plant at Moa Point sound good? (no sludge pipes)

Once sludge minimisation is in place we need to go hard on waste minimisation.

When sludge pipes fail it can be really disruptive - this happened last year.

Or is better technology at the landfill the answer?

Why not both?

Wastewater treatment in NZ kinda out. What's the guarantee that effluent coming out of the treatment plant doesn't contain heavy metals etc?

Option 1: No change in current practice	Option 2: Invest in technology at Southern Landfill	Option 3: Sludge minimisation through Council funding	Option 4: Sludge minimisation through alternate funding (preferred)
The cheapest course of action would be to keep pumping raw wastewater across the city and disposing of it in the landfill. This is a feasible and affordable choice. Capital cost and debt impact: No change. Rates change: None.	We could invest in better infrastructure at the Southern Landfill. For example, we could install a thermal drier (estimated additional total expenditure around \$86.134m) and this would go some way to reducing the volume of sludge to be disposed. This option reduces some of the sludge volume to landfill, but leaves a significant remaining volume of sludge to be disposed at the landfill. In addition, the pumping of sewage across the city would continue. Capital cost and debt impact: \$86m to \$134m. Rates change: 0.30% 3 year average increase.	In option 3 we invest in the existing wastewater treatment plant site at Moa Point. It would mean the sludge would not need to be pumped to the Southern Landfill and would help the city meet its environmental objectives. Option 3 would be a long-term investment that would better reflect our aspirations on carbon and waste reduction. Capital cost and debt impact: \$147m to \$200m in first 10 years. Rates change: 1.05% 3 year average increase.	Option 4 delivers the same service and benefits as Option 3. However, this option is our preferred option, because the cost of the project will be delivered and funded through an external fund enabled by the Infrastructure Funding and Financing Act 2020. It means that the project would not be funded by Council debt and we would not exceed our debt-to-income cap as in Option 3. The same asset will still be constructed as Option 3 (at a value of \$147m-\$200m). Capital cost and debt impact: Same as Option 3, but through alternate funding, so no cost to Council. Rates change: None, but a levy of approx. \$70 to \$100 per residential ratepayer collected per year from year 4. fair to different income earners? No!

Through rates or through a residential levy?

It doesn't seem fair that everyone would have to pay the same amount in a levy regardless of income.

The current system is holding us back from making impact in other areas of environmental concern e.g. waste. Make high 0 carbon + low waste!

Cycleways

---

**Q17. Your comments on the big decisions (optional)**

Cycleways are great, but I disagree that investing many millions in a few fancy bike paths makes cycling in Wellington safer. The cycleways cover only a short combined distance, and the rest of the roads in Wellington are in horrific shape, especially the ones sealed with loose chip. The roads are poorly done, and even worse maintained. Cycling, driving, and motorcycling on these roads is dangerous, and flying rocks cause huge amounts of damage to cars and bikes, at a high cost to rate payers which is not included in the overall calculation of the cost of chip seal vs asphalt roads. Many pedestrians also report being hit by flying rocks. I would like to see the council phasing out the use of loose chip seal in Wellington city and suburbs in this 10 year plan. It can be partially funded by making the cycleways a little less fancy. Only then can you claim to really be making Wellington better and safer for cyclists.

---

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

---

**Q19. Do you support the proposed budget?**

I somewhat support the proposed budget.

---

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

I think the building consent fees are absurd. The hourly rates are already too high, and I don't see the increase as justified, much less increases of this size. 28% increase in already high fees is daylight robbery

**2021–2031 | Long-term Plan Consultation**

This joint submission has been prepared by the group of zero waste advocates listed below. We are passionate about circular economy, eliminating waste and valuing resources; with this focus, responses have been prepared to Question 1, 4 and 7 in the Long-term Plan consultation document.

- Caroline Arrowsmith**, *Sustainability Trust*
- Hannah Blumhardt**, *The Rubbish Trip*
- Sophie Brooker**, *Wellington Waste Managers*
- Sue Coutts**, *Zero Waste Network*
- Polly Griffiths**, *Sustainability Trust*
- Ali Kirkpatrick**, *Waste-ed*
- Karina McCallum**, *Wellington Waste Managers*
- Careoline-Charlotte Michael**, *Organic Wealth*
- Liam Prince**, *The Rubbish Trip*
- Te Kawa Robb**, *Para Kore Marae Inc*
- Susie Robertson**, *Sustainability Trust*
- Kate Walmsley**, *Kaicycle*

**Question 1 – Investment in three waters infrastructure**

Which of these options do you prefer?

	Enhanced (\$2.4b investment – the Council’s preferred option)
	Maintain (\$2.0b investment - lower rates and debt)
	Accelerated (\$3.3b investment – higher rates and debt)
	<b><u>None of these options</u></b>
	Don’t know

**Question 4 – Te Atakura First to Zero (Climate Change)**

Which of these options do you prefer?

	<b><u>Fully fund the programme (Council's preferred option, \$29.9m investment)</u></b>
	<b>Low level of funding (\$18.1m investment, lower rates and debt)</b>
	<b>Medium investment with savings (\$25.4m investment, lower rates and debt)</b>
	<b>None of these options</b>
	<b>Don't know</b>

### **Question 7 – Reducing sewage sludge and waste**

	<b><u>Sludge minimisation through alternate funding (Council's preferred option, \$147m-\$208m capital investment funded through a levy, no additional rates increase)</u></b>
	No change in current practice (no change to investment, rates or debt)
	Invest in technology at Southern Landfill (\$86m-\$134m capital investment and additional 0.39% rates increase)
	Sludge minimisation – through Council funding (\$147m-\$208m capital investment, above debt limit, and additional 1.65% rates increase)
	None of these options
	Don't know

### **Comments**

Please note we have only responded to Question 1, 4 and 7 due to the remit of our group.

### **QUESTION 1**

None of the options presented in the LTP have provided any major review or analysis of the resilience or sustainability of the three waters network as a whole. The enormous size, complexity and importance to a well-functioning city of three waters infrastructure requires its future to be very carefully considered. As highlighted by the work of [Transition-HQ](#), the world is looking at a future where we will have no choice but to live more efficiently on less energy - big infrastructure depends on high energy inputs to run.

While we understand that historic underinvestment has left Council with little choice but to increase investment in critical upgrades and maintenance now, there is an enormous missed

opportunity to rethink the system for the genuine long-term (beyond ten years). Given the size of the infrastructure and the huge costs (expenditure, energy etc.) of running and maintaining it, we must begin to explore opportunities that consider how to better address the climate and local environmental impact of the system as it is now, while building more resilience and efficiency into our water systems. These opportunities can be developed through applying circular economy frameworks to the way we use, move, reuse and dispose of water.

We fully support the submission by the Poo Breakfast Club on the need to start exploring the feasibility of an alternative system for managing human waste/biosolids that does not rely on the wastewater system. Using water to transport biosolids increases the contamination of both the biosolids, and the water.

Instead, solids and wastewater should be kept separate (thus uncontaminated). In such a system, biosolids can be processed either at a local level or collected and processed at a centralised composting facility separate from the wastewater treatment plant. While this is a long-term issue, budget must be allocated now to investigate and help develop a source-separated wastewater/sanitation system, as it may take decades to phase in completely. We recommend some waste minimisation funding for organics goes towards pilot and feasibility studies for decentralised, source-separated sanitation systems.

The consultation supporting documents identify the following action “*Making investment in green infrastructure business as usual with mātauranga Māori guiding delivery where it is practicable in relation to the impacts of stormwater.*” We recommend that tikanga should also guide delivery, and we recommend deleting the words 'where it is practicable'. The idea that tikanga Māori might not be considered for reasons of practicality is not itself, tika - all responses need to be informed and guided by mana whenua and tikanga Māori. It's not for Council to determine, but to ensure mana whenua are supported to guide.

Council must also consider smaller-scale initiatives that can improve environmental outcomes and reduce load on the infrastructure in the short-term. Such initiatives include:

- Prohibiting the disposal of food waste into the wastewater system in order to reduce pressure on the wastewater network and mitigate waste-related emissions. This would include banning new installations of waste disposal units in households (e.g. [Insinkerator](#)) and technologies that process commercial quantities of food waste to be disposed of in wastewater (e.g. [ORCA](#) and [lugis](#)). Any existing systems should be phased out akin to the Climate Change Commission's proposed phase-out of gas connections.
- Installing litter traps at key stormwater outflow sites, in consultation with ecologists with relevant expertise (e.g. the pathways of migratory fish), could help reduce the incidence of plastic pollution in the marine environment and would also provide a good opportunity to collect data on litter concentrations and types.
- Alternative approaches that improve efficiency of water usage and retention must be considered as part of investment in the three waters infrastructure. For example, enhanced education, tools and incentives to encourage and, in some cases, require

water conservation activities; effective and strategic water metering; encourage, incentivise and ultimately require greywater recovery; invest in and implement sustainable urban drainage systems (SUDS). The [Hutt City Long Term Plan Consultation](#) acknowledges that reducing water consumption is vital for the region for environmental protection and fair distribution of water, and we support metering to provide information to help us understand water demand, find leaks and target water usage reduction activities.

#### **QUESTION 4**

We support the full funding of Te Atakura. However, we believe its scope is much too narrow. While energy use and transport are important, Wellington City's response to the climate and ecological emergency must be much broader, encompassing zero waste and circular economy frameworks, water use reductions, resilient urban redesign, biodiversity, and community resilience, among others.

It is particularly crucial that the transition to a zero-waste, circular economy is embedded in Te Atakura and its funded workstreams for the next ten years. We strongly support the Council investigating the inclusion of circular economy concepts into the Council's policy framework, as stated on p. 47 of Te Atakura, and encourage Council to go further and develop a full circular economy action plan as part of its core work on climate action. The transition to a circular economy presents one of our best opportunities for slashing Wellington's consumption-based emissions, as well as building in long-term resilience and creating employment.

We cannot overstate the importance of shifting to a circular economy as part of climate action. As much as 45% of global emissions are associated with making products, and circular economy strategies are needed to tackle these emissions. Furthermore, the recent [Circularity Gap report](#) outlines how simply reducing emissions in line with our Nationally Determined Contribution is not enough. Nationally Determined Contributions (NDCs) overwhelmingly focus on the energy transition and moving to non-fossil sources. Even if all NDCs are implemented, the rise in temperatures is still forecast to hit 3.2-degrees this century. By implementing a shift to a circular economy alongside meeting NDCs, global warming can be kept to 1.5 degrees.

We note the proposed workstream, under all proposed options, to measure Council and City greenhouse gas emissions and urge the council to include within this workstream a measurement approach that goes beyond the limited focus on production-based emissions. Taking only a production-based approach to measuring Wellington's emissions (let alone national and global emissions measurements) is a misleading representation of the climate impact of our city. It is crucial that the measurement of Council and City greenhouse gas emissions under Te Atakura incorporates consumption-based emissions and includes measurement of circularity. This will make the importance of a transition to a circular economy much clearer (for more detail on these points, see the [Zero Waste Network's submission on the Climate Change Commission's draft advice here](#)). Having this information inform Te Atakura's work and funding is critical.

While Te Atakura itself may not be able to stretch across all aspects of responding to the climate emergency, it should be well-connected with relevant Council-led initiatives, such as the Sustainable Food Network Action Plan, as well as community-led initiatives, to proactively avoid operating in a siloed manner. It is critical that the adaptation planning workstream of Te Atakura involves food and water security and resilience. The Wellington Climate Lab in particular presents a great opportunity to explore cross-sectoral, multiple-duty and paradigm-shifting solutions to the challenges our city faces.

We believe Te Atakura will have much greater success in achieving WCC's Priority Objectives 5 (an accelerating zero-carbon and wastefree transition) and 6 (strong partnerships with mana whenua) through formal integration of community input and advice into the work programme. We recommend that the delivery of Te Atakura involves community advisory panels/reference groups, e.g. for waste, emissions, circular economy, as there is substantial knowledge and skill in these areas in our community that can be drawn on (see also our response to Decision 7). Partnering with communities is also crucial for adaptation planning that will affect everyday people and businesses long into the future. Community partnership will help generate actions that are fit-for-purpose and well-accepted by Wellingtonians, and have long-term positive impacts.

Business and community funding provided through Te Atakura should be managed strategically to generate the most holistic, cost-effective outcomes possible. We believe the top-down funding approach results in a hodge-podge of siloed projects being funded. Te Atakura should facilitate and support collaboration between multiple sectors, including business, social enterprise, community organisations, mana whenua, and other stakeholders, in order to achieve greater impact and better outcomes per dollar spent of the limited funds available.

Having well-thought-out funding priorities and programmes will help amplify outcomes. For example, the Climate and Sustainability Fund should be made available to help advance circular economy models and initiatives, such as repair, reuse and sharing economies. We support the proposed workstream to provide support for car sharing and believe this support could be extended to provide support for the sharing economy more generally for a wider range of goods and services, from tools and clothes through to appliances and other goods. These could operate through peer-to-peer sharing platforms (such as Mutu), through community-run initiatives such as the Wellington Tool Library, or business models such as laundrettes. Formalising and expanding the sharing and service economy has been recognised as a key way in which high-income countries can reduce high levels of climate intensive material consumption.

Wellington has a fantastic opportunity to show leadership in the climate action space, both nationally and internationally, by placing the transition to a circular economy at the heart of climate action. WCC has a crucial role to signal and lead this transition, and facilitate and support collaboration.

## **QUESTION 7**

We agree there is an urgent need for a solution that stops the need for sludge disposal at the Southern Landfill. We welcome the Council's commitment to addressing this issue urgently.

We fully support the submission by the Poo Breakfast Club on the need to start exploring the feasibility of an alternative system for managing wastewater and biosolids/human waste in the longer term that will build in true resilience. While this is a long-term issue, budget must be allocated now to investigate and help develop a source-separated wastewater and sanitation system, as it may take decades to phase in completely. We recommend that some of the waste minimisation funding earmarked for organics goes towards pilot and feasibility studies for decentralised, source-separated sanitation systems.

The current situation, requiring each tonne of sludge to be mixed with 4 tonnes of general waste for disposal, has been a significant barrier to Council action on waste minimisation. We have been repeatedly told that progress on waste diversion from landfill is dependent on removal or minimisation of the sludge. Now that a solution has been identified, we urge the Council to be ambitious and plan to avoid the need for future expansion of the landfill. Given the large investment of money to remove the sludge, the findings from the strategic review of waste, and the additional waste levy income, must be used to prepare and take action now rather than further delay.

We support the Council investing in the proposed infrastructure needed to reduce the amount of sludge that must be sent to landfill. However, we note that this is not a forever solution and is better understood as one that buys us the much-needed time to investigate, develop and build a more resilient and ecological, source-separated sanitation system that is ready to go before the ~50 year lifespan on the proposed infrastructure expires. We urge the Council not to continue kicking the can down the road on this issue, and to take the opportunity of time that the present infrastructural investment represents.

We note too the reference in the LTP to the potential that after sludge has been processed through the proposed infrastructure, that it could become "a product that could potentially be diverted from the landfill for beneficial re-use". We are concerned about this statement given the sludge will be contaminated with microplastics, heavy metals, persistent organic pollutants and other toxins as a result of being mixed with wastewater. We do not see a viable pathway for this sludge to be reused, safely. Again, the proposed infrastructure is not a long term solution to our sludge problems, it merely buys us time to develop a more resilient, source-separated system that will allow for safer beneficial reuse of the biosolids.

We urge the Council to involve the community in Waste Minimisation/zero waste beyond the formal consultation processes. One way this could be achieved would be by establishing a community advisory panel. For example, the recently established Waste Free Wellington group consists of individuals, organisations and businesses advocating and acting on zero waste in Wellington; there is substantial knowledge and capacity that can be drawn on. Community partnership will help generate actions that are fit-for-purpose and well-accepted by

Wellingtonians, and have long-term positive impact. This approach aligns with the Wellington Region Waste Management and Minimisation Plan (LM.6: Collaborate with private sector and community to work with local groups and waste companies).

Many of the groups who have come together to co-author this submission are part of the Waste Free Wellington group, which has three priority areas: community-scale composting; reuse economy; and building a resource recovery network. These priority areas align with actions already in the WRWMMP (for example, LM.3: Industry-based reuse). The group is supportive of the increase in landfill fees that will come in alongside the increase in the landfill levy and believe this can provide more funding for waste minimisation directed to developing solutions with business and the community.

We support Council plans to allocate more funding for organic waste diversion. The primary purpose of the organics fund should be to divert existing organic waste, particularly food scraps, not to support compostable packaging. Investment in packaging solutions are better aimed higher up the waste hierarchy - i.e. developing reusable packaging systems that have far more beneficial environmental and economic outcomes than single-use packaging systems (including compostables and recyclables). The uncertainties and risks associated with compostable packaging (including toxic chemical additives) should halt our use of such packaging until New Zealand has a much stronger regulatory and certification system for it.

We note that there is nothing explicitly in the LTP consultation about supporting the reuse economy beyond car sharing. Any funding should focus on the top of the waste hierarchy where there is the greatest potential to reduce waste. We are disappointed that work on the resource recovery centre is delayed until year 4; we know there is community appetite for more services in this area and opportunities coming through the Government's regulated product stewardship schemes (e-waste and potential container return scheme). There is the chance to work with the community now, to plan for further resource recovery capacity across the city and to implement this sooner. We are also disappointed about the lack of mention of construction and demolition waste, which makes up over 50% of waste going to landfill.

The current proposals are very centred on the waste that goes to the Council-managed Southern Landfill. The Council's waste minimisation focus needs to transcend that and consider waste generated by, and/or disposed within, the city as a whole. The new waste bylaw is a positive step and we look forward to seeing this being implemented and enforced, and appropriate Council funding allocated to enable this. Waste is a cross-cutting issue that should not be siloed in one department, otherwise the focus will remain on treating symptoms rather than turning off the tap and creating circular systems. The Council has the ability to lead and influence - particularly through procurement, funding and use of Council land - the creation of a circular Wellington. Waste is a climate issue far beyond the direct emissions from landfill, with nearly 50% of global carbon emissions being related to the consumption of products and materials. Focussing on a circular economy will reduce emissions, and bring additional co-benefits including job creation, resilience and community building.

- Q4. **What organisation are you submitting on behalf of?** not answered
- Q5. **Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?** No
- Q6. **If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer?** not answered
- Q7. **Oral forum time** not answered
- Q8. **Oral hearing time** not answered
- Q9. **Which of these options do you prefer? (3 waters decision)** Option 2. Enhanced investment (\$2.4bn - the Council's preferred option).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** Option 2. Take ownership (Council's preferred option, \$32m investment).
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 1. Low level of funding (\$18.1m investment, lower rates and debt).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** Option 1. Demolish and site developed through long-term lease (Council's preferred option).
- Q14. **Which of these options do you prefer? (Central Library decision)** Option 2. Council to strengthen Central Library later (complete in 2028 instead of 2025, additional 0.83% rates increase).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 3. Sludge minimisation through Council funding (\$147m to \$208m capital investment, above debt limit, and higher rates)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Cycleways  
Te Atakura (climate change)

---

**Q17. Your comments on the big decisions (optional)**

I think we should be finishing a cycle network as soon as possible, it should be brought up to the same high standard that roads for cars are. Cars are fairly space inefficient and hazardous and will be noisy and polluting for some time. It would be good to see a lot less street parking (especially main roads) I think you'd achieve this by building parking buildings, if the council can use street parking as an income stream then buildings may work as well. I think increasing cycling capacity is as much as the council should be spending on climate change, all the big decisions look urgent and expensive so any further funding should be coming from the government.

---

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

---

**Q19. Do you support the proposed budget?**

I somewhat support the proposed budget.

---

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

not answered

Cycleways  
Te Atakura (climate change)

**Q17. Your comments on the big decisions (optional)**

I am supportive of the city walking/biking the talk with regards to reducing carbon emissions. Alignment and exceeding our commitments under the Zero Carbon Act will require bold action and investment in a range of transport and stationary energy solutions. Te Atakura and the enhanced cycleway investment provide a clear pathway to meet these goals. The costs are high, but the next 10 years are the last chance we have to get it right.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

Investment in three waters infrastructure  
Cycleways  
Central Library  
Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Focus on what needs to be updated around infrastructure not on things that can wait and are not important At the moment the cycleways are not a problem. Focus on public transport not on cycleways that not one uses. The central library should be demolished or sold - it is not a priority at the moment. Until we have our finances under control everything at the southern landfill can wait. Money needs to be spend on getting our pipes/water infrastructure sorted not changing the landfill which is working well at present.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

I somewhat oppose the proposed budget.

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

I support keeping the budget the same but with some changes.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

not answered

- Q14. **Which of these options do you prefer? (Central Library decision)** Option 1. Strengthen now by temporarily exceeding debt limit (Council's preferred option, additional 0.79% to rates).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 4. Sludge minimisation through alternate funding (Council's preferred option, \$147m to \$208m capital investment funded through a levy, no additional rates increase)

Q16. **Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

not answered

---

Q17. **Your comments on the big decisions (optional)**

I strongly support the Council's ambitious and forward-looking agenda to renew Wellington's infrastructure, prepare for climate change, and enable modal shifts in transport. The proposed options sensibly balance the urgency to act with capacity constraints.

---

Q18. **You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

---

Q19. **Do you support the proposed budget?**

I strongly support the proposed budget.

---

Q20. **You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

---

Q21. **Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

I felt the consultation should have given opportunity to give feedback on the overall funding/financing levels. To ensure this is well-connected to people's priorities, it would be useful to offer various 'packages' of investment that combine differently scaled options of each major decision, each at a different rating/debt level, so that the feedback connects Wellington's desired service/infrastructure levels with the funding needed to pay for it. In my view the Council has plenty of fiscal space to keep borrowing. The key challenge is the resulting depreciation costs and its impacts on rates (with flow-ons for rents). I would strongly support the Council to continue working with central government (including through the review of local government) to explore options for central government to fund or part-fund depreciation costs of debt-funded infrastructure spending, or else reduce the link between debt and rates in some other way.

---

Cycleways

---

**Q17. Your comments on the big decisions (optional)**

Its time for Wellington to have a connected cycling network. Its no use having cycleways in some areas but not others. I do not support the de-prioritising of cycleways in the nothern suburbs. These suburbs are heavily car-dependent, and we need to make cycling in these suburbs safer and practical by introducing cycleways. My daughter is nearly two years old now and would like her to be able to cycle to school by the end of the ten-year plan period, rather than car being the only practical option. I'm not convinced that there is insufficient capacity to carry out Option 4 - you wouldn't say the same about large roading projects. The capacity can increase over time to match the funding available. If not possible to implement Option 4, I support the greater prioritisation of cycleways in the northern suburbs. At the every least, this should be given greater prioritisation of completing the Greater Harbour Way (coastal cycleways that are expensive to implement). I also support the comments made by Cycle Wellington in their submission on the LTP.

---

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

---

**Q19. Do you support the proposed budget?**

I somewhat support the proposed budget.

---

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Support proposed fee increases, with exception of weekend parking. I think there should be a smaller increase to \$3 per hour as public transport is insufficient on the weekend to get into town. In my suburb, buses only run every half hour on Saturday and every on Sundays. Support keeping swimming free for under 5s with the proviso that the council should investigate ways for people to prove that they are Wellington city ratepayers (i.e. non Wellington city ratepayers should still pay).

Cycleways

---

**Q17. Your comments on the big decisions (optional)**

I fully support the advocacy of Cycle Wellington for fully funding planned cycleways (Option 4). Delays to these projects are unacceptable. Cyclists have waited years for safe cycling infrastructure. We're on the right side of history on this given climate change and demand for livable, human-centred urban areas. I want a city that's livable for people, safe commuting options for cyclists and other forms of active transport. Infrastructure for cars needs to be deprioritised, and use of cars disincentivised.

Cycleways

Q17. Your comments on the big decisions (optional)

Cycle ways spends needed to be paused, Bus service a mess, buses unreliable WCC should have stuck with old Company Go Wellington , passengers were happy , drivers were happy. Until bus mess is sorted out we will continue to use cars as cant rely on buses to get me and my family to appointments . Wellingtons geography is not suited to all clyceays, need safe foothpaths. pedestrians needs safe places to walk without being hit by those fast scooters

Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)

not answered

Q19. Do you support the proposed budget?

I somewhat oppose the proposed budget.

Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?

I support keeping the budget the same but with some changes.

Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?

Do not increase car parking fees, people from outside the city drive to use the services, ie I meet people from Levin who had come to Pacific Radiology, there are medical services in town optometrists , psychologists , medical labs, Orthodontists, Banks that we visit and go with other family members, elderly neighbors . If you pick up Student from College it is not practical to catch 3 links of buses and take 1.5hrs to get to town for an appointment that is only available in the city. If you are self -employed and have a meeting i town time is money so if new bus system takes twice as long and 2 buses instead of the one it used to take , There is no logic to taking a bus to the city. Library is very important to the well being of the residents and give free access to a range of knowledge and helps assist with education and building a community , so dont take anymore money away from libraries , city and in the suburbs,

**Q17. Your comments on the big decisions (optional)**

- Three Waters (drinking, waste, storm) : No decisions should be made on water infrastructure until there is more information and certainty regarding the Government's 'Three Waters reforms' - Scope : WCC needs to narrow its focus and not take on responsibilities that sit with Central Government (social housing, much of Let's Get Wellington Moving) or that are already offered by other organisations (EV charging, home energy audits). On housing, WCC does not receive adequate Govt funding to offer social housing rent relief at the same level as the Government provides directly. So council housing rents are higher than Govt housing rents, unless subsidised by ratepayers. Owning and managing social housing is NOT a core competency of WCC. The LTP has \$179m expenditure on social housing - and I understand there is a c\$400m 'hole' compared to what is actually required. The level of rates rises proposed will impact the affordability for renters, homeowners, businesses and other organisations. WCC's rates rises will increase the demand for social housing! On LGWM, WCC should not pay for any SH1 improvements, and should receive Govt support to the same extent as other councils for other transport projects eg: Auckland's City Rail Link is 50% Govt funded. WCC simply cannot afford the level of investment proposed for LGWM. - Tradeoffs: WCC cannot simply choose to do more and more. Some activities need a rethink - do we keep funding a zoo (\$83m over the LTP) as well as Zealandia (\$19m)? - Value: Given the extraordinary challenges we face, WCC needs to exert a greater level of care and transparency with expenditure (why are we spending \$8.5m in the Begonia House?) and explore other revenue sources (eg: could congestion charges fund cycle lane investment?). - New approach: owning assets is risky, requires time energy, focus and skills. Given the myriad of challenges ahead, the council should review ownership of all assets - from buildings to port, airport, farms, landfills etc. Ownership is not a prerequisite for proper provision of services. We have seen first hand the risks of owning buildings - earthquake strengthening, leaky building issues, development / construction risk, building standards changing, insurance cost rising and community needs changing over time. Leasing matches expenses with income, provides flexibility and reduces risk. - Debt : what is the acceptable long term stable level of debt? The LTP shows debt reducing sharply from a peak in 22/23 that is only just over their target limit. Why is debt repaid so rapidly when it is funding investment in very long term assets? Transparency: WCC needs to provide better, clearer information. How can we choose between an option for sludge v an option for cycleways if we have no idea of the relative carbon abatement costs of the two options? All investment should have an associated carbon impact disclosed - positive or negative. Many expenditure items in the LTP are unexplained or unclear. There are no cost benefit analyses, and no outputs or impacts eg : km cycleways delivered or investment per user, or subsidy per unique visitor etc

Investment in three waters infrastructure  
Cycleways

---

**Q17. Your comments on the big decisions (optional)**

Functional and reliable water infrastructure is crucial for the life (and reputation) of the city. I think the most active approach possible should be taken to improve this infrastructure. I noted the Council preferred the third option so as to also gather information in the first period, but I would support setting aside the biggest amount possible in the budget for three waters infrastructure, so that all relevant work can be undertaken once information is gathered. As a Northern Suburbs resident I am highly supportive of plans to develop cycleways in this part of the city, as it seems to have received very little investment in this kind of infrastructure so far. A good cycle path along the Johnsonville to Ngaio, eg, could reduce a lot of traffic (and thus emissions, time cost etc) in this busy corridor and at the same time encourage young peoples' activity . I am unsure about the WCC money committed to LGWM - this project seems to be so troubled that I would be more inclined to support investment in public transport and active transport infrastructure that could occur outside of that and directly via WCC, but I don't fully understanding the funding mechanisms for these.

---

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

---

**Q19. Do you support the proposed budget?**

I somewhat support the proposed budget.

---

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

I urge the Council to prioritise basic, but key community infrastructure, such as library services, open green spaces, sports fields and parks, and community centres, as these types of amenities bring residents together, enable people to live active lives, and offer community spaces for people to spend time regardless of their housing situation. The social divided is so high on these types of amenities and investment in them will make the city and its suburbs more liveable. I also support greening and pedestrianising the central city as much as possible to make it an attractive area for residents of all parts of Wellington to come to.

- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** Don't know.
- Q14. **Which of these options do you prefer? (Central Library decision)** Option 1. Strengthen now by temporarily exceeding debt limit (Council's preferred option, additional 0.79% to rates).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 3. Sludge minimisation through Council funding (\$147m to \$208m capital investment, above debt limit, and higher rates)

Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below

None of these

---

Q17. Your comments on the big decisions (optional)

not answered

---

Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)

not answered

---

Q19. Do you support the proposed budget?

I strongly support the proposed budget.

---

Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?

not answered

---

Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?

not answered

---

---

Q17. **Your comments on the big decisions (optional)**

Sludge and waste minimisation: I selected option 3 because of the risk you've identified that you might not get the funding. If that happens, it sounds like there's a risk the project might not happen, or that it would happen at the cost of something else you'd agreed to - maybe something I am very keen to happen. I have no idea what the likelihood of any of this is, but that's why I selected option 3 rather than option 4. I would also support option 4.

Cycleways  
Te Atakura (climate change)

---

**Q17. Your comments on the big decisions (optional)**

I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I strongly support the acceleration of building cycleways and enabling more people to use this form of low carbon, active transport. I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets, and Innovating Streets improvements. I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere. I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels. I support WCC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise.

not answered

---

Q21. **Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

I believe council rates have been too low and should be increased to pay for urgent maintenance that has been put off for too long. Rates rebates and other forms of relief could be made more easily available if that is necessary to help those with low incomes living in expensive houses.

**Q17. Your comments on the big decisions (optional)**

I think that Wellington has a lot of catching up to do, following years of underinvestment in key infrastructure. We need to seriously invest in three waters infrastructure in order for our city to be functional and healthy, and we really, really need to invest in cycleways (and routes for other non-motorised transport) in order to be a functional, healthy, and a vibrant modern city - the current lack of cycleways is both dangerous to the population and discourages so many people from making choices that are smart for their health, communities, and the climate. We are a long way behind in many aspects of our spending, and I do not want us to forego other important services in order to catch up in these investments. I think the council needs to seriously consider debt limits and rates increases in order to get to be the city we want to be.

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

I note that the long-term vision put forward in this LTP is very narrow in scope and I (and others) would like more opportunities to be involved in more holistic city-wide planning - in ways that are more accessible to a greater range of people too.

Cycleways  
Central Library  
Te Ngākau funding for future work

**Q17. Your comments on the big decisions (optional)**

Hi, I live and skateboard in Wellington and moved here with excitement having seen wellington skate spots that predominantly were public plaza type spaces including the waterfront area. The wide space employed around the waterfront in particular is ideal for skateboarding to mix in with other citizens without bothering them or getting in their way. Skateboarding in Wellington was once (only a decade ago) at an international level of skill and enviable inner-city locations and drew many, myself included, from around NZ and overseas to move to. With the Skateboarding entering the Olympics coming up and the NZ Team is working with major brands like New Balance, the representation from Wellington City is missing. Matt Markland is on the team and (I think) from the Hutt valley, Auckland predominates, but there is an opportunity for involvement being missed now that 10 years ago would not have been missed. For the next 10 years, adding some focus and material support to wellington skateboarding will benefit the community directly and contribute to council goals around transport, emissions, and public space use and life. It also has the potential international presence and involvement with big sports brands. There are many skateboarders in Wellington and this submission is in alignment with many other submissions via the following: Our goals: Make Wellington one of the best cities in the world to be a skateboarder. Top Five Short-term Goals and Priorities Creating a 'Long-term/10-year plan' for the future of skateboarding in Wellington City. This is vital to ensure that mistakes from the past (poor design/construction) are not repeated. Future developments need to be well thought out with proper input and consultation with the broader skate community. Creating a central city skate park easily accessible by using public transport (and without the need for a car) by anyone living in all areas of the greater Wellington region. This can be achieved by upgrading Waitangi Park to cater to all levels of ability (beginner, intermediate and advanced) and types of skating (Park and Street courses), meeting current Olympic standards, and holding local, regional, national, and Olympic qualifying events. Reinstating a mini ramp back inside Kilbirnie Recreation Centre (at the least) until a better solution is found. There are no facilities or anywhere to go skateboarding during the Winter Months or when it is dark, wet, or windy. This is urgent and a top priority as Wellington is highly vulnerable to all the Elements for extended periods. This could easily be achieved by rearranging the current layout and moving 'Tinytown' (for which the ramps were removed) to another arrear inside. Furthermore, if the Council simply agreed to give us the small space required – the skate community could build the ramp themselves (The idea of removing the plastic floor should also be considered). A central city 'Skate Friendly Street Plaza' that provides a safe area for skaters to meet and skate together (and again which is easily accessible by using public transport by anyone living in all areas of the greater Wellington region. This is a vital ingredient for a healthy skate scene. All the great cities worldwide are well known for their skate communities — for example, Barcelona – MACBA. Putting a system in place to ensure opportunities to include 'skateboarding' in future infrastructure projects that could benefit the city are not missed. Achieving the goal of making Wellington city one of the best places in the world to be a skateboarder will require integrating small areas all around the city for street skating and ensuring the city is both accessible and inviting to move around in as a form of transport. This goal is achievable and does not have to be hugely costly. A great opportunity is staring us in the face with current future projects due to happen in the next ten years, including: A network of bike lanes which the Council currently want to spend \$120 million on over the next ten years. These need to stop being classed as 'Bike lanes'. Many other diverse user groups (skateboarders, long-boarders, roller-skaters, scooter, etc.) can benefit from these lanes by removing all patches of rough ground from designs. There is also no reason why they could not be more inviting, fun, and exciting by including pump-bumps and banks. Future redevelopment of public spaces over the next 10-years, including Frank Kitts Park, Te Aro Park, the National War Memorial, and The Civic Centre (to name a few), could also provide a skate-able area. This could be in the form of a perfect ledge, bench, set of stairs etc.

Q18. **You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)** not answered

---

Q19. **Do you support the proposed budget?** I somewhat support the proposed budget.

---

Q20. **You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?** not answered

---

Q21. **Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Generally agree, but always want public ownership foremost, ceding IP for private funding is historically regretted. Retain the civic square atmosphere and heritage! invest in it, keep it, don't divvy it up or repurpose. Transport right now needs your interference - protect bus drivers from the race to the bottom system that we now have, not the companies trying to profit.

These need to stop being classed as 'Bike lanes'. Many other diverse user groups (skateboarders, long-boarders, roller-skaters, scooter, etc.) can benefit from these lanes by removing all patches of rough ground from designs. There is also no reason why they could not be more inviting, fun, and exciting by including pump-bumps and banks. Future redevelopment of public spaces over the next 10-years, including Frank Kitts Park, Te Aro Park, the National War Memorial, and The Civic Centre (to name a few), could also provide a skate-able area. This could be in the form of a perfect ledge, bench, set of stairs etc.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

Q19. Do you support the proposed budget?

I somewhat support the proposed budget.

---

Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?

---

not answered

Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?

not answered

Cycleways  
Central Library  
Te Ngākau funding for future work

**Q17. Your comments on the big decisions (optional)**

Make Wellington one of the best cities in the world to be a skateboarder. Top Five Short-term Goals and Priorities 1. Creating a 'Long-term/10-year plan' for the future of skateboarding in Wellington City. This is vital to ensure that mistakes from the past (poor design/construction) are not repeated. Future developments need to be well thought out with proper input and consultation with the broader skate community. 2. Creating a central city skate park easily accessible by using public transport (and without the need for a car) by anyone living in all areas of the greater Wellington region. This can be achieved by upgrading Waitangi Park to cater to all levels of ability (beginner, intermediate and advanced) and types of skating (Park and Street courses), meeting current Olympic standards, and holding local, regional, national, and Olympic qualifying events. 3. Reinstating a mini ramp back inside Kilbirnie Recreation Centre (at the least) until a better solution is found. There are no facilities or anywhere to go skateboarding during the Winter Months or when it is dark, wet, or windy. This is urgent and a top priority as Wellington is highly vulnerable to all the Elements for extended periods. This could easily be achieved by rearranging the current layout and moving 'Tintytown' (for which the ramps were removed) to another rearer inside. Furthermore, if the Council simply agreed to give us the small space required – the skate community could build the ramp themselves (The idea of removing the plastic floor should also be considered). 4. A central city 'Skate Friendly Street Plaza' that provides a safe area for skaters to meet and skate together (and again which is easily accessible by using public transport by anyone living in all areas of the greater Wellington region. This is a vital ingredient for a healthy skate scene. All the great cities worldwide are well known for their skate communities — for example, Barcelona – MACBA. 5. Putting a system in place to ensure opportunities to include 'skateboarding' in future infrastructure projects that could benefit the city are not missed. Achieving the goal of making Wellington city one of the best places in the world to be a skateboarder will require integrating small areas all around the city for street skating and ensuring the city is both accessible and inviting to move around in as a form of transport. This goal is achievable and does not have to be hugely costly. A great opportunity is staring us in the face with current future projects due to happen in the next ten years, including: (a) A network of bike lanes which the Council currently want to spend \$120 million on over the next ten years. These need to stop being classed as 'Bike lanes'. Many other diverse user groups (skateboarders, long-boarders, roller-skaters, scooter, etc.) can benefit from these lanes by removing all patches of rough ground from designs. There is also no reason why they could not be more inviting, fun, and exciting by including pump-bumps and banks. (b) Future redevelopment of public spaces over the next 10-years, including Frank Kitts Park, Te Aro Park, and The Civic Centre (to name a few), could also provide a skate-able area. This could be in the form of a perfect ledge, bench, set of stairs etc. On a personal note, I have lived in Wellington for a large proportion of my life and I love living here with my family. I have also been a skateboarder for a number of years now and two of my children are very keen on it too. It would be fantastic if WCC can make a commitment to include 'skateboarding' in its future infrastructure design and investment planning. Now is the time to do it. Thank you.

Te Ngākau funding for future work  
None of these

**Q17. Your comments on the big decisions (optional)**

For Decision 5 (Te Ngākau) I don't support any of the options offered. The buildings should be demolished and rebuilt, but with the council not selling either the freehold (land) or lease. Keep it in public ownership - and a 99 or 999 year lease doesn't count as public ownership. Overall, there are multiple references to debt limits. These are entirely artificial and should be ignored by councillors. Compliance with these suggestions is entirely a political choice to provide worse services or sell off land or buildings. The issues Wellington is facing require major investment for intergenerational benefits, and to make up for intergenerational under-investment. Debt has never been cheaper and the Council has a solid credit rating. It should be borrowing more money to deliver not just the maximum options offered here, but to retain the Municipal Office Building Land and Civic Administration Land. The Council should also be (a) building far more grade-separated cycle lanes to encourage people to cycle more by feeling safe, and (b) lobbying NZTA to change the law to make cycling and riding scooters on the pavement illegal for anyone older than 12 years of age, and with a maximum speed of 10 km/h. Permitting adult cyclists and scooter users to use the pavement disincentivises NZTA from investing in cycle/scooter lanes, and adds additional risk to pedestrians when we should be encouraging more walking from climate change, traffic congestion, and public health perspectives.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

I somewhat oppose the proposed budget.

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

I support increasing spend in the current budget.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

For Governance (Statement of Service Provision 1.1) the Council states that it only intends to meet the legislated timeframe for responding to LGOIMA requests in 95% of cases. Planning to break the law 5% of the time - or for 1 in 20 requests - should be out of the question. The Council has been subject to these obligations since 1987. After 34 years, there can be no excuse for not having a target for complying with the legislated time limit 100% of the time, especially given the extension provisions in the Act. Also in relation to 1.1 Governance, I am disappointed there is no apparent effort by the Council to explore more participatory forms of local democracy, such as citizen juries or citizen assemblies (although these should be 'residents' or 'workers' depending on the issue, rather than 'citizens' as this would exclude those who have a residence visa rather than citizenship. Finally in relation to 1.1 Governance, the Council should be setting a target to reduce the number of 'closed to the public' workshops for councillors to 'discuss' issues. These discussions need to be open to the public so that we can see and hear what our elected representatives have to say on particular issues, and to avoid the fiction that substantive decisions are not taken at these workshops. For Urban Planning (6.1) the Council should re-instate the funding for the Chinese Garden in Frank Kitts Park. In addition, the Council should rescind the previous decision to sell or lease the site of the Michael Fowler Centre car park. This should be retained in public ownership, and the Council should pilot using a citizen's assembly process to determine what use to make of the space once the ballet company returns to the St James' Theatre. Under 7.1, Transport, there are two safety risks that the Council should prioritise funding to fix. These are the junction of Bolton Street with The Terrace, where there should be a stop sign, or give way sign for those driving down Bolton Street approaching The Terrace. For many years this has been a dangerous road for pedestrians to cross. The second location that needs urgent attention is Chaytor Street in Karori - this is incredibly dangerous for cyclists.

Investment in three waters infrastructure  
Central Library

---

**Q17. Your comments on the big decisions (optional)**

As a superannuant I can't afford another cent for rates The council should get rid of the library to an investor then lease it back, or rent empty buildings in Wellington. The zoo should no longer be council business. We don't need a zoo. Let's put our money into Zealandia and bush protection in Wellington. Seems to me to be much cross over between Central Gov. and Local Gov. Much of pipe and water maintenance should have been done along the way. Money seems to have been wasted and in my opinion is still being wasted.

---

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

---

**Q19. Do you support the proposed budget?**

I strongly oppose the proposed budget.

---

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

I support keeping the budget the same but with some changes.

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Money is being wasted on poor planning, poor service delivery, long delays, and council being 'business owners' to things they seem to lack any understanding of. To ask superannuations to pay to fix passed mistakes when we've spent up to 60 years paying for those mistakes to be made is not correct. Stop asking us all the time. Get a few genuine experts on the council staff to professionally sort out the problems. Please don't get more consultants who produce yet more reports.

---

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Sludge and waste minimisation  
Te Ngākau funding for future work

**Q17. Your comments on the big decisions (optional)**

Three waters: It is apparent that Option 1 won't be adequate, given the critical nature of the task at hand. Option 3 is way too expensive, especially if this is on top of the proposed 13.5% rates increase. It is a tough decision, yet Option 2 seems to be the best trade-off in this bad situation. Cycleways: Sure, finish the projects that you started (so at least it meets the goals of being safer for cyclists in those areas). Compared to other big decisions, this takes a lower priority in my book, and can wait. The extra funding should be allocated more pragmatically - top of my mind is addressing Aro Valley & the hill that leads to Kelburn, as it is frustrating being held up by slow cyclists (ditto for Salamanca Road past the squash centre). I haven't observed the impact of cyclists in the Eastern Corridor (except for the cycle lane on Crawford Rd, which has conveniently removed them from the road lanes), though having previously lived in Brooklyn I found the road wide enough, especially with the passing lane, to accommodate cyclists and make it easy for vehicles to pass - therefore that can be held off for a while. Given the presence of cycle lanes on southern Victoria St, I believe that road should have its speed limit restored to 50km/h since it is a major traffic route like Taranaki St. Climate change: I note that the programme can be adequately delivered with the lowest level of funding. Given the encouragement of increased uptake of public transport and cycling, I would expect council staff & councillors to adopt these modes of transport, rather than incur a huge expense in upgrading to electric vehicles. A pragmatic approach to vehicle funding should be adopted, e.g. council contractors who carry tools, such as groundskeepers. Parking enforcement could pay for their own EVs as they save up their income from infringement fines and parking charges (though it would be exceedingly arrogant to increase parking charges significantly to fund this). I don't know much about the Home Energy Saver audits, though expect that the current level of funding can maintain this offering. Sludge/waste minimisation: Based on my current rates, a \$70-\$100 annual levy would cost more than a 1.65% increase on my current rates, so Option 3 would work better for me than the levy proposed in Option 4 (which I assume would increase towards the \$100 over time). The first two options aren't adequate in order to address our ecological need. Civic Square / MOB & CAB: Definitely demolish and rebuild - we need a clean slate so that we're not encumbered by increasing costs of strengthening work over time and as Murphy's Law rears its head (which appears to be the track record). And this time, get it right - we've known for decades about Wellington's seismic hazards, and whoever designed the CAB and Library building should've known better than to specify such poor design details such as a 5cm overhang of floor sections on their supporting pillars (for example). I'm not attached to the design of the CAB building (although it's nice), and definitely not the MOB building, so I won't be sorry to see that go. I support the design & development of a suitable venue for the NZSM/NZSO music centre, and would rather not see that be lost to some general commercial office development.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

I strongly oppose the proposed budget.

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

I support decreasing spend in the current budget.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

The proposed parking fee increase on weekends (i.e. nearly doubling it) is excessive, as well as coupon parking and trade parking (which would very likely lead to significant cost increases for trade services). The proposed increase of various building consent fees of 27-28% is very large - and contradicts the intention to make housing more affordable. There doesn't seem to be an acceptable explanation for a 13.5% general rates increase before the add-ons such as a further 2.51% increase for the recommend water infrastructure option are considered. Even if this is just for the first year, that increased amount is maintained forever after (unless rates decrease in future years). By 2029, based on the proposed annual increases, I calculated that the average rates bill would be 1.66x the amount paid for the 2020-2021 year - which is obscene. Once these projects are delivered, when are we going to see a rates reduction? Also, the distribution of the rates increases based on capital value should have a wider differential, so that owners of \$2million-plus residential properties can shoulder more of the increase, while those of us getting by with a more modest property value aren't unfairly disadvantaged. This is especially given the general rapid increase of house prices, which does not reflect typical incomes that are rather inelastic in comparison. My impression is that the more expensive properties would be owned by households with the sufficient disposable income to shoulder more of the burden of these rates rises.

- Q8. **Oral hearing time** not answered
- Q9. **Which of these options do you prefer? (3 waters decision)** Option 3. Accelerated (\$3.3bn investment – higher rates and debt).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** Option 2. Take ownership (Council's preferred option, \$32m investment).
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** Option 2. Proceed with base build proposal for public purposes (higher debt and rates)
- Q14. **Which of these options do you prefer? (Central Library decision)** Option 1. Strengthen now by temporarily exceeding debt limit (Council's preferred option, additional 0.79% to rates).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 4. Sludge minimisation through alternate funding (Council's preferred option, \$147m to \$208m capital investment funded through a levy, no additional rates increase)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Cycleways  
Te Atakura (climate change)  
Sludge and waste minimisation

---

**Q17. Your comments on the big decisions (optional)**

Long term planning should always be driven by our responsibility to the people who come after us. Building an integrated cycle network, doing everything we can to address climate change, including mitigation and minimising our waste are critical to meeting our responsibility to the wellbeing of these future generations. This is about the legacy Wellingtonians want to leave: A city that is forward looking, responsible to the planet and to the wellbeing of our children and their children. The longer we leave it, the harder it become for them to do anything about. Doing it now is the pragmatic and right thing to do.

---

Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

The sludge removal must be done at Moa Point, because the existence of Southern Landfill for sludge disposal, must change to allow for emissions reductions and waste minimisation. Assumption is the mother of all stuff ups. For years it has been assumed Southern Landfill is going to be the one mega landfill into the future when all others in the Wellington Region are closed. This assumption is based on market share, revenue, basically the same landfill centric thinking that has seen Wellington have 3 class1 landfills within forty minutes drive of the CBD in a small geographic area as each council focuses on revenue generating assets, and market share in the waste stream. I myself was surprised when an ex-council asset manager said part WCC owned Spicer Landfill would be a better site for the one future regional landfill south of Bonny Glen. Improvements to Wellington Motorways, the trucking of sludge, Spicer's more central location mean that if Spicer's capacity and extendability are suitable this becomes the blatantly obvious future solution for the one future Regional landfill. However blatantly obvious solutions take for ever to happen in waste in this region and our Region. Eg: look how long it has taken since after Auckland's Redvale landfill instituted a volume based charge for polystyrene waste, (early 2000s) before Wellington Region landfills did. The fact is the management of our regions landfills is far short of private sector decision making, vision and wisdom even about this relatively simple aspect of landfill management. When Southern landfill extension was being consulted on we were told there was no suitable alternative within 10 years hence the landfill must be extended and yet now we are consulting on sludge dewatering and trucking to landfill. That is therefore the level of respect I have for your capability to plan for 10 years in a period where we need change. Your current capacity to drive change is best seen with the lack of progress to targets and in waste that is the abysmal progress towards your 10 year waste target (gone backwards with volumes increasing?) and this should give clear concern about meaningfully progressing towards climate change targets. With three council owned class1 landfills within 40 minutes drive of the CBD and the region's recycling controlled by Chinese owned interests there is a lack of a private sector recycling ecosystem (the buying and selling of waste derived products beyond greenwaste) in the Wellington region of a scale to effect landfill volumes. Where are our innovations like Auckland's Green Gorilla?. Why are most of Poly Palace's 100% recycled polystyrene sales being sold outside this region? It is because of the lack of a strong vibrant LOCAL recycling ecosystem at scale focused on LOCAL products and markets. and that is what our council owned landfill and offshore owned public recycling is depriving our region of as our councils in this region that own the class1 landfills progress towards 1950 waste solutions not 2050 zerowaste. So WCC please get your shit sorted at your earliest opportunity and close Southern when it's full. (Try implementing a smaller volumetric size for your minimum polystyrene fee in the interim. Everything from a few bags to a B- train of consumer packaging polystyrene is less than your current 1/2 ton minimum fee.....Doh! If you can't operate a landfill economically you shouldn't own one. That goes for Hutt City and Silverstream as well so as a region we can't even get the simple decisions on waste right. And it's been this way for decades. #Welcome to Wellington the coolest little landfill capital in the world.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

Don't know.

10 May 2021

**To:** Wellington City Council

**Submission on the draft Long Term Plan**

**By:** Ngaio Crofton Downs Residents Association

**Contact Details:** Ian Turk, Chairperson

**INTRODUCTION**

Ngaio Crofton Downs Residents Association represents the interests of, and advocates for, residents in the suburbs of Ngaio and Crofton Downs. From the 2018 census, the total number of residents in these suburbs is 7,275.

It is the view of NCDRA that the plan as presented focusses on a reaction to the current situation that Wellington is in with very little information relating to the longer term direction, or a vision of what Wellington City will work towards.

We appreciate that there are a number of large issues that must be addressed immediately and must be provided for over the next few years. However there are also longer term projects that Council must not lose sight of if our city is to become the dynamic attractive city fit for the future, for which Mayor Foster says he is hoping to lay the foundation.

It is our view that the seven decisions that Council is seeking feedback on are very specific, and our residents will hold varying views as they are entitled to. We are not submitting a preference for most of these decisions but are instead encouraging our members to submit their own personal choice from the options that are offered.

## **The Seven Major Decisions**

We do make the following comment on each:

**Three waters** – clearly this is one of Wellington’s major issues, and one that must be addressed with urgency so that Wellington development is not continually hindered by water infrastructure failures.

We believe however that investment in Three Waters must keep the Spatial Plan in mind. The Spatial Plan is already sufficiently developed to highlight areas of population growth – and will be adopted mid-year, which is only a couple of months away. Any investment in the Three Waters infrastructure must be mindful of future requirements that arise through the Spatial Plan.

**Ownership of Wastewater Laterals** – it is our view that Council Ownership of wastewater laterals is a preferred option, but to make this change is of less urgency to make at a time when there are other significant budget demands. While a cost in increased rates is obvious, the analysis appears short in showing a probable overall reduction of costs to rate payers. Individuals who would otherwise be faced with wastewater lateral maintenance will make significant personal savings. We expect that a central and regular maintenance programme will over time be less expensive than the current situation in which repairs are one-offs in an ad-hoc (when there is a failure) manner.

**More Cycleways** – Council says the community is telling it to make this a priority. We believe that encouragement of low emission transport options will contribute to an active attractive city but individuals’ submissions will tell the story of whether rate payers want to continue high investment in cycleways while there are many other demands on the rates dollar.

**Te Atakura – First to Zero.** This is most definitely a decision of strategic importance for the City – a climate and ecological emergency has been declared and must be funded so that actions can be taken.

Sustainability is an issue that is dear to the hearts on residents in Ngaio and Crofton Downs, and we have our own programme underway to reduce the carbon footprint of our suburbs. NCDRA strongly supports funding of Te Atakura and encourages our community to support it.

**Resilience in Te Ngākau, and funding the Central Library rebuild.** Both of these issues deal with use of land and buildings in central Wellington, which have a role to play in the heart of the city. Individual’s opinions on the options vary widely and are often emotionally held. NCDRA will not present a preferred option, again encouraging residents to submit their own preferences. We do however support that the decisions need to be made with some urgency, in line with the community’s preferences.

**Reducing Sewage waste and sludge:** while the direct impact on Northern suburbs may be less obvious, it is clear that improvements must be made to the way that the city manages sewage. Failures in the current system in recent times indicate that this is another decision that requires urgency, and individual’s preferences should drive the option which is adopted. As

an executive we believe that the best, and most sustainable option is that preferred by Council – sludge minimisation through alternate funding.

**Changes to fees and user charges.** We accept the principle that users should pay for the services that are covered by the list of user charges. We submit that charges should be reflective of actual cost of providing those services, but with an overlying social support to provide assistance where necessary. Again individual preferences should be the guide for changes to user charges.

## **Other Decisions**

There are some areas in the long term plan that concern NCDRA for their absence.

**City safety.** There has been recent publicity around city safety – and we believe that this is a significant issue that WCC must plan to address urgently. Recent oral submissions to Council made very powerful arguments for the need to address city safety with urgency. The Council's recent treatment of volunteers relating to Camera Base, and the failure to recognise significant community input shows a terrible lack of empathy towards its community. This is something that can be, and must be, addressed swiftly.

**Spatial Plan:** Clearly the spatial plan is indicating significant growth in the Wellington population, which will not occur evenly throughout the area. While we understand that the spatial plan is still in draft form, it will come into effect during the next 10 years.

Council must be confident that the decisions it makes in relation to the Long Term Plan, and which will extend over multiple years, leave the city in a position where it can adequately respond to changes that are signalled through the long term plan. The city must be able to provide the infrastructure that the population growth will require. This includes not only transport, water, sewage etc, but social amenities such as open space, recreational facilities, and schooling.

**Transport.** Linked in with population growth is the provision of adequate transport. Is Lets Get Wellington Moving, which focusses on the Ngauranga to Miramar/ airport corridor, still relevant given suburban growth indicated by the spatial plan.

The spatial plan will encourage growth along the Johnsonville line (and others), but will the line have capacity to cope with the increase. Other transport bottlenecks are the Mt Victoria tunnels and Karori tunnel – these will be issues, how is WCC thinking ahead to them.

An effective cycleway network combined with an efficient transport system will go a long way to mitigating Wellington's traffic bottlenecks and meeting our sustainability goals.

We want to see WCC demanding more from LGWM so that it is actually addressing Wellington transport issues not extolling that it is **investigating** options for a walking and cycling crossing

over Cobham Drive, or **reviewing** speeds on State Highway 1 east of Mt Victoria. There are major strategic issues facing Wellington that need to be addressed urgently.

**Social Housing.** NCDRA notes the audit opinion which states that “In our view the underlying information should include the remaining (social housing) estimated costs of \$403.2 million and the Council should address how these costs will be funded”. We understand that it is working on options for how this will be funded and has included \$42.8 million of the total \$403.2 million in the Council’s budget.

It is our view that while Council is hopeful that alternate funding will be found for a large proportion of the total social housing sum, this is a significant sum that will impact hugely on the budget if hoped for outcomes are not achieved. Council has not been up front with significant risks to the long term plan, and residents will not be able to make their decisions with the degree of confidence that should be expected.

Ian Turk

Chairman

Ngaio Crofton Downs Residents Association.

--	---

---

**Q17. Your comments on the big decisions (optional)**

I find the "big decisions" a slap in the face of every person who thinks climate change is an emergency. How can you make "bicycle lanes" a big decision when it is clear that transport is one the key changes we have to implement? Why isn't "roading" a big decision? I see this statement in the 10 year plan: "new roading to facilitate greenfields sites eg \$128m for Ohariu to Westchester Drive". This is ONE road! Compare this to the planned expenditures for bike lanes which are spread out over 10 years. In my opinion the above road should not be paid for by the council but should be paid for privately (and if it cannot be funded privately it should not be build). In fact council should privatize most roads in the city. Only roads which are infrastructure, i.e. are being used for public transport and biking should be kept under the council. Come to think of, both "roading" and "biking" are not big decisions, that decision is already concluded with the "First to Zero" vision, i.e. less roading, more biking. It just needs to be implemented. Also note that interest on debt is at a historic low. On the other hand inflation on construction seems to be quite high. So delaying investments does not make much sense: \* changing Wellingtons transport infrastructure is a required outcome of the WCCs own goals (climate emergency, First To Zero). Infrastructure changes take time to be implemented, so they should have started actually years ago. \* Wellington pipes are bursting, so there is already increased cost in short term fixing. The sooner these are fixed, the lower the cost for short term fixes is (in addition to the savings on cost increases due to inflation) \* the same goes for the Central Library. It won't be cheaper to fix in a couple of years time. Also the Civic Square is in a sad state, so unless WCC wants to advertise Wellington as a dying city, it should do something for our Civic Square. For the Civic Square: Note that I have stated 'None of the above' for the other buildings. I am not opposed to demolishing them, but if WCC plans to open up that part of Civic Square for redevelopment to "feed the beast" (property developers, see also our white elephant, the conference centre), then I am opposed to it. I support a denser city, but a denser city needs public open spaces and parks. If you live in the city centre you do not have your own garden, so you need to able to access shared spaces. I would also request that every decision should be evaluated along these lines: \* what does this means for climate emergency: Will it reduce carbon emissions or not? (Hint: a new road will not) \* what does this means for climate change adaption: Will it make Wellington more resilient or not? (Hint: delaying investment into pipes will not) Also a comment I made already to some of LGWMs bi-monthly consultations (the only outcome they produce) and to WCCs Spatial Plan: There might be a strategy somewhere, i.e. a holistic plan. But I do not see it and it is definitely not being presented. For example I opposed densification of Miramar on the grounds that there is no transport solution. This ten-year-plan tells me that we will not have a holistic solution in 2030 either, since it doesn't present any plan. So I suggest to drop the "First to Zero" marketing label, that will just cause ridicule.

---

Q17. **Your comments on the big decisions (optional)**

I agree with the chosen priorities and these are all important however I would like to also see focus on the beautification of our city. My husband and I have lived in Wellington for most of our lives and feel that the city has lost a lot of its spark over the last 5-10 years. The empty buildings (the library, CAB, Reading) give it a hollow feeling. People no longer come into the central city as there is nothing there. There has been no effort spent on making the central city attractive with flower boxes, paving, art etc. Courtenay Place is a disgrace - rundown old buildings. aggressive violent crowds at night. No progress has been made on the waterfront except to build new corporate office buildings. Its taken two years to do the pathway around Evans Bay which is ridiculous. The Council spends all its time fighting with each other instead of getting on and doing things which improve our city. I no longer want to live here and would prefer to live somewhere like Auckland where there is visible progress.

---

Q18. **You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)** not answered

---

Q19. **Do you support the proposed budget?** I somewhat support the proposed budget.

---

Q20. **You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?** not answered

---

Q21. **Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

See previous comment - please put money aside for making the central city an attractive inspiring place to be. Would also like to see money spent on making Kilbirnie town centre a more attractive area. motivating retailers and restaurant owners to set up there. There could be a lot done to improve the Lyall Bay seafront area - move this forward quickly. I don't mind paying higher rates if I actually see something for them.

---

Sludge and waste minimisation

---

Q17. Your comments on the big decisions (optional)

Re: sludge and waste minimisation, I would like to have a better understanding about the separate levy - how long/how many years will we need to pay this. It is not clear if this levy will no longer be charged when the \$147m have been reached (which looks more like 20 years than 10)?

Proposed Fees and User Charges Changes We would like to make a submission about the proposed increase in the monthly parking coupon fee as outlined in the Wellington City Council's 2021-31 Long Term Plan. The proposal in the LTP is to increase the cost of a monthly parking coupon from \$200 to \$333. The cost of monthly coupons was already increased by an incredible 67% (from \$120 to \$200) in 2019, and prior to that had increased by 50% from \$80 to \$120) the previous year. The new proposal in the LTP signals yet another massive 67% increase. This represents a staggering and utterly unjustifiable 400% increase in just three years. We are not aware of a single other item or service in this economy that has increased by so much in just a few years, especially when the annual inflation rates has been less than 2% over the same period. We see no evidence that any revenue raised from these proposed fee increases (or indeed the multitude of other proposed parking fee increases) is actually going back into anything that will help grow the city's economy and help the many struggling businesses, which we believe should be one of the Council's biggest priorities, and even more critical since Covid-19. The huge risk we see is that all these excessive parking fee increases will do is force many, many more people to work from home as the cost of coming into the city will quite simply be unaffordable (and no doubt has already become so for many). The impact of this will be further damage to the local economy and the closure of more and more businesses. For this very reason, the huge number of public servants in Wellington (on who the local economy depends) have been told by the State Services Commissioner that we must be in the city, working in our offices wherever possible, however the City Council is making this impossible for a great many people for whom the bus or train services, or any other form of public transport, are simply not practical or reliable (or even available). If the ultimate aim is to reduce the number of vehicles coming into the city, then some sort of congestion charge (as has been implemented in many other countries) should be investigated, rather than punishing those who are making the effort each day to work in the CBD and support local businesses. While we understand that climate change is seen as a priority by both Local and Central Governments, and that reducing the number of vehicles on the roads has been seen as the way forward, this needs to be balanced against making it utterly cost prohibitive for people to come into the city at all, which will also have a huge negative impact. If the issue is simply to reduce congestion on the roads in Wellington, to make the city an overall more enjoyable place to live, then something needs to be done about the state of the roads themselves, rather than punishing those who use them to come to work, to shop, or for entertainment. We see no evidence that any revenue raised from the proposed parking increases (or any of those previous) has gone into improving the road network, or increasing the number of parking spaces (which have in fact reduced significantly in recent years). The term "Liveable City" implies being an easy and enjoyable city to live in, and whether the Council accepts it or not, part of what makes a city liveable is the ability to drive and park somewhere that isn't cost prohibitive.

---

Cycleways

---

**Q17. Your comments on the big decisions (optional)**

Bike paths need to be uphill, 3meters wide, multi use paths, cycling and walking. Cyclists can ride down hill at the speed of the traffic flow. Uphill riding is slower even on an e- bike. Bike paths need to go to end of journey and not terminate at a traffic pinch point. Island Bay cycle way is not safe and not fit for purpose, please speak to cyclists outside of Cycle Wellington. Regards Fraser, Cyclist, bicycle retailer (My Ride Wellington) and NZ representative.

Central Library

---

Q17. Your comments on the big decisions (optional)

I prefer building a new library on the existing site (saving key design features to be reinstalled). The demolition rubble could be used to construct bunds and sea walls to protect our city from rising sea levels and storm surges. It is also a cheaper option that could have greater certainty of cost than retro-fitting a flawed building.

Cycleways

---

**Q17. Your comments on the big decisions (optional)**

I cycle every day to work. Not having a connected network means I feel unsafe during large parts of my journey. I've had a large amount of near-miss incidents while not on a cycleway, which is making me reconsider if cycling is the best mode of transport for me to get to work. I definitely don't encourage my two children to cycle to school because of the current network, despite knowing that cycling is a healthy and time-efficient option. Option 4 is future-focused and a big step in creating a people-friendly city where people can feel safe doing the right thing.

- Q2. **Phone number:** [REDACTED]
- Q3. **Are you making this submission as an individual or on behalf of an organisation?** Individual
- Q4. **What organisation are you submitting on behalf of?** not answered
- Q5. **Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?** No
- Q6. **If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer?** not answered
- Q7. **Oral forum time** not answered
- Q8. **Oral hearing time** not answered
- Q9. **Which of these options do you prefer? (3 waters decision)** Option 2. Enhanced investment (\$2.4bn - the Council's preferred option).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** Option 2. Take ownership (Council's preferred option, \$32m investment).
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 1. Finish started projects (\$29m capital investment, lower debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 1. Low level of funding (\$18.1m investment, lower rates and debt).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** Option 1. Demolish and site developed through long-term lease (Council's preferred option).
- Q14. **Which of these options do you prefer? (Central Library decision)** Option 1. Strengthen now by temporarily exceeding debt limit (Council's preferred option, additional 0.79% to rates).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 1. No change in current practice (no change to investment, rates or debt).

Q16. **Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Te Atakura (climate change)  
Sludge and waste minimisation

---

Q17. **Your comments on the big decisions (optional)**

We should hit the pause button on Te Atakura (climate change) until at least the Covid-19 pandemic is officially over. This is because many Wellington individuals, businesses and organisations are facing severe financial hardship while this pandemic is continuing.

---

Q18. **You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

---

Q19. **Do you support the proposed budget?**

I strongly oppose the proposed budget.

---

Q20. **You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

I support increasing spend in the current budget.

---

Q21. **Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

I strongly recommend that the Wellington City Council does not implement race-based Maori Wards as a practical way to reduce unnecessary costs and rate increases. We also need to prioritise having Wellington individuals, businesses and organisations financially survive the Covid-19 pandemic. We want Wellington to be an attractive city for productive citizens to live in.

---

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

1) Investment in three waters infrastructure I support the points raised by Zero Waste Advocates (Caroline Arrowsmith, Hannah Blumhardt etc) in their submission. We must plan for a future we live more efficiently with less energy. That requires us to investigate the need to change our waters infrastructure, not simply invest more in the current model. Due to historic underinvestment I do support investing in critical upgrades now. But I would ALSO like to see Council investigate the feasibility of: - an alternative system for managing human waste/biosolids that does not rely on the wastewater system. Instead, solids and wastewater should be kept separate (thus uncontaminated). In such a system, biosolids can be processed either at a local level or collected and processed at a centralised composting facility separate from the wastewater treatment plant. While this is a long-term issue, budget must be allocated now to investigate and help develop a source-separated wastewater/sanitation system, as it may take decades to phase in completely. Some waste minimisation funding for organics could go towards pilot and feasibility studies for decentralised, source-separated sanitation systems. - smaller scale initiatives to reduce pressure on the system, such as a ban on insinkerators etc. 2) Cycleways Please invest the MAXIMUM you can in cycling infrastructure, for the safety of my family and for climate justice. (And please accelerate work on the Newtown Connection.) Cycling is the primary mode of transport for me and my husband, including to transport our young son. We bike because it is kind on the environment and (on the whole) good for our mental health. BUT it is dangerous. We regularly have close calls. I fear for my husband's safety when he is cycling, and there are places we do not go because there are no safe cycleways. This is not fair. So much is invested in roads, and so much space is given to cars!!! I am tired of being dangerously squished alongside buses, and of fearing for my family's safety because of our choice to use clean transport. Please invest the maximum you can in cycling infrastructure to reward those who choose clean transport options. As well as a safety matter this is also a response to the climate emergency, please accelerate this work. When my son is old enough to ride a bike, I hope it is safe for him to do so. I support all points raised by Cycle Wellington in their submission. 3) Te Atakura - I wholeheartedly support investment in our city's transition to net zero. - Please go further by developing a full circular economy action plan as part of your work on climate action. - Please do NOT give a loan or grant to the airport. As a private business they can find their own funding. WCC funds should go towards reducing emissions not increasing them. 4) Sludge and waste minimisation -YES let's get that sludge out of landfill! - I support the Council investing in the proposed infrastructure needed to reduce the amount of sludge that must be sent to landfill. - However this is not a true long term solution, WCC should also explore an alternative system for managing wastewater and biosolids/human waste, that keeps these separate from water, as suggested by the Poo Breakfast Club. Please allocate budget for this now. - Please allocate more funding for organic waste diversion for food waste. - Increase funding for re-use schemes beyond car sharing. - Please bring forward the work on the resource recovery centre. Can't wait to see this! Thanks for all you do.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

I strongly support the proposed budget.

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Social housing reminds vital, WCC should continue their important work in this area.

---

Cycleways  
Central Library

---

Q17. **Your comments on the big decisions (optional)**

Cycleways - would like even more than proposed as this is my main for of private transport. I struggle to get to shops and schools as I find the roads scary. Library - prefer the rebuild option, which Council ignored as the option more Wellingtonians wanted. Otherwise increase the rates to fund this.

---

Q18. **You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

---

Q19. **Do you support the proposed budget?**

I somewhat support the proposed budget.

---

Q20. **You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

---

Q21. **Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Consider water meters. Unpopular but will give better view of where leaks are happening and make people more aware of their usage. Most people will also pay less than what they currently are through rates (subsidising the high usage of the few).

--	---

---

**Q17. Your comments on the big decisions (optional)**

Deferring significant investment in Three Waters will only lead to a large required investment in three years. Investment has already been deferred for too long, and more now (than Option 2, council preferred) is needed. If it can't all be spent, then so be it, but better to be prepared to put in what is required. Cycleways are critical to so much of what this council purports to care about: getting around the city better, the wellbeing and enjoyment of citizens and visitors, public health, climate change and more. My family would be willing for an even greater rates' rise than proposed in any of the options to enable us to all safely and confidently get around. While my brother and I love going everywhere with my dad on our family bike, my mum is too scared of the drivers to do it. Separate, connected cycleways are needed. Parking demand will surely decrease as more people get around by bike and as autonomous cars become a reality. Become a leader, don't wait for LGWM. Spend our rates, and also be much more quick and decisive when central government is willing to pay for 90%, rather than being a disappointment. While much of the Te Atakura investments are laudible, missing is efforts to support and incentivise cycling as a replacement for cars. Bike charging stations, dedicated secure parking for cargo bikes (which can replace family cars as my family has), a council ebike and e cargo bike programme, and more. Rather than support successful car share programmes, why not set up an ecargo bike share programme? Or support an existing business to set this up? Rather than swap out council cars with electric cars, really examine if any of these can be replaced with electric bikes (and if safety is a reason not to, surely separated cycleways are even more clearly needed). This is the sort of transformational change required, not just more of the same. You claim to have declared a climate emergency. For me and my brother and future generations, be bold. If trying to incentivise less sludge, why are you decreasing the rate for getting rid of large amounts of it??

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

On fees: should be INCREASING the cost for disposing of bulk sludge, not decreasing it from the status quo. Otherwise you are further encouraging people to make sludge, not discouraging.

Cycleways

---

Q17. Your comments on the big decisions (optional)

Investment in cycleways makes Wellington an attractive place to live and visit. It helps respond to the climate emergency and keeps its residents safe and promotes healthy lifestyles.

---

Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)

not answered

---

Q19. Do you support the proposed budget?

I strongly support the proposed budget.

---

Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?

not answered

---

Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?

I fully support the funding to make biking and other modes of active, climate friendly transport easier and more attractive. I fully support the investment in making changes to minimise the city's impact upon the environment (waste) and moving toward carbon zero. Thanks

---

- Q5. **Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?** No
- Q6. **If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer?** not answered
- Q7. **Oral forum time** not answered
- Q8. **Oral hearing time** not answered
- Q9. **Which of these options do you prefer? (3 waters decision)** Option 3. Accelerated (\$3.3bn investment – higher rates and debt).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** Option 1. No change (no change in investment, rates or debt).
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 1. Finish started projects (\$29m capital investment, lower debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 2. Medium investment with savings (\$25.4m investment, lower rates and debt).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** Option 2. Proceed with base build proposal for public purposes (higher debt and rates)
- Q14. **Which of these options do you prefer? (Central Library decision)** Option 1. Strengthen now by temporarily exceeding debt limit (Council's preferred option, additional 0.79% to rates).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 2. Invest in technology at Southern Landfill (\$86m to \$134m capital investment and higher rates).

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Cycleways  
Sludge and waste minimisation

---

**Q17. Your comments on the big decisions (optional)**

Cycleways are a waste of money while transport problems abound. Cycleways only serve a small number of people. I cannot ride bike, walk up and down hills and need to use a car. We have limited bus service and none in the weekends, biking for all my neighbours is not an alternative but parking to catch buses is with rules around new housing regarding the need for limited car parks. Sort public transport before the luxury of cycleways. Sludge management needs to cover all areas including South Karori. The council needs to control all essential services.

---

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

---

**Q19. Do you support the proposed budget?**

I somewhat support the proposed budget.

---

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

not answered

---

Please indicate what decision you are commenting on by selecting from the list of item(s) below** not answered

---

Q17. **Your comments on the big decisions (optional)**

As a ratepayer, I need to pay my fair share. If I don't the generation coming after me will be saddled with more costs and debt. The generation of ratepayers proceeding mine has done just that. The buck stops here. We need to pay for essential infrastructure or we are failing our children.

---

Q18. **You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)** not answered

---

Q19. **Do you support the proposed budget?** Neutral.

---

Q20. **You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?** I support increasing spend in the current budget.

---

Q21. **Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

WCC should consider levying a congestion charge on busy city roads. However - in conjunction with the GWRC it needs to ensure public (and active) transport alternatives are available at an equal or lower cost.

---

**Q17. Your comments on the big decisions (optional)**

Investment in 3 Waters Just get on with it. Wastewater Laterals This accountancy sleight-of-hand decision made by a previous council to transfer the responsibility and costs to the ratepayer was an appalling decision and it is only right and proper - and logical- that the laterals are cared for by one entity and bought back in-house. Cycleways Some are better than others and the Old Hutt Road one - well why would you bother? Frankly you are not visionary enough. I'd like to see the cost-benefit ratios and some really good financial scrutiny. Thorndon Quay is the next one off the blocks so I thought it would be interesting to see up to date crash statistics from Land Transport. As I suspected no bicycle deaths in 20 years! Yes angle parking is tricky (people vehicle backing have poor sight lines) but this problem will resolve itself with an upgraded vehicle fleet. In 20 years most vehicles will have backing cameras. Also, I've wondered for years about the poor roading design that allows pinch points (ie cyclists run out of road)- well no surprises there. The underpinning assumption that roads are dangerous places is a good one and we all need to take care. However the one thing that would help both motorists and cyclists exponentially is regular, reliable and consistent public transport. It will be years before the public trust in the bus network particularly but also the train network is reestablished after the "Bustrophe" and this current industrial contretemps. Once the public transport networks are so woven into the fabric of the city that nobody notices them - and cycleways form their own roads so that safety is a given, well that's when Wellington will come of age. As I write this I see that France has put a date on closing down domestic air travel, yet here we are facing a fabulously expensive cycle way to Petone that can't even future proof a third rail track. So my opinion on cycleways? Forget this half hearted approach - build sky ways across the city and really plan for the future. Climate Change You would have to be living under a rock not to see that the world is changing, so the first two questions of every single action the Council undertakes should be "what is the impact on the environment and how can we ameliorate it?", thus leading by example. But Council has to balance it's budget somewhere and this looks like a rabbit hole to me. It seems to me that the wealthy who can afford an EV and the electricity required to run it are further favoured by preferential parking. At least now council isn't paying for their electricity as well! It's all terribly laudable but I'm mindful that the closure of one Chinese coal fired power station would still be more efficient than my own community collecting pens for recycling for the next 1000 years. Other I'm dumbfounded that Council is not hanging it's head in shame about the pushback from the Audit office and a \$400 million budget shortfall in social housing. Apparently it's OK because you have a scheme afoot to source the funds - I can't work out if it's smoke and mirrors, counting your chickens before they are hatched, or more accounting chicane. This ratepayer finds it very disappointing.

<p><b>Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)</b></p>	<p>not answered</p>

Sludge and waste minimisation

---

Q17. **Your comments on the big decisions (optional)**

The explanation provided with Option 4 (the Council's preferred option) states that there is a risk that the alternative funding model may not be possible. Should that be the case, I would support the Council using some of its 'headroom' above the 225% debt limit to fund this work, however, the explanation provided with Option 4 rules that out. Hence I do not support Option 4, but as I want the work done, I support Option 3.

---

Q18. **You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

---

Q19. **Do you support the proposed budget?**

I somewhat support the proposed budget.

---

Q20. **You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

---

Q21. **Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

I 'somewhat support' the proposed budget because I would have been happy for it to be even bigger. It is very clear that the Council has seriously under-invested in essential infrastructure in the past and in my view we need to rectify that as quickly as possible and if that means even higher rates increases than currently budgeted for, so be it. I would much rather pay more now to get a city with infrastructure that functions well than to limp on into the future with frequent serious, and individually minor but collectively serious, infrastructure failures.

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Three waters infrastructure: I would be supportive of an option 2.5. I don't believe option 2 provides the investment level necessary to ensure the integrity of our three waters system into the future however I recognise the risks identified in option 3. The documents state that the Council doesn't yet have the necessary data to direct such a large investment. Is there room for a portion of additional budget beyond option 2 to accelerate gathering this data? Te Atākura: It's great to see the Council prioritising the actions necessary to reduce emissions. I support the Council funding Te Atākura in full however I would like to see regular check ins to ensure that the programme is sufficient and actually targetting the actions necessary to achieve our climate goals. Cycleways: Given, the prioritisation the Council has given climate action, I would like to see the investment in cycleways match this (ie. the accelerated investment). Switching to active modes of transport is broadly recognised as one of the key actions that needs to be accelerated to reach our climate goals. It is also relatively easy to achieve - there are lots of people who are keen to use more active transport however may not feel safe to do so on the roads currently. Investing in a safe cycleway network will help a huge number more people feel safe to cycle, supporting our climate ambition whilst also having significant health and wellbeing benefits. Sludge and waste minimisation: The new investment in treatment at Moa Point is absolutely necessary for our waste and climate goals. I don't have strong views on how it is funded however I am concerned that there is a potential gap where, if the alternative investment approach falls through, there will not be funding for this at all in the immediate future. If option 4 is pursued, it must be with high certainty of success, otherwise I would place my support behind option 3.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

Cycleways

---

Q17. Your comments on the big decisions (optional)

Trails Wellington (Wellington Trails Trust) are keen to see significant investment in cycleway infrastructure in and around Wellington City. Reducing number of cars in central city should be a goal. Increasing ease of commuting for bikes, scooters and other electric devices should be priority. We believe a key opportunity exists to develop bike commuter trails in green belt as well as, or in substitution for, some of plans to develop road reserve cycleways. An ideal example of this is a commuter trail from Wakefield Park to Central Park. Support for this concept from Waka Kotahi is critical. They currently won't invest in commuter trails in green areas. This should be challenged as lights and tyres on bikes have considerably improved particularly with all eBikes having lights. Trails Wellington would love to work with WCC and explore the viability of Wakefield Park to Central Park as an alternative Island Bay/Berhampore to city commuting trail.

- Q9. **Which of these options do you prefer? (3 waters decision)** Option 2. Enhanced investment (\$2.4bn - the Council's preferred option).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** Option 2. Take ownership (Council's preferred option, \$32m investment).
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 2. Medium investment programme (\$39m capital investment, lower debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 2. Medium investment with savings (\$25.4m investment, lower rates and debt).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** None of these options.
- Q14. **Which of these options do you prefer? (Central Library decision)** Option 1. Strengthen now by temporarily exceeding debt limit (Council's preferred option, additional 0.79% to rates).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** None of these options.

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Wastewater laterals  
Cycleways  
Te Atakura (climate change)  
Central Library  
Sludge and waste minimisation  
Te Ngākau funding for future work

---

**Q17. Your comments on the big decisions (optional)**

Submission on WCC 10 year Plan – 10 May 2021 Principles submitted for Council consideration of the “Big Decisions”; 1. Councillors and Council officers, when considering decisions involving major expenditure, should always be focused rigorously on the fact that funds at the Council's disposal are "ratepayers funds" not Council funds. Central Government fiscal discipline is assisted by the widely shared political commitment to the concept of "taxpayers funds". WCC should adopt and highlight this kind of usage as a constant reminder to all officers and as a reassurance to the public that they understand the impact of the rates burden. 2. In times of financial difficulty, such as the present, Councillors and Council officers should be especially disciplined and focus on ruthless prioritisation of budget allocations. Essential services must be distinguished from "nice to haves". And the "nice to haves" must be either put aside until later or rigorously pruned. An increase in rates of around 13% is extraordinary and will be hard for many people in Wellington and unbearable for some. Much more discipline is therefore required in Council prioritisation. (Just consider the political implications for a Government at the national level if they proposed increasing tax across the board by 13%!) 3. Discipline and prioritisation and responsible use of "ratepayers funds" also requires an innovative approach to the use of ratepayers capital. Again the true owners of the WCC capital investments are the ratepaying public not the Council. This needs to be much more strongly evident in Council thinking. For more than two decades Central Government has applied the principle that in general taxpayers funds cannot responsibly be used to provide office accommodation for public servants especially where the commercial private market can effectively deliver such capacity. Taxpayers capital is therefore applied to the delivery of services and only to a small number of iconic buildings (such as Parliament itself ) and iconic purposes of which the conservation estate is one. This principle is not politically controversial at the national level. It has been widely supported by successive governments. Why should Wellington City ratepayers be funding capital investment in buildings for Council officers? Politically and financially it makes sense for Council, especially at this time, to adopt the same principle as Central Government and accommodate its staff principally in commercially rented office buildings. 4. Land and buildings in high value areas, such as Civic Square, which are a fundamental and iconic part of the ratepayers capital investment in the City should never be privatised or otherwise alienated. Councillors saw the political backlash against suggestions that the library or parts of it should be given over in various ways to private interest. The same factors apply to any suggestion that some of the current space in Civic Square/Te Ngakau or Jack Ilott Green be given over to private interests. This is unacceptable for reasons of principle and especially in view of the opportunity cost in terms of usage of the extremely scarce land in the center of the city that is forfeited. 5. Wellington is a significantly poor performing outlier internationally and in comparison to many other NZ cities in terms of green/open user friendly space in the CBD. When opportunities emerge to contribute to remediating this deficiency and sustaining existing such amenities, and especially where this can be implemented consistently with the principles set out above, Council should give very high priority to this. 6. In assessing priorities and options within priorities, Councillors and Council officers should always be very mindful of the unintended collateral damage associated with any major project. Public tolerance of the inevitable disruption and ratepayers support for funding projects that cannot be delivered in a timely manner dissipates quickly. So, cost and other project focused variables must be weighed against the other critical variable which is time for delivery. There will be distinct political, economic and credibility costs associated with all major projects when Council adopts options that prolong the project timescale. Councillors must always be alert in this context to the rule that "the perfect is the enemy of the good". Early delivery of a good project will almost always trump slow delivery of a perfect project. 7. There is a place for a careful and socially responsible "user pays" policy - especially where this fosters more environmentally friendly behaviours. Evidence shows that properly and fairly applied water use charges, for instance, can help manage overuse of scarce resources. Council should move rapidly to develop a charging system in conjunction with its waters project and as mentioned below,

to recoup costs associated with both water usage and for its waste/sludge project. Application of these principles to the "Big Decisions" (a) Fixing the water problems (including acquiring control of the laterals) is an absolutely essential service and should proceed as proposed. (b) Remediation of the library should proceed as quickly as possible. But savings can still be made with respect to the Library. The Council did not need to commit to the most extensive and costly remediation. Council chose the "perfect" option. It could still choose a "very good" lesser option. Council should reopen its earlier decision and effect some important savings and deliver the project more quickly. (c) Cycle ways are good, but they are not an essential priority in these exceptional times. They are a "nice to have" and should therefore be funded at a lower level than proposed. (d) Responding to climate change is a priority, but in these exceptional times it could be funded at a lower level than proposed. (e) Sludge minimisation is actually a component of the waters project and is therefore part of an essential service. Some cost recovery is appropriate. But a levy approach is not a fair or acceptable basis for recovering costs. Council should move rapidly to develop a charging system for its waste/sludge project in conjunction with a fair and usage focused charging system for water. (f) The situation with respect to Civic Square/Te Ngakau offers a unique and important opportunity to be innovative, disciplined and fiscally responsible and to address a number of the key principles set out above. I am strongly against redeveloping MOB and CAB on this site at all. Ratepayers funds should certainly not ever be applied to capital investment in office buildings for Council staff. But the option of redeveloping this iconic ratepayers land in partnership with private developers is even worse. Civic Square/Te Ngakau is an iconic ratepayers asset. It belongs to the people of our city - it is the heart of our City and should not be alienated from them or commercialised or privatised in any way. This is abhorrent. My proposal is that the MOB and CAB be dismantled in conjunction with the work on the Central Library and the land be used to provide a small new vital increment of very user friendly open/green space for the people of our city. This can be done in a much quicker time frame than in any of the current proposals and with much less disruption to the owners – the ratepaying people of the city. It is also the best option in terms of exposure to long term climate change related risks such as sea level rise. As explained below, while this proposal would involve a shift of costs from capital to operational budgets, I believe that it is likely to be the most cost effective option in the long term. Certainly Central Government experience would reinforce that conclusion. I am mindful of proposals relating to the construction of a Pasifika "Fale" on the Frank Kitts Park open space. This would involve the loss of even more open/green space in the area immediately adjacent to Civic Square. I see the value in the "Fale" proposal in terms of showing recognition to our Pasifika communities. But it then becomes all the more important to gain the additional open space that I am proposing in Civic Square in compensation for this. And it is therefore also vital to retain and incorporate Jack Ilott Green into the plan for this Civic Square/Te Ngakau open/green space. For the reasons set out above it would be equally abhorrent for Jack Ilott Green to be developed and in any way alienated commercialised or privatised. In the same vein, the City to Sea Bridge is absolutely iconic and must be retained as a key element linking the new open space with the open space on the waterfront. Access to it will no doubt need adjustment and remediation. But this clever and inviting area provides the only uninterrupted pedestrian access to the waterfront facilities and businesses. It is also a popular and photogenic meeting, gathering and relaxing place for both citizens and visitors. And of major importance is the fact that the bridge is integrated with an iconic piece of wood sculpture by a leading Maori artist. It must be preserved. I recognise that it is desirable for Council leaders to be located in Civic Square vicinity - the heart of the city. I suggest that the new space approved for the upper floors of the Library could be designed for the Mayor, Councillors their immediate staff and necessary senior Council Officers and for the necessary meeting rooms on site. It is good that the vision for the Library already incorporates space on this site for a public Council information and Service Centre capacity I suggest that the bulk of Council officers - especially back office staff, be accommodated in privately owned rented office space just like the Government's public servants have been for twenty five years or more. Central Government experience shows that this approach significantly improves flexibility in meeting always changing office needs. It does involve additional costs in the operational budget, but central government experience was that in the medium term this was entirely manageable in terms of budgets and actually imposed very useful self-discipline benefits on public servants in terms of their office accommodation wish lists. Some Departments required transitional financial provisions, but in the case of the WCC, a long term transitional feature is already uniquely available. Under any of the current options proposed by the Council for the MOB and CAB rental costs for staff offices are already going to be a feature of the WCC budget for much of the life of the current 10 year plan. This is due to the construction lead times. So this already provides a transition space. Over time lower cost rental space in less central parts of the CBD (or even hubs like Kilbirnie or Johnsonville) could be used. This could enable long term reductions in cost pressures on the operational budget. This proposal has the big advantage of preserving the integrity of ratepayers equity from private incursion, of contributing to remedying our CBD open/green space problem, of quickest possible delivery and

minimisation of disruption and of stopping the allocation of ratepayers capital to unnecessary office accommodation for bureaucrats . This proposal also provides an opportunity for a really innovative paradigm shift by the Council. The prospect of Councillors prioritising a shift away from essentially vanity projects for staff office accommodation and replacing that with a focus on investing capital only in essential services would have real political attractions and help offset some of the inevitable backlash against the proposed increases in rates that will be hard for many and intolerable to some.

- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** Option 2. Take ownership (Council's preferred option, \$32m investment).
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** Option 2. Proceed with base build proposal for public purposes (higher debt and rates)
- Q14. **Which of these options do you prefer? (Central Library decision)** Option 1. Strengthen now by temporarily exceeding debt limit (Council's preferred option, additional 0.79% to rates).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** None of these options.

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Cycleways  
Sludge and waste minimisation  
None of these

**Q17. Your comments on the big decisions (optional)**

Biodiversity - it is disappointing to see that our natural taonga were missing from the decisions on the LTP. it is vital we continue to support habitat restoration and initiatives like PF Wellington, Capital Kiwi, and ZEALANDIA as well as projects like Sanctuary to Sea. I'd also like to see more being done about the freshwater ecosystems in the city, particularly the unpiping and restoration of streams in the CBD. Investment in three waters infrastructure - I support an approach to softening infrastructure and working with nature, similar to what is proposed in Forest & Bird Youth's submission. Cycleways - We must achieve widespread modeshift, with walk & cycling becoming the most dominant form of transport and cars used sparingly. Research shows this requires safe and separated infrastructure. WCC should prioritise the most car-dependent parts of our cities first as low hanging fruit. The Cycling Minor Works budget should be doubled to support these changes, and a separate funding category used for delivering cycleways. The cycling budget must also be ring-fenced. Sludge and waste minimisation - Again I support an approach which softens infrastructure (instead of relying on new technologies) that works with nature, similar to what is proposed in Forest & Bird Youth's submission. Decolonisation - WCC must meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards; committing to decolonisation and working with mana whenua and Māori to identify what this would look like; identifying how each proposed spend/project in the LTP contributes to partnership under te Tiriti; supporting Māori to explore ways co-governance can be implemented in Wellington; and establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making. Other matters - WCC must target waste minimisation and aim to achieve a zero waste city. A first step would be to roll out community composting hubs across the city. WCC must also ensure adequate funding is provided for walking and supporting vulnerable communities (e.g. disabled people, Māori) to accessibly transport themselves around Wellington. The current transport budget still spends too much on roading, and these funds could be allocated to projects for active transport, and achieving transport justice. I would also like to see more support for car-sharing schemes. While private cars must be discouraged and ultimately removed, there are a very small minority of trips which are justified in using a car. Car-sharing schemes bridge this gap and should be given more support and rolled out more widely - one small change that could be done immediately is to allow them to use on-street residents parking.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

I somewhat support the proposed budget.

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

WCC needs to act swiftly and begin to decarbonise our city through degrowth, decolonisation, and de-intensification of many practices. This will have multiple benefits across health, wellbeing, social cohesion, happiness, and the environment - as well as economically (just not in the neoliberal sense). many of the ways to do this have been directly addressed or alluded to in my submission and others (Genzero, Forest and Bird Youth), but it remains that WCC continues to try and pursue technological or economic growth based solutions to our problems - these will only exacerbate other issues and must be abandoned. WCC must also ignore the vocal minority who will vehemently oppose certain measures, especially mode-shift. Systemic change is required to meet the challenges of our time, and we know from research that focusing on individual behaviour change alone does not work - people need to be supported and incentivised to make the right decisions and reap the benefits of change. When our city is more resilient and liveable, the vocal minority will fall silent as they realise they benefit from change as well.

Cycleways

Te Ngākau funding for future work

---

**Q17. Your comments on the big decisions (optional)**

Cycleways - we need a connected, safe network ASAP. Just build it! Seville built 80km of bike network in 18 months. Get on with it, yeah? Te Ngākau funding - I would prefer council to own the replacement buildings here as well as they will be so prominent and tightly associated with civic square and our city. Doesn't make sense to me to pay rent for core city functions.

Cycleways

Te Ngākau funding for future work

---

**Q17. Your comments on the big decisions (optional)**

Decision 3; I noticed that the Cycleway link planned for here in Newtown is not included. After all the consultation this is a wasted opportunity. Decision 5; I lament the enthusiasm within the Council to demolish these buildings, one of which, MOB, is of High Heritage value and should be utilised as planned as part of the Music School. Otherwise I see an empty site for years while costs and designs are debated eventually staring down the barrel of having to privatise all or part of any new development.

Cycleways  
Te Atakura (climate change)  
Te Ngākau funding for future work

**Q17. Your comments on the big decisions (optional)**

Cycleways: Wellingtonians have waited too long already for a safe and connected cycle network. We are decades behind other cities and our whole city - the people, the environment, the liveability- have all suffered as a result. With obligations to reduce emissions adding urgency to this issue, you should not be questioning whether it is affordable to complete the full program in 10 years, but what the cost will be if you don't. Until the network is truly safe, and people can get where they need to go pleasantly and easily, huge parts of the population are excluded from this form of transport. I want to cycle safely with my children. I want the act of moving around my city to be a joy and not a stress and danger. Cities such as Amsterdam have achieved this- they are a joy to move around in. Cities with less cars, lower speeds and high levels of active transport have a vibrancy impossible to achieve in car-heavy places. Vibrancy is people on the streets; it's people lingering and wandering slowly. Wellington could be so much better than it is- a truly world-class city and destination. Please put the people of this city first, and deliver the cycleways in the quickest time possible. Our health and the health of our planet are dependent on it. Te Ngakau: I am potentially supportive of the preferred plan to demolish, but you did not make it clear what the cost of rebuilding was or exactly how this would be funded. I would appreciate more clarity on this. Te Atakura: Regardless of what the public response is to this question, you have a duty to do everything in your power to mitigate climate change and put us in a new direction. I hope you will have the integrity and vision to take the boldest possible action, even if public support is not as high as you would like. My children's future is in your hands- please live up to this responsibility.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

I strongly support the proposed budget.

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

not answered

Central Library  
Te Ngākau funding for future work

---

**Q17. Your comments on the big decisions (optional)**

The Central Library and Te Ngākau Civic Square are two important community spaces in Wellington. We support strong community engagement to ensure these spaces at the heart of the city are welcoming, vibrant and encourage coming together and creativity. We support the Wellington literary sector's submission that asks Wellington City Council to commit to exploring with the sector a literary hub at the Central Library where the literary community can work together, share resources, amplify each other's mahi, and support our City's writers and readers. Wellington has untapped potential as a place that celebrates and centers writers and readers of the past, present and future and we encourage the Council to truly pursue this. We would also like to comment on the CPI increase for multi-year contract funding. We currently receive multi-year contract funding for which we are very grateful. The support of the Council is crucial to our organisation and the contribution we make to caring for and sharing our city's heritage and encouraging and facilitating creativity. We are surprised and disappointed that in the draft LTP the CPI increase has been removed as a saving, which means that inflationary increases would not be able to be applied to multi-year contract funding without reducing the grant pool. We urge Council to reconsider the removal of the CPI increase to multi-year contract funding. The CPI increase is a small amount but it has a significant impact on organisations like ours where every dollar counts and each year costs essential to our operations are increased by service providers.

not answered

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

We note the concurrent consultation on Aho Tini 2030: Arts Culture + Creativity Strategy and support the feedback from others in the arts, culture and heritage sector that budget must be attached to enable delivery of the strategy. We acknowledge the big decisions the Council is having to make and the significant costs of infrastructure and the climate change emergency response, but we urge Council to continue to recognise the value of arts, culture and heritage to the city's residents and economy and invest appropriately, otherwise Wellington will be a creative capital in name only.

Cycleways  
Te Atakura (climate change)  
Central Library  
Sludge and waste minimisation  
Te Ngākau funding for future work

**Q17. Your comments on the big decisions (optional)**

Some of these reflect a lack of any kind of sign of cost cutting at the council there are too many nice to have and not enough charges on big business eg large scale developers should pay far more towards infrastructure maintenance than they already do. Some of the little charges shouldn't increase swimming etc is expensive, there's no point charging schools for using eg athletics parks it's just creating a load of jobs and paperwork shifting 'my' money from one pot to another, the council should expect to provide some services and it probably costs more to shift the money than it brings in. Cycleways I see no need for an accelerated programme (however I fully support cycleways along the harbour out to Karori etc but the accelerations you are proposing just seems like they are not adding anything. Same with climate change so important but I don't see the more expensive programme making much of a difference just sloshing easy money around. Sludge and waste minimisation you've not given enough detail about the funding is this like a private finance initiative? These are always made to look very attractive to public companies by clever marketing but ALWAYS end up costing way more, the contracts very much give preference to the funding provider and the council/hospital/school etc just ends up being used like a cashpoint machine for private profits. We need to just fund it. Central square needs more joined up thinking what do we want where do we want it and why. On the one hand you are removing roads and increasing charges to keep us out of town on the other going on about needing a central drawcard to bring us in!!!! I like the palm trees though but the rest of the stuff is too disconnected. I'd ask you where the people live who work in those offices? Bet most of them are not in Wellington suburbs. the biggest thing you could do is therefore move most WCC office functions out of town, cut driving time and emissions of staff and save lots of money!!! I would also like to see thought given to cutting council spending in some areas, I also feel it's very important to remain democratic and keep decision making with voted representatives. I sometimes feels like WCC consultations are a paper exercise and that they just go and do what they were going to do anyway.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

I somewhat oppose the proposed budget.

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

I support increasing spend in the current budget.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

I think you need to find more savings, i think you need to cut some of the nice to have, rethink civic square in it's entirety (how did we end up with such a mess?) there also needs to be a conversation about social housing why are we not eligible for gov subsidies? What can we do to change this? Can we make central government take on some of these facilities and use this windfall money for some of our infrastructure. Clearly there is going to be widescale development all along Taranaki, Kent Terrace, Adelaide road the development levies for all of this need to be increased massively to fund the infrastructure replacements in their entirety. What extra gov funding can we get in recognition of our role as a capital city?

Cycleways

---

**Q17. Your comments on the big decisions (optional)**

The Council's proposed rate increase of 13.5% this year and significant increases for the following years is completely irresponsible, particularly in the current circumstances where many ratepayers are facing significant financial constraints as a result of Covid-19. I am in that situation, operating a part time consultancy from home. I cannot just increase my income with the stroke of a pen, unlike the Council. Many other ratepayers are in even worse straight jackets because they are on fixed incomes. You may have seen that most Publicly Servants will not be receiving pay increases for the next three years. Faced with this situation, some other Councils have managed to find significant savings in their budgets. As far as I can see, our Councillors have not seriously attempted to do this. Have any Councillors actually gone through the budget in fine detail and separated the essential expenditure from that which is nice to have? For many councillors, "savings" seems to be a foreign concept. No where is this more evident than cycleways. It was bizarre that a proposal to increase cycleway expenditure to nearly a quarter of a billion dollars failed by only one vote on Council. This is in addition to around \$50 million (in today's dollars) spent on cycleways in the past 10 years, plus indeterminate additional amounts hidden away in LGWM. Councillors who supported these proposals need to get out of their bubbles a bit more and talk to the people who actually have to pay the rates. I have talked to a lot of people about this, and have yet to find anyone who supports the Council on this. The proposal to spend more on cycleways is particularly out of place, given the Council's apparent inability to safely manage what it has already put in place. So called shared paths - particularly when cyclists feed into them from cycleways - are a dangerous shambles, with Council failing to enforce the rules they have established. As a result many people who regard themselves as vulnerable are no longer walking, but are driving instead. Councillors need not only to get a grip on their excessive expenditure, but also take account of the vast majority of Wellingtonians who are not cyclists.

Cycleways

---

**Q17. Your comments on the big decisions (optional)**

I support provision for active and public transport as part of a complete streets strategy, to include - but not be limited to - the provision of cycleways. Other active and PT users are important, and require addressing, such as improved walking facilities (the central city, for example, continues to be overwhelmingly car-centred, despite WCC policies specifying that private cars are the lowest priority), and there has been no significant improvement in bus priority for 10 years, a shameful record. These need fixing.

None of these

---

Q17. **Your comments on the big decisions (optional)**

We would like to see a bigger commitment to urban design in central Wellington. It is important to have safe, warm, and well-lit social hubs for people to gather. It is also important that the streets of Wellington are well-lit, safe, and accessible for people who walk or cycle. In addition to general safety, this would also be more protective from sexual violence in the city.

Q21. **Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

We would like to see a plan for dealing with sexual violence in Pōneke. We believe that this is the most important social issue for Wellingtonians, and it can be improved by urban design in areas such as Courtney Place, Manners Street, and all other central locations.

---

- Q4. **What organisation are you submitting on behalf of?** not answered
- Q5. **Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?** No
- Q6. **If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer?** not answered
- Q7. **Oral forum time** not answered
- Q8. **Oral hearing time** not answered
- Q9. **Which of these options do you prefer? (3 waters decision)** Option 2. Enhanced investment (\$2.4bn - the Council's preferred option).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** Option 2. Take ownership (Council's preferred option, \$32m investment).
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** Option 2. Proceed with base build proposal for public purposes (higher debt and rates)
- Q14. **Which of these options do you prefer? (Central Library decision)** Option 1. Strengthen now by temporarily exceeding debt limit (Council's preferred option, additional 0.79% to rates).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 4. Sludge minimisation through alternate funding (Council's preferred option, \$147m to \$208m capital investment funded through a levy, no additional rates increase)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Cycleways  
None of these

---

**Q17. Your comments on the big decisions (optional)**

I support the proposed funding to upgrade Khandallah Swimming Pool. It is critical to get functional, safe, connected cycleways into and through the city as soon as possible. Water sensitive urban design needs to be mandatory as soon as possible for infill housing and new developments.

---

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

---

**Q19. Do you support the proposed budget?**

I strongly support the proposed budget.

---

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

I support the proposed funding for the upgrade of Khandallah swimming pool.

Cycleways  
Central Library

---

**Q17. Your comments on the big decisions (optional)**

Cycleways- A very important piece of work needs to be done to connect the end of the new Petone-Wellington cycleway (Kaiwharawhara) to the train station and beyond. The current cycleways through Thorndon quay across endless driveways and angled carparks are incredibly dangerous. Serious work needs to be done now or there will be considerable accidents when the huge numbers of new cyclists/commuters start using the new harbour side cycleway. Central Library- Im not convinced of the value of one central library anymore. The satellite model seems to work very well for people who can pop in to the library closer to their place or work or shopping. I for one would be more likely to pop into the library system when there are three in the city area than one that requires more purposed decision making. What I love about the library off Lambton Quay is how it is so close to places of work and shopping that people pop in, and the same with Thorndon/National Library. Have to wonder whether two smaller libraries would better service Wellington particularly when many new residents are moving into Te Aro Valley and perhaps one closer to Tory Street/Taranaki Street instead of the smaller Manners St one and another in similar library (or David Jones building) would better serve Wellington, increase patronage and be far cheaper to ratepayers. The days of one big library or one big department store are long gone. Im certainly not convinced from what I have read this has been given adequate consideration by councillors and those preparing reports on the future of the library.

Investment in three waters infrastructure  
Wastewater laterals  
Cycleways  
Te Atakura (climate change)  
Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

While interest rates are at an all time low it would seem prudent for council to take this opportunity to renew and extend its borrowings at lower interest levels to enable investments in long term infrastructure projects to be undertaken - within the capacity of the workforce to be able to deliver. I support the LTP provision for continued work by Wellington Water for flooding mitigation in the Tawa area. I support the higher investment in cycle-ways to enable the progressing of Northern connections: Tawa to Johnsonville route to be established. This is currently a high safety risk route on which also provide the only access north in times of disaster or accident which causes a closure of the SH1 motorway between Johnsonville and Tawa. There is already an existing shared pathway established through Tawa to Porirua and Porirua City are working on extending this further north. The gap in the safe cycle route is getting out of the city between Johnsonville and Tawa. I support the proposed climate change plans for First to Zero and leading the way by example for the community to similarly follow in lowering their emissions and supporting other climate change mitigation effects. For the sludge minimisation, since the sludge pipe to southern landfill is now repaired, it is unclear to me why the sludge drying/minimisation cannot be undertaken at the southern landfill site rather than at the much higher profile site at moa point.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

I strongly support the proposed budget.

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

I support the case for zero fees for under fives at public swimming pools accompanied by an supervising adult. I support the LTP plan for a redevelopment of the Grenada North sports grounds complex into a year around multi-code sports hub for the northern suburbs. In particular vastly improving the drainage of all the grounds is required to allow this facility to be used on more playing days year-round. I wish give a shout out for the good work happening under the community facilities team to create the Linden Community Center as a safe and more usable space and associated services to support this underprivileged section of our community. I also wish give a shout out and congratulations to the wonderful work that the local PSR rangers do in support the city-wide network of local environment care organistion groups and the may volunteer hours undertaken in our public parks and reserves around the city. In this regards I also ask that additional funding that was provided for pest weed control in last years annual plan be continued to allow the backlog of pest weed control work to continue - especially in regards to OMB and pampus species. The effects of climate warming are only making worse the effects of invasive weeds becoming more entrenched and more species spreading to our region. And this is impacting on the good work being done elsewhere to maintain Wellingtons indigenous biodiversity and pest animal control.

It is absurd that WCC officers propose to charge \$201/hr for resource consent staff to process a resource consent application. Some professionals in the sector have been working for over 20 years and still do not charge such hourly fees. We presume this fee would apply to all staff from graduate level to senior. In our view this is not acceptable.

- Q1. **Full name:** Judy Whiteside
- Q2. **Phone number:** [Redacted]
- Q3. **Are you making this submission as an individual or on behalf of an organisation?** Individual
- Q4. **What organisation are you submitting on behalf of?** not answered
- Q5. **Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?** No
- Q6. **If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer?** not answered
- Q7. **Oral forum time** not answered
- Q8. **Oral hearing time** not answered
- Q9. **Which of these options do you prefer? (3 waters decision)** Option 2. Enhanced investment (\$2.4bn - the Council's preferred option).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** Option 2. Take ownership (Council's preferred option, \$32m investment).
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 1. Finish started projects (\$29m capital investment, lower debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 2. Medium investment with savings (\$25.4m investment, lower rates and debt).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** Option 3. Retain and seek to repurpose (higher debt and rates)
- Q14. **Which of these options do you prefer? (Central Library decision)** Option 1. Strengthen now by temporarily exceeding debt limit (Council's preferred option, additional 0.79% to rates).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 3. Sludge minimisation through Council funding (\$147m to \$208m capital investment, above debt limit, and higher rates)

Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below

None of these

Q17. Your comments on the big decisions (optional)

not answered

Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)

[REDACTED]

Q19. Do you support the proposed budget?

I somewhat support the proposed budget.

Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?

not answered

Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?

An idea to share on cars coming off transmission gully & light rail: When transmission gully is completed the cars will be pouring into wellington at a great rate, with nowhere to go. The council/govt could buy extra farmland to create a parking station for thousands of cars coming off the gully. This could be connected to light rail going to, and through, the city and onto the airport. The light would be free (but fees collected through another avenue, eg rates) . The trains could leave every 2 minutes as they do in Switzerland, providing a fast conductor free service. This plan would largely contribute to more of a car free city centre.

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library

---

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making. Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily. Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

Investment in three waters infrastructure  
Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

The Council are only offering variations on 'more of the same' technology for the three waters. The Council should be leading the adoption of a distributed three waters processing technologies. This would involve neighborhood membrane bioreactor processing of sewage to deliver recycled water. Neighborhood used of this water for non-potable applications would reduce the demand for treated drinking water. Recycled water, not used , would be of a high enough quality to be discharged to groundwater, local surface water body, or if necessary to storm water. These technologies are ready for commercial deployment and would cost no more than the three water charges that are included in the current rate demand.

Central Library

Te Ngākau funding for future work

**Q17. Your comments on the big decisions (optional)**

Comment on Decision 5: Please ensure that the literary community is engaged with in a meaningful way throughout the development of this building. It is central to our community and much of our respective mahi around building communities, wellbeing and opportunity for all. We propose funding to support the literary community in Wellington so that by the time the new library is opened there is a thriving sector to support and engage with it. Comment on Decision 7: We plead for the Council to consider the independent artists and organisations trying to live and work in the City alongside these developments. The reality is that Wellington is becoming extremely expensive for artists and we need infrastructure support in order to continue our core work.

Please note that the Aho Tini strategy requires funding and budget support in order to be useful and achieve any level of success. We have submitted separately to that strategy document but ask that Council enable the arts in Wellington by committing to investment (increase Arts & Culture funding), committing to infrastructure funding (support for people in the arts community who are at the heart of the activity), and address the venues problems and review the current model which does not enable access or growth in the City by being unaffordable.

**Submission to Long Term Plan, Wellington City Council 2021**  
**drafted by Claire Mabey, Verb Wellington**

5 May 2021

**Re: Literary Sector submission to Long Term Plan, Wellington City Council, public consultation 2021**

Tēnā koutou,

This letter is intended to outline two proposals created by members of the literary sector in Pōneke/Wellington for consideration for the Long Term Plan.

We are passionate, committed members of a vibrant community of writers, publishers, literacy advocates, and literary event and programme producers. Our mahi enables us to appreciate the astonishing vibrancy of our literary community here in Pōneke: we have a City full of talented storytellers who enrich our lives, and lives all over Aotearoa and beyond, with their craft and ability to reflect life back to us. We know how important reading is for wellbeing, at all ages; and we know how essential it is to have access to stories that reflect yourself and your own experiences. We believe that investing in Wellington's literary activity will help Council to achieve its aim of making Wellington a place where culture can thrive and that artists can live and work.

The proposals we make below we believe will illuminate Wellington's literary identity and help more people in our City, and beyond, to engage with our books, our writers, and the conversations that emerge from bringing people together over stories. We believe that the potential for this identity put Wellington even more firmly on the global artistic map is huge.

- 1) **Feedback on Decision 5 and Decision 7: We are asking for Wellington City Council to commit to exploring with us a literary hub where our community can work together, share resources, amplify each other's mahi, and support our City's writers and readers.** We are hugely encouraged that Wellington City Council have signalled enthusiasm for this kaupapa via public participation over Central Library. We would like to ensure that this idea is thoroughly developed in collaboration with Wellington City Council, particularly in relation to any Council-owned spaces and places that may be redeveloped in the City and available for 'public good' use (including the MOB CAB projects).
- 2) **Feedback on Aho Tini (note we have made separate decisions on this via Aho Tini feedback mechanisms) in relation to Decision 5: We are asking for a City Literature Fund to boost recognition of and capacity for literary artists and organisations in the City, and support creation of events that bring readers + writers together.**

**Submission to Long Term Plan, Wellington City Council 2021**  
**drafted by Claire Mabey, Verb Wellington**

We believe that it is essential, and in the City's best interests, to have a vibrant and well supported literary sector. Particularly alongside the immense opportunity that is the redevelopment and reopening of a Central Library. A City Literary Fund could be drawn on by the local literary sector to secure their mahi, as well as create new kaupapa, with the view to ensuring that Wellington's literary identity is as vibrant and world-leading as possible by the time our new Library is reopened. We view the Library as a central home for reading and for literature: it is the one public amenity that exists for, and because of, writing, storytelling and books. The fund may be drawn on for such kaupapa as: infrastructure assistance for independent literary artists and organisations; writer's residencies; children's literature projects / events, support for kaupapa Māori and indigenous literary projects / events; books and reading focussed kaupapa; individual literary project funding (writing and publishing). People and projects supported via this fund may be reflected in the programming fabric, and/or physical amenities, of the Central Library (for examples, projects could be developed to take place within the Library or in relation to it, or for or in relations to aspects of the collections within it).

We believe that a fund such as this can also assist the aims of the Aho Tini draft strategy. This draft strategy aims to focus on pathways for artistic careers (Focus Area 4). Without budget and a clear understanding that artists and arts organisations need support for people, before projects, it is difficult to understand how this can be achieved. Arts funding needs to enable people to do their mahi -- without people, the projects can't happen. It is a very challenging environment for many artists and independent arts organisations to operate without core infrastructure support. We would like to see a literary fund that supports the human mahi at the centre of a project, as well as open to project funding. We thank you for your mahi for our City and look forward to engaging in conversation with you over our proposals to the Long Term Plan.

Ngā mihi,

Claire Mabey (Verb Wellington)

Nadine Anne Hura (on behalf of Te Hā or Ngā Pou Kaituhi Māori)

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

<p><b>Q19. Do you support the proposed budget?</b></p>	<p>not answered</p>
--	---------------------

---

<p><b>Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?</b></p>	<p>not answered</p>
---	---------------------

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

- Q5. **Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?** not answered
- Q6. **If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer?** not answered
- Q7. **Oral forum time** not answered
- Q8. **Oral hearing time** not answered
- Q9. **Which of these options do you prefer? (3 waters decision)** Option 3. Accelerated (\$3.3bn investment – higher rates and debt).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** not answered
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** not answered
- Q14. **Which of these options do you prefer? (Central Library decision)** Option 1. Strengthen now by temporarily exceeding debt limit (Council's preferred option, additional 0.79% to rates).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** not answered

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library

---

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

---

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

---

**Q19. Do you support the proposed budget?**

not answered

---

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library  
Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Central Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital. General Proper education of the other road users about driving safely around cyclists (keep your distance while behind cyclists, keep your distance while taking over cyclists, not speeding when over taking cyclists...) Although not managed by the Council but supporting compulsory insurance for vehicles (e.g. cars) so in case of an accident with a cyclist, the driver of the vehicle is financially responsible for the medical and material costs of the cyclist. Drivers might become much more careful when driving around cyclists.

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)** not answered

**Q19. Do you support the proposed budget?** not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?** not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital. General There needs to be a focus on cycling infrastructure that delivers good outcomes rather than the current tick the box approach. Kaiwharawhara is a good cycle path but results in possibly increased danger to cyclists due to the high number of vehicle crossing points/movements. cyclist safety at intersections should be a priority and part of that is reducing the number of intersections cyclists have to navigate, not increasing them as kaiwharawhara has done.

- Q13. **Which of these options do you prefer? (Civic Precinct decision)** not answered
- Q14. **Which of these options do you prefer? (Central Library decision)** Option3. Strengthen now by increasing rates further (additional 1.79% rates increase).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 3. Sludge minimisation through Council funding (\$147m to \$208m capital investment, above debt limit, and higher rates)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
 Cycleways  
 Te Atakura (climate change)  
 Central Library  
 Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Central Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)** not answered

**Q19. Do you support the proposed budget?** not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?** not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library  
Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Central Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

- Q1. **Full name:** Gerad McArthur
- Q2. **Phone number:** not answered
- Q3. **Are you making this submission as an individual or on behalf of an organisation?** Individual
- Q4. **What organisation are you submitting on behalf of?** not answered
- Q5. **Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?** No
- Q6. **If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer?** not answered
- Q7. **Oral forum time** not answered
- Q8. **Oral hearing time** not answered
- Q9. **Which of these options do you prefer? (3 waters decision)** Option 3. Accelerated (\$3.3bn investment – higher rates and debt).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** not answered
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** Don't know.
- Q14. **Which of these options do you prefer? (Central Library decision)** Option3. Strengthen now by increasing rates further (additional 1.79% rates increase).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 3. Sludge minimisation through Council funding (\$147m to \$208m capital investment, above debt limit, and higher rates)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library  
Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Central Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

Decision 6 Funding the Central Library. The lack of Wellington's library building in Civic Square is a scandal. The building is a critical element, but even more so, the books within. This essay by Lindsay Shelton in Wellington Scoop is a clarion call: <http://wellington.scoop.co.nz/?p=135573> Fund the Library fully. Open it without further delay. Refrain from de-accessioning the off-site stored collection until the reading and scholarly needs of the community can be assessed once the restored library building is back in service.

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

Investment in three waters infrastructure  
Te Atakura (climate change)  
Central Library  
Te Ngākau funding for future work

**Q17. Your comments on the big decisions (optional)**

3 Waters: There is little detail that is helpful in accepting that WCC has insufficient data and expertise to deal with the real job of cleaning up the water problems. What has been happening? Are you suggesting that privatising services was a mistake? If so, what is the strategy and the cost to change this? WCC needs to get key infrastructure going and this can not be put off to future generations....this is not what sustainability means. We need to get away from Pipes Tunnel vision and need to think about reducing waste of rainwater and grey water and techniques to increase absorption and carbon capture. WCC needs to fund some smaller scale community initiatives and get away from consultants reports absorbing a big share of funding! The issues bigger than local and we need to scale up solutions...this is would be the benefit of Central Government takeover if WCC can not make progress in helping communities deal with smaller scale initiatives designed to help a culture shift away from waste and wastage. In Houghton Valley, locals are struggling to get support with such an initiative. WCC trumpeted the Waitangi Park initiative internationally so why can we not be lifting horizons now? This is why I am asking for more spending that WCC wants and TRUSTING that it would be used with future generations in mind. Central library: why are we still being asked this after all the consultation thus far? Te Ngākau: Any analysis of office space availability or changing work practice that makes CBD office space less/more viable? I regret that my lack of trust in WCC to manage big projects means I put development of this central city square a lesser priority than critical infrastructure as I can see this turning into 10 years of consultation and no real action when compared to the Library progress.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

I somewhat support the proposed budget.

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

I believe that the consultation process is inadequate for the problems local government faces all over the country. It may be that a central government review of this will help but I am doubtful as the time period elected representatives serve in both local and central government is inadequate. I do not see a 3 year term as having any influence on the big decisions; and longer-term representatives see no personal responsibility for decisions taken as they are part of a flawed process! I think an investigation of Citizens Fora and Referenda are overdue. We need 100 year thinking if we are to get to grip with sustainability and carbon zero aims. I do not see career local body politicians, fly by night high paid executives, and consultants who report to channeled TOR as being the way to a better future for our grandchildren. I agree with the OBRA submission that "Resilience....should be a STRATEGIC INITIATIVE across all councils and in line with central government actions as well. In addition, the key impacts of climate change appear to have been either ignored or brushed over lightly e.g. how to look after coastal communities." In effect, retreat from the coastline is such a huge issue that councils are too scared to deal with the consequences of this and lack the weight to deal with multi-national insurance underwriters. Even smaller issues like the attitude shift needed to break the fixation with privately owned ICVs and open up roads to alternative transport seem to be beyond the power of local bodies who do not have the resources or skills to deal with community backlash that privileges vested and hostile interests. In these cases, the 'social contract' is broken and we need to look for a new way to obtain informed consent from citizens. I would like to see elected representatives strong enough to host discussion that questions the value of the process that elected them. And, look for a better one that is demographic as well as democratic. If one has in mind a % of citizens that should participate in consultation to validate the process and product of that consultation, how will the result of this consultation fare?

---

| Q4. What organisation are you submitting on behalf of?  | not answered  |
| Q5. Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?  | not answered  |
| Q6. If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer? | not answered  |
| Q7. Oral forum time   | not answered  |
| Q8. Oral hearing time   | not answered  |
| Q9. Which of these options do you prefer? (3 waters decision)   | Option 3. Accelerated (\$3.3bn investment – higher rates and debt).   |
| Q10. Which of these options do you prefer? (Wastewater laterals decision)   | not answered  |
| Q11. Which of these options do you prefer? (Cycleways decision)   | Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)                    |
| Q12. Which of these options do you prefer? (Te Atakura Funding decision)  | Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).                                 |
| Q13. Which of these options do you prefer? (Civic Precinct decision)  | not answered  |
| Q14. Which of these options do you prefer? (Central Library decision)   | Option 1. Strengthen now by temporarily exceeding debt limit (Council's preferred option, additional 0.79% to rates). |
| Q15. Which of these options do you prefer?(Sewage sludge and waste decision)  | not answered  |

<p><b>Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below</b></p>	<p>Investment in three waters infrastructure            Cycleways            Te Atakura (climate change)            Central Library</p>
--	---

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

<p><b>Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)</b></p>	<p>not answered</p>
---	---------------------

<p><b>Q19. Do you support the proposed budget?</b></p>	<p>not answered</p>
--	---------------------

<p><b>Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?</b></p>	<p>not answered</p>
---	---------------------

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

--	--

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Central Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model.

<p><b>Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)</b></p>	<p>not answered</p>

---	---------------------

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital. I'm using this form to save time and because I feel that I submitted on this during previous consultations - like Newtown connections. It's been so frustrating feeling the momentum sag out of those projects. I had high hopes that my kids could safely bike around their neighbouring suburbs but sadly that's not the case. There just isn't the infrastructure. I cycle daily and atleast once a week am nearly hit by a car. Spending some money to make cycling safer will be forward thinking. Big cities are already doing it . Look at Auckland!! Those protected cycle lanes on K Road are the envy of every wellington cyclist.

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

- Q1. **Full name:** Ross Petherick
- Q2. **Phone number:** not answered
- Q3. **Are you making this submission as an individual or on behalf of an organisation?** Individual
- Q4. **What organisation are you submitting on behalf of?** not answered
- Q5. **Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?** No
- Q6. **If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer?** not answered
- Q7. **Oral forum time** not answered
- Q8. **Oral hearing time** not answered
- Q9. **Which of these options do you prefer? (3 waters decision)** Option 3. Accelerated (\$3.3bn investment – higher rates and debt).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** not answered
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** not answered
- Q14. **Which of these options do you prefer? (Central Library decision)** Option3. Strengthen now by increasing rates further (additional 1.79% rates increase).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 3. Sludge minimisation through Council funding (\$147m to \$208m capital investment, above debt limit, and higher rates)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
 Cycleways  
 Te Atakura (climate change)  
 Central Library  
 Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Central Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)** not answered

**Q19. Do you support the proposed budget?** not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?** not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

<p><b>Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?</b></p>	<p>not answered</p>
---	---------------------

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

- Q1. **Full name:** Mark Huser
- Q2. **Phone number:** not answered
- Q3. **Are you making this submission as an individual or on behalf of an organisation?** Individual
- Q4. **What organisation are you submitting on behalf of?** not answered
- Q5. **Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?** No
- Q6. **If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer?** not answered
- Q7. **Oral forum time** not answered
- Q8. **Oral hearing time** not answered
- Q9. **Which of these options do you prefer? (3 waters decision)** Option 3. Accelerated (\$3.3bn investment – higher rates and debt).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** not answered
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** not answered
- Q14. **Which of these options do you prefer? (Central Library decision)** Option3. Strengthen now by increasing rates further (additional 1.79% rates increase).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 3. Sludge minimisation through Council funding (\$147m to \$208m capital investment, above debt limit, and higher rates)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below** not answered

---

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Central Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model.

I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital. The best cities I have lived and travelled in around the world are always the ones that have prioritised cycling over cars even going as far and giving cyclists right of way. It makes for a safer, more vibrant and enjoyable city experience with less cars on the roads. I would also like to make a comment on the new cycle way installed along Evans Bay opposite the airport. This is a great investment, and well appreciated, however I am disappointed to see the use of loose shingle on both sides of the immaculately smooth tarseal pathing. This is not much of an issue for cyclists, but extremely dangerous for skateboards, longboards, and e-boards, where one stone can send the rider flying for a major accident. Please consider in the future the materials around these areas as stones always get knocked across surrounding areas

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

I've been a resident in Wellington for over 30 years and have witnessed continuing three waters maintenance work occurring, as well as major new investment such as Moa Point & the associated Mt Albert tunnel. The recent problems have received much media exposure that I believe is overblown. Therefore I support only a moderate increase in expenditure. Riding bicycles is possibly the most significant way residents can reduce their CO2 emissions. We have declared a climate emergency, just get on and build infrastructure needed to allow that to happen. The present sludge disposal system has only been in use for about 20 years. It would be wasteful to now close it down after such a short time. Originally it wasn't going to contribute to waste at the landfill because the compost would be shipped out again. Investigate ways of improving that system.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

I somewhat support the proposed budget.

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

not answered

- Q1. **Full name:** Darryl Gouder
- Q2. **Phone number:** not answered
- Q3. **Are you making this submission as an individual or on behalf of an organisation?** Individual
- Q4. **What organisation are you submitting on behalf of?** not answered
- Q5. **Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?** No
- Q6. **If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer?** not answered
- Q7. **Oral forum time** not answered
- Q8. **Oral hearing time** not answered
- Q9. **Which of these options do you prefer? (3 waters decision)** Option 3. Accelerated (\$3.3bn investment – higher rates and debt).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** not answered
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** not answered
- Q14. **Which of these options do you prefer? (Central Library decision)** Option3. Strengthen now by increasing rates further (additional 1.79% rates increase).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 3. Sludge minimisation through Council funding (\$147m to \$208m capital investment, above debt limit, and higher rates)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library  
Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Central Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Central Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model.

---

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)** not answered

---

**Q19. Do you support the proposed budget?** not answered

---

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?** not answered

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital. Please take proper account of the multiple benefits of active modes of transport: including reducing climate change, physical health and mental health benefits, and economic and equity benefits. Increased active and public transport should go hand-in-hand with a transformation of our cities to reduce dependence on car use, which has so damaged our urban fabric.

Cycleways  
Central Library

---

**Q17. Your comments on the big decisions (optional)**

Central Library should be demolished, the site sold or leased and a new building built and the Library space leased back to the Council, similar to proposed for the Council office buildings. This is a low risk and low cost option. The Council then does not need to maintain the building or risk future earthquake strengthening issues. The Council does not need to own its buildings. We cannot afford it. Cycleways - With a proposed rate increase of over 13%, can we really afford to increase the spending on cycleways. If you double the rates as proposed over the next ten years, you won't have any residents in the city who can afford to live here in any case. Social Housing - I know this issue isn't in the above big decisions but the Wellington City Social housing budgets are a mess. The city needs to sell its Social Housing to either the Central Government or a Social Housing Provider. Why is Wellington City in the business of Social Housing when most other Councils, eg Auckland and Christchurch have no social housing. Leave it to Central Government to sort out. They are taking us for a ride. We cannot afford it. The proposed rates increase will have a big impact on rents in the city. The increase in rates will be passed onto Tenants who are already burdened with high rents and lack of affordable housing. You cannot blame landlords for charging high rents when the Council continues to increase rates far in excess of inflation and wage increases. This type of policy is unsustainable and will make our city a less desirable place to live. Planning - WCC should focus on planning changes so we can build more houses. Let the private sector build the houses. The Council needs to sort out the planning aspects. This is not just a matter of building up in existing suburbs but big thinking plans for new subdivisions close to the city with proper public transport connections. Lets Get Wellington Moving - This collaboration with NZTA is a mess. The Council should abandon this huge waste of resource and go it alone with its Cycleways and Bus Lane upgrades etc. Leave it to Central Government to sort out SH1 and the folly that is Light Rail. .

---

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

---

**Q19. Do you support the proposed budget?**

I strongly oppose the proposed budget.

---

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

I support keeping the budget the same but with some changes.

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

If you cut spending in other areas then you could afford do the basics properly. Upgrade infrastructure etc. The zoo costs the city several million a year. Close it or let it pay its own way. Social Housing, 400m over 10 years...sell it or get Central Government to take control of it. LGWM - 1.2Billion - where is the money coming from for that.....walk away from this folly and go it alone with the central city bus lanes, cycleways and footpath upgrades. Consultation with Iwi.....millions every year.....why.....for what gain? Golden Mile.....don't try and fix what is not broken.....yes ban cars at certain times to free up bus travel times but we cannot afford big changes on this item. The proposed rate increases are unaffordable and far above what the average land owner or tenant can afford. This 10 year plan needs a complete rethink and budgets in other areas reviewed so that the long term infrastructure deficits can be funded properly. Focus on the basics! Start with a clean sheet of paper!

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Central Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model.

---

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)** not answered

---

**Q19. Do you support the proposed budget?** not answered

---

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?** not answered

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital. I moved to Wellington and within 2 months was involved in 2 minor collisions on my bike... one of which happened on a clear day, stopped at a red light... Drivers in Wellington actively hate cyclists, if they can't learn to share and be a tiny bit patient then we need safe passageways.

I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital. My partner rides with my son on the back of the bike. I know this is health and good for the environment but the lack of cycle ways and poor driver education around sharing the road makes me very anxious. Please make it safe for our kids and families to be on the road (or even better cycle lanes!) on a bike

Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Central Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

- Q4. **What organisation are you submitting on behalf of?** not answered
- Q5. **Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?** No
- Q6. **If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer?** not answered
- Q7. **Oral forum time** not answered
- Q8. **Oral hearing time** not answered
- Q9. **Which of these options do you prefer? (3 waters decision)** Option 3. Accelerated (\$3.3bn investment – higher rates and debt).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** not answered
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** not answered
- Q14. **Which of these options do you prefer? (Central Library decision)** Option3. Strengthen now by increasing rates further (additional 1.79% rates increase).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 3. Sludge minimisation through Council funding (\$147m to \$208m capital investment, above debt limit, and higher rates)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library  
Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Central Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model.

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital. Roads are not the future solution for transport in our city. Especially if the proposed intensification of the central suburbs goes ahead. The city needs to be safer and more accessible to cyclists, pedestrians and other forms of mobility than privately owned cars.

Cycleways  
Te Atakura (climate change)  
Central Library  
Te Ngākau funding for future work

**Q17. Your comments on the big decisions (optional)**

In the Long Term Plan the CPI increase for the 67 organisations funded through multi-year contracts has been removed as a saving. This means that Council will not be able to apply this inflationary increase without reducing the grant pool. The inflationary (CPI) increase for contract organisations was initiated in the last LTP. The accumulated effect of no adjustment will amount to a significant loss over 2-5 years. This is critical at a key point where BATS is proving such strong value in helping to create better resilience and innovation in the local arts sector. This is an unfortunate and counter intuitive measure and we strongly advise that the Council does not do this. As discussed in the submission on Aho Tini 2030 BATS welcomes the values and goals in the draft pan but effectively cutting funding through the CPI adjustment loading will immediately impact on the ability of organisations such as BATS to effectively partner with Council within a challenging period for all. We support the Council's priorities. We note with appreciation Council's commitment to strong partnerships with mana whenua as one of the plan's six priority objectives. This commitment is essential for delivering to Te Tiriti and we note with enthusiasm Council's vision of becoming bilingual by 2040. We welcome the focus on the four well-beings to underpin the strategic priorities. A reliant water infrastructure and zero-carbon, waste free transition are important to us as members of the community. We are particularly mindful of the importance of safe and resilient housing coupled with reliable public transport as we build greater inclusivity, diversity and help support wellbeing with our communities. In reference to Aho Tini 2030 we see the upmost importance of this for both for our artists and audiences to engage and be enriched by art making. We live as part of the same local communities and it is of concern that these fundamentals to living well are becoming barriers to inclusion. We welcome that Council states that 'resilient and fit-for-purpose community, creative and cultural spaces" as one of Council's six priority objectives. Regarding the seven big decisions we support a more cohesive and thorough consultation with the arts sector in Decision 5 and 6. Both the public library and the civic centre development we view as inextricably linked. Both spaces have historically been 'homes' for arts and culture and we are ready to assist the exciting opportunity to reimagine and rebuild these spaces. We welcome a focus on building forward through relationship with Mana whenua and ensuring the civic centre space reflects the heart and power of this place on the earth. A place that invites, reflects and empowers all of Wellington's diversity. Arts can and must be invited to play a significant part of this action moving forward.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

Don't know.

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Regarding community infrastructure investment we stand with Arts Wellington in their feedback around the importance of arts communities being well engaged in the development of the spacial plan. This will not only help activate Focus area 3 of Aho Tini ("Aho Whenua – Our city as a stage") in a fit for purpose and strategic way but begin to align the values around partnership and collaboration more effectively. We stand with the following submission from Arts Wellington: "As Council approaches these decisions, we encourage you to consider: How any leasing or partnership arrangements in new or redeveloped facilities may result in changes to the costs of using these facilities. Smaller community-based arts groups and organisations would likely struggle to keep up with cost increases. Whether any new or redeveloped spaces could support arts communities by providing spaces where they can make and show their work to audiences. If spaces or facilities are decommissioned, whether any may be appropriate to repurpose as spaces for artists and arts organisations to make, share and present their work. Affordable studio space in particular is crucial for the retention of artists and practitioners after completing training/study, and the development of sustainable careers. We also note that for many years the Wellington arts sector has advocated for the need for an affordable mid-sized venue (400-600 seats) and that this consideration has yet to be incorporated in Council plans." These considerations are part of the pathways that we at BATS are exploring with partners both in the tertiary sector and with organisations such as Tāwhiri as well as working with national partners to support work moving from Wellington. Currently there is a real pressure on artists for adequate space if they wish to scale up their work from the size of BATS auditoria aside from in the digital space we are experimenting in. We stand with Arts Wellington in their comments about the need for arts sector input in the requirements and specifications of the upgrades of the St James, Town Hall and indeed in any of the venues requiring upgrades. From the vantage point of BATS we feel keenly the lack of activity in the Hannah Playhouse and see the impact the dearth of mid size venues has on the health of the arts ecosystem in Wellington. The affordability and accessibility to Council owned venues for independent artists is of continuing concern. BATS has made a seperate submission on Aho Tini 2030 but joins a number of local arts leaders who flag their concern on the lack of budget detail to support the delivery of some very positive steps in the draft policy. As highlighted in the CPI commentary at the top of this section, static funding or even the smallest cuts will not enable the timely aspirations of the draft policy's partnership model. With rising costs of living in Wellington, the ongoing impact of the Covid -19 environment, as well as very real increases in costs for the creation of arts experiences. The Wellington arts ecology has proven strength and resourcefulness and we at BATS are consciously working through strong value alignment to deepen our work with Council. We see a need and align strongly with Council's strategic aspirations around diversity, hauora, well-being, space activation, innovation, resilience and greater inclusivity. Nestled beneath Tangi Te Keo we are the guardians of a valued tāonga on a local and national scale. As we move into our next 30 years we seek to sustainably and ethically bring our resource to a wider community through championing social connectedness while having fun. BATS vision is to light-up lives through our work. We do this by identifying and realising the value BATS brings to its whānau, and developing new and dynamic ways to co-create. We fulfil this vision by asking the right questions; testing ideas through significant community involvement; and keeping what we're doing, but doing it even better.

- Q13. **Which of these options do you prefer? (Civic Precinct decision)** not answered
- Q14. **Which of these options do you prefer? (Central Library decision)** Option3. Strengthen now by increasing rates further (additional 1.79% rates increase).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 3. Sludge minimisation through Council funding (\$147m to \$208m capital investment, above debt limit, and higher rates)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library  
Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Central Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

Cycleways

---

**Q17. Your comments on the big decisions (optional)**

Cycling is unlikely to become a highly popular option for low-emissions transport in Wellington, given the hilly landscape and challenging weather. Many businesses in the CBD do not provide bike racks or showers, which further limits people's ability to use cycling as a legitimate transport option. Bikes and e-bikes are also expensive. This means the only people that cycling is really available to is fit, able-bodied people with access to a bike rack and enough money to buy a bike. Does the council have information on what proportion of the city's population meets those criteria? I think its likely that many of Wellington's citizens would not benefits from the proposed cycleway improvements. The cycleways are still an important part of our low-emissions future and should still be improved, which is why I supported the high investment option. However, the remaining budget that will tackle the outer suburbs in future years would be better spent subsidising electric bikes so that people can actually cycle around the Wellington landscape, or on other low-emissions transport options like electric buses, trams or trains, that are more accessible to the wider population.

---

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Housing - Wellington's housing stock is truly atrocious, many people I know are regularly sick, cold and unable to afford to properly heat their homes. Living in mould-ridden rooms is considered normal for the average Wellingtonian. The burden of keeping the house safe and warm falls on the tenant because many landlords ignore insulation and heating requirements, knowing that their tenants will not complain or leave because the housing market is too competitive. Many tenants cannot afford this burden so instead have to choose to be cold and sick. I think this is unacceptable and I don't understand why we have to live like this. Its quite embarrassing for Wellington as a city. I don't know what the council can do about this but something needs to change. I don't see this issue reflected strongly enough in the plan's priority areas and big decisions.

Climate change - The 10 year plan does not place enough emphasis on the climate change challenge. There is some discussion around emissions reduction, but not much around resilience to physical climate impacts. We are already well behind the ball on responding to climate impacts so this cannot wait until the next plan. Ecological wellbeing and biodiversity - Similar to above, there is not enough mention of this in the consultation. Wellington's biodiversity may be seen to be thriving compared to the rest of the country, but in reality it is really just several bird species that have flourished in the last few decades, mostly because of Zealandia. The rest of Wellington's original biodiversity has not recovered and is still being devastated by massive rat populations. The 10 year plan needs to include measurable targets for improving biodiversity.

Refugees - There seems to be no mention in the consultation about welcoming and caring for refugees. World politics and climate change will see a massive increase in refugees needing to be accepted into NZ and Wellington needs to start preparing for how to house and support these people.

---

Cycleways

Q17. Your comments on the big decisions (optional)

Cycling & Walking – from cycleways to education to infrastructure – should be your priority. This will reduce stress, carbon emissions, costly repairs to roads beaten down by cars...

---

Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)

not answered

Q19. Do you support the proposed budget?

I somewhat support the proposed budget.

---

Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?

not answered

Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?

Listing Council's "preferred option" on each matter in the survey and the "Our 10-Year Plan" pdf for each option is highly problematic. Firstly, it certainly leads to bias in the answers, encouraging authoritarians to comply, and contrarians to disagree. Further, "preferred" is not defined. Does it mean 100% vote of the Councillors? Or everyone who works there? Or the staff? If 100% of you prefer one, why even bother listing the other options? Why bother asking our opinions? Do you want to be swayed by less qualified opinions? You have doomed yourself not to get an accurate view of public opinion. Was this intentional?

- Q5. **Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?** No
- Q6. **If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer?** not answered
- Q7. **Oral forum time** not answered
- Q8. **Oral hearing time** not answered
- Q9. **Which of these options do you prefer? (3 waters decision)** Option 2. Enhanced investment (\$2.4bn - the Council's preferred option).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** Option 2. Take ownership (Council's preferred option, \$32m investment).
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** Don't know.
- Q14. **Which of these options do you prefer? (Central Library decision)** Option3. Strengthen now by increasing rates further (additional 1.79% rates increase).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 4. Sludge minimisation through alternate funding (Council's preferred option, \$147m to \$208m capital investment funded through a levy, no additional rates increase)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Cycleways

---

**Q17. Your comments on the big decisions (optional)**

We desperately need more cycling infrastructure in Wellington. Especially in suburbs like Brooklyn where it is incredibly unsafe to cycle due to high speeds, very poor quality pedestrian options, and no existing cycling infrastructure. I currently don't commute to work by bike because I find it terrifying to turn onto Brooklyn road with cars going down it at high speed and no dedicated space for cyclists.

---

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

---

**Q19. Do you support the proposed budget?**

I somewhat oppose the proposed budget.

---

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

I support increasing spend in the current budget.

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

not answered

<p>We have contributed to and endorse Toi o Taraika Arts Wellington's submission on the Long Term Plan. In addition, we have some additional points to make regarding the importance of the city's venues and creative spaces, including Te Ngakau, and how they are viewed and planned for by WCC. We would also like to add that while the Arts and Culture Fund is not a significant line - compared to those above - in the city's annual budget, any increase in investment in the arts will be repaid, many times over, in the social and cultural well-being of the city.</p>

ROYAL NEW ZEALAND BALLET

Additional comment to accompany submission on the Long Term Plan, May 2021

The Royal New Zealand Ballet is pleased to have the opportunity to make this submission on the latest iteration of Wellington City Council's Long Term Plan.

In addition to the responses which we have given regarding the different options for the Council's Seven Big Decisions, as set out in the consultation document, we would like to note the following:

Wellington City Council rightly places investment in arts and culture at the heart of the City's current and future plans. We are delighted that, since our 2018 submission, substantial progress has been made on the seismic strengthening of the St James Theatre and the Town Hall. We look forward to returning to the St James for performances in early 2022, and to our own premises at the theatre, later in the year.

However, despite Council's stated commitment to developing resilient and fit-for-purpose creative spaces, our experience with the St James project is that it has been viewed by WCC as a building project, rather than a people-centred, cultural project. Fit-for-purpose must be considered to cover much more than foundations and floors, if the true purpose of a building is to be fulfilled.

It is the usage of the theatre, bringing people together into a shared space, for a shared experience, that gives it its greatest value. In addition, it is the way that the spaces around the theatre – foyers, function spaces, hospitality – that bring the theatre to life during the day, encouraging people to walk through the doors to engage with the arts, learn a little of what goes on behind the scenes, or just enjoy a cup of coffee. With enlivened public spaces that celebrate the art that is created there, through changing exhibitions, digital displays and more, the re-opened St James can play a vital role in the regeneration of Courtenay Place as the welcoming heart of Wellington's entertainment precinct.

The aim, in any cultural regeneration project, should be to make the space truly welcoming and exciting for everyone who goes there, from seasoned ballet goers attending a first night to families looking for a quiet place to have a cup of coffee before catching the bus home.

The same approach as for the St James and the Town Hall could and should be taken for Te Ngākau, Civic Square. It is more than an open space surrounded by a disparate collection of buildings, some of which are currently closed. It is a place created for and enlivened by people, for performance, protest, celebration and more. To treat it as a void with some inconvenient and expensive seismic strengthening projects around the edges, does the city and its people a disservice. Te Ngākau, Civic Square is surrounded by doorways and bridges which connect Wellingtonians with the very best in arts and culture that the city has to offer and we should celebrate it.

The amount dedicated to investment in arts and culture in Wellington City Council's annual budgets is small. The sector that it helps to support is nimble and entrepreneurial, adept at raising additional funds and creative in finding solutions. An increase in investment through the Arts and Culture Fund

will not make a significant difference in Wellington City Council's overall balance sheet, but it will have a significant impact on the social, cultural and economic well-being of the city that we are proud to call home. We encourage Wellington City Council to consider an increase in investment in the arts through the Long Term Plan, knowing that such an investment will be repaid, through the health and vibrancy of our cultural sector and the way that it serves Wellington, many times over.

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below** not answered

---

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Central Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model.

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model.

---

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)** not answered

---

**Q19. Do you support the proposed budget?** not answered

---

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?** not answered

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

Q16. **Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Wastewater laterals  
Cycleways  
Te Atakura (climate change)  
Central Library  
Sludge and waste minimisation  
Te Ngākau funding for future work

---

Q17. **Your comments on the big decisions (optional)**

Raise the commercial and residential rates, and ask government for more funding.

---

Q18. **You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

---

Q19. **Do you support the proposed budget?**

Don't know.

---

Q20. **You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

---

Q21. **Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Increase charges on cars which are ruining life in Wellington. Institute congestion charging. Support public transport being free for all young people. No more new highways. Do not support Mt Victoria tunnel until the mass transit light rail system is commissioned and the need is proven. This 10-year plan needs much more funding for implementation of community development facilities around the public transport hubs. This must be planned and construction started well before the end of the 10 year plan period. Add at least \$100m for this over the period.

Tēnā koutou,

We are Eryn Gribble and Ellie Clayton, the Kaiwhakahaere/Coordinators from the Newtown Community & Cultural Centre. We are a Trust, with a passion for Newtown and Newtowners.

We would like to submit on 4 issues. 2 are highlighted aspects of the 10 Year Plan:

- Decision 4: Te Atākura - climate change
- Decision 3: Building more cycleways

As well as 2 aspects which have not been highlighted in the plan:

- Housing
- Community Centre funding, including Consumer Price Index (CPI) increase removal from WCC contracts

#### **Decision 4: Te Atākura - climate change**

Our community in Newtown is diverse and of a lower socio-economic background than many in Wellington - as with any crisis, those of us with fewer resources are always worst hit. As well as that, our community have 'aiga in the Pacific, whānau around the motu, the immigrants and former refugees here have relatives around the world who will be dramatically affected by climate change. Newtowners, and the Newtown Community Centre, want urgent action on climate change, locally and globally.

We support **Option 3, to fully fund Te Atākura**. However, we would like to note that our preference would be to improve our public transport systems which we believe should be owned by the people of Wellington rather than a private company. We also call for public transport to be green and accessible to everyone - i.e. cheaper, or free, particularly for those on lower incomes. We would also de-prioritise electrifying the Council's cars, in favour of Council staff taking public transport (outside of necessary maintenance vehicles etc). We saw with the Covid-19 lockdown that it's possible to do much remote work or remote meetings and we would support this over the use of unnecessary Council vehicles.

#### **Decision 3: Building more cycleways**

We support **Option 4: Accelerated Full Programme**.

According to the Commuter / Waka app (commuter.waka.app), the majority of Newtowners already walk or use public transport. Making cycling safer and more possible for our community is a priority to be in line with our call for urgent action on climate change.

#### **Housing**

We were surprised not to see housing highlighted as one of the key issues in the 10 Year Plan. We call for:

- More social housing. This is urgently needed, Aotearoa is still in a housing crisis. At the Community Centre we regularly see people who are struggling to afford housing, are in emergency housing or are currently sleeping rough or in their cars.
- Pressure on Government at a national level to introduce rent control - rents in Wellington have increased drastically in the last few years and many are struggling to make ends meet. Newtown has a high level of rental homes.

- More funding for wraparound support for people without stable housing, without relying on charities to do this mahi.

### **Community Centre funding, including Consumer Price Index (CPI) increase removal from WCC contracts**

This part of our submission is a little more personal, and perhaps a little uncomfortable.

We are primarily funded through the Wellington City Council, for which we are massively appreciative. This allows us to do our crucial mahi in the community. However, year after year at our 6-monthly funding reviews with Council, we are told not to ask for more money. Not only are we writing this part of the submission to say that we can't afford you to take away our Consumer Price Index (CPI) increase, but we're also here to ask for more money. We would welcome an opportunity to discuss this – sometimes it feels like screaming into the wind, but we need WCC to understand and to hear us. We cannot survive and definitely not thrive with the current funding community centres are provided.

One of our mandates from Wellington City Council is to provide cheap, accessible and quality venue to the community – so they have space they can use for their birthday parties, community meetings, fundraising events, dance practices – a whole host of reasons! We are funded to manage these buildings for these purposes. At the Newtown Community & Cultural Centre, we manage four council owned buildings – Newtown Tool Library, Newtown Hall, Network Newtown and our core premise Rintoul/Colombo streets (currently closed for renovations) – which has 5 hireable spaces housed within it. We also run various community building activities/programmes such as:

- A Youth Programme (including one of the most affordable school holiday programmes in Wellington, at \$80 for the whole 10 days for Community Services Card holders)
- Smart Newtown (free internet, help-desk & computer hub and computer classes [www.smartnewtown.org.nz](http://www.smartnewtown.org.nz))
- Wellington Timebank - a community of people who share their skills for time instead of money ([www.wellingtontimebank.org.nz](http://www.wellingtontimebank.org.nz))
- Newtown Tool Library (it's just what it sounds like, a library for tools [www.newtown-tool-library.com](http://www.newtown-tool-library.com))
- Free soup Fridays (connecting community & providing food to those who need it) & a free daily hangout space for tea and coffee
- Wash against Waste (keeping events/parties/dinners waste free)
- \$2 exercise classes supported by Tū Ora
- The Newtown News, a community zine by Newtowners for Newtown

Our only form of income for the core running of the centre and its spaces (aside from grants) is income from hire. If we raise hire rates to be able to pay our staff fairly then we no longer are achieving one of our core goals. Newtown is a particularly low socio-economic area and we want to provide community to space to everyone in Newtown who needs it.

Eryn and Ellie, encouraged by a former staff member (who left to obtain a 6 figure salary in public sector), had a kōrero with other Community Centre coordinators across Wellington with a thought to unionise. We discovered that in Newtown, our wages were about \$5 below the bottom tier on the Council pay scales for Community Centre staff – and that we hold more responsibility (particularly in terms of management of staff - we currently manage 10 staff and multiple programmes between us). We chatted with other coordinators from around Wellington and learnt that most were on approx \$24 per hour. We saw a vacancy listed at a Council run community centre – where we as

Coordinators could earn the same amount each week for a role that was 10hrs fewer per week – and that was just the starting rate!

Along with being told ‘not to ask for more money’, we have also consistently been told by WCC that the issue of payrates sits only with the NCCC Trust Board, not with Council. However, as mentioned above, WCC are our primary funders and an increase to wages cannot be sustained with the grants that we receive. Our reserves for many years have been tagged for our upgrade project.

The NCCC Trust Board, after talking with Council staff and Councillors, decided that it was clear that the situation was unfair, so in December of 2020 Eryn and Ellie were each given an increase of \$5 per hour to reflect their skills and level of responsibility – this now puts them on or just below the bottom tier of the payrate for council employed community centre coordinators – so does not reflect our experience/performance – or the fact that NCCC is probably the biggest community centre in Wellington (in terms of venue management and project management).

Currently I (Eryn) am going through an employment process for Wellington Timebank, a council funded project – funded for 25 hours of coordinator time per week – The timebank can’t achieve its outcomes on this amount, nor is this a liveable amount of hours (on a low-wage) for our employee - so I spend time finding funding for this project so that the timebank can be the amazing community it is. Like many jobs in the NFP sector, the diversity of skills we require from a coordinator is huge – communications (social media/newsletters), volunteer management, event management, people skills, strategic thinking & outreach etc. The outcomes Council funding has set for Wellington Timebank are:

- Building a diverse membership for Timebank- membership statistics indicate continued awareness of diversity: age, ethnicity, gender, abilities
- Maintain and increase community participation, continue to sign up new members, encourage membership trading, provide volunteering opportunities for the Timebank itself and for other member organisations, and promote the Timebank to raise public profile
- Timebank will provide opportunities for members to develop connections at a local level through a variety of initiatives which may include hubs, potluck meals, and other social events
- Act as a ‘trade broker’ between members, for those identified as being ‘isolated’ or ‘vulnerable’, increase connections both within and outside of the Timebank

I have maximised the starting rate as much as I am able – to \$23.50 (\$1.40 over the Living Wage, or \$3.50 over the current minimum wage), but this is an awful lot to ask for, from someone earning \$23.50 an hour.

We tell you all this because we’re concerned about the future of the community sector in Wellington as costs increase but funding doesn’t. Wellington City council talks about investing in its communities in various plans/consultations however – this isn’t reflected in increases to the organisations that are on the ground floor doing the mahi. Yes, it’s mahi that we love - we are invested in this community and we love it. However, we - along with every community centre and many other organisations that obtain contract funding from WCC - need to be treated fairly and resourced to do our work. Removing the CPI increase is one part of this issue that we wish to highlight.

In the not-for-profit area, workers are often exploited and being pushed to do more work for no extra money. We often do it, because we care and because we know that it is important mahi. But this is not sustainable for the workers, or for the work that we do. It is mutually exclusive to not

decrease our funding, by removing CPI increase. We propose to WCC – find more money to effectively fund Community Centres and pay hard working staff fairly!

## Introduction

Who are we submitting on behalf of:

This submission has been prepared by the Owhiro Bay Residents Association (OBRA) committee. We have consulted with a variety of groups and individuals in the catchment but have not had time between writing and submitting to fully consult with the community. Our views however reflect long-standing community positions.

We are part of and have consulted with the Owhiro Catchment Collective(OCC) and fully support their

submission to the Long Term Plan.

Before outlining the details of our submission to the Long Term Plan we believe it is important to comment on the broad approach that the Council appears to be taking, and the concerns we have with its direction.

We don't want the legacy we pass to the next generation to reflect our failure to make hard decisions now.

In this regard the Council and the Long Term Plan process is significantly out of step with the wants and aspirations of the community it represents.

1. There are major failures in the infrastructure which holds the city together. We acknowledge the significant amount of investment required to make these a strong infrastructure platform for the City to grow. But we believe it is time to fix what needs fixing and not pass this off to another generation.
2. We need this LTP to not only set the direction for change but also articulate how the path will be navigated. Co-design with the community and ensuring the community is actively engaged in decision-making stages is imperative.

## Decision 1: Increasing investment to fix the water pipes

*The issue: There is insufficient detail in the documentation we have seen to take a clear position of the respective merits of Options 2 versus Option 3. This applies both to our catchment, Owhiro, and the wider city, particularly outside the CBD.*

### Our Recommendations:

1. **Owhiro Catchment. Resource the Owhiro Pilot to ensure it achieves its objective as being the prototype for successful citywide multiparty processes that restore 3 water networks to a sound state that no longer degrade waterways. Confirm that there is adequate funding to successfully and rapidly fix public and private pipe failures to ensure the Owhiro Stream and the Tapu Teranga Marine Reserve at Owhiro Bay are made fit for primary contact within a couple of years.**
2. **The network outside the critical assets in the CBD. Fund water infrastructure renewals and upgrades to a level that ensures that the entire network is made fit-for-purpose in the coming years.**
3. **Ensure training and recruitment systems are in place to achieve these goals.**
4. **Resource appropriately to ensure the recommendations of the Mayoral Taskforce, particularly around resilience and water-sensitive urban design are implemented.**

## **Owhiro Catchment: funding to fix the pipes**

Funding for the Owhiro Catchment and the Owhiro Pilot have been recognized by WCC, including in the Mayoral Taskforce on the 3 waters, as a project of high priority for the city and the region. The Owhiro Catchment has been chosen by WCC and WWL to be the site of the first roving crew/Know Your Pipes team and as such needs to be addressed quickly and successfully if the city is to succeed in improving water quality in the city's waterways and beaches in line with the NPS-FM.

We need to improve water quality in our streams and bays to a level that is fit for primary contact. Meeting the NPS-FM is a responsibility that must be shouldered. Wellington's water infrastructure needs to be addressed at a level well above Business As Usual.

The City's Chief Infrastructure Officer has confirmed that there is funding to undertake both investigations and repairs of failed or failing assets in the Owhiro catchment. However, should major failures be uncovered, they will require additional funding, more in line with Option 3 than Option 2.

Option 3 states under the Wastewater section: "After investigations and a \$391m renewals programme, we would be able to invest to reduce sewage pollution, starting with catchments around the central city, Karori and Owhiro Bay, then widening into other catchments." This is not included in option 2. This wording is problematic if the City is committed to the Owhiro Pilot and needs to be amended.

## **The Network outside the CBD and most critical assets**

The issue we have with the current preferred option: The consequential difference between options 2 and 3 is unclear but given the difference in the amount of money (moderate increase under 2, significant under 3), it is likely that the CBD's assets will receive the necessary attention but that the suburbs may be left to tread faecally-contaminated water.

Our position is that we need greater clarity in the Long Term Plan around funding commitments to the network further out from the CBD and ensure that funding will result in transformative change.

Option 2 is a politically safer option as it won't generate as much kick-back from concerned ratepayers but if we want to solve these problems we need to help the community have greater transparency around the implications of not spending sufficient money to modernise our network through a well-funded renewals programme.

Under Option 2 it is likely that, 30 years down the track, our network will still be aged, particularly outside the CBD, and that over the coming 30 years risks of major failures, excluding the critical assets identified and addressed, will remain significant.

Option 3 is closer to an outcome where, in 30 years time, the renewal programme will have caught up

and kept pace with ongoing degradation of pipes. Therefore this option is more aligned to a strategic focus for Wellington, rather than a tactical one which is Option 2.

The environment should not be left to suffer from failing assets and future generations should not shoulder an unfair share of the burden.

## **Training, recruitment and scaling up**

WCC officer (Baz) told the Island Bay Residents Association on 3 May 2021 that a key reason that option 2 is preferred to option 3 is that there just aren't enough suitable people who can be recruited to undertake the scale of activity Option 3 would trigger.

We recommend that WCC be more ambitious and determined to fix the problems and this will clearly require a significant investment in training and recruitment resources. We support the establishment of regional or national training centres to train a new corp of water industry personnel.

WCC could also consider engaging with the Universities to see what science students could be sponsored to work with the council through their current projects and then in the organisation once their degree is completed.

We appreciate that it will be a massive challenge to the industry nationally, including WWL, to scale up to a level commensurate with the requirements. The human resources challenges are not insurmountable but they require focus and budget from the city. Scaling up will realistically need to be staged but we **have** to be ambitious.

WWL has succeeded in significant growth in capex spending around renewals in the last couple of years and this upswing in spending will need to be supported with access to more staff and equipment. Ensure WCC and WWL are resourced to work with other Councils, other industry groups and central government to build better career paths in water, increase local production of valves and other equipment that are currently dependent on vulnerable overseas supply chains.

## **Investing in actioning the Mayoral Taskforce on 3 Waters recommendations**

The Mayoral Taskforce Report on The Three Waters makes a number of recommendations that will improve outcomes for the environment and for resilience. These need to receive greater attention and funding to progress. These include but are not limited to progress around: resiliency, changes to new build requirements, support water efficient use by residents.

**We support the recommendations, including:**

1. Smart meters: continue the investigation of this important piece of green infrastructure. Ensure better community engagement and discussion of equity and guaranteed public ownership. We appreciate this is a contentious issue for our city.
2. Targeted rates: introduce a system similar to the one recently introduced by Porirua City Council to support home owners with repair work required to improve the private 3 water network.
3. MTF Rec 19: Task and fund WWL to develop a road-map for consideration in the 2024/34 LTP to achieve compliance with NPS-FWM.
- 4 MTF Rec 17: Establish suite of policy including rainwater harvesting and storage.
- 5.MTF Rec 8: Change district plan so all new land development consents are required to improve stormwater effects.
6. MTF Rec 9: Catchment scale planning.
7. MTF Rec 10. Green infrastructure.
8. We support the development of a WOF (Warrant of Fitness) system for 3 water pipes that would be part of all private house sales. This measure would drive significant improvements quickly. When houses are sold all laterals need to be inspected and this would generate a report that would appear on the LIM. Water mains would be checked for a leak, laterals checked to ensure they are fit for purpose. The city should require such a report before a sale could finalised.

## Decision 4: Te Atakura First to Zero (Climate change)

*The issue: Having an initiative for achieving zero carbon emissions is admirable for the council, but the underlying initiatives for how it will be achieved across the wider Wellington region is very light across all sections of Decision 4.*

*It is noted that Wellington City Council has not addressed Resilience, which should be a STRATEGIC INITIATIVE across all councils and in line with central government actions as well.*

*In addition, the key impacts of climate change appear to have been either ignored or brushed over lightly e.g. how to look after coastal communities.*

***Our recommendation: Acknowledge in the LTP that resilience needs to be addressed and will be included in next year's annual plan and subsequent LTPs.***

Addressing resilience is a requirement of the impact of Climate Change.

Resilience is critical to how Wellington will manage (survive) after any major event. Given the impact on Wellington after the Christchurch and Kaikoura earthquakes it is surprising that the council has failed to at least address the fact that there needs to be focus on this area including looking at what the most important factors are that the council needs to focus on, such as:

- What tools and systems etc. need to be in place should any communities become isolated from

water/electricity/power after an event

- What will the immediate support systems and then the medium-to-permanent fix approaches be?
- What capabilities need to be in place to support communities? How will the current emergency services support our communities?

It is noted that there are a few random notes on Resilience i.e. page 27 Increasing neighbourhood resilience. This looks like an initiative that could be reused across many communities yet there has been little or no engagement with other communities, for which the Owhiro catchment is one that would be interested in this.

We need WCC to advise what they plan to do to address resilience as a strategic initiative, including: community engagement, working with central government, working with key suppliers to understand what resilience they have in place (electricity for example), etc.

## Owhiro Bay

*The issue: WCC and the Owhiro Community have participated in the eCoast coastal engineering assessment project and are now in receipt of the report. The City needs to have a more consistent and strategic approach to preparing the City's coastlines and their communities for climate change mitigation.*

### Our recommendation:

- 1. We request support to improve our community's resilience programme, including, as recommended by eCoast's report:**
  - **Grading of the beach**
  - **Capturing of sea movement (camera installation and video retention) to support longer term options to mitigate the impact of sea movement**
  - **Investigations on structural improvements in the footpaths and sea walls.**
  - **Hardening the resilience at critical points of the bay, including the bridge. The bridge is a critical, vulnerable asset that needs serious assessment in consultation with the community to ensure the gateway to Red Rocks/Te Kopahou is secure.**

We note in correspondence from WCC there is a concern that support for our request could be seen as setting a precedent for future coastal community requirements. However, precedence has already been set through the work in Lyall Bay, fixing of the Island Bay sea wall and the 'new' sea wall in front of the Victoria University research centre. If a precedent had not already been set, it should have been, as the entire Wellington south coast is an area of risk that must be addressed by a holistic resilience strategy

- 2. We request support for short and long term budgeting, in the LTP, for at least the following:**

**Opex:** \$100k for year one to fund further investigations of structural support in the bay, grading of the beach, installation of cameras and retention of video data

Ongoing year on year budget of approx. \$30,000 for beach grading.

**Capex:** to be noted that capex needs to be budgeted for:

- in next three years for roading/sea wall improvements
- in next 10-15 years potential artificial reef installation.

## Decision 7 of WCC LTP 2021

*The Issue: Sludge and Waste Water MUST been seen as a strategic initiative for the long-term benefit of all Wellingtonians and accounted for in the LTP accordingly, which it is not today.*

Our Recommendations:

1. OBRA wants to see sludge decoupled from the landfill and agrees with the preferred Option 4 – Moa Point treatment of sewage sludge funded externally through the Infrastructure Funding and Finance Act 2020.
2. However, this is a loan, not a grant. It should be made clear in the LTP that the funding is to be paid back via these levies and that the levy will carry on for 30 years. This is passing the cost on to future rate-payers.
3. Where is the budget allocated for spending within the next three years to ensure WCC acquires funding for the Moa Point project? Is there budget for spending on all the applications, documents/lawyers etc, to ensure this goes ahead and gets funding for the SPV?
4. Audit NZ has indicated there is a risk to this IFF funding coming through. We understand from WCC that this risk is slight, but if it fails then we do not want to see the project cancelled or curtailed. Option 3 must be selected and an alternative way of funding will be necessary. Ways of doing this might be:
  - a) Prioritising this over less essential infrastructure projects such as cycleways
  - b) Using the amount budgeted for extending the Southern Landfill, which cannot go ahead unless the sludge is treated and minimised, or
  - c) Using some of the budget allocated for the Three Waters pipes work which the Auditor believes cannot be fully used due to lack of resources.
5. We need better clarity in the LTP on how the environmental impact of the landfill fits in with WCC's zero-waste vision. There must be a strategic plan covering waste in general – not just the sludge - which addresses the future of the Southern Landfill and indeed all other Wellington landfills. In the absence of any such plan it seems that the Southern Landfill will continue by default indefinitely. We do not want to see the situation that, as other Wellington landfills reach capacity and are closed, their waste is redirected to the Southern Landfill.

The latter is no longer a suitable place for waste as it is in an increasingly populated area and this causes problems, eg:

- a) trucks converging on it from all parts of the city, bottlenecking through Brooklyn and down Happy Valley (where the permanently pot-holed road is a danger to cyclists and needs to be re-structured to a higher spec)
- b) environmental destruction of stream ecology
- c) danger of predators to Zealandia and pests to households.

6. We need to ensure that the Moa Point project, any resource consent applications and possible extension of the landfill, all move in lock-step with waste minimisation, and that the community is fully consulted at every step of the journey.
7. We want to see a concrete plan for reducing waste, including such things as recycling centres, re-use of C&D, banning/restricting plastic in supermarket packaging. We think this should be at a regional level, coordinated by GWRC; we have submitted to that effect on their LTP.
8. The council should look at urgently changing building regulations and RCs to reduce waste as the intensification of the city centre goes ahead, and thus help make Wellington greener. All building and demolition work should be directed to conform to strict recycling rules.
9. We recommend that a state-of-the-art recycling centre is built at the Southern Landfill C & D site – which should be a condition of the new C&D lease which is imminently due to expire. In this scenario it will not be an expense for the council/rate payer. Again, this should form part of a strategic initiative for the long term benefit of Wellingtonians, none of which is covered under this LTP.
10. Proposed Fees and Charges:  
At the Landfill why is commercial disposal cheaper than domestic?  
We believe that the sewage sludge fee could be much higher to reflect the need to forward-pay for pipe repairs and new technologies.

Please read the Owhiro Catchment Collective (OCC) submission to this Long Term Plan which has been prepared in consultation with our Association. We append it to this document.

---

## Other recommendations

### Road Surfaces and road calming measures

*The Issue: Happy Valley Road is heavily used by trucks using the three landfills. The road surface is in poor repair and is not of a standard suitable for these levels of use. The footpath is in a very poor state of repair.*

**Our recommendation: There needs to be a clear plan, budgeted and timelined to address the needs of all road users, including cyclists. We believe waste minimisation will reduce road use by trucks. See our recommendations for Decision 7. Historically, the landfill sites were poorly chosen and we should be making every effort to limit the volume and sources of material making its way through the city and up Brooklyn Hill.**

*The Issue: The south side of Owhiro Bay is part of the Marine Reserve and a destination for growing numbers of visitors. It is a dead-end stretch of road which is narrow. Traffic speed needs to be slowed.*

**Our recommendation: Funding traffic calming measures that recognise the special status of the bay and the community as part of Te Kopahou/Tapu Teranga.**

# Appendix

10 May 2021

## Submission by Ōwhiro Catchment Collective on Wellington City Council (WCC) Draft Long -Term Plan (LTP)

---

1. The Ōwhiro Catchment Collective (OCC) is a vehicle for coordinating the actions of and advocacy by a group of community organisations which focus on issues relevant to the catchment of the Ōwhiro Stream:
  - 1.1 Ōwhiro Bay Residents Association
  - 1.2 Stream Team
  - 1.3 Southern Environmental Association
  - 1.4 Friends of Ōwhiro Stream (FOOS)
  - 1.5 Friends of Taputeranga Marine Reserve.
2. The purpose of this submission is to highlight matters of common concern to the members of the OCC. Individual members may make their own submissions providing more detail and/or addressing different matters.
3. OCC would also like the opportunity to speak to its submission.

### Background

4. OCC is a coalition of community groups who are connected to the Ōwhiro catchment and share a vision of a thriving ecological corridor from the border with Zealandia to Taputeranga Marine Reserve in the south. This includes improving the water quality of the Ōwhiro Stream and its tributaries and improving habitat and native biodiversity of the catchment.
5. OCC's member groups are active in the catchment restoring habitat, planting, controlling weeds and trapping predators. Organisations such as FOOS have a long history of advocacy for the catchment. Despite a huge investment of volunteer hours and effort, the catchment continues to face many challenges. These include the landfills located within the catchment and the ongoing issues with wastewater infrastructure and stream contamination. Many of the decisions in the LTP have significant implications for the health of our catchment.

6. OCC promotes a catchment-wide approach to addressing the environmental issues in the Ōwhiro catchment that recognises its values and unique place in Wellington's geography. OCC supports the establishment of the Ōwhiro Pilot multi-party working group consisting of WCC, Greater Wellington Regional Council, Wellington Water Ltd, the Department of Conservation and Regional Public Health working together on common issues. We would like this to grow and extend to the development and adoption of an integrated catchment management plan to monitor and improve the water quality of Ōwhiro Stream in partnership with community groups and mana whenua.

### **Community outcomes**

7. WCC's proposed community outcomes include:

- 7.1 *"Environmental — A sustainable, climate friendly eco capital — A city where the natural environment is being preserved, biodiversity improved, natural resources are used sustainably, and the city is mitigating and adapting to climate change — for now and future generations."*

The Ōwhiro catchment is an important part of Wellington's environment. It contains one of the few remaining wild daylighted streams in our urban environment. It adjoins and provides a corridor between Zealandia and the Taputeranga Marine Reserve. Water from the Ōwhiro Stream discharges into the Marine Reserve.

- 7.2 *"Social — A people friendly, compact, safe and accessible capital city — An inclusive, liveable, and resilient city where people and communities can learn, are connected, well housed, safe and healthy."*

The Ōwhiro catchment provides a home for many households and includes three schools and several early learning centres. The Taputeranga Marine Reserve is a destination for diving, swimming and enjoying the beach. The Ōwhiro Stream runs alongside Ōwhiro Bay School. Zealandia and the south coast are also valuable local and tourist destinations that showcase Wellington's environment.

8. Achieving these community outcomes will require investment in improving water quality and mitigating the impacts of the Ōwhiro catchment landfills so that the Ōwhiro Stream and the marine environment at Ōwhiro Bay are safe for the community to interact with and use.

### **Key issues of concern**

9. Key concerns for OCC are:

- 9.1 Improving the management and treatment of sewage sludge and reduce the volume buried at the WCC Southern Landfill:

- (a) This is essential to reduce carbon emissions from the landfill and enable waste minimisation.

- 9.2 Developing a strategic plan for the future of the WCC Southern Landfill:
- (a) We do not believe the landfill should be extended indefinitely. Doing so will impact the liveability of the Ōwhiro catchment; destroy the natural values of those parts of the Ōwhiro catchment converted to landfill; and lock-in environmental risk to the water quality of the Ōwhiro Stream and Taputeranga Marine Reserve, particularly in the event of a major earthquake.
  - (b) A strategic plan (which includes improving the management of sewage sludge) must be developed and agreed upon with the community **before** consent is sought to expand the landfill.
- 9.3 Improving the management of rubbish entering the environment from the Ōwhiro catchment landfills and from vehicles travelling to those landfills.
- 9.4 Improving the management of the T&T Landfill and addressing its impact on Ōwhiro Stream water-quality.
- 9.5 Adopting measurable targets for improving the water quality of Ōwhiro Stream.
- 9.6 Repairing or renewing wastewater infrastructure to address its impact on Ōwhiro Stream water quality.

### **Submissions on the proposed ‘big decisions’**

#### Spending more money on fixing the water pipes

10. OCC supports investing more on Wellington’s three waters infrastructure. The level of detail in the LTP consultation document makes providing feedback on the three options (different levels of capital expenditure) difficult. OCC’s key submission on Decision 1 is that the LTP should distinguish between:
- 10.1 investment in new assets (such as reservoirs) and renewals (such as the programmed replacement of pipes); as opposed to
  - 10.2 investment to identify and fix existing problems that are already impacting the water quality of urban waterways such as Ōwhiro Stream.
11. Recommendation 19 of the *Mayoral Taskforce on the Three Waters Report* is:
- Task and fund WWL to develop a road-map for consideration in the 2024/34 LTP that would see WWL (or a future entity) funded to achieve compliance with the National Policy Statement — Freshwater Management by 2040.
12. OCC does not agree that work towards achieving compliance with the National Policy Statement — Freshwater Management (NPS-FM) should wait until after 2024. That is not good enough.

WCC knows its wastewater infrastructure is a cause of reduced water quality. It is not acceptable for WCC to plan for the possibility of water quality continuing to degrade over the next three years.

13. OCC's view is that the LTP should provide for funding to identify and fix existing problems that are already impacting the water quality of urban waterways such as Ōwhiro Stream separately from the capital expenditure provided for by Decision 1.
14. OCC also seeks that WCC:
  - 14.1 fund the Ōwhiro catchment pilot so that it can achieve its objective of being a prototype for successful citywide multiparty processes to restore three waters networks to a sound state that no longer degrade waterways; and
  - 14.2 formally adopt a time-bound and measurable target for improving water quality in the Ōwhiro Stream.

#### Ownership of wastewater laterals

15. OCC agrees with the Decision 2 preferred option. The model of relying on private owners to care for and renew wastewater laterals has failed. The problem of laterals impacting water quality requires community ownership.

#### Reducing sewage sludge and waste

16. OCC supports the Decision 7 preferred option with some caveats. It is essential that Wellington's wastewater treatment infrastructure be improved so as to reduce the volume of sewage sludge that cannot be discharged into the Cook Strait. The current way wastewater is managed requires large volumes of sludge to be pumped to the Southern Landfill. This is vulnerable to earthquake damage; results in carbon emissions; and requires even larger volumes of solid waste to be mixed with the sludge before it is buried — which in turn precludes waste minimisation.
17. The caveats include:
  - 17.1 OCC is worried about what happens if the Infrastructure Funding and Financing Act 2020 cannot be used. Waiting another three years to fund improvements at Moa Point is not acceptable. WCC should commit to revisiting its LTP if funding cannot be sourced via the Act.
  - 17.2 OCC is worried about when construction will begin. The LTP consultation document suggests a levy will not need to be collected until year 4. It is not clear when significant capital expenditure on Moa Point improvements will commence. This contrasts with WCC's proposed capital budget for 'Stage 4' of the Southern Landfill, which includes 1,310,000 at year 1; 4,896,000 at year 2; and 7,397,000 at year 3. OCC is strongly opposed to WCC seeking consent for 'Stage 4' of the landfill until a strategic plan for the

landfill (which includes improving the management of sewage sludge) has been developed and agreed upon with the community.

18. OCC will not accept a forever operational and forever expanding WCC landfill in the Ōwhiro catchment.

[Redacted]  
[Redacted]  
[Redacted]

[Redacted] [Redacted]  
[Redacted] [Redacted]  
[Redacted] [Redacted]

- Q1. **Full name:** Lawrence Collingbourne
- Q2. **Phone number:** [Redacted]
- Q3. **Are you making this submission as an individual or on behalf of an organisation?** Organisation
- Q4. **What organisation are you submitting on behalf of?** Onslow Residents Community Association
- Q5. **Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?** Yes
- Q6. **If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer?** Oral Hearing (formal hearing with set times to speak to full Council, 5mins per individual, 10mins per organisation)
- Q7. **Oral forum time** not answered
- Q8. **Oral hearing time** Morning
- Q9. **Which of these options do you prefer? (3 waters decision)** Option 2. Enhanced investment (\$2.4bn - the Council's preferred option).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** Option 2. Take ownership (Council's preferred option, \$32m investment).
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 1. Finish started projects (\$29m capital investment, lower debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** None of these options.
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** Option 4. Sell to support development (no debt or rates impact)
- Q14. **Which of these options do you prefer? (Central Library decision)** None of these options.
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 1. No change in current practice (no change to investment, rates or debt).

Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below

Investment in three waters infrastructure  
Wastewater laterals  
Cycleways  
Te Atakura (climate change)  
Central Library  
Sludge and waste minimisation  
Te Ngākau funding for future work  
None of these

Q17. Your comments on the big decisions (optional)

Our response to the seven key decisions: 1. Enhanced, the preferred option for water infrastructure, as it is prudent for a basic service, noting that this provides no funding for densification outside of the inner-city and that large liabilities remain unfunded until quantified and addressed with an acceptable plan 2. Take ownership, the preferred option for the council taking back waste water laterals 3. Finish started projects, for cycleways, as only a small proportion of residents cycle, the track record in building them is poor, and we need a lower rates increase 4. None of these options, for First to Zero to be deferred, save for future planning and measurement, as we don't know the carbon reduction return on investment, or what impact it will have, electric vehicles will shortly become cheaper (and don't exist for trucks), and we need a lower rates increase 5. Sell to support development, for the Council Precinct, with the land, including central library sold for amenity through a design competition, as we want to see a meaningful city centre square developed, not a council precinct 6. None of these options, as we cannot afford to fix the Central Library, so it should be sold for development to mitigate future infrastructure liabilities 7. Option 1, for sludge minimisation, as the preferred option disingenuously talks about "alternative funding", but this is a form of targeted rate above the 48%, which we reject.

Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)

[https://s3-ap-southeast-2.amazonaws.com/ehq-production-australia/996f5ba4931dac74fb161a0a545437ff7a49dcdd/original/1620623959/b8be3950caf1a2f3c3bbcff812738a5f\\_ORCA\\_Submission\\_on\\_WCC\\_10-Year\\_Plan\\_2021\\_final.pdf?1620623959](https://s3-ap-southeast-2.amazonaws.com/ehq-production-australia/996f5ba4931dac74fb161a0a545437ff7a49dcdd/original/1620623959/b8be3950caf1a2f3c3bbcff812738a5f_ORCA_Submission_on_WCC_10-Year_Plan_2021_final.pdf?1620623959)

Q19. Do you support the proposed budget?

I strongly oppose the proposed budget.

Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?

I support decreasing spend in the current budget.

Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?

We strongly oppose the proposed 10-year budget and we support decreasing spend in the current budget. The proposed budget demands at least a 48% increase in rates in the next five years, DOES NOT address the need for investment in our three-waters infrastructure, has too-high a debt limit and is not in any way economically sensible, but rather we consider it to be irresponsible. Other projects: we want the Khandallah Park and Swimming Pool upgrade project to go ahead, as it is a modest investment (\$1m) in our amenities to keep them viable for another ten years or more.

# ON SLOW RESIDENTS' COMMUNITY ASSOCIATION

## Submission of the Onslow Resident's Community Association for the Wellington City Council 10-Year Plan 2021

The Onslow Residents Community Association represents the areas of Khandallah, Broadmeadows and Kaiwharawhara. Our purpose is to act as a conduit between the community and local authorities, represent the views and interests of our three communities, promote, develop and improve the public services and facilities for our community and foster a sense of community. We are a voice for our community.

### Overview

The Onslow Residents Community Association is pleased to make a submission on the Wellington City Council 10-Year Plan. This is based upon local knowledge and communication with our residents at our Annual Meeting and through email.

We thank the contributors for producing such a quality plan. However,

***We suggest it is irresponsible to propose a 48% rates rise over the first five years when very large future expenditures remain unquantified and it is a time of economic uncertainty for everyone, so we recommend a substantial reduction in these expenditures to create a fiscally responsible plan***

We also wish to present our submission on the 10-Year Plan in person to Councillors in a formal Council meeting.

We will first make some general comments and then focus on the key points in the submission document. Finally, we will present recommendations for action for consideration by the Council.

### Time to raise your game

The 10-Year plan sets out four community outcomes and six priority objectives before summarising the budget and getting to seven key decisions about new expenditure. The outcomes and objectives should guide the plan, but as they are neither quantified nor measurable and none of the seven key decisions is tied back to them, we see little point in raising our concerns about them.

***We must get beyond marketing hype to concrete outcomes for our City and a plan to deliver them***

There is no engagement on operational expenditure beyond an unexplained list of items in supporting documentation. When questioned about it, the Chief Executive claimed that many costs savings have been achieved, but we can find no evidence for them, nor any descriptions of which services have been cut to enable them. On the contrary a single page (55) explains that prior decisions remain unaltered even in the light of the glaring liabilities exposed in the plan. We find this simply unacceptable.

***We want to also engage about operational expenditure, prior projects and funding options***

The Plan does not address very large capital liabilities on water infrastructure (the \$0.7B funding makes no inroads into the backlog of a replacement value of \$3.9B), Let's Get Wellington Moving (\$0.27B funding out of an estimated \$1.4B) and an unknown liability called social housing "sustainability challenges", a service we are told will become insolvent from June 2023 (it also appears that only three years of the \$0.4B 10-year cost is funded). When we compare these liabilities to the \$1B of capital costs proposed in the seven key decisions, we anticipate further very large rates rises ABOVE the 48% proposed in the next five years.

***Your highest priority is to define the unknown risks in this plan and remove the audit qualifications***

We also caution the Council over the temptation to borrow heavily to fund capital solutions. Every capital project that goes bad instantly appears as an operational cost when it is written off or made obsolete by a replacement project, e.g. the Island Bay cycleway. Today's low interest rates become tomorrow's repayment nightmare if interest rates rise, as the Reserve Bank is cautioning.

***It is high risk to rely on large capital projects and low interest rates, capital spend must be reduced***

### Answers to the Questions in the Submissions Questionnaire

These responses are made in our online submission also.

Contact details (in the online form only)

Our response to the seven key decisions:

1. Enhanced, the preferred option for water infrastructure, as it is prudent for a basic service, noting that this provides no funding for densification outside of the inner-city and that large liabilities remain unfunded until quantified and addressed with an acceptable plan
2. Take ownership, the preferred option for the council taking back waste water laterals
3. Finish started projects, for cycleways, as only a small proportion of residents cycle, the track record in building them is poor, and we need a lower rates increase
4. None of these options, for First to Zero to be deferred, save for future planning and measurement, as we don't know the carbon reduction return on investment, or what impact it will have, electric vehicles will shortly become cheaper (and don't exist for trucks), and we need a lower rates increase
5. Sell to support development, for the Council Precinct, with the land, including central library sold for amenity through a design competition, as we want to see a meaningful city centre square developed, not a council precinct
6. None of these options, as we cannot afford to fix the Central Library, so it should be sold for development to mitigate future infrastructure liabilities
7. Option 1, for sludge minimisation, as the preferred option disingenuously talks about "alternative funding", but this is a form of targeted rate above the 48%, which we reject.

Our feedback on these decisions is provided above.

We strongly oppose the proposed 10-year budget and we support decreasing spend in the current budget. The proposed budget demands at least a 48% increase in rates in the next five years, DOES NOT address the need for investment in our three-waters infrastructure, has too-high a debt limit and is not in any way economically sensible, but rather we consider it to be irresponsible.

Other projects: we want the Khandallah Park and Swimming Pool upgrade project to go ahead, as it is a modest investment (\$1m) in our amenities to keep them viable for another ten years or more.

## What we like about the Long Term Plan

We have only found two items to like about the 10-year plan, a prudent budget for water infrastructure (until the true extent of liabilities are uncovered) and taking back waste water laterals.

## Recommendations

The recommendations we make have been highlighted throughout this submission by using **emphasis** at the points where the evidence for them is discussed.

## Conclusion

We refuse to indulge in the usual practice of a lolly scramble for new projects at rate payers' expense; we are the ratepayers. This 10-year plan presents risks that are larger than the seven key decisions, yet takes little action to prepare for them. Instead it proposes massive rates rises of 48% over five years, at a time when inflation is low, interest rates are low, the economic outlook uncertain and the new post-COVID normal is yet to finalise across the World. In short, this is at best irresponsible and at worst, sheer madness. Let's avoid a "Fiddling with cycleways and civic buildings while Rome burns" epitaph for this Council.

***If other product and service suppliers follow your inflationary leadership, we are doomed to hyperinflation, which will set back New Zealand to the 1980s with catastrophic consequences***

Wellington City Council must get back to basic service provision and meeting core amenity needs for all. If Councillors want large investment in new capabilities, they must wait until we solve our social housing and infrastructure "challenges". Given the size of the liabilities, it will be vital that the Council leverages new sources of funding for projects and ensures their future value delivery, to make them both affordable and worthwhile.

Yours faithfully

Lawrence Collingbourne, President on behalf of

Onslow Residents' Community Association

- Q5. **Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?** No
- Q6. **If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer?** not answered
- Q7. **Oral forum time** not answered
- Q8. **Oral hearing time** not answered
- Q9. **Which of these options do you prefer? (3 waters decision)** Option 2. Enhanced investment (\$2.4bn - the Council's preferred option).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** Option 2. Take ownership (Council's preferred option, \$32m investment).
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** Don't know.
- Q14. **Which of these options do you prefer? (Central Library decision)** Option 1. Strengthen now by temporarily exceeding debt limit (Council's preferred option, additional 0.79% to rates).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 3. Sludge minimisation through Council funding (\$147m to \$208m capital investment, above debt limit, and higher rates)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Sludge and waste minimisation

---

**Q17. Your comments on the big decisions (optional)**

Decision 1: While I have ticked option 2 for enhanced investment in three waters infrastructure, it was challenging to provide a preferred option because the information supplied didn't answer all of my questions. - Under option 2, it states that "the quality of some of our streams and the marine environment may not worsen." This is unacceptable, the council must raise its expectations about improving the health of te taiao. - We are in the situation we are in because of significant underinvestment, "out of sight, out of mind" thinking so we are now paying for the negligence of previous councils. I believe this is a good reason to increase our debt to pay for this. - Option 3 mentions improved planning regulations enabling nature based solutions. It was unclear to me why this is in option 3 but not option 2 as improved planning regulations don't come with huge operational or capital costs. This should be pursued as part of option 2 as well. Decision 7: I support investment in sludge minimisation as described in options 3 and 4 however only if the council is able to use the avenues provided for in the Infrastructure Funding and Financing Act or by breaching its self-imposed debt limit. I do not support the use of a public private partnership.

---

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

---

**Q19. Do you support the proposed budget?**

I somewhat support the proposed budget.

---

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

As mentioned in my comments about decision 1, the generations living in Pōneke today are essentially inheriting debt in the form of neglected assets. We should be taking on additional debt to spread the cost of the maintenance and renewal of these assets and to prepare ourselves for the changes we know are coming. Many experts argue that now is the right time to further increase our debt to tackle underinvestment in assets and respond to challenges presented by population growth in the city and climate change. We have been left with no other option but to leave a legacy of debt for future generations. The choice we have is whether we leave it in the form of a financial debt, or in the form of neglected assets and degraded environments. Either way, we will be passing on debt. Much of the damage that is being done by ignoring our three waters infrastructure is causing irreversible damage to our waterways, beaches and oceans. I would prefer the debt we leave to be a financial debt, as this form of debt is actually possible to repay.

10 May 2021

**CAPITAL FOOTBALL'S SUBMISSION | WELLINGTON CITY COUNCIL LONG TERM  
PLAN 2021-2031**

To the Wellington City Council,

This submission is made by Capital Football Federation for and on behalf of our affiliated clubs to discuss the quality and cost of the football facilities provided by the Wellington City Council.

Capital Football provides a thriving football community that benefits all participants-players, officials, administrators, families, and supporters in the greater Wellington region.

The contact person at Capital Football is Blair Duncan [REDACTED] [REDACTED] [REDACTED]

We wish to appear before council to speak to our submission.

---

**SUBMISSION**

Capital Football is the governing body for football in the Greater Wellington region, including Wellington, Western Zone, Horowhenua-Kapiti, Hutt Valley and Wairarapa. In 2021, Capital Football have 13,000 registered football players. Over 6,000 of these are members to Wellington City Council based clubs, with the majority of the remained using the Council facilities. There are also over 6,500 futsal players, with 5,000 of these primarily based in Wellington City Council venues.

Capital Football is concerned about the following areas and this submission will discuss these concerns in four sections:

1. Appropriate gender neutral facilities.
2. Lack of visibility in Capital Expenditure plans for developments and maintenance (including both fields and facilities).
3. The Cost model of artificial turfs.
4. One of the only large urban council charging ground fees.

**Part 1: Appropriate gender neutral facilities**

Capital Football is concerned with the appropriateness of the gender neutral facilities in the Wellington region. There are not enough facilities with adequate provisions for both men's and women's players. We have experienced over 3% growth in the female side of the game since 2018

and after being confirmed as a host city for the 2023 Women's World Cup, we expect even more growth in the female game in the coming years.

Over the last few years, we have also implemented a transgender policy and received several queries from players transitioning genders and from non-binary players. Having adequate facilities for these players is something that is crucial for football to be able to provide an experience that is safe and welcoming for all players.

### **Part 2: Lack of visibility in Capital Expenditure plans for development and maintenance (including both fields and facilities)**

In 2021, Capital Football has budgeted over \$200,000 in field hire (natural and artificial turfs) to the Wellington City Council. Whilst there is excellent communication from the Sportsfields / Parks team around short term maintenance and repairs, more clarity around long term Capital Expenditure plans would be helpful for our planning with clubs and engagement with Council on annual and long term plans.

### **Part 3: Cost model of artificial turfs**

In 2021, Capital Football's budgeted spend on artificial turfs is \$145,000. Capital Football and our affiliated clubs do not believe the proposed fees increase for 2022 are justifiable. With regards to the artificial turfs, we do not think the often repeated reason that capital expenditure needs to be repaid can no longer be used. As we have pointed out football, and of course other sports, have repaid a considerable amount of the initial capital cost of the artificial turfs and therefore (whilst appreciating that money needs to be charged for replacement costs, repairs and maintenance, etc.) the cost of hire-age should be decreasing not increasing. It looks, to us, that this is simply a toll-bridge model which is no longer acceptable.

Our concerns with the artificials are:

- a. We are the owner and responsible for the maintenance of the best artificial turf in Wellington and are the biggest users of artificial turfs throughout Greater Wellington. By some distance, the Wellington City Council owned turfs are the ones that are in the worst condition regardless that they may be the ones that have been in service the longest; their maintenance is not proportionate to others.
- b. The costs of Capital Football maintaining their artificial turf at Petone Memorial Park costs \$50,000. Wellington City Council cost theirs (per turf) at \$80,000; a 60% difference.

Given the above and that Petone Memorial is widely acknowledged as the best artificial in Wellington and those owned by the Wellington City Council are perceived as some of the worst, this raises a key question as to why there is a difference and what is the rationale for the increase?

### **Part 4: One of the only large urban council charging ground fees.**

In 2021, Capital Football have for the first time budgeted over \$500,000 in venue hire fees across our region. This excludes clubs' trainings and non-competition games. This cost falls back on the participants in what is becoming and increasingly expensive sport. Other councils around the

country and particularly those in large urban areas (for example, Auckland and Christchurch) do not charge ground fees for organised sports. Is this a vision for the Wellington City Council to strive for and in so doing make it more affordable for Wellingtonians to participate in sport and get the most out of their communities?

---

## **SUMMARY AND RECOMMENDATIONS**

In summary, Capital Football does not see enough progress in the development of inclusive facilities that cater for all players, long term development of facilities, the value for money regarding the quality and cost of the artificial football facilities, and disparity in operating models of similar urban areas. It is recommended that the Council:

- 1) Invests more money into off field facilities, such as changing rooms, toilets, showers etc.
- 2) Provides more clarity and consultation around long term Capital Expenditure.
- 3) Reviews the cost model of artificial turfs and decreases the charges over time, rather than year on year increases.
- 4) Explore the option of alignment with other large urban areas in terms of its ground charges.

Capital Football believes that investing in facilities in the Wellington region will provide a positive experience for our football members and increase the number of people playing sport. This will have a wider impact off the field as it is well known that playing a team sport is a great way for people to improve their health and wellbeing, feel part of a team and strengthen the community.

Thank you for the opportunity to submit.

**Blair Duncan**

## **Submission on the Wellington City Council Long Term Plan, 2021 - 2031**

### **Introduction**

The Newtown Residents' Association has been an Incorporated Society since July 1963. We are residents and business owners from Newtown and the surrounding area, who take a keen interest in the community and local issues. We are concerned with maintaining and improving our area's liveability, connectedness and sustainability and working to make our community a thriving, diverse, great place to live.

### **Submission**

Our Association has a long history of making submissions asking for priority to be given to the City's basic services, and we are very relieved that this is now a primary focus of this Long Term Plan. A solution and upgrade to our water and sewerage infrastructure is paramount as is doing all we can to combat climate change.

### **Decision #1: Investment in three waters infrastructure.**

We support Option 3, Accelerated investment. The Council's preferred option 2, 'enhanced investment', lacks ambition. There have been many years of deferred action, with increasing deterioration to the pipes, and we are impatient with proposals to restrict remedial action now that the situation is at crisis point.

In our submission to the 2018-2028 LTP we had particular concerns about storm water management, and strongly supported water sensitive urban design. As we said then, we would like to see an emphasis on managing stormwater by increasing the extent of porous surfaces so that less water enters the stormwater network and more infiltrates to ground. As well as reducing the quantities of water being drained, this would also reduce the load of contaminants such as heavy metals and hydrocarbons entering streams and the harbour. There is only a passing reference to these principles in this plan, again in option 3. We look forward to water sensitive urban design being incorporated in the District Plan review.

### **Decision #2: Wastewater laterals**

We strongly support Option 2, the proposal that the Council should take ownership of the laterals and accept responsibility for the maintenance and renewal of private wastewater connections to the wastewater (sewerage) main underneath the road corridor. Currently householders have no control over the conditions that can damage these laterals,

and no choice over how they are repaired, but are expected to be financially responsible. The threat of large and unforeseen expenses hangs over all ratepayers, and it would be a great relief for the Council to take this responsibility.

### **Decision #3: Cycleways**

We note that none of the options in this draft plan involve any definite action on a Newtown Connections cycleway. This is merely referred to in Options 3 and 4 as something that might be delivered as part of Lets Get Wellington Moving.

Our Association members have a wide range of opinions on cycleways, so our submissions on the subject have focussed on the importance of recognising and acknowledging the needs and wishes of all members of our community, while working towards good cycling solutions.

We do agree with making it easier and safer for people to cycle. This is a healthy and environmentally sustainable mode of transport, and we agree with encouraging and supporting those who would cycle but experience it as unsafe in current conditions. However currently there is no consensus about the best way forward.

As we said in the 2018 consultation on Newtown Connections, the biggest problem area is the need for on-street car parking for a community with little off-street parking, on the one hand, and the desire for a network of protected cycleways on the other hand, and the extreme difficulty of fitting both into our narrow streets.

We acknowledged that it won't be possible to satisfy everyone, but we asked for continuing efforts to communicate and explain the rationale for decisions, to listen to concerns and to do whatever is possible to ameliorate adverse effects.

This started off well with an apparent acknowledgement that parking issues needed attention before the Newtown Connections cycleways proceeded. There were extensive reviews and consultation on WCC's Parking Policy, and we were pleased that the WCC Parking Policy (finally adopted in August 2020) made provision for Area Based Planning. During consultation there was a suggestion that Newtown might be the first, or one of the first, communities where this area based planning would be put into action. We have heard nothing more but we are still waiting and hoping that this will happen in the near future. At present the pressure on parking is increasingly severe.

### **Decision #4: Te Atakura First to Zero**

We support Option 3, to fully fund the Te Atakura action plan.

### **Decision #5: Te Ngākau Civic Precinct, Council Office Buildings**

On the information in the consultation document we prefer Option 2.

We note that it is acknowledged in the draft Plan that the MOB has particular heritage value, and the arguments for preferring the option of demolition seem unconvincing.

To demolish both buildings and start again is a huge undertaking, and it is hard to approve of this, even in principle, without having much more clarity around the parameters for the final design.

However we do not think that there has been enough public information and involvement in exploring the options and possible outcomes. We would like to see more process around this before any action is taken.

### **Decision #6: Central Library**

We support Option 1, to fund the repair and upgrade of the Central Library by temporarily breaching the current debt limit.

### **Decision#7: Sludge and waste minimisation**

We strongly support investing in treatment of wastewater at the Moa Point plant, so that the sludge can be kept out of the landfill. When there is no longer any need to mix the sludge with general waste it becomes possible to make every effort to reduce the total amount of waste going to the landfill. We hope that this will mean that there is no need to increase the size of the landfill site for many years to come.

We support Option 4, if the proposed alternative funding for this investment through the Infrastructure Funding and Financing Act is indeed a realistic option.

**Thank you for the opportunity to make this submission. We would like the opportunity to speak to Councillors about it in the appropriate forums.**

**Rhona Carson**

**President, Newtown Residents' Association**

**May 8<sup>th</sup> 2021**

- Q5. **Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?** No
- Q6. **If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer?** not answered
- Q7. **Oral forum time** not answered
- Q8. **Oral hearing time** not answered
- Q9. **Which of these options do you prefer? (3 waters decision)** Option 2. Enhanced investment (\$2.4bn - the Council's preferred option).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** Option 2. Take ownership (Council's preferred option, \$32m investment).
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 1. Finish started projects (\$29m capital investment, lower debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 2. Medium investment with savings (\$25.4m investment, lower rates and debt).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** Option 4. Sell to support development (no debt or rates impact)
- Q14. **Which of these options do you prefer? (Central Library decision)** None of these options.
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 1. No change in current practice (no change to investment, rates or debt).

Q16. **Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

not answered

---

Q17. **Your comments on the big decisions (optional)**

Council Office Buildings The Council cannot afford to fix the Council Precinct, so Council offices should stat on the Terrace and the land sold for amenity Option 4. Central Library Sell the Central Library and retain the existing suburban ones so that future infrastructure liabilities can be mitigated.

---

Q18. **You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

---

Q19. **Do you support the proposed budget?**

I somewhat oppose the proposed budget.

---

Q20. **You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

I support increasing spend in the current budget.

---

Q21. **Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

not answered

Q16. **Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

None of these

---

Q17. **Your comments on the big decisions (optional)**

Rates are already too high and a significant increase inevitable, without exasperating this further. It seems the productivity of council staff in line with their wage rates need to be addressed. There has been no specific accountability for previous budget blow outs, or where spending hasn't been as intended, so spending should be kept to a minimum until the council is capable of effectively controlling their budget without endlessly relying on the ratepayers to pick up the pieces.

---

Q18. **You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

---

Q19. **Do you support the proposed budget?**

Neutral.

---

Q20. **You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

I support decreasing spend in the current budget.

---

Q21. **Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Again I believe an independent review should be conducted to assess potential areas where unnecessary council spending can be curbed. The council should act more like a business and be smart in how the ratepayer's money is spent, as such costs must be controlled, targets maintained and a process of accountability in place otherwise.

not answered

---

Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?

I support increasing parking fees or a congestion charge to reduce vehicle traffic, emissions and reduce future rates rises. Increasing parking fees or a congestion charge is preferable to a rates increase due to a rates increase's potential to exacerbate housing unaffordability. Increasing housing unaffordability has many social consequences such as increased homelessness, crime and mental health issues which reduce the city's vibrancy and economic potential.

Wastewater laterals

---

Q17. Your comments on the big decisions (optional)

Council taking responsibility for lateral from boundary property to mains is a good idea. It enables council to act if there are issues and for drains to be systematically repaired and upgraded in line with other infrastructure works eg. if any road works are being undertaken. The current system is also unfair as homeowners may be required to take responsibility for damage to drains that is caused by matters beyond their control (eg by tree roots on council reserve, road traffic (including heavy) etc.)

Don't know.

---

Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?

I have lost faith in the ability of Council and its subsidiaries to plan for infrastructure (water/wastewater etc.) both repairs and maintenance and new. Ten year infrastructure planning, and 30 year strategic planning have been legal requirements for some years and are supposedly a discipline. The timing of expenditure on core infrastructure and rate increases (to fund) should have been spread more effectively over time. The need for the expenditure should not be a surprise or require massive (ie 13% or thereabouts) annual rates increases. There has clearly been poor planning, heads in the sand, and/or Councillors more focused on pet projects than core infrastructure which is the backbone that keeps our city ticking over. I would love the Audit Office to come in and do a forensic analysis of performance over the past 20 years to actually get some independent and trustworthy advice about why we find ourselves in the current position. I hope that Councillors will prioritise infrastructure matters, hold management teams to account if projects do not get done according to the timetable in the 10 year plan /30 year infrastructure strategy and/or there are cost overruns. Appropriate reporting systems must be in place to make sure future plans to upgrade infrastructure actually occur on time and there should be some simple easy to understand reporting to ratepayers about progress.

---

--	--

**Q17. Your comments on the big decisions (optional)**

1) Investment in three waters infrastructure I support the points raised by Zero Waste Advocates (Caroline Arrowsmith, Hannah Blumhardt etc) in their submission. We must plan for a future we live more efficiently with less energy. That requires us to investigate the need to change our waters infrastructure, not simply invest more in the current model. Due to historic underinvestment I do support investing in critical upgrades now. But I would ALSO like to see Council investigate the feasibility of: - an alternative system for managing human waste/biosolids that does not rely on the wastewater system. Instead, solids and wastewater should be kept separate (thus uncontaminated). In such a system, biosolids can be processed either at a local level or collected and processed at a centralised composting facility separate from the wastewater treatment plant. While this is a long-term issue, budget must be allocated now to investigate and help develop a source-separated wastewater/sanitation system, as it may take decades to phase in completely. Some waste minimisation funding for organics could go towards pilot and feasibility studies for decentralised, source-separated sanitation systems. - smaller scale initiatives to reduce pressure on the system, such as a ban on insinkerators etc. 2) Cycleways I regularly cycle Wellington streets with my 18 month old on my bike. Cycling is a win-win for climate, public health and general wellbeing. I'm sick of the risks I take as a cyclist. Please invest the MAXIMUM you can in cycling infrastructure, for the safety of my family and for climate justice. (And please accelerate work on the Newtown Connection.) So much is invested in roads, and so much space is given to cars!!! I am tired of being dangerously squished alongside buses, and of fearing for my family's safety because of our choice to use clean transport. Please invest the maximum you can in cycling infrastructure to reward those who choose clean transport options. As well as a safety matter this is also a response to the climate emergency, please accelerate this work. When my son is old enough to ride a bike, I hope it is safe for him to do so. I support all points raised by Cycle Wellington in their submission. 3) Te Atakura - I wholeheartedly support investment in our city's transition to net zero. - Please go further by developing a full circular economy action plan as part of your work on climate action. - Please do NOT give a loan or grant to the airport. As a private business they can find their own funding. WCC funds should go towards reducing emissions not increasing them. 4) Sludge and waste minimisation -YES let's get that sludge out of landfill! - I support the Council investing in the proposed infrastructure needed to reduce the amount of sludge that must be sent to landfill. - However this is not a true long term solution, WCC should also explore an alternative system for managing wastewater and biosolids/human waste, that keeps these separate from water, as suggested by the Poo Breakfast Club. Please allocate budget for this now. - Please allocate more funding for organic waste diversion for food waste. - Increase funding for re-use schemes beyond car sharing. - Please bring forward the work on the resource recovery centre. Can't wait to see this! All the best.

- Q7. **Oral forum time** not answered
- Q8. **Oral hearing time** not answered
- Q9. **Which of these options do you prefer? (3 waters decision)** Option 2. Enhanced investment (\$2.4bn - the Council's preferred option).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** Option 2. Take ownership (Council's preferred option, \$32m investment).
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 1. Finish started projects (\$29m capital investment, lower debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** Option 1. Demolish and site developed through long-term lease (Council's preferred option).
- Q14. **Which of these options do you prefer? (Central Library decision)** Option 1. Strengthen now by temporarily exceeding debt limit (Council's preferred option, additional 0.79% to rates).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 4. Sludge minimisation through alternate funding (Council's preferred option, \$147m to \$208m capital investment funded through a levy, no additional rates increase)

Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below

None of these

---

Q17. Your comments on the big decisions (optional)

not answered

---

Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)

not answered

---

Q19. Do you support the proposed budget?

I somewhat support the proposed budget.

---

Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?

not answered

---

Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?

We would like to see WCC acknowledge the need for a larger community centre for Churton Park and make a plan for progress towards this.

---

Te Ngākau funding for future work

**Q17. Your comments on the big decisions (optional)**

A Capital City must support the Arts honestly and vigourously, and ensure the long-term continuity of this for the future of the nation, region and city. This includes all individuals and groups involved in any way – and suitable buildings and facilities. The NZSO is an excellent asset, world-class in fact. I can compare them very favourably with fine orchestras in major cities I have lived in in England, Germany and Australia. Their quality and status must be protected and strongly supported – including with facilities. Tertiary Music Education in a Capital City must be of top international quality. In addition to cultural aspects, the Music Industry is a highly significant part of the economy. TE KOKI must continuously be given generous and adequate support, so that it can “deliver” appropriately and be internationally recognised - including with good facilities. New Zealand is extremely fortunate in the Wellington TOWN HALL ORGAN – a superb instrument of international reputation. It is by any standards a splendid example of the “English Town Hall Organ” of the 19th and early 20th centuries. Through excellent management in the past this has escaped the fate of so many of its contemporaries throughout the world, i.e. it has not suffered “improvements” to keep up with transient fashions. It is completely coherent in itself, with a very clear personal voice and character – a joy and inspiration to hear, and to perform and teach on. (There is another fine but smaller example in Dunedin Town Hall, and a large but now quite different example in Auckland - well rebuilt, but with a different character, by a German organ builder.) It is high time that our Very Special one here in Wellington is not only back in place, as soon as the building is ready, and once again becomes a strong and colourful part of the New Zealand Music Scene - National, and of course Regional and Local. So it is critically important that – whatever way the adjacent Council buildings are dealt with – the use of the ORGAN is not hindered significantly by other pressures on the use of its hall within the Town Hall building complex. This could easily happen if e.g. Te Koki or the NZSO, through having significant use of the Town Hall, “inadvertently” happens to block regular access to it – either through insisting on timetabling too many events there, or through being “inconvenienced” by possible acoustical disturbance in adjacent rooms, when it is in use for practice etc. as well as for performance. The Large Musical Instrument is often loud! This could very easily happen, “with the best will in the world”, unless very clear “sharing rules” are put in place beforehand. As a Wellington ratepayer I do appreciate the need to work out the optimum way of financing all these responsibilities. I leave it to those skilled in this to make the most appropriate decisions for the long term perspective.

Investment in three waters infrastructure  
Wastewater laterals  
Cycleways  
Te Atakura (climate change)  
Central Library  
Sludge and waste minimisation  
Te Ngākau funding for future work

**Q17. Your comments on the big decisions (optional)**

Three waters –This is one of Wellington's major issues, and one that must be addressed with urgency so that Wellington development is not continually hindered by water infrastructure failures. There have been so many examples of system failure in recent years so this should be a priority. Any investment in the Three Waters infrastructure must be mindful of future requirements that arise through the Spatial Plan. Wastewater Laterals – I agree with the council that council ownership of wastewater is the preferred option however it is not an immediate priority when there are so many larger issues at hand. A central and regular maintenance programme will over time be less expensive than the current situation in which repairs are one-offs in an ad-hoc (when there is a failure) manner. The council ownership of wastewater laterals will allow for a preventative maintenance approach to be established. Cycleways –the development of low emission transport options will contribute to an active attractive city. These options need to be carefully designed, built and maintained in order to be successful. Te Atakura – First to Zero. This is most definitely a decision of strategic importance for the City – a climate and ecological emergency has been declared and must be funded so that actions can be taken. Central Library Rebuild – The redevelopment of the civic square including the central library should be a priority. There is currently a block full of empty buildings in the central city, with not only the interiors of these buildings being closed, but many access routes through civic square have been lost. There is a great opportunity for redevelopment given the multitude of public buildings in close proximity in need of redevelopment. This development should be carefully considered and not rushed without appropriate planning. The new development has a role to play in the central city and should be around for many many years to come. Reducing Sewage waste and sludge - It is clear that improvements must be made to the way that the city manages sewage. Failures in the current system in recent times indicate that this is another decision that requires urgency. Te Ngākau funding for future work – It makes sense that users should pay for the services that are covered by the list of user charges. Charges should be reflective of actual cost of providing those services, but with an overlying social support to provide assistance where necessary.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

There are many issues that seem to have been overlooked in the long term plan. Namely city safety and the spatial plan: City safety. There has been recent publicity around city safety –this is a significant issue that WCC must plan to address urgently. Everyone has the right to feel safe in their city, and have the confidence to walk around knowing they are safe to do so. This should be a priority of the long term plan. Spatial Plan: Clearly the spatial plan is indicating significant growth in the Wellington population, which will not occur evenly throughout the area. Council must be confident that the decisions it makes in relation to the Long Term Plan, and which will extend over multiple years, leave the city in a position where it can adequately respond to change that are signalled through the spatial plan. The city must be able to provide the infrastructure that the population growth will require. This includes not only transport, water, sewage etc, but social amenities such as open space, recreational facilities and schooling. Fees and Charges: As someone who has plans to buy my first home in the wellington region the indication of increasing rates is an additional burden to the forever increasing house prices. While I understand that there are many things that need to be funded by the cities rates encouraging alternative funding where possible is preferred.

To: Wellington City Council  
Submission on the Draft Long Term Plan

From: Lara Vance

## Long Term Plan

### **The Seven Major Decisions**

**Three waters** – This is one of Wellington’s major issues, and one that must be addressed with urgency so that Wellington development is not continually hindered by water infrastructure failures. There have been so many examples of system failure in recent years so this should be a priority. Any investment in the Three Waters infrastructure must be mindful of future requirements that arise through the Spatial Plan.

**Wastewater Laterals** – I agree with the council that council ownership of wastewater is the preferred option however it is not an immediate priority when there are so many larger issues at hand. A central and regular maintenance programme will over time be less expensive than the current situation in which repairs are one-offs in an ad-hoc (when there is a failure) manner. The council ownership of wastewater laterals will allow for a preventative maintenance approach to be established.

**Cycleways** – the development of low emission transport options will contribute to an active attractive city. These options need to be carefully designed, built and maintained in order to be successful.

**Te Atakura** – First to Zero. This is most definitely a decision of strategic importance for the City – a climate and ecological emergency has been declared and must be funded so that actions can be taken.

**Central Library Rebuild** – The redevelopment of the civic square including the central library should be a priority. There is currently a block full of empty buildings in the central city, with not only the interiors of these buildings being closed, but many access routes through civic square have been lost. There is a great opportunity for redevelopment given the multitude of public buildings in close proximity in need of redevelopment. This development should be carefully considered and not rushed without appropriate planning. The new development has a role to play in the central city and should be around for many many years to come.

**Reducing Sewage waste and sludge** - It is clear that improvements must be made to the way that the city manages sewage. Failures in the current system in recent times indicate that this is another decision that requires urgency.

**Te Ngākau funding for future work** – It makes sense that users should pay for the services that are covered by the list of user charges. Charges should be reflective of actual cost of providing those services, but with an overlying social support to provide assistance where necessary.

## OTHER DECISIONS

There are many issues that seem to have been overlooked in the long term plan. Namely city safety and the spatial plan:

**City safety.** There has been recent publicity around city safety –this is a significant issue that WCC must plan to address urgently. Everyone has the right to feel safe in their city, and have the confidence to walk around knowing they are safe to do so. This should be a priority of the long term plan.

**Spatial Plan:** Clearly the spatial plan is indicating significant growth in the Wellington population, which will not occur evenly throughout the area. Council must be confident that the decisions it makes in relation to the Long Term Plan, and which will extend over multiple years, leave the city in a position where it can adequately respond to change that are signalled through the spatial plan. The city must be able to provide the infrastructure that the population growth will require. This includes not only transport, water, sewage etc, but social amenities such as open space, recreational facilities and schooling.

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)

**Q17. Your comments on the big decisions (optional)**

The ecological and climate emergency, safe drinking water, wastewater and stormwater infrastructure, and active transport, directly relate to the safety and wellbeing of Wellington residents and Papatūānuku. They need to be prioritised above all else. In 10-20 years, Wellington residents will be directly affected by these issues, and the (silly) Mt Vic tunnel proposal will be completely irrelevant. We are in environmental, economic, mental health, housing and inequality crises, it's time for WCC to prioritise the essentials that relate directly to addressing these crises and ensuring the health and wellbeing of Wellingtonians. Also have you considered becoming a doughnut economics city like Dunedin?

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

Cycleways

---

**Q17. Your comments on the big decisions (optional)**

Cycleways: please hire someone with experience on dealing with intersections. A Dutchie or Danish..they need to be done right. General: It's pretty tough to make an educated decision on these with the huge amount of reading to do. I would love some more thought into summarising the detail (and providing the depth for those dedicated/more time rich). I expect you folks to be doing the thinking on all of this and to summarise your research to make it more accessible.

Cycleways  
Central Library

---

Q17. **Your comments on the big decisions (optional)**

Cycleways: As an occasional commuter-cyclist from the Eastern Suburbs, none of the cycleways that have been put in place on my route (Kilbirnie, Cobham Dr, Evans Bay - Oriental Bay) were in my view necessary and have not made my commute easier or safer. I just don't think they justify the expense. There is a simpler/cheaper option through painted lines on wide roads. That's all that's needed. Central Library: I think the need for a large expensive library needs to be re-examined in this day and age. I think alternative models should be explored. I don't support spending a significant amount of money on a library like the current one. I'd suggest a smaller central library and better support of satellite/suburban libraries.

---

Q18. **You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

---

Q19. **Do you support the proposed budget?**

I strongly oppose the proposed budget.

---

Q20. **You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

I support decreasing spend in the current budget.

---

Q21. **Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

The proposed rates increases will have a massive impact on a lot of families. I know there is the need to catch up on investment but many ratepayers simply cannot afford the proposed increases. Suggest greater use of debt to spread the time over which rates increases are necessary. And a re-think of where spending can be cut. The inner city parking charges and time limits mean a lot of families (mine included) avoid the city centre on weekends. Real shame given the jewel that the waterfront is. I can't even drive to take my kids to watch the Hurricanes because of the 2 hour limit. Suggest restoring car park capacity to pre-earthquake levels should be a priority. Cheers

| Q1. Full name:  | Alison Kuiper   |
| Q2. Phone number:   | not answered  |
| Q3. Are you making this submission as an individual or on behalf of an organisation?  | not answered  |
| Q4. What organisation are you submitting on behalf of?  | not answered  |
| Q5. Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?  | not answered  |
| Q6. If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer? | not answered  |
| Q7. Oral forum time   | not answered  |
| Q8. Oral hearing time   | not answered  |
| Q9. Which of these options do you prefer? (3 waters decision)   | Option 3. Accelerated (\$3.3bn investment – higher rates and debt).   |
| Q10. Which of these options do you prefer? (Wastewater laterals decision)   | Option 2. Take ownership (Council's preferred option, \$32m investment).  |
| Q11. Which of these options do you prefer? (Cycleways decision)   | Option 3: High investment programme (\$120m capital investment - Council's preferred option)  |
| Q12. Which of these options do you prefer? (Te Atakura Funding decision)  | Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).   |
| Q13. Which of these options do you prefer? (Civic Precinct decision)  | Option 2. Proceed with base build proposal for public purposes (higher debt and rates)  |
| Q14. Which of these options do you prefer? (Central Library decision)   | None of these options.  |
| Q15. Which of these options do you prefer?(Sewage sludge and waste decision)  | Option 4. Sludge minimisation through alternate funding (Council's preferred option, \$147m to \$208m capital investment funded through a levy, no additional rates increase) |

Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below

Central Library

---

Q17. Your comments on the big decisions (optional)

Starting afresh with the Central Library would result in a building more sited to purpose and enhance the city.

---

Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)

not answered

---

Q19. Do you support the proposed budget?

Neutral.

---

Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?

Don't know.

---

Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?

not answered

---

Cycleways

---

Q17. Your comments on the big decisions (optional)

I want to cycle to work - I used to live in London and there was great cycle lines and I felt safe. I do not feel safe in Wellington. We should swap out car parking for cycle lanes. Car parking should cost more - the council are basically subsidising car parking. If car parking prices reflected the true cost of the land it would be much much more expensive.

---

Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)

not answered

---

Q19. Do you support the proposed budget?

I somewhat support the proposed budget.

---

Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?

not answered

---

Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?

You should definitely find ways to make more revenue. I am a big fan of the central library but don't see any reason why some of it shouldn't be leased out to cover costs.

---

Investment in three waters infrastructure  
Wastewater laterals  
Cycleways

**Q17. Your comments on the big decisions (optional)**

Immediate investment in water and transport (cycling) infrastructure in the city will make the intensification/redevelopment of the central city - in accordance with the new spatial plan and NPS-Urban Development - more feasible. Enabling new development is critical in ensuring that escalating housing costs are curtailed and the city remains an affordable option for lower income households. Libraries are useless if people cannot afford to live here. I am encouraged to see the the council considering bold spending in un-sexy pipes.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Wastewater laterals  
Cycleways  
Te Atakura (climate change)  
Central Library  
Sludge and waste minimisation  
Te Ngākau funding for future work

**Q17. Your comments on the big decisions (optional)**

I think that the big projects like Civic Square and the Library need to be deferred and money spent on improving key infrastructure like the water network. Investment in cycleways will help to make Wellington a great place to live and reduce costs for people who will be able to cycle around the city much easier if you invest in it - with the rates increases Wellington is looking less and less like an appealing place to live. Investment in cycleways is a key link to the climate change goals, and I think a much more appealing goal than buying EVs for the council.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

Don't know.

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

I love living in Wellington, our access to great walking, running and biking tracks is phenomenal. However, I feel like we are losing out on opportunities to create great communities in our suburbs. For example it was great to reconnect with going to the Library when I had my daughter, but why are you spending so much money on the central library when there are all the branch libraries that are actually in the community?

Cycleways  
Te Atakura (climate change)

---

Q17. Your comments on the big decisions (optional)

Wellingtons cycleways need significant work to make them safer and easier to navigate. There are huge benefits to traffic, climate change, health etc that should not be ignored. Climate change should be considered when making all of these decisions and I think more funding should go to improving public transport, cycleways and reducing council emissions.

Cycleways  
Te Atakura (climate change)  
Central Library

---

**Q17. Your comments on the big decisions (optional)**

Wellington needs to take urgent climate action. Please invest in cycleways fully separated from the road and footpath so we can cycle safely. Please extend cycleways out to suburbs like Tawa and Porirua so we can commute to work. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects that will reduce Wellington's emissions not increase them. As a private business the airport can find its own funding. I support the continuation of pop up libraries around the city. Library budgets must not be cut. I support WCC providing community gardens and composting facilities around the city. There is currently no easy way for apartment dwellers, renters and students to compost and this could reduce waste going into landfill. WCC must meet its obligations under Te Tiriti and involve mana whenua in decision making.

---

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

---

**Q19. Do you support the proposed budget?**

I strongly support the proposed budget.

---

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

not answered

---

## **Additional Comments on Long Term Plan for Wellington City 2021**

**Roland Sapsford,** [REDACTED]  
[REDACTED]

### **General comment on the role of a council in honouring Te Tiriti o Waitangi**

1. Local governments exist by virtue of statute and so is in many ways an expression of the Crown's role at a local level. Furthermore, statute imposes specific obligations to consider Te Tiriti o Waitangi. However, the relationship with local government is not a substitute for the direct relationship between iwi, hapu and whanau and the Crown. This creates a special opportunity for local government.
2. Rather than view the relationship with those who exercise mana whenua simply as an obligation, local government has the opportunity to build relationships and partnerships that help transform the relationship between Maori and Crown-established governance.
3. Local government can actively seek opportunities to help all its citizens to understand the full history of their district and to engage in actively fostering positive relationships between mana whenua and others who live in their rohe.
4. Local government also has the opportunity to create new ways of working in the way land and natural resources are managed. Councils can actively look for opportunities to support mana whenua to more fully and appropriately exercise their kitiaki role.
5. In developing a Long Term Plan, the Council needs to consider how it is resourcing and planning for a more active and engaged role for Maori in the decade ahead.

### **General comment on borrowing**

6. Wellington has a massive infrastructure deficit and needs to invest in the transition to a liveable, low-emissions city which is resilient to the unavoidable impacts of climate change and provides great quality of life to all its residents. Financing costs are very low at the moment, although not as low as they were last year. Financing costs are far more important than the amount borrowed, and New Zealand is in a relatively strong position to fund long-term borrowing at relatively low interest rates. Now is the time to borrow to invest in the future.

### **Three Waters Infrastructure**

7. I support Option 3 – Accelerated Investment. Investment in Three-waters infrastructure has been long-deferred. Option 3 commits the Council to an investment path to fully address these matters. The timing, extent and rate to which this is realised will depend on further work, but it is vital to set an ambitious goal and then address phasing issues. Failure to do so will simply repeat the cycle of the past.

8. No 10-year forward estimate will ever be accurate; the world is too uncertain for that. However the fact that we are uncertain about the scale of the problem and how fast we can deliver the work means we need to set a generous envelope for the work at the start the 10 years, which can be refined on a rolling basis.

### **Ownership of Wastewater Laterals**

9. Divesting itself of responsibility for wastewater laterals was a poor decision by the Council. It attempted to transfer a large burden onto individuals and was not made in good faith. I commend the Council for reversing this approach.

### **Building more cycleways across the city**

10. I support Option 4 – Accelerated Full Programme. As with other large capital investments, it is important at the start of this 10-year cycle to set an ambitious programme and then address phasing issues. The fact that we are uncertain about the scale of the problem and how fast we can deliver the work means we need to set a generous envelope for the work at the start the 10 years, which can be refined on a rolling basis.
11. Cycling is a fast growing activity that offers health, local environmental and climate benefits to both people who cycle and the wider community through reduced car dependence. If we put ourselves in the shoes of those 10 years from now, they will thank us for being ambitious.

### **Paying for Te Atakura action plan**

12. Having declared a climate emergency and created a climate action plan, doing anything other than full-funding implementation would be disingenuous. I am not sure that there is more to say here. The world badly needs climate leadership in every corner of the globe.

### **Resilience issues in Te Ngākau**

13. I support Option 2 – Proceed with base build. The comparison of options as presented overstates the benefits of Option 1, and confuses costs and ownership. The cheapest option in the long term is Option 2, as the Council retains an asset and is not subject to the uncertainties associated with being a long-term tenant. A crucial comparison is the cost of providing a private developer with the returns needed for a long term rental building versus the financing costs of the rebuild. This is not presented in the documentation.
14. Option 2 also has the public benefit of restoring and strengthening a heritage building.

## **Reducing Sewerage Sludge and Waste**

15. My preference is for Option 4, on the understanding that it is a genuine option. Otherwise my preference is for Option 3. As stated earlier in relation to both three-waters infrastructure and cycling, we need to set a generous envelope for the work at the start the 10 years, which can be refined on a rolling basis.

## **Other comments**

### ***Creating a safe, accessible city:***

16. I support measures to make our city safer, more welcoming and more accessible for a wider-range of people. Cities which focus on the needs of women, children, and those with disabilities create cities which are great for everyone.

### ***Even safer speeds:***

17. I support measures to introduce a comprehensive set of 30 km/hr zones, and submit that these should potentially include arterial roads. Excluding these at the outset unduly restricts the scope of work and buys into a myth that there is a high cost to reducing speed. The case for safer speeds is overwhelming, the argument that calming arterial roads diverts traffic is spurious, and there are good examples of positives experiences with arterial calming around the world.

## ***Housing:***

18. The Plan takes an unusually limited view of Council's role in housing. Wellington has vast amounts of land available for housing and mixed use development that is currently
  - (i) Vacant
  - (ii) Used for parking only
  - (iii) Occupied by low-quality 1-3 storey post-1960 commercial buildings
19. There has to date been no investigation of
  - (i) the extent of this land – informal estimates suggest enough to house more than 100,000 people in in high quality accommodation of varying types.
  - (ii) why this land has not been developed to provide housing
  - (iii) what powers the Council has to raise the holding costs of this land
  - (iv) how the Council could take a more active and facilitative role in encouraging the development of this land
20. I submit that the Long Term Plan ought to include:
  - (i) An average of \$5m per annum in operating expenses for the next 10 years to support work addressing matters (i)-(iv) above
  - (ii) At least \$200m in capital expenditure to support investment in additional affordable housing in Wellington, in partnership with Kainga Ora, superannuation funds and others who have an interest in housing as a long term investment.

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Wastewater laterals  
Cycleways  
Te Atakura (climate change)  
Central Library  
Sludge and waste minimisation  
Te Ngākau funding for future work

---

**Q17. Your comments on the big decisions (optional)**

Climate change and inter-generational equity need to be at the heart of all Council decision making. This may require Council to rethink existing funding models (taking on more public debt, partnering with central local government, obtaining private capital etc.), and how it will use infrastructure investment to ensure Wellington will be a low-emissions, innovative, productive and resilient city in decades to come. We also need to also utilise our existing infrastructure better, such as building cycling and walking infrastructure into our existing streets and roads. While this may be a significant investment today, we owe it to current and future Wellingtonians to ensure this city is a place where people want to live, work and play.

---

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

---

**Q19. Do you support the proposed budget?**

I somewhat oppose the proposed budget.

---

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

I support increasing spend in the current budget.

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

This is a once in a generation opportunity to invest in Wellington city and its people after decades of underinvestment. While this may require alternative funding methods or increasing borrowing, the need to address Wellington's significant challenges can only be done through Investments in public infrastructure, inclusive planning and urban design. The Council should put climate change and inter-generational equality at the heart of its decision making.

#### **About The New Zealand Portrait Gallery**

The New Zealand Portrait Gallery Te Pūkenga Whakaata tells the stories of New Zealanders through the art of portraiture.

The Gallery was founded in 1990 as a charitable trust. We have been in our permanent home in Shed 11 on the Wellington waterfront since 2010. Both central and local government, as well as many private individuals and Gallery supporters, contributed to the cost of purchasing the long-term lease on the building, which is a heritage asset owned by the Council. The Gallery has thrived in that location and has become a respected and important part of New Zealand's heritage and cultural community.

It enables audiences – free of charge - to see portraits of New Zealanders who, in all their diversity, have shaped our country's development or influenced the way we think about ourselves. Through portraiture, the Gallery offers perspectives on New Zealand, our history, creativity, and place in the world. The Gallery's premises are fully accessible.

The Gallery mounts some 8-10 exhibitions a year in Wellington and usually has half a dozen of its exhibitions touring to other museums and galleries throughout New Zealand. Its exhibitions are highly diverse and inclusive. In the past few years, we have presented portraits of many different communities in New Zealand, including tangata whenua, Pasifika, Chinese New Zealanders and refugees. The Gallery itself has only a small collection of portraits. Our exhibitions are largely made up of works borrowed from private individuals and other institutions, including Te Papa and the Alexander Turnbull Library. Through these key partnerships, we are able to show many works of national importance that would otherwise not be seen.

Since mid-2016 the Gallery has received a contract funding grant from the Wellington City Council which covers about 4% of its annual operating expenses. It provides invaluable assistance. Apart from this grant, the Gallery relies almost exclusively on donations from individuals and organisations to finance its ongoing work, and on the sponsorship of various trusts and foundations to meet its exhibition costs. This support, and that of the many volunteers, is crucial for the financial viability of the Gallery.

The economic impact of the Covid-19 pandemic has already affected the ability of some sponsors to assist us. The Council's Tipu Toa Covid Recovery Fund was a major tool in assisting the Gallery to launch the Kiingi Tuheitia Portraiture Award, an initiative to showcase the creativity of emerging Māori artists and build a platform to encourage visitation to the city during winter which is typically a slow season for tourism.

The Gallery's annual operational budget is around \$450,000. For most of the last five years we have had a budget deficit of between about \$40,000 and \$60,000. While we have diversified our revenue sources and pruned budgets to help defray costs, and operate with a small highly professional Director and staff, the gap between income and operating expenditure continues to hover around \$60,000 a year. This constrains our ability to enhance our programme and profile and grow the Gallery into the truly national museum of biography and portraiture that we aim to be.

## **Introduction**

Since the last LTP consultation the Council has made significant investment in developing the arts and cultural infrastructure in the city, to ensure there are venues and community facilities that are fit for purpose, eg strengthening the St James Theatre, opening the Waitohi Johnsonville Community Hub, erecting the temporary RNZB building and starting construction of Tākina. The new Matariki festival, Ahi Ka, and various ethnic festivals such as Chinese New Year (in which the Gallery has been an active participant) has also been major initiatives.

The Gallery has appreciated the increased engagement and support for its activities from the Council's arts and culture team, and WellingtonNZ, most notably in their promotion of the inaugural Kiingi Tuheitia Portraiture Award for emerging Māori artists which opens at the Gallery on 27 May 2021. This is a significant event which has drawn entries from all over New Zealand and is expected to become a biennial competition in odd numbered years, drawing audiences to Wellington from around the country before touring nationally. It will alternate with our established Adam Portraiture Award which has been running in even-numbered years for over 20 years.

## **Feedback on Priority Objectives**

The New Zealand Portrait Gallery Te Pūkenga Whakaata strongly supports the four community wellbeings that inform the Council's strategic direction underpinning its Long-term Plan, particularly the cultural outcome of "an innovative, inclusive and creative city that connects, colaborates, explores identities and openly expresses, preserves and enjoys arts, culture and heritage." This outcome resonates deeply with the Gallery's own mission. Prior to Covid-19, the Gallery attracted almost 40,000 visitors a year, and continues to play an important role in contributing to the city's reputation as a world-class arts locality that visitors, both from New Zealand and overseas, want to visit, and that locals want to participate in. While one third of our visitors typically from overseas, their presence has declined while the border remains closed. This situation is expected to improve gradually. The Portrait Gallery plays an important role in contributing to the city's reputation as a world-class arts locality that visitors, both from New Zealand and overseas, want to visit, and that locals want to participate in.

The New Zealand Portrait Gallery Te Pūkenga Whakaata strongly supports the four community wellbeings that inform the Council's strategic direction underpinning its Long-term Plan, particularly the cultural outcome of "an innovative, inclusive and creative city that connects, colaborates, explores identities and openly expresses, preserves and enjoys arts, culture and heritage." This outcome resonates deeply with the Gallery's own mission. Prior to Covid-19, the Gallery attracted almost 40,000 visitors a year, and continues to play an important role in contributing to the city's reputation as a world-class arts locality that visitors, both from New Zealand and overseas, want to visit, and that locals want to participate in. While one third of our visitors have typically been from overseas, their presence has declined while the border remains closed. This situation is expected to improve and has been partially offset by the increased numbers of visitors from elsewhere in New Zealand.

As residents of Wellington, we are all invested in Priority Objective 1, a resilient water infrastructure, and Priority Objective 5, a zero-carbon and waste-free transition.

Priority Objectives 2 and 3 – affordable, safe and resilient housing and public transport – are valuable to us not only as residents and, but also as creators who seek to reach diverse audiences. The arts can help connect communities, and artists themselves are embedded in communities through their homes

and workplaces. Accessibility of the arts has been identified as a focus area in *Aho Tini 2030* and safe and highly accessible public transport makes a major difference to the lives of our staff and participating artists as well as the ability of audiences to access the city's range of artistic and cultural offerings.

We strongly support the Council's Priority Objective 4 – resilient, fit-for-purpose, community, creative and cultural spaces. The Portrait Gallery contributes to this accessibility by being free, centrally located and providing approachable exhibitions and supporting activities for different groups. The Portrait Gallery also provides opportunities and employment for professional and emerging gallery staff, artists, interns and volunteers. We especially appreciate the Council's efficiency in seismically strengthening the Gallery premises at Shed 11 in 2012. This has enabled the Gallery to continue to grow and to thrive by offering a variety of attractions on the waterfront over the past decade. It has also allowed the Gallery to provide a small affordable venue for private and public functions outside of Gallery hours. The waterfront is the locus of many major cultural and other public events in the city and should be maintained as the jewel in Wellington's crown. The Gallery has been privileged to support the Council by organising or participating in many waterfront festivals and activities.

We also welcome Council's commitment in Priority Objective 6 - strong partnerships with mana whenua. This commitment is essential for delivering to Te Tiriti, and realising Council's vision of becoming bilingual by 2040. The Gallery actively contributes to this Priority Objective, most recently through its initiative in launching the Kiingi Tuheitia Portraiture Award as well as presenting the works of many Māori practitioners in its exhibitions.

#### **Feedback on Seven Big Decisions and decisions coming up in the future**

The Gallery supports the Council's efforts to invest in community infrastructure to support residents as the city grows. We encourage Council to ensure arts communities are consulted and engaged throughout the development of Council's spatial plan, which may lead to changes to the mix of community assets.

Strong engagement with the arts community will help activate Focus Area 3 of *Aho Tini 2030*, "Aho Whenua – Our city as a stage". The arts and creative sector can provide valuable direction and insight into creating facilities that have flair and are fit for purpose, as well as creating anchor sites in communities that speak to history, heritage and identity.

#### **Further feedback**

##### *Aho Tini 2030: Arts Culture + Creativity Strategy*

In terms of Aho Tini, the Gallery would urge that increased funding be approved to support delivery of the strategy. Static funding would result in less cultural activity being able to be supported and delivered, with nothing to offset the rising costs of living in Wellington and of producing and presenting arts and cultural activities for local and visiting audiences. In that connection, investments in digital screens and projectors should be a lower priority than ensuring the city's arts and cultural organisations are well funded to operate sustainably. Without sufficient baseline funding, many artists, collectives and public non-profit organisations like the Gallery will be unable to continue to function.

- Q14. **Which of these options do you prefer? (Central Library decision)** None of these options.

Q15. Which of these options do you prefer?(Sewage sludge and waste decision) Option 4. Sludge minimisation through alternate funding (Council's preferred option, \$147m to \$208m capital investment funded through a levy, no additional rates increase)

---

Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below

Te Atakura (climate change)  
Central Library

---

Q17. Your comments on the big decisions (optional)

The climate emergency should be fully funded now and non-emergency items deferred. Copenhagen city is on target to be the first to zero (by 2025), so Wellington will have to be carbon zero by 2024 if it is to be first to zero. The fully funded proposals are ok, but they are too little too late. All dangerous council buildings MOB, CAB and library should be demolished and the land sold while it has some value - it will be flooded by rising sea level.

- Q1. **Full name:** Hugo Van Dyke
- Q2. **Phone number:** [Redacted]
- Q3. **Are you making this submission as an individual or on behalf of an organisation?** Individual
- Q4. **What organisation are you submitting on behalf of?** not answered
- Q5. **Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?** No
- Q6. **If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer?** not answered
- Q7. **Oral forum time** not answered
- Q8. **Oral hearing time** not answered
- Q9. **Which of these options do you prefer? (3 waters decision)** Option 2. Enhanced investment (\$2.4bn - the Council's preferred option).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** Option 2. Take ownership (Council's preferred option, \$32m investment).
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** Option 4. Sell to support development (no debt or rates impact)
- Q14. **Which of these options do you prefer? (Central Library decision)** Option 1. Strengthen now by temporarily exceeding debt limit (Council's preferred option, additional 0.79% to rates).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 4. Sludge minimisation through alternate funding (Council's preferred option, \$147m to \$208m capital investment funded through a levy, no additional rates increase)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Sludge and waste minimisation  
Te Ngākau funding for future work

**Q17. Your comments on the big decisions (optional)**

I'd prefer that the land be developed into high density housing (ground floor could be commercial) given the need for more homes in central Wellington. Ground leases aren't an attractive option for prospective buyers so the council lease option doesn't seem as viable (it's still my second best option though). If the land was sold to a developer, I would want assurances that the developer (and subsequent purchasers) wouldn't impede changes to civic square which is otherwise publicly owned. On waste, NZ has the lowest charges for disposing waste in the OECD. Users should have to pay more to encourage more recycling and waste minimization (particularly in the building sector which is responsible for such a large proportion of waste). If these incentives were to work, there would be the added benefit of lowering embodied emissions in buildings.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

Neutral.

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

I support increasing spend in the current budget.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Develop Berhampore golf course into medium density housing (or take steps to allow the private sector to do it). Consider alternative models for encouraging earthquake strengthening of buildings (including penalties/paid appropriation for those who don't comply). Improve public transport and active modes of transport. Ensure new developments in CBD are high density - don't allow any more medium density housing in the CBD (ala Paddington).

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library

**Q17. Your comments on the big decisions (optional)**

Three waters: It is critical that we investigate better ways of dealing with waste. Simply dumping valuable organic material makes no sense ( we should look to nature and its recycling of all waste. Option such as sterilization for use as fertilizer which would recycle the material as a useful product. Ecological projects that restore water quality should be encouraged and assisted. Cycling: Climate change is upon us and the Wellington City Council has declared a climate emergency. The city and the council now need to live up to this declaration and act as if it is an emergency!! By getting active and public transport to a point where they are cheaper and more attractive than continuing on our current destructive petrol powered path. New Zealand, I have learned has probably the worst track record in the developed world for increasing emissions of Greenhouse gases in recent decades, It is going to take major disruptive change to curb this. Useful non recreational cycling facilities should be given priority over and development related to motor vehicles or expensive sea walls with bicycles tracks added then fully billed to cycling facilities! Alternative vehicles pedal powered electric assisted enclosed cycles should be adopted and promoted as an alternative to cars ( The Pebal and the Elf are two examples). A congestion tax should be imposed on the CBD. Large private vehicles should be banned (utes and SUV's) from the CBD. I would be great to have a non congested CBD which is liveable rather than dominated by large noisy smelly vehicles with frustrated angry drivers who would force a cyclist from the road. The Library should be mothballed as it comes down to choosing between being able to read books with peace of mind against the survival of our race and dealing with real problems we are facing. Having two sons I know which I would choose for them! If we can't afford both we must choose not build more debt. Climate change: This is an emergency! Yes Emergency!! Dealing with the climate emergency and the effects of our consumptive lifestyle must be paramount like dealing with a storm or earthquake. Subversion and avoidance no longer have a place in this discussion. The science is clear. These issues must be dealt with as the highest priority. NOW. This means no more car or building projects unless they a very low emissions. (carbon budgets should be done for all projects and rejected if high emissions are present) Ecological restoration needs to be encouraged and promoted with funding. Reduction in car use (really). Public transport should be removed from the contractors and returned to being a service for public good. Fairs should be able to reflect that public transport is more efficient. This will mean a review if the services and investment in more buses (electric) and trains. More efficient ways of doing things must be explored. Not always money related efficiency with plenty of vested interests. Council should consider disbanding the large high end of its structure in favour of citizen's assemblies to decide major issues and prioritize there implementation.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

I somewhat oppose the proposed budget.

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

I support decreasing spend in the current budget.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

The council must be fiscally responsible. The creation of debt is a way of deferring the problems to the next generation. This is no longer acceptable. We must learn to change our ways. The administration end of all organisations must look at the cost of what they are doing and do what they have been telling the front line for decades and become more effective, efficient and lower the income expectations to a point where they make sense.

Te Atakura (climate change)  
Central Library  
Te Ngākau funding for future work

**Q17. Your comments on the big decisions (optional)**

Climate change initiatives will be a matter for New Zealand as a whole and should be funded from general taxation or private investment. I do not support the Council creating further ground leases - I support the office buildings and land being sold or rebuilt using a Public Private Partnership - I have no issue with a library being owned privately and having non-library floors with commercial occupancy. There is no reason for the Council to own its offices and with current demands on spending it will just have to remain in rented premises. There seems to be no attempt at restraint in this plan it seems as though all Wellingtonians are just expected to pay more.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

I somewhat oppose the proposed budget.

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

I support decreasing spend in the current budget.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

There does not seem to be any proposal to deal with water issues in the outer suburbs where we are also seeing regular pipe failures. Further densification will not be possible until water issues are addressed unless the Council's intention is sewage in the streets. The fee increases generally seem to exceed inflation by quite a margin. The Spatial Plan consultation indicated a desire, ill founded in my view, to increase development but all the fee increases proposed seem to make development more onerous. The messaging is very inconsistent. Could the Council look at approving a suite of 5 to 10 high quality home designs for in-fill which could be completed with a minimum amount of RMA and Building consent rigmarole and consequent heavily discounted fees? Ending up with another Tarikaka Street would not be bad thing. The proposed rates increase very high especially given many of our ratepayers are public servants who have just been landed with a pay freeze. I would like to see the Council try harder to keep the rate increase to single figures by deferring glory projects like the library and council office redevelopments.

Cycleways

---

**Q17. Your comments on the big decisions (optional)**

New cycleways would be nice, so long as they don't take years and years to build , and screw up everyone's daily commute. The Evans Bay cycleway has taken years to build and is hugely inconvenient for cyclists with all the lane changes and footpath riding. More importantly, where are the cyclists going to safely park their cycle when they arrive in town? Please build/add cycle parking facilities at either end of Cuba St.

Cycleways

Te Ngākau funding for future work

**Q17. Your comments on the big decisions (optional)**

Cycling in Wellington is the way of the future. The city is small enough and the geography lends itself to non motorised transport and makes it more viable than public transport solutions as compared to other cities. The weather also makes cycling amongst traffic more dangerous with wind gusts being a fact of life in our town that means cycles can get blown off course. Regarding the arts centre, that is something that Wellington needs to maintain its fantastic reputation as a centre for the arts in NZ. I am constantly impressed by the standard of teaching and graduates that come from the NZ School of Music and this is clearly the pre-eminant music school in NZ. Bringing these talented musicians into the centre of the city will make them more accessible and visible to the public. Wellington needs to build on its identity and strengths to maintain relevance in NZ - i.e. beyond being a place for government and public servants. This centre will support and strengthen our reputation in this sphere.

Kia ora Thanks for this work, some tough decisions there and realise that improvements need to be made and there is not a lot of rates income to do it. I just wanted to say something in general about the way the council is conducting consultation at the moment and improvements I would like to see happen. 1. We live in a divisive culture that is accentuated by Social Media. 2. I feel that the current consultation methodology increases divisiveness, for example by having short periods of consultation followed by long periods of silence. 3. there is a low response rate on consultation 4. I don't see consensus being reached on difficult issues, 5. I also don't see genuine interest in grass roots opinions and/or placemaking methodology from different viewpoints. 6. A lack of consensus and increased divisiveness in the public causes councillor fatigue and issue driven voting. 7. Not much gets agreed on or achieved, things get more expensive over time and there is lots of reworking of ideas. Solution? I think you need a department of consultation, whose main goal is to achieve consensus and a "way forward" on difficult topics and to lead community input on large and small investments. The department would change the consultation strategy to more continuous stakeholder engagement on council issues, which would be aided by a strong stakeholder network that was also part-funded and part-organised by council. All business cases would include consultation with key stakeholders and investment objectives would be co-designed and co-written by the people who the decisions impacts. I know this is a very difficult area, but keen ot hear your thoughts. Many thanks James

Cycleways

---

**Q17. Your comments on the big decisions (optional)**

We need cleaner public transport and dedicated cycling lanes. Bring back the trolley buses. To encourage more people to use public transport and cycling to commute and get around the city for recreational purposes the City Council needs to ring-fence money to do the following: - subsidise public transport and - make cycling and walking safer by providing more cycle lanes and pedestrian crossing bridges. The WCC needs to look at how cities overseas such as London and Paris reallocated road space to respond to the increasing growth in cycling. I agree with the following from "Cycle Wellington": Cycle lanes could be delivered quicker, easier and cheaper with the addition of a dedicated fund for this type of work. Currently the LTP suggests this work could be funded out of the already limited Minor Works Budget, but we think the scale needed to deliver a connected cycle network over the next decade requires a well-resourced and dedicated fund. This fund would also deliver public space improvements outside of cycling in the form of Low-Traffic Neighbourhoods and parklets.

## Submission to Wellington City Council on the Draft Long Term Plan 2021

Contact person: **Ellen Blake**

Date: **10 May 2021**

Thanks for the opportunity to comment. As noted on the submission form, we support the full funding of the Te Atakura – First to Zero climate action plan (Decision 4).

The remainder of this submission discusses our preferred approach to funding Wellington transport projects, and specific activities we would like to see funded in the Long Term Plan.

### Introduction

We support the emissions reductions and mode shift targets and assumptions of the Climate Change Commission's draft advice to Government, the Regional Land Transport and Public Transport Plans, Let's Get Wellington Moving and Te Atakura – First to Zero, which include:

#### Climate Change Commission

Increase share of distance travelled by walking, cycling and public transport by 25%, 95% and 120% respectively by 2030

#### Regional Land Transport Plan

30% reduction in deaths and serious injuries  
40% mode shift to walking, cycling and public transport  
30% reduction in carbon emissions

Furthermore, Te Atakura identifies investing in rapid transit and improving public and active transport infrastructure as having major GHG reduction potential by 2030 – and a key objective of Let's Get Wellington Moving is to move more people with fewer vehicles.

Living Streets Aotearoa supports safe footpaths for pedestrians and safe, separated lanes for cyclists, so that more people are willing to take up these low-carbon modes of transport. We also support extending the present safer speeds areas. Walking has a particularly important role to play in conjunction with public transport, and we submit that bus priority is an important area which needs to be advanced in the near future to accelerate emissions reductions.

We submit that any new transport funding in the long term plan should be for a 'complete streets, multi-modal programme' of walking, cycling and public transport improvements to meet these targets and assumptions - bearing in mind that climate action, safer streets, and increasing sustainable mode share are all council policy as is reducing private vehicle travel an outcome for LGWM. The components of this should include:

- safe, best practice standard, well-lit footpaths free of obstructions
- safe, separated cycle and microbility lanes
- bus priority lanes and other bus improvements
- placemaking interventions.

As a general principle, we do not support shared paths, although in some circumstances where the volume of pedestrians is comparatively low they may be appropriate, e.g. Te Ara Tupua.

## **Proposals**

We submit that the Long Term Plan should include funding for the following activities:

- Education and enforcement to ensure that drivers comply with Safer Speeds (30km/h and below) zones.
- Roll out of further 30km/h speed zones, again with associated tactical urbanism, education and enforcement.
- Establishment of bus priority lanes, and other measures such as priority at traffic lights, throughout Wellington, including but not limited to those areas covered by Let's Get Wellington Moving
- Creation of better walking access (including signage) to bus stops and railway stations, to make it easy for pedestrians to use public transport and help solve the "last mile problem"
- At all intersections that have "No Exit" signage that applies only to vehicular traffic, install signage that shows that this does not apply to pedestrians, e.g. by indicating which street(s) or significant location(s) the pedestrian route leads to.
- Safety, visibility and weathertightness audits and improvements to all bus shelters – for example, checking whether they have invisible glass edges that are a hazard to the sight impaired, and whether the bus and RTI screen are visible when sitting in the shelter
- Create raised platform and zebra pedestrian crossings on busy crossings

- Safer speed limits outside all schools, in line with Waka Kotahi’s requirements, and creation and support of more school walking initiatives such as walking school buses
- Auditing and reducing the risk to pedestrians at vehicle accessways/driveways across footpaths e.g. Adelaide Road and The Terrace in particular
  - Remove redundant accessways and bring footpaths up to standard
  - Make all accessways have stop/ give way to pedestrians signs on the property boundary (to meet NZ Road Rules).
  -

### **About Living Streets Aotearoa**

Living Streets Aotearoa is New Zealand’s national walking and pedestrian organisation, providing a positive voice for people on foot and working to promote walking-friendly planning and development around the country. Our vision is “More people choosing to walk more often and enjoying public places”.

The objectives of Living Streets Aotearoa are:

- to promote walking as a healthy, environmentally-friendly and universal means of transport and recreation
- to promote the social and economic benefits of pedestrian-friendly communities
- to work for improved access and conditions for walkers, pedestrians and runners including walking surfaces, traffic flows, speed and safety
- to advocate for greater representation of pedestrian concerns in national, regional and urban land use and transport planning.

For more information, please see: [www.livingstreets.org.nz](http://www.livingstreets.org.nz).

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library  
Te Ngākau funding for future work

**Q17. Your comments on the big decisions (optional)**

So firstly, it's great that councils like Wellington provide indications such as their preferred option when we have our say. It gives us understanding so that our ideas of what councils should do whether it's how much financial help the council can do. Balancing the reliance between ratepayers and taxpayers, mixed funding tools like levy is needed so that this council proceed with their commitments. This financial year has been the biggest concern of what Wellington City Council will do to keep this city resilient. This follows the series of events and concerns like the pipe outbursts such as wastewater into the harbour, water supply outbursts, the sudden closure of the library, the Kaikoura earthquake wake up call, calls to improve transport provision for cycleways and public transports, calls to make more carbon reductions, and how to improve the heart of the Capital city. There is each analysis to explain my selected decisions. Three Waters infrastructure has become a national spotlight. It was very shocking to learn that all pipes in Wellington are over a century years old. When the council intervened in the wastewater leak in December 2019, further action was held when Willis Street in Te Aro had to be closed off, including buses like Route 7, which runs double-deckers, to divert into Ghuznee Street. This success shows how the city can manage this kind of disruption to traffic and water services, which Option 2 can be carried out as this city can't fix all pipes at once. Fixing all pipes in Wellington City will cost billions, and a big hike was a real concern. As I don't support at least a 6% increase, Wellington would defer some commitments to grow this Capital City. Unless the Three Waters national agency can help with taxpayers money, this is the way Waka Kotahi (NZTA) shares taxpayers money to ratepayers on transports infrastructure. But in the meantime, while the Three Waters agency is currently implemented in the government as an initiative held by Local Government minister Nanaia Mahuta, Option 2 will be a prudent option as this is a valuable approach to affordability and sustainability. The Wastewater lateral services would undoubtedly pass it on to the council due to unsustainable pipes in properties as part of the Option 2 deal. That reason would include what happened at Owhiro Bay which makes the environment for the residences doomed, especially the beachgoers. Cycleway network is a critical topic that plagued debates and standpoints for Wellingtonians. It began when the current Island Bay cycleway received negative reviews from the residences. They've waited long enough to get the current cycleway to be transformed into something more clarified. The other problem with that is when NZTA was in disarray when executive changes plagued delay to the council's projects. The fix on the Island Bay cycleway didn't come to fruition at that time. When the cycleway network was developing, the eastern suburbs were the most focused and they are about to the finish line at their corner. We know that more places in Wellington need segregated cycleways on most routes, particularly where high-frequent buses travel. As Island Bay should be included, other parts need to be taken into account. Newtown is a hot topic for Wellingtonians. Some parts of it can become cycleways, and some parts can have other transport parts like bus lanes which I'll partially talk about in the next paragraph below. Wellington lowered the central speed limits to make roads safer for pedestrians, including cyclists, while other roads remaining at the usual limit. There are ways of how cyclists can be separated from and shared onto roads. That is why high-level investment option will be preferred while other transport initiatives, the bus priority lanes, would take place in this growing city of Wellington. Let's Get Wellington Moving (LGWM) must also be the priority. In the way we travel around Wellington, people rely on buses and cycling than vehicles. When the bus network controversially rolled out, the city council debated on the bus priority lanes that they were unsuccessful in making. We believe the bus lanes are needed due to bus demands. This can be less stressful for the bus drivers to use them, which will probably be based on the peak hour travel because Riddiford Street would handle particular traffic accidents due to how many cars drive into the hospital on the southbound turning lane. When I've seen how drivers manage to skip traffics, particularly Taranaki Street, I believe it's unsafe for the buses to do that, and that's why bus lanes are needed; to keep the traffics segregated, as much as cycling, and have more bus priority signals on safe lanes for the buses. The peak-hour bus lanes would solve those problems in a similar style to Adelaide Road. But we know that LGWM

is the most important thing to have as much as a bus priority network. When Andy Foster took office months after LGWM revealed the plan for Wellington, duplicating the Mount Victoria Tunnel is his priority. The other priority of LGWM is mass transit to the airport. If four lanes to the airport are apparent to unclog the traffic, we know that the mass transit can do that. That is why sorting this roading infrastructure so that Wellington's economy remains supported in regards to the Mount Victoria duplication, which must include ventilation, and with electric cars on the roll. With mass transit, light rail was the ideal topic for Wellington City. As I support from the railway station to the airport, there was a report that Someone suggested the light rail to Island Bay due to the estimated and escalated cost of building this to the airport from my point of view. The transit option would be better off with Auckland's 'Botany to Airport transit' proposal. A bus rapid transit articulated style can still make the route to the airport possible. Mass transit is how transport emissions can be reduced to support the Capital City's environment apart from the current SH1 between Te Aro and airport upgrade that must take shape to support the Wellington economy. Te Atakura (climate change) was declared by councils in the last few years. Everyone's determined on how will cities be impacted by this cause. Transport and other emissions are the concern to reduce. The climate emergency policy does show the acceptance of national and international science; to give ideas to develop what needs to change and manage. In this economic matter, Wellington Airport has long held the commitment to make the airport safer, which requires a loan from the council. Resisting a loan from the council to the airport is unthinkable because the airport does commit to reduce emissions with the help from the airlines' fleet, such as Air New Zealand's building a sustainability network on how we can protect our home country. Therefore, diversifying the asset at Wellington Airport doesn't stack up. Wellingtonians and New Zealanders still need the airport, and we need them for domestic and international routes. When the airport was planning to extend the runway and expanding and reconfiguring terminals, the main concern was dependant on the public listed company that owns Wellington Airport, 'Infratil', alongside Council. But Wellington Airport must continue to play and feed the Capital city and other parts of the region to support tourism as a reserve for their prosperity even we lost Singapore Airlines when the airline ditched its route as it's not part of the Trans-Tasman bubble while Australia is proposing a Singapore bubble. When Wellington declared the state of the climate emergency in accepting the international science topics as a policy element, the aircraft companies like Airbus and Boeing and engine companies like Rolls-Royce and General Electrics has their commitment to being net-zero. That is why becoming a net-zero city by 2050 would be a certain chance to do, so can the companies as they must meet the clean air standards. The emphasis on the environment for Wellington is about how this will change the economy as I support the council's action plan. The Central Library came to a surprise of impact when this place closed suddenly due to seismic concerns. I learnt that on this decision that one of the floors are similar to the demolished Statistics building since the Kaikoura earthquake. This impacted a lot of locals. The councillors opted for a debate on whether the library should be retained or not, and setting aside budget was a concern. When the council cabinet chose to retain the library, this consultation was comprehensive. But their preferred option was a difficult one. The Central Library is a much-loved landmark for Wellington. In this consultation, funding for strengthening the library had been comprehensive to understand what the council's commitment to rebuild the library. I support the base isolation. But in this funding, the council is looking at exceeding its debt temporarily. What this could mean is a potential rate hike. However, this would hike up to just a percent. Freeing up debt is the challenge but so does the arrangements. If the council would handle alone to rebuild the Central Library, this would when the Christchurch City Council handled earthquake strengthening the Town Hall which took 5 years to do that. While mixed funding tools are taking place in other priorities the Wellington City Council's doing in this years long-term plan, there is a chance that Wellington will able to save the library as much as the Town Hall in the Civic Square which would be a similar time of when the Central Library will return. If we want this library back, then must do it as soon as this decade perhaps the middle. Te Ngakau, the Civic Square that shows the heart of Wellington, had its identity changed when it all began when the Town Hall was closed in 2009 before having other parts of the buildings redundant that has its uncertain future. Those are Municipal Office Building, Civic Administration Building, and Capital E. They were lost to Wellington since they declared earthquake prone. If we choose to demolish the buildings, it will be a cheap rate to afford even insurance companies has offered how much it would pledge to the council to repair the buildings. However, two of the buildings between the town hall and the Central Library may not come back but instead can be rebuilt into a modern and look similar to the Christchurch City Council building - having MOB and CAB combined. The National Music Centre is yet to be opened when the Town Hall's completed and the ventures between Victoria University and New Zealand Symphony Orchestra has leased a couple of floors in the MOB building. It would be a turnover for the Te Ngakau civic square; to bring back the communities and enhance the heart of the capital. In that case, if we wanted the buildings back, then it would be a difficult decision to let the current seismic buildings go despite the heritage values it has got. It'll be a long time to

the solutions of MOB and CAB. So the first option will see how much rates we can afford and how the ground be leased to private investment to rebuild those buildings before handing them back to the council. I reckon the National Music Centre would be as successful when they open soon so that Civic Square of Te Ngakau is sustainable. They could expand its business in the rebuilt CAB building since the council leased the floors to them when the Wellington City Council moved to the former PWC building on the Terrace. Above all, Wellington is facing the toughest budget in history. With plenty of aids as much as mixed funding tools and reserves, plenty of money should come from separate places and tools to help the city's projects and initiatives like Three waters for historical pipes upgrade, NZTA for cycleways, bus priorities and LGWM, and other partners such as what the future of the Council buildings in the Te Ngakau civic which could face a similar strategy of when Victoria University and NZSO had come to support the buildings they will settle as National Music Centre. Let's keep the Wellingtons future positive, to unlock growth towards prosperity, to bring mojo and resiliencies so that people can call Wellington home as much as the region where they travel on trains or drive on motorways to the capital where they call work. Let's keep Wellington moving!

- Q6. **If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer?** not answered
- Q7. **Oral forum time** not answered
- Q8. **Oral hearing time** not answered
- Q9. **Which of these options do you prefer? (3 waters decision)** Option 2. Enhanced investment (\$2.4bn - the Council's preferred option).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** Option 2. Take ownership (Council's preferred option, \$32m investment).
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** Option 2. Proceed with base build proposal for public purposes (higher debt and rates)
- Q14. **Which of these options do you prefer? (Central Library decision)** Option 1. Strengthen now by temporarily exceeding debt limit (Council's preferred option, additional 0.79% to rates).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 4. Sludge minimisation through alternate funding (Council's preferred option, \$147m to \$208m capital investment funded through a levy, no additional rates increase)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Cycleways  
Te Atakura (climate change)  
Central Library  
Te Ngākau funding for future work

**Q17. Your comments on the big decisions (optional)**

1. Cycleways - Until a connected-up network is available, the potential of the existing cycling facilities will not be realised. Cycleways (and pedestrian facilities) should be prioritised over using public road space for parking private motor vehicles. Money needs to be allocated to cycleways alongside a strong commitment to making those facilities happen, because otherwise the allocation doesn't get spent in a timely way. Over the last few decades we have had many nice promises but they have not produced coherent, connected-up changes on the ground yet. It is time for action now with looming climate change responses needed. 2. Te Atakura - Previous councils have really dropped the ball on this issue. Actions proposed in Option 3 don't really go as far or fast as we need, but better late than never. Bringing the community along with the changes is essential. It can be done (think about public acceptance of the policy banning single-use plastic bags) if people understand the 'why' and 'how', so a commitment to good quality consultation/engagement is crucial. 3. Central Library - Not sure why the current building would be kept if it is significantly cheaper to build something new and fit-for-purpose. It is a great location, and would be exciting to see a classy building designed for that space. It would be nice to have better connection (visual and physical) to the bridge over to the waterfront. 4. Te Ngākau - I strongly oppose the idea of selling off the ground, or the right to redevelop buildings around Te Ngākau, to private developers. It is a wonderful public space and details of what is there and how it is used should be made by publicly-accountable people and organisations. Private enterprise is motivated by a desire to maximise profits and/or assets, which produces a different focus for development. The MOB is a nice old building and it would be good to see it upgraded if that can be done without exorbitant cost and time. The CAB is ugly and is another building that creates a barrier between the town and waterfront, so I would be happy to see that go and replaced by an exciting modern design. The concept of the national music centre is a great one, and will bring life and energy to that part of the city. The centre would presumably take a long-term lease of any new or suitably upgraded building, so whatever decision is made (to upgrade or rebuild) should allow for that to happen.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

I strongly support the proposed budget.

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

not answered

**Q17. Your comments on the big decisions (optional)**

Further comments on big decisions and funding for the 10-year plan: The Wellington Alliance Against Sexual Violence (hereinafter referred to as 'The Alliance') is a coalition of organisations and young people coming together to strategise, organise, and mobilise around preventing and responding to sexual violence in Wellington. The Alliance was formed in response to an ever-growing feeling of unsafety in our city. The Alliance identified three main areas that Wellington City Council has neglected to yet take proper action on, and that have the potential for considerable impact to city safety. Our people deserve to be safe. We know that Wellington City Council not only can do more to address the complex issue of sexual violence, but also has a duty to carry out these asks. What we want to see: 1. Urban Design: The creation and implementation of a new vision for Courtenay Place, Cuba St, and surrounding areas. This vision must be accessible, people-focused, and prioritise community building. We know that good urban design and planning can create safer streets for all. 2. Hospitality: Council working with hospitality staff, management, and patrons to create a city-wide strategy to keep our bars, clubs, and restaurants free from sexual violence. This would include further training for bar staff around prevention and consultation with the sexual violence sector and evidence-based research around how to make public venues/environments safer for everyone. 3. Funding for Prevention: Further investment in sexual violence prevention through increasing existing funding to local prevention organisations, and the creating of additional funding streams for community-based projects. We would also like to make the following recommendations that; 4. Council employs a dedicated full-time staff member for the coordination of WCC's sexual violence prevention mahi. Wellington Alliance Against Sexual Violence is optimistic about the further work that can be done in our region to prevent sexual violence. We sincerely look forward to the opportunity to discuss our vision further with council representatives.

# Wellington City Council Long Term Plan Submission

*Wellington Alliance Against Sexual Violence*

*10/05/2021*

*Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?*

Further comments on big decisions and funding for the 10-year plan:

The Wellington Alliance Against Sexual Violence (hereinafter referred to as 'The Alliance') is a coalition of organisations and young people coming together to strategise, organise, and mobilise around preventing and responding to sexual violence in Wellington. The Alliance was formed in response to an ever-growing feeling of unsafety in our city.

The Alliance identified three main areas that Wellington City Council has neglected to yet take proper action on, and that have the potential for considerable impact to city safety. Our people deserve to be safe. We know that Wellington City Council not only can do more to address the complex issue of sexual violence, but also has a duty to carry out these asks. What we want to see:

1. **Urban Design:** The creation and implementation of a new vision for Courtenay Place, Cuba St, and surrounding areas. This vision must be accessible, people-focused, and prioritise community building. We know that good urban design and planning can create safer streets for all.
2. **Hospitality:** Council working with hospitality staff, management, and patrons to create a city-wide strategy to keep our bars, clubs, and restaurants free from sexual violence. This would include further training for bar staff around prevention and consultation with the sexual violence sector and evidence-based research around how to make public venues/environments safer for everyone.
3. **Funding for Prevention:** Further investment in sexual violence prevention through increasing existing funding to local prevention organisations, and the creating of additional funding streams for community-based projects.

We would also like to make the following recommendations that;

1. Council employs a dedicated full-time staff member for the coordination of WCC's sexual violence prevention mahi.

Wellington Alliance Against Sexual Violence is optimistic about the further work that can be done in our region to prevent sexual violence. We sincerely look forward to the opportunity to discuss our vision further with council representatives.

Te Ngākau funding for future work

**Q17. Your comments on the big decisions (optional)**

Civic Square land and buildings, as a focal point of the city, must stay in council control to meet the community desires of residents now and in the future. The only way to achieve this is by retaining ownership (and also not granting long-term ground leases, which are functionally the same as ownership). The MOB and CAB, including the sites on which they sit, should neither be sold nor the ground leased long term. This includes the kind of 99 or 999 year "leases" the council has granted in recent years. Whether these buildings are worth remediating, or should be demolished, is a separate decision. If council decides it cannot afford to rebuild or remediate immediately, it is better to retain the sites until finance is available. If the buildings are unsafe or clearly not worth remediation, it is better to demolish them and leave the sites vacant (as garden or park) than to limit our future options by rushing into a "partnership" or lease with a private developer. Civic Square needs to be retained for civic purposes. We do not know what ideas or desires for civic facilities residents of this city will have in 10, 20, or 50 years. Long term leases unfairly constrain future generations' options for this community space.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

I strongly oppose the proposed budget.

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

I support increasing spend in the current budget.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

This draft Long Term Plan is frequently misleading. It ignores certain decisions as assumed fait accompli, makes false claims about the council's ability to borrow, misleads about the implications of borrowing more, and misleads about council's ability to service debt. This submission is not a request to "keep rates low" - rather, it is a plea to be significantly more ambitious by accepting the low-cost money that is on the table and using it to fully fund the work needed to urgently fight climate change, the housing crisis, and infrastructure. This is a rare opportunity that may not come up again in our lifetimes. Council should not pass it up. \*\*\* There is no debt cap \*\*\* Discussion around the council table, commentary in officers' advice, and the LTP itself all make misleading claims about debt limits or caps. There is no debt cap. Usually, claims of a debt cap are referring to one of two things: \* A self-imposed limit that council sets itself. However, far from being a foregone conclusion as often implied (including in the draft LTP), this is the very figure that council plans should be consulting on. Too often these plans wrongly imply that the only matters open to consultation are spending within this self-imposed limit. \* The limit imposed by the Local Government Funding Agency (LGFA). However, this limit is also voluntary. Council borrows through LGFA as a convenience, and as a member also sets its rules such as its "limit." We are not bound to continue borrowing through LGFA if it refuses to accept our proposed increases. It's clear that COVID-19 has affected governments both local and central. Central government has luxury of creating money (through the Reserve Bank purchasing of Government bonds). Local government doesn't have that luxury, but has the next best thing: cheap bonds from central government. Central government needs and wants councils to take up this cheap money. In the words of Bernard Hickey: "The Reserve Bank actually needs councils to borrow a lot more than they are, and it has their back." Councils, including the WCC, are turning down this opportunity - out of an historic aversion to debt. That needs to change. Councillors should override officers overly conservative (and recessionary) advice and accept this rare opportunity to fund infrastructure and fight climate change. \*\*\* The council's proposed funding sources are inequitable \*\*\* Council proposes a significant transfer of wealth from current residents of the city, to future residents, in the form of funding up-front - or paying down debt far too quickly - for the infrastructure that will last for generations. This can be seen in the Funding Impact Statement as large rates increases to produce large operational surpluses, with these surpluses applied to capital expenditure. This is despite council's ability to responsibly borrow far more than planned. \*\*\* Council is choosing unnecessarily expensive funding options for residents \*\*\* The LTP makes misleading claims about "affordability" to residents such as: "...to ensure that Council finances remain within sensible financial limits and are affordable for Wellingtonians.." and "It is important we have sensible limits on our borrowing to ensure that the impact on affordability of rates is maintained.." The reality is that council is choosing an option that is more expensive to residents. The cost of money to households is higher than that to councils, as councils can borrow far more cheaply than households can. By using rates, rather than close-to-free debt, the plan is less affordable (both now and in future) for Wellingtonians than it could be. \*\*\* Debt to revenue gives a misleading view of debt affordability \*\*\* In seeking to justify limited borrowing, the LTP uses the usual "debt to revenue" ratio and projects this over the ten years. However, with interest rates so low, debt to revenue is no longer a good measure of debt serviceability. What matters now is the interest rates. Wholesale interest rates are now often below even the inflation rate. Essentially, this means that the offerer (central government) is offering to pay us for the privilege of us borrowing their money. Unfortunately, the LGFA continues to use Net Debt / Total Revenue covenants. However, if LGFA refuses to increase these self-imposed limits, or remove them in favour of existing and much more reasonable Net Interest measures, WCC should bypass the LGFA to borrow direct from debt markets. Council's credit agency ratings are the highest possible. According to ratings agencies, it is currently only limited only by the sovereign rating. There is headroom to increase debt, even beyond the LGFA's conservative limits, without threatening our credit rating.

# Tim Jenkins – Wellington City Council Long-Term Plan Submission

## Cycleways

The council must choose Option 4

I live in Karori and travel around the city by bike, bus and on foot. I am an experienced cyclist, having ridden recreationally and for transport for at least 40 years. However, I am finding that I only ride for transport now. There are too many cars, many driven by aggressive or incompetent people, and far too few safe routes – it's just not fun anymore. My partner has recently learned to ride through the Pedal Ready scheme. I can't see any time in the future that we might go for a ride together in Wellington – it is not a place for new riders. Wellington is years from having a usable network that will allow people to cycle to their destinations safely. If the council chooses Option 3 it will be decades until we have a network. Only Option 4 will allow the council to seriously lift your game on cycleways.

The council knows the benefits of developing a safe, connected network for the environment, safety, health and the economy. Many of them are listed on your [website](#). Yet there has been little progress. Between 2010 and 2020 only 16 km of cycleways were built and Waka Kotahi recently stated that 'significant improvement [is] needed' for road safety by Wellington City Council<sup>1</sup>.

Transport is by far the largest source of carbon emissions in Wellington<sup>2</sup> (despite the LTP playing this down by stating it's 'one of the biggest' on page 30). The only way to reduce this quickly enough to reach the council's targets is to shift transport modes and dramatically reduce the number of cars used. Providing a connected network of cycleways will clearly help the council to achieve this. Despite the lack of a network the numbers cycling have increased dramatically in recent years. Just think how much better it would be with good infrastructure.

(As an aside, on page 34 the LTP has changing to electric cars first in the examples of mode shift. This is not a mode shift, merely a different power source for cars. All the other problems associated with cars – congestion, water pollution, provision of expensive real estate for parking, etc – remain.)

The LTP raises concerns about the cost for Option 4. However, given the financial benefits listed on the council's [website](#) I argue that you can't afford anything but Option 4. Work by Victoria University backs this up, with a benefit-cost ratio of 11:1 for cycling spending<sup>3</sup>.

The decades-long planning for cars above all else needs to change. Too many people have been denied access to road space for too long. Jess Berentson-Shaw talks about this being a matter of justice.<sup>4</sup> She is absolutely right.

'When it is just too hard and harmful to walk and cycle through our streets as a child, as a disabled person, as a person with limited mobility, or a person with a healthy respect for their safety, and when money is put above this need then our own streets are for all intents and purposes closed to many of us. And that is not just. These streets are for all of us.'

## Let's Get Wellington Moving Uncertainty

Exactly what and when Let's Get Wellington Moving will deliver for cycling is still uncertain. It is possible that that not all routes will happen. This adds to the need for the council to choose Option 4.

### Funding

#### *Minor works budget*

The cycling minor works and tactical urbanism budget is \$1million per year in options 3 and 4. I think this should be doubled to \$2million a year. It is unlikely that this budget is constrained by WCC's capacity to deliver, so doubling it would vastly improve the council's ability to provide bike parking and other minor improvements over the next decade.

#### *Ring-fence cycling funding*

For too long WCC has allocated funding for cycling that has gone unspent. In the last LTP more than \$16 million was assigned for Newtown Connections, the Parade Upgrade and Miramar networks. There is little to see for it. It is not clear what has happened to this allocated funding, but it hasn't been spent on cycling.

Money allocated to cycling through an extensive LTP consultation process should be spent on cycling. Therefore, I believe WCC should ring-fence cycling funding. This may be the only way that a connected network will be built.

The cycle of promises followed by failure to deliver is a major disappointment to the many people who could cycle in Wellington.

#### *Rates and debt limits*

I do not believe that the council's fiscal conservatism is necessary. WCC's chosen debt to asset ratio is much less than the maximum allowed by the Local Government Funding Agency, and is lower than most other councils.

I understand the need to allow for future uncertainty, but feel that the council is being too risk averse. The LTP gives a few reasons that make Wellington unique in its need for headroom, these included earthquakes, COVID-19 or similar and uncertainty about national government changes. None of these seem unique to me. I support the council lifting the debt limit more, especially as borrowing is historically cheap. This will ensure that Wellington does not miss out on the enormous physical, mental, social, environmental and financial benefits of investing in cycling.

(Note: This comment applies to other decisions in the LTP, such as the library, sewage sludge and the missing funds for City Housing. The lack of infrastructure investment over many years needs to be addressed, now is the time to do it.)

### Industry capacity

The LTP raises concerns about the capacity to deliver Option 4. I argue that the council will support and show commitment to industry by choosing Option 4 and ring-fencing funding. This will allow industry to invest in staff and equipment over the next ten years. It is unlikely that there is sufficient capacity in the industry now as there has been little commitment to invest over the past decade. Industry will only invest if there is a clear financial commitment from council to do so. The LTP discusses this very approach for Three Waters on page 24.

## Consultation approach

It is not clear to me why cycleways are highlighted as a major decision for consultation in the LTP. An investment for a road costing \$128 million dollars is briefly mentioned on page 63 of the LTP. This road will cost more than the council's preferred option for cycleways but doesn't merit similar public scrutiny. Why is that?

Cycling is part of the transport shift that the council needs to consider for urban development and growth. Why has it been selected for special treatment? at this stage wouldn't it be better for the council to be consulting on a systems approach to transport and urban design?

The LTP would be clearer and allow for better informed consultation if costs were broken down by household, as Greater Wellington Regional Council in their LTP<sup>5</sup>. On page 17 council debts are shown per household. It's a not inconsiderable sum, but makes little sense as the debt does not belong to householder's debts. I assume this is done to make people agree with the councils fiscal conservatism. An interesting discussion on the costs per household for cycling in the LTP is available [here](#).

## Three waters

It's staggering that around 30 percent of drinking water is lost through leakage, and that the council doesn't know exactly how much is lost as it's not measured. It's also unacceptable that 'none of the city's water bodies will meet the environmental limits' under the NPS for Freshwater Management. Years of under-investment in order to keep rates low has resulted in decaying and failing water infrastructure.

Option 2 does not go far enough. Freshwater quality and the marine environment 'may not worsen' under this option, and it doesn't appear to include sustainable storm water drainage. Option 3 seems to address these issues and bring about significant improvement. However, I am concerned by the council's lack of information to 'properly cost and direct our investment'. Given the lack of information, how have the significantly higher costs over Option 2 been estimated? Is it possible that the true costs might be somewhere between Options 2 and 3?

## Central library

I support Option 1. However, I am concerned about the use of capital underspend to reduce the temporary debt breach. The approach is too uncertain. The breach should just be accepted as council debt.

## Sludge and Waste Minimisation

Reducing sludge production and removing it from landfill will allow for waste reduction at the landfill, reduce emissions, and the risk of sludge being trucked across the city. I support the Council's preferred approach, but think that if the alternate funding is not available the council should look at rates or debts to fund it.

# FUTURE DRAGONZ WELLINGTON AND WELLINGTON CHINESE ASSOCIATION

## WELLINGTON CITY COUNCIL LONG-TERM PLAN 2021-2031 SUBMISSION

### In support of the Wellington Chinese Garden Society Inc. Submission

10 May 2021

#### ***We wish to speak to our submission:***

Tēnā koutou,

On behalf of Wellington Chinese Association and Future Dragonz Wellington, we write **in support of the submission by Wellington Chinese Garden Society Inc. (WCGS)**, which requests a tangible financial commitment to action from the Council towards the Garden of Beneficence to be included in the Long-term Plan, as a way to show the Council still has the vision and leadership needed to create a waterfront befitting of Aotearoa New Zealand's capital.

We support the proposals put forward by WCGS in their submission, namely:

- To reinstate \$504K to the waterfront renewal budget; and
- For \$6.3m in Year Three and \$50,000 in Year One of the budget to reaffirm the Wellington City Council's commitment to the Garden of Beneficence, as part of the Frank Kitts precinct redevelopment.

The purpose of our submission is to provide additional support for the proposal, and demonstrate the importance of the Garden of Beneficence for future generations.

#### **Background**

Wellington Chinese Association is the Wellington branch of the New Zealand Chinese Association (NZCA), a national organisation serving the Chinese community and championing Chinese culture in New Zealand since 1935.

Future Dragonz is the young Chinese associate arm of NZCA, with branches in Auckland, Wellington and Christchurch. Future Dragonz seeks to inspire, engage and connect young Chinese professionals aged 18-35 years to nurture the next generation of Chinese Kiwi leaders by offering social, professional, leadership and cultural development opportunities.

#### **Our submission**

We wish to speak to our submission and will further elaborate on these points:

**Future Dragonz Wellington and Wellington Chinese Association  
WCC LTP 2021-2031 Submission**

In support of the Wellington Chinese Garden Society Inc. Submission

- Pōneke Wellington (and Aotearoa New Zealand) has a long history regarding people of Chinese heritage that is little known and underrepresented;
- Aotearoa's ties with China are also dynamic and continuously developing;
- Over the course of history, there have been several waves of migration from places of Chinese origins. The contemporary population of New Zealanders who identify as Chinese now comprises multiple generations of diverging and converging experiences, forming a multi-layered and rich culture of Chinese Kiwis;
- The Garden was first proposed in 1996. The WCGS have been working tirelessly and constructively with Council, and other relevant partner organisations along the way, including sister cities, since 2001. For some Future Dragonz members now in their early-20s, this is nearly their entire lifetime, if not longer;
- The Garden is not just about history, but providing a place and tangible space to recognise and celebrate diversity in our city. This resonates strongly with Priority Objective No. 4 in the 2021-2031 Long-term Plan;
- The Garden also represents relationships of Chinese with other people in Aotearoa, including mana whenua. The WCGS has worked with mana whenua closely in the planning of the Garden, and the project as a whole has presented a unique opportunity to forge strong relationships in the wider community. This resonates strongly with Priority Objective No. 6 in the 2021-2031 Long-term Plan;
- The Garden simultaneously symbolises the past, acknowledges the present and evokes the future, representing the presence of Chinese culture in Aotearoa that is becoming increasingly rich and multi-generational;
- As the next generation of Chinese leaders in Aotearoa, we are privileged to learn from and be inspired by the long-serving members of WCGS, whose tenacious tenure in trying to see this vision through to fruition has been the length of a generation;
- To us, this Garden - and its long journey towards being realised - represents what it means to be a Chinese New Zealander, and we will proudly support our community leaders and help them carry the torch forward for the next generation;
- To that end, we implore the Council to demonstrate commitment to the Chinese community, in Pōneke and Aotearoa.

### **In summary**

The longitudinal and ongoing nature of this project means the Garden has become an intergenerational campaign. The relationships which WCGS have fostered, the plans that have been developed and the conversations and learnings that have emerged from this work have built a solid foundation - but its potential has not yet been fully realised. The Wellington Chinese community and the next generation of Chinese Kiwi leaders are committed to seeing this project through and reap what our leaders have sown patiently for the last twenty plus years. The support of the Council is vital in order to bring this to life. Without this commitment, it shows that yet again, Chinese (and Pan-Asian) culture are being put to the side.

Ngā mihi nui,

Jess Wong and Chelsea Wong

## **Guardians of the Bays Inc.: Additional Comments for Submission on the 2021-31 Wellington City Council Long Term Plan**

Our comments pertain to Decision 4: Te Atakura First to Zero (Climate Change). We support fully funding this programme and have additional comments.

In addition, we have commented on Wellington City Council's contribution to the Let's Get Wellington Moving programme.

### **Decision 4: Te Atakura**

#### **Wellington Airport's expansion and extension plans are contrary to the goals of Te Atakura**

As the [Te Atakura Implementation Plan](#) notes:

At almost 20% of the city's emissions, and with emissions from these sectors still increasing, actions to reduce emissions from aviation and marine sectors must be explored and identified in collaboration with key stakeholders. Although aviation emissions will remain low in the short-term due to the Covid-19 pandemic, strong investment in potential solutions is needed. (p. 23)

We agree that action on aviation is needed. Until aviation can be wholly or largely fuelled by renewable energy, we submit that airport emissions must be capped and then progressively reduced.

Wellington International Airport Limited (WIAL)'s 2040 Masterplan includes an ambition to almost double pre-COVID-19 passenger numbers by 2040, and includes plans to extend Wellington Airport runway into Cook Strait. The effects of COVID-19 are minimal to WIAL which relies heavily on domestic air travel. With the accelerating effects of climate change, WIAL still has the long term objective of increased passenger numbers.

Furthermore, WIAL has recently issued two Notices of Requirement (NoR) to expand the physical land area of the airport within Wellington City, with a substantial part of this land earmarked for parking and the removal of half the green space of the Miramar Golf Course that surrounds it. These designations are shortly to be considered at a first-level hearing, where the Council's RMA s42a report has recommended that the East Side NoR not be approved, due in part to its climate change effects.

WIAL's expansion and extension plans threaten the achievement of Wellington's climate change goals in three ways:

1. by the direct growth in aviation emissions that would occur if Wellington Airport is able to realise its passenger number growth ambitions, which include allowing many more long-haul flights
2. due to induced emissions from additional car journeys to the airport

3. due to construction works both in earthwork construction traffic movements and in embodied energy of the proposed large concrete retaining wall in the Eastern Designation.

Therefore, with regards to the implementation of Te Atakura, we submit that:

1. We support Wellington City Council's decision to remove a loan for the proposed runway extension from the draft Long Term Plan. There must be no restoration of this funding, in any form, in the final Long Term Plan.
2. Due to direct and indirect emissions from Wellington Airport's operations, Wellington International Airport Limited's extension and expansion plans are contrary to the goals of Te Atakura and a threat to its implementation. Wellington City Council should oppose, and refuse to fund, any further growth of Wellington Airport's physical or emissions footprint. We propose that, as part of implementing Te Atakura, a cap should be placed on Wellington Airport's greenhouse gas emissions, with the permitted level of emissions set to sink each year after that. This will constrain flights and reduce emissions until it is possible to fly without burning fossil fuels.
3. We note that the Climate Change Commission is required by 31 December 2024 to provide written advice to the Minister on whether the 2050 target should be amended to include emissions from international shipping and aviation. We urge Wellington City Council to advocate for the full inclusion of international shipping and aviation emissions in the 2050 target.

### **Other Matters: Let's Get Wellington Moving**

Guardians of the Bays supports the conversion of the land and air transport fleet to renewable energy sources. However, given that the private vehicle fleet is overwhelmingly fossil fuelled and that the use of renewable energy for aviation is still in its early experimental stages, the next ten years is absolutely not the time to be funding the construction of new road capacity to Wellington Airport or supporting new parking or aircraft parking and taxiways surrounded by an extensive concrete retaining wall as proposed in the Eastern Designation or runway capacity at the airport with a runway extension south into Lyall Bay.

Guardians of the Bays Inc. submits that WCC should advocate strongly for rapid transit to the eastern suburbs of Wellington, including Miramar and the airport, and should prioritise rapid transit over new road capacity. This needs to be done to meet both WCC's greenhouse gas reduction objectives and the objectives of the Let's Get Wellington Movement programme of investment (supporting document, p. 53), notably the objective of reducing dependence on private motor vehicles.

An efficient mass rapid transport system, together with an all-electric bus fleet and better walking and cycling provisions, will both reduce land transport emissions and make it harder for WIAL to justify taking more of Wellington's land and turning it into car parks, or for that matter, parking for planes.

In addition we suggest that WCC puts a cap and an ongoing reduction on WIAL's car parking within its designations and surrounding neighbourhood through the new proposed Wellington City Council District Plan.

We urge WCC to oppose any expansion of the number of flights into Wellington Airport, in particular long-haul flights, and to oppose the extension of Wellington Airport runway due to its implications for the region's emissions.

### **About Guardians of the Bays**

Guardians of the Bays Inc (GotB) was set up as a citizens' group in Wellington's eastern suburbs in July 2013. It now has a membership of over 500 including citizens and voluntary organisations from all over Wellington. Its motivation initially was the protection of the environment that would be at threat from plans by WIAL (Wellington International Airport Limited) to extend the airport runway at first into Evans Bay and later into Cook Strait. GotB's goals have widened in a way that is consistent with the original environmental objective. Those goals might be summarised now as:

- protection of the marine life and coastline adjacent to the airport
- protection of the local community from the negative effects of airport expansion
- concern about climate change which would be exacerbated by continuing promotion of air travel, and increased emissions from aircraft and transport to/from the airport
- the real danger of sea-level rise which puts at risk many low-lying areas, including the airport itself
- concern that ratepayers' and taxpayers' money should not be expended on airport expansion when many other pressing human, social, resilience and infrastructure challenges confront Wellington.

- Q14. **Which of these options do you prefer? (Central Library decision)** Option 1. Strengthen now by temporarily exceeding debt limit (Council's preferred option, additional 0.79% to rates).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 4. Sludge minimisation through alternate funding (Council's preferred option, \$147m to \$208m capital investment funded through a levy, no additional rates increase)

Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below

Cycleways  
Te Atakura (climate change)

Q17. Your comments on the big decisions (optional)

I'd like to highlight the importance to provide this city with a safe and extensive network of cycleways. I understand that it's a challenging matter if we maintain the current network to be used by motor vehicles (car, buses, etc) with limited space, This happened in a high % of the roads of Wellington. I'm sure that putting this matter in experts hands such as Architects specialized in developing Urban areas is the way to go. A main network of cycleways can be designed making the roads UNIDIRECTIONAL. It means that one of the lines can be transformed into a 2way-cycleway, making a road just to one direction. I understand that this can cause distress to some residents that need to spend 5 minutes more driving to get to their houses, but in the long run, it's an effective way to create an effective and SAFE cycleway. This will be together with TE Atakura. Using fewer private cars will ensure a better future for the City, Public transport is not the way to fix the problem of transport. it's expensive and inefficient. It's in private hands so unless is profitable, won't be improved. The thing is that if we provide the city to SAFER cycleways, residents would happily take their e-bikes, scooters, etc as transport. I wish to see this happens. I've been living here the last 10 years and I would love to live another 10.

Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)

not answered

Q19. Do you support the proposed budget?

Neutral.

Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?

I support increasing spend in the current budget.

Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?

I have no seen any word regarding housing. I understand quite a challenging issue... but I would LOVE to see any regulation in the rent and the conditions those flats/homes are presented by the landlords. I think the investors are constantly taking advantage of the situation, supported by the banks. I understand that. It's a business. But there is no reason why the council can't create a regulation of the rents the tenants like me have to put up with. The students suffer the most as their financial situation is more critical. I reckon that it's a tough bone to chew. Cheers D

Cycleways  
Te Ngākau funding for future work

**Q17. Your comments on the big decisions (optional)**

Decision 3: Cycleway I have chosen Option 4 as we cannot wait to make these critical changes to how we move around the city. Urban form is an expensive and contentious part of our lives to change but Wellington needs to be bold and committed to a significant increase in active transport to meet many of the stated priority objectives such as a healthy, more people centred vibrant CBD, delivering Te Atakura, and enabling housing that is no longer car centric and car dependant. Decision 5: Te Ngakau CAB & MOB I have ticked 'none of those options' for several reasons. Firstly, I feel that MOB's heritage value to the whanau of buildings and spaces that make up Te Ngakau is high enough to warrant further investigation into how it could be retained in part or whole. I support the demolition of CAB and the redevelopment of the CAB+MOB sites but with some retention of MOB. This may be some of its facade or most of the building, however I would rather not see the total replacement of both CAB and MOB. Along side a collective scheme for CAB+MOB which retains some of the later, I also would like to see a layperson's explanation of the financial modelling around this being led by a private developer vs Council retaining ownership. The motivation here is that if Council are, as stated, committed to be majority based in Te Ngakau then at some point in the future being a tenant will cross over to a financial position that is less favourable vs being an owner/occupant as was the situation before the move the The Terrace. This also puts the Council in a stronger position to control and influence the future of Te Ngakau in decades to come.

Cycleways

**Q17. Your comments on the big decisions (optional)**

Support Option 4 to build a fully-connected network by 2031 - Without a full-connected network, Wellington will not realise the maximum number of people moving from private vehicles to bicycles. There is an opportunity cost here regarding the health of our community, if people who might bike decide not to because it is too dangerous. There is also associated benefits for carbon reduction, as emissions from transport form a large part of the overall total. Cycling is not completely without emissions, but they are far smaller than those generated by motorised vehicles. Prioritise children before seawalls. Completion of the Great Harbour Way has been prioritised over cycleways in the Northern suburbs. In my opinion, this is a missed opportunity - there are 2500 children attending Newlands College, Newlands Intermediate, and 4 primary schools. There is a high level of car dependency in this area, and safe cycleways utilised by school children would reduce the use of cars, congestions, emissions, and have associated health benefits. Double the Cycling Minor Works Budget to \$2 million per year The minor works budget can have a much larger impact on cycling in Wellington than it currently does. The works covered such as bike parking actually make Create a new dedicated funding category to deliver rapid changes to the urban environment - This should be focussed on the reallocation of street-space - eg reducing parking to allow for space for active modes of transport, creating parklets and low-traffic neighbourhoods. This is a strategy that has been proven to work overseas in cities such as London, New York and Paris, and is relatively fast, compared to the current situation of long lead times to deliver infrastructure. Ring-fence cycling funding. There is a concern that over the last several years, the cycling budget has not been fully spent. Although once in a while this might happen, it should not be happening consistently. Even more alarming, this money does not get carried over. The elephant or library in the room is that there is no funding for the repair of the library, but it is suggested that it can be funded from 'savings' from other projects. This provides an obvious and perverse incentive to not spend cycling money on cycling projects, and instead divert it to the library. This is not acceptable. Enabling an increase in cycling and active transport has multiple benefits for the city and the population, and the infrastructure needs to be of sufficient quality to get the 'want to bike, but it is too risky' segment of the population onto bikes. 'Saving' money by not spending the budget, leaving gaps in the network, or providing cheap solutions (painted lanes, sharrows) is loading up a cost to the city that is not affordable. The best cycling solutions can be funded by increasing the debt levels beyond the WCC self-imposed limits. This will give the city the best bang for ratepayers buck and provide the optimum uptake of cycling in the city. A significant commitment to building quality infrastructure will give the construction sector the confidence to invest in people and plant.

Cycleways  
Te Atakura (climate change)

**Q17. Your comments on the big decisions (optional)**

I would like to include my opinion regarding the cycleways and the climate change action plan. After suffering a huge accident down Riddiford St in Newtown, 5 years ago, I became a person who is in fear of riding a bike, anywhere. I don't feel confident. After years of being a rider, I would give to anyone having a concussion and not knowing how to deal with such delicate mental state. I had support. But it's not an easy recovery. The accident showed me how insecure are Wellington streets for all of us. And I want streets open and welcoming to all of us, with all abilities and levels of confidence. I want the streets to be with less cars, less parking and more bikes and people walking. Wellington is the perfect place to commute everywhere by foot or bike. The options are more and more everyday, including the electrics bikes, cargo bikes, family bikes, etc. And I'm a true believer that the more cycleways there are, the less congested the streets will be, the less parking will be needed. People will commute by bike to shops, work or any business, as long as the city and the Council provides the means to do this. Keeping people safe, with enough space for all of us to use the streets. In Melbourne I saw how some streets had trams and other buses, and not all the vehicles go on the same streets. In Santiago, Chile, you can see streets with just On Way, and other that you could only park in one side of the street, so you simply cannot go both ways and park in both sides. I think Wellington needs a serious restructure on the streets: bicycles need a place, also buses and cars, but maybe there needs to be less parking, new streets directions where you can go only in one direction, etc. We will all have to compromise something, accepting that some streets will change and we would probably need to find new routes for cars and buses. This could all be done having experts to consult with, even from other countries, such as Architects specialised in Urbanism. The impact of a cycleways network goes hand in hand with supporting the Te Atakura (climate change) plan. Electric cars is a good idea but is expensive. But is not only about Council having electric cars to reduce emissions. How about police in bicycles? How about really reducing emissions by REDUCING cars and car parks. How about closed streets once a month to promote health and a less stress lifestyle? Greener buildings YES! but how about promoting this for every building, public or private, how about community centre's green roofs, and promote community gardens on rooftops? not just certain buildings, but a fund to promote this type of initiatives within communities. And promoting people to save up on power and water, by reducing their bill, or granting certain rewards for saving.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

In general it looks Ok, but all the 6.2.1 Building control and facilitation rising around 30% which is excessive, and the Building Warrant of Fitness rates are unbelievable. (from \$163 to \$418!!! that's way more than 30%) Besides that, I would like to mentioned that even though is a tough topic, there is no mention of the Housing situation/crisis in Wellington. The rents are going higher and higher, but the wages are not. There is no regulation, and for people that can't afford buy yet, there is no many options (plus the sad state of many houses and flats, is a clear sign that the landlords and property owners have no regulation over what are they putting for rent, how much are they charging and whether their property is suitable... is there going to be a WOF for houses at any point soon?) There are many people condensing all profit and not investing on improving their properties. Once they do, the rents go high. But IT'S THEIR DUTY to do it. Is not a luxury. It's basic living conditions. A rule and regulation for rented property prices would be ideal.

Cycleways

---

**Q17. Your comments on the big decisions (optional)**

The lack of progress in developing Wellington's cycleways is disappointing and out of step with our ambitions of encouraging active lifestyles, building a liveable city and reducing climate emissions. It is remarkable so many people in Wellington cycle given the lack of proper cycle routes and the danger of our narrow car-oriented streets. I encourage Council to move as fast as possible developing a proper cycling network and making the difficult decisions needed to create cycling routes on dangerous narrow sections of road, eg, Adelaide Rd, Riddiford Street, Molesworth/Murphy Streets, Featherston Street. There also needs to be a better route (or lane separation) along the Waterfront. It's a really well-used cycleway but there is limited space for both cyclists and pedestrians. Cycling should be a genuine and safe commuting option for Wellingtonians; it shouldn't feel like going to war.

Cycleways  
Te Atakura (climate change)

---

**Q17. Your comments on the big decisions (optional)**

Wellington has severely underfunded infrastructure necessary to make it safe for people to cycle, particularly those who are less confident. Addressing this requires urgent and significant investment. Making it safe for people who want to cycle to do so will also help Wellington achieve its climate change goals. I fully support Cycle Wellington's additional proposals in relation to cycling. I'm not convinced the council's proposals for Te Atakura is the best method for reducing Wellington's emissions. I think it would be much more effective to make it easier for Wellingtonians to walk, cycle and use public transport.

- Q13. **Which of these options do you prefer? (Civic Precinct decision)** Option 3. Retain and seek to repurpose (higher debt and rates)
- Q14. **Which of these options do you prefer? (Central Library decision)** None of these options.
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 4. Sludge minimisation through alternate funding (Council's preferred option, \$147m to \$208m capital investment funded through a levy, no additional rates increase)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Wastewater laterals  
Cycleways  
Central Library  
Te Ngākau funding for future work

**Q17. Your comments on the big decisions (optional)**

Three waters: It's all about the governance on pipes. Someone has let Wellington down [successive councils for years]. You order up a long term plan. Then fund it. Then monitor it please. Then do the vanity projects when we can afford it [or better yet not at all]. Wastewater laterals: I wonder - is the option to take ownership just the Council being too soft to enforce proper maintenance from home owners [who have just had a 20% rise in property value but can't afford to fix a pipe?]? Cycleways: I'm a cyclist - and I find your thinking, co-ordination and implementation muddled - you build where there is no problem [Island Bay; Brooklyn hill] - and you can't [easily] solve where you really need cycleways because the geography is unfortunate [e.g. Berhampore shops] - and your [perhaps historical] road design is not cycle friendly [try biking happy valley and dodge the person hole covers, hydrants, etc.] - and then you are about to fine considerate drivers who park a little on the footpath giving a little more space to road users - so even more squash and danger for cyclists. Central library: (i) distributed model is more customer centric - a central library is an out of date concept; (ii) basic budgeting: don't fix the library until you can afford it which is after you have fixed the pipes; (iii) if there is a civic need for meeting / study spaces then that is a separate debate (iv) apart from the nikau the library is of minimal architectural merit and doesn't need to be saved (that's me & 3 architects I've asked - there are much better 'Ath's' about) Te Ngākau: I'm not sure you've considered all the options or given us enough financial information. Do you really want all your eggs/workers in downtown Wellington [resilience]? e.g. could you do reduced office space requirements in Civic square and lease the balance around town or in suburbs? What about a distributed model? Have you factored in WFH on space requirements? What's the total cost of ownership between the options?

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

Neutral.

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

I support keeping the budget the same but with some changes.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Re-think parking availability and cost - if you want downtown businesses to thrive; Re-think no parking on footpaths [have you seen our narrow streets? - allowing a modest encroachment while minimum 900mm to pedestrians was pragmatic]

not answered

---

Q19. Do you support the proposed budget?

I strongly oppose the proposed budget.

---

Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?

I support decreasing spend in the current budget.

---

Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?

1) Overall I support investment in city infrastructure through borrowing rather than the large increase in rates proposed. Interest rates have never been lower and is a perfect coincidence between the need for investment and the availability of cheap funds. Increasing rates to 13% is unnecessary in light of low cost of borrowing and will only add to the housing crises and push people to move to other cities. 2) While bike lanes add to the city in reality they serve a very small percentage of our population. We have huge issues affecting the whole population e.g. pipes/water, earthquake strengthening of the Town Hall, St James and Library. These works are urgent and expensive and because they impact such a large percentage of the population should take precedence over bike lanes affecting very few. 3) I support the move to close Lambton Quay to cars but id it is to be a pedestrian shopping Mall then taxis and buses should rerouted so this can be a safe pedestrian environment. Should council decide to allow buses/taxis then don't close off side streets to parking. If there is no convenient parking the city will die. Lambton Quay closed to traffic must have an outstanding public transport system to service it and we don't have that. Do this in the right order; fix public transport first, second provide parking in the side streets. Listen to the retailers, if not planned properly our CBD, already under pressure, will fail if you add further complications to the heart of our city already struggling following Covid and online shopping options. 4) As a general comment I am very concerned at the lack of business acumen displayed by Council and the adherence to party politics coming down from a head office in Auckland. Councillors are elected by Wellington rate payers to represent their interests and should act in the best interests of the city who elected them If the council goes ahead with a 13% rate increase there will be blood on the floor at the next election.

Investment in three waters infrastructure  
Wastewater laterals  
Cycleways  
Te Atakura (climate change)

---

**Q17. Your comments on the big decisions (optional)**

The Council's attitude to major infrastructure issues and long term planning has not been as ambitious as is necessary to see a future proofed city that supports resident's wellbeing. Our cycling infrastructure is dangerous and sorely lacking and our pipes are failing. As a young person, I recognise that we all have to contribute now, to prevent problems later on: something I wish previous generations had done. That's why, in principle, I support high investment solutions for the major issues Te-Whanganui-A-Tara faces. Although it may hit us in the pocket, it will stop the city crumbling under our children's feet, in fact providing us the opportunity to have a world class capital city that we're all proud to live in!

Cycleways

---

**Q17. Your comments on the big decisions (optional)**

I fully support the acceleration of the cycleways programme. However, I have concerns about the design, consultation and implementation processes, all of which appear to require improvement. The design process requires frequent "sanity-checking", by an independent panel of qualified people including cycle advocates and suitably qualified professionals. Consultation has been laboured and appears to give too much weight to frontagers concerned only with the provision of residential and business parking, often at the expense of cyclist safety and Council's requirement to give weight to its Climate Emergency declaration. Implementation of major schemes needs improved oversight, supervision and near-real-time communication with affected parties. I would be happy to elaborate on these points.

The Miramar and Maupuia Community Centre would like to submit on the Long-term Plan with specific reference to the CPI increase which has been removed as a saving. We would like to oppose this saving as we are reliant on this inflationary increase for key parts of keeping our community centre functioning financially, particularly in regard to staff salaries. We are working hard to continue to provide a range of valuable projects/ideas for our local community and to face a reduction of CPI in real terms is something that will have an impact on our ability to do so. In addition, we would like to request that some funding could be put allocated in this Long-term Plan for the improvement of our kitchen facilities. We have been needing to upgrade our kitchen for many years now, and an upgrade will help us to provide a better offering to the users of our community centre. In terms of the more strategic plans proposed in the Long-term Plan, we would like to voice our support for more spending on key three waters infrastructure in Miramar, and on investing in improvements to public transport, walking and cycling to help ensure that our community continues to be a great place for people to live, work and play. Our community in Miramar and Maupuia is growing and as it grows, it is important that investment in community infrastructure grows too.

Cycleways

---

Q17. Your comments on the big decisions (optional)

Cycleways: I support the development of a safe, separated network of cycle/micromobility lanes, but it's important that this be part of a multi-modal approach that includes the provision of safe, high-quality, well-lit footpaths; the urgent development of bus priority lanes; the mass transit option of LGWM; traffic demand management; and the removal of private vehicles from the Golden Mile.

---

Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)

not answered

---

Q19. Do you support the proposed budget?

I somewhat support the proposed budget.

---

Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?

not answered

---

Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?

There has never been a better time to borrow. WCC should increase its debt limit above that proposed to fund the development of vital infrastructure that will contribute to a low-carbon future and make our city more resilient.

---

I support increasing spend in the current budget.

Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?

---

not answered

- Q1. **Full name:** Susanna Broughton
- Q2. **Phone number:** [Redacted]
- Q3. **Are you making this submission as an individual or on behalf of an organisation?** Individual
- Q4. **What organisation are you submitting on behalf of?** not answered
- Q5. **Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?** Yes
- Q6. **If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer?** Oral forum (informal, 60min facilitated table discussion with 2 to 3 Councillors and other submitters)
- Q7. **Oral forum time** Morning
- Q8. **Oral hearing time** not answered
- Q9. **Which of these options do you prefer? (3 waters decision)** Option 2. Enhanced investment (\$2.4bn - the Council's preferred option).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** Option 2. Take ownership (Council's preferred option, \$32m investment).
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 2. Medium investment with savings (\$25.4m investment, lower rates and debt).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** Don't know.
- Q14. **Which of these options do you prefer? (Central Library decision)** Option 1. Strengthen now by temporarily exceeding debt limit (Council's preferred option, additional 0.79% to rates).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 4. Sludge minimisation through alternate funding (Council's preferred option, \$147m to \$208m capital investment funded through a levy, no additional rates increase)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Cycleways

---

**Q17. Your comments on the big decisions (optional)**

The city is at a crossroads to move away from urban planning that facilitates heavy car traffic in the centre, towards a more liveable, healthier, climate friendly and enjoyable place to work and live. Investing in safe and extensive cycle ways would have a transformative effect, reducing traffic congestion and pollution. Such cycle ways would improve pedestrian experience too, as footpaths are currently being used for safe cycling and scooting. Getting people out of cars would solve the pressure to build more roads and tunnels as a mistaken solution to traffic. More roads have been proven to simply result in more traffic, let's see if the same applies to bikes!

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)

---

**Q17. Your comments on the big decisions (optional)**

Three waters - I note the auditor's report and the need to use information about the condition of the infrastructure to actually cost and direct investment. My read of the option I selected appeared to align closer to this approach, but I hope that the approach taken will take into consideration the auditor's comments. Cycleways - if you want to reduce transport emissions, cycleways are a cost-effective option. When you also take into account increased parking fees (particularly on weekends), alternative transport options are crucial, and while WCC has limited influence over public transport provision, cycleways are a great opportunity. Also, investments to improve the city centre for people over cars is really important from an emissions perspective and for making the city centre a nice place to actually be in. Te Atakura - I would support the full investment, but I couldn't see any difference between the medium level investment and the high level investment.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

On the recreational activity fees - I would support greater increases to golf fees, particularly if it can subsidise other fees like rec centres and swimming pools, particularly considering the relative social good of these services. Golf courses take up space that could be used for housing, and if it subsidises other physical activity, it will help with public health and particularly helps those in our community for whom these fees take up a greater share of people's income.

Te Ngākau funding for future work

**Q17. Your comments on the big decisions (optional)**

Ka mihi ki ngā uri o te rohe nei! Kia ora koutou! Kia orana tātou! As John Key once said, Wellington is dying! As acknowledged here, Te Ngākau is bereft of life and as a City - a Capital City - our creative and cultural heart is left wanting. This means the communities that added balance to the Central City in particular are not present - artists, audience members, industry professionals. This has led to a Wellington City that has instead prioritised big out of town visitation numbers; international events purchased and then presented here in our City. In short, Wellington has become an event city - led by event administrators. It has not been an Arts City for many, many years. An Arts City is nurtured and developing by an arts community and industry. Wellington City Council has not significantly invested in the artists that nurture and grow the creative and cultural heart of this City - choosing instead to import events, artists and crews. It is entirely untruthful for Wellington City to identify as a cultural and creative city. The ever increasing incidences of violence in the Central City is because there is no longer a wider more complex culture of creative audiences spending the night in town to meet with friends and whānau, take in a theatre show and seek out a late night coffee to follow. As long-time and very active members of the local theatre and dance industries, we have long been aware that the increase in violence is because there is no longer a visible and engaged theatre going audience populating the Central City at night. As a Wellington creative business leader, the City has prioritised the artforms of our colonial past - including the ballet, the orchestra and a monolithic arts festival. Our Māori and Pasifika led arts companies, festivals and organisations need only look at the carpark of the Michael Fowler to see the value system of Council reflected to us. This shallow and mono-cultural value system has left our City lacking in any 'diversity' - with the in recent years the hashtag #WellingtonSoWhite often accompanying arts discourse of Wellington City. Despite the lack of value from Council - and the overwhelming prioritisation of the Pākehā-led entities in this Capital City - the Māori and Pasifika theatre industry has continued to grow - despite this lack of vision. As artists, organisations, festivals and companies, we, as Indigenous peoples, are global by nature. In Wellington, we need only look to our Kia Mau Festival as an example of a possible future - a dynamic, diverse and innovative ecology, growing economy- that without major resource from this city - continues to attract the world here. Like Tawata Productions too, we are global by nature, yet deeply rooted in Te Whanganui-a-Tara, with a focus on Wellington City and Wellingtonians. We implore the Wellington City Council to be bold - think locally and by it's very nature, act globally. We have the opportunity to make a bold decision, to engage with local Māori and Pasifika led creative companies and artists to prioritise and enhance a unique and world leading creative ecology. The 'rich traditions' that exist in our city are also creative traditions - Wellington is the birth place of both contemporary Māori and Pasifika theatre. We have a live performance ecology in this city that is acknowledged globally - and continues to be looked to as a meeting place of leading artists and companies from around the world. Wellington is a Capital City - yet it lacks the mana of a capital city. The answers to this City's future start right here in Pōneke - in fact, the solution have already begun, it's long past time for the Wellington City Council to catch up! Kia kaha! Miria George Co-Director, Tawata Productions Executive Director, Kia Mau Festival

Investment in three waters infrastructure  
Wastewater laterals  
Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

We support the Council's decision to invest in a digester and thermal dryer to reduce the volume (and emissions) of sewage sludge going to landfill. We primarily support this proposal if it means the Southern Landfill extension will be reconsidered, and also for the opportunities it unlocks to accelerate waste minimisation activities. The consent requirements of mixing four parts general waste with one part sludge has been a huge roadblock for our city's waste minimisation goals, and we know there is a huge appetite to see action on this both within the waste sector and amongst the general public. We fully support the joint submission of local zero waste advocates on areas of focus for waste minimisation activities and the development of a zero waste strategy for the city. However, we do not believe that this particular piece of infrastructure is the ultimate solution for how we manage sewage and human waste. This system buys time for Wellington to get on with a zero waste plan, but in the longer term there are a number of drawbacks with this investment. In essence, this a 'bottom of the pipe' solution, in the sense that it simply tacks on an extra process to the end of a system which itself is highly problematic. The current network of pipes feeding a small number of centralised wastewater treatment facilities has become increasingly complex, costly and vulnerable. The most promising alternative systems we have encountered are decentralised, source separated approaches to sewage and wastewater (see references for further info). These are 'top of the pipe' or even better 'no-pipe' solutions and their application could fundamentally reshape how our city thinks about the sustainability and resilience of our sanitation systems. We recognise the current system needs to remain functional and to some extent be improved, but recommend that now is the time to invest in R&D, develop strategic plans and carry out feasibility studies for a more sustainable and resilient wastewater system. The 50 years 'bought' by the digester and thermal dryer is not a very long time to fundamentally reshape our city's wastewater infrastructure. If we don't start now, it will be too late. The most well-known and basic example of a decentralised, source-separated system is a waterless 'composting toilet'. While rudimentary composting toilets, consisting of a bucket with a toilet seat on top (to which straw and wood chips are added), are common, there is a lot of innovation happening in this area, and there are a range of different models and systems that can work for different circumstances, different populations, different levels of separation and processing of waste streams. There have been trials of composting toilets and other source-separated solutions for apartment blocks, university and school buildings, and even entire towns in parts of North America, Europe, China, Australia and elsewhere. However, this is also a very underexplored and understudied approach to managing human waste in an urban context and will need careful and thorough research, planning and testing before implementation. Key issues that decentralised, source-separated systems would address: Contamination: Mixing human waste with other sources of greywater results in a contaminated sludge. Contaminants include a range of toxic pollutants (heavy metals and other micropollutants) from industrial chemicals, paints, personal care/cosmetic products, and microplastics (which themselves attract and absorb other toxins to them). Many of these contaminants are extremely difficult if not impossible to remove. The Council has suggested that future 'reuse' of the sludge may be possible with the new hydrolysis and thermal dryer facility - which most likely would be treatment and application of biosolids to land. However, there are several alarming studies globally that have shown that microplastic contamination of soil resulting from biosolids being applied is a serious issue with unknown consequences. On the other hand, the purpose of source-separated sanitation is to keep human waste separate and therefore uncontaminated (aside from pharmaceuticals). For composting toilets, if they are managed and processed well the resulting compost can be applied to land safely. In fact, source-separation means the valuable nutrients within human excreta, including urine, can be used for fertilising and replenishing soils, rather than being made unusable by contamination with pollutants. Resilience: Sewage and sanitation systems have huge resilience issues. A large earthquake in Wellington would seriously compromise our primary sanitation system. Climate change will likely also create water insecurity, fundamentally impacting operation of the wastewater

network. Water consumption in our region is comparatively high relative to our population. With Wellington's projected population growth to 2050, meeting these same water needs poses substantial challenges and costs. Alongside other unsustainably high and wasteful uses of water, the current sewerage system is very water intensive and contaminates a large amount of potable water – and the pressure on this system is going to get worse in the coming years and decades. Composting toilets (which are sometimes called dry toilets) don't require water at all. This means they can function well in a disaster scenario where water infrastructure is damaged, and would help preserve water for essential use in both emergencies and in times of water scarcity. The successful emergency composting toilet trial conducted by WREMO in 2012/2013 proved the viability of even a very basic composting toilet system in Wellington. Cost: The current centralised sewage treatment proposal is expensive in itself and does not address the ongoing and increasing costs of maintaining, repairing and replacing pipes and other aspects of the current sewerage infrastructure over the long term – even without an earthquake scenario complicating things. In fact, the current proposals have the potential to create a lock-in effect that binds us to this problematic system of sanitation. On the other hand, basic composting toilet systems can be extremely cheap, easy to set up and maintain. While overall costs in a medium- to long-term transitional period would likely be high because of the need for investment in two systems, the alternative model could take the pressure off the existing sewerage system with sufficient uptake over time. Key barriers to implementing source-separated sanitation: Given the range of emerging technologies for decentralised, source-separated management of human waste, there are many unknown barriers and issues that will need to be worked through. Specifically for composting toilets, there are three key barriers to making them a practical solution for urban sanitation in Aotearoa New Zealand: - The Building Code requires connection to water mains. This doesn't necessarily prevent composting toilets to be used as a secondary toilet, but will have implications for new developments. - Genuine public health concerns with composting toilet usage that health authorities are hesitant about, such as ensuring that disease causing pathogens are eliminated during the composting process, and how and where to dispose of the compost (e.g. on site or collection and processing at an offsite facility). The entire process from toilet to soil needs to be well managed and monitored to ensure it is safe. - Overcoming public perception that composting toilets are dirty, smelly and unhygienic. On top of this, while Greater Wellington Regional Council permits composting toilets in general (provided certain criteria are met), it requires the effluent stay on the property where the toilet is located. This adds an additional barrier to the possibility of collection and offsite processing. For some iwi and hapū, disposing of human waste to land may be preferable to disposing of it in water. However, the tikanga of such systems will still need to be worked through to ensure any alternative system is acceptable to mana whenua. Appropriate end uses for humanure must also be guided by tikanga. There are examples of successful composting toilet systems to learn from in rural parts of NZ (Camp Glenorchy, Jester House, Okere Falls Store and countless private residences, as well as some festivals, such as Splore) and around the world – and they have been shown to work very well if managed correctly at a small scale. Compost toilets have also been implemented successfully in developing countries where wastewater infrastructure is very limited or non-existent. There have only been a handful of trials in urban areas of developed countries with mixed success, so the experience and knowledge is limited. Sustainable Coastlines HQ building in Central Auckland, known as the Flagship, has composting toilets and would be an interesting case study to investigate. Some of the members of our PBC are very keen to support the development of a pilot project trialling source-separated systems including composting toilets in urban areas in Wellington. The first step would likely be a feasibility study to look into the barriers we've just mentioned and find the safest and most workable solutions. There is also rapidly increasing interest in and studies being conducted on these systems globally from the perspective of eventually creating an urban sanitation infrastructure that is environmentally beneficial as opposed to harmful, highly resilient in times of disaster, responds to water scarcity, and also more economical and simpler to run and maintain alongside other waste reduction activities in the community. To summarise, we support the Council's proposal to address Wellington's current sludge to landfill problem, provided it is tied to a commitment not to extend the Southern Landfill, and provided that it is understood as a temporary solution that buys us time to investigate, develop and implement a more sustainable solution for managing human waste and biosolids. Our concern with the current proposals is that they are presented as a standalone solution and there is no indication that Council is grasping this opportunity to rethink the current sanitation and sewerage system. As we have outlined in this submission, there is a lot of mahi that needs to be done to be in a position where we can adopt a decentralised, source-separated sanitation system and this mahi needs to be properly prioritised and funded or it will never happen. Again, we recognise the urgency of dealing with the sludge problem that is upon us, but urge council to at least start to consider the need for source separation and decentralised sewerage systems like composting toilets that can be developed, trialled and implemented alongside the current proposal, and allocate funding accordingly. It's a long term view, but we think we've got to start somewhere. Poo

**Q19. Do you support the proposed budget?**

I somewhat support the proposed budget.

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

not answered

## **Poo Breakfast Club submission to Wellington City Council Long-term Plan 2021-2031**

We support the Council's decision to invest in a digester and thermal dryer to reduce the volume (and emissions) of sewage sludge going to landfill. We primarily support this proposal if it means the Southern Landfill extension will be reconsidered, and also for the opportunities it unlocks to accelerate waste minimisation activities. The consent requirements of mixing four parts general waste with one part sludge has been a huge roadblock for our city's waste minimisation goals, and we know there is a huge appetite to see action on this both within the waste sector and amongst the general public. We fully support the joint submission of local zero waste advocates on areas of focus for waste minimisation activities and the development of a zero waste strategy for the city.

However, we do not believe that this particular piece of infrastructure is the ultimate solution for how we manage sewage and human waste. This system buys time for Wellington to get on with a zero waste plan, but in the longer term there are a number of drawbacks with this investment. In essence, this a 'bottom of the pipe' solution, in the sense that it simply tacks on an extra process to the end of a system which itself is highly problematic. The current network of pipes feeding a small number of centralised wastewater treatment facilities has become increasingly complex, costly and vulnerable.

The most promising alternative systems we have encountered are **decentralised, source separated approaches to sewage and wastewater** (see references for further info). These are 'top of the pipe' or even better 'no-pipe' solutions and their application could fundamentally reshape how our city thinks about the sustainability and resilience of our sanitation systems. We recognise the current system needs to remain functional and to some extent be improved, but recommend that now is the time to invest in R&D, develop strategic plans and carry out feasibility studies for a more sustainable and resilient wastewater system. The 50 years 'bought' by the digester and thermal dryer is not a very long time to fundamentally reshape our city's wastewater infrastructure. If we don't start now, it will be too late.

The most well-known and basic example of a decentralised, source-separated system is a waterless 'composting toilet'. While rudimentary composting toilets, consisting of a bucket with a toilet seat on top (to which straw and wood chips are added), are common, there is a lot of innovation happening in this area, and there are a range of different models and systems that can work for different circumstances, different populations, different levels of separation and processing of waste streams. There have been trials of composting toilets and other source-separated solutions for apartment blocks, university and school buildings, and even entire towns in parts of North America, Europe, China, Australia and elsewhere. However, this is also a very underexplored and understudied approach to managing human waste in an urban context and will need careful and thorough research, planning and testing before implementation.

### **Key issues that decentralised, source-separated systems would address**

**Contamination:** Mixing human waste with other sources of greywater results in a contaminated sludge. Contaminants include a range of toxic pollutants (heavy metals and other micropollutants) from industrial chemicals, paints, personal care/cosmetic products,

and microplastics (which themselves attract and absorb other toxins to them). Many of these contaminants are extremely difficult if not impossible to remove. The Council has suggested that future 'reuse' of the sludge may be possible with the new hydrolysis and thermal dryer facility - which most likely would be treatment and application of biosolids to land. However, there are several alarming studies globally that have shown that microplastic contamination of soil resulting from biosolids being applied is a serious issue with unknown consequences.

On the other hand, the purpose of source-separated sanitation is to **keep human waste separate** and therefore uncontaminated (aside from pharmaceuticals). For composting toilets, if they are managed and processed well the resulting compost can be applied to land safely. In fact, source-separation means the valuable nutrients within human excreta, including urine, can be used for fertilising and replenishing soils, rather than being made unusable by contamination with pollutants.

**Resilience:** Sewage and sanitation systems have huge resilience issues. A large earthquake in Wellington would seriously compromise our primary sanitation system. Climate change will likely also create water insecurity, fundamentally impacting operation of the wastewater network.

Water consumption in our region is comparatively high relative to our population. With Wellington's projected population growth to 2050, meeting these same water needs poses substantial challenges and costs. Alongside other unsustainably high and wasteful uses of water, the current sewerage system is very water intensive and contaminates a large amount of potable water – and the pressure on this system is going to get worse in the coming years and decades.

Composting toilets – which are sometimes called dry toilets – don't require water at all. This means they can function well in a disaster scenario where water infrastructure is damaged, and would help preserve water for essential use in both emergencies and in times of water scarcity. The successful emergency composting toilet trial conducted by WREMO in 2012/2013 proved the viability of even a very basic composting toilet system in Wellington.

**Cost:** The current centralised sewage treatment proposal is expensive in itself and does not address the ongoing and increasing costs of maintaining, repairing and replacing pipes and other aspects of the current sewerage infrastructure over the long term – even without an earthquake scenario complicating things. In fact, the current proposals have the potential to create a lock-in effect that binds us to this problematic system of sanitation. On the other hand, basic composting toilet systems can be extremely cheap, easy to set up and maintain. While overall costs in a medium- to long-term transitional period would likely be high because of the need for investment in two systems, the alternative model could take the pressure off the existing sewerage system with sufficient uptake over time.

### **Key barriers to implementing source-separated sanitation**

Given the range of emerging technologies for decentralised, source-separated management of human waste, there are many unknown barriers and issues that will need to be worked through. Specifically for composting toilets, there are three key barriers to making them a practical solution for urban sanitation in Aotearoa New Zealand.

- The Building Code requires connection to water mains. This doesn't necessarily prevent composting toilets to be used as a secondary toilet, but will have implications for new developments.
- Genuine public health concerns with composting toilet usage that health authorities are hesitant about, such as ensuring that disease causing pathogens are eliminated during the composting process, and how and where to dispose of the compost (e.g. on site or collection and processing at an offsite facility). The entire process from toilet to soil needs to be well managed and monitored to ensure it is safe.
- Overcoming public perception that composting toilets are dirty, smelly and unhygienic.

On top of this, while Greater Wellington Regional Council permits composting toilets in general (provided certain criteria are met), it requires the effluent stay on the property where the toilet is located. This adds an additional barrier to the possibility of collection and offsite processing.

For some iwi and hapū, disposing of human waste to land may be preferable to disposing of it in water. However, the tikanga of such systems will still need to be worked through to ensure any alternative system is acceptable to mana whenua. Appropriate end uses for humanure must also be guided by tikanga.

There are examples of successful composting toilet systems to learn from in rural parts of NZ (Camp Glenorchy, Jester House, Okere Falls Store and countless private residences, as well as some festivals, such as Splore) and around the world – and they have been shown to work very well if managed correctly at a small scale. Compost toilets have also been implemented successfully in developing countries where wastewater infrastructure is very limited or non-existent. There have only been a handful of trials in urban areas of developed countries with mixed success, so the experience and knowledge is limited. Sustainable Coastlines HQ building in Central Auckland, known as the Flagship, has composting toilets and would be an interesting case study to investigate.

Some of the members of our PBC are very keen to support the development of a pilot project trialling source-separated systems including composting toilets in urban areas in Wellington. The first step would likely be a feasibility study to look into the barriers we've just mentioned and find the safest and most workable solutions. There is also rapidly increasing interest in and studies being conducted on these systems globally from the perspective of eventually creating an urban sanitation infrastructure that is environmentally beneficial as opposed to harmful, highly resilient in times of disaster, responds to water scarcity, and also more economical and simpler to run and maintain alongside other waste reduction activities in the community.

To summarise, we support the Council's proposal to address Wellington's current sludge to landfill problem, provided it is tied to a commitment not to extend the Southern Landfill, and provided that it is understood as a temporary solution that buys us time to investigate, develop and implement a more sustainable solution for managing human waste and biosolids.

Our concern with the current proposals is that they are presented as a standalone solution and there is no indication that Council is grasping this opportunity to rethink the current

sanitation and sewerage system. As we have outlined in this submission, there is a lot of mahi that needs to be done to be in a position where we can adopt a decentralised, source-separated sanitation system and this mahi needs to be properly prioritised and funded or it will never happen. Again, we recognise the urgency of dealing with the sludge problem that is upon us, but urge council to at least start to consider the need for source separation and decentralised sewerage systems like composting toilets that can be developed, trialled and implemented alongside the current proposal, and allocate funding accordingly. It's a long term view, but we think we've got to start somewhere.

The Poo Breakfast Club is a diverse group of individuals who have been meeting since late winter 2020 to discuss the future of Wellington's sewage management. Our initial purpose was to discuss and devise solutions to prevent sewage from being sent to the Southern Landfill in order to halt the landfill extension and enable progress on the city's waste minimisation goals. Now that the Council is likely to build the hydrolysis and thermal dryer facility, we have shifted our focus also to consider how to build a more environmentally sustainable and resilient wastewater system.

Our members include community and residents advocates, engineers, waste minimisation consultants, professional composters, public servants and more.

## **Submission on the Council's 10 Year Plan for 2021-31**

### **Overview**

The Council's Long Term Plan indicates that it has number of very large expensive issues in front of it. From a financial viewpoint, the Council's Plan shows a high level of financial over commitment and is not well phased to minimize financial impact on the ratepayer. The result is a massive rise in rates for annual ratepayers for 2020/21 (an average increase of 13.5%) as well as a high level of rate increases over the next 9 years.

The 10 Year Plan contains no information about cost savings that the Council has saved or will save from the preparation of the 10 Year Plan. The overall look is that of a plan that is cost plus and no cost savings. There is no indication that there has been a zero-based line by line review of each Council manager's operating expense and capital expenditure budgets looking for cost savings that would reduce the rise in rates for the city's ratepayers.

My comments on the eight big decisions in the Long Term Plan place a focus on how to try and reduce the rates rise for ratepayers.

### **1. Investment in Three Waters Infrastructure**

I don't support any of the options put forward by the Council at this stage. My reason for taking this view is that the Council has based its expenditure decisions, according to the Auditor General's qualified audit opinion, on the age of the pipes rather than the condition of the pipes. The potential here for the Council to incur deadweight costs (expenditure of no value to the ratepayer because an aged pipe may be in good condition and not need replacing) could be very significant. There is potential here to avoid significant unnecessary expenditure in the planned \$2.4 billion programme under Option 2. Obviously, this could have consequential benefits to ratepayers in reducing the level of rate rises over the next 10 years.

As an alternative way of progressing the Three Waters Infrastructure improvement programme, I suggest the following:

- a) There needs to be a common understanding within the Council (i.e. between councillors, management and staff) that Three Waters Infrastructure work is **core** infrastructure work. I note that nowhere in the 10 Year Plan is the Three Waters Infrastructure work described as **core** infrastructure work. Nowhere!! What this means in practice is that the budgets for maintaining, replacing and upgrading this critical core infrastructure should not be seen as optional budgets that can be cut

and replaced by nice to have initiatives that are neither critical nor core requirements.

- b) Wellington Waters, as a regional company, has been responsible for Three Waters Infrastructure since 2014. It is very surprising that, in all that time since 2014, they do not seem to have carried out asset condition monitoring for its pipe network.
- c) In best practice organisations, budgets for maintaining, replacing and upgrading assets are based on information on each asset's condition from an asset condition monitoring system. That information is then used to prioritize work from the most urgent to the least urgent to form the work programme for each asset. With the information currently held by Wellington Waters and the Council, it is planning its pipe network asset management work programme using an information vacuum.
- d) The need for an asset condition monitoring system to store up to date timely information about the state of Wellington's pipe network on an ongoing basis should be the top priority for the Council to manage successfully its Three Waters Infrastructure pipe network.
- e) The second priority is to carry out monitoring reviews of pipes in Wellington's pipe network that are considered to be at high risk of failing and getting a comfort level, or otherwise, as to the condition of those pipes. Budget requirements for annual business plans and other plans, such as the 10 Year Plan, should follow from those condition assessments of those pipes.
- f) Given that Wellington's Three Waters Infrastructure is core infrastructure for the city I believe this critical part of Wellington's core infrastructure should not be serviced by Wellington Waters going forward. The latter organization does not provide the necessary confidence that they are completely on top of servicing this critical piece of the city's core infrastructure.
- g) Instead, I consider the Council should move its Three Waters Infrastructure function from Wellington Waters to an in-house operation. That in-house operation would be led by a team of dedicated engineers who would carry out the monitoring and planning for the city's Three Water Infrastructure work programmes. This would ensure that the Three Waters Infrastructure was treated by the Council as critical and core work for the city. It would massively improve the focus on the city's pipe network and also help to improve the Council's institutional knowledge about this critical infrastructure for the city. Also, accountability and control should be much stronger under this organizational arrangement.
- h) I note that there will be a requirement for a very high level of integrated planning between the plans for the city's Three Waters Infrastructure and its Draft Spatial Plan.

- i) For the reasons set out above under f), g) and h) above, I believe the Council should opt out of the Government's planned new water service delivery vehicle if one is offered for the Wellington region.
- j) When the Council's Draft Spatial Plan is finalized it should ensure that its Three Waters Infrastructure work programmes and budgets are allocated to those areas, throughout the city, that the Council has earmarked to absorb the city's population growth. It is fundamental that those population growth areas have an adequate, safe, continuous, reliable and resilient Three Waters Infrastructure pipe network.

## **2. Wastewater Laterals**

The Council's preferred option (Option 2 – Take Ownership) is supported. Although it is not a priority item, it has a small effect on the rates increase for ratepayers.

## **3. Cycleways**

The Council's Draft Spatial Plan envisages that in the areas that are earmarked to absorb the city's population growth there will be limited car parking facilities for residents living in new high density accommodation buildings. There is a disconnect in the 10 Year Plan between the provision of cycleways and those areas that are earmarked to absorb the city's population growth. For example, in the 10 Year Plan Johnsonville is earmarked for cycleways somewhere between Years 3 and 10 and yet under the Draft Spatial Plan it is earmarked for immediate considerable population growth via high density accommodation buildings. This planning is not congruent.

**NONE** of the above comments should be misconstrued as support for the Draft Spatial Plan's intentions regarding high density accommodation buildings for Johnsonville.

In summary then, I completely support safe cycleways for cyclists but consider the cycleway options need re-visiting by the Council to better connect population growth areas with new cycleways.

## **4. Climate Change**

I support the thrust of Option 1 (Low Level of Funding) but have doubts about the wisdom of replacing all of the Council's vehicle fleet with EV vehicles. I am surprised that replacement with hybrid vehicles was not an option presented with the other options in the 10 Year Plan.

Hybrid vehicles can deliver around 40% reduction in CO<sub>2</sub> emissions relative to non-hybrid vehicles and so this reduction is significant. The purchase cost of a hybrid vehicle is noticeably cheaper than an EV vehicle. Hybrid vehicles don't have the battery/charging issues associated with EV vehicles.

I think a better and cheaper option for ratepayers over the next 5 years is to replace the Council's vehicle fleet with hybrid vehicles. This would give the Council the time to see if EV

vehicle costs get lower and to see if the battery charging technology improves considerably as it needs to do so.

The hybrid vehicle option would require less capital expenditure than the EV vehicle option and therefore is cheaper, from that perspective, for ratepayers.

#### **5. Te Ngakau Civic Precinct – Council Office Buildings**

I support the Council's preferred option (Option 1 – Demolish and site developed through a long term ground lease) because it's effect on rates and the ratepayer is minimal assuming the future lease cost assumptions are correct.

#### **6. Central Library**

I do not support the Council's preferred option (Option 1 – Strengthen now by temporarily exceeding the debt limit).

I cannot understand why the Council, at a time when it is severely challenged from a financial perspective, favoured a strengthening proposal for the Central Library at just below \$200 million over a new library which was originally estimated to cost only \$120 million. I understand the cost of the new, fabulous library in Christchurch was only \$120 million and I note that Christchurch, population wise, is the 2<sup>nd</sup> largest city in New Zealand. It seems that the city's ratepayers are going to have to pay a completely unnecessary and avoidable extra cost of around \$60 million in order to preserve some architectural heritage associated with the existing Central Library.

This is the sort of financial largess in the 10 Year Plan that should be removed from the plan with a consequential reduction in the rates rises planned for ratepayers.

#### **7. Sludge and Waste Minimization**

I support the Council's preferred option (Option 4 – Sludge minimization through alternate funding). The problem this programme is trying to address appears to be better understood than some of the huge funding requirements set out under the Council's Three Waters Infrastructure programme.

In relation to the \$70 to \$100 per residential ratepayer, I assume that this rate of repayment is linked to the life of the asset and not to the term of the loan. If it is not, it should be.

I note that a \$100 payment per residential ratepayer paying rates of \$3,900 per annum (on a property with a capital value of \$900,000) represents a 2.56% increase in rates for this single line item alone.

#### **8. City Housing Financial Sustainability**

This area is clearly a financial mess with financial operating deficits forecast and insolvency forecast from June 2023 for City Housing.

It is crystal clear that the Deed of Grant that the Council signed with Central Government in 2007 did not have enough financial safeguards in it to protect the ratepayer from having to fund the function of Wellington Council being a social housing provider. Going forward this will not be fair on Wellington ratepayers. This is because the Wellington ratepayer will have to pay twice to provide social housing: once as a taxpayer, and then again as a Wellington ratepayer.

I understand the Auckland City Council, the largest city council in New Zealand, has exited the social housing provider function.

The Wellington City Council should either:

- a) Exit the Deed of Grant, unilaterally if necessary, or
- b) Renegotiate the Deed of Grant so that the Wellington ratepayer is protected from having to finance the social housing provider function.

### **Conclusion**

The Wellington City Council needs to, on behalf of it's ratepayers, severely prune the expenditure levels set out in this plan as per advice set out above. At the very least the Council should provide a report to all ratepayers on the significant reductions in expenditure levels following feedback received from the submissions on it's 10 Year Plan.

Your sincerely,

Warren Taylor

--	--

**Q17. Your comments on the big decisions (optional)**

● The WCC is proposing a major increase in its spending, even though many residents are struggling financially. ● The long term plan proposes major investment in cycling (the 4th most used mode) yet there is no investment in bus lanes to get out buses out of traffic gridlock. Buses are the major alternative mode to driving for North Wellington yet the WCC has no targeted investment in this key area. ● Under Investing in more Cycleways, from the information provided, it appears that the "Option 2. Medium investment programme (\$39m capital investment)" is still a major investment to improve cycling in those parts of the city that cycle (Johnsonville is not a beneficiary). Spending another \$80 million, given the large rates increase, is not good value for money. As such, JCA chooses the least expensive option that still provides some cycling safety benefits. ● Under Te Atakura First to Zero, from the information provided, it appears that the "Option 1. Low level of funding (\$18.1m investment)" is still a major investment to reduce our emissions. Spending another \$10 million, given the large rates increase, is not good value for money. As such, JCA chooses the least expensive option that still provides some environmental benefits. It is also noted that, apart from putting some unspecified amount of funding into public transport and roading, the proposed initiatives are all "soft" unmeasurable goals. The council has failed to link Te Atakura expenditure to specific climate change outcomes. ● Under Reducing sewage sludge and waste, the council's preferred option of a mandatory "levy" is just a way to charge ratepayers without making it part of the rates package i.e. a small means by which WCC can look to limit the number of increases. Excluding this proposed compulsory charge to all ratepayers from statements about future rate increases is very misleading. ● Johnsonville is designated as a sub-regional centre and is planned to be the area with the largest population growth yet there is little supporting investment in expanding and improving our infrastructure and facilities in the LTP.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

● The WCC is proposing a major increase in its spending, even though many residents are struggling financially. ● Johnsonville residents are being asked for a major increase in their contribution to the city. The need for catch-up investment in three waters infrastructure is obvious and supported. However, a lot of our rates are to go towards other improvements in the CBD and other parts of the city. ● Johnsonville is designated as a sub-regional centre and is also planned to be the area with the largest population growth. Yet there is little supporting investment in expanding and improving our bus PT, infrastructure and facilities in the WCC LTP. ● The WCC LTP proposes major investment in cycling (the 4th most used mode) yet there is no investment in bus lanes to get out buses out of traffic gridlock. Buses are the major alternative mode to driving for North Wellington yet the WCC has no targeted investment in this key area. It is understood that there is some investment proposed in Lets Get Wellington Moving but the JCA has no little that this programme will ever deliver the benefits of better PT services to our area.

- Q5. **Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?** Yes
- Q6. **If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer?** Oral Hearing (formal hearing with set times to speak to full Council, 5mins per individual, 10mins per organisation)
- Q7. **Oral forum time** not answered
- Q8. **Oral hearing time** Afternoon
- Q9. **Which of these options do you prefer? (3 waters decision)** Option 1. Maintain current funding level (\$2.0bn investment - lower rates and debt).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** Option 2. Take ownership (Council's preferred option, \$32m investment).
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 1. Finish started projects (\$29m capital investment, lower debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** None of these options.
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** Option 4. Sell to support development (no debt or rates impact)
- Q14. **Which of these options do you prefer? (Central Library decision)** None of these options.
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 1. No change in current practice (no change to investment, rates or debt).

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library  
Te Ngākau funding for future work

**Q17. Your comments on the big decisions (optional)**

Investment in three waters infrastructure: There is something fundamentally wrong with your accounting. You have stated that the replacement value (NOT the depreciated accounting value) is \$3.9bn. The small range of options you propose are between \$2.0 and \$3.3bn. This means you propose replacing between 51% and 85% of the network assets over 10 years. The average life of the assets should be at least 50 years (components such as pumps would be less, and pipes and civil structures far more). A very rough guess for a 10 year plan would be to replace 20% because average life is 50 years, another 20% because of your decades of neglect, and another say 10% for growth over 10 years. That comes to 50%, or \$1.95bn. You described \$2bn as a "maintain investment" option as if it is what you are currently doing. It is clear and I support a proper assessment of the existing network, by someone external with expertise, however this must include asset valuations as well as condition. Any significant work (excluding clearly required replacement projects) should be deferred until a proper assessment is available. There is also a major issue with forecasting demand to be used as a basis for planning. The Spatial Plan and related District Plan will lead to substantial increases in demand in the central city and potential localised increases in all of the areas designated for high rise. This demand must be catered for but there is no information yet on what it will be. Cycleways: There are many problems with the cycleway development programme. Fundamentally it is driven by ideologies and not by a real assessment of potential demand and economic value. It is far too high a level of expenditure with little to no return, exacerbated by the poor to desperate financial position the LTP imposes on residents. The track record to date in providing working routes has been very poor. I don't just mean Island Bay, as a cyclist myself based in the northern suburbs cycleways such as Thorndon Quay and central Johnsonville are dangerous and not fit for purpose. The geography and current layout of Wellington makes it unsuitable for dedicated cycleways in all except a few special cases. A different approach is needed, based on expecting cyclists to share the road and making lanes wider and shared central space available for cars overtaking. Climate Change: Again there is a high level of ideology driving this programme, ignoring both financial and scientific issues. There are substantial scientific issues over the details of the real impacts of climate change (not helped by the consistent failure of IPCC projections, largely ignored or denigrated in mainstream media, but that is no excuse for you to spend our money based on populism rather than science). There is also no reason WCC should try to lead the country, that is the job of the government. Why should you spend taxpayer's money introducing or subsidising electric cars, planting more pine trees, imposing more costs on businesses, or other proposed actions, when you are in such a desperate financial situation? You should be strictly limited to projects to mitigate real identified impacts, not "future scenarios" and not ideological concepts. (A simple example: what is the REAL data for sea level rise since 1990?) Central Library: We simply cannot afford this development at present. There are much higher priorities, and the LTP is already well beyond a realistic budget. You need to back out, spend some money improving existing facilities, and incorporate the library into the Civic Square proposals (see below). Another good option would be to convert half or all of the convention centre into the library, as most people know it will not be viable as a convention centre. Te Ngākau funding for future work: Again the reality is that we cannot afford any development at present. There is also an issue that the existing square is just a collection of big buildings, with few resources for people. I strongly support the "sell to support development" option. Developers would see the obvious potential for small scale retail at ground floor level, with apartments and maybe some offices at higher levels. Leave the problem of dealing with existing buildings to them.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

Q19. Do you support the proposed budget?

I strongly oppose the proposed budget.

---

Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?

I support keeping the budget the same but with some changes.

---

Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?

The fundamental problem with the LTP is the lack of financial realism. The resulting budget is far too high a cost for the city. The substantial rates and borrowing increases will cause a lot of hardship within the community, and will substantially impact economic activity. There are also very large upside risks in the current plan, particularly items in the plan but not costed (unknown 3-waters scope, LGWM, social housing, etc), risk of interest rate increases, and risk of capital project overruns. The plan is simply not realistic or sustainable. At the start of the LTP Consultation Document the Council set out its Long Term Strategic Goals, followed by its six priority objectives to focus on in the next three years. I thought these were pretty awful, stacked with buzzwords and promoting the Council's Spatial Plan and other programmes, but haven't commented in detail because such goals are normally there to look good and not relevant to actual plans. However I would like to stress that there is nothing such as carrying out your core functions in the most cost effective manner feasible, balancing the costs of any new developments against the benefits, limiting rates to the minimum necessary, or maintaining a long term sustainable financial position. Surely these should be included, if not at the top. There is a basic problem that there has been a long term trend for WCC (and many other councils) to continuously expand your field of activities. You also look for new sources of revenue and increase borrowing, rather than address operational efficiency. You need to get back to basics, reassess your core functions, and concentrate on managing the core functions efficiently. You need to get rid of the idea of trying to create a city and a population in your idealised image, because it is up to individuals and not you to decide what people most value and also because you are particularly bad at it. I recommend starting again with a substantial review of the Council's current and proposed activities, and developing a plan with capital and operational expenditure forecasts which are far more financially responsible. Even better, get Government and external organisations to help and drive the process.

Cycleways  
Sludge and waste minimisation

---

**Q17. Your comments on the big decisions (optional)**

Cycleways I support Option 4 for Building More Cycleways and want WCC to complete a city-wide cycling network in the next decade. To help support new people into cycling (including children, teenagers, students, older Wellingtonians) we need to provide a connected network of cycleways so that they feel safe. This includes around schools and particularly in currently car dependent areas (eg around Johnsonville and the northern suburbs). I would like to see WCC emulating cities around the world that have reacted quickly and dynamically to reallocate road space to encourage large scale growth in cycling. I support initiatives like the Brooklyn Cycleway trial that is being delivered quickly and smartly. There should be a well-resourced and dedicated fund in place to do this. Cycle way funding should be ring fenced. Also, sea walls should not come out of cycleway funding - only the cycleway on top of them should be accounted for in this way (especially Petone to Ngauranga). Investing in a full network of cycleways (along with more effective public transport) will make our city more liveable, more safe and efficient to get around, improve safety, cut carbon, boost health and productivity, save money, connect people, plus evidence shows that it is good for business. Sewage Sludge I really support investing in the smart solution to process the sewage sludge on site, removing it from landfill which will hopefully enable WCC to readdress the landfill expansion. Thank you to those involved for presenting the information so clearly in the 10 year plan decision document and this web submission form - it makes it very straight forward to participate.

Cycleways  
Sludge and waste minimisation

---

**Q17. Your comments on the big decisions (optional)**

Ambitious cycleways investment surely links to ambitious Te Atakura investment. These go hand in hand in my books! Support phasing out sewage sludge from landfill - I recognise it was a great solution once upon a time but not a practicable long term solution if it goes against our solid waste minimisation aims.

not answered

---

**Q19. Do you support the proposed budget?**

Neutral.

---

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

I support increasing spend in the current budget.

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

I fully support increased spend on public goods / infrastructure, however I am also cognisant that income inequalities are a real issue in Aotearoa NZ - and our city. I trust that Councillors are therefore actively considering how best to safeguard lower-income home owners and ratepayers. (But!! That rationale should not be used as a scapegoat/political fodder to justify inaction or conservative investment in long-term public good; WCC should be able to pursue ambitious climate and infrastructure investment plans while ensuring equitable distribution of costs.)

Investment in three waters infrastructure  
Wastewater laterals  
Cycleways  
Te Atakura (climate change)  
Central Library  
Sludge and waste minimisation  
Te Ngākau funding for future work

---

**Q17. Your comments on the big decisions (optional)**

I think the Council is trying to do too much at the same time. Expecting ratepayers to fund the proposed projects in the way that it is is unrealistic. The impact of a 13.53% one-off with subsequent 5.77% pa on those who are on fixed incomes (such as a benefit or National Super) could well force some people out of their homes into a housing crisis where Council claims there is a shortage of housing. I'd like to see the statistics for this oft-repeated claim, and rather wonder if it's more a case of a shortage of affordable housing than a shortage of accommodation itself. Saying that relief can be applied for is not a solution as it merely defers what then becomes a compounding debt problem for the individual so affected. Individuals who are also affected by rising costs in most other essential areas of their lives. Getting the infrastructure into better shape is essential. It looks as though getting the pipes sorted out would prevent the immediate need to by-pass the pipes for moving sludge. I support Council borrowing to enable this work to be done, and keeping the rates increase to less than 10%. Getting the Te Ngākau Civic precinct back into useable shape is important. What used to be a wonderful focal point for activity is now largely a desolate space in the heart of what I had believed for many years was one of the best cities in the world. I no longer think is the case. I'm deeply disappointed that the decision has been taken to rebuild the existing library and would rather have seen it demolished and a new, more fit-for-purpose-21st century-and-beyond library be developed there instead, and at a fraction of the price. Like the Gordon Wilson flats, seeing it have a Heritage 1 listing slapped on it is a backward rather than progressive step. How did this happen, and what has Council been able to do that could have stopped it, or had the decision reversed? Finish the cycleways that have been started. Please work out a longer term plan for developing the other proposed cycleways. This is a 'nice to do' rather than essential in the immediate future. I don't see the value of the 'first to zero' goal on climate change. Please take a longer term view on this and manage the financial impact of it more carefully and over a longer term. Wastewater laterals: how big a deal is this in reality? The 10-year plan talks about the preferred option meaning not having a rate increase but instead ratepayers will be asked to pay \$70-\$100 pa anyway - that's simply calling a rates increase by another name. If it's considered to be an essential part of the general 3 waters infrastructure, then I support it. Otherwise it's something to be done, but manage it in a longer time frame. The way the information that goes with this consultation document is given and the wording used leaves me deeply mistrustful that we are being given impartial facts on which to base informed decisions but, rather, are being carefully directed to vote in the direction Council wants. I have little to no confidence in this Council. There is a sense that decisions and directions are being taken that reflect personal and political ideologies rather than being the result of impersonal constructive and well thought/well researched civic planning for the Wellington of the future. There appears to be a lack of adequate leadership, and one of the consequences of this appears as a lack of cohesive, well thought through, civic planning. There is certainly no sense of the those elected to Council working as a cooperative group, fully focused in a shared direction, clearly understanding that they are there as representatives of, and therefore fully accountable to, the ratepayers (as well, of course, as meeting their legislative obligations). I don't agree with the extent of the proposed changes to Lambton Quay and Courtney Place - the proposed plan on this seems to be getting pushed through without enough understanding and support from the businesses that exist in these precincts, businesses which are already finding it difficult to survive. David Jones leaving town is a major indicator of the challenges our retailers are facing. While there is evidence that making shopping precincts pedestrian only is good for businesses, and I've seen the evidence of that in different cities around the world, that's not the proposal which Wellington Council has presented and I don't what's on offer as being workable or beneficial. What do our businesses need? What is being done to meet those needs? I'm also wondering whether Council needs to own so much in the way of assets - could leasing, having public/private partnerships, be an avenue that could both save money, and also free the time of both councillors and staff to focus on the facilities and services a city and region really needs.

---

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)** not answered

---

**Q19. Do you support the proposed budget?** I somewhat oppose the proposed budget.

---

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

I support decreasing spend in the current budget.

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

A councillor has told me that the Council is not borrowing to its full capacity. I ask that this be reconsidered, and that the rates increase be brought back into a single figure. Last year Council proposed to its social housing tenants that their income (on which their rent was then based) was to now include any accommodation supplement they received. Such a move would, for many, mean they could no longer afford other necessities of life inc. food, warmth and clothing, and thus be forced out of their social housing home. Where would they then go, given social housing is already the bottom end of what is acceptable in a supposedly 1st world country? Should all social housing be given to the Ministry of Housing and Urban Development? Council fees and charges: 6.2.1. Building Control increases seem somewhat high relative to all other proposed increases. Is there a flat percentage that's being applied, and could it not be lower than what's being proposed? Similarly with 6.2.2 Development Control and Facilitation City wide parking fees at weekends being increased to \$4.50/hour is a killer for being in town on weekends and will impact on retailers. I strongly oppose this. The increase should be no more than the 50 cents that's being applied for weekday parking. I appreciate the opportunity to have my say, and now only trust that the feedback Council receives through this exercise will intelligently inform its reasoning and decision making going forward. Thank you.

Cycleways

Q17. Your comments on the big decisions (optional)

The council has the opportunity to work with the regional and national authorities to implement public transport corridors. These could be used as cycle ways to minimise investment in cycle-specific infrastructure. Implementing a revenue-neutral congestion charge in the inner city will reduce traffic and enable funding for the creation of these corridors and fund additional capacity in the public transport network.

---

Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)

not answered

Q19. Do you support the proposed budget?

I somewhat support the proposed budget.

---

Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?

not answered

---

Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?

Wellington needs a congestion charge to reduce traffic and fund better, cheaper public transport. The current state of reading is untenable and growing worse. Enabling safer cycling and faster, better, cheaper public transport is the only way to address this.

- Q14. **Which of these options do you prefer? (Central Library decision)** Option3. Strengthen now by increasing rates further (additional 1.79% rates increase).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 2. Invest in technology at Southern Landfill (\$86m to \$134m capital investment and higher rates).

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Cycleways

Te Ngākau funding for future work

**Q17. Your comments on the big decisions (optional)**

Cycleways: existing and proposed expenditure on cycleways is totally out of proportion to the community benefits as is the disruption caused to vehicular traffic. Only a tiny fraction of the community can utilise cycleways for productive purposes in Wellington's environment and until some method can be found to make them self-funding and cover their social costs (such as registration fees) expenditure should be curbed. Te Ngākau: it is not appropriate for the WCC to pay for the MOB to be available for the National School of Music. Such provision is a function for the education system and central government.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

I strongly oppose the proposed budget.

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

I support decreasing spend in the current budget.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Rates: a rise of 13+% in residential rates in year 1 is unreasonable and the plan is a failure if the WCC seriously contemplates this level. Proposed expenditure priorities, particularly non-core infrastructure and services, must be re-examined and economised in all categories to reduce the rise. The WCC seems to be taking on functions which should be left to central government and taxes, not to local government and rates.

- Q9. **Which of these options do you prefer? (3 waters decision)** None of these options.
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** Option 2. Take ownership (Council's preferred option, \$32m investment).
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** Option 1. Demolish and site developed through long-term lease (Council's preferred option).
- Q14. **Which of these options do you prefer? (Central Library decision)** Option3. Strengthen now by increasing rates further (additional 1.79% rates increase).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 4. Sludge minimisation through alternate funding (Council's preferred option, \$147m to \$208m capital investment funded through a levy, no additional rates increase)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Wastewater laterals  
Cycleways  
Te Atakura (climate change)  
Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

I support the submissions made by Caroline Arrowsmith, Hannah Blumhardt et al. (<http://therubbishtrip.co.nz/wp-content/uploads/2021/05/Joint-Submission-on-WCC-LTP.pdf>), and the Poo Breakfast Club. My further comments/highlights: Investment in three waters infrastructure: WCC's investment needs to balance addressing urgent issues with gathering data and planning for a different system that will provide long-term resilience, including in the context of projected population growth. I support a shift toward decentralised three waters systems that have much lower water requirements, including composting of uncontaminated biosolids. Wastewater laterals: I support Council taking ownership, to improve maintenance of this part of the system, and facilitate a transition to more resilient and lower-cost systems, as above. Cycleways: If WCC is serious about promoting mode shift, cycling infrastructure needs appropriate prioritising as a mode of transport that is used by more people than private vehicles. I support the suggestions made by Paihikara ki Poneke / Cycle Wellington: 1. Support Option 4 to build a fully-connected network by 2031 2. Prioritise children before seawalls (prioritise school cycling routes higher) 3. Double the Cycling Minor Works Budget to \$2 million per year 4. Create a new dedicated funding category to deliver rapid changes to the urban environment 5. Ring-fence cycling funding Te Atakura: I think the best opportunities of Te Atakura will be found in cross-sectoral work and collaborations between WCC and various communities. Speeding the transition to a circular economy and creating regenerative, resilient local food systems should be key workstreams of Te Atakura. It should have alignment of kaupapa Maori and upholding Te Tiriti at its core. Sludge and waste minimisation: Council's preferred option has enormous potential to enable Wellington to swiftly reduce its waste and transition to a zero waste, regenerative, circular economy. However it is not a long-term solution, and work needs to begin to ensure we have a proper, resilient long-term solution in place in plenty of time before the 50-year life span of the sludge infrastructure is up. Council must now start planning how to effect serious waste minimisation as soon as the interim sludge solution is up and running. Increasing the circularity of our economy presents one of our best prospects for reducing Wellington's carbon emissions. Serious public engagement and education efforts will play a crucial role in this.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

Neutral.

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

I support increasing spend in the current budget.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

6.2.2 Development Control and Facilitation There should be a sliding scale/subsidised options available for non-profit organisations - for example getting consent for community-scale composting operations.

Q21. **Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Wellington City currently lacks a permanent music arts space that is accessible to people of all ages. People who wish to share their mahi who are under 18 have nowhere to show off their creativity. All of the venues in Wellington that cater to live music, such as Meow, San Fran, Valhalla and the like, are licenced venues that do not allow for people under 18 to enjoy live music. Toi Pōneke, while serving as a space for practicing music, does not allow for shows. While the lack of space and viability in the CBD serves as a challenge, I do not accept that the WCC do not have the means to look into such a space outside the CBD, provided there is ample public transport. By providing a space that anyone can access, we are giving our young people something to do, while nourishing their creative energy. We need a space, free of discrimination where we can foster and celebrate our next Lordes, Church and APs, and Benees. If Wellington is the arts and culture capital of Aotearoa, why does this not extend to our youth?

Investment in three waters infrastructure  
Central Library  
Te Ngākau funding for future work

**Q17. Your comments on the big decisions (optional)**

1 - waters -- There are two many unknowns to back the increase in spending on water infrastructure. - why did so many previous councils, and Mayors especially, underinvest and get away with it. An investigation needs to be done on who said or promised what previously. If they promised and didn't do their failings should be a hall of shame to help prevent a repetition. The current blanket - they all did it - is simply lazy and not fully accurate. Some lied more than others. Steps need to taken to investigate how to make councillors accountable in the present time for campaign promises. Central Library - earthquake strengthening will damage the vibe of the library with the removal of the slender columns as they will have to be quadrupled or more in size to be safe. The impact on the sense of space in the building will be huge. Surely we need to go through the process of showing what any strengthened building will actually look like inside versus alternative options of what it could look like inside or alternative designs altogether. You seem to have put the cart before the horse and asked people what to do about the library and they said they wanted their library back. But the reality is strengthening will change the dynamic of the building so people think they are getting their library back but they won't. Go through a more thorough consultation process showing what possible options will look like. Call for plans and models and put the strengthened option up against those other options. Te Ngakau - Redevelopment of civic square after demolition. The concept of selling the land and lease back is imposing a long term cost on wellington rates payers. The demolition concept is a completely separate issue to how to fund the development. It should not be presented to the public within one option . This approach is misleading and deceptive to ratepayers and looks politically motivated or at worse still - corrupt as somebody is lined up to purchase. This

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

There needs to be rates increases on businesses. The changes back in the 90's to shift the rates burden onto residential ratepayers gave the wrong incentive to business to just sit on their land and not use it wisely and go up. The massive increase in desire for accomodation is being held back by the semi-industrial areas being very happy to hold land as single or double story buildings with open car park spaces around them. The large carparks on Te Are flats at the back of victoria street are a poor and negative use of land. High rates would drive these owners to build up to get a bigger return on the land they hold. High rise carparks may come back but more importantly buildings for people should. Rates on business are too low and this holding Wellington back from a people centred future.

No current mention from the 2018 about non-council run Maori and Pasifika major events and festivals in Wellington. This needs to align with the new Arts, Culture & creativity strategy. Neither draft strategies seems to be speaking to each other currently. I would also like the council to stop Wellington houses being listed as heritage status, unable to be fixed or demolished for newer properties.

Wellington City Council needs to review its development contributions policy. This has not changed in more than 5 years and doesn't even increase annually due to inflation etc. By staying the same every year acts as a disincentive for developers to build houses at pace, which could thereby contribute to land banking. Hutt City Council charges considerably more in development contributions, with inflation linked increases annually, and even combined their 2021 long term plan with a change to their development contribution's policy. It is not fair that rate payers have to always shoulder the burden of most development, when it is the developer's who do the best out of relatively small development contributions when compared to many other parts of New Zealand. I would like to see the development contribution's policy reviewed as a matter of priority and am disappointed it was not done concurrently as part of this long term plan consultation.

Central Library

---

Q17. Your comments on the big decisions (optional)

I think whether a central library is needed should be reconsidered on now all costs associated with building works are known. Why not buy a warehouse and use the satellite libraries for pick up or allow people to pay a courier fee for getting books. Surely this would be more cost effective than rebuilding the central library.

---

Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)

Te Ngākau funding for future work

---

**Q17. Your comments on the big decisions (optional)**

Regarding the future of the Council office buildings (decision 5), I indicated above that I support the "base build proposal for public purposes" (option 2). This is my preferred option because it provides for retention of the Municipal Office Building and its heritage values as part of the surrounding heritage precinct, and because it specifically (and with certainty) provides for the National Music Centre and National School of Music. It also obviates the risk of losing building(s) which have merit in terms of contribution to streetscape and character in the area, in favour of an unknown design that may well (I fear is likely to) be of poor/dubious design quality that will then be further compromised by inevitable building cost increases. It is not clear from the consultation document why the obvious hybrid option of demolishing CAB (which I assume is the more modern pink building) and retaining MOB was not considered/included for consultation. I somewhat understand the argument for considering the fate of MOB and CAB together, but I would like to see analysis and costings of this hybrid option.

- Q1. **Full name:** Lachman Prasad
- Q2. **Phone number:** not answered
- Q3. **Are you making this submission as an individual or on behalf of an organisation?** Individual
- Q4. **What organisation are you submitting on behalf of?** not answered
- Q5. **Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?** No
- Q6. **If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer?** not answered
- Q7. **Oral forum time** not answered
- Q8. **Oral hearing time** not answered
- Q9. **Which of these options do you prefer? (3 waters decision)** Option 2. Enhanced investment (\$2.4bn - the Council's preferred option).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** Option 2. Take ownership (Council's preferred option, \$32m investment).
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 1. Finish started projects (\$29m capital investment, lower debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 1. Low level of funding (\$18.1m investment, lower rates and debt).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** Option 4. Sell to support development (no debt or rates impact)
- Q14. **Which of these options do you prefer? (Central Library decision)** None of these options.
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 1. No change in current practice (no change to investment, rates or debt).

Q16. **Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

not answered

---

Q17. **Your comments on the big decisions (optional)**

not answered

---

Q18. **You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

---

Q19. **Do you support the proposed budget?**

I strongly oppose the proposed budget.

---

Q20. **You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

I support decreasing spend in the current budget.

---

Q21. **Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

The Council seems to operate on the assumption that the rate payers are a piggy bank that they can raid!! From the proposed rate rises it would appear that the council is "trading while insolvent". Such debt is irresponsible and the council should mitigate expenses, relook at costs and possible over runs on the projects that would create a greater issues in both the short and long term. Council should look at selling some of its asserts to invest in maintenance of services. New infrastructure should be the responsibility of the government.

- Q1. **Full name:** Andrew Lensen
- Q2. **Phone number:** [REDACTED]
- Q3. **Are you making this submission as an individual or on behalf of an organisation?** Individual
- Q4. **What organisation are you submitting on behalf of?** not answered
- Q5. **Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?** Yes
- Q6. **If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer?** Oral Hearing (formal hearing with set times to speak to full Council, 5mins per individual, 10mins per organisation)
- Q7. **Oral forum time** not answered
- Q8. **Oral hearing time** Evening
- Q9. **Which of these options do you prefer? (3 waters decision)** None of these options.
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** Option 1. No change (no change in investment, rates or debt).
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** None of these options.
- Q14. **Which of these options do you prefer? (Central Library decision)** Option 1. Strengthen now by temporarily exceeding debt limit (Council's preferred option, additional 0.79% to rates).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 4. Sludge minimisation through alternate funding (Council's preferred option, \$147m to \$208m capital investment funded through a levy, no additional rates increase)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Wastewater laterals  
Cycleways  
Te Atakura (climate change)  
Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Water infrastructure needs to be urgently decentralised as part of building a green and resilient city. Having one fully connected water and sewage network, especially when our pipes are so poorly maintained, is archaic and unsustainable. Water should be collected per community, from rainwater, and shared across small neighbourhoods. Wastewater should be dealt with through the use of composting toilets and drainage fields which utilise wetlands and provide for significant biodiversity. Piped streams should be brought back above the ground throughout the city, to provide for our native flora and fauna and to improve mental health and further link nature with urbanism. I agree that we may need to demolish the council office buildings, but I strongly disagree with the idea of the council leasing new buildings from a private company. Public assets should be owned by the public - even if it means a rate overrun or need for central government loans/assistance in the short-to-medium term. We must own our own buildings! There are too many examples of leases going wrong and/or governments losing significant money over the long term to capitalistic 1-percenters. Cycleways, among other forms of active transport, must be urgently prioritised. No road funding for new or improved roads can be justified, as the literature shows this directly increases our emissions, congestion, and decreases our physical and mental wellbeing. Driving should become a rare occurrence (in exceptional circumstances), with active and public transport allowing us to move around a clean and safe city. You must go beyond Option 4, and approve mass construction of separated cycleways and pedestrian walkways, while significantly decreasing the number of lanes and roads. Cities are for people - not cars!

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

I somewhat oppose the proposed budget.

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

I support increasing spend in the current budget.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

not answered

- Q5. **Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?** Yes
- Q6. **If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer?** Oral forum (informal, 60min facilitated table discussion with 2 to 3 Councillors and other submitters)
- Q7. **Oral forum time** Evening
- Q8. **Oral hearing time** not answered
- Q9. **Which of these options do you prefer? (3 waters decision)** Option 1. Maintain current funding level (\$2.0bn investment - lower rates and debt).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** Option 1. No change (no change in investment, rates or debt).
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 2. Medium investment programme (\$39m capital investment, lower debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** None of these options.
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** Option 1. Demolish and site developed through long-term lease (Council's preferred option).
- Q14. **Which of these options do you prefer? (Central Library decision)** None of these options.
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 4. Sludge minimisation through alternate funding (Council's preferred option, \$147m to \$208m capital investment funded through a levy, no additional rates increase)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Cycleways  
Te Atakura (climate change)  
Central Library  
Te Ngākau funding for future work

**Q17. Your comments on the big decisions (optional)**

I have included a document below (16) that expresses both my concerns and ideas about the areas I've selected above (14). I have invested a huge amount of time and energy into this document and would appreciate it being read and my ideas considered. There are two main underlying points I am trying to get across in my document: 1. An opportunity and full potential will be missed by not having an overarching Urban Design Plan linking both The Long Term Plan and Let's Get Wellington Moving (LGWM) ideas together. 2. I urgently want to see Skateboard facilities and the experience provided for skateboarders drastically improved in Wellington City by: - Upgrading Waitangi Park so it meets current Olympic standards, and can hold local, regional, national, and Olympic qualifying events - Creating a central city 'Skate Friendly Street Plaza' and including skate-able features in future urban projects While the first part of my document relates to LGWM it is still connected and rooted in The Long-Term Plan. Please Read my whole document. The second part of my document (Page 9 onward) pertains to the areas of the Long-Term Plan mentioned above. Particularly in regards to Skateboarding and the connection to Cycleways, Te Ngākau (Civic Center) and the Central Library. I argue that skateboarding should, and could be included in these developments for no extra cost. Page 9 of my document highlights how an opportunity is being missed to include and integrate other diverse forms of human-powered, sustainable forms of transport (Skateboarding for example) into Cycleways Page 14 onward addresses how Skateboarding could restore vibrancy into the city by reintegrated it back into the fabric of the city through creating a number of 'Skate-friendly' urban designed public spaces spread out around the city (Just like in other famous/vibrant cities around the world such as Barcelona, Paris, London, New York, Melbourne, Copenhagen, Berlin, and Auckland as examples). Again this doesn't have to be hugely costly exercise and would add many benefits which I hope I will have the opportunity to share.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

**Q19. Do you support the proposed budget?**

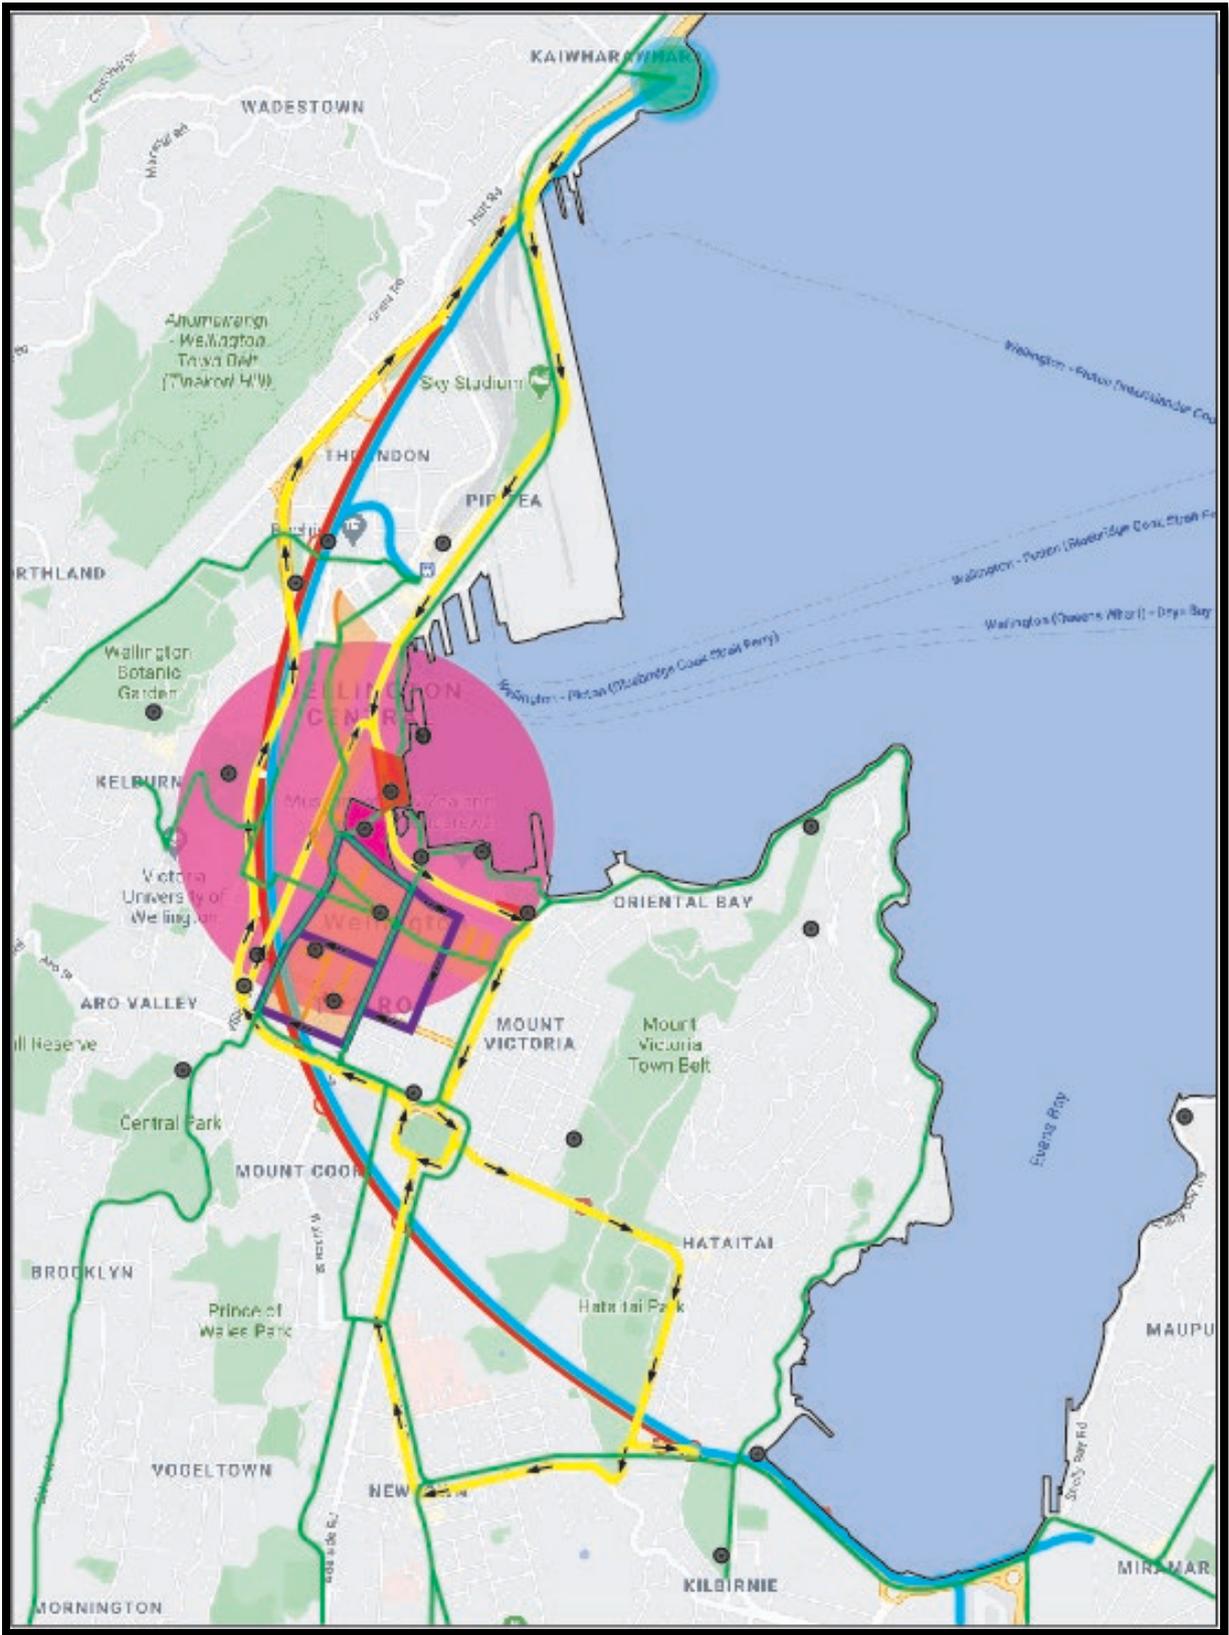

Neutral.

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

Don't know.

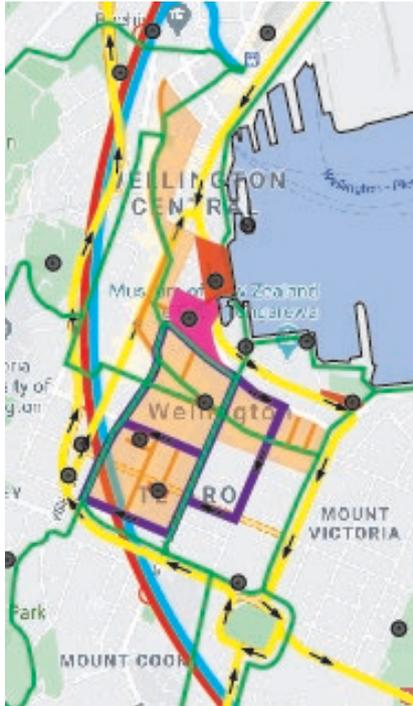

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Please see my Comments on Question 15

# City Urban Design Proposal, and Feedback on Wellingtons 10-Year Plan and Let's Get Wellington Moving Plans

By Kevin Francis 15/04/2021

## INTRODUCTION

The Wellington City Council and the Lets Ge Wellington Moving (LGWM) group are currently in the midst of making major decisions about the future of Wellington City. These decisions will reshape both the landscape and vibrancy of the city for many generations to come.

The combined cost of all these separate projects runs into billions of dollars and will cover large areas of the central city. Three different groups are in charge of overseeing and making a plan that will ensure these projects are a success. They are Waka Kotahi NZ Transport Agency, Wellington City Council, and the Greater Wellington Regional Council.

With billions of dollars being spent and the sheer scale and scope of all these projects combined, there is huge potential to rebuild Wellington into a vibrant, sustainable city of the future that could benefit further by being both an example and a leader for other cities around the world to follow.

However, the success, benefits and full potential of these projects may never be reached for two main reasons. Firstly, as each one of these projects are seemingly being developed, and approached separately as individual projects, the huge potential and benefits for linking all projects and budgets together under an overarching plan is being missed. This approach is short-sighted and the equivalent of using band aids to fix a much bigger problem.

A brief example of how connecting projects together under a master plan could compliment and flow together is: The Civic Square redevelopment could be linked with the Frank Kitts Park redevelopment and the LGWMs new transport plan. This could lead to creating a cut and cover tunnel running the length of Frank Kitts Park and Civic Centre. Positives would: allow for car traffic to flow freely along the waterfront while creating more open space in the heart of the city; and providing inviting, easy access from the CBD (Golden Mile) and The Civic centre directly to the waterfront (Wellingtons biggest asset). Another example that could restore vibrancy to the city is by combining both the proposed 'Bike Lanes', 'Car free inner city streets' and 'Public Spaces/Skateboarding/Scootering'. Rather than just 'bikelanes' a bigger idea that is more inclusive could include other alternative user-groups, communities, and modes of transportation such as skateboarders, longboarders, rollerskaters, rollerbladers, and scooters etc.

The second reason the success, benefits and full potential of these projects may never be reached is because neither Waka Kotahi NZ Transport Agency, the Wellington City Council, Greater Wellington Regional Council or the LGWM seem to be working together (A)(B).

It is greatly concerning that it seems no one is connecting the dots and is able talking about the bigger picture. Failure to realise this opportunity will mean the full potential and possibilities to completely redesign Wellington into a vibrant and sustainable city (that sets the precedent for future cities) will be missed.

It is highly likely the opportunity to transform the city on such a large and grand scale will never come around again. Certainly not in our children's, or our grandchildren's lifetime.

## The Solution and Benefits

These concerns and issues could be overcome through employing an 'Urban Design' team with the experience to link all these different ideas and projects together.

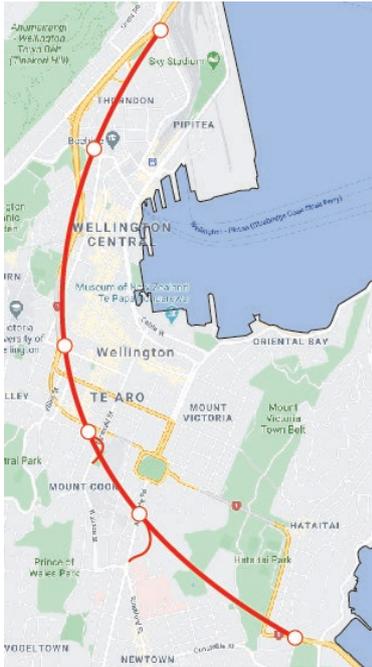

An obvious example to use would be 'Isthmus' which already has experience working with the Wellington City Council on the walking and biking paths connecting Miramar to Oriental Parade and has been leading other projects connected to the wider Wellington Region such as "Ngā Ūranga ki Pito-one project that will deliver a step-change for cycling and walking between Wellington and Lower Hutt", and "RiverLink is a partnership between Greater Wellington Regional Council, Hutt City Council, and Waka Kotahi NZ Transport Agency" (<https://isthmus.co.nz/journal/>).

Just a few other projects where Isthmus has been instrumental includes: creating Invercargill's City Centre Masterplan; Te Ahu a Turanga "Manawatū Tararua Highway will create 11.5km of new highway between Ashhurst and Woodville, including six new bridges and structures and the planting of over 2 million trees and shrubs" which has just won the prestigious NZPI Best Practice National Award for excellence in consultation and participation from the New Zealand Planning Institute. It makes perfect sense that Isthmus has both the experience and values needed to ensure everyone is consulted, listened to and heard ensuring each and every one of these projects are a success.

Some ideas about different projects connected to the central city and wider region include:

- Removing cars from The Golden Mile and Central City Streets
- Building a Network of Bike Lanes (Evans Bay Cycleway etc)
- The Hutt River Link
- Ngā Ūranga ki Pito-One shared path
- A second Mount Victoria Tunnel
- A new central city public transport system
- Frank Kitts Park redevelopment
- Redeveloping Te Ngākau-Civic Square
- Repairing the central Library
- Demolishing and rebuilding new municipal council office buildings
- Developing Te Aro Park
- Restore vibrancy to the central city
- as well as creating more creative public spaces that will bring vibrancy and creative energy back to the heart of the city
- Making the city friendly for other diverse and creative user groups such as skateboarders, longboarders, rollerskaters, rollerbladers, scooters, free running (parkour), hacky sackers, artists, and musicians

Currently there is no system in place that creates an opportunity for wider ideas and possibilities to be heard and considered by members of the public.

## Tunnel Bypass (Option 1)

The biggest concern I have regarding Lets Get Wellington Moving (LGWM) is the plan to build a second Mt Victoria tunnel. While I agree that a second tunnel is necessary, I would argue that only having it go through Mt Victoria is extremely short sighted.

The biggest problem with Wellington City's traffic is the inner-city congestion. While there are many factors at play here including: areas where two lanes merge into one (entrances to the Terrace tunnel and Mt Victoria tunnel); slow moving traffic caused by multiply sets of traffic lights; the biggest problem occurs where the traffic flow of people zigzagging across the city has to merge with or crosses the path of people trying to get through the city to reach both essential parts of Wellington such as: the airport and hospital), or popular entertainment, recreational and sporting areas such as: the Weta Cave; the Zoo, the southern coast (surfers/beach goers etc); and sports centres, fields and swimming pools in Kilbirnie and

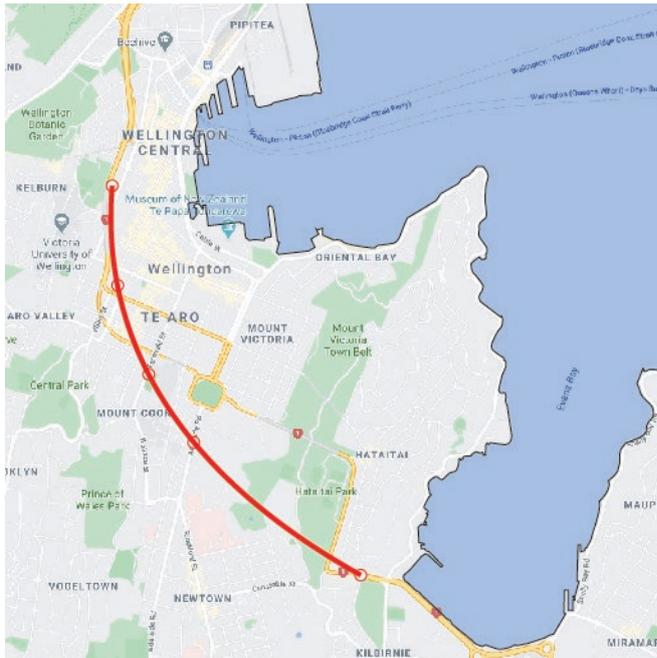

Island Bay. These are just a few examples.

It cannot be ignored that future plans and developments at the Southern side of the city such as: residential development at Shelly Bay; Lyall bay/Island Bay parks; Kilbirnie sports field and recreational centre; a future airport expansion; and a growing population is going to greatly contribute to amount of traffic heading to this area of the city. While it is vital to have a network of safe pathways for foot traffic and other diverse transport users (bikes/scooters/skateboarders etc), it is impractical to think that somebody coming from the wider Wellington area to go to a the surf beaches, Lyall Bay Retail Park, Weta Cave, the Zoo, the airport, or hospital etc are going to either 'ride a bike all the way there' or pay the huge cost of parking centrally and then using public transport.

I have been driven to speak up due to not having heard anyone else raise these issues in relation to a new tunnel that only goes through Mt Victoria and how the same problem will still exist where traffic traveling across town is running into traffic trying to get through town. *The obvious solution that no one is mentioning is building a tunnel that will 'bypass' the city completely.* I cannot believe that no one sees this? mention that the tunnel

The biggest failure I see with LGWM is not building a second tunnel that creates a direct route under the city to the airport (with key strategic exits). This tunnel could potentially start in Thorndon then arc up through key parts of the city (Upper Terrace, Te Aro, Mount Cook, Newtown Hospital) and finally coming out at the sky needle in Kilbirnie. I have worked out this would = 5.73km of tunnel, which in comparison is still less than Auckland's 2.4km Waterview Tunnel (\$1.4 billion), and 3.45km twin-tunnel Auckland City Rail Link project (totalling \$4.419 billion) combined. That is still less than the 6.4 billion Wellington transport plan currently on the table.

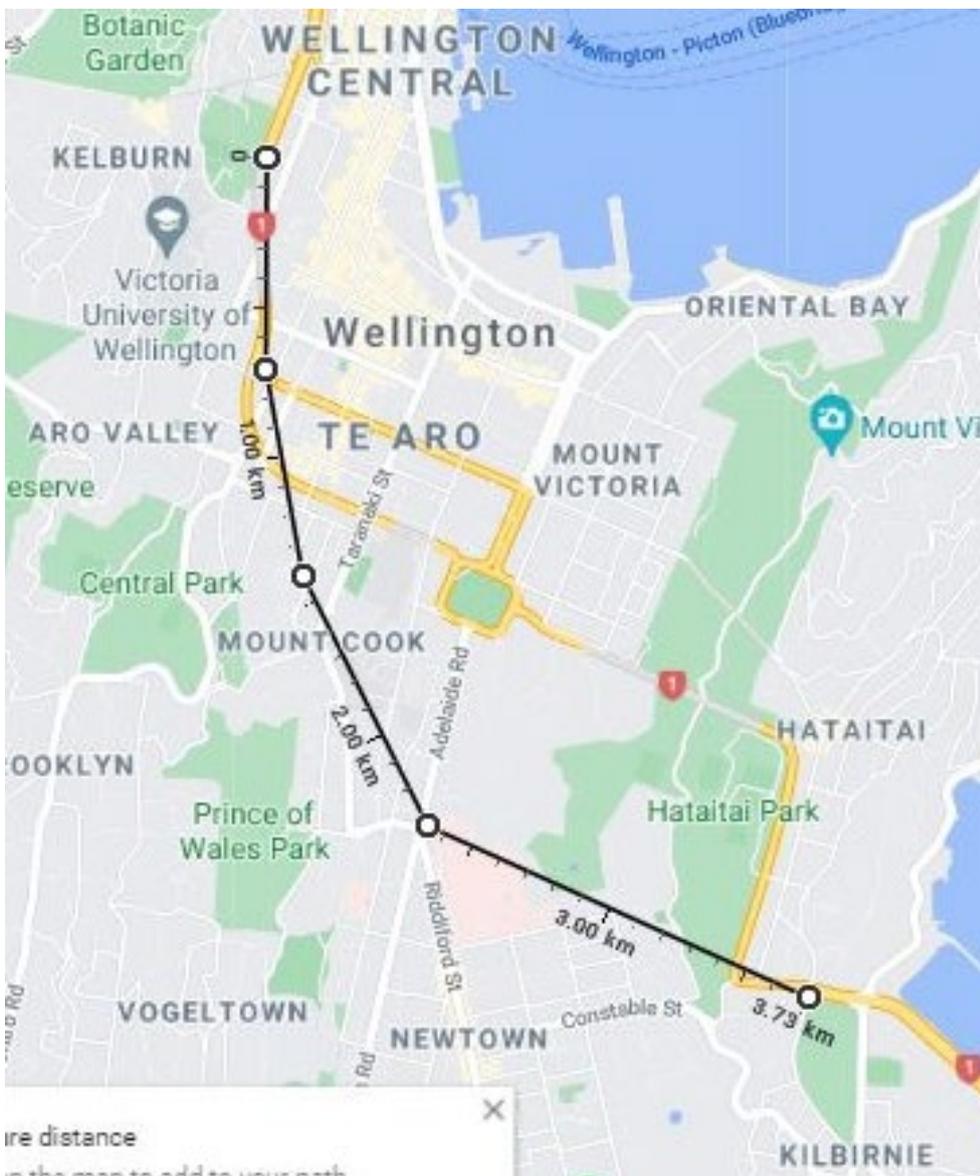

This would solve a lot of issues both short and long term, and combined with creating both a new transport-loop around the city (see below), a new public transport line (also below), and a connection of alternative transport routes (bikes/scooters/skateboarders etc), it would make Wellington a well prepared city for the future.

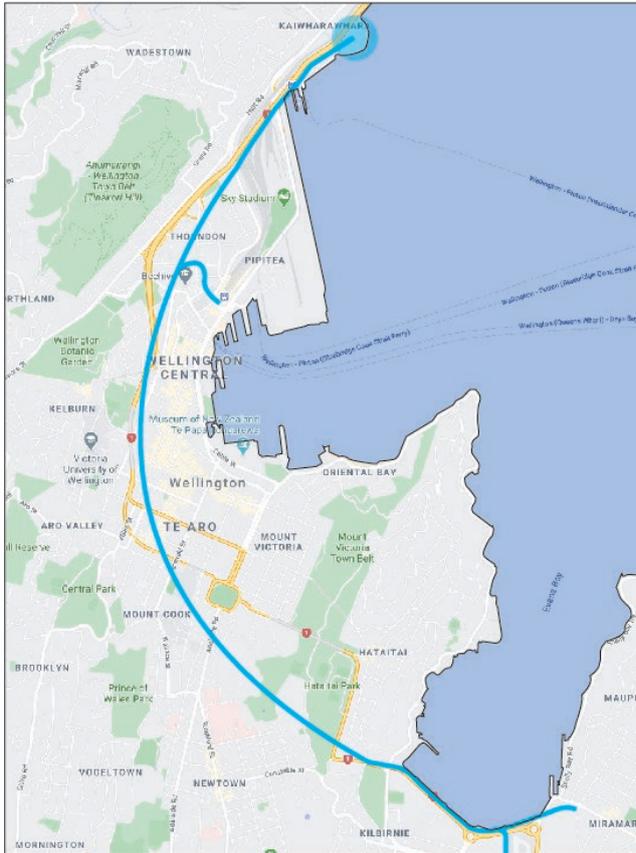

## Tunnel Bypass (Option 2)

A shorter and what should be a cheaper option would be to start the tunnel next to the current Terrace Tunnel.

At 3.73km this would be 2km shorter than the 5.73km tunnel I proposed in option 1 and is closer to the 3.45km twin-tunnel Auckland City Rail Link project (totalling \$4.419 billion).

ire distance  
in the man to add to your path

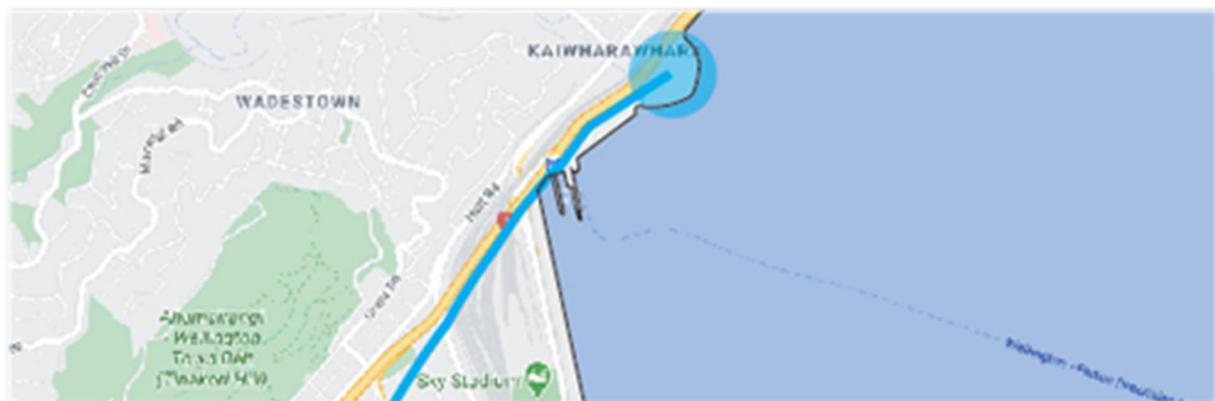

## Inner City Train Connection

Another benefit from this could be a new train loop that also utilizes the same tunnel. This would follow the same route and again have strategic stops at key locations (Upper Terrace, Te Aro, Mount Cook, Newtown Hospital etc).

Furthermore, a sub connection could link from the Wellington Train Station, going from under the current bus depo on Bunny street and then either arching under the old High Court to link up with the longer tunnel in Option 1, or potentially heading under Lambton Key and following the 'Golden Mile' across the city before linking up with the new tunnel in Option 2 somewhere near Te Aro.

Another important idea to consider would be starting this new train route at the Interisland Ferry Terminal and constructing a very large carpark building on the mould sticking into the harbour at Kaiwharawhara. A motorway exit could be easily constructed that connects directly to this new carpark building - allowing people coming from the wider regional area to park their cars outside the city and then either catch a train into the city (going as far as the airport and potentially Miramar shops), or park their cars and bike, scooters, skateboard into and around the city.

Developing this little peninsula at Kaiwharawhara could have huge benefits to Wellington. As well carparks and connection to public transport, it could be developed to include both recreational and park areas (possibly some apartments). This would also connect well and compliment Te Ara Tupua-One Shared Path, and the Hutt River Link Project.

## Outer City Traffic Loop

Another important idea to consider while a second tunnel is being constructed could be the central city streets being reconfigured to create a 'loop' that sweeps around the outer city. This would be very effective because of the Wellington's small size.

Other cities around the world, particularly more recently the small Belgian city of Ghent which famously and dramatically changed the traffic circulation in 2017. Again, I know Isthmus quite recently studied and held a workshop to learn about 'The Ghent Circulation Plan'.

Interestingly enough 'Greater Auckland' have also been looking to Ghent - "It seems that rather than "build it and they will come", Ghent used the concept of "return it to the people and they will come". When road space is at a premium – as in Ghent, or Auckland –

trying to magic up new space and protection for all the neglected modes is futile, and expensive. Much more can be achieved within a limited budget by removing the ability of cars to dominate" (<https://www.greatauckland.org.nz/2020/01/21/modeshift-targets-critical-lessons-from-ghent/>).

More information here shows that Ghent managed to achieve the very goals both the Wellington City Council and LGWM are aiming for:

<https://filmfreeway.com/TheInnovativeWayGhentRemovedCarsFromTheCity>,  
<https://stad.gent/en/mobility-ghent/circulation-plan>).

In Wellington this could be achieved by widening the motorway turn-off at Kaiwharawhara (next to the Interisland Ferry Terminal) to two lanes so it creates a two-lane express route that would run in a loop down the waterfront up Kent Terrace through two lanes through Mt Victoria tunnel all the way to the airport, or around and back through Newtown and then either connecting with the Arras Tunnel, or heading down Willis Street to loop back around again. The idea would be to make it quicker to get around the city by using the 'loop' rather than trying to zigzag and weave across Wellington's inner-city streets. This could be achieved by making the 'loop' 70-80kmh and removing any barriers such as traffic lights through the use of 'cut-and-cover tunnels' and overbridges.

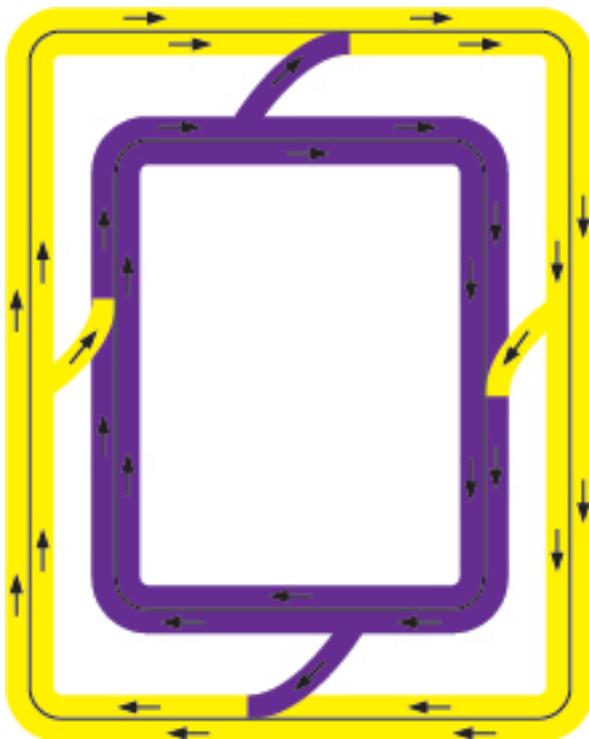

As mentioned at the start of this document, combining ideas, projects, and budgets could create opportunities and benefits that are not otherwise being realised. In this case placing the road on the waterfront underground (ideally from the railway station until Kent Terrace) would allow the redevelopment of Frank Kitts Park and Te Ngākau-Civic Square to be enlarged - creating more public space, providing direct access from the city to the waterfront (Wellington's best asset) and ensuring Te Ngākau-Civic Square as the heart of the city.

## Inner City Traffic Loop

A second Inner City Loop would compliment the Outer City Loop by working in the same manner.

By changing the traffic direction within the inner city a smaller inner-city loop would work as a spiral ensuring all traffic flows in the same direction as the outer city loop. All other inner-city streets could be car-free (except for slow 20kmh zones for residents and service/delivery vehicles only). While I have yet to thoroughly think this through – traffic flow could potentially come down Victoria St, along Jervis Key, and then back up either Taranaki St, Kent terrace or both.

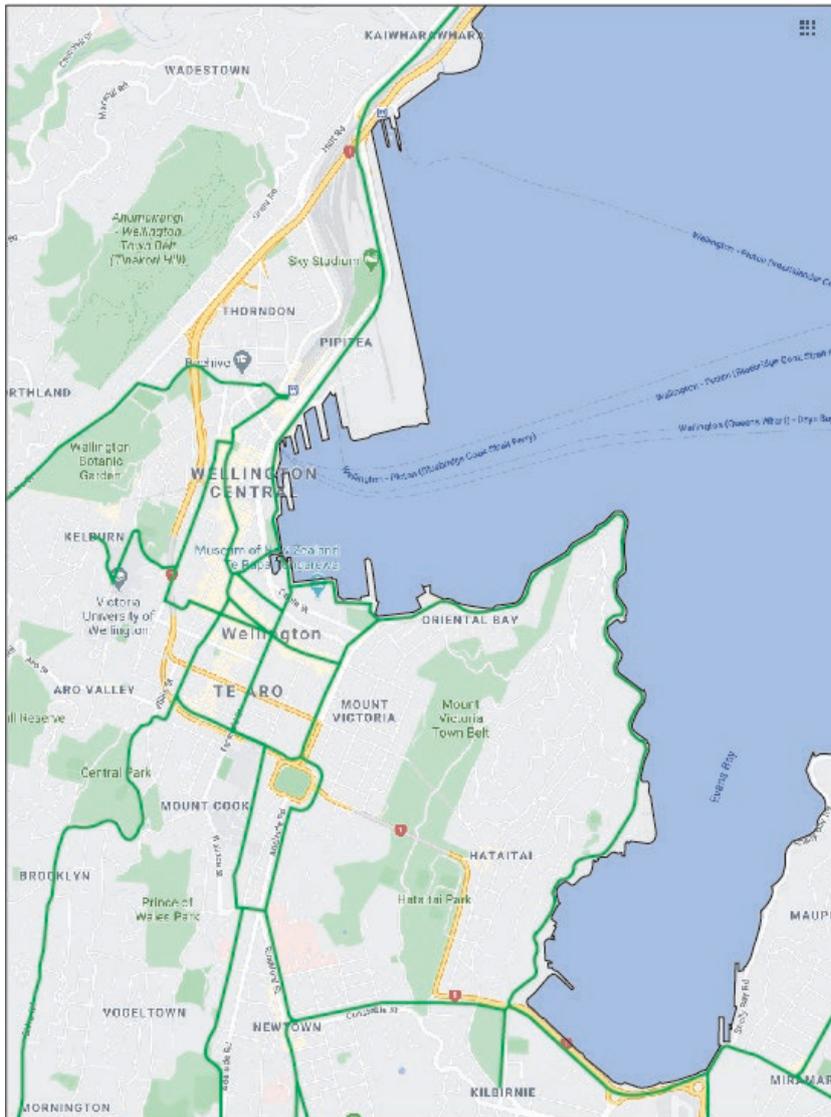

## How the Loop would work

This would create a situation where car users would have to travel to the Outer City Loop road on the city outskirts, while not making it impossible to use a car it would motivate shorter trips to be done via human power or mass transit.

- A continuous double lane road would incircle the outer city, while a continuous double lane road would surround the inner city.
- Strategic entry and exit points would consist of merging lanes separate from each of the double lanes.
- All traffic would flow in the same direction.
- Tunnels and overpasses could be used to remove roadblocks such as the need for traffic lights.

## Benefits and Links to Other Projects

- This would create a clear inner-city centre, and a sense of the city having a 'heart'. This could be reinforced and linked to the redevelopment of Civic Centre, Frank Kitts Park and the public Library.
- Bike Lanes (alternative modes of transport). Again, car users would be forced to drive a loop around the city rather than weaving across it for shorter trips, hence encouraging the use of human power and sustainable forms of transport. Furthermore, by removing cars from the inner city, barriers such as traffic lights would no longer be needed making it easier and quicker to move around the inner city through walking, biking, skateboarding, or scootering.

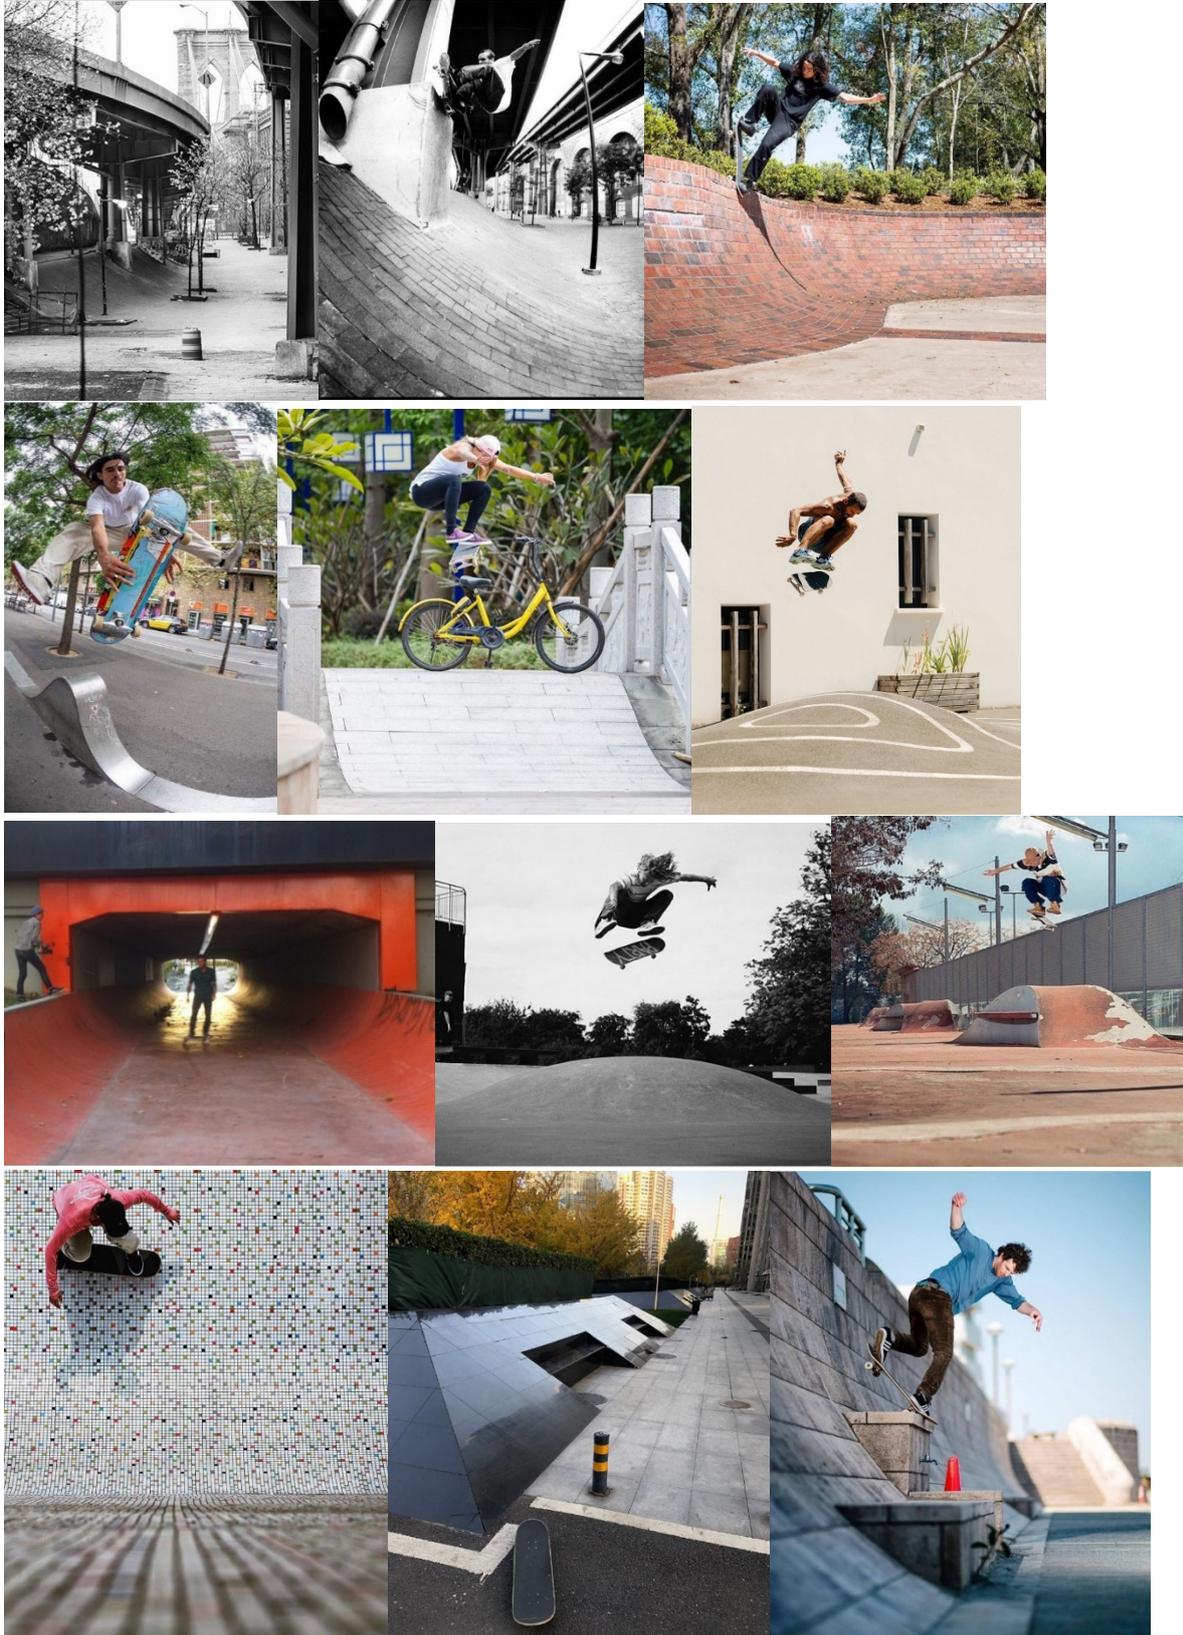

## Bike Lanes (and alternate forms of transport)

Again, it is vital to have a network of safe pathways for foot traffic and other diverse transport user groups such as bikes, scooters, and skateboarders. However, an enormous opportunity is being missed by only considering people on bikes. A small city like Wellington is perfect for other forms of transport, especially skateboarding. I can speak from personal experience. For almost thirty years I used my skateboard as a way to get around the city. However, the experience is no longer what it used to be. Whereas once I used to catch a train into town and be able to 'skate' across town quite quickly and stress free – the past twenty years has seen

many areas of the city that used to be smooth replaced with harsh bumpy tiled footpaths or rough ground. This mixed with a larger city population and less spacious public areas has made it difficult and unenjoyable getting from A to B. As a skateboarder, now you must crisscross the city to avoid ground that you cannot skate safely or comfortably on or get off and walk. This is a huge shame as in many other countries and cities (Barcelona, Copenhagen for example) city streets are being opened up for all users – not just individuals with bikes.

Again, it bothers me that some people living in central Wellington tend to ignore the fact that many people who use and love the city live in the wider region. The reality that not everyone only can afford a bike, or that it is not practical riding a bike very long distances from the wider Wellington region. I know what it is like as a single parent to not be able to afford a bike for myself let alone my children. When I grew up, once I got to my teenage years it was either a bike or my skateboard – my parents could not afford both and my interest in skateboarding was more than just using it as a form of transport. Later in life I have found my own children in the same situation. I am saying this to highlight that not everyone is always going to have access to a suitable bike – but they may however have another form of transport they can use or prefer. One of my children for example catches the train into town and then skates to his classes at Massey University.

Furthermore, another opportunity being missed to encourage users to leave their cars at home (or park their car and commute around the city) is by not making 'bike lanes' more fun, exciting and enjoyable. The smallest of features can open up a whole world of possibilities, exploration and excitement (see pictures below). Other cities that have added these features are famously known as 'vibrant', fun and exciting cities where tourists will travel to experience.

Even with 'bike lanes' the reality is Wellington is extremely vulnerable to the elements a large proportion of the year. People will not walk or ride their bikes long distances in bad weather – they will drive. While I am a strong advocate for a sustainable city the reality is 'bike lanes' alone will not fix Wellington's transport problems. The future is not car-less but it will have electric cars, alternative modes of sustainable transport (bikes, scooters, skateboards), and environmentally friendly forms of public transport.

There is no reason why fun and enjoyment can be added into this equation at no extra cost. Especially considering the vibrancy it would add.

## Golden Mile/City without Cars

As mentioned above there is a connection and huge opportunity to integrate elements of the projects mentioned above into both The Golden Mile and removing cars from the Inner-City streets such as: Bike Lanes (alternative modes of human powered transport), Inner/Outer City Loops, and an Inner-City Metro line.

All consideration should be giving for connecting the Central City Train Station to the heart of the city (Civic Centre). A large open route of smooth ground should run directly from the train station to the Civic Centre that connects with other smooth laned car free routes.

Special care should be given to ensure that all the ground is smooth and well brightly light up at night.

Furthermore, creative urban design should integrate areas for creativity and recreation to bring vibrancy to the city. For example, as I have mentioned above and will go into more detail below, I have been advocating for 'skateable' architecture to be included and spread throughout the city. This idea has been well implemented in other parts of the world, especially in European cities such as Barcelona, Copenhagen, Berlin, London, Paris just to name a few. This idea has been picked up by other vibrant cities around the world such as Melbourne, Sao Paulo, New York, and even to a degree Auckland. I will explore this more at the end of the document.

Another vital element nobody is talking about is the need for a 'Well Lighten-up' route the runs directly from the Central City Train Station into the heart of town. Currently there is no direct route that flows from the Train Station into the city centre (Civic, Cuba, Courtney Place etc). Anyone walking, biking, scootering, or skateboarding will take completely different routes which are largely dependant on factors such as: the time of day, weather conditions (rain/wind), and safety.

The Golden Mile offers an opportunity to create a well lighten-up, easy to navigate, and well monitored path directly to the cities heart that feels both vibrant and safe. This would also benefit the Retail sector as it would bring the pedestrian traffic flow right past there doors, rather than many people heading down Waterloo Quey, Jervis Quey and Featherston St which is currently the case.

## Civic Centre, Public Library, and new Municipal Buildings

Much work needs to be done to restore the vibrancy back to Civic Centre. Again, there is a huge opportunity here to link all these projects together and ensure that civic centre sits at the heart of it all.

If the Councils preferred option to demolish the Municipal Office Building (MOB), the Civic Administration Building (CAB) goes ahead it will provide a greater scope as a community to reimagine Te Ngākau (Civic Centre Precinct) as well as the Central Library, Capital E, the City to Sea bridge, and the

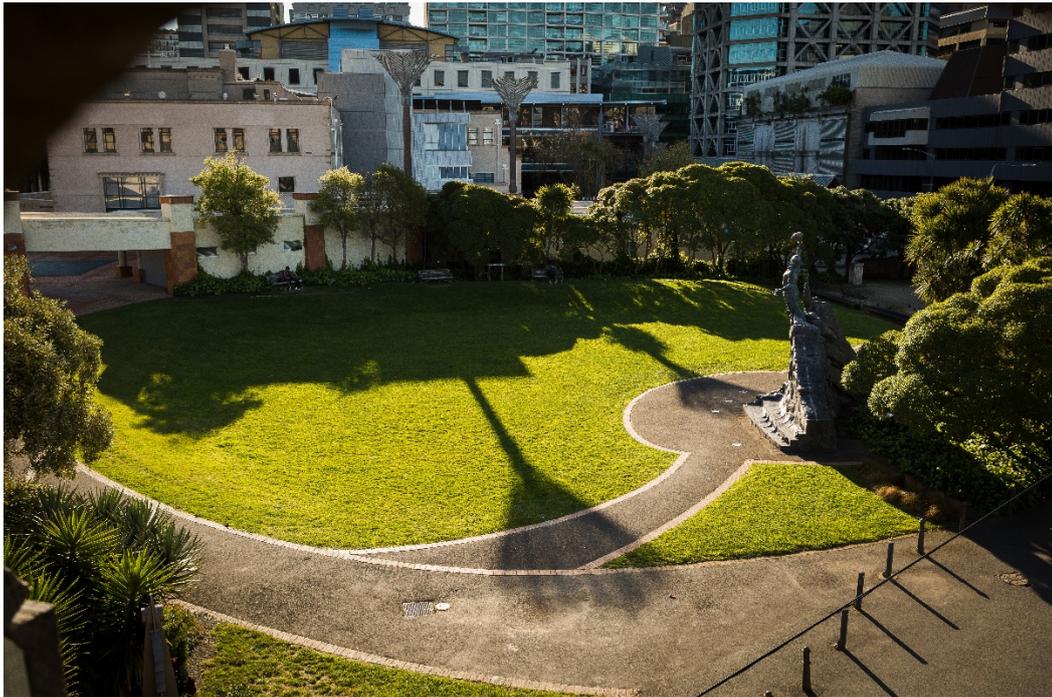

underground carpark.

Rather than treating this as a sperate project, by instead combining and linking these redevelopments with LGWM and my ideas mentioned above, a bigger picture can be formed that more creative possibilities open up that would greatly benefit Wellington City.

Some of my own ideas I have heard no one else mention that would have huge benefits include:

- Placing the length of road (Jervois Quey) in front of Frank Kitts Park, the Civic Centre, and The Michael Fowler Centre inside a 'Cut and Cover' tunnel.  
This would allow direct and easy access from the car-free Inner-City Streets, the Golden Mile, and Civic Centre (the heart of the city) to the waterfront – Wellingtons best asset. This would have a whole lot of advantages including more open space for a people and a whole range of recreational activities.  
More free space would be a massive positive move considering the expected increased population density. I also strongly feel this would really put Wellington on the World map
- Ensuring any new building that replaces the MOB and CAB buildings are icon in design so that anyone who sees a picture of them knows it is Wellington (much like the Sky Tower is to Auckland). In my mind I picture a building connecting the Town Hall with the Central Library made of glass sheets situated on irregular angles and reflecting the surrounding buildings of the city. It could be shaped to symbolize both the mountain ranges of the Southern Alps (South Island) and the Volcanoes of The National Park (North Island) and symbolically they would also connect to te ao Māori (Māori world view) as Mountains in the Māori world are hugely important.  
As well as Te Ngākau (Civic Centre) symbolically acting as a centre point for the North and South Island, it would also symbolize the meeting point of Ranginui (the Sky Father) and Papatūānuku (the Earth Mother).
- As well as housing The National School of Music, another idea could look at creating a 10,000 to 12,000 seat venue underneath this building and Civic Square itself. This could be named after and linked to the underworld (Rarohenga).
- Another idea would be to build a tall skinny building/Tower at the tip of the City to Sea bridge (above Capital E) that would stick out above Whairepo Lagoon and symbolize the Taurapa (stern post) of a Waka.  
This could possibly have a café located at the base and a 'look out' platform located at the top providing a creative elevatored location for special events and to view and photograph the city from.

- If the road is lowered and covered as mentioned above ('Jervois Quay) in front of Frank Kitts Park, the Civic Centre, and The Michael Fowler Centre inside a 'Cut and Cover' tunnel', the extra space would allow for an abundance of new possibilities such as an expansion of Capital E.
- The City to Sea bridge could be removed complete with the money needed to strengthen it redirected towards other developments.
- The large grass space in the picture below situated next to the art gallery could be transformed to provide a safe and inclusive plaza area that can be used by skateboarders, roller-skaters, scooters etc. As well as bringing added vibrancy to the area, this would give the skate community something they have been seeking for a long time.

Furthermore, if done right it would become an icon and well-known feature of Wellington both Nationally and Internationally. This concept isn't new and can be found in many of the more progressive cities around the world such as: MACBA (the museum of contemporary and modern art of Barcelona) and Le Dome in Paris (Palais de Tokyo, Museum of Modern Art of the City of Paris), (see examples below).

## Skateboarding, Skateparks, and Urban Areas

Since the Council upgraded Waitangi Park 15 years ago, they have inadvertently silently waged a campaign against skateboarding. As well as the upgrade of Waitangi Park seeing a significant reduction in the size of the area provided compared to the previous park, it is also important to note that it was poorly designed and flawed in its construction. Currently Waitangi Park is the only place in Wellington City provided to skate, and not being much bigger than 2 Netball courts, it is completely inadequate in size to meet the demands for a diverse user group that has continued to grow.

More concerning however, since the Council redeveloped Waitangi Park, it has been used as an excuse to reduce and remove other skate facilities (such as Wellington's only indoor Ramps from Kilbirnie Rec Centre) and actively campaigned to remove skateboarding from all central city public areas such as Midland Park by spending money on 'No Skateboarding' signs, 'Skate-Stopper' knobs, and physically altering popular areas (replacing smooth ground with rough ground for example).

This is in complete contrast to what is happening globally. Everyday skateboarders in Wellington are reminded via social media of the amazing facilities provided and experienced by skaters all over the world. While over the past 15-20 years skateboarding has been accepted and embraced for all its positive qualities in other parts of the world, in Wellington the experience of being a skateboarder has progressively worsened due in part to negative dispositions held by some past councillors and their unwillingness to prioritise and treat skateboarding equally as important and valued as any other culture or sport.

This is hugely disappointing and highlights that Wellington has gone backwards in this regard by making it harder for individuals to access and have experiences that are easily accessible in other cities around the world. While discussions with the Council have been ongoing the fact remains, there are no plans to do anything significant in the next 10 years.

**PLEASE DO NOT MISS THIS OPPORTUNITY TO INCLUDE SKATEBOARDING IN THE LONGTERM PLAN**

**LEFT:** Joseph Whaanga one of New Zealand's most well know professional skateboarders skating what was Wellington's most icon spots - at Midland Park. 2006. Midland park had been the centre of the Wellington skateboard scene since the early 90s. After this photo was taken, the ground was altered to stop skateboards skating the stairs and ledge. As well as being a great skate spot, Midlands was a central meeting point where you could meet other skaters. From there you would go explore other spots around the city and often end up back at Midlands at the end of the day. Midlands became a proving ground, and played a key role in the progression of both skaters ability, and in helping grow a community.

I am arguing that within all the planned redevelopments and future projects there is both the opportunity and room to 'Make Wellington one of the best cities in the world to be a skateboarder'.

Despite efforts to remove skateboard from the inner city, a lack of adequate and new skate facilities for almost 20yrs, and the removal of old worn-out facilities – skateboardings popularity has continued to grow. Furthermore, the recent explosion of Female and Gender diverse skateboarders have seen the number of users explode.

This year will also see skateboarding making its debut at the Tokyo Olympic games where it is set to take centre stage. Whereas other sports have become somewhat uninspiring, are inaccessible for many people or contain negative discourses such as: 'winning is everything', you must wear a uniform and conform to rules, and there are 'winners and losers' – skateboarding has provided an exciting alternative and juxtaposition. Individualism and diversity can flourish in the skate culture. This is why the numbers will keep growing as more and more Female, Gender diverse, and individuals that don't 'fit-in' with other sports find skateboarding.

The problem facing Wellington's skate community simply cannot keep being ignored. Not being treated the same as other cultures or sports will not stand. In no other public areas of the city will you see signs signalling out a certain group of people.

Including provision for skateboarding in the Long-Term Plan won't only encourage people to get out the house and exercise, if done right, Internationally Wellington would become to be regarded as one of the 'skate capitals' and draw people here from all over the world. What is better is it would not have to cost a lot of money relatively speaking.

**To achieve the goal of making Wellington one of the best cities in the world to be a skateboarder, there are two main areas to be addressed.**

**1. Upgrading Waitangi Park so it meets current Olympic standards, and can hold local, regional, national, and Olympic qualifying events.**

Creating a central city skate park easily accessible by using public transport (and without the need for a car) by anyone living in all areas of the greater Wellington region. This can be achieved by upgrading Waitangi Park to cater to all levels of ability (beginner, intermediate and advanced) and types of skating (Park and Street courses), meeting current Olympic standards, and holding local, regional, national, and Olympic qualifying events.

**2. Creating a central city 'Skate Friendly Street Plaza' and including skateable features in future urban projects (including 'Bike-Lanes')**

A central city 'Skate Friendly Street Plaza' that provides a safe area for skaters to meet and skate together (and again which is easily accessible by using public transport by anyone living in all areas of the greater Wellington region. This is a vital ingredient for any healthy skate scene and would help restore the heart of Wellingtons skate scene.

Putting a system in place to ensure opportunities to include 'skateboarding' in future infrastructure projects that could benefit the city are not missed. This goal is achievable and does not have to be hugely costly.

There are many examples of central city skate plazas all around the world such as Love Park in Philadelphia, The Brooklyn Banks in New York, South Bank in London, and Peoples Plaza in Shanghai just to name a few. Even Auckland Cities own Aotea Square is famously known around the world for it's skate friendly culture and skateable features.

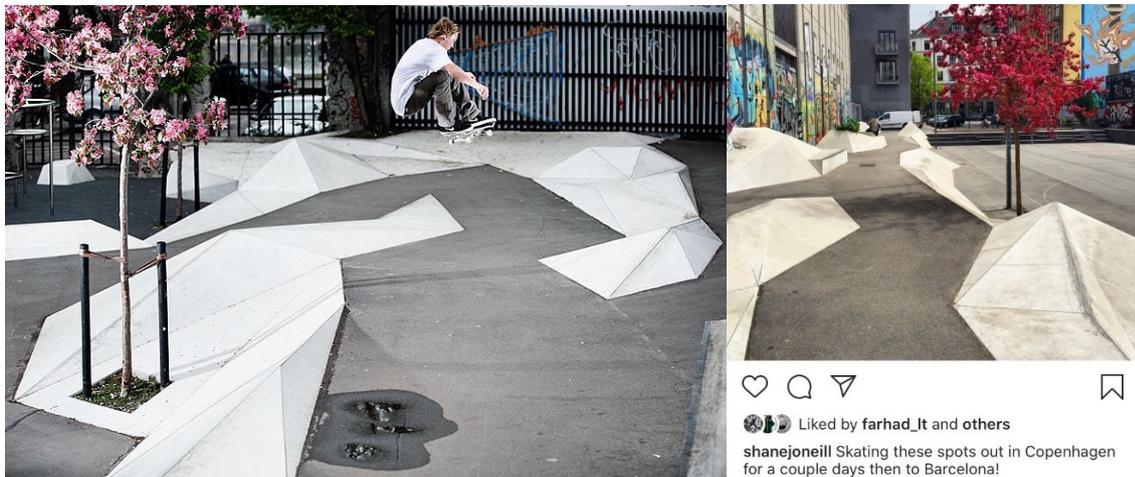

Left: Arguably the worlds most famous skate plaza, Embarcadero (EMB) in downtown San Francisco became the first urban 'plaza' taken over in the early 90s by skateboarders.

EMB became the proving ground in the early 90s for modern street skateboarding and set the standard for what makes a city a 'skate capital'. While a large effort was made to stop skateboarding it still exists today, with skaters still travelling from all over the world to visit this hallowed ground, despite it's poor state from a lack of maintenance.

Future redevelopment of public urban spaces over the next 10-years including Frank Kitts Park, Te Aro Park, and The Civic Centre all provide an opportunity for skate-able features to be included in certain areas. This could be in the form of a perfect ledge, bench, or set of stairs as examples. This idea is now a common practice in many cities around the world (just like Bike-Lanes) and has been used to great effect in cities such as Copenhagen and Malmo (pictures below)

By having a plan, and being open for creative ideas, these features could be included in the budget and design for little to no extra cost. Furthermore, I would say it is the smartest thing to do as time-and-time again efforts to stop skateboarding do not work – skateboarders still find ways to interpret and find a challenge to overcome. All design features such as using rough ground or using ‘skate-stoppers’ achieves is limiting the fun and potential of an urban area. Good design would instead re-direct skateboarders to areas more suited (such as away from the front of business and out of the flow of foot traffic), while maintain the vibrancy and positivity that including skateable areas brings.

### Skate Spots (Urban Design)

Designing and providing skateable spots (or urban architecture) around the city is the idea I am most passionate about seeing come to life. It would not only achieve the goal of making Wellington a city like Barcelona, Copenhagen, or Paris (as just a few examples), it would also restore key aspects of the city that made the Wellington skateboarding scene so special and well regarded in the first place, and once again adding to the rich history and culture of skateboarding in Wellington City. It would also significantly do wonders for Wellington’s image internationally by:

- Creating interest, publicity, and character in International media and sub-cultures
- Highlighting Wellingtons creative and progressive approach to urban design
- Become well known for creative architecture
- Taking a step towards making Wellington a fun, exciting city to live and visit by bringing in tourism
- It could also help clean up areas such as Te Aro Park that has become a magnet for violence and sexual assault (D) by bringing vibrant, vigilant positivity to the area

One of the best things about this idea is for the amount of positivity and good that would come from it, not a lot of money would have to be spent in comparison to the amount of money that has been thrown at other endeavours and rendered somewhat unsuccessful/negative results (Island Bay Bike lanes for example?). Furthermore, with good communication, building costs could be reduced by using recycled materials and partnerships with local community members and groups.

For example, \$1 million dollars could provide upto 10 small scale spots around the city per year for ten years. This could be in the form of anything as simple as a perfect bench, natural bank, or set of stairs, to more elaborate 'plaza' spaces, skateable sculptures, or landscaped terrain. The million dollars would be split up into (10x \$10,000 per year, totalling \$100,000 per year and \$1,000,000 over ten-years). 10 spots per year, over a 10-year period would equal 100 spots.

This would not only create a uniquely skateable city, it would also create international 'marketability' and attract pros and companies from all over the world. 100 spots spread over the Wellington city and Region would achieve the goal of making Wellington a 'skateable' city just as good as, if not better than Malmo or Barcelona.

This is just using a low estimate (compared to how much is spent on other projects) to demonstrate how much potential, enjoyment, creativity, and long-term benefit could be provided and result from just \$1 million dollars. I strongly feel much more money could be allocated to this cause considering its benefits. For example, better more elaborate spots could be created with the same budget used to upgrade Christchurch's Washington Way skatepark (\$3.2 million).

I strongly feel the money is already there and going to be spent regardless on Urban Projects such as Civic Centre, Frank Kitts Park, Te Aro Park, Car Free Streets, and the Golden Mile. Again, it would cost very little if any extra to include skateable features into these projects by including it in any design

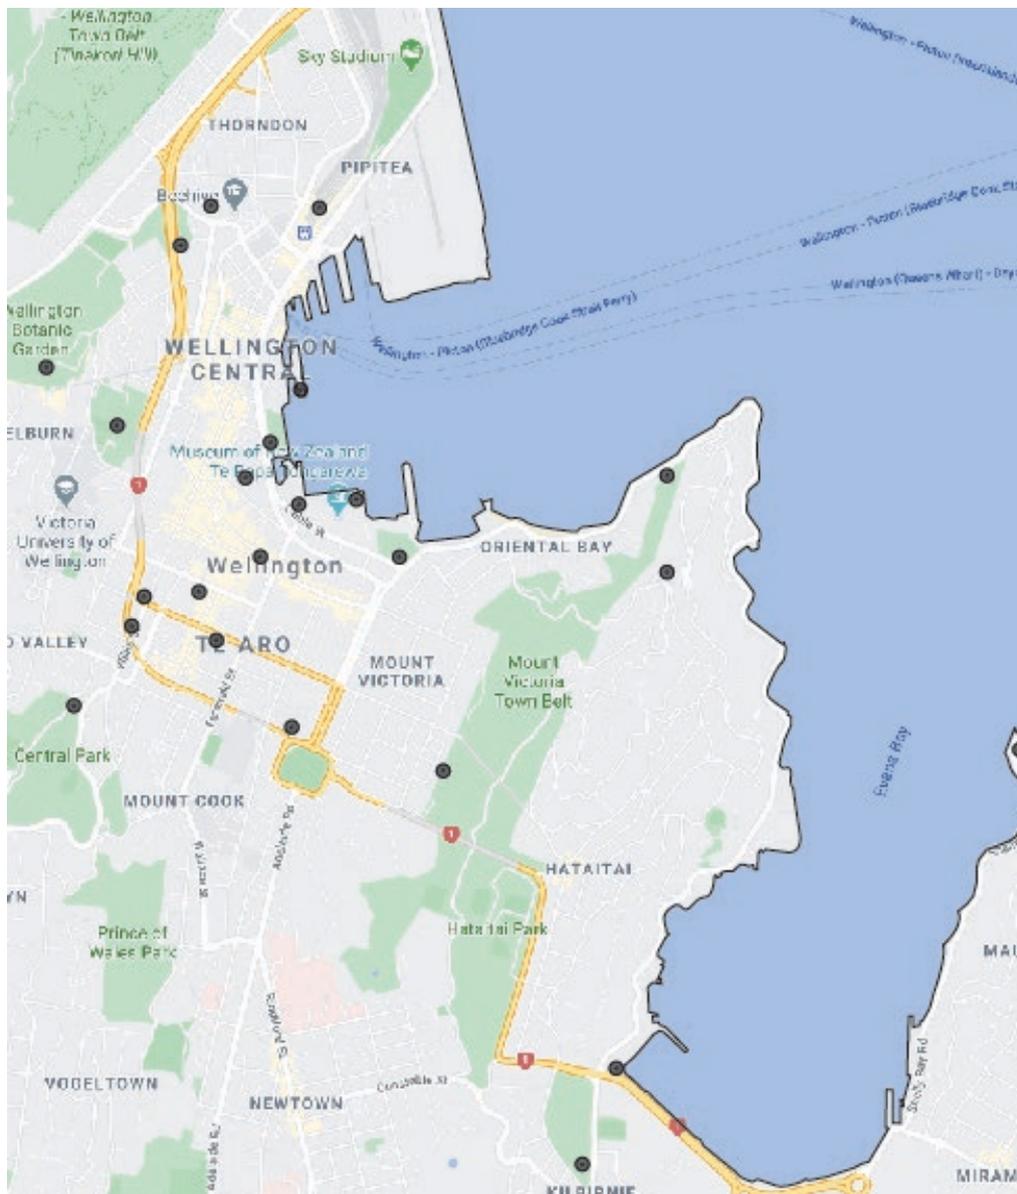

brief. Funds and Financing for an upgrade to Waitangi park could be separate and come from the sports and recreation budget *not* playgrounds.

I feel potentially anywhere from \$10-20 million dollars could be allocated towards transforming skateboarding in Wellington over the next 10yrs in conjunction with help and support from the central government, and the 'Get Wellington Moving' initiative. The long-term benefits this would have for the economy would not just benefit Wellington, but the Country as a whole. Especially if this concept was rolled out Nationwide.

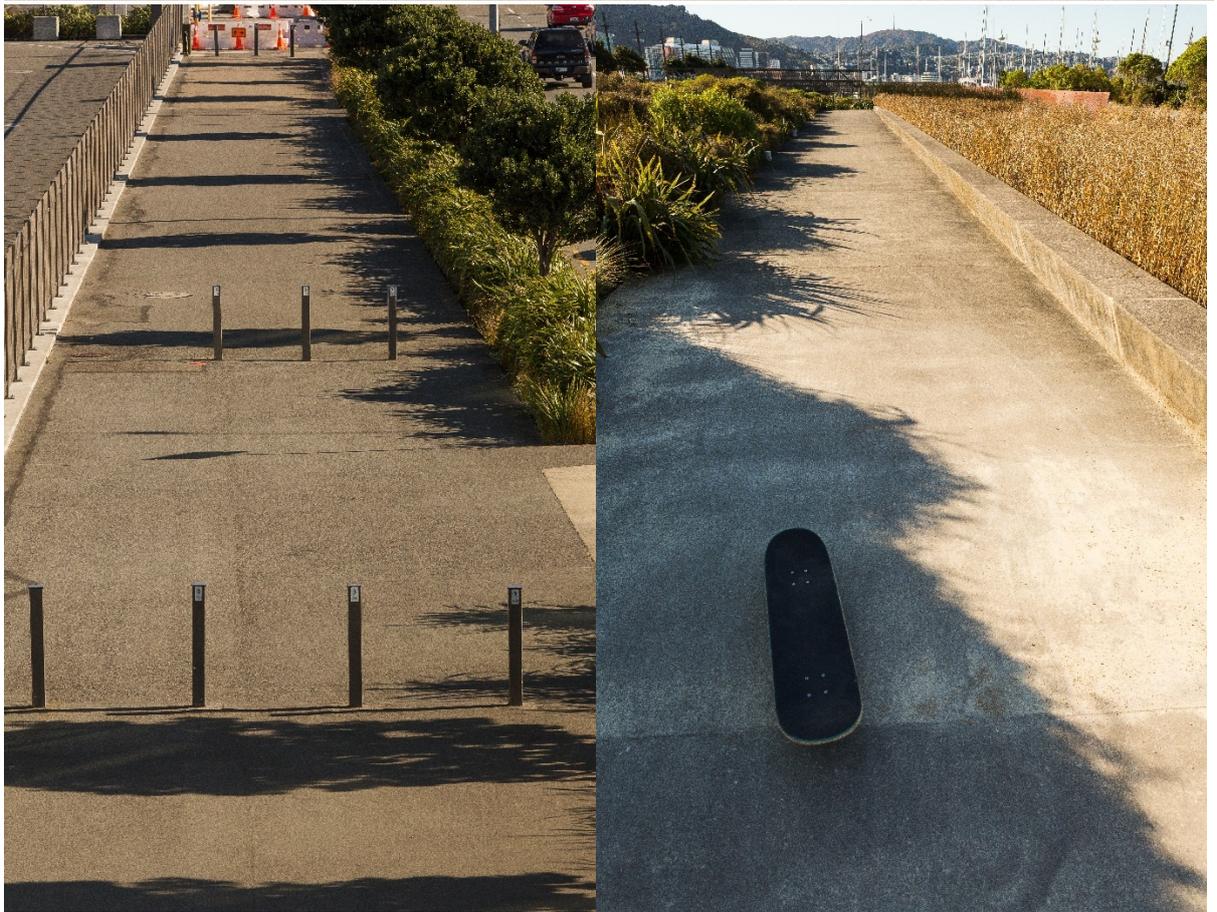

## Skateboarding Spots

Below is a map of some key areas that skateboarders already frequent and co-exist with the public in the city, and areas where skateboarders could add life and vibrancy to either a run-down or ignored urban area. As mentioned above, these are areas that could be drastically improved and made into something unique, and special with very little investment and work.

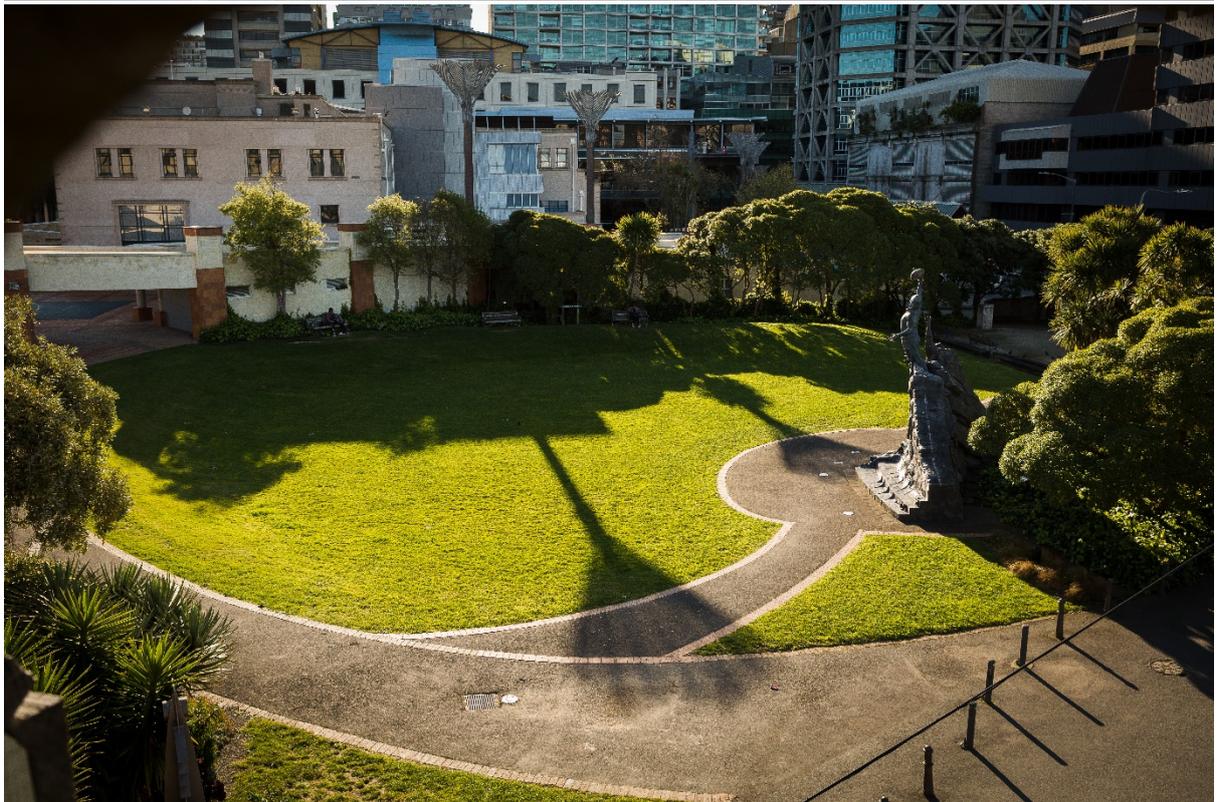

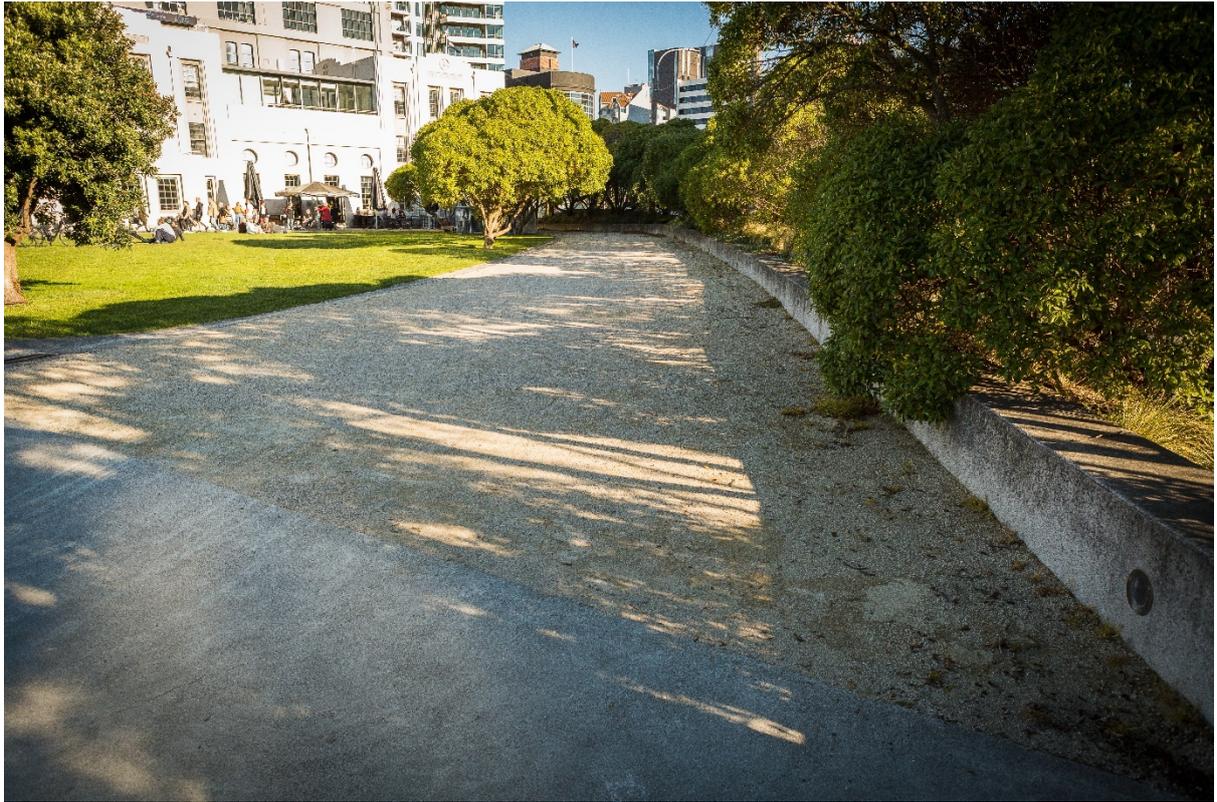

Below the map are photos of a few of these potential 'Spots'.

[Redacted] [Redacted]

- Q1. **Full name:** Alexander Garside
- Q2. **Phone number:** [Redacted]
- Q3. **Are you making this submission as an individual or on behalf of an organisation?** Individual
- Q4. **What organisation are you submitting on behalf of?** not answered
- Q5. **Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?** No
- Q6. **If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer?** not answered
- Q7. **Oral forum time** not answered
- Q8. **Oral hearing time** not answered
- Q9. **Which of these options do you prefer? (3 waters decision)** Option 2. Enhanced investment (\$2.4bn - the Council's preferred option).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** Option 2. Take ownership (Council's preferred option, \$32m investment).
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 2. Medium investment with savings (\$25.4m investment, lower rates and debt).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** Option 2. Proceed with base build proposal for public purposes (higher debt and rates)
- Q14. **Which of these options do you prefer? (Central Library decision)** Option 1. Strengthen now by temporarily exceeding debt limit (Council's preferred option, additional 0.79% to rates).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Don't know.

Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below

---

Cycleways

Q17. Your comments on the big decisions (optional)

As populations and traffic levels increase, we need to be more explicit about defining space as for cycling. Especially connecting areas of projected population growth with commercial centres.

---

Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)

not answered

---

Q19. Do you support the proposed budget?

I somewhat support the proposed budget.

---

Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?

not answered

---

Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?

I approve of the increased coupon-parking fees.

---

- Q5. **Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?** Yes
- Q6. **If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer?** Oral forum (informal, 60min facilitated table discussion with 2 to 3 Councillors and other submitters)
- Q7. **Oral forum time** Afternoon
- Q8. **Oral hearing time** not answered
- Q9. **Which of these options do you prefer? (3 waters decision)** Option 3. Accelerated (\$3.3bn investment – higher rates and debt).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** Option 2. Take ownership (Council's preferred option, \$32m investment).
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** None of these options.
- Q14. **Which of these options do you prefer? (Central Library decision)** Option3. Strengthen now by increasing rates further (additional 1.79% rates increase).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 3. Sludge minimisation through Council funding (\$147m to \$208m capital investment, above debt limit, and higher rates)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Wastewater laterals  
Cycleways  
Te Atakura (climate change)  
Central Library  
Sludge and waste minimisation  
Te Ngākau funding for future work  
None of these

---

**Q17. Your comments on the big decisions (optional)**

I support the Cycle Wellington submission.

---

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

---

**Q19. Do you support the proposed budget?**

I strongly oppose the proposed budget.

---

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

I support increasing spend in the current budget.

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

not answered

**Q17. Your comments on the big decisions (optional)**

I am the owner and operator of Karori Acupuncture. For the past 35 years I have operated from premises at 92A Karori Road, however I have been practicing acupuncture as a part of traditional Chinese medicine (TCM) in Karori over more than 45 years. My business has at times employed or operated with a range of other health providers, including medical doctors, osteopaths and massage therapists. I believe Karori Acupuncture has the same responsibilities to its clients, and in turn the society in which we operate, as do other health provider groups, in areas covering social, mental and physical health. Readers of this submission may be aware of the medical doctor organisation's move in recent years to reduce their client's dependence on pharmaceutical drugs by the concept of "green prescription". Cycling is frequently promoted as non weight-bearing exercise for enhancement of circulation in the lower limb for a number of lower limb medical conditions. My practice has a room set aside with two cycle exercise machines and I am proud that through this means a number of more elderly (and sometimes not so elderly) patients have been able to resolve chronic lower limb disabilities. Though I do not think it is the place of this submission to elaborate further on the long history (over four and a half thousand years) of the use of exercise in the practice of TCM for the treatment and maintenance of health conditions, I wish however to place on the record that in the same way as for my medical doctor colleagues, the organisation which I represent promotes exercise as a means of enhancing the health of patients and in turn of the wider society. i wish to support the Council's submission's option 4 for the highest priority of investment in cycling infrastructure in planning for our great city. Thank you.

not answered

## **Additional Submission on the Wellington City Council Draft Ten Year Plan 2021**

### **William Guest**

1. The requirements for the long-term plan are laid out the Local Government Act 2002. Broadly, the discussion document issued by Council appears to comply with those requirements, but two issues should be noted:
  - a. The office of the Auditor-General notes that \$403.2M of funding for social housing has not been included in the budget although Council has an obligation for this expenditure under an agreement made with the government some years ago.
  - b. The plan includes \$270M over 10 years for the maintenance of city streets but notes that the LGWM project may yet require a Council contribution of \$1.4B.
2. When the sums from 1a and 1b above are included, it is clear that ratepayers are going to have to dig very deep over the coming decade. Council has already been somewhat disingenuous in talking about a 13.5% rates increase, while also adding a “levy” item for sludge treatment to the rates while pretending that that the levy is something else. It takes little calculation to show that all residential ratepayers with a property with a capital value of \$900,000 or more will pay 14%+ to Council in the coming year.
3. Council’s consultation document claims that there are seven important questions on which it wants to consult citizens. It sidesteps many issues. In the next paragraphs some other issues are laid out for consideration.

#### **4. Improve the Performance of Council:**

For several years ratepayers have observed dysfunctional behaviour on Council. Poor decisions have been made (e.g., failure to fund drain renewals in good time, cycleway squabbling, subsidy paid to Singapore Air, etc etc). There are strong indications of poor governance of Wellington Water Ltd by Council, and of the Let’s Get Wellington Moving project. Several major projects have overrun their budget estimates by huge amounts for reasons that prove hard to explain. It is suggested that a program be devised to lift the performance of Councillors by providing training in governance, and elective training in specialist topics such as transport, three waters, urban planning, project management, etc. A salary incentive should be paid for undertaking an approved program.

#### **5. Improve the Performance of Officers**

The Local Government Act 2002 reorganised how local governments run and required a much greater reliance on contractors and consultants over in-house staff. It now appears (and has done so for some years) that this has weakened the ability of Councils to plan strategically and experimentally. Not only have professional staff numbers been reduced, but “corporate memory” has faded over time. Not all high-level strategic thinking can be parcelled up and handed out to consultants. Further, there has been a string of extremely

high project cost overruns that point to deficiencies in the project management ability of Council staff.

It is suggested that Council arrange a major review of the numbers, qualifications and experience of in-house staff to ensure that they are right.

There also appears to be a need for a Quality and Audit function within Council, charged to (1) review projects and programmes for efficiency and effectiveness, and (2) to receive and review complaints from residents about Council activities.

## **6. Transport Network**

Priority Objective 3 of the consultation document is laudable. Choices, safety, efficient, productive – all good words. Why then has no mention at all been made of the critical need for improved road access to the western suburbs? The major blockage is Karori Tunnel, which “serves” around 25,000 residents of Karori, Northland, Wilton, and Makara. The train wreck of LGWM has not included Karori Tunnel in its poorly selected group of ill-defined projects. Wellington City Council must take a firmer view on the needs of the city, and not leave them to nebulous and badly governed project teams. The interests of NZTA and GWRC are not necessarily coincident with those of Wellington City.

Karori Tunnel and its approach roads are not safe for cyclists, while the tunnel itself is impassable for pedestrians with disabilities, caregivers with all but the smallest of child pushchairs, and even passing pedestrians.

The mixing of electric scooters and cyclists with pedestrians is becoming a significant hazard, both on city footpaths, and on shared walkways in the green belts. More work is needed to ensure the safety of pedestrians throughout the city.

The long-term plan should give stronger recognition of the need for roads to support commercial activities within Wellington.

## **7. The Spatial Plan and District Plan**

Citizens are still waiting for the completion of the spatial plan (a disaster as it was first presented) and the draft revision of the district plan. As these documents will significantly affect the long-term development of the city, it is deplorable that the long-term plan is being consulted upon before the spatial plan is released.

## **8. Climate Change and Environment**

The move to EV's by Council is supported, as is the installation of a good network of EV charging points around the city. The conversion to electric buses from diesels by GWRC should be supported.

The sludge minimisation project should reduce some greenhouse gas emissions. Good management of the landfill including recycling improvements will also help.

More could be done to encourage the development and care of our “urban forest” – green spaces, especially those with trees and shrubs. Council is projecting another 18,000 residents within inner-city Wellington – where will they walk, relax, and play in green surroundings? Where will corridors for birds and insects be across the city?

Council should be looking to clean up urban streams, remove weeds more aggressively, and remove the old and ugly pine trees that are eyesores in the green belts.

In all other respects, the lead on climate change should be taken by government. Council cannot tackle this issue alone. Declaring an emergency might be symbolic, but practical and clear-headed programs will contribute to results.

## **9. Buildings, and Civic Square**

Knock down the old council buildings. Develop an imaginative open space that is attractive to all residents but especially to the growing population of Inner-City Wellington. Link this concept to a redevelopment of Capital E and the refurbishment of the Bridge to the Sea. Include the woeful space at the corner with Harris Street (where Circa once stood). Shift the awful rugby statue to the Stadium.

Do not build or own buildings when the space can be leased. In other words, shift the Council offices into leased space in the city. Sell any Council land that does not have a clear need for retention within 30 years.

Do not do anything “because we are the capital”. If the government want to enhance the capital, let government pay. Do things to enhance the liveability of the city for the citizens.

## **10. Social Housing**

Further to the comment in paragraph 1a above, social housing should primarily be a government issue. Council should review any past agreement with government to ensure that it is fair and reasonable. The currently projected rates increases far exceed the income increases that most ratepayers have received over the past few years. The appalling rise in house prices of the past decade is not reflected in incomes, leaving many ratepayers “asset rich but cash poor” which is hardly their fault.

| Q6. If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer? | not answered  |
| Q7. Oral forum time   | not answered  |
| Q8. Oral hearing time   | not answered  |
| Q9. Which of these options do you prefer? (3 waters decision)   | Option 3. Accelerated (\$3.3bn investment – higher rates and debt).   |
| Q10. Which of these options do you prefer? (Wastewater laterals decision)   | not answered  |
| Q11. Which of these options do you prefer? (Cycleways decision)   | Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)                    |
| Q12. Which of these options do you prefer? (Te Atakura Funding decision)  | Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).                                 |
| Q13. Which of these options do you prefer? (Civic Precinct decision)  | not answered  |
| Q14. Which of these options do you prefer? (Central Library decision)   | Option 1. Strengthen now by temporarily exceeding debt limit (Council's preferred option, additional 0.79% to rates). |
| Q15. Which of these options do you prefer?(Sewage sludge and waste decision)  | not answered  |

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library

---

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

---

**Q19. Do you support the proposed budget?**

not answered

---

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

| Q14. Which of these options do you prefer? (Central Library decision)   | Option 1. Strengthen now by temporarily exceeding debt limit (Council's preferred option, additional 0.79% to rates). |
| Q15. Which of these options do you prefer?(Sewage sludge and waste decision)  | not answered  |

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library

---

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** not answered
- Q14. **Which of these options do you prefer? (Central Library decision)** not answered
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 3. Sludge minimisation through Council funding (\$147m to \$208m capital investment, above debt limit, and higher rates)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

not answered

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

Central Library

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

<p><b>Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)</b></p>	<p>not answered</p>

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

- Q6. **If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer?** not answered
- Q7. **Oral forum time** not answered
- Q8. **Oral hearing time** not answered
- Q9. **Which of these options do you prefer? (3 waters decision)** Option 3. Accelerated (\$3.3bn investment – higher rates and debt).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** not answered
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** not answered
- Q14. **Which of these options do you prefer? (Central Library decision)** Option3. Strengthen now by increasing rates further (additional 1.79% rates increase).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 3. Sludge minimisation through Council funding (\$147m to \$208m capital investment, above debt limit, and higher rates)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library  
Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital. High traffic levels at Mt Victoria tunnel in morning and evenings are 50% taxis, travelling to and from airport. [Just do a count at Kilbirnie traffic lights at 8.30am]. Provide decent public transport options (to and from airport) and the car traffic can decrease substantially, negating any need for additional road infrastructure.

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** not answered
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** not answered
- Q14. **Which of these options do you prefer? (Central Library decision)** Option3. Strengthen now by increasing rates further (additional 1.79% rates increase).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 3. Sludge minimisation through Council funding (\$147m to \$208m capital investment, above debt limit, and higher rates)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
 Cycleways  
 Te Atakura (climate change)  
 Central Library  
 Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)** not answered

**Q19. Do you support the proposed budget?** not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?** not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

Central Library  
Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital. I am a fairly new cyclist thanks to the advent of e cargo bikes for my hilly suburb and commute to Karori, and I would love to feel safer biking in this city and encourage other people to do so as well. Please please improve the safety of the Raroa rd/chaytor st intersection. Whether I bike or drive it is the scariest part of my day.

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

<p><b>Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)</b></p>	<p>not answered</p>

<p><b>Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?</b></p>	<p>not answered</p>
---	---------------------

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

---

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

- Q9. **Which of these options do you prefer? (3 waters decision)** Don't know.
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** not answered
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** not answered
- Q14. **Which of these options do you prefer? (Central Library decision)** Option3. Strengthen now by increasing rates further (additional 1.79% rates increase).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 3. Sludge minimisation through Council funding (\$147m to \$208m capital investment, above debt limit, and higher rates)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below** not answered

---

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

---

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)** not answered

---

**Q19. Do you support the proposed budget?** not answered

---

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?** not answered

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)** not answered

**Q19. Do you support the proposed budget?** not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?** not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

**Q19. Do you support the proposed budget?** not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?** not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

- Q1. **Full name:** Richard Russell
- Q2. **Phone number:** not answered
- Q3. **Are you making this submission as an individual or on behalf of an organisation?** Individual
- Q4. **What organisation are you submitting on behalf of?** not answered
- Q5. **Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?** No
- Q6. **If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer?** not answered
- Q7. **Oral forum time** not answered
- Q8. **Oral hearing time** not answered
- Q9. **Which of these options do you prefer? (3 waters decision)** Option 3. Accelerated (\$3.3bn investment – higher rates and debt).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** not answered
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** not answered
- Q14. **Which of these options do you prefer? (Central Library decision)** Option3. Strengthen now by increasing rates further (additional 1.79% rates increase).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 3. Sludge minimisation through Council funding (\$147m to \$208m capital investment, above debt limit, and higher rates)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library  
Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital. I would like to see Wellington City Council do all it can to support the immediate start of the Petone to Ngauranga seawall and path. This link will reduce the traffic in Wellington City and provide a vital link outside the city in the event of an earthquake.

- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** not answered
- Q14. **Which of these options do you prefer? (Central Library decision)** Option3. Strengthen now by increasing rates further (additional 1.79% rates increase).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 3. Sludge minimisation through Council funding (\$147m to \$208m capital investment, above debt limit, and higher rates)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
 Cycleways  
 Te Atakura (climate change)  
 Central Library  
 Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)** not answered

**Q19. Do you support the proposed budget?** not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?** not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

- Q1. **Full name:** Paul Glover
- Q2. **Phone number:** not answered
- Q3. **Are you making this submission as an individual or on behalf of an organisation?** Individual
- Q4. **What organisation are you submitting on behalf of?** not answered
- Q5. **Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?** No
- Q6. **If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer?** not answered
- Q7. **Oral forum time** not answered
- Q8. **Oral hearing time** not answered
- Q9. **Which of these options do you prefer? (3 waters decision)** Option 3. Accelerated (\$3.3bn investment – higher rates and debt).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** not answered
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** not answered
- Q14. **Which of these options do you prefer? (Central Library decision)** Option3. Strengthen now by increasing rates further (additional 1.79% rates increase).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 3. Sludge minimisation through Council funding (\$147m to \$208m capital investment, above debt limit, and higher rates)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library  
Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital. Past council achievement has been woeful, dangerous and climate damaging. Active transport saves lives and makes Wellington a healthy place with happy people. Consultation to destruction is failure. Organise your information and go ahead NOT in ever decreasing money wasting circles!

I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital. "I'm from Christchurch, we have a very successful cycling infrastructure programme being rolled out. Hopefully the Wellington City Councillors are familiar with this. Here is a link showing cycling in Christchurch including the Major Cycle Routes: <https://ccc.govt.nz/transport/cycling> Cycling in Christchurch is much safer in the areas where cycleways have been implemented. When I'm biking I see a wide range of people biking - varying age and varying ability. It is so wonderful seeing smiles on faces of people that never would have been biking if it wasn't for the safe cycling infrastructure. Wellington needs this. I am very concerned about the cycling environment in Wellington. When visiting I see a risk that is far higher than it should be. Active transport like cycling offers so many benefits (health, environment and community wellbeing). Quality active transport infrastructure is a necessary part of a modern city for this reason. Please Wellington City Councillors now is the time to embrace delivery a strong cycleway program in our capital city. "

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.
