Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

---

- Q1. **Full name:** Clea Matthews
- Q2. **Phone number:** not answered
- Q3. **Are you making this submission as an individual or on behalf of an organisation?** Individual
- Q4. **What organisation are you submitting on behalf of?** not answered
- Q5. **Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?** No
- Q6. **If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer?** not answered
- Q7. **Oral forum time** not answered
- Q8. **Oral hearing time** not answered
- Q9. **Which of these options do you prefer? (3 waters decision)** Option 3. Accelerated (\$3.3bn investment – higher rates and debt).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** not answered
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** not answered
- Q14. **Which of these options do you prefer? (Central Library decision)** Option3. Strengthen now by increasing rates further (additional 1.79% rates increase).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 3. Sludge minimisation through Council funding (\$147m to \$208m capital investment, above debt limit, and higher rates)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library  
Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

---

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
 Cycleways  
 Te Atakura (climate change)  
 Central Library  
 Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)** not answered

**Q19. Do you support the proposed budget?** not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?** not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

Cycleways  
Sludge and waste minimisation

---

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model.

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** not answered
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** not answered
- Q14. **Which of these options do you prefer? (Central Library decision)** Option3. Strengthen now by increasing rates further (additional 1.79% rates increase).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 3. Sludge minimisation through Council funding (\$147m to \$208m capital investment, above debt limit, and higher rates)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library  
Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

| Q15. Which of these options do you prefer?(Sewage sludge and waste decision)  | not answered  |

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library

---

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

---

**Q19. Do you support the proposed budget?**

not answered

---

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

---

- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** not answered
- Q14. **Which of these options do you prefer? (Central Library decision)** not answered
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 3. Sludge minimisation through Council funding (\$147m to \$208m capital investment, above debt limit, and higher rates)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)** not answered

**Q19. Do you support the proposed budget?** not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?** not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

---

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

---

**Q19. Do you support the proposed budget?**

not answered

---

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. - Q11. **Which of these options do you prefer? (Cycleways decision)** Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** not answered
- Q14. **Which of these options do you prefer? (Central Library decision)** Option3. Strengthen now by increasing rates further (additional 1.79% rates increase).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 3. Sludge minimisation through Council funding (\$147m to \$208m capital investment, above debt limit, and higher rates)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library  
Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

 Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)** not answered

**Q19. Do you support the proposed budget?** not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?** not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital. I support (inexpensive) tree planting in all urban landscape projects. Trees clean the air and make the city healthier and more livable.

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

<p><b>Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)</b></p>	<p>not answered</p>
---	---------------------

<p><b>Q19. Do you support the proposed budget?</b></p>	<p>not answered</p>
--	---------------------

<p><b>Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?</b></p>	<p>not answered</p>
---	---------------------

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

- Q4. **What organisation are you submitting on behalf of?** not answered
- Q5. **Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?** No
- Q6. **If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer?** not answered
- Q7. **Oral forum time** not answered
- Q8. **Oral hearing time** not answered
- Q9. **Which of these options do you prefer? (3 waters decision)** Option 3. Accelerated (\$3.3bn investment – higher rates and debt).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** not answered
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** not answered
- Q14. **Which of these options do you prefer? (Central Library decision)** Option3. Strengthen now by increasing rates further (additional 1.79% rates increase).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 3. Sludge minimisation through Council funding (\$147m to \$208m capital investment, above debt limit, and higher rates)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
 Cycleways  
 Te Atakura (climate change)  
 Central Library  
 Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)** not answered

**Q19. Do you support the proposed budget?** not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?** not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model.

---

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

---

**Q19. Do you support the proposed budget?**

not answered

---

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

<p><b>Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)</b></p>	<p>not answered</p>
---	---------------------

<p><b>Q19. Do you support the proposed budget?</b></p>	<p>not answered</p>
--	---------------------

<p><b>Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?</b></p>	<p>not answered</p>
---	---------------------

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

<p><b>Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)</b></p>	<p>not answered</p>

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

- Q1. **Full name:** Matthew Spencer-Phillips
- Q2. **Phone number:** not answered
- Q3. **Are you making this submission as an individual or on behalf of an organisation?** Individual
- Q4. **What organisation are you submitting on behalf of?** not answered
- Q5. **Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?** No
- Q6. **If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer?** not answered
- Q7. **Oral forum time** not answered
- Q8. **Oral hearing time** not answered
- Q9. **Which of these options do you prefer? (3 waters decision)** Option 3. Accelerated (\$3.3bn investment – higher rates and debt).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** not answered
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** not answered
- Q14. **Which of these options do you prefer? (Central Library decision)** Option3. Strengthen now by increasing rates further (additional 1.79% rates increase).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 3. Sludge minimisation through Council funding (\$147m to \$208m capital investment, above debt limit, and higher rates)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library  
Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

not answered

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

- Q13. **Which of these options do you prefer? (Civic Precinct decision)** not answered
- Q14. **Which of these options do you prefer? (Central Library decision)** Option3. Strengthen now by increasing rates further (additional 1.79% rates increase).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 3. Sludge minimisation through Council funding (\$147m to \$208m capital investment, above debt limit, and higher rates)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library  
Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

<p><b>Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)</b></p>	<p>not answered</p>

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** not answered
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** not answered
- Q14. **Which of these options do you prefer? (Central Library decision)** Option3. Strengthen now by increasing rates further (additional 1.79% rates increase).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 3. Sludge minimisation through Council funding (\$147m to \$208m capital investment, above debt limit, and higher rates)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library  
Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

- Q1. **Full name:** Lynne Pomare
- Q2. **Phone number:** not answered
- Q3. **Are you making this submission as an individual or on behalf of an organisation?** Individual
- Q4. **What organisation are you submitting on behalf of?** not answered
- Q5. **Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?** No
- Q6. **If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer?** not answered
- Q7. **Oral forum time** not answered
- Q8. **Oral hearing time** not answered
- Q9. **Which of these options do you prefer? (3 waters decision)** Option 3. Accelerated (\$3.3bn investment – higher rates and debt).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** not answered
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** not answered
- Q14. **Which of these options do you prefer? (Central Library decision)** Option3. Strengthen now by increasing rates further (additional 1.79% rates increase).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 3. Sludge minimisation through Council funding (\$147m to \$208m capital investment, above debt limit, and higher rates)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library  
Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising its debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital. "Really intelligent, expert thought needs to be applied to the development of cycleways. Numerous ones now in place present dangerous options for cyclists. Many types of wheels now compete for road space. Cars often obstruct cycle access to green blocks that are supposed to give cyclists safety at intersections and even then, motor scooters and motor bikes also compete for that space Please make our city safe for carbon-free commuters of which, at nearly 78, I am a regular push bike rider. "

- Q6. **If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer?** not answered
- Q7. **Oral forum time** not answered
- Q8. **Oral hearing time** not answered
- Q9. **Which of these options do you prefer? (3 waters decision)** Option 3. Accelerated (\$3.3bn investment – higher rates and debt).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** not answered
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** not answered
- Q14. **Which of these options do you prefer? (Central Library decision)** not answered
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 3. Sludge minimisation through Council funding (\$147m to \$208m capital investment, above debt limit, and higher rates)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
 Cycleways  
 Te Atakura (climate change)  
 Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)** not answered

**Q19. Do you support the proposed budget?** not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?** not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library

---

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

 Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)** not answered

**Q19. Do you support the proposed budget?** not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?** not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital. I have started cycling more since new cycleways have emerged. Cycling in Wellington is often a real safety issue and has prevented me from getting on my bike. I am still nervous about accessing some neighbourhoods where friends live such as Karori due to very dangerous intersections, the tunnel and busy hazardous roads - as a non-car owner and with unreliable buses, this prevents me from having full enjoyment of my city. I am able-bodied, reasonably fit and reasonably confident on a bike - imagine how many more people less able-bodied, less fit and less confident would consider cycling an option with proper cycling infrastructure in place. At the moment I believe the lack of infrastructure which would keep cyclists safe is the main thing holding people back. Having lived in many countries throughout Europe I have seen how good cycle infrastructure transforms a city. As a non-car owner it would also be great for Wellington to lead the way on providing more cycling carrying options for long distance journeys out of town. At the moment is really hard to even visit the Hutt or Kapiti due to limits on train carriage and buses and the lack of safe cycleways between these areas, let alone getting further afield! If you don't have a car to carry a bike, you often are really stuffed.

--	---

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

<p><b>Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)</b></p>	<p>not answered</p>
---	---------------------

<p><b>Q19. Do you support the proposed budget?</b></p>	<p>not answered</p>
--	---------------------

<p><b>Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?</b></p>	<p>not answered</p>
---	---------------------

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

---

- Q9. **Which of these options do you prefer? (3 waters decision)** Option 3. Accelerated (\$3.3bn investment – higher rates and debt).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** not answered
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** not answered
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** not answered
- Q14. **Which of these options do you prefer? (Central Library decision)** Option3. Strengthen now by increasing rates further (additional 1.79% rates increase).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** not answered

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Cycleways  
Central Library

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)** not answered

**Q19. Do you support the proposed budget?** not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?** not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

- Q4. **What organisation are you submitting on behalf of?** not answered
- Q5. **Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?** No
- Q6. **If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer?** not answered
- Q7. **Oral forum time** not answered
- Q8. **Oral hearing time** not answered
- Q9. **Which of these options do you prefer? (3 waters decision)** Option 3. Accelerated (\$3.3bn investment – higher rates and debt).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** not answered
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** not answered
- Q14. **Which of these options do you prefer? (Central Library decision)** Option3. Strengthen now by increasing rates further (additional 1.79% rates increase).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 3. Sludge minimisation through Council funding (\$147m to \$208m capital investment, above debt limit, and higher rates)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library  
Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)** not answered

**Q19. Do you support the proposed budget?** not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?** not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital. I believe Wellington should work hard to become a sustainable city that priorities people over cars. We have the opportunity to make bold changes to better meet our climate change obligations and encourage people to shift away from cars and onto bikes and walking, but they need to feel safe in doing so and that is why we should go as hard and fast as we can with the options we have available.

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

Investment in three waters infrastructure  
 Cycleways  
 Te Atakura (climate change)  
 Central Library  
 Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)** not answered

**Q19. Do you support the proposed budget?** not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?** not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

<p><b>Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?</b></p>	<p>not answered</p>
---	---------------------

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital. "I support initiatives that allow my child and other children to navigate the city (central and suburbs and everything in between) in active way to get to all the things they need to have a healthy, happy life, and to do that relatively independently of adult supervision. By making cycling and walking easier for them, you ensure that the next generation grows up using their bodies in ways that enhance their health, their independence, and their self-efficacy. However, if Council continues to invest in roading and single-occupant/family vehicles, it will lock those generations into modes of travel that do the opposite, and will miss the social and economic opportunities that more condensed communities offer. If in doubt, planners and politicians can educate themselves on transport injustice, social determinants of health, and the strong links between active transport and health and wellbeing. "

- Q1. **Full name:** Dean Quinn
- Q2. **Phone number:** not answered
- Q3. **Are you making this submission as an individual or on behalf of an organisation?** Individual
- Q4. **What organisation are you submitting on behalf of?** not answered
- Q5. **Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?** No
- Q6. **If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer?** not answered
- Q7. **Oral forum time** not answered
- Q8. **Oral hearing time** not answered
- Q9. **Which of these options do you prefer? (3 waters decision)** Option 3. Accelerated (\$3.3bn investment – higher rates and debt).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** not answered
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** not answered
- Q14. **Which of these options do you prefer? (Central Library decision)** Option3. Strengthen now by increasing rates further (additional 1.79% rates increase).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 3. Sludge minimisation through Council funding (\$147m to \$208m capital investment, above debt limit, and higher rates)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library  
Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

<p><b>Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)</b></p>	<p>not answered</p>

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

- Q4. **What organisation are you submitting on behalf of?** not answered
- Q5. **Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?** No
- Q6. **If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer?** not answered
- Q7. **Oral forum time** not answered
- Q8. **Oral hearing time** not answered
- Q9. **Which of these options do you prefer? (3 waters decision)** Don't know.
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** Don't know.
- Q11. **Which of these options do you prefer? (Cycleways decision)** Don't know.
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Don't know.
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** Option 4. Sell to support development (no debt or rates impact)
- Q14. **Which of these options do you prefer? (Central Library decision)** Option3. Strengthen now by increasing rates further (additional 1.79% rates increase).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** not answered

Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below

Central Library

Q17. Your comments on the big decisions (optional)

Urgently needed. We need a new Library

Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)

[REDACTED]

Q19. Do you support the proposed budget?

I strongly oppose the proposed budget.

Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?

not answered

Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?

i can't afford rates increase of more than 3% because my Fred died last year.

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
 Cycleways  
 Te Atakura (climate change)  
 Central Library  
 Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)** not answered

**Q19. Do you support the proposed budget?** not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?** not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library

---

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

not answered

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around

Investment in three waters infrastructure  
Wastewater laterals  
Cycleways  
Te Atakura (climate change)  
Central Library  
Sludge and waste minimisation  
Te Ngākau funding for future work

**Q17. Your comments on the big decisions (optional)**

The basic infrastructure of drinkable water, effective waste and waste water disposal and swimmable waterways are a Wellingtonians rite and the councils first priority. Technology is changing the way citizens access information (libraries) and council services as such capital investment in libraries and council buildings is best minimised and outsourced to accommodation providers. Cycle ways are a nice to have compared to water and sewage issues Significant investment in green technology while we pollute the harbour seems a low priority Split the cost between current users (rates) a future users (loans) seems logical. In this current environment of previous under investment in basic infrastructure and the prospect of significant future population growth the focus must be on the must haves rather than the nice to haves ie Water and Sewer pipes A clean harbour

 Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)** not answered

**Q19. Do you support the proposed budget?** not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?** not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

<p><b>Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)</b></p>	<p>not answered</p>
---	---------------------

<p><b>Q19. Do you support the proposed budget?</b></p>	<p>not answered</p>
--	---------------------

<p><b>Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?</b></p>	<p>not answered</p>
---	---------------------

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

Investment in three waters infrastructure  
 Cycleways  
 Te Atakura (climate change)  
 Central Library  
 Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)** not answered

**Q19. Do you support the proposed budget?** not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?** not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

- Q9. **Which of these options do you prefer? (3 waters decision)** Option 3. Accelerated (\$3.3bn investment – higher rates and debt).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** not answered
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** not answered
- Q14. **Which of these options do you prefer? (Central Library decision)** Option3. Strengthen now by increasing rates further (additional 1.79% rates increase).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 3. Sludge minimisation through Council funding (\$147m to \$208m capital investment, above debt limit, and higher rates)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
 Cycleways  
 Te Atakura (climate change)  
 Central Library  
 Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)** not answered

**Q19. Do you support the proposed budget?** not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?** not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

- Q1. **Full name:** Oliver Seiler
- Q2. **Phone number:** not answered
- Q3. **Are you making this submission as an individual or on behalf of an organisation?** Individual
- Q4. **What organisation are you submitting on behalf of?** not answered
- Q5. **Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?** No
- Q6. **If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer?** not answered
- Q7. **Oral forum time** not answered
- Q8. **Oral hearing time** not answered
- Q9. **Which of these options do you prefer? (3 waters decision)** Option 3. Accelerated (\$3.3bn investment – higher rates and debt).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** not answered
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** not answered
- Q14. **Which of these options do you prefer? (Central Library decision)** Option3. Strengthen now by increasing rates further (additional 1.79% rates increase).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 3. Sludge minimisation through Council funding (\$147m to \$208m capital investment, above debt limit, and higher rates)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
 Cycleways  
 Te Atakura (climate change)  
 Central Library  
 Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)** not answered

**Q19. Do you support the proposed budget?** not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?** not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital. Take a look at what other cities are doing. Investing in cycling ticks all the boxes: climate action, health benefits, reduced pollution, encouraging physical activity, quieter and safer. I know it's hard not to listen to those loud people who love their cars,. But habits can be changed, it just requires leadership.

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library

---

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

not answered

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?** not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

- Q4. **What organisation are you submitting on behalf of?** not answered
- Q5. **Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?** No
- Q6. **If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer?** not answered
- Q7. **Oral forum time** not answered
- Q8. **Oral hearing time** not answered
- Q9. **Which of these options do you prefer? (3 waters decision)** Option 3. Accelerated (\$3.3bn investment – higher rates and debt).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** not answered
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** not answered
- Q14. **Which of these options do you prefer? (Central Library decision)** Option3. Strengthen now by increasing rates further (additional 1.79% rates increase).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 3. Sludge minimisation through Council funding (\$147m to \$208m capital investment, above debt limit, and higher rates)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
 Cycleways  
 Te Atakura (climate change)  
 Central Library  
 Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)** not answered

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library

---

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

- Q1. **Full name:** Barry Phease
- Q2. **Phone number:** not answered
- Q3. **Are you making this submission as an individual or on behalf of an organisation?** Individual
- Q4. **What organisation are you submitting on behalf of?** not answered
- Q5. **Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?** No
- Q6. **If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer?** not answered
- Q7. **Oral forum time** not answered
- Q8. **Oral hearing time** not answered
- Q9. **Which of these options do you prefer? (3 waters decision)** Option 3. Accelerated (\$3.3bn investment – higher rates and debt).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** not answered
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** not answered
- Q14. **Which of these options do you prefer? (Central Library decision)** Option3. Strengthen now by increasing rates further (additional 1.79% rates increase).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 3. Sludge minimisation through Council funding (\$147m to \$208m capital investment, above debt limit, and higher rates)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
 Cycleways  
 Te Atakura (climate change)  
 Central Library  
 Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)** not answered

**Q19. Do you support the proposed budget?** not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?** not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

<p><b>Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)</b></p>	<p>not answered</p>

<p><b>Q19. Do you support the proposed budget?</b></p>	<p>not answered</p>
--	---------------------

<p><b>Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?</b></p>	<p>not answered</p>
---	---------------------

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

---

- Q1. **Full name:** Ruth Korver
- Q2. **Phone number:** not answered
- Q3. **Are you making this submission as an individual or on behalf of an organisation?** Individual
- Q4. **What organisation are you submitting on behalf of?** not answered
- Q5. **Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?** No
- Q6. **If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer?** not answered
- Q7. **Oral forum time** not answered
- Q8. **Oral hearing time** not answered
- Q9. **Which of these options do you prefer? (3 waters decision)** Option 3. Accelerated (\$3.3bn investment – higher rates and debt).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** not answered
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** not answered
- Q14. **Which of these options do you prefer? (Central Library decision)** Option3. Strengthen now by increasing rates further (additional 1.79% rates increase).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 3. Sludge minimisation through Council funding (\$147m to \$208m capital investment, above debt limit, and higher rates)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library  
Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

Te Atakura (climate change)  
Central Library

---

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

 Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)** not answered

**Q19. Do you support the proposed budget?** not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?** not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library

---

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

**Q19. Do you support the proposed budget?**

not answered

---

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

| Q5. Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?  | not answered  |
| Q6. If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer? | not answered  |
| Q7. Oral forum time   | not answered  |
| Q8. Oral hearing time   | not answered  |
| Q9. Which of these options do you prefer? (3 waters decision)   | Option 3. Accelerated (\$3.3bn investment – higher rates and debt).   |
| Q10. Which of these options do you prefer? (Wastewater laterals decision)   | not answered  |
| Q11. Which of these options do you prefer? (Cycleways decision)   | Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)                    |
| Q12. Which of these options do you prefer? (Te Atakura Funding decision)  | Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).                                 |
| Q13. Which of these options do you prefer? (Civic Precinct decision)  | not answered  |
| Q14. Which of these options do you prefer? (Central Library decision)   | Option 1. Strengthen now by temporarily exceeding debt limit (Council's preferred option, additional 0.79% to rates). |
| Q15. Which of these options do you prefer?(Sewage sludge and waste decision)  | not answered  |

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library

---

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

---

**Q19. Do you support the proposed budget?**

not answered

---

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital. You need to create corridors that connect and protection on city streets, paint just ain't enough but you know that, also push for more p Traffic infringement enforcement with the police (work together) I.e. get people off their phones while in charge of a motor vehicle.

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

- Q9. **Which of these options do you prefer? (3 waters decision)** Option 3. Accelerated (\$3.3bn investment – higher rates and debt).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** not answered
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** not answered
- Q14. **Which of these options do you prefer? (Central Library decision)** Option3. Strengthen now by increasing rates further (additional 1.79% rates increase).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 3. Sludge minimisation through Council funding (\$147m to \$208m capital investment, above debt limit, and higher rates)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library  
Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital. I live in the Hutt and intend to bike to work once the new harbour path is built. Won't ride now due to safety. I support any initiative that makes cycling safer for me and my family

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)

[REDACTED]

Q19. Do you support the proposed budget?

I strongly support the proposed budget.

Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?

not answered

Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?

WCC needs to take on more borrowing/debt to fund the LTP and not trim services or quality or delay projects. Staying constrained by what increased costs can be passed onto ratepayers is guaranteed to keep infrastructure inappropriate for need and in the longterm will end up costing more.

I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

<p><b>Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)</b></p>	<p>not answered</p>

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

---

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

- Q6. **If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer?** not answered
- Q7. **Oral forum time** not answered
- Q8. **Oral hearing time** not answered
- Q9. **Which of these options do you prefer? (3 waters decision)** Option 3. Accelerated (\$3.3bn investment – higher rates and debt).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** not answered
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** Don't know.
- Q14. **Which of these options do you prefer? (Central Library decision)** Option3. Strengthen now by increasing rates further (additional 1.79% rates increase).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 3. Sludge minimisation through Council funding (\$147m to \$208m capital investment, above debt limit, and higher rates)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library  
Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

**Q19. Do you support the proposed budget?** not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?** not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

- Q1. **Full name:** Rachel Laurenson
- Q2. **Phone number:** not answered
- Q3. **Are you making this submission as an individual or on behalf of an organisation?** Individual
- Q4. **What organisation are you submitting on behalf of?** not answered
- Q5. **Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?** No
- Q6. **If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer?** not answered
- Q7. **Oral forum time** not answered
- Q8. **Oral hearing time** not answered
- Q9. **Which of these options do you prefer? (3 waters decision)** Option 3. Accelerated (\$3.3bn investment – higher rates and debt).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** not answered
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** not answered
- Q14. **Which of these options do you prefer? (Central Library decision)** Option3. Strengthen now by increasing rates further (additional 1.79% rates increase).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 3. Sludge minimisation through Council funding (\$147m to \$208m capital investment, above debt limit, and higher rates)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
 Cycleways  
 Te Atakura (climate change)  
 Central Library  
 Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)** not answered

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

- Q1. **Full name:** Paul Mahoney
- Q2. **Phone number:** not answered
- Q3. **Are you making this submission as an individual or on behalf of an organisation?** Individual
- Q4. **What organisation are you submitting on behalf of?** not answered
- Q5. **Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?** No
- Q6. **If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer?** not answered
- Q7. **Oral forum time** not answered
- Q8. **Oral hearing time** not answered
- Q9. **Which of these options do you prefer? (3 waters decision)** Option 3. Accelerated (\$3.3bn investment – higher rates and debt).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** not answered
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** not answered
- Q14. **Which of these options do you prefer? (Central Library decision)** Option3. Strengthen now by increasing rates further (additional 1.79% rates increase).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 3. Sludge minimisation through Council funding (\$147m to \$208m capital investment, above debt limit, and higher rates)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
 Cycleways  
 Te Atakura (climate change)  
 Central Library  
 Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)** not answered

**Q19. Do you support the proposed budget?** not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?** not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital. A city that works for walking, cycling, and accessibility for all, is a modern city. One that is designed around single-occupancy motor vehicles for the majority (moving them and storing them) is one that lives in the past. Motor vehicle access should be prioritised for those that need to use them, not for those that could use public transport or more active methods but choose not to.

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library  
Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

Hi there, I have been a skateboarder in Wellington for the last 12 years. I have to agree with Kevin regarding what appears to be a push against skateboarding in the city. I think it is an urban design issue as much as anything. I think the harassment of skateboarders using the Pukeahu war memorial park is unfair. It is a public space and no one bats an eye at someone kicking a ball around but skateboarders get chased and trespassed. I understand that it is a place of remembrance but if I lost my life for this country I would rather have a memorial park full of smiling active people than a somber empty overpass. I understand that skateboarding is semi destructive but, with the right advice and incorporating skateboarders in the planning when building new public spaces the damage could be minimised. Think metal edging, hardened concrete not skatestoppers and rough concrete. I don't want a fancy new skatepark. But employ the people who are already doing things in Wellington out of their own pockets (treetops diy in newtown etc). Build skate friendly spots like Auckland (library, Aotea square). I know it doesn't seem like an issue, but for many of the skateboarders I know, skateboarding is the best part of their life. It's what they think about while they are working or studying. It's a means of expression, it's a social meeting point. Thank you for your time. Torrens

Kia ora, I'm deshan - a resident here in Wellington and a skater that has been skateboarding for over 10 years. I have had a brief look at the 10 year plan and am saddened to not see any facilitation for the skateboarding community. This letter will be relating directly to: - the expanding of cycleways - the rebuilding of the city library These are both vital as they are facilitating the shifting of wellingtons infrastructure - this is a place where skateboarders can also be included. My main comment for skateboarding is that I understand for years now skateboarders have been perceived as disrespectful, loud and insubordinate. These particular labels have tainted the sport we love so much. The stereotypes and boxes that we've been placed in are hindering our future and we have to change the mindset we have toward this. The fact that there is no facilitation for skateboarding in the 10 year plan supports these ideas. Skateboarding in Wellington is rough to say the least. There is one park in the central city.. 1. In winter there are practically no indoor or outdoor places we can skate. There have been community efforts to create more spots such as treetops and ghetto spot (behind hospital) but the community can only do so much, we need the help of the council to create new places to facilitate skateboarding. You don't have to look far to realise that skating has been recognised as a real sport - it's inclusion as an Olympic sport now solidifies it's importance. Even if I don't get to enjoy these facilities I want the youth to be able to grow up with adequate resources to support their hobbies and dreams. Skateboarding keeps a lot of youth out of trouble and provides a family to those who don't have healthy relationships with their own. Please just call rich landscapes and get them on the job, they have built a plethora of skateboarding facilities around New Zealand and are bringing aroha to the scene. Sorry about this being a very ill put together letter - it is literally a brainstorm before I have to go into work. Thank you for your time and for reading. Our goals: Make Wellington one of the best cities in the world to be a skateboarder. Top Five Short-term Goals and Priorities 1. Creating a 'Long-term/10-year plan' for the future of skateboarding in Wellington City. This is vital to ensure that mistakes from the past (poor design/construction) are not repeated. Future developments need to be well thought out with proper input and consultation with the broader skate community. 2. Creating a central city skate park easily accessible by using public transport (and without the need for a car) by anyone living in all areas of the greater Wellington region. This can be achieved by upgrading Waitangi Park to cater to all levels of ability (beginner, intermediate and advanced) and types of skating (Park and Street courses), meeting current Olympic standards, and holding local, regional, national, and Olympic qualifying events. 3. Reinstating a mini ramp back inside Kilbirnie Recreation Centre (at the least) until a better solution is found. There are no facilities or anywhere to go skateboarding during the Winter Months or when it is dark, wet, or windy. This is urgent and a top priority as Wellington is highly vulnerable to all the Elements for extended periods. This could easily be achieved by rearranging the current layout and moving 'Tinytown' (for which the ramps were removed) to another arrear inside. Furthermore, if the Council simply agreed to give us the small space required – the skate community could build the ramp themselves (The idea of removing the plastic floor should also be considered). 4. A central city 'Skate Friendly Street Plaza' that provides a safe area for skaters to meet and skate together (and again which is easily accessible by using public transport by anyone living in all areas of the greater Wellington region. This is a vital ingredient for a healthy skate scene. All the great cities worldwide are well known for their skate communities — for example, Barcelona – MACBA. 5. Putting a system in place to ensure opportunities to include 'skateboarding' in future infrastructure projects that could benefit the city are not missed. Achieving the goal of making Wellington city one of the best places in the world to be a skateboarder will require integrating small areas all around the city for street skating and ensuring the city is both accessible and inviting to move around in as a form of transport. This goal is achievable and does not have to be hugely costly. A great opportunity is staring us in the face with current future projects due to happen in the next ten years, including: 1. A network of bike lanes which the Council currently want to spend \$120 million on over the next ten years. These need to stop being classed as 'Bike lanes'. Many other diverse user groups (skateboarders, long-boarders, roller-skaters, scooter, etc.) can benefit from these lanes by removing all patches of rough ground from designs. There is also no reason why they could not be move inviting, fun, and exciting by including pump-bumps and banks. 2. Future redevelopment of public spaces over the next 10-years, including Frank Kitts Park, Te Aro Park, and The Civic Centre (to name a few), could also provide a skate-able area. This could be in the form of a perfect ledge, bench, set of stairs etc.

- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** not answered
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** not answered
- Q14. **Which of these options do you prefer? (Central Library decision)** Option3. Strengthen now by increasing rates further (additional 1.79% rates increase).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 3. Sludge minimisation through Council funding (\$147m to \$208m capital investment, above debt limit, and higher rates)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
 Cycleways  
 Te Atakura (climate change)  
 Central Library  
 Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)** not answered

**Q19. Do you support the proposed budget?** not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?** not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

<p><b>Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)</b></p>	<p>not answered</p>
---	---------------------

---

<p><b>Q19. Do you support the proposed budget?</b></p>	<p>not answered</p>
--	---------------------

---

<p><b>Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?</b></p>	<p>not answered</p>
---	---------------------

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital. I support all initiatives to increase cycling and use of car share networks. Car traffic, moving and parked, has become a huge, dangerous and dirty problem for the city and this will get worse without action now.

I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital. There seems to be a major lack of joined-up planning around the wider Wellington REGION's planning around cycleways. Currently, a large proportion of Lower Hutt residents commute into Wellington. Converting some of these commuters from car to cycle would prevent an immense amount of daily carbon emissions. However the cycle route crosses several jurisdictions (Hutt City, GWRC, NZTA, WCC) with varying mandates, loyalties and plans around cycleways. The cycle route is poorly maintained overall and none of the plans seem to take the others into account. Expensive new NZTA solutions, such as Te Ara Tupua, are wrong-headed in various respects. I would like to see the LTP require WCC to engage across the region around cycle commuter network development.

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

## Toi o Taraika Arts Wellington

### Submission on Wellington City Council LTP consultation, May 2021

#### Who is Toi o Taraika Arts Wellington

Toi o Taraika Arts Wellington is a membership organisation for arts, heritage, cultural and education organisations and independent practitioners in the Greater Wellington region. We seek to provide networking and development opportunities, and to amplify the voice of the region's arts sector.

Our membership includes a number of national bodies such as the Royal New Zealand Ballet, New Zealand Symphony Orchestra and Te Papa; educational institutions such as Toi Whakaari, the New Zealand School of Dance and the New Zealand School of Music; and well established organisations such as Orchestra Wellington, Footnote Dance, and Tāwhiri. The visual arts sector is also well-represented through both public and commercial galleries.

In the past two years, Arts Wellington has deliberately sought to better understand and support the needs of the independent art sector, and amplify independent artists' voice into conversations such as the Covid-19 recovery budget administered by the Ministry for Culture and Heritage and WCC's Covid recovery plans. Independent artists and organisations have different needs to established organisations that can access different funding sources. They do not have recurring infrastructure support. They tend to survive and thrive through project funding, which rarely covers costs like salaries, offices, and core operating costs. They also form much of Wellington's artistic and creative talent pool, and hence the vibrancy of the city. Council's investment decisions impact heavily upon the independent sector.

#### About this submission

Toi o Taraika Arts Wellington is also providing a separate submission on the consultation for *Aho Tini 2030: Arts Culture + Creativity Strategy*. This submission focuses on the LTP but draws some connections between the two consultation documents.

#### Introduction

Since the last LTP consultation Council has made significant investment into developing arts and cultural infrastructure in the city, to ensure there are venues and community facilities that are fit for purpose. This includes beginning the strengthening of St James Theatre, the opening of Waitohi Johnsonville Community Hub, the temporary RNZB building and the start of construction of Tākina. A new Matariki festival, Ahi Ka, has also been supported.

Over this time, Toi o Taraika Arts Wellington also notes the high ongoing engagement from Council's arts and culture team with the local arts sector, and the productive relationship with WellingtonNZ over both promotion of the city's event and artistic offerings, and access to venues.

#### Feedback on Priority Objectives

We note with appreciation the use of the four wellbeings to underpin the Council's strategic direction. Artistic and cultural activity celebrates the diversity of our identities and communities, creates cohesive and connected communities, attracts investment, and drives innovative solutions to climate challenges.

As residents of Wellington, we are all invested in Priority 1, a resilient water infrastructure, and Priority 4, a zero-carbon and waste-free transition.

Priorities 2 and 3 – safe and resilient housing and public transport – are valuable to us not only as residents, but as creators who seek to reach diverse audiences. The arts can help connect communities, and artists themselves are embedded in communities as their homes. Accessibility of the arts has been identified as a focus area in *Aho Tini 2030* and in feedback from our membership we can see that safe and highly accessible public transport makes a major difference in both the working life of creative practitioners, and the ability for audiences to access the city’s artistic and cultural offerings.

It’s excellent to see resilient and fit-for-purpose community, creative and cultural spaces identified as one of Council’s six priority objectives. These facilities not only provide vital spaces for arts communities to make, share and present their work, but also foster connection and creativity, and are a key vehicle through which councils can support the social, cultural, economic and environmental wellbeing of their diverse communities.

Finally, we welcome Council’s commitment to strong partnerships with mana whenua as one of the Plan’s six priority objectives. This commitment is essential for delivering to Te Tiriti, and realising Council’s vision of becoming bilingual by 2040.

### **Feedback on Seven Big Decisions**

Toi o Taraika Arts Wellington submits its feedback on two of the seven big decisions identified by Council.

#### *Decision 5 – Te Ngākau Civic Precinct, Council Office Buildings*

Council has put forward four options for the potential re-use of the Municipal Office Building and Civic Administration Building in Civic Square. Funding is a significant issue, as there’s insufficient debt headroom in the early years of the plan to carry out the capital works.

Option one (Demolish and site developed through a long-term ground lease) and option two (Proceed with base build proposal for public purposes) would both provide opportunity for the National School of Music to be housed within the building. Option one is Council’s preferred option.

We encourage Council to consider that:

- Partnering with another development to undertake a rebuild is a significant cost saving, which could provide opportunity for Council to investment more in the activation and operation of the space (eg, more funds to support creative activity in the newly formed facilities).
- Option 2 would have the buildings fit for use more quickly, and retain the existing heritage buildings

We encourage Council to engage closely with arts communities to determine which option will best serve Wellington residents, and are happy to serve as a forum for these conversations.

#### *Decision 6 – Central Library*

Public consultation has shown high-level remediation of the Central Library building is supported by Wellington residents, and Council has selected this as the preferred option. We note this option is achieved by temporarily exceeding debt limit, which enables Council to open the building in 2025.

We note the seriousness of this decision, and support Council pursuing the option that brings a much-loved and much-used facility back into operation as quickly as possible.

The reactivation of the Central Library space provides opportunities for Council to consider how to best nurture and develop Wellington's strong literary and reading communities, as well as wider usage by arts and creative groups and practitioners. We support the Wellington's literary community's call to increase the visibility and access to Wellington's literary arts alongside the development of the Central Library, so that when the building reopens there is a vibrant and ready community who can amplify engagement with the facility and the art form / stories at its core.

We also encourage Council to work closely with the arts communities to explore how they might work alongside Council and the literary community to feed into the remediation of the Central Library, and how it might be an even more powerful site of gathering and community growth after re-opening.

Again, Toi o Taraika Arts Wellington is happy to support Council's engagement with the arts community through our regular forums.

*Combined comment, Decisions 4 and 6*

The Council Office building and Central Library decisions are inextricable from the larger project to redevelopment Te Ngākau Civic Square, our city's most important spaces for gathering and public life – from art activations to protests. We welcome the vision of a vibrant, welcoming and resilient heart of the city and welcome the public consultation on the framework for the redevelopment in May this year. We encourage Council to continue to aspire to a space for public life that is distinctively and powerfully of this place, centred on the history of mana whenua and this amazing site, and embraced by all Wellington's communities.

**Feedback on decisions coming up in the future**

*Community infrastructure investments*

Council is recognising the need to invest in community infrastructure to support residents as the city grows. We encourage Council to ensure arts communities are well engaged throughout the development of Council's spatial plan, which may lead to changes to the mix of community assets.

Strong engagement with the arts community will help activate Focus Area 3 of *Aho Tini 2030*, "Aho Whenua – Our city as a stage". The arts and creative sector can provide valuable direction and insight into creating facilities that both have flair and are fit for purpose, as well as creating anchor sites in communities that speak to history, heritage and identity.

As Council approaches these decisions, we encourage you to consider:

- How any leasing or partnership arrangements in new or redeveloped facilities may result in changes to the costs of using these facilities. Smaller community-based arts groups and organisations would likely struggle to keep up with cost increases.
- Whether any new or redeveloped spaces could support arts communities by providing spaces where they can make and show their work to audiences
- If spaces or facilities are decommissioned, whether any may be appropriate to repurpose as spaces for artists and arts organisations to make, share and present their work. Affordable studio space in particular is crucial for the retention of artists and practitioners after completing training/study, and the development of sustainable careers.

We also note that for many years the Wellington arts sector has advocated for the need for an affordable mid-sized venue (400-600 seats) and that this consideration has yet to be incorporated in Council plans.

#### *Venues strengthening and upgrades*

The re-opening of St James Theatre and the Town Hall are keenly anticipated: they provide high-quality spaces that can grow and develop audiences, attract investment, increase economic activity, and further strengthen the city's tourism offering.

There is a risk that these project become consumed by the needs of seismic strengthening, and do not respond to the needs of hirers, such as those represented in our membership, and the many and diverse audiences they serve and engage. We request input into the requirements and specifications for the St James and Town Hall – consultation which had been occurring pre-Covid has tailed off. There are concerns that when these crucial sites re-open, they will not be optimised to meet the varied needs of different art forms and audiences.

We welcome Council's planning to determine which other venues also require upgrades and encourage Council to work closely with arts communities to ensure any developments or upgrades are in line with the needs of those who use the facilities.

#### *Combined feedback on venues*

The management of Council-owned venues is currently relatively passive – they are dark boxes waiting to be lit up by the organisers of events and performances. Council may wish to explore the idea of a more active model of engagement for larger venues, aimed at developing relationships, growing community participation, and developing activity outside the times of performances and events.

We also encourage Council to at all times keep in mind the affordability of these venues for arts organisations (and through that same logic, the new and diverse audiences they, and the city, wish to attract). New and refreshed venues are of little value if the arts community is priced out of using them. Council may need to review the revenue targets set for these venues, and ask whether the current profit margins are of more value and urgency than the development of a vibrant and sustainable arts sector and the engagement and growth of diverse and more representative audiences.

We appreciate Council and WellingtonNZ's engagement with Toi o Taraika Arts Wellington, our members, and the wider community through the venues strengthening and upgrade mahi to date, and look forward to continuing this productive relationship.

#### **Further feedback**

##### *Aho Tini 2030: Arts Culture + Creativity Strategy*

A separate submission has been made on Aho Tini. However, we reiterate here that budget has been attached to support delivery on the strategy. Static funding will actually result in less cultural activity being able to be supported and delivered, with nothing to offset the rising costs of living in Wellington, and producing and presenting arts and cultural activities for local and visiting audiences.

**Submission #: 1495**

**Submission of Wellington Skateboarding Association**

To the

**Wellington City Council**

On the

**10 Year Plan**

## BACKGROUND

1. This submission is made on behalf of Wellington Skateboarding Association (WSA).
2. We wish to make an oral submission.
3. WSA is a non-profit incorporated society formed in 2017 with the purposes of:
  - a) Promoting involvement in skateboarding and running competitions and other events;
  - b) Promoting and facilitating the construction of skateparks; and
  - c) Promoting equal access to skateboarding for everyone and advocating against systemic and cultural barriers such as poverty, sexism and homophobia.
4. The WSA represents skateboarders across the Greater Wellington region. We have free membership and engagement with approximately 1100 skateboarders on Facebook and 900 on Instagram.
5. Our submission is primarily focussed on the Council's oversight that the Long Term Plan (LTP) has no provisions for any development and funding of skateboarding over the next 10 years, despite this going against the Council's own recommendations set out in its 2017 Play Spaces Policy<sup>1</sup> and 2020 Skate Engagement Survey<sup>2</sup>. This is a serious missed opportunity to make our city a 'live and play' city.
6. We recommend that the Council review its draft LTP and amend it accordingly to ensure that there is funding set aside for:

<sup>1</sup> [https://wellington.govt.nz/~/\\_media/your-council/plans-policies-and-bylaws/plans-and-policies/a-to-z/play-spaces/play-spaces-policy.pdf?la=en](https://wellington.govt.nz/~/_media/your-council/plans-policies-and-bylaws/plans-and-policies/a-to-z/play-spaces/play-spaces-policy.pdf?la=en)

<sup>2</sup> [https://wellington.govt.nz/~/\\_media/recreation/enjoy-the-outdoors/skate-community-engagement-report.pdf?la=en&hash=3A5ACDF1169EE06C65C50710DF0BDE16F2A21291](https://wellington.govt.nz/~/_media/recreation/enjoy-the-outdoors/skate-community-engagement-report.pdf?la=en&hash=3A5ACDF1169EE06C65C50710DF0BDE16F2A21291)

- a) Construction of a indoor facilities;
- b) Construction of a large inner city skatepark and additional or redeveloped suburban skateparks;
- c) Development of skateable “spots” around central Wellington in conjunction with other urban design and redevelopment projects; and
- d) Funding projects and events that encourage further participation of women and minority groups in skateboarding.

## SKATEBOARDING IN WELLINGTON

7. Skateboarding has been around since the late 1960s and saw two major booms at the end of the 1980s and 1990s. Since the start of the new millennium skateboarding has remained steadily popular.
8. Different styles of skating are all popular and can briefly be described as:<sup>3</sup>

<b>Style</b>	<b>What?</b>
Street	Street style skaters use public spaces such as plazas, forecourts, squares, streets and footpaths. They use typical urban street furniture such as kerbs, benches, rails and walls to ride, grind and slide on.
Park	Park style skaters use dedicated skate parks and spaces designed for skating. Much like street skaters, these skaters use skate park obstacles such as fun-boxes, manual pads, banks to ride, grind and slide on.
Transitional	Transitional style skaters (also known as bowl or vert skating) utilise dedicated skate parks with transitional and bowl elements.
Longboarding	Longboarders utilise public spaces such as wide park paths, streets and footpaths. These skaters do not generally grind or slide on furniture.

9. Scooter riding, which is very popular with younger kids, uses largely the same facilities as skateboarding and the above definitions, bar longboarding, suit scooter riding as well.
10. Skateboarding is not like a traditional sport that requires a team, coach, uniform, rules, playing times and schedules. Skateboarders can skate at any time, with whoever they want, without any rules or regulations in how it must be done. This provides opportunity for people from all walks of life to take part and encourages participation. Additionally, there is also a competitive side which some skateboarders choose to take part in. This competitive side is likely to gain in popularity with the introduction of skateboarding to the Olympics.

<sup>3</sup> Above n1. Play Spaces Policy

11. Because skateboarding is accessible to most people, there is high participation in groups that often face systemic barriers to participation. Amongst 5 to 17 year olds in Wellington who skate, 46% are Māori or Pacifica and 25% come from high deprivation backgrounds.<sup>4</sup>
12. While skateboarding has traditionally been heavily male dominated, participation from women, girls and gender diverse communities has seen a dramatic increase in the last decade. Amongst skateboarders 17 and under, 30% are girls.<sup>5</sup> This is likely to continue to increase with the assistance of current programmes actively encouraging the participation of women, girls and gender diverse communities.
13. Approximately 31% of children aged 5 to 17 years old ride a skateboard or scooter.<sup>6</sup> Anecdotal evidence suggests that children who ride scooters often switch to skateboarding in their teenage years.
14. Skateboarding in Wellington is not just for young people: 54% of adults that skate are aged over 25, with 33% aged over 34 years old.<sup>7</sup>
15. In the late 1980s and early 1990s Wellington had a world-class indoor skate facility called the “skate pit”. This was privately run and located in a large warehouse near where the Sky Stadium is today. At the time skateboarding had not developed in popularity enough to maintain this as a viable business, but it serves as a good model of what should be looked at today for a top of the line indoor facility that could be used for recreational skating, Olympic training and national and international competition.  
(see appendix 1)
16. Since the Skate Pit was removed in the early 1990s, Wellington has lacked adequate skateboarding facilities and has not kept pace with the rest of the country, or the rest of the world. For the most part our skateparks are badly designed, badly built, small, and outdated. This means that these parks never

<sup>4</sup> <https://sportnz.org.nz/resources/active-nz-survey-2018/>

<sup>5</sup> Above n4, Active NZ Survey

<sup>6</sup> Above n1, Play Spaces Policy

<sup>7</sup> Above n4, Active NZ Survey

reach the potential user numbers that they should have. Some are completely disused.

17. Wellington has historically viewed skateboarding negatively and tried to ban or restrict skateboarding from much of the central city. By-laws have previously been introduced in order to ban skateboarding from the roads and then from the footpaths with large fines imposed.
18. In recent years the relationship between skateboarders and the Council has improved dramatically. The Council appears to have come around to the view that skateboarding is here to stay and that it can have a positive impact on the community, but Wellington still falls well behind the rest of the country and the world in terms of skatepark building and incorporating skateable architecture into its urban design.
19. One of the reasons for this lack of investment is that Skateboarding is not funded under sports and instead sits under play spaces. While there is technically nothing preventing further funding as play spaces, we believe that not recognising skateboarding as a sport has led to it not being taken seriously and treated as a 'problem' rather than a high-performance activity.
20. Over the last 20 years Wellington has seen a decline in the number of skate facilities due to the following actions:
  - a) The Kilbirnie Recreation Centre removed its vert ramp and mini-ramp and re-floored its rink with a slippery plastic that makes the facility largely un-skateable. This was the only indoor facility for skateboarding in Wellington.
  - b) The redevelopment of Chaffers Park into Waitangi Park reduced the size of the skatepark by about two-thirds.
  - c) Onslow Bowl was filled in and covered with grass. This was not a Council asset but the city and skaters benefitted from it.
  - d) Karori skatepark was removed completely.

21. In comparison, Auckland City developed a skate strategy in 2001<sup>8</sup> that saw major investment in new skateboarding facilities over the proceeding 20 years. Auckland now boasts high quality skateparks like the Victoria and Valonia parks.

Valonia skatepark, Auckland

22. It is telling of the underinvestment in skateboarding in Wellington that two of the most popular skateparks are DIY projects where skateboarders have had to pay for and build their own parks.

<sup>8</sup> <https://at.govt.nz/media/imported/4989/skatestrategy.pdf>

## WELLINGTON'S SKATEPARKS

23. Wellington currently has seven Council funded skate facilities and two DIY facilities funded by skateboarders. Many of the facilities are largely unusable and not fit for purpose. The facilities are:

a) **Waitangi Park**

The skate bowl is excellent, but other parts of the park have not been well built and areas such as the mini-ramps are largely unusable and rarely skated. It is too compact and not fit for purpose as a large city-wide skatepark.

Waitangi Park

b) **Island Bay skatepark**

The mini-ramp well designed and built is fit for purpose and of reasonable design and quality. The rest of the park (aside from the recent “taco” built with input and design from skateboarders) is badly designed and built. It is largely unusable by all but the most experienced skateboarders and is better suited to bikes.

Island Bay skatepark

c) **Rongotai Skatepark**

Construction was stopped on Rongotai skatepark when it was less than one-third developed. Because of this it is too small and not fit for purpose.

Rongotai skatepark

Rongotai skatepark plan that did not get completed

d) **Karori skate ramps**

The mini ramp is well designed and built and the vert ramp is adequate. There is no need for alterations to what is already there but there is opportunity for the large unused grass area behind the ramps to be developed.

Karori skate ramps

Unused land behind Karori skate ramps

e) **Nairnville ramp**

It is misleading to class this as a skate facility. Around 25 years ago the original wooden vert ramp was cut in half (this does not work with skate ramp design and is akin to cutting a rugby field in half and still calling it a playable field). Around 5 years later the ramp was covered in concrete, quickly cracked and became unusable. It has sat dishevelled and largely abandoned ever since.

Disused Nairnville ramp

f) **Newlands skatepark**

Newlands park is currently being revamped with input from skateboarders and is set to be the best skatepark outside of Waitangi park.

Newlands skatepark

g) **Tawa skatepark**

The obstacles in the park were badly designed and constructed and many parts are largely unusable. It is currently not fit for purpose. The Tawa Residents Association has worked with WSA to develop plans for a new park. Unfortunately there is no Council funding to make those plans a reality.

Tawa skatepark

Tawa skatepark concept design

#### h) **Kilbirnie Recreation Centre**

Through the 1990s this was an excellent facility for skateboarding, containing a vert ramp and mini ramp (where “tiny town is now) and street obstacles (in the rink area). Unfortunately around 20 years ago the vert ramp was removed, the mini ramp destroyed and the rink covered in slippery plastic coating. It is no longer fit for purpose.

Kilbirnie recreation centre

Kilbirnie recreation centre when it used to have a min ramp and vert ramp (background)

Old Kilbirnie recreation centre mini ramp that was removed and destroyed

i) **“Treetops” DIY skatepark**

This is located in Newton/Berhampore and was developed by skateboarders placing ramps and other obstacles in the largely unused overflow carpark for Newtown Park. It has since become one of the most popular skate spots in Wellington. It caters largely to “street” skaters as it doesn’t have mini/vert ramps or bowls. It receives no council funding as a skate facility.

Treetops DIY skatepark

j) **Owen street DIY skatepark**

Another skatepark developed by skaters due to the lack of council facilities. This park sits behind the hospital and contains permanent concrete ramps and obstacles. It suits more experienced skaters, but parts of the park cater to all skill levels. It receives no council funding as a skate facility.

Owen street DIY skatepark

## THE COUNCIL'S PLAY SPACES POLICY AND SKATE ENGAGEMENT SURVEY

24. The 2017 Play Spaces Policy (PSP 2017)<sup>9</sup> lacked information on skateboarding. This was recognised at the time and it was agreed as part of that policy that further engagement with the skate community would take place to “plan, prioritise and consider funding for skate facilities.” This led to the development of the 2020 Skate Engagement Survey.<sup>10</sup>

25. Even without the necessary level of detail, the PSP 2017 was clear that more needed to be put in place for skateboarding. The policy noted:

- a) That the Council has a responsibility to ensure opportunities for play spaces are improved where possible in the public realm.
- b) That diversifying the use and improving the quality skateparks over time will maximise use of these facilities.
- c) That opportunities for development of a network of five skateable “spots” around central Wellington will be explored through an assessment of potential spaces and through inclusion of skate opportunity in the design brief for all new public space upgrades.
- d) That skateboarding will be promoted as an activity that benefits participants and the city.

26. None of these actions have been implemented. By taking no steps to include funding for skateboarding in the LTP, the Council is not even following its own policy.

27. The 2020 Skate Engagement Survey (SES 2020) was a more thorough attempt to engage with the skateboarding community and make recommendations.

28. It is clear from the SES 2020 that Wellington is in need of the following:

<sup>9</sup> Above n1

<sup>10</sup> Above n2

- a) A large, centrally accessible skatepark that caters to all ages and skill levels.
- b) An indoor facility that is usable all year round, particularly in winter when skaters tend to head to car park buildings as the only skateable areas under shelter.
- c) Development of skate friendly spaces in urban design throughout the city.
- d) Improvement of current facilities, many of which are not fit for purpose and largely unusable.
- e) A world class facility to support skaters intending to skate professionally/semi-professionally, on the international stage and/or at the Olympics.
- f) Support and funding to increase the participation of women, girls and gender diverse communities.

29. We were appreciative of the Council for undertaking this survey, actively engaging with skaters and identifying the needs of the community. Unfortunately, without funding through the long-term plan, this engagement becomes largely tokenistic and pointless. The depth of feeling amongst the skateboarding community is very strong because we feel we have been led to believe the Council is finally going to give skateboarding the attention it requires and are now being betrayed.

30. There have already been excellent opportunities that have been missed where skateable spots could have been incorporated into public space upgrades. A good example is the Oriental Bay to Kilbirnie cycleway. The wide footpaths and smooth surface would have been perfect for incorporation of small skateable ramps, benches and other facilities.

31. With the LTP having a large focus on the development of cycleways, the Council should be thinking broader than just cycling. These provide great opportunities for skateboarding facilities.

## RECOMMENDATIONS

32. The 2001 Auckland City Skate Strategy (ACSS 2001)<sup>11</sup> identified a three-tier hierarchy of skate facilities:

- a) One city-wide skatepark – centrally located.
- b) At least three medium size skateparks spread between core regional areas (e.g. North Wellington, South Wellington, Eastern Wellington).
- c) Smaller neighbourhood skateparks as necessary.

33. We largely agree with that assessment. It is easy to see how this could be developed in conjunction with the recommendations of the SES 2020.

34. Additionally, as Wellington moves to more high density building, kids need places to play, exercise and be part of the community. Skateparks are ideal for this because they can be built to a variety of sizes and areas where it would not necessarily be appropriate to put other sports fields or facilities.

35. We suggest the adoption of 6 long-term recommendations and 9 steps that can be taken immediately to invest in the future of skateboarding in Wellington.

<sup>11</sup> Above n8

## Long Term Recommendations

1. The city-wide skatepark be developed into a world-class facility open to all skill levels and used for international competition and as an elite training facility and skate school for beginners.
2. Either the city-wide skatepark or one of the medium sized skateparks be located indoors.
3. New urban design includes skateable spots so that the central city becomes a world-class skate city along the lines of popular “skate” cities like Barcelona.
4. Current skateparks are redeveloped to make them fit for purpose and ramps or other facilities are placed indoors or under shelter wherever possible.
5. Skateparks include lighting and public toilets to make them safer and more accessible to women, girls and gender diverse communities.
6. Funding for skate schools such as Waa Hine skate and Girl Skate NZ to further encourage the participation of women, girls and gender diverse communities.

### **Immediate steps that can be taken**

1. Incorporate a world class skate facility into the Grenada North Sports Hub development or the Kilbirnie Park redevelopment. This could be indoors, see Olympic level and international competition as well as provide a training facility and skate school.
2. Expand Waitangi Park by re-designing the mini ramps and extending the surrounding area.
3. Fund the Tawa skatepark, which has already been designed.
4. Incorporate smaller indoor mini ramps into upcoming projects like the Alex Moore Park Sports Hub building or the redevelopment of Aro Valley community facilities (an adequate size would be approximately 9 x 6 metres).
5. Complete the Rongotai skatepark (there is a full park design but only one-third was built).
6. Give Treetops and Owen Street DIY spots Council designation as skateparks and funding to include toilet facilities, lights, seating and bins, while allowing for skaters to develop their own skate facilities (thereby keeping the DIY aesthetic).
7. Develop the unused large grass area behind the Karori ramps into a “street” skatepark area.
8. Replace the disused Nairnville ramp with a new fit for purpose mini-ramp.
9. Incorporate skate spots into urban design when opportunities arise and follow through on Council policy to incorporate five skateable “spots” around central Wellington and include an assessment of skate opportunities in the design brief of all new public space upgrades.

36. If done correctly, these steps could put Wellington as one of the top skateboarding destinations in the world within ten years. This is not only good for the development of local skateboarding and national competitions but would lead to economic benefit from national and international tourism. Prior to Covid, New Zealand had become a popular spot for international skate teams. This led to many areas of New Zealand featuring in videos on sites like *thrashermagazine.com*, where the videos receive hundreds of thousands of views. Unfortunately, pro-teams have often bypassed Wellington altogether on these tours because of its lack of skate facilities.

37. We hope the Council will take on board our recommendations and make Wellington a world leader as a skateable city.

**Appendix 1 – Wellington’s “Skate Pit” and other indoor facilities**

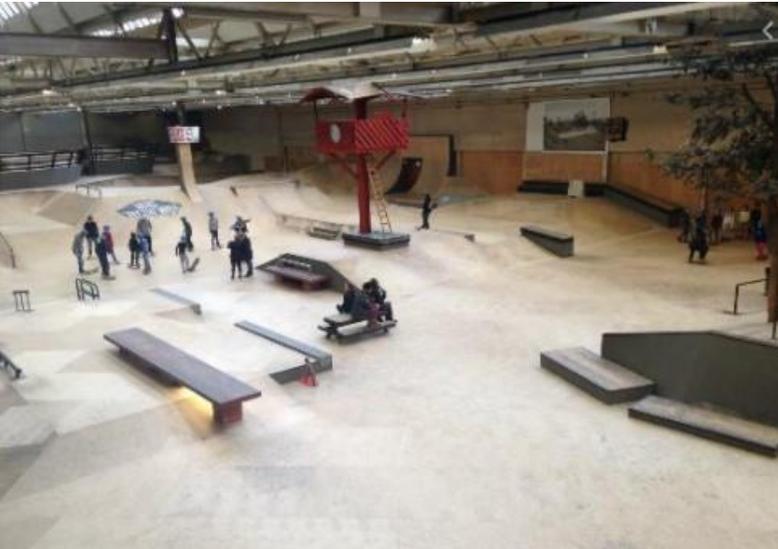

The Skate Pit was a world-class facility containing a vert ramp, spine ramp, mini ramp, snake run and bowl and large street area. While some of the facilities wouldn't meet today's standards, the size of the facility and amount of ramps is what is needed if Wellington is going to provide an Olympic quality facility for Wellington skateboarding.

## **1. Introduction**

Students want to live in a city that is sustainable, creative, and safe. Students want organised and comprehensive public transport, healthy and affordable housing, and a city which brims with job opportunities and culture. An increasing number of students want to see decisions made with and by mana whenua and Māori. The formation, development, and implementation of the Wellington City Council (WCC) Long Term Plan can bring into effect each of these important kaupapa. It is a crucial document, which can help to solve some of Wellington City's most acute issues, from leaking pipes to lacklustre public participation.

Below are the views of Victoria University of Wellington Students' Association, on behalf of the students of Te Herenga Waka - Victoria University of Wellington. We have focused on areas we believe are particularly central to the student experience. In addition, our focus has also expanded to the wider Wellington region, and the groups most impacted by public development and infrastructure. As active members of the Wellington Central City, students are particularly interested in ensuring that those groups most acutely impacted by Wellington's infrastructural systems are highlighted as key stakeholders. This includes our disabled community, tāngata whenua, migrants, renters and, of course, students.

Victoria University of Wellington Students' Association represents all 22,000 students studying at Te Herenga Waka-Victoria University of Wellington. We believe in direct and empowering democracy, and are particularly interested in areas of Wellington City Council's infrastructure such as public transport, water supply, and housing. These areas of key concern recur throughout our submission below, and we hope to continue to work with WCC, and other local bodies, to make genuine change on these ongoing issues.

## **2. Water Ways**

VUWSA believe that the Wellington City Council should undertake option three – accelerated investment. The three waters system operated by Wellington City Council relates to all four of the community outcomes outlined at the beginning of the consultation document - environmental, social, economic, and cultural. Our current system impacts our environment through its pollution of local waterways, directly affecting Wellington's awa and whenua. It's poor structure and leaks are costing ratepayers thousands of dollars, impacting on our city's economic viability. Water is also of deep

significance to our mana whenua and taura Māori, and the clarity of our streams and adequacy of our pipes also contributes to the overall hauora of Wellington's residents.

VUWSA acknowledges the Council's view that there is not enough information currently gathered to understand the full scope of investment needed to accelerate the improvement of Wellington's water ways. While we understand that there is not a clear way forward, VUWSA believes that a robust and modern three waters network is an important requirement for Wellington's environmental and economic sustainability, and should be further prioritised through accelerated investment. By choosing option three, Wellington City Council is committing itself to find robust and creative ways to address issues with our three waters system. It also allows for a more than sufficient section of the overall budget to be put aside to address this issue.

An expanded and more efficient water infrastructure in Wellington presents the opportunity for further development of houses. Students desperately need low-cost housing, and any changes to the current infrastructural standing of Wellington's water ways should be focused on providing further infrastructure to support the development of high-density housing within the central city. It is the responsibility of WCC, alongside central government, to begin addressing this issue immediately, or risk losing the lifeblood of their city – students.

VUWSA supports the Council's focus on reducing future maintenance costs, and believe that accelerating the process of understanding the water ways pipes carbon footprint would help Wellington to meet its obligations under Te Atakura. Another necessary change to our water system in order for Wellington to fall in line with its Te Atakura framework is the improvement of our wastewater system. Our current wastewater system pollutes every stream within Wellington. Not only is this unacceptable for Wellington, as the capital and leading city of New Zealand, this ongoing pollution is disrespectful to our local iwi and hapu, and those who rely on our rivers as a source of cultural connection and livelihood.

VUWSA also supports the continued usage of green space to soak up stormwater. An increase in greenspace is to the general benefit of our city's natural environment, and VUWSA believe that these green areas should also prioritize native flora, to the benefit of our whenua and biodiversity. VUWSA also support the focus on increased planning requirements, as this will work to ensure that there is more adequate future planning around our three water systems. In regards to the overall distribution of funding within the Wellington City Council investment under option three, we approve of the over 400-

million-dollar investment in waste water, as this is a crucial part of fixing wellington's infrastructural issues.

Water and awa hold deep importance in te ao Māori, and to Wellington's tangata whenua and iwi. It is also a section of public infrastructure which impacts every aspect of our city – from environment to public health. Students want to know that they live in a city which is sustainable, and where their Council are taking reasonable steps to protect the future of Wellington's water infrastructure and environment, a city they will look to live, work and contribute to post-study. Given this, it is crucial that Wellington City Council prioritise an accelerated investment in the City's three-waters system.

### **3. Laterals**

VUWSA prefer option two. We believe that the management and upkeep of Wellington's laterals is most efficiently done through the Council.

### **4. Cycleways**

VUWSA's preferred option on building more cycleways is option 3: High Investment.

Whilst a majority of students, when transitioning between campuses, prefer to utilise public transport, VUWSA believes that the current lack of student uptake around cycling is due to routes being inaccessible and unsafe.

We believe that improving the safety of cycleways should be a priority funding allocation. Students who utilise cycleways are prone to unsafe conditions when travelling on sparsely illuminated and narrow cycleways. This risk is exacerbated during the winter when it gets dark much earlier during the day and weather conditions are more extreme.

VUWSA would like to see cycleways well lit, so that the entire route is completely illuminated, and wide enough to comfortably accommodate cyclists and pedestrians. In any instance, cycleways should not come at the expense of pathways. We believe that creating physical and clear barriers separating cycleways and walkways greatly reduces the risk of an accident. Paths purposefully allocated for a particular use avoids traffic confusion and reduces path congestion.

We implore Council to include central city cycling feasibility, within any programme to build more cycleways, as this will increase accessibility for cycling between campuses and the inner-city suburbs. The absence of cycleways surrounding Te Herenga Waka, Victoria University Campuses at Kelburn, Pipitea and Te Aro, doesn't make cycling to university accessible or appropriate. Currently, students who cycle onto campus are required to cycle on the main road with motor vehicles. This is a significant safety hazard for students, particularly during peak hours, and prohibits our ability to opt in favour of cycling to, from and in between campuses.

We do however want to note, that while increasing accessibility and safety of cycleways is of importance, as students continue to get pushed out of the central city, public transport will continue to be the primary mode of transportation and more must be done to make such accessible for students.

VUWSA believes there is great environmental and wellbeing value in any effort to make Wellington more accessible and less car focused.

## **5. Te Ngakau Civic Precinct, Council Office Building**

VUWSA advocates for Option 1: the demolition of the MOB and CAB buildings and construction of new buildings in their place. This is because it would avoid the exorbitant costs involved in strengthening the current buildings, while filling the gap left by the futile buildings in this important Council area.

VUWSA sees a benefit in housing the Te Koki School of Music within the new MOB buildings. This places the NMC in Wellington's cultural and artistic centre, revitalizing the Civic Square. Students are attracted to Wellington as it is the cultural capital, and has a bustling creative sphere. Therefore, we want to affirm the importance of restoring the CBD's cultural institutions.

## **6. Library**

VUWSA's preferred option for Decision 6 is Option 3: strengthening the library now by increasing rates further.

VUWSA supports the option of fixing the library as soon as possible as the loss of the library has been a great detriment to the student community over the past few years. We would like to see the library re-opened by 2025 rather than 2028 as this is a gap that needs to be filled. The library provides a safe, warm space for students to study in and to participate in group work. There are no comparable facilities

in Te Aro that are easily accessible to all students, particularly for those who do not live near their university campus, or who are not university students.

The pop-up libraries that have been implemented in the interim are far from sufficient as they do not nearly have as many resources as the Central Library did. They do not house sufficient seating space, charging ports, and other facilities for students to use. Therefore, they do not spend as much time as desirable in them.

Another reason VUWSA would like to see the library restored soon is that it provided an inclusive space for university students, high school students, tutors and the general public to work in. It is advantageous for those who attend schools and universities or polytechnics that do not have adequate facilities to support all of their students. In this way, it is an inclusive excellent resource for all members of the community, but its absence has been felt by students in particular.

Although it is a politically risky decision, VUWSA would like to advocate for increasing rates to fund the strengthening of the library, rather than surpassing the debt limit (Option 1). We want to see Council make sustainable economic decisions, and leave room for future Councils to use the money they have to tackle important issues that will arise in the future. We do not want to see Council focusing on reducing its level of debt, instead of concentrating on bigger issues at stake.

## **7. Te Atākura**

We support the full funding of the action plan for Te Atākura – First to Zero - Option 3. Anything less than this is simply not acceptable in 2021. Students deserve a city that is fully committed to reducing carbon emissions. We especially support the funding into the climate change response team and urge the Council to work collaboratively with communities on the front lines. Overall, we submit that the plan itself does not seem to go far enough.

Te Atākura – First to Zero should be a primary consideration in every major and minor decision the Council makes, and we have not seen enough of this throughout the LTP document. Sustainable procurement principles should guide infrastructure decisions. Adapting for the climate crisis should not mean that dealing with sludge allows other waste minimisation actions, like a strong focus on the circular economy, to fall by the wayside. A focus on Te Atākura also aligns with improving the reliability, efficiency, accessibility and safety of our public transport system.

## **8. Sludge Minimisation**

VUWSA supports Option 4: sludge minimisation through alternative funding. This is an urgent problem that we strongly support swift action on. We need to reduce waste going to landfill, and stop pumping sludge across the city. 2020 demonstrated the risks of failing to act quickly on this problem. VUWSA understands that action on waste minimisation has been consistently curtailed by the ratio requirements for safe sludge management, and we are urging the Council to plan to avoid further expansion of the landfill and continue exploring better waste management streams, given the limited lifespan of this proposed infrastructure. We support research and planning into source – separated waste water and sanitation systems, as outlined in the submission of zero waste advocates in Wellington.

VUWSA has chosen to support Option 4, as we want the Council to embrace alternative funding streams. However, we have two primary concerns. Most importantly, if the intended funding stream becomes unworkable, we would want reprioritisation of funding to ensure that this project remains viable. It is crucial for creating a city that is focused on including circular loop principles, and to remove the current hurdles that limit proper waste minimisation for other waste streams. Secondly, we do not want the cost of the ratepayer levy being passed onto students through rent increases, given the levy will be collected for thirty years from Year 4.

Overall, we want to see waste systems that work for a city truly committed to Te Atākura - First to Zero. Waste is a climate change issue that goes far beyond emissions from landfill. This looks like embracing resource recovery centres, and addressing construction and demolition waste streams. We would have wanted to see more consultation on these elements, which we know are issues important to students and the Wellington community.

## **9. Key Upcoming Decisions**

### **Affordable Housing**

The current state of housing in Wellington is abysmal, particularly for students, who are often forced to rent low-quality, expensive flats. As rental prices continue to rise and housing availability falls, students are being forced further and further out from the central city, reducing their time and ability to contribute to the culture, economy, and vibrancy of Wellington. The lack of affordable housing is not

only a disincentive to students coming to study in Wellington in the first instance, but also to remain in Wellington permanently after their studies. If Wellington wants to remain a vibrant and student-friendly city, it must make urgent decisions in the area of affordable housing.

We urge the City Council to center the perspectives of students and youth, those who will contribute to the future of Wellington, in their Spatial Plan and Housing Strategy. We commend the work Wellington City Council are undertaking in their Te Mahana (Homelessness Strategy), however believe that the homeless community should be actively involved in these conversations. Any solutions to the problem of homelessness must be co-designed alongside the homeless community of Wellington. Progressive and genuine partnership is the most effective means for long-lasting and progressive change.

### **Let's Get Wellington Moving**

Public transport that is accessible for all is pivotal for Wellington's student's population, who often rely on public transport and safely-lit pedestrianized areas to get around. The former will only continue to be of growing importance to students as they are pushed further out of the City Centre with the ongoing housing crisis. As the WCC implements the Let's Get Wellington Moving programme in the first few years of the LTP, we hope to see ongoing consultation and engagement with those stakeholder groups particularly impacted by the current state of Wellington's public transport, including students. VUWSA supports the ongoing commitment to improving Wellington's transport infrastructure, and the decision to shift to an increased focus on people and culture in the design and implementation process.

### **10. Consultation**

VUWSA would like to acknowledge the extent to which the Wellington City Council have attempted to make their consultation accessible. The long-term plan was broken down into several simple sections, which allowed groups not already engaged with Council processes to gain a fairly robust understanding of the potential changes to our city. We are also deeply appreciative of the Council's attendance of local areas and bodies, and believe that this is a highly accessible and democratic form of consultation.

However, we believe that more work can be done from the Council's end in proactively liaising and collaborating with major community organizations to support them in gathering the viewpoints and perspectives of Wellingtonians. For example, if the Wellington City Council had spent more time proactively engaging with both the University and the Student Association of Te Herenga Waka, student consultation would have deeply benefitted.

We believe that this fits into a wider discussion as to the level of engagement the general public has with WCC. More engagement and co-development of engagement strategies with local community organisations brings the power back to the citizens of Wellington, and ensures consultation and engagement are legitimate and empowering. This is an area VUWSA is particularly interested in further exploring with Wellington City Council.

## **11. Conclusion**

Wellington is a city with great potential to become a student-focused, progressive and environmentally and economically sustainable capital. The current proposals in the Wellington City Council's long-term plan are steps in the right direction towards ensuring that we continue to lead New Zealand in sustainability, cultural vibrancy and citizen satisfaction. Alongside the decisions outlined in the Long-Term Plan, VUWSA believe that the council must take urgent action on a number of key issues. In particular, our current housing crisis, lack of adequate public transportation, and inefficient waste systems.

We urge the Wellington City Council to take into account the perspective of the Wellington student population as they go about solving these growing issues. We believe that the options highlighted within this report will present the best outcomes for students, and will help to ensure that Wellington remains a liveable city for generations to come.

## Submission on the Wellington City Council Long Term Plan From the Living Wage Movement Wellington Network

*We would also like to make an Oral Submission on the Wellington City Council Long Term Plan.*

---

‘Wellington City Council is a diverse organisation. The skills required to run a city are numerous and ever changing. The retention and development of these skills is vital for the council. Remuneration is one part of that plan. **Lifting the lowest wages to that of the living wage rate is one signal that the council values the contribution its people make to the operations of the city.**’ - Wellington City Council<sup>1</sup>

---

<sup>1</sup><https://wellington.govt.nz/-/media/your-council/meetings/committees/governance-finance-and-planning/2013/12/20131211-report-2-implementation-of-a-living-wage-rate.pdf>

## **Your decision to become a Living Wage Employer changes lives**

In 2018, the Wellington City Council became Aotearoa's first accredited Living Wage council. Since then, you have proudly worn the Living Wage trademark, as an Accredited Employer. Wellingtonians working at WCC like cleaners, parking wardens, security guards, library, pool and recreation staff who are now being paid the Living Wage have benefited not only from the security the Living Wage offers but also, through accreditation, the knowledge that they will be paid a wage they can live on for years to come.

Other City Councils in New Zealand are following the lead of WCC. Your proud status as an accredited employer in this way is also part of improving the lives of workers nationwide, alongside other iconic Wellington Employers like Garage Project, MEVO, Six-Barrel Soda, Rogue and Vagabond and so many more.

## **Our submission to the Long Term Plan asks you to continue to champion the Living Wage in our city:**

- **By maintaining Living Wage Accreditation**

By continuing to pay directly employed and contracted workers the Living Wage, committing to this within the Long Term Plan, workers at Wellington City Council continue to have the security the Living Wage offers them. As well as this, WCC continues to be a positive influence on other employers city, region, and nationwide.

- **By supporting local employers to pay their staff the Living Wage through the \$300,000 per annum allocation to the grants fund**

The inclusion of this allocation shows that WCC is serious about making Wellington a Living Wage City. The \$300,000 p/a allocation to top up the wages of staff working events ran by employers receiving a grant will encourage employers to pay the Living Wage and will support workers who work these events, such as those in the arts sector.

- **By working towards all council and council supported events paying the Living Wage**

WCC runs and supports a series of fantastic events each year, such as Diwali, Matariki, and concerts in the park during the summer. By committing to auditing these events, finding out where workers are not being paid the Living Wage, and then lifting their wages, WCC can ensure that all workers at it's events are being paid the Living Wage.

---

## **Conclusion**

We are proud of our city council's progress with the Living Wage. We are proud of the council members and mayor for looking after their workers, and we are also proud of the staff who work to ensure their colleagues are being paid enough to live on. Now it is time to keep up the good work, and champion the Living Wage to make Wellington Aotearoa's first Living Wage city!

---

## **About us**

Living Wage Wellington is a local network of Living Wage Movement Aotearoa. We are Wellingtonians from faith groups, community organisations, and unions. Just like you, we want an inclusive, sustainable and creative capital for people to live, work and play.

# Submission on the Wellington City Council's Long Term Plan 2021-2031

10 May 2021

<b>For more information and further queries, please contact</b>
---

Liam Kernaghan
----------------

## Wellington City Council's Long Term Plan 2021-2031

### 1. Recommendations summary

1.1 Property Council New Zealand (Property Council) generally supports the Wellington City Council's Long Term Plan 2021-2031. Property Council makes the following recommendations:

- Recommend realigning the six priorities for the next decade, and adding a seventh around economic growth;
- Address a number of the concerns highlighted by the Auditor in relation to expenditure;
- Reduce the proposed rates increases over the first two years and spread the increases across the decade more evenly;
- Use more alternative funding vehicles and reduce the debt increases proposed;
- Introduce water meters on residential properties;
- Delay all major decisions regarding waste-water and associated infrastructure until final decisions by the Government and the Council have been made in regards to Three Waters reform;
- Align the cycleway priorities with Lets Get Wellington Moving;
- Ensure more transparency around climate change goals and ensure there are incentive structures in place to help change behaviours;
- Do not strengthen the Central Library as is, and instead re-engage with the community and re-examine other options for library services to be delivered;
- Consider the asset stock and assess whether divestment of unnecessary assets can occur.

### 2. Introduction

2.1 Property Council welcomes the opportunity to submit on the Wellington City Council's Long Term Plan 2021-2031.

2.2 Property Council's purpose is "Together, shaping cities where communities thrive". We believe in the creation and retention of well-designed, functional and sustainable built environments which contribute to New Zealand's overall prosperity. We support legislation that provides a framework to enhance economic growth, development, liveability and growing communities.

2.3 Property is currently New Zealand's largest industry with a direct contribution to GDP of \$29.8 billion (13 per cent). The property sector is a foundation of New Zealand's economy and caters for growth by developing, building and owning all types of property.

2.4 Property Council is the leading not-for-profit advocate for New Zealand's largest industry- property. Connecting people from throughout the country and across all property disciplines is what makes our organisation unique. We connect over 10,000 property professionals, championing the interests of over 600 member companies have a collective \$50 billion investment in New Zealand property.

### 3. Overview

3.1 Property Council is supportive for further investment into Wellington's infrastructure to address some of the long standing issues Wellingtonians have been facing. Many – including three waters and transport – are well traversed in the media and do not need further addressing. However, other issues about the commercial viability of assets and the management of some of our public spaces and services will be addressed throughout this submission.

3.2 Fundamentally, Property Council hopes local and regional authorities throughout New Zealand will get on with doing the core basics well and focus harder on delivering the services communities expect. To that end, Property Council broadly agrees with the six priorities the Council has set for this long term plan. However, we would reorder them as follows in terms of importance to communities and to the property sector:

- Improving three waters infrastructure
- A safe, resilient, reliable transport network
- Wellington has affordable, resilient and safe housing
- The city has resilient and fit-for-purpose community, creative and cultural spaces
- An accelerating zero-carbon and waste-free transition
- Strong partnerships with mana whenua

We would also advocate for a seventh overarching priority – ensuring continued economic development and growth in Wellington. While Council cannot regulate for economic growth, it can create the conditions and the environment where people want to live, work and play within our city. We absolutely agree with the long-term plan at page ten, where it says “Council’s primary role is the provision of core infrastructure – the foundations of a city that allows communities, the environment and businesses to thrive.”

3.3 Property Council is supportive of the \$2.7b capital investment programme across the 10 years. However, we hope the Wellington City Council commits to this level of capital investment even if three waters reform progresses. Investment across many different portfolios is needed to stay ahead of infrastructure capacity issues into the medium-long term.

3.4 We are concerned at a number of the points raised by the Auditor. They will be discussed throughout our submission but, in summary, our concerns include:

- The Council does not use information about the condition of its three water assets to cost and direct its investment in its three waters networks;
- The renewal of assets has been forecast based on the age of the assets, capped by what the Council considers is affordable;
- The Council has not included the remaining estimated costs for social housing of \$403.2 million, or how this will be funded, in the information and assumptions underlying its consultation document;
- The Council has assumed that external funding contributions will be obtained through use of the Infrastructure Funding and Financing Act 2020 to invest in the existing wastewater treatment plant site. The external funding contributions are currently uncertain because funding agreements are not yet in place; and
- Delivery of three waters infrastructure and of all the work planned may, due to other large infrastructure projects within the region and nationally which are competing for

limited resources, be at risk. This, coupled with the uncertainty of Covid-19, could result in the Council failing to deliver its capital programme in future years which could impact on service levels.

#### **4. Rates**

- 4.1 Ratepayers continue to face significant financial pressure due to the impact of COVID-19 pandemic. While New Zealand has weathered the short term implications relatively well compared to our international counter-parts, the continued impacts of our isolated position are still being felt by residential and commercial landlords. As you know, on 25 March 2020 we wrote to all local authorities and the Minister of Local Government recommending councils minimise proposed rates increases to a level that is financially prudent.
- 4.2 We do not support the trajectory Wellington City Council proposes of a first year rates increase of 13.5 per cent and an average of 9.9 percent over the first three years. For many this is a cost which cannot be justified given some of the priorities in the long-term plan (for instance, the Central Library). While rate increases decline over the ten-year period, in our experience this never eventuates.
- 4.3 To give certainty and transparency to ratepayers, we would support a reduced rates increase in the first three years but a more consistent increase across the ten years. Our estimation would suggest rate increases of between 3 and 4 per cent each year for the next ten years should suffice.
- 4.3 Property Council supports the use of targeted rates as a fairer, more transparent funding vehicle to general rates increases – so long as targeted rates replace and do not supplement the overall ratings take.
- 4.4 We are opposed to any increase in the ratings differentials. We note the proposed increases in commercial rates which is higher than residential and, given capital gains in residential, consider this to be inequitable.

#### **Debt**

- 4.5 Property Council supports Councils reducing their debt as a percentage of revenue over the medium-long term. We are not supportive of the Council's decision to allow a breach of the debt limit in years 1–3 to allow the Library to be built over years 1–5. Property Council does not support the rebuilding of the Library and would prefer the Council to re-engage with the community about other options.

#### **Business rating differentials**

- 4.6 As a matter of principle, Property Council has always opposed the business rates differential as a rating tool due to the lack of transparency of funding. In particular, rates differentials are collected as general rates and are added to the overall pool of money, making it near impossible for businesses who pay the rating differential to track the total charges and where it is spent. This results in a lack of transparency for commercial ratepayers as it is unclear what their additional rates are funding and whether it is beneficial to their business needs. Often the level of business rates paid is disproportionate to the level of services received.

- 4.7 Under the Local Government Act 2002, Councils must ensure prudent stewardship of resources and undertake a robust cost benefit analysis for fulfilling their functions. On this basis and in the principle of transparency we request that the Council releases a copy of this analysis publicly so that businesses can assess whether the rating differential is fair.
- 4.8 Our position on transparency is consistent with the 2019 New Zealand Productivity Commission report on local government funding and financing which found that “councils’ rating practices are too often not transparent.” The report recommends councils should make better and more transparent use of their rating and other funding tools.
- 4.9 Abolishing rates differentials is also consistent with Central Government’s 2007 Local Government Rates Enquiry which recommended that in the interest of transparency, rates differentials should be abolished and replaced with alternative funding mechanisms. This includes targeted rates, user charges (i.e. congestion charges), public-private partnerships and special purpose vehicles.

#### Targeted rates

- 4.10 Property Council is supportive of targeted rates that improve certainty and transparency to ratepayers and consumers. We think the Wellington City Council should consider using more targeted rates to help fund projects across the community to provide assurances to Wellingtonians that the projects the Wellington City Council chooses to fund will in fact be funded.

#### Water meters

- 4.11 Similarly, Property Council endorses the use of water meters on residential properties for two reasons. The first being it allows Wellington Water to get a more granular picture of where leakages and over-use exists across the city, and then to deploy better services and resources to fix the leakages and gaps in the infrastructure. Secondly, it allows Wellington Water and Wellington City Council to get a better understand of where the demands on infrastructure exist across the network to better plan for future investment in water infrastructure. Property Council would support the trialling of the use of water meters in the next three year period to measure the benefits water meters would bring to better understanding the demands on our water pipe infrastructure.

#### Alternative funding methods

- 4.12 Property Council advocates for all territorial authorities throughout New Zealand to investigate alternate funding methods. This will more accurately reflect the rating base and allow the Council to deliver much needed infrastructure. Our recommendation is consistent with the Productivity Commission inquiry into local government funding and financing. We support amending the Development Contributions policy and make further comment later on regarding your specific proposals.
- 4.13 Alternative tools may include user charges (e.g. water charges and congestion charging), targeted rates, public-private partnerships and special purpose vehicles. In particular, special purpose vehicles involve debt sitting off the Council’s balance sheet and is helpful for those Council’s that are approaching their debt limits. It has been successfully implemented internationally and became a foundation for the Infrastructure Funding and Financing Bill, which the Property Council supports.

## **5. Investing in upgrading and protecting our city's water networks**

- 5.1 Property Council supports investment in infrastructure networks in our city. The advent of the Three Waters reform is timely for local authorities in terms of their water infrastructure.
- 5.2 Property Council welcomes the substantial increase in the level of three waters investment, including a 23.2 percent operational expenditure and 41.1 percent capital expenditure increase above what was in the 2018 Long-term Plan. We agree with the Council when they admit that "...while there remains a risk with this option that some service levels may continue to decrease and therefore increase operating costs, this option includes additional funding to better understand the condition of the network, and this will improve our ability to renew and invest in the network."
- 5.3 We do note though that Local Government New Zealand has recommended Councils across New Zealand work on the understanding that Three Waters Reform won't be delivered and Councils will maintain responsibility for their water infrastructure. We recommend that Council provide an alternative package – i.e. as if Three Waters reform is delivered – to provide certainty around (a) the ratings requirements in a different model and (b) how that impacts on capital expenditure over the next decade.
- 5.4 At a national level, Property Council is actively engaging with Minister Mahuta and officials on the design of the water entities and their key performance indicators. Property Council believes the success of water services and infrastructure in the future will be dependent on the success and design of the entities themselves. To that end, Property Council will continue to work with central and local government to ensure the entities are fit for purpose.

## **6. Wastewater laterals**

- 6.1 Property Council notes the Council's preferred option to take responsibility for the section of the wastewater lateral beneath the legal road to the property boundary be consistent in the region and New Zealand. We also note the Council believes this will create efficiencies in maintenance by allowing us to plan their renewal alongside wastewater mains.
- 6.2 We recommend decisions on this be delayed until the announcement of the design of the Three Waters entities and further decisions by the Council are made about the long-term management of our three waters infrastructure throughout Wellington. It does not make sense to make a decision on this so close to decisions being announced by the Government.

## **7. Cycleway priorities**

- 7.1 Property Council is supportive of further use of public transport, and cycleways to encourage the public to help contribute to the Government's proposed climate mitigation and adaptation goals.
- 7.2 However, with the uncertainty around Lets Get Wellington Moving, we recommend Council support Option Two over Option Three. As noted by Council, "what we progress and when ... will depend on which routes are delivered as part of LGWM."

To our mind, it makes sense to work towards more certainty around Lets Get Wellington Moving and then commit to further projects. While Option Three would deliver further cycleways currently unplanned, Option Two allows for more flexibility in regards to what the Government and Council might agree to in the long term in regards to Lets Get Wellington Moving.

## **8. Te Atakura – First to Zero**

- 8.1 One of Property Council's priorities is climate change adaptation, mitigation and resilience planning. We are supportive of Council's across New Zealand taking proactive measures to work with their people to reduce emissions whilst helping incentivise local industries and communities to change behaviours.
- 8.2 We are concerned that the Council's proposed Te Atakura – First to Zero is not linked up with the advice that the Government has received from the Climate Change Commission, nor been well canvassed with the public. It has serious repercussions right across our communities and more work should be done with regards to some of the major policy decisions. We note a number of them below:

### Measurement of Council and City greenhouse gas emissions

- 8.3 Property Council is supportive of the Council measuring the greenhouse gas emissions. However, we are concerned the recently legislated powers that Councils now may take a climate lens to consenting will stifle growth and mean Councils will effectively veto projects they do not agree with from a climate perspective. The Emissions Trading Scheme should do the heavy lifting here and, where projects have the appropriate credits available to them, emissions should not be used to decline consents.

### Climate change response team funding

- 8.4 Property Council is supportive of response teams but the current information provided by the Council is insufficient for us to understand the depth and breadth of this team, their powers and functions and what their performance indicators will be.

### WCC EV Fleet project

- 8.5 Property Council supports the Council replacing our vehicle fleet with electric vehicles, over a ten year period. We would like to understand what partnership opportunities exist with central government to support this – including whether used/second hand electric/hybrid vehicles not used in the central government fleet can be re-purposed for local government use.

### Home energy audits, Workplace Travel Planning, Community climate action support and business climate action support

- 8.6 We are broadly supportive of these measures but more detail is necessary to ensure these policy decisions will have meaningful reductions in emissions across the City and our communities rather than just add extra charges and costs on to ratepayers.

## **9. Te Ngākau Civic Precinct, Council Office Buildings**

- 9.1 Property Council supports the preferred decision to demolish both the MOB and CAB buildings and new buildings developed in their place, through the sale of a long-term ground lease and private funding to develop the replacement building. We believe this presents the best opportunity for ratepayers to receive the greatest benefit from the land in the future.
- 9.2 We would want to understand whether interest has been received for long-term ground lease opportunities. Property Council has submitted recently on Christchurch City Council's long-term plan and noted – in regard to empty spaces in the central city – that “good development throughout the City which contributes to its liveability and viability, not hurried development for the sake of it” should be incentivised and that “Council should consider a requirement for some beautification of empty sites” at least in the short term.

## **10. The Central Library**

- 10.1 Property Council submitted on the future of the Central Library in September 2020, saying the Council should do further work and allows ratepayers to have another opportunity for consultation on the preferred option alongside the Long-Term Plan consultation process before determining the future of the Central Library. Our position was – and is still – that demolishing the building and rebuilding a new library is the best use of capital.
- 10.2 We are disappointed the only options being considered is strengthening the current building, rather than looking at different opportunities that exist. These could include:
- The option to rebuild the Central Library and demolish the existing building;
  - Continue with the popular pop-up libraries across the city and provide more bespoke, local community services which make sense to our vast communities; and
  - Considering providing more library services online and reducing the size and scope of the Central Library to reduce costs.
- 10.3 Property Council notes that delaying work on the current site and re-evaluating other options will provide enough headroom to prioritise water infrastructure and avoid unnecessary debt. This is preferable to ensuring services continue to be funded and the Council can maintain its credit rating.

## **11. Upcoming decisions**

### *Social and affordable housing*

- 11.1 One of the Property Council's priorities is delivering housing that enhances communities. To that end, Property Council is keen to see the development of social and affordable housing through various different providers who are best placed to develop and build houses.
- 11.2 We are concerned at the Auditors comment on page 72 that while the Council has “calculated the expected cost for a full capital upgrade and maintenance of its social housing to be \$446 million over the 10-year period of the long-term plan,” that only “\$42.8 million has been included in the Council's budget. The Council has not

included the remaining estimated costs of \$403.2 million, or how this will be funded, in the information and assumptions underlying its consultation document.”

- 11.3 We agree with the Auditor that it is unreasonable to omit these costs and associated funding for social housing from its underlying information. The underlying information should include the remaining estimated costs of \$403.2 million and the Council should address how these costs will be funded. Some costs could be absorbed by accepting some of the recommendations in previous paragraphs.

### Community infrastructure Investments

- 11.4 Property Council supports the Council’s work to look across the current network of community infrastructure to see if Wellington has the right facilities in the right places to best meet community needs now and for the future. Doing this will help Council ensure that Wellingtonians are getting maximum benefit from the assets the Council owns.
- 11.5 We would want to see Council consider divesting some of those assets where they do not meet community or commercial sense. To that end, we would want communities consulted once the work programme has identified the various assets which could be divested from Council ownership.

## **12. Conclusion**

- 12.1 Property Council generally supports the direction the Wellington City Council is taking with its Long Term Plan 2021-2031. We do make the following recommendations:

- Recommend realigning the six priorities for the next decade, and adding a seventh around economic growth;
- Address a number of the concerns highlighted by the Auditor in relation to expenditure;
- Reduce the proposed rates increases over the first two years and spread the increases across the decade more evenly;
- Use more alternative funding vehicles and reduce the debt increases proposed;
- Introduce water meters on residential properties;
- Delay all major decisions regarding waste-water and associated infrastructure until final decisions by the Government and the Council have been made in regards to Three Waters reform;
- Align the cycleway priorities with Lets Get Wellington Moving;
- Ensure more transparency around climate change goals and ensure there are incentive structures in place to help change behaviours;
- Do not strengthen the Central Library as is, and instead re-engage with the community and re-examine other options for library services to be delivered;
- Consider the asset stock and assess whether divestment of unnecessary assets can occur.

- 12.2 Property Council would like to thank the Wellington City Council for the opportunity to provide feedback on the 2021-31 Long Term Plan as it gives our members a chance to have their say in how Wellington is shaped, today and into the future.

12.3 Any further queries do not hesitate to contact Liam Kernaghan, Senior Advocacy Advisor, [REDACTED].

Yours sincerely

*Paul Robinson*

### WCC LONG TERM PLAN

#### Submission on the need for a Street Trees Planting Policy

In an article on the benefits trees bring to our environment the *Listener* magazine reported that Wellington was one of very few capital cities in the developed world that does not have a roadside trees planting policy. While mayor Andy Foster when asked contested that statement, a senior WCC staff member has since confirmed by email the current position:

*WCC doesn't have a policy that specifically just covers roadside trees.*

*WCC does have various strategies, policies, plans and guidelines that help guide decision making on street trees and roadside vegetation. These include:*

- *Verges Policy*
- *Street tree planting requirements in reserves agreements and resource consent for new subdivisions*
- *Central City Framework*
- *Northern Growth Framework*
- *Our Natural Capital includes road corridor planting*
- *Road Encroachment and Sale Policy include consideration of natural values in road stopping assessments*

Apart from the second document listed, the benefits from street tree planting requirements rate only an indirect mention. Mental wellbeing, temperature reduction in built up areas, and the sheer enjoyment of being in tree-lined streets are not considered. None of the other documents provides specific guidance to staff or sets out expectations which would guide communities in discussing with council particular local needs.

As a result, tree planting along city roads is random and sometimes meets with mixed success. In the CBD, wonderful results have been achieved. Obviously, budget constraints prevent such planting more widely across the city, but constraints and priorities need to be defined. Many streets are devoid of trees where verges are available for planting. A constructive framework is needed to beautify such areas; a significant challenge for the council to face.

Within the limits of developer contributions, new streets are being planted. There is a distinct reliance on single species which is perhaps unwise, given that outbreaks of disease both here and elsewhere in the world have devastated single species. Perhaps a guiding policy would have led to a varied approach.

The council's present level of appreciation of roadside planting is illustrated by a most extraordinary statement from a WCC staff member. New streets are now being built in higher areas which regularly experience strong winds. The standard two stake and tie system may fail to give adequate support and saplings are being lost as a result. In a discussion on improving the support system, a council email contained words to the effect that "*we are considering whether our budget will permit the use of three stakes to each tree*". Here we have New Zealand's capital city unable to afford a few wooden stakes! I hope councillors are as stunned as I was on first reading that. (Current plantings along exposed streets continue with two stakes per tree.)

I ask our councillors to align us with other capital cities and give street trees their due by implementing a guiding policy as part of the LTP to move towards a time when Wellington can fairly be described as a tree-lined city. (As climate change continues to turn up the heat, future residents will be grateful.)

I would like to speak in support of this submission.

John Tiley 9 May 2021

## **WCC LONG TERM PLAN**

### **Submission on a Larger Community Centre for Churton Park**

The Churton Park community has for several years repeatedly emphasised to senior council staff, Mayor Andy Foster (meetings in 2019 and 2021) and Northern Ward Councillors that a facility much larger than the present one is needed to provide reasonably for community needs. The Plan must make proper provision for such a facility, acknowledging not only that present needs are not being met but that the planned expansion of the community, both within the present built-up area and in Stebbings Valley, will increase demands even further.

The council's records will show that many regular bookings have been discontinued as user organisations grow and find the present limited space no longer adequate. Some users have compromised and used the present facility even though e.g. no changing rooms are available for performers. Storage space is minimal, with stacked chairs taking up hall floor space. Potential users express interest then decline on discovering how limited the available space is.

On page 57, the draft consultation document pointedly omits any larger community centre for Churton Park even though upgrades for other suburbs including Tawa/Linden are included. Neither is the draft consistent with the provision in the Draft Spatial Plan to "carry out a community centre assessment (for Churton Park) ..... ". That provision refers to a "small" community centre, failing to recognise the reality of current demands, space – or rather the lack of it – being the issue.

As drafted, the Plan unreasonably disadvantages Churton Park residents. I request the Plan include provision for a larger community centre, consistent with the many approaches to the council in recent years, noting also the pressing need which will require completion in the plan's early stages.

John Tiley

# Long Term Plan 2021- 2031 Submission To Wellington City Council

*May 2021*

We would like to appear in person to support our submission

*Contact person:*

Laura Jackson, Chair  
Wellington City Youth Council

c/o Wellington City Council  
PO Box 2199, Wellington 6140

**Wellington City Youth Council**  
Te Rūnanga Taiohi o te Kaunihera o Pōneke

## Introduction

1. The Wellington City Youth Council (Youth Council) welcomes the opportunity to submit on Wellington City Council's Long Term Plan 2021-2031 to help shape the future of Wellington.
2. We recognise that this Plan marks a crucial turning point for Wellington - if drastic measures are not taken in the next ten years to address many of the major issues we currently face, Wellington will face the consequences of inaction with degraded infrastructure and a city struggling to attract talent.
3. As young people in Wellington, we are particularly motivated in ensuring that the decisions made now are not going to negatively impact our futures irreversibly.
4. Youth Council recognises the delicate balance and bind that Council must consider in this Long Term Plan, with competing spending interests, limited additional capacity, debt constraints, and balancing rates rises with household costs.
5. However, significant levels of investment into our city are critical to enabling Wellington to thrive and maintain its competitive position as a powerhouse of vibrancy and activity. Without taking action is not taken in the short term, our future generations will bear the consequences of this decision making irreparably.
6. The submission by Youth Council on the Long Term Plan 2021-2031 will focus on the following points.
  - a. Council must ensure that it delivers safe, accessible, and affordable housing to Wellingtonians as a critical outcome to strive towards, and the Long Term Plan must work to enable this goal.
  - b. Significant investment is needed to improve our three waters infrastructure. Getting safe drinking water to homes, and safely removing wastewater, is fundamental and foundational to the running of a city.
  - c. The development of a Youth Hub in the central city needs to be progressed at pace as a priority for Council and is the primary way that Council can demonstrate its commitment to young people.

- d. Council needs to focus on ensuring that Wellington has a thriving central city built around community, through the redevelopment of Te Ngākau Civic Square and the Central Library.
7. Youth Council acknowledges that not all projects can be fully funded within the spending limitations of the Long Term Plan, and that Council faces tough decisions to balance community views to ensure a viable financial plan for the city.
8. However, we urge Council to focus spending on the areas that are literally bursting at the seams, such as fixing our water systems, improving cycleways, and getting the Central Library back up and running. Wellingtonians are making their views heard and expect to see action.
9. This Long Term Plan must consider how decisions now will affect our future. With this challenge in mind, now is the time for significant funding to be placed into the Te Atakura action plan in order to ensure that we have a liveable environment for future generations to enjoy.

## **Supporting our communities into healthy, accessible homes**

10. Youth Council urges Council to focus more on the ways that Council can support better housing outcomes by increasing high-quality housing supply in Wellington, such as through accommodating an increase in intensification and new developments.
11. Other Council actions underway are expected to boost housing supply into the future. But the Long Term Plan provides Wellington's budget and spending intentions for the next decade, and it is outrageous that there is no focus on housing in the LTP.
12. Council has not budgeted for its requirement to upgrade and invest in City Housing, which is concerning, and we urge Council to take action to both upgrade its own housing stock and invest more to unlock more housing citywide.
13. Housing is an issue that will not go away if we just try to ignore it, and it is irresponsible for Council to ignore the costs of upgrading City Housing.
14. A lack of action on housing now will further lock out young Wellingtonians from the housing market, will put further pressure on already sky-high rents, and will harm Wellington's position as a city into the future.

15. Youth Council has strongly and repeatedly urged more action from Council to do all it can on housing. We again submit this advice.

## **More spending for fixing the water pipes**

16. The state of Wellington's water infrastructure is of serious concern and are embarrassing for a capital city. Youth Council urges Council to keep an unrelenting focus on repairing and upgrading Wellington's literal foundations.
17. Youth Council recognises that a failure to have a future-minded view and make significant long-term investments now will only transfer the fiscal burden to future generations.
18. Due to this, Youth Council strongly advises against 'kicking the can down the road' by simply maintaining current levels of funding.
19. Youth Council supports a balance between Options 2 and 3, to allow for an ambitious and comprehensive investment to address Wellington's failing infrastructure.
20. Youth Council notes that information around Wellington's water networks, and the City's ability to direct investment in water assets to support a growth plan, limit the level of immediate investment that can occur, which in part underscores the Council preference for Option 2.
21. Youth Council understands these constraints, but urges Council to put a more ambitious investment track to address water issues in Wellington, with greater levels of funding from Year 3 onwards in the LTP.
22. By that time, Council must have a better expectation of water asset conditions and an ability to direct investment to support growth.
23. A lack of ambitious funding intentions risks under playing the issues and consequences at stake of having Wellington's water assets failing further - a clear signal must be sent now that Council is serious about addressing Wellington's infrastructure deficit and intends to invest to correct this.
24. A modified Option 2, to allow for more ambitious spending in the out-years of the LTP, allows for Council to get better information before embarking on investment.
25. But Option 2 by itself risks knowing that more investment is needed but neglecting to fund this increase until full details are known about exactly what pipe needs to be replaced.

26. With 30% of water supply and 20% of wastewater pipes already past their use-by date, and all of Wellington’s water bodies failing to meet national standards, the issues are laid bare. These issues require a comprehensive investment.
27. Youth Council has split views on water metering.
  - a. On one hand, Youth Council sees water metering as a way to ensure water conservation is considered, smaller households don’t subsidise larger water users, and a way to monitor, assess, and fix leaks in the water system.
  - b. On the other hand, Youth Council also is concerned about the impact of metering on low income households, larger families, and ownership of water assets.
28. We note that water supply at present is not “free”, but paid for generally through rates without recognition of the use of water of the volume consumed.
29. We also note that privatisation of water provisioning is not possible under current legislation, and that previous analysis from Auckland pointed toward lower income households not being large water users.<sup>1</sup>
30. Overall, Youth Council recommends the Enhanced Investment option as we believe this more or less balances the long term outcomes with the short term fiscal costs.

## Ownership of wastewater laterals

31. Youth Council supports the preferred option, Option 2, which could see Council take ownership of wastewater laterals.
32. Option 2 will bring Council’s policy in line with the rest of the country, and create efficiencies in maintenance.
33. Youth Council supports a Wellington where water assets are well maintained, and Option 2 provides the best ability to see this outcome occur.

---

<sup>1</sup> [https://www.waternz.org.nz/documents/other/111118%20\\_metering%20\\_overview.pdf](https://www.waternz.org.nz/documents/other/111118%20_metering%20_overview.pdf)

34. Option 2 takes the burden off property owners, who may be unaware of their responsibilities or not be able to undertake repairs when needed.
35. Just as importantly, the change in policy would ensure Council can be responsible and proactive in managing all water assets, instead of getting into a position where Council could be hindered from maintaining water assets by disagreements on responsibility of laterals.

## **Building more cycleways across the city**

36. Youth Council strongly supports Council's preferred Option 3 for the cycleways decision.
37. The prioritised full programme will ensure that Wellington gets the high-quality cycleway network it needs, but still remaining within the capacity of the construction sector.
38. In particular, Youth Council supports Council's intention to link Tawa and Johnsonville with a high-quality cycleway. This part of the network is the only break in the cycling infrastructure between Porirua and the Airport, and connecting it up will be a significant improvement for cycling access across the Northern Suburbs and into Wellington as a whole.
39. More generally, Youth Council supports Council's vision in terms of tactical urbanism, active and public transport, and a higher-density city with fewer cars.
40. Safety is often one of the primary reasons why young people don't cycle around Wellington, and the projects included in Option 3 go a long way to alleviate this concern.
41. Of course, if the construction sector had more capacity, and if Council had more funding headroom, Youth Council would also support an accelerated programme of works.
42. However, Youth Council feels that if more construction capacity and funding headroom is found, other unfunded programmes should be a higher priority for that increased capacity - for example, the youth hub proposed by the Children and Young People Strategy.

## **Paying for the Te Atakura action plan**

43. Youth Council wholeheartedly supports the full funding of the Te Atakura action plan, and endorses the preferred option, Option 3.
44. A priority for young people is climate justice and the full funding of the action plan is a must-do in order to see this happen - anything less than full funding is Wellington turning its back on the climate and the commitments we have already made as a city.
45. Young people will live through the effects of climate change, and the city's ability to respond to the impacts of climate change is very important to ensure a sustainable future.
46. Investigating new actions through the full-funding of the action plan will ideally allow for a more just transition for all to a rapidly changing world.
47. Option 3, compared to Option 2, allows Council to take more of a leadership role in taking action through itself as an organisation transforming its operations.
48. Option 3 allows for greater focus on transport emissions from Council's own car fleet by increasing EV purchases and enables better charging infrastructure around Wellington with more EV chargers.
49. Option 3 also provides for greater levels of community funding to support Wellingtonians to themselves reduce emissions - Youth Council also supports this funding.
50. Youth Council views Option 3 as significantly preferable to Option 2 to enable a more comprehensive response and a "leading" rather than "following" position when it comes to undertaking current commitments to reduce carbon emissions.
51. Youth Council strongly opposes Option 1, which would represent a weak attempt to address climate change in Wellington - Wellington needs bold action.

## **Resilience issues to Te Ngākau**

52. Youth Council generally supports Council's preference for Option 1 - demolishing the damaged buildings and having the site developed through a long-term ground lease.

53. We believe that Option 1 is the best balance of financial and earthquake-stability considerations. As Te Ngākau is an area with great potential development, we believe that the time-delay involved in rebuilding the space rather than simply renovating is a worthy sacrifice in comparison to the future benefits a new space could have.
54. The additional steps required to gain resource consent to demolish MOB due to its consideration as part of the Heritage Civic Precinct is seen by Youth Council to be a worthy action in order to achieve the best possible outcome for the space.
55. Although we agree with Council in the preference to demolish and develop the site, we believe that more specification and consideration needs to be taken into which tenants are to fill the buildings in this area.
56. If Council wishes for Te Ngākau to be the creative and musical heart of the city, then the type of tenants which Council leases the land to is crucial.
57. As a starting point, housing the National School of Music in a new MOB building will bring life and music to the square, drawing in members of the community from all walks of life and enhancing the atmosphere of Te Ngākau.
58. Other space within the Te Ngākau square buildings should be leased to tenants with a community focus, such as community groups, NGOs, not-for-profits, or youth-focused entities such as the Youth Hub.
59. Te Ngākau Civic Square has the potential to be a thriving community hub for Wellington City's centre by ensuring that the space is utilised in a way that focuses on all Wellingtonians, rather than simply the businesses which occupy the space during the weekdays.
60. In particular, if the space is leased to businesses who only operate on a Monday-Friday schedule, then Te Ngākau has the potential to become another abandoned area of the city on weekends, as much of The Terrace is outside of traditional working hours.
61. Although the public-benefit sentiments of the suggestion to focus the Te Ngākau redevelopment to specific tenants may be possible through Option 2 (base build proposal for public purposes), the consequences of Option 2 are not desirable.
62. Youth Council believes that it is not acceptable for Council to progress an option which includes both MOB and CAB having extremely poor earthquake ratings. As the land is already unstable and uncertain due to its proximity to

the harbour, it is unacceptable for Council to knowingly develop and invest public funds in its assets only to have an outcome with earthquake ratings of 67% and 50% at best.

63. Option 3 is undesirable as it loses the benefit which Option 2 has of being able to house the National School of Music - Youth Council sees little benefit from Option 3.
64. Similarly, Option 4 does not appear to provide any benefits to the city beyond the lack of spending associated with the sale.
65. Overall, Youth Council supports Option 1 (Council's preferred option), but urges Council to consider mandating or overseeing the type of tenants which these buildings will hold in order to ensure that this space is able to be community-focused and retain its reputation as a musical and cultural hub for the city.

## **Funding the Central Library rebuild**

66. Youth Council supports the preferred option, Option 1, to strengthen the Central Library now by temporarily breaching Council's self-imposed debt limit of 225%.
67. Youth Council has been vocal on a rapid solution to having lost the Central Library, and with it, a key piece of Wellington's social infrastructure for young people.
68. The Central Library is a key landmark and is integral to the cityscape.
69. In previous decisions involving the Central Library, Council has made the speed of action a constant area of importance.
70. To live up to its previous commitments and focus on a rapid resolution on the library, Youth Council strongly submits that Option 1 should be pursued to get the Central Library operational as swiftly as possible.
71. Youth Council considers it to be a better solution to have one project completed, and make other projects wait, than to have many half-complete and unfinished projects across Wellington for an extended period of time.
72. Option 2, with multiple projects taking slower to complete, would see Wellington with an unacceptable level of partially complete works - it is better to concentrate efforts to reopen parts of Wellington's infrastructure sooner by prioritising action.

73. A temporary breach of Council’s debt limit, in the early years of the Long Term Plan, will still leave capital investment space towards the end of the Long Term Plan period for unallocated spending items.
74. Council, and the Wellington community, have identified the Central Library as a critical priority - it deserves the rapid and complete funding demanded by the community to get community assets back into operation as soon as possible.

## **Reducing sewage sludge and waste**

75. Youth Council supports the preferred option, Option 4, to achieve sludge minimisation using alternate funding mechanisms.
76. However, if Option 4 turns out to not be possible, we support Council needing to prioritise funding again to ensure that Option 3 occurs.
77. Youth Council understands that the objective of both Option 3 and 4 are the same, but the funding systems underpinning the options are different.
78. Youth Council supports Council’s focus on the minimisation of sludge and submits that Council should work to reduce overall sewage sludge.
79. Youth Council supports Council’s plan to reduce both carbon emissions and waste as part of Te Atakura and the Regional Waste Minimisation and Management Plan.
80. Youth Council supports Options 3 and 4 as these options work to achieve the plans noted above.
81. Overall, Option 4 achieves the outcome Youth Council desires in the most financially feasible way for Council.
82. However, we also note that Option 4 requires the use of an external fund enabled by the Infrastructure Funding and Financing Act (IFFA) - also known as using a “special purpose vehicle” (SPV) for specific debt-funded projects.
83. Using an SPV would still see Wellingtonians pay, it’s just that the money would be ring-fenced to pay for this project and therefore sit off the Council’s books, allowing for more Council debt funding for other projects.
84. If Council needed to fund Option 3, this would require either higher borrowing (which is limited) or further prioritisation of Council funding.

85. As Council documentation makes clear, Options 1 and 2 do not make significant inroads into addressing already well-documented concerns and costs from current practice around sludge.
86. Youth Council does not find it favourable to keep waste levels to the landfill up so that we have enough rubbish to mix with sludge - it makes a mockery of Wellington's focus to reduce our impact on the environment.
87. Youth Council supports Option 4 (or otherwise 3) to enable a "long-term, strategic investment that would leapfrog short-term options and better reflect our aspirations on carbon and waste reduction."<sup>2</sup>

## Changes to fees and user charges

88. Whilst it is noted that Councillors intend for the current policy of free under 5's admission to Council swimming pools to continue, Youth Council wishes to strongly endorse that this position is maintained both through this planning process and into the future.
89. Introducing a \$3.90 admission charge for under-5s swimming will not just have long-term negative effects on water safety, but it will also disproportionately affect low-income whānau and their tamariki, which is a significant equity issue.
90. The impact of free swimming for under-5s is insignificant for Council's balance sheet, but massive and important for the whānau who need it the most.
91. As the suggestion to remove free swimming from under-5's had been raised as a change to user charges in initial stages of the Long Term Plan, Youth Council implores Councillors to rule this out as a possibility going into the future.

## Conclusion

92. Youth Council generally supports the direction that the Long Term Plan points Wellington towards.

---

<sup>2</sup> Wellington City Council (2021). *Decision 7 Sludge and waste minimisation*. Wellington City Council. <https://www.letstalk.wellington.govt.nz/sludge-minimisation> (Retrieved 27 April 2021)

93. We urge a much greater focus on housing to ensure that Wellington has high-quality housing options that allow Wellington to attract and retain people who add to the vibrancy of the city.
94. Youth Council supports a modified Option 2 for spending on water assets, with a more ambitious focus on water needed to address current failing infrastructure.
95. Youth Council supports Option 2 for ownership of wastewater laterals as a common sense approach to bring Wellington in line with the rest of New Zealand.
96. Youth Council supports Option 3 for building more cycleways across Wellington to ensure that our active transport network allows Wellingtonians to move around safely.
97. Youth Council supports Option 3 for paying for Te Atakura action plan to ensure Wellington is serious about addressing climate change.
98. Youth Council support Option 1, with caveats around the tenants for Te Ngākau, for resilience issues in Te Ngākau to ensure Wellington regains the beating heart of the city
99. Youth Council supports Option 1 for funding the Central Library rebuild, to ensure a swift return for a critical piece of Wellington's social infrastructure
100. Youth Council supports Option 4 for reducing sewage sludge and waste, with an endorsement to take action under Option 3 if funding options for Option 4 prove to not be viable, to enable Wellington to reduce our burden on the environment.
101. Youth Council supports the retention of free swimming fees for under 5s.

## Submission by the New Zealand Centre for Sustainable Cities on the Wellington City Council's 10-Year Plan to 2031

Assoc Professor Ralph Chapman, Professor Philippa Howden-Chapman<sup>1</sup>

10 May 2021

In the attached submission form, we offer our views on the 'Big Decision' Questions 1,3, and 4; in addition we provide comment under Question 8 and some more strategic comment under Question 10. Thank you for the opportunity to provide our views.

## Submission form

### Kōrero mai mō te mahere 10-tau Have your say on Our 10-Year Plan

**All submissions must be received by midnight Monday 10 May 2021**

You don't have to give feedback on every decision – just choose the ones you're interested in. You can only submit once. You can include supporting information along with your submission.

Before you start, read about our big decisions and the other supporting information in this consultation document.

#### **Why we're collecting this information**

Your feedback matters. This plan is about the future of Wellington and it affects everyone who lives and works here. That's why we want to hear from as many people as possible. Your views will inform the next steps we take.

#### Privacy statement

All submissions (including names and contact details) are provided in their entirety to elected members. Submissions (including names but not contact details) will be made available to the public at our office and on our website.

Your personal information will also be used for the administration of the consultation process, including informing you of the outcome of the consultation.

All information collected will be held by Wellington City Council, 113 The Terrace, Wellington, with submitters having the right to access and correct personal information.

**Full Name: Assoc Professor Ralph Chapman; Professor Philippa Howden-Chapman**

<sup>1</sup> Ralph Chapman is Director, Environmental Studies Programme, Victoria University of Wellington, and a co-director of the NZ Centre for Sustainable Cities; Philippa Howden-Chapman is at the Dept of Public Health, University of Otago Wellington, and Director of the NZ Centre for Sustainable Cities.

## Our seven big decisions

The next seven questions relate to the big decisions for the 10-year plan.

- **Decision 1:** Increasing spending on the three waters network to fix the pipes
- **Decision 2:** Taking responsibility for the ownership of wastewater laterals
- **Decision 3:** Increased investment in cycleways
- **Decision 4:** Implementing our Te Atakura: First to Zero action plan
- **Decision 5:** Choosing a plan for earthquake-prone Council Office buildings
- **Decision 6:** Funding the Central Library strengthening and upgrade
- **Decision 7:** Choosing a plan for sludge minimisation

Detailed information on these decisions are on pages 21 to 46 of the Consultation Document.

Question 9 in this submission form is a place for you to comment or provide any other feedback on the decisions.

You are also able to attach further information to your submission at the end of this form.

### **Question 1 – Investment in three waters infrastructure**

There are three different levels of investment in the three waters network to consider. Our preferred level of investment is the **Enhanced** option, which focuses on improving the condition and reliability of the network in an affordable and sustainable way.

Problems with pipes have been a long time in the making, and we cannot fix everything at once. The Enhanced option represents a \$2.4bn investment in our three waters network and is the middle-ground option that we are confident of being able to deliver in this plan. We will be able to review the level of investment in our next Long-term Plan review in 2024, when we will have more information on the network.

A summary of the proposed investment in in the three waters network is on pages 23-27 of the Consultation Document.

**Which of these options do you prefer?**

Yes	Enhanced (\$2.4b investment – the Council’s preferred option)
	Maintain (\$2.0b investment - lower rates and debt)
	Accelerated (\$3.3b investment – higher rates and debt)
	None of these options
	Don’t know

**Question 2 – Wastewater laterals**

Currently residents are responsible for the maintenance of the pipes connecting their property to the wastewater (sewerage) main underneath the road corridor. These are called wastewater laterals.

We propose that the Council takes ownership of the laterals between the property boundary and the sewerage main underneath the road corridor.

A summary of the proposal to take responsibility for wastewater laterals is on page 28 of the Consultation Document.

**Which of these options do you prefer?**

	Take ownership (Council’s preferred option, \$32m investment)
	No change (no change in investment, rates or debt)
	None of these options
	Don’t know

**Question 3 – Cycleways**

Cycleways is an area where we have ambition to seriously lift our game – we’d like to build a network of connected and safe cycleways that allow Wellingtonians to be able to choose cycling as a mode of transport. Our full programme for the network can be viewed at [transportprojects.org.nz](http://transportprojects.org.nz) and if all of the routes were progressed, would be a \$226m investment across the 10 years of this plan.

Our preferred option is a \$45m or 60 percent increase in funding for cycleways than what was planned in the previous Long-Term Plan. It will progress \$120m of the full \$226m programme

We believe the High investment programme option balances the need for increased investment in this area with what is affordable for Council and what we will be able to deliver. It allows time in the programme for robust community engagement and to build capacity in the Council and the sector for the full programme to be eventually delivered.

A summary of the proposed investment to build more cycleways is on pages 30 -33 of the Consultation Document.

**Which of these options do you prefer?**

	High investment programme (Council's preferred option, \$120m capital investment)
	Finish started projects (\$29m capital investment, lower debt and rates)
	Medium investment programme (\$39m capital investment, lower debt and rates)
Yes	Full investment programme (\$226m capital investment, higher debt and rates)
	None of these options
	Don't know

**Question 4 – Te Atakura First to Zero (Climate Change)**

Te Atakura – First to Zero is our response to the climate and ecological emergency we declared in 2019 but it is not yet funded.

Te Atakura is intended to ensure sufficient activity is undertaken in this decade to reduce our emissions. Council can do this by supporting the transport mode-shift projects, as well as encouraging the uptake of electric cars, providing seed funding to leverage businesses and community impact and supporting residents to be motivated to take action.

Our preferred option is to fully fund Te Atakura, which is included in our 5.3% average increase across 10 years.

A summary of the proposed investment in Te Atakura – First to Zero Action Plan is on pages 34 -37 of the Consultation Document

**Which of these options do you prefer?**

Yes	Fully fund the programme (Council's preferred option, \$29.9m investment)
	Low level of funding (\$18.1m investment, lower rates and debt)
	Medium investment with savings (\$25.4m investment, lower rates and debt)
	None of these options
	Don't know

**Question 5 – Te Ngākau Civic Precinct – Council office buildings**

Te Ngākau Civic Square is the musical, creative and democratic heart of Wellington but it has significant resilience challenges.

While we are still working through finalising the Framework for the Square, a specific decision is required in this Long-term Plan with respect to the future of the Council office buildings - the Municipal Office Building (MOB) and the Civic Administration Building (CAB).

As the two buildings are connected, and have similar resilience issues, it is important that the future of them is considered together.

Our preferred option is to demolish and rebuild the MOB and CAB buildings in partnership with private investment through a long-term ground lease for the site.

Combining a MOB and CAB development would enhance this opportunity and significantly decrease the need for additional Council borrowing and ratepayer funding to address these impaired buildings.

A summary of the proposed approach to developing of Te Ngākau Civic Square on pages 38 -41 of the Consultation Document

**Which of these options do you prefer?**

	Demolish and site developed through long-term lease (Council’s preferred option)
	Proceed with base build proposal for public purposes (higher debt and rates)
	Retain and seek to repurpose (higher debt and rates)
	Sell to support development (no debt or rates impact)
	None of these options
	Don’t know

**Question 6 –Fixing the Central Library**

Wellington’s much-loved Central Library was closed in March 2019 following an engineering assessment saying that the way the floor was designed presented a high level of potential failure in a significant earthquake.

After hearing from Wellingtonians in the 2020 consultation, Council agreed to recommend the high-level remediation option to be part of this plan. This option makes the building resilient to future shocks and supports our ability to deliver an adaptable modern library service, while preserving the buildings heritage. It also allows us to mitigate some climate change impacts in the future.

Now there are choices about how to fund the \$187.4m library remediation project, and when the project should take place.

The preferred option, includes the Council agreeing to temporarily breach its debt limit of 225% to ensure the library can be refurbished in the original timeframe and remain in public ownership. Our debt level will remain at 225%, and Council has agreed to accept the breach in the first three years of this plan. This breach will be mitigated by any capital underspend being used for the library project rather than on new projects. Our debt level will be back below our limit by year 4 – 2024/25.

A summary of the proposed investment to fund the fixing of the Te Ngākau Civic Square Central Library is on pages 42 -43 of the Consultation Document

**Which of these options do you prefer?**

	Strengthen now by temporarily exceeding debt limit (Council’s preferred option additional 0.79% rates increase)
	Council to strengthen Central Library later (complete in 2028 instead of 2025, additional 0.83% rates increase)
	Strengthen now by increasing rates further (additional 1.79% rates increase)
	None of these options
	Don’t know

**Question 7 – Reducing sewage sludge and waste**

One of the largest waste categories at the Southern Landfill is wastewater (sewage) sludge. This accounts for about a quarter of the waste that enters the landfill.

Through Te Atakura (our Zero Carbon Plan) and our Regional Waste Minimisation and Management Plan we have formally committed to reducing carbon emissions and reducing waste by a third. Minimising wastewater sludge is a necessary first step to achieving these objectives.

We need to break the link between the Southern Landfill and wastewater sludge and stop pumping sludge across the city, as 2020 highlighted the serious resilience issues and the significant consequences of failure.

Our preferred option is to invest in a sludge minimisation programme through another funding source. This means the project would not be funded by Council, but if it is funded through a Special Purpose Vehicle, a levy of about \$70-\$100 per year will be charged to each ratepayer.

A summary of the proposed investment in sludge and waste minimisation is on pages 45-47 of the Consultation Document.

**Which of these options do you prefer?**

	Sludge minimisation through alternate funding (Council’s preferred option, \$147m-\$208m capital investment funded through a levy, no additional rates increase)
	No change in current practice (no change to investment, rates or debt)
	Invest in technology at Southern Landfill (\$86m-\$134m capital investment and additional 0.39% rates increase)
	Sludge minimisation – through Council funding (\$147m-\$208m capital investment, above debt limit, and additional 1.65% rates increase)
	None of these options
	Don’t know

**Question 8 – Feedback on these decisions**

Do you have any comments you would like to provide around why you selected your preferred option to any of these decisions, or why you don’t support any of the options we proposed? If yes please indicate what decision/s you wish to provide comment on.

Yes	Investment in three waters infrastructure
	Wastewater laterals
Yes	Cycleways
Yes	Te Atakura (Climate change)
	Central Library
	Sludge and waste minimisation
	Te Ngākau funding for future work
	None of these

If this space is not adequate for your comments, please feel free to attach supporting information to the submission. Please be clear what decision you are commenting on.

<p>Q1: Comment on Three Waters investment proposal:</p> <ul style="list-style-type: none"> <li>We consider it vital to improve the condition and reliability of the network in an affordable and sustainable way, for resilience, health and well-being.</li> </ul> <p>Q3: Comment on Cycleways proposal:</p>
---

- A high quality cycling network is a vital part of our City's transport system. With e-biking and e-scooter growth, this investment will help transform city transport.
- It is a critical enabler for carbon emission reduction, health (cleaner air, reduced noise, enhancing physical activity), social development (enabling more community activity and events, enhancing cohesion), and the local economy (congestion reduction, enabling other essential traffic). Taking account of all these co-benefits means the investment will have a high overall return.
- The proposed spend is modest at \$22.6m per year for 10 years, and compared with other strategic investments such as LGWM and other roads-related projects.
- We are confident Council has the capability to gear up quickly to manage this level of investment wisely.

Q4: Comment on Te Atakura (climate change) proposal:

- Climate change has appropriately been declared an emergency by WCC and the Government. If necessary steps to mitigate climate change are not taken urgently, we will not be effectively pulling our weight in a global crisis. The consequences could be hugely challenging for Wellington and NZ.
- We strongly support option 3 (fully funding the programme). Even this option, costed at \$2.08m per year for 10 years, is very modest given the importance of action in this area.
- However, fully funding the programme will be a step forward, *in conjunction with fully funding the cycleways programme* (Q3 above), and exploring additional ways of cost-effectively reducing emissions in the community (for example by supporting public transport and active travel, and discouraging car use)

### **Question 9 – Proposed 10-year budget** (See section “what this plan will cost” p13. of the Consultation Document for details)

Our draft budget, has an average rates increase for the average ratepayer of 5.3 percent after growth across the 10 years of the plan. We also propose setting a limit on how much we can raise from general rates - \$465m for each year across the first 3 years of the plan and, \$630m each year across years four to ten.

The first year of the plan has a rates increase of 13.5 percent (after growth) and there is an average of 9.9 percent (after growth) over the first three years. This is higher than previous plans because of the **key challenges** faced by the city including infrastructure, housing, earthquake strengthening and COVID-19 impacts. Therefore, we now require a step up in the level of rates we charge. Details of the key challenges are on page xx of the **Consultation Document**.

Our proposed budget also represents our highest ever level of capital investment in Wellington. It addresses the need for increased investment in our three waters

infrastructure and transport network and seismic strengthening of key buildings, along with making progress against all our other priority community objectives.

Our debt levels for this plan, including the value of uninsured assets, range from 134 percent to 239 percent of our annual income. Our proposed limit is 225 percent.

We think this is a sensible limit on our borrowing to ensure that the impact on affordability of rates is maintained and leaves enough 'headroom' to ensure we can repay our debt, and respond to expected but unfunded and unexpected future events and opportunities.

**Do you support the proposed 10-year budget?**

	I strongly support the proposed budget
Yes	I somewhat support the proposed budget
	Neutral
	I somewhat oppose the proposed budget
	I strongly oppose the proposed budget
	Don't know

**Question 9.a) – If you stated in Question 1 that you are neutral or do not support the proposed budget. Do you support increasing or decreasing spend?**

	I support increasing spend in the current budget
	I support decreasing spend in the current budget
	I support keeping the budget the same but with some changes
	Don't know

**Question 10 – Any other feedback on what is proposed for the 10-year Plan**

**Future decisions**

The Consultation Document also signals other decisions that are coming up in the time of this plan, but that we do not have enough information on at this stage for a detailed consultation.

**Other projects**

We also have many other services and projects detailed in our Statements of Service Provision.

**Council Fees and charges**

We have also made changes to some of our fees and user charges. More information on these are available on our website: <https://wgtn.cc/ltp> and available at our libraries and service centre.

**Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

The NZ Centre for Sustainable Cities supports initiatives by WCC which take a strategic, long-term view of Wellington City's future, particularly programmes

which will strengthen environmental sustainability, resilience, health and well-being.

For example, we support a high level of spending on Three Waters infrastructure, but oriented where possible in a way which provides greater support for central and city-fringe Wellington areas. This will mean more sustainable and resilient housing development in central and city-fringe areas is facilitated. We also believe in introducing water meters for all houses and properties. Many cities in NZ and abroad already have metering. This is a cost-effective way of finding leaks and encouraging people to reduce their water consumption.

We do not support Council funding programmes that have predictably low returns, such as Convention Centre spending, or spending in support of outer-suburban greenfield developments which necessarily entail a high carbon footprint due to car-dependence. It is important that the Council lean against such carbon-intensive and costly peripheral developments.

Thank you very much for your submission!

# Submission form

## Kōrero mai mō te mahere 10-tau Have your say on Our 10-Year Plan

**All submissions must be received by midnight Monday 10 May 2021**

You don't have to give feedback on every decision – just choose the ones you're interested in. You can only submit once. You can include supporting information along with your submission.

Before you start, read about our big decisions and the other supporting information in this consultation document.

### **Why we're collecting this information**

Your feedback matters. This plan is about the future of Wellington and it affects everyone who lives and works here. That's why we want to hear from as many people as possible. Your views will inform the next steps we take.

### **Privacy statement**

All submissions (including names and contact details) are provided in their entirety to elected members. Submissions (including names but not contact details) will be made available to the public at our office and on our website.

Your personal information will also be used for the administration of the consultation process, including informing you of the outcome of the consultation.

All information collected will be held by Wellington City Council, 113 The Terrace, Wellington, with submitters having the right to access and correct personal information.

**Full Name: Angela Rothwell**

**Contact details:** [REDACTED]  
[REDACTED]

	<input type="checkbox"/> <b>Evening</b>

## Our seven big decisions

The next seven questions relate to the big decisions for the 10-year plan.

- **Decision 1:** Increasing spending on the three waters network to fix the pipes
- **Decision 2:** Taking responsibility for the ownership of wastewater laterals
- **Decision 3:** Increased investment in cycleways
- **Decision 4:** Implementing our Te Atakura: First to Zero action plan
- **Decision 5:** Choosing a plan for earthquake-prone Council Office buildings
- **Decision 6:** Funding the Central Library strengthening and upgrade
- **Decision 7:** Choosing a plan for sludge minimisation

Detailed information on these decisions are on pages 21 to 46 of the Consultation Document.

Question 9 in this submission form is a place for you to comment or provide any other feedback on the decisions.

You are also able to attach further information to your submission at the end of this form.

### **Question 1 – Investment in three waters infrastructure**

There are three different levels of investment in the three waters network to consider. Our preferred level of investment is the **Enhanced** option, which focuses on improving the condition and reliability of the network in an affordable and sustainable way.

Problems with pipes have been a long time in the making, and we cannot fix everything at once. The Enhanced option represents a \$2.4bn investment in our three waters network and is the middle-ground option that we are confident of being able to deliver in this plan. We will be able to review the level of investment in our next Long-term Plan review in 2024, when we will have more information on the network.

A summary of the proposed investment in in the three waters network is on pages 23-27 of the Consultation Document.

#### **Which of these options do you prefer?**

<input checked="" type="checkbox"/>	Enhanced (\$2.4b investment – the Council's preferred option)
<input type="checkbox"/>	Maintain (\$2.0b investment - lower rates and debt)
<input type="checkbox"/>	Accelerated (\$3.3b investment – higher rates and debt)
<input type="checkbox"/>	None of these options
<input type="checkbox"/>	Don't know

## **Question 2 – Wastewater laterals**

Currently residents are responsible for the maintenance of the pipes connecting their property to the wastewater (sewerage) main underneath the road corridor. These are called wastewater laterals.

We propose that the Council takes ownership of the laterals between the property boundary and the sewerage main underneath the road corridor.

A summary of the proposal to take responsibility for wastewater laterals is on page 28 of the Consultation Document.

**Which of these options do you prefer?**

<input checked="" type="checkbox"/>	Take ownership (Council's preferred option, \$32m investment)
<input type="checkbox"/>	No change (no change in investment, rates or debt)
<input type="checkbox"/>	None of these options
<input type="checkbox"/>	Don't know

### Question 3 – Cycleways

Cycleways is an area where we have ambition to seriously lift our game – we'd like to build a network of connected and safe cycleways that allow Wellingtonians to be able to choose cycling as a mode of transport. Our full programme for the network can be viewed at [transportprojects.org.nz](http://transportprojects.org.nz) and if all of the routes were progressed, would be a \$226m investment across the 10 years of this plan.

Our preferred option is a \$45m or 60 percent increase in funding for cycleways than what was planned in the previous Long-Term Plan. It will progress \$120m of the full \$226m programme

We believe the High investment programme option balances the need for increased investment in this area with what is affordable for Council and what we will be able to deliver. It allows time in the programme for robust community engagement and to build capacity in the Council and the sector for the full programme to be eventually delivered.

A summary of the proposed investment to build more cycleways is on pages 30 -33 of the Consultation Document.

#### Which of these options do you prefer?

<input checked="" type="checkbox"/>	High investment programme (Council's preferred option, \$120m capital investment)
<input type="checkbox"/>	Finish started projects (\$29m capital investment, lower debt and rates)
<input type="checkbox"/>	Medium investment programme (\$39m capital investment, lower debt and rates)
<input type="checkbox"/>	Full investment programme (\$226m capital investment, higher debt and rates)
<input type="checkbox"/>	None of these options
<input type="checkbox"/>	Don't know

#### **Question 4 – Te Atakura First to Zero (Climate Change)**

Te Atakura – First to Zero is our response to the climate and ecological emergency we declared in 2019 but it is not yet funded.

Te Atakura is intended to ensure sufficient activity is undertaken in this decade to reduce our emissions. Council can do this by supporting the transport mode-shift projects, as well as encouraging the uptake of electric cars, providing seed funding to leverage businesses and community impact and supporting residents to be motivated to take action.

Our preferred option is to fully fund Te Atakura, which is included in our 5.3% average increase across 10 years.

A summary of the proposed investment in Te Atakura – First to Zero Action Plan is on pages 34 -37 of the Consultation Document

#### **Which of these options do you prefer?**

<input checked="" type="checkbox"/>	Fully fund the programme (Council's preferred option, \$29.9m investment)
<input type="checkbox"/>	Low level of funding (\$18.1m investment, lower rates and debt)
<input type="checkbox"/>	Medium investment with savings (\$25.4m investment, lower rates and debt)
<input type="checkbox"/>	None of these options
<input type="checkbox"/>	Don't know

## **Question 5 – Te Ngākau Civic Precinct – Council office buildings**

Te Ngākau Civic Square is the musical, creative and democratic heart of Wellington but it has significant resilience challenges.

While we are still working through finalising the Framework for the Square, a specific decision is required in this Long-term Plan with respect to the future of the Council office buildings - the Municipal Office Building (MOB) and the Civic Administration Building (CAB).

As the two buildings are connected, and have similar resilience issues, it is important that the future of them is considered together.

Our preferred option is to demolish and rebuild the MOB and CAB buildings in partnership with private investment through a long-term ground lease for the site.

Combining a MOB and CAB development would enhance this opportunity and significantly decrease the need for additional Council borrowing and ratepayer funding to address these impaired buildings.

A summary of the proposed approach to developing of Te Ngākau Civic Square on pages 38 -41 of the Consultation Document

### **Which of these options do you prefer?**

<input checked="" type="checkbox"/>	Demolish and site developed through long-term lease (Council's preferred option)
<input type="checkbox"/>	Proceed with base build proposal for public purposes (higher debt and rates)
<input type="checkbox"/>	Retain and seek to repurpose (higher debt and rates)
<input type="checkbox"/>	Sell to support development (no debt or rates impact)
<input type="checkbox"/>	None of these options
<input type="checkbox"/>	Don't know

## **Question 6 –Fixing the Central Library**

Wellington’s much-loved Central Library was closed in March 2019 following an engineering assessment saying that the way the floor was designed presented a high level of potential failure in a significant earthquake.

After hearing from Wellingtonians in the 2020 consultation, Council agreed to recommend the high-level remediation option to be part of this plan. This option makes the building resilient to future shocks and supports our ability to deliver an adaptable modern library service, while preserving the buildings heritage. It also allows us to mitigate some climate change impacts in the future.

Now there are choices about how to fund the \$187.4m library remediation project, and when the project should take place.

The preferred option, includes the Council agreeing to temporarily breach its debt limit of 225% to ensure the library can be refurbished in the original timeframe and remain in public ownership. Our debt level will remain at 225%, and Council has agreed to accept the breach in the first three years of this plan. This breach will be mitigated by any capital underspend being used for the library project rather than on new projects. Our debt level will be back below our limit by year 4 – 2024/25.

A summary of the proposed investment to fund the fixing of the Te Ngākau Civic Square Central Library is on pages 42 -43 of the Consultation Document

### **Which of these options do you prefer?**

<input checked="" type="checkbox"/>	Strengthen now by temporarily exceeding debt limit (Council’s preferred option additional 0.79% rates increase)
<input type="checkbox"/>	Council to strengthen Central Library later (complete in 2028 instead of 2025, additional 0.83% rates increase)
<input type="checkbox"/>	Strengthen now by increasing rates further (additional 1.79% rates increase)
<input type="checkbox"/>	None of these options
<input type="checkbox"/>	Don’t know

## **Question 7 – Reducing sewage sludge and waste**

One of the largest waste categories at the Southern Landfill is wastewater (sewage) sludge. This accounts for about a quarter of the waste that enters the landfill.

Through Te Atakura (our Zero Carbon Plan) and our Regional Waste Minimisation and Management Plan we have formally committed to reducing carbon emissions and reducing waste by a third. Minimising wastewater sludge is a necessary first step to achieving these objectives.

We need to break the link between the Southern Landfill and wastewater sludge and stop pumping sludge across the city, as 2020 highlighted the serious resilience issues and the significant consequences of failure.

Our preferred option is to invest in a sludge minimisation programme through another funding source. This means the project would not be funded by Council, but if it is funded through a Special Purpose Vehicle, a levy of about \$70-\$100 per year will be charged to each ratepayer.

A summary of the proposed investment in sludge and waste minimisation is on pages 45-47 of the Consultation Document.

### **Which of these options do you prefer?**

<input checked="" type="checkbox"/>	Sludge minimisation through alternate funding (Council's preferred option, \$147m-\$208m capital investment funded through a levy, no additional rates increase)
<input type="checkbox"/>	No change in current practice (no change to investment, rates or debt)
<input type="checkbox"/>	Invest in technology at Southern Landfill (\$86m-\$134m capital investment and additional 0.39% rates increase)
<input type="checkbox"/>	Sludge minimisation – through Council funding (\$147m-\$208m capital investment, above debt limit, and additional 1.65% rates increase)
<input type="checkbox"/>	None of these options
<input type="checkbox"/>	Don't know

## **Question 8 – Feedback on these decisions**

Do you have any comments you would like to provide around why you selected your preferred option to any of these decisions, or why you don't support any of the options we proposed? If yes please indicate what decision/s you wish to provide comment on.

1.	Investment in three waters infrastructure
	Wastewater laterals
2.	Cycleways
3.	Te Atakura (Climate change)
4.	Central Library
	Sludge and waste minimisation
	Te Ngākau funding for future work
	None of these

If this space is not adequate for your comments, please feel free to attach supporting information to the submission. Please be clear what decision you are commenting on.

1. This is promising. How does this plan interact with the GWRC LTP?
2. We support cycleways entirely. We'd like to go further – to see a Complete Streets approach implemented throughout Wellington. Or if not throughout all of Wellington, then how about in Mt Victoria??  
The proposed change to enforcement policy around cars that park on the footpath has illuminated opportunities for streets to be redesigned so that they can more successfully accommodate all modes of transport, and all users.
3. The Te Atakura plan is disappointing. EVs are still the same size as their petrol or diesel counterparts on the road, so there's no sense of true modal shift – we need more space for safe and connected cycleways and pedestrian spaces, and we need to be able to completely revamp and redesign areas like the Golden Mile – as LGWM has already concluded. How does this plan interact with the GWRC LTP, LGWM and WCC's own Spatial Plan?
4. We're very keen to see the central library rebuilt and made available to the public again. We miss it for so many reasons – the books, films, archives and so forth, the internet services and availability of computers for public use – but also, and maybe even more importantly, as a social hub for people of all ages and interests. The central library was a great place to meet, play, create and discuss, as well as a refuge from grotty weather for our vulnerable residents.

**Question 9 – Proposed 10-year budget** (See section “what this plan will cost” p13. of the Consultation Document for details)

Our draft budget, has an average rates increase for the average ratepayer of 5.3 percent after growth across the 10 years of the plan. We also propose setting a limit on how much we can raise from general rates - \$465m for each year across the first 3 years of the plan and, \$630m each year across years four to ten.

The first year of the plan has a rates increase of 13.5 percent (after growth) and there is an average of 9.9 percent (after growth) over the first three years. This is higher than previous plans because of the **key challenges** faced by the city including infrastructure, housing, earthquake strengthening and COVID-19 impacts. Therefore, we now require a step up in the level of rates we charge. Details of the key challenges are on page xx of the **Consultation Document**.

Our proposed budget also represents our highest ever level of capital investment in Wellington. It addresses the need for increased investment in our three waters infrastructure and transport network and seismic strengthening of key buildings, along with making progress against all our other priority community objectives.

Our debt levels for this plan, including the value of uninsured assets, range from 134 percent to 239 percent of our annual income. Our proposed limit is 225 percent.

We think this is a sensible limit on our borrowing to ensure that the impact on affordability of rates is maintained and leaves enough ‘headroom’ to ensure we can repay our debt, and respond to expected but unfunded and unexpected future events and opportunities.

**Do you support the proposed 10-year budget?**

	I strongly support the proposed budget
X	I somewhat support the proposed budget
	Neutral
	I somewhat oppose the proposed budget
	I strongly oppose the proposed budget
	Don't know

**Question 9.a) – If you stated in Question 1 that you are neutral or do not support the proposed budget. Do you support increasing or decreasing spend?**

	I support increasing spend in the current budget
	I support decreasing spend in the current budget
	I support keeping the budget the same but with some changes
	Don't know

**Question 10 – Any other feedback on what is proposed for the 10-year Plan**

**Future decisions**

The Consultation Document also signals other decisions that are coming up in the time of this plan, but that we do not have enough information on at this stage for a detailed consultation.

**Other projects**

We also have many other services and projects detailed in our Statements of Service Provision.

**Council Fees and charges**

We have also made changes to some of our fees and user charges. More information on these are available on our website: <https://wgtn.cc/ltp> and available at our libraries and service centre.

**Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Thank you very much for your submission!

### The WCC Long Term Plan: Submission form

dsport is a **charity** managed by a board of elected volunteers, which was established in 1969.

**Our vision is for Wellington to be a diverse and inclusive region.**

dsport is underpinned by the principles of **inspire, enable, achieve**

1 in 4 people in New Zealand identify as disabled

95,000 young people (0-14 years)

We inspire disabled people to believe in themselves. To aspire to being involved in sport and active recreation. To dream.

We enable disabled people to get into sport and active recreation. We don't believe in can't. Rather how can we. How can we make this fun and make this work? We persevere and we build strength collectively.

But more importantly, our members achieve. They overcome adversity, find work-arounds and creative solutions to achieve. And for some, they will achieve their dreams.

Sport New Zealand (2018) in their *Value of Sport* report stated "sport and active recreation creates a happier, healthier people, better connected communities and a stronger New Zealand" and that sport is 'in our DNA'.

25 percent of New Zealanders identify as disabled (Statistics New Zealand, 2013).

Article 30 of the United Nations Convention on the Rights of Persons with Disabilities (UNCRPD) explicitly requires countries, including Aotearoa New Zealand, to take appropriate measures to encourage and promote disability-specific sport.

In the recently published Sport NZ strategic direction *Every Body Active* (Sport New Zealand, 2019b), **disabled people were identified as a priority group, given their lower participation rates in sport and active recreation.** Peter Miskimmin, CE of Sport NZ has stated “we want a system that is equitable and where disabled people can be as active as non-disabled people”.

We are a membership-based organisation, with 200 disabled people (aged 5 years and older), their family and whanau as members.

### **Cost is a barrier**

On reviewing the Wellington City Council 10-year Plan, we note the cost of sport and recreation facilities, such as the ASB Sports Centre, are proposed to rise. While we recognize the need to maintain these community sport and recreation assets and services, we find the proposed increase in costs somewhat of an insult.

Recently dsport presented to the Council on the Class 4 Gaming Sinking Lid Proposal and identified the issue of cost as a barrier to participation for disabled people. dsport argued against this proposal as we, like many small community-based sport and recreation organisations, rely on Class 4 funding to deliver our programmes and services.

With the recent decision by Council to implement the Sinking Lip Policy, we feel the impact on our organization to deliver free or low-cost services to our members will be compromised even further with the Council’s proposal to increase user charges.

We argue by these decisions, the Council has essentially not only constrained our income streams but also plans to burden us with increased costs. **This policy squeeze from both sizes does not, in our opinion, substantiate the Council’s position of putting community wellbeing at the centre of their planning.**

It is our contention that these dual decisions, for our community (disability sport), will not necessarily make Wellington more friendly and accessible, nor will it ensure it is inclusive, thereby failing the strategic direction of the Council.

We implore Wellington City Council to consider how the multitude of overlaying decisions such as the LTP will impact on disabled people in Wellington. We do not wish to see our members and other disabled people marginalized further due to decisions which neglect to address the flow-on implications for these members of the community, such as cost becoming a barrier to participation and community engagement.

### **Facility Development**

dsport understands and acknowledges the desire to redevelop some Council services and amenities, such as the Central Library.

While recognizing the cost of these projects have been establish, we raise with the Council the need to ensure these are fully accessible for ALL USERS – regardless of mobility and ability – and request that disability groups be engaged and consulted during the design phases to ensure facilities are fit for purpose. dsport is happy to assist in such an endeavour.

We welcome the opportunity to work with the Council to investigate options to better improve the lives of disabled people in Wellington – be it sport or recreation facilities and services or amenities such as the Central Library.

Yours sincerely

**Sent:** Friday, 7 May 2021 4:37 PM

**To:** Mayor Andy Foster; Fleur.Fitzsimmons@wcc.govt.nz; Councillor Laurie Foon; Councillor Jenny Condie; malcolm.sparros@wcc.govt.nz; Deputy Mayor Sarah Free; Councillor Sean Rush; Councillor Teri O'Neill; Councillor Iona Pannett; Councillor Nicola Young; Councillor Tamatha Paul; Councillor Diane Calvert; Councillor Rebecca Matthews

**Subject:** Increasing Car Parking Fees

Dear Mayor and councillors, like so many concert, theatre, public meetings, ie Probus, U3A, ESU that I attend everyone is very upset about the plan to increase parking fees and can imagine the retailers are also very concerned about this as there will be a reduction in shoppers from Hutt Valley, Tawa, Petone, etc.

I would like to attend the council meeting and would like to be advised when it will be.

Yours sincerely

Pauline Swann

# Wellington City Council Long Term Plan 2021-31

Submission by Tawa Community Board to Wellington City Council  
10 May 2021

## Introduction

The Tawa Community Board is a Community Board under the Local Government Act and Wellington City Council with elected members representing the northernmost suburbs of Wellington City comprising Tawa, Takapu Valley and Grenada North.

We wish to make an oral submission to the Councillors.

## Comments on the Council's proposals for Decisions 1-7

### 1. Three waters infrastructure investment

The Tawa Community Board supports the Council's preferred option.

We note in particular the Main Road Tawa stormwater upgrade project.

Wellington Water informs us this is planned for an October 2021 start, assuming funding goes ahead. Businesses and property owners are very keen for this to occur as soon as possible. It would be unacceptable for this project to be stalled.

### 2. Wastewater laterals

The Board supports the Council's preferred option. We see this as an equity issue, and we believe the Council's proposal to take ownership of wastewater laterals will alleviate a significant burden on property owners.

### 3. Cycleway investment

The Board supports the Council's preferred option.

We strongly support the included Northern connections package and its Tawa-Johnsonville cycleway link. The current lack of safe access by bicycle from Tawa to Johnsonville and then on to the CBD leads to increased pressure on local roads and greatly reduces the likelihood of residents switching from car to bicycle for this route.

#### 4. Te Atakura First to Zero

We support the Council's preferred option.

Young people have made their wishes loud and clear in recent years. We need to act decisively and quickly on climate change.

The Board particularly supports the Council's initiative to increase the number of public EV chargers across the city, noting that there are no public EV chargers in Tawa, despite the high uptake of electric vehicles in our community.

#### 5. Te Ngākau Civic Square

We support in principle the Council's preferred option.

However we have great reservations as to the merits of strengthening existing buildings. Regardless of what the buildings are used for, the Community Board does not think it wise for the Council to risk its own already-stretched capital in an area prone to sea level rise. We suggest that, as long as Council maintains control over the design of the buildings, and as long as public facilities like libraries are not privatised, a public-private partnership could be an appropriate option.

#### 6. Central Library timing of capital investment

We support the Council's preferred option. Getting the Central Library open as soon as is practicable is important for the wellbeing of all Wellingtonians, and especially young people. College age students in our area have repeatedly advised us on the importance of spaces for young people to exist in and engage with, and a strengthened and revitalised Central Library will be a great step in that direction.

#### 7. Sludge and waste minimisation

We support the Council's preferred option.

Tawa residents are connected to the Porirua wastewater treatment system, which we understand already uses modern technology in sludge minimisation. If this can be realised in Wellington through alternative funding streams, then that achieves the environmental burdens without increased impact on ratepayers. Either way, we support the initiative.

### **Other issues affecting Tawa in the Long-Term Plan**

#### 8. The Community Board notes the Council's intent to upgrade community facilities in Tawa and Linden.

We request early input from the Board and the community, as to the best way to allocate these funds and look for innovative solutions to our community needs.

There are many and varied needs within Tawa and Linden, and we need to focus on helping the people who need the most help.

We also need good information on which to base decisions. The Board has requested a list of Council assets in our area, including their age and likely upgrade/replacement cycle.

9. The Tawa Community Board strongly supports the proposed installation of a public toilet in Linden. The Board has requested this for many years. We look forward to also seeing engagement with the Linden community on the nature and delivery of the project.
10. The Tawa Community Board strongly supports funding of a Grenada North community sports hub. We believe that the facility will be a valuable asset for a community long-underserved, and we look forward to working with Council to ensure that the facility is delivered in a way that most benefits the community. Given Grenada North's connections to the Metlink bus network, we urge Council to work with Greater Wellington to make the facility as accessible as possible.
11. The Board commends Councillors for rejecting the proposal to re-instate fees for under-5s swimming at Council pools. Tawa Pool is an important asset for our community, and the reinstatement of fees would have severely limited opportunities for our youngest tamariki to gain confidence in the water.
12. We note that funding for the operationalisation of the new Spatial and District Plans is not included in the 2021-2031 Long-Term Plan, and provision is not likely for another three years. The National Policy Statement on Urban Development is already in force. We are uneasy at the lack of provision for planning and funding its implementation for another three years (the 2024-2034 Long-Term Plan).

Local government needs to play a more involved role in facilitating intensification, perhaps through an urban renewal structural plan concept that encourages development in specific areas with amalgamation of titles into larger blocks, the inclusion of green areas, lane-ways and public facilities.

We urge Council to think carefully about where funding can best be spent.

Tawa's connections to public transport make it an ideal area for suburban growth.

We believe Council itself has a role to play in making the Plans real, including considering whether Council land can be shifted to mixed-use; for example, a community centre / hub on the ground floor, high-density housing on top.

We understand that some residents will struggle with large rates increases. However, we acknowledge the urgent need for the large programme of capital investment outlined in the Long Term Plan.

The Tawa Community Board looks forward to seeing the implementation of all the recommendations of the recent governance review. We urge Councillors to ensure everything possible is done to ensure this, both as individuals and as a group, and that Wellingtonians can clearly see the changes made. This will greatly increase the confidence in the Council's decisions and oversight of the Long Term Plan in the years ahead, and ensure that funding is wisely and effectively used.

On behalf of the Tawa Community Board

# Berhampore Community Association

## Our Long Term Plan

### Improving Berhampore Village

Berhampore Community Association represents the community of Berhampore in the Paekawakawa ward of Wellington City, between Newtown and Island Bay.

We do not usually provide submissions on Council topics as we recognise our community has diverse views which can be hard to summarise, but we do encourage our community to attend consultation meetings and provide feedback to Councillors.

Our Long Term Plan submission is an exception to this as we feel there is a desire by our community for the Council to live up to promises made regarding the Berhampore village upgrade project over the years.

## History

Berhampore village is on the main arterial route from Wellington city to the large and growing suburb of Island Bay to the south. Recently new businesses have begun to recognise the growing popularity of Berhampore and we have had a new pub, deli and cafe, and sustainable kitchenware and dressmakers shops open up in the last two years.

## Wellington City Council Consultation

Council consultation documents from our archives show that there was a desire for Berhampore village to be improved in terms of traffic safety in 1984, 37 years ago.

The Newtown Connections active transport project started consulting in 2014. It has yet to deliver street changes to any of the proposed areas.

Council engagement events in recent years were really well attended by our local community, leading to excellent feedback on potential changes for the village centre and the surrounding streets, your own website repeats this:

*"People told us in 2018 as part of the Newtown Connections engagement that Berhampore village is a special area and needs attention."* - <https://www.transportprojects.org.nz/current/newtown-connections/berhampore-village/>

Wellington City Council visited the community again in March and May 2019 and gathered feedback. Overwhelming local feedback pinpointed the following themes:

- 81% of the comments received were saying things need to change
- 38% of comments were about reducing the safety impacts of traffic
- 31% of comments about improving the space for people

The two most popular comment themes:

- A neighbourhood for people, prioritise pedestrians
- Allow for people riding bikes - safe bike paths

Full feedback here:

[https://www.transportprojects.org.nz/assets/Modules/DocumentGrid/Berhampore-dropins-feedback\\_All2019.pdf](https://www.transportprojects.org.nz/assets/Modules/DocumentGrid/Berhampore-dropins-feedback_All2019.pdf)

Berhampore Community Association participated in this work in a volunteer capacity. A timeline of work our community put in is included as Appendix 1 to this submission. The last correspondence between Wellington City Council and the previous Berhampore Community Association Secretary was on **7th November 2019**.

The community has provided Wellington City Council with a mandate for change in Berhampore and stepped up, participating in consultation in good faith. There is a growing feeling that the rounds of consultation were a “waste of time” and people feel “ignored”.

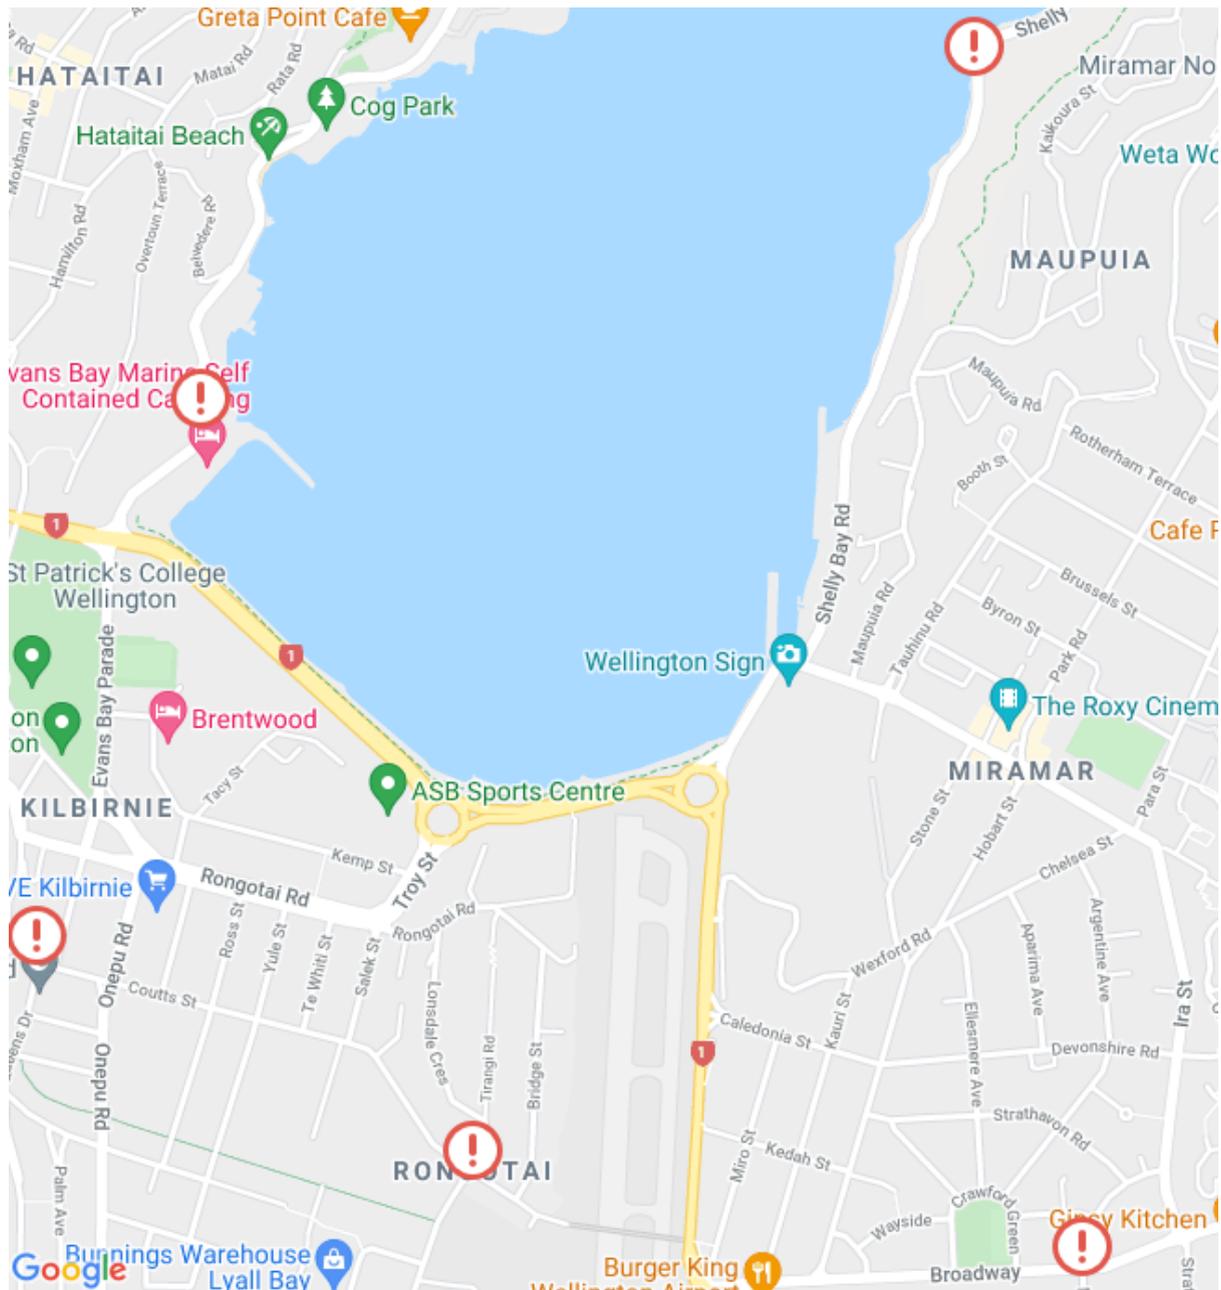

## Berhampore - the poster child for near-misses

A key theme in feedback during the consultation process was the traffic danger present in Berhampore village. This is backed up by evidence collected on a public web page.

Data collected via the dangerspace.nz website shows a sample of the incidents recorded in the project area

Comparison area - Evans Bay including Miramar shops:

Such a high prevalence of traffic danger does not suit a suburb where tamariki travel through this area to SWIS to the north east and Berhampore Primary in the west.

A detailed list of near-misses in the Berhampore village area is included as Appendix 2 to this submission.

## Recent Council Action

We would like to thank the Council for recent safety improvements to Britomart Street in Berhampore in March/April 2021.

We have had a 30kph limit added to the village centre, but two sets of traffic signals and a steep incline mean that this is routinely ignored by drivers. Traffic signal phasing often gives drivers a double green light through the village area, which exacerbates speeding.

Traffic speeds and the inconvenience of crossing the street leads to Berhampore village being a much less pleasant place to spend time than other village centres around Wellington.

## Wellington village centres

Other village centres around Wellington have much better facilities for pedestrians crossing, and lowering traffic speeds.

### Takapū - Tawa

2x raised crossings in the shopping area on an arterial route

### Paekawakawa - Island Bay

Our southern neighbour and just down the road, on the same bus route:

- Raised table crossings
- 2 Full road-width raised zebra crossings
- Kerb build outs

## Pukehinau - Kelburn

Zebra crossing along the main street

## Short term interventions

Possible short-term interventions, subject to community co-design:

- Shorten signal cycle lengths to ensure drivers stop more often in the village instead of speeding through
- Speed cushions
- Raised table crossing of Adelaide Road
- Add fourth pedestrian crossing on the northern edge of Britomart, Herald Sts & Adelaide Road

## BCA - Our Ten Year Plan

Berhampore Community Association's vision for our village centre is a quieter, slower space for the community to meet, enjoy food and drink at our fantastic local venues and a great place to grow up, with a village centre that kids can visit and travel through safely. A place where people are prioritised over traffic flow.

## Appendix 1 - Berhampore Village Project timeline & correspondence with Wellington City Council

Date	Correspondence type	Content
23 March 2019	Community drop-in	<a href="https://www.transportprojects.org.nz/assets/Uploads/Berhampore-village-drop-in-feedback-23-March-2019.pdf">https://www.transportprojects.org.nz/assets/Uploads/Berhampore-village-drop-in-feedback-23-March-2019.pdf</a>
18 May 2019	Community drop-in	<a href="https://www.transportprojects.org.nz/assets/Uploads/Berhampore-drop-in-feedback-May-2019.pdf">https://www.transportprojects.org.nz/assets/Uploads/Berhampore-drop-in-feedback-May-2019.pdf</a>
19 June 2019	Workshop with BCA/WCC	Introduction, define purpose and goals, confirm community objectives with review of past consultation
3 July 2019	Workshop with BCA/WCC	Propose and test via group activity, different possible improvement options for Berhampore Village
18 July 2019	Topographical surveying	<p>We also wanted to let you know that over the next couple of weeks, you may spot (or have already spotted) people in high vis gear with tripods and other survey equipment working in the area.</p> <p>We are getting topographical work carried out to give us more accurate information on things like ground levels and the depth of underground services. This will help us to better understand the physical conditions in Berhampore, and help with the development of village upgrade concept design options for consideration later in the year.</p> <p>Surveyors will be in the area from Thursday 18 July on and off doing an above-ground survey that will take about a week. From next Thursday (1 August), they will then focus on the underground pipes and services. You may see them lifting manhole covers to get</p>

		information on depths and types of services, or using ground penetrating radar to get images. The work will not involve any digging.
24 July 2019	Workshop with BCA/WCC	Group exercise to complete multi-criteria analysis of possible options
23 - 28 July 2019	Student survey	Three students will also be working in the area on and off over a few days next week (23 to 28 July) to better understand how people are moving through Berhampore Village. They will be counting pedestrians and cyclists and potentially chatting to locals to find out more information.
4 September 2019	Workshop with BCA/WCC	Present formalised options to group allowing for further feedback, wrapping and closing workshop engagement.
7 September 2019	Community drop-in	<a href="https://www.transportprojects.org.nz/assets/Modules/DocumentGrid/Berhampore-dropins-feedback_All2019.pdf">https://www.transportprojects.org.nz/assets/Modules/DocumentGrid/Berhampore-dropins-feedback_All2019.pdf</a>
7 November 2019	Email from officer	<p>Since our last update in July, we have been looking at what small improvements could be made to make things safer in the vicinity of Adelaide Road and Luxford Street. These could include changes to traffic signals, safer crossing points or speed humps.</p> <p>Any small improvements we make at this stage need to be considered in the wider context of future growth and transport changes in the Berhampore area. If we get approval to go ahead with some of these short-term improvements, we'll let you know.</p> <p>In early 2020, the Council will be seeking feedback on the next stage of Planning for Growth – the review of the District Plan which sets the rule book for how the city can grow. In July we expect to be consulting with the public on a proposed package of routes and options for Newtown Connections.</p> <p>We will need to hold off doing further work on developing concept designs that enhance and improve the Berhampore area until some of these bigger things have progressed.</p>

## Appendix 2 - Berhampore Village DangerSpace reports

ID	field_date	What happened?	Lat	Long	Type	Situation
493	2021-02-15T15:52:10	Biking around the corner from Rintoul onto Luxford, a car sailed downhill through the Rintoul St intersection without stopping, and directly into my path. I had to brake really hard to avoid him.	-41.31984508	174.7778262	Bicycle	Vehicle pulls out or across cyclist
451	2020-08-28T08:40:00	Cycling west on Luxford Street, with pre-scholler on the back. Car pass on the turn in to Rintoul Street and cut us off.	-41.31983943	174.7777728	Bicycle	Problematic pass (usually too close)
441	2020-07-18T18:30:00	Driver cut the corner and drove head on towards me as I waited in the right turn lane to leave Luxford St, turning south onto Rintoul.  The driver had to brake sharply and come to a stop to avoid a collision.	-41.31990646	174.777788	Bicycle	Person drove (or cycled) at cyclist head on
364	2020-02-24T07:44:00	Driver gave less than a meter distance to take over even though he could had used the other side of the street or wait behind for less than 10meters	-41.32199444	174.7751674	Bicycle	Problematic pass (usually too close)
360	2020-02-21T07:54:24	Car parked in clearway outside Gramercy Bakery, three of us on bikes needed to move out into lane to continue up the street (northbound). Car behind us tried to squeeze into the gap past us, rather than slowing down.	-41.32033938	174.7752345	Bicycle	Problematic pass (usually too close)

350	2020-02-19T20:10:37	Overtaking a bus (while at busstop) and car came very close while overtaking (double overtaking?)	-41.31970726	174.7752887	Bicycle	Problematic pass (usually too close)
345	2020-02-17T07:20:00	Car drove through stop sign. I was on give way. Car drove across in front of me without stopping at stop sign. Regularly happens at this intersection	-41.31993373	174.7778341	Bicycle	Road user turns across cyclist's path
342	2020-02-10T15:26:00	Once again car turning right went straight through stop sign.	-41.31991703	174.7778202	Car	
296	2020-02-01T15:52:00	Wind afternoon and car overtook with less than 1meter going up hill. To close specially in a wind day.	-41.31907391	174.7752993	Bicycle	Problematic pass (usually too close)
278	2020-01-28T17:38:00	I pulled out from the lights at Britomart, heading south ahead of a car stopped there. I pulled into the main flow of traffic because of parked cars on Adelaide. Driver behind me honked and forced me towards parked cars by passing closely between me and oncoming traffic, ignoring sharrows and 30kph limit	-41.32082516	174.7753233	Bicycle	Problematic pass (usually too close)
269	2020-01-21T17:05:00	There is a right turn bay here with a stop line. It is a sharp bend. I was turning right off Luxford and onto Rintoul St. A car travelling from Rintoul onto Luxford cut the corner, across my path. This is a common occurrence.	-41.31993542	174.7778129	Bicycle	Vehicle pulls out or across cyclist
266	2020-01-22T06:25:00	Pulled out of Edinburgh terrace and couldn't see a car coming from the right. The parked cars are too close to the end of the street and there's no way to see someone coming till you are in the line of traffic	-41.32167532	174.7803	Car	

251	2020-01-23T08:20:00	A car passed me very close to avoid a car coming the other way. Should have waited a few seconds	-41.32203714	174.7752372	Bicycle	Problematic pass (usually too close)
234	2020-01-22T08:20:00	I was riding to work and an 18wheeled truck passed too close to my partner and I on Adelaide Rd in Berhampore. Squeezing us between parked cars on the left and their giant vehicle. It spooked me.	-41.32153024	174.7751875	Bicycle	Problematic pass (usually too close)
227	2020-01-17T14:00:00	Tradesman driving a large ute gave me a punishment pass for causing him to drive slightly more slowly for slightly longer than usual.	-41.31993806	174.776595	Bicycle	Problematic pass (usually too close)

## Submission on Tō Mātou Mahere Ngahuru Tau - WCC's Long-Term Plan

### Introduction

Forest and Bird Youth is a nationwide network of young people (aged 14-25) who are protecting and restoring Aotearoa's wildlife and wild places. With over 500 members and supporters, our vision is to see empowered rangatahi actively engaged in our connection to Te Taiao and in the fight for our future. Our mission is to take action for nature as youth, with youth, and for youth. As the Wellington Hub of Forest & Bird Youth, we actively engage with and represent our members living in the Wellington Region.

The Long-Term Plan will have significant impacts on our environment and biodiversity, and the ability of future generations to thrive on a habitable planet. In 2019, WCC declared a ["climate and ecological emergency"](#). The council intended this declaration ensure that the environment is at the forefront of all decision-making. However, the actions following this declaration have been seriously negligent of te taiao. This Long-Term Plan encompasses a decade where, if WCC don't take action, they are condemning young people - and the species we share our home with in Te-Whanganui-a-Tara - to a grim future. **It is for this reason that Forest & Bird Youth is calling on the council to take this plan seriously, and stop prioritising the interests of a few over the many.** We will present our case on the 7 big decisions and what direction the council needs to take in order to effectively manage the social and ecological crises we face.

We would also like to highlight how critically important it is that the council engage with mana whenua about the proposed plan, acting as tangata tiriti and ensuring that it upholds its obligations under Te Tiriti o Waitangi to allow Māori to practice kaitiakitanga and tino rangatiratanga over their whenua and taonga. Indigenous solutions exist for many of the problems the council is facing - it is time they stepped up and took leadership from our treaty partners to fund and implement these solutions.

### **Missing from the Decisions: Biodiversity**

*Wellington's Biodiversity Strategy must continue to be implemented. Restoring and encouraging connection with our green spaces will have massive societal and environmental benefits. WCC must also work towards more water-sensitive design, which will also improve resilience to flooding events. We would like to see rain gardens and other green spaces established across Pōneke, and movement to restore our urban waterways which are currently piped underneath our city.*

- Increased funding for implementing Our Natural Capital: Wellington's Biodiversity Strategy is crucial to ensuring biodiversity thrives in our city. We would also like to see WCC increase its commitment to supporting projects such as Predator-Free Wellington, ZEALANDIA Ecosanctuary, and Capital Kiwi.
- We would like to see increased use of water-sensitive design and restoration of green spaces across the city. There are many benefits to reducing hard-surfaces in urban areas and replacing them with places where communities can connect with nature.
- Forest & Bird Youth would like to see funding set aside in the LTP to reopen and restore our piped urban streams. [Similar projects overseas have been successful](#), and cities are now reaping the rewards: open watercourses handle floods better than pipes do, which is extremely important as our climate changes. Restoring urban streams also reduces the heat-island effect and provides habitat for our precious native taonga. We also ask that WCC establish a working group, including youth and mana whenua representatives, to identify potential restoration opportunities.

### **Decision 1 - Increasing investment to fix the water pipes**

*We support increasing investment to fix our water problems, however, we believe the proposed solutions and frame of thinking about this issue will serve to kick the can on these issues down the road (as hard infrastructure will need consistent long-term maintenance) and exacerbate other environmental issues. For this reason, **we ask that WCC consider a fourth option** which seeks to decentralise and "soften" our three waters infrastructure.*

- This will involve implementing solutions such as water tanks for drinking water, composting toilets for wastewater, and nature-based treatment options for stormwater and wastewater.
- In 2011, GWRC commissioned research into the use of rainwater tanks for toilet flushing and outdoor use - they ultimately found that this option would not be cost-effective. However, we believe the research is outdated (as we now know a lot more about the costs to fix Wellington's water infrastructure) and was flawed as it did not consider drinking water provision as well. By reducing the industrialisation of our water infrastructure - using less concrete, complicated machinery, and processes like chlorination - we will ultimately save in carbon emissions, waste to landfill, energy, among many other benefits which are not usually quantified for cost-benefit analyses. "Softening" and decentralising water provision will also allow for increased resilience to natural disasters such as earthquakes.
- Composting and keeping nutrients within an ecological cycle is the most cost-effective way to treat our wastewater, as nature provides the service for "free". The use of composting waste systems is well understood, and many designs exist to suit different needs - from simple backyard compost heaps to flushable toilets with underground tanks that act identically to current systems. Nutrients are treated on site (using methods such as vermicomposting) and can then be automatically or manually spread into planted areas (such as native wetlands) where the nutrients can be kept in a cycle.

- Stormwater can be treated in a similar way to wastewater. Waitangi Park is an excellent example of this. There is also ample opportunity to reduce stormwater via the use of rain gardens and more green spaces, as well as restoring the natural flow of urban streams.
- Indigenous cultures around the world have been using “soft” infrastructure to treat waste for thousands of years. An example of this is the Kolkata Wetlands which filter wastewater for 7 million people. We would expect that the council engage and work with mana whenua to ensure an approach to treating the three waters consistent with te ao Māori is followed.

### **Decision 2 - Taking ownership of wastewater laterals**

*We support option 2 as an interim change as the council works towards our proposed solution for Decision 1, as it will allow WCC to keep critical links to wastewater infrastructure maintained.*

### **Decision 3 - Building more cycleways**

*We strongly support option 4, with changes. Namely, the current transport budget proposed in the Long-Term Plan still proposes a large amount of funding for roading above and beyond that proposed for cycleways and footpaths. If WCC were to reprofile this funding appropriately, then this would alleviate doubts about the affordability of option 4. The plan also needs to consider people with disabilities, vulnerable communities and pedestrians.*

- Reaching our climate commitments will require widespread modeshift in Wellington. Research shows that to support people to cycle, it is necessary to provide a fully connected network that is safe and separated from other traffic. WCC must fully fund the cycling network across Wellington and reallocate funding from roading projects.
- Safe journeys for vulnerable road users, such as children, should be the highest priority when making transport decisions. We ask that the council tackle our most car-dependent areas (such as the northern suburbs) before prioritising projects like the Great Harbour Way.
- We would also like to see the doubling of the Cycling Minor Works Budget to \$2 million per year. This will support much-needed changes such as removing pinch-points, adding curb cuts, and rolling out bike parking across the city. We must support people so they can make choices other than owning or running a car, and this will require minor improvements to cycle infrastructure across the city alongside delivering separated, safe cycle lanes.
- WCC must also create a new dedicated funding category to deliver rapid changes to the urban environment instead of making these changes using the Cycling Minor Works Budget. This would allow cycleways to be created faster, and it would also deliver public space improvements outside of cycling in the form of Low-Traffic Neighbourhoods and parklets.
- We also believe the cycling budget should be ring-fenced. This would ensure that any money allocated must be spent on cycling and not reallocated elsewhere. We also think the council should properly fund its projects by increasing rates or taking on additional debt.

### **Decision 4 - Funding for Te Atākura - First to Zero action plan (climate change)**

*We strongly support option 3, as it is critical that WCC implement Te Atākura in order to mitigate and adapt to climate change. However, we would also like funding committed to reviewing and updating the action plan (in partnership with mana whenua and centering indigenous solutions) in light of recent evidence that achieving net zero emissions by 2050 is not enough. This will be especially important once the IPCC releases their next report in the coming year.*

### **Decision 5 - Fixing resilience issues in Te Ngākau Civic Square - Council office buildings**

*We support option 2. Remediating and strengthening existing buildings will have significantly lower environmental impacts than redeveloping the site. It is also important that we retain vital public spaces to ensure the wellbeing of people and promote liveable cities.*

### **Decision 6 - Funding the Central Library rebuild**

*We support both options 1 and 3. We are glad to see the council is committed to remediating and strengthening the building instead of demolishing it - this must be done as soon as possible to ensure that people have access to essential communal resources.*

### **Decision 7 - A solution for reducing sewage sludge and waste**

*We support the minimisation in sewage sludge, but believe option 4 is the wrong approach. Softening and decentralising infrastructure (akin to our proposed option 4 above) will allow for sewage to not be treated as “waste”, but as part of a closed system of nutrient cycling without the need for expensive and damaging technologies. The council should also be prioritising becoming a zero-waste city so that the sludge is not relied upon for landfilling.*

### **Further Thoughts for the LTP**

- 1. Waste - We would like to see WCC support the mass-rollout of community composting schemes to reduce organic waste, prioritising this over any kerbside collection process. The benefits of community composting extend beyond simply reducing waste - it promotes social cohesion and provides valuable resources for urban gardening. We would also like WCC to prioritise moving towards becoming a zero-waste city and starting to address some of the key considerations of the Wellington Regional Waste Management and Minimisation Plan. While the council has a target to reduce waste to landfill by one-third by 2026, waste to landfill has actually increased.*
- 2. Other transport considerations - WCC must work with and support community leaders, disabled people and local businesses to ensure that Wellington’s streets are safe and accessible to get around on. The LTP must reprioritise money from roading projects which will increase or maintain car-dependency to projects which will improve our streets for vulnerable communities - including those who walk as their main form of transport. For journeys that require a car, WCC must support public car-share schemes as much as possible to encourage people to live without a private car. One easy solution is to allow current car-share schemes to use on-street Residents’ Parking.*
- 3. Meeting Te Tiriti o Waitangi obligations - WCC must meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards; committing to decolonisation and working with mana whenua and Māori to identify what this would look like; identifying how each proposed spend/project in the LTP contributes to partnership under te Tiriti; supporting Māori to explore ways co-governance can be implemented in Wellington; and establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.*

## Submission #: 1508

Ramil Adhikari  
Chair, Wellington Branch

PO Box 2199  
Wellington 6140

### Submission to Wellington City Council on its Draft Long-Term Plan 2021-31

Thank you for the opportunity to have input into the development of the Wellington City Council's Long-Term Plan. We would like the opportunity to present orally on our submission.

#### The role of local government in public health

Health is created by the conditions in which people are born, live, grow, work and play, and many of the influences on health lie beyond the control of the health sector; several, in fact, reside within the realm of local government.

The critical importance of local government for public health is recognised in the Health Act 1956 (s23), which states that it is “the duty of every local authority to improve, promote and protect public health within its district”.

#### Summary of key points

**Decision 1: Three Waters.** None of the options satisfactorily addresses the urgent need to ensure safe drinking water and protect the environment. PHA Wellington recommends accelerated investment alongside integrated thinking across urban densification, environmental protection and three waters infrastructure to meet current and future needs.

**Decision3: Cycleways.** PHA Wellington supports Option 4 (Accelerated Full Programme) which will deliver public health benefits over the other options considered. It will increase physical activity, improve safety, support the health and development of young people, and address climate change.

**Decision 4: Climate action.** We support Option 3 (Fully fund the Te Atakura First to Zero Action Plan) because climate change is considered the greatest public health challenge of our time, and rapid action to reduce emissions is vital to human survival.

**Decision 6: Central library.** We support Option 1: Strengthen now by temporarily exceeding the debt limit. Re-opening the Central Library is vital to support wellbeing and social inclusion for all.

**Decision 7: Sludge and Waste Minimisation.** We support Option 4: Sludge minimisation through alternate funding, since this option aligns with sustainability goals.

In addition, we raise two issues of community concern and public health importance that are not currently part of the Council's Long Term Plan:

- the **housing crisis**, and
- **alcohol harm**.

We argue that the Council's failure to act on these issues is harming Wellingtonians. Greater investment in social housing and a policy plan to address alcohol-related violence and crime should be included in the Long Term Plan.

---

### **Decision 1: Investment in three waters infrastructure**

PHA Wellington does not support any of the proposed options, since none of them satisfactorily addresses the urgent need to ensure safe drinking water and protect the environment. We recommend accelerated investment coupled with integrated thinking between urban densification and the three waters, and we note that significant central government funding is available to support such work through DIA's Three Waters Reform Programme.

Provision of infrastructure for drinking water, wastewater, and storm water is a key public health function of local authorities. In the late 1800's deaths and illness from waterborne diseases such as typhoid, cholera and dysentery were commonplace in Wellington due to uncontrolled sewage contaminating drinking water. For example between 1885 and 1891, 550 Wellingtonians were killed by such diseases (<https://www.stuff.co.nz/national/health/64261485/historian-probes-deadly-mansfield-undertones>). Following the construction of sewage systems, such diseases became rare and life expectancy increased dramatically.

The Havelock North *Campylobacter* outbreak of 2016 - in which over 8000 people are estimated to have been infected, at least 4 killed and several permanently disabled (Gilpin et al, 2020) – provides a more recent example of drinking water contamination, with devastating results. More recently still, residents of East Otago are still unable to drink the tap water following lead contamination of the water supply, possibly due to aging pipes with lead fittings (<https://www.stuff.co.nz/national/health/124521734/lead-in-the-water-more-Councils-testing-for-lead-after-otago-scare> ).

These examples show that safe drinking water cannot be taken for granted in New Zealand. Indeed, the dire state of Wellington's drinking water, storm water and wastewater infrastructure (as outlined in the consultation document, and the 2020 Mayoral Taskforce report) suggests that it is only luck that major drinking water contamination incidents have not yet occurred in Wellington.

Aging and deteriorating stormwater pipes are leading to wastewater contamination of ALL the streams in the Wellington district. With climate change bringing more frequent floods, the risk of cross-contamination between stormwater, wastewater and drinking water is increasing. As noted in the document there is a 30% loss of drinking water through leaks. This suggests of a vast number of entry points where pressure fluctuations could suck contaminated ground water into the drinking water system, leading to water borne disease outbreaks like that faced by residents during the 2016

Havelock North *Campylobacter* crisis. Furthermore, it is possible that aging pipes could themselves be leeching contaminants into our water supply.

**Accordingly, we reject all three options:**

- Option 1 Maintaining the current funding level is completely rejected as the net result is degradation of the existing asset, environmental degradation and risk of disease outbreaks.
- Option 2 Enhanced investment is rejected as it is a 'do minimum' option where maintenance is easily overtaken by demands for new service.
- Option 3 Accelerated investment is rejected as the Council seems unwilling to take immediate action ("we don't know enough about the condition of pipes to properly cost and direct the investment") and we envisage significant delays under this option.

We are concerned that the development of all three options appears to be based on siloed thinking and planning, reducing the cost effectiveness of expenditure that could be targeted to resolving several issues in parallel.

There is no cheap solution to Wellington's water woes. However, combining town planning, urban development, environmental improvement and the rehabilitation and development of infrastructure considered together would provide a better and more cost-effective basis for planning and investment, and would deliver on multiple outcomes.

Our recommendation is to integrate thinking between urban densification, environmental improvement and three waters investment and take a lifetime costing approach. We recommend increasing the number of consumers per kilometre of pipe (through densification) and investing in high quality three waters infrastructure that will last for several generations (rather than opting for cheap, short-term fixes). This would require significant up-front investment, but we note that Central Government funding is available through the Three Waters Reform Programme to support such work. The time to act is now. The alternative - to continue to kick the can down the road, and risk a major disease outbreak – is unacceptable.

**Decision 3: Cycleways**

PHA Wellington branch supports Option 4: Accelerated Full Programme

We agree with the Council about the need to change the way we move around to make Wellington a more liveable city and to meet national and local carbon zero goals. Investing in cycleways will not only help us meet these goals, but will also support the health and wellbeing of Wellingtonians in four key ways:

1. **Cycleways will get more people more active more often.** Sedentary lifestyles are a major public health problem, and the proportion of people (especially children and adolescents) who are inactive is growing. Lack of physical activity negatively affects almost every organ and system in the body, whereas regular physical activity can prevent coronary heart disease, stroke, type 2 diabetes, breast cancer, colon cancer (Kyu et al, 2016), depression (Mammen & Faulkner, 2013) and dementia (Blondell, 2014) The health and productivity costs of inactivity to the Wellington region were estimated at \$140 million in 2010 (<http://www.communityresearch.org.nz/the-costs-of-physical-inactivity-toward-a-regional->

[full-cost-accounting-perspective/](#) ). Active transport is the obvious way to build activity into daily life for people of all ages, with cycling shown to have particularly strong health benefits (Gill & Celis-Morales, 2017). Safety concerns are currently a major barrier to getting people cycling, particularly women and children. A network of separated cycleways will make cycling a genuine transport option for many who do not currently cycle.

2. **Cycleways will improve road safety.** There have been more than 4000 crashes causing injury in Te Whanganui-a-Tara over the past 10 years, and cyclists and pedestrians made up nearly a third of all minor injuries, nearly half of all serious injuries, and 38 percent of all deaths. (<https://www.rnz.co.nz/news/national/437923/pedestrian-cyclist-deaths-and-injuries-disproportionate-in-wellington>). Separated cycleways coupled with safer speed limits are urgently needed to address Wellington's appalling road safety record.
3. **Cycleways will improve children's and teen's independence.** Independent mobility is important for young people's health and development, but few parents are comfortable letting their children bike to school or to after-school activities. We urge WCC to prioritise safe routes to schools and to design cycleways with kids in mind so that they can get around their neighbourhoods independently.
4. **Cycleways will help to address climate change,** which has been described as the biggest public health challenge of the 21<sup>st</sup> century. There is an urgent need to reduce reliance on private vehicles by improving access to public transport, walking and cycling transport options. Connected cycleways are vital to the realisation of WCC's Zero Carbon goal.

We note, with disappointment, that planned cycling infrastructure development (e.g. Newtown Connections, and the Island Bay upgrade) have faced ongoing delays. Given the urgency of the challenges outlined above and the major environmental and health benefits of mode shift towards active transport, rapid expansion of Wellington's cycling infrastructure must be a top priority. Options 1, 2 and 3 do not go far enough or fast enough to bring about change at the needed pace. Therefore, PHA Wellington supports Option 4.

#### **Decision 4: Te Atakura First to Zero Action Plan:**

We support Council's preferred 'Option 3 - Fully Fund the programme' to not only fully implement the plan but also to investigate new actions as they arise.

We commend the Council on the collaborative development of Te Atakura First to Zero - Wellington City's Zero Carbon Implementation Plan 2020 - 2030 and in doing so showing leadership within local government to address the climate crisis. The inclusion of mana whenua on Te Atakura Steering Group is also commended however, iwi are not simply 'another stakeholder' and the relationship needs to be an intentional and genuine Te Tiriti o Waitangi partnership.

Climate change is considered the greatest public health challenge of our time, and rapid action to reduce emissions is vital to human survival. Climate change presents not only risks but also public health opportunities, since many actions to reduce carbon emissions are also good for public health and equity (Watts et al, 2015; Bennett et al, 2014).

We fully support the proposed action areas and the implementation of this plan as the first stage in the journey to become a zero-carbon city. Cycling and walking have demonstrated health benefits (as noted above) as does the shift from private car use to public transport (via incidental physical activity and improved safety), and from fossil fuel vehicles to EVs in terms of a reduction in air

pollution. Given existing congestion, projected population growth, and limited public space for storing cars, we recommend greater emphasis on active and public transport (rather than EVs) since these are space-efficient options for reducing emissions, with major health and social co-benefits (see: <https://www.vtqi.org/wwclimate.pdf> ).

Home energy saver grants are also likely to have health co-benefits, if they increase the number of Wellingtonians living in warm, dry homes and mean families have more money left for other essentials after paying the power bill. Particularly if targeted to low-income households, these grants will help to reduce the health gap between rich and poor (Howden-Chapman et al, 2007).

We acknowledge the commitment the Council has to the implementation of this plan to ensure the future health and wellbeing of the people of Wellington.

### **Decision 6: Central Library**

We support the Council's preferred option, Option 1: Strengthen now by temporarily exceeding the debt limit.

*"A library in the middle of a community is a cross between an emergency exit, a life raft and a festival; cathedrals of the mind; hospitals of the soul; theme parks of the imagination. On a cold rainy island, they are the only sheltered public space where you are not a consumer but a citizen instead". (Caitlin Moran)*

The restoration of a fully functioning Central Library is a critical and vital priority for Wellington citizens and Wellington City Council.

We commend the Council for the interim library arrangements in establishing two pop-up libraries and maintaining the reserves services and other functions. However, there is an urgency for the Central Library to reopen to provide for equity and social inclusion, and to revitalise the city centre.

The Central Library makes a critical contribution to equity in our city. Libraries are places for people of all ages, incomes, ethnicities and educational levels to gather and use. Libraries are of particular importance to children and older people, those with disabilities and people who may be socially excluded. They provide internet access (without cost) which is now vital to access social welfare benefits, services, jobs information and for quality of life. Libraries provide safe, comfortable places to read and access material that may not otherwise be accessed. A library may be one of the first places to open after a natural disaster.

We commend the Council in the decision to back high-level remediation of the Central Library which protects the building from future shocks, ensures a high quality and adaptable library service and to using the existing and much-appreciated building.

Any moves to use privatisation measures for funding the rebuild must continue to be rejected. We strongly support the latest decision by the Council to overturn and vote against privatisation measures. Privatisation puts access to the public asset of the Library and its services at risk. The equity benefits of the library could be lost. Furthermore, the purpose of the Library and its relationship to other Council functions are inextricably linked and the Council needs complete control over decisions and use of Council buildings. Unpredictable situations may develop or changes may be needed, and this will be negated if the Council does not control the Library building and its services.

Option 1 ensures that the time frame of reopening the Central Library in 2025 is met and that it remains wholly in public ownership, without increasing the financial burden on ratepayers. Lifting debt level as a mechanism to fund this vital public asset is responsible as the Central Library benefits future generations as well as current users in providing essential and vital services.

### **Decision 7: Sludge and Waste Minimisation**

PHA Wellington branch supports Options 4: Sludge minimisation through alternate funding, since this option aligns with waste minimisation and Zero Carbon plans without putting undue financial burden on ratepayers.

As noted in the Mayoral Taskforce report (2020) biosolids contain energy and nutrients that could be harnessed. An integrated approach is needed with consideration given to the New Zealand Standard for disposal of biosolids, the potential for biosolids to provide a sustainable fertilizer alternative to the use of phosphates and nitrogen, and the potential to harness energy from biosolids. The value of return of organic matter to a land-based cycle should be recognised, and investment made to realise opportunities for sustainability gain.

Option 1 (No change in current practice) is rejected, since it does not align with the First to Zero or Waste Minimisation plans. Option 2 (Investment in technology at Southern Landfill) is rejected as this is just volume reduction and continues the practice of transporting sludge across the city with inherent public health risks.

To solve the problem, investment in technology at the sewage treatment plant level is needed. This is described in Option 3: sludge minimisation by investment by the Council in the existing wastewater treatment site at Moa Point. While Option 3 is acceptable, Option 4 (Sludge minimisation through alternative funding) is our preferred option since it takes advantage of opportunities provided by the Infrastructure and Funding Finance Act of 2020 and puts less immediate financial burden on ratepayers compared to Option 3.

Options for funding include association with technically competent non-public organisations to develop a long-term solution that is sustainable and contributes to the restoration of the phosphate balance and land improvement for food supply.

Option 4, if done properly, could be economically self-sustaining as well as environmentally friendly and remove a significant pathway for pathogens to enter residential environments.

### **Additional issues crucial to public health, 2020-2030**

We note that the Long Term Plan makes little mention of alcohol harm or inadequate housing – both key concerns of Wellingtonians and important public health issues.

### **Safety in the City - Addressing Alcohol Harm**

Rates of assault in Wellington's CBD are 10 times higher than the national average <https://www.rnz.co.nz/news/national/428871/rate-of-assaults-in-wellington-cbd-10-times-higher-than-nation-s-average>. This is unacceptable and must be addressed.

Much of the crime and disorder in the central city is alcohol-fuelled. We note that Wellington does not have a Local Alcohol Policy (LAP) in place, and that efforts to put one in place seem to have stalled. We urge Council to adopt a LAP with a cap on outlets and, ideally, a sinking lid – especially of off-licences. There is growing New Zealand and international evidence that reducing the density of liquor outlets (especially off-licences) and the hours that alcohol is available can reduce violence (Livingston et al, 2007; Conner et al, 2021). We strongly urge WCC to use the functions and duties of the District Licencing Committee to act in the public interest and improve the participation of communities in the alcohol licensing process. We believe this will help reduce the number of off-licences in the Central City and limit the opening hours of on- and off-licences to reduce the late night availability of alcohol and associated crime and violence.

## **Housing**

We acknowledge WCC for its role as a significant provider of social housing in our city. The provision of social housing reduces health problems and hospitalisation of people in acute housing need (Baker et al, 2010). Due to the current housing crisis, we recommend that the Council increases investment in safe and healthy social housing, and emergency accommodation.

The housing shortage in Wellington is acute. Recent data suggests Wellington has the most understocked housing inventory in the country. <https://www.stuff.co.nz/life-style/homed/housing-affordability/124847457/wellington-has-the-most-understocked-housing-inventory-in-the-country-says-new-data>

The waiting list for social housing has increased in recent years, as rents and house prices have kept on rising. As Wellington's population increases, demand for housing increasingly outstrips supply. Therefore, vulnerable families and individuals feel the pressure of an exceptionally competitive housing market. Wellington's population is projected to increase further. It is estimated that up to 30,000 additional housing units will be required to meet the city's housing needs by 2043. Population groups such as migrants and older people and a shift towards more one and two persons households also have implications for the type of housing required in the city.

Home ownership has become increasingly unaffordable for Wellingtonians. In 2014, New Zealand's median house cost was \$400,000. The median income across all sources was \$31,200 per annum. Now, the median house cost is more than \$700,000 and median income from all sources is still just \$33,904 (Corelogic, 2020). High rents make it difficult for households to pay for the other basics needed for health (e.g. healthy food, home heating).

Healthy homes advance great physical and emotional well-being. Conversely, low quality housing and lack of housing (e.g. people living in cars, or 'couchsurfing') contribute to medical conditions like persistent infections, respiratory illness, rheumatic fever, tuberculosis and mental health problems (Braveman et al., 2011). Children are particularly vulnerable to the health effects of poor housing,

with hundreds of Wellington children hospitalised each year with preventable conditions (Ingham et al, 2019).

Thus, for the health and wellbeing of Wellington residents the Council needs to increase investment in social housing and emergency housing (Parity, 2007). Furthermore, the Council has a role to play in maintaining rental housing standards. We strongly urge WCC to incorporate increased housing investment in the current Long Term Plan.

## **Conclusion**

The Wellington Branch of the Public Health Association is keen to work closely with the Wellington City Council on the infrastructural and regulatory issues that impact on the health and wellbeing of Wellington residents. Overall, we support the community outcomes framework, the six priority objectives for the coming three years, and much-needed emphasis on infrastructure investment. However, we urge the Council to make the above amendments to the Plan, to ensure the best outcomes for our city

Nāku noa, nā

Ramil Adhikari

Chairperson

Wellington Branch

Public Health Association of New Zealand

### **About the Public Health Association (PHA)**

The Public Health Association (PHA) is a national membership association with a commitment to health for all. Public health focuses on promoting good health and preventing illness in communities and populations. The Wellington Branch has about 90 members who work in the public, private and not for profit sectors and collectively hold a high level of expertise on issues that affect wellbeing.

Our vision: health equity in Aotearoa  
Hauora mo te katoa – oranga mo te Ao

Submission to Wellington City Council’s Long-Term Plan 2021 - 2031

To Wellington City Council

Thank you for the opportunity to make a submission to your proposed long-term plan 2021 – 2031.

We have looked at your plan through a wellbeing and physical activity lens. We implicitly believe in the value that being physically active can add to increasing and maintaining wellbeing at an individual, city and district, and regional level.

Consideration of your proposed projects through a wellbeing and physical activity lens involves taking account of several factors including:

- the impact of proposals on play, active recreation, active transport, and sport opportunities
- the extent to which proposals support diversity and inclusion that help to address inequity of opportunity
- spaces and places that are designed for multi-use and multi-domain purposes
- the opportunity to activate cities and towns and communities

At the same time, we are taking the opportunity to introduce you to the changes we have made here at Nuku Ora (formerly Sport Wellington) with a view to understanding how your council and Nuku Ora can work more effectively together on physical activity opportunities and experiences that encourage and support greater wellbeing in your communities.

We would welcome an opportunity to talk to you about our submission.

Nga mihi

Phil Gibbons  
Chief Executive

## Introducing Nuku Ora

---

Kia rau nuku

Kia rau wai

Kia rau ora

Like the water that flows through our region, connecting us and providing energy and life, we want physical activity to flow through our lives, connecting us and bringing health, wellbeing, and joy.

Our whakatauki was developed from the common themes arising from conversations we had with mana whenua around the meaning and value of physical activity and the importance to our work of the land, the people, physical activity, and health and wellbeing.

This in turn led to the creation of our new name and visual identity.

### ***Why change?***

Our previous name did not accurately reflect the purpose of our organisation, the scope of the people and partners we work with, and the mahi we do every day to ensure that everyone has equitable opportunities to be active, healthy, and happy.

We have been working in the health, sport, and recreation space for over twenty years but because our name has always been Sport Wellington, many of our stakeholders and community have perceived our focus, indeed our sole focus, to be sport.

Sport is important to the wellbeing of the region and will remain a key component of our work; but it is not the answer for everyone. Our communities are telling us they need more diverse ways to be physically active; they are looking for opportunities through active recreation, active transport, play and sport. Each of these has a role to play in improving the wellbeing of communities in this region.

We needed an identity that removed any barriers to building relationships with partners and communities in all the sectors we operate in. We needed an identity that all our staff could proudly wear on their t-shirts, no matter who they are working with or what they are doing.

While for some people it might just be a 'name change', for us this process has been about creating a unifying identity for the organisation. Something that truly reflects the outcomes we want to achieve, and the work each of our staff do every day.

## Our focus on less active people and communities

---

Covid's impact has heightened the inequities in the regional physical activity system from both a provider and participant perspective. Participation numbers have not returned to pre-Covid levels and providers are struggling to address the financial and membership challenges that exist with reduced capacity (another consequence of Covid) for many. The effects of Covid will continue to have an impact on their operations for some time to come.

In response Nuku Ora is garnering its resources and focusing on specific communities within the region. Our work is increasingly focused on less active people and communities - specifically:

- Tamariki and rangatahi
- Women and girls
- People with a disability
- Maori and Pasifika communities
- Those living in high deprivation areas

These are communities of interest to our two organisations, and we would welcome the opportunity to work with officials on collaborative responses.

## A focus on physical activity (play, active recreation, active transport, and sport)

---

Our insights tell us that people in our communities are looking for different ways of being physically active while also facing different barriers to accessing opportunities that may already be on offer.

Levels of play amongst our children are declining. We want to address this decline given that a playful childhood is a critical element in living a physically active life. We are building our knowledge about the importance of self-directed play for children as a means of supporting their development and wellbeing. This goes beyond the provision of a playground – it is about having a broader focus on creating playful environments and communities giving children time, place, and permission to play in a way that works for them.

Sport remains an important part of the physical activity landscape, but participation in sport is declining (in some sports more than others) and in general, people are wanting to be active at a time and place that fits their lifestyle rather than in a scheduled manner. Volunteering is also changing as people look to fit this into their lives. Volunteers are giving less time and looking for shorter, less time-consuming commitments through episodic volunteering or project-based volunteering. Changes occurring in our communities such as an ageing population, greater ethnic and cultural diversity, and changes to work also impact volunteering.

Active recreation is non-competitive physical activity for the purpose of wellbeing and enjoyment. It includes activities that occur in built, landscaped and natural environments (including outdoor recreation, fitness/exercise, community recreation, aquatics), which are undertaken by individuals and by groups, and occur with and without the involvement of a 'provider' group or organisation (that is, can be undertaken independently).

Active recreation provides a significant opportunity to attract people who are seeking a broader range of activity experiences. In the wider Wellington region, we are almost spoilt for choice when it comes to active recreation - walking, swimming, cycling, equipment-based exercise, fishing, running, yoga and more. And, we have lots of opportunities to participate regardless of our age, life stage, income, culture, place of residence, physical ability, or other factors.

People want physical activity to be an easy fit with their everyday lifestyles. Active transport, whether it be walking, biking, scootering, or skateboarding, provides a great opportunity for people to integrate physical

activity into their daily routines. Our interest is in ensuring that active transport is supported through the presence of connected networks of walkways and cycleways and that active design principles are widely applied to create active environments.

## Sector challenges

---

### *Post-Covid*

As stated earlier, Sport NZ data shows that participation numbers have not returned to pre-Covid levels and providers are having to contend with the financial and membership challenges that exist. Sector organisations which play a key role in enabling New Zealanders to be active were impacted through lost revenue, cash flow difficulties, reduced capacity and change of membership. More significant was the loss of Class 4 gambling revenues during Alert Level 3 and 4 restrictions. The sport and recreation sector lost about \$14 million of funds for each of the three months gaming activity did not occur during Alert levels 3 and 4. Currently participation rates are around 90% of pre-Covid levels.

### *Fees*

RSOs are increasingly affected by the rising cost and affordability of community sport. As the costs of provision increase so too does the cost of participation and for many participants this becomes a barrier. Given the inequities that already exist within the physical activity system we know that sport is out of the reach of some in our communities.

We acknowledge the challenge for council around setting fees and covering costs. Of concern to many RSOs is the ongoing increase in fees for use of sports fields and facilities used for community sport. Their concerns are around ensuring that there continues to be affordable access to an adequate number of spaces and places to run their activities. While RSOs look to absorb fee increases there is a point at which these have to be passed on to their member clubs creating an additional financial burden on predominantly volunteer led and run organisations.

### *Facilities*

Access to and use of facilities is the main area of interaction between the sector and councils. At Nuku Ora we are looking at ways we can initiate regular conversations between all councils and facility users to talk about facility use and development and address collaboratively issues that may arise. Of interest to users currently are:

- Maintaining minimum standards of maintenance and upkeep of facilities to be able to optimise the use of spaces and places across the regional network.
- Exploring ways to have better alignment across the region's Councils on strategic and operational facility matters. In the case of RSOs, which have a regional focus, they are required to work with all councils and within the different systems, pricing, standards, and other requirements of each council which can be both time consuming and problematic at times.
- Responding to the changing needs of participants appropriately. Many sports are identifying the importance of providing female friendly facilities including separate toilets and shower blocks given that men's and women's matches are increasingly scheduled at the same time. There is also a need to consider the facility needs of other genders, people with disabilities, and others who are not currently universally catered for.
- Developing a greater understanding of the asset management approaches of councils particularly around repairs and maintenance cycles
- Flexibility of cost models for facilities such as artificial turfs once the capital outlays have been paid for.

There is recognition by the sector of the complexities of facility management and the extent to which facilities are subsidised by council. As a region our network currently meets demand and there is awareness of the work being done by councils to respond to the challenges of anticipated growth in our communities.

## Nuku Ora's feedback on specific proposals

---

### **Project: Cycleways**

We support your preferred option for developing and managing cycleways in Wellington.

We believe there needs to be a proactive approach to developing active transport infrastructure particularly as it impacts on the availability of walking and cycling pathways (and other non-motorised forms of active transport) that enable people to easily integrate physical activity into their daily lives and connect with their personal places of interest. Walkways and cycleways support safer and more environmentally friendly journeys from and to these places of interest for users. If considered during the design of these spaces, we believe they can also be used to create opportunities for the inclusion of play-along-the-way activities as part of those journeys.

### **Other projects**

We support the moves to upgrade and earthquake strengthen community sport infrastructure. The Regional Spaces and Places Plan identifies the resiliency challenge of our ageing network of facilities as a key risk. We would advocate for consideration of active design principles and consideration of universal design principles during any development and/or upgrade to maximise the physical activity opportunity provided and to make these spaces available and accessible to all.

We support and have an interest in the North Grenada Sports Hub development. We believe that this development responds to anticipated growth in Wellington, will fill a gap in provision in this location, and add to the regional network of spaces and places.

### **Funding request: Spaces and Places (Facilities) shared role**

The Regional Spaces and Places (Facilities) Plan was signed off by the region's Mayors in December 2019. The plan provides a strategic framework for joint decision-making about facilities deemed regional, national, and international facilities while also advocating for local planning at city and district levels that considers the broader regional network of facilities. While implementation of the plan began in early 2020, progress has been slowed by the impact of Covid-19.

Nuku Ora has undergone a strategic review of its structure and made changes to ensure it can deliver its new strategy and that it can continue to operate in a fiscally responsible way given the impact of Covid-19.

A dedicated resource to support the implementation of the Regional Spaces and Places plan is one of the at-risk roles in the new structure, hence this proposal to consider a shared role across the region's councils and Nuku Ora.

### **Proposal**

The proposal seeks consideration by each of the region's councils to support a Regional Facilities Advisor role which would be housed and managed by Nuku Ora. The purpose of this role is to:

- Guide the implementation of the Wellington Region Spaces and Places (Facilities) Plan through working alongside local authority partners, investors, and user groups.
- To provide a regional view on facility developments, ensuring that new facility developments and re-developments are aligned to the principles identified in the regional plan.

- To provide support and advice to facility development partners to ensure regional plan outcomes are met.
- To work alongside your council's staff and provide support to their work including connecting with the sector and Sport NZ on facility matters.

Nuku Ora has secured some funding for this role and is looking for investment from council partners to create a shared role from 1 July 2021 through to 30 June 2024 with a review of the arrangement to be carried out at the end of the first year (during July/August 2022). Nuku Ora will also continue to contribute to the role.

We are asking for your consideration of investing in this role. Note that should this proceed, there will be detailed accountabilities back to individual councils against any investment received. Additionally, it is proposed that progress reports against the regional plan will be provided to Council CEO and Mayoral forums.

We are asking for your consideration of a contribution of \$39,000 on an annual basis for the next three years.

We welcome an opportunity to talk further with you on all these matters.

Nga mihi  
Phil Gibbons

## PSA submission to Te Kaunihera o Pōneke - Wellington City Council Long Term Plan 2021-31

10 May 2021

### Background

The New Zealand Public Service Association Te Pūkenga Here Tikanga Mahi (the PSA) is the largest trade union in New Zealand with over 77,000 members. We are a democratic organisation representing members in the public service, the wider state sector (the district health boards, crown research institutes and other crown entities), state owned enterprises, local government, tertiary education institutions and non-governmental organisations working in the health, social services and community sectors.

PSA represents over 9000 members working in local government including over 400 at Wellington City Council.

The PSA has been advocating for strong, innovative and effective public and community services since our establishment in 1913. People join the PSA to negotiate their terms of employment collectively, to have a voice within their workplace and to have an independent public voice on the quality of public and community services and how they're delivered.

We are an organisation that is committed to the principles of the Treaty of Waitangi.

### The PSA in Pōneke Wellington

The PSA represents over 18,000 members who live and work in Pōneke Wellington of whom 460 work for Wellington City Council and its agencies. All of these members have a strong interest, as residents of Wellington, in the Plan and its aspirations and intentions; and those members employed by the Wellington City Council and its agencies have an additional interest in how the Plan will affect their jobs and working conditions.

The PSA is a principal partner of the Living Wage Movement and a strong supporter of Wellington City Council's move to becoming an accredited Living Wage employer in 2018.

This submission has been prepared by local PSA members who work in Wellington. We wish to speak to this submission, and the contact person is:

**Maddy Drew**

Public Service Association  
Te Pūkenga Here Tikanga Mahi

## Submission on Long Term Plan

### PSA vision for local government

Local democracy is a cornerstone value for the PSA: vibrant communities are underpinned by strong democratic institutions that aim to support and maximise citizen participation in local decisions. We support public ownership and control of services and facilities.

The PSA believes that the constitutional independence of local government must be supported and strengthened.

### Overall comments on the draft plan

#### Workforce

All workers should be paid a fair and decent wage. Equal pay for equal work is a human right, with legal force under the Equal Pay Amendment Act 2020 and is one of PSA's four strategic goals.

While we've been pleased to see some movement towards improving Council's processes for setting and reviewing pay levels over the past triennium, workers at Wellington City Council still receive less, on average, for the same work than those at other Councils, despite Wellington's comparatively strong economy. This has detrimental effects on staff wellbeing and on the ability to attract and retain skilled staff against competition from the state and private sector. At last measure it also has one of the highest gender pay gaps among all territorial authorities in Aotearoa. According to a PSA survey conducted in November 2019, this stood at 17.69%, compared with 14.86% for local government overall. Wellington City Council has agreed to work with PSA to close this gap. Our next survey will be taking place later this year.

Under the Human Rights Act 1993, discrimination on the grounds of age, gender, sexual orientation, relationship status, religion, ethnicity, disability or illness, or political opinion is illegal. All staff at Council must therefore have equality of access to training, development, and advancement opportunities.

We strongly recommend Wellington City Council set aside adequate resource to support equal pay claims (current and in the future), closing the gap with local government median rates, pro-actively identifying and addressing discriminatory practices, and other adjustments as may be agreed through the collective bargaining process.

#### Living Wage

The PSA is a principal partner of the Living Wage Movement, and has been instrumental in the campaign in local government.

We commend Wellington City Council on its ongoing accreditation as a Living Wage employer. We welcome the announcement of a \$300,000 annual grants fund to support local events that pay a Living Wage and look forward to continuing to work with Council on how it can use its mana and influence to support Wellington's aspiration to become Aotearoa's first Living Wage city.

## Submission on Long Term Plan

### **Workload**

Safe workloads are a critical issue for the health and wellbeing of workers, and the sustainable functioning of council services. Excessive workloads are a common complaint from our members at Wellington City Council, with unreasonable delays in filling vacancies frequently cited as the largest contributing factor. We recommend Wellington City Council ensure adequate resourcing and consistent policies across the organisation for:

- Timely refilling of vacancies
- Appropriate re-allocation and/or reprioritisation of duties while vacancies are unfilled, with priority given to the wellbeing of staff
- Staff to receive reasonable compensation for extra duties (the employer should offer this without the staff member needing to ask)

### **Keeping services in-house**

The PSA's view is that services (and assets) should, in principle, be retained in-house rather than be outsourced or removed to a CCO. A key issue for PSA members is ensuring that CCOs and other contracted service providers remain fully accountable to the Council and to the service users. Additionally, we want assurance that Council will require that contractors follow 'responsible contractor' policies, including best practice employment requirements, health and safety best practice, a commitment to workforce and career development and job security.

We commend Wellington City Council for bringing its digital and IT infrastructure services back in house after the widely-acknowledged shortcomings of the Shared Services model.

PSA notes the significant uncertainties about future costs contained in the proposed LTP, particularly around major infrastructure projects. We seek commitment from Wellington City Council to keep services in house, that the outsourcing of essential services would not be preferred options should Council see a need to rebalance expenditure in response to changes in the anticipated costs of these projects. Experience has shown that whatever the apparent short-term gains, outsourcing is not an effective or socially responsible way to reduce expenditure over the medium to long-term.

### **Asset sales**

In principle, the PSA strongly supports the retention of publicly owned assets in public ownership and control and we oppose the sale of assets that are large-scale, strategically important to the economic, environmental, cultural and social well-being of the community, and the sale of which will disadvantage future generations. We believe that these are the tests that should be applied by the Council in making any decision to sell assets.

Our members strongly support the timely strengthening of the Central Library as essential to the rejuvenation and reactivation of the Civic Precinct. PSA commends Wellington City Council on its decision not to proceed with proposals to partially lease the Central Library to the private sector, since this will retain valuable office space in the Civic Precinct for staff who provide essential services.

Public Service Association  
Te Pūkenga Here Tikanga Mahi

## Submission on Long Term Plan

We strongly believe that the retention and (where necessary) redevelopment of publicly-owned office space for Wellington City Council staff is in the best interest of our members, Council, and Wellington residents. Relying on private leases to provide office space (as is the case currently) has massive disadvantages over the medium-to-long term, reducing the flexibility and adaptability of these worksites, diminishing Council's mana, and exposing the organisation and staff to significant uncertainty.

Te Ngākau Civic Square has been the vibrant heart of Wellington's commons for some three decades, and Council has benefitted from its presence here in the CAB and MOB buildings alongside the Central Library and City Gallery, providing a strong link between these functions. For staff, the location provides a sense of immediacy and intimacy with our city's creative & entertainment centres. For the public, it is a visible, accessible, and welcoming space for them to engage with their local authority and access information and services.

With that in mind we would be strongly averse to any proposal for the sale or long-term lease of Council-owned office space to the private sector which does not give due consideration for suitable alternative long-term accommodation of Council staff in publicly-owned office space. **Decision 5 – Fixing resilience issues in Te Ngākau Civic Square**, the preferred option given by Council for CAB & MOB is **Option 1** - "Demolish and site redeveloped through a long-term ground lease". While this might save some money in the short term, it would severely constrain Council's ability to adequately house its staff in future.

Of the options proposed, **Option 3** – "Retain and seek to repurpose" is the only option that meets the needs of the organisation and the public it serves. However, we would consider supporting any alternative proposal which retained the ability to suitably house the majority of Council staff in the precinct or another suitable location.

Given the likely impacts of climate change on sea level, we urge Wellington City Council to include appropriate flood hazard mitigation in its ongoing planning and redevelopment of the precinct.

### Transport

PSA strongly supports increased investment in sustainable and accessible transport options, including cycleways and other alternatives to private motor vehicles. Given the high level of public interest in changes to the transport network, it is of course crucial that Council (and partner agencies) engage pro-actively with residents to ensure that changes to the network are well-tested locally and supported by those affected. Many Council staff live on cycle routes and would benefit from expansion of the cycleway network.

Let's Get Wellington Moving is an ambitious proposal to transform our transport network and successful delivery will hinge upon strong support from & cooperation between partner agencies. Given present uncertainties around Let's Get Wellington Moving's governance structure and delivery

## Submission on Long Term Plan

timeline, we encourage Council to continue working proactively with partners to improve our transport network both alongside and within the LGWM framework.

### Environment

Wellington City Council's commitment to the *Te Atakura – First to Zero* strategy is an encouraging sign that it takes its role in mitigating and adapting to climate change seriously.

While initiatives to support individuals to reduce their carbon footprint are commendable, this needs to be appropriately balanced by incentives for business and industry to reduce theirs. The initiatives proposed in the Long Term Plan are all positive steps in the right direction, however, PSA recommends Wellington City Council explore additional supply-side mechanisms to reduce emissions by local industry, including through grants/funding and resource consent processes.

Unlike many cities in Aotearoa (e.g. Christchurch, Tauranga), Wellington City Council does not collect and process green waste at the kerbside. Green waste accounts for around 22.8% of the waste sent to Wellington's Southern Landfill, which currently generates over 3000 tonnes (overall) per year in methane emissions. Small-scale kerbside collection and home composting trials have shown promising results over recent years. Given this, we're disappointed to see that the LTP as proposed does little to build on those efforts. Given its zero carbon commitments Wellington's reputation as our most innovate and progressive city, we strongly encourage Wellington City Council to be more ambitious with its waste management strategy and learn from the successes of other major cities in Aotearoa.

PSA also recommends Wellington City Council explore ways to improve the processing of Wellington's recyclable waste, to both expand the range of waste covered and reduce emissions generated.

Regarding sludge minimisation, while Council has recommended **Option 4** – "Sludge minimisation through alternate funding", as read we are concerned this presents significant risk should external funding fall through. While it would require a slightly higher budgetary commitment on paper, we suggest **Option 3** would ensure funding is adequately ringfenced should alternative funding not be forthcoming.

### Housing

PSA strongly supports increased investment in affordable & social housing, and Council's ongoing efforts to end homelessness in line with the Te Mahana strategy.

However, we note with concern that even the "affordable" rental housing launched by Council in 2020 under the [Te Kāinga](#) programme remains well out of reach for most residents, starting at \$410/wk for a single bedroom apartment. While purportedly targeted at "People who work in essential public sector roles", this pricing would seem to suggest that Wellington City Council does not view the majority of front-line workers who deliver public services as "essential".

Public Service Association  
Te Pūkenga Here Tikanga Mahi

## Submission on Long Term Plan

We note Council's concerns about the future operating costs of City Housing. We would not support any increase of social housing rents beyond the current 70% of market rents since this would disproportionately impact low-income and migrant residents. Given the importance of Council's ongoing role as a provider in this space, we encourage the exploration of other options to meet these costs. This might include finding ways to make the Income Related Rent Subsidy available to tenants, working through or with registered Community Housing Providers.

Poor conditions in private residential tenancies have been widely reported in local media, along with exploitative practices by some property managers. While we have seen improvements to renters' rights from central government, the onus largely remains on tenants to enforce these in a situation where they may be unaware, unable, or unwilling (due to the inherent power imbalance of the landlord-renter relationship) to do so. PSA notes that Councils have significant statutory authority under the Health Act 1956 to enforce Healthy Homes standards in private tenancies within its boundaries. We encourage Wellington City Council to explore ways to use this authority to improve living conditions for vulnerable residents, in conjunction with other relevant agencies.

### **Governance**

Our members strongly support WCC increasing its investment in building strong mana whenua partnerships, as well as investing in increased internal capacity to enhance its cultural competency, and make Council a place where Māori staff feel comfortable and supported to work as Māori, fully embracing their tikanga.

### **Fee Changes**

PSA's view is that public services should be accessible to all people, regardless of income level. The LTP 2021-31 proposes significant fee increases across a broad range of key services which will increase barriers to service access, and disproportionately impact low-income residents. We strongly encourage Council to consider alternatives to fee increases wherever possible; and explore options to minimise the impact of increases on low-income residents (e.g. Community Services Card holders).

Public Service Association  
Te Pūkenga Here Tikanga Mahi

## Submission on Long Term Plan

### Conclusion

#### **Recommendation 1:**

That Wellington City Council set aside adequate resourcing in the LTP to eliminate its gender pay gap, close the gap with median pay across the sector, and other such adjustments as may be agreed through the collective bargaining process.

#### **Recommendation 2:**

That Wellington City Council ensure adequate resourcing and consistent policies across the organisation to avoid unreasonable workloads, consistent with its commitment to staff wellbeing.

#### **Recommendation 3:**

That Wellington City Council provide assurance to residents that the outsourcing of essential services and sale of significant public assets would not be preferred cost-saving options should capital expenditure exceed LTP projections.

#### **Recommendation 4:**

That Wellington City Council pursue options for the redevelopment of Te Ngākau Civic Square which retain the ability to suitably house the majority of Council staff in suitably located, publicly-owned office space.

#### **Recommendation 5:**

That Wellington City Council provide additional resourcing, beyond that proposed, to expand and improve the city's waste management systems, including the development of infrastructure to support kerbside green waste collection.

#### **Recommendation 6:**

That Wellington City Council build on its role as a housing provider and regulator to combat the housing crisis, and support the expansion of genuinely affordable, liveable housing in the inner city and surrounding suburbs.

## Submission to Wellington City Council (WCC) 2021-31 Long Term Plan (LTP) Consultation

Contact: Karyn Burgess, Regional Coordinator, Enviroschools Te Upoko o te Ika a Māui [REDACTED]

**We would like to speak to our submission.**

Thank you for the contribution Wellington City Council has made over many years to supporting an Enviroschools Network in Te Whanganui a Tara.

We request continued funding for the Enviroschools Network as a means of enhancing WCC priorities on multiple fronts.

We also request that WCC engages with us, other partners and Toimata Foundation to expand Enviroschools provision in Te Whanganui a Tara. We encourage an increase of WCC's Natural Environment fund to enable this.

### **The significance of Enviroschools in this uniquely challenging environment - *developing and growing the citizens we need for the future***

As the Wellington City Council LTP plan consultation document stresses, we all face a uniquely challenging environment.

This is an environment where we need to do more than reduce emissions and fix our infrastructure - we need a generation of people in our communities who are prepared and empowered to solve the problems of the future, who instinctively think and act in regenerative ways and understand what it means to honour Te Tiriti o Waitangi.

Enviroschools provides schools and early childhood centres with a framework and support system to help grow those citizens.

### **A great fit with Wellington City Council's overarching priorities - *strong partnerships with Mana Whenua and accelerating a zero-carbon and waste-free transition***

Enviroschools prioritises strengthening relationships with Mana Whenua and restoring connections with Papatūānuku as essential foundations for taking environmental and social action.

We have developed a strong relationship with Taranaki Whānui to help schools and centres understand what it means to hold taha Māori respectfully and safely in their settings.

Recently 250 students from 7 Wellington City enviroschools came together to connect with one another, with local people and with their local place at Otari Wilton's Bush.

Students and teachers loved this event, saying it is always the highlight of their year. The event itself provides a taster of ways to connect with nature. We are then able to support teachers to implement the approaches more widely as part of their programmes back at school.

WCC's investment in parks and green spaces complements our mahi and we in turn are able to help the council maximise return on its investment through encouraging use of, connection to and care for these places.

We also support schools and centres to look holistically at everything they do and consider how it can be more sustainable and regenerative. We help them celebrate what they have achieved and identify next steps. This provides outcomes across the whole of council as well as for Parks, Sports and Recreation where our funding comes from.

This mahi adds value to the climate change response and we support fully funding Te Atakura - First to Zero.

### **Enviroschools progressing their journeys in Te Whananui a Tara**

Forty Wellington City schools and centres are currently working with the Enviroschools resources and facilitators at varying levels of engagement.

Despite the COVID-19 pandemic, in 2020 seven schools and centres participated in an Enviroschools Holistic Reflection process in order to progress their journeys. This included Paparangi School extending a 17 year journey with the Enviroschools Network when they re-reflected at Green-Gold.

A similar number of schools and centres are preparing for holistic reflection this year, including Peninsula Community Early Learning Centre who will soon celebrate their Green-Gold reflection with the community.

### **Wellington City Council is not alone - A nation-wide movement for positive change**

Enviroschools in Te Whanganui a Tara is part of a strong collaborative model nationally, regionally and locally. Such collaboration is essential if we are to address the complex challenges we face as a society. Central government, other regions and all the councils of the Wellington region are working together to support a network that provides knowledge and inspiration to its participants who find it highly valuable to be part of.

The funding partner collaboration in the Wellington region is outlined in the attached *Regional Statement of Collaboration, Enviroschools in Te Upoko o te Ika a Māui*.

### **Future Funding for Enviroschools in Te Whanganui a Tara - why increase the value of the contract?**

Currently our contract with WCC enables Enviroschools Facilitators to work the equivalent of 2.5 days per week to support the Enviroschools Network in Te Whanganui a Tara. This involves working across 40 schools and centres and means we do not have the capacity to work with many of them in depth.

We also have a steady flow of inquiries from schools and centres to be part of the network - six schools and centres inquiring since January 2021 that we are unable to support given the current funding. We expect the level of interest to increase as the community responds to the call to step up in response to climate change and other challenges.

Over the next three years we would appreciate your support to work with all the councils in the region, other partners and Toimata Foundation to be able to make a step change in how we support the Enviroschools Network in this region. We need to provide more and bigger Enviroschools Facilitator roles if we want to achieve Wellington City's Environmental community outcome of a sustainable, climate friendly eco capital - where the natural environment is being preserved, biodiversity improved, natural resources are used sustainably, and the city is mitigating and adapting to climate change.

With the right level of support we can help make this happen now and for future generations.

# REGIONAL STATEMENT OF COLLABORATION

## Enviroschools in Te Upoko o te Ika a Māui

### Purpose of this Statement - working together in Te Upoko o te Ika a Māui

We are all working together towards a more sustainable future. Each participating council is committed to environmental sustainability and understands that working with communities can lead to positive changes now and for future generations. This includes supporting and providing education programmes for our local schools and early childhood centres. We all collaborate regionally, with Toimata Foundation, to provide an Enviroschools network in Te Upoko o te Ika a Māui.

This document explains what Enviroschools is, the reasons for our commitment to Enviroschools, how it contributes to a sustainable future, and our organisational roles in the collaborative structure for action.

As regional Enviroschools partners, we will:

- Work together in flexible, high-trust relationships that support a collaborative approach.
- Support innovation in the ways the Enviroschools kaupapa is shared with and supported in our local communities.
- Explore ways to grow the regional reach of the Enviroschools approach and to foster the depth of practice across the Enviroschools Network.

Hands-on learning and action  
- creating an outdoor classroom

Working with communities to care for  
and restore special places

Student-led action to reduce waste

## What is Enviroschools?

Enviroschools is a **network of schools** and early childhood education (ECE) centres learning and taking action together to create a more healthy, peaceful and sustainable world.

Through Enviroschools **young people are empowered to be active citizens – designing and leading projects** in their ECE centres, schools, neighbourhoods and beyond.

The Enviroschools approach is unique in that it takes a **holistic approach** to sustainability, drawing together all aspects of what takes place in the school or centre.

A **long-term relationship** is built with schools and centres in the network and the approach acknowledges that every ECE centre and school across the country has its own ecology, history, culture and community, so Enviroschools looks **different in every setting**.

## Why we invest in Enviroschools

As council partners we have committed to Enviroschools because it plays an essential role in creating a resilient and sustainable future.

Enviroschools was co-developed with councils. It is specifically designed as an authentic way for councils to work proactively with their communities for a range of sustainability outcomes across the four well-beings in the Local Government Act – environmental, cultural, social, and economic. Enviroschools provides a way to bring to life the principles of Te Tiriti o Waitangi.

- It is a proven approach, with a 20-year track record and backed by a 5-year research and evaluation programme.
- It is good value – the collaborative, nationwide approach means the annual investment from councils represents around a quarter of the total annual investment in Enviroschools, with the balance funded by Central Government and Community.
- Participating in a nationwide initiative that is highly collaborative means both participants and council partners benefit from the innovations, knowledge and experiences of other regions, as well as the range of support provided by Toimata Foundation.

## Five Guiding Principles Ngā Mātāpono of the Enviroschools Kaupapa

**EMPOWERED STUDENTS** are enabled to participate in meaningful ways in the life of their early childhood centre or school. Their unique perspectives are valued for the knowledge and insight that they bring, and they are supported to take action for real change.

**LEARNING FOR SUSTAINABILITY** recognises the types of teaching and learning that use connecting experiences to develop holistic and ecological perspectives, foster student enquiry, decision-making, action, and reflection, and create sustainable outcomes.

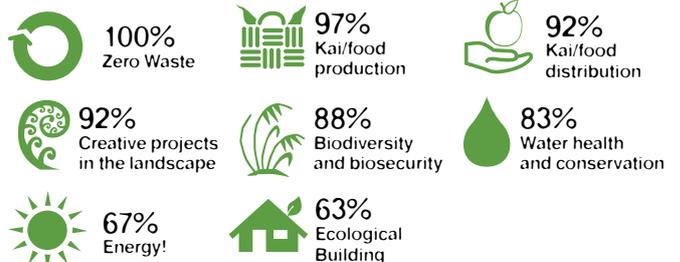

**MĀORI PERSPECTIVES** honours the status of tangata whenua in this land and the value of indigenous knowledge and wisdoms in enriching and guiding learning and action.

**RESPECT FOR THE DIVERSITY OF PEOPLE AND CULTURES** acknowledges the unique gifts, contributions and perspectives of individuals and groups, reinforcing the value of participatory decision-making and collaborative action.

**SUSTAINABLE COMMUNITIES** act in ways that nurture all aspects of nature, including people, now and in the future, to maintain the health and viability of our environment, society, culture and economy.

### Environmental sustainability actions:

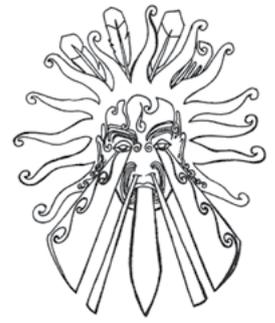

### Cultural, Social and Economic sustainability actions:

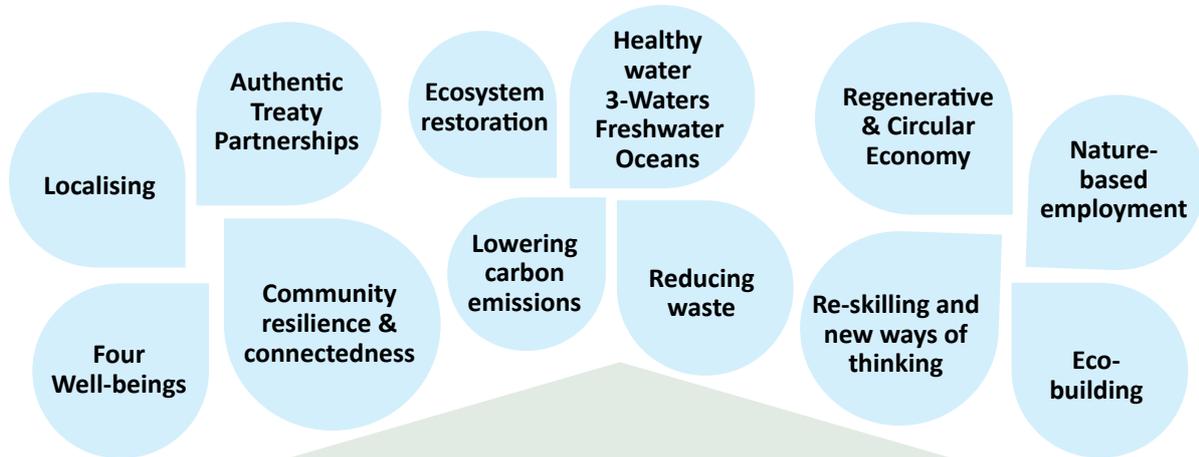

\* Percentages are the total % of participants who are taking one or more actions in the area

# The role of Enviroschools in creating a resilient and sustainable future

This diagram shows how Enviroschools contributes towards positive change in communities across New Zealand.

## Aspects of a sustainable future

**Integrating Māori perspectives, tikanga and concepts** as sustainability solutions unique to our country.

**Sharing knowledge** so localised learning and solutions can be applied nationwide.

**Connecting schools with communities** - building stronger connections between schools and their communities, and facilitating connections between schools.

**Supporting teachers** to weave learning into a real-life process of creating a sustainable school and community.

**Creating 'nature connectedness'** for people as a the foundation for sustainable lifestyle choices.

**Fostering creativity** by people exploring and envisaging what a resilient and vibrant sustainable world could be.

**Empowering through action-learning** - people of all ages leading and participating in projects to design, plan, restore and construct all the different aspects of a sustainable community.

**Building citizenship and a strong sense of belonging** through collective local action.

**Addressing root causes** - helping people to understand the big picture of sustainability, the relationships between issues, and exploring ways to tackle root causes.

## Enviroschools' contribution to a sustainable future

**Holistic kaupapa and approach** that is grounded in Mātauranga Māori and empowers people of all ages

A highly **collaborative cross-sector model** of 100+ agencies working together to support local communities

**Expertise**  
A nationwide team with sustainability know-how and specialised skills in facilitating participatory processes

**Comprehensive suite of resources and highly effective tools and processes** for collective community visioning, learning and action

**Large nationwide network** with long-term participation that has reach into thousands of communities

## Foundational elements of the Enviroschools approach

## Our roles in the Enviroschools collaborative structure for action

The complex environmental, social, cultural and economic challenges facing us today call for a collaborative response. Toimata Foundation creates a hub for such a collaborative response bringing together organisations from Local Government, Central Government and Community to support a large network of participating ECE centres and schools come together to support each other, share developments and take action on a larger scale.

### At a regional level, the role of the Enviroschools

#### Te Upoko o te Ika a Māui team is to:

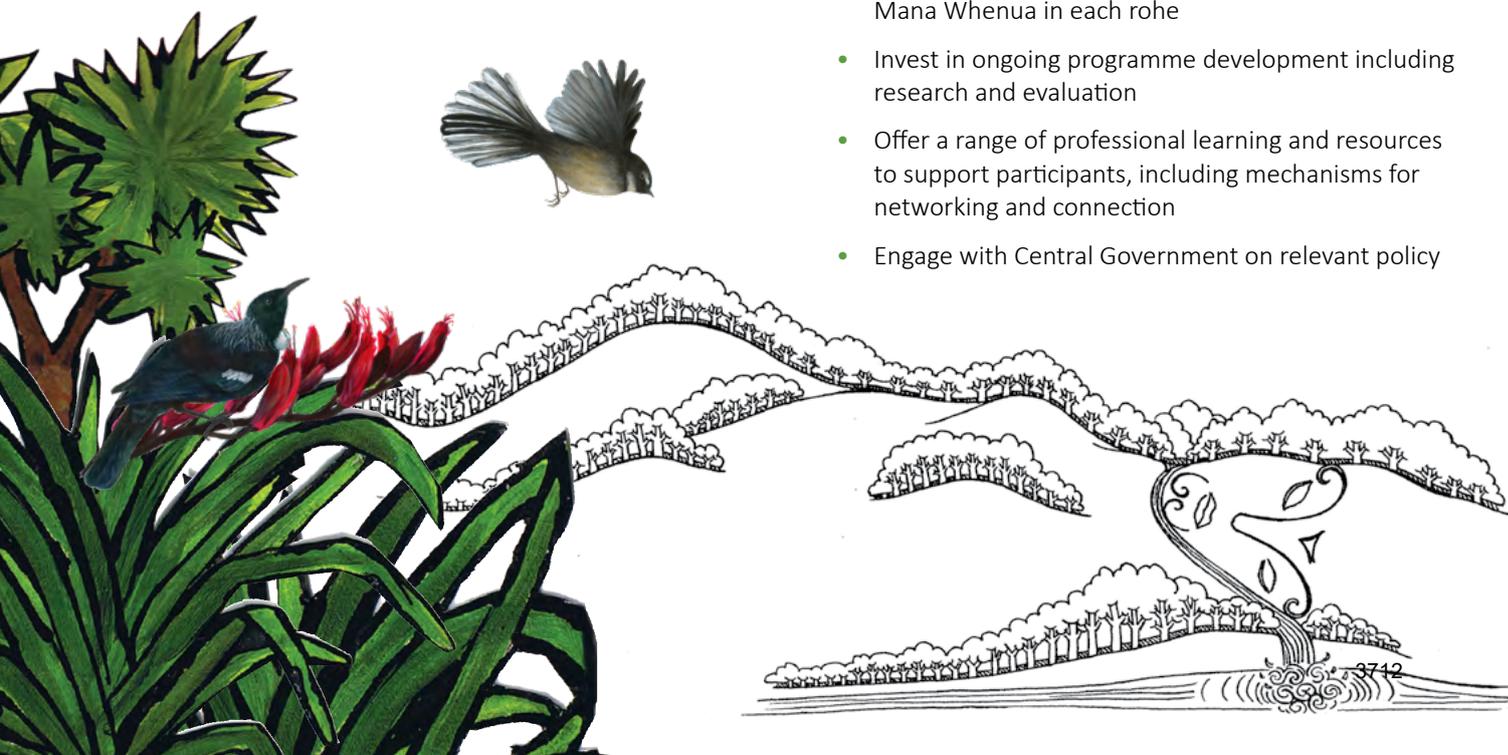

- Hold an overview of and set the strategic direction for the Enviroschools Network in the region, including maintaining and developing partnerships across multiple organisations
- Facilitate communities across the region to participate in Enviroschools, this includes:
  - Providing sustainability related professional development and networking opportunities for teachers
  - Running sustainability related exploration events for children and students
  - Developing and maintaining on-going relationships with schools and ECE centres in order to be able to reflect on progress over time and to be able to link them with local experts and action
  - Sharing examples of effective and reflective practice across the network
  - Assisting schools and ECE centres to connect with council and other provider programmes useful for them at the current time
- Build authentic and supportive relationships with Tangata Whenua
- Collaborate with other programme providers across the region to support a synergistic way of working
- Provide advice and guidance to council staff interested in working with schools and ECE centres

### At a regional level, councils play a key role in regional implementation by:

- Contributing the funds to enable Enviroschools to operate in the region/city/district
- Connecting the direction and vision for the region/district/city with Enviroschools
- Providing environmental, well-being and citizenship expertise
- Providing content specific sustainability-related programmes
- Providing an overview of environmental and community relationships within a region/district/city
- Linking schools and centres to projects of importance to a community
- Providing facilities that enable people to connect with the world around them

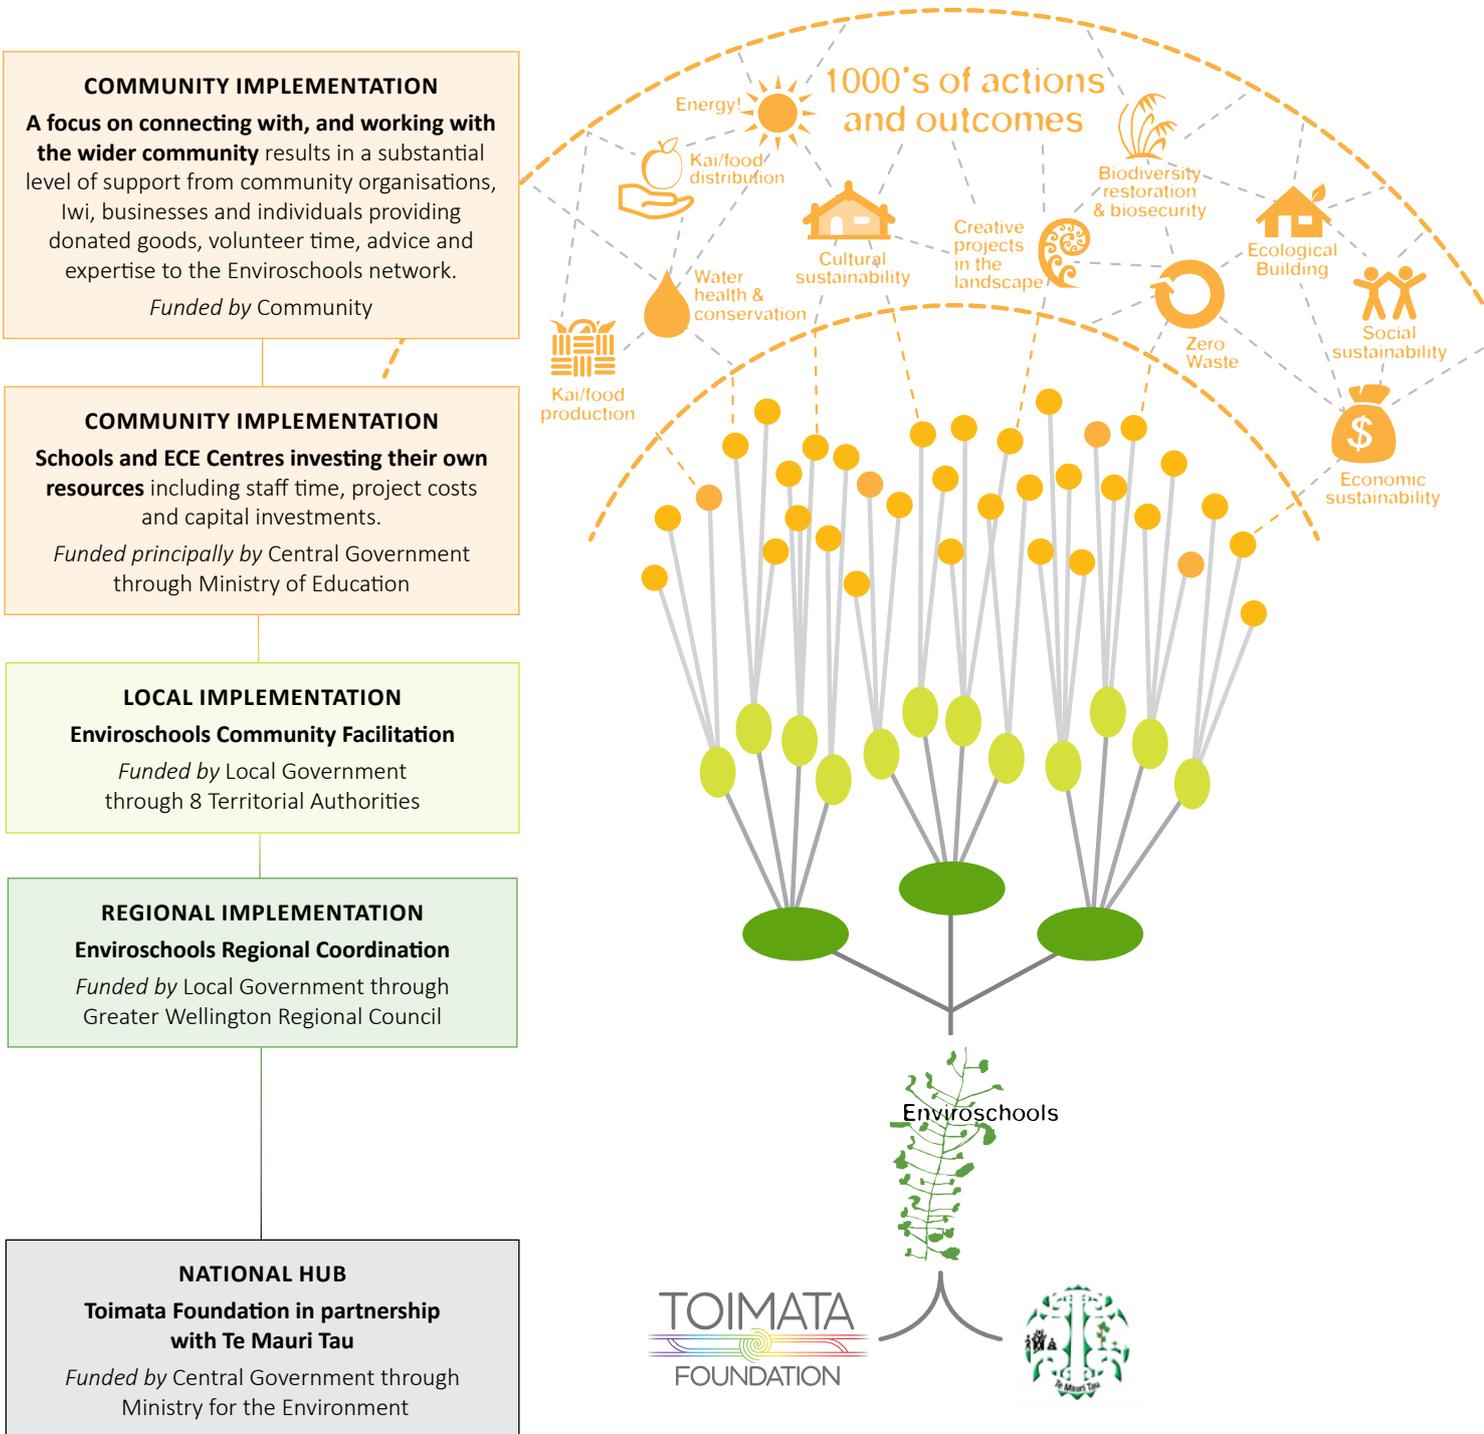

### At a national level, the role of Toimata Foundation is to:

- Guide the vision and strategic direction of Enviroschools
- Provide a framework, resources and in-depth support for taking a whole school/centre approach to sustainability
- Mobilise funding through a network of partnerships
- Hold the integrity of a kaupapa grounded in Māori perspectives through working with founding partner Te Mauri Tau and supporting regions to be connect with Mana Whenua in each rohe
- Invest in ongoing programme development including research and evaluation
- Offer a range of professional learning and resources to support participants, including mechanisms for networking and connection
- Engage with Central Government on relevant policy

# The Enviroschools collaborative structure for action

The following diagram shows the Enviroschools collaborative structure for action, highlighting the contributions from participants at various levels of the model resulting in tens of thousands of innovative projects and lifestyle changes taking place in schools/centres, households, neighbourhoods, on farms, in local businesses and in all types of ecosystems. Some projects are small-scale in one school or centre and others involve hundreds of people working across a whole catchment or community.

Toimata and Te Mauri Tau also support Te Aho Tū Roa, a kaupapa in te reo Māori working with kōhanga/puna reo, kura, wharekura and communities that embraces Māori culture, language and wisdom. Te Aho Tū Roa has its own collaborative support model that is distinct from Enviroschools.

# Submission form

## Kōrero mai mō te mahere 10-tau Have your say on our 10-Year Plan

All submissions must be received by **midnight Monday 10 May 2021**.

You don't have to give feedback on every decision – just choose the ones you're interested in. You can only submit once. You can include supporting information along with your submission.

Before you start, read about our priorities and projects in our consultation document. There are copies available at your local library and our Service Centre at 12 Manners Street, or visit [wgtn.cc/ltp](http://wgtn.cc/ltp).

### Why we're collecting this information

Your feedback matters. This plan is about the future of Wellington and it affects everyone who lives and works here. That's why we want to hear from as many people as possible. Your views will inform the next steps we take.

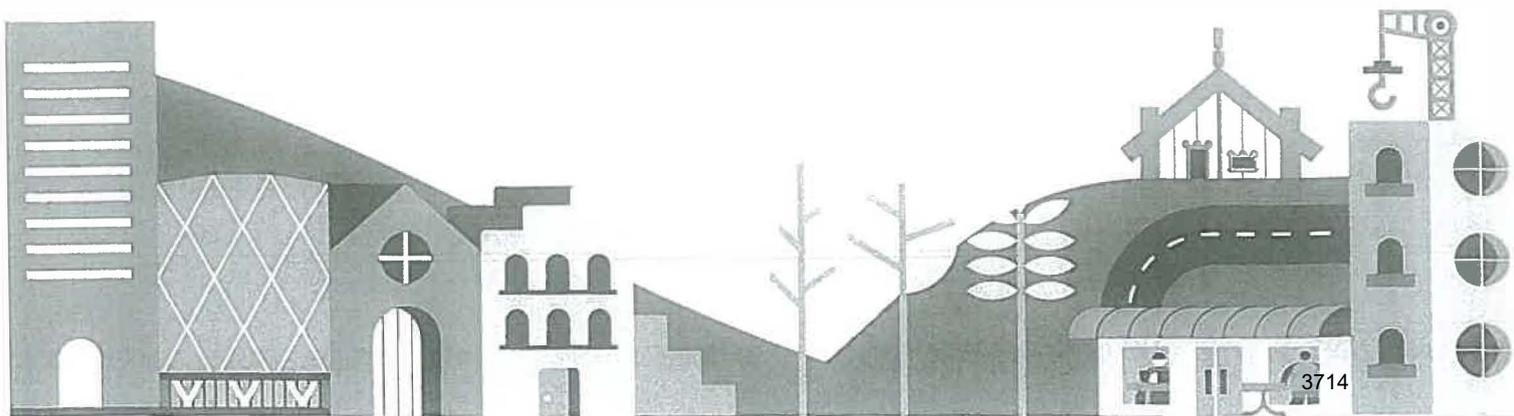

### Privacy statement

All submissions (including names and contact details) are provided in their entirety to elected members. Submissions (including names but not contact details) will be made available to the public at our office and on our website.

Your personal information will also be used for the administration of the consultation process, including informing you of the outcome of the consultation.

All information collected will be held by Wellington City Council, 113 The Terrace, Wellington, with submitters having the right to access and correct personal information.

Full name: <u>Daran Ponter</u>		
<b>Contact details</b>		
Address: [REDACTED]		
Phone number: [REDACTED]		
Are you making this submission as an individual or on behalf of an organisation?		
Individual	Organisation: <input checked="" type="checkbox"/>	
What is your connection to Wellington? (tick all that apply)		
<input checked="" type="checkbox"/> I am a Wellington City Council ratepayer	<input checked="" type="checkbox"/> I live in Wellington	<input checked="" type="checkbox"/> I work in Wellington
<input type="checkbox"/> I own a business in Wellington	<input type="checkbox"/> I study in Wellington	<input type="checkbox"/> I am a visitor to Wellington
Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?		
Yes <input checked="" type="checkbox"/>	No <input type="checkbox"/>	
If yes – We are offering two ways of speaking to Councillors about your submission. (Please tick which option(s) you would prefer?)		
<b>Oral forum</b> (informal, 60min facilitated table discussion with 2 to 3 Councillors and other submitters)	<input type="checkbox"/> Morning	<input type="checkbox"/> Afternoon
		<input type="checkbox"/> Evening
<b>Oral Hearing</b> (formal hearing with set times to speak to full Council, 5mins per individual, 10mins per organisation) <input checked="" type="checkbox"/>	<input type="checkbox"/> Morning	<input type="checkbox"/> Afternoon
		<input checked="" type="checkbox"/> Evening

## Our seven big decisions

The next seven questions relate to the big decisions for the 10-year plan.

- **Decision 1:** Increasing spending on the three waters network to fix the pipes
- **Decision 2:** Taking responsibility for the ownership of wastewater laterals
- **Decision 3:** Increased investment in cycleways
- **Decision 4:** Implementing our Te Atakura, First to Zero action plan
- **Decision 5:** Choosing a plan for earthquake-prone Council Office buildings
- **Decision 6:** Funding the Central Library strengthening and upgrade
- **Decision 7:** Choosing a plan for sludge minimisation

Detailed information on these decisions are on pages 20 to 47 of the Consultation Document.

**Question 8** in this submission form is a place for you to comment or provide any other feedback on the decisions.

You are also able to attach further information to your submission at the end of this form.

### 1. Investment in three waters infrastructure

There are three different levels of investment in the three waters network to consider. Our preferred level of investment is the **Enhanced** option, which focuses on improving the condition and reliability of the network in an affordable and sustainable way.

Problems with pipes have been a long time in the making, and we cannot fix everything at once. The Enhanced option represents a \$2.4b investment in our three waters network and is the middle-ground option that we are confident of being able to deliver in this plan. We will be able to review the level of investment in our next Long-term Plan review in 2024, when we will have more information on the network.

A summary of the proposed investment in in the three waters network is on pages 22 - 26 of the Consultation Document.

Which of these options do you prefer?

Enhanced (\$2.4b Council's preferred option)	Maintain (\$2.0b investment - lower rates and debt)	Accelerated (\$3.3b investment - higher rates and debt)	None of these options	Don't know
--	---	---	-----------------------	------------

### 2. Wastewater laterals

Currently residents are responsible for the maintenance of the pipes connecting their property to the wastewater (sewerage) main underneath the road corridor. These are called wastewater laterals.

We propose that the Council takes ownership of the laterals between the property boundary and the sewerage main underneath the road corridor.

A summary of the proposal to take responsibility for wastewater laterals is on pages 28 - 29 of the Consultation Document.

Which of these options do you prefer?

Take ownership (Council's preferred option, \$32m investment)	No change (no change in investment, rates or debt)	Neither of these options	Don't know
---	--	--------------------------	------------

### 3. Cycleways

Cycleways is an area where we have ambition to seriously lift our game – we'd like to build a network of connected and safe cycleways that allow Wellingtonians to be able to choose cycling as a mode of transport. Our full programme for the network can be viewed at [transportprojects.org.nz](http://transportprojects.org.nz) and if all of the routes were progressed, there would be a \$226m investment across the 10 years of this plan.

Our preferred option is a \$45m or 60 percent increase in funding for cycleways than what was planned in the previous Long-term Plan. It will progress \$120m of the full \$226m programme

We believe the high investment programme option balances the need for increased investment in this area with what is affordable for Council and what we will be able to deliver. It allows time in the programme for robust community engagement and to build capacity in the Council and the sector for the full programme to be eventually delivered.

A summary of the proposed investment to build more cycleways is on pages 30 – 33 of the Consultation Document.

Which of these options do you prefer?

High investment programme (Council's preferred option, \$120m capital investment)	Finish started projects (\$29m capital investment, lower debt and rates)	Medium investment programme (\$39m capital investment, lower debt and rates)
Accelerated full investment programme (\$226m capital investment, higher debt and rates)	None of these options	Don't know

### 4. Te Atakura First to Zero (Climate Change)

Te Atakura – First to Zero is our response to the climate and ecological emergency we declared in 2019 but it is not yet funded.

Te Atakura is intended to ensure sufficient activity is undertaken in this decade to reduce our emissions. Council can do this by supporting the transport mode-shift projects, as well as encouraging the uptake of electric cars, providing seed funding to leverage businesses and community impact and supporting residents to be motivated to take action.

Our preferred option is to fully fund Te Atakura, which is included in our 5.3 percent average increase across 10 years.

A summary of the proposed investment in Te Atakura – First to Zero Action Plan is on pages 34 – 37 of the Consultation Document.

Which of these options do you prefer?

Fully fund the programme (Council's preferred option, \$29.9m investment)	Medium investment with savings (\$25.4m investment, lower rates and debt)	
Low level of funding (\$18.1m investment, lower rates and debt)	None of these options	Don't know

### 5. Te Ngākau Civic Precinct - Council office buildings

Te Ngākau Civic Square is the musical, creative and democratic heart of Wellington but it has significant resilience challenges.

While we are still working through finalising the framework for Civic Square, a specific decision is required in this Long-term Plan with respect to the future of the Council office buildings - the Municipal Office Building (MOB) and the Civic Administration Building (CAB).

As the two buildings are connected, and have similar resilience issues, it is important that the future of them is considered together.

Our preferred option is to demolish and rebuild the MOB and CAB buildings in partnership with private investment through a long-term ground lease for the site.

Combining a MOB and CAB development would enhance this opportunity and significantly decrease the need for additional Council borrowing and ratepayer funding to address these impaired buildings.

A summary of the proposed approach to developing of Te Ngākau Civic Square on pages 38 – 41 of the Consultation Document.

Which of these options do you prefer?

Demolish and site developed through long-term lease (Council's preferred option)	Proceed with base build proposal for public purposes (higher debt and rates)		
Retain and seek to repurpose (higher debt and rates)	Sell to support development (no debt or rates impact)	None of these options	Don't know

## 6. Fixing the Central Library

Wellington's much-loved Central Library was closed in March 2019 following an engineering assessment saying that the way the floor was designed presented a high level of potential failure in a significant earthquake.

After hearing from Wellingtonians in the 2020 consultation, Council agreed to recommend the high-level remediation option to be part of this plan. This option makes the building resilient to future shocks and supports our ability to deliver an adaptable modern library service, while preserving the buildings heritage. It also allows us to mitigate some climate change impacts in the future.

Now there are choices about how to fund the \$187.4m library remediation project, and when the project should take place.

The preferred option, includes the Council agreeing to temporarily breach its debt limit of 225 percent to ensure the library can be refurbished in the original timeframe and remain in public ownership. Our debt level will remain at 225 percent, and Council has agreed to accept the breach in the first three years of this plan. This breach will be mitigated by any capital underspend being used for the library project rather than on new projects. Our debt level will be back below our limit by year 4 - 2024/25.

A summary of the proposed investment to fund the fixing of the Te Ngākau Civic Square Central Library is on pages 42 - 44 of the Consultation Document.

Which of these options do you prefer?

Strengthen now by temporarily exceeding debt limit (Council's preferred option, additional 0.79% rates increase)	Council to strengthen Central Library later (complete in 2028 instead of 2025, additional 0.83% rates increase)	
Strengthen now by increasing rates further (additional 1.79% rates increase)	None of these options	Don't know

## 7. Reducing sewage sludge and waste

One of the largest waste categories at the Southern Landfill is wastewater (sewage) sludge. This accounts for about a quarter of the waste that enters the landfill.

Through Te Atakura (our Zero Carbon Plan) and our Regional Waste Minimisation and Management Plan we have formally committed to reducing carbon emissions and reducing waste by a third. Minimising wastewater sludge is a necessary first step to achieving these objectives.

We need to break the link between the Southern Landfill and wastewater sludge and stop pumping sludge across the city, as 2020 highlighted the serious resilience issues and the significant consequences of failure.

Our preferred option is to invest in a sludge minimisation programme through another funding source. This means the project would not be funded by Council, but if it is funded through a Special Purpose Vehicle, a levy of about \$70-\$100 per year will be charged to each ratepayer.

A summary of the proposed investment in sludge and waste minimisation is on pages 45 - 47 of the Consultation Document.

Which of these options do you prefer?

Sludge minimisation through alternate funding (Council's preferred option, \$147m-\$208m capital investment funded through a levy, no additional rates increase)	No change in current practice (no change to investment, rates or debt)	
Invest in technology at Southern Landfill (\$86m-\$134m capital investment and higher rates)	Sludge minimisation - through Council funding (\$147m-\$208m capital investment, above debt limit and higher rates)	
None of these options	Don't know	

## 8. Feedback on these decisions

Do you have any comments you would like to provide around why you selected your preferred option to any of these decisions, or why you don't support any of the options we proposed? If yes please indicate what decision/s you wish to provide comment on.

Investment in three waters infrastructure	Wastewater laterals	Cycleways
Te Atakura (climate change) ✓	Central Library	Sludge and waste minimisation
Te Ngākau funding for future work	None of these	

If the space on the next page is not adequate for your comments, please feel free to attach supporting information to the submission. **Please be clear** what decision you are commenting on.

Please see comments attached on  
Te Atākura (Climate change).

**Comments**

**9. Proposed 10-year budget (see page 10 for details)**

Our draft budget, has an average rates increase for the average ratepayer of 5.3 percent after growth across the 10 years of the plan. We also propose setting a limit on how much we can raise from general rates - \$465m for each year across the first 3 years of the plan and, \$630m each year across years four to ten.

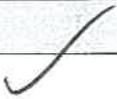

The first year of the plan has a rates increase of 13.5 percent (after growth) and there is an average of 9.9 percent (after growth) over the first three years. This is higher than previous plans because of the **key challenges** faced by the city including infrastructure, housing, earthquake strengthening and and COVID-19 impacts.. Therefore, we now require a step up in the level of rates we charge. Details of the key challenges are on pages 20 - 47 of the **Consultation Document**.

Our proposed budget also represents our highest ever level of capital investment in Wellington. It addresses the need for increased investment in our three waters infrastructure and transport network and seismic strengthening of key buildings, along with making progress against all our other priority community objectives.

Our debt levels for this plan, including the value of uninsured assets, range from 134 percent to 239 percent of our annual income. Our proposed limit is 225 percent.

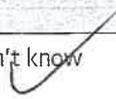

We think this is a sensible limit on our borrowing to ensure that the impact on affordability of rates is maintained and leaves enough 'headroom' to ensure we can repay our debt, and respond to expected but unfunded and unexpected future events and opportunities.

**Do you support the proposed 10-year budget?**

I strongly support the proposed budget	I somewhat support the proposed budget	Neutral 
I somewhat oppose the proposed budget	I strongly oppose the proposed budget	Don't know

**If you stated in Question 9 that you are neutral or do not support the proposed budget.**

**Do you support increasing or decreasing spend?**

I support increasing spend in the current budget	I support decreasing spend in the current budget	I support keeping the budget the same but with some changes	Don't know 
--	--	---	--

## 10. Any other feedback on what is proposed for the 10-year Plan

### Future decisions

The Consultation Document also signals other decisions that are coming up in the time of this plan, but that we do not have enough information on at this stage for a detailed consultation.

### Other projects

We also have many other services and projects detailed in our Statements of Service Provision.

### Council Fees and charges

We have also made changes to some of our fees and user charges. More information on these are available on our website [wgt.ncc/ltp](http://wgt.ncc/ltp) and available at our libraries and service centre.

Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?

please see attached.

## Submission to Wellington City Council Long Term Plan 2021-31

Greater Wellington Regional Council (GW) shares the commitment of Wellington City Council to reduce carbon emissions, as reflected in our Declaration of a Climate Emergency in 2019. “Responding to the Climate Emergency” is one of GW’s four ten-year strategic priorities.

GW believes that among the seven big decisions on which you seek comment, fully funding Te Atākura – First to Zero (Wellington City’s Zero Carbon) Implementation Plan should be a top priority for Wellington City Council.

GW strongly agrees with WCC’s view that one of the most significant actions to reduce emissions is a mode-shift to public transport. We also note your intention to support residents to be motivated to take action. Our joint involvement with Let’s Get Wellington Moving (LGWM) is a key means of achieving this outcome; this includes a commitment to a dedicated Wellington Airport public transport service.

As outlined in Te Atākura (Wellington’s blueprint for a Zero Carbon Capital), Wellington Airport is a major regional destination and employer, linking us to the world and supporting a thriving economy. However, through this role and function, it is also a recognised contributor to carbon emissions. GW notes Te Atākura’s questions “*What high quality public transport link to the airport could be possible? What could be more convenient?*”

## **Regional Public Transport Plan**

GW has recently completed consultation on the draft Wellington Regional Public Transport Plan 2021-31. The draft RPTP signalled the establishment of a new airport bus service to be provided as an integral part of the Metlink public transport network, by July 2022. Public feedback on the draft signalled strong support for such a service, with key factors for success being punctuality, reliability and equitable access for residents across the region.

We note that Wellington International Airport Limited (WIAL) is also in favour of public transport to the airport, in mitigating traffic congestion and supporting the flow of people to and from the city. In 2019 they noted that to be effective it must be fast, direct and reliable. At the time they observed queues at the taxi and shuttle ranks because traffic congestion would prevent timely transfers into the city. While the 2020 lockdowns gave some breathing space, we are once again contending with major congestion issues.

Support is therefore coalescing around the provision of an airport bus service that is attractive to users and viable as a service. Important to all is that it would significantly aid mode shift and reduce carbon emissions.

## **Regional Land Transport Plan**

Consultation has also concluded recently on the draft Regional Land Transport Plan, to which Wellington City Council is a signatory.

The draft plan identifies three ambitious targets to achieve by 2030:

- 40% fewer deaths and serious injuries
- 30% less carbon emissions; and
- 40% increase in the share of trips by active travel and public transport

Reflecting this broad direction and aspirational goals, GW is working collaboratively with WIAL over the establishment of a Metlink airport bus service to be in place by 1 July 2022. As we see it this would be a service that:

- is provided by electric buses
- runs frequently
- is competitively priced
- is fully "joined up" with the Metlink network and is visible on the Metlink real time information boards
- has limited stops on a similar route as the previous Airport Flyer (between the Airport and the Wellington Railway Station)
- Will be integrated into the Metlink integrated ticketing system, coming in 2023.

The Metlink Airport service does not negate the potential for a future mass rapid transit service to the Airport under LGWM or a ferry service between the Wellington CBD and Miramar Wharf/Wellington Airport.

### **Conclusion**

GW thanks Wellington City Council for the commitment expressed through Te Atākura – First to Zero, the Regional Land Transport Plan, and as a shareholder in Wellington International Airport Limited.

We endorse Option 3 (fully funding Te Atākura), and look forward to the conclusion of agreements underpinning the launch of a Metlink Airport Bus service in mid-2022.

Ngā mihi

## Kōrero mai mō te mahere 10-tau Have your say on Our 10-Year Plan

All submissions must be received by midnight Monday 10 May 2021

You don't have to give feedback on every decision – just choose the ones you're interested in. You can only submit once. You can include supporting information along with your submission.

Before you start, read about our big decisions and the other supporting information in this consultation document.

### Why we're collecting this information

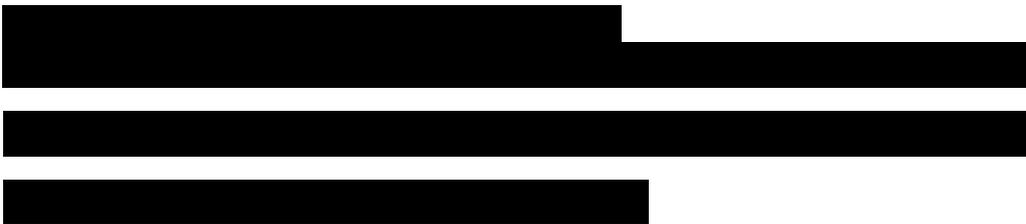

Your feedback matters. This plan is about the future of Wellington and it affects everyone who lives and works here. That's why we want to hear from as many people as possible. Your views will inform the next steps we take.

### Privacy statement

All submissions (including names and contact details) are provided in their entirety to elected members. Submissions (including names but not contact details) will be made available to the public at our office and on our website.

Your personal information will also be used for the administration of the consultation process, including informing you of the outcome of the consultation.

All information collected will be held by Wellington City Council, 113 The Terrace, Wellington, with submitters having the right to access and correct personal information.

## Our seven big decisions

The next seven questions relate to the big decisions for the 10-year plan.

- **Decision 1:** Increasing spending on the three waters network to fix the pipes
- **Decision 2:** Taking responsibility for the ownership of wastewater laterals
- **Decision 3:** Increased investment in cycleways
- **Decision 4:** Implementing our Te Atakura: First to Zero action plan
- **Decision 5:** Choosing a plan for earthquake-prone Council Office buildings
- **Decision 6:** Funding the Central Library strengthening and upgrade
- **Decision 7:** Choosing a plan for sludge minimisation

Detailed information on these decisions are on pages 21 to 46 of the Consultation Document.

Question 9 in this submission form is a place for you to comment or provide any other feedback on the decisions.

You are also able to attach further information to your submission at the end of this form.

### Question 1 – Investment in three waters infrastructure

There are three different levels of investment in the three waters network to consider. Our preferred level of investment is the **Enhanced** option, which focuses on improving the condition and reliability of the network in an affordable and sustainable way.

Problems with pipes have been a long time in the making, and we cannot fix everything at once. The Enhanced option represents a \$2.4bn investment in our three waters network and is the middle-ground option that we are confident of being able to deliver in this plan. We will be able to review the level of investment in our next Long-term Plan review in 2024, when we will have more information on the network.

A summary of the proposed investment in in the three waters network is on pages 23-27 of the Consultation Document.

**Which of these options do you prefer?**

	Enhanced (\$2.4b investment – the Council's preferred option)
	Maintain (\$2.0b investment - lower rates and debt)
	Accelerated (\$3.3b investment – higher rates and debt)
x	None of these options
	Don't know

**Question 2 – Wastewater laterals**

Currently residents are responsible for the maintenance of the pipes connecting their property to the wastewater (sewerage) main underneath the road corridor. These are called wastewater laterals.

We propose that the Council takes ownership of the laterals between the property boundary and the sewerage main underneath the road corridor.

A summary of the proposal to take responsibility for wastewater laterals is on page 28 of the Consultation Document.

**Which of these options do you prefer?**

	Take ownership (Council's preferred option, \$32m investment)
	No change (no change in investment, rates or debt)
	None of these options
	Don't know

### **Question 3 – Cycleways**

Cycleways is an area where we have ambition to seriously lift our game – we'd like to build a network of connected and safe cycleways that allow Wellingtonians to be able to choose cycling as a mode of transport. Our full programme for the network can be viewed at [transportprojects.org.nz](http://transportprojects.org.nz) and if all of the routes were progressed, would be a \$226m investment across the 10 years of this plan.

Our preferred option is a \$45m or 60 percent increase in funding for cycleways than what was planned in the previous Long-Term Plan. It will progress \$120m of the full \$226m programme

We believe the High investment programme option balances the need for increased investment in this area with what is affordable for Council and what we will be able to deliver. It allows time in the programme for robust community engagement and to build capacity in the Council and the sector for the full programme to be eventually delivered.

A summary of the proposed investment to build more cycleways is on pages 30 -33 of the Consultation Document.

#### **Which of these options do you prefer?**

x	High investment programme (Council's preferred option, \$120m capital investment)
	Finish started projects (\$29m capital investment, lower debt and rates)
	Medium investment programme (\$39m capital investment, lower debt and rates)
	Full investment programme (\$226m capital investment, higher debt and rates)
	None of these options
	Don't know

### **Question 4 – Te Atakura First to Zero (Climate Change)**

Te Atakura – First to Zero is our response to the climate and ecological emergency we declared in 2019 but it is not yet funded.

Te Atakura is intended to ensure sufficient activity is undertaken in this decade to reduce our emissions. Council can do this by supporting the transport mode-shift projects, as well as encouraging the uptake of electric cars, providing seed funding to leverage businesses and community impact and supporting residents to be motivated to take action.

Our preferred option is to fully fund Te Atakura, which is included in our 5.3% average increase across 10 years.

A summary of the proposed investment in Te Atakura – First to Zero Action Plan is on pages 34 -37 of the Consultation Document

#### **Which of these options do you prefer?**

x	Fully fund the programme (Council's preferred option, \$29.9m investment)
	Low level of funding (\$18.1m investment, lower rates and debt)
	Medium investment with savings (\$25.4m investment, lower rates and debt)
	None of these options

	Don't know
--	------------

**Question 5 – Te Ngākau Civic Precinct – Council office buildings**

Te Ngākau Civic Square is the musical, creative and democratic heart of Wellington but it has significant resilience challenges.

While we are still working through finalising the Framework for the Square, a specific decision is required in this Long-term Plan with respect to the future of the Council office buildings - the Municipal Office Building (MOB) and the Civic Administration Building (CAB).

As the two buildings are connected, and have similar resilience issues, it is important that the future of them is considered together.

Our preferred option is to demolish and rebuild the MOB and CAB buildings in partnership with private investment through a long-term ground lease for the site.

Combining a MOB and CAB development would enhance this opportunity and significantly decrease the need for additional Council borrowing and ratepayer funding to address these impaired buildings.

A summary of the proposed approach to developing of Te Ngākau Civic Square on pages 38 -41 of the Consultation Document

**Which of these options do you prefer?**

	Demolish and site developed through long-term lease (Council's preferred option)
	Proceed with base build proposal for public purposes (higher debt and rates)
	Retain and seek to repurpose (higher debt and rates)
	Sell to support development (no debt or rates impact)
	None of these options
	Don't know

**Question 6 –Fixing the Central Library**

Wellington's much-loved Central Library was closed in March 2019 following an engineering assessment saying that the way the floor was designed presented a high level of potential failure in a significant earthquake.

After hearing from Wellingtonians in the 2020 consultation, Council agreed to recommend the high-level remediation option to be part of this plan. This option makes the building resilient to future shocks and supports our ability to deliver an adaptable modern library service, while preserving the buildings heritage. It also allows us to mitigate some climate change impacts in the future.

Now there are choices about how to fund the \$187.4m library remediation project, and when the project should take place.

The preferred option, includes the Council agreeing to temporarily breach its debt limit of 225% to ensure the library can be refurbished in the original timeframe and remain in public ownership. Our debt level will remain at 225%, and Council has agreed to accept the breach in the first three years of this plan. This breach will be mitigated by any capital

underspend being used for the library project rather than on new projects. Our debt level will be back below our limit by year 4 – 2024/25.

A summary of the proposed investment to fund the fixing of the Te Ngākau Civic Square Central Library is on pages 42 -43 of the Consultation Document

**Which of these options do you prefer?**

	Strengthen now by temporarily exceeding debt limit (Council’s preferred option additional 0.79% rates increase)
	Council to strengthen Central Library later (complete in 2028 instead of 2025, additional 0.83% rates increase)
	Strengthen now by increasing rates further (additional 1.79% rates increase)
	None of these options
	Don’t know

**Question 7 – Reducing sewage sludge and waste**

One of the largest waste categories at the Southern Landfill is wastewater (sewage) sludge. This accounts for about a quarter of the waste that enters the landfill.

Through Te Atakura (our Zero Carbon Plan) and our Regional Waste Minimisation and Management Plan we have formally committed to reducing carbon emissions and reducing waste by a third. Minimising wastewater sludge is a necessary first step to achieving these objectives.

We need to break the link between the Southern Landfill and wastewater sludge and stop pumping sludge across the city, as 2020 highlighted the serious resilience issues and the significant consequences of failure.

Our preferred option is to invest in a sludge minimisation programme through another funding source. This means the project would not be funded by Council, but if it is funded through a Special Purpose Vehicle, a levy of about \$70-\$100 per year will be charged to each ratepayer.

A summary of the proposed investment in sludge and waste minimisation is on pages 45-47 of the Consultation Document.

**Which of these options do you prefer?**

x	Sludge minimisation through alternate funding (Council’s preferred option, \$147m-\$208m capital investment funded through a levy, no additional rates increase)
	No change in current practice (no change to investment, rates or debt)
	Invest in technology at Southern Landfill (\$86m-\$134m capital investment and additional 0.39% rates increase)
	Sludge minimisation – through Council funding (\$147m-\$208m capital investment, above debt limit, and additional 1.65% rates increase)
	None of these options
	Don’t know

## **Question 8 – Feedback on these decisions**

Do you have any comments you would like to provide around why you selected your preferred option to any of these decisions, or why you don't support any of the options we proposed? If yes please indicate what decision/s you wish to provide comment on.

x	Investment in three waters infrastructure
	Wastewater laterals
x	Cycleways
x	Te Atakura (Climate change)
	Central Library
x	Sludge and waste minimisation
	Te Ngākau funding for future work
	None of these

If this space is not adequate for your comments, please feel free to attach supporting information to the submission. Please be clear what decision you are commenting on.

### **Investment in three waters infrastructure**

We support the submission from the Poo Breakfast Club, and we have also submitted a joint submission with a group of advocates for zero waste in Wellington outlining our position in relation to this decision.

### **Cycleways**

We fully support the submission of Cycle Wellington in response to this decision.

### **Te Atakura (Climate Change)**

We support the submissions from the Generation Zero, Poo Breakfast Club, and Cycle Wellington. We have also submitted a joint submission with a group of advocates for zero waste in Wellington outlining our position on this decision in relation to waste. In addition:

1. We support expansion of the Home Energy Savers programme to reach 25% of Wellington households. To date the programme is providing detailed and personalised assessments to 1000 households/year with a recommended expansion to at least 1500 homes/year in the LTP (\$300,000/year). Recommendations focus on advice on behaviours and interventions to improve household energy efficiency, create a healthy home, reduce costs, and lower carbon emissions. Households are provided with a detailed report, documentation, and prompts to carry out the recommendations. Followup surveys gather information on uptake of advice and interventions as well as customer satisfaction. In our opinion programmes such as Home Energy Saver both encourage action for household benefit and provide community awareness of the needs to address rising carbon emissions on city wide and national basis. When Council partners with a community-based environmental organisation to

support individual households climate journey it demonstrates the city's commitment to meeting our national and global carbon commitments.

2. We call for Council to continue to invest in programmes to support vulnerable households in energy hardship. Council has been a long-term advocate and supporter of programmes insulating and heating subsidy programmes that enable warm, dry homes for low-income households. We encourage Council to continue to support these households with allocation of a flexible fund of \$100,000/year that is allocated on an annual basis to effective outcomes. Central government is strengthening policy and funding commitments to assisting households in energy hardship – committing Council funds to provide Wellington-specific outcomes would provide our vulnerable households with increased options. This might include supporting energy bills, additional subsidies for insulation, heating, ventilation etc, smaller interventions, education, and assistance with accessing low-carbon transport. Also noting that the Healthy Homes Standards is kicking in for rental properties on 1 July 2021, and the majority of vulnerable households are renters, a flexible fund could also target solutions that work for tenants. This might include support for negotiation with landlords on energy efficiency interventions and programmes to alert landlords to their obligations.
3. We call for Council to support or develop a targeted rate for upgrading existing homes in Wellington. This would enhance the existing Wellington Regional Council programme and provide a loan/targeted rate for a range of energy efficiency interventions at a low-interest rate. The targeted rate should include the full range of energy efficiency and carbon-mitigation options including EV charging ports and photovoltaics.
4. We support the upgrading of Council-owned properties to meet the HHS.

#### **Sludge and Waste Minimisation**

We support the submission from the Poo Breakfast Club, and we have also submitted a joint submission with a group of advocates for zero waste in Wellington outlining our position on this decision.

### **Question 9 – Proposed 10-year budget** (See section “what this plan will cost” p13. of the Consultation Document for details)

Our draft budget, has an average rates increase for the average ratepayer of 5.3 percent after growth across the 10 years of the plan. We also propose setting a limit on how much we can raise from general rates - \$465m for each year across the first 3 years of the plan and, \$630m each year across years four to ten.

The first year of the plan has a rates increase of 13.5 percent (after growth) and there is an average of 9.9 percent (after growth) over the first three years. This is higher than previous plans because of the **key challenges** faced by the city including infrastructure, housing, earthquake strengthening and COVID-19 impacts. Therefore, we now require a step up in

the level of rates we charge. Details of the key challenges are on page xx of the **Consultation Document**.

Our proposed budget also represents our highest ever level of capital investment in Wellington. It addresses the need for increased investment in our three waters infrastructure and transport network and seismic strengthening of key buildings, along with making progress against all our other priority community objectives.

Our debt levels for this plan, including the value of uninsured assets, range from 134 percent to 239 percent of our annual income. Our proposed limit is 225 percent.

We think this is a sensible limit on our borrowing to ensure that the impact on affordability of rates is maintained and leaves enough 'headroom' to ensure we can repay our debt, and respond to expected but unfunded and unexpected future events and opportunities.

**Do you support the proposed 10-year budget?**

	I strongly support the proposed budget
	I somewhat support the proposed budget
x	Neutral
	I somewhat oppose the proposed budget
	I strongly oppose the proposed budget
	Don't know

**Question 9.a) – If you stated in Question 1 that you are neutral or do not support the proposed budget. Do you support increasing or decreasing spend?**

x	I support increasing spend in the current budget
	I support decreasing spend in the current budget
	I support keeping the budget the same but with some changes
	Don't know

**Question 10 – Any other feedback on what is proposed for the 10-year Plan**

**Future decisions**

The Consultation Document also signals other decisions that are coming up in the time of this plan, but that we do not have enough information on at this stage for a detailed consultation.

**Other projects**

We also have many other services and projects detailed in our Statements of Service Provision.

**Council Fees and charges**

We have also made changes to some of our fees and user charges. More information on these are available on our website: <https://wgtn.cc/ltf> and available at our libraries and service centre.

**Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

We think that WCC can meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like.

We think that each activity or project WCC commits to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. We would like to see these considerations included in the final plan.

We support WCC supporting Māori to explore ways co-governance can be implemented in Wellington.

We support WCC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

We support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing.

We believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs.

WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Thank you very much for your submission!

Submission #: 1514

## Kōrero mai mō te mahere 10-tau Have your say on Our 10-Year Plan

All submissions must be received by midnight Monday 10 May 2021

You don't have to give feedback on every decision – just choose the ones you're interested in. You can only submit once. You can include supporting information along with your submission.

Before you start, read about our big decisions and the other supporting information in this consultation document.

### Why we're collecting this information

Your feedback matters. This plan is about the future of Wellington and it affects everyone who lives and works here. That's why we want to hear from as many people as possible. Your views will inform the next steps we take.'

### Privacy statement

All submissions (including names and contact details) are provided in their entirety to elected members. Submissions (including names but not contact details) will be made available to the public at our office and on our website.

Your personal information will also be used for the administration of the consultation process, including informing you of the outcome of the consultation.

All information collected will be held by Wellington City Council, 113 The Terrace, Wellington, with submitters having the right to access and correct personal information.

## Our seven big decisions

The next seven questions relate to the big decisions for the 10-year plan.

- **Decision 1:** Increasing spending on the three waters network to fix the pipes
- **Decision 2:** Taking responsibility for the ownership of wastewater laterals
- **Decision 3:** Increased investment in cycleways
- **Decision 4:** Implementing our Te Atakura: First to Zero action plan
- **Decision 5:** Choosing a plan for earthquake-prone Council Office buildings
- **Decision 6:** Funding the Central Library strengthening and upgrade
- **Decision 7:** Choosing a plan for sludge minimisation

Detailed information on these decisions are on pages 21 to 46 of the Consultation Document.

Question 9 in this submission form is a place for you to comment or provide any other feedback on the decisions.

You are also able to attach further information to your submission at the end of this form.

**Question 1 – Investment in three waters infrastructure**

There are three different levels of investment in the three waters network to consider. Our preferred level of investment is the **Enhanced** option, which focuses on improving the condition and reliability of the network in an affordable and sustainable way.

Problems with pipes have been a long time in the making, and we cannot fix everything at once. The Enhanced option represents a \$2.4bn investment in our three waters network and is the middle-ground option that we are confident of being able to deliver in this plan. We will be able to review the level of investment in our next Long-term Plan review in 2024, when we will have more information on the network.

A summary of the proposed investment in in the three waters network is on pages 23-27 of the Consultation Document.

**Which of these options do you prefer?**

<input type="checkbox"/>	Enhanced (\$2.4b investment – the Council’s preferred option)
<input type="checkbox"/>	Maintain (\$2.0b investment - lower rates and debt)
<input type="checkbox"/>	Accelerated (\$3.3b investment – higher rates and debt)
<input checked="" type="checkbox"/>	None of these options
<input type="checkbox"/>	Don’t know

**Question 2 – Wastewater laterals**

Currently residents are responsible for the maintenance of the pipes connecting their property to the wastewater (sewerage) main underneath the road corridor. These are called wastewater laterals.

We propose that the Council takes ownership of the laterals between the property boundary and the sewerage main underneath the road corridor.

A summary of the proposal to take responsibility for wastewater laterals is on page 28 of the Consultation Document.

**Which of these options do you prefer?**

<input type="checkbox"/>	Take ownership (Council’s preferred option, \$32m investment)
<input type="checkbox"/>	No change (no change in investment, rates or debt)
<input type="checkbox"/>	None of these options
<input type="checkbox"/>	Don’t know

### **Question 3 – Cycleways**

Cycleways is an area where we have ambition to seriously lift our game – we'd like to build a network of connected and safe cycleways that allow Wellingtonians to be able to choose cycling as a mode of transport. Our full programme for the network can be viewed at [transportprojects.org.nz](http://transportprojects.org.nz) and if all of the routes were progressed, would be a \$226m investment across the 10 years of this plan.

Our preferred option is a \$45m or 60 percent increase in funding for cycleways than what was planned in the previous Long-Term Plan. It will progress \$120m of the full \$226m programme

We believe the High investment programme option balances the need for increased investment in this area with what is affordable for Council and what we will be able to deliver. It allows time in the programme for robust community engagement and to build capacity in the Council and the sector for the full programme to be eventually delivered.

A summary of the proposed investment to build more cycleways is on pages 30 -33 of the Consultation Document.

#### **Which of these options do you prefer?**

	High investment programme (Council's preferred option, \$120m capital investment)
	Finish started projects (\$29m capital investment, lower debt and rates)
	Medium investment programme (\$39m capital investment, lower debt and rates)
	Full investment programme (\$226m capital investment, higher debt and rates)
	None of these options
	Don't know

### **Question 4 – Te Atakura First to Zero (Climate Change)**

Te Atakura – First to Zero is our response to the climate and ecological emergency we declared in 2019 but it is not yet funded.

Te Atakura is intended to ensure sufficient activity is undertaken in this decade to reduce our emissions. Council can do this by supporting the transport mode-shift projects, as well as encouraging the uptake of electric cars, providing seed funding to leverage businesses and community impact and supporting residents to be motivated to take action.

Our preferred option is to fully fund Te Atakura, which is included in our 5.3% average increase across 10 years.

A summary of the proposed investment in Te Atakura – First to Zero Action Plan is on pages 34 -37 of the Consultation Document

#### **Which of these options do you prefer?**

	Fully fund the programme (Council's preferred option, \$29.9m investment)
	Low level of funding (\$18.1m investment, lower rates and debt)
	Medium investment with savings (\$25.4m investment, lower rates and debt)

	None of these options
	Don't know

### **Question 5 – Te Ngākau Civic Precinct – Council office buildings**

Te Ngākau Civic Square is the musical, creative and democratic heart of Wellington but it has significant resilience challenges.

While we are still working through finalising the Framework for the Square, a specific decision is required in this Long-term Plan with respect to the future of the Council office buildings - the Municipal Office Building (MOB) and the Civic Administration Building (CAB).

As the two buildings are connected, and have similar resilience issues, it is important that the future of them is considered together.

Our preferred option is to demolish and rebuild the MOB and CAB buildings in partnership with private investment through a long-term ground lease for the site.

Combining a MOB and CAB development would enhance this opportunity and significantly decrease the need for additional Council borrowing and ratepayer funding to address these impaired buildings.

A summary of the proposed approach to developing of Te Ngākau Civic Square on pages 38 -41 of the Consultation Document

#### **Which of these options do you prefer?**

	Demolish and site developed through long-term lease (Council's preferred option)
	Proceed with base build proposal for public purposes (higher debt and rates)
	Retain and seek to repurpose (higher debt and rates)
	Sell to support development (no debt or rates impact)
	None of these options
	Don't know

### **Question 6 –Fixing the Central Library**

Wellington's much-loved Central Library was closed in March 2019 following an engineering assessment saying that the way the floor was designed presented a high level of potential failure in a significant earthquake.

After hearing from Wellingtonians in the 2020 consultation, Council agreed to recommend the high-level remediation option to be part of this plan. This option makes the building resilient to future shocks and supports our ability to deliver an adaptable modern library service, while preserving the buildings heritage. It also allows us to mitigate some climate change impacts in the future.

Now there are choices about how to fund the \$187.4m library remediation project, and when the project should take place.

The preferred option, includes the Council agreeing to temporarily breach its debt limit of 225% to ensure the library can be refurbished in the original timeframe and remain in public ownership. Our debt level will remain at 225%, and Council has agreed to accept the breach in the first three years of this plan. This breach will be mitigated by any capital underspend being used for the library project rather than on new projects. Our debt level will be back below our limit by year 4 – 2024/25.

A summary of the proposed investment to fund the fixing of the Te Ngākau Civic Square Central Library is on pages 42 -43 of the Consultation Document

**Which of these options do you prefer?**

	Strengthen now by temporarily exceeding debt limit (Council’s preferred option additional 0.79% rates increase)
	Council to strengthen Central Library later (complete in 2028 instead of 2025, additional 0.83% rates increase)
	Strengthen now by increasing rates further (additional 1.79% rates increase)
	None of these options
	Don’t know

**Question 7 – Reducing sewage sludge and waste**

One of the largest waste categories at the Southern Landfill is wastewater (sewage) sludge. This accounts for about a quarter of the waste that enters the landfill.

Through Te Atakura (our Zero Carbon Plan) and our Regional Waste Minimisation and Management Plan we have formally committed to reducing carbon emissions and reducing waste by a third. Minimising wastewater sludge is a necessary first step to achieving these objectives.

We need to break the link between the Southern Landfill and wastewater sludge and stop pumping sludge across the city, as 2020 highlighted the serious resilience issues and the significant consequences of failure.

Our preferred option is to invest in a sludge minimisation programme through another funding source. This means the project would not be funded by Council, but if it is funded through a Special Purpose Vehicle, a levy of about \$70-\$100 per year will be charged to each ratepayer.

A summary of the proposed investment in sludge and waste minimisation is on pages 45-47 of the Consultation Document.

**Which of these options do you prefer?**

	Sludge minimisation through alternate funding (Council’s preferred option, \$147m-\$208m capital investment funded through a levy, no additional rates increase)
	No change in current practice (no change to investment, rates or debt)
	Invest in technology at Southern Landfill (\$86m-\$134m capital investment and additional 0.39% rates increase)

	Sludge minimisation – through Council funding (\$147m-\$208m capital investment, above debt limit, and additional 1.65% rates increase)
	None of these options
	Don't know

**Question 8 – Feedback on these decisions**

Do you have any comments you would like to provide around why you selected your preferred option to any of these decisions, or why you don't support any of the options we proposed? If yes please indicate what decision/s you wish to provide comment on.

<input checked="" type="checkbox"/>	Investment in three waters infrastructure
<input type="checkbox"/>	Wastewater laterals
<input type="checkbox"/>	Cycleways
<input checked="" type="checkbox"/>	Te Atakura (Climate change)
<input type="checkbox"/>	Central Library
<input checked="" type="checkbox"/>	Sludge and waste minimisation
<input type="checkbox"/>	
<input type="checkbox"/>	Te Ngākau funding for future work
<input type="checkbox"/>	None of these

If this space is not adequate for your comments, please feel free to attach supporting information to the submission. Please be clear what decision you are commenting on.

**QUESTION 1**

None of the options presented in the LTP have provided any major review or analysis of the resilience or sustainability of the three waters network as a whole. The enormous size, complexity and importance to a well-functioning city of three waters infrastructure requires its future to be very carefully considered. As highlighted by the work of [Transition-HQ](#), the world is looking at a future where we will have no choice but to live more efficiently on less energy - big infrastructure depends on high energy inputs to run.

While we understand that historic underinvestment has left Council with little choice but to increase investment in critical upgrades and maintenance now, there is an enormous missed opportunity to rethink the system for the genuine long-term (beyond ten years). Given the size of the infrastructure and the huge costs (expenditure, energy etc.) of running and maintaining it, we must begin to explore opportunities that consider how to better address the climate and local environmental impact of the system as it is now, while building more resilience and efficiency into our water systems. These opportunities can be developed through applying circular economy frameworks to the way we use, move, reuse and dispose of water.

We fully support the submission by the Poo Breakfast Club on the need to start exploring the feasibility of an alternative system for managing human waste/biosolids that does not rely on

the wastewater system. Using water to transport biosolids increases the contamination of both the biosolids, and the water.

Instead, solids and wastewater should be kept separate (thus uncontaminated). In such a system, biosolids can be processed either at a local level or collected and processed at a centralised composting facility separate from the wastewater treatment plant. While this is a long-term issue, budget must be allocated now to investigate and help develop a source-separated wastewater/sanitation system, as it may take decades to phase in completely. We recommend some waste minimisation funding for organics goes towards pilot and feasibility studies for decentralised, source-separated sanitation systems.

The consultation supporting documents identify the following action *“Making investment in green infrastructure business as usual with mātauranga Māori guiding delivery where it is practicable in relation to the impacts of stormwater.”* We recommend that tikanga should also guide delivery, and we recommend deleting the words 'where it is practicable'. The idea that tikanga Māori might not be considered for reasons of practicality is not itself, tika - all responses need to be informed and guided by mana whenua and tikanga Māori. It's not for Council to determine, but to ensure mana whenua are supported to guide.

Council must also consider smaller-scale initiatives that can improve environmental outcomes and reduce load on the infrastructure in the short-term. Such initiatives include:

- Prohibiting the disposal of food waste into the wastewater system in order to reduce pressure on the wastewater network and mitigate waste-related emissions. This would include banning new installations of waste disposal units in households (e.g. [Insinkerator](#)) and technologies that process commercial quantities of food waste to be disposed of in wastewater (e.g. [ORCA](#) and [lugis](#)). Any existing systems should be phased out akin to the Climate Change Commission's proposed phase-out of gas connections.
- Installing litter traps at key stormwater outflow sites, in consultation with ecologists with relevant expertise (e.g. the pathways of migratory fish), could help reduce the incidence of plastic pollution in the marine environment and would also provide a good opportunity to collect data on litter concentrations and types.
- Alternative approaches that improve efficiency of water usage and retention must be considered as part of investment in the three waters infrastructure. For example, enhanced education, tools and incentives to encourage and, in some cases, require water conservation activities; effective and strategic water metering; encourage, incentivise and ultimately require greywater recovery; invest in and implement sustainable urban drainage systems (SUDS). The [Hutt City Long Term Plan Consultation](#) acknowledges that reducing water consumption is vital for the region for environmental protection and fair distribution of water, and we support metering to provide information to help us understand water demand, find leaks and target water usage reduction activities.

#### **QUESTION 4**

We support the full funding of Te Atakura. However, we believe its scope is much too narrow. While energy use and transport are important, Wellington City's response to the climate and ecological emergency must be much broader, encompassing zero waste and circular economy

frameworks, water use reductions, resilient urban redesign, biodiversity, and community resilience, among others.

It is particularly crucial that the transition to a zero-waste, circular economy is embedded in Te Atakura and its funded workstreams for the next ten years. We strongly support the Council investigating the inclusion of circular economy concepts into the Council's policy framework, as stated on p. 47 of Te Atakura, and encourage Council to go further and develop a full circular economy action plan as part of its core work on climate action. The transition to a circular economy presents one of our best opportunities for slashing Wellington's consumption-based emissions, as well as building in long-term resilience and creating employment.

We cannot overstate the importance of shifting to a circular economy as part of climate action. As much as 45% of global emissions are associated with making products, and circular economy strategies are needed to tackle these emissions. Furthermore, the recent [Circularity Gap report](#) outlines how simply reducing emissions in line with our Nationally Determined Contribution is not enough. Nationally Determined Contributions (NDCs) overwhelmingly focus on the energy transition and moving to non-fossil sources. Even if all NDCs are implemented, the rise in temperatures is still forecast to hit 3.2-degrees this century. By implementing a shift to a circular economy alongside meeting NDCs, global warming can be kept to 1.5 degrees.

We note the proposed workstream, under all proposed options, to measure Council and City greenhouse gas emissions and urge the council to include within this workstream a measurement approach that goes beyond the limited focus on production-based emissions. Taking only a production-based approach to measuring Wellington's emissions (let alone national and global emissions measurements) is a misleading representation of the climate impact of our city. It is crucial that the measurement of Council and City greenhouse gas emissions under Te Atakura incorporates consumption-based emissions and includes measurement of circularity. This will make the importance of a transition to a circular economy much clearer (for more detail on these points, see the [Zero Waste Network's submission on the Climate Change Commission's draft advice here](#)). Having this information inform Te Atakura's work and funding is critical.

While Te Atakura itself may not be able to stretch across all aspects of responding to the climate emergency, it should be well-connected with relevant Council-led initiatives, such as the Sustainable Food Network Action Plan, as well as community-led initiatives, to proactively avoid operating in a siloed manner. It is critical that the adaptation planning workstream of Te Atakura involves food and water security and resilience. The Wellington Climate Lab in particular presents a great opportunity to explore cross-sectoral, multiple-duty and paradigm-shifting solutions to the challenges our city faces.

We believe Te Atakura will have much greater success in achieving WCC's Priority Objectives 5 (an accelerating zero-carbon and wastefree transition) and 6 (strong partnerships with mana whenua) through formal integration of community input and advice into the work programme. We recommend that the delivery of Te Atakura involves community advisory panels/reference groups, e.g. for waste, emissions, circular economy, as there is substantial knowledge and skill in these areas in our community that can be drawn on (see also our response to Decision 7). Partnering with communities is also crucial for adaptation planning that will affect everyday

people and businesses long into the future. Community partnership will help generate actions that are fit-for-purpose and well-accepted by Wellingtonians, and have long-term positive impacts.

Business and community funding provided through Te Atakura should be managed strategically to generate the most holistic, cost-effective outcomes possible. We believe the top-down funding approach results in a hodge-podge of siloed projects being funded. Te Atakura should facilitate and support collaboration between multiple sectors, including business, social enterprise, community organisations, mana whenua, and other stakeholders, in order to achieve greater impact and better outcomes per dollar spent of the limited funds available.

Having well-thought-out funding priorities and programmes will help amplify outcomes. For example, the Climate and Sustainability Fund should be made available to help advance circular economy models and initiatives, such as repair, reuse and sharing economies. We support the proposed workstream to provide support for car sharing and believe this support could be extended to provide support for the sharing economy more generally for a wider range of goods and services, from tools and clothes through to appliances and other goods. These could operate through peer-to-peer sharing platforms (such as Mutu), through community-run initiatives such as the Wellington Tool Library, or business models such as laundrettes. Formalising and expanding the sharing and service economy has been recognised as a key way in which high-income countries can reduce high levels of climate intensive material consumption.

Wellington has a fantastic opportunity to show leadership in the climate action space, both nationally and internationally, by placing the transition to a circular economy at the heart of climate action. WCC has a crucial role to signal and lead this transition, and facilitate and support collaboration.

#### **QUESTION 7**

We agree there is an urgent need for a solution that stops the need for sludge disposal at the Southern Landfill. We welcome the Council's commitment to addressing this issue urgently.

We fully support the submission by the Poo Breakfast Club on the need to start exploring the feasibility of an alternative system for managing wastewater and biosolids/human waste in the longer term that will build in true resilience. While this is a long-term issue, budget must be allocated now to investigate and help develop a source-separated wastewater and sanitation system, as it may take decades to phase in completely. We recommend that some of the waste minimisation funding earmarked for organics goes towards pilot and feasibility studies for decentralised, source-separated sanitation systems.

The current situation, requiring each tonne of sludge to be mixed with 4 tonnes of general waste for disposal, has been a significant barrier to Council action on waste minimisation. We have been repeatedly told that progress on waste diversion from landfill is dependent on removal or minimisation of the sludge. Now that a solution has been identified, we urge the Council to be ambitious and plan to avoid the need for future expansion of the landfill. Given the large investment of money to remove the sludge, the findings from the strategic review of

waste, and the additional waste levy income, must be used to prepare and take action now rather than further delay.

We support the Council investing in the proposed infrastructure needed to reduce the amount of sludge that must be sent to landfill. However, we note that this is not a forever solution and is better understood as one that buys us the much-needed time to investigate, develop and build a more resilient and ecological, source-separated sanitation system that is ready to go before the ~50 year lifespan on the proposed infrastructure expires. We urge the Council not to continue kicking the can down the road on this issue, and to take the opportunity of time that the present infrastructural investment represents.

We note too the reference in the LTP to the potential that after sludge has been processed through the proposed infrastructure, that it could become “a product that could potentially be diverted from the landfill for beneficial re-use”. We are concerned about this statement given the sludge will be contaminated with microplastics, heavy metals, persistent organic pollutants and other toxins as a result of being mixed with wastewater. We do not see a viable pathway for this sludge to be reused, safely. Again, the proposed infrastructure is not a long term solution to our sludge problems, it merely buys us time to develop a more resilient, source-separated system that will allow for safer beneficial reuse of the biosolids.

We urge the Council to involve the community in Waste Minimisation/zero waste beyond the formal consultation processes. One way this could be achieved would be by establishing a community advisory panel. For example, the recently established Waste Free Wellington group consists of individuals, organisations and businesses advocating and acting on zero waste in Wellington; there is substantial knowledge and capacity that can be drawn on. Community partnership will help generate actions that are fit-for-purpose and well-accepted by Wellingtonians, and have long-term positive impact. This approach aligns with the Wellington Region Waste Management and Minimisation Plan (LM.6: Collaborate with private sector and community to work with local groups and waste companies).

Many of the groups who have come together to co-author this submission are part of the Waste Free Wellington group, which has three priority areas: community-scale composting; reuse economy; and building a resource recovery network. These priority areas align with actions already in the WRWMMP (for example, LM.3: Industry-based reuse). The group is supportive of the increase in landfill fees that will come in alongside the increase in the landfill levy and believe this can provide more funding for waste minimisation directed to developing solutions with business and the community.

We support Council plans to allocate more funding for organic waste diversion. The primary purpose of the organics fund should be to divert existing organic waste, particularly food scraps, not to support compostable packaging. Investment in packaging solutions are better aimed higher up the waste hierarchy - i.e. developing reusable packaging systems that have far more beneficial environmental and economic outcomes than single-use packaging systems (including compostables and recyclables). The uncertainties and risks associated with compostable packaging (including toxic chemical additives) should halt our use of such packaging until New Zealand has a much stronger regulatory and certification system for it.

We note that there is nothing explicitly in the LTP consultation about supporting the reuse economy beyond car sharing. Any funding should focus on the top of the waste hierarchy where there is the greatest potential to reduce waste. We are disappointed that work on the resource recovery centre is delayed until year 4; we know there is community appetite for more services in this area and opportunities coming through the Government's regulated product stewardship schemes (e-waste and potential container return scheme). There is the chance to work with the community now, to plan for further resource recovery capacity across the city and to implement this sooner. We are also disappointed about the lack of mention of construction and demolition waste, which makes up over 50% of waste going to landfill.

The current proposals are very centred on the waste that goes to the Council-managed Southern Landfill. The Council's waste minimisation focus needs to transcend that and consider waste generated by, and/or disposed within, the city as a whole. The new waste bylaw is a positive step and we look forward to seeing this being implemented and enforced, and appropriate Council funding allocated to enable this. Waste is a cross-cutting issue that should not be siloed in one department, otherwise the focus will remain on treating symptoms rather than turning off the tap and creating circular systems. The Council has the ability to lead and influence - particularly through procurement, funding and use of Council land - the creation of a circular Wellington. Waste is a climate issue far beyond the direct emissions from landfill, with nearly 50% of global carbon emissions being related to the consumption of products and materials. Focussing on a circular economy will reduce emissions, and bring additional co-benefits including job creation, resilience and community building.

See also our response to Decision 1 and 4.

### **Question 9 – Proposed 10-year budget** (See section “what this plan will cost” p13. of the Consultation Document for details)

Our draft budget, has an average rates increase for the average ratepayer of 5.3 percent after growth across the 10 years of the plan. We also propose setting a limit on how much we can raise from general rates - \$465m for each year across the first 3 years of the plan and, \$630m each year across years four to ten.

The first year of the plan has a rates increase of 13.5 percent (after growth) and there is an average of 9.9 percent (after growth) over the first three years. This is higher than previous plans because of the **key challenges** faced by the city including infrastructure, housing, earthquake strengthening and COVID-19 impacts. Therefore, we now require a step up in the level of rates we charge. Details of the key challenges are on page xx of the **Consultation Document**.

Our proposed budget also represents our highest ever level of capital investment in Wellington. It addresses the need for increased investment in our three waters infrastructure and transport network and seismic strengthening of key buildings, along with making progress against all our other priority community objectives.

Our debt levels for this plan, including the value of uninsured assets, range from 134 percent to 239 percent of our annual income. Our proposed limit is 225 percent.

We think this is a sensible limit on our borrowing to ensure that the impact on affordability of rates is maintained and leaves enough 'headroom' to ensure we can repay our debt, and respond to expected but unfunded and unexpected future events and opportunities.

**Do you support the proposed 10-year budget?**

	I strongly support the proposed budget
	I somewhat support the proposed budget
x	Neutral
	I somewhat oppose the proposed budget
	I strongly oppose the proposed budget
	Don't know

**Question 9.a) – If you stated in Question 1 that you are neutral or do not support the proposed budget. Do you support increasing or decreasing spend?**

x	I support increasing spend in the current budget
	I support decreasing spend in the current budget
	I support keeping the budget the same but with some changes
	Don't know

**Question 10 – Any other feedback on what is proposed for the 10-year Plan**

**Future decisions**

The Consultation Document also signals other decisions that are coming up in the time of this plan, but that we do not have enough information on at this stage for a detailed consultation.

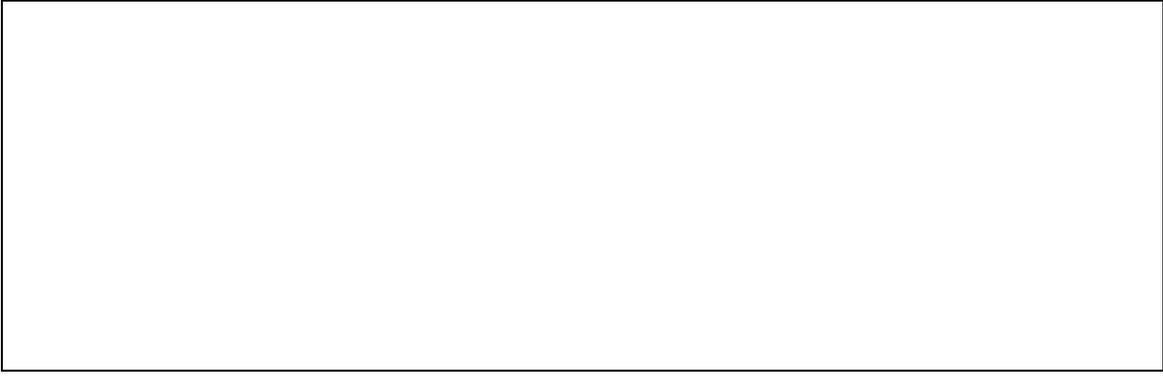

**Other projects**

We also have many other services and projects detailed in our Statements of Service Provision.

**Council Fees and charges**

We have also made changes to some of our fees and user charges. More information on these are available on our website: <https://wgtn.cc/ltp> and available at our libraries and service centre.

**Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Thank you very much for your submission!

# Submission form

## Kōrero mai mō te mahere 10-tau Have your say on Our 10-Year Plan

All submissions must be received by midnight Monday 10 May 2021

You don't have to give feedback on every decision – just choose the ones you're interested in. You can only submit once. You can include supporting information along with your submission.

Before you start, read about our big decisions and the other supporting information in this consultation document.

### Why we're collecting this information

Your feedback matters. This plan is about the future of Wellington and it affects everyone who lives and works here. That's why we want to hear from as many people as possible. Your views will inform the next steps we take.

### Privacy statement

All submissions (including names and contact details) are provided in their entirety to elected members. Submissions (including names but not contact details) will be made available to the public at our office and on our website.

Your personal information will also be used for the administration of the consultation process, including informing you of the outcome of the consultation.

All information collected will be held by Wellington City Council, 113 The Terrace, Wellington, with submitters having the right to access and correct personal information.

<b>Full Name: Louis Houlbrooke</b>					
<b>Contact details:</b>  [REDACTED]  [REDACTED]					
<b>Are you making this submission as an individual or on behalf of an organisation?</b> <input type="checkbox"/> Individual <input checked="" type="checkbox"/> Organisation: New Zealand Taxpayers' nion					
<b>What is your connection to Wellington? Tick all that apply</b>					
I am a Wellington City Council ratepayer	<input checked="" type="checkbox"/>	I live in Wellington	<input checked="" type="checkbox"/>	I work in Wellington	<input checked="" type="checkbox"/>
I own a business in Wellington	<input type="checkbox"/>	I study in Wellington	<input type="checkbox"/>	I am a visitor to Wellington	<input type="checkbox"/>
<b>Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?</b>					

Yes	<input checked="" type="checkbox"/>	No	<input type="checkbox"/>
<b>If yes - We are offering two ways of speaking to Councillors about your submission. Please tick which option(s) you would prefer?</b>			
Oral forum (informal, 60min facilitated table discussion with 2 to 3 Councillors and other submitters)	<input type="checkbox"/>	Morning	
	<input type="checkbox"/>	Afternoon	
	<input type="checkbox"/>	Evening	
Oral Hearing (formal hearing with set times to speak to full Council, 5mins per individual, 10mins per organisation)	<input type="checkbox"/>	Morning	
	<input checked="" type="checkbox"/>	Afternoon	
	<input type="checkbox"/>	Evening	

## Our seven big decisions

The next seven questions relate to the big decisions for the 10-year plan.

- **Decision 1:** Increasing spending on the three waters network to fix the pipes
- **Decision 2:** Taking responsibility for the ownership of wastewater laterals
- **Decision 3:** Increased investment in cycleways
- **Decision 4:** Implementing our Te Atakura: First to Zero action plan
- **Decision 5:** Choosing a plan for earthquake-prone Council Office buildings
- **Decision 6:** Funding the Central Library strengthening and upgrade
- **Decision 7:** Choosing a plan for sludge minimisation

Detailed information on these decisions are on pages 21 to 46 of the Consultation Document.

Question 9 in this submission form is a place for you to comment or provide any other feedback on the decisions.

You are also able to attach further information to your submission at the end of this form.

### **Question 1 – Investment in three waters infrastructure**

There are three different levels of investment in the three waters network to consider. Our preferred level of investment is the **Enhanced** option, which focuses on improving the condition and reliability of the network in an affordable and sustainable way.

Problems with pipes have been a long time in the making, and we cannot fix everything at once. The Enhanced option represents a \$2.4bn investment in our three waters network and is the middle-ground option that we are confident of being able to deliver in this plan. We will be able to review the level of investment in our next Long-term Plan review in 2024, when we will have more information on the network.

A summary of the proposed investment in in the three waters network is on pages 23-27 of the Consultation Document.

**Which of these options do you prefer?**

	Enhanced (\$2.4b investment – the Council’s preferred option)
--	---

X	Maintain (\$2.0b investment - lower rates and debt)
	Accelerated (\$3.3b investment – higher rates and debt)
	None of these options
	Don't know

## **Question 2 – Wastewater laterals**

Currently residents are responsible for the maintenance of the pipes connecting their property to the wastewater (sewerage) main underneath the road corridor. These are called wastewater laterals.

We propose that the Council takes ownership of the laterals between the property boundary and the sewerage main underneath the road corridor.

A summary of the proposal to take responsibility for wastewater laterals is on page 28 of the Consultation Document.

### **Which of these options do you prefer?**

	Take ownership (Council's preferred option, \$32m investment)
X	No change (no change in investment, rates or debt)
	None of these options
	Don't know

### **Question 3 – Cycleways**

Cycleways is an area where we have ambition to seriously lift our game – we'd like to build a network of connected and safe cycleways that allow Wellingtonians to be able to choose cycling as a mode of transport. Our full programme for the network can be viewed at [transportprojects.org.nz](http://transportprojects.org.nz) and if all of the routes were progressed, would be a \$226m investment across the 10 years of this plan.

Our preferred option is a \$45m or 60 percent increase in funding for cycleways than what was planned in the previous Long-Term Plan. It will progress \$120m of the full \$226m programme

We believe the High investment programme option balances the need for increased investment in this area with what is affordable for Council and what we will be able to deliver. It allows time in the programme for robust community engagement and to build capacity in the Council and the sector for the full programme to be eventually delivered.

A summary of the proposed investment to build more cycleways is on pages 30 -33 of the Consultation Document.

#### **Which of these options do you prefer?**

	High investment programme (Council's preferred option, \$120m capital investment)
X	Finish started projects (\$29m capital investment, lower debt and rates)
	Medium investment programme (\$39m capital investment, lower debt and rates)
	Full investment programme (\$226m capital investment, higher debt and rates)
	None of these options
	Don't know

### **Question 4 – Te Atakura First to Zero (Climate Change)**

Te Atakura – First to Zero is our response to the climate and ecological emergency we declared in 2019 but it is not yet funded.

Te Atakura is intended to ensure sufficient activity is undertaken in this decade to reduce our emissions. Council can do this by supporting the transport mode-shift projects, as well as encouraging the uptake of electric cars, providing seed funding to leverage businesses and community impact and supporting residents to be motivated to take action.

Our preferred option is to fully fund Te Atakura, which is included in our 5.3% average increase across 10 years.

A summary of the proposed investment in Te Atakura – First to Zero Action Plan is on pages 34 -37 of the Consultation Document

#### **Which of these options do you prefer?**

	Fully fund the programme (Council's preferred option, \$29.9m investment)
	Low level of funding (\$18.1m investment, lower rates and debt)
	Medium investment with savings (\$25.4m investment, lower rates and debt)
X	None of these options

	Don't know
--	------------

**Question 5 – Te Ngākau Civic Precinct – Council office buildings**

Te Ngākau Civic Square is the musical, creative and democratic heart of Wellington but it has significant resilience challenges.

While we are still working through finalising the Framework for the Square, a specific decision is required in this Long-term Plan with respect to the future of the Council office buildings - the Municipal Office Building (MOB) and the Civic Administration Building (CAB).

As the two buildings are connected, and have similar resilience issues, it is important that the future of them is considered together.

Our preferred option is to demolish and rebuild the MOB and CAB buildings in partnership with private investment through a long-term ground lease for the site.

Combining a MOB and CAB development would enhance this opportunity and significantly decrease the need for additional Council borrowing and ratepayer funding to address these impaired buildings.

A summary of the proposed approach to developing of Te Ngākau Civic Square on pages 38 -41 of the Consultation Document

**Which of these options do you prefer?**

	Demolish and site developed through long-term lease (Council's preferred option)
	Proceed with base build proposal for public purposes (higher debt and rates)
	Retain and seek to repurpose (higher debt and rates)
X	Sell to support development (no debt or rates impact)
	None of these options
	Don't know

**Question 6 –Fixing the Central Library**

Wellington's much-loved Central Library was closed in March 2019 following an engineering assessment saying that the way the floor was designed presented a high level of potential failure in a significant earthquake.

After hearing from Wellingtonians in the 2020 consultation, Council agreed to recommend the high-level remediation option to be part of this plan. This option makes the building resilient to future shocks and supports our ability to deliver an adaptable modern library service, while preserving the buildings heritage. It also allows us to mitigate some climate change impacts in the future.

Now there are choices about how to fund the \$187.4m library remediation project, and when the project should take place.

The preferred option, includes the Council agreeing to temporarily breach its debt limit of 225% to ensure the library can be refurbished in the original timeframe and remain in public ownership. Our debt level will remain at 225%, and Council has agreed to accept the breach in the first three years of this plan. This breach will be mitigated by any capital

underspend being used for the library project rather than on new projects. Our debt level will be back below our limit by year 4 – 2024/25.

A summary of the proposed investment to fund the fixing of the Te Ngākau Civic Square Central Library is on pages 42 -43 of the Consultation Document

**Which of these options do you prefer?**

	Strengthen now by temporarily exceeding debt limit (Council’s preferred option additional 0.79% rates increase)
	Council to strengthen Central Library later (complete in 2028 instead of 2025, additional 0.83% rates increase)
	Strengthen now by increasing rates further (additional 1.79% rates increase)
X	None of these options
	Don’t know

**Question 7 – Reducing sewage sludge and waste**

One of the largest waste categories at the Southern Landfill is wastewater (sewage) sludge. This accounts for about a quarter of the waste that enters the landfill.

Through Te Atakura (our Zero Carbon Plan) and our Regional Waste Minimisation and Management Plan we have formally committed to reducing carbon emissions and reducing waste by a third. Minimising wastewater sludge is a necessary first step to achieving these objectives.

We need to break the link between the Southern Landfill and wastewater sludge and stop pumping sludge across the city, as 2020 highlighted the serious resilience issues and the significant consequences of failure.

Our preferred option is to invest in a sludge minimisation programme through another funding source. This means the project would not be funded by Council, but if it is funded through a Special Purpose Vehicle, a levy of about \$70-\$100 per year will be charged to each ratepayer.

A summary of the proposed investment in sludge and waste minimisation is on pages 45-47 of the Consultation Document.

**Which of these options do you prefer?**

	Sludge minimisation through alternate funding (Council’s preferred option, \$147m-\$208m capital investment funded through a levy, no additional rates increase)
	No change in current practice (no change to investment, rates or debt)
X	Invest in technology at Southern Landfill (\$86m-\$134m capital investment and additional 0.39% rates increase)
	Sludge minimisation – through Council funding (\$147m-\$208m capital investment, above debt limit, and additional 1.65% rates increase)
	None of these options
	Don’t know

## Question 8 – Feedback on these decisions

Do you have any comments you would like to provide around why you selected your preferred option to any of these decisions, or why you don't support any of the options we proposed? If yes please indicate what decision/s you wish to provide comment on.

	Investment in three waters infrastructure
	Wastewater laterals
	Cycleways
X	Te Atakura (Climate change)
X	Central Library
X	Sludge and waste minimisation
	Te Ngākau funding for future work
	None of these

If this space is not adequate for your comments, please feel free to attach supporting information to the submission. Please be clear what decision you are commenting on.

**Climate change:** NZTU does not support any of the proposed climate action in this plan. The Council's proposals centre around sectors that are already covered by the Emissions Trading Scheme. Reducing emissions in these sectors will only free up credits for the production of emissions in other sectors. Regardless, carbon emissions are a macro challenge, not a micro one. Central government is better placed than local government to lead action on this issue.

**Central library:** Considering the level of rate hikes and borrowing proposed in this budget, it is remarkable that submitters are not invited to challenge the library strengthening project. NZTU would support a full sale of the existing building and site, with the continuation of the successful and scaleable pop-up library programme. The Council should also look harder at its property portfolio for opportunities to sell or lease out assets. We believe the size of the Council's property portfolio poses serious risks to ratepayers in the event of an earthquake.

**Sludge and waste minimisation:** NZTU strongly opposes the use of a Special Purpose Vehicle / levy to fund sludge management. This appears to be a blatant attempt to hide costs from ratepayers. If a levy is to be implemented, this should be recognised as an effective rate hike and communicated as such, i.e. packaged into whatever rate increase is eventually announced.

## Question 9 – Proposed 10-year budget (See section "what this plan will cost" p13. of the Consultation Document for details)

Our draft budget, has an average rates increase for the average ratepayer of 5.3 percent after growth across the 10 years of the plan. We also propose setting a limit on how much we can raise from general rates - \$465m for each year across the first 3 years of the plan and, \$630m each year across years four to ten.

The first year of the plan has a rates increase of 13.5 percent (after growth) and there is an average of 9.9 percent (after growth) over the first three years. This is higher than previous plans because of the **key challenges** faced by the city including infrastructure, housing, earthquake strengthening and COVID-19 impacts. Therefore, we now require a step up in the level of rates we charge. Details of the key challenges are on page xx of the **Consultation Document**.

Our proposed budget also represents our highest ever level of capital investment in Wellington. It addresses the need for increased investment in our three waters infrastructure and transport network and seismic strengthening of key buildings, along with making progress against all our other priority community objectives.

Our debt levels for this plan, including the value of uninsured assets, range from 134 percent to 239 percent of our annual income. Our proposed limit is 225 percent.

We think this is a sensible limit on our borrowing to ensure that the impact on affordability of rates is maintained and leaves enough 'headroom' to ensure we can repay our debt, and respond to expected but unfunded and unexpected future events and opportunities.

**Do you support the proposed 10-year budget?**

	I strongly support the proposed budget
	I somewhat support the proposed budget
	Neutral
	I somewhat oppose the proposed budget
X	I strongly oppose the proposed budget
	Don't know

**Question 9.a) – If you stated in Question 1 that you are neutral or do not support the proposed budget. Do you support increasing or decreasing spend?**

	I support increasing spend in the current budget
X	I support decreasing spend in the current budget
	I support keeping the budget the same but with some changes
	Don't know

**Question 10 – Any other feedback on what is proposed for the 10-year Plan**

**Future decisions**

The Consultation Document also signals other decisions that are coming up in the time of this plan, but that we do not have enough information on at this stage for a detailed consultation.

**Other projects**

We also have many other services and projects detailed in our Statements of Service Provision.

**Council Fees and charges**

We have also made changes to some of our fees and user charges. More information on these are available on our website: <https://wgtn.cc/ltf> and available at our libraries and service centre.

**Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

No comments at this stage but may cover in an oral submission.

Thank you very much for your submission!

### Submission Long Term Plan

This submission is on behalf of an organisation, the Glenside Progressive Association Inc (GPA). We wish to speak to Councillors at an Oral Hearing. We are available to speak in the morning.

Our submission just focuses on walking and cycling along Middleton Road between Glenside and Takapu Railway Station.

We have been in consultation with Council for 20 years now about suitable walking access on this stretch of road and have made no progress so far. We believe the delays are due to the exorbitant cost, which is based on an over-engineered proposal dating back many years.

#### Our key requests:

- a) The prime aim should be to reduce car traffic by providing convenient walking and cycling access to Takapu Station.
- b) Walkers need to be considered equally to cyclists. Please make it clear in communications that the Middleton Road cycling proposal is also for the walking community otherwise the voice of the walker is excluded.
- c) Road-separated cycling options are all too expensive and alternative options must be considered.
- d) Less engineered, less expensive options that benefit the walker and recreational cyclist should be considered to keep the cost down. Similar examples are beside Te Marua SH, the walkway beside the railway in Pukerua Bay village, and Pauatahanui SH inlet off-road route.

#### Comments in support of key requests:

- The cycle programme of work at [www.transportprojects.org.nz](http://www.transportprojects.org.nz) which appears to exclude walkers, is that non-vehicular access between Glenside and Takapu (Churton Park and Tawa) is a 'missing' link in the work programme. This missing link should be progressed early.
- However, this cycling option in the Long Term Plan is ranked as the third most expensive item at \$12.4m (e-mail to GPA from WCC in March 2021).
- Current cycling traffic counts in the Glenside gorge are around 125 during the day and 145 during the weekend. Refer <https://www.transportprojects.org.nz/cycle-data/#showdata/electronic/100047075/2020-08-01>
- Cycling network linkages and recreational opportunities are both important but – if 125 cyclists use the route per day now and Council provides for 250 per day in future, the maximum capital spend this would justify is about \$7 million unless there are other significant benefits. (This calculation provides for a \$1.00 subsidy / km for each cyclist using the cycleway with a 25 year payback period and is not discounted.)
- A revised and revisited programme of works, inclusive of walkers, might reduce this cost significantly and enable earlier progression and benefits.

**Claire Bibby** for *Glenside Progressive Association Inc.*

## SUBMISSION ON WELLINGTON CITY COUNCIL'S LONG-TERM PLAN

### INTRODUCTION

1. Thank you for the opportunity to submit on the Wellington City Council's Tō mātou mahere ngahuru tau: Our 10-year Plan (the Long-term Plan). The Chamber has consistently worked hard to ensure the city's business community has a voice in city matters, and our contributions to the annual plans are an essential part of this.
2. The Chamber would welcome the opportunity to discuss this submission with the Council and wishes to take part in an oral submission.

### ABOUT THE CHAMBER

3. The Wellington Chamber of Commerce ('the Chamber') has been the voice of business in the Wellington region for 164 years since 1856. We advocate for policies that reflect the interests of Wellington's business community - both city and region - and which support the development of the Wellington economy as a whole. The Chamber is accredited through the New Zealand Chamber of Commerce network, and we are also one of the four regional organisations of BusinessNZ. Through our three membership brands - the Wellington Chamber of Commerce, Business Central, and ExportNZ - our organisation represents around 3,500 businesses across the central and lower North Island.

### EXECUTIVE SUMMARY

4. Wellington City Council is facing a period of high investment, which is a result of catching up on a legacy of under-investment in infrastructure, and also catering for rapid future growth. Tackling both of these issues is essential to wresting housing affordability back into the city. In addition, many inner-city businesses are still battling with Covid and its aftermath. Decision-makers cannot assume this is behind us.
5. The Council is therefore responsible for making some hard decisions and trade-offs. Neither 'business-as-usual' or 'wish lists' are an option. Nevertheless, the 2021 *Long-term Plan* ('LTP') contains some work towards preventing excessive future expenses, and we congratulate the Council for this.
6. But there is plenty to do. Some preferred options in the LTP are prohibitively expensive, and undermine the hard economic choices made elsewhere. Little initiative is proposed on making our inner-city a desirable, high-density place to live, especially considering transport, housing affordability, insurance, and safety issues. And sorely-needed transport improvements will incur great expense, which is not yet accounted for.

7. The Council has delivered on few of its previous '8 Big Ideas' from its 2014 economic development agenda. This LTP does little to build off that document. The ongoing lack of strategic consistency is symptomatic of a city losing its edge. We must address the central question: is Wellington still a place where professionals want to live, study and work?
8. Wellington is reaching a crisis point, and political leaders are not working together on implementing solutions.
9. The Chamber believes that the following ought to be adopted by Council as a way for moving forward:
  - Name three key indicators for the city: Carbon emissions; Housing affordability; and Job Growth – and set, measure, and publish these indicators.
  - Water metering: Introduce this across the city to provide a dedicated revenue stream to Wellington Water, so it can fix the aging infrastructure.
  - 'Let's Get Wellington Moving': Renegotiate this transport package with the central government, so they pay for 100 per cent of State Highway One projects. This will free up Council funding for improvements to bus routes as well as walking and cycling infrastructure.
  - Commercial property developers: Let them manage the revitalisation of the Civic precinct, including the Central Library building, just as central government departments lease commercial office space in Wellington.
  - Public debates on housing affordability: Take a lead on these to ensure more high quality, high-density housing is built in Wellington, particularly the central city.
  - Work with The Treasury: Focus on reforms and regulations to New Zealand's property insurance market, before rapidly escalating premiums start to push residents and businesses out of Wellington.
  - Develop a safer central city: Increase the Police presence, and invest in more lighting, sightlines, and CCTV coverage.
  - 'Venue Strategy': Develop and implement a plan for the city to inform the Civic Square redevelopment, including assessing what facilities the city needs compared with what is already available and accessible.

## STRATEGIC DIRECTION

10. The Long-term Plan's overall strategic direction - i.e. community outcomes and priority objectives - are focused on the right things. This indicates some good common goals between political leaders and council officers. Hopefully, these goals also result in some similarly well-aligned initiatives towards action.
11. However, it is currently unclear whether the city's preferred set of projects and funding methods, as outlined in the LTP, will achieve the desired outcomes. This is the focus of this submission. Without further work on improving the affordability of projects, along with some hard calls around ownership, the city will continue to restrict its ability to improve and grow.
12. While debt limits have provided discipline around additional borrowing, this is not evident in operational expenditure and rates rises. Consequently, ratepayers are being asked to absorb enormous rates increases year-on-year over the next decade. And this does not take into account the full impact of current transport promises.
13. Wellington businesses already pay some of the highest rates in New Zealand due to a combination of the following charges levied: an exceedingly high 3.25 general rates multiplier; an additional targeted commercial sector rate; and, for CBD located businesses, the downtown levy. This adds up to being nearly half the total rate collected by Wellington City Council. When examining the LTP Funding Impact Statement, the total general rates revenue take is set to increase from \$196,282,000 to \$368,449,000 by 2030. That is an 87 per cent increase in rates revenue over the ten-year period, 39 per cent for the 3-year period, and for just 2021 it is a 16.5 per cent increase. Even after adjusting for any growth in the ratepayer base, this is unacceptably too high.

14. Further, we would emphasise the strategic importance of Council embracing appropriate private investment and seeing the business community as future strategic partners.

## **BUDGET PRESSURES**

15. The budget pressures facing the current Council are understandable. Debt was used to cope with the economy-wide shock of Covid-19. But debt cannot be used to plug gaps in operational expenditure in the medium-term. As discussed on pages 17 and 18, it is prudent to maintain some headroom with the debt limit in order to cope with an unforeseen crisis, and this is supported by the Chamber.
16. Budgetary pressures reinforce the need for the Council to go back and rethink some assumptions about their previous ways of doing things. In addition, Wellington must secure new funding sources for the required investment in core infrastructure; for example, the use of water metres to help fund upgrades to Wellington's water network.
17. The current economic downturn due to Covid-19, resulting in the inability of Wellington Airport to pay the Council a dividend, illustrates the limited mechanisms that the Council has to manage this risk. The lack of dividend is causing the Council revenue stress. Yet, the airport is not an asset that the Council needs to retain a minority stake in – whoever its owner, the airport would continue to operate commercially and provide air linkages for Wellington. Therefore, the Council should divest itself from the airport. Better to invest the proceeds in the Council's current strategic priorities.
18. Current revenue pressures and operating expenditure have resulted in a forecast rates increase of 13.5 per cent in 2021/22. This is completely unacceptable, and demonstrates the need to go back and rethink how the budget is formulated. There is little credibility in the forecast rates increases of 2-3 per cent in the later years of the Long-term Plan. We know they will be much higher because these figures do not include most of the 'Let's Get Wellington Moving' expenditure – as explained on page 19. This means ratepayers potentially facing a doubling in rates over the next ten years.
19. Therefore, the Chamber strongly supports the Council investigating divestment opportunities as outlined on page 53. The right mix of assets is not necessarily the one that previous generations gave to us. The Council needs to think through which risks are best managed by itself, and which ones are best managed by others. This applies to the airport, discussed above, but also applies to many smaller assets the Council has. Generally, if a Council-owned asset or organisation is operating commercially or competing against other providers, then the need for Council ownership is negligible.
20. This approach also applies to the Central Library building and is discussed in more detail in the library section later in this submission.

## **DECISIONS**

### **Investment in three waters infrastructure – Decision 1**

21. This section of the LTP lays out the scale of the problem, and the Chamber agrees that the three waters is the number one priority facing the Council.
22. Wellington Water has inherited decaying infrastructure. Sewerage running across streets or into the harbour is unacceptable. Wellington Water is well placed to manage the required maintenance, repairs, and upgrades so long as they are adequately funded and supported by political leaders.

23. To provide additional funding, the Chamber advocates for introducing water meters in Wellington and across the region. Meters would give the extra funding required to undertake necessary investments; provide ongoing sustainable revenue, so we do not repeat historical underinvestment; and increase conservation activities to reduce water usage.
24. The city should start by investing its water network assets into a dedicated CCO (such as the successful Water Care in Auckland) and installing water metres to provide a user pays revenue stream that significantly improves water conservation. Experiences in other areas, such as Kāpiti, have illustrated the benefits of metering while demonstrating that initial community fears are unfounded.
25. Over 23,000 water metres were rolled out in Raumati, Paraparaumu and Waikanae in mid-2014 at the cost of \$8 million. Despite some community apprehension, the process led to measurable improvements. The following summer saw a 25 per cent drop in peak day use, as residents cut back to keep their bill down. While 2015's summer rainfall was just one-third of the previous years', sprinkler bans were avoided as residents voluntarily conserved water. During the 2017-18 summer, the hottest in 10 years – Kāpiti was the only lower North Island district not to need water restrictions.
26. The average water bill for a family of four in Kāpiti is \$490 per year. The Council says 75 per cent of ratepayers pay less for water now than they previously did when it was a one-size-fits-all approach.
27. It is estimated that Wellington's demand for water will outstrip supply within ten years if residents keep consuming at their current rate. Several years ago, Water NZ estimated that Wellington's pipe system leaked 15-20 per cent of its water. They compared this to the leakage rate in the Netherlands of 3 per cent.
28. Some community members fear metering for water is privatisation of the water. However, it is essential to note that it is still a council-controlled organisation managing the water network: it is managed as a not-for-profit Council controlled organisation ('CCO'), the charging is on a user-pays basis, and all revenue is reinvested in the network for either repairs or network expansion.

### **Wastewater Laterals – Decision 2**

29. The inclusion of laterals into the ownership and control of Wellington Water, in order to manage and maintain the network, makes good sense. The Chamber supports this decision, based on the modest \$3.2 million estimate of additional operating and capital expenditure required (see page 29 of the consultation document.)

### **Cycleways – Decision 3**

30. The Chamber supports the construction of additional transport infrastructure within Wellington. Different transport options give Wellingtonians better and easier ways to get around their city, promote economic development, and allow for population growth, particularly in the inner city. Cycleways are a crucial component for any transport network, and safer routes will become busier routes. The parts of Wellington that are easily accessible by bike - namely the central city, and southern and eastern suburbs - will benefit most of all. The Chamber supports the current programme of upgrades.
31. Looking at the new options put forward in the Long-term Plan, there is a very large jump between Option 2's \$39 million and Option 3's \$120 million price tag. This is at a time when the Council is already severely worried about its finances.
32. However, the main problem with considering a much larger cycleway programme is that all of Wellington City's transport liabilities are not included in the LTP. The document clearly states that most of the 'Let's Get

Wellington Moving' components are omitted. This will see a dramatic rise in transport capital costs for the city. Deciding on an enhanced cycleway programme now, without giving ratepayers clarity on existing transport infrastructure commitments, is not good process.

33. Finally, ratepayers, especially cyclists, have lost confidence in the city's ability to deliver new cycleways. The Island Bay example is particularly noteworthy. The Council needs to rebuild trust from the community before committing to their most expensive option, one that the Council itself admits is "ambitious".

#### **Te Atakura First to Zero – Decision 4**

34. The Chamber supports the Te Atakura First to Zero plan to assist the city with tackling climate change. The Chamber particularly endorses the plan to measure and publish the Council and the city's greenhouse gas emissions. It is only through recognising and understanding opportunities to improve that the city can meaningfully reduce its emissions quickly.

#### **Te Ngākau Civic Precinct, Council Office Buildings – Decision 5**

35. Using private developers to bring the civic precinct back to life will be a good outcome for the city. Option 1 does not require ratepayers to foot the bill in order to fund the redevelopment. This makes it a much better choice that will hopefully bring some "ground floor" life back to Civic Square.
36. Demolishing the buildings is unfortunate, but they are no longer usable due to previous earthquakes. Retaining the structures intact, or in Council ownership, just opens up ratepayers to high costs that the Council may not yet fully grasp.
37. Civic Square is an essential feature of Wellington's inner city, and it has been dead for years. Beginning its recovery period will be an important step to restoring public confidence and interest in this area.

#### **Central Library – Decision 6**

38. The Council's preference to retain the Central Library building is inconsistent, because the Council prefers demolition and redevelopment for 'Decision 5 Te Ngākau Civic Precinct' next door.
39. Maintaining the library's operations, and assets such as books, are appropriately under the direct ownership of the Council. However, the building that the library is housed in does not need to be constructed and owned by the Council. Instead, ownership exposes the Council to significant financial risks, and we are living with these now.
40. Almost all central government departments and agencies do not own the buildings they operate out of. The Council does not own the buildings that house the current pop-up libraries.
41. Allowing another owner the ability to redevelop the site will bring multiple benefits, including: construction of a new fit-for-purpose building; breathing new life into Civic Square by housing multiple tenants rather than just a 9 a.m.- 5 p.m. library; opening safe pedestrian access from Victoria Street to our waterfront; and shifting the costs of construction off ratepayers.
42. The Chamber supports the same option for the Central Library building as for the Civic precinct, because there is no compelling reason to treat these various buildings differently. This means demolition, and site development through a long-term ground lease. Under this option, Council would retain ownership of the land and control the design brief for any replacement buildings, but it would not own or fund the replacement buildings.

## Sludge – Decision 7

43. Reducing sludge is an important consideration, and the proposed solution in the LTP appears sound. The proposal to use a special purpose vehicle to facilitate the project is welcome, and we would like to see SPVs considered as solutions to other problems across Council.
44. However, the timing of this project is problematic when combined with the other calls on the Council's finances as detailed in this LTP. Therefore, the Chamber supports delaying the approval of this work until the Council has greater certainty of the costs for tackling water infrastructure, transport, and the Central Library building.

## LET'S GET WELLINGTON MOVING

45. The exclusion of most of the 'Let's Get Wellington Moving' costs from the LTP is surprising. It's one of the key priorities for the Council, and it carries enormous costs for ratepayers. Additionally, the project is under pressure, with the Minister of Transport expressing frustration at the project's lack of leadership and delivery.
46. As expressed in our submission to last year's annual plan, the Chamber's opinion remains that the Council renegotiates the deal with the central government because of the deal's unaffordability to ratepayers, the lack of delivery so far, and the exclusion of essential transport links the city will need to get moving.
47. Wellington's traffic problems are well known. Wellington's growing population has led to rising traffic congestion and longer commuting times. Areas in the central city as well as around the port and airport are particularly problematic. Public transport is straining, trains are reaching capacity, and the bus reforms have been a debacle. Unfortunately, Wellington has been let down by the central government and our own lack of vision.
48. The 'Let's Get Wellington Moving' deal announced in 2019 was a poor deal. While addressing some of the capital's most chronic transport needs, the package shifted too much of the cost onto local ratepayers. It deliberately blurs the traditional areas of responsibility between local and central government for transport projects. It imposes a bespoke model of cost-sharing that requires a higher contribution from local councils than, for example, ATAP in Auckland. Also, there is too much uncertainty over critical projects like the Mount Victoria tunnel, and the Terrace tunnel does not even feature at all.
49. Businesses in Wellington have expressed their support for some sort of congestion charging within the central city. By investing in fit-for-purpose transport links around the city, drivers can willingly avoid the more congested areas near the centre. Once completed, financial incentives can be used to ensure that traffic stays within these arterial routes. With such charges, the Council can invest in further projects to aid inner-city mobility, such as improved public transport infrastructure, bus priority, scooter paths, cycle lanes, and wider footpaths. Some of this is already underway with the 'quick wins' part of LGWM, but more is required.
50. Councillors should lead public discussions explaining why transport funding is not zero-sum between modes. This would increase public support for upgrades that benefit multiple users of corridors. For example, trenching Karo Drive is an expensive project that is seen to primarily benefit car users. Yet it will be a massive boost for walkers and cyclists in the area, delivering an enormous amenity benefit to local residents by getting cars away from residential and mixed-use spaces.

## INSURANCE MARKET FAILURE

51. The LTP identifies insurance risks for the Council, but it is a risk facing all residents and commercial tenants and owners. The Council needs to work with the Treasury on a work programme to fix Wellington's insurance market.
52. Commercial property owners in the city are coping with building insurance premiums that have doubled, tripled, or even quintupled over the last few years. For example, one typical office block in Wellington saw its insurance premiums rise 220 per cent in just four years - from \$99,000 in 2016 to almost \$320,000 last year. In one of our quarterly business confidence surveys from 2019, 30 per cent of respondents said they had experienced "significantly increasing premiums" in the past three years. The Chamber has spoken directly to businesses, who have told us that insurance companies are inserting additional clauses into contracts to reduce cover without clear explanation, and that their cover has been "shrinking over the last four years, but premiums continue to go up".
53. Rapidly rising insurance premiums are a cost to businesses, but they also flow through into the rents of every tenant, which in turn increases the price of all goods and services in Wellington.
54. Insurance companies and their representatives claim that the market is adjusting to the 2016 Kaikoura earthquakes. They are making more granular risk-based assessments of properties based on location, and reverting to international norms when compared to similar jurisdictions in Japan and California. The problem with these arguments is that no matter what mitigation investment a business makes, the insurance premiums still go up. Japan and California have low rates of business insurance compared with New Zealand, but are far larger economies.
55. High rates of private insurance cover were key to Christchurch's successful rebuild following their 2011 earthquake. It would be regrettable for businesses to decide to forego insurance cover in a bid to keep their operating costs down, in doing so exposing themselves and our economy to a significant shock in the wake of even a moderate earthquake. New Zealand can preserve its enviable high rates of insurance cover if we act now.
56. The Mayoral Taskforce on Insurance from the previous Council appears to have gone quiet. We urge the Council to continue working with the government on insurance reforms to maintain the affordability of premiums for residential and commercial property owners.

## AFFORDABLE HOUSING

57. Wellington's population growth is hurting housing affordability. The city needs to build more houses in central and suburban areas. To achieve this, the Council should encourage developers to push ahead with significant housing developments across the city. This could take the form of regulatory support, expediting consents, and better guidance through the approvals process.
58. Planning for population growth with a focus on improving housing affordability is admirable, as discussed on page 51, because this desire has been lacking in the past. However, catering for growth also needs to acknowledge the catch-up required to improve affordability for all. A greater sense of urgency is needed on implementing the spatial plan.
59. One significant barrier to higher density housing is objections from surrounding residents, even when the area is zoned for such developments to proceed. Councillors should prioritise housing developments going ahead and champion them in front of their local communities. Only with political leadership, and people articulating

why such housing is essential, will such projects then proceed, and contribute to making housing more affordable.

60. In addition, the Council could contribute to common infrastructure costs to get additional housing developments going. An example of the Council holding up a housing development is Shelly Bay. Rather than fighting the development, the Council should be sitting down with proponents and working out how they can get it through the consenting process fairly.

## **COMMUNITY HOUSING**

61. Social housing is the responsibility of central government. Wellington city's participation in social housing is a considerable financial risk that it has struggled to manage over the preceding several decades. Citizens deserve warm, dry houses that are safe to live in. Yet because of the financial demands on Council, it has struggled to maintain the housing stock for its citizens adequately. Instead, the Council could partner with existing community housing providers and Kāinga Ora, who are better equipped to provide successful social housing outcomes.
62. Social housing tenants are best served by having dedicated social agencies wrapping services around them. Therefore, the Council should consider transferring its social housing portfolio to existing community housing providers funded by the central government rather than establishing its own CHP. These providers are better able to offer support services such tenants often require, and they are also better at looking after the properties.

## **VENUES STRENGTHENING AND UPGRADES**

63. The 'venues strengthening and upgrades' work discussion on page 53 of the LTP needs to fit into a wider consideration of how Wellington's venues work for the community. Before embarking on a series of expensive upgrade projects, the Council should first consider the role and purpose of each venue and how it uniquely contributes to Wellington. Alternative solutions should be found for those venues whose purpose is duplicated, or whose upgrade work is too expensive. The Chamber supports the Council developing a venues strategy before committing to further upgrade work.

## Submission #: 1518

### Submission to Wellington City Council Long Term Plan

Julie Geange and Seán Mahoney

#### We wish to be heard in support of this submission

##### **Dedicated Residential Parking on Waiapu Road , Kelburn.**

We reside on Waiapu Road, Kelburn, home of the wonderful community asset Zealandia Ecosanctuary.

Zealandia has three specific dedicated public car parking areas, as well as a dedicated staff car parking area. We support these being in place.

Waiapu Road has a residential block of flats with their own dedicated parking, one house with a private driveway and parking and then four properties located at the top end of Waiapu Road with no off-street parking. In this same area there are four on-street public car parks, which could adequately service the four residential houses on Waiapu Road if they were dedicated parks for residents.

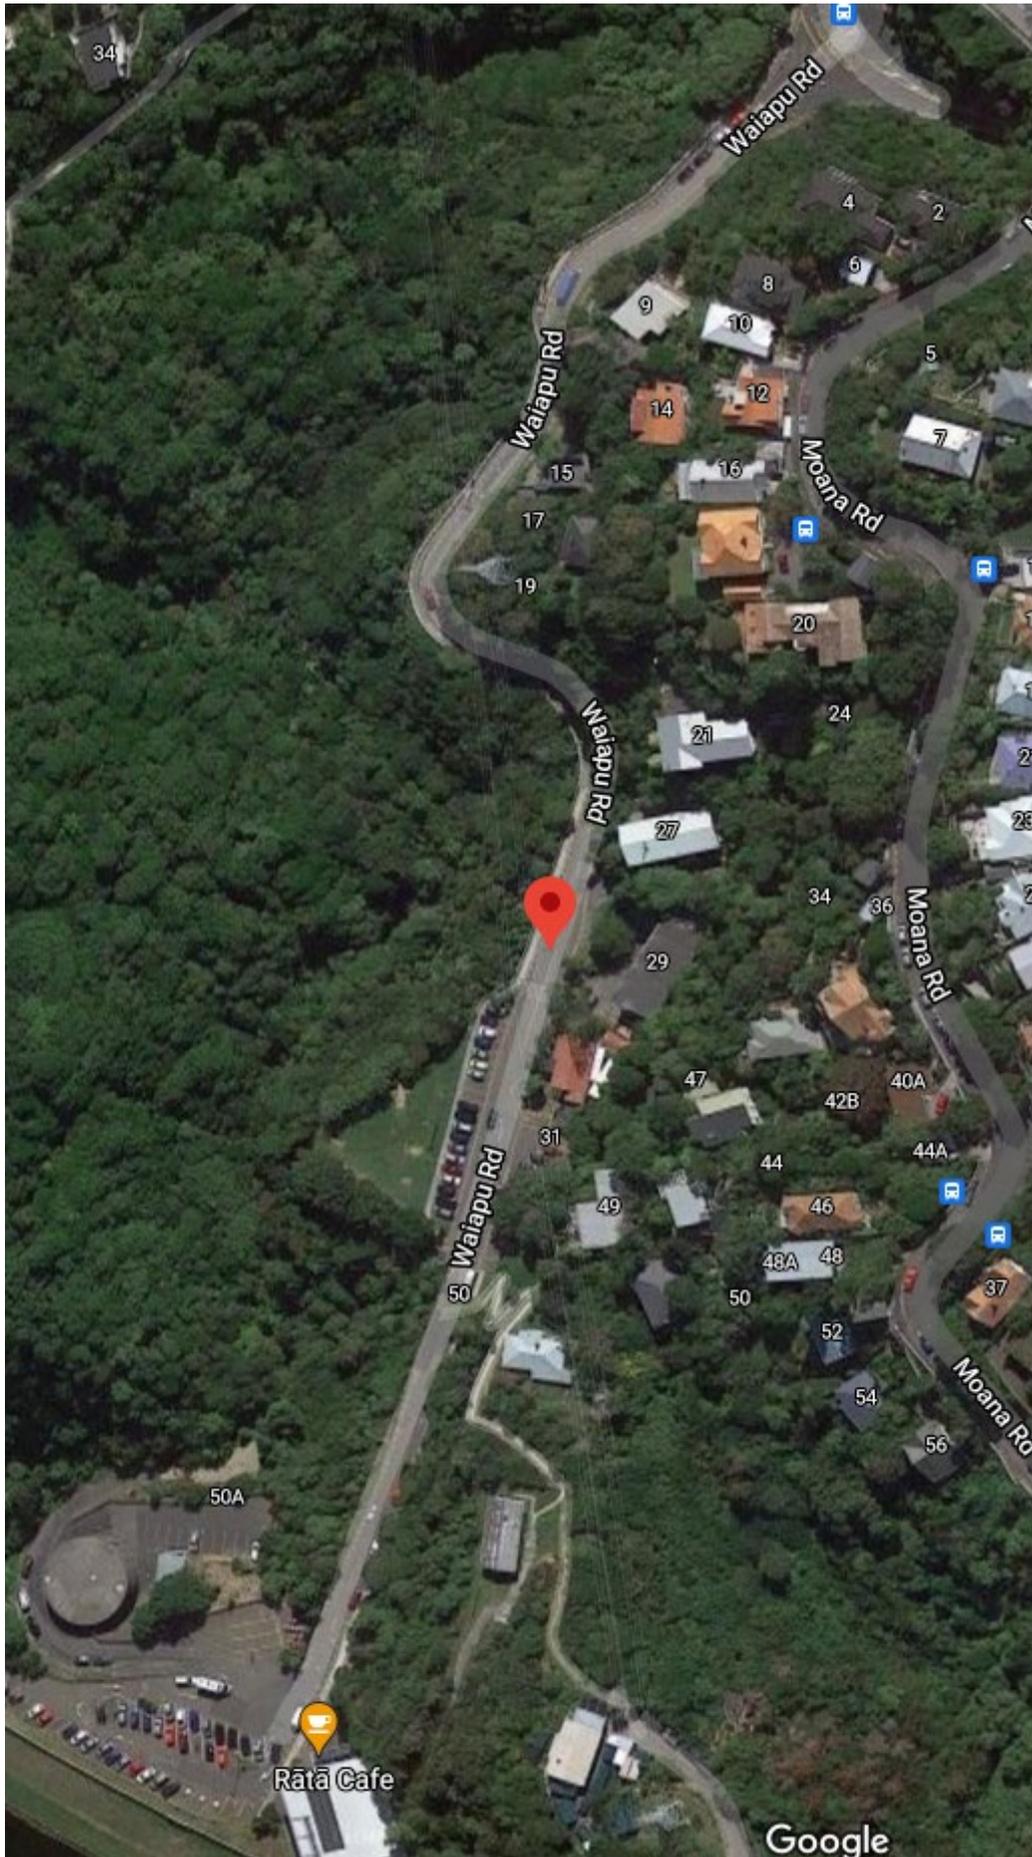

When Zealandia is busy, especially when the entrance fee is reduced or removed, there is increasing pressure on the parking closest to Zealandia which often means we as residents cannot park anywhere close to our houses, which makes access them difficult especially when bringing in groceries etc. These parking areas have also been used to home abandoned or broken-down cars.

Zealandia is supportive of a move to zone these carparks residential (see attachment) as are the residents who are affected.

At this point we would like to be clear, we do not wish to increase the number of parking spots, rather that we are asking for the existing four car parks at the Chaytor Street end of Waiapu Road to be designated 'Zealandia residential parking' and that 9, 11, 15 & 17 Waiapu Road are each entitled to one 'Zealandia residents car park', upon payment of a residents parking fee.

Why are we asking for this through the LTP process? Upon enquiring with the WCC, the form to apply for residential parking to be created was not on the website, nor could it be located by staff (who by all intents were very helpful). We were then told an engineer would need to investigate the situation and the process could take up to a year.

Should council be supportive of this proposal, there will be minimal cost to create the parks. We look forward to a positive outcome for both residents and visitors to this area.

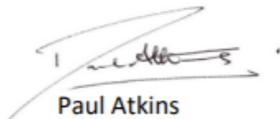

Monday 27 April, 2021

To whom it may concern

I am writing to support the application for four existing roadside public car parks at the end of Waiapu Road next to the junction of Chaytor Street to be designated as residents parking for the residential properties at 11,13,15 & 17 Waiapu Road.

These are currently public car parks and are utilised not only by the local residents but by visitors as well, causing some problems for the residents of the aforementioned properties who do not have access to off-street parking. I can confirm that the removal of these car parks from public use will not negatively impact visitors to Zealandia, on the other hand this will have a positive impact on the day-to-day lives of the residents of the four houses.

Yours faithfully,

  
Paul Atkins  
Chief Executive

To whom it may concern,

We have lived at 9/11 Waiapu Road Kelburn Since March 2018

Parking was removed from the street underneath my house just before it was bought – there were eight spaces originally. This has in time caused many issues when you live on the street – I entirely back the application to request resident parking.

There are four houses this affects and there are four bays that could be allocated for residential parking – due to location of these bays we suffer from losing car bays to city workers Daily parking, weekend Zealandia customers.

I see that on the Wellington Kelburn Residential permit page we are eligible for this to take place.

Please add our interest in making Waiapu Road Resident permit parking

Many thanks

Driana And Isabella Greenwood Reeves

## Kōrero mai mō te mahere 10-tau

### Have your say on our 10-Year Plan

All submissions must be received by **midnight Monday 10 May 2021**.

You don't have to give feedback on every decision – just choose the ones you're interested in. You can only submit once. You can include supporting information along with your submission.

Before you start, read about our priorities and projects in our consultation document. There are copies available at your local library and our Service Centre at 12 Manners Street, or visit [wgtm.cc/ltp](http://wgtm.cc/ltp).

#### Why we're collecting this information

Your feedback matters. This plan is about the future of Wellington and it affects everyone who lives and works here. That's why we want to hear from as many people as possible. Your views will inform the next steps we take.

#### Privacy statement

All submissions (including names and contact details) are provided in their entirety to elected members. Submissions (including names but not contact details) will be made available to the public at our office and on our website.

Your personal information will also be used for the administration of the consultation process, including informing you of the outcome of the consultation.

All information collected will be held by Wellington City Council, 113 The Terrace, Wellington, with submitters having the right to access and correct personal information.

Full name: <b>Karori Residents Association Inc</b>		
<b>Contact details</b>		
Address: <span style="background-color: black; color: black;">[REDACTED]</span>

Are you are making this submission as an individual or on behalf of an organisation?		
Individual	Organisation: <b>KRA Inc</b>	
What is your connection to Wellington? <i>(tick all that apply)</i>		
* I am a Wellington City Council ratepayer <input checked="" type="checkbox"/>	I live in Wellington <input checked="" type="checkbox"/>	* I work in Wellington <input checked="" type="checkbox"/>
I own a business in Wellington <input checked="" type="checkbox"/>	I study in Wellington	I am a visitor to Wellington
Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?		
Yes <input checked="" type="checkbox"/>	No	
If yes - We are offering two ways of speaking to Councillors about your submission. <i>(Please tick which option(s) you would prefer?)</i>		
<b>Oral forum</b> (informal, 60min facilitated table discussion with 2 to 3 Councillors and other submitters) <input checked="" type="checkbox"/>	Morning	Afternoon <input checked="" type="checkbox"/> Evening <input checked="" type="checkbox"/>
<b>Oral Hearing</b> (formal hearing with set times to speak to full Council, 5mins per individual, 10mins per organisation)	Morning	Afternoon Evening

## Our seven big decisions

The next seven questions relate to the big decisions for the 10-year plan.

- **Decision 1:** Increasing spending on the three waters network to fix the pipes
- **Decision 2:** Taking responsibility for the ownership of wastewater laterals
- **Decision 3:** Increased investment in cycleways
- **Decision 4:** Implementing our Te Atakura, First to Zero action plan
- **Decision 5:** Choosing a plan for earthquake-prone Council Office buildings
- **Decision 6:** Funding the Central Library strengthening and upgrade
- **Decision 7:** Choosing a plan for sludge minimisation

Detailed information on these decisions are on pages 20 to 47 of the Consultation Document.

**Question 8** in this submission form is a place for you to comment or provide any other feedback on the decisions.

You are also able to attach further information to your submission at the end of this form.

### 1. Investment in three waters infrastructure

There are three different levels of investment in the three waters network to consider. Our preferred level of investment is the **Enhanced** option, which focuses on improving the condition and reliability of the network in an affordable and sustainable way.

Problems with pipes have been a long time in the making, and we cannot fix everything at once. The Enhanced option represents a \$2.4b investment in our three waters network and is the middle-ground option that we are confident of being able to deliver in this plan. We will be able to review the level of investment in our next Long-term Plan review in 2024, when we will have more information on the network.

A summary of the proposed investment in in the three waters network is on pages 22 - 26 of the Consultation Document.

Which of these options do you prefer?

Enhanced (\$2.4b Council's preferred option)	Maintain (\$2.0b investment - lower rates and debt)	<input checked="" type="checkbox"/> Accelerated (\$3.3b investment - higher rates and debt)	None of these options	Don't know
--	---	---	-----------------------	------------

### 2. Wastewater laterals

Currently residents are responsible for the maintenance of the pipes connecting their property to the wastewater (sewerage) main underneath the road corridor. These are called wastewater laterals.

We propose that the Council takes ownership of the laterals between the property boundary and the sewerage main underneath the road corridor.

A summary of the proposal to take responsibility for wastewater laterals is on pages 28 - 29 of the Consultation Document.

Which of these options do you prefer?

* Take ownership (Council's preferred option, \$32m investment) <input checked="" type="checkbox"/>	No change (no change in investment, rates or debt)	Neither of these options	Don't know
---	--	--------------------------	------------

### 3. Cycleways

Cycleways is an area where we have ambition to seriously lift our game - we'd like to build a network of connected and safe cycleways that allow Wellingtonians to be able to choose cycling as a mode of transport. Our full programme for the network can be viewed at [transportprojects.org.nz](http://transportprojects.org.nz) and if all of the routes were progressed, there would be a \$226m investment across the 10 years of this plan.

Our preferred option is a \$45m or 60 percent increase in funding for cycleways than what was planned in the previous Long-term Plan. It will progress \$120m of the full \$226m programme

We believe the high investment programme option balances the need for increased investment in this area with what is affordable for Council and what we will be able to deliver. It allows time in the programme for robust community engagement and to build capacity in the Council and the sector for the full programme to be eventually delivered.

A summary of the proposed investment to build more cycleways is on pages 30 - 33 of the Consultation Document.

Which of these options do you prefer?

High investment programme (Council's preferred option, \$120m capital investment)	Finish started projects (\$29m capital investment, lower debt and rates)	Medium investment programme (\$39m capital investment, lower debt and rates)
Accelerated full investment programme (\$226m capital investment, higher debt and rates)	None of these options ✓	Don't know

### 4. Te Atakura First to Zero (Climate Change)

Te Atakura - First to Zero is our response to the climate and ecological emergency we declared in 2019 but it is not yet funded.

Te Atakura is intended to ensure sufficient activity is undertaken in this decade to reduce our emissions. Council can do this by supporting the transport mode-shift projects, as well as encouraging the uptake of electric cars, providing seed funding to leverage businesses and community impact and supporting residents to be motivated to take action.

Our preferred option is to fully fund Te Atakura, which is included in our 5.3 percent average increase across 10 years.

A summary of the proposed investment in Te Atakura - First to Zero Action Plan is on pages 34 - 37 of the Consultation Document.

Which of these options do you prefer?

Fully fund the programme (Council's preferred option, \$29.9m investment)	Medium investment with savings (\$25.4m investment, lower rates and debt)	
Low level of funding (\$18.1m investment, lower rates and debt) ✓	None of these options	Don't know

### 5. Te Ngākau Civic Precinct - Council office buildings

Te Ngākau Civic Square is the musical, creative and democratic heart of Wellington but it has significant resilience challenges.

While we are still working through finalising the framework for Civic Square, a specific decision is required in this Long-term Plan with respect to the future of the Council office buildings - the Municipal Office Building (MOB) and the Civic Administration Building (CAB).

As the two buildings are connected, and have similar resilience issues, it is important that the future of them is considered together.

Our preferred option is to demolish and rebuild the MOB and CAB buildings in partnership with private investment through a long-term ground lease for the site.

Combining a MOB and CAB development would enhance this opportunity and significantly decrease the need for additional Council borrowing and ratepayer funding to address these impaired buildings.

A summary of the proposed approach to developing of Te Ngākau Civic Square on pages 38 - 41 of the Consultation Document.

Which of these options do you prefer?

Demolish and site developed through long-term lease (Council's preferred option)	Proceed with base build proposal for public purposes (higher debt and rates)		
Retain and seek to repurpose (higher debt and rates)	Sell to support development (no debt or rates impact)	None of these options ✓	Don't know

## 6. Fixing the Central Library

Wellington's much-loved Central Library was closed in March 2019 following an engineering assessment saying that the way the floor was designed presented a high level of potential failure in a significant earthquake.

After hearing from Wellingtonians in the 2020 consultation, Council agreed to recommend the high-level remediation option to be part of this plan. This option makes the building resilient to future shocks and supports our ability to deliver an adaptable modern library service, while preserving the buildings heritage. It also allows us to mitigate some climate change impacts in the future.

Now there are choices about how to fund the \$187.4m library remediation project, and when the project should take place.

The preferred option, includes the Council agreeing to temporarily breach its debt limit of 225 percent to ensure the library can be refurbished in the original timeframe and remain in public ownership. Our debt level will remain at 225 percent, and Council has agreed to accept the breach in the first three years of this plan. This breach will be mitigated by any capital underspend being used for the library project rather than on new projects. Our debt level will be back below our limit by year 4 – 2024/25.

A summary of the proposed investment to fund the fixing of the Te Ngākau Civic Square Central Library is on pages 42 – 44 of the Consultation Document.

Which of these options do you prefer?

<input checked="" type="checkbox"/> Strengthen now by temporarily exceeding debt limit (Council's preferred option, additional 0.79% rates increase)	Council to strengthen Central Library later (complete in 2028 instead of 2025, additional 0.83% rates increase)	
Strengthen now by increasing rates further (additional 1.79% rates increase)	None of these options	Don't know

## 7. Reducing sewage sludge and waste

One of the largest waste categories at the Southern Landfill is wastewater (sewage) sludge. This accounts for about a quarter of the waste that enters the landfill.

Through Te Atakura (our Zero Carbon Plan) and our Regional Waste Minimisation and Management Plan we have formally committed to reducing carbon emissions and reducing waste by a third. Minimising wastewater sludge is a necessary first step to achieving these objectives.

We need to break the link between the Southern Landfill and wastewater sludge and stop pumping sludge across the city, as 2020 highlighted the serious resilience issues and the significant consequences of failure.

Our preferred option is to invest in a sludge minimisation programme through another funding source. This means the project would not be funded by Council, but if it is funded through a Special Purpose Vehicle, a levy of about \$70-\$100 per year will be charged to each ratepayer.

A summary of the proposed investment in sludge and waste minimisation is on pages 45 – 47 of the Consultation Document.

Which of these options do you prefer?

*Sludge minimisation through alternate funding (Council's preferred option, \$147m-\$208m capital investment funded through a levy, no additional rates increase)	No change in current practice (no change to investment, rates or debt)	<input checked="" type="checkbox"/>
Invest in technology at Southern Landfill (\$86m-\$134m capital investment and higher rates) <input checked="" type="checkbox"/>	Sludge minimisation – through Council funding (\$147m-\$208m capital investment, above debt limit and higher rates)	<input type="checkbox"/>
None of these options	Don't know	<input type="checkbox"/>

## 8. Feedback on these decisions

Do you have any comments you would like to provide around why you selected your preferred option to any of these decisions, or why you don't support any of the options we proposed? If yes please indicate what decision/s you wish to provide comment on.

<input checked="" type="checkbox"/> Investment in three waters infrastructure	<input checked="" type="checkbox"/> Wastewater laterals	<input checked="" type="checkbox"/> Cycleways
<input checked="" type="checkbox"/> Te Atakura (climate change)	<input checked="" type="checkbox"/> Central Library	<input checked="" type="checkbox"/> Sludge and waste minimisation
<input checked="" type="checkbox"/> Te Ngākau funding for future work	None of these	

If the space on the next page is not adequate for your comments, please feel free to attach supporting information to the submission. **Please be clear** what decision you are commenting on.

6. Transport Network

Priority Objective 3 of the consultation document is laudable. Choices, safety, efficient, productive – all good words. Why then has no one mentioned the Karori Tunnel and its approach roads are not safe for cyclists, while the tunnel itself is impassable for pedestrians with disabilities, and the mixing of electric scooters and cyclists with pedestrians is becoming a significant hazard, both on city footpaths, and on shared roads. The long-term plan should give stronger recognition of the need for roads to support commercial activities within Wellington.

7. The Spatial Plan and District Plan

Citizens are still waiting for the completion of the spatial plan (a disaster as it was first presented) and the draft revision of the district plan.

8. Climate Change and Environment

The move to EV's by Council is supported, as is the installation of a good network of EV charging points around the city. The conversion of the sludge minimisation project should reduce some greenhouse gas emissions. Good management of the landfill including recycling and more could be done to encourage the development and care of our "urban forest" – green spaces, especially those with trees and shrubs. Council should be looking to clean up urban streams, remove weeds more aggressively, and remove the very old and ugly pine trees. In all other respects, the lead on climate change should be taken by government. Council cannot tackle this issue alone. Declaring a climate emergency is a necessary step.

9. Buildings, and Civic Square

Knock down the old council buildings. Develop an imaginative open space that is attractive to all residents but especially to the growing population. Do not build or own buildings when the space can be leased. In other words, shift the Council offices into leased space in the city. Stop the council from doing things "because we are the capital". If the government want to enhance the capital, let government pay. Do things to enhance the capital.

10. Social Housing

Further to the comment in paragraph 1a above, social housing should primarily be a government issue. Council should review any proposals for social housing.

*Lesleigh Salinger*

## Comments

### 9. Proposed 10-year budget (see page 10 for details)

Our draft budget, has an average rates increase for the average ratepayer of 5.3 percent after growth across the 10 years of the plan. We also propose setting a limit on how much we can raise from general rates - \$465m for each year across the first 3 years of the plan and, \$630m each year across years four to ten.

The first year of the plan has a rates increase of 13.5 percent (after growth) and there is an average of 9.9 percent (after growth) over the first three years. This is higher than previous plans because of the **key challenges** faced by the city including infrastructure, housing, earthquake strengthening and and COVID-19 impacts.. Therefore, we now require a step up in the level of rates we charge. Details of the key challenges are on pages 20 - 47 of the **Consultation Document**.

Our proposed budget also represents our highest ever level of capital investment in Wellington. It addresses the need for increased investment in our three waters infrastructure and transport network and seismic strengthening of key buildings, along with making progress against all our other priority community objectives.

Our debt levels for this plan, including the value of uninsured assets, range from 134 percent to 239 percent of our annual income. Our proposed limit is 225 percent.

We think this is a sensible limit on our borrowing to ensure that the impact on affordability of rates is maintained and leaves enough 'headroom' to ensure we can repay our debt, and respond to expected but unfunded and unexpected future events and opportunities.

#### Do you support the proposed 10-year budget?

I strongly support the proposed budget	I somewhat support the proposed budget	Neutral ✓
I somewhat oppose the proposed budget	I strongly oppose the proposed budget	Don't know

#### If you stated in Question 9 that you are neutral or do not support the proposed budget. Do you support increasing or decreasing spend?

I support increasing spend in the current budget	I support decreasing spend in the current budget	I support keeping the budget the same but with some changes	Don't know
--	--	---	------------

## 10. Any other feedback on what is proposed for the 10-year Plan

### Future decisions

The Consultation Document also signals other decisions that are coming up in the time of this plan, but that we do not have enough information on at this stage for a detailed consultation.

### Other projects

We also have many other services and projects detailed in our Statements of Service Provision.

### Council Fees and charges

We have also made changes to some of our fees and user charges. More information on these are available on our website [wgtn.cc/ltp](http://wgtn.cc/ltp) and available at our libraries and service centre.

Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?

### Comments on the Wellington City Council Draft Ten Year Plan 2021

1. The requirements for the long-term plan are laid out the Local Government Act 2002. Broadly, the discussion document is good.
  - a. The office of the Auditor-General notes that \$403.2M of funding for social housing has not been included in the budget.
  - b. The plan includes \$270M over 10 years for the maintenance of city streets but notes that the LGWM project may y
2. When the sums from 1a and 1b above are included, it is clear that ratepayers are going to have to dig very deep o
3. Council's consultation document claims that there are seven important questions on which it wants to consult citizen
4. Improve the Performance of Council:

For several years ratepayers have observed dysfunctional behaviour on Council. Poor decisions have been made (e

## Resilience and Environment: Te Manahau me te taiao

In terms of the environment, one of Council's four city outcomes /or long-term goals is that of eco city, p10 of the LTP notes "*developing Wellington as an eco-city means proactively responding to environmental challenges. It is important that Wellington takes an environmental and leadership role, as the capital city of clean and green NZ.*" -

The LTP asks "have we got the balance right?" In the context of Council's stated "eco city" goal and having specific regards to the interests of Karori and its wider environment, the answer is "**no**"

- It is **KA's** view that, in the past, infrastructure spend has been downplayed in favour of sexier projects and the time has come to redress the balance and to get the bones of the city functioning in an efficient and environmentally sustainable way. The increasing spend under Option 1 is supported but does it go far enough? In particular, much of the increased spend is to be directed towards central city upgrades (because of projected population growth). Apart from identified projects in Tawa and Miramar, **there is little transparency around proposed spend on infrastructure upgrades in the suburbs.**
- **KA** is generally supportive of those projects under Option 1 which are aimed at increasing the City's resilience (e.g. increasing the water storage capacity and pipe network). However it appears that the proposed upgrades are to be directed to the central city only, along with the Upper Stebbings and Horokiwi areas. We trust this is because the current state of Karori's water storage network (as well as that of other suburban communities) has been assessed as being able to cope with natural disaster events?
- In respect to wastewater and stormwater, the extent to which Karori would benefit from the \$13 million allocated under Option 1 to increase the capacity in "other parts" and the \$32 million to upgrade the capacity and resilience "of parts" of our stormwater network is unknown. **KA** will maintain a watching brief to ensure we get our share of the pie. The Ryman's development will put pressure on the current network capacity as will any "re-birth" of Council's medium density housing proposals in the suburb.
- The glaring omission in all of this is the lack of provision for the upgrade of the Western Wastewater Treatment Plant, given that existing consents expire in 2023. Estimates of the \$\$ value required for the works are well in excess of most if not all of the other projects that have been specifically listed under Option 1. The WWTP upgrade is **NOT** optional. Why is it missing?
  - **Where is the budget to address this issue** (which is not confined to Karori Stream)?
- Council will also be well aware of the issues of cross contamination caused by the ageing wastewater networks. Karori is far from immune with **Karori Stream have extremely high E coli levels**. Given:
  - Wellington's long term "eco city" goal, "*the capital city of clean and green*"
  - The identification of Karori Stream in Schedule F1 of GW's Proposed Natural Resources Plan as a river with significant indigenous ecosystems, containing habitat for indigenous threatened/at risk fish
  - The NPS for Freshwater Management
- **KA** wishes to see a clean-up of Karori Stream from headwaters to coast with a comprehensive program of investigation, investment, sensible regulations and compliance action. Place all public drains on private property on easements with appropriate access agreement and health and safety provisions. (See **KA's** recent submissions to a GWRC resource consent hearing).

**Option 1:** p 14 Increase levels of service      **Support:**      **Wastewater network improvement**

# Housing/ Ngā Kāinga

## Key Projects: The Strategic Housing Investment Plan

### Option 1: p 22 Support:

The severity of the housing crisis means all land available needs to be optimised. There is a risk \$22m is used poorly as subsidies to developers, with minimal real value gained, however, \$11m to operate the fund should hopefully enable sound investment.

There may be a need for the council to further leverage its stock of housing to expand supply. This can be considered using forms of project financing without using ratepayer underwriting as described elsewhere in this submission. Given the income related subsidies that enable the Council to obtain market rents even from social housing, the portfolio can be operated on a self-standing basis. The cost of borrowing may be marginally higher, but only because it does not receive a ratepayer subsidy from the underwrite.

## Wellington Housing Strategy

The focus on improving housing affordability generally is weak. The strategy focuses more on public housing and housing quality. There is little focus on land supply, zoning, and infrastructure supply. 1000+ new dwellings per annum; these should be pursued in light of the summary of needs described in Footnote1\*.

- **Special Housing Area:** are problematical for infrastructure supply. SHAs are often rushed through without assessing congestion and capacity constraints. If WCC is able to fast track, it should do so with existing processes.
- **Inner city building conversions:** there seems no need for proactive WCC involvement. There is a strong market in Auckland for conversions, and if they are not happening here there may not be a market for them. WCC should just ensure their own regulatory requirements are not overstated, and its own development contributions and ratings policies are not out of balance.
- **Special Housing Vehicle (Urban Development Agency):** No value-add is apparent. What would it do precisely? The only additional power UDA legislation may have over and above what councils can already do is land acquisition for site assembly to increase the scale and viability of private development. This is a fraught area, and if Parliament legislates for any such powers, it can be considered then, not now.
- **Rental WOF and Te Whari Oki Oki:** support the continuation with trial for former, and collaboration for latter.

Other elements of Housing Strategy: little else is described in the separate strategy document relating to general affordability. It says reviews of district plan and of the 'Urban Growth Plan'. This is too weak. Much more needs to be done to enable or facilitate urban expansion and intensification where infrastructure supply exists and where it does not damage the values of existing properties.

In the case of intensifying **Karori** to increase housing supply, this is supported provided: three waters infrastructure is upgraded, transport corridors are upgraded as described elsewhere in this submission, and the need for quality intensification is pursued. In particular:

- While the WCC continues to allow raw sewerage to get into the Karori Stream and into Cook Strait from the pumping station on the coast, there is little prospect for further development in the suburb, which is a pity given its potential and proximity to the city.
- In relation to quality intensification, the following points are germane. They apply to RMA plans, rather than 10-year plans, but are nonetheless relevant to the Council's Housing Strategy for which comment is being sought:

- 1 Measurements of distance to the boundary need to be done honestly, which is at the widest point of a house. Currently the measurement is taken at the foundations, which does not allow for the addition of cladding, windows, eaves and guttering. The result is that dwellings are closer than is shown on the plan, and this is very visible at eye level and above.

- 2 The consent process is too simple and does not look at the effect of a new build on existing properties, particularly where infill dwellings are proposed. The privacy and sunshine of existing homes need to be protected, and plans need to show clearly how a proposed dwelling will fit in among neighbouring homes. It should be required that designs are adapted if they are intrusive and the rights of existing homeowners should be given priority.

In addition:-

Footnote 1: **SUSTAINABILITY IN COMMUNITY AND HOUSING.**

Creating communities planned to allow organic growth could result in vibrant, organic, eco friendly communities that are not only economically sustainable but also able to accommodate the different generations in a cycle of changing need. The use of eco materials in building and sustainable energy such as solar and heating alternatives is desired.

The LTP should include whanau sustainability in the community with a cycle of housing that could sustain our suburbs and communities needs regardless of age or income levels and provide enough homes for:

**Renters:** both young and old who will require either part or all their lives being housed in properties that they do not own. Kiwis, by birthright, are entitled to live in comfortable, healthy homes and the recent Housing NZ drive to build prefabricated, smaller homes highlights the ability to provide this in our country.

**Homeowners:**

*Smaller homes* - there is a cycle of home ownership that starts and ends with low maintenance 2 bedroom properties; apartments or units. They cater to the largest population of buyers as they are a group made up of first home buyers, solo parents, singles, couples, downsizers and retirees.

*Family homes* – growing families need room to move and usually want 2 bathrooms or at least 2 toilets with yard space and a second lounge or study area. Cars are a consideration regarding garaging and sports equipment storage and the ease of flow of shopping and amenities into the home.

*Investors* – when planning for retirement the great kiwi dream is barely realistic due to our current superannuation forecasting being unsustainable! Investors are mostly looking for either low maintenance properties returning a 7% yield or a larger multi bedroom property to bring in maximum income, usually by exploiting cash-strapped students needing accommodation close to universities.

*Retirees* – generally this group doesn't want to leave their community unless they have family out of the area or want to move to warmer climates. Most pensioners will remain in the family home far longer than they are practically or financially able to manage due to not wanting to move from the area but not having housing options locally unless they move to a retirement home. They then stay in the large family home, where they can no longer afford the maintenance either financially or physically and have inadequate heating and a poor lifestyle. Eventually a fall or other health issue result in them being hospitalised numerous times until finally they are forced into a home.

## Transport/ Ngā Waka Haere

*"A good transport system...should benefit people's overall quality of life, support economic productivity, help create healthy urban neighbourhoods that are people focussed, and reduce the city's carbon emission."*

It is **KA's** view that there is an over emphasis on spending on cycling networks. The majority of commuting residents are going to use public transport or cars. Whilst the Ngauranga to airport corridor is prioritised there seems to be little awareness that Wellington's suburbs feed traffic into the City every day. In Karori's case there are some 20,000 car journeys a day and approximately 30 school buses transporting children out of the suburb because, for one of the largest suburbs in New Zealand, there is no educational provision for secondary and tertiary students (with the exception of Marsden Collegiate). **KA** surveyed Karori residents and a statistically significant majority favoured the VUW College of Education site being used for a secondary school. (Survey conducted by member, Derek Neale)

We suggest the following needs to be done:-

1. Define standards and design guidelines "Transit Roads" (suggested reference "Transit Street Design", NACTO, USA 2012). Declare Karori Road and Chaytor Street to be Transit Roads, undertake investigations and planning to implement necessary changes within the period of the Ten Year Plan.
2. Undertake geological and engineering investigations for a second Karori Tunnel, considering options for (1) a road vehicle tunnel; (2) a smaller tunnel for pedestrians and cyclists only; and (3) a tunnel exclusively for public transport vehicles. This study should be completed with cost estimates and public consultation done before the preparation of the next Ten Year Plan in 2028.
3. Plan and implement cycle lanes in Karori to take as many bikes as possible off Karori Road, especially during peak travel times.
4. Plan for at least three substantial bus interchanges in Karori, approximately (1) near Karori Park (2) near the Town Centre, and (3) near the entrance to Karori Tunnel. These interchanges should provide a park-and-ride park, a kiss-and-ride lane, and secure under cover bike parks. Consideration should be given to working with GWRC to provide express (limited stop) buses to key hubs in the central city. **Implement at least one of these within the new Ten Year Plan.** As well, devise and implement a plan to reduce parking in narrow parts of Karori Road and implement bus lanes more extensively.
5. Work with GWRC to investigate the use of smartphone summoned shuttles to take bus passengers to and from the hilly parts of Karori that are some distance from Karori Road.
6. Plan and implement traffic lights to control traffic at the intersection of Glenmore Street and Kelburn Road to encourage more motorists to use Glenmore Street as the major access route to Karori Tunnel. The traffic lights to be phased with the Chaytor St/Birdwood lights. Redesign the Chaytor Street/Birdwood Street intersection to provide a free turn left into Birdwood Street (with Give-way sign only). Implement after public consultation.
7. Prepare a comprehensive plan for the reconfiguration of Appleton Park, incorporating a commuter car park (park and ride and kiss and ride), secure bike parking, a redesign of the Chaytor St/Raroa Road/Curtis Street intersection by widening it and providing waiting and merging lanes. Replant the Chaytor Street border to the remainder of Appleton Park to provide a suitable screen of native trees and shrubs. Complete public consultation and incorporate in Ten Year Plan if possible.

**Option 2:** p 29 Deliver Cycling Master Plan over 35 years **Support:** Existing budget levels

## Arts & Culture/ Ngā Toi me te Ahurea Submission

### LTP Preamble

*"Wellington is known as the cultural capital of New Zealand, reflecting the presence of national arts organisations and vibrant arts and events in the city. It is a city of unique cultural moments, experienced by residents and visitors alike. This did not happen by accident. It is the result of deliberate investment over recent years by the Council and other partners."*

An overarching philosophy: An approach would be to ask:

### **What is the desired outcome for the City and its residents at the end of the 10 year plan?**

**Answer:** *A vibrant, diverse cultural life which encourages participation and celebration with choice of events and performances of high quality which in turn enhance a reputation befitting a capital city.*

**Marketed as:** Cultural Capital ; Festival Capital; Arts Capital; using the nuances of the word 'capital' as head of government, but also- best, top, head, principal, investment, first, primary,

In a world of older, richer and long-established cultures with magnificent cultural institutions Wellington is very small fry, therefore the City has to establish a '**point-of-difference**'. Wellington is 'our' City and the Council's priority is to make it work for the ratepayers and residents. If this is successful it will become a beacon for visitors, who will come for the National Institutions (Te Papa, the Houses of Parliament etc) or for Festivals if their reputations are good. Our City has:-

### **Advantages:**

- Arts as an inherent part of a flourishing economy
- being the capital and housing the National Institutions, ie. mana
- having the topography of a natural amphitheatre; an excellent civic square; a compact, walkable city
- boasting the highest education level and per capita income
- home to three major tertiary institutions with strong Arts foci: VUW, Massey, Whitireia/Weltec
- some very good venues- or potentially good venues
- various benefactors and trusts which support the Arts

### **Disadvantages:**

- ❖ being earthquake prone
- ❖ various unsuitable, poor quality or redundant venues. Second rate management of those venues
- ❖ weather which can't be relied on
- ❖ a relatively small population (despite projected growth) **200,000** and 4 cities population, **400,000**
- ❖ high cost of living; severe traffic congestion; high house prices and expensive commodities

The new Plan takes a "build venues and the people will come" approach which puts the cart before the horse. How many Councillors remember the fiasco which was the 1990 Sesqui-centennial?! Millions of \$\$\$ of the City's money down the drain, the failure- a laughing-stock and several small businesses going-to-the-wall.

Rather, think to centralise Arts development and create a hub based around-and in- Civic Square which encapsulates the present: Library, Art Gallery, Capital E, Town Hall, MFC\*, City-to-Sea Bridge, Wharewaka, Te Papa Forecourt and the Waterfront (Frank Kitts Park). Note:- Circa Theatre while not part of Venues Wellington may be incorporated into a precinct based on creating a working arrangement with the Theatre Trust. Further along the Waterfront is the Wellington Museum, the NZ Academy of Fine Arts and the NZ Portrait Gallery. The TSB\*\* arena is located between them as well.

Elsewhere are BATS Theatre, Taki Rua, Toi Whakaari and the National School of Dance

As part of a cultural hub:-

**\*MFC:** repurpose and develop by building an extension on the adjoining car park and incorporating and redesigning the Renouf Foyer: rethink the entry and remove and re-site the present ticket office, add parking underground; a very good facility for loading/ unloading equipment and, as well as the present concert hall, add a varied suite of rooms suitable for: chamber music (300 seats); a lecture theatre, break-out rooms (for hire) convention facilities for discrete conventions and all interlinked by walkways, foyers and passages giving public access with cafes suitable for pre/post theatre tapas, and well as attracting patrons during the day. Part or all leased-out to best-practice operators with excellent performance standards measures incorporated into contracts. This would be premised on:

- Employing architects with specialist skills in planning venues and town centres
- A vast improvement in the management of the City's venues and facilities (or leasing as above).
- An audit of all the venues available in the wider City to be undertaken or brought up to date.  
eg. There used to be a very good 'little theatre' at VUW- is it still used and available? The new home of Whitireia/Weltec has a theatre, a cinema and other facilities. Some colleges have good halls and Scots College has a purpose-built film/recording studio. Are these available for public hire?
- And likewise, a sizeable improvement in the quality of food, and the service levels of food and beverage facilities- or even better leasing provision to a variety of businesses with watertight contracts as above.
- Creating and strengthening working partnerships with organisations such as: VUW, Massey, Circa Theatre, Ngāti Poneke, Te Papa, the City cinemas (where appropriate) NZAFA, Leading Colleges, Government departments where appropriate and many more.

*LTP Response*

Code: page nos & options refer to the Consultation Document *Our 10 Year Plan*; Tō mātou mahere ngahuru tau

**Option 1:** p 42 "Additional Support for the Arts"

**Support:** Strengthen Cultural Facilities

**In Plan** p42 St James; \*Town Hall; Wellington Museum; other venues \$117.7mil cost/investment.

\*Town Hall: doubt exists about the economic value of investment in the Town Hall. If \$90mil is invested in this asset then it would need to bring in annual net revenues of at least 1/15th of the \$90mil outlay; ie. \$6mil p.a. Preferable would be, a further \$3mil net revenue to save in advance for its next major renewal. If this cannot be achieved then alternative uses should be considered- eg. as part of a convention centre. As part of an integrated civic/cultural hub with good tenants and these conditions perhaps the \$90mil of ratepayers money can be justified.

**Support:** p42 Investment of \$16mil over 10 years (\$1.6mil p.a.) for a co-ordinated programme of events, activities, theatre and public art to position the city as a global cultural destination.

**In Plan** Develop a Matariki Festival (mid-winter)

**In Plan** Te Whare Héra: international artist residency programme: partner, Massey University School of Art

**Develop** Create a summer performing arts festival to make best use of Wellington's popular waterfront, eg. Summer Shakespeare: partners Victoria University and Circa Theatre

**In Plan** p43 Investment in cultural attractions: Movie Museum and Convention Centre (see below)

## Sustainable Growth/ Te Kauneke Tauwhiro Submission

*Sustainable Growth* and *Arts & Culture* are inherently linked. In Wellington, the Arts is a very significant part of the economy. The Council is contemplating a big investment in this sector over the life of this LTP.

The city should be focused on supporting existing businesses and bringing in new businesses that export goods and services out of the region and bring money into the region. The publication "The Flow of Money" is useful background on this point <http://phillipsecd.com/EDED/FLOWOFMONEY.pdf>. These firms are 'contributors', and remaining firms such as shops are 'consumers' of these revenues. These contributor firms should be targeted towards high-value goods and services, rather than tourism which is a low value add industry. There should be a more supportive environment for such firms, such as competitive rates upon them and plenty of sites for them to locate on. Other central issues for such firms are transport connectivity and housing costs, because the latter also increases wages they must pay to attract and retain labour markets. Investing in those areas is far more important than expensive and risky luxury projects.

### Arenas

How many arenas does Wellington need? Are the present venues used to capacity? By building yet more arenas will the effect be to distribute the audiences more widely and thus make each one uneconomic? Especially when they're not well managed.

They should be financed as per above using a project revenue bond, not a ratepayer backed general obligation bond. The covered arena project is unlikely to be viable given Wellington's small population base, competitive market for major music events, and inability to sustain a revenue stream sufficient to cover costs.

### The TSB Arena\*\*:

Unfortunately this has not been fit for purpose or flexible for varied use since the day it opened: the acoustics, sight-lines, seating, access and foyers are poor! Rather than building yet another arena; strip this one out and re-design and re-fit for multi-purpose use. And as above use an architect who knows what she/he is doing. It is currently used to house *World of Wearable Art*, when it does, the seats are cramped and uncomfortable, the tiers are precipitate without handrails- they must surely be unsafe!

### The Westpac Stadium (aka the Cake Tin)

As an alternative to the above, perhaps the Cake Tin could be adapted to allow more flexible use (with fittings which could be installed for rock concerts), covered or covered in part.

**Support:** Option 1

**In Plan** p34 Strategic Planning; Comprehensive District Plan Review, Streamlined Consenting

### Key Projects

**Support:** Option 2 **Reject** ratepayer support of movie museum/convention centre

**In Plan** p 35 Movie Museum and Convention Centre- **Not develop** This proposal is fraught with risks; on the conventions side the City would be in a bidding war with more attractive large-convention alternatives (Auckland for scale and Queenstown for scenic values), Wellington would be better to attract discrete conventions as part of a 'compact city' or high-tech model.

As for the Movie Museum. A museum traditionally, as a repository of artefacts, costs money to maintain. As an attraction with a high entry price then there is danger in the 'Sesqui' effect, ie. pricing locals off the market and probably not sustainable on tourist income (this happened with Zealandia). It may also be competing against Te Papa which generally being free to enter will win hands-down. **KA** suggests that market testing is done. We would not want to see the Council end up with a, all be it glamorous, white-elephant, which would need to be sold at a later date. Think:- **'point-of-difference'**

**In Plan** p 38 Airport runway extension- **Not develop**. This proposal is just barking mad. Wellington sits in the 'roaring 40s' and is earthquake prone. Why on earth would even the most megalomaniac of engineers think that pushing fill into Cook Strait is a good idea? Having experienced the Wahine storm and seen what more recent storms can do to Island and Lyall Bays this scheme should not be thrust on to ratepayers.

It is very important that for such a major proposal any development follows financing disciplines with minimal, if any, ratepayer support. [Stretching runway numbers; Review of cost benefit analysis of proposed Wellington Airport runway extension](#)

**Support:** Option 1

**In Plan** p 37 Key sustainable growth projects- Kiwi Point Quarry; Conservation attractions-Wellington Zoo **Develop**. Ongoing success projects which have demonstrated their worth. [Construction Industry Study](#)

**KA** supports ratepayer ownership of the new quarry as a monopolistic supply situation should not be allowed to develop. (Rock is a vital resource for road foundations, drainage works, asphalt, concrete, and as a drainage medium. A rise in the cost of rock products would hit ratepayers hard.)

Wellington Zoo is a very long-standing feature of the City and plays an important role in the protection and maintenance of species.

In addition

#### **Additional Karori Amenities**

- ❖ Improve Ben Burn Park by providing more seating and shelter, a low fence along Campbell Street to block balls from hitting parked cars (within reason), replanting the tired and ugly trees and shrubs, improving the children's playground, and placing a water fountain at the north end.
- ❖ Advocate energetically for the provision of more room in our state primary schools, and a state secondary school in Karori.
- ❖ Advocate energetically with Ryman to encourage the development of a new (or relocated) health centre in those parts of the campus site which are to be repurposed.

## **Financial Strategy Submission**

### **Funding Implications**

**Any capital project**, including the runway and museum/convention centre concepts, extending even to waters and transport projects, should on first attempt be made to progress without general ratepayer support as follows:

- **Fund by project revenues:** Rely on user charges and long-term targeted rates from willing beneficiaries. Only approach general ratepayers with specific and modest co-funding propositions on a limited liability basis.
- **Revenue bonds:** pledge (and charge) only the revenues to specific project bonds, called 'revenue bonds'. Make clear bond holders have no recourse to general revenues or assets of the council, especially not its rates. Ensure no moral responsibility by the Council to bond holders.
- **Construction risk:** Designers and builders take the construction, consent, commissioning risks with a fixed price contract. Strike the rates and issue bonds only on successful execution of the project as per pre-agreed conditions, and use bond proceeds to reimburse private builders of the projects.

- **Project selection:** This approach imbeds better project selection tests; the acid test becomes whether initial private investors are willing to invest at a reasonable price, and whether long-term investors are willing to buy all the revenue bonds at a reasonable cost of interest, which it's expected they all will not unless the project is strong.
- **Support the sponsor:** Champions of any such project need a clear channel to progress such initiatives, and a possible ability to create a special purpose entity (SPE) relevant to the project if needs be, especially if targeted rates and council issued revenue bonds are required. Make this function accessible to all.

General ratepayer borrowing ('general obligation bonds' secured by 'full faith and credit' of the Council) should only apply to projects that cannot proceed as per the above. If they cannot proceed because their benefits are less than costs, then the council should not enable them, and if they do, then the Council's ability to rate and borrow should be severely restricted as a consequence.

In Plan p 54-5

- **Renewals should be savings financed:** should be funded from the savings set aside deemed their 'accounting depreciation', based on the economic principle of 'consumption smoothing'. These savings will be less than the borrowings for new growth infrastructure, but they will serve to reduce net debt. Renewals should not ultimately be debt financed and paid back by depreciation, as is described on page 55 and repeated below:
  - *"If the capital expenditure relates to the replacement (renewal) of an existing asset, that expenditure will be initially funded by borrowings. These borrowings will be repaid by rating for depreciation over the life of the asset. Any surplus rate funded depreciation, after paying for the replacement of Council assets, will be used to repay borrowings."*
  -
- **The imposition of the "charge over rates":**
  - The council should clearly explain in plain language to ratepayers their use, pros and cons of the "charge over rates", empowered by section 115 of the Local Government Act 2002, which councils willingly choose to use or not use. Essentially, they are borrowing and giving lenders the right in the event of debt default to step in and become a tax authority themselves and take everyone's property if needs be. This is an extreme imposition on property owners. We have been advised by experts (partners of Big-4 accountancies) that no other country allows local governments to provide so little protections and safeguards to property owners in their own jurisdictions. In practice this means default will never occur because taxes will always be raised and enforced; Kaipara's failed water scheme is a case in point. The reason for it is to minimise the cost of borrowing, but at what price? In principle this should enforce keeping general public debts low. Any discussion of increasing debt should be had in the full knowledge of the risks imposed. If this then proves not agreeable by ratepayers, then councils should borrow without using the "charge over rates" power.
  - Likewise, the council should make clear to ratepayers in plain language that most other councils are borrowing in a club with security against WCC's charge over Wellington ratepayers' property, care of the Local Government Funding Agency. Informed ratepayers would likely insist that WCC argue to keep debt low by all other councils.
- **Encumbering future councils:** Increasing general borrowings encumbers future councils, reducing their democratic freedoms. The prudence of previous councils to keep debt low is now being used to build a series of very costly and high-risk projects. This is an appropriation from past and future councils.

**KA's** submission has been contributed to and written by: Lesleigh Salinger (Chair), Chris Parker (Treasurer), Leith Wallace (Secretary), Bill Guest (Infrastructure spokesperson), Heather Sinclair (Environment Spokesperson), Andrea Skews and Derek Neale.

# Submission #: 1520

10 May 2021

## Submission by Ōwhiro Catchment Collective on Wellington City Council (WCC) Draft Long-Term Plan (LTP)

---

1. The Ōwhiro Catchment Collective (**OCC**) is a vehicle for coordinating the actions of and advocacy by a group of community organisations which focus on issues relevant to the catchment of the Ōwhiro Stream:
  - 1.1 Ōwhiro Bay Residents Association
  - 1.2 Stream Team
  - 1.3 Southern Environmental Association
  - 1.4 Friends of Ōwhiro Stream (**FOOS**)
  - 1.5 Friends of Taputeranga Marine Reserve
  - 1.6 Taranaki Whānui ki Te Upoko o Te Ika.
2. The purpose of this submission is to highlight matters of common concern to the members of the OCC. Individual members may make their own submissions providing more detail and/or addressing different matters.
3. OCC would also like the opportunity to speak to its submission.

### Background

4. OCC is a coalition of community groups who are connected to the Ōwhiro catchment and share a vision of a thriving ecological corridor from the border with Zealandia to Taputeranga Marine Reserve in the south. This includes improving the water quality of the Ōwhiro Stream and its tributaries and improving habitat and native biodiversity of the catchment.
5. OCC's member groups are active in the catchment restoring habitat, planting, controlling weeds and trapping predators. Organisations such as FOOS have a long history of advocacy for the catchment. Despite a huge investment of volunteer hours and effort, the catchment continues to face many challenges. These include the landfills located within the catchment and the ongoing issues with wastewater infrastructure and stream contamination. Many of the decisions in the LTP have significant implications for the health of our catchment.
6. OCC promotes a catchment-wide approach to addressing the environmental issues in the Ōwhiro catchment which recognises its values and unique place in Wellington's geography. OCC supports the establishment of the Ōwhiro Pilot — a multi-party working group consisting of WCC, Greater Wellington Regional Council, Wellington Water Ltd, the Department of Conservation, Regional Public Health and Ōwhiro catchment community members working together on common issues. We would like this to grow and extend to the development and adoption of an integrated catchment management plan to monitor and improve the water quality of Ōwhiro Stream in partnership with community groups and mana whenua.

### Community outcomes

7. WCC's proposed community outcomes include:
  - 7.1 *“Environmental — A sustainable, climate friendly eco capital — A city where the natural environment is being preserved, biodiversity improved, natural resources are used sustainably, and the city is mitigating and adapting to climate change — for now and future generations.”*

The Ōwhiro catchment is an important part of Wellington's environment. It contains one of the few remaining wild daylighted streams in our urban environment. It adjoins and provides a corridor between Zealandia and the Taputeranga Marine Reserve. Water from the Ōwhiro Stream discharges into the Marine Reserve.

- 7.2 “*Social — A people friendly, compact, safe and accessible capital city — An inclusive, liveable, and resilient city where people and communities can learn, are connected, well housed, safe and healthy.*”

The Ōwhiro catchment provides a home for many households and includes four schools and several early learning centres. The Taputeranga Marine Reserve is a destination for diving, swimming and enjoying the beach. The Ōwhiro Stream runs alongside Ōwhiro Bay School. Zealandia and the south coast are also valuable local and tourist destinations that showcase Wellington’s environment.

8. Achieving these community outcomes will require investment in improving water quality and mitigating the impacts of the Ōwhiro catchment landfills so that the Ōwhiro Stream and the marine environment at Ōwhiro Bay are safe for the community to interact with and use.

### Key issues of concern

9. Key concerns for OCC are:

9.1 **Improving the management and treatment of sewage sludge to reduce the volume buried at the WCC Southern Landfill:**

- (a) This is essential to reduce carbon emissions from the landfill and enable waste minimisation.

9.2 **Developing a strategic plan for the future of the WCC Southern Landfill:**

- (a) We do not believe the landfill should be extended indefinitely. Doing so will impact the liveability of the Ōwhiro catchment; destroy the natural values of those parts of the Ōwhiro catchment converted to landfill; and lock-in environmental risk to the water quality of the Ōwhiro Stream and Taputeranga Marine Reserve, particularly in the event of a major earthquake.

- (b) A strategic plan (which includes improving the management of sewage sludge) must be developed and agreed upon with the community **before** consent is sought to expand the landfill.

9.3 **Improving the management of rubbish entering the environment from the Ōwhiro catchment landfills and from vehicles travelling to those landfills.**

9.4 **Improving the management of the T&T Landfill and addressing its impact on Ōwhiro Stream water-quality.**

9.5 **Adopting measurable targets for improving the water quality of Ōwhiro Stream.**

9.6 **Repairing or renewing wastewater infrastructure to address its impact on Ōwhiro Stream water quality.**

### Submissions on the proposed ‘big decisions’

#### Spending more money on fixing the water pipes

10. OCC supports investing more on Wellington’s three waters infrastructure. The level of detail in the LTP consultation document makes providing feedback on the three options (different levels of capital expenditure) difficult. OCC’s key submission on Decision 1 is that the LTP should distinguish between:
- 10.1 investment in new assets (such as reservoirs) and renewals (such as the programmed replacement of pipes); as opposed to
- 10.2 investment to identify and fix existing problems that are already impacting the water quality of urban waterways such as Ōwhiro Stream.
11. Recommendation 19 of the *Mayoral Taskforce on the Three Waters Report* is:

*Task and fund WWL to develop a road-map for consideration in the 2024/34 LTP that would see WWL (or a future entity) funded to achieve compliance with the National Policy Statement — Freshwater Management by 2040.*

12. OCC does not agree that work towards achieving compliance with the National Policy Statement — Freshwater Management should wait until after 2024. That is not good enough. WCC knows its wastewater infrastructure is a cause of reduced water quality. It is not acceptable for WCC to plan for the possibility of water quality continuing to degrade over the next three years.
13. OCC's view is that the LTP should provide for funding to identify and fix existing problems that are already impacting the water quality of urban waterways such as Ōwhiro Stream separately from the capital expenditure provided for by Decision 1.
14. OCC also seeks that WCC:
  - 14.1 fund the Ōwhiro Pilot so that it can achieve its objective of being a prototype for successful citywide multiparty processes to restore three waters networks to a sound state that no longer degrade waterways; and
  - 14.2 formally adopt a time-bound and measurable target for improving water quality in the Ōwhiro Stream.

#### Ownership of wastewater laterals

15. OCC agrees with the Decision 2 preferred option. The model of relying on private owners to care for and renew wastewater laterals has failed. The problem of laterals impacting water quality requires community ownership.

#### Reducing sewage sludge and waste

16. OCC supports the Decision 7 preferred option with some caveats. It is essential that Wellington's wastewater treatment infrastructure be improved so as to reduce the volume of sewage sludge that cannot be discharged into the Cook Strait. The current way wastewater is managed requires large volumes of sludge to be pumped to the Southern Landfill and buried. This is vulnerable to earthquake damage; results in carbon emissions; and requires even larger volumes of solid waste to be mixed with the sludge before it is buried — which in turn precludes waste minimisation.
17. The caveats include:
  - 17.1 OCC is worried about what happens if the Infrastructure Funding and Financing Act 2020 cannot be used. Waiting another three years to fund improvements at Moa Point is not acceptable. WCC should commit to achieving funding certainty within 12 months and revisiting its LTP if funding cannot be sourced via the Act.
  - 17.2 OCC is worried about when construction will begin. The LTP consultation document suggests a levy will not need to be collected until year 4. It is not clear when significant capital expenditure on Moa Point improvements will commence. This contrasts with WCC's proposed capital budget for 'Stage 4' of the Southern Landfill, which includes 1,310,000 at year 1; 4,896,000 at year 2; and 7,397,000 at year 3. OCC is strongly opposed to WCC seeking consent for 'Stage 4' of the landfill until a strategic plan for the landfill (which includes improving the management of sewage sludge) has been developed and agreed upon with the community.
18. OCC will not accept a forever operational and forever expanding WCC landfill in the Ōwhiro catchment.

#### **Other issues**

19. The LTP consultation document states that one of WCC's 'priority objectives' is "*Strong partnerships with mana whenua — upholding Te Tiriti o Waitangi, weaving Te Reo Māori and Te Ao Māori into the social, environmental and economic development of our city and, restore the city's connection with Papatūānuku (nature)*", however there is little about how this will be achieved. OCC believes

environmental science must be paired with Mātauranga Māori and that the key concerns at [9] above are consistent with Te Ao Māori.

## Submission #: 1521

This submission is made to Wellington City Council (WCC) on behalf of the Wellington Branch of the Royal Forest and Bird Protection Society New Zealand Incorporated.

Forest & Bird is New Zealand's leading independent conservation organisation, which has since 1923 played an important role in preserving New Zealand's environment and native species. We appreciate the opportunity to contribute to the Long Term Plan 2021 – 2031 (LTP) and speak for nature.

Science is telling us that what we do in the next ten years will have significant implications for future generations and the viability of the city as a place to live and work. We have therefore focused our attention on the issues that have a direct impact on how the city responds to the climate change emergency.

On the current trajectory we are approaching a climate tipping point around 2030 when it could be too late for humanity to have any chance of 'managing' the climate and the consequences that follow for life on earth. At the current rate of CO<sub>2</sub> reduction, scientists are warning that global temperature rise will exceed a 2°C increase above pre-industrial levels. This is well above the 1.5°C target for the end of this century — regarded as the gateway to “dangerous” warming.

Ice melt from Antarctica and Greenland is poised to accelerate the rate of sea level rise—signalled by recent studies that suggest that this is occurring faster than originally thought. This implies that the sea level will exceed a 1m increase sooner than predicted and quite possibly within 80 yrs. As more data becomes available and analysis tools improve, the prognosis for sea level rise is looking less favourable for coastal communities than earlier estimates predicted — increased rate of change and higher mean sea level.

This leads us to the view that this Long Term Plan (LTP) will be the most important that Council will produce in a long time. It will set the direction for the critical period between now and 2030 to avoid the worst case scenario of sea level rise. We are encouraged that the LTP shows that Council is taking the climate emergency seriously. We support bold steps that must be taken (funded) in the early years to significantly reduce greenhouse gas (CO<sub>2</sub>, CH<sub>4</sub>) emissions and also increase carbon sequestration. In our view the Council should aim to exceed targets of GHG emissions by engaging with the community and encourage participation appropriate to an emergency situation.

A Global Methane Assessment undertaken for the UN Environment Programme (Unep) has concluded that in the short term (30yrs), reducing methane (CH<sub>4</sub>) release into the atmosphere is the most effective way to combat “climate change... happening faster than expected”. The Unep report states that the main sources of human-related methane are the fossil fuel industry (34%), agriculture (40%) and the waste sector (20%).

The analysis undertaken by Aecom of Wellington's GHG emission profile shows transport as the major contributor (53%) and stationary energy (34%) however the measurement is in CO<sub>2</sub>e and the time effect of each GHG is not accounted for. Solid waste accounts for 6% of the total, however it is methane, a short lived gas that has considerably more warming effect in the initial years than the equivalent weight of CO<sub>2</sub>. It is for this reason and the fact that landfill methane accounts for 80% of Council's GHG emission [page 45] we consider that sludge and waste minimisation should be elevated in importance; equivalent to that of the two big contributors mentioned above. This would align Wellington's strategy with the Unep recommendation.

Sewage solid waste; recycling and reuse are entirely within Council control and have beneficial environmental outcomes beyond landfill and GHG emission reduction. We agree and support options 3 or 4 under decision 7 and do not have an opinion on the funding model.

The mayor in the LTP forward [page 7] explains that the sludge treatment under decision 7 is essential to “... *reducing the scale of the impending landfill extension...*”! Yes, we agree but it is not a solution to the waste of material that could be recycled / repurposed that is going to landfill including construction and demolition ‘waste’. The world has moved on from landfill; a mature industry now creates and uses technology to recycle practically all the material that currently ends up in a Wellington landfill including construction material.

The city has a recycling culture within the community but Council is failing to deliver a meaningful recycling facility. The treatment of recyclable material is just as broken as the waste water pipes, it is time think sustainably and treat recycling as a top infrastructure priority. Further delays merely create bigger problems for the future, now is the time to build back better using the funding model proposed for decision 7 option 4.

Council has limited ability to influence and reduce transport emissions outside of its own vehicle fleet. There is no certainty that cycleways will reduced car use in sufficiently large numbers to make a meaningful difference to GHG emissions. For this to happen it will require the existence of an accessible and reliable public transport network and an increase in remote working. The uptake of affordable electric vehicles is the other factor. In principle we support cycling and walking as climate friendly however if there is to be a limit on funding in the short term we would put landfill and sludge minimisation (Decision 7) ahead of cycleways (Decision 3).

Earthquake and tsunami can be damaging events and are not welcome however they are short lived but sea level rise is continuous and when combined with severe storm surges has the potential to devastate communities, possibly indefinitely.

Experience has shown that a sea wall cannot hold back wave action indefinitely. With climate change there will be more frequent ‘100 yr events’ and more powerful than in the past. Wellington’s coastal communities, like others around the globe, will have serious sea incursion and flooding sooner than earlier predictions and make them less attractive as a place to live.

Wellington needs a planned retreat strategy for communities living and working in suburbs vulnerable to the impact of sea level rise and/or persistent flooding, as part of its climate emergency response

The condition of the three waters pipework is a disgrace and a poor reflection on Council management by admitting [page 22] “... *the condition of our network and what we need to invest in has for many years been largely out of sight, out of mind...*” As an essential service and in the context of the climate emergency it must be given funding priority. The repair and renewal of existing infrastructure being more urgent than undeveloped sites e.g. Stebbings Valley.

Climate change weather patterns will continue to create the paradox of too much and not enough water, a problem that Water Sensitive Urban Design (WSUD) has solved. It is the solution we would expect contractors to use in order to reduce flooding events and stream damage; improve ground water retention and keep streams clean and healthy.

The LTP provides a credible proposal to address the climate and ecological *emergency* it declared in 2019 under the banner *Te Atakura – First to Zero*. There is however an aspect of the emergency that deserves greater attention and recognition of its importance—habitat and its biodiversity restoration.

The indiscriminate destruction of natural habitat across the globe in no small measure has brought us to this point—mankind now in danger of losing its habitat! A point pertinent to Wellington.

We would like to see in the LTP the importance of habitat restoration not only to redress biodiversity loss but also its importance for sequestering carbon. There needs to be far more funding and resources allocated to restoring the wetlands and forests than signalled under the heading Environment [page 56]. We consider the Council's "... *business as usual practice*..." to be completely inadequate.

The LTP needs to recognise the value of a restored forest along the length of the Outer Green Belt in the context of a climate emergency (which will continue for generations) and should be appropriately funded and resourced. Principally

- an increase in the level of invasive pest plant control, particularly clearance of species that seriously inhibit natural regrowth.
- pest animal control.
- increased number of native plants grown and distributed to restoration groups across Wellington

The native habitat and indigenous biodiversity are our most valuable asset providing both carbon capture and economic benefit.

**Re: Tō mātou mahere ngahuru tau - Wellington City Council's Long Term Plan Consultation  
2021-2031**

10 May 2021

Tēnā koe,

Wellington Regional Healthy Housing Group (WRHHG) welcomes the opportunity to provide a written submission on the Wellington City Council's Long Term Plan.

Wellington Regional Healthy Housing Group (WRHHG) is a cross-sectoral group working toward the vision: *"Everyone in the Wellington region lives in warm, dry and safe housing by 2025."* WRHHG highly value the leading role that Wellington City Council continues to play through its representatives on the WRHHG Working and Steering Groups.

Alongside Wellington City Council, over 50 organisations are represented on WRHHG Steering Group,<sup>1</sup> including central government departments, other local councils, district health boards and Regional Public Health, industry bodies, as well as research, social outreach, health and community organisations. We operate a collective impact model and commit to upholding Te Tiriti o Waitangi principles and articles.

New Zealand's housing stock is of a very low standard compared to other developed countries. Poor quality housing contributes to carbon emissions through high operational energy use and has huge costs for whānau and taxpayers in health and education and broader intergenerational wellbeing outcomes.

Poor housing and its negative impacts disproportionately affect Māori and Pasifika people, people on low incomes, people living with disability and single-parent households.

**WRHHG commend Wellington City Council for recognising the central role of housing for a thriving community**, articulated in the LTP Priority Objectives #2 and #5 that highlight the importance of "affordable, resilient and safe housing", and "development of low-carbon... buildings". We recognise that Wellington City Council has an existing role in providing social housing and has committed to investment to upgrade this to meet the Healthy Homes Standards. We commend Wellington City Council's demonstrated commitment to supporting improved energy efficiency and householder health outcomes through the Home Energy Saver programme and insulation and heating subsidy programmes.

---

<sup>1</sup> For details, see <https://www.wrhhg.org.nz/members-list/>

<sup>2</sup> BRANZ House Condition Survey 2015

<sup>3</sup> Dowdell, D, 2020. Build 176: <https://www.buildmagazine.org.nz/articles/show/cutting-carbon-is-a-material-issue>

We call for the Council to build on this foundation through additional measures to support homeowners to improve housing health and energy efficiency and incentivise private sector development of high performance and affordable housing.

Wellington City Council's Te Atakura Strategy commits the Council to a significant reduction of carbon emissions by 2030. Ensuring new house builds meet low carbon goals is an important step, however existing housing stock performs poorly<sup>2</sup> and if not upgraded will contribute to significant carbon emissions in the next decades.<sup>3,4</sup> It is estimated that, nationally, improving the energy efficiency of NZ homes can create \$60million worth of carbon savings, contributing to the realisation of the 2050 zero carbon target.<sup>5</sup> WCC support for improved energy efficiency of existing homes can contribute to this.

A warm, dry home is the foundation of health and wellbeing throughout life<sup>6</sup>. Poorly performing homes – those that are un- or badly insulated, draughty, damp – are difficult and expensive to keep warm and healthy. Damp, cold and unhealthy homes and household crowding are significant risk factors for respiratory illnesses such as asthma, skin infections and acute rheumatic fever. This in turn impacts on school and employment outcomes, and on financial and mental health. In 2019, 1,539 New Zealand children aged 0-14 years were admitted to hospital with a preventable, housing related, illness. Māori children were 3 times as likely and Pasifika children 3.7 times as likely to be hospitalised as children of all other ethnicities.<sup>7</sup>

**COVID-19** has further highlighted the dangers of unhealthy homes and particular vulnerability of those on low incomes, younger and older people, single-parent households and Māori and Pasifika people.<sup>8</sup>

On the other hand **we know improving house performance works**. Research has shown that investment in improving housing through retrofitting insulation provides a benefit: cost ratio of more than 5:1 including healthcare savings, carbon emissions reduction.<sup>9,10</sup> Research commissioned by EECA found retrofitting reduced days off school by an estimated 23% and days off work by 39%.<sup>11</sup>

We note also that incentivising and resourcing improvements in existing housing stock can contribute to employment creation in the region. Sustainability Trust calculations estimated that new insulation and heating retrofit of 10,000 homes would result in 75-100 new direct jobs and up to 30 indirect jobs.

In summary, raising the quality of housing contributes to the following outcomes:

- i) Improved **affordability of housing costs** (as ongoing maintenance as well as operational energy costs will be reduced)
- ii) **Reduction of carbon emissions** related to household energy use
- iii) Improved **physical and mental health** outcomes
- iv) Positive impact on **employment and school attendance** outcomes

- v) An opportunity to **address inequities in housing** that see Māori and Pasifika people disproportionately impacted by unhealthy housing

**Recommended ACTION to include in WCC LTP**

Action to ensure affordable, healthy and climate-friendly new housing supply

We urge Wellington City Council to consider all options to incentivise the increase of **affordable** and **healthy** housing supply. We recommend that this include:

- review of district plan provisions
- review of development contributions policy (eg. decreased contribution for high performing and/or affordable or social housing, slightly increased contribution for developments that don't meet this criteria in order to offset)

Action to make existing housing affordable, healthy and climate-friendly

- expand the Home Energy Saver programme delivered in partnership with Sustainability Trust to reach 25% of Wellington households with advice on behaviours and interventions to improve household energy efficiency, create a healthy home, reduce costs, and lower carbon emissions
- continue to invest in programmes to support vulnerable households in energy hardship through allocation of a flexible fund of \$100,000/year. This might include supporting energy bills, additional subsidies for insulation, heating, ventilation etc, smaller interventions, education, and assistance with accessing low-carbon transport. Noting that the majority of vulnerable households are renters, we recommend it also target solutions that work for tenants, such as support for negotiation with landlords on energy efficiency interventions and programmes to alert landlords to their obligations.
- include performance standard certifications such as HomeFit, Homestar, Passive House on LIMs
- establish a Voluntary Targeted Rate (VTR), with a low or zero interest rate that ratepayers can access to make improvements to their homes that increase energy efficiency and performance. Such a VTR would enhance the existing Wellington Regional Council programme and could be used in combination with central government support such as the Warmer Kiwi Homes subsidies for insulation and heating, or as stand-alone financing.

WRHHG would like to appear before the WCC LTP Hearings Committee to speak to our submission and answer questions. We are also happy to provide further information in writing upon request.

**Submission #: 1523**

Submission to the:  
**WELLINGTON CITY COUNCIL**

on the:  
**WELLINGTON CITY COUNCIL'S DRAFT LONG-TERM PLAN 2021-2031**

Submission from:  
**TENNIS CENTRAL REGION (INC.)**

This submission is representing the 7,000+ members and casual participants of Tennis Central Region Inc., including the 3,000+ that reside in Wellington City.

Date:  
**10 May 2021**

Representatives of Tennis Central Region (Inc.) wish to discuss the main points in this written submission at a hearing.

Address for contact:  
Tim Shannahan  
Chief Executive Officer  
Tennis Central Region Inc.

## Introduction

Tennis Central Region (Inc.) is one of six regional tennis organisations recognised by Tennis New Zealand as responsible for the delivery of grass-roots tennis. Created in 2007, Tennis Central Region services the lower part of the North Island, specifically Taranaki, Manawatu, Wanganui, Wairarapa, Kapiti Mana, Hutt Valley and Wellington.

Tennis Central has four key focus areas, which are:

- Participation and development – successfully supporting clubs to grow the game; and guiding players and coaches through the participation pathway.
- Performance – successfully deliver a range of events and tournaments for performance-focused participants; and support performance achievement.
- Organisational excellence – continuous improvement in our organisational performance.
- Sustainability – operating a sustainable business underpinned by secure revenues and prudent reserves.

Access to suitable tennis facilities is critical to these focus areas. Wellington City Council has been a key partner in current upgrades to the Wellington Renouf Tennis Centre, which is the regional hub for the sport in the Central region.

## Council Funding of Sport & Recreation

This submission simply wishes to draw attention to the relevance of sport and recreation as a key component in ensuring Wellington is a thriving city. Residents expect Wellington to provide opportunities for a healthy lifestyle. While some of those opportunities are delivered directly by Council through provision of sporting facilities that enable gym membership or pool access, the vast majority of opportunities are delivered by not-for-profit organisations championing a specific passion for the enjoyment of many. These organisations are key to making Wellington a great place to live and it is essential that Council has capacity to support these organisations.

This submission is specific to ensuring that Council continues to invest in sport and recreation. It is hoped that the final Long-Term Plan will recognise the value of sport and recreation by ensuring that funding for sport and recreation, in all the ways Council currently supports sport and recreation, does not diminish.

Budget provision for the future development of sport and recreation facilities; maintenance of existing facilities; provision of sports grounds and maintaining these to the specifications of user sports; and support for hosting of national and international tournaments are key areas in which Council currently supports sport and recreation. It is essential that this continues.

The sport of tennis has directly benefitted in recent years from Council funding through the Sportville Partnership Fund (supporting Wellington Tennis Inc. with upgrades to the Wellington Renouf Tennis Centre) and the Sport Event Partnership Fund (supporting Tennis New Zealand to bring the Fed Cup women's international teams event to Wellington in February 2020). From a Tennis Central Region perspective, as an indirect beneficiary of Council's funding of these other tennis entities, both of these funded activities enhance the capacity to deliver tennis locally and attract people to the sport.

The proposed upgrade of the netball / tennis courts at Hataitai Park, as included in the Long-Term Plan for the 2021-2022 financial year, is another example of Council funding an initiative that supports the opportunity for Wellington residents to engage in sport. It is appropriate for Council to commit to projects such as this that will enhance what is available to local residents.

Council's own 'Recreation Strategy (2003)' identifies the reasons why Council sees value in investing in sport and recreation:

*"... Council considers recreation to be a core activity that significantly contributes to the well-being of the city's residents. For most of these activities the public good component is funded directly by Council although there is provision in the Council's funding policies to recover charges from users where appropriate."*

Council is encouraged to stay true to that commitment by continuing to invest in sport and recreation. By continuing to develop facilities and maintain those facilities; by continuing to provide and maintain fields and courts; by continuing to provide funding for worthy projects by retaining the Sportville Partnership Fund and Sport Event Partnership Fund.

### Conclusion

Tennis Central applauds the Wellington City Council for its commitment to invest in sport and recreation to ensure Wellington remains a desirable place to live. Council is asked to continue with this commitment in the Long Term Plan 2021-2031, acknowledging its own position that sport and recreation is 'core' to Wellington being a city that prioritises the well-being of its residents.

Please continue to invest in facilities and provide funding to enhance the sport and recreation offerings available in Wellington at a level year on year that is no less than the current level of investment.

Thank you for the opportunity to make this submission. Representatives of Tennis Central Region look forward to the opportunity to discuss this submission in further detail with Councillors at an oral hearing.

## Submission #: 1524

### Submission: 2021-2031 Long Term Plan

Catharine Underwood

I am submitting as an individual

I would like to speak to my submission please

I note on the inside page of the document, that since 2018, the council has, amongst other things declared a Climate and Ecological emergency. But I've seen little evidence that the council is doing much about the ecological emergency. The council parks and reserves unit does a great job, as does the council with its support of Zealandia, but there is so much more that would be really simple to promote and encourage indigenous biodiversity in the city.

I'd like to propose that the council pays more attention to the street scape and require green space within each new building/development whether it be a green wall or native trees/shrubs along the front or a green roof. Solar lighting for common areas or wind generation for taller blocks. Sure, it may be a little more expensive but the investment will be worth it. Or Wellington will become a wasteland between the parks reserves. This photo is a good representative of what the current urban design rules allow to be built. This development has 2 trees and 1 shrub if you know where to look.

Something else that would be great for the environment and be easy to implement would be to require all new street/suburbs/developments to have 'dark sky lighting'. Tekapo can do it, why can't Wellington. The council needs to have some 'blue sky ideas' and this would be an easy one. There are some excellent guidelines for LED advertising boards and cranes for example to stop light pollution. Be great for tourism, great for the environment and great for people. Why not do it I ask.

#### Order of Priority

- 1: Water infrastructure
- 2: Fit for purpose community, creative, cultural AND environmental spaces i.e. parks, reserves, pocket parks. Wellington is already behind the 8 ball without enough parks in the central city for the current population. Where's the plan for the next 80,000 people.
- 3: A proper transport network that is reliable – the new bus network roll out has been a disaster (most of it not of the city councils making). The bus hub has made my local village street into a bus depot. Please stop using cheap chip seal. It is awful to cycle and drive on. It is noisy and the chips get into your car, your carpet and onto your shoes. Come on Wellington, have some class and use asphalt. I know it is expensive but let's have decent roads rather than vanity projects.
- 4: Waste minimisation – target the manufacturers as well as the consumer
- 5: Sustainable housing – let's hope there aren't too many more council housing that has been sitting empty for years and deteriorating. Hutt council has done up their suburban houses and now has clients living in a house in a suburb. I support the conversion of office buildings and the renovation of suburban houses rather than demolishing them.
- 6: Partnerships with mana whenua. These are important but are part of all the above rather than separate.

Page 19 – which assets are you not renewing insurance? I think this should be included here rather than sending readers off elsewhere. I'm not sure that this is a good practice depending on the asset.

Decision 1: The most important action needs to be the waters.

How can the council promote the preferred option which may worsen the environmental outcomes for some catchment areas? This option is in direct contrast to the claim of having declared a climate and ecological emergency. Water is an ecosystem service which we have a duty of care to look after. The Owhiro Bay and Karori Streams need to be included in any options no discussion.

Page 29 – agree about laterals. A good move on the part of the council and is likely to mitigate many a stressed home owner when dealing with the council over leaks etc.

Decision 3 – Cycle ways. I am a keen cyclist and ride my bike all over Wellington every day as part of my job. I'd like to see the council fix the badly designed already installed cycle ways i.e. Island Bay, Victoria Street, Rongotai Road and, by now, Brooklyn Road. I don't use the Island Bay cycle lane as I don't feel safe, I don't use the Rongotai one either, I have to use the Victoria Street one but have learnt how to cycle in the traffic instead and the Brooklyn Road lane is just plain dangerous for every other user. The council has not done a service to any road user with these cycle lanes. To go spending more money on wasteful, badly designed, community dividing cycle lanes proves indeed that the council only cares about ticking the box and a cycle lane at all cost regardless of the safety concerns.

The only option is option 1 - to fix what's been badly done and not spend even more rate payer funds on dangerous cycle lanes. Funding to fix Island Bay is mandatory regardless of what option is chosen. Not to do so, flies in the face of all road users and rate payers.

Decision 4. See above comments. Good to see you mention Greening our building projects in the initiatives section. But no mention of this in any of the options. Does that mean painting them green or installing double glazing or insisting on each development having more plants for biodiversity? When looking further at the options, it would appear that it means more green paint than plants. Is this photo representative of what you mean by greening building projects?

Decision 5. I'm not sure what I think about this. The council will do what it wants anyway. But I do insist on the following:

That no pohutukawa tree on the MFC car park which is temporarily a ballet school is harmed in any way or that the little park at the eastern end is used for any of your proposed developments.

That the view shaft (to use council terminology) from Mercer Street through Civic Square and to the harbour/Mt Vic be registered as a protected view shaft. This means no high rise buildings on Jack lilot Green and no walkway between the upper floors of the existing library and the current MOB. This view shaft lets light and sun into Mercer Street, makes Mercer Street and Victoria Street feel open and not a wind tunnel/canyon and it draws the eye to the horizon to the east.

Let's Get Welly Moving is an expensive disaster. Time to put it to rest and move on.

Community Infrastructure. The council is hell bent on making room for 80,000 more people to live in the city. Yet it is removing car parks like there is no tomorrow. Car parks aren't all for cars, they are used for motorbikes, boats, caravans, bicycles and other toys. It is so disappointing to see the council take away those spaces for people with mobility issues, deliveries, short term drop offs. Not everyone can cycle or catch the bus. A developer has themselves said that 70% of his 23 unit of one bedroom block will have cars and the council only required him to have 3 car parks because the council let him install residential units in a centre zoned space. So, 80,000 people means potentially 56,000 more vehicles – using this one example to extrapolate. I heard that there was a review happening for the cities community centres – great idea – am interested in reading it when it comes out.

Page 56 – why does completing the Frank Kitts Park playground revamp come under Environment? This is recreational and it's unnecessary. Can you assure me that no pohutukawa trees will be harmed? Can't you leave well alone? Stop wasting rate payers money. There is nothing wrong with Frank Kitts Park.

5: the council does really good things with biodiversity in its parks. But it isn't consistent with biodiversity in its urban design guidelines. The world is going through a mass extinction and the council is proposing a massive building programme without any consideration of streetscape. Streetscape is an after-thought to the building. Every development, building project should have a mandatory planting plan. During Covid/lock down it became apparent that getting touch with nature was really important. So, the council needs to build on that and incorporate native trees and plants in developments. A compulsory 50sqm park for every 100 bedrooms or something similar. The development in the photo is a big one and indicative of future buildings – there is NO communal garden/green space in here. There are no decks, no opportunity to see any 'nature' at all. And 'nature' and getting amongst it was a really big thing during covid. I say again this is what the council urban design plans allow and it will only get worse with the new spatial plan rules.

Page 57. The urban development area is a joke. My community asked for a heritage/character assessment 20 years ago and was ignored. It also asked for one 10 or so years ago but we weren't important enough. We asked for one to be done prior to the spatial plan. But no, the response was that it will be done after the spatial plan is approved. Guess what – the council did a high level assessment, determined that the only building worth having on its list was 96 Washington Ave. Then in February 2021 approved a demolition order. And urban design has decided that suddenly, houses in Mt Vic that have been character and heritage for years have overnight now been classified as having no character or heritage value.

Page 58 – your plans to increase the hourly parking rate, increase the hours that parking can be charged and increase the weekend parking fee etc just shows a lack of respect for those who you represent. If you didn't remove so many car parks then this money grabbing fee may not be necessary. The WCC and its anti-car policy is the best thing that has happened to Queensgate.

## Submission #: 1525

### Submission on the Wellington City Council Long Term Plan, 2021 - 2031

Graeme Carroll

#### Introduction

I have been a resident of Wellington City since 1984, with a keen interest in the community well being and in seeing progressive innovative sustainable development that will continue to see initiatives taken to make Wellington an example of one of the best places to live in a zero carbon future.

#### Submission

I support the submission made by the Newtown Resident's Association, of which we are members.

Their submission makes important points and recommendations that cover Long Term Plan Decisions 1 – 7.

In addition to the specific priorities set out in the draft Long Term Plan, there needs to be greater engagement and investment to provide increased earthquake resilience for Wellington City, with a greater active engagement with partners to help provide the solutions. Much has already been written by others on this including the recent Report from the Wellington Lifelines Taskforce chaired by Fran Wilde, the Wellington Mayoral Insurance Group report, and various presentations around the recent 10 years anniversary of the Christchurch earthquakes.

Practical initiatives that have been advocated by earthquake engineering specialists for several years now include the seismic structural health monitoring instrumentation of buildings to provide rapid earthquake assessments. There are now low cost effective systems available; such as the Wellington based and developed system by Global Seismic Data ( [www.gsdhq.io](http://www.gsdhq.io) ).

The full cost of installing and providing 400 multilevel buildings in Wellington is around \$8m, for such a system with this minimising otherwise major disruptions, downtime and recovery time costs from the effects of a moderate earthquake on Wellington. With such a building installed sensor system rapid assessments are possible within a couple of hours. It took weeks to months to assess the condition of many multilevel buildings in Wellington from the 2016 Kaikoura earthquake on Wellington with major disruptions and relocations needed for many people. Wellington City Council needs for example to take a lead and install such a system across its buildings – including as a priority for multilevel housing apartments.

### **Decision #1: Investment in three waters infrastructure.**

Support Option 3, Accelerated investment.

Support greater attention to Stormwater, which in a 1 in100 year event likely to cause major flooding, and the approach proposed for Stormwater put forward by the Newtown Residents Association, with much greater attention to maximising the use water sensitive urban design for the management of stormwater systems.

The Government through the 3 Waters Reform process is providing additional investment co-funding that the council needs to maximise use of to assist with accelerating much needed already identified priority infrastructure work.

This also needs to include the priority Lifelines identified and already costed in the recent Report by the Wellington Lifelines Earthquakes Resilience Taskforce that was chaired by Fran Wilde.

An additional aspect of Water resilience that needs to be actioned is a strong ramping up of household emergency water holding tanks in the event of an earthquake – the type of tanks available through WREMO. There needs to be a much more active initiative to supply and assist with the installation of these throughout our communities, including support of the development and supply of new innovative versions such as one designed in recent years by Massey School of Design students with staff.

### **Decision #2: Wastewater laterals**

Strongly support Option 2, the proposal that the Council should take ownership of the laterals and accept responsibility for the maintenance and renewal of private wastewater connections to the wastewater (sewerage) main underneath the road corridor – as outlined and well expressed in the Newtown Residents Association submission.

### **Decision #3: Cycleways**

Support the submission as set out in the Newtown Residents Association submission.

### **Decision #4: Te Atakura First to Zero**

Strongly support Option 3, to fully fund the Te Atakura action plan.

### **Decision #5: Te Ngākau Civic Precinct, Council Office Buildings**

Support the position of the Newtown Residents Association, with the need for having more clarity around the parameters for the final design.

## **Decision #6: Central Library**

Support Option 1, to fund the repair and upgrade of the Central Library by temporarily breaching the current debt limit.

## **Decision#7: Sludge and waste minimisation**

Strongly support investing in treatment of wastewater at the Moa Point plant, so that the sludge can be kept out of the landfill.

There are a number of available technology options that are now available, such as the Viroment Technologies sludge dewatering and treatment RDVF(Rotary Drum Vacuum Filtration) system that provide eco-friendly very efficient treatment of all sorts of sludge, that will make a major reduction in the current levels of waste going to the landfill.

There are available technology providers, such as Bioplant NZ with their proven Japanese waste to energy scalable modular plants that could readily ensure the diversion of the current waste streams to produce a mix of bio/synthetic fuel, electricity and biochar soil improvement products. ([www.bioplantenergy.com](http://www.bioplantenergy.com))

Support Option 4, if the proposed alternative funding for this investment through the Infrastructure Funding and Financing Act is a realistic option.

Thank you for the opportunity to make this submission.

I would like the opportunity to speak to Councillors as part of oral presentations.

**Graeme Carroll**

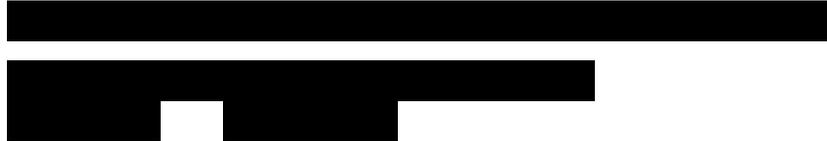

**Submission on**

**Wellington City Council  
Long Term Plan (LTP) 2021**

Submission by Friends of Owhiro Stream (FOOS)  
10<sup>th</sup> May 2021

Submission prepared by:

Contact name: Martin Payne, FOOS Co-ordinator

Friends of Owhiro Stream (FOOS) would like to be heard in support of its submission.

**The Owhiro Stream Restoration Project**

The Owhiro Stream is the only substantially un-piped urban stream flowing to the South coast of Wellington City. It provides crucial habitat for native fish and both long and short finned eels. It is also the primary freshwater feed into the Tapu Te Ranga Marine Reserve at Owhiro Bay.

For more than eighteen years, Friends of Owhiro Stream (FOOS) have been working to restore this unique part of Wellington's environment by removing construction waste, rubbish and weeds, planting over 25,000 native plants, raising community awareness and advocating for its protection at numerous resource consents and council consultations.

**A Catchment - Community focus required**

Every week, dedicated people in the community gather to battle with blackberry, plan strategies, propagate and plant native seedlings to restore the health of the Owhiro Stream and yet, despite all these efforts, the water quality continues to decline. Runoff contaminated with wastewater, Stormwater surge from urban development and waste disposal in the catchment continue to negatively impact the stream's ecosystems ability to support populations of native fish and macroinvertebrates and also frequently fails to provide for safe recreation for people in the waters of the stream and the bay.

The Owhiro community recognises that an integrated catchment plan is necessary if the pressures on the stream environment are to be remedied and reversed.

We are heartened by the willingness of Wellington City Council, Greater Wellington Regional Council, Wellington Water, Regional Public Health and the Department of Conservation to work with the Owhiro community to understand the issues and come up with solutions. For our group, proof of the effectiveness of this co-operation will be the action and the measurable improvement in the stream's ecosystems.

## **Planning for better outcomes**

The Long term plan is an opportunity for the community to be involved in Wellington City Councils prioritisation of projects in the next decade.

### **Decision 1 .Investment in three-waters infrastructure**

#### **Wastewater management**

FOOS supports urgent action and expenditure on the City's failing wastewater network.

We however take exception to the the statement in the preferred option 2 that

“ We anticipate that under this option the quality of some of our streams and the marine environment may not worsen, but the problem is decades in the making and it will take sometime to reverse.”

This statement suggests that the city ignore the critical decline of our natural waters particularly the city's few remaining freshwater streams. Reversing the decline get more difficult and expensive with time. A similar logic that has lead to the gross underinvestment in the 3 waters infrastructure, consequential failures and a massive injection of capital required to remedy a failure to respond and plan effectively.

Let the city not repeat this fiasco with our natural environment. After all we call ourselves an ecocity!

### **Decision 2 .Wastewater laterals**

FOOS agrees with the preferred option for WCC to take responsibility for lateral connection beyond the private property boundaries. This would bring Wellington city into line with many other Local authorities' practice.

### **Decision 4 Te Atakura First to Zero (climate change)**

FOOS supports fully funding for Te Atakura. Urgent action is required to reduce the council's and community's greenhouse gas emissions. FOOS is aware of Owhiro Stream vulnerability to the effects of climate change and is already observing a significant increase in streambank erosion rates which seem clearly related to predicted changes in intensity of rainfall events. The District plan review needs to embed Stormwater retention rules and WSUD design principles into new development consents.

### **Decision 7 Sludge and waste minimisation.**

FOOS supports the minimisation and eventual beneficial use of sewage sludge. We have long recognised that the volumes of dewatered sewage sludge and the need to mix this waste stream with general waste is driving the volumes of waste currently being landfilled. Reducing and eventually removing sewage sludge from the waste stream is key in a transition towards zero waste to landfill. FOOS is concerned that potential difficulties in financing this initiative may delay substantive waste reduction initiatives. The consequences of any delay will be further landfilling over some of the most ecologically significant parts of the Owhiro Stream in the Owhiro catchment which we would clearly want to avoid.

#### **Waste operations**

FOOS remains concerned about the planning processes for the extension of the Southern landfill. We consider that full and open consultation is required before the Council enters the

Resource Consent process is essential. We would consider a transition plan to zero waste an necessary part of this process to minimise the need for further extension of the landfill.

Thank you for the opportunity to make this submission.

Friends of Owhiro Stream DOES wish to be heard on this submission.

Martin Payne

Co-ordinator

for Friends of Owhiro Stream

## WCC Environmental Reference Group (ERG) Submission to Wellington City Council's Long-Term Plan 10 May 2021

Contact name on behalf of WCC ERG: Lynn Cadenhead

[REDACTED]

[REDACTED]

Postal address: WCC PO Box 2199 WELLINGTON 6140 Attn: Hedi Mueller

### Purpose of the Environmental Reference Group (ERG)

Advise Council on the best ways to improve Wellingtonian's quality of life environmentally, socially, culturally and economically by protecting and enhancing the local environment.

Bring knowledge and insight into Council around the environment, including climate change, water, energy, waste, biodiversity, urban design and transport management, in the context of Council's roles and priorities.

### Overarching Principles of ERG Group

ERG believe that WCC policies, plans and decisions should:

Safeguard the life-supporting capacity of air, water, soil, and ecosystems.

1. Consider zero carbon, climate change mitigation and adaptation, biodiversity protection, heritage protection, resilience, future generations and the principles of Te Tiriti in all decision making.
2. Work with others including communities, Iwi, Central and Regional Government.
3. Collect information in a systematic way using best practise and share and use it effectively.
4. Monitor change.
5. Recognise and respect the relationship that manawhenua and communities have with their environment and rohe.
6. Recognise that new ways and change can be beneficial.

### Question 1 – Investment in three waters infrastructure

We support the accelerated investment option 3 with increased spending on the integration of water sensitive urban design into the stormwater system

We seek that WCC:

1. Commit to the Critical Assets Inspection Programme and develop an asset upgrade and construction programme. This will identify where investment is required over the next three years and outline an indicative programme of works.
2. Commit to working with central government, Water New Zealand and other industry bodies to improve the capability and capacity fo the three waters sector in Wellington.

3. Commit to investigating ways that WCC can better promote the adoption of good practices for three waters and implement these through all relevant policies and programmes, e.g. the district plan, and council projects, e.g. roading, housing. This should include considering recommendations from Activating Water Sensitive Design (Manaaki Whenua, 2019)
4. Commit to expediting the work on the business case for water meters, with an intention to make a decision within the next financial year.

**Reason:**

It's clear that WCC needs to invest significantly more in three water services after decades of under-investment leading to ever increasing pipe and system breakages and under-capacity.

We seek greater emphasis on stormwater, to enable better integration of water sensitive urban design (WSUD) into the system as soon as possible. If WSUD is not incorporated soon, the current moderately high value of the Council's reserves and waterways will likely be irreversibly impacted. Stormwater is very costly to remediate, as Auckland is now finding through the 'daylighting' of its streams. This means controlling ground infiltration, implementing esplanade provisions and maintaining riparian margins to reduce impacts of urbanisation, especially in suburban Wellington.

Attention to stormwater is further important as it recognises and respects mana motuhake – the whakapapa and relationship that manawhenua and other communities have with water ecosystems in their rohe.

**Question 2 – Wastewater laterals**

We support the Council's preferred option.

**Question 3- Cycleways (and note our focus is broader - on decarbonising transport)**

We support Option 4 accelerated full investment programme.

We support the following transport upgrade works:

- \$38.5m for Walking Improvements.
- \$26.5m for Intersection improvements
- \$5.6m for School Safety and accessibility improvements
- \$12.4m for speed management upgrades
- \$5.9m for In-fill Streetlight and Accessway Lighting
- Bus priority
- Accessibility investment

We do not support the deferral of \$7m from years 1-4 to years 4-8 for footpath upgrades.

WCC should also develop an updated cycleway implementation plan for Wellington that identifies what projects will be delivered over the next ten years, and when they will be operational.

WCC should double the minor project fund from \$1 million to \$2 million, so as to provide dedicated funding to small projects, e.g. more cycle parking, and tactical urbanism projects, that promote healthy streets, e.g. parklets, traffic calming and so forth.

WCC should remove funding for new roading projects that will lead to an increase in private vehicle traffic and greenfield development.

**Reason:**

ERG's transport principles seek that WCC act to reduce private vehicle use, by modal shift to walking, cycling and public transport, while ensuring the city maintains and improves accessibility for all people. This is an important part of reducing the carbon footprint of the fossil-fuelled transport system in order to make more space for - and proactively facilitate and encourage - active and public transport.

Construction of connected and safe cycleways aligns with these, and other ERG transport principles, as well as ERG's principles for a safe climate. Provision of safe, connected cycleways is also a proven way to increase population health and wellbeing, and is associated with improved economic activity.

Why seek the accelerated full investment option?

Wellington currently has a limited number of quality cycleways, and these are poorly connected. Wellington faces significant geographical constraints. LGWM has signalled a number of cycling improvements: to make the most of these WCC needs to ensure that this planned infrastructure is connected in with a broader network of safe cycleways serving the suburbs and inner-city areas.

The need for the accelerated full investment programme is given further impetus by WCC's adoption of Te Atakura, and the signals in the draft spatial plan and aligned national directions, e.g. the NPS for Urban Development forecasting significant population growth within existing urban areas.

Re-purposing existing public street space, and designing new streets with provision for safe active transport provision from the outset, which an accelerated full investment programme will enable, will incentivise the mode shift necessary to achieve climate change reduction goals, whilst freeing up road space and efficient movement for those who need to use vehicles (e.g. for some trades) and therefore help to make the most of Wellington's geographically constrained road space as density increases.

**Question 4 – Te Atakura First to Zero (Climate Change)**

We prefer the option of fully funding the programme

**Reason:**

ERG is of the view that WCC is not being ambitious enough with its Te Atakura targets. We will provide further comment on this in the future.

## **Question 5 – Te Ngākau Civic Precinct – Council office buildings**

No preferred option.

Whatever decision is made the carbon cost of the decision needs to be known and weighed up against other options with a full life cycle carbon analysis using best practice through a third party. We did not feel there was enough information to make an informed recommendation on this matter.

## **Question 6 –Fixing the Central Library**

We prefer the option of strengthen now by temporarily exceeding debt limit (Council's preferred option additional 0.79% rates increase).

### **Reason:**

The library has now been declared a Category One Heritage Building and should be retained in public ownership. It therefore makes sense to ensure that the repairs and upgrades are of the highest quality, to protect the building's life for as long as possible and to mitigate some climate change impacts. We agree with the proposed five-star Green Star rating to ensure high levels of energy efficiency. Retrofitting the existing structure will significantly reduce the embodied carbon of the project when compared to building a new structure.

## **Question 7 – Reducing sewage sludge and waste**

We prefer the option of sludge minimisation through alternate funding (Council's preferred option, \$147m-\$208m capital investment funded through a levy, no additional rates increase)

One reason to use alternate funding is that it increases WCC's financial resilience.

The current minimisation target in the Wellington Region Waste Management and Minimisation Plan is to reduce waste to landfill by  $\frac{1}{3}$  by 2026.

Without radically overhauling the sewage to landfill system, the city cannot achieve any current or future waste minimisation goals, due to the required 4 to 1 waste to sewage sludge ratio.

Decoupling the sewage from the landfill is essential for these reasons:

- The current system is a roadblock on meaningful action to seriously minimise waste to landfill in Wellington
- This is a key part of achieving the emission reduction goals set in Te Atakura - First to Zero, as 80% of WCC emissions result from landfills
- WCC cannot achieve Wellington Region Waste Management and Minimisation Plan targets without decoupling sewage and landfill systems

- This is an outdated and polluting system, which does not reflect the sustainability goals of Wellington city
- The current system is a significant resilience risk to the city
- Demonstrates leadership on waste and climate issues - it's important the council 'walks the talk'.

We request additional funding in the Long Term Plan to support Wellington transitioning to a Circular Economy. The circular economy should be secured ahead of installation of the new sewage sludge system, to fast-track action in this area.

## **Question 10 – Any other feedback on what is proposed for the 10-year Plan**

### **Biodiversity**

- We support the increase in funding for animal pest management and weeds and hazardous tree management.
- We support the additional funding for the Botanical Gardens Begonia House and for Otari Wilton Bush facility.
- We support the renewal and development of new Central city greenspaces and parks.
- We support the ongoing support for predator free and community trapping.
- We request that additional funding be included in the LTP for;
  1. Aligning WCC's biodiversity work with the Aotearoa New Zealand Biodiversity Strategy
  2. Ensure resourcing for collaboration with GWRC on biodiversity
  3. Implementing the high priority items and actions in Our Natural Capital.
  4. Updating of Our Natural Capital including timeframes for actions
  5. Freshwater ecology restoration
  6. To ensure biodiversity enhancement is a key feature of all council projects
  7. To support biodiversity initiatives such as SNA's, and allow for readiness to respond to upcoming national directives, e.g. NPS IB.

### **Heritage**

- We support the continuing and additional funding for the providing financial incentives for heritage building owners to undertake comprehensive earthquake strengthening. We recommend incentivising basic energy efficiency retrofits at the same time as a condition of these grants.
- We support the Bond Store (Wellington Museum) building strengthening work
- We support the completion of Town Hall and St James strengthening as they are underway and contracts have been let.

### **Frank Kitts Park**

- We support the removal of \$6.5m previously provisioned for Frank Kitts Park garden development.

### **Sustainable Food Network Action Plan**

- We support the Implementation of programmes from the Sustainable Food Network Action Plan including new approaches to household composting and enhancing food security (\$500k Years 1-3)

### **Long Term Plan Budget**

We seek that WCC increase its debt ceiling limit to provide for the additional expenditure sought.

Thank you for the opportunity to submit.

## Submission #: 1528

2021-2031 Long-term Plan  
Wellington City Council  
longtermpian@wcc.govt.nz

To whom it may concern

### **SUBMISSION:**

### **T M TOU MAHERE NGAHURU TAU - 10-YEAR PLAN CONSULTATION DOCUMENT**

Thank you for the opportunity to present this submission. When hearings are held, we would like to speak in support of it, then take the opportunity to answer any questions from councillors and staff.

### **ABOUT WELLINGTON BOTANICAL SOCIETY**

#### **Introduction**

Wellington Botanical Society was formed in 1939. Our membership of c. 245 people includes amateur and professional botanists.

#### **Our advocacy work**

We advocate for the protection of:

- existing scenic reserves and recreation reserves as required by the provisions of the Reserves Act 1977;
- the Wellington Town Belt as required by the provisions of the Wellington Town Belt Act 2016.

We also advocate for legal protection to be given to areas of native vegetation which are not subject to it. If the plant community is privately owned we may alert Wellington City Council, Greater Wellington Regional Council, Department of Conservation Kāpiti-Wellington Area office or the QE2 National Trust to the natural values of the site.

#### **Our programme February – November**

- First Saturday each month: Field trips to reserves and other protected natural areas in Wellington city and beyond;
- Third Monday each month: Public meetings in Murphy Lecture Theatre 101 at Victoria University when speakers give presentations on botanical subjects.

+++++

## THE SUBMISSION

**Our submission is a reinforcement and expansion of our submission on WCC's draft Annual Plan 2020-2021.**

### **Global biodiversity crisis**

New Zealand and the rest of the world face an intensifying four-pronged indigenous biodiversity crisis:

1. Global climate change and rising sea levels;
2. Pollution of soils, air and waters as a result of human activities;
3. Pest animals which infest indigenous plant communities, browsing on palatable plant species. Wellington City Council and Greater Wellington Regional Council have done excellent work in the last two decades by almost eliminating possums from our urban areas;
4. Pest plants and other weeds which compete with and crowd out those indigenous plant species which occur naturally in the areas infested and in addition may adversely impact on soil micro-organisms associated with those indigenous plant species.

### **WCC's progress to 2021**

Wellington Botanical Society welcomes Council's:

- declaring a climate and ecological emergency;
- joining hundreds of cities around the world in declaring a State of Climate and Ecological Emergency;
- adopting its Te Atakura First to Zero Carbon (climate change) policy.

Wellington Botanical Society supports Option 3 – to fully fund the programme. We believe that swift and sustained implementation of actions by council and all Wellingtonians is vital. Intensive control of pest animals and weeds is essential to encourage the resurgence of native plant species on our public lands and lands in private ownership. These actions will increase the native plants' ability to sequester carbon.

### **Wellington City Council's responsibilities for protected areas**

The legislation:

- Reserves Act 1977
- Conservation Act 1987
- Wellington Town Belt Act 2016

For many decades, WCC's funding for the control of weeds on the lands which it manages on behalf of Wellingtonians has been woefully inadequate. The result is a huge backlog of weed-control work to be done on many areas of the city's scenic reserves, recreation reserves, road reserves and the Wellington Town Belt. Many of these areas are infested with a wide range of aggressive weed species which prevent or delay the growth of native plant species.

### **Tipu Toa Build Back Better**

Wellington Botanical Society welcomed the allocation of \$200,000 in the Tipu Toa Build Back Better package in the draft Annual Plan 2020/2021 – see our submission on Council’s 2020-2021 draft Annual Plan.

**Recommendation made in our submission on the 2020/2021 draft Annual Plan:**

Some of the \$200,000 Tipu Toa Build Back Better funding money should be spent teaching the members of community groups which work in the city’s scenic reserves, recreation reserves, road reserves and the Wellington Town Belt to identify the weed species infesting the areas they look after. This investment would empower the people to do some of the weed control so badly needed.

**Further recommendations**

Given Council’s gross underfunding for several decades of weed-control work on the public lands it manages on the public’s behalf:

1. Council should vote large sums of money, e.g., \$500,000 per year for each of the ten years of this Long-term Plan, in an effort to catch up on the huge backlog of weed-control work;
2. Council staff and contractors should be employed to do the weed-control work on sites which council staff deem to be too hazardous, or the weed infestations to be too large, for community volunteers to work on;
3. Council staff and contractors should be employed to do the weed-control work on sites in areas where there are no community groups involved.

**Some pest plants infesting public land in Wellington**

We list below some of those many weed species infesting parts of the city, suburbs and rural hinterland. These lists are far from comprehensive. They indicate the scale of the problems faced by native plant communities in our scenic reserves, recreation reserves, road reserves, on the Wellington Town Belt and on private land. These pest plants compete aggressively with native plant species for light, moisture, soil nutrients and shelter.

We included the list below in our submission on WCC’s 2020/2021 draft Annual Plan. We believe that repeating this table is necessary to help to persuade councillors to vote to fund substantial investment every year of the term of this 2021-2031 Long-term Plan to combat the rising tide of infestations of weeds on public and private lands throughout the city.

<b>Climbers</b>	
Cape ivy	<i>Senecio angulatus</i>
Cathedral bells	<i>Cobaea scandens</i>
English ivy	<i>Hedera helix</i>
Garden nasturtium	<i>Tropaeolum majus</i>

Lacebark / houhere	<i>Hoheria populnea</i>
Pōhutukawa	<i>Metrosideros excelsa</i>
Pseudopanax hybrids	<i>Pseudopanax lessonii</i> hybrids
Pūriri	<i>Vitex lucens</i>

## Recommendations

We urge Wellington City Council to:

1. increase very substantially its budget for weed control and pest-animal control on the lands it manages on behalf of Wellingtonians for each year of the Long-term Plan 2021-2031;
2. stop the regeneration of the weedy pine and eucalypt species, macrocarpa, sycamore, flowering cherry, hawthorn, karo, karaka, lacebark, etc., on public lands by pulling out seedlings, and felling and stump-treating saplings and small trees. This would encourage the regeneration of native species in the understorey which in the long-term will replace the tall weed trees as they become senescent, die and fall over. This work should be supplemented by planting locally appropriate, eco-sourced native pioneer plant species to hasten the development of a dense understorey with a steadily increasing carbon-sequestration ability;
3. allocate at least \$200,000 in the Tipu Toa Build Back Better package every year of this Long-Term plan 2021-2031 and future Annual Plans for the foreseeable future, until such time as infestations of pest plants and other ecologically damaging weed species are uncommon, if not eliminated, from all scenic reserves, recreation reserves, road reserves and the Wellington Town Belt;
4. **Review its weed management role over the last two decades.** This should include:
5. Council's present approaches to weed-management planning, results to date, cost effectiveness, monitoring, priorities over the last two decades and implications for this Long-Term Plan 2021-2031;
6. partnership opportunities with GWRC, iwi, the general public, residents' associations, secondary schools, service clubs, sports clubs, etc.,
7. fragmentation of public lands caused by pest-plant infestations;
8. public attitudes to weed control;
9. the potential for new jobs for those involved on community-led weed-control projects who have gained experience in identifying weed species and learning control methods;
10. the benefits of doing work in-house rather than using contractors;
11. the implications of climate change for weed control in Wellington.

This review is essential because of the mounting crisis of global climate-change and its adverse impact on indigenous biodiversity. In addition, central government and regional authorities are raising the profile of indigenous biodiversity, so Wellington City Council must do likewise. The reasons include increased funding by central government for the protection of indigenous biodiversity and "shovel-ready" projects, the increased role for iwi in decision-making under DOC's and MfE's indigenous biodiversity strategies, the overlapping of weed-management roles in public-sector agencies, the complexity of health and safety matters and the impacts of weeds on restoration projects.

J C Horne

Long-term Plan 2021-2031  
Wellington City Council  
[longtermpln@wcc.govt.nz](mailto:longtermpln@wcc.govt.nz)

To whom it may concern

### **SUBMISSION: 2021-2031 Long-term Plan Consultation Document Tō mātou mahere ngahuru tau**

#### **Hearings**

When hearings are held, I would like to speak in support of this submission.

#### **Our journey to 2021**

I oppose the continuing construction of a Convention Centre. The Covid pandemic has slashed international air travel. Agencies which in the past sent delegates flying to conventions around the world can now avoid the considerable expense of flying staff and losing staff work-time when those staff fly to and from conventions. Face-to-face conventions have been rendered outmoded, now that they can be run remotely, e.g., by ZOOM. The present large reduction in CO2 greenhouse-gas emissions as a result of the COVID lock-downs world-wide is invaluable as the nations of the world fight the enormous risks posed by runaway climate change.

#### **Recommendation**

The interior of the proposed Convention Centre should be redesigned to make it New Zealand's Museum of the Performing Arts. What a fitting tribute that would be to the performing arts in the capital city and nationwide. The fact that it would be across Mercer Street from Te Papa Tongarewa would make it and Te Papa an even greater draw-card for Wellingtonians, people from other parts of the country, and if and when we are able to open our borders, people from overseas.

I welcome Council's:

1. Passing of Te Atakura First to Zero Carbon policy;
2. Declaration of Climate and Ecological emergency;
3. development of pop-up libraries;
4. Strengthening of the St James Theatre;
5. North Kumutoto public space upgrade to offset to a small extent the loss of public space caused by construction of the hideous PWC building;
6. The opening of the temporary Royal NZ Ballet building.

7. The starting of the new Matariki festival, Te Ahi Ka

### **The big decisions for this plan**

#### **Decision 1 – Three-waters infrastructure – page 22.**

Given the many decades of inadequate maintenance of much of this complex network, some of which is about a century old, it seems that WCC must seek substantial funding from central government, in addition to rates money from the commercial, education, medical and residential sectors.

#### **Decision 2 – Wastewater laterals – page 28.**

I support Option 2 because laterals are often under footpaths and the adjacent berm/road reserve, as is the case for my property in Kaihuia St, Northland.

#### **Decision 3 – Cycleways – page 30.**

I support Option 3, provided that:

- the awful lessons learnt from the Island Bay Parade cycleway debacle are avoided. To have that cycleway lead to the loss of two small groceries/dairies and their owners' livelihoods was inexcusable. In addition, the placing of the cycle lane inside the line of car parks is as bad for alighting car passengers as it is for passing cyclists.
- cycleways are not imposed on footpaths. They are for pedestrians. Walkers, wheel-chair users and pram pushers are put at risk if cyclists are allowed to share footpaths with them.

#### **Decision 4 – Te Atakura First to Zero (climate change) – page 34.**

I support Option 3 because as the capital city we are obliged to set an example to the rest of the country by investing heavily to reduce our emissions of greenhouse gases in the fight against the threat of runaway climate change.

#### **Decision 5 – Te Ngākau Civic Precinct, Council Office Building - page 38.**

To demolish the MOB and/or the CAB would produce large amounts of concrete, glass and steel, etc., which would have to be dumped in the Southern Landfill. The impacts of the noise of demolition on centre-city workers, residents and visitors, and residents in Brooklyn would be unacceptable. What an awful loss of natural resources! I urge council to find ways to strengthen both buildings so that our city council staff and councillors are housed where they should be – in the heart of the city. I support Option 3. Council should seek government funding towards the cost of strengthening these two buildings. This Option would revitalise our languishing Te Ngākau – Civic Square.

#### **Decision 6 – Central Library – page 42.**

I welcome Option 1. I trust that the most advanced design of equipment for base-isolation is used on this gem of a building. Given that engineers were able to move an hotel on wheels elsewhere in Te Aro, is it possible that engineers could devise a way to raise our library by 1-2 metres to give it more "free-board" in the event of catastrophic sea level rise?

**Decision 7 – Sludge and waste minimization – page 45.**

I support Option 4 – sludge minimisation through alternate funding. I support any ways we can persuade citizens to recycle more items and to compost their food wastes in their gardens if they have them.

Yours sincerely  
Chris Horne.

## Kōrero mai mō te mahere 10-tau Have your say on our 10-Year Plan

All submissions must be received by **midnight Monday 10 May 2021.**

You don't have to give feedback on every decision – just choose the ones you're interested in. You can only submit once. You can include supporting information along with your submission.

Before you start, read about our priorities and projects in our consultation document. There are copies available at your local library and our Service Centre at 12 Manners Street, or visit [wgtn.cc/ltp](http://wgtn.cc/ltp).

### Why we're collecting this information

Your feedback matters. This plan is about the future of Wellington and it affects everyone who lives and works here. That's why we want to hear from as many people as possible. Your views will inform the next steps we take.

### Privacy statement

All submissions (including names and contact details) are provided in their entirety to elected members. Submissions (including names but not contact details) will be made available to the public at our office and on our website.

Your personal information will also be used for the administration of the consultation process, including informing you of the outcome of the consultation.

All information collected will be held by Wellington City Council, 113 The Terrace, Wellington, with submitters having the right to access and correct personal information.

Full name: Island Bay + Beckhampton Community Outreach

**Contact details**

Address: [Redacted]

Phone number: [Redacted]

Are you making this submission as an individual or on behalf of an organisation?

Individual  Organisation:

What is your connection to Wellington? (tick all that apply)

<input type="checkbox"/> I am a Wellington City Council ratepayer	<input checked="" type="checkbox"/> I live in Wellington	<input type="checkbox"/> I work in Wellington
<input type="checkbox"/> I own a business in Wellington	<input type="checkbox"/> I study in Wellington	<input type="checkbox"/> I am a visitor to Wellington

Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?

Yes  No

If yes - We are offering two ways of speaking to Councillors about your submission. (Please tick which option(s) you would prefer?)

<b>Oral forum</b> (informal, 60min facilitated table discussion with 2 to 3 Councillors and other submitters)	Morning <input type="checkbox"/> Afternoon <input checked="" type="checkbox"/> Evening <input checked="" type="checkbox"/>
<b>Oral Hearing</b> (formal hearing with set times to speak to full Council, 5mins per individual, 10mins per organisation)	Morning <input type="checkbox"/> Afternoon <input type="checkbox"/> Evening <input type="checkbox"/>

# Our seven big decisions

The next seven questions relate to the big decisions for the 10-year plan.

- **Decision 1:** Increasing spending on the three waters network to fix the pipes
- **Decision 2:** Taking responsibility for the ownership of wastewater laterals
- **Decision 3:** Increased investment in cycleways
- **Decision 4:** Implementing our Te Atakura, First to Zero action plan
- **Decision 5:** Choosing a plan for earthquake-prone Council Office buildings
- **Decision 6:** Funding the Central Library strengthening and upgrade
- **Decision 7:** Choosing a plan for sludge minimisation

Detailed information on these decisions are on pages 20 to 47 of the Consultation Document.

**Question 8** in this submission form is a place for you to comment or provide any other feedback on the decisions.

You are also able to attach further information to your submission at the end of this form.

## 1. Investment in three waters infrastructure

There are three different levels of investment in the three waters network to consider. Our preferred level of investment is the **Enhanced** option, which focuses on improving the condition and reliability of the network in an affordable and sustainable way.

Problems with pipes have been a long time in the making, and we cannot fix everything at once. The Enhanced option represents a \$2.4b investment in our three waters network and is the middle-ground option that we are confident of being able to deliver in this plan. We will be able to review the level of investment in our next Long-term Plan review in 2024, when we will have more information on the network.

A summary of the proposed investment in in the three waters network is on pages 22 - 26 of the Consultation Document.

Which of these options do you prefer?

Enhanced (\$2.4b Council's preferred option) <input checked="" type="checkbox"/>	Maintain (\$2.0b investment - lower rates and debt) <input type="checkbox"/>	Accelerated (\$3.3b investment - higher rates and debt) <input type="checkbox"/>	None of these options <input type="checkbox"/>	Don't know <input type="checkbox"/>
--	--	--	--	-------------------------------------

## 2. Wastewater laterals

Currently residents are responsible for the maintenance of the pipes connecting their property to the wastewater (sewerage) main underneath the road corridor. These are called wastewater laterals.

We propose that the Council takes ownership of the laterals between the property boundary and the sewerage main underneath the road corridor.

A summary of the proposal to take responsibility for wastewater laterals is on pages 28 - 29 of the Consultation Document.

Which of these options do you prefer?

Take ownership (Council's preferred option, \$32m investment) <input checked="" type="checkbox"/>	No change (no change in investment, rates or debt) <input type="checkbox"/>	Neither of these options <input type="checkbox"/>	Don't know <input type="checkbox"/>
---	---	---	-------------------------------------

### 3. Cycleways

Cycleways is an area where we have ambition to seriously lift our game - we'd like to build a network of connected and safe cycleways that allow Wellingtonians to be able to choose cycling as a mode of transport. Our full programme for the network can be viewed at [transportprojects.org.nz](http://transportprojects.org.nz) and if all of the routes were progressed, there would be a \$226m investment across the 10 years of this plan.

Our preferred option is a \$45m or 60 percent increase in funding for cycleways than what was planned in the previous Long-term Plan. It will progress \$120m of the full \$226m programme

We believe the high investment programme option balances the need for increased investment in this area with what is affordable for Council and what we will be able to deliver. It allows time in the programme for robust community engagement and to build capacity in the Council and the sector for the full programme to be eventually delivered.

A summary of the proposed investment to build more cycleways is on pages 30 - 33 of the Consultation Document.

Which of these options do you prefer?

High investment programme (Council's preferred option, \$120m capital investment)	Finish started projects (\$29m capital investment, lower debt and rates)	Medium investment programme (\$39m capital investment, lower debt and rates)
Accelerated full investment programme (\$226m capital investment, higher debt and rates) <input checked="" type="checkbox"/>	None of these options	Don't know

### 4. Te Atakura First to Zero (Climate Change)

Te Atakura - First to Zero is our response to the climate and ecological emergency we declared in 2019 but it is not yet funded.

Te Atakura is intended to ensure sufficient activity is undertaken in this decade to reduce our emissions. Council can do this by supporting the transport mode-shift projects, as well as encouraging the uptake of electric cars, providing seed funding to leverage businesses and community impact and supporting residents to be motivated to take action.

Our preferred option is to fully fund Te Atakura, which is included in our 5.3 percent average increase across 10 years.

A summary of the proposed investment in Te Atakura - First to Zero Action Plan is on pages 34 - 37 of the Consultation Document.

Which of these options do you prefer?

Fully fund the programme (Council's preferred option, \$29.9m investment) <input checked="" type="checkbox"/>	Medium investment with savings (\$25.4m investment, lower rates and debt)
Low level of funding (\$18.1m investment, lower rates and debt)	None of these options <input type="checkbox"/> Don't know <input type="checkbox"/>

### 5. Te Ngākau Civic Precinct - Council office buildings

Te Ngākau Civic Square is the musical, creative and democratic heart of Wellington but it has significant resilience challenges.

While we are still working through finalising the framework for Civic Square, a specific decision is required in this Long-term Plan with respect to the future of the Council office buildings - the Municipal Office Building (MOB) and the Civic Administration Building (CAB).

As the two buildings are connected, and have similar resilience issues, it is important that the future of them is considered together.

Our preferred option is to demolish and rebuild the MOB and CAB buildings in partnership with private investment through a long-term ground lease for the site.

Combining a MOB and CAB development would enhance this opportunity and significantly decrease the need for additional Council borrowing and ratepayer funding to address these impaired buildings.

A summary of the proposed approach to developing of Te Ngākau Civic Square on pages 38 - 41 of the Consultation Document.

Which of these options do you prefer?

Demolish and site developed through long-term lease (Council's preferred option) <input checked="" type="checkbox"/>	Proceed with base build proposal for public purposes (higher debt and rates)
Retain and seek to repurpose (higher debt and rates) <input checked="" type="checkbox"/>	Sell to support development (no debt or rates impact) <input type="checkbox"/>
	None of these options <input type="checkbox"/> Don't know <input type="checkbox"/>

## 6. Fixing the Central Library

Wellington's much-loved Central Library was closed in March 2019 following an engineering assessment saying that the way the floor was designed presented a high level of potential failure in a significant earthquake.

After hearing from Wellingtonians in the 2020 consultation, Council agreed to recommend the high-level remediation option to be part of this plan. This option makes the building resilient to future shocks and supports our ability to deliver an adaptable modern library service, while preserving the buildings heritage. It also allows us to mitigate some climate change impacts in the future.

Now there are choices about how to fund the \$187.4m library remediation project, and when the project should take place.

The preferred option, includes the Council agreeing to temporarily breach its debt limit of 225 percent to ensure the library can be refurbished in the original timeframe and remain in public ownership. Our debt level will remain at 225 percent, and Council has agreed to accept the breach in the first three years of this plan. This breach will be mitigated by any capital underspend being used for the library project rather than on new projects. Our debt level will be back below our limit by year 4 - 2024/25.

A summary of the proposed investment to fund the fixing of the Te Ngākau Civic Square Central Library is on pages 42 - 44 of the Consultation Document.

Which of these options do you prefer?

Strengthen now by temporarily exceeding debt limit (Council's preferred option, additional 0.79% rates increase)	Council to strengthen Central Library later (complete in 2028 instead of 2025, additional 0.83% rates increase)	
Strengthen now by increasing rates further (additional 1.79% rates increase)	None of these options	Don't know

## 7. Reducing sewage sludge and waste

One of the largest waste categories at the Southern Landfill is wastewater (sewage) sludge. This accounts for about a quarter of the waste that enters the landfill.

Through Te Atakura (our Zero Carbon Plan) and our Regional Waste Minimisation and Management Plan we have formally committed to reducing carbon emissions and reducing waste by a third. Minimising wastewater sludge is a necessary first step to achieving these objectives.

We need to break the link between the Southern Landfill and wastewater sludge and stop pumping sludge across the city, as 2020 highlighted the serious resilience issues and the significant consequences of failure.

Our preferred option is to invest in a sludge minimisation programme through another funding source. This means the project would not be funded by Council, but if it is funded through a Special Purpose Vehicle, a levy of about \$70-\$100 per year will be charged to each ratepayer.

A summary of the proposed investment in sludge and waste minimisation is on pages 45 - 47 of the Consultation Document.

Which of these options do you prefer?

Sludge minimisation through alternate funding (Council's preferred option, \$147m-\$208m capital investment funded through a levy, no additional rates increase)	No change in current practice (no change to investment, rates or debt)	
Invest in technology at Southern Landfill (\$86m-\$134m capital investment and higher rates)	Sludge minimisation - through Council funding (\$147m-\$208m capital investment, above debt limit and higher rates)	
None of these options	Don't know	

## 8. Feedback on these decisions

Do you have any comments you would like to provide around why you selected your preferred option to any of these decisions, or why you don't support any of the options we proposed? If yes please indicate what decision/s you wish to provide comment on.

Investment in three waters infrastructure	Wastewater laterals	Cycleways
Te Atakura (climate change)	Central Library	Sludge and waste minimisation
Te Ngākau funding for future work	None of these	

If the space on the next page is not adequate for your comments, please feel free to attach supporting information to the submission. **Please be clear** what decision you are commenting on.

Our community orchard is a welcoming space, where people meet, learn + share skills + grow food together. We are deeply concerned about climate change and urge the WCC to fully fund Te Atakura.

Te Atakura is a start, + we all need to work together to do more to achieve a just transition to zero carbon.

We need to get people out of cars, + to do this, we need to make it as easy as possible to get around. We think this means increasing bus frequency, + routes, building safe + separate cycle infrastructure, supporting schools with walking schoolbuses, + getting LGWM moving. We can explore alternative technologies to provide electricity security, like the smart wind turbines for homes, subsidised solar panels, biogas + so on. Obviously any change, <sup>made</sup> to bus services needs to make sure that drivers are paid well + treated fairly, + the WCC + WRC should look at changing bus providers because recent actions by NZ bus shows just how vulnerable they are.

We need to support wellingtonians to become resilient - supporting people to learn skills like growing food, reducing waste and

Comments

knowing how to support each other in the coming climate crisis.

We need to ensure the participation of Māori in driving a just transition process. And we need to think about how climate change may affect our (urban (rough sleeping) community, & ensure we have accessible, safe housing for people to live in permanently.

9. Proposed 10-year budget (see page 10 for details)

Our draft budget, has an average rates increase for the average ratepayer of 5.3 percent after growth across the 10 years of the plan. We also propose setting a limit on how much we can raise from general rates - \$465m for each year across the first 3 years of the plan and, \$630m each year across years four to ten.

The first year of the plan has a rates increase of 13.5 percent (after growth) and there is an average of 9.9 percent (after growth) over the first three years. This is higher than previous plans because of the **key challenges** faced by the city including infrastructure, housing, earthquake strengthening and and COVID-19 impacts.. Therefore, we now require a step up in the level of rates we charge. Details of the key challenges are on pages 20 - 47 of the **Consultation Document**.

Our proposed budget also represents our highest ever level of capital investment in Wellington. It addresses the need for increased investment in our three waters infrastructure and transport network and seismic strengthening of key buildings, along with making progress against all our other priority community objectives.

Our debt levels for this plan, including the value of uninsured assets, range from 134 percent to 239 percent of our annual income. Our proposed limit is 225 percent.

We think this is a sensible limit on our borrowing to ensure that the impact on affordability of rates is maintained and leaves enough 'headroom' to ensure we can repay our debt, and respond to expected but unfunded and unexpected future events and opportunities.

Do you support the proposed 10-year budget?

<input checked="" type="checkbox"/> I strongly support the proposed budget	<input type="checkbox"/> I somewhat support the proposed budget	<input type="checkbox"/> Neutral
<input type="checkbox"/> I somewhat oppose the proposed budget	<input type="checkbox"/> I strongly oppose the proposed budget	<input type="checkbox"/> Don't know

If you stated in Question 9 that you are neutral or do not support the proposed budget.

Do you support increasing or decreasing spend?

<input type="checkbox"/> I support increasing spend in the current budget	<input type="checkbox"/> I support decreasing spend in the current budget	<input type="checkbox"/> I support keeping the budget the same but with some changes	<input type="checkbox"/> Don't know
---	---	--	-------------------------------------

## 10. Any other feedback on what is proposed for the 10-year Plan

### Future decisions

The Consultation Document also signals other decisions that are coming up in the time of this plan, but that we do not have enough information on at this stage for a detailed consultation.

### Other projects

We also have many other services and projects detailed in our Statements of Service Provision.

### Council Fees and charges

We have also made changes to some of our fees and user charges. More information on these are available on our website [wgtn.cc/ltp](http://wgtn.cc/ltp) and available at our libraries and service centre.

Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?

Empty response area for feedback.

[ltip@wcc.govt.nz](mailto:ltip@wcc.govt.nz)

**Wellington City Council Submission on 10-Year Plan and  
the Wellington Harbour Board Head Office and Bond Store (Wellington Museum)**

**To:** Wellington City Council

**Name of Submitter:** Heritage New Zealand Pouhere Taonga

1. Heritage New Zealand Pouhere Taonga (HNZPT) is an autonomous Crown Entity with statutory responsibility under the Heritage New Zealand Pouhere Taonga Act 2014 (HNZPTA) for the identification, protection, preservation and conservation of New Zealand's historical and cultural heritage.
2. Thank you for the opportunity to provide feedback on the proposed 10-Year Plan as it relates to funding for the seismic strengthening of the former Wellington Harbour Board Head Office and Bond Store, now the Wellington Museum.
3. The former Wellington Harbour Board (WHB) Head Office and Bond Store has a very high level of significance both individually and as a landmark component to the Wellington's heritage waterfront and cityscape. It is entered on the New Zealand Heritage List/Rārangi Kōrero as a Category 1 Historic Place (List No. 234). A Category 1 listing indicates that historic place is of special or outstanding significance to the nation. The building contributes to the proposed "Wellington Harbour Board Historic Area" and has further recognition, and associated protections, through its scheduling as heritage in the Wellington District Plan and inclusion as part of the Post Office Square heritage area.
4. The WHB Head Office and Bond Store has a high degree of architectural significance. Completed in 1892, it was designed by Frederick De Jersey Clere on reclaimed land at Queens Wharf and is a benchmark non-ecclesiastical building within his career. Best known for the design of scores of churches scattered mainly across the North Island, Clere was a versatile architect and among of New Zealand's preeminent practitioners in the late-nineteenth and early-twentieth-century. For the WHB Head Office and Bond Store, Clere formulated an elegant Second Empire architectural design that also evoked modernity and solidity through its relative plainness and concrete construction.

5. The WHB Head Office and Bond Store has a high degree of historical significance as a symbol of the successful development of Wellington's port, and in the waterfront's revitalisation as shipping traffic shifted to container port to the north. The building ceased to be used by the Harbour Board in 1954 and the building was donated to Wellington City for use as a maritime museum. Its history as a museum is now equal to the length of its use for port activity and can be considered a harbinger of the revitalisation of the historic port and waterfront for civic means that has occurred over the past generation.
6. As the lead national heritage agency, HNZPT understands the challenges facing heritage property owners—both public and private—with regard to seismic risk. HNZPT is particularly aware of the needs and cost of seismic strengthening as steward for a range of important Wellington heritage places, including its own Old St Paul's, which recently underwent a successful \$3 million seismic strengthening and systems upgrade, and Turnbull House, which is earthquake prone and soon will be strengthened as part of project estimated to cost tens of millions of dollars.
7. The costs of upgrading and strengthening any building—heritage or otherwise—are significant, but positive outcomes go far beyond health and safety and asset management, particularly, when considering conservation of the historic built environment. Heritage is vital to understanding a society's past and present and in shaping its future. It provides a tangible touchstone to history and provides an anchor for the telling of diverse stories. It also provides colour, uniqueness, and appeal to cityscapes at a time when new development is not often distinctive nor marks a place as local. Finally, at a time when New Zealand, and the world, grapple with the realities of climate change, retention of existing buildings is a the most sustainable approach as the building endures and the materials and energy utilised in creating them do not end up at the landfill, and conservation work supports tradespeople and their ongoing specialist skills in the construction industry.
8. HNZPT understands that Wellington Museum, located in the highly significant WHB Head Office and Bond Store, requires strengthening, both to the structure above ground as well as the foundations below. Current estimates place a single project which includes extensive strengthening work at roughly \$38 million, but if two-staged project with above- and below-ground works separated into two phases at nearly \$48 million (\$21 million for the above ground and \$27 million for the below ground). An additional \$6 million will be spent by Experience Wellington on the refurbishment of the Wellington Museum.
9. HNZPT is heartened to see that Wellington City Council, the owner of the WHB Head Office and Bond Store, has promised \$21 million to complete the above ground strengthening works. This shows leadership as a heritage property owner and is also an indicator of the Council's commitment to the resilience and liveability of the city, particularly at a time when the Council is facing a range of funding priorities and pressures.
10. HNZPT is advocating that Wellington City Council considers full funding of single project rather than to approach it in two stages. A single project will assure that the project work is integrated and provides a strengthened and much safer building for public use and enjoyment; will limit operational disruption, and the income-producing activities, of the Wellington Museum; and is likely to provide greater control of ultimate project expense.

11. HNZPT most vigorously supports an approach whereby the funds to complete the full strengthening programme in a single stage are made available through an immediate appropriation. However, if such an approach is not tenable, we can support a second alternative whereby funding for the second stage is made available through the Long-Term/10-Year Plan for Wellington City.

Thank you again for the opportunity to provide input in the consultation process. As evidenced by this submission, Heritage New Zealand Pouhere Taonga feels strongly about the importance and role of the Wellington Harbour Board Head Office and Bond Store to the city and the well-being of its residents, present and future. Please contact us at this office if you would like any further discussion or clarification of this letter.

Nāku noa, nā

# Submission form

## Kōrero mai mō te mahere 10-tau Have your say on our 10-Year Plan

All submissions must be received by **midnight Monday 10 May 2021**.

You don't have to give feedback on every decision - just choose the ones you're interested in. You can only submit once. You can include supporting information along with your submission.

Before you start, read about our priorities and projects in our consultation document. There are copies available at your local library and our Service Centre at 12 Manners Street, or visit [wgtn.cc/ltp](http://wgtn.cc/ltp).

### Why we're collecting this information

Your feedback matters. This plan is about the future of Wellington and it affects everyone who lives and works here. That's why we want to hear from as many people as possible. Your views will inform the next steps we take.

### Privacy statement

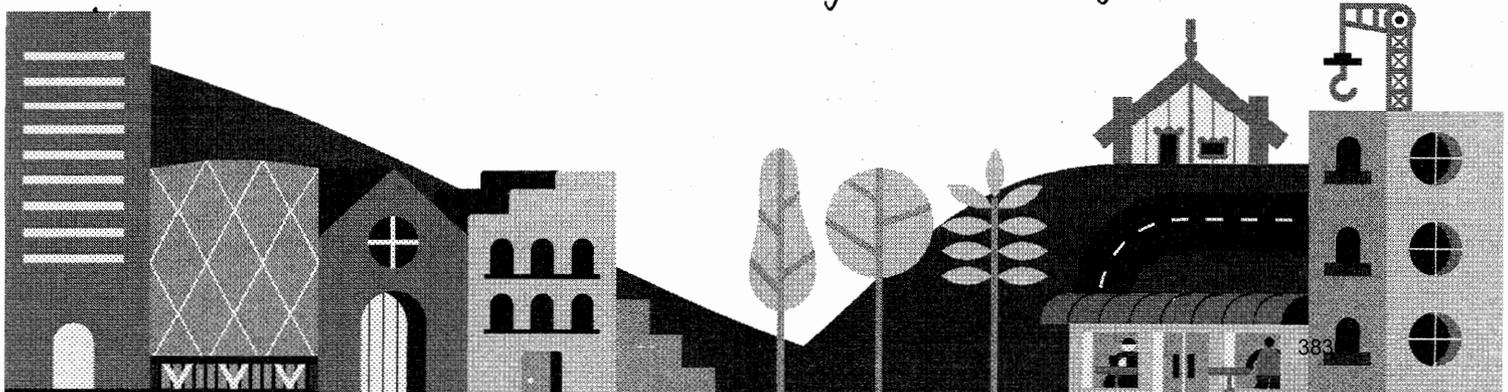

All submissions (including names and contact details) are provided in their entirety to elected members. Submissions (including names but not contact details) will be made available to the public at our office and on our website.

Your personal information will also be used for the administration of the consultation process, including informing you of the outcome of the consultation.

All information collected will be held by Wellington City Council, 113 The Terrace, Wellington, with submitters having the right to access and correct personal information.

Full name: <i>Lewis Gaire Herdman Thompson</i>		
<b>Contact details</b>		
Address:		
Phone number:		
Are you making this submission as an individual or on behalf of an organisation?		
Individual	Organisation: <i>Thompson Property Group</i>	
What is your connection to Wellington? (tick all that apply)		
<input checked="" type="checkbox"/> I am a Wellington City Council ratepayer	<input type="checkbox"/> I live in Wellington	<input type="checkbox"/> I work in Wellington
<input checked="" type="checkbox"/> I own a business in Wellington	<input type="checkbox"/> I study in Wellington	<input type="checkbox"/> I am a visitor to Wellington
Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?		
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No	
If yes - We are offering two ways of speaking to Councillors about your submission. (Please tick which option(s) you would prefer?)		
<b>Oral forum</b> (informal, 60min facilitated table discussion with 2 to 3 Councillors and other submitters)	<input type="checkbox"/> Morning	<input type="checkbox"/> Afternoon
	<input type="checkbox"/> Evening	
<b>Oral Hearing</b> (formal hearing with set times to speak to full Council, 5mins per individual, 10mins per organisation)	<input type="checkbox"/> Morning	<input type="checkbox"/> Afternoon
	<input type="checkbox"/> Evening	

*Not sure would depend on date and my travel arrangements*

## Our seven big decisions

The next seven questions relate to the big decisions for the 10-year plan.

- **Decision 1:** Increasing spending on the three waters network to fix the pipes
- **Decision 2:** Taking responsibility for the ownership of wastewater laterals
- **Decision 3:** Increased investment in cycleways
- **Decision 4:** Implementing our Te Atakura, First to Zero action plan
- **Decision 5:** Choosing a plan for earthquake-prone Council Office buildings
- **Decision 6:** Funding the Central Library strengthening and upgrade
- **Decision 7:** Choosing a plan for sludge minimisation

Detailed information on these decisions are on pages 20 to 47 of the Consultation Document.

**Question 8** in this submission form is a place for you to comment or provide any other feedback on the decisions.

You are also able to attach further information to your submission at the end of this form.

1. Investment in three waters infrastructure				
<p>There are three different levels of investment in the three waters network to consider. Our preferred level of investment is the <b>Enhanced</b> option, which focuses on improving the condition and reliability of the network in an affordable and sustainable way.</p> <p>Problems with pipes have been a long time in the making, and we cannot fix everything at once. The Enhanced option represents a \$2.4b investment in our three waters network and is the middle-ground option that we are confident of being able to deliver in this plan. We will be able to review the level of investment in our next Long-term Plan review in 2024, when we will have more information on the network.</p> <p>A summary of the proposed investment in in the three waters network is on pages 22 - 26 of the Consultation Document.</p>				
Which of these options do you prefer?				
Enhanced (\$2.4b Council's preferred option)	Maintain (\$2.0b investment - lower rates and debt) ✓	Accelerated (\$3.3b investment - higher rates and debt)	None of these options	Don't know

2. Wastewater laterals			
<p>Currently residents are responsible for the maintenance of the pipes connecting their property to the wastewater (sewerage) main underneath the road corridor. These are called wastewater laterals.</p> <p>We propose that the Council takes ownership of the laterals between the property boundary and the sewerage main underneath the road corridor.</p> <p>A summary of the proposal to take responsibility for wastewater laterals is on pages 28 - 29 of the Consultation Document.</p>			
Which of these options do you prefer?			
✓ Take ownership (Council's preferred option, \$32m investment)	No change (no change in investment, rates or debt)	Neither of these options	Don't know

Debt and Rates

Like all councils there needs to be a good hard look at all council expenses to see how things are being done, why it is being done, could it be done more efficiently, could it be done more quickly and could it be done with less staff.

Also is it really necessary to keep the city running well or is it a nice to have or a trendy thing to have. Another way to look at it is will it wait and save money and debt now so that we will be in a better position in the future to build or purchase something that will be a real asset to the city and its people rather than wasting it on some trendy temporary expenditure.

The 2 extra Maori Co-opted ~~committe~~ Council Committee Members  
I object to this being approved as they are not elected by the voters yet are costing I understand \$220,000 per year, and have voting rights.

Climate Emergency

Council should only be funding what is needed when it is needed rather than spending \$18 - \$30m of money that has to be borrowed or extracted from unwilling rate payers, for example electric cars are costly to buy, their production creates pollution and in future disposal of their batteries creates another pollution problem.

## 10. Any other feedback on what is proposed for the 10-year Plan

### Future decisions

The Consultation Document also signals other decisions that are coming up in the time of this plan, but that we do not have enough information on at this stage for a detailed consultation.

### Other projects

We also have many other services and projects detailed in our Statements of Service Provision.

### Council Fees and charges

We have also made changes to some of our fees and user charges. More information on these are available on our website [wgtn.cc/ltp](http://wgtn.cc/ltp) and available at our libraries and service centre.

Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?

Fees and charges need to be kept as low as possible to encourage development of needed facilities and housing. An example of what I believe is excessive is that for a joinery workshop in Tawa we were required to get a Crime Prevention Report, which had to be peer reviewed. A total waste of money and time as any practical person could have said it in one or two paragraphs instead of a very padded 17 page expensive report. Is the parking department on a commission payment ~~of~~ not have a fine cancelled when there is a fully fair and reasonable explanation for example expired W.O.F. - car parked waiting for garage to repair. Also I know of a case of a person ticketed for parking in front of his own driveway.

### Selling Assets

I would support selling under utilised ones not likely to be required in the future but not shares in the Airport.

Comments

**9. Proposed 10-year budget (see page 10 for details)**

Our draft budget, has an average rates increase for the average ratepayer of 5.3 percent after growth across the 10 years of the plan. We also propose setting a limit on how much we can raise from general rates - \$465m for each year across the first 3 years of the plan and, \$630m each year across years four to ten.

The first year of the plan has a rates increase of 13.5 percent (after growth) and there is an average of 9.9 percent (after growth) over the first three years. This is higher than previous plans because of the **key challenges** faced by the city including infrastructure, housing, earthquake strengthening and and COVID-19 impacts.. Therefore, we now require a step up in the level of rates we charge. Details of the key challenges are on pages 20 - 47 of the **Consultation Document**.

Our proposed budget also represents our highest ever level of capital investment in Wellington. It addresses the need for increased investment in our three waters infrastructure and transport network and seismic strengthening of key buildings, along with making progress against all our other priority community objectives.

Our debt levels for this plan, including the value of uninsured assets, range from 134 percent to 239 percent of our annual income. Our proposed limit is 225 percent.

We think this is a sensible limit on our borrowing to ensure that the impact on affordability of rates is maintained and leaves enough 'headroom' to ensure we can repay our debt, and respond to expected but unfunded and unexpected future events and opportunities.

**Do you support the proposed 10-year budget?**

I strongly support the proposed budget	I somewhat support the proposed budget	Neutral
I somewhat oppose the proposed budget	<input checked="" type="checkbox"/> I strongly oppose the proposed budget	Don't know

**If you stated in Question 9 that you are neutral or do not support the proposed budget.**

**Do you support increasing or decreasing spend?**

I support increasing spend in the current budget	<input checked="" type="checkbox"/> I support decreasing spend in the current budget	I support keeping the budget the same but with some changes	Don't know
--	--	---	------------

### 3. Cycleways

Cycleways is an area where we have ambition to seriously lift our game - we'd like to build a network of connected and safe cycleways that allow Wellingtonians to be able to choose cycling as a mode of transport. Our full programme for the network can be viewed at [transportprojects.org.nz](http://transportprojects.org.nz) and if all of the routes were progressed, there would be a \$226m investment across the 10 years of this plan.

Our preferred option is a \$45m or 60 percent increase in funding for cycleways than what was planned in the previous Long-term Plan. It will progress \$120m of the full \$226m programme

We believe the high investment programme option balances the need for increased investment in this area with what is affordable for Council and what we will be able to deliver. It allows time in the programme for robust community engagement and to build capacity in the Council and the sector for the full programme to be eventually delivered.

A summary of the proposed investment to build more cycleways is on pages 30 - 33 of the Consultation Document.

Which of these options do you prefer?

High investment programme (Council's preferred option, \$120m capital investment)	✓ Finish started projects (\$29m capital investment, lower debt and rates)	Medium investment programme (\$39m capital investment, lower debt and rates)
Accelerated full investment programme (\$226m capital investment, higher debt and rates)	None of these options	Don't know

*Give priority to those that improve safety for cyclists.*

### 4. Te Atakura First to Zero (Climate Change)

Te Atakura - First to Zero is our response to the climate and ecological emergency we declared in 2019 but it is not yet funded.

Te Atakura is intended to ensure sufficient activity is undertaken in this decade to reduce our emissions. Council can do this by supporting the transport mode-shift projects, as well as encouraging the uptake of electric cars, providing seed funding to leverage businesses and community impact and supporting residents to be motivated to take action.

Our preferred option is to fully fund Te Atakura, which is included in our 5.3 percent average increase across 10 years.

A summary of the proposed investment in Te Atakura - First to Zero Action Plan is on pages 34 - 37 of the Consultation Document.

Which of these options do you prefer?

Fully fund the programme (Council's preferred option, \$29.9m investment)	Medium investment with savings (\$25.4m investment, lower rates and debt)
Low level of funding (\$18.1m investment, lower rates and debt)	✓ None of these options
	Don't know

*Only do what is necessary at any one time*

### 5. Te Ngākau Civic Precinct - Council office buildings

Te Ngākau Civic Square is the musical, creative and democratic heart of Wellington but it has significant resilience challenges.

While we are still working through finalising the framework for Civic Square, a specific decision is required in this Long-term Plan with respect to the future of the Council office buildings - the Municipal Office Building (MOB) and the Civic Administration Building (CAB).

As the two buildings are connected, and have similar resilience issues, it is important that the future of them is considered together.

Our preferred option is to demolish and rebuild the MOB and CAB buildings in partnership with private investment through a long-term ground lease for the site.

Combining a MOB and CAB development would enhance this opportunity and significantly decrease the need for additional Council borrowing and ratepayer funding to address these impaired buildings.

A summary of the proposed approach to developing of Te Ngākau Civic Square on pages 38 - 41 of the Consultation Document.

Which of these options do you prefer?

Demolish and site developed through long-term lease (Council's preferred option)	Proceed with base build proposal for public purposes (higher debt and rates)
Retain and seek to repurpose (higher debt and rates)	None of these options
Sell to support development (no debt or rates impact)	✓
	Don't know

*Look at the most innovative and economical way to ensure that these buildings are not earthquake prone.*

## 6. Fixing the Central Library

Wellington's much-loved Central Library was closed in March 2019 following an engineering assessment saying that the way the floor was designed presented a high level of potential failure in a significant earthquake.

After hearing from Wellingtonians in the 2020 consultation, Council agreed to recommend the high-level remediation option to be part of this plan. This option makes the building resilient to future shocks and supports our ability to deliver an adaptable modern library service, while preserving the buildings heritage. It also allows us to mitigate some climate change impacts in the future.

Now there are choices about how to fund the \$187.4m library remediation project, and when the project should take place.

The preferred option, includes the Council agreeing to temporarily breach its debt limit of 225 percent to ensure the library can be refurbished in the original timeframe and remain in public ownership. Our debt level will remain at 225 percent, and Council has agreed to accept the breach in the first three years of this plan. This breach will be mitigated by any capital underspend being used for the library project rather than on new projects. Our debt level will be back below our limit by year 4 - 2024/25.

A summary of the proposed investment to fund the fixing of the Te Ngākau Civic Square Central Library is on pages 42 - 44 of the Consultation Document.

Which of these options do you prefer?

Strengthen now by temporarily exceeding debt limit (Council's preferred option, additional 0.79% rates increase)	Council to strengthen Central Library later (complete in 2028 instead of 2025, additional 0.83% rates increase)	
Strengthen now by increasing rates further (additional 1.79% rates increase)	None of these options ✓	Don't know

*Look at costings and timing of other projects to avoid breaching borrowing limits*

## 7. Reducing sewage sludge and waste

One of the largest waste categories at the Southern Landfill is wastewater (sewage) sludge. This accounts for about a quarter of the waste that enters the landfill.

Through Te Atakura (our Zero Carbon Plan) and our Regional Waste Minimisation and Management Plan we have formally committed to reducing carbon emissions and reducing waste by a third. Minimising wastewater sludge is a necessary first step to achieving these objectives.

We need to break the link between the Southern Landfill and wastewater sludge and stop pumping sludge across the city, as 2020 highlighted the serious resilience issues and the significant consequences of failure.

Our preferred option is to invest in a sludge minimisation programme through another funding source. This means the project would not be funded by Council, but if it is funded through a Special Purpose Vehicle, a levy of about \$70-\$100 per year will be charged to each ratepayer.

A summary of the proposed investment in sludge and waste minimisation is on pages 45 - 47 of the Consultation Document.

Which of these options do you prefer?

Sludge minimisation through alternate funding (Council's preferred option, \$147m-\$208m capital investment funded through a levy, no additional rates increase)	No change in current practice (no change to investment, rates or debt) ✓	
Invest in technology at Southern Landfill (\$86m-\$134m capital investment and higher rates)	Sludge minimisation - through Council funding (\$147m-\$208m capital investment, above debt limit and higher rates)	
None of these options	Don't know	

*Needs to be left when not same pressure on funds, monitor research on subject*

## 8. Feedback on these decisions

Do you have any comments you would like to provide around why you selected your preferred option to any of these decisions, or why you don't support any of the options we proposed? If yes please indicate what decision/s you wish to provide comment on.

Investment in three waters infrastructure	Wastewater laterals	Cycleways
Te Atakura (climate change)	Central Library	Sludge and waste minimisation
Te Ngākau funding for future work	None of these	

If the space on the next page is not adequate for your comments, please feel free to attach supporting information to the submission. Please be clear what decision you are commenting on.

**SUBMISSION RE WELLINGTON CITY COUNCIL'S  
LONG-TERM PLAN**

I submit that any cash-flow of ratepayers' expenditure planned for infrastructure at Shelly Bay be more clearly identified in the Plan.

Also, that, before Council officers make any (further) agreements regarding the road to Shelly Bay, they present their proposals publicly to elected members together with explanations about a note given to elected members just before they voted to sell Council land at Shelly Bay that ratepayers' outlay on changes proposed at Shelly Bay would not exceed \$!0,000,000.

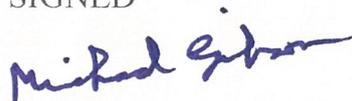

(The fear is that this unsigned note, which was secretly circulated at the last-minute, was a wrong and unjustified attempt to persuade elected members to sell Council land to a developer who was known to its writer - see under the heading "Funding":

"Q. Infrastructure costs: Can the rate payer be assured that we will be paying maximum \$10m on infrastructure costs? . . . Yes . . . .")

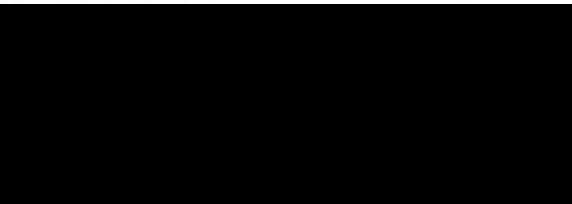

I further submit that the presentation requested above includes suitably redacted details of a conversation which Mayor Foster is said to have "described as an 'abrupt' change in the council's views about safety concerns relating to the narrow Shelly Bay Rd." (The DominionPost, May 7 2021)

I ask to be heard on my submission by way of oral presentation.

SIGNED

Michael Gibson

May 10 2021

## Submission #: 1533

To Wellington City Council,

Recently to get student participation in Wellington City Councils Long Term Plan, the Greens at Vic Group set up a stall in the Hub. The stall was held on April 17th and May 3rd for 2 hours each day. This stall had information on the LTP and different options for varying levels of participation. This effort had minimal effect in getting more people to make submissions; only a few walked away with booklets and submission forms. However, the stall did succeed in getting more people to vocalise on local issues and gain awareness of the LTP.

A common theme was support for decolonisation and Māori rangatiratanga. People wanted more Māori representation, consultation and Māori spaces. Students are becoming increasingly aware of the lack of enforcement of Te Tiriti. They want to see a decolonised future for their local government. This was recognised by both Māori and Pākehā students.

There was also, unsurprisingly, strong support for climate efforts. People wanted to see more green spaces and better recycling programmes. People acknowledged that the council recognised the need for more climate initiative focused funding. However, it was unanimous in saying that people wanted more radical change than what was presented in the LTP.

Students often spoke about transport in conjunction with climate issues. There was strong support for safer cycling lanes. The failing bus service causes much frustration, especially as people want to support sustainable modes of transport. Many people frequently experienced bus cancellations and “ghost buses”. They commented that it would be great to have better communication surrounding these.

**Students said that they do not feel safe in their city.** This has been explored heavily in the media, and I am sure you know these issues. One way students suggested to make them feel safer was better street lighting. Many streets are underlit or pathways that are not lit, which makes people feel unsafe to walk around the city.

Students supported the call for the urgent address of the city’s plumbing. They recognised that this was something essential and would be better for the residents of Wellington and the environment. Whilst students did not feel equipped enough to comment on issues of infrastructure directly, they had full support in the council taking strong action to resolve these issues.

The Central Library was spoken about more than I was expecting. Students missed having space in the city to hang out and do something for free. People recognised the importance as a space not only for study, but for community. They spoke of the homeless community needing a space to go to in the cold and have a sense of place.

The Civic Precinct was not strongly commented on as many people did not know what it was as they were not from Wellington and did not know what it was like prior to being closed off. From my personal view as someone born and raised in Wellington, I heavily support option 1. Whilst I am not too tied to the architecture, I remember it being an important hub for Wellingtonians to sit in the Summer sun and make full use of the city’s assets, the library, the art gallery and being in close proximity to the council. At the Civic precinct, where you go to either enjoy an ice

cream, start a march or protest. It is a place of the people of Wellington, so it should remain as such.

The cost of living and inadequate rental properties caused stress amongst many students. It was often the thing they hated most about Wellington. Students were constantly complaining about steep rent and poor housing quality. These issues caused students to comment on how the council would not care about what they have to say as they are not homeowners.

You may question the relevance of this submission to the Long Term Plan. I argue that this submission is directly relevant to the inaccessibility of council consultation. The submission form was limited to the audience as it took too much time and looked like hard work for something they felt ill-prepared for. As the stall was in an environment where people were there for different purposes (study and work), people did not have the time or the headspace to contribute immediately. However, if the stall were not there, many people would not even know of the existence of the LTP.

The Q&A session at Te Papa was great, but only if you took time out of your day to go. As I am sure many of you have realised, those who went to events like these were already going to submit and already had a stance. The community pop up events were at a time when most people were studying or working, which greatly limits who you are going to capture. Why not have a stall in the middle of Courtenay Place, Lambton Quay or in the middle of food courts? If you really want people to submit on the LTP, you have to go to people, not wait for them to come to you.

As many topics were around things like infrastructure and transportation, people understood the importance, but not necessarily how to address them. A simple what do you like/dislike about Wellington board was far more appealing. Many people came off as having imposter syndrome as they did not feel like it was their place to comment on these issues. Even if they could verbally articulate them, they struggled to write something down. This speaks to a broader problem where we see political power and voices as something for the elite. We often see highly educated people with titles talk about political issues as if they are the only people entitled to have a political voice. Most people do not have time to engage in politics and are especially unmotivated when they do not feel like they will say matters or hold any effect.

I hope my submission provides insight to assist in future consultation processes. I want to speak to my submission in person to provide an opportunity for questions and further discussion.

Thank you,  
Franki Tate

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library

---

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. Library Comments: I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington.

---

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

---

**Q19. Do you support the proposed budget?**

not answered

---

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards.

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily. Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making. Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. **Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

<p><b>Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)</b></p>	<p>not answered</p>

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.
