Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

<p><b>Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)</b></p>	<p>not answered</p>
---	---------------------

<p><b>Q19. Do you support the proposed budget?</b></p>	<p>not answered</p>
--	---------------------

<p><b>Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?</b></p>	<p>not answered</p>
---	---------------------

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

- Q2. **Phone number:** not answered
- Q3. **Are you making this submission as an individual or on behalf of an organisation?** Individual
- Q4. **What organisation are you submitting on behalf of?** not answered
- Q5. **Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?** No
- Q6. **If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer?** not answered
- Q7. **Oral forum time** not answered
- Q8. **Oral hearing time** not answered
- Q9. **Which of these options do you prefer? (3 waters decision)** Option 3. Accelerated (\$3.3bn investment – higher rates and debt).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** not answered
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** not answered
- Q14. **Which of these options do you prefer? (Central Library decision)** Option 1. Strengthen now by temporarily exceeding debt limit (Council's preferred option, additional 0.79% to rates).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** not answered

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library

---

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

---

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

---

**Q19. Do you support the proposed budget?**

not answered

---

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

| Q6. If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer? | not answered  |
| Q7. Oral forum time   | not answered  |
| Q8. Oral hearing time   | not answered  |
| Q9. Which of these options do you prefer? (3 waters decision)   | Option 3. Accelerated (\$3.3bn investment – higher rates and debt).   |
| Q10. Which of these options do you prefer? (Wastewater laterals decision)   | not answered  |
| Q11. Which of these options do you prefer? (Cycleways decision)   | Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)                    |
| Q12. Which of these options do you prefer? (Te Atakura Funding decision)  | Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).                                 |
| Q13. Which of these options do you prefer? (Civic Precinct decision)  | not answered  |
| Q14. Which of these options do you prefer? (Central Library decision)   | Option 1. Strengthen now by temporarily exceeding debt limit (Council's preferred option, additional 0.79% to rates). |
| Q15. Which of these options do you prefer?(Sewage sludge and waste decision)  | not answered  |

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library

---

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

---

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

---

**Q19. Do you support the proposed budget?**

not answered

---

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

General I want Wellington to be a vibrant and people's centred city. I want my children to want to live here and continue to attract a diverse range of people and industries. We need to invest in infrastructure that had been under-invested in for far too long and be prepared for continued population growth and urbanisation.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on. General Electric buses now! The carbon monoxide from buses, cars and commercial /trade vehicles is so high that no one is safe to walk or cycle on Karori Road. Suggest you get the levels monitored. Understand the No 2 route will be all electric buses before end of 2021. Is this on target? WCC and GWRC must take a stronger approach to education on the urgency of climate change, what both organisations are doing (just main points) and what citizens must try to do. This information should be displayed in bus shelters now displaying adverts for KFC, Coca Cola, etc, and these companies should be invited to sponsor this vital information. Just 3 main points on council's work, and 3 on what citizens must do; change them every month to a fresh set of information, recycle the first lot in month 3 and so on, regularly updating and recycling. In 10 years time I want to see that big changes to deal with climate change have been in place for years, everyone is onboard and clear about the best ways to address this challenge and comments are of the nature 'why didn't we do this sooner'.

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

General We have the bones of a little city with the potential to be the coolest little city in the world, with the scatterings of parklands, ocean fringes and forest parks but we need to interconnect the whole thing with an aggressively progressive mindset. The one thing that continues to hold this ugly duckling back from its full potential as the most beautiful little city is the fact that our streets are filled with the noise and pollution of cars. How beautiful it would be to bike everywhere I wanted to go and only have to use my car on weekends to go further afield. The old excuse of what about large purchases and transporting them home is now void with the efficiency of delivery services. When I compare Wellington to the beautiful cities in Europe I have lived in the one ingredient holding it back is bicycle lanes that cover the entire city. Wellington is a compact city and the time it takes to cycle is often quicker if not the same than driving. Please please please bring this city into the modern age. We are becoming another old rundown inefficient city that has cars clogging up every street, with the added degradation of noise and pollution. As I sit here in my apartment in the aro all I can hear is traffic.

The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

General Because I work and play in this city and I want to see my two-year-old son grow up with fully operational facilities, a safe way to cycle and a city and region that supports sustainability to reduce the impacts of climate change.

| Q3. Are you making this submission as an individual or on behalf of an organisation?  | Individual  |
| Q4. What organisation are you submitting on behalf of?  | not answered  |
| Q5. Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?  | No  |
| Q6. If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer? | not answered  |
| Q7. Oral forum time   | not answered  |
| Q8. Oral hearing time   | not answered  |
| Q9. Which of these options do you prefer? (3 waters decision)   | Option 3. Accelerated (\$3.3bn investment – higher rates and debt).   |
| Q10. Which of these options do you prefer? (Wastewater laterals decision)   | not answered  |
| Q11. Which of these options do you prefer? (Cycleways decision)   | not answered  |
| Q12. Which of these options do you prefer? (Te Atakura Funding decision)  | Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).                                 |
| Q13. Which of these options do you prefer? (Civic Precinct decision)  | not answered  |
| Q14. Which of these options do you prefer? (Central Library decision)   | Option 1. Strengthen now by temporarily exceeding debt limit (Council's preferred option, additional 0.79% to rates). |
| Q15. Which of these options do you prefer?(Sewage sludge and waste decision)  | not answered  |

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Te Atakura (climate change)  
Central Library

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily. Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on. General Wellington has so much potential to continue to lead the world and serve its residents. I want to see that continued!

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

<p><b>Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)</b></p>	<p>not answered</p>

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

General As a capital city, Wellington has a particular responsibility to show leadership in excellent local government by creating working relationships with local iwi and hapū based on Treaty of Waitangi and indigenous people's rights and together building a sustainable future for the city.

General Te Whanga-nui-a-Tara is one of the most beautiful places I've ever lived in. However, we are in desperate need for an active transport mode that works for every single person in our community to thrive. By putting climate and social justice at the centre of our decisions and plans today we will be able to have a more inclusive city and region that works for everyone in our society.

I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

General I have lived here my whole life and I want my kids to have the same or better experiences in the Wellington area during their lifetime

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on. General Wellington has the opportunity, unlike other regions who have longer distances to travel and genuinely do require cars, to really become a trend setter for regenerative energy, better forms of transport and listening to its community.

- Q9. **Which of these options do you prefer? (3 waters decision)** Option 3. Accelerated (\$3.3bn investment – higher rates and debt).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** not answered
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** not answered
- Q14. **Which of these options do you prefer? (Central Library decision)** Option 1. Strengthen now by temporarily exceeding debt limit (Council's preferred option, additional 0.79% to rates).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** not answered

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library

---

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

---

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

---

**Q19. Do you support the proposed budget?**

not answered

---

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

General I love the vibrant life of Wellington - the arts and culture, the great coffee bars, friendly people on the streets, ease of walking. So let's build on that - with more venues for the arts, with taking cars out of central Wellington, with a better public transport system - let's make Wellington a truly international city.

General Because we have the potential to be! It might be difficult to take the first step but someone needs to do it, and we are arguably best positioned of all Aotearoa's major cities to do so. I want my kids to be able to grow up here and have the same kind of childhood I was so privileged to have. Be brave! Ngā mihi nui.

I am writing to touch base on the Skate community engagement letter. To be apart of the wellington skateboarding community over the past 15 years has been a true blessing, we have so much potential to grow and expand our sport if we act on what is said in the skate community engagement letter. Public skater-free spaces are the way to go, to create these spaces is simple. Designated spaces in open areas like the waterfront could easily have some skate-able art made by skateboards or made For skateboarders like in Europe, where councils endorse skateboarding spaces to create places for people to meet, gather and play. These spaces could be scattered throughout the city and suburbs and done at a very cheap cost compared to building entire new skateparks. Would love to get a face to face meeting set up with council members and wellington public skateboarders.

My name is Bailey Te Maipi, I am the founder of Waa Hine Skate, a skateboarding school focusing on the empowerment of wāhine in the skateboarding scene. I am writing to you as I have concerns that there has been little to no follow up with the skateboarding community and facilities since the "Skate Community Engagement" survey completed in early 2020. I am aware that there are many other projects and unforeseen costs that the Wellington City Council has to complete and handle, but there are many ways that the council can support the skate community in ways that don't cost an arm and a leg. E.g. • Taking down unnecessary "No Skateboarding" signs • Making more public areas skate friendly, as seen by the Hutt City Council buildings and in Napier • More funding given to Wellington Skate Association in order to allow them to work with the skate community in a more productive way, which will be good for them as well as the council In your findings you stated that "males were more likely to participate...than females" and that "in comparison to other sport and recreational activities, participation rates in skate are low (in ages 5-17)". But you also found that "female participation and interest in skate has increased significantly", with 35% of all respondents to the survey identifying as a woman or girl. I can 100% support this from what I have seen over the last 3-4 years in the Wellington skate scene, with over 30 wāhine showing up to a wāhine only skate jam last month, held at Te Papa and double the amount of wāhine entries (than last year) into Bowlziilla at the end of last month. This data, as well as my lived experience and observations proves that there is a growing interest in skateboarding within wāhine and I am working on continuing that growth, especially within the 5-17 age range. If there is more funding set aside for kaupapa such as Waa Hine Skate, Onboard Skate and Wellington Skate Association you will see so much positive growth from the Wellington community as a whole, not only because of the physical benefits, but the mental benefits too. As well as the growth recorded in this survey, there has also been a worldwide growth in the sport over lockdown, as skateboarding was something that could be done without being in contact with anyone else. This article from the Guardian gives many examples of kids and adults giving skateboarding a go and finding a new passion, which i'm sure was replicated all over the world. All this to say, skateboarding is such an awesome sport and skaters deserve to be respected.

Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?

In line with democracy, I select the Option 4 for the 10-year plan along with: Allocate \$2m to minor works program annually as opposed to the \$1m p.a, indicated currently. That the total bicycle budget be ring fenced to be solely spent on bicycle route improvements and not allocated to other underfunded / overspent projects outside of allocation to bicycle improvements. This will cover all unspent funding on bicycle improvements that remain unspent in the financial year. This will ensure that the intended purpose of the budget allocation is utilized for the purpose proposed. That contractors be selected that competitive to ensure maximum efficiency in deliverer both economically and quality. Yes, that can involve completing continuously from both ends of the proposed cycle route to ensure that the public can appreciate the new facilities and utilize them accordingly at an earlier date than otherwise. That only cycle routes be completed as opposed to cycle lanes that being put up intermittently around town currently. I would not recommend any child at 12 years use the current cycle lanes as they are dangerous. That cycle route completion be based on priority and number of individuals who utilize the routes currently. There must be a program of cycle routes completed that enable the contractors to invest in resources to complete the task and have an opportunity to have ongoing work . That temporary cycle routes be implemented as early as possible to test the situation. These can be low cost and for a minimum of 4 months. It is appreciated that winter is coming up at cycling in the city will decrease 10-15% due to the weather. I have no confidence that Lets get Wellington Moving is capable of delivering transport solutions for the public while appreciating that it is a collaboration of parties including the Greater Wellington Regional Council and NZTA. I have been unable to confirm from WCC staff the nature of the entity concerned, ie partnership, company or otherwise. I believe that the city needs to be designed for people not motor vehicles. I look forward to seeing the final 10 year plan and implementation.

Cycleways

Central Library

#### Q17. Your comments on the big decisions (optional)

The priority objectives of the LTP give mention to accessibility referenced to affordable Housing. It is important to consider access issues when planning how our communities and transport systems develop. Accessibility is an on-going goal rather than a set of minimal standards to be complied with. There is always room for improvement, especially as new and innovative approaches are constantly being developed. CCS Disability Action would recommend: 1) That access, - Universal Design - be applied to all projects and expenditure in the LTP, and that in housing, an aspirational level of no less than 15% of all new builds be fully accessible. That WCC consider how this could be applied through the building consent process. 2) That no one is left behind particularly in housing, transport and community, creative and cultural spaces. 3) That all the big decisions include a codesign process with disabled people. 4) We encourage Council to consider the needs of all their citizens, rather than focus narrowly just on efficient or cost-effective infrastructure and services. A narrow focus on efficiency can result in Councils cutting corners with access. This can have significant effects on the wellbeing of disabled people and our older population. 5) We recommend that Council collects regular accurate data on the ability of people with access needs to move around their community and access services (We can provide tools and advice to effectively do this). Disabled New Zealanders do not get a fair go. They do not get the same opportunities as non-disabled people. In the 2013 Disability Survey, disabled people compared to non-disabled people: were more likely to have no qualification and less likely to have a bachelor's degree or higher. had higher unemployment and lower labour force participation. were more likely to have lower incomes and live in lower-income households. were less likely to report a high level of life satisfaction. were less likely to feel safe at home or in their neighbourhood. were twice as likely to be the victim of violent crime. were more likely to report being discriminated against and more likely to be discriminated against more than three times over a twelve-month period. In the 2018 General Social Survey, disabled people under 65 compared to non-disabled people the same age: were 2.5 times more likely to experience material hardship. were 1.6 times more likely to say their housing was very unaffordable. were 2 times as likely to report being discriminated against. were 2.2 times more likely to rate their life satisfaction as a 6 or below (on a scale where 10 is the highest). were 1.9 times more likely to rate the wellbeing of their family as a 6 or below (on a scale where 10 is the highest); and were almost twice as likely to report being discriminated against.

Cycleways: Along with the planning for cycleways we recommend a significant investment in footpaths which gives many similar outcomes to cycling. That roading, cycleways, and pavements, become shared pathway conversations to meet the need of multimodal complete streets solutions. All prioritised users (that is pedestrians, public transport users, micro mobility users and cyclists) get benefit from the budgeted spend. Investment in maintenance of current pedestrian infrastructure should link to new projects to ensure full accessibility from home to destination. Additional budget for footpath maintenance is required to ensure a robust pedestrian infrastructure in the CBD and suburbs. Mobility car parks. We recommend that Council continue to provide Mobility Parking Spaces, especially in the the planning for the library, Civic Precinct and Michael Fowler Centre, and Let's get Welly Moving projects. That an increased number are provided, in the city and suburbs, to respond to the demands of the aging population growth and the changes to the Unitary Plan requirements for urban development. Information on the location of Mobility car parks should be easily found on Councils website along with any restrictions and costs. When considering Access, all types of mobility aides need to be considered. This includes motor vehicles adapted for mobility use. An aspirational number of mobility parking spaces could be included as close to 2 percent of all parking in line with Australian and Canadian cities. A lack of mobility car parks, plays a role in isolating people from their community and preventing them from accessing work, social, and educational opportunities. Information. Where possible this should include information being provided in a number of different ways, for example in Easy Read Format, providing opportunity for people with cognitive difficulties to be included in any consultation processes It is also important to consider that many people who experience living with a disability or impairment may not always have access to technology due to a number of factors, therefore some citizens are excluded from having their say. Wellington City Council has a vital role in ensuring the growing number of people with access needs can participate, contribute, and be included in their communities. Unless Council proactively ensures the accessibility of the community, we risk cutting more and more people off from their community and the services they require to live their daily lives. The impact of the aging population growth will bring an increase in the numbers of people with impairments and increase the need for Universal Design standards and the ability to make Accessible Journeys. Access and Inclusion are needed in the Plan.

Q18. **You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)** not answered

---

Q19. **Do you support the proposed budget?** I somewhat support the proposed budget.

---

Q20. **You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?** not answered

---

Q21. **Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

700km of footpaths to be maintained and upgraded will require significant budget increases.

- Q7. **Oral forum time** not answered
- Q8. **Oral hearing time** not answered
- Q9. **Which of these options do you prefer? (3 waters decision)** Option 3. Accelerated (\$3.3bn investment – higher rates and debt).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** not answered
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** not answered
- Q14. **Which of these options do you prefer? (Central Library decision)** Don't know.
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** not answered

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library

---

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

---

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

---

**Q19. Do you support the proposed budget?**

not answered

---

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on. General Its a lively city with a lot happening, In saying that it is hard to be a young person attempting to make a living. We are currently dealing with mouldy flats, failing infrastructure, and a lack of mana whenua identity. In 10 years, I want to see Wellington being the model livable city around the world with the best amenity - I want to see a council who are diverse in gender, ethnicity and background with the best interest of our community.

--	---

---

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

<p><b>Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)</b></p>	<p>not answered</p>
---	---------------------

---

<p><b>Q19. Do you support the proposed budget?</b></p>	<p>not answered</p>
--	---------------------

---

<p><b>Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?</b></p>	<p>not answered</p>
---	---------------------

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

General I'm sick of this short political timeframe influencing the ability for councils to put in longer term sustainable and carbon zero actions. We need to start prioritising cycling, investing intelligent design engagement with designing cycleways. They can't just be on the side of the road if we want kids, parents and older people to use them. They need their own space, take them through the green belt, create safer appealing options. Invest in a proper light rail route to the airport and through Newtown to island bay. Move to a car free city center. The options and changes need to be drastic to achieve anywhere near the carbon goals we need to. All of these point above are important and we need to stop worrying about rates increases and make some long term moves.

<p><b>Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?</b></p>	<p>not answered</p>
---	---------------------

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

--	---

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

<p><b>Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)</b></p>	<p>not answered</p>
---	---------------------

<p><b>Q19. Do you support the proposed budget?</b></p>	<p>not answered</p>

I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on. General Wellington has in recent years become the butt end of some bad joke. I have lived here almost my entire life and used to be proud to call Wellington my home. We have been plagued with issues seemingly to no end. Lack of parking is preventing people from reaching our CBD and causes a lot of our retail stores and restaurants to die out. The water infrastructure that has been identified years ago, neglected and woefully underfunded. House and rent prices skyrocketing while the quality of housing (especially rentals) declines and causes health issues for a great number of people. We are the capital city and should be leading our country and setting an example for the future.

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

General I have been a resident of Wellington for the last 40 years and I am planning to stay here for the next 20 years. All the above will make the city and exciting, safe and pleasant place to live.

General The city is at a cross roads. We could go with the old way - austerity, promoting the minority who drive cars, letting our environment and assets decline. We know that path is wrong. Or we could have just a little courage and do what's right for future generations and people here right now.

General Over the past year of living in Wellington, it has quickly become my home and a place where I feel a real sense of belonging. I am invested in the future and wellbeing of this city for all. However, I have major concerns on the future of this city in sustaining its culture as it grows. I am concerned about climate change affecting standards of living. I am concerned about the neglect or sidelining of interests of tangata whenua and our connection to the whenua. I am concerned about the lack of community and cultural spaces especially as the city grows and more people move here and whether we will start to feel more like a city and lose the community feeling that Wellington sustains. I am concerned about how safe my friends and I feel walking in the city both in the day and at night. I want to see Māori co-governance in council decisions especially as since moving to Wellington, I feel like my connection has weakened.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

General Lead the country and the world and demonstrate what a modern, sustainable city looks like through good planning and taking climate considerations in to account robustly!

---

- Q1. **Full name:** Joan Pettit
- Q2. **Phone number:** [REDACTED]
- Q3. **Are you making this submission as an individual or on behalf of an organisation?** Individual
- Q4. **What organisation are you submitting on behalf of?** not answered
- Q5. **Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?** No
- Q6. **If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer?** not answered
- Q7. **Oral forum time** not answered
- Q8. **Oral hearing time** not answered
- Q9. **Which of these options do you prefer? (3 waters decision)** Option 2. Enhanced investment (\$2.4bn - the Council's preferred option).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** Option 2. Take ownership (Council's preferred option, \$32m investment).
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 3: High investment programme (\$120m capital investment - Council's preferred option)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** Option 1. Demolish and site developed through long-term lease (Council's preferred option).
- Q14. **Which of these options do you prefer? (Central Library decision)** Option 1. Strengthen now by temporarily exceeding debt limit (Council's preferred option, additional 0.79% to rates).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 4. Sludge minimisation through alternate funding (Council's preferred option, \$147m to \$208m capital investment funded through a levy, no additional rates increase)

Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below

---

Te Atakura (climate change)

Q17. Your comments on the big decisions (optional)

Wellington has the opportunity to lead the world forward with its First to Zero plan. It is well thought out and stretches our possibilities.

---

Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)

---

not answered

Q19. Do you support the proposed budget?

---

I strongly support the proposed budget.

Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?

---

not answered

Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?

not answered

---

Cycleways  
Te Atakura (climate change)  
Central Library  
Sludge and waste minimisation

---

**Q17. Your comments on the big decisions (optional)**

Overall comment. We should think about containing the size of Wellington and keeping it as a boutique city. A value added proposition in itself. Cycleways are non essential at the moment and something that the city has demonstrated in inability to do well so far. Use the money for essentials. Climate change. Needs investing in but I'm not sure we are seeing the right objectives here. Rethink this area. Central library. Stop wasting money on an architectural non entity that doesn't feature on the world stage. Bring some vibrancy to this part of Wellington by selling off or leasing the site to a developer. I quite like the library in Brandon Street, what's the rush for a new one. Sludge and waste management. Stop being disingenuous by pretending a levy isn't a rate increase by any other name. Something needs to be done,

---

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

---

**Q19. Do you support the proposed budget?**

I somewhat oppose the proposed budget.

---

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

I support keeping the budget the same but with some changes.

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Keep to essentials and away from ideologies.

---

Cycleways

---

**Q17. Your comments on the big decisions (optional)**

I support Cycle Wellington's submission. Changes I'd like to see are: - ringfencing cycle funding - Double the Cycling Minor Works Budget to \$2 million per year - Prioritise network of cycleways in Northern cycleways higher (more utility, will help school kids get around). Lower priority of the Great Harbour way (this is mainly recreational and seawalls will use a lot of money. If roads need seawall protection, the funding should not come from cycle budgets). - Active transport infrastructure should be a priority. Reducing car dependence is key to reducing emissions.

---

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

---

**Q19. Do you support the proposed budget?**

Neutral.

---

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

I support increasing spend in the current budget.

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

not answered

---

Investment in three waters infrastructure  
Cycleways  
Sludge and waste minimisation

---

**Q17. Your comments on the big decisions (optional)**

With the recent issues around water and waste water. It's clear that something needs to be done. I'm not 100% sure of the right option. But any option is better than no option. Let's get it fixed. Cycles ways is a no brainer in a future of electric bikes.

---

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Hi, there are some local long term changes I would like to see. I've just turned 40 and have two young children. In my area of Lyall bay, I would like to see more changes that improve there well-being and connection to the land for our family. Things like more green spaces and trees lining streets. The new Heutepara park concept is one step in that direction. It would bring what is an under utilised area and make it a place people visit and connect. Toilets down that end of the beach would be of great use for the kids and adults. Easy decision...

Cycleways

---

**Q17. Your comments on the big decisions (optional)**

Cycleways need to be progressed as a network, not as fragmented sections, so that biking will be a safe, convenient and attractive choice that makes sense to a broad range of people to use to get around, free of congestion, emissions and cost - like in Christchurch. Intersections, driveways and local centres are where conflicting movements happen and this is where quality cycleways are most important. They need to be designed like mini-roads suitable for e-bikes travelling at decent speeds, not like mini-footpaths with tight corners and kerb ramps.

---

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

---

**Q19. Do you support the proposed budget?**

I strongly support the proposed budget.

---

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Infrastructure issues have been deferred for too long - we need to address them now for resilience and to enable growth. In future years we will need to address climate change adaptation, so it makes sense to fund deferred maintenance through rates rather than debt as future generations will have enough to deal with.

- Q7. **Oral forum time** not answered
- Q8. **Oral hearing time** not answered
- Q9. **Which of these options do you prefer? (3 waters decision)** Option 3. Accelerated (\$3.3bn investment – higher rates and debt).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** Option 1. No change (no change in investment, rates or debt).
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** Option 1. Demolish and site developed through long-term lease (Council's preferred option).
- Q14. **Which of these options do you prefer? (Central Library decision)** Option 2. Council to strengthen Central Library later (complete in 2028 instead of 2025, additional 0.83% rates increase).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 3. Sludge minimisation through Council funding (\$147m to \$208m capital investment, above debt limit, and higher rates)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Cycleways

---

**Q17. Your comments on the big decisions (optional)**

One change from the previous LTP is the reduction of priority for a connected cycle network in the northern suburbs of Johnsonville, Newlands and Paparangi. This network of cycle lanes in the northern suburbs would provide a connected network to support over 2500 children to cycle to school at Newlands College, Newlands Intermediate and four primary schools in the area. We were disappointed to see these cycleways given lower priority (6, see below) than the completion of the Great Harbour Way (5, see below) on the basis of "low value for money". The Great Harbour Way is a largely recreational route with extremely high costs due to the road-widening and coastal defences required to provide this route around the entirety of Wellington's coastline. These three sections amount to more than a quarter of the total budget. We asked WCC to be clear in the consultation around the co-benefits this would deliver in terms of protecting the existing road and properties from storms and sea-level rise. Only a very small proportion of the costs of these coastal projects are spent on cycleways. We think that safe journeys for vulnerable road users such as children should be the highest priority. Churton Park and other northern suburbs currently have the highest rates of car dependency in Wellington City.

Te Atakura (climate change)

---

**Q17. Your comments on the big decisions (optional)**

it is essential that Council becomes more actively involved in sorting out the public transport issues in Wellington - we need an efficient, reliable, faster, bus service and/or other means of moving across the city to encourage people to use their cars less. This will assist with Council measures to address climate change. reduce car congestion and generally create a happier, less stressed community of workers in Wellington who can then travel to and from work quickly, cheaply and efficiently.

Investment in three waters infrastructure  
Cycleways  
Sludge and waste minimisation

---

**Q17. Your comments on the big decisions (optional)**

I didn't support any of the three water options because I expected to see water meters introduced for all houses and properties, as many cities already do in NZ and overseas. This is a cost-effective way of finding (and then fixing) leaks and encouraging people to reduce their water consumption. Water is a scarce and expensive commodity, so why should it be "free"? Let's get a bit more ambitious with our cycleways plan. The money involved is peanuts compared with what we propose to spend on roads, including WCC's share of LGWM road and tunnel projects. I support either Option 3 or 4 (which cost the same), which are more expensive than 1 or 2. But I don't have a strong view as to the better funding model.

---

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)** not answered

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

I think Council should consider other funding sources. In particular, why don't local councils get a share of GST, which all goes to central government? I hope that WCC and other councils are talking to the government about this. In addition, do churches and government departments pay rates on their land within Wellington? Are other land owners also given a rates holiday? This may be outside WCC's control, but if so, then what steps are we taking to address this obvious source of lost revenue? Another potential revenue source is on-street parking in residential areas, which should be charged for. If people want to store vehicles in the public realm, they should pay for it, rather than non-car owners (or property owners with garages) effectively cross-subsidising them (because they aren't getting any benefit from this "free" parking). Some streets (in inner suburbs) have residents' parking, but only a few, and the cost of permit parking is pitiful compared with the price people pay to rent parking spaces. I'd also like to see land owners in the central city charged high rates if they are "land banking" - not using land for productive urban purposes, such as retail, office or commercial purposes. Vacant lots used for surface car parking are a huge waste of space and result in a more spread-out city, undermining the urbanism the Council is trying to achieve, and that most people want. Already more people enter the central city during weekday rush hour by walking, cycling and public transport, than by private car. We need to do all we can to reduce car travel, and tackling parking is a key lever that Council can and should use.

Cycleways

---

**Q17. Your comments on the big decisions (optional)**

Kla ora and thank you for the chance to comment. I'm a single mother of a toddler who lives in Brooklyn and works in the central city. My 18 month old son and I bike to his ECE and my work most days and we would love to be able to feel safer when we do this. I've spent time in cities where the streets have been opened to everyone by building integrated, connected cycleways and it's a joyful experience. Older people, children and people with a range of mobility and confidence are able to travel freely and with confidence. That's the future I want for my city. I understand that some people are fearful of this kind of change, and I know the Council will be faced with that fear, so I want you to know that there are lots and lots of people like me. Every morning I chat with other parents dropping off their children by bike in the inner city, they love the freedom that traveling by bike gives them and wish that more people could feel safe and confident to join them. Other parents comment on my bike, telling me they wish they could travel with their children by bike with confidence, but that the lack of dedicated and connected cycleways makes that impossible for them. I have every reason to believe, based on international experience and the conversations I have every day, that if we had better cycleways in Wellington, more and more people would feel confident to travel by bike, and enjoy the freedom and independence of bike travel, while also contributing to our collective health, air quality and reducing climate change. Whenever I visit my sister in the Netherlands and see her two primary age children ride independently to school on completely safe, dedicated bike lanes I think of how wonderful it would be to be able to see my son do that when he starts school in a few years. Bikes are only one of the ways that people want to travel around Wellington, and I obviously want to see a city in which our streets are open to and accessible for everyone whatever their mobility needs and income. But dedicated connected cycleways are one incredibly important part of building a healthy, connected Wellington in the future.

Cycleways

---

**Q17. Your comments on the big decisions (optional)**

Currently cycleways in Island bay, Newtown, Kilbirnie, Oriental Parade and Evans Bay Parade are quite disconnected and often poorly marked, making them less useful than they could and are intended to be. Also, more often than not, it appears that pedestrians completely ignore the fact that there are actually individual paths - plus because cycleways have so many 'sudden' ends and junctions where cyclists need to use the road alongside cars, using cycleways as they are is presently quite dangerous. I know many people who refrain from cycling in Wellington because it is dangerous and having short, disconnected stretches of cyclepaths doesn't actually change this fact (even if the individual paths are perfectly fine). The cycling network will need to be extended to achieve wider adoption without putting their users at risk.

- Q4. **What organisation are you submitting on behalf of?** not answered
- Q5. **Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?** No
- Q6. **If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer?** not answered
- Q7. **Oral forum time** not answered
- Q8. **Oral hearing time** not answered
- Q9. **Which of these options do you prefer? (3 waters decision)** Option 3. Accelerated (\$3.3bn investment – higher rates and debt).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** Option 2. Take ownership (Council's preferred option, \$32m investment).
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 2. Medium investment programme (\$39m capital investment, lower debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** Option 2. Proceed with base build proposal for public purposes (higher debt and rates)
- Q14. **Which of these options do you prefer? (Central Library decision)** Option3. Strengthen now by increasing rates further (additional 1.79% rates increase).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 4. Sludge minimisation through alternate funding (Council's preferred option, \$147m to \$208m capital investment funded through a levy, no additional rates increase)

Q16. **Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below** None of these

---

Q17. **Your comments on the big decisions (optional)**

This plan represents a failure by the Council to plan, prepare and prioritize. It has favoured infighting over action. The pipes investment needs to be accelerated. The Council must take option 3. It is a massive issue. Water is a commodity and waste leakage is a health and safety issue. It is not good enough to simply "reduce" as specified in option two of the 'three waters infrastructure'. Be bold. Make the hard decisions now. Show some leadership. The Council had previously had no trouble in finding money for vanity projects such as the Convention Centre (while saying there is no budget to fix a public good such as the Library). It is high time that the Council gets on the same page and prioritize critical infrastructure over vanity. There is nothing more embarrassing than a Capital city having arterial road a closed because human waste has exploded everywhere. Secondly, there is a big increase in the cost of getting a LIM report (approx. \$100). This will further alienate those whanau who are trying to get in the housing market. It is already prohibitive to purchase a home in Wellington. If it costs 100 dollars extra to get a LIM report, this will only make it worse. My thoughts are to lower this proposed cost. Finally, I oppose the parking rate increase. There is no evidence that this has 'increased parking turnover'. It was strongly opposed the majority of submitters when it was introduced and there is no evidence to show that public opinion has shifted. Hamilton has recently trialed a "two hour free parking" system (as WCC used to have) and has received glowing feedback from business owners. Continuing to increase parking rates while removing parking spaces illustrates a lacking of engagement from the Council. The council has previously noted that this money will go to "rates reduction" ("Parking activity is 100 per cent user-funded, with excess revenue used to offset rates increases."). As a renter, I see none of this. So essentially I am giving my landlord a discount everytime I park in town. This is ridiculous. P.s - I believe the way in which this consultation document is set out is flawed. Firstly, where an option is the Council's preferred option, it does not include any commentary. However the other options state things like "higher rates" or "more debt". This can affect how people view issues, particularly when there is no comment on the "council's preferred option". For what it's worth, the Council should have removed what it's preferences were in total to avoid undue influence. To conclude, this plan represents a failure by the Council. However, it does not have to continue to be a failure. Make the hard decisions now. Think longer term than the electoral cycle.

---

Q18. **You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)** not answered

---

Q19. **Do you support the proposed budget?** I strongly oppose the proposed budget.

---

Q20. **You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?** I support increasing spend in the current budget.

---

Q21. **Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Please see previous comment

Disposal of waste from the Homegrown Festival on the Wellington Waterfront into Wellington Harbour! Why was there inadequate control and monitoring of waste issues arising from this event? It must never be held next to a waterway again. I was horrified the morning after the event to see split drinks, vomit and glass (A huge quantity of all three) being hosed down the storm water drains into the harbour. There was rubbish spread all over the waterfront also, with lots still being there 3 days after the event - around Te Papa for example. In Queenstown there are strict waste removal measures and consents for events and these are strictly enforced. Why is this not happening in Wellington? Is staff morale so low that no one on Council cares about the environment anymore? Also why are there no public recycling bins next to the food trucks at the harbourside market? This is one of the few events Wellington has that is positive and permanent bins should have been put there long ago! Please treat this as a formal complaint about homegrown festival, as I realise it is not a comment on the annual plan, other than to ensure adequate funding is provided for constant monitoring.

**Q17. Your comments on the big decisions (optional)**

It is very difficult to give a sound judgement about these issues in detail without being an expert. What I do know is that increasing rates dramatically will put an unbearable burden on many people, especially those on fixed incomes. I find that unfair and socially unbalanced (people well off have no problem paying it). With a high rate increase you are creating an even wider gap between rich and poor in Wellington up to the degree that it will be impossible for poorer people to live here? Question: do you want that? I am asking you to have social justice/peace in mind when making your decisions. Thank you.

---

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

- Q1. **Full name:** Jennifer Ann Lewis
- Q2. **Phone number:** not answered
- Q3. **Are you making this submission as an individual or on behalf of an organisation?** Individual
- Q4. **What organisation are you submitting on behalf of?** not answered
- Q5. **Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?** No
- Q6. **If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer?** not answered
- Q7. **Oral forum time** not answered
- Q8. **Oral hearing time** not answered
- Q9. **Which of these options do you prefer? (3 waters decision)** Option 2. Enhanced investment (\$2.4bn - the Council's preferred option).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** Option 2. Take ownership (Council's preferred option, \$32m investment).
- Q11. **Which of these options do you prefer? (Cycleways decision)** Don't know.
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** Option 1. Demolish and site developed through long-term lease (Council's preferred option).
- Q14. **Which of these options do you prefer? (Central Library decision)** Option 1. Strengthen now by temporarily exceeding debt limit (Council's preferred option, additional 0.79% to rates).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Don't know.

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Central Library  
Te Ngākau funding for future work

**Q17. Your comments on the big decisions (optional)**

The effect of earthquakes in recent years has changed the heart of cultural centre of Wellington City. I strongly support having the library repaired and upgraded as soon as possible. I have just visited Christchurch and their new library was a pleasure to be in. It is a focus for activities and for people to meet. If Wellington can reopen its central library by 2025 that will be a huge step forward in "repairing the city's heart". I also support having a "home" for the NZSO and National School of Music in Te Ngākau Civic precinct. It will give a solid purpose and "buzz" to the area. I have lived in Wellington for several decades. I love the city and its environs, I look forward to a renewed central "heart"

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

[Redacted]

**Q19. Do you support the proposed budget?**

I somewhat support the proposed budget.

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

I "Mostly" support the proposed budget.

WELLINGTON CITY COUNCIL  
LONG TERM PLAN

Cricket Wellington Submission  
MAY 2021

## **CRICKET WELLINGTON SUBMISSION:**

### **Introduction**

Cricket Wellington is the regional sports organisation (RSO) for cricket in the Wellington region and one of six Major Associations that make up New Zealand Cricket. As an organisation we are responsible for the administration, promotion, and development of cricket in Wellington. We are committed to 'Creating Outstanding Experiences for the People of Wellington'. Chaired by experienced sports administrator David Howman and led by CEO, Cam Mitchell and General Manager, Liz Green, Cricket Wellington was the first RSO in Aotearoa to achieve the Sport New Zealand Governance Mark (the gold standard for governance in sport).

Cricket is New Zealand's summer game. From the beach to the backyard, from local parks to the Basin Reserve, cricket is played informally and competitively across the nation. Furthermore, the ongoing success and profile of the Blackcaps and White Ferns has seen the popularity of the game continue to grow. Locally, it has been a golden period for Cricket Wellington; this season we hosted our second consecutive Dream11 Super Smash grand final double header, with the Wellington Firebirds retaining their status as Super Smash Champions. This event achieved a record national domestic crowd attendance of 5,545, proving that cricket remains a popular form of entertainment for Wellingtonians alike.

The 2021-22 season will be one of the biggest ever, with the previously delayed ICC Women's World Cricket World Cup to be held in New Zealand during March and April of 2022. This action-packed spectacle will see 31 matches across 31 days, with Wellington hosting six games, including the White Ferns v Australia fixture on Sunday 13<sup>th</sup> of March, and the first semi-final on Wednesday 30<sup>th</sup> of March. With the best women's cricketers in the Capital, this is a once in a lifetime opportunity to create a legacy for women's sport, for participants and for fans. It will also be an opportunity to showcase the city of Wellington and all there is to offer in the capital for visiting teams, supporters, and fans.

To maximise the opportunities created by international and domestic success, Cricket Wellington and our member clubs continue to prioritise community cricket. This is evident in our Strategic Plan (2020-2023) that identifies our community priorities as youth and female cricket, while continuing to focus on our core deliverables of community player pathways, coach and umpire development and capability and capacity.

It is our responsibility to create a vibrant, integrated and participant focused environment that inspires. During the 2020-21 season, we;

- Engaged Tamariki and Rangatahi from 108 schools across the Wellington region in our School Awareness, Yeah! Girls and School Yard Smash programmes
- Developed and supported 100% of junior and youth team coaches through our coach education programme
- Developed initiatives to increase ethnic diversity, with 25% of our participants now recognised as coming from ethnic communities. We continue to strive to engage more of our community
- More people playing and loving cricket; a 9.4% increase in participation from 2019-20

As measured by the annual Voice of Participant survey (conducted by Sport New Zealand) overall member satisfaction is improving. Feedback has identified that to enhance the participant experience we must ensure facilities for training and play continue to improve.

Therefore, in our submission we seek continued support from Wellington City Council to help ensure the recommendations from our facilities strategy are achieved. In this submission we also seek Wellington City Council's support to ensure that community cricket is not adversely affected as clubs continue to manage the wider challenges and impacts of COVID-19.

## **Cricket Wellington Facilities Strategy**

Cricket Wellington developed a Facilities Strategy in 2018 to identify our facility requirements now and into the future. The strategy was developed in partnership with Visitor Solutions and set out a series of recommendations that would help support our desire to grow the game and create outstanding cricket experiences.

We thank the Wellington City Council for your support in mobilising Cricket Wellington's Facilities Strategy and we ask that there is continued investment and collaboration in improving these community assets. We have enjoyed a positive relationship over many years and appreciate the consistency in the high-quality grounds that are provided at the various facilities in the region. The ongoing investment in community sport is also appreciated and a recent highlight was the opening of the Waiora Hub at Alex Moore Park. However, there is always more to be done and we request that Wellington City Council considers the following priorities when developing its annual plan:

1. Ensure our communities have access to an adequate number of turf and artificial facilities
2. Continue to maintain minimum standards of maintenance and upkeep for facilities
3. Partner with Cricket Wellington to identify, and upgrade facilities that require maintenance

## **Our Investment**

Cricket Wellington continues to view community cricket as our number one priority, and this was evident in the removal of affiliation fees for all of our member clubs in the 2020-21 season. This allowed clubs to navigate the financial uncertainty of Covid-19, at a cost of \$200k to Cricket Wellington. It is our hope that clubs will be in a stronger position to invest in grassroots cricket, whether it be participant programmes, coaching support, or club infrastructure.

In addition to the removal of affiliation fees, Cricket Wellington continues to invest significantly in community cricket, of which \$148,516 is spent on council ground fees, with \$69,270 specific to Wellington City Council. This season it is our intent to restore affiliation fees to clubs at the same level as the 2019-20 season and to ensure that cricket remains affordable for all and we are therefore requesting that all Councils maintain their ground fees from the 2020-21 season. This will help ensure that Cricket Wellington and its member clubs are not impacted by any additional financial burden and increases are not passed onto participants.

Ensuring that cricket remains affordable for all Wellingtonians will help maintain cricket's status as New Zealand's number one summer sport, a sport that can be enjoyed by our community in a magnitude of different settings.

## **SUMMARY:**

Sport plays a fundamental role in keeping our communities active and engaged, and Cricket Wellington looks forward to continuing to work in partnership with Wellington City Council to offer participants the opportunity to engage with cricket in a safe and enjoyable environment.

Cricket Wellington would like to thank the Wellington City Council for your ongoing support, and we look forward to being given the opportunity to discuss our submission further.

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** not answered

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library

---

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

---

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

---

**Q19. Do you support the proposed budget?**

not answered

---

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on. General I fully support implementing cycle ways asap. This can be done sooner if we go for a car free CBD and a number of routes into the city that do not allow parking. More people would cycle if they felt less vulnerable. About 8 weeks ago a car in front of me suddenly stopped. I stood on the breaks to avoid a collision and flew over the handle bars. The result was badly bruised ribs . I just started cycling again last week but I feel very nervous. To reduce my carbon footprint, I have an e-bike plus use public transport as much as possible. To get active modes going we need to promote a car-free CBD, Safe cycle routes and shared driving options. GW and WCC should provide incentives to reduce congestion and emission. Most of all they need to drive a campaign that will promote behaviour change.

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making. Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily. Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on. General Wellington absolutely must adapt to the future. That means zero carbon policies as a key focus for everything we do. My personal focus is on reducing reliance on motor cars and boosting support across the board for better public transport and safer cycling. Please stop deprioritising cycle ways and, while consultation is important, please adopt a bold set of principles to guide bold decisions that demonstrate Wellington's commitment to a greener, more sustainable future. We can wean people off cars, it's been done around the world and covid has shown how adaptable people are to change. Let's do this!!

Investment in three waters infrastructure  
Te Atakura (climate change)  
Central Library

---

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

Debt comments WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily. Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on. General Wellington has a reputation for having a good mix of cultures and has plenty of great natural spaces. However the council has largely failed to listen to the public voice and truly understand user stories. For example, bus routes that fail to take into account parents dropping kids off at school/s and then going to work (yet buses don't take into account school drop off and pick up timings) and route where people are more inconvenienced (more waiting time between buses, multiple buses to get from home to key places (school, hospital, cbd, airport, supermarkets, libraries, council sports and recreation centers etc) get charged more instead of less resulting in more cars driving on roads. Council putting annual water bans in place at a time people are trying to grow vegetables yet have many significant leaks left for weeks unattended, services like rubbish and recycling collection being reduced not improved and not taking into account people may live and work in different areas (lower hutt, Porirua etc) which has different recycling rules, putting in cycleways that cost Millions for cyclists that aren't asked to fund by way of a cycle license scheme and make roads less safe (why not design cycleways on parallel streets,

---

**Q17. Your comments on the big decisions (optional)**

Cycleways are a crucial part of our city's infrastructure. They need to be funded. I want to be able to travel on Wellington's road with my whanau safely.

---

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

---

**Q19. Do you support the proposed budget?**

I somewhat support the proposed budget.

---

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

not answered

---

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

Cycleways

---

**Q17. Your comments on the big decisions (optional)**

I support the Council increasing rates to fund infrastructure for cycling. I support the Council taking on additional debt by raising its debt-to-revenue ratio limit above 225%. I support the Council increasing the improvement in healthy streets and active modes of transport. I urge the Council to make completing the Island Bay Parade upgrade as a high priority, and am astounded that it is not yet complete. I support the building of a fully-connected cycle network, so that all road users can benefit from the network effects.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on. General Wellington must respond to the infrastructural and social needs that this city is crying out for - it must do so in a way that is future proofed and innovative in order to respond to the unprecedented challenges that lay ahead. Our Mana Whenua must have an effective and clearly defined role which allows them to actually exercise Tino Rangatiratanga in the Resource Management issues of our city, the days of Te Tiriti 'Box ticking' are gone. This city cannot be only for the top 1%, it is our vibrant and diverse communities that give this city the life and heart upon which our 'coolest little capital' ethos is borne out of. Our city is crying out for help, effective and innovative long term planning is what is required.

Cycleways  
Central Library  
Te Ngākau funding for future work

**Q17. Your comments on the big decisions (optional)**

Please ring fence cycle funding, so it is spent on cycleways, rather than used on other non cycle projects if an underspend happens on a certain project. Please fund the library properly through rates and debt. Please do not sell down to a private owner. Some people make not like the building, but it is the front room of the city and needs to be done well and stay within the ownership of the city. Please be brave and bold and fund our long term infrastructure properly. The council has head room to increase its debt. It can borrow cheaply and there is a urgent need for long term infrastructure to be built in the next 10 years.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

Neutral.

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

I support increasing spend in the current budget.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

not answered

Cycleways  
Central Library

---

Q17. **Your comments on the big decisions (optional)**

LIBRARY -DEMOLISH THE LIBRARY AND REBUILD . THE NEW CHRISTCHURCH LIBRARY IS A GOOD DESIGN. Cycleways the use of the cycleways newly constructed is below the modelled take up. The majority of people do not own a bike for various valid reasons and will never shop,collect children from school or commute on one due to age or health reasons. Also the ones that have been constructed are mostly a waste of space i.e. Island Bay problems.

---

Q18. **You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

---

Q19. **Do you support the proposed budget?**

I somewhat oppose the proposed budget.

---

Q20. **You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

I support decreasing spend in the current budget.

---

Q21. **Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

The Council needs to listen to businesses before it decides to close roads and ban cars in the city. We emigrated to NZ thirteen years ago when Wellington was buzzing and business was booming. What a difference now and it started well before COVID struck. Please get back on track ! We live in a beautiful city.

Cycleways

Q17. Your comments on the big decisions (optional)

This council seems obsessed with cycleways, and pushes them through with laughable consultations. They are still on major roads and removing carparks to support this idea - while traffic still continues in the same path - with no road widening or service to support road parking tenants just seems like a recipe for being run over.

---

Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)

---

not answered

Q19. Do you support the proposed budget?

---

I strongly support the proposed budget.

Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?

---

not answered

Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?

fix the vital needs first, sewage and water, not cycleways and reviews, if the council is seem to be wasting money on frivolous events when sewage is being pumped into the ocean all respect is gone.

---

Investment in three waters infrastructure  
Te Atakura (climate change)

**Q17. Your comments on the big decisions (optional)**

Underinvestment in the past has created a problem which current generations need to fix. Lets fix these issues now so that they don't continue to plague those in the future. I worry that the Te Atakura may not be applied in an appropriate manner. Providing seed funding or incentives for business that have already significantly benefitted from environmental degradation could be perceived to be a reason to continue polluting or being less sustainable. Business is perfectly capable of absorbing the costs associated with better environmental compliance. We should not continue to provide additional funding to business especially when the profits of those businesses rarely result in funds available to the public which is funding them to get off the ground. Furthermore the distribution of these funds largely arises from people who already know about it, which is largely those of people involved in getting it across the line. This form of cronyism is incredibly common at a local government level and should not be supported.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

I strongly support the proposed budget.

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

If possible, Wellington City Council should try and provision a greater level of funding from central government. Currently the majority of taxpayer money is recouped by central government leaving WCC with a small share of total tax revenue. Alternate sources of income such as this should be investigated in the plan to ensure that the ambitious plans can be met with adequate funding and all parties pay their fair share.

- Q13. **Which of these options do you prefer? (Civic Precinct decision)** Option 1. Demolish and site developed through long-term lease (Council's preferred option).
- Q14. **Which of these options do you prefer? (Central Library decision)** Option 1. Strengthen now by temporarily exceeding debt limit (Council's preferred option, additional 0.79% to rates).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 4. Sludge minimisation through alternate funding (Council's preferred option, \$147m to \$208m capital investment funded through a levy, no additional rates increase)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Cycleways

---

**Q17. Your comments on the big decisions (optional)**

I do not own a car and choose to travel around Wellington predominately by cycling. It can be extremely treacherous on the roads and along the waterfront, where I cycle to work every day, I feel like an inconvenience to pedestrians but feel I have no choice. I would absolutely love for more segregated cycleways for my own safety - and I know more people would happily hop aboard bikes if they knew they would be able to cycle more safely. For example, my boyfriend likes the idea of cycling but finds his commute from Wadestown to Newtown far too scary and I don't blame him. Murphey Street is very scary, as is Kent/Cambridge Tce and Adelaide Road. Why these long, straight roads haven't been able to accommodate cycleways I don't know.

---

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

---

**Q19. Do you support the proposed budget?**

I strongly support the proposed budget.

---

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Considering WCC declared a "climate emergency," if we are to take that seriously than cycleways need to be thought about less as "nice to haves" and more as "what may enable us to unshackle ourselves from fossil fuels and improve our health!"

---

Cycleways

---

**Q17. Your comments on the big decisions (optional)**

Regarding cycleways, I am very disappointed that the WCC's preferred option insufficiently funds this crucial avenue to making Wellington liveable and attractive and easy to navigate. Cycling makes a place a pleasure to be in and get around and transforms health and happiness, including for people who wouldn't have considered it without proper infrastructure. Wellington could be a world-leading city in cycling but for lack of funding, and for funding being left unspent and then redirected to other council costs. After returning from east London to Wellington after 16 years I'm shocked at how poor cycling is here, and how frightening it is to cycle. London has made huge progress and Wellington CC, seems content with short disconnected segregated routes combined with scary on-street unsegregated routes that no one but the fearless use. The lack of a proper network ensures that cycling will remain a very minority pursuit. I'm driving everywhere and I don't want to be driving. The minor works budget needs to be at least doubled, and there should be a dedicated budget for quick tactical cycling changes that can be consulted on while in use. Cycle funding must be ring-fenced and not underspent and reallocated elsewhere.

---

Cycleways

---

Q17. Your comments on the big decisions (optional)

We need to proactively support Cycling in the City as a way to improve health and reduce dependencies on cars. Car free spaces, public transport and cycling are the future of a vibrant and healthy Wellington

---

Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)

not answered

---

Q19. Do you support the proposed budget?

I somewhat oppose the proposed budget.

---

Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?

I support keeping the budget the same but with some changes.

---

Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?

I feel like projects like the convention centre should be repurposed as a library, and all the initiatives regarding travel and tourism should be temporarily halted. Get rid of Shelly bay as this will also cost the council significantly more than stated in the long run.

Cycleways

---

Q17. **Your comments on the big decisions (optional)**

The Council's own figures show that cyclists are overrepresented in road crash statistics in the Wellington City area. The WCC has a legal, ethical, and moral obligation to ensure the roads are safe for all users, and particularly vulnerable road users. The number of cyclists on the city's roads is expanding rapidly and should be supported. More people on bikes is fewer people in cars, reduced congestion and a more efficient public transport system. It's a win-win scenario, and made better by the fact cyclists are low-impact road users - they don't create the wear and tear on infrastructure that cars and trucks do. More active transport has the potential to save the WCC funds in maintenance costs, but it has to have the courage to invest in the infrastructure that will provide a safer and more user-friendly environment for cyclists. Finally, it's not enough to create cycleways. People need secure facilities in the city where they can leave their bikes, confident they won't be stolen. Currently, Wellington has a significant bike theft problem with over 300 bikes being reported stolen annually. There is a shortage of secure cycle storage facilities in the city. Some thought needs to be given to rectifying this. E-bikers are set to be an important, and growing, part of the city's transport network. Such bikes are expensive. It makes sense to invest in e-bike use, and encourage uptake by ensuring owners can bring them to the inner city safe in the knowledge their bikes can be stored safely and securely while they're at work. Conversion of existing parking space for this purpose should be considered.

---

Q18. **You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

---

Q19. **Do you support the proposed budget?**

I somewhat support the proposed budget.

---

Q20. **You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

---

Q21. **Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

The WCC should actively reconsider its position on the debt cap. While borrowing comes with some risk, it is a means to addressing some of the priority projects the WCC faces without over-burdening ratepayers in the short term

Cycleways

---

**Q17. Your comments on the big decisions (optional)**

Prioritise cycle safety as part of core infrastructure investment. We need to keep our children and families safe on the roads. I think that safe journeys for vulnerable road users such as children should be the highest priority. Investing in safe cycle infrastructure will improve health and wellbeing, reduce carbon emissions, increase biodiversity, and create a more connected and healthier city. We have a long way to catch up on the degradation that we let happen with our focus on motor vehicles and private car parking in public spaces over the last 80 years. Please have the backbone to stand up to nimbys who complain about losing a few parking spaces - parking private property in a public space is a privilege, not a right. The safety of vulnerable road users should always come before car parking.

- Q14. **Which of these options do you prefer? (Central Library decision)** None of these options.
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 1. No change in current practice (no change to investment, rates or debt).

Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below

Cycleways

---

Q17. Your comments on the big decisions (optional)

For a city with such insane levels of congestion, I feel like our cycleways are worse than a third world country. The paths are not smooth, covered with patches and holes, glass and stones, right next to cars and also no shelter. With such terrible weather we've really only looked short term and developed the concrete path without thinking "how can we increase the number of cyclists per day?". That would lead to underground paths / sheltered paths / safer paths and possibly even something futuristic. When it rains or we have 100kmph gusts, who in their right mind would use the 200m cycleway? Not me, I'll be driving!

---

Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)

not answered

---

Q19. Do you support the proposed budget?

Neutral.

---

Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?

I support decreasing spend in the current budget.

---

Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?

Like all projects the costs are completely blown out of proportion and justified by rates increasing. We will likely see the cost go above budget, huge delays and another 10 years of let's not get Wellington moving. Compared to my home town New Plymouth, Wellington has done absolutely nothing since I moved in 2011. I just want to see the capital have a competent council that is ready to kick arse and get things done.

---

Investment in three waters infrastructure  
Te Atakura (climate change)  
Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

I think the council should be funding the waterways and that they should be doing a lot more research on the current state of the pipes, so we know how to fund them in future long term plans. I think that the climate change plan should be funded, but I do not think the ambition of net zero by 2050 is ambitious enough. Our world is facing a severe climate crisis, and I believe we should be working much faster than that to ensure we are damaging the planet as little as possible. I also believe we should not be producing waste at all to solve the sludge situation, and I think that if the council fails to find other funding they should fund the changes themselves, because no action at all is not good enough.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

I somewhat support the proposed budget.

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

I think there should be more thought on how these changes impact Māori, to ensure that these plans follow Te Tiriti. I also think there should be more on housing, and what the council is doing to make housing affordable.

Cycleways  
Te Atakura (climate change)  
Central Library

---

**Q17. Your comments on the big decisions (optional)**

It is very important to me that the cycle network is extended, and that cycleparking is also built into the plans, so there are easy places to park your bike--sometimes the random light post just does not cut it! Investment in cycleways matters to me because I ride my bike on Wellington streets most day, and I often feel worried for myself, pedestrians, and drivers--there's just not places to go to stay out of each other's way, and everyone is frustrated with each other. I was also recently injured in a collision with a car in Newtown, and felt really scared to ride for a little while. Thanks to community bike projects like bike Space and Mechanical Tempest, I was able to fix my bike, but it reinforced to me that cycle systems--accessible service provision, effective routes on roads, and places to park would make my favourite form of transport way more fun and safe. I also really loved the Central Library building and spending lots of time there, and thought it was an effective place, to study, read, and feel hopeful and enthusiastic about the many ideas in the world, connected to the citizens around me. I especially liked the special archives and collections on the top floor. I'd love it to be open again soon. Despite changes to parking recently, I think it's really important to make low carbon options easier in Wellington, and that Wellington prioritises being a climate-thoughtful city, asking for transformation at social and commercial levels. I like the initial shape of the Te Atakura plan and I would love to see that developed further so that low carbon living is the best way to live in Wellington. I think it's really important that Wellington implements transformative response to climate change, because it's desperately important to make this city a world leader, and also more equal.

Q19. Do you support the proposed budget?

I somewhat oppose the proposed budget.

Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?

I support keeping the budget the same but with some changes.

Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?

Please refer to the contents of my submission regarding the funding for this plan. Please also contact me urgently should the pdf submission file attachment become detached

## **Alternative options for funding of the Wellington City Council 2021-31 Long Term Plan.**

The 10-year plan proposes an average 13.5% increase to the General Rate in year one with further increases averaging 8.7%, 7.7% and 6.6% in the three subsequent years. If we include the actual 5.1% General Rate increase from last year, that means that the General Rate will have increased by 41.6% over a period when the average rate of inflation is likely to have been less than 12% with a similar rise in wages/salaries and benefits. Put simply, the proposed General Rate increases are both obscene and unaffordable by the population at large. General Rates are taxes on property wealth rather than on income. People with high value properties but lower incomes are disproportionately affected and find it difficult to find the cashflow to pay their rates. There has to be a better way. My submission urges Wellington City Council (WCC) to urgently consider and understand why and how increased borrowing will provide that solution.

Firstly, I recognise that WCC is in an invidious position, partly hamstrung by out of date rules (some self-imposed) about debt are stopping it from addressing decades of under investment in infrastructure. This comes at a time when it is simultaneously facing additional costs relating to earthquake resilience, future costs to counter climate change challenges and providing funding for the consequences of population/densification growth. WCC is not alone in this regard but the solution proposed of raising the general rates an exorbitant amount and lifting debt to only 225% of revenue is not the answer. The WCC needs to become less risk averse and become better informed about how the worlds of bond investors, interest rates and central bank bond buying have changed dramatically since the LGFA borrowing limits of 300% of revenue and WCC's own cap of 175% of revenue were first set. The "Perfect Storm" circumstances now presented dictate that the 2012 general principle held by the Office of the Auditor General (AOG) *that "debt should be used to fund new assets to meet demand or to increase levels of service rather than fund renewals"* needs to be set aside. The option of using General Rate increases lacks imagination and is unaffordable by ratepayers. Fortunately however, the current state of the Financial Markets does provide an option whereby long-term debt can be raised at a fraction of the cost applicable back in 2012 when the AOG made their pronouncement.

A study by NZIER in 2013 found that Councils throughout NZ had an average ratio of revenue being spent on debt servicing close to 8%. Coincidentally at that same time, the LGFA set its benchmark limit for debt servicing at 20% of total revenue. Since the onset of Covid-19, the LGFA has raised \$2 billion on behalf of councils with an average rate of 0.99%. The Reserve Bank has bought a lot of those and other LGFA bonds at an average interest rate of 0.76%. WCC's ratio of debt servicing cost to total revenue has risen from 4.31% in 2017/18 to 5.04% in 2020/21. There is a huge amount of headroom between that figure and the 20% LGFA maximum limit. By way of an example though, Auckland City (AC) has prudently set its own limit for debt servicing at not more than 15% of total revenues subject that net debt did not exceed 275% of total revenue.

I have hypothesised a situation in which WCC, instead of the 13.5% increase, adopted a 3% increase in the General Rate for 2021/22 (viz. circa \$202,135,000 income instead of the forecast \$392,230,000 income). Total Revenues would then be circa \$427,072,000. I suggest that WCC borrow 280% of this figure (\$1,195,801,600) but as they already have debt of \$847,445,000, they would be making new borrowing of \$348,356,600 which at 0.99% interest would cost \$3,448,730 per annum in servicing costs. I have noted that WCC used interest rates ranging from 2.52% (2021/22) to 3.48% (2025/26) in their "Significant Assumptions" paper in support of the 2021-31 long term plan. Clearly their "significant assumptions" are "significantly different" to what is available from the financial markets. Even at an additional interest cost of \$3.44M, WCC's new total debt servicing costs (\$29,156,000) would only be 6.83% of total revenues, well below the 20% LGFA requirement.

This maths shows that the reduction in revenue from rates (\$190,095,000) is more than countered by additional borrowings of \$348,356,600. This demonstrates that a 13.5% increase in the General Rate is neither necessary nor justified. Prudential means exist for WCC's financial needs to be met in these extraordinary times through additional borrowing whilst taking advantage of current low interest rates. To keep the General Rate affordable, WCC needs to significantly increase its level of borrowing and it needs to borrow for as long a period as possible. WCC Councillors need to accept the challenge.

Russell Bell

- Q2. **Phone number:** [Redacted]
- Q3. **Are you making this submission as an individual or on behalf of an organisation?** Individual
- Q4. **What organisation are you submitting on behalf of?** not answered
- Q5. **Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?** No
- Q6. **If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer?** not answered
- Q7. **Oral forum time** not answered
- Q8. **Oral hearing time** not answered
- Q9. **Which of these options do you prefer? (3 waters decision)** Option 2. Enhanced investment (\$2.4bn - the Council's preferred option).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** Don't know.
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 2. Medium investment with savings (\$25.4m investment, lower rates and debt).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** Don't know.
- Q14. **Which of these options do you prefer? (Central Library decision)** Option 1. Strengthen now by temporarily exceeding debt limit (Council's preferred option, additional 0.79% to rates).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 2. Invest in technology at Southern Landfill (\$86m to \$134m capital investment and higher rates).

Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below

None of these

---

Q17. Your comments on the big decisions (optional)

not answered

---

Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)

not answered

---

Q19. Do you support the proposed budget?

I somewhat support the proposed budget.

---

Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?

not answered

---

Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?

not answered

---

Te Ngākau funding for future work

**Q17. Your comments on the big decisions (optional)**

I love civic square--it's one of my favourite places to be in Wellington. I'm passionate that this remains a public space--without commercial interests. If the buildings/land are leased they need to be leased to organisations/companies that are committed to providing "3rd spaces" that enable people of all walks of life to come together and build community. If the buildings become retail that will significantly change the vibe and destroy the heart of our ability to be together as citizens rather than consumers.

Cycleways  
Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

I would like to hear more factual/informative information regarding cycleways and cycle accidents/death in Wellington I agree that change needs to be made for sludge and waste minimisation, but do not think raising rates is an efficient way- considering Wellington's housing crisis and unaffordable rent cost

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

I somewhat support the proposed budget.

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

I believe there are still important policies needed for this 10 year plan for Wellington such as the housing crisis, until we combat this issue an increase in rates will only create more inequality

The key for the successful delivery of cycleways will be that they are delivered as part of a cohesive and comprehensive plan, and not patchy, disconnected routes. The saying "if you build it, they will come" will absolutely be true - if what is built is logically and sensibly delivered.

**Q17. Your comments on the big decisions (optional)**

Kia ora, I agree that making Wellington housing more safe & affordable is considered one of the main 10 year plan objectives. However, this objective is not addressed in any of the publicly viewable decisions above. If Wellington housing is a priority, it would be great for the public to see a break down of the decisions and actions being made to make housing safer and more affordable. For example, are there actions concerning housing in the long term plan which are to be achieved in the same timeframe as the other decisions?

Wastewater laterals  
Cycleways  
Te Atakura (climate change)  
Central Library  
Sludge and waste minimisation  
Te Ngākau funding for future work

---

**Q17. Your comments on the big decisions (optional)**

How are we going to do these without affecting the lower income Wellington community? Which are we prioritizing? Increased rates are going to affect the working and lower income community directly which can cause an increase in benefits which will affect Wellington council and cause inflation to increase which is will affect the whole economy. Wellington is in a Housing crisis, how are we going to support this. If rates are going to increase, that means rent will. This will force civilians out of there homes and out of work. Every year we are having an increase flow of people (Students, International, national workers) coming into Wellington looking for housing in the CBD. We have some use of land in a lot of places. Gordon Wilson flats? Though it is 'heritage' status it is earthquake damaged. If we repair it and don't affect the heritage (so we don't get sued again in environmental court) we could use the flats for housing again like how Gordon Wilson intended it for. For climate change I think we need to be more ambitious and have that as a key priority for New Zealand especially Wellington. Climate change is affecting all of us, economically and emotionally. We need to continue to design Wellington as an eco friendly safe environment for New Zealanders. That is economically stable for all of us! Not just the rich.

Cycleways  
Te Atakura (climate change)  
Sludge and waste minimisation

---

**Q17. Your comments on the big decisions (optional)**

I support the work that is being done by the council towards a 10 year plan. I am concerned about the climate. Decisions made for the improvement of life in Wellington should in no way jeopardise the environment. Improving quality of life at the expense of the planet, culminating in more widespread loss of life due to climate breakdown would be abhorrent. I implore the council to remain aware of this in the decisions that they make relating to a long term plan. I strongly support the plan of a sludge treatment plant rather than continuing to rely on a system of sludge management that requires the addition of general waste, therefore encouraging the use of landfill. I will conclude by mentioning that in creating cycleways, it is important to me that these are safe for physically disabled people to both use and cross. Thank you :)

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Sludge and waste minimisation  
Te Ngākau funding for future work

**Q17. Your comments on the big decisions (optional)**

Kia ora, I am submitting as an individual however my role as a chaplain at Victoria University means that I am writing with the perspective of the students that I come into contact with. I am aware that these students will be the people who will be most affected by the plan changes. First off, I am very aware that one of the highest priorities noted in the consultation document is Housing development however there are no decisions around this point. Increase in housing density will have affects on almost all of these decision in this plan, however none of them seem to consider how greater housing needs, and a greater proportion of renters who will bear rates increase via increase in rent. The higher demand on housing also will put higher demand on infrastructure, and the need to have alternate ways of transport. 1. investment in in three waters infrastructure: I support the council to improve the water pipes and making this a priority. I agree that the entire system cannot be upgraded straight away however I believe that it is very important that priority is given to investigation of pipes condition and taking into account housing zone changes and the importance of creating better, more liveable urban areas. 2. I strongly support investing highly in cycleways, including cycleways into northern suburbs. Ensuring that these cycleways are safe is very important, however simply building the infrastructure will not be enough. I think that funding of cycle re-homing programmes to get more people affordable bikes, and repair classes/workshops so that people can continue to cycle, are both important . In creating more car-free or low-car options, keeping a minimum accessibility for those who rely on private transport due to disability or other valid reasons, should be kept in mind. Further, when adding shared spaces/ Cycle ways, it is also important to keep accessibility and disability awareness in mind. Will there be safe crossing points on cycleways for pedestrians with low vision or hearing? I would also encourage the council to ensure integration with Waka Kotahi and Let's Get Wellington Moving to deliver the best outcomes. 3. Te Atakura should be fully funded. However, I believe it should be considered a first step rather than a final plan. It sets some ambitious goals however I think the council should be following closely further outcomes of groups like the climate Commission. would like to see information that shows the planned steps would actually meet the targets. As I mentioned above, vulnerable groups such as those on low wages or those with disabilities may not be able to participate fully in efforts to use lower-emission transport unless funding to make this happen is also included in the plan. 4. Sludge: I believe funding an option to deal with the sludge without relying on the landfill is important to align with Te Atakura, as otherwise it relies strongly on keeping sludge to 20 % of waste and therefore requiring us to produce waste. It is not a sustainable way to deal with our sludge, to treat it and still dispose of it via pumping and dumping. 5. Te Ngākau: I believe that the preferred option is a good one, however would like to note that public-facing organisations should be prioritised. This is because Te Ngākau is a community meeting space- a third space where there is an important ability to rest, work or be without the need to consume. in conclusion, i hope that you will consider the most vulnerable members of society when coming to decisions around the new ten year plan, as well as internal consistency on priorities of reducing waste and our reliance on landfills, and in keeping increasing demand on housing - particularly rentals and urban development- in mind when making decisions on infrastructure.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

- Q9. **Which of these options do you prefer? (3 waters decision)** Option 2. Enhanced investment (\$2.4bn - the Council's preferred option).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** Option 2. Take ownership (Council's preferred option, \$32m investment).
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** Option 1. Demolish and site developed through long-term lease (Council's preferred option).
- Q14. **Which of these options do you prefer? (Central Library decision)** Option 1. Strengthen now by temporarily exceeding debt limit (Council's preferred option, additional 0.79% to rates).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 4. Sludge minimisation through alternate funding (Council's preferred option, \$147m to \$208m capital investment funded through a levy, no additional rates increase)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
 Wastewater laterals  
 Cycleways  
 Te Atakura (climate change)  
 Central Library  
 Sludge and waste minimisation  
 Te Ngākau funding for future work

**Q17. Your comments on the big decisions (optional)**

I believe it is vital to invest in our pipes now so they don't cause more problems in the future. I would like to see option 2 implemented, but for more investment to go towards investigating the pipes and their current condition. I think it would be excellent for the council to take on wastewater laterals, and strongly support this proposal. For cycleways I strongly support the decision to work on and finish the cycleways over the next 10 years. This investment is vital for reaching national and local climate change goals, as it will incentivize more people to bike around the city and reduce people using cars as a mode of transport. Investing more into cycleways now will pay off later, as every dollar contributing towards climate change solutions now will save many more dollars, and lives, in the future. This is also why I believe the council's climate plan needs to be fully funded. This is an excellent first step towards tackling climate change at a local level, and should be the first of many such projects designed to combat climate change. Becoming 'net zero by 2050' is not ambitious enough, in my view, and the council should strongly consider further, more ambitious investments. This end goal is not, in my view, consistent with the state of emergency the council has declared and therefore it is crucial that this goal is reimagined to be more ambitious and strives to fight climate change as much as possible. However, I back the council's proposal to do whatever they can to combat climate change, and strongly support whatever investment is possible. Fixing the Wellington library is a great opportunity to create a community centered space with a focus on learning, collaboration and inclusivity. The library could be reimagined to be an interactive space, with activities to encourage the sharing of ideas and chances for the community to engage with local and national issues. This collaborative community hub could had a traditional library at it's center, to provide the foundation for this project. Potential ideas can be found here: <https://www.stuff.co.nz/nelson-mail/opinion/124979813/reimagining-a-new-nelson-library-as-an-ideas-factory> I strongly support option 4 for dealing with our sewage sludge. Minimizing waste is a vital component of combating climate change and finding more effective ways to deal with sludge could contribute well. Building a vibrant, inclusive community space needs to be a priority when rebuilding civic square. Care needs to be taken to ensure this place is accessible and safe for everyone. Some additional suggestions I would have are to fund existing sexual assault prevention organizations in the CBD to mitigate the harm done by sexual assault. I would also like to see the council collaborate (or put pressure on) VUW to use the Gordon Wilson flats.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)** not answered

**Q19. Do you support the proposed budget?** I somewhat support the proposed budget.

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?** not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

I am very concerned about the cost of living and housing affordability in Wellington, and would like to see the council take action to make housing more affordable in Wellington. I am also concerned that the rate increases will disproportionately affect renters and lower income individuals and families, and I implore the council to ensure this does not happen.

Cycleways  
Te Atakura (climate change)

**Q17. Your comments on the big decisions (optional)**

I am a frequent visitor and occasional person on a bike in your fine city. I live in Te Awakairangi ki Tai, Lower Hutt. I do not work or own property in Wellington but I do frequent (particularly Central City) retail and hospitality businesses. I am also 27 and terrified about what our current actions will mean for Earth's changing climate and ecology. In this regard I was very impressed with WCC's submission to He Pou a Rangi and am enormously grateful for your leadership as an organisation. The Council's comments in this submission, particularly with regard to our transport future, give me hope that our institutions are finally beginning to reflect the changes that we need to make. I think that fully funding both the Cycleways and Te Atakura portions of this plan will be very important for Wellington City's reputation as a place that can walk the talk. With specific regard to the full cycleways budget I understand the risks/uncertainties about affordability and deliverability that may worry some officers and elected members. I genuinely value work to ensure that WCC is a professional organisation that has capacity to deliver on its commitments. I am also conscious however that there are some risks that it is appropriate to take. Ultimately this is a decision in your hands but I would suggest that in many past cases the risks and uncertainties inherent in the scale of change we need to see have scared organisations away from doing what is right. No doubt implementing this will be difficult and risks will need to be actively managed but what better reasons are there to do the work than ensuring our people are safe, that they have access to their own streets and that we displace emissions which are endangering the life and livelihoods of future generations? Further, we need to be conscious of the inherent risks is not pursuing (or half-heartedly pursuing) the transition we are embarking on. If funding is committed and WCC falls short on physical works, despite best efforts, I have no doubt that this would be broadly accepted by the community. There will always be opportunity to engage in tactical reallocation of space if major infrastructure is not able to be rolled out within timeframe but failing to plan for what we know is necessary is accepting failure from the start. As a resident of the Hutt Valley I am acutely aware of the impact that Te Ara Tupua will have on travel behaviour and would love to see safe cycling networks on both ends of this path when it is in operation. I worry both about the safety of people from my home city and about how businesses in the outer suburbs of Wellington will be negatively impacted if people on bikes can not safely access their premises- we should not want the economic benefits of major infrastructure projects such as this to be fenced into a central city area. With regard to safety I was very taken with the presentation by Dr David Tripp at a recent WCC committee meeting which was considering safety on Thornton Quay. He has said it all much more eloquently than I can muster. Finally, with specific regard to the Te Atakura Implementation Plan this is another piece of work I was very pleased to see. I was impressed with the modelling and the decision matrix which considers co-benefits for investment. Despite this the actions committed to within the Te Atakura IP do not go far enough (and I am sure that this would be widely recognised around the Council table). Committing less funding than what is currently recommended would therefore be a very disappointing outcome. You are considering a plan for your city that covers the very last decade we have left to avert catastrophic climate change. I urge you to do what is right and what is precautionary & prudent. Please commit to the work I have talked about above and be part of ushering in an exciting, people and planet-centred, future.

Cycleways

---

Q17. Your comments on the big decisions (optional)

Please just put these cycle ways in, there is no need for consultation. There will always be the naysayers because they only have a car-dominated worldview. But cycling is better for the environment and health & wellbeing. Many places put them in. Just put them in and forget about the tedious and controversial consultation. They are like roads, we also do not consult on every road decision we make.

Parks and open spaces become increasingly important if more people are squeezed into apartments or properties without much land. So developments like the citizen initiative to 'renovate' Queens Park, part of the Town Belt in Thorndon, need more attention i.e. funding.

Wastewater laterals  
Central Library

---

Q17. **Your comments on the big decisions (optional)**

Central Library My belief is that the existing building has no great heritage value & apart from re-using the Palm trees a new purpose built building should be provided. Facilities should be along the lines of Johnsonville library (Waitohi Centre) which is far more functional & relevant than the existing Central library. Wastewater Laterals I support the proposal since all new wastewater mains are now located in roadways & lateral repair work is too specialised for local plumbers. I do not understand why taking ownership of laterals has an up front cost. Surely the cost is operational based on maintenance liability which is not a cost which can be quantified accurately. I can understand how depreciation should be applied but the cost specified seems like false capital. Surely? no ratepayer is charging Council for these laterals. Is this cost based on recovered cost from ratepayers when Council repair existing laterals?

---

Q18. **You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

---

Q19. **Do you support the proposed budget?**

I strongly oppose the proposed budget.

---

Q20. **You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

I support decreasing spend in the current budget.

---

Q21. **Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Until public & visitors return to Wellington City in greater numbers the increases to parking fees should be deferred. I also oppose the loss of parking in the CBD, especially since parking buildings have remained closed or seriously downsized for many years. Council should work with parking building owners & entrepreneurs to restore & increase capacity.

Cycleways

---

**Q17. Your comments on the big decisions (optional)**

It is essential to move towards multi-modal. Current cycling options are deeply inadequate and dangerous. There is little incentive to start cycling without the significant investment in electric bikes, and then the unsafe road options are restrictive. Bikes get cars off the road: reducing emissions, and decreasing traffic. Electric vehicles are better than ICE, but remain traffic. Not everywhere is appropriate for bike lanes, but installation for the major routes would give such a disproportionate benefit it would be short-sighted not to.

---

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

---

- Q4. **What organisation are you submitting on behalf of?** not answered
- Q5. **Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?** No
- Q6. **If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer?** not answered
- Q7. **Oral forum time** not answered
- Q8. **Oral hearing time** not answered
- Q9. **Which of these options do you prefer? (3 waters decision)** Don't know.
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** Option 1. No change (no change in investment, rates or debt).
- Q11. **Which of these options do you prefer? (Cycleways decision)** None of these options.
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** None of these options.
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** None of these options.
- Q14. **Which of these options do you prefer? (Central Library decision)** Option3. Strengthen now by increasing rates further (additional 1.79% rates increase).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 2. Invest in technology at Southern Landfill (\$86m to \$134m capital investment and higher rates).

Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below

Cycleways  
Central Library

Q17. Your comments on the big decisions (optional)

Doesn't want cycleways investment. Second option for central library is the Councils preferred option.

Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)

[REDACTED]

Q19. Do you support the proposed budget?

I strongly oppose the proposed budget.

Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?

not answered

Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?

We agree to 6% rates only. Sell airport shares. Cut pay and staff equal to rates - well?? It's about mismanagement!

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)

---

**Q17. Your comments on the big decisions (optional)**

-invest more in upgrading our pipes, this is a huge problem and needs to be fixed as fast as possible. Just do it already. - cycleways - we spend too much money on cycleways, less money on cycle ways more money on improving infrastructure please -climate change - electric cars are not great for the environment, they are just greenwashing, come up with a sensible climate change policy and then ask us to fund it. Less money on this, more money to be spent fixing pipes and the library and all the things that are actually important to the majority of the city.

---

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

---

**Q19. Do you support the proposed budget?**

Neutral.

---

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

I support increasing spend in the current budget.

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Happy with the majority of the increases in the user charges, but have concerns with the weekend increases to parking. Local businesses are a major contributor of rates, the increase in parking charges makes the city a less attractive place for visitors, which may lead to the businesses struggling. This will have an effect on the councils rates revenue. Wellington CBD is already starting to see a growing number of empty shops, we should be looking at more ways to encourage people into the city, not trying to deter people.

Cycleways

---

Q17. **Your comments on the big decisions (optional)**

As a cycle commuter I feel very strongly that our streets need to be configured better to accommodate cycling as a means of transport. Currently there are too many pinch-points where drivers are made to feel cyclists are an obstacle to be overcome. Co-existence is not encouraged. Yet every cyclist is one less vehicle on the road. Even as an experienced and very risk-averse cyclist I fear for my safety at times. I do not believe I should feel brave for my commuting choice. If the council is serious about alternative and active transport and a carbon zero future a well developed cycle network is the most basic of initiatives.

not answered

---

Q19. **Do you support the proposed budget?**

Neutral.

---

Q20. **You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

I support increasing spend in the current budget.

---

Q21. **Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

After years of under investment by politicians trying to appease rate payers' unrealistic demands, it has fallen upon the current council to "tell it like it is" and spend appropriately for our future. There is a cost to living in a great city and we have to be prepared to pay that cost - the council needs to lead!

WelCAB thanks the Council for its continued support and recommends that the inflation clause of our contract is retained. The return on investment in WelCAB continues to be high and we contribute to Council outcomes. We look forward to talking with Council about returning to operate from the Central Library. See attached file for further detail.

Citizens Advice Bureau Wellington Inc (WelCAB)  
P O Box 24 093, Wellington 6142  
4 May 2021

## Submission to Wellington City Council Long Term Plan 2021-31

Citizens Advice Bureau Wellington Inc (WelCAB) has two recommendations and a request for the Wellington City Council (WCC):

1. WelCAB gratefully acknowledges the support of the WCC and recommends our continued contractual relationship, which enables WelCAB to contribute towards the WCC's social outcomes.
2. WelCAB recommends that the WCC reinstate the inflation component in its funding contracts for community organisations, including WelCAB, for 2021 to 2031.
3. Request: WelCAB has noted the plan to strengthen the Central Library and the assurance that WelCAB will be housed in that building when it is completed. We look forward to engaging with officials on this project.

### Comments

*Contractual relationship and contribution to WCC outcomes:* Over the last 12 months WelCAB has helped **8743** clients with challenging problems and a further **5179** clients whose issues could be quickly resolved. **7733** clients also attended WelCAB clinics. The most common issues that we help clients with relate to housing, employment, consumer matters, immigration and family issues. We also provide reference to more than **2000** community organisations in Wellington. WelCAB provides a "high quality, low cost" delivery option; we offer a real-time human interaction often at a point when clients are beginning to despair (PwC Report 2018). WelCAB achieves a high return on the WCC's investment at just over \$10 per client interaction.

Our work links directly with the WCC's social, cultural and economic outcomes and we look forward to our continuing relationship.

*Inflation clause:* We are disappointed to hear that the WCC will no longer fund the inflation component of our contract and recommend that it adhere to its contractual obligation. WelCAB is paying commercial rates for temporary housing of its CAB Central Wellington bureau (in the James Smiths building, corner Cuba Street and Manners Mall) while the Central Library is not available. We appreciate the WCC's support for that. The rent for our current premises, however, is increasing by 2% per annum and all costs will continue to increase. The WCC's assistance in adjusting the contract for inflation has been invaluable and we hope that this will be reinstated.

The WelCAB contract currently includes provision for inflation and we strongly recommend that this provision is retained as part of our ongoing relationship. We look forward to engaging with and supporting the WCC in the delivery of its long-term plan to the community.

*Central Library:* WelCAB has a particular interest in the redevelopment of the Central Library. We have been assured verbally that WelCAB will return to the library when it reopens, however there has been no written commitment to this position, nor have we been involved in the planning. The WCC generously houses four of WelCAB's five branches in its community centres and, when renovations of those were underway, engaged with us in the planning. We look forward to talking with the WCC's officers about the plans for WelCAB to return to the Central Library.

WelCAB broadly supports the WCC's seven priority areas of its long-term plan: the three waters infrastructure; wastewater laterals; cycleways; on climate change; Te Ngākau civic square precinct; the Central Library, and sludge and waste minimisation.

Jane Julian

Area Manager, Citizens Advice Bureau Wellington (WelCAB)

Cycleways

Te Ngākau funding for future work

---

**Q17. Your comments on the big decisions (optional)**

Regarding Cycleways — please make WLG the most friendliest city for pedestrians, bicycles, scooters and skaters (including all electric options) and of course accessible for all — reducing and simplifying speedlimits (no need for the huge range of speedlimits WLG currently offers) throughout CBD into suburbs where windy roads and tight corners don't really allow for 50k/h for example Te Ngākau / City Square — great opportunity to also redevelop junction Victoria Street–Mercer Street–Wakefield Street in line with above and make it much more permeable between Waterfront and CBD as well as a place for social and recreational activities.

- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** Option 1. Demolish and site developed through long-term lease (Council's preferred option).
- Q14. **Which of these options do you prefer? (Central Library decision)** Option 1. Strengthen now by temporarily exceeding debt limit (Council's preferred option, additional 0.79% to rates).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 4. Sludge minimisation through alternate funding (Council's preferred option, \$147m to \$208m capital investment funded through a levy, no additional rates increase)

Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below

---

Cycleways

Q17. Your comments on the big decisions (optional)

Wellington is an intimidating city to bike in. If we want it to be an option for the majority of residents, we need major improvements to the network. Not completing this work in the next 10 years isn't good enough.

---

Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)

not answered

---

Q19. Do you support the proposed budget?

I somewhat support the proposed budget.

---

Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?

not answered

---

Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?

not answered

---

---

Q17. **Your comments on the big decisions (optional)**

Make the city work before these investments, the city is broken, no pay rises for people mean we can't afford to pay you. Find ways to fix broken city first not individual bits. This city needs to come alive instead this council is killing the city. people will pay more in a living city not a dead duck like it is now. This council is failing our city. You are the problem not the cure.

---

Q18. **You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)** not answered

---

Q19. **Do you support the proposed budget?** I strongly oppose the proposed budget.

---

Q20. **You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?** I support keeping the budget the same but with some changes.

---

Q21. **Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

These councillors need to go, you are killing this city, it's not breathing its in the intensive care unit

I wish to raise my utter disappointment at the proposed parking increase - also the fact that its hard to find on this website and even in this submission application? I work in Thorndon and have purchased monthly coupons for the last 4 years. You had a huge price hike a little over a year ago from \$120 to \$200 which was and is already hard to swallow because lets be frank thats a ridiculous amount to pay for a park that isn't guaranteed and is at your own risk. How can you justify \$20 a day for a street park? and after yet another extension of pay rise freeze for government this is putting me at my wits end. The public transport from Ngaio doesnt work for my schedule so i have to drive but in order to make use of an overpriced coupon i have to leave in time to actually get a park. Do you expect people to pay \$333 for a park they may not even get? Will this mean you will make the residents who park in the coupon parking use their designated "residents parking" areas instead of the prime coupon parking? probably not. You say you will use the cost recovery to cover costs for the library etc but how can you expect people to go to the library and pay inflated prices? its already a joke as is. you will literally destroy the CBD shopping as people will go to Queensgate or Northcity where parking is free, you would risk that to paint some walls at a library? pretty sure kindles will be purchased and people will buy e-books for \$5 instead of paying \$20 to walk up and down aisles for an a couple of hours before the wardens slap on a a fine (which i have no doubt in my mind you have decided to increase aswell). I will stop there as everything about this consultation is a joke - you wont listen and wont change, we all know how they work!

Q17. **Your comments on the big decisions (optional)**

I consider that investment now in water/waste infrastructure and carbon zero transport alternatives will save money later in both resilience measures and disaster mitigation. I would like to see a Location Y Vassal type approach to Te Ngākau, sensitively working with what can be retained to improve the relationships in the Civic square without the carbon expense of demolition. Though i think the library building could function as a living room to the city , with the square its courtyard, and would like to see that same level relationship developed through renovation. The attached is a submission from my Colleague Jesse Matthews, which our organization roundly supports.

not answered

---

Q21. **Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Generally i think any carbon using/environment degrading activities should be levied proportionate to use/pollution to deter their use. Including all vehicle use.

---

# GENERAL COMMENTS

I am supportive of the direction of the Long Term Plan but believe it does not go far enough or fast enough on some items, and woefully under-priorities cycling in particular. I appreciate there are capacity constraints on many issues requiring investment in physical infrastructure, but believe we need to start investing more heavily now with a secure ongoing pipeline of work to build this capacity as quickly as possible.

In general I am also supportive of very significant increases in investment in Wellington's physical infrastructure, especially that which will support low carbon transport, increase quality of life, resiliency against disasters and climate change, and increase the supply, desirability and uptake of affordable medium-high density housing close to the city and public transport routes.

It is clear that Wellington is suffering from decades of under-investment, caused largely by successive councils running down existing assets to maintain artificially low rates. My view is that the fair and equitable way of funding the urgent infrastructure deficit is by rates increases for current Wellington ratepayers who have enjoyed these unrealistically low rates during the previous decades. While I would support temporary increases in debt if it allowed projects to proceed sooner rather than later, pushing additional financial burden onto future generations would be a gross abdication of moral accountability by the people most responsible for our current issues.

I also support a more progressive rating system with targeted rates increases on higher value properties, as well as the implementation of value-uplift capture mechanisms as recommended by the Productivity Commission. Wellington property owners are wealthier than ever. The massive increase in the value of Wellington's ratings base in recent years provides a significant opportunity that the WCC must harness if we are to put in place the infrastructure that we will need to thrive in the 21st century. Capturing a tiny fraction of the value of this year's property inflation alone would solve the WCC resource challenges for years to come.

Basically, despite what we like to tell ourselves, we are a wealthy society and can easily afford to pay for all those things that we need to pay for if there is the political will and leadership to distribute these costs fairly.

Items that I believe are missing from the current long-term plan (or at least haven't been included in this consultation) include:

1. A plan and timeline for value-uplift rating mechanisms as a future revenue source, as recommended by the Productivity Commission so that the city can share in the increase in property value caused by transit improvements. This should be put in place in time to dovetail with Lets Get Wellington Moving transport programme. This should be aggressively pursued and implemented as soon as a clear legal basis for them is established. WCC should be pushing on this as hard as possible with the current government.
2. The LTP needs to include a programme of incentives to accelerate the development of good quality affordable housing within walking and biking distance of the CBD. This will be

help address the chronic housing shortage, be in support of the current stated aims of the District Plan, be aligned with the NPS-UP, as well as support the WCC's stated climate goals - especially with regard to transport emissions. This should comprise a carrot & stick approach which includes disincentives for non-productive property speculators (land bankers), and a range of incentives to increase the desirability of living in and residential development of urban areas. I support:

a) Punitive targeted rates increases on the land banking of suitable development sites, especially vacant or abandoned properties. A huge amount of development land is currently sitting unutilised within identified growth areas (see Adelaide Rd, Newtown, Te Aro Basin). This would be politically popular and spur the transfer of property from those who intend to do nothing with it to those who can use it productively. The extra revenue raised can be used to help fund the incentives part of the package below.

b) Aligned with the goals of the Spatial Plan, a range of measures should be implemented to increase the desirability and developability of good quality residential buildings in suitable urban growth areas:

i) Streetscape improvements and creation of new parks and green spaces in the Te Aro Basin and other identified high-growth residential areas that lack green space. This will improve the livability, attractiveness, stormwater detention, and air quality of these urban areas. They are often unattractive, hard and grey areas of the city, and they represent a huge opportunity to be developed into attractive and desirable residential precincts if intelligent interventions are made.

ii) Rapid improvements in pedestrian, cycle, and public transport in these areas to increase the viability and desirability of low car usage patterns. This would help developers to build affordable housing by realising significant savings on car park construction costs in future development. It will also allow more people to enjoy low-cost and low-carbon lifestyles free from the financial, time, and environmental cost of private vehicles. Implementing the Gehl plan from 20 years ago would go a long way to supporting housing growth in the city and should be implemented in full within 5 years. With regards to cycle infrastructure, the funding for future cycle infrastructure in the LTP is wholly inadequate and needs to be substantively increased if it is to be congruent with either the Spatial Plan, WCC's declaration of a Climate Emergency, or item 4 Te Atakura (climate change) of the LTP (see separate cycle section).

iii) Council support for improved design quality of urban housing. We are generally bad at designing and building multi-unit housing in this country. We must rapidly get better at this. Council should support this through design competitions for high-profile projects, and provision of or lending support for land purchases to enable alternative forms of housing delivery (i.e resident-led and not-for-profit development). Better resourcing and depth of skill at the council urban design team would provide more certainty for affordable housing developers and better urban design guidance for designers. The calculation of development contributions should also be redesigned to reward developers who provide high levels of amenity for future residents, measured on such metrics as the amount of green space, bike parks, shared space, external windows, etc, provided per unit or resident. Development contribution rebates should also be beefed up for Greenstar buildings, and extended to multi-unit residential buildings.

These targeted desirability measures may also have the side-effect of taking some pressure off of the more politically contentious densification efforts in already desirable areas such as Mt Victoria, Thorndon etc. Basically it will be easier and better to create more attractive leafy areas, rather than spending too much energy fighting the nimbys in already leafy areas. Planting new trees is relatively easy and cheap, and political capital could perhaps better be reserved for ensuring support for realistic rates to do this.

## OTHER ISSUES:

### Cycle Network Funding

I strongly support the Accelerated full investment cycleways investment programme. The council's preferred 'high' investment is mislabelled and misleading. It cannot at all be considered high by the standards of the funding for other transport modes in Wellington, especially roading. Nor is it at all high when compared to the human, climate, and economic costs of implementing an overdue cycle network badly or slowly. The case for proceeding with the Accelerated full investment programme is:

1. We are in the critical stage of a climate crisis that will shape the prospects of our city and the lives of our descendants for generations to come. The WCC declared a Climate Emergency in 2019. Responding to the climate crisis is one of the stated primary goals of the Long Term Plan.
2. Road transport causes nearly 40% of New Zealand's green house gasses. Road transport emissions are the lowest hanging fruit for emission reduction as petrol powered cars can relatively easily be replaced by other types of transport. The technology for doing it exists, and in the case of bicycles, is mature.
3. Bicycles (closely followed by e-bikes) are the most energy and carbon efficient methods of moving humans from one point to another known to physics. They are also the second cheapest form of transport, after walking.
4. Data from cities around the world shows that over 30% of car trips in cities can easily be replaced by bikes, (and potentially higher with ebikes) if cycling is a safe and attractive option. Wellington's current cycling mode share is 2.7%.
5. Encouraging more people to bike rather than drive is one of the easiest and cheapest methods for reducing NZ's transport emissions. We won't get better bang for the buck with anything else, not even public transport or electric cars.
6. Agriculture, forestry, and other climate related policy may be out of WCC's control, but transport planning is the main lever that the city of Wellington can pull in response to climate change and we have the responsibility to pull it as hard as it can.
7. Currently, people on bikes are being killed and injured every week on Wellington streets. The price of delayed action is measured in broken bones and dead friends. This is not acceptable and can not be allowed to continue.
8. Increasingly New Zealand's, and especially Wellington's competitive advantage in high-wage industries is by being a place where people want to live. Much of Wellington's burgeoning tech sector thrives here because talent wants to be here. We must recognise this as a key advantage to build on and invest more in those

things that make Wellington an attractive place to live and to put down roots. A safe and functioning cycle network is an absolutely key part of ensuring Wellington remains high in the livability rankings. Our cycle infrastructure is already decades behind other comparable cities, and we ignore this at our peril. We must recognise that just like the pipes, we are playing catch up here and have a long way to go.

9. Safe cycling infrastructure supports affordable housing development. We are also in a housing crisis. A large part of solving this and achieving the aims of the Spatial Plan will be contingent on ensuring that new medium-high density housing can be built within walking and cycling distance of the CBD and other amenities. This means housing can be built with a reduced (or no) need for carparking and car use, reducing housing construction costs and construction related emissions significantly while also reducing people's ongoing transport costs.
10. Traffic on the roads in Wellington is pretty bad and getting worse each year. Less cars on the road means less traffic for drivers, and with separated cycle lanes much more efficient traffic flow.
11. Safe and well designed cycle infrastructure must therefore be a critical and core piece of our future transport infrastructure. Cycleways are not a 'nice to have' or 'something we could do better', but one of the main strategic tools that must aggressively deploy to ensure that we remain competitive as a city and do not ruin the future.
12. The use and usefulness of a cycle network are greatest when it operates as a network. Network effects accumulate as each new connection is added to it – a network is greater than the sum of it's parts, and next to useless when fragmented. We would never dream of building roads that aren't connected to other roads. Yet that is what we have with our cycleways at present and that is what we will still have in 10 years time with the council's preferred 'high' level of investment. In the meantime existing assets already put in place are not being fully utilised because they're not connected up. Far from saving the ratepayer money, delaying the full completion of the network will likewise only delay reaping the benefits of the network, and therefore indefinitely pushing out the payback period of the ratepayer's significant investment.
13. At the preferred 'high' level of investment, Wellington's cycle network will still not be complete in 10 years time. If I start a family now there will still not be proper safe and connected bike paths in Wellington by the time my children are teenagers. In the meantime our chance to take meaningful action to address the climate emergency will have been and gone. It will be too late. The next 10 years are the years that count. The meaning of the word 'emergency' is not being properly understood by the drafters of the LTM. I do not want hanging over my conscience that we didn't do everything we could practically do to solve the defining issue of the century, while we still could. This is quite clearly a moral issue and we must do everything we can, especially when doing the right thing isn't even that hard and will provide us with a raft of other benefits.
14. The Accelerated full investment programme is affordable. I will very happily pay an extra 1.31% on my rates if it meant I was at less chance of being killed on the way to work, and increase the likelihood that my children will inherit a habitable planet.

**Q17. Your comments on the big decisions (optional)**

Coupon parking charges. The last rise was 40% which was huge. The proposed rise is worse. While everyone accepts Wellingtons infrastructure needs significant financial resource, you need to stop finding ways to take more money from users and ratepayers of which I am both. There is not one ounce of consideration of what people can afford and that includes the proposed levy for waste water which is claimed to not be a rate rise, instead a levy. It does not matter what you call it, its another fee I will have to pay that is associated to being a ratepayer. The standard of living for most will drop as you continue to take more and more money from us. When you decide on the next rates levy that will clearly be significant and lets say you settle on the same figure increase each year for 3 years, that rate increase compounds each year on the previous years rates that rose. Be honest and upfront. I now feel that you are stealing from me which is a sad indictment. Consider the impact of those you are taking hard earned money from. Add up each of the levy's and charges and look at what you are taking from us. Focus on the projects that need to be done to keep essential services going, dump those proposed additional dangerous bike lanes, the lanes are a nice to have, not a must have. Treat us as real people, not bottomless money pits for you to steal from..

I support keeping the budget the same but with some changes.

---

Q21. **Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Reduce parking fees. I live out of the city, weekend public transport is limited. why would i come in to the city to shop etc when parking is so expensive? i would rather stay home. Please do not increase coupon parking - commuters are essential workers, this will cause 1000s of people to work from home meaning less people going to shops in Wellington.

---

Q21. **Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Getting young people confident and safe in the water is critical for a coastal country - so strongly suggest keeping under 5's free at the pool. The building consent fee increases are outrageous in parts - including \$131/hour for an administrator. No private business would get away with a charge like that. Moreover, it suggests the need for a mindshift from "what must we do to protect the city from people who build/develop" to "what can we do to support people who build/develop our city to get the best results, including affordability for the citizens who end up buying/renting/leasing the properties." Everyone involved in building and resource consents could be encouraged to contribute to this with the question of "what have you done to make building in our city more efficient this week?" Not a criticism of those who work hard, but a suggestion to celebrate and encourage the behaviours that really help our city.

Cycleways

**Q17. Your comments on the big decisions (optional)**

Public and active transport infrastructure is an investment in the common good. As part of building healthy communities and creating a stable climate, public and active transport needs to become the default way of moving people around urban environments. We all have different lives and different needs – getting children to school, people getting to work on time, elderly people getting around their community. No matter where we live or what our situation, all people – the elderly, disabled people, young people – should be able to move easily around our city in ways that build our health and take care of the planet. Regardless of where they live in a city, kids need to be able to move about freely in fun and healthy ways. To get on a bike, take a bus, walk, or scooter to school, their friends' place, or sports practice across town. Good public transport, protected cycleways and walking paths can help us all move about our city independently and have fun on the way. A city that is great for everyone to live in and good for kids' health, is one with lots of public and active transport and is easy to navigate without a car. Building more cycleways for people riding bikes, scooters and skateboards is one of the key ways that we can give everybody more options for how they get around. Despite this, WCC has only built 16 km of cycleways in the last decade and Waka Kotahi (NZTA) says significant improvement is needed. I don't like that you have cherry-picked 'Building More Cycleways' as a key decision to be consulted on in isolation in the new Long Term Plan, rather than attempt a more holistic discussion about urban mobility and transport shift in the context of a climate and housing crisis. However, what's done is done and one positive is that it means you have identified the specific impact of each of your proposed options for building more cycleways on operating cost, rates and capital cost. This is good information to have and helps to highlight how self-defeating it is to be concerned about the impact it might have on rates. For example, the operating cost impact of the Accelerated Full Programme for Cycleways in the LTP (Option 4) is \$4.5m a year which translates to a 1.31% rates increase. Based on a rates bill of \$4k per annum that's an extra \$50 a year, or \$1 a week for a city-wide micro-mobility network. Even better, the difference between Option 4 and your recommended Option 3 is additional operating costs of \$1.9m pa, which is an extra 0.55% on rates, or \$22 a year added to a \$4k rates bill. That's 42 cents a week. These amounts are tiny. Transport is a significant expense for most Wellington City households. 85% of all Wellington households own one or more cars and it costs around \$12k per year to own and run a car in Wellington. There are over 110,000 cars in Wellington City, which means Wellington is spending a massive \$1.3bn a year on owning and running cars, which is a ridiculously large number. By contrast your Accelerated Full Programme to build more cycleways is an average of \$22.6m capital spend per year over 10 yrs (2% of \$1.3bn) and an increase in operational costs of \$4.5m per year (0.35% of \$1.3bn). What this means is that a city-wide cycling network only needs to reduce Wellington's household car running costs by more than 0.35%, or around \$42 per car per year on average, before it has paid for itself. Why is this even a discussion? The difference between the cost of a full cycling network and what Wellington spends on cars every year is so vast that it's a no brainer to invest more in cycling and micro-mobility. A full cycling network only needs to contribute to very small percentage reductions in household travel costs and it will be worth it (and that's without even considering all the other ways cycling can contribute to a well-connected, integrated transport system that works for everyone). The argument about a lack of sector capacity is being disingenuous. The sector won't ramp up the capacity unless it sees a strong commitment from WCC first. WCC needs to send the sector a signal by putting the budget in place. You might not spend all the budget but if you don't commit the budget in the first place then you're guaranteed not to do it. In addition to supporting Option 4 for Building More Cycleways I'd also like to endorse all of the following points made by Cycle Wellington: I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users. I support doubling the Cycling Minor Works Budget to \$2 million per year. I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements. I support ring-fencing the cycling budget so that money allocated for cycling

is not used elsewhere. Deliverability of new cycling projects I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements. I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects. I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects. Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels. I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent. Funding I support the council increasing rates further to fund essential infrastructure for cycling. I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225%.

**Q17. Your comments on the big decisions (optional)**

The plan looks quite impressive. Well done. Council's task at this time is basically impossible if we are to retain our integrity. We have concerns about our basic operating system, ie the money system, that are not being addressed at all. The LTP has an overriding assumption that basically all is well and that we will be fine continuing basically as we are. Sadly this is not the case and I think we are all well aware of this. I won't list our failures here, but Climate change, Resource consumption, Stress, Inequality, Poverty and Technological Unemployment are a start.... We appreciate that historically there is only so much a Council can do and that time, resources, money and energy are limited. However, in times of such strife, with multiple threats to our wellbeing becoming ever more obvious, it behoves us all to not simply throw up our hands and say "we're doing all we can". We have a greater responsibility than that, and at some point will have to state "we will do whatever we have to". That fortunately will free us to admit the evident current failures and to look more forcefully and rationally at what may well initially be unimaginable proposals. Such as, of course, abandoning money. It is at the root of every problem that we face. We must be aware of the insidious creep of psychopathy as we are cornered by money into absolute acquiescence to it. Thanks very much for this opportunity. All the best. Richard Might Council be sufficiently bold to acknowledge our current fatal trajectory and to look at alternatives to the toxic monetary system such as the money free 'Resource Based Economy'?

Investment in three waters infrastructure

---

Q17. **Your comments on the big decisions (optional)**

It is vital that we spend money now to secure Wellington's water system for the future. This is in full acknowledgment of the challenges that come with larger debt and higher rates - it is worth it and much better to do now that take a half-hearted approach and pay for it later (as we are already doing!)

<p><b>Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?</b></p>	
<p>I think some of issues around sewage and water pipes can be better managed through proactive maintenance by council as opposed to waiting for blockages or bursting to happen and fix after fact. It would also help minimise the level of investment needed to repair or even restore the pipes, etc. in the long run.</p>

Sludge and waste minimisation

---

Q17. **Your comments on the big decisions (optional)**

To reduce waste going to the landfill, we need significant improvements in recycling and green waste collection for residents, particularly those without access to a car. Recycling collection stations should be established throughout the suburbs and city and be accessible by foot or bike. Green waste should be collected from households.

---

Q18. **You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

---

Q21. **Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Council needs to be bold and prepared to significantly increase rates to deliver the services Wellington needs. Rates have been kept too low for too long. Council should also be willing to take on more debt. Council needs to do significantly more to improve pedestrian safety in Wellington. It is not acceptable to prioritise driver impatience over pedestrians. Create more real pedestrian crossings, allow pedestrians who aren't able-bodied to have sufficient time to cross - and do not make them wait minutes to do so, do not allow cars to turn when pedestrians have a green light to cross. Council needs to increase housing stock in Wellington. Council should do more to encourage and require the development of accessible housing and application of universal design principles.

Cycleways  
Te Atakura (climate change)

---

**Q17. Your comments on the big decisions (optional)**

Really annoyed that yet again you single cycleways out for consultation rather than just getting on and investing in this critical area. You have procrastinated for too long , always finding yet more reasons why you can't make the necessary hard decisions to enable decent infrastructure to be built for those who want options to get around other than by car. You bang on about being sustainable and tackling climate etc but when it comes to making meaningful change you lack any sense of urgency. When you see what cities around the world are doing to make real changes in their urban environment, it just depresses one to yet again be having to make one more submission to try and get you lot to even do the bare minimum.

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library

---

**Q17. Your comments on the big decisions (optional)**

Cycleways are essential. I cycle to work every day and have to compete with cars for road space. On-street parking should be reduced in order to make way for cyclists. In addition, the speed limit for roads should be reduced. I suspect that cycleways can be rolled out for much less than the projected cost by reducing carparking and the amount of space allocated to cars. I'm surprised the Council hasn't looked at increasing the cost for residents carparking permits. These should increase by at least the rate of inflation each year. The Council is currently massively undercharging for this privatisation of public land. Climate change and the environment are also important. Hence the Council should invest more. The Central library is also important and should be re-opened immediately.

---

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

---

**Q19. Do you support the proposed budget?**

I somewhat support the proposed budget.

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

I think that charging more for resident parking permits should be top of the list. The cost comes nowhere near the cost of maintaining this space, and the benefits are entirely private. Unlike, say swimming, there are no health or cultural benefits from the council charging very little for this use of land. The rate should be at least \$1,000 per year, and should increase by the rate of inflation annually. I support the other increases in charging for carparking.

Cycleways  
Te Atakura (climate change)

---

**Q17. Your comments on the big decisions (optional)**

Building a city-wide network of safe and connected cycleways is urgently needed and must be a top priority. Unsafe cycling conditions, due to Council's inaction in delivering cycleways, is a major barrier to greater uptake of active modes of transport. E-bikes are making cycling an accessible option for most people - imagine if Council chose to focus on incentivising transport by e-bikes and active modes what it would do for liveability and sustainability in Wellington. Selecting the low investment option for the climate action plan was not because we shouldn't be investing in it, but because the focus appears to be on electric cars instead of generating a major mode shift to public and active transport, including e-bikes. Central government will incentivise switching to e-vehicles; Council needs to focus on improving and remedying its total failure at delivering a viable and safe network of cycleways for people to travel by active modes.

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)

---

**Q17. Your comments on the big decisions (optional)**

I have selected options which favour the majority of the financial burden being paid for by this generation rather than attempting to spread the costs into the future. My reason for doing so is that I believe the decades of neglect to infrastructure should be paid for by the people who have benefited from this neglect. It is unfair to push these costs out to the next generation who will already be bearing significant financial stress and existential risks from climate change adaptation. The current issues are only going to get more expensive to solve, and the can must not be kicked down the road. Specifically, in support of cycleways, there is a lot of evidence that these have the most favourable cost-benefit ratios out of other transportation improvements. Cycling has historically been underfunded and has multiple co-benefits to peoples health and happiness. On a personal note, I feel like I am risking my life every time I am on my bike in traffic. I shouldn't have to risk my life just because I want to lower my carbon emissions and stay healthy and reduce air pollution!

---

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

---

**Q19. Do you support the proposed budget?**

I somewhat support the proposed budget.

---

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

The council should be spending even more to reach net zero targets! There are so many studies which show the economic sense of investing in climate change mitigation and adaptation. Happy to provide evidence if asked - but this is common knowledge folks!

- Q9. **Which of these options do you prefer? (3 waters decision)** Option 2. Enhanced investment (\$2.4bn - the Council's preferred option).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** Option 2. Take ownership (Council's preferred option, \$32m investment).
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** Option 2. Proceed with base build proposal for public purposes (higher debt and rates)
- Q14. **Which of these options do you prefer? (Central Library decision)** Option 1. Strengthen now by temporarily exceeding debt limit (Council's preferred option, additional 0.79% to rates).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 4. Sludge minimisation through alternate funding (Council's preferred option, \$147m to \$208m capital investment funded through a levy, no additional rates increase)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

---

not answered

**Q17. Your comments on the big decisions (optional)**

not answered

---

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

---

not answered

**Q19. Do you support the proposed budget?**

---

I somewhat support the proposed budget.

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

---

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

not answered

Q21. **Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Please look into funding rooftop solar as a fast, distributed way to reduce the external power burden of our city. Money saved through local energy distribution can be used to snowball further rooftop installations.

**Wellington Electricity Lines Limited:  
WELLINGTON CITY COUNCIL  
(2021-2031 Draft Long-Term Plan)**

---

**To** Wellington City Council

**Sent via email to:** [ltip@wcc.govt.nz](mailto:ltip@wcc.govt.nz)

**FROM:** Wellington Electricity Lines Limited  
("WELL") PO Box 31049  
Lower Hutt 5040

Date 25 April 2021

## **1 Introduction**

- 1.1 Wellington Electricity Lines Limited (WELL) owns and operates electricity distribution network assets within the Wellington Region (Wellington City, the Hutt Valley and Porirua Basin). This key infrastructure has a system length of 4,600km and serves around 165,000 connected customers.
- 1.2 WELL is committed to providing users in the region a safe, efficient yet secure electricity supply infrastructure, which in doing so provides a critical service to local communities including hospitals, schools, public infrastructure, offices and residential dwellings.
- 1.3 WELL provides electricity supply services to Wellington City communities, and hence holds a keen interest in Wellington City Council strategic planning documents that either directly or indirectly impact on their service delivery
- 1.4 Wellington City Council's proposed (draft) 10 Year Plan (2021-2031) represents a strategic document WELL considers has the potential to indirectly influence electricity supply services to local communities.
- 1.5 Whilst there may appear to be little direct relevance to WELL's network utility operations in the primary purpose of the long term plan (such that WELL infrastructure is not publically owned), the environmental context and high-level messaging in which the long term plan directs Council's strategic decisions can have an incidental effect on the effective delivery of WELL services – particularly in lower-level planning documents such as the Wellington City District Plan.
- 1.6 It is in the context of this indirect effect of the long term plan that WELL wish to provide feedback on the document *Tō mātou mahere ngahuru tau: Our 10-Year Plan 2021–2031*.

## **2 Wellington City Long-term Plan 2021–2031**

- 2.1 Wellington City Council (WCC or Council) has notified the Draft Long-term Plan 2021–31, and are currently receiving feedback from the community.
- 2.2 Council's 2021–2031 Long Term Plan (from here on abbreviated as 'LTP') is a high-level strategic document notifying the community how, where and why Council propose to direct financial resources over the next 10 year period.
- 2.3 In particular, the objectives for LTP are framed around Environmental, Social, Cultural and Economic spheres, and set in place the desired outcomes for the City.
- 2.4 WELL fundamentally support the function of long term plans (as a strategic planning and financial transparency tool for growth throughout Wellington City). The primary basis for this support and interest in providing this feedback is that such high-level planning documents can assist in guiding the strategic direction and decision making process for WELL's network assets; particularly in the key areas of resilience, and providing suitable levels of service to satisfy urban growth.

- 2.5 WELL’s recognition of Council’s strategic documents is evident by not only this LTP submission, but also on a number of preceding submissions WELL have made to the City’s Urban Growth Plans, and Spatial Plan which will underpin the current District Plan Review process.
- 2.6 WELL acknowledge that the feedback currently being sought by WCC will be used to shape a 10 year strategic document that is inclusive of community consultation. The finalised LTP will further define identified projects, and their funding, that have been proposed to satisfy the City’s desired environmental outcomes over the next ten years – particularly in regard to making Wellington more resilient, vibrant and competitive.
- 2.7 WELL has identified key priority areas of the draft LTP in which the secure supply of electricity is a relevant consideration. Consequently, the key messaging of WELL’s feedback is intended to highlight issues and opportunities in the draft LTP whereby appropriate recognition should be provided in regard to the role and function of critical network utility operators in enabling delivery in these priority areas.
- 2.8 The key messages WELL seek to have included in the finalised LTP broadly relate to;

1. *Resilience*
2. *Infrastructure*
3. *Housing and Sustainable Growth.*

### **3 Wellington Electricity Feedback on the LTP**

---

#### *Resilience and Infrastructure*

---

- 3.1 WELL own and operate networks of electrical lines, cables and substations throughout the Wellington City area. Operating and maintaining these networks in a well-planned, efficient and cost effective manner is of paramount strategic and statutory importance to WELL so as to ensure that obligations under the 1986 Commerce Act, 1992 Electricity Act, and various electricity regulations are met. Implicit in these operations is the on-going requirement to make the network more resilient to the effects of natural hazards.
- 3.2 A priority area discussed in Council’s LTP consultation document is that of ensuring the City is resilient to natural hazards. Specific mention in the document is given to three waters infrastructure upgrades that Council are proposing to allocate funding towards – such as improvements to water storage and wastewater capacity, as well as upgrading to existing infrastructure such as stormwater.
- 3.3 WELL agree with Council that such infrastructure priorities are important in making the City more resilient to natural hazards; however, it is considered that appropriate acknowledgement of non-council infrastructure also needs to be provided for in the final LTP regarding resilience.

- 3.4 Core infrastructure, such as WELL’s electricity distribution network, is a lifeline utility that is integral when considering infrastructure resilience projects across the City. To make this point clear, three waters networks are in most instances reliant on a secure supply of electricity (i.e., pump stations, control gates, plant and machinery), and consequently require an appropriate level of recognition in the LTP alongside that of Council infrastructure.
- 3.5 WELL consider that, in isolation, there is limited benefit in building a more resilient three waters network if the electricity network is not equally resilient so that pumping stations can function after, for instance, an earthquake. WELL further contend that a perceived lack in co-ordination of planning resilience projects will result in suboptimal investment outcomes.
- 3.6 It is acknowledged that under the Local Government Act the purpose of a LTP is (amongst other things) to provide transparent information regarding public infrastructure and investment within the City. However, where the draft LTP consultation documents requests feedback on challenges relating to resilience and infrastructure, WELL considers that greater, more explicit, provision is presented in the document for inter-relationships with non-Council owned core infrastructure which are instrumental in servicing public infrastructure.
- 3.7 As stated in the LTP – *“Council’s primary role is the provision of core infrastructure – the foundations of a city that allows communities, the environment and businesses to thrive”*.
- 3.8 WELL contend that adequately reflecting the importance of support infrastructure in Council’s identified three waters capital investment projects is appropriate – as without the means to provide for a resilient electricity distribution network, then the ability to *allow communities, the environment and businesses to thrive*, as proposed in the draft LTP, will not be holistically reflected in the document.
- 3.9 In regard to emergency management, WELL would like Council to consider referencing the potential for emergence overhead cable routs as a cost efficient means to providing robust infrastructure protection, and wider natural hazard resilience across the City. Such corridors represent strategic ‘pathways’ through the city that are reserved for the rapid re-establishment of linear infrastructure services in the event that a natural hazard significantly disrupting the existing network operation.
- 3.10 In acknowledging the concept of such corridors as a response to improved strategic resilience, an appropriate method to address such challenges will be provided for in the LTP

---

*Housing and Sustainable Growth*

---

- 3.11 WELL are interested in the strategic direction being proposed by Council in regard to housing supply as well as laying foundations for sustainable urban growth.
- 3.12 The LTP consultation acknowledges that *“Rapid population growth also means the network [Council Infrastructure] is nearing capacity in many areas, and there will need to be well*

*targeted, but extensive investment in new infrastructure to align with future population growth.”*

- 3.13 WELL consider that Council, in providing for the City’s housing demand, is likely to enter even more so in to partnering with developers and other housing providers, as well as working with central government to explore funding options so as to free up development-ready land.
- 3.14 WELL was a submitter on the MfE National Policy Statement on Urban Development, and consequently is particularly interested in how Tier 1 Cities such as Wellington strategically plan for residential growth as WELL are a core infrastructure provider and need to maintain a level of strategic input in regard to both residential intensification, or future greenfield growth cells.
- 3.15 WELL is not opposed to the LTP Objective regarding additional housing to better meet demand and community requirement for affordable housing – however, electricity distribution to such development needs to be strategically planned in advance. The reason for such planning is to ensure network integration of additional load, the potential for land procurement (i.e., for the possibility of new substation facilities), as well as to forecast capital investment that may be required to expand or upgrade sections of the network.
- 3.16 WELL consider it necessary for the LTP to more explicitly recognise at a high-level *all* core infrastructure provision for housing and sustainable growth (not concentrating solely on Council-owned infrastructure), and furthermore, that such core infrastructure providers are to be meaningfully consulted in advance of the establishment of such housing areas.
- 3.17 In clearly recognising both Council and Non-Council infrastructure requirements for sustainable housing growth, the LTP will transparently portray not only the challenges in meeting this priority area, but also will assist in informing the wider community how Council propose to meet these challenges – thus better informing how the desired outcomes are to be achieved.
- 3.18 WELL seek that the final LTP broadens recognition in the LTP’s challenges and desired outcomes in regard to housing and sustainable growth to include that of core network utility infrastructure providers. By appropriately acknowledging the role and function organisations such as WELL play in the planning and development of housing within the city, a more transparent policy direction will be provided in the LTP for future implementation.
- 3.19 WELL has provided numerous submissions to Council in regard to urban growth strategies and more recently the Planning for Growth Spatial Plan for Wellington City. For the reasons indicated above, WELL support such a strategic approach to growth management; however, an enhanced recognition of all infrastructure variables should be provided.
- 3.20 In consideration of the above WELL seek that additional comment is provided in the LTP to the extent that:
- Ensuring recognition of the city’s electricity distribution networks is provided in the LTP.

- Recognition of WELL as a development partner in meeting the desired environmental outcomes for the provision of sustainable urban development.
- 3.21 WELL are supportive of the LTP priority objective that *Wellington has affordable, resilient and safe housing* – and acknowledge that this objective will be largely addressed through Council’s District Plan review process that is currently underway. However, for the reasons addressed above, WELL seeks that the LTP appropriately recognise the role that network utility operators play in addressing this challenge to ensure that a consistent message is presented in Council’s higher-level planning strategies.
- 3.22 In summary of the 2021-2031 LTP’s Housing and Sustainable Growth objectives
- 1) WELL support strategic approaches to urban growth as it allows for WELL’s network managers to provide for load growth in their Asset Management Plan;
  - 2) WELL acknowledge that the current comprehensive District Plan review process will robustly reflect the requirement for network utility infrastructure to be in place prior to the development of greenfield sites;
  - 3) That to ensure higher-level planning strategy documents adequately recognise that the provision of all key infrastructure is integrated and that the provision of such infrastructure needs to be aligned in order to achieve the desired environmental outcomes of the LTP.

#### **4 Conclusion**

- 4.1 WELL acknowledge the importance of clear and transparent communication associated with delivering Council’s 2021-2031 iteration of the LTP. In recognition of this importance, WELL has provided the above high-level feedback to Council so that such communication adequately reflects perspectives from the city’s electricity distribution provider.
- 4.2 The feedback provided by WELL is intentionally high-level, yet appropriate reasoning has been provided to Council to ensure broader infrastructure considerations are carried through to the finalised LTP document.
- 4.3 WELL note that development of the LTP includes the ability to discuss pertinent matters, such as those raised in this feedback document, directly with Council Officers or the LTP development committee. Consequently, WELL wishes to be heard at the LTP Hearing to elaborate on the themes presented in this submission.

## SUBMISSION TO LONG TERM PLAN 2021-2031

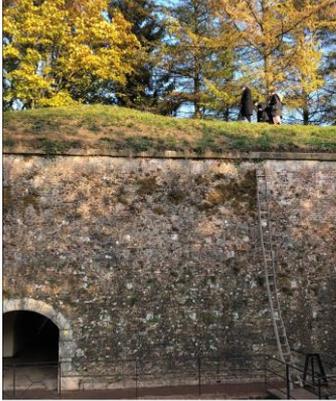

### REQUEST FOR FUNDING SUPPORT FOR NEW ZEALAND MEMORIAL MUSEUM & VISITOR CENTRE, LE QUESNOY, FRANCE

#### Background

In the closing days of the First World War, our soldiers on the Western Front, exhausted survivors of battles on the Somme, Messines, Passchendaele and from halting the 1918 Spring Offensive, had one last wall to climb – literally.

The small town of Le Quesnoy in northern France had been under German occupation since August 1914 and this was November 1918. Surrounded by a moat and a 17th century wall complete with ramparts, the medieval town was like a fortress that had survived many an invasion in the preceding centuries. It had one more force to reckon with. The New Zealand Division had arrived to liberate the town from the German occupiers, who continued to defend the ramparts using howitzers, machine guns and rifles. Orders had been given to the New Zealand troops not to shell the town, to avoid any casualties among the 1600 civilian inhabitants.

Instead, some 300 flaming oil drums were fired onto the ramparts to create a smoke screen obscuring the assault by New Zealand infantry using long ladders to scale the outer walls and inner ramparts. The liberation of the town was completed with the capture of over 700 German soldiers, against just on 500 New Zealand casualties including 142 dead - the liberation was achieved without

the loss of a single civilian life. This is an achievement which the town and its people have never forgotten, even today - over 100 years later - which is now beyond living memory. They speak of the liberation with awe, still amazed that men would come from the far side of the world to free their town and citizens, to rescue them in their darkest hour.

The liberation of the historic walled town by the New Zealand Rifle Brigade just one week before the end of the Great War was a demonstration of Kiwi ingenuity and an act of courage. The story of Le Quesnoy is different from that of many other World War One sites – the town was liberated without being destroyed, and the residents were not displaced, and in that respect, it is a story of hope. The town was preserved intact and stands as a place where memories are lived and relived to tell the story to all who will listen; of the price that was paid for freedom in a war that stole much from our world.

### The Project

The NZ Memorial Museum Trust - Le Quesnoy (a non-profit charitable trust) believes it is time to build a permanent memorial to our soldiers who perished on the fields of Flanders and France in the “war to end all wars”. Indeed, it did not end all wars and many more New Zealanders lost their lives on European soil in the Second World War. Over 12,400 New Zealanders are buried in France and Belgium. It is appropriate that the sacrifice of a significant number of New Zealanders, who will remain forever in a place far from home, is acknowledged and remembered.

The Trust has had the opportunity to purchase a heritage property, the former Mayor’s residence and Gendarmerie (military police headquarters), in Le Quesnoy, which is directly connected to New Zealand’s World War One experience in Europe.

The Trust is working towards the vision of creating “a Kiwi place in France where memory and relationships are alive”. We are working towards this goal through the establishment of a Museum and Visitor Centre in Le Quesnoy where our story will be told across multiple platforms – through artefacts, interactive activities, movies, audio stations, an app and other media.

The museum itself will include space for exhibitions and interactive activities, both digital and manual, designed to encounter and explore the stories of New Zealand's liberation of Le Quesnoy, New Zealand's contributions to the war in Europe, the history of the town of Le Quesnoy, an introduction to New Zealand's culture and heritage to Europeans, and the unique relationship that has developed between New Zealand and the French in Le Quesnoy.

### Our Objective

Through this project we seek to celebrate:

**Freedom** – which inspired our people to go to war

**Friendship** – the unique bonds which developed between the people of Le Quesnoy and New Zealand which are still strong 100 years on

**Future** – the opportunity to create a better future with a focus on how to avoid war

### Our Partners

To fully realise the link between past, present and future, we have engaged New Zealand's most respected professional museum experts to help shape and guide the concept through strategic planning and interpretative masterplanning. We have recently approved the Internal Experience Design Brief for the Museum and Visitor Centre prepared by museum experts Lily Frederikse, Tim Walker and Karl Johnstone. The Feasibility Study prepared by French company, Lamaya, was signed off last year and our Māori Advisory Group has provided a Māori cultural framework to inform the overall visitor experience.

We are in discussions with the French government about a potential partnership. They are very supportive of the project.

We have raised \$8M to date towards the \$15M total. Most of this has come from private individuals and businesses, who are on board with the vision of establishing "a Kiwi place in France where memory and relationships are alive". This is not just a project about remembering the past but focuses on the future, developing an experience which is cross-cultural, connecting across nations, through educational experiences and exchanges, offering an opportunity to reflect and learn from the past as we step into the future. As it is so beautifully expressed in Te Reo:

Ka mua, ka muri

We walk backwards into the future.

### Our Request

We have previously presented to your Mayor at the Metro Councils meeting. We wish to request that you consider a funding commitment to this project as part of your Long-Term Plan.

**Our submission is to request that Wellington City Council supports the project to build a Museum and Visitor Centre in Le Quesnoy with a donation of \$100,000 to remember those who gave their lives in the World Wars to give us freedom.**

**We wish to speak to our submission at an LTP hearing.**

The funds are not required immediately and can be paid over the next three years. We are currently seeking a commitment from you towards the project.

Soldiers came from this city and region as evidenced by your War Memorials. Their names stand in perpetuity here in our country. Their descendants live here and maybe even sit in this Council Chamber. Soldiers came from cities, towns and villages across New Zealand, not knowing what they were going to face on the other side of the world but stepping forward with a courage and belief in what was right and just and good for our country and our world. They went with a belief that tyranny and injustice threatened the very essence of our lives, threatened the freedom, friendship and future which, because of their sacrifice, generations that came after them have been able to enjoy.

In this day and time, we cannot even imagination what they must have faced on the battle grounds of Europe, but we can remember and honour them.

The NZ Memorial Museum Trust asks that you do just that through support of our project.

Thank you for the opportunity to make this submission which we hope will be favourably considered.

Rt Hon Sir Don McKinnon ONZ GCVO  
Chairman  
New Zealand Memorial Museum Trust

### Introduction

The Great Harbour Way/ Te Aranui o Pōneke is a 72 km walking and cycling route around Te Whanganui-a-tara, the harbour of Wellington, New Zealand, from Ōrua-pouanui /Baring Head in the east, to Te Rimurapa / Sinclair Head in the west. Few, if any, opportunities exist elsewhere in the world to walk or cycle the entire coastline of a major city harbour, continually touching the water's edge.

Since this beautiful route runs through both Wellington and Hutt City Council territory, and touches the coastline, much of which is Greater Wellington's responsibility, we are writing to all three Councils regarding their Long Term Plans. We will also copy both mana whenua iwi, Te Ātiawa Taranaki ki Te Upoko o Te Ika and Ngāti Toa Rangatira, to keep them informed and we welcome their continued input. Likewise, we will send this document to Waka Kotahi, the NZ Transport Agency, a significant funder, and Minister of Transport Michael Wood.

All three Councils, and the Government, have declared a Climate Emergency. Zero carbon commuting, recreation and tourism are possible with Te Aranui o Pōneke. Other benefits include greater mental and physical wellbeing from healthy exercise close to nature, less traffic congestion as commuters have a better choice, significant opportunities for local businesses in accommodation, food, and bike hire. Walkers<sup>1</sup> and cyclists<sup>2</sup> spend more locally and stay longer than cruise ship passengers, for example.

Once Te Ara Tupua is complete we envisage there will be a boom in domestic visitors like the Otago Rail Trail<sup>3</sup> or Tasman's Great Taste Trail<sup>4</sup>. Other improvements are making a difference but Te Ara Tupua will be the game-changer to make Te Aranui o Pōneke a significant destination as well as a spine connecting other walking and cycling opportunities. For a number of potential users, the flat nature of the path will be a significant attraction. We also expect events such as ultra-marathons to happen along the route although we would discourage any exclusive use.

There are several further improvements we recommend, and we would like to see these completed in the next decade, as soon as possible after Te Ara Tupua. These are listed under "Investment Required". We recommend staff utilise the excellent Boffa Miskell Report

**Request:** GHW Trust would like all three Long Term Plans to include Te Aranui o Pōneke, Great Harbour Way, as a project and for each to allocate a specific staff member as a contact for the Trust.

<sup>3</sup> <https://www.otagocentralrailtrail.co.nz>

<sup>4</sup> <https://www.nzcycletrail.com/find-your-ride/22-great-rides/tasmans-great-taste-trail>

Diagram is from the excellent Boffa Miskell Report<sup>5</sup>

## Progress

Since the **Fix the Gap** public meeting in 2008 where the Great Harbour Way coalition, subsequently Trust, was formed, and the earlier Founder's Plan for the Great Harbour Way, there has been considerable progress for which we thank the three Councils, Waka Kotahi, volunteers, and advocates. Every improvement draws more users.

### Improvements (from East to West):

- Ōrua-Pouanui, Baring Head, in public ownership
- Baring Head lighthouse accommodation, in progress
- Resource Consent granted for the Eastern Bays (Eastbourne) shared path
- Construction started on cycling connections from Melling to Petone enabling more access
- Resource Consent and funding for Fixing the Gap i.e. Te Ara Tupua between Petone and Ngauranga
- Hutt Road walking and cycling path improvements
- Announcement of Thorndon Quay cycling improvements
- Announcement of an electric ferry from Queens Wharf to Miramar (and Days Bay)
- Opening of Te Raukura Wharewaka
- Oriental Bay walking and cycling improvements
- Paths along the coast at Te Raekaihau Head
- Tahitai
  - Work progressing on Pt Jerningham to Evans Bay and Akau Tangi / Evans Bay improvements
  - Cobham Drive section complete
- Construction started at Miramar cutting – forming a good connection to the Peninsular section
- Te Raekihau Point paths
- Widened portions of the footpath in Houghton Bay, Island Bay and Owhiro Bay
- Te Kopahou Visitors Centre

<sup>5</sup> <http://www.greatharbourway.org.nz/documents/boffa-miskell-report-on-great-harbour-way-te-aranui-o-poneke>

## Investment Required

Considerable detail is available in the original Boffa Miskell report<sup>6</sup>, commissioned in 2009 (available on the GHW website).

Greater Wellington Regional Council has several opportunities to help complete and support Te Aranui o Pōneke, particularly with their majority ownership of Centreport, role in Public transport and ownership of the East Harbour Regional Park. We would like more support for the excellent local ranger.

## Public Transport

Trains, buses, and ferries mean that sections of the Great Harbour Way can be enjoyed in either direction. We encourage GWRC to ensure access to as many points on the Great Harbour Way is possible for walkers (including those with wheelchairs or buggies) and cyclists. Limitations on bicycle transport should be reduced.

Ferry access includes Queens Wharf, Seatoun and Days Bay, all of which are on the GHW route. Miramar Wharf is in planning. We would also encourage refurbishment, maybe shortening, of the Petone Wharf if possible so ferries can support walkers and cyclists.

## Centreport

The current route from Ngāuranga to the Wellington waterfront is along Hutt Road and Thorndon Quay. While this corridor is important for commuters, we would like to see a route along the coast. This has been walked (with permission from Kiwirail). Current developments in Dunedin show how well a path could be created without the expensive reclamation work necessary for Te Ara Tupua. Recent conversations with senior management at Centreport have been promising. Access from Kaiwharawhara beach and future Ferry Terminal along to Aotea Quay could be designed in conjunction with potential work on the Aotea Quay to Ngāuranga motorway section.

The following items are from East to West and not in order of importance nor cost. The three Councils, Waka Kotahi and other organisations including Great Harbour Way Trust and Wellington Sculpture Trust have parts to play.

## General

- Māori cultural and historic information
- Later historical information e.g. Wahine memorial, F69 sinking, wrecks, wharf redevelopment
- Public Toilets/ water fountains/planting/ seats/Public Art
- Local species (seabirds, kororā, lizards, invertebrates, plants) education and protection
- Promotion through WellingtonNZ.com
- Signage: The Trust is delighted with the clarity in WCC's website that Tahitai is part of Te Aranui o Pōneke and recommend physical signage, with our logo, that makes this clear to the public along the whole route.

## Specific places

- Baring Head/ Ōrua-Pouanui: we'd like a marker to show the beginning/end of the Great Harbour Way, Te Aranui o Pōneke. This could also show the South Coast route for the Remutaka cycleway loop (that is also good for walking)
- Access from Baring Head to Eastbourne crosses private land in places and we urge GWRC to regularise this important access by lease, purchase or other agreements, potentially aided by the Walking Access Commission, Te Hīkoi Aotearoa
- Access by Seaview is unclear
- The Bridge over Te Awa Kairangi/Hutt river is inadequate for fishers, walkers, and cyclists. Please consider the addition of cantilevered fisher pods to free the existing walkway or a separate bridge in the next ten years.
- The Petone foreshore section from Te Awa Kairangi/ Hutt River to the west end of The Esplanade is in places too narrow for walkers and cyclists to share safely, especially with the increase in e-scooters and e-bikes. More safe crossings for people on foot or bike across The Esplanade would encourage residents from Petone to use the lovely foreshore on foot and for GHW users to access the Jackson Street cafés and shops.
- Ngāuranga to Wellington City: Thorndon Quay – we strongly endorse removal of angled parking and installation of 24/7 cycleways along this busy section. However, even better than the commuting route along Hutt Road and Thorndon Quay would be a seaward path from Ngauranga to Kaiwharawhara where the new

<sup>6</sup> <http://www.greatharbourway.org.nz/documents/boffa-miskell-report-on-great-harbour-way-te-aranui-o-poneke>

ferry terminal is planned. An interim and cost-effective step would be to create a flat walking path, of a tramping standard, that re-joins the Hutt Road alongside the Kaiwharawhara Stream.

- Wellington Waterfront: pinch points near Shed 5 and across bridges make this experience less than ideal. Cycling lanes along Jervis Quay for fast commuting cyclists would reduce conflict.
- Miramar peninsula. Stronger consideration of how the walking and cycling communities are served around the peninsula is necessary, including during construction at Shelly Bay. Slower speeds will help but the road space for more vehicles, cyclists and pedestrians is tight. Consider cantilevering a path as per Cromwell-Clyde<sup>7</sup>, or putting one on piers as Ōtepoti/Dunedin peninsular shared path has done recently<sup>8</sup>. Progress with the 70+ hectare Te Motu Kairangi National Heritage Park appears to have stalled despite successive three-way MOUs. We urge Central and local Government and iwi to urgently agree a plan with ecological restoration and access for walking and cycling. Is the Framework,<sup>9</sup> revised in 2016, current policy?
- Breaker Bay to Moa Point – walking access is provided off-road, but the road is narrow for cycling and motorised vehicles.
- Wellington Airport – tunnel access is restricting. A path over the top for walkers and cyclists is desirable.
- Lyall Bay – given the width of the footpath and the danger from angle parking, should either a shared path or delineated walking and cycling be formalised here?
- Lyall Bay to Te Raekihau Head: there are several road reserves to the seaward and land side that could provide more space for walking and cycling.
- Te Raekihau Head – while there are some separate paths there is little signage to indicate where cyclists can go and the bike path surface is unkind to on-road bikes. The footpath/boardwalk is insufficiently wide for sharing and the road is narrow with poor visibility. Access from the Princess Bay car park back to the road/footpath is dangerous.
- Houghton Bay to Island Bay: some car parking on the seaward side could be re-purposed for walking and cycling but this would be controversial for residents and visitors.
- An immediate step in the right direction would be to set a speed limit of 30km all along the coast from the Miramar cutting to Owhiro Bay, including Karaka Bay, Breaker Bay, Moa Point, Lyall Bay, Houghton Bay and Island Bay.
- Owhiro Bay to Sinclair Head/Rimurapa: whether fewer motorised vehicles should be allowed on more days (like Sunday where only keyholders have access) is a question we'd like to raise. The close proximity between 4WDs, cyclists, and walkers, on constrained sections is unpleasant if not dangerous.
- Rimurapa – we'd like a marker to show the beginning/end of the Great Harbour Way/ Te Aranui o Pōneke.

Thank you for your consideration.

Together we can create a world-class attraction for locals and visitors alike, embedded in the stunning natural landscape, enjoying access to the Hutt and Wellington dining and cultural amenities, accessible to the whole population, with multiple benefits for our ecological, cultural, health, social and economic wellbeings.

**He waka eke noa!**

We would appreciate a detailed response from each Council on what is feasible, in what timeframe, for their areas of responsibility and a commitment to collaborate on this exciting project.

### Ōtepoti/ Dunedin to Portobello shared path under construction 2021<sup>10</sup>

We recommend the separate path on piers for areas like the Miramar peninsula. It is less disruptive than reclamation and no change to existing roads is necessary. This must be an acceptable solution given its current construction.

### Lake Dunstan cantilevered sections<sup>11</sup> could suit Kaiwharawhara to Aotea Quay

## **Hospitality New Zealand**

**TO WELLINGTON CITY COUNCIL**

**SUBMISSION ON  
LONG TERM PLAN 2021-31**

**30<sup>th</sup> April 2021**

**CONTACT DETAILS:** Hospitality New Zealand  
Contact: Adam Parker

[www.hospitality.org.nz](http://www.hospitality.org.nz)

### **About Hospitality New Zealand:**

1. Hospitality New Zealand (“Hospitality NZ”) is a member-led, not-for-profit organisation representing approximately 3,000 businesses, including cafés, restaurants, bars, nightclubs, commercial accommodation, country hotels and off-licences.
2. Hospitality NZ has a 119-year history of advocating on behalf of the hospitality and tourism sector and is led by Chief Executive Julie White. We have a team of seven Regional Managers located around the country, and a National Office in Wellington to service our members.
3. Hospitality NZ has a Board of Management, made up of elected members from across the sectors of the industry, and an Accommodation Advisory Council, made up of elected members from the accommodation sector.
4. We also have 20 local Branches covering the entire country, representing at a local level all those member businesses which are located within the region. Any current financial member of Hospitality NZ is automatically a member of the local Branch.
5. This submission relates to the Long-Term Plan 2021-31 (“the Plan”).
6. Enquiries relating to this submission should be referred to Adam Parker, Regional Manager – Wellington, at [REDACTED].

### **General Comments:**

7. Hospitality New Zealand welcomes the opportunity to comment on Wellington City Council’s Long-Term Plan 2021-31. We have a number of general concerns on issues that we believe will rear their head in the next ten years. These include infrastructure funding, local alcohol policies, short-term rental accommodation, and responsible camping.

#### **Rates**

8. Hospitality NZ urges caution around rates increases. While we are somewhat supportive of the projects assessed as the 7 ‘big calls’, we are wary of in many cases, businesses being asked to carry an unfair proportion of the rates bill considering that these main projects may not actually be of benefit to them at all.

#### **Infrastructure Funding**

9. Local Councils in some parts of the country have recognised infrastructure funding is a significant issue and are working towards change, some Councils are looking at targeted rates while others have openly criticised the funding investment options put forward by the Government.
10. In 2019, Productivity Commission undertook its report into Local Government Funding and Finance. The report recommended that “Better use of existing tools and central government funds should be enough to close the tourism funding shortfall. Given the small scale of the funding gap, introducing new funding tools would incur significant implementation, administration and enforcement costs and is unlikely to result in a net benefit to councils.”

11. We endorse those sentiments – rather than introducing new tools that target specific sectors, councils should make better use of existing tools to achieve their goals.
12. Hospitality NZ believes a consistent and fair nationwide approach to the funding of core infrastructure needs to be introduced.
13. Hospitality and accommodation sectors are viewed by local councils as an easy source of funds, via targeted rates on commercial businesses, or implementing bed taxes. Hospitality NZ opposes the introduction of bed tax as it targets only those people staying in commercial accommodation.
14. If a targeted rate or visitor levy is deemed necessary, Hospitality NZ believes these must be broad based taxes, and ensure that they are appropriately designed, are fair and equitable to those contributing, have community support, and are used solely for initiatives that benefit the visitor economy. Alternatively, those funds raised must be ring-fenced and used for the benefit of those contributing to the fund. However, Hospitality NZ's preference would be for any funding of tourism infrastructure to come from a centralised pool.
15. Hospitality NZ recommends further consideration is given to implement the Productivity Commission's report findings.
16. Prior to COVID, tourism was struggling to maintain social license in communities – in part given the infrastructure pressure tourism growth was placing on some regions. We recognise that tourism and hospitality use and benefit from a wide variety of mixed-use infrastructure. We now have a real opportunity to resolve some of these infrastructure issues and prepare for the rebuild of the sector.
17. Targeted rates and 'tourism' or 'bed taxes' concern our members, who assert:
  - These unfairly place the burden of funding infrastructure or promotion on just one part of the tourism/hospitality industry;
  - As ratepayers, businesses oppose increased rates to fund basic infrastructure they may not receive a direct benefit from i.e., infrastructure for freedom campers;
  - We would prefer to see Central Government funding of infrastructure, where local councils are unable to fund it themselves; and
  - If new funding schemes are required, there needs to be an emphasis on broad-based levying. They need to be fair and equitable and all businesses who will benefit from further infrastructure development should contribute.

### **Local Alcohol Policies (LAPs)**

18. Hospitality NZ has and continues to be actively involved in developing LAPs, ensuring the sector, local communities and the viability of our members have the best fit settings and rules governing the sale and consumption of alcohol.
19. Hospitality NZ has actively contributed by submitting on all draft LAPs throughout the country. Some Councils have opted not to introduce a LAP and instead used the national default rules set out in the Sale and Supply of Alcohol Act 2012 (SSAA).
20. Since the implementation of SSAA 2012 Act it has become apparent that some Councils often attempt to include rules within an LAP that are beyond their authority. This is a timely and expensive process.
21. The wider hospitality industry would like the process of LAPs to be either repealed or significantly amended.

22. Within the current District Licencing Committees system, there is the ability for each licence to have appropriate restrictions placed on it if deemed necessary by the committee. A shift in the system whereby DLCs administer appropriate restrictions would render the LAP process unnecessary.

### **Short-term Rental Accommodation (STRA)**

23. The significant growth in short-term rental accommodation (STRA) through providers such as AirBnB or Bookabach, has raised a number of concerns for the sector, including:

- Peer to peer accommodation providers, particularly if they are operating in a highly commercial way, are often not meeting the regulatory requirements under the Building Act, taxation, health and safety or local government district plans that commercial accommodation providers are required to adhere to. Some of these regulations incur significant costs to businesses and this can create an imbalance in competition.
- In some parts of the country, the preference for rental property owners to convert to AirBnB or similar, is resulting in a lack of available long-term rental accommodation for workers and families.

24. Traditional accommodation operators are seeking a fairer playing field with regard to commercial vs non-commercial rates and regulation. STRA operators do not require the same building and operational compliance and therefore do not attract the associated costs that commercial accommodation providers do. However, they do benefit from things like tourism promotion which is often funded from the tourism and accommodation sector. STRA operators also have an impact on the communities they operate in, contributing to housing shortages, noise impacts and loss of community.

25. There is a growing inequity in the regulation of short-term and long-term accommodation. Stats NZ estimated that for 2018, STRA gross revenue was between \$550-\$700 million, with guest nights between 6-10 million.

26. The STRA sector operates mainly in residential areas, only pays residential rates, operates with less regulation, and often escapes appropriate taxation. Where councils have tried to regulate STRA operators, barriers for regulation include identification of STRA properties, lack of cooperation in data capture from operators and booking platform providers, and consistent regulation between local councils.

27. As more people look to non-traditional STRA, safety standards, hygiene standards, and contact tracing becomes significant guest care factors and priorities post-COVID-19. We face negative impacts of an unregulated and substandard product offered to both local and international visitors.

28. Hospitality NZ alongside other sector associations submitted a letter to MBIE in July 2020 recommending a compulsory registration/data sharing system that allows for information collection from all operators of STRA and a consistent national regulatory framework.

29. Hospitality NZ would welcome the opportunity to work with you and related parties to:

- Define commercial accommodation in your area in a way that captures people who are benefiting from STRA house letting on a commercial level;
- Ensure rates are appropriately collected from these businesses;
- Ensure appropriate health and safety and compliance requirements on peer-to-peer house letting is set at a national level, removing the need for local councils to come up with the rules; and

- Advocate to Central Government to create a national register of short-term rental accommodation properties, moving towards fair regulation of STRA operators.

### **Responsible Camping**

30. Freedom camping has been a part of New Zealand culture for many years. However, in recent years, freedom camping has attracted more attention as international tourism numbers have grown, and communities have expected higher standards from both domestic and international tourists. The proliferation of non-self-contained freedom campers parking up in non-compliant spots around the country has increased to the detriment of local's perception of visitors, the environment and to other visitors using these facilities.
31. The number of international visitors who did some freedom camping in New Zealand has been rising recently, from 54,000 in the year ended 2013 to around 123,000 in the year ended 2018. This followed a period of moderate growth from around 10,000 visitors at the beginning of the 2000's. Total estimated spending by visitors who did some freedom camping has also increased significantly in this period, from \$210 million in 2013 to \$540 million in 2018. The growth in numbers and spending from this group of visitors followed a similar pattern to that seen for total international visitors. However, even with this increase, only 3.4 per cent of visitors to New Zealand did some freedom camping in 2017 and 2018.
32. The definition of "self-contained" now means freedom campers wanting to stay in restricted areas will need a toilet that can be used inside the vehicle even when the bed is made up.
33. The wider industry feels their local councils need to do more to control this issue and are also concerned about the damage being done to scenic spots due to lack of appropriate facilities. When left unmanaged it effects the amenity of an area negatively through rubbish, waste and congestion in public areas.
34. Direct effects can be seen on smaller accommodation providers where freedom campers have the ability to stay in areas where no clear local rules have been established. Therefore, having the ability to stay centrally in their vehicles as opposed to staying at small to medium sized accommodation.
35. The Tourism Infrastructure Fund put public bathrooms in many popular tourism spots, and unintentionally created places where people could freedom camp – some of which were only a few kilometres from a holiday park. We do not believe this contributes to the type of high value visitor we want.
36. Businesses primarily impacted are holiday parks as these freedom campers would traditionally have stayed in these facilities. Currently issues for holiday parks include freedom campers using facilities without paying.
37. Hospitality New Zealand wants local government to develop and strengthen appropriate regulations for responsible camping, and create infrastructure cost support for the future.
38. Hospitality NZ would welcome the opportunity to work with you and related parties to:
  - Take greater leadership in managing the locations where freedom campers can operate;
  - Implement freedom camping bylaws through clear, honest, pragmatic consultation and feedback during its development; and
  - Lobby to ensure Central Government has a strategy to acknowledge the growth in freedom camping – accommodating responsible camping but not to the detriment of

other visitor experiences and other accommodation providers (i.e., Motels and Holiday parks).

### **Specific Comments:**

39. Hospitality NZ also has a number of specific comments concerning the Council's Long-Term Plan.

### **Rates**

40. HNZ believes Council should explore other financial avenues to reduce rates and debt rather than simply relying on ratepayers to fund projects. Most ratepayers – and certainly the business community – do not have confidence that Council is cutting costs or being business-like in the way it manages assets, debt or a changing economic environment. If ratepayers felt the Council was doing its utmost to minimise costs, rates increases would be more palatable.

41. Hospitality NZ notes that the differential in the proposed LTP is 3.25. In addition, the proposed rates increase is 13.5%. However, the actual increase for Wellington businesses is 44% which in our opinion, is unfair and unreasonable. A real-world example is if a resident is paying \$4.50 for a coffee, a small coffee business is paying \$6.48. No one will pay \$6.48 for a coffee and therefore these extra costs cannot be passed on to the consumer.

42. We would also like to remind council that both residential and commercial taxpayer are very aware of recent events involving various underground burst pipes, sinkholes and sewage leaks across Wellington. It's arguable that these events could have been prevented if council had chosen to renew its depreciated assets over recent years. Hospitality NZ feel that ratepayers are now being unfairly penalised with substantial rates increases for mistakes that could have been prevented, should council have chosen to follow the advice of central Government.

### **Key projects**

43. Hospitality New Zealand are supportive of the investment in three waters infrastructure and waste water laterals. However, we do not support the substantial rates increase which is being placed on already struggling small business in order to fund this investment. We suggest council look at alternative ways of funding this investment in addition to a more reasonable rates increase for the small business sector.

44. Hospitality NZ is supportive of the cycleways project and the proposed option for funding. However, we would urge council not to eliminate any loading zones or access areas for supply trucks and delivery vehicles to get in to inner city small business.

### **Recommendation:**

45. We recommend that the Council:

- a) Work with, and include Hospitality venues (*including bars, restaurants, cafes and commercial accommodation*) when considering how to increase the vibrancy and safety of Wellington city.
- b) Consider other funding options for the three-waters reform in order to prevent penalising small business for infrastructure repairs and maintenance.

**Conclusion:**

46. We thank Wellington City Council for the opportunity to provide input into the consultation.

47. We would be happy to discuss any parts of this submission in more detail, and to provide any assistance that may be required.

# Submission #: 719

## Long-term Plan Submission 2021/31

### We wish to speak to our submission

We are writing regarding a long-term plan submission; for \$504K to be reinstated to the waterfront renewal budget, \$6.3m Year Three and \$50,000 in Year One of the budget to reaffirm the Wellington City Council's commitment to the Garden of Beneficence, as part of the Frank Kitts precinct redevelopment.

### Background

Following the arrival of European settlers, the Chinese community is one of the longest established communities in New Zealand, first arriving in 1853. Their presence is represented by arches and gardens in other New Zealand cities and towns but nothing yet exists in Aotearoa's capital.

The Garden of Beneficence has been part of the Wellington City Council's vision since 2001 to redevelop the Frank Kitts waterfront, to make the city more attractive and vibrant, and provide valuable recreation opportunities, benefiting the whole community.

A Memorandum of Understanding (MoU) was signed 7 June 2010 by the Wellington City Council and the Beijing Municipal People's Government. In MoU clause V11 both parties agree to provide support for the establishment of a "Chinese Garden" in Wellington. Beijing subsequently sent a garden designer and engineer to Wellington to make recommendations on the design and helped fund the resource consent.

In 2014 a MoU was signed with Wellington's sister city, Xiamen, to implement the garden. Essentially works "above ground" would be donated/funded from Xiamen and other sources, meaning there is no impact on rates. The cities of Tianjin (friendly city status) and the province of Zhejiang have also offered their support. Works "below ground" are the responsibility of Wellington City Council.

The current proposed design for the garden has it located between the lower open lawn and upper lawn, replacing the current steps and encroaching slightly on the side of the existing Frank Kitts Park underground carpark.

The carpark has been identified as being earthquake prone and Council is considering options to remove or remediate the carpark.

In the Council's Long-term Plan 2018-2028 there was \$2.6 million budgeted in 2018/19 for the Frank Kitts playground to be built, and waterfront renewal of \$198k in 2018/19 for Frank Kitts park, and \$306k in 2019/20 for the Frank Kitts carpark seismic strengthening. The Council's contribution to the garden was to be \$6.3 million in year 7 (2024/25).

Resource consent for the Garden of Beneficence was finalised 23 December 2018. The requested \$1 million contribution for the garden from the Wellington Chinese Garden Society, representing years of tireless fundraising, was presented to Wellington City Council 22 October 2020.

### **The current situation**

The Council has recently agreed to proceed with building of Frank Kitts playground at a cost of \$5.5 million, separating it from other redevelopment work.

In March 2021 City Councillors voted to remove \$6.5 million from the long-term budget for the Garden of Beneficence. This seriously undermined the trustworthiness of the Council with the wider Wellington community and years of effort developing relationships that have benefited local businesses working with China.

The Wellington City Council has had talks with the Fale Malae Trust about a fale potentially being located on the waterfront. The Wellington Chinese Garden Society has also been working constructively with the Fale Male Trust.

It has been recommended to Council that Frank Kitts car park be demolished, however the decision on this has yet to be made final by Council.

### **Our submission**

The Wellington Chinese Garden Society proposes the elegant three arch Pai Lau entrance to the future Garden of Beneficence be erected as a tangible demonstration of the Wellington City Council's commitment to the garden. This would only require four holes to be dug in an area (near the Jervois Quay footpath) where the ground quality is not questionable, with minimal expense to the Council. The Pai Lau arches would be donated to Wellington City Council.

This move would be an appropriate gesture to honour the agreement with the city of Xiamen and could be done in time, with an event, to recognise the 15-year anniversary of the sister city relationship in 2022. The erection of the Pai Lau would also enable resource consent for the Garden of Beneficence to be kept live.

We further request that the Council return \$504K to the waterfront renewal of the Frank Kitts precinct in Year One of the budget to resolve the issue of the carpark, allowing detailed design of the garden to undertaken.

We look forward to better understanding what strengthening work is required to shore up the sea wall and ensure the resilience of Frank Kitts waterfront by the carpark. We can then understand what funding is needed for the Garden of Beneficence to be completed. The original \$6.3m for the Garden of Beneficence needs to be reinstated to confirm the Council's commitment to garden.

### **Support for the Long-term plan**

Progressing with the Garden of Beneficence supports the 2021-2031 Long-term Plan priority objectives 4 and 6.

Priority 4. The city has resilient and fit-for-purpose community, creative and cultural spaces.

Priority 6. Strong partnerships with mana whenua.

Mana whenua have provided their written support to the Garden of Beneficence. To ensure they are appropriately represented in the development of the garden mana whenua will hold two places on the Wellington Chinese Garden Society committee.

Having the Garden of Beneficence included in the Long-term plan with tangible financial commitment to action would demonstrate the Council still has the vision and leadership needed to create a waterfront befitting of Aotearoa's capital.

Thank-you for considering our submission. If you have any further queries or information, please do not hesitate to contact Tina Dome on email [REDACTED]

Warmest regards, Tina Dome and Harvey Wu (Chairperson), Wellington Chinese Garden Society Inc.

# Long Term Plan Submission

Submission to the Wellington City Council  
May 2021

## About Sport New Zealand

Sport New Zealand (Sport NZ) is the crown agency responsible for contributing to the wellbeing of everybody in Aotearoa New Zealand by leading an enriching and inspiring play, active recreation, and sport system. Sport NZ's vision is simple - to get **Every Body Active in Aotearoa New Zealand**.

Our role as kaitiaki of the system focusses on lifting the physical activity levels of all those living within Aotearoa and having the greatest possible impact on wellbeing. We achieve our outcomes by aligning our investment through partnerships, funds and programmes to our strategic priorities set out in our four-year strategic plan.

Wellington City Council is important to the work of Sport NZ in the greater Wellington region.

## The importance of Council

Wellington City Council is a major provider of sport and recreation facilities, activities and services in the Wellington region. We appreciate this support and investment – without it much of what happens in our sector would not be possible. Council investment has provided positive outcomes for a wide range of sports codes and community members from diverse cultures, ages, and abilities. We also acknowledge the commitment of council staff in supporting the sector.

Play, active recreation and sport make an enormous contribution to the health and wellbeing of all the residents of Wellington City, contributing to happier, healthier people and connected communities. Physical activity, its wide-ranging benefits and its importance to our communities are fundamental to meeting the outcomes identified in several Council plans and strategies.

We acknowledge the challenges Council faces with balancing the various competing demands such as growth, transport, climate change, water quality and the significant infrastructure projects that Council is undertaking through this plan. The impact of Covid-19 will be with us for some time to come, so too the decisions made in this 10-year Budget.

## The importance of Nuku Ora (Formerly Sport Wellington)

Sport New Zealand invests into Regional Sports Trusts, like Nuku Ora for their regional leadership of the play, active recreation and sport system and consider them to be our significant regional partner and champion of our strategic vision. This aligns well with their own vision of '**Hauora. Everyone active, healthy, and happy**'. Nuku Ora work hard to build strong strategic relationships, particularly with Councils and have driven the development and implementation of *Living Well*, the regional physical activity framework for the Wellington Region, which is hallmarked by organisational collaboration in order to achieve regionwide strategic outcomes. We acknowledge Council's proactive stance and investment in supporting Nuku Ora for their regional leadership of the play, active recreation and sport sector and implementation of *Living Well*. With significant organisational change aligned to their new strategy now behind them Nuku Ora will need to gain additional momentum for the implementation of their strategy and continued support from Council will be an important enabler.

## The impact of COVID-19 on the play, active recreation and sport sector

COVID-19 has placed significant pressure on Aotearoa New Zealand's play, active recreation, and sport system.

- Through our insights, we know the COVID-19 lockdowns has exacerbated inequalities, putting some population groups at even more risk regarding their physical and mental wellbeing.

- Analysis of media commentary also identified concerns about returning to previous activities in shared public spaces due to safety.
- Sector organisations which play a key role in enabling New Zealanders to be active were also impacted by COVID-19. These impacts include lost revenue, cash flow difficulties, reduced capacity and change of membership.

All these things have hit the sector hard, and Sport NZ is working with regional sports trusts, like Nuku Ora, Councils, and other local stakeholders to find solutions to help address these.

## **The Future of Play, Active Recreation and Sport**

The impacts of Covid-19 have accelerated the need for our sector to consider the future state of play, action recreation and sport to position itself for the next 20 years and beyond. Over the last year work has been underway with the sector to better understand the challenges and create a more active future through a system that does things differently and better. Emerging themes from this work paint a picture of a system that is:

- Values-based, inclusive, equitable, fair, affordable, bi-cultural, multi-cultural, gender neutral/gender free, caring, strong sense of belonging, safe, affordable, universally accessible, universal design, cooperative and co-designed.
- Locally led and behaves as a dynamic network, which integrates action across many agencies / communities / regions and leverages systems thinking and practice.
- Collaborative through a high trust model with clear roles and incorporates new parties, innovative funding, distributed decision-making and continuously learns and adapts to changing needs, situations, and facts (data-driven).
- Giving effect to the principles of Tiriti o Waitangi through Mana Ōrite – partnership, Mana Maori – protection, Mana Taurite – participation.
- Caring and protective of the unique natural environment (mountains, lakes, seas, native bush, fauna and flora) in which people can be active, and contribute to environmental sustainability through safeguarding natural resources (air, water, land) and planning the physical environment to support activity, universal access and accessibility of spaces and places to be active.
- Achieving Mauri Tū, Mauri ora – ‘an active soul is a healthy soul’. Mauri ora describes a heightened state of physical, mental, emotional, spiritual wellbeing and cultural vitality. In physical activity it is when we are fully engaged, active, strong, and well.

## **Target audiences and activity areas**

Sport NZ remains committed to making progress towards our primary goal of ensuring more tamariki and rangatahi (aged 5 – 18) have access to quality physical activity options. We aspire to reduce the drop off in activity levels of rangatahi from ages 12 to 18 and increase the levels of activity for those tamariki and rangatahi who are less active.

## **Wellington City Council investment in Play, Active Recreation and Sport**

Sport NZ acknowledges the challenges faced by Council in providing community services through its sport and recreation assets and that these some of these assets are ageing and require significant renewal investment.

Sport NZ, Nuku Ora, and Wellington City Council officers have been working alongside representatives from all Wellington region councils and with the active recreation and sports sector to develop a co-ordinated and collaborative approach for future sport and recreation facility provision. The Wellington Region Spaces and Places Plan (2019-2022) provides Council with a clear strategic view of infrastructure needs for the region and the evaluation criteria to prioritise

investment and ultimately make better decisions. This plan is at a critical stage of implementation and we would urge Council to contribute, alongside other Councils in the Wellington region, to ensure Nuku Ora can provide the appropriate level of capability and capacity to lead this project which provides the opportunity to benefit all stakeholders as well as the community.

Sport NZ acknowledges the high level of commitment that Council has traditionally shown to maintaining quality recreational and sport infrastructure and notes the planned resurfacing of Hataitai netball and tennis courts and the proposed earthquake strengthening of Freyberg Pool. With such a significant programme of infrastructure development and renewals planned across Council activities for this 10-year period we would ask that Council continue the high standard set for maintaining recreational and sport infrastructure across the City including upgrades to parks and reserves, which remain such a catalyst for physical activity. This has been a hallmark of Council over many years and should not be compromised due to other significant infrastructure projects.

Planning for growth in the city is critical and it is pleasing to note that the development of the Grenada North Sports hub remains in the plan. Sport NZ has recently published a Sports Hub Development Guide which will be a useful resource for Council to utilise. The local sports hub examples of Toitu Poneke, Alex Moore Park and, slightly further afield Fraser Park Sportville, provide real life examples, of the opportunities and the challenges that sports hubs present and will be a rich resource of advice.

We note the plan to upgrade community facilities at Strathmore, Newtown, Aro Valley, Tawa/Linden and Karori and would suggest that Council views these developments through a wellbeing and physical activity lens. What opportunities can they provide as catalysts for increased physical activity and how will they engage with local communities to ensure that they meet local community physical activity needs?

The rising cost of participation continues to be a signification barrier, particularly for those members of the Wellington community living in higher deprivation areas and we note Council's intentions to review its fees and charges. We recognise the challenge for council here in what is often a contentious subject as any rise in such fees and charges will have a negative impact on community participation and wellbeing.

## **Wellington City Council's support for Play**

Sport New Zealand's focus upon Play has grown sharply over the last few years to accommodate our strategic priorities. We have grown our workforce and steeply grown our investment into the sector.

Wellington City Council has been successful, not just in securing some of this investment as a catalyst for activation, but in steadily testing community play interventions which are informing the growth of play across the region, alongside Nuku Ora. We are delighted to see the creation and growth of specific Play roles within the Sport and Recreation projects team and we wish to thank those officers involved in supporting the development and testing of new or novel efforts to deliver play in public settings.

Play activations of this type serve to normalise play everywhere and promote the benefits and impacts of play to a growing cohort of New Zealanders. To consolidate upon this success, and to remain at the vanguard, we encourage Wellington City Council to now contemplate an integrated planning approach towards play. Doing so would mobilise teams across council in a child-friendly fashion and ensure there is more opportunity to activate spaces and places and create environments that encourage physical activity through incidental play. Wellington City Council clearly understand that play is not just playgrounds, and as such, have established firm footings to begin to plan for a child-friendly city.

Across our submissions we are encouraging councils to consider, how the interaction of investment, policy, programmes and the physical environment specifically support the physical wellbeing of residents, and in particular our tamariki and rangatahi.

Through our regional partner, Nuku Ora, Sport NZ can support council on the play journey.

## **Sport NZ recommendations/feedback on specific consultation topics**

### **1. Cycleways**

Sport NZ acknowledges the significant drive by Council to enhance Active Transport opportunities through the development of a more connected network of cycleways. Safer cycling options contribute to more connected communities, increased physical activity options and thus community wellbeing. Sport NZ also acknowledges that, given some significant infrastructure projects planned over the next 10 years that Council needs to balance priorities. We therefore support Option 3 with an investment of \$120m over the 10-year period as being a pragmatic yet significant statement of council's intentions and aspirations.

Thank you for the opportunity to submit to the Wellington City Council draft 10-year plan.

Ngā mihi

**Sport New Zealand**

## Kōrero mai mō te mahere 10-tau

### Have your say on our 10-Year Plan

All submissions must be received by **midnight Monday 10 May 2021**.

You don't have to give feedback on every decision – just choose the ones you're interested in. You can only submit once. You can include supporting information along with your submission.

Before you start, read about our priorities and projects in our consultation document. There are copies available at your local library and our Service Centre at 12 Manners Street, or visit [wgtm.cc/ltp](http://wgtm.cc/ltp).

#### Why we're collecting this information

Your feedback matters. This plan is about the future of Wellington and it affects everyone who lives and works here. That's why we want to hear from as many people as possible. Your views will inform the next steps we take.

#### Privacy statement

All submissions (including names and contact details) are provided in their entirety to elected members. Submissions (including names but not contact details) will be made available to the public at our office and on our website.

Your personal information will also be used for the administration of the consultation process, including informing you of the outcome of the consultation.

All information collected will be held by Wellington City Council, 113 The Terrace, Wellington, with submitters having the right to access and correct personal information.

Full name: <b>Mazz Scannell</b>			
<b>Contact details</b>			
Address: <span style="background-color: black; color: black;">[REDACTED]</span>			
Phone number: <span style="background-color: black; color: black;">[REDACTED]</span>			
Are you are making this submission as an individual or on behalf of an organisation?			
Individual	Organisation: <b>Friends of the Wellington Botanic Gardens</b>		
What is your connection to Wellington? <i>(tick all that apply)</i>			
<input checked="" type="checkbox"/> I am a Wellington City Council ratepayer	<input checked="" type="checkbox"/> I live in Wellington	<input checked="" type="checkbox"/> I work in Wellington	
<input checked="" type="checkbox"/> I own a business in Wellington	<input checked="" type="checkbox"/> I study in Wellington	<input type="checkbox"/> I am a visitor to Wellington	
Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?			
Yes <input checked="" type="checkbox"/>		No	
If yes - We are offering two ways of speaking to Councillors about your submission. <i>(Please tick which option(s) you would prefer?)</i>			
<b>Oral forum</b> (informal, 60min facilitated table discussion with 2 to 3 Councillors and other submitters)	<input type="checkbox"/> Morning	<input type="checkbox"/> Afternoon	<input type="checkbox"/> Evening
<b>Oral Hearing</b> (formal hearing with set times to speak to full Council, 5mins per individual, 10mins per organisation)	<input checked="" type="checkbox"/> Morning	<input type="checkbox"/> Afternoon	<input type="checkbox"/> Evening

## Our seven big decisions

The next seven questions relate to the big decisions for the 10-year plan.

- **Decision 1:** Increasing spending on the three waters network to fix the pipes
- **Decision 2:** Taking responsibility for the ownership of wastewater laterals
- **Decision 3:** Increased investment in cycleways
- **Decision 4:** Implementing our Te Atakura, First to Zero action plan
- **Decision 5:** Choosing a plan for earthquake-prone Council Office buildings
- **Decision 6:** Funding the Central Library strengthening and upgrade
- **Decision 7:** Choosing a plan for sludge minimisation

Detailed information on these decisions are on pages 20 to 47 of the Consultation Document.

**Question 8** in this submission form is a place for you to comment or provide any other feedback on the decisions.

You are also able to attach further information to your submission at the end of this form.

### 1. Investment in three waters infrastructure

There are three different levels of investment in the three waters network to consider. Our preferred level of investment is the **Enhanced** option, which focuses on improving the condition and reliability of the network in an affordable and sustainable way.

Problems with pipes have been a long time in the making, and we cannot fix everything at once. The Enhanced option represents a \$2.4b investment in our three waters network and is the middle-ground option that we are confident of being able to deliver in this plan. We will be able to review the level of investment in our next Long-term Plan review in 2024, when we will have more information on the network.

A summary of the proposed investment in in the three waters network is on pages 22 - 26 of the Consultation Document.

Which of these options do you prefer?

Enhanced (\$2.4b Council's preferred option)	Maintain (\$2.0b investment - lower rates and debt)	Accelerated (\$3.3b investment - higher rates and debt)	None of these options	Don't know
--	---	---	-----------------------	------------

### 2. Wastewater laterals

Currently residents are responsible for the maintenance of the pipes connecting their property to the wastewater (sewerage) main underneath the road corridor. These are called wastewater laterals.

We propose that the Council takes ownership of the laterals between the property boundary and the sewerage main underneath the road corridor.

A summary of the proposal to take responsibility for wastewater laterals is on pages 28 - 29 of the Consultation Document.

Which of these options do you prefer?

Take ownership (Council's preferred option, \$32m investment)	No change (no change in investment, rates or debt)	Neither of these options	Don't know
---	--	--------------------------	------------

### 3. Cycleways

Cycleways is an area where we have ambition to seriously lift our game - we'd like to build a network of connected and safe cycleways that allow Wellingtonians to be able to choose cycling as a mode of transport. Our full programme for the network can be viewed at [transportprojects.org.nz](http://transportprojects.org.nz) and if all of the routes were progressed, there would be a \$226m investment across the 10 years of this plan.

Our preferred option is a \$45m or 60 percent increase in funding for cycleways than what was planned in the previous Long-term Plan. It will progress \$120m of the full \$226m programme

We believe the high investment programme option balances the need for increased investment in this area with what is affordable for Council and what we will be able to deliver. It allows time in the programme for robust community engagement and to build capacity in the Council and the sector for the full programme to be eventually delivered.

A summary of the proposed investment to build more cycleways is on pages 30 - 33 of the Consultation Document.

Which of these options do you prefer?

High investment programme (Council's preferred option, \$120m capital investment)	Finish started projects (\$29m capital investment, lower debt and rates)	Medium investment programme (\$39m capital investment, lower debt and rates)
Accelerated full investment programme (\$226m capital investment, higher debt and rates)	None of these options	Don't know

### 4. Te Atakura First to Zero (Climate Change)

Te Atakura - First to Zero is our response to the climate and ecological emergency we declared in 2019 but it is not yet funded.

Te Atakura is intended to ensure sufficient activity is undertaken in this decade to reduce our emissions. Council can do this by supporting the transport mode-shift projects, as well as encouraging the uptake of electric cars, providing seed funding to leverage businesses and community impact and supporting residents to be motivated to take action.

Our preferred option is to fully fund Te Atakura, which is included in our 5.3 percent average increase across 10 years.

A summary of the proposed investment in Te Atakura - First to Zero Action Plan is on pages 34 - 37 of the Consultation Document.

Which of these options do you prefer?

Fully fund the programme (Council's preferred option, \$29.9m investment)	Medium investment with savings (\$25.4m investment, lower rates and debt)	
Low level of funding (\$18.1m investment, lower rates and debt)	None of these options	Don't know

### 5. Te Ngākau Civic Precinct - Council office buildings

Te Ngākau Civic Square is the musical, creative and democratic heart of Wellington but it has significant resilience challenges.

While we are still working through finalising the framework for Civic Square, a specific decision is required in this Long-term Plan with respect to the future of the Council office buildings - the Municipal Office Building (MOB) and the Civic Administration Building (CAB).

As the two buildings are connected, and have similar resilience issues, it is important that the future of them is considered together.

Our preferred option is to demolish and rebuild the MOB and CAB buildings in partnership with private investment through a long-term ground lease for the site.

Combining a MOB and CAB development would enhance this opportunity and significantly decrease the need for additional Council borrowing and ratepayer funding to address these impaired buildings.

A summary of the proposed approach to developing of Te Ngākau Civic Square on pages 38 - 41 of the Consultation Document.

Which of these options do you prefer?

Demolish and site developed through long-term lease (Council's preferred option)	Proceed with base build proposal for public purposes (higher debt and rates)		
Retain and seek to repurpose (higher debt and rates)	Sell to support development (no debt or rates impact)	None of these options	Don't know

## 6. Fixing the Central Library

Wellington's much-loved Central Library was closed in March 2019 following an engineering assessment saying that the way the floor was designed presented a high level of potential failure in a significant earthquake.

After hearing from Wellingtonians in the 2020 consultation, Council agreed to recommend the high-level remediation option to be part of this plan. This option makes the building resilient to future shocks and supports our ability to deliver an adaptable modern library service, while preserving the buildings heritage. It also allows us to mitigate some climate change impacts in the future.

Now there are choices about how to fund the \$187.4m library remediation project, and when the project should take place.

The preferred option, includes the Council agreeing to temporarily breach its debt limit of 225 percent to ensure the library can be refurbished in the original timeframe and remain in public ownership. Our debt level will remain at 225 percent, and Council has agreed to accept the breach in the first three years of this plan. This breach will be mitigated by any capital underspend being used for the library project rather than on new projects. Our debt level will be back below our limit by year 4 – 2024/25.

A summary of the proposed investment to fund the fixing of the Te Ngākau Civic Square Central Library is on pages 42 – 44 of the Consultation Document.

Which of these options do you prefer?

Strengthen now by temporarily exceeding debt limit (Council's preferred option, additional 0.79% rates increase)	Council to strengthen Central Library later (complete in 2028 instead of 2025, additional 0.83% rates increase)	
Strengthen now by increasing rates further (additional 1.79% rates increase)	None of these options	Don't know

## 7. Reducing sewage sludge and waste

One of the largest waste categories at the Southern Landfill is wastewater (sewage) sludge. This accounts for about a quarter of the waste that enters the landfill.

Through Te Atakura (our Zero Carbon Plan) and our Regional Waste Minimisation and Management Plan we have formally committed to reducing carbon emissions and reducing waste by a third. Minimising wastewater sludge is a necessary first step to achieving these objectives.

We need to break the link between the Southern Landfill and wastewater sludge and stop pumping sludge across the city, as 2020 highlighted the serious resilience issues and the significant consequences of failure.

Our preferred option is to invest in a sludge minimisation programme through another funding source. This means the project would not be funded by Council, but if it is funded through a Special Purpose Vehicle, a levy of about \$70-\$100 per year will be charged to each ratepayer.

A summary of the proposed investment in sludge and waste minimisation is on pages 45 – 47 of the Consultation Document.

Which of these options do you prefer?

Sludge minimisation through alternate funding (Council's preferred option, \$147m-\$208m capital investment funded through a levy, no additional rates increase)	No change in current practice (no change to investment, rates or debt)	
Invest in technology at Southern Landfill (\$86m-\$134m capital investment and higher rates)	Sludge minimisation – through Council funding (\$147m-\$208m capital investment, above debt limit and higher rates)	
None of these options	Don't know	

## 8. Feedback on these decisions

Do you have any comments you would like to provide around why you selected your preferred option to any of these decisions, or why you don't support any of the options we proposed? If yes please indicate what decision/s you wish to provide comment on.

Investment in three waters infrastructure	Wastewater laterals	Cycleways
Te Atakura (climate change)	Central Library	Sludge and waste minimisation
Te Ngākau funding for future work	None of these	

If the space on the next page is not adequate for your comments, please feel free to attach supporting information to the submission. **Please be clear** what decision you are commenting on.

## Comments

### 9. Proposed 10-year budget (see page 10 for details)

Our draft budget, has an average rates increase for the average ratepayer of 5.3 percent after growth across the 10 years of the plan. We also propose setting a limit on how much we can raise from general rates - \$465m for each year across the first 3 years of the plan and, \$630m each year across years four to ten.

The first year of the plan has a rates increase of 13.5 percent (after growth) and there is an average of 9.9 percent (after growth) over the first three years. This is higher than previous plans because of the **key challenges** faced by the city including infrastructure, housing, earthquake strengthening and and COVID-19 impacts.. Therefore, we now require a step up in the level of rates we charge. Details of the key challenges are on pages 20 - 47 of the **Consultation Document**.

Our proposed budget also represents our highest ever level of capital investment in Wellington. It addresses the need for increased investment in our three waters infrastructure and transport network and seismic strengthening of key buildings, along with making progress against all our other priority community objectives.

Our debt levels for this plan, including the value of uninsured assets, range from 134 percent to 239 percent of our annual income. Our proposed limit is 225 percent.

We think this is a sensible limit on our borrowing to ensure that the impact on affordability of rates is maintained and leaves enough 'headroom' to ensure we can repay our debt, and respond to expected but unfunded and unexpected future events and opportunities.

#### Do you support the proposed 10-year budget?

I strongly support the proposed budget	I somewhat support the proposed budget	Neutral
I somewhat oppose the proposed budget	I strongly oppose the proposed budget	Don't know

#### If you stated in Question 9 that you are neutral or do not support the proposed budget. Do you support increasing or decreasing spend?

I support increasing spend in the current budget	I support decreasing spend in the current budget	I support keeping the budget the same but with some changes	Don't know
--	--	---	------------

## 10. Any other feedback on what is proposed for the 10-year Plan

### Future decisions

The Consultation Document also signals other decisions that are coming up in the time of this plan, but that we do not have enough information on at this stage for a detailed consultation.

### Other projects

We also have many other services and projects detailed in our Statements of Service Provision.

### Council Fees and charges

We have also made changes to some of our fees and user charges. More information on these are available on our website [wgtn.cc/ltp](http://wgtn.cc/ltp) and available at our libraries and service centre.

Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?

#### Submission

##### Friends of the Wellington Botanic garden

###### Begonia House

The Friends of the Botanic gardens have been an active fund and friend-raiser for 32 years. The Friends set out to promote and support the development of the Botanic gardens, to raise funds and support garden projects and public foster interest in its scientific, educational, cultural and recreational functions.

We support the planned Capex expenditure for the Begonia House precinct. The Begonia house is an educational facility that showcases botany, encourages social interaction, and hosts many educational visits while constantly exhibiting excellent curation and biodiversity.

The Friends would like to acknowledge and formally thank the vast majority of Wellington Councillors who voted to include the Begonia House capital expenditure of \$7.748m - over the years 3-6 (pp. 13,20:clause 33) at the Annual plan/Long Term plan committee meeting 4 March.

The Capex funding is required for the redevelopment of the Begonia House precinct. Including the Picnic café, retail space, public toilets, event space, associated building services and the building's interaction with the rose garden and the Dell.

The Begonia House showcases a rich biodiversity of plants in a tropical setting and is an excellent contrast to both the New Zealand bush and the extensive rose collection outside. The plant collection encourages comparisons and educational opportunities with native and non-native flora and highlights diversity in the plant world. These experiences broaden visitor perspectives and allow for conservation efforts to be experienced first-hand.

The Begonia house is a garden that offers Wellingtonians, New Zealanders and international visitors the opportunity to appreciate plants and flowers curated from all over the world. The glasshouse also serves a valuable social role. Visitors can see the relationship between process and organisms and appreciate the delicate balance of nature first-hand while meeting with friends, family or special interest groups.

However, the Begonia House is no longer fit for purpose. Opened in 1960, the building has evolved bit-by-bit with bolt-on solutions designed to achieve a particular fix rather than complementing an overall plan that creates a seamless and holistic experience. Currently the building is difficult to service, and its tired general appearance no longer fits its destination status

The plants are dependent on heating to ensure plant health and vigour. The gas boilers need replacing as the heating distribution remains fraught and inefficient. Replacing the gas boilers with more modern heating solutions is also consistent with Te Atakura government initiative.

Temperatures can vary from 10 to over 35C degrees – creating unsafe working conditions. Those wild fluctuations in temperature necessitated in the temporary relocation of the shop to the Treehouse. The shop profits (when at the Begonia House) and rental from Picnic café contributed 10 per cent of the gardens operating costs. This profit is reinvested in the gardens as part of the operational budget.

It is worth noting that the annual profit from the shop has dropped due to its relocation away from the heavy foot traffic of the Begonia precinct. Inconsistent temperatures also means that the Begonia House is a less than ideal event space that hinders the potential of the space as a wedding and corporate venue.

There are also structural shortcomings, including the glasshouse window panes which are no longer fit for purpose for temperature control or weather tightness; internal wiring and electrical fittings are old and vulnerable to water ingress; and the toilets suffer from overuse and have become odorous and unpleasant.

Visitor numbers to the rose gardens and Begonia House compare well to other Wellington destination attractions, experiencing more visitors than Wellington Zoo and Zealandia.

It is estimated 1.2M people annually visit the Botanical garden, and from those 400,000 visit the Rose garden and Begonia house. A third of all visitors enter the gardens through the Rose gardens.

The Begonia house offers a rare all-weather accessible facility for visitors of varying levels of physical fitness to experience the physical, social and emotional benefits of interacting with nature. The proximity of parking assists to deliver these benefits.

On any given day, the Begonia house is a destination - the plant exhibits are complemented by a successful and popular café, which is also considered a destination for many Wellingtonians and visitors. The café is housed in the Begonia House.

Historically the garden is a very small demander of capital funds. Most developments are a combination of private and public funding including the glasshouses (2010), the Treehouse (1999), the duck pond redevelopment (1996) and the redevelopment of the Discovery garden (2017).

The age of the Begonia House and the need for modernisation of the existing infrastructure means that the necessity for Capex funding will not go away. In fact, the longer the building is left in its current state the greater the demand for Capex will be.

Therefore, the Friends of the Wellington Botanic gardens request that the dedicated Capex for the Begonia House precinct remains in the long-term plan and actioned according to the calendar years allocated.

## Our seven big decisions

The next seven questions relate to the big decisions for the 10-year plan.

- **Decision 1:** Increasing spending on the three waters network to fix the pipes
- **Decision 2:** Taking responsibility for the ownership of wastewater laterals
- **Decision 3:** Increased investment in cycleways
- **Decision 4:** Implementing our Te Atakura, First to Zero action plan
- **Decision 5:** Choosing a plan for earthquake-prone Council Office buildings
- **Decision 6:** Funding the Central Library strengthening and upgrade
- **Decision 7:** Choosing a plan for sludge minimisation

Detailed information on these decisions are on pages 20 to 47 of the Consultation Document.

**Question 8** in this submission form is a place for you to comment or provide any other feedback on the decisions.

You are also able to attach further information to your submission at the end of this form.

### 1. Investment in three waters infrastructure

There are three different levels of investment in the three waters network to consider. Our preferred level of investment is the **Enhanced** option, which focuses on improving the condition and reliability of the network in an affordable and sustainable way.

Problems with pipes have been a long time in the making, and we cannot fix everything at once. The **Enhanced** option represents a \$2.4b investment in our three waters network and is the middle-ground option that we are confident of being able to deliver in this plan. We will be able to review the level of investment in our next Long-term Plan review in 2024, when we will have more information on the network.

A summary of the proposed investment in the three waters network is on pages 22 - 26 of the Consultation Document.

Which of these options do you prefer?

Enhanced (\$2.4b Council's preferred option) ✓	Maintain (\$2.0b investment - lower rates and debt) ✓	Accelerated (\$3.3b investment - higher rates and debt)	None of these options	Don't know
--	---	---	-----------------------	------------

### 2. Wastewater laterals

Currently residents are responsible for the maintenance of the pipes connecting their property to the wastewater (sewerage) main underneath the road corridor. These are called wastewater laterals.

We propose that the Council takes ownership of the laterals between the property boundary and the sewerage main underneath the road corridor.

A summary of the proposal to take responsibility for wastewater laterals is on pages 28 - 29 of the Consultation Document.

Which of these options do you prefer?

Take ownership (Council's preferred option, \$32m investment) ✓	No change (no change in investment, rates or debt)	Neither of these options	Don't know
---	--	--------------------------	------------

### 3. Cycleways

Cycleways is an area where we have ambition to seriously lift our game - we'd like to build a network of connected and safe cycleways that allow Wellingtonians to be able to choose cycling as a mode of transport. Our full programme for the network can be viewed at [transportprojects.org.nz](http://transportprojects.org.nz) and if all of the routes were progressed, there would be a \$226m investment across the 10 years of this plan.

Our preferred option is a \$45m or 60 percent increase in funding for cycleways than what was planned in the previous Long-term Plan. It will progress \$120m of the full \$226m programme

We believe the high investment programme option balances the need for increased investment in this area with what is affordable for Council and what we will be able to deliver. It allows time in the programme for robust community engagement and to build capacity in the Council and the sector for the full programme to be eventually delivered.

A summary of the proposed investment to build more cycleways is on pages 30 - 33 of the Consultation Document.

Which of these options do you prefer?

High investment programme (Council's preferred option, \$120m capital investment) * ✓	Finish started projects (\$29m capital investment, lower debt and rates)	Medium investment programme (\$39m capital investment, lower debt and rates)
Accelerated full investment programme (\$226m capital investment, higher debt and rates)	None of these options	Don't know

\* except for Island Bay issues.

### 4. Te Atakura First to Zero (Climate Change)

Te Atakura - First to Zero is our response to the climate and ecological emergency we declared in 2019 but it is not yet funded.

Te Atakura is intended to ensure sufficient activity is undertaken in this decade to reduce our emissions. Council can do this by supporting the transport mode-shift projects, as well as encouraging the uptake of electric cars, providing seed funding to leverage businesses and community impact and supporting residents to be motivated to take action.

Our preferred option is to fully fund Te Atakura, which is included in our 5.3 percent average increase across 10 years.

A summary of the proposed investment in Te Atakura - First to Zero Action Plan is on pages 34 - 37 of the Consultation Document.

Which of these options do you prefer?

Fully fund the programme (Council's preferred option, \$29.9m investment) ✓	Medium investment with savings (\$25.4m investment, lower rates and debt)
Low level of funding (\$18.1m investment, lower rates and debt)	None of these options
	Don't know

### 5. Te Ngākau Civic Precinct - Council office buildings

Te Ngākau Civic Square is the musical, creative and democratic heart of Wellington but it has significant resilience challenges.

While we are still working through finalising the framework for Civic Square, a specific decision is required in this Long-term Plan with respect to the future of the Council office buildings - the Municipal Office Building (MOB) and the Civic Administration Building (CAB).

As the two buildings are connected, and have similar resilience issues, it is important that the future of them is considered together.

Our preferred option is to demolish and rebuild the MOB and CAB buildings in partnership with private investment through a long-term ground lease for the site.

Combining a MOB and CAB development would enhance this opportunity and significantly decrease the need for additional Council borrowing and ratepayer funding to address these impaired buildings.

A summary of the proposed approach to developing of Te Ngākau Civic Square on pages 38 - 41 of the Consultation Document.

Which of these options do you prefer?

Demolish and site developed through long-term lease (Council's preferred option)	Proceed with base build proposal for public purposes (higher debt and rates)
Retain and seek to repurpose (higher debt and rates)	Sell to support development (no debt or rates impact) ✓
	None of these options
	Don't know

## 6. Fixing the Central Library

Wellington's much-loved Central Library was closed in March 2019 following an engineering assessment saying that the way the floor was designed presented a high level of potential failure in a significant earthquake.

After hearing from Wellingtonians in the 2020 consultation, Council agreed to recommend the high-level remediation option to be part of this plan. This option makes the building resilient to future shocks and supports our ability to deliver an adaptable modern library service, while preserving the buildings heritage. It also allows us to mitigate some climate change impacts in the future.

Now there are choices about how to fund the \$187.4m library remediation project, and when the project should take place.

The preferred option, includes the Council agreeing to temporarily breach its debt limit of 225 percent to ensure the library can be refurbished in the original timeframe and remain in public ownership. Our debt level will remain at 225 percent, and Council has agreed to accept the breach in the first three years of this plan. This breach will be mitigated by any capital underspend being used for the library project rather than on new projects. Our debt level will be back below our limit by year 4 - 2024/25.

A summary of the proposed investment to fund the fixing of the Te Ngākau Civic Square Central Library is on pages 42 - 44 of the Consultation Document.

Which of these options do you prefer?

Strengthen now by temporarily exceeding debt limit (Council's preferred option, additional 0.79% rates increase) ✓	Council to strengthen Central Library later (complete in 2028 instead of 2025, additional 0.83% rates increase)	
Strengthen now by increasing rates further (additional 1.79% rates increase)	None of these options	Don't know

## 7. Reducing sewage sludge and waste

One of the largest waste categories at the Southern Landfill is wastewater (sewage) sludge. This accounts for about a quarter of the waste that enters the landfill.

Through Te Atakura (our Zero Carbon Plan) and our Regional Waste Minimisation and Management Plan we have formally committed to reducing carbon emissions and reducing waste by a third. Minimising wastewater sludge is a necessary first step to achieving these objectives.

We need to break the link between the Southern Landfill and wastewater sludge and stop pumping sludge across the city, as 2020 highlighted the serious resilience issues and the significant consequences of failure.

Our preferred option is to invest in a sludge minimisation programme through another funding source. This means the project would not be funded by Council, but if it is funded through a Special Purpose Vehicle, a levy of about \$70-\$100 per year will be charged to each ratepayer.

A summary of the proposed investment in sludge and waste minimisation is on pages 45 - 47 of the Consultation Document.

Which of these options do you prefer?

Sludge minimisation through alternate funding (Council's preferred option, \$147m-\$208m capital investment funded through a levy, no additional rates increase)	No change in current practice (no change to investment, rates or debt)	
Invest in technology at Southern Landfill (\$86m-\$134m capital investment and higher rates) ✓	Sludge minimisation through Council funding (\$147m-\$208m capital investment, above debt limit and higher rates)	
None of these options	Don't know	

## 8. Feedback on these decisions

Do you have any comments you would like to provide around why you selected your preferred option to any of these decisions, or why you don't support any of the options we proposed? If yes please indicate what decision/s you wish to provide comment on.

Investment in three waters infrastructure	Wastewater laterals	Cycleways ✓
Te Atakura (climate change)	Central Library ✓	Sludge and waste minimisation ✓
Te Ngākau funding for future work ✓	None of these	

If the space on the next page is not adequate for your comments, please feel free to attach supporting information to the submission. **Please be clear** what decision you are commenting on.

**9. Proposed 10-year budget (see page 10 for details)**

Our draft budget, has an average rates increase for the average ratepayer of 5.3 percent after growth across the 10 years of the plan. We also propose setting a limit on how much we can raise from general rates - \$465m for each year across the first 3 years of the plan and, \$630m each year across years four to ten.

The first year of the plan has a rates increase of 13.5 percent (after growth) and there is an average of 9.9 percent (after growth) over the first three years. This is higher than previous plans because of the **key challenges** faced by the city including infrastructure, housing, earthquake strengthening and and COVID-19 impacts.. Therefore, we now require a step up in the level of rates we charge. Details of the key challenges are on pages 20 - 47 of the **Consultation Document**.

Our proposed budget also represents our highest ever level of capital investment in Wellington. It addresses the need for increased investment in our three waters infrastructure and transport network and seismic strengthening of key buildings, along with making progress against all our other priority community objectives.

Our debt levels for this plan, including the value of uninsured assets, range from 134 percent to 239 percent of our annual income. Our proposed limit is 225 percent.

We think this is a sensible limit on our borrowing to ensure that the impact on affordability of rates is maintained and leaves enough 'headroom' to ensure we can repay our debt, and respond to expected but unfunded and unexpected future events and opportunities.

**Do you support the proposed 10-year budget?**

I strongly support the proposed budget	I somewhat support the proposed budget ✓	Neutral
I somewhat oppose the proposed budget ✓	I strongly oppose the proposed budget	Don't know

**If you stated in Question 9 that you are neutral or do not support the proposed budget.**

**Do you support increasing or decreasing spend?**

I support increasing spend in the current budget	I support decreasing spend in the current budget ✓	I support keeping the budget the same but with some changes	Don't know
--	--	---	------------

## 10. Any other feedback on what is proposed for the 10-year Plan

### Future decisions

The Consultation Document also signals other decisions that are coming up in the time of this plan, but that we do not have enough information on at this stage for a detailed consultation.

### Other projects

We also have many other services and projects detailed in our Statements of Service Provision.

### Council Fees and charges

We have also made changes to some of our fees and user charges. More information on these are available on our website [wgtn.cc/ltp](http://wgtn.cc/ltp) and available at our libraries and service centre.

Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?

Yes.

## **Comments on the 10 year plan.**

### **1) 3 Waters Infrastructure**

Central Govt has made clear moves in this area, and hopefully a better outcome will be for all of NZ, including Wellington Region in regards capture, storage, supply, distribution of water and cost for ratepayers. But it looks like in Wellington City the chickens are coming home to roost with the inability of staff and Councillors over the decades to ensure our pipes and supply were protected.

I am strongly opposed to water meters on residential homes in this city. I was in a group who gathered signatures for a year of over 17000 people to oppose water meters. A Mr Frank Cook, gave a presentation to Councillors as to how he had traced and analysed where all the water leaks were. 90% is in the shoddy CBD so put water meters on them.

### **2) Wastewater laterals**

I'm pleased to see the Council taking ownership of the laterals.

### **3) Cycleways**

I'm please to see the ongoing development of safe cycleways. But LGWM is coming to a slow death on the major issues.

Apart from education (about biking and walking) I wish to see Council foster other ideas such as a greater degree of car/ride sharing. No cars in peak hours unless three persons inside. Also the parallel urgent need to have better, faster, and cleaner powered buses. Light rail is a non starter.

### **4) Te Atakura First to Zero**

I'm please to see funding start on this very important policy. Climate is going to impact in many ways on our city.

### **5) Civil Precinct.**

Lets see the plan. I suspect like many Council Officer plans it will overstate the benefits and understate the costs.

### **6) CBD Library**

I submitted to Council that I was in favour as first choice of a new build. I still am. But in spite of the majority of Wellingtonians wanting that, Council, after some adjusted build costs by officers, resolved to stick with fixing up the present mess. Ok, so I still want to see the project started, and finished with urgency. The Library was the heart, and its not beating now, and looks like many years will pass before is opened. What shame!

### **7) Sludge and waste.**

Yes, we need to jump ahead in this area. We are behind the pump. (pun).

## **8) Feedback on options:**

I want to comment on all options – hence these notes – and my expected attendance at an Oral Forum.

## **9) Proposed 10 year budget**

**“I somewhat oppose the proposed budget” is my position.**

In all my networks ratepayers are furious as to the predicament we are in. Basically any rate rise about 5% or 6% is sending citizens into revolt. Proposed rate increase is one of the highest in NZ. Appalling.

Where is the discussion about options other than accepting huge rate increases.

Let's have a DISCUSSION, debate on other options.

a) Sell the 34% of airport shares. Maybe \$300m there and freeing ourselves of the shackles of a private company growing their profit.

b) Once the Conference Centre is completed: sell it. It will become an elephant for ratepayers anyway.

c) Have a moratorium on all projects for 2-3 years in a bid to save \$20 to \$30million.  
Or have the discussion to trim projects by 20%. The previous Mayor did work with the CEO and Management to gain savings on operations.

## **10) Other issues to comment on.**

### **a) Fees increase.**

All liquor Licensing matters should be user pay. That is, licensing fees must also include the full operations of the District Licensing Committee.

Dog Licenses are fully recoverable – so should Liquor Licensing be.

### **b) Local Alcohol Policy.**

The city urgently needs one. The Hospitality industry shot down the previous attempt to gain a LAP.

I have been involved with communities in the CBD, Newtown and Kilbirnie, and also individually in 20 contested cases regarding alcohol to gain moderation and responsibility since the bad Sale and Supply of Alcohol Act 2012. The Act's authors tout that it was supposed to be easier for communities to have a say which in reality is not the case.

A LAP should include:

1) one way door policy – once a punter is in after 11pm, they stay there and don't go off pub crawling. All pubs close at 3am rather than the present default hours.

2) Pubs lower their prices to encourage punters into bars, to reduce pre loading. But neither should licensees encourage excessive drinking.

3) Police step up to some pubs with known bad host responsibilities and close them down.

4) **ALL Off Licenses**, including supermarkets stop alcohol sales after 8pm both in the CBD and in all suburban areas. Council research showed that persons who brought booze from an Off License in the evening would drink it within 2 hours of purchase.

5) Then there is research that shows that crime and disorder increases within 800 metres of every Off License. (The Courtney Place mess).

6) Police pro actively police the Alcohol Ban areas more.

There is much more I could say – but will exercise restraint.

### C) Social Housing:

O dear: This is a bit embarrassing to Council and Officers. (and us ratepayers).

The Independent Auditor is critical (page 72 of the Ten Year Plan). She references page 52 that Council Officers have calculated \$446 million is needed over 10 years to complete the legally required upgrade programme and to meet maintenance costs but only \$42.8 million has been included in Councils budget. Page 52 states “However City Housing will then become insolvent from June 2023.”

Well, Council seems to be chasing more \$ from Central Govt. Let’s hold our breath.  
If Central Govt doesn’t front with the \$ what then?

Central to the issue is that the vast majority of ratepayers do not understand the complexity of this situation, but also Council Officers have been remiss at not informing the ratepayers of this disaster.

Some Councils in NZ have hocked off their social housing properties – to their public shame full peril. Other Councils have worked through the financial and political shortcomings.

What went wrong – who should be held accountable for this nightmare -who exercises oversight in this multi million dollar bungle.

Bernard O’Shaughnessy

*Tracy 21*

## **Submission of the Wellington Residents' Coalition on Wellington City Council 2021 Long-Term Plan**

### **Introduction**

Formed in 1997, the Wellington Residents' Coalition seeks to defend the assets of, services to and rights of the people of Wellington. Our submission on the 2021 Long-Term Plan will focus on water, housing and asset sales.

### **1. Water**

#### **a. Water Meters**

The Coalition is pleased that the Council does not have included the introduction of universal water meters in the Plan. It is our position that charging for water by volume will lead to the commercialisation of access to water which is supposed to be a human right. That will hit the poorer in our community the hardest. In order to delay capital expenditure to provide more water the Council should rely on the community to conserve water, not the market.

#### **b. Conservation**

About 70% of household water use goes on showers/baths, toilets and laundry – things we all need. Water efficient shower heads, modern dual flush toilets and modern front loading washing machines use about half the water that old shower heads, toilets and washing machines use. The average use of water in Wellington per household is about 560 litres per day. If a household using the average amount of water but with old inefficient shower heads, toilets and washing machines, was upgraded from old to new this would reduce their water use from 560 litres to 370. The \$144 million proposed to be spent on installing water meters could be used instead to upgrade households potentially saving up to a third of their water use.

Note that ten years ago the Coalition presented a petition calling for the Council to encourage the use of tanks for grey water purposes such as watering gardens. We have not seen the Council take any action on this.

#### **c. Management and Ownership of Assets**

The Coalition is relieved that the Council has decided not to hand over its water assets to Wellington Water but is concerned that it has done so because of central government's proposed water reforms. We hereby foreshadow that unless the proposed water authorities are directly accountable to the electorate, we will be campaigning for the Council to opt out of the proposed scheme.

#### **d. Sewerage and Laterals**

It is the stance of the Wellington Residents' Coalition that the local council should be responsible for the maintenance of all water and sewer pipes up to and from each dwelling. We therefore support the proposal that the Council take over ownership of sewer laterals.

## 2. **Housing**

Despite the fact that the consultation document identifies housing as the second major issue of concern to Wellingtonians, there is no proposal for funding the remainder of the upgrade of the Council's existing housing stock.

The Wellington City Council could not have foreseen the Christchurch earthquakes nor the consequent changes in building codes and increase in construction costs. It is therefore not entirely to blame for the blowout in the budget for the upgrade of Council housing. The Coalition would support the Council in asking for much more central government assistance in paying for this upgrade.

The upgrade however, is insufficient. The Council along with the State needs to be an active player in the rental market so should in its Long-Term Plan provide for building more housing units.

## 3. **Asset Sales**

Rent money is dead money. We oppose the proposal to hand the sites of the Municipal Office Building and the Council Office Block over to private developers to then rent back to the Council. The Council should either upgrade or rebuild the existing buildings itself and retain ownership of them. However, given the shortage of construction resources this should be done later on in the term of the Plan to allow those resources to be used to build housing.

## 4. **Consultation on the Plan**

We recommend some changes to how the Long-Term Plan is consulted.

1. The consultation document should be the same as the plan.
2. Those reading the consultation document should not be directed to what the "big decisions" are.

# 1. Submission form

## Kōrero mai mō te mahere 10-tau

### Have your say on Our 10-Year Plan

**All submissions must be received by midnight Monday 10 May 2021**

You don't have to give feedback on every decision – just choose the ones you're interested in. You can only submit once. You can include supporting information along with your submission.

Before you start, read about our big decisions and the other supporting information in this consultation document.

#### **Why we're collecting this information**

Your feedback matters. This plan is about the future of Wellington and it affects everyone who lives and works here. That's why we want to hear from as many people as possible. Your views will inform the next steps we take.

#### Privacy statement

All submissions (including names and contact details) are provided in their entirety to elected members. Submissions (including names but not contact details) will be made available to the public at our office and on our website.

Your personal information will also be used for the administration of the consultation process, including informing you of the outcome of the consultation.

All information collected will be held by Wellington City Council, 113 The Terrace, Wellington, with submitters having the right to access and correct personal information.

**Full Name:** \_\_\_\_\_ Warwick Taylor \_\_\_\_\_

<b>Are you making this submission as an individual or on behalf of an organisation?</b>				
<input type="checkbox"/> Individual <input checked="" type="checkbox"/> Organisation: Wellington Housing Action Coalition _____				
<b>What is your connection to Wellington? Tick all that apply</b>

	<input type="checkbox"/> Afternoon			
	<input type="checkbox"/> Evening			

## Our seven big decisions

The next seven questions relate to the big decisions for the 10-year plan.

- **Decision 1:** Increasing spending on the three waters network to fix the pipes
- **Decision 2:** Taking responsibility for the ownership of wastewater laterals
- **Decision 3:** Increased investment in cycleways
- **Decision 4:** Implementing our Te Atakura: First to Zero action plan
- **Decision 5:** Choosing a plan for earthquake-prone Council Office buildings
- **Decision 6:** Funding the Central Library strengthening and upgrade
- **Decision 7:** Choosing a plan for sludge minimisation

Detailed information on these decisions are on pages 21 to 46 of the Consultation Document.

Question 9 in this submission form is a place for you to comment or provide any other feedback on the decisions.

You are also able to attach further information to your submission at the end of this form.

## **Question 1 – Investment in three waters infrastructure**

There are three different levels of investment in the three waters network to consider. Our preferred level of investment is the **Enhanced** option, which focuses on improving the condition and reliability of the network in an affordable and sustainable way.

Problems with pipes have been a long time in the making, and we cannot fix everything at once. The Enhanced option represents a \$2.4bn investment in our three waters network and is the middle-ground option that we are confident of being able to deliver in this plan. We will be able to review the level of investment in our next Long-term Plan review in 2024, when we will have more information on the network.

A summary of the proposed investment in in the three waters network is on pages 23-27 of the Consultation Document.

### **Which of these options do you prefer?**

	Enhanced (\$2.4b investment – the Council’s preferred option)
	Maintain (\$2.0b investment - lower rates and debt)
	Accelerated (\$3.3b investment – higher rates and debt)
	None of these options
	Don’t know

## **Question 2 – Wastewater laterals**

Currently residents are responsible for the maintenance of the pipes connecting their property to the wastewater (sewerage) main underneath the road corridor. These are called wastewater laterals.

We propose that the Council takes ownership of the laterals between the property boundary and the sewerage main underneath the road corridor.

A summary of the proposal to take responsibility for wastewater laterals is on page 28 of the Consultation Document.

### **Which of these options do you prefer?**

	Take ownership (Council’s preferred option, \$32m investment)
	No change (no change in investment, rates or debt)
	None of these options
	Don’t know

### **Question 3 – Cycleways**

Cycleways is an area where we have ambition to seriously lift our game – we'd like to build a network of connected and safe cycleways that allow Wellingtonians to be able to choose cycling as a mode of transport. Our full programme for the network can be viewed at [transportprojects.org.nz](http://transportprojects.org.nz) and if all of the routes were progressed, would be a \$226m investment across the 10 years of this plan.

Our preferred option is a \$45m or 60 percent increase in funding for cycleways than what was planned in the previous Long-Term Plan. It will progress \$120m of the full \$226m programme

We believe the High investment programme option balances the need for increased investment in this area with what is affordable for Council and what we will be able to deliver. It allows time in the programme for robust community engagement and to build capacity in the Council and the sector for the full programme to be eventually delivered.

A summary of the proposed investment to build more cycleways is on pages 30 -33 of the Consultation Document.

#### **Which of these options do you prefer?**

	High investment programme (Council's preferred option, \$120m capital investment)
	Finish started projects (\$29m capital investment, lower debt and rates)
	Medium investment programme (\$39m capital investment, lower debt and rates)
	Full investment programme (\$226m capital investment, higher debt and rates)
	None of these options
	Don't know

### **Question 4 – Te Atakura First to Zero (Climate Change)**

Te Atakura – First to Zero is our response to the climate and ecological emergency we declared in 2019 but it is not yet funded.

Te Atakura is intended to ensure sufficient activity is undertaken in this decade to reduce our emissions. Council can do this by supporting the transport mode-shift projects, as well as encouraging the uptake of electric cars, providing seed funding to leverage businesses and community impact and supporting residents to be motivated to take action.

Our preferred option is to fully fund Te Atakura, which is included in our 5.3% average increase across 10 years.

A summary of the proposed investment in Te Atakura – First to Zero Action Plan is on pages 34 -37 of the Consultation Document

#### **Which of these options do you prefer?**

	Fully fund the programme (Council's preferred option, \$29.9m investment)
	Low level of funding (\$18.1m investment, lower rates and debt)
	Medium investment with savings (\$25.4m investment, lower rates and debt)

	None of these options
	Don't know

### **Question 5 – Te Ngākau Civic Precinct – Council office buildings**

Te Ngākau Civic Square is the musical, creative and democratic heart of Wellington but it has significant resilience challenges.

While we are still working through finalising the Framework for the Square, a specific decision is required in this Long-term Plan with respect to the future of the Council office buildings - the Municipal Office Building (MOB) and the Civic Administration Building (CAB).

As the two buildings are connected, and have similar resilience issues, it is important that the future of them is considered together.

Our preferred option is to demolish and rebuild the MOB and CAB buildings in partnership with private investment through a long-term ground lease for the site.

Combining a MOB and CAB development would enhance this opportunity and significantly decrease the need for additional Council borrowing and ratepayer funding to address these impaired buildings.

A summary of the proposed approach to developing of Te Ngākau Civic Square on pages 38 -41 of the Consultation Document

#### **Which of these options do you prefer?**

	Demolish and site developed through long-term lease (Council's preferred option)
	Proceed with base build proposal for public purposes (higher debt and rates)
	Retain and seek to repurpose (higher debt and rates)
	Sell to support development (no debt or rates impact)
	None of these options
	Don't know

### **Question 6 –Fixing the Central Library**

Wellington's much-loved Central Library was closed in March 2019 following an engineering assessment saying that the way the floor was designed presented a high level of potential failure in a significant earthquake.

After hearing from Wellingtonians in the 2020 consultation, Council agreed to recommend the high-level remediation option to be part of this plan. This option makes the building resilient to future shocks and supports our ability to deliver an adaptable modern library service, while preserving the buildings heritage. It also allows us to mitigate some climate change impacts in the future.

Now there are choices about how to fund the \$187.4m library remediation project, and when the project should take place.

The preferred option, includes the Council agreeing to temporarily breach its debt limit of 225% to ensure the library can be refurbished in the original timeframe and remain in public ownership. Our debt level will remain at 225%, and Council has agreed to accept the breach in the first three years of this plan. This breach will be mitigated by any capital underspend being used for the library project rather than on new projects. Our debt level will be back below our limit by year 4 – 2024/25.

A summary of the proposed investment to fund the fixing of the Te Ngākau Civic Square Central Library is on pages 42 -43 of the Consultation Document

**Which of these options do you prefer?**

	Strengthen now by temporarily exceeding debt limit (Council’s preferred option additional 0.79% rates increase)
	Council to strengthen Central Library later (complete in 2028 instead of 2025, additional 0.83% rates increase)
	Strengthen now by increasing rates further (additional 1.79% rates increase)
	None of these options
	Don’t know

**Question 7 – Reducing sewage sludge and waste**

One of the largest waste categories at the Southern Landfill is wastewater (sewage) sludge. This accounts for about a quarter of the waste that enters the landfill.

Through Te Atakura (our Zero Carbon Plan) and our Regional Waste Minimisation and Management Plan we have formally committed to reducing carbon emissions and reducing waste by a third. Minimising wastewater sludge is a necessary first step to achieving these objectives.

We need to break the link between the Southern Landfill and wastewater sludge and stop pumping sludge across the city, as 2020 highlighted the serious resilience issues and the significant consequences of failure.

Our preferred option is to invest in a sludge minimisation programme through another funding source. This means the project would not be funded by Council, but if it is funded through a Special Purpose Vehicle, a levy of about \$70-\$100 per year will be charged to each ratepayer.

A summary of the proposed investment in sludge and waste minimisation is on pages 45-47 of the Consultation Document.

**Which of these options do you prefer?**

	Sludge minimisation through alternate funding (Council's preferred option, \$147m-\$208m capital investment funded through a levy, no additional rates increase)
	No change in current practice (no change to investment, rates or debt)
	Invest in technology at Southern Landfill (\$86m-\$134m capital investment and additional 0.39% rates increase)

	Sludge minimisation – through Council funding (\$147m-\$208m capital investment, above debt limit, and additional 1.65% rates increase)
	None of these options
	Don't know

**Question 8 – Feedback on these decisions**

Do you have any comments you would like to provide around why you selected your preferred option to any of these decisions, or why you don't support any of the options we proposed? If yes please indicate what decision/s you wish to provide comment on.

	Investment in three waters infrastructure
	Wastewater laterals
	Cycleways
	Te Atakura (Climate change)
	Central Library
	Sludge and waste minimisation
	Te Ngākau funding for future work
	None of these

If this space is not adequate for your comments, please feel free to attach supporting information to the submission. Please be clear what decision you are commenting on.

**Question 9 – Proposed 10-year budget** (See section “what this plan will cost” p13. of the Consultation Document for details)

Our draft budget, has an average rates increase for the average ratepayer of 5.3 percent after growth across the 10 years of the plan. We also propose setting a limit on how much we can raise from general rates - \$465m for each year across the first 3 years of the plan and, \$630m each year across years four to ten.

The first year of the plan has a rates increase of 13.5 percent (after growth) and there is an average of 9.9 percent (after growth) over the first three years. This is higher than previous plans because of the **key challenges** faced by the city including infrastructure, housing, earthquake strengthening and COVID-19 impacts. Therefore, we now require a step up in the level of rates we charge. Details of the key challenges are on page xx of the **Consultation Document**.

Our proposed budget also represents our highest ever level of capital investment in Wellington. It addresses the need for increased investment in our three waters infrastructure and transport network and seismic strengthening of key buildings, along with making progress against all our other priority community objectives.

Our debt levels for this plan, including the value of uninsured assets, range from 134 percent to 239 percent of our annual income. Our proposed limit is 225 percent.

We think this is a sensible limit on our borrowing to ensure that the impact on affordability of rates is maintained and leaves enough ‘headroom’ to ensure we can repay our debt, and respond to expected but unfunded and unexpected future events and opportunities.

**Do you support the proposed 10-year budget?**

	I strongly support the proposed budget
	I somewhat support the proposed budget
	Neutral
	I somewhat oppose the proposed budget
X	I strongly oppose the proposed budget
	Don't know

**Question 9.a) – If you stated in Question 1 that you are neutral or do not support the proposed budget. Do you support increasing or decreasing spend?**

X	I support increasing spend in the current budget
	I support decreasing spend in the current budget
	I support keeping the budget the same but with some changes
	Don't know

**Question 10 – Any other feedback** on what is proposed for the 10-year Plan

**Future decisions**

The Consultation Document also signals other decisions that are coming up in the time of this plan, but that we do not have enough information on at this stage for a detailed consultation.

**Other projects**

We also have many other services and projects detailed in our Statements of Service Provision.

**Council Fees and charges**

We have also made changes to some of our fees and user charges. More information on these are available on our website: <https://wgtm.cc/ltp> and available at our libraries and service centre.

**Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

<p>We strongly oppose the proposed budget because it does not fund the remainder of the programme to upgrade Council units nor does it allow for building of more Council units. We think that the Council should build sufficient housing such that its housing stock constitutes at least 10% of rental housing units in Wellington City.</p> <p>We support any bid by the Council to central government for funding for this purpose.</p> <p>We oppose any transfer of Council housing to any other organisation, including a trust.</p> <p>All newly-built housing must be accessible to all people.</p>

Thank you very much for your submission!

8 May 2021

## SUBMISSION ON WELLINGTON CITY COUNCIL'S LONG-TERM PLAN 2021–2031 (LTP)

### SUMMARY

1. The draft LTP includes two capex projects for the Wellington Botanic Gardens: investment in the upgrade of botanic gardens buildings (Begonia House \$8.5m in years 2–5 and Otari-Wilton Lab and Nursery \$3.1m in years 5–9)
2. The Trust's submission invites Council to reverse the order of implementation of these two projects, i.e., upgrade the Otari-Wilton's Bush Conservation Laboratory and Nursery (\$3.1m) in years 1–5, and the Begonia House (\$8.5m) in years 6–9.

#### Rationale for request:

3. **Otari:** Starting the expansion of Otari's nursery and conservation laboratory later this year means that, by the end of year five, (2025/6) these facilities could be supporting effective plant conservation programmes with partners at national, regional and local levels.
4. New Zealand's indigenous biodiversity is in trouble with some 4,000 species being threatened or at risk of extinction (Department of Conservation, 2017). 1,253 species of vascular plants had their conservation status assessed in 2017, and these assessments showed that 46% were threatened or at risk of extinction. That's over 550 plant species. (This doesn't include threatened non-vascular plants such as mosses and lichens).
5. An even more alarming finding was that the conservation status of 61 vascular plant species had declined in the five years between the assessments in 2012 and 2017. (This included several species which were threatened by myrtle rust, a fungal disease that arrived in New Zealand in March 2017).
6. It's sobering to think about the number of plant species whose conservation status may decline between 2017 and the next assessment in 2022 or 2023. Threats include climate change, pest species (herbivores and weeds), further plant pathogen incursions and land clearance. Some of these declines, however, could be stabilised or reversed with the right combination of in-situ and ex-situ plant conservation practices in the field and at places like Otari.
7. Supplementary benefits of this project include making it easier for visitors to see what is happening in these facilities, thus adding value to their visits to Otari, increasing their ability to advocate for native plants and extending the length of visitors' trips to Wellington. It also

means the Trust could describe Otari’s enhanced plant conservation outcomes in the history of Otari that the Trust plans to publish ahead of the Otari centennial in 2026.

8. **Begonia House**<sup>1</sup>: The Trust recognises that the buildings and displays in the Begonia House are overdue for a major upgrade if their maintenance and renewal has been underfunded for some time. (It was built in 1960). Perhaps there are health and safety issues if the glass framing is getting to the point where sheets of glass could fall out. The Trust is not aware of any specific strategic outcomes Council expects to achieve from this sizeable investment. The Botanic Gardens of Wellington Management Plan (p. 42) says, however, that vehicle access from Glenmore Street makes it easier for the tourist buses and visitors who cannot easily access other parts of the garden to reach the Begonia House and other nearby visitor attractions, e.g., the café, the rose garden and the peace flame. As traffic volumes increase, some consideration may need to be given to making the turn into the gardens easier and safer for buses, pedestrians and other vehicles, and less disruptive for other traffic.

## **ABOUT OTARI AND THE TRUST**

9. The Otari-Wilton's Bush Trust, (the Trust), was established as an independent charitable trust in 2001. Trust members have contributed time, energy, funding and expertise to Otari over the last two decades and have worked with staff in many different ways. (See Appendix 1).
10. Rostering of Trust volunteers to provide visitor services at Otari’s visitor information centre has saved Council thousands of opex dollars over the years because Council doesn’t have to budget for staff to be on duty at Otari at weekends or on public holidays. We would appreciate an estimate of how much this saves Council in a typical year, but not in either 2020 or 2021 when the information centre has been closed for extended periods.
11. The Trust has also helped fund professional development opportunities for staff, and facilities such as the platform which now protects the roots of Otari’s 800 year old rimu. The suspension of cruise ship visits to Wellington in 2020, means that the Trust is now seeking alternative sources of funding.

## **Otari as a conservation attraction**

12. The draft Long Term Plan defines Zealandia and the Zoo as “conservation attractions” but treats Otari as part of Council’s 4,200 hectares of Open Space which are valued primarily as carbon sinks and for contributing to the quality of life in Wellington (see table below). The 2.1 text does not do justice to the diversity of ways that Otari contributes to Wellington’s community outcomes. The Trust invites Council to consider treating Otari as a conservation attraction alongside the Zoo and Zealandia in section 2.6 of the Long Term Plan in either the next triennium or for the 2031–2041 LTP.

<sup>1</sup> Collections in the Begonia House include a temperate collection with changing seasonal displays including begonias, a tropical plant section and the adjacent lily pond.

13.

2.6 Ngā painga kukume Papa Atawhai	2.1 Ngā Māra, Tātahi, Whenua Pārae, Ngahere
Conservation Attractions	Gardens, Beaches and Green Open Spaces
<p>The Wellington Zoo Trust and Zealandia (Karori Sanctuary Trust) are both CCOs and are part-funded by the Council. These attractions tell a story of our past and of our special wildlife. They attract visitors to our city and inform and educate about conservation and biodiversity.</p> <p><b>Conservation visitor attractions</b></p> <ul style="list-style-type: none"> <li>• For conservation and biodiversity. These attractions inform and educate Wellingtonians and visitors about conservation and biodiversity.</li> <li>• To attract visitors. These facilities aim to attract tourists to the city, contributing to the local economy.</li> <li>• To protect flora and fauna. We strive to protect native and exotic flora and fauna, protecting our natural environment.</li> </ul>	<p>The city’s parks, gardens and coastlines are a precious resource. They provide spaces for recreation, community gatherings and events. One-eighth of Wellington’s area is reserve and has been protected for generations. It is a vital and iconic part of Wellington’s landscape, and also supports the city’s response to climate change by acting as a carbon sink. To ensure these spaces continue to contribute to a high quality of life for all Wellingtonians, we invest to protect, maintain and develop these areas. The work carried out in this area makes the city’s environment greener and more pleasant for all Wellingtonians – it improves our quality of life and sense of pride in the city. These spaces also make Wellington an attractive place to visit.</p>

**Conservation at Otari of Aotearoa/New Zealand’s threatened plants**

14. Trust members would like to see Council taking more pride in the contribution that Otari has made, is making, and could make in the future to the conservation of New Zealand’s native plant species and ecosystems. Objective 1.2.1 in *Our Natural Capital* (WCC, 2015), says Council will “Partner with relevant organisations for the in-situ and ex-situ protection of threatened (plant) species ...”. A Council website also acknowledges that conservation is one of the four main roles of Otari-Wilton’s Bush.

***Conservation:** Seedlings of threatened species are raised and either kept in the gardens as a conservation measure or returned to the wild in plant conservation recovery programmes. Staff play a key role in the New Zealand Indigenous Flora seed bank programme through collecting seeds and assisting with training in seed collection.*

15. The partnership approach was illustrated recently in a moving event when iwi from Pureora gifted seeds of *Dactylanthus*<sup>2</sup> to six Wellington iwi for planting at Zealandia and Otari. Otari’s manager, Tim Park, has been working since his appointment in January 2021 to strengthen the partnership with mana whenua. As more iwi, hapu, councils and landowners

<sup>2</sup> The Māori name for *Dactylanthus* is "pua o te rēinga," meaning “flower of the underworld”. *Dactylanthus taylorii* is New Zealand’s only fully parasitic flowering plant and attaches to the roots of trees. The conservation status of *Dactylanthus* is currently nationally vulnerable to extinction.

become aware of the scope of their responsibilities as kaitiaki for indigenous plants, Otari is likely to receive more enquiries about opportunities for partnerships and assistance with plant propagation.

16. Two insightful decisions made by Council a few years ago facilitated more innovative and advanced roles for Otari in the conservation of indigenous plant species:
  - In 2016, Garden managers appointed Karin Van Der Walt as Science and Conservation Advisor. She has added advanced scientific dimensions to Otari's traditional horticultural approaches to plant conservation.
  - In 2018, Council, the Karori Lions and the Trust combined resources to establish a small conservation laboratory at Otari, and it already needs enlarging because of constraints on its capacity.
17. Karin has become an important asset to Otari, Council and Aotearoa/New Zealand. She has developed a valuable network of contacts in agencies throughout New Zealand and helped develop the response to Myrtle Rust when it was first detected in NZ/Aotearoa. The Trust supported Karin's participation in a conference in the USA where she met international experts working on some of the more technical ways of protecting seeds that don't remain viable under ordinary seed banking, e.g., cryopreservation. Karin shares her knowledge with the public through articles in the Trust's quarterly newsletter and has given several presentations in the information centre.
18. The Trust and many others are excited by the work Karin is doing to facilitate the integration of in situ and ex situ conservation strategies. The continued survival of some of New Zealand's threatened plant species will depend on this dual strategy.
19. Horticultural aspects of plant conservation such as propagating skills remain essential, and can require patience, persistence, space and time. Successful propagation and growing of Kirk's daisy at Otari took nine years of experimentation before staff discovered ways of keeping young plants alive in the ground. The conservation status of Kirk's daisy is At Risk.

### **Nationally threatened plants**

20. Since 2017, the statement, "nearly 4000 species are threatened or at risk of extinction" has been used to summarise the biodiversity crisis in Aotearoa/ New Zealand. Behind that simple sentence, however, is a wealth of information from the Department of Conservation's Threat Classification System about the risk of extinction faced by each known species in about 30 large taxonomic groups of plants and animals, e.g., birds, butterflies and moths, mosses and lichens. Panels of specialists from New Zealand's taxonomic communities establish objective benchmarks to determine the conservation status of each species and then reassess it again five years later. The conservation status of a species can be used to prioritise the use of conservation resources. It also provides a measure of the success of conservation management programmes.
21. As noted earlier (paragraph 4), 1,253 species of vascular plants had their conservation status assessed in 2017, and these assessments showed that 46 percent were threatened or at risk of extinction. That's over 550 species. The status of some other vascular plant species can't

be assessed at this stage because not enough is known about them, or how to protect them in the wild, or how to store their seeds or propagate them ex situ in a specialised facility like Otari. The panel of specialists decided that the conservation status of more than 60 species had declined over the five years since the 2012 assessment, including kauri. Improvements in the conservation status of several species resulted from obtaining more data about distributions, or re-interpreting existing data.

## Regionally threatened plants

22. Regionally threatened plants are not nationally threatened plants which happen to grow in the Wellington region, but species which are at risk in the Wellington region.<sup>3</sup> Following the recent development of a new methodology, interested parties can now access lists of plants that are regionally threatened<sup>4</sup>. Trust members and organisations with conservation responsibilities in the region anticipate that this will result in more effective planning, prioritisation and collaborative implementation of plant conservation programmes throughout the Wellington region. A start has been made with *Muehlenbeckia astonii*, shrubby tororaro which is ranked as Regionally Critical and Nationally Endangered.

## The special place of Māori and mana whenua in Council decision-making

23. Several recent national biodiversity initiatives have stressed the importance of recognising mātauranga Māori and the local and intergenerational knowledge held by hapū and whanau in biodiversity programmes. Government is still developing its response to the report Ko Aotearoa Tēnei on Wai 262 to better protect taonga species, taonga works and mātauranga Māori (indigenous knowledge) and to recognise and leverage their use in a manner that supports Māori aspirations. Te Mana o te Taiao, the Aotearoa New Zealand Biodiversity Strategy was released in 2020 and implementation planning is now underway. Following consultation in 2019–20, the development of a National Policy Statement on Indigenous Biodiversity under the Resource Management Act (RMA) appears to have stalled again, possibly to allow for more work to be done on legislation to replace the Resource Management Act.
24. This emerging policy is mentioned in section 1.2.1 of Council's LTP (Māori and mana whenua partnerships) where Council says it intends to strengthen its partnerships and recognise the special place of Māori and mana whenua in Council decision-making. The Trust understands that the focus will be on strategic planning at a leadership level – *standing side by side, looking to the future together*. The Trust hopes that the future includes an expanding leadership role in the conservation of indigenous plants.
25. The Trust anticipates learning more about the implications of Council's commitment for decision-making about Otari in four main ways:

<sup>3</sup> In total, 72 plant species have been identified as being Regionally Threatened: 48 Regionally Critically Endangered, 15 Regionally Endangered and 9 Regionally Vulnerable. Of those totals, the national rankings for those species were: 48 Threatened, 15 At Risk and 9 Not Threatened.

<sup>4</sup> The methodology was developed by Dr Philippa Crisp of the Greater Wellington Regional Council and Jeremy Rolfe of the Department of Conservation with input from amateur and professional botanists from across the region.

- through its monthly meetings with Otari and Wellington Botanic Gardens managers about ways of weaving the principles of tikanga Māori, kaitiakitanga and manaakitanga into on-going strategic and operational planning including, for example, the collections review, interpretation planning, Open Day, signage, training of volunteers for hosting in Te Marae a Tane, and track maintenance and development;
- in 2022, through the review of the MOU between the Trust and Council;
- in 2024 during the statutory review of the Wellington Botanic Gardens of Wellington Management Plan;
- in 2025, through the non-statutory review of 'Our Natural Capital' Wellington City Council's Biodiversity Strategy and Action Plan (June 2015).

## Events

26. The Trust anticipates helping Council celebrate three noteworthy Otari events during the term of the LTP (2021-2031):
- a. the opening later in 2021 of the revamped Te Marae a Tane, Otari's visitor centre.  
  
Otari's manager, Tim Park, has been working with mana whenua representatives to revise earlier plans for the redevelopment of Te Marae a Tane. The Trust has been assured that Parks, Sport and Recreation holds sufficient funding from 2020/21 to complete this project which was first proposed in 2009 during drafting of the LTP.
  - b. a ceremony to acknowledge the construction of a platform to protect the roots of Otari's 800-year old rimu from visitor impacts, and the announcement of a culturally appropriate name for what is probably Wellington's most loved tree. The Trust donated \$25,000 to this project.
  - c. The celebration in 2026 of the centennial of Otari Native Botanic Garden. The Trust has already initiated the researching and publishing a professionally written history of Otari.

## CONCLUSION

27. An expanded laboratory and nursery at Otari, supported by a talented team of staff and volunteers, and highly motivated partners including iwi, hapu and councils throughout New Zealand, could save more of the unique plant species found only in Aotearoa/New Zealand, and contribute to Otari being recognised as Wellington's third conservation attraction.

## APPENDIX 1: OTHER WAYS THE TRUST SUPPORTS OTARI

### **Animal pest control:**

In the 2020 calendar year, the Trust's RAMBO<sup>5</sup> team of 12 caught 89 rats, seven mustelids and seven hedgehogs. This was down a little on the previous year's catches when 101 rats were caught along with four mustelids and 13 hedgehogs. Though these catch numbers may not seem high, the purpose of RAMBO's trapping programme is to complement Greater Wellington Regional Council's poison bait program which is aimed at possums with rats as a secondary catch.

There were comparatively few catches in the centre of the bush area. Most were along the Skyline, the Kaiwharawhara Stream and in the Karori Cemetery.

Volunteers used to spend 15–18 hours per month checking six trap lines, but the workload has already grown to close to 30 hours per month following the addition of extra lines.

**Learning opportunities for the public:** The Trust runs four or five seminars in March, monthly walks on Sunday afternoons, and guided walks on request for local groups. At weekends, hosts answer visitors' questions.

**Otari's annual Open Day:** This very popular event is the result of a long-running and successful partnership between Council staff and Trust members. It has generated revenue for both organisations and encourages more people to grow native plants in their gardens.

**Research:** The Trust helped organise Wellington's first Bioblitz in 2007 and has either helped fund or provided practical support to other research projects at Otari, e.g., pollination of rātā moehau (Bartlett's rata).

**Restoring Kaiwharawhara Stream:** Since 2001, volunteers have replaced vast quantities of weeds at the former landfill face with native plants.

**Weeding the gardens:** Experienced volunteer gardeners help staff maintain the planted gardens. (These volunteers need to know their weeds and plants)

**Propagation:** Volunteers help staff propagate new plants in the nursery and care for plants growing in pots and planter bags.

**Funding accession trips:** The Trust contributes funding for accession trips to other parts of Aotearoa/New Zealand so staff can collect seeds and cuttings to add more species to Otari's collections.

**Professional development opportunities:** The Trust helps staff access additional professional development opportunities within and beyond NZ.

**Preparing submissions:** The Trust submits on Council's statutory plans and non-statutory strategies with implications for Otari. It has also submitted on some national and regional plans, strategies and policies.

<sup>5</sup> RAMBO means Rats and Mustelids Blitzing Otari

10 May 2021

Historic Places Wellington (HPW) wishes to make an oral submission, and to make the following requests:

#### **Built Heritage Resilience**

- Increase funding for Built Heritage Investment Fund. Wellington heritage buildings require funding support for earthquake strengthening. Progress has been made, but several key buildings require support: St Gerard's Monastery; Congregational Church (45 Cambridge Tce); Adelaide Hotel; and several buildings in Cuba St.
- Complete strengthening of WCC owned public buildings (Town Hall and St James Theatre).
- Begin strengthening of Central Library and Opera House. Do not sell Opera House, or Central Library. Do not fund the library project by putting a 17-storey building on top, or anything above a single extra floor.

#### **Te Ngākau Civic Square**

HPW puts those buildings at a higher priority than saving the Municipal Office Building (MOB).

Redevelop Te Ngākau Civic Square so that it is:

- a sunny space (is not overshadowed by new MOB or library buildings)
- green space with trees
- an area with weather shelter and with public art
- well lit with passive surveillance
- an area with active edges (e.g. cafes) linking with adjacent streets and with connections to the waterfront
- a public space which retains all existing public access and use rights.

#### **Technical Built Heritage Support**

Support building owners with technical information to adaptively re-use buildings. Give specific recognition to the benefits to climate of retaining old buildings and repurposing them.

#### **Character & Heritage protection/Neighbourhood Planning/Signage**

- Fund neighbourhood engagement in "place based" planning initiatives so that local communities are fully able to participate in consultation about District Plan matters; and in specific project development.

- Increase areas of character protection in heritage suburbs: Mt Victoria; Thorndon; Aro Valley; Mt Cook & Newtown/Berhampore in Draft District Plan. Establish heritage protection measures including set-backs and height limits to respect heritage buildings.
- Fund initiatives to better identify all places of heritage significance, including to Māori and to non-Māori.
- Add interpretation where a richer, more rounded story needs telling.
- Support the existing national programme of Blue Plaques within WCC signage policy.

### **Wellington Heritage Festival**

Support an annual Wellington Heritage Festival.

Felicity Wong

Chair, Historic Places Wellington

[REDACTED]

[REDACTED]

Note:

Historic Places Wellington is a not for profit society dedicated to the preservation of historic places in the wider Wellington region. We aim to promote the identification, protection and conservation of historic places and to inform, advise and educate the public of their significance. We work cooperatively with local councils, Heritage New Zealand Pouhere Taonga and other organisations concerned with the preservation of historic heritage.

**Date:** 04 May 2021 13:01:13

---

Dear Planning team

The Churton Park Community Association appreciates the opportunity to comment on the issues raised in your discussion document but has a different matter that we would like to be addressed in WCC's Long Term Plan.

Churton Park is rapidly-growing community, with more houses being built all the time. We have a much-used but very small Community Centre and have made many representations to the Council about the need to expand this facility, or to build another, and have been advised that this would need to be considered in the Long Term Plan.

Our case is that the largest, and most popular, room in the Community Centre is fully booked for most daytimes and evenings and, even when it is free, it is too small for many community meetings. We have received requests from our residents for a sports facility, large enough for basketball tournaments as there is no such facility in this part of Wellington. The Amesbury Hall and (when renovation is complete) the Churton Park School hall can supplement these bookings but they are heavily booked for school activities, leaving few possibilities for community use.

We look forward to seeing this need recognised in the Long Term Plan.

Yours sincerely  
Brian Sheppard - CPCA President

Thorndon, Wellington 6021  
☎ 04 939 1102  
✉ csw@collegesport.org.nz  
📘 CollegeSportWellington  
🌐 www.collegesport.org.nz

To whom it may concern,

Thank you for the opportunity to provide a submission on the Wellington City Council (WCC) Long Term Plan (LTP) for 2021-2031. This is a submission on behalf of College Sport Wellington, a registered charitable organisation responsible for the management and development of secondary school sport for our member schools.

We are the primary deliverers of some 35 different sporting competitions and opportunities to the 27,177 students in the 42 secondary schools north to and including Otaki and in some cases also including the 7 colleges of the Wairarapa. Last year, just under 60% of students pulled on their schools jumpers and represented their school in meaningful sporting activity – the highest of the major metropolitans. Within the Wellington City Council boundaries, we represent 15 member schools with a total roll of 13,082. We also note that by the very nature of our sport competition structures, secondary school sport acts as an excellent advertisement for the Council. On any given week, several thousand participants from outside of the Council boundaries will visit and make use of WCC venues and local amenities.

We want to take this opportunity to thank the Council for its ongoing support of sport and wider physical activity opportunities. We consider the Council to be an important and supportive partner of College Sport and its member schools. Furthermore, we believe there is good alignment between our objectives and a shared understanding of the benefits physical activity bring to the wider community. With this in mind, College Sport Wellington offers the following comments on the Council's Long Term Plan, in the hope that it helps to create a well-rounded and informed strategy moving forward.

### **Venue User Charges:**

College Sport Wellington believes that WCC offer some of the best sporting facilities in the region, and we are very appreciative of their availability. In particular, we want to highlight the importance of the ASB Stadium, Wellington Regional Aquatic Centre and various artificial turfs located around the city. These facilities provide a high quality sporting experience and this has undoubtedly contributed to the growth of sports particularly played at the ASB Centre.

However, we are also mindful of the costs incurred through use of these facilities, particularly for students and families that participate in a number of different sports. Without overstating the issue, participation in sport for some families will run into the thousands of dollars. We believe this cost barrier is at odds with the goal of creating a healthy and vibrant community.

We encourage the Council to take a holistic perspective when setting its venue rental levels, and be mindful that cost is a critical barrier to participation. In particular, we submit that either cheaper or free youth sport venue fees should be a specific Council initiative to improve the wider wellbeing of communities.

**Event Fund:**

Every year a large number of national secondary school sports events take place around the country, and while a small number are hosted within the Wellington region, we believe that there is considerable opportunity here for the Council to attract more. These events represent a significant level of income into the local tourism industry through accommodation bookings and hospitality, and act as an excellent advertisement for the region. We encourage the Council to continue engaging with the National and Regional Sporting bodies and look for ways to attract these events. Often, this may be as simple as reducing or removing the venue hire fees, in order to make the Wellington bid for events more attractive. Therefore, we support any initiatives the Council takes to support these events, in recognition of the larger economic value they bring to the local economy.

We thank the Council for its time and the opportunity to submit to the Long Term Plan. We welcome any further correspondence, or requests for more information on the details of our submission.

**Regional Planning for Sport and Recreation**

Speaking to our broader challenges, we encourage all of the Councils within our region to work collaboratively on their support of sport and recreation. Whether that be through provision of facilities or through funding support of events, we believe there is a great deal to gain by working together. We note that in the past, the Council Parks and Recreation teams have worked together well, but this perhaps lost momentum following the decision not to look at a 'super city' merger. Regardless of the outcome of that wider discussion, we still believe there is great merit in the respective Council Sport and Recreation teams collaborating and where possible aligning their strategies.

Furthermore, we believe we can greatly aid the Councils in their planning, given our detailed understanding of youth sport and the future trends likely to impact upon Councils. By way of a very specific example, secondary schools have noted a large surge of interest in volleyball as the sport of choice for their students. This year alone, an additional 1000 students have taken up the sport. This is clearly a fantastic result, particularly because it hasn't been at the expense of other sports, but it also comes with its challenges. Our school gymnasiums are now bursting at the seams, as we try to accommodate the additional teams. As this interest grows and flows through into later years, there will presumably be more interest in volleyball at the adult level. Are Council venues in a position to accommodate this? Across the board, College Sport Wellington monitors the changing sporting interests of our students and can provide useful predictive analysis to Councils for future planning.

We thank the Council for its time and the opportunity to submit to the Long Term Plan. We welcome any further correspondence, or requests for more information on the details of our submission.

Yours Faithfully,

Bryan Dickinson  
Executive Director

# 2020 BY THE NUMBERS

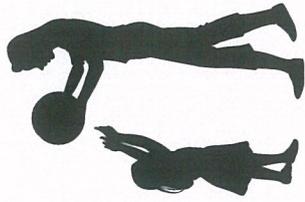

# 15,796

# STRATEGIC PLAN 2021-2025

# COLLEGE SPORT WELLINGTON VALUES

At the core of College Sport Wellington are a set of values that determine our vision for the future and how we will work to achieve that vision. These values speak to the heart of what makes secondary school sport so special. College Sport Wellington's values are aligned to our member schools and most importantly to the students themselves.

## LEARNING THROUGH SPORT

Mā te hākinakina e ako

"Winning is good if it's been earned. Losing is sad, but you get over it"

Schools prepare students for a lifelong journey, helping them to explore and grow into their world. Sport is a great vehicle for schools to provide those opportunities.

### KEY WORDS

Curiosity, Growth and Leadership

### NZ CURRICULUM

Thinking

Te tautoko tangata kē atu

"School Sport is about playing for something bigger than yourself or your team"

## SUPPORTING OTHERS

Students take pride in belonging, especially to their families, groups of friends and schools. Belonging means a commitment to and support of others, which is at the heart of secondary school sport.

### KEY WORDS

Pride, Belonging and Relationships

### NZ CURRICULUM

Participating and Contributing

# DOING THE RIGHT THING

E mahia ana te mahi tika

“It brings out the best in you”

Doing the right thing is how you become the person you want to be in the future. School sport provides a safe and supportive environment for students to learn this.

## KEY WORDS

Honesty, Integrity and Respect

## NZ CURRICULUM

Managing Self, Using Language, Relating to others

# Kia ngākau tapatahi

“Everyone should get a go, but we all play to the same rules”

# GETTING A FAIR GO

Everyone deserves the opportunity to have a go, what they do with that opportunity is up to them. Schools are uniquely placed to provide those opportunities to all students, regardless of circumstance.

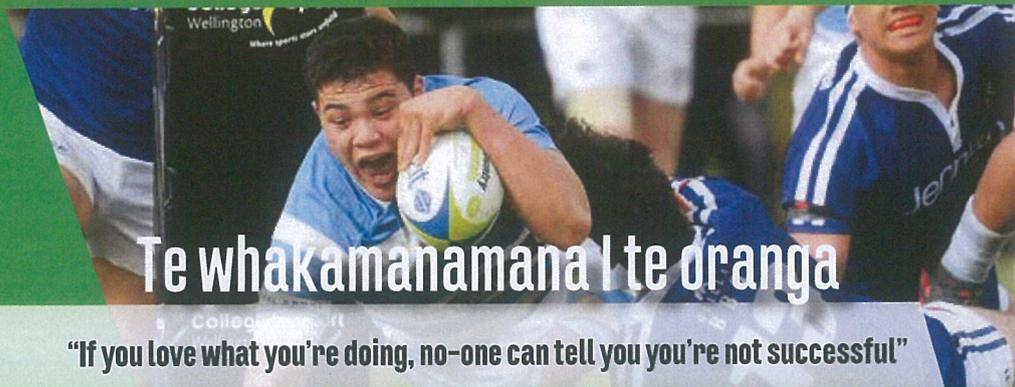

## KEY WORDS

Equity, Opportunity and Inclusiveness

## NZ CURRICULUM

Relating to others

# ENJOYING LIFE

Te whakamanamana i te oranga

“If you love what you’re doing, no-one can tell you you’re not successful”

Sport is meant to be fun and enjoyed for its own sake, otherwise why would we do it? However we often lose sight of that in the heat of battle. Our students deserve the right to enjoy their life, especially through sport.

## KEY WORDS

Fun, Passion, Balance and Well-being

## NZ CURRICULUM

Participating and Contributing

# COLLEGE SPORT WELLINGTON VISION

Every student has the opportunity to enjoy their school sport experience.

---

## TO ACHIEVE THIS, COLLEGE SPORT WELLINGTON WILL:

Create an environment that recognises sport as an integral part of the school experience and seeks to provide balance in student's lives.

Foster student's pride in belonging, creating opportunities for them to express this both on and off the court.

Create a framework based on fairness and integrity that signals its expectations to students and schools.

Support our schools and students to create a level playing field, so that circumstance does not determine result.

Provide opportunities that focus on the enjoyment of the students involved, whatever form that takes.

---

**Through our actions, College Sport Wellington will reinforce the shared values of secondary school sport**

Learning through Sport

Supporting Others

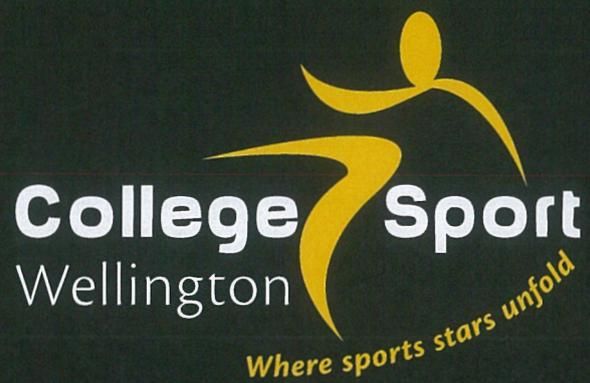

Doing the Right Thing

Getting a Fair Go

Enjoying Life

Long-term Plan  
Wellington City Council  
PO Box 2199,  
Wellington 6140.

**SUBMISSION ON DRAFT LONG-TERM PLAN 2021-31, FROM TRELISSICK PARK GROUP**

Submitter and contact name: Peter Reimann on behalf of Trelissick Park Group

Address: [REDACTED]  
[REDACTED]

Email: [REDACTED]

Date: 9 May 2021

Trelissick Park occupies the valley between Ngaio and Wadestown/Highland Park. Our Group enjoy a collaborative relationship with Council and appreciate the work it does in the Park. Our comments are below.

**We should invest more in green spaces**

Our parks, reserves and coastal areas are combined with the urban areas, making Wellington a unique and attractive city. Well maintained pest-free natural green spaces provide a return on investment with better mental and physical health, productivity, inventiveness, sense of place, cultural well-being and attractiveness for all.

We should invest more in preserving natural green spaces and maintaining parks and reserves, as well as more control of pest weeds and pest animals.

**Stormwater and housing concerns**

Housing developments and infill housing are causing more fast stormwater run-off from hard surfaces. All the stormwater from the Kaiwharawhara catchment stretching from Karori to Khandallah flows into our long-suffering streams. This causes flooding, stream bank erosion, siltation and destruction of aquatic life. In Trelissick Park we have observed streams quickly rise to a brown, raging torrent 2 metres deep after heavy rain. This will become more severe with the more extreme weather effects of climate change.

The cause of fast stormwater run-off from hard surfaces must be addressed. New developments must be biophilic. All developments, including new roads, must have a neutral effect on stormwater runoff, such as by use of swales, wetlands, planting, green walls/roofs, soakage areas, permeable (instead of hard) surfaces, stormwater detention and roof water tankage. Two Council documents apply:

Water Sensitive Urban Design – a Guide for WSUD Stormwater Management in Wellington - The provisions in this guide must be mandated to counter the above adverse stormwater effects.

Subdivision Design Guide (last amended November 2013) – It is understood that this guide is being updated, as part of the Long-Term Plan provisions. The following phrases in G4.3 to G4.6, G 5.8 and G 6.10 should be changed to become mandatory:

“Consideration should be given to...”

“...where possible.”

“...wherever practicable.”

Yours sincerely,

A handwritten signature in black ink that reads "P. M. Reimann".

Peter Reimann  
(Chairman, Trelissick Park Group)

# Introducing Disabled Persons Assembly NZ

---

The Disabled Persons Assembly NZ (DPA) is a pan-impairment disabled person's organisation that works to realise an equitable society, where all disabled people (of all impairment types and including women, Māori, Pasifika, young people) are able to direct their own lives. DPA works to improve social indicators for disabled people and for disabled people be recognised as valued members of society. DPA and its members work with the wider disability community, other DPOs, government agencies, service providers, international disability organisations, and the public by:

telling our stories and identifying systemic barrier

developing and advocating for solutions

celebrating innovation and good practice

## The submission

---

Disabled Persons Assembly New Zealand welcomes this opportunity to comment on the Wellington City Council's 10 Year Plan.

DPA is pleased to see that the Council is intending to deal with some significant longstanding infrastructural issues such as three waters, wastewater, cycleways, Te Atakura (first to zero)/climate change, Te Ngakau civic precinct, the future of the Central Library and sludge minimisation.

DPA members have been particularly concerned over issues such as the future of Te Ngakau civic precinct and the Central Library and we will be focusing on these issues in our submission. However, we will also make general observations about the other issues upon which Council is seeking feedback even though we do not have fixed positions on some of them whereas we have on others.

DPA will also add some other observations about accessible information and communication and future legislative developments in the disability policy space which we would like to draw to Council's attention, i.e., the proposed accessibility legislation from central government.

The United Nations Convention on the Rights of Persons with Disabilities (UNCRPD)

The UNCRPD Articles most relevant to our submission are:

- Article 4.3 Involving disabled people and our organisations in decisions that affect us
- Article 5: Equality and non-discrimination
- Article 9: Accessibility

- Article 19: Living independently and being included in the community
- Article 20: Personal mobility
- Article 29: Participation in political and public life

## DPA's recommendations

---

DPA strongly recommends that universal design standards should be applied in the construction of the new Municipal Office Building (MOB) and Civic Administration Building (CAB) and also any associated work to develop a new National Music Centre in partnership with Victoria University on the Michael Fowler Centre site. Crucially, disabled people should be one of the key stakeholders involved in the design and development process for Te Ngakau given that the UNCRPD's Article 29 stipulates that disabled people should have full access to civic and political participation.

DPA strongly recommends and supports the re-development of the Central Library to account for new earthquake safety standards and that every opportunity is taken to re-make it as a universally designed cultural destination for all Wellingtonians. As with the proposed Te Ngakau precinct builds, disabled people should be one of the key stakeholders in the co-design and development process. In stating this, though, we welcome the proposed \$187 million spend on accessibility improvements for the newly strengthened or rebuilt library and we believe that if the above processes we recommend are used, then there will be a good and cost-effective outcome achieved for Council, for disabled people and, indeed, for all Wellingtonians. We also welcome the non-appearance in this plan of any proposal to privatise the library service (or parts thereof). If such a privatisation plan were ever to be implemented, this would impact on the availability of publications in accessible formats, amongst other things, within our library. Our desire is for the whole library service (including buildings) to remain under full Council control thereby affording everyone free access to all library services and for such an idea to never be floated again.

DPA also supports the Council's Te Atakura (first to zero) climate change plans. Climate change is both a disability issue and a human rights issue. Disabled people are already being severely impacted by the floods, cyclones, storms, coastal erosion and heating of our planet with many disabled people living in poorer communities and nations bearing the greatest brunt. Also disabled people in Aotearoa/New Zealand, for example, face the prospect - if internal migration becomes a possibility - of having to leave more accessible low lying coastal and other communities for areas which may be more geographically/topographically difficult to access. That's why we support Council being ambitious in its climate change policies and planning and therefore we favour Option 3, the full funding of Te Atakura as our preferred option. Furthermore, disabled people need to be fully involved in the co-design and

implementation of climate change plans and policies and should be prioritised for access to, for example, home energy audits as research has shown that many disabled people tend to live in cold, damp, poorly insulated, energy inefficient homes.

DPA welcomes moves to improve the city's cycling infrastructure and has no preferred option on how this should proceed. However, irrespective of whichever option is adopted, Council should continue to place cycleways and pedestrian spaces such as, for example, walking tracks and footpaths, parallel and separate from one another to ensure that the safety and enjoyment of both cyclists and pedestrians is maximised.

DPA welcomes the proposals around Three Waters and the need to upgrade our city's water infrastructure. The continuing issues with polluted water from the city's supply channels are a major concern for the health and wellbeing of all Wellingtonians, and that includes disabled people. Therefore, DPA would support the adoption of either options two or three for funding any upgrade given the dire state of the city's water pipelines as continuing funding at existing levels is clearly not an option.

DPA supports the preferred option of the Wellington Council to take ownership of the wastewater laterals that run under the city's homes. This move would take the maintenance burden off individual householders by placing it collectively in the hands of Council.

DPA recognises that there could well be substantial rates rises stemming from the long term plan process. Given that many disabled people are on low and/or fixed incomes, we would ask that the impact of any rises are mitigated through, for example, the extensive promotion and availability of rates grants and any other mechanisms which will take the burden of any rises off lower socioeconomic groups as much as possible.

DPA also wishes to use this opportunity to draw Council's attention to the proposed introduction by Government of an Accessible New Zealand Act, on the same basis as similar legislation in Canada, which will mandate minimum accessibility standards for the physical and built environment, transport, information, communications and will even establish standards around, for example, access to housing, justice, as well as central and local government services. Therefore, this and other relevant plans should begin factoring in the eventuality of such legislation.

DPA is very disappointed that this WCC LTP was not made available in New Zealand Sign Language, Easy Read or Braille. We would like to point out that, for example, the Dunedin City Council recently made its invitation to its 10 Year Plan workshop aimed at their local disability communities available in accessible formats. Although Dunedin's own plan was not made fully available in accessible formats either, at least that level of accessible engagement was a beginning.

DPA strongly recommends that in the final 10 Year Plan, that Council commits to making all of its communications and information available in accessible formats including New Zealand Sign Language, Easy Read, Braille, audio and large print and that it puts adequate funding resources towards this and works alongside the Accessibility Advisory Group towards effecting this change.

DPA is pleased to see that the Council has recognised the need to fund the Let's Get Wellington Moving (LGWM) project, and that it will be making decisions on how to do so during the lifetime of this plan. However, alongside other local stakeholders, we wish to express our disappointment that the project has been beleaguered by issues which could delay its start. Notwithstanding, DPA submitted on the LGWM some years ago when it was first recommended, and our previous Kaituitui was also consulted locally by a key official involved in this project and we would definitely welcome ongoing dialogue. In any event, disabled people should be key co-design stakeholders during the planning and implementation process.

DPA acknowledges that investment by Council in more social housing and other community housing projects is mentioned as an ongoing project within this plan. Housing, and more specifically, the lack of accessible housing options is a high priority issue for the disability community. Therefore, we reiterate again our call for all new Council housing builds to be built to Universal Design Lifemark Standards and that disabled people are identified and recognised as full stakeholders in all housing programmes and initiatives at the local level.

DPA acknowledges that investment in venue strengthening and upgrades is another primary objective of the WCC. Again, we strongly reiterate the need for any complexes to be constructed to universal design principles and standards and that disabled people be recognised as key co-design stakeholders during the planning and construction process.

DPA acknowledges that the Wellington Regional Growth Framework was mentioned in the plan which seeks to address the infrastructural and economic needs of the Greater Wellington region going forward. Disabled people and our organisations should be involved in this given that, for example, this framework could be used as a further means of promoting and investing in greater employment opportunities for disabled people (alongside other equity groups including Maori, Pacific peoples, ethnic communities, etc) within our region.

DPA welcomes the Wellington City Council's 10 Year Plan as a starting point in addressing some of the city's most pressing needs. Nevertheless, Council should also strive to meet its UNCRPD obligations to ensure that disabled people are involved as full partners in the decision-making process.

## Submission #: 732

**From:** [Rob Hole](#)  
**To:** [BUS: Long Term Plan Engagement](#)  
**Subject:** WCC Long term Plan: Submission from the Friends of the Wellington Botanic Garden (FOWBG) re the Begonia House  
**Date:** 07 May 2021 19:27:41

---

Dear Councillors and Council Staff

As immediate past president of the FOWBG, I should like to endorse fully, the submission filed by our President, Mazz Scannell and to express my appreciation of Councillors who voted recently to include Begonia House capex of \$7.748 million in the current consideration of the Long Term Plan. The Begonia House together with the Lady Norwood Rose Garden is, for many if not most visitors, the front door of our wonderful garden but the current state of the Begonia House well exceeds what the usual annual maintenance might fix; a substantial make-over is overdue.

I congratulate the Council for seeking a substantial public input into its planning. I trust that the reference to the Garden's Begonia House survives this process and that this wonderful structure can again shine in our 151 year old Garden.

Yours sincerely

Rob Hole

Cycleways  
Te Atakura (climate change)  
Central Library

**Q17. Your comments on the big decisions (optional)**

1. Cycleways effect only a small proportion of residents, the cost of these escalate even before work has started and we all need a lower rates increase. 2. This council needs to save for future plans, budget accordingly and get some expertise on budget control. The record so far, for the last 150 years apparently, is appalling! 3. The council cannot afford to fix the Council Precinct, so council offices should stay where they are on The Terrace and the land be sold for amenities. There is NO NEED to have flash council offices if the only way to do this is to accrue more debt. Future generations will NOT be able to pay back debt, let alone interest rates for the debt this council already has when they start to rise. 4. Rate payers are NOT the only source of income if the council was thinking laterally. We should use big business sponsorship more liberally to support the city they want to be part of - I have seen no hints of even engaging with this source of funding. 5. If the city is in fact in this dire a situation my first suggestion is that the Councilor's themselves go back to the minimum wage, rescind their different council post fees, cancel the paid lunches and get serious our their stewardship roles for the city. 6. I support Khandallah Park and Swimming Pool upgrade, as the cost is minimum, and the pool is well used over the Summer by the young adults of 3-4 suburbs surrounding this facility. It is an important social and exercise facility especially for this group. 7. I do NOT support the extreme rates rise proposed - people have already been driven out of the city by the mismanagement of the CBD, this will only drive further people to other areas, as it appears better stewardship and management is happening elsewhere.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

I strongly oppose the proposed budget.

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

I support decreasing spend in the current budget.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

This council needs to think laterally about funding. The rate payers of this city are NOT the only source of income! Partnering with big business has been successfully completed in overseas companies - use others expertise without travelling(!) by using digital services available to form relationships and get guidance on funding alternatives. This doesn't appear to have been approached at all.

- Q7. **Oral forum time** not answered
- Q8. **Oral hearing time** not answered
- Q9. **Which of these options do you prefer? (3 waters decision)** Option 2. Enhanced investment (\$2.4bn - the Council's preferred option).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** Option 2. Take ownership (Council's preferred option, \$32m investment).
- Q11. **Which of these options do you prefer? (Cycleways decision)** None of these options.
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** None of these options.
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** Option 1. Demolish and site developed through long-term lease (Council's preferred option).
- Q14. **Which of these options do you prefer? (Central Library decision)** Option 1. Strengthen now by temporarily exceeding debt limit (Council's preferred option, additional 0.79% to rates).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 1. No change in current practice (no change to investment, rates or debt).

Q16. **Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Wastewater laterals  
Cycleways

Q17. **Your comments on the big decisions (optional)**

Waste water laterals: As far as I am aware, these used to be the responsibility of Council but this decision was changed about 10 years ago? It's ridiculous. Private homeowners do not have the money or skills to repair leaks under the footpath or on the road, and it's usually not their fault that there is a problem. This should definitely be a council responsibility, because it involves heavy machinery, traffic management and expert skills. I would like to see the people in charge of water leaks become more efficient though - fix leaks promptly, get to grips with your records department so that you actually know what services are underground and don't waste weeks dithering around. I reported a leak which wasn't fixed for over a month and I was told you were trying to figure out what was under the ground. All companies with services underground should be required to inform WCC of what they have, and WCC should have a centralised record of what is there. Cycleways: Please don't waste any more money on these. The one down Rongotai Road is barely used - I have seen ONE person on it in all the time it's been there. Cycling numbers will never be high enough to justify the money spent. Any separated cycleway will always come to a point where there is an intersection, road works or something else that is difficult to navigate, so there is a limit to the type of person who will cycle. I would much rather you spent money reminding cyclists that they should not ride on the footpath. I have never seen any advertising about this.

Q18. **You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

Q19. **Do you support the proposed budget?**

I somewhat oppose the proposed budget.

Q20. **You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

I support decreasing spend in the current budget.

Q21. **Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

I would like to see the council focus on key infrastructure such as roads and pipes. Spend less on pretty things that are nice but not essential, like rainbow crossings and murals. We don't need a "bike to work day". Cancel the upgrade of Frank Kitts Park and the walled Chinese Garden which is a terrible use of waterfront space. Use fewer consultants. Work more efficiently. I don't need somebody to ring me up every time I report a water leak. I just want you to fix the leaks. Car parking in some of the CBD should be for 3 hours - two hours is not long enough to go and see a movie, and marginal for having a meal in a restaurant.

Cycleways  
Te Atakura (climate change)

**Q17. Your comments on the big decisions (optional)**

Climate change is a nonsense Cycleways - a fashion for the moment. I can verify that cycleways are poorly utilised in both newtown and kilbirnie. The cycleway cobham drive/roundabout has destroyed a good mature seaside landscape; not only a windbreak, but a sanctuary for penguins. There was room for bicycles without major earthworks. Crawford road uphill between kilbirnie and newtown has been dangerously narrowed by the cycleway.

I support decreasing spend in the current budget.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

A traffic comment. Current. Buses at the traffic lights on Rongotai Road have to make a very tight right hand turn in order to head uphill via crawford road to newtown. It would be made less hazardous for both buses and cars if one carpark was removed from the left of the intersection (Diagram drawn on attached file).

Cycleways

---

**Q17. Your comments on the big decisions (optional)**

Congestion levels in Wellington are already high. Given the city's projected population increase, it is vital that we look at new ways to get people around the city. NZ already has very high levels of obesity and mental health problems. Increasing access to safer cycling would improve people's physical and mental health, make the city more resilient, save money lost to the economy by people sitting in traffic and strengthen communities by increasing the liveability and accessibility of neighbourhoods. Please be bold and get on with it.

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

<p><b>Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)</b></p>	<p>not answered</p>

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

General Wellington is one of the best cities I ever lived in. It is a beautiful place and I want to see it develop into a city I can continue to be proud of.

| Q5. Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?  | No  |
| Q6. If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer? | not answered  |
| Q7. Oral forum time   | not answered  |
| Q8. Oral hearing time   | not answered  |
| Q9. Which of these options do you prefer? (3 waters decision)   | Option 3. Accelerated (\$3.3bn investment – higher rates and debt).   |
| Q10. Which of these options do you prefer? (Wastewater laterals decision)   | not answered  |
| Q11. Which of these options do you prefer? (Cycleways decision)   | Don't know.   |
| Q12. Which of these options do you prefer? (Te Atakura Funding decision)  | Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).                                 |
| Q13. Which of these options do you prefer? (Civic Precinct decision)  | not answered  |
| Q14. Which of these options do you prefer? (Central Library decision)   | Option 1. Strengthen now by temporarily exceeding debt limit (Council's preferred option, additional 0.79% to rates). |
| Q15. Which of these options do you prefer?(Sewage sludge and waste decision)  | not answered  |

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Te Atakura (climate change)  
Central Library

---

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

General I want wellington to be a great place to live, travel and work in, and for us to feel safe walking and cycling, and that public transport works to move people around cheaper and quicker than is possible at the moment so my daughter can travel to school safely. and other parents can ditch the school run I wish for road space to stop being used for the free storage of motor vehicles, and maximised to move people around safely. and I hope there will be a congestion charge implemented before 2024. I want the harbour and beaches to be safe to swim in every day of the year. I want the arts to continue to be celebrated in Wellington, and for the City gallery to retain it's independence. I want Council to stop signing peppercorn rent deals with Willis Bond and other developers effectively giving them large chunks of our land for unnecessary unwanted developments, and i want Wreda and the other Quangos who avoid accountability and don't act to serve ratepayers to be abolished. I want the airport to stop taking over land and trying to expand into the golf course. or Cook straight. All reports indicate that our climate does not need a larger airport, it does need there to be less personal vehicles and taxis clogging up Wellington's streets travelling there. though, so Light rail and bus services to the airport, and a council charge on all other vehicles using the airport to pay for the infrastructure needed. Oh, and just to be sure, I'll repeat that want more awesome bike lanes, secure bike parking and light rail through Newtown to the airport to happen before i retire please.

I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

---

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

---

**Q19. Do you support the proposed budget?**

not answered

---

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

General I want Wellington to be a dynamic, accessible, affordable city to live in with good core infrastructure and community links. In the midst of a climate crisis, it is crucial that we have the physical, social and environmental infrastructure to match the challenges of our time, and with the urgency that is required. These next 10 years are critical to transform our city for the better.

---	--------------

<b>Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?</b>	not answered
--	--------------

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

General I regularly travel to Wellington from Auckland for my work by bus, train and folding bicycle. I use these modes of transport to help reduce my personal carbon footprint, but it's inaccessible to most people because it's expensive and just a little bit difficult! Imagine if we could make equitable, diverse travel options in and out of Wellington so there were more people like me?

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

<p><b>Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)</b></p>	<p>not answered</p>
---	---------------------

---

<p><b>Q19. Do you support the proposed budget?</b></p>	<p>not answered</p>

<p><b>Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?</b></p>	<p>not answered</p>
---	---------------------

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

General A low-carbon Wellington is also one that benefits public health, Te Tiriti, transport equity, and people's right to housing. This is the last decade in which reducing emissions can help avert the worst of the climate crisis' consequences. WCC's LTP must reflect this urgency.

Cycleways

---

**Q17. Your comments on the big decisions (optional)**

I want to be able to use a network of safe, separated, maintained cycle paths to get across Wellington (Hataitai to Ngauranga). I also want to know there are secure, monitored bike parking areas across the city. I have a bike that I could use for short trips to town, but there are very few places I feel confident locking my bike. Many, many other cities around the world appreciate the benefits of cycling and doing things bit by bit frustrates both cyclists and polluting vehicle drivers equally. The rapid growth of ebike ownership makes Wellington as bikeable as the traditionally flat cities of Europe. Don't waste this opportunity to get it right - and by getting it right, I mean actually consult with those people who have experience in setting up successful, positive infrastructure for cyclists! Build it and they will come.

| Q1. Full name:  | Oli Brooke-White  |
| Q2. Phone number:   | not answered  |
| Q3. Are you making this submission as an individual or on behalf of an organisation?  | Individual  |
| Q4. What organisation are you submitting on behalf of?  | not answered  |
| Q5. Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?  | No  |
| Q6. If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer? | not answered  |
| Q7. Oral forum time   | not answered  |
| Q8. Oral hearing time   | not answered  |
| Q9. Which of these options do you prefer? (3 waters decision)   | Option 3. Accelerated (\$3.3bn investment – higher rates and debt).   |
| Q10. Which of these options do you prefer? (Wastewater laterals decision)   | not answered  |
| Q11. Which of these options do you prefer? (Cycleways decision)   | Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)                    |
| Q12. Which of these options do you prefer? (Te Atakura Funding decision)  | Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).                                 |
| Q13. Which of these options do you prefer? (Civic Precinct decision)  | not answered  |
| Q14. Which of these options do you prefer? (Central Library decision)   | Option 1. Strengthen now by temporarily exceeding debt limit (Council's preferred option, additional 0.79% to rates). |
| Q15. Which of these options do you prefer?(Sewage sludge and waste decision)  | not answered  |

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

General This city should be about people and public transport options, not cars and roading projects.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making. Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily. Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

- Q6. **If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer?** not answered
- Q7. **Oral forum time** not answered
- Q8. **Oral hearing time** not answered
- Q9. **Which of these options do you prefer? (3 waters decision)** Option 3. Accelerated (\$3.3bn investment – higher rates and debt).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** not answered
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** not answered
- Q14. **Which of these options do you prefer? (Central Library decision)** Option 1. Strengthen now by temporarily exceeding debt limit (Council's preferred option, additional 0.79% to rates).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** not answered

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library

---

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

---

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

---

**Q19. Do you support the proposed budget?**

not answered

---

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

---

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

---

**Q19. Do you support the proposed budget?**

not answered

---

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

General The Wellington region's topography has led to population clusters separated by hilly terrain. Its madness to be building expensive difficult roads into an already car clogged CBD. Lets build better public transport and get the commuter vehicles off the road.

I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

General As a Vic graduate, my memories are of a clean, safe, arty, urban space; wherein Maori were visible. On my visits to the city, over the years, I am still impressed by the clean, arty space wherein Maori are visible; not always now, for the best reason like in my university days. I am unimpressed by the unsafe inner city that has been portrayed by the press, television news, and social media recently; and those geysers that pop up now and then. The bus transport leaves much to be desired!

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

<p><b>Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)</b></p>	<p>not answered</p>

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

General As an older resident of the inner city I value the services the Council currently provides and endorse all the points above relating to future developments. I would like to add a strong recommendation to the Council that, before further intensification of housing in the Te Aro area, they address the imbalance between public green space and buildings. This may involve converting some of the existing roading, the purchase of lots currently devoted to parking, and the uncovering of watercourses.

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

General I am really concerned about the impacts of climate change and the insufficient action being taken by local and central government to agreed it. Please prioritise action and funds to address Climate change with urgency.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

General Wellington has the capacity to be an awesome city by living within the constraints that Nature has set for us. This includes not building out our already highly engineered airport further and building more roads for more cars. Let's live within our means and the constraints that nature itself imposes.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on. General It is essential to reduce carbon emissions and there is not a lot of time to do it. Wellington must focus on the zero-carbon future, which will have to be very different from the high-carbon past. Nothing should be done that increases emissions, nothing should be done that leaves emissions where they are now. Reduction must be the lens through which all options are viewed. Reduction must be the deciding factor for making all decisions.

| Q15. Which of these options do you prefer?(Sewage sludge and waste decision)  | not answered  |

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library

---

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

---

**Q19. Do you support the proposed budget?**

not answered

---

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making. Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily. Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on. General Wellington has the unique opportunity to be a world-leading capital city, but it will not get there without clear, decisive, and visionary leadership.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

General Wellington is NZ's capital and it widely known as NZ's most progressive city. This is a chance for Wellington to be a leader and a role model for the rest of NZ. It must lead the way.

| Q14. Which of these options do you prefer? (Central Library decision)   | Don't know.  |
| Q15. Which of these options do you prefer?(Sewage sludge and waste decision)  | not answered   |

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library

---

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making. Debt comments I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily. Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on. General Wellington

Central Library

---

Q17. Your comments on the big decisions (optional)

A de-centralised library model, where books are ordered and delivered to local libraries or homes. Can be app-based or in-person through local branches. Building and funding a central library is poor land use and locks-in outdated models of shared book ownership.

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

I strongly support investing more in Wellington City, particularly through adequately funding cycleways, climate action and water/sewage network and treatment. I plan to live in Wellington for a long time and I would rather pay more through rates to live in a city that works well. The phrasing of this survey frames opting for more investment in terms of higher debt/rates, which is true but not the whole picture, and we need to get away from that kind of thinking. I would much rather pay higher rates & have higher levels of council debt-in-dollars than have a deficit of critical infrastructure & debt-in-carbon. Furthermore, having great infrastructure that supports population growth close to the city (e.g. making it easy to live without a car) means that we can split our future rates bill between more residents as well as reducing household costs like needing a private vehicle. I particularly want to see cycleways that work for kids. Having connected suburban cycleways is crucial for children's independent mobility. Alongside the routes in the plan, we also need to consider other options for making cycling practical and safe, particularly for new or less experienced riders. We can do this by reducing traffic with low-traffic neighborhoods. Drastically reducing on-street carparking is another cheap way we could effectively widen our roads and create space for vulnerable road users.

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library  
Sludge and waste minimisation  
Te Ngākau funding for future work

---

#### Q17. Your comments on the big decisions (optional)

3 waters: costs for work will only go up, so would rather pay more rates and have it addressed properly right now to avoid higher costs down the line  
Cycleways: these are urgent. We need option 4. There are so many benefits from getting more people onto bikes, not all tangible, and I really believe that money invested in a cycle network will be returned many fold over time, and perhaps more quickly than we might think. If we are serious about combatting climate change, then we must prioritise cycleways and public transport and other initiatives to get people out of cars as a matter of urgency. Overseas experience shows that this will also have a positive effect on businesses, particularly if streets are closed to cars, and on the physical and mental health of the population. (Is there any Ministry of Health money that can be called upon, as money spent on cycleways will save money from their budget?) Overseas examples also show us that just building cycle infrastructure isn't enough to reduce car usage, but that making car driving less attractive is also a valid action. So using existing space for cycle lanes, resulting perhaps in less car parks or slightly slower travel for cars, isn't necessarily a bad thing, and should even out as more people are encouraged to use different modes of transport. My own switch to cycling was for 3 reasons: wanting to reduce my carbon footprint, wanting a healthier transport option, and seeing bikes constantly going faster than my car! I also suffer from a chronic medical condition which reduces my mobility, so getting moving on a bike is important, and actually less painful than driving for me. For times when my condition is very bad and I can hardly move at all, I'd appreciate being able to use a car with less other cars on the road, which is what prioritising cycle infrastructure should achieve -- people who absolutely must drive are able to do so easily without dealing with congestion, because there are less cars on the road. I note that the central city is already lacking in bike parks, which tend to be full during the day (and non-existent on the Terrace!) so this would need to be addressed alongside building cycleways. I also want to note that cyclists subsidise car drivers as the cost to the public purse for car use is many times higher per journey than for cyclists, who do not damage the roads nearly as much and do not pollute. Please see attached infographic about this. In fact, according to information on the WCC website, option 4 would save Wellingtonians \$2.1 Billion. See image 6 on this page: <https://wellington.govt.nz/parking-roads-and-transport/transport/cycling/we-support-cycling/facts-and-figures> I would like to see the debt headroom reduced to accommodate fast-tracking this and other carbon zero/climate change projects. I believe that the benefits gained will outweigh the spending so it would be sensible to start reaping those benefits as soon as possible. It seems likely to me that the construction industry would step up if given the certainty of spending as this would allow them to increase capacity with confidence. I would like to see the money for cycling ring-fenced for this reason.  
Te Atakura: additional to the comments above, I want to add that I'd like to see Wellington ban cruise ships. They are incompatible with a carbon zero goal and the costs to our city outweigh any perceived benefits to local business (which I understand to be debatable). Again, I'd like to see the debt headroom reduced to accommodate full and urgent action on climate change. If not now, when? I support pedestrianised streets, and higher parking charges, even as a car owner.  
Central library: this is also an urgent project. We need our library back ASAP! Our family has sorely missed the central library and the lack of one makes our city a far worse place to live. The library was a safe place where our children could hang out after school where they didn't have to spend money for access, it was a place for me to do my freelance work when I couldn't handle being at home alone working any more, it was a meeting place and a community hub and a wonderland of learning resources, entertainment, and possibility. The branch libraries and pop ups do not fulfill the same function as they don't have enough space, or decent desks and chairs, or reliable wi-fi, and they do not have the central collection of books and other resources. I feel extremely sad that my children lost this at such a crucial time in their lives, and, as time passes with no action, resentful. I'm happy to have my rates raised or to pay a levy to have this essential asset back. While I'm on libraries, I was shocked to learn that most library staff earn only the living wage. These people play such an invaluable role in our society -- they deserve to be paid a lot better than living wage!!  
Sludge: how on earth can we meet our carbon goals if we don't invest fully in a solution for this right now?! Again, reduce debt headroom, get it done, reap the benefits ASAP.  
Te Ngākau: Presumably WCC will need to pay rent to the building owners in perpetuity if they lease the land and give up the buildings? I'm loathe to see assets pass from public to private ownership, having seen what has happened in the UK with councils selling social housing only to have to rent it back at exorbitant rates as emergency accommodation. Look what happened when WCC gave up ownership of the bus network. We went from having enviable public transport to a completely embarrassing mess, right when climate change dictates that we provide better transport options to get people out of cars.

Q18. **You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)** [https://s3-ap-southeast-2.amazonaws.com/ehq-production-australia/ecb49dfc260c817cffd4ce4729dde39064021c4e/original/1620343324/0ef5256d2308e6f0600d1b5f06bb9d88\\_comparitive\\_commute\\_costs\\_by\\_vehicle\\_type.jpg?1620343324](https://s3-ap-southeast-2.amazonaws.com/ehq-production-australia/ecb49dfc260c817cffd4ce4729dde39064021c4e/original/1620343324/0ef5256d2308e6f0600d1b5f06bb9d88_comparitive_commute_costs_by_vehicle_type.jpg?1620343324)

---

Q19. **Do you support the proposed budget?** Neutral.

---

Q20. **You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?** I support increasing spend in the current budget.

---

Q21. **Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

I would support the budget with decreased debt headroom to allow urgent action on climate change, the library, waste management, and on a full cycle network. I'm happy to accept a rates increase, levy for waste management, and increased parking charges in order to achieve this. I support WCC establishing Māori wards, committing to decolonisation and working with mana whenua and Māori to identify what this would look like, supporting Māori to explore ways co-governance can be implemented in Wellington, and establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making. I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily. I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

---

# How much does your commute cost (or save) society?

Every time you travel you put money into the system, but you also cost the system. Your contribution to and burden on the system differs depending on how you travel.

For example, when you ride the bus you pay a fare – money into the system. Your burden on the system includes the cost of operating the bus, and also less obvious impacts like emissions and noise pollution.

By looking at the ratio of what we put in versus what we cost the system, we see that different ways of travelling are more subsidized than others.

The practice of taking these less tangible costs and benefits into consideration and assigning them a dollar value is known as "full-cost accounting." While there are many ways of doing this, this infographic shows one example of how those costs and charges can be calculated.

- Q14. **Which of these options do you prefer? (Central Library decision)** Option 2. Council to strengthen Central Library later (complete in 2028 instead of 2025, additional 0.83% rates increase).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 4. Sludge minimisation through alternate funding (Council's preferred option, \$147m to \$208m capital investment funded through a levy, no additional rates increase)

Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below

---

Cycleways

Q17. Your comments on the big decisions (optional)

Make the city car free. Make the roads safer for all road users by investing in enabling infrastructure such as cycling infrastructure for health, climate action and a better city liveability

---

Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)

not answered

---

Q19. Do you support the proposed budget?

I somewhat support the proposed budget.

---

Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?

not answered

---

Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?

not answered

---

---

Cycleways

Q17. Your comments on the big decisions (optional)

Cycleways result in more people cycling and more people cycling has so many benefits for people, communities and will ultimately save Council money. There is an increase in numbers cycling around our city and it is important that there is the infrastructure to support it.

Central Library  
Sludge and waste minimisation

---

Q17. **Your comments on the big decisions (optional)**

My preferred option for the central library is to use available office space in the wellington CBD and create smaller library cafe style mini libraries for outer areas like Kelburn, Aro Valley, Mt. Cook and other suburbs that are currently not able to easily access a local library. I don't feel like the money is well spend to create a massive central library as we move forward in this digital age. More exploration needed.

---

Q18. **You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

---

Q19. **Do you support the proposed budget?**

Neutral.

---

Q20. **You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

I support increasing spend in the current budget.

---

Q21. **Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

We need to be much smarter about waste in Wellington. No one I have ever spoken to except landfill workers actually know what we can and can not recycle in Wellington. More communication and more environmentally smart circular economy handling of our waste for the future please!

# Predator Free Wellington Limited: Submission on the Wellington City Council 2021-31 Long Term Plan

*Helping achieve Our Natural Capital  
through a world-first model  
for resilient communities & nature*

**Contact:** James Willcocks  
Project Director – Predator Free Wellington  
027 521 8747  
james@pfw.org.nz

Predator Free Wellington  
is supported by:

Absolutely Positively  
**Wellington City Council**  
Me Heke Ki Pōneke

# Long Term Plan funding benefits

This submission supports the vital place of successful predator control in Wellington and thanks Wellington City Council for including the Long Term Plan funding to enable:

- Continuous roll-out of the 5 phases of Predator Free Wellington over 7 years and achievement by 2027 of full predator elimination and enhanced community resilience
- More efficient use of resources in predator eradication
- Achievement of goals including community cohesion, climate change, biodiversity, and pest management
- Further development of predator eradication tools, knowledge and infrastructure for use in Aotearoa New Zealand
- Leverage of external at-risk funding from the Next Foundation and Predator Free 2050 of up to \$3.9 million
- Investment in Predator Free Wellington builds on the successes of Zealandia, WCC and GWRC.
- Predator Free Wellington is essential to achieve the objectives of [Our Natural Capital](#), WCC's Biodiversity Strategy and Action Plan.

# Predator Free Wellington Phase 1 has demonstrated a proven model for novel and impactful approaches to urban predator eradication

**Miramar:**  
**20,000 people, 16 schools**  
**more than 3,000 households**

View the Miramar celebration video on  
<https://youtu.be/G6IHGcNZrrE>

## The Miramar experience:

### Phase 1

- Delivers a proof-of-concept for urban landscape-scale predator control.
- Proves the major benefits in community resilience and wellbeing, alongside predator eradication and its positive impact for biodiversity and quality of life.
- Delivers open source, evidence-based tools and techniques for predator eradication.

*Community involvement and technical expertise have been vital in delivering Predator Free Miramar*

# Resilient communities

*One day we were just checking the traps and I found a gecko underneath it, and it was really cool because I'd never seen one before  
Chelsea & Fiona*

*I'm just really excited about how the community grabs this thing and runs with it, I couldn't stop this now if I tried.  
Dan Henry, Predator Free Miramar*

The best thing I think has been meeting people, as cliché as that sounds it is actually really cool  
Kenney-Jean

# Phase 1 Key Achievements – Nature, People and Knowledge

The following achievements are directly aligned with WCC priorities and outcome areas.

## Biodiversity outcomes

Annual five minute bird count monitoring undertaken by third party contractors has already shown a 33% increase in native bird counts from before the start of the operation. This increase in the abundance and distribution of native bird species will continue to expand throughout the city and region as the project advances. Indications of invertebrate and lizard numbers are even more encouraging.

## Wellbeing

68.5% of Wellingtonians feel more connected to their community as a result of being involved in Predator Free Wellington and backyard trapping. Independent health and wellbeing research showed that in Wellington, depression scores are a third lower in trappers vs. non-trappers and stress scores are 50% lower in trappers. In times of global biodiversity loss and climate change concern, Predator Free Wellington offers hope and agency to all ages.

## Tools and Knowledge

Predator Free Wellington has delivered the model for backyard trapping now growing exponentially throughout the region and Aotearoa. The PFW team is providing the technical, engagement and operational advice to regional groups to ensure ongoing success. Predator Free Wellington is developing the model for urban eradication required to deliver on the national goal and has delivered ground breaking research contributing the regional and national knowledge pool, positioning the capital as a national and global leader.

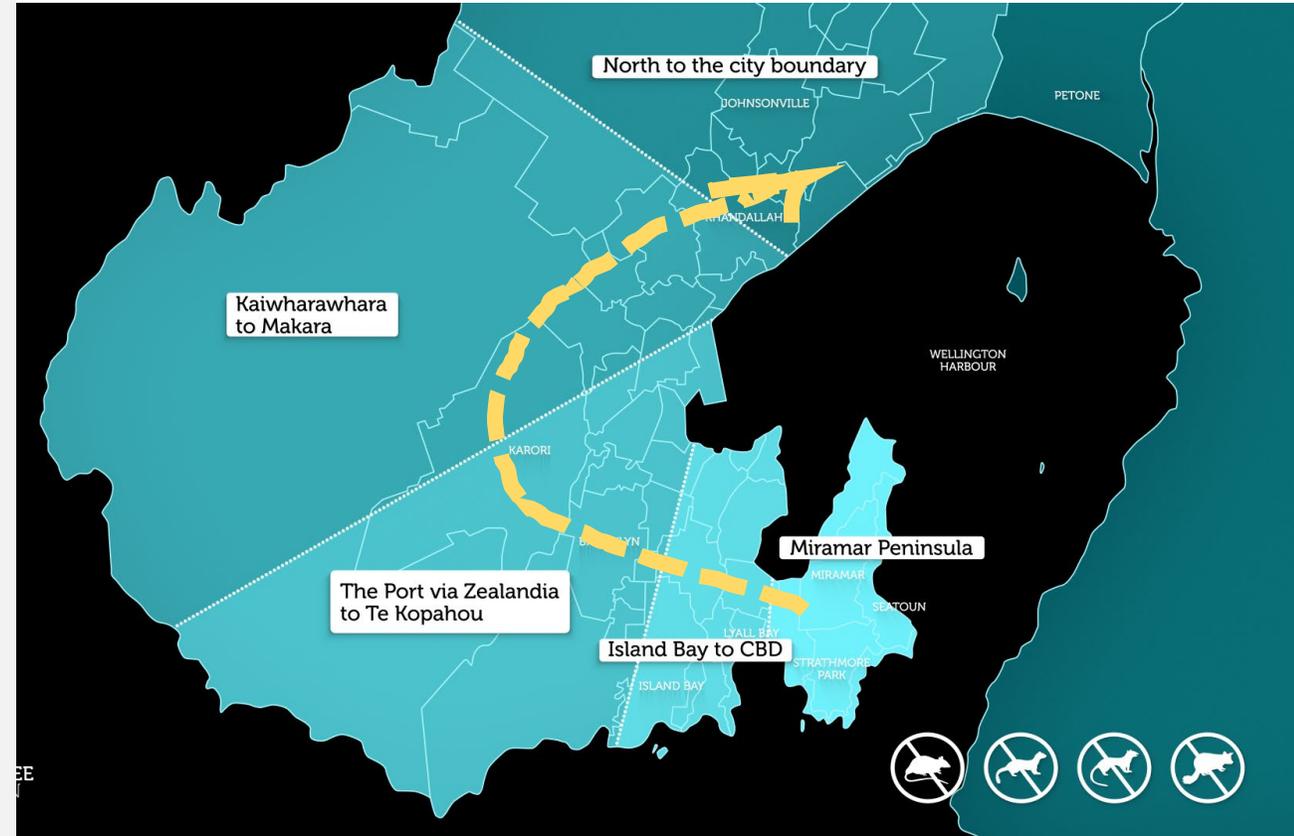

# The next opportunity: accelerated rollout of Predator Free Wellington: a continuous programme over 7 years

- Phases 2 to 5 for PFW are based on the **proven track record** of Phase 1 – Predator clearance from Miramar.
- Techniques and approaches are well developed and can be rolled out with high confidence.

## ***A continuous programme and more rapid eradication:***

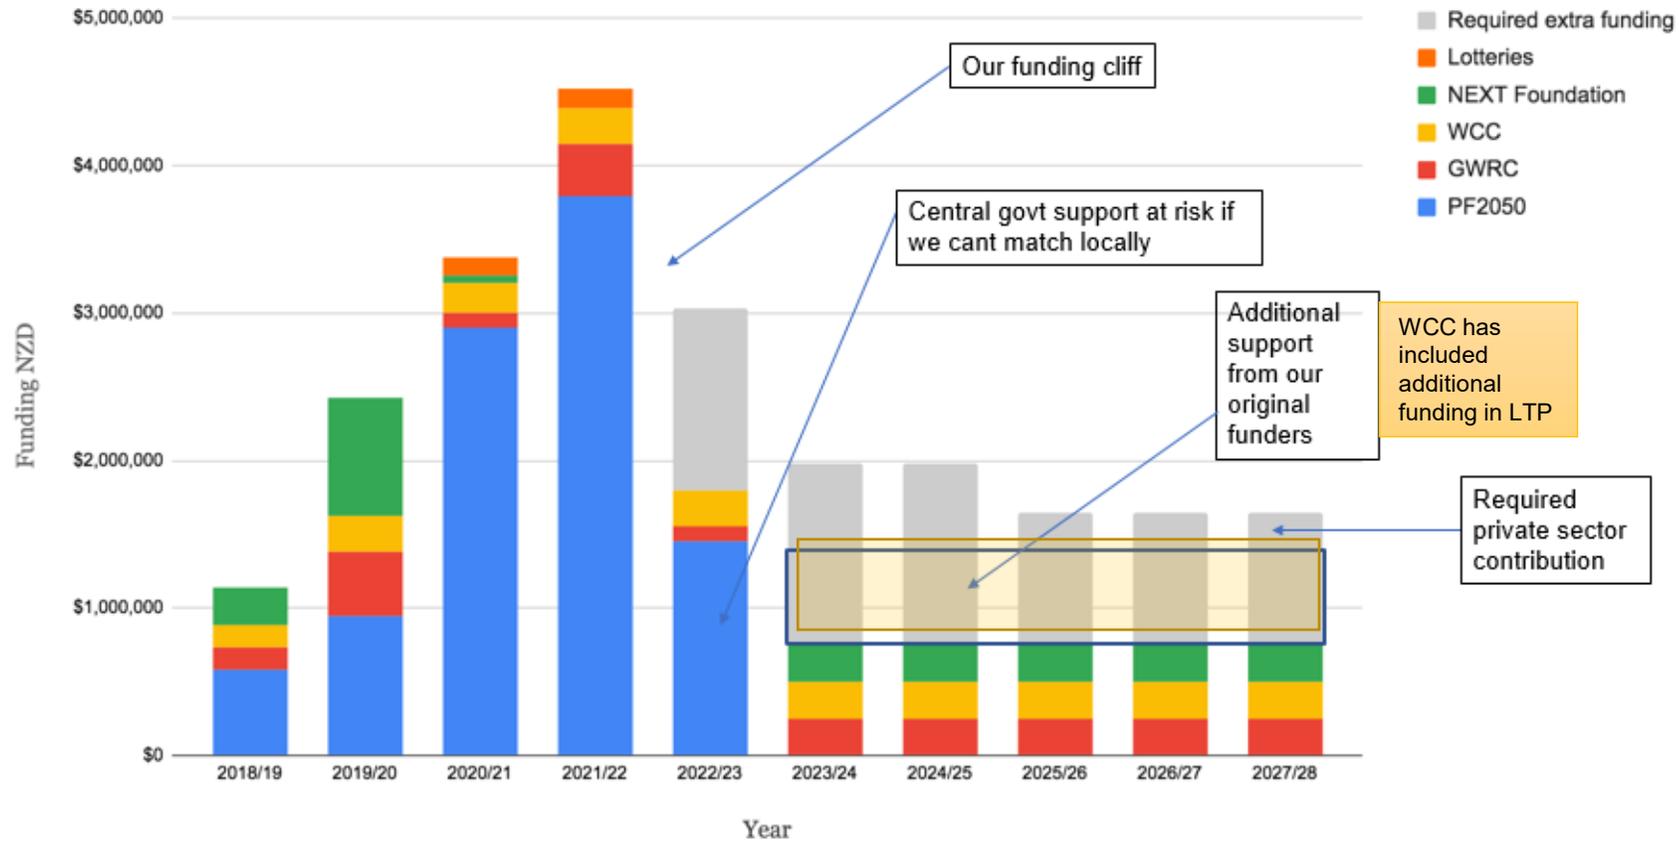

- Allows much more efficient use of resources, rather than standing up and winding down teams in an inefficient cycle of effort
- Creates economic and employment benefits from ongoing job opportunities
- Reaches more than 80,000 households in 7 years rather than 10 years
- More strongly delivers visible benefits in community cohesion and enhanced biodiversity
- Will be widely supported– there is **94% community support** for eradication, and tens of thousands of residents are taking part in predator eradication activities
- Lowers biosecurity risks of reinvasion and reduces the costs of ongoing control
- Fully leverages available national and other funding.

# Making it happen: commitments required to leverage national funding

## 10 Year Funding Snapshot

Total Project is \$23.5 million over 10 years)

\$3.95m from PF2050 and Next Foundation is at risk if full local funding (WCC and GWRC) is not achieved

PREDATOR FREE  
WELLINGTON

We appreciate Wellington City Council's numerous challenges including climate change, infrastructure, housing and resilience and thank you for your positive support to enable Predator Free Wellington project acceleration and completion.

Absolutely Positively

- Q7. **Oral forum time** not answered
- Q8. **Oral hearing time** not answered
- Q9. **Which of these options do you prefer? (3 waters decision)** Don't know.
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** Option 2. Take ownership (Council's preferred option, \$32m investment).
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 2. Medium investment programme (\$39m capital investment, lower debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** Option 1. Demolish and site developed through long-term lease (Council's preferred option).
- Q14. **Which of these options do you prefer? (Central Library decision)** Option 1. Strengthen now by temporarily exceeding debt limit (Council's preferred option, additional 0.79% to rates).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 4. Sludge minimisation through alternate funding (Council's preferred option, \$147m to \$208m capital investment funded through a levy, no additional rates increase)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Te Ngākau funding for future work

---

**Q17. Your comments on the big decisions (optional)**

My central concern is the establishment of a permanent home for the NZSO and NZSM. The NZSO is a true Taonga for Wellington and New Zealand as a whole. It is world-class without question and deserves the highest recognition and a permanent base in Wellington, to preserve Wellington's attempt, as the Capital City, to retain something of its claim to be the cultural capital. Likewise, the NZSM has produced a stream of creative artists, both performers (singers and instrumentalists) and composers, going back to the likes of David Farquar, Jenny McCleod, Douglas Lillburn, Gareth Farr and most recently John Psathas. To have the interaction between these two creative forces operating in Wellington would be a signal triumph for this city!! Give them a home and make us all proud!

---

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

---

**Q19. Do you support the proposed budget?**

I strongly support the proposed budget.

---

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Nothing specific

---

- Q9. **Which of these options do you prefer? (3 waters decision)** Option 2. Enhanced investment (\$2.4bn - the Council's preferred option).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** Option 2. Take ownership (Council's preferred option, \$32m investment).
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** Option 4. Sell to support development (no debt or rates impact)
- Q14. **Which of these options do you prefer? (Central Library decision)** Option3. Strengthen now by increasing rates further (additional 1.79% rates increase).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 2. Invest in technology at Southern Landfill (\$86m to \$134m capital investment and higher rates).

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Cycleways

---

**Q17. Your comments on the big decisions (optional)**

Cycleways contribute to so many other aspects of city life in a positive way, reducing other infrastructure and emission reduction costs and making kids travelling to and from school happier and healthier and its about time decisions were based more holistically. A big thank you for all the good work from the new young councillors who are aware of the level of change needed and the associated reprioritisation required.

---

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

---

**Q19. Do you support the proposed budget?**

I strongly support the proposed budget.

---

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

not answered

**Q17. Your comments on the big decisions (optional)**

Make Wellington one of the best cities in the world to be a skateboarder. Top Five Short-term Goals and Priorities Creating a 'Long-term/10-year plan' for the future of skateboarding in Wellington City. This is vital to ensure that mistakes from the past (poor design/construction) are not repeated. Future developments need to be well thought out with proper input and consultation with the broader skate community. Creating a central city skate park easily accessible by using public transport (and without the need for a car) by anyone living in all areas of the greater Wellington region. This can be achieved by upgrading Waitangi Park to cater to all levels of ability (beginner, intermediate and advanced) and types of skating (Park and Street courses), meeting current Olympic standards, and holding local, regional, national, and Olympic qualifying events. Reinstating a mini ramp back inside Kilbirnie Recreation Centre (at the least) until a better solution is found. There are no facilities or anywhere to go skateboarding during the Winter Months or when it is dark, wet, or windy. This is urgent and a top priority as Wellington is highly vulnerable to all the Elements for extended periods. This could easily be achieved by rearranging the current layout and moving 'Tinytown' (for which the ramps were removed) to another area inside. Furthermore, if the Council simply agreed to give us the small space required – the skate community could build the ramp themselves (The idea of removing the plastic floor should also be considered). A central city 'Skate Friendly Street Plaza' that provides a safe area for skaters to meet and skate together (and again which is easily accessible by using public transport by anyone living in all areas of the greater Wellington region. This is a vital ingredient for a healthy skate scene. All the great cities worldwide are well known for their skate communities — for example, Barcelona – MACBA. Putting a system in place to ensure opportunities to include 'skateboarding' in future infrastructure projects that could benefit the city are not missed. Achieving the goal of making Wellington city one of the best places in the world to be a skateboarder will require integrating small areas all around the city for street skating and ensuring the city is both accessible and inviting to move around in as a form of transport. This goal is achievable and does not have to be hugely costly. A great opportunity is staring us in the face with current future projects due to happen in the next ten years, including: A network of bike lanes which the Council currently want to spend \$120 million on over the next ten years. These need to stop being classed as 'Bike lanes'. Many other diverse user groups (skateboarders, long-boarders, roller-skaters, scooter, etc.) can benefit from these lanes by removing all patches of rough ground from designs. There is also no reason why they could not be more inviting, fun, and exciting by including pump-bumps and banks. Future redevelopment of public spaces over the next 10-years, including Frank Kitts Park, Te Aro Park, and The Civic Centre (to name a few), could also provide a skate-able area. This could be in the form of a perfect ledge, bench, set of stairs etc.

Cycleways  
Te Atakura (climate change)  
Central Library  
Te Ngākau funding for future work

**Q17. Your comments on the big decisions (optional)**

Cycleways The cost of cycleways is out of all proportion to the numbers of cyclists using them. We cannot afford them at the moment! Therefore after completing current projects, there should be no major capital investment in cycleways. LGWM is a failure, and WCC should take control of local roads. For example, cycling along Thorndon Quay could be made much safer very quickly with minimal expenditure by changing all angle parking to parallel parking. With Clearways (no parking) in operation southbound in the weekday morning peak, and northbound weekday afternoon peak, there would be ample room for cyclists and for buses to pull in at stops. At other times there would still be a considerable amount of space for a cycle lane between the parked cars and moving traffic. Also WCC could easily move very quickly to improve the reliability of bus services along the Golden Mile, by simply banning all except emergency vehicles and buses and stopping parking in the morning and evening peaks periods. At other times, traffic and on-street parking would be allowed as at present. This would prove whether bus reliability can be improved, while at the same time taking cognisance of retailers' concerns about removing cars from Lambton Quay completely. NZTA should be responsible for SH1 to and from the Airport. First to Zero - Te Atakura Again, we don't have the money, and significant expenditure should be deferred. Increasing use of buses can be encouraged by better reliability, as proposed above, and more extensive bus priority lanes in the CBD. Central Library Option 2 does not really achieve anything, while ratepayers cannot afford option 3. With the designation of the Library as a heritage building, any other cheaper option to demolish and rebuild is unlikely to survive legal objections, so Option 1 is the logical choice. Borrowing by the Council should be for as long-term as possible (30+ years) to spread the cost as far as possible. Why can the Council not increase its debt level further to say 250% when borrowing is so cheap to spread the cost over a longer period. For the top (non-library) floors of the library building, consideration should be given to providing office space for some council staff to reduce rent being paid elsewhere. Civic Square Te Ngakau If there is any serious prospect of Option 4 being a goer, then that would be the least cost option, but it seems unlikely. Therefore option 1 is preferred as we cannot afford option 2 or 3.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

I strongly oppose the proposed budget.

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

I support decreasing spend in the current budget.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Residents cannot afford annual increases as proposed - nearly 50% in the next five years!! Each proposed annual increase is compounding on top of previous years, with +13.5 % in Year 1 - unacceptable. It is ridiculous to be contributing \$270million to LGWM for extensive changes to the Golden Mile, Thorndon Quay and Hutt Road, when significant improvements to bus service reliability and cycle safety could and should be made with much less extravagant improvements. (see earlier comments). LGWM proposals are so expensive that the Golden Mile could indeed be paved with gold if their proposals are adopted! There seems to be no mention of any costs for social housing in the Draft Statements of Service Provision, and this is not one of the 7 big issues put forward for consultation. With central government unwilling and/or unable to house all those in need, the burden is increasingly falling on local councils, and this looks like a large sinkhole for untold amounts of WCC ratepayers' money to me. One specific point about User Charges - I think that the proposal to increase weekend parking charges by \$2.00 to \$4.50 is too extreme. I would suggest an increase of \$0.50 or \$1.00 max, to \$3.00 or \$3.50 - but only if it is demonstrated that weekend on-street parking is already reaching say 80% utilisation.

---

Cycleways  
Te Atakura (climate change)  
Central Library

**Q17. Your comments on the big decisions (optional)**

Climate change is the biggest challenge facing humanity. Our current problems are all trivial compared to what we face with climate change. If we want, we could mitigate climate change. We must stop pointing fingers and lower our emissions now. Te Atakura must have all the money it ever needs. Building cycleways will have a huge impact on lowering Wellington's emissions. Wellington's biggest emissions source is transport, we must do everything we can to get people out of cars. Cycleways are an investment which will pay off for our city. WCC's website has all the info about how insanely beneficial they are. This has me convinced that building a full network is a no brainer [https://wellington.govt.nz/parking-roads-and-transport/transport/cycling/we-support-cycling/facts-and-figures?](https://wellington.govt.nz/parking-roads-and-transport/transport/cycling/we-support-cycling/facts-and-figures?fbclid=IwAR3TNuizLIFSgeUbTImqh28QLePSRh2hTJ6k7IxWdBBAAoLDF9sURWPzNqw)

fbclid=IwAR3TNuizLIFSgeUbTImqh28QLePSRh2hTJ6k7IxWdBBAAoLDF9sURWPzNqw: 1\$ spend is \$20 saved, 40% benefit to retail, 40% less injuries, greater home value, health etc. Wellingtonians spend 1.3 billion dollars on cars a year. Cars are an expensive mode of transport. By investing in cycleways we will save Wellingtonians a shit ton of money. It is perfectly justifiable to put up rates in anticipation of this saving. We need to improve cycle infrastructure sooner than later so that Wellington can divert wasteful investment away from cars. E.g. someone might buy a cargo bike instead of a second car. Wellington traffic is at a tipping point. Back-to-back traffic fills the streets twice a day. We owe it to the poor car commuters to cut traffic by giving people who want to cycle/walk/bus better options! This means full cycleways and not restricting footpath upgrades. Having a central library is a great improvement for the city. Honestly, its hard to argue for a library on the same page as climate change, the problems are orders of magnitude different. If we ignore climate change, our planet will change and we will be faced with migration crises, new disease, biodiversity crises, storms, sea level rise, food instability, wars, economic instability. If we ignore the needs for a library, our community will be less strong and resilient. Each year Wellington supports more and more climate action. Councillors that support full climate action—which includes fully funding Te atakura and cycleways—will stay relevant for future elections.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

Wellington City CBD is dying due to the lack of parking and the cost of parking. I live in Wellington and if I am meeting people from nearby suburbs I drive to Petone or Queensgate where parking is easy for all, and you can put your shopping in the car which is not suitable for taking on bikes and too hard to carry up the hill etc from bus stop to home for my friends. Stop this stupidity of trying to get rid of cars. It gets rid of people and then businesses. We are already seeing the City as a dumping ground for social housing and increased crime. Provide a very large (well designed) car park in place of the BNZ building and have 8 to 12 seat frequent electric shuttles (every five minutes) so people can park (free for 2 hours; \$5 for 4 hours, \$15 for 6 hours; and \$50 > 6 hours) to attach people into the city. This would help attach people to go out to dinner, see shows etc. Wellington is a very unfriendly city.

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library  
Te Ngākau funding for future work

---

**Q17. Your comments on the big decisions (optional)**

We need major investment in the three waters network and direct Wellington Water to accelerate investigations into the network. It is such a waste of water for broken water mains to be bursting (and leaking) and the environmental impact and image of sewage spilling into the harbour and sea is sad. Wellington's reputation is at stake. Why is the focus only on cycle ways? More investment needs to be put into shared pathways for ALL active modes, including scooters and skateboarding. Encouraging more people to use active modes will improve health outcomes for all. Cycleways (shared active mode pathways) should be separated from roads. New Zealand (and the world) is facing a crisis in climate change. More investment and encouragement is needed to change people's behaviours (and reliance) on plastics and fossil fuels. The central library should demolished and rebuilt. I do not support sale of the council land/buildings at all. If the buildings are heritage listed, then they should be protected, otherwise demolish them and rebuild.

- Q9. **Which of these options do you prefer? (3 waters decision)** Option 2. Enhanced investment (\$2.4bn - the Council's preferred option).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** Option 2. Take ownership (Council's preferred option, \$32m investment).
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 1. Finish started projects (\$29m capital investment, lower debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** None of these options.
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** Option 4. Sell to support development (no debt or rates impact)
- Q14. **Which of these options do you prefer? (Central Library decision)** None of these options.
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 1. No change in current practice (no change to investment, rates or debt).

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Cycleways  
Central Library

---

**Q17. Your comments on the big decisions (optional)**

Cycleways: These are tending to be "elite-st" for a very limited group. Experience from the Island Bay experiment has taken a safe environment for all users and turned it into a dangerous one for cyclists and motorists. The \$9m+ stretch from Thorndon to Onslow Road has no compulsion attached to it, and cyclists continue to use the roadway, especially north-bound. Central Library: Trying to fix this debacle is going to be ludicrously expensive, with very little gain. Renovate it with a bulldozer, and start again - if you're not prepared to use the new Johnsonville facility. The Council - both the elected wing and the administration wing - need to get financial management under control as a first priority. Years of mismanagement and excessive spending on frilly frapperly, as opposed to maintaining import infrastructure has brought us here. There is no taste in Wellington citizens for creating a huge debt for the ratepayers of the future to have to meet - reign things in and live within your budget.

---

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

---

**Q19. Do you support the proposed budget?**

I strongly oppose the proposed budget.

---

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

I support decreasing spend in the current budget.

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

not answered

---

- Q13. **Which of these options do you prefer? (Civic Precinct decision)** Option 1. Demolish and site developed through long-term lease (Council's preferred option).
- Q14. **Which of these options do you prefer? (Central Library decision)** Option 1. Strengthen now by temporarily exceeding debt limit (Council's preferred option, additional 0.79% to rates).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 4. Sludge minimisation through alternate funding (Council's preferred option, \$147m to \$208m capital investment funded through a levy, no additional rates increase)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Cycleways

---

**Q17. Your comments on the big decisions (optional)**

There is a significant gap between the Council's aims to promote cycling, reduce transport carbon emissions, and support community well-being and the what the Council actually does. While some progress has been made on cycleways between Miramar and the city, nothing has been done about high risk accessways between Island Bay and the city or the northern and western suburbs. If the Council wants to get people out of their cars and on to public transport, cycles and other mobility devices then follow through on the rhetoric and invest in safe cycle/mobility lanes.

---

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

---

**Q19. Do you support the proposed budget?**

I somewhat support the proposed budget.

---

Cycleways

---

Q17. Your comments on the big decisions (optional)

I want to be able to safely bike around the city. I want more people to bike so that we have less cars/trucks/vans in the city. The best way to do this is to create a cycling network that connects Wellington end-to-end.

---

Wastewater laterals  
Sludge and waste minimisation

---

**Q17. Your comments on the big decisions (optional)**

Water and wastewater: I would like to see a charge for water and wastewater per usage. Without blaming anyone, I can see our neighbours pointlessly wasting water washing their cars, watering their lawns or water-blasting their decks several times a month. Charging for water would teach people to be more mindful about their water usage. I think this, rather than an increase in rates, should add into the waste-water-repair-funding. (I'm aware that installing meters would be the challenge) Waste minimisation: this is more on a national level, but I would like to see the government supporting businesses coming up with alternatives for their current packaging. I would love to see subsidies for organisations that work on environmentally friendly options, as well as punishments (high taxes?) for those that don't. Organisations have a much bigger impact than people. However, I do think education would help, too.

Investment in three waters infrastructure  
Te Atakura (climate change)

---

**Q17. Your comments on the big decisions (optional)**

I encourage Council to borrow more and not be limited to increasing rates in order to progress these important projects. I am a committee member of the Southern Environmental Association Inc which works to rejuvenate the Tawatawa reserve and also works on conjunction with other environmental groups in the area. I think the Owhiro Catchment resource pilot should be resourced to ensure it achieves its objective for being the prototype for successful multiparty processes that restore 3 water networks to sound states that no longer degrade waterways. Also there needs to be adequate funding to quickly fix the public and private pipe failures to ensure the Owhiro Stream and Taputeranga Marine Reserve are for primary contact within a couple of years. Wellington's 3 waters infrastructure needs to be addressed at a level well above business as usual. I think the failing infrastructure needs to be fixed relatively rapidly otherwise, and under option 2, it seems likely that in 30 years time we will still have an ageing network and will not have caught up with the regular renewal programme. I also support the establishment of regional or national training centres so that we do have sufficient trained water industry staff. Council needs to be ambitious and bold to fix the 3 waters problems. Finally I think the recommendations of the mayoral taskforce on 3 waters recommendations need to receive greater attention and funding to progress.

---

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

---

**Q19. Do you support the proposed budget?**

I strongly support the proposed budget.

---

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

As mentioned previously, while I support the budget I also think Council should not be afraid to borrow more money to make things happen and not be limited to increases in rates.

---

- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** Option 2. Take ownership (Council's preferred option, \$32m investment).
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 3: High investment programme (\$120m capital investment - Council's preferred option)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** Option 1. Demolish and site developed through long-term lease (Council's preferred option).
- Q14. **Which of these options do you prefer? (Central Library decision)** Option 1. Strengthen now by temporarily exceeding debt limit (Council's preferred option, additional 0.79% to rates).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 4. Sludge minimisation through alternate funding (Council's preferred option, \$147m to \$208m capital investment funded through a levy, no additional rates increase)

Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below

---

not answered

Q17. Your comments on the big decisions (optional)

not answered

---

Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)

---

not answered

Q19. Do you support the proposed budget? I strongly support the proposed budget.

---

Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?

---

not answered

Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?

Strongly support the recent council decision on Maori wards. But how does council propose to invest in the capability of council staff to effectively engage with Maori?

Cycleways

Te Ngākau funding for future work

**Q17. Your comments on the big decisions (optional)**

On cycleways the evidence of demand is plain to see in the number of cyclists taking to the streets every day despite the difficulty and danger. Imagine how many people would be cycling if it was easy! We need bold action on cycling infrastructure in order to achieve critical mass. A timid and piecemeal approach is almost as bad as doing nothing. On Te Ngākau, please consider opening up a public corridor between Lower Cuba and Civic Square. Previously you had to walk through a sterile and unwelcoming building to take a direct route between the two. How can you have the heart of the city blacked off from the main artery? It was always such a missed opportunity and now we have the chance to fix it and open up what would be the most natural and beautiful of pathways in the city.

Investment in three waters infrastructure  
Wastewater laterals  
Cycleways  
Central Library  
Sludge and waste minimisation  
Te Ngākau funding for future work

**Q17. Your comments on the big decisions (optional)**

Cycling in the Long-Term Plan I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031. Council has continued to defer both decisions to start and actual construction of this network for too many years. Council needs to signal to the civil construction sector that it is serious about the work, so that it can scale up to the work required, so the confidence of wellingtonians is restored in the process (getting it done fast, where the results can be seen, rather than endless slow and disruptive construction). Deliverability of new cycling projects I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements. Council needs to employ staff in-house who can propose and design innovative early works to trial infrastructure that is then followed up on when successful, rather than first needing to buy in expensive external traffic engineering. By having the full budget and in-house engineering I would hope that we would no longer see the expensive re-lay of curb and channel on streets with cycling projects proposed: The cycle budget would be available to put the channel in the right place for the final design! I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users. My children ride to school in Miramar and Strathmore, and there is no safe infrastructure for any of their journey. I support doubling the Cycling Minor Works Budget to \$2 million per year. There is much that could be done, without major pain, in our city if as well as the big paths, small changes could be made often and simply, complementing the larger works. I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements. There is an amazing amount of difference that could be achieved by some simple changes. I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere. So often 'cycling' budgets seem to be paying for sea walls (to protect SH1), environmental remediation (eg Evens Bay) and placemaking. That might be OK if the larger budget was accepted, but to have it eaten away at fringe benefits, rather than the core mission is just budget-shifting. I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects. Council and submitters time is spent over and over asking the same questions one parking place and one street at a time. We need a single plan, laid out and accepted so that when a curb-and-channel is layed, or a road re-surfaced, that the new design just gets put in. Likewise communities are sick of always hearing about new cycleways, it brings up constant fear yet they say 'it isn't connected to anything'. If we can just design once, put in with safe hit posts so folks can see the full outcome, then build formally, we would all be better off. To make this possible I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects. Consultation can then be about where the road space reclamation is not desired by the community, who can propose to accept eg resident parking (and fees) if they absolutely need to "retain" that road space. The default needs to change from "no change" to "we will build this corridor, if you want to keep you car there, suggest how". Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing woeful baseline levels. I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent. Unspent budget should be rolled into innovating streets style packages until the civil works sector can catch up. Funding I support the council increasing rates further to fund essential infrastructure for cycling. I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225%. Other Issues I support the most proposed option of accelerated Investment for three waters infrastructure, but fear it won't be enough and suggest the council do the work to remove the unknowns from the accelerated investment proposal, so we can catch up properly. I support the council ownership of wastewater laterals, given the damage is almost always from council trees, but suggest that either stormwater laterals should be included, or a

pragmatic approach should be taken to ensure that where co-located that both can be renewed. I personally paid > \$10,000 recently to renew my laterals because the stormwater was broken, and it made little sense to do one and not the other. We need to ensure that ratepayer money (both directly and via council) is spent efficiently in this space. So much cost can be sucked up into 3 levels of sub-contracting, traffic management etc. I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects. The council should raise the debt limit, but should not consume 'underspend' in capital works elsewhere to build a building, rather that should just mean the debt it not drawn down for those projects until later. It really feels like the council is betting on slow delivery of the cycleways to fund the library, and we should not be trading them off against each other. I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. The new fees better match the commercial fees, and particularly address the major issue of parking on the city fringe being highly subsidised. That induced parking demand (by cheap fees) in turn makes it harder for that space to be seen as possible for cycling projects. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I support innovation in this space to find a way to provide a smoother surface for a cycle lane (primary position, taking the lane) without needing the build the whole road to the higher cost, also to encourage good cycling position (rather than door zone or weaving in parked cars). I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. The external funding model is just accounting tricks, it is still money paid from the rates bill. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital. Civic Square I don't support any of the options. I think the council should take its time, rebuild the central library with as much integrated council use as possible, use space in the renovated Town hall, City Arts Gallery and MFC, wait for the construction sector to calm down and then re-assess. Selling the building or ground lease now makes little sense, as does trying to keep the existing damaged building. This will avoid rates pressure and debt ceiling pressure.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)** not answered

**Q19. Do you support the proposed budget?** I somewhat support the proposed budget.

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?** not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

I'm concerned about the increase in fees for the children's garden at the botanic gardens. We need more school groups to use this space, not to make this a revenue centre for the council.

**Q17. Your comments on the big decisions (optional)**

I am disappointed but unsurprised to see no mention of skateboarding in this ten year plan. As a skateboarder who grew up and Wellington it truly feels like the council is against us and would ultimately like to stifle our activities. Skateboarding is an incredibly beneficial outlet for adults and young people alike, an outlet that requires incredible skill - which is why it has been recognised as an Olympic sport. I request that the Wellington city council also make this recognition by working with Kevin Francis to begin to understand how forgotten this community has become and start taking steps pump life back into it, by creating facilities that can be used by more than one group of people. We're not greedy, we just see the incredible facilities being built for skateboarders in other parts of the world and other parts of NZ. It's time Wellington got a slice of the fun.

Creating a 'Long-term/10-year plan' for the future of skateboarding in Wellington City. This is vital to ensure that mistakes from the past (poor design/construction) are not repeated. Future developments need to be well thought out with proper input and consultation with the broader skate community. Creating a central city skate park easily accessible by using public transport (and without the need for a car) by anyone living in all areas of the greater Wellington region. This can be achieved by upgrading Waitangi Park to cater to all levels of ability (beginner, intermediate and advanced) and types of skating (Park and Street courses), meeting current Olympic standards, and holding local, regional, national, and Olympic qualifying events. Reinstating a mini ramp back inside Kilbirnie Recreation Centre (at the least) until a better solution is found. There are no facilities or anywhere to go skateboarding during the Winter Months or when it is dark, wet, or windy. This is urgent and a top priority as Wellington is highly vulnerable to all the Elements for extended periods. This could easily be achieved by rearranging the current layout and moving 'Tinytown' (for which the ramps were removed) to another arrear inside. Furthermore, if the Council simply agreed to give us the small space required – the skate community could build the ramp themselves (The idea of removing the plastic floor should also be considered). A central city 'Skate Friendly Street Plaza' that provides a safe area for skaters to meet and skate together (and again which is easily accessible by using public transport by anyone living in all areas of the greater Wellington region. This is a vital ingredient for a healthy skate scene. All the great cities worldwide are well known for their skate communities — for example, Barcelona – MACBA. Putting a system in place to ensure opportunities to include 'skateboarding' in future infrastructure projects that could benefit the city are not missed. Achieving the goal of making Wellington city one of the best places in the world to be a skateboarder will require integrating small areas all around the city for street skating and ensuring the city is both accessible and inviting to move around in as a form of transport. This goal is achievable and does not have to be hugely costly. A great opportunity is staring us in the face with current future projects due to happen in the next ten years, including: A network of bike lanes which the Council currently want to spend \$120 million on over the next ten years. These need to stop being classed as 'Bike lanes'. Many other diverse user groups (skateboarders, long-boarders, roller-skaters, scooter, etc.) can benefit from these lanes by removing all patches of rough ground from designs. There is also no reason why they could not be move inviting, fun, and exciting by including pump-bumps and banks. Future redevelopment of public spaces over the next 10-years, including Frank Kitts Park, Te Aro Park, and The Civic Centre (to name a few), could also provide a skate-able area. This could be in the form of a perfect ledge, bench, set of stairs etc.

Cycleways

---

**Q17. Your comments on the big decisions (optional)**

I would like to see a stronger focus on creating more diverse communities in the suburbs. For instance, I would like my suburb, Island Bay, to provide more housing for people of different socio-economic backgrounds. We should encourage people of different ethnicities, ages and backgrounds to share the suburb rather than having them all segregated toward their own suburbs. I would like for young people, with not much money, to be able to move into Island Bay. But at the moment it is too expensive. Please consider greater housing densification as well as building state housing or council housing in Island Bay to make it a more diverse and affordable suburb. My young colleagues at work are not even looking at Island Bay as a place to live. They are only considering Upper Hutt, Wainuiomata and Kāpiti as viable options. As well as the strong support for public transport and active transport I would like to see greater pressure put on people to stop driving. For instance, I would like to remove carparks on roads that buses drive along, making space for more bus and cycle lanes.

---

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

---

**Q19. Do you support the proposed budget?**

Neutral.

---

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

I support increasing spend in the current budget.

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

I would like to see stronger user charges to support waste minimisation and elimination. I would also like to see greater use of user charges to support the use of fewer resources - for instance, charges for climate emitters and intensive water users. I would also like to see more of the cost of using public roads put on private car drivers - for instance, an end to the subsidy that allows cars to park 'for free' on streets that urgently need cycleways (e.g. Adelaide Road and Rintoul St).

---

Cycleways

---

**Q17. Your comments on the big decisions (optional)**

It is vital that we have a fully connected cycle network. A potpourri of disconnected cycleways with dangerous stretches of road between means that the investment in these cycleways never achieves its potential. It should be acknowledged that much of the investment in the Great Harbour Way is not actually spent on the cycleway element, much of the cost is related to road widening and coastal defences. It is vital (and relatively cheap) that the Cycling Minor Works Budget is doubled to \$2 million per year. All cycling funding included in the LTP must be ring fenced so that it is not able to be reallocated or spent on other things if left unspent. Cycleways are a very good investment when well planned and connected. The single best thing the council could do is to remove curb side parking and instead buy vacant sections to provide paid parking facilities. This would considerably improve the safety of cycling and also facilitate the development of bus priority lanes. Most arterial routes are not too narrow but are instead crowded by parked cars that reduce visibility and disrupt traffic flow as cars move into and out of car parks.

I would like the council to follow up on the consultation process with the skateboarding community, with funding and spaces and upgrades to Wellington skateboard facilities. As someone who has been riding for a number of years, the current areas are lacking, the city is in need of more locations and variety of spaces to pursue the recreation and physical playtime that the skateboard offers. I would be more than happy to comment further, if interested in how this could be achieved economically on smaller scale, local features. by using skateboard led design and use of specialist park building contractors. As opposed architects and building contractors, that do not understand the subtleties of what we do. Thank you for reading. My apologies if this was the wrong comment section. [REDACTED]

Cycleways

**Q17. Your comments on the big decisions (optional)**

CycleWays: I live and work in Wellington Central, I do not own a car. I don't own and use an electric skateboard and for everything else I walk. At the moment I have no network on which to safely get around. If I'm on the footpath I have to slowly navigate pedestrians to not run into anyway or safely injure them. I have to be constantly on the look out for cars driving out of driveways so as to not get hit by them, and I'm continually slowed down when crossing the road by transitioning from the foot path to the road and back to the footpath again. I also have to watch my speed due the surface of the foot path not being smooth and often times have major pavement just disappear. If I'm on the road, I can go quicker, but I'm not the same speed as a car. So the cars will queue up behind me, which is both intimidating and dangerous ( What happens if I need to stop in a hurry). I have to be on the look out for people getting out of parked cars. As such I only use the road when I know the traffic volume is low. And due to the space cars give me when overtaken I can not swerve to avoid obstacles ( eg. Man hole covers where the surface is not smooth, holes in the road, General debris) that pose a very real threat to me injuring myself . I also spend close to 100% of my time in the city, yet like 90% of public space is dedicated to cars, moving and storing ( parking ) them . And a large percentage of these people will be driving in from out of town ( the Hutt etc ), when public transport exists for these options. Why is there such a huge inequity of have the public space allocated. Finally without a full cycle network we push people into using significantly worse form of transport. If we don't build a cycle network that is safe enough for mothers and their young children and is only appropriate for confident riders, then how can we expect anyone but not confident riders to use them. If a cycle lane design is not safe for a family going for a ride with their young children it is not a true cycle lane and should be sent back to the drawing board until it is. This means eliminating interactions with cars, including drivers cutting into lanes, and car parking in the cycle lanes. And if the Cycle network does not allow a person to safely get where they need to go along safe cycle lanes, then people will drive. A network should not just be about getting commuters to work. People are more than their jobs and they go to more places than their office. This means the cycle network needs to let people get to the grocery stores, parents can drop kids off at school and daycare, unaccompanied kids cycling to the park safely . If we don't build a cycle network that EVERYONE feels safe using, then we will just see more people driving on the roads for lack of better options. This leads to more traffic, more pollution, more injuries and deaths, and way more roading expenditure. If we do build this cycle network we will see a boom in cyclists. This is good for the city, the environment, the people, the business and even those that still choose to drive. Every driver that chooses to cycle is one less car on the road. Which will do way more to reduce traffic than any road building will do. The air will be cleaner due to less car spewing toxic gas. The streets will be quieter and safer. Businesses can attract customers cycling cause they never have to worry about stopping and find a park. And without the upkeep costs of maintaining and running a car ( ie petrol they will have more money to spend. Plus it will work to drastically reduce one of the biggest contributors to global warming. Why would you choose to half ass this? This is an investment in our future, this an investment in our city and the quality of life for those that live and work in it. Do it once and do it properly. We have tried a city that is full of cars, it hasn't worked. Now lets make the city better with a fully funded safe cycle network.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

Te Atakura (climate change)

---

Q17. Your comments on the big decisions (optional)

Faster rates rises are clearly needed to fund underinvestments and overdue climate action. The climate emergency should guide investment, which also supports max investment in cycleways, public transportation, sludge (and waste) reduction and increases in parking charges and so on.

- Q6. **If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer?** not answered
- Q7. **Oral forum time** not answered
- Q8. **Oral hearing time** not answered
- Q9. **Which of these options do you prefer? (3 waters decision)** not answered
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** not answered
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 1. Finish started projects (\$29m capital investment, lower debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 2. Medium investment with savings (\$25.4m investment, lower rates and debt).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** Option 1. Demolish and site developed through long-term lease (Council's preferred option).
- Q14. **Which of these options do you prefer? (Central Library decision)** Option 1. Strengthen now by temporarily exceeding debt limit (Council's preferred option, additional 0.79% to rates).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** not answered

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Te Ngākau funding for future work

**Q17. Your comments on the big decisions (optional)**

Te Ngakau Civic Square has been struggling since the Town Hall closed. It has impacted negatively on our arts community as well as the wider community. the music centre vision has been delayed and put at risk. This is a project which will bring in \$30 million external funding and enliven Civic Square in a most exciting and dynamic way whihc will in turn bring more people and business back to the area. It will really put Wellington back as the arts capital of NZ. Definite and supportive decisions have to be made NOW so NZSO and NZSM can fully realise their investment in fitting out Wellington Town hall. The other components need to open concurrently with the re-opening of WTH IN 2024.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

I somewhat support the proposed budget.

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

not answered

Cycleways  
Central Library

**Q17. Your comments on the big decisions (optional)**

Make Wellington one of the best cities in the world to be a skateboarder. Top Five Short-term Goals and Priorities 1. Creating a 'Long-term/10-year plan' for the future of skateboarding in Wellington City. This is vital to ensure that mistakes from the past (poor design/construction) are not repeated. Future developments need to be well thought out with proper input and consultation with the broader skate community. 2. Creating a central city skate park easily accessible by using public transport (and without the need for a car) by anyone living in all areas of the greater Wellington region. This can be achieved by upgrading Waitangi Park to cater to all levels of ability (beginner, intermediate and advanced) and types of skating (Park and Street courses), meeting current Olympic standards, and holding local, regional, national, and Olympic qualifying events. 3. Reinstating a mini ramp back inside Kilbirnie Recreation Centre (at the least) until a better solution is found. There are no facilities or anywhere to go skateboarding during the Winter Months or when it is dark, wet, or windy. This is urgent and a top priority as Wellington is highly vulnerable to all the Elements for extended periods. This could easily be achieved by rearranging the current layout and moving 'Tinytown' (for which the ramps were removed) to another rearer inside. Furthermore, if the Council simply agreed to give us the small space required – the skate community could build the ramp themselves (The idea of removing the plastic floor should also be considered). 4. A central city 'Skate Friendly Street Plaza' that provides a safe area for skaters to meet and skate together (and again which is easily accessible by using public transport by anyone living in all areas of the greater Wellington region. This is a vital ingredient for a healthy skate scene. All the great cities worldwide are well known for their skate communities — for example, Barcelona – MACBA. 5. Putting a system in place to ensure opportunities to include 'skateboarding' in future infrastructure projects that could benefit the city are not missed. Achieving the goal of making Wellington city one of the best places in the world to be a skateboarder will require integrating small areas all around the city for street skating and ensuring the city is both accessible and inviting to move around in as a form of transport. This goal is achievable and does not have to be hugely costly. A great opportunity is staring us in the face with current future projects due to happen in the next ten years, including: 5.1. A network of bike lanes which the Council currently want to spend \$120 million on over the next ten years. These need to stop being classed as 'Bike lanes'. Many other diverse user groups (skateboarders, long-boarders, roller-skaters, scooter, etc.) can benefit from these lanes by removing all patches of rough ground from designs. There is also no reason why they could not be move inviting, fun, and exciting by including pump-bumps and banks. 5.2. Future redevelopment of public spaces over the next 10-years, including Frank Kitts Park, Te Aro Park, and The Civic Centre (to name a few), could also provide a skate-able area. This could be in the form of a perfect ledge, bench, set of stairs etc. WCC needs to act immediately to do something for skateboarders. Many skateboarders who live in central Wellington are using the Pukeahu Park (National War Memorial) for skateboarding, given the lack of purpose-built facilities for skateboarding in central Wellington. Waitangi Skate Park is NOT fit for purpose and cannot accommodate the large numbers of people who participate in skateboarding. Scooterers and skateboarders have different needs, and the park in it's current state is better suited to the former. Chronic underinvestment in skate facilities by WCC is evident when compared to the neighboring cities of Lower Hutt and Upper Hutt, where there are several new facilities, plus older facilities, which have been purpose-built for skateboarders by the Hutt City Council. Wellington's skateboarders desperately need WCC to take action, or risk creating conflict between the large numbers of skateboarders who are now forced to use the public space at Pukeahu Park, and other residents who take exception to their use of this public space.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

Q19. Do you support the proposed budget?

Neutral.

---

Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?

---

I support keeping the budget the same but with some changes.

---

Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?

Do something good for skateboarders!

Central Library

---

Q17. Your comments on the big decisions (optional)

The library area & civic square would be an amazing plaza for lunch seekers and skateboarders alike, and should be utilised. Skateboarding must be recognised in Wellington and 'decriminalised' (for lack of better word) in places such as the war memorial and other CBD public areas. The plaza in Lower Hutt is a good example.

Investment in three waters infrastructure  
Cycleways  
Central Library  
Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Three Waters: I support accelerated investment without the \$432M for growth. We need to provide an affordable city for the existing residents before we spend hundreds of millions for growth. Cycleways: I believe the residents of Wellington should be able to safely about their city using a bicycle as a means of transport. I don't understand how the Council can continue to delay projects that provide for public safety. Ignore the health benefits of people getting out of cars and out on their bikes. Ignore the climate benefits and that the Council has declared a climate emergency. But I don't see how the safety issue can be ignored. As the Waka Kotahi audit is reported to include "Cyclists and pedestrian injures and deaths in crashes in Wellington were over-represented based on the number of active users and the council had not taken sufficient action to fix the problem". When the Council is faced with other public safety issues they take action. I propose the time for delays and reasons for lack of progress is over. Central Library: If the funding is not available for the preferred choice then the options should be revisited and a solution that fits within the available funding considered Sludge: Option 4 could be a dangerous precedent for funding projects with additional non-rates fees. I would support Option 4 if the cost was based on metered water use. This would encourage conservation and reduce the need for future large scale and cost infrastructure projects. Overall: This statement on Decision 6 puts all the decisions made through the LTP at risk: "This breach will be mitigated by any capital underspending being used for the library project". One of the largest and most significant projects relying on funding allocated to other projects. There will be tremendous pressure on council staff to drag the chain on projects to create "underspend"

Investment in three waters infrastructure  
Cycleways  
Central Library

**Q17. Your comments on the big decisions (optional)**

Three waters - I would like to see a compulsory building cross-connection check where there is an incomplete inspection record for a property. Detect and remedy cross-connections. Three waters - I would like to see a standard for stormwater treatment in brownfield/greenfields developments - either swale soakage or a treatment facility provided that treats piped road/stormwater discharges before they enter natural watercourses or the harbour. Cycleways - Research shows that to support people cycling it is necessary to provide a fully connected network that allows people to cycle to wherever their destination is safely. Only one option proposed in the LTP has the potential to deliver this and that is Option 4: Accelerated Full Programme. I support ring-fencing the budget too - not robbing from it to fund other programmes or shortfalls. Cycleways - I favour planning and investment in a Northern (Paparangi/Newlands/J'ville) network, and a Karori-City and Karori -Johnsonville network. Providing for safe journeys for vulnerable road users such as children travelling to and from school, pools and libraries should be the highest priority. Churton Park and other northern suburbs currently have the highest rates of car dependency in Wellington City. Karori is also a high car-dependency commuter suburb. Cycleways - I wish Council to pressure LGWM to lift their performance and deliver for the city/region. Their performance is abysmal and a total sad disappointment. Cycleways -I support a increase in the small-improvements (minor improvements) budget for cycle-facilities. It is not proposed to be increased under Options 3 or 4 - whereas I consider it should be. Small suburban and city improvements will aid cycles/uptake. Central Library - The pop-up and temporary library sites are actually very good, combined with a service centre in Manners St I consider this a service level improvement, accepted that some holdings have to be retrieved with a consequent borrowing delay. I support option 2 - a deferral in library strengthening. Te Ngākau Civic Precinct, Council Office Buildings - I prefer a service-centre in the restrengthened library building - and that the Council Administration site shift from Civic Square - the two admin buildings in the square should be demolished and the land be used for mixed use/commercial/retail/housing redevelopment. Use the UDA power available to you or partner and be innovative in breathing 24/7 life into this locality. Dead at night Council admin buildings are not the way to make Te Ngākau Civic Precinct, alive and vibrant.

Cycleways  
Central Library  
Te Ngākau funding for future work

**Q17. Your comments on the big decisions (optional)**

In terms of cycleways Wellington needs to prioritise well separated cycleways ahead of on street parking. I fail to understand how long it takes to get cycle lanes in place, compared to cities like Paris where cycle lanes were implemented. Streets need to be made more cycle friendly by removing pinch points, particularly pedestrian islands, if pedestrians do need to cross then a zebra crossing should be used. Skateparks have been in decline in Wellington since I moved here 10 years ago. Additionally the facilities have been poorly designed and built by contractors with no expertise in the Skating domain. There is often not a good mix of levels supported in the skateparks, for instance Waitangi park could do with a smaller, more entry level bowl for instance. Hutt Council has rebuilt Maidstone skatepark and it's a good example of a mixed skills solution. Auckland and Christchurch have both seen significant development of skating facilities over the last few years - with new builds like Victoria in Auckland and Washington in Christchurch - to name a few of the many new builds. Additionally Wellington could do with an indoor solution because of the weather. A warehouse would be appropriate, but there are perhaps other avenues to be explored, for example the space under / near the stadium concourse. Both myself and tow of my children regularly use Wellington city skateparks, along with many others! There is so much potential, but some investment is required for a sector that has been ignored for a significant period. I support the WSA and the objectives stated for the long term plan for skateboarding in Wellington: === Top Five Short-term Goals and Priorities === - Creating a 'Long-term/10-year plan' for the future of skateboarding in Wellington City. This is vital to ensure that mistakes from the past (poor design/construction) are not repeated. Future developments need to be well thought out with proper input and consultation with the broader skate community. - Creating a central city skate park easily accessible by using public transport (and without the need for a car) by anyone living in all areas of the greater Wellington region. This can be achieved by upgrading Waitangi Park to cater to all levels of ability (beginner, intermediate and advanced) and types of skating (Park and Street courses), meeting current Olympic standards, and holding local, regional, national, and Olympic qualifying events. - Reinstating a mini ramp back inside Kilbirnie Recreation Centre (at the least) until a better solution is found. There are no facilities or anywhere to go skateboarding during the Winter Months or when it is dark, wet, or windy. This is urgent and a top priority as Wellington is highly vulnerable to all the Elements for extended periods. This could easily be achieved by rearranging the current layout and moving 'TINYTOWN' (for which the ramps were removed) to another area inside. Furthermore, if the Council simply agreed to give us the small space required – the skate community could build the ramp themselves (The idea of removing the plastic floor should also be considered). - A central city 'Skate Friendly Street Plaza' that provides a safe area for skaters to meet and skate together (and again which is easily accessible by using public transport by anyone living in all areas of the greater Wellington region. This is a vital ingredient for a healthy skate scene. All the great cities worldwide are well known for their skate communities — for example, Barcelona – MACBA. - Putting a system in place to ensure opportunities to include 'skateboarding' in future infrastructure projects that could benefit the city are not missed. Achieving the goal of making Wellington city one of the best places in the world to be a skateboarder will require integrating small areas all around the city for street skating and ensuring the city is both accessible and inviting to move around in as a form of transport. This goal is achievable and does not have to be hugely costly. A great opportunity is staring us in the face with current future projects due to happen in the next ten years, including: - A network of bike lanes which the Council currently want to spend \$120 million on over the next ten years. These need to stop being classed as 'Bike lanes'. Many other diverse user groups (skateboarders, long-boarders, roller-skaters, scooter, etc.) can benefit from these lanes by removing all patches of rough ground from designs. There is also no reason why they could not be more inviting, fun, and exciting by including pump-bumps and banks. - Future redevelopment of public spaces over the next 10-years, including Frank Kitts Park, Te Aro Park, and The Civic Centre (to name a few), could also provide a skate-able area. This could be in the form of a perfect ledge, bench, set of stairs etc.

Q19. **Do you support the proposed budget?** Neutral.

---

Q20. **You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?** I support decreasing spend in the current budget.

---

Q21. **Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Money is currently cheap - I would support temporarily increased levels of debt.

---

not answered

---

Q21. **Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Water meters need to be brought into manage the scarce resources better. Kapiti saved millions. Wgn rates are cheaper than other major cities and a lack of investment in basics is now embarrassing with poo and water fountains. Get wgn moving is a joke and those involved need to learn to play like professionals not like badly behaved kids and get on with the work.

Investment in three waters infrastructure  
Sludge and waste minimisation

---

**Q17. Your comments on the big decisions (optional)**

The council has given Wellington good reason to have zero faith in their capability to manage wastewater infrastructure investment. I am not able to choose one of the given options while having no belief that these are the right options. Additionally, the proposal to create centralised water authorities will have an impact but I can't see how the questionnaire reflects this.

---

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

---

**Q19. Do you support the proposed budget?**

I somewhat support the proposed budget.

not answered

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Consultation will not fix the bigger problem of council's lack of capability to plan and run procurement for its projects to succeed. You need to make sure the options you put forth in consultation are actually the right options to be considering, including that they are feasible to deliver. LGWM is a big example of a lot of consultation but huge failures because council did not deliver on its promises.

Cycleways

Te Ngākau funding for future work

**Q17. Your comments on the big decisions (optional)**

For too long the council have ignored skaters views in wellington, and are now starting to quietly push skaters out of the community, but we are staying. All we want is improved skating facilities like a rebuild and redesign of the waitingi skatepark, and more acceptance of skaters in public areas like Te Ngakau and the war memorial. I think that funding should stay the same for cycleways, but yes more should be built, but at least minimal amount of investment in skateboarding by the council would be amazing and helpful in improving skating facilities. If the council doesn't want to spend anymore money in repairing and fixing public areas from skaters, more skater allowed facilities need to be built in the near future. Thanks, Felix.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

I somewhat oppose the proposed budget.

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

I support keeping the budget the same but with some changes.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Please improve skating facilities

<p>No. Good to see future decisions such as the future of the three waters being considered as part of the document.</p>	

Thank you for the opportunity to comment on your Long Term Plan (LTP).

Overall, we (WREMO) are very supportive of the content of your LTP. In particular, we are very supportive of WCC's focus on the following aspects:

- Mitigating and adapting to the impacts of climate change;
- Investing in infrastructure (3 waters, and public transport) to make it more resilient (including replacing infrastructure with better quality materials);
- Avoiding high risk hazard areas and planning to build a resilient city in urban planning;
- Improving the resilience of key emergency routes;
- Connecting communities;
- Working with mana whenua; and
- Working to build trust and confidence in governance, in particular internal/external communications and decision making.

On the subject of emergency management, we are also supportive of the following:

- Investing in an above ground water network for use in emergencies;
- Council staff being prepared to respond to emergency events through response plans and regular training;
- Planning for and delivering a city-wide welfare response for people during a civil defence emergency;
- Engaging with communities to ensure the city is prepared for earthquakes and other natural disasters; and
- Placing an emphasis on lessons learned from events and continuous improvement.

While we note your listing of WREMO as an activity, we would have liked to see more of an emphasis on being able to respond to all types of emergencies (ie not just natural disasters eg the Tapu Te Ranga Marae fire) and working with emergency management partners (including other councils) to help build regional emergency management capability and capacity.

We would have also liked to see a stronger emphasis on improving the trained state of council staff (ie not just attending regular training) but staff progressing along the development pathway from foundation to advanced level.

We would have also liked to have seen a strong emphasis being placed on legislation (the CDEM Act) and the 4R's framework of comprehensive emergency management (reduction, readiness, response and recovery) as outlined in the National Disaster Resilience Strategy and CDEM Group Plan as a lens through which to view the subject of emergency management.

None of these

---

Q17. Your comments on the big decisions (optional)

If civic square is to be redone make it skate friendly and a safe environment

---

Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)

not answered

---

Q19. Do you support the proposed budget?

Don't know.

---

Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?

not answered

---

Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?

Skateboarding in Wellington has always been looked down on and excluded from many other sports. Most city's have many places where skateboarding is allowed and Wellington does not have many places at all. Wellington needs more places where people are allowed to skate.

Cycleways  
Central Library

---

**Q17. Your comments on the big decisions (optional)**

Stop making cycleways! too few cyclists use them in hilly, windy Wellington. A dreadful decision was made to have cycleways to the left of parked cars, these throw the traffic closer to the median line which have no room to avoid on-coming traffic that has crossed the median line. Demolish the central library, it had no redeeming features being too industrial and factory like, though I do like the Nikau Palms, even though too many were manufactured for the site, another example of the council overspending the ratepayers money! Keep the pop-up library in Brandon Street, it works well!!!

---

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

I somewhat support the proposed budget.

---

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Stick to the basics sewage and the like and let commerce build a Chinese garden in the Botanic Gardens and keep Frank Kitts Park as it is. Wellington is a perfect size as it is don't keep trying to grow in size.

- Q14. **Which of these options do you prefer? (Central Library decision)** Don't know.
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 4. Sludge minimisation through alternate funding (Council's preferred option, \$147m to \$208m capital investment funded through a levy, no additional rates increase)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

None of these

**Q17. Your comments on the big decisions (optional)**

I wish to comment on proposed fees increases for the following: 5.1.1. Swimming Pools Continuing incremental raises to swimming pool access and usage fees (as outlined in Proposed Fees and Charges 2021-2031 Long-term Plan: 5.1.1 Swimming Pools) will decrease accessibility to swimming pool facilities that should be accessible to all. Fees for swimming should be reduced significantly from present to remove barriers to access, rather than increased. The increase in attendance to the facilities due to reduced fees would temper experienced inequity and social disparity (as outlined in the WCC Social Wellbeing Framework). Swimming pool assets should not be subject to inflation of asset-value when they provide wellbeing services to the community. 7.2.1. Parking Extensive raises to coupon parking and trades parking are proposed (in Proposed Fees and Charges 2021-2031 Long-term Plan: 7.2.1 Parking) with no justification. The recent increase from \$7.50 to \$12.00 was also unjustified. Many socially disadvantaged workers and students in Wellington necessarily commute to work in private vehicles and rely on coupon parks in congested areas with limited alternatives for parking, e.g., around Victoria University of Wellington. Punitive charges are all very well when there are viable alternatives; but for most people commuting in private vehicles, it is the only option. In addition, E-vehicles will replace the current private vehicle fleet in time, so the demand for commuter parking will not decrease. It would behoove the council to consider within its planning, better parking solutions for private vehicles, instead of expecting commuters to use grossly inefficient public transport, or to get on a bike, when it is not viable for them to do so and is unlikely for it to be viable for them to do so in the next 10 years. 5.1.7. Marinas Raises to marina rates are proposed with no mention of marinas in the plan. Much needed upgrades to marina infrastructure for H&S compliance, climate adaptation, and access to the natural environment are currently required. Existing marina infrastructure has been consistently underinvested in and is already overpriced for the extant state of jetty infrastructure. If marina fees are to be increased (as outlined in Proposed Fees and Charges 2021-2031 Long-term Plan: 5.1.7 Marinas), I require the plan to include marina maintenance for the jetty infrastructure, boat ramps, seawalls and groins. Without a commitment to timely maintenance and upgrades in maritime infrastructure, the Council cannot justify the proposed marina fee increases for Evans Bay and Clyde Quay. Wellington is a harbour city on Te Whanganui a Tāra. Marine infrastructure and coastal accessibility for marine vehicles (waka, yachts, ships, small craft, etc.) is consistently under-emphasized or omitted in planning. Maintaining jetties and related marine infrastructure should be no different to the upkeep required for green spaces, parks, sports fields, etc.; therefore, marine infrastructure should be included in planning in the same way land-based recreational spaces are included. This plan lacks specific forethought for marine infrastructure, safe mooring and coastal accessibility, and, not least, climate adaptation solutions for the city's maritime culture and infrastructure. Wellingtonians actively use our harbour and coastal waters for waka-ama, dragon-boating, sailing, surfing, rowing, kayaking, swimming, fishing, and diving. The waters of our harbour and coastal areas are arguably just as valued as "green space" when Wellingtonians think of our "natural environment", which amply justifies their maintenance. 6.2.1 Building control and facilitation Given the issues with housing, it would be prudent for the council to run an equity lens over the proposed increases to building control and facilitation (as outlined in Proposed Fees and Charges 2021-2031 Long-term Plan: 6.2.1 Building control and facilitation), so to ensure that the proposed increases do not further slow-down new builds, renovations, or subdivisions that aim to increase quality housing options by imposing barriers to socially-beneficial development. In particular, for building proposals that will provide rental accommodation for severely housing deprived persons, single women (a growing demographic), and elderly social housing tenants. The Council needs to have a moral conscience for the proposed fees, even if this means introducing a social conscience lens to all build proposals and having a sliding-scale for fees based on key social benefit metrics.

Cycleways

---

**Q17. Your comments on the big decisions (optional)**

WCC needs to prioritise the continued development of a connected cycle network that provides a safe, separated way for people on bikes to get around ALL of Wellington. The council states that it wants to be fossil free but continues to pander to businesses who falsely believe that using public land for protected cycleways instead of for private storage of vehicles (often called parking) detracts from their businesses. The council should be prioritising the safety of vulnerable road users over alleged monetary losses. Research shows that rather than losing custom businesses next to cycleways get MORE customers. WCC should explore ways to present this research to business owners or explain that they make evidence-based decisions rather than listening to the voices of people who often have more say and sway than vulnerable Road users.

Investment in three waters infrastructure  
Cycleways  
Te Ngākau funding for future work

**Q17. Your comments on the big decisions (optional)**

I would like to see the 3 waters work include a significant fund to move away from reliance on pipes, kerb and channel, etc and full implementation of the WSUD policy. Some years ago you wasted a large amount of money to add kerb and channel to San Sebastian St, instead of allowing spring water that comes up there to go into the adjacent green space. We need to get past this fixation with engineering control, and start living with natural systems. For example in Hutt Road, why did you not use narrow rainwater gardens to separate cyclists and pedestrians, Given that it is presumably a reclamation, it may not even have been necessary to have any fancy infrastructure, and simply allow the rain to soak into the ground, as it does in the adjacent green areas. All new builds and upgrades should include water harvesting. Pervious surfaces should be compulsory for things like carparks. I support funding of cycleways, but would like to see a significant fund for providing pedestrian infrastructure. I put forward a series of greenways proposals as part of LGWM, and then as part of the Thorndon Quay process that was unnecessarily stopped, and still nothing has been done to take the existing incomplete network of walking routes and make them into continuous and visible greenways. For example, all the Thorndon Quay to Kelburn one needs is a few assisted road crossings (zebra crossings or even just central islands) and some good signage. There also needs to be a ring-fenced budget for pedestrian fixes - improving the way pedestrians are treated at controlled intersections, improving wayfinding, fixing lighting on shortcuts, improving footpaths, etc. And a ring-fenced budget for pedestrian amenity - seats, toilets, supporting community restoration that is for walker amenity, artworks, etc. For Civic Square to become the community centre of the city that it should be, the buildings need to be owned by the public and used for public or semi-public purposes - school of music, theatres, public administration, galleries, etc. Not private exclusive spaces. It also needs to become more permeable - all hours connections to all the surrounding streets. The council also needs to be able to control what the buildings are used for to ensure that there is all hours activity to make the square a safe place at night and in the weekends. In terms of heritage/amenity value, I prefer the other two buildings to the library building, so I'm not sure why you are so keen to retain the library building and demolish these ones. Demolition is also generally not very carbon/environment friendly compared to re-use. I would have expected some detail in the consultation document on these, not just the options with little information. In terms of cost, if a developer can make a profit developing them, I can't see why the council (which can borrow at a lower rate) can't manage to retain ownership. Design briefs are all very well, but not as secure as being the owner. I'm not sure why you haven't asked me for my comments on the fees question. It's bad enough that you aren't providing a clear place for me to comment on the other budget items. Although I'm going to regardless. In terms of fees, why are you providing a discount to recidivist commuter parkers who clutter up my street. They should be punished not rewarded for turning up every day. The construction guys next door need the space for their vehicles. Tell the commuters to use PT or walk. You keep creating these nice sounding policies and then fail to follow through with TDM measures. In terms of funding of other things, that you haven't bothered to ask about. You need to increase the funds available for park rangers who support community groups. You have a ridiculously tiny cohort to support a large number of groups. It is now very difficult for me to get the services I need to do my projects. And please stop paying for roadside "vegetation management" that is just butchering plants, not helping pedestrians, making streets look like motorways, and annoying volunteers. Put that money into park rangers and actually communicate with your groups instead of constantly undoing their efforts. Last year I had to do another of those walk-throughs with poor Dean and the new Fulton Hogan contractors, pointing out the mess their workers had made. I raise this every year, and every year you make noises and do nothing. Transfer all the control of vegetation to the park rangers, employ some more, and get serious about transforming the ecology of the city. Predator free is all very well, but vegetation matters more for most species. And put some more money into enforcement of parking and other intrusions onto footpaths and into green spaces. And please fine people who blatantly park illegally, don't just give them a warning. I shouldn't have to report the same car on the same bit of footpath day after day in the hopes that at some point your staff will actually do something useful that stops the behaviour.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)** not answered

**Q19. Do you support the proposed budget?** I somewhat oppose the proposed budget.

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?** I support increasing spend in the current budget.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

I put it in the earlier section as you didn't say there would be a later place to put it. Rates are a small part of my annual spend, and deliver a lot of benefits. I'm sick of listening to people complain that the council doesn't do things for them, and then complain about rates. I expect you to be efficient in using my money, which mostly means I'd like you to sort out your internal silo system and pull a lot of work back from contractors to in-house expert staff. But I want you to provide the services - water, waste, pedestrian facilities, public transport facilities, libraries, green spaces, etc. Deal with the people who really can't afford rates by providing rate relief. Not by cutting services just because there are still people who believe that the private sector is more efficient (despite all the evidence to the contrary).

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)

**Q17. Your comments on the big decisions (optional)**

Investment in three waters I submit that Council support option 3 - accelerated investment, for the following reasons: Wellington city has under invested in its pipe network in the past, and now we are facing a critical situation. If significant progress is not made, the city will be forced to continue to spend on emergency works, meaning that in some cases work will need to be done twice – both as immediate repairs, and then later as part of increasing capacity and/or modernising of the affected infrastructure. Wellington City is about to enter a period of growth, with the passage of the spatial plan. Indicative information provided by Wellington Water shows that a majority of the suburbs for which growth in density is forecast, require improvements in capacity and quality of their three waters infrastructure to cope with this. It is essential that this work be done in tandem with growth in those areas. Climate change and sea level rise is accelerating risks to existing infrastructure – further impetus for the need for additional investment. I submit that with adoption of option three, the city council explore with ratepayers the full range of alternative funding mechanisms, including catchment levies, targeted rates, a higher debt ceiling, and volumetric charging for water through a metering system. I was disappointed to see that the business case for water metering was not included with this long-term plan. Whilst I understand further work is needed before a business case can be presented to ratepayers, this work needs to be undertaken as a matter of urgency. It is essential that Wellingtonians improve the conservation of water, which is currently very poor, and that people are very clear how much water they are using. Some mechanism to enable Council to consider a business case for mandatory water metering sooner than the next long-term plan should be considered.

Investment in cycleways I submit that Council adopt option four: accelerated full investment program for cycleways for the following reasons: The lion's share of Wellington City's carbon emissions comes from the transport sector, and the council has committed itself to an ambitious carbon reduction target which will require a real transformation in residents' behaviour. Wellington is a space constrained city, and congestion will continue to get worse, if the number of vehicles using the narrow roadways we have is not reduced. Cycles use vastly less road space than vehicles: the more people cycling or using scooters, the more road space is freed up for those who genuinely require a vehicle, for example tradespeople. Council's own information shows that a majority of private vehicle trips within the city are short trips, carrying 1.2 people or less: trips of a nature that could be undertaken using active transport. Council's own information further shows that many people would cycle more often if safe cycling infrastructure to support that was in place. My daughters are in this category: both of them enjoy cycling, but neither of them feel safe on a bicycle around Wellington. For example, they like the Hutt Road cycleway, but getting to that cycleway down Ngaio Gorge without a separated safe cycle track makes them nervous, and then having to leave the cycleway to travel past the angle parking on Thorndon Quay puts them off. A comprehensive and connected cycleway network is important, and at an average of \$3 million a km compared to an average of \$30 million a km for new roading, it is surely worth it (and this figure doesn't include the significant health and local economic benefits that accrue from cycling) I submit that Council double the amount allocated for minor cycleway works, from \$1 million to \$2 million. I have been frustrated on a number of occasions recently, by the lack of bicycle parking, including outside Wellington City Council's own offices on the terrace, and in the areas outside of major government departments and businesses throughout town. Additional and secure options for visitor cycle parking around these areas is greatly needed, and having a minor works fund for this type of thing, plus other small improvements, could make a big positive difference. I submit that Council create a new fund to support rapid implementation cycling and safer streets projects, for example creation of play streets, addition of street furniture and parklets and so forth, similar to the Innovating Streets fund run by NZTA: changes are still taking far too long. I submit that Council change the priority afforded cycle improvements around Newlands schools, which has been downgraded. It is essential that investment in safe cycling and active transport infrastructure be prioritised around schools: if young people get into the habit of using active transport modes when they are young, the transition required across our

city to these modes in the coming decades will be a lot easier. There are also well proven public health and mental well-being benefits to this. I submit that council make good on the promises it made for Island Bay regarding its cycleway, and part and parcel of this, institute the cycle improvements recommended by the community advisory group convened in 2017 on the Island Bay - Newtown cycleway. The improvements that group recommended were reached by consensus, including local businesses, from a group who had spent considerable time hearing and assessing the views of many experts. Their recommendations should have been given the respect they deserved and found their way into delivery of safe cycling infrastructure as part of 'joining up' Island Bay, and improving things for Newtown residents. I submit that Council create a new category of fund to support seawall and resilience projects, so that the cycleway budget does not end up subsidising these expensive projects. Such resilience projects, essential as part of our climate change adaptation response, have other benefits and this should be recognised with them having their own fund. It is not acceptable that such a large chunk of the cycle fund be taken up on the expense of work required to improve the seawall's as part of the great harbour way initiative. This initiative has multiple benefits beyond cycling, and therefore its funding sources should reflect this. Sewage Sludge I submit that council implement the option for improvements to Moa Point to see sludge removed all together from the landfill: the landfill resource should not be wasted on this material, nor should energy be being wasted on its transport to the landfill from the Moa Point plant. If the alternative funding model isn't accepted, I would support the option for ratepayers to fund this, even if this means we have to raise the debt ceiling, and/or pay more rates. Sorting out waste water has to be a priority for council.

---

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)** not answered

---

**Q19. Do you support the proposed budget?** I strongly support the proposed budget.

---

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?** not answered

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

My first additional message is that with all that the council is facing, it would be good for council to be looking at all funding options, and having discussions with residents about these: I personally do not believe our rates are too high compared with many other places - we are a well off population on the whole, and council can adopt policies to look after lower income families, as it does already with the schemes it has to cater for this part of our population. My second additional message is that in making my comment supporting the demolishing of the civic buildings and the land use for long term lease (Option 1), that council look to do this for a mixed use development, including with the music centre option, the opportunity for a developer to include both social and higher end housing, as well as office space and commercial areas so that this brings 'life' into civic square: it is not the best place to be at night: having a mixed use development including the music centre could transform this area into a nice space, day and night. Ensure, in any design, that the potential for basement and/or ground level inundation is 'built in' - some water sensitive design as part of a rejuvenated square around these new buildings perhaps?

- Q1. **Full name:** David Laing
- Q2. **Phone number:** [Redacted]
- Q3. **Are you making this submission as an individual or on behalf of an organisation?** Individual
- Q4. **What organisation are you submitting on behalf of?** not answered
- Q5. **Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?** No
- Q6. **If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer?** not answered
- Q7. **Oral forum time** not answered
- Q8. **Oral hearing time** not answered
- Q9. **Which of these options do you prefer? (3 waters decision)** Option 2. Enhanced investment (\$2.4bn - the Council's preferred option).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** Option 2. Take ownership (Council's preferred option, \$32m investment).
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** Option 2. Proceed with base build proposal for public purposes (higher debt and rates)
- Q14. **Which of these options do you prefer? (Central Library decision)** Option3. Strengthen now by increasing rates further (additional 1.79% rates increase).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 4. Sludge minimisation through alternate funding (Council's preferred option, \$147m to \$208m capital investment funded through a levy, no additional rates increase)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Cycleways

---

**Q17. Your comments on the big decisions (optional)**

Research shows that to support people cycling it is necessary to provide a fully connected network that allows people to cycle to wherever their destination is safely. We are in the middle of a climate emergency, and the Council has a duty of care to citizens to provide safe alternatives to private vehicle usage. In particular, the Council should focus on reducing the usage of fossil-fuel driven vehicles, and focus on sustainable forms, such as cycling, which provides other public health benefits and outcomes. It is no longer appropriate to prioritise the temporary storage of private vehicles (parking) over provision of a connected network of safe cycling paths. Only one option proposed in the LTP has the potential to deliver this and that is Option 4: Accelerated Full Programme.

---

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

---

**Q19. Do you support the proposed budget?**

I somewhat support the proposed budget.

---

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

I would rather that children in the Northern suburbs be provided with a connected network of cycleways (a relatively small investment) than the Council pay for (or contribute to) the Great Harbour Way (an expensive undertaking with low value return to ratepayers). Double the Cycling Minor Works Budget to \$2 million per year. We're constantly told that there's not enough money in this budget for improvements we ask for. We also don't think it's a budget where the council is constrained by capacity in what it can deliver. Doubling this budget to \$2 million per year would vastly improve the councils ability to provide parking and other minor improvements over the next decade. Create a new dedicated funding category to deliver rapid changes to the urban environment. I think cycle lanes could be delivered quicker, easier and cheaper with the addition of a dedicated fund for this type of work. Currently the LTP suggests this work could be funded out of the already limited Minor Works Budget, but I think the scale needed to deliver a connected cycle network over the next decade requires a well-resourced and dedicated fund. This fund would also deliver public space improvements outside of cycling in the form of Low-Traffic Neighbourhoods and parklets. Ring-fence cycling funding Ring-fencing the cycling budget would ensure that any money allocated must be spent on cycling and not reallocated elsewhere. I also think the council should properly fund its projects by increasing rates or taking on additional debt.

Cycleways

**Q17. Your comments on the big decisions (optional)**

I would like to attach my comment mainly to the topic of the cycleways proposal. I think that there are other modes of wheeled transport that should be considered in the creation of these cycleways. While a lot of people do ride bicycles there is also a great number of other common and popular wheeled transportation (such as rollerblades, rollerskates, scooters longboards and skateboards) that could benefit from these cycleways if they were designed to accommodate them. If they were made of smooth concrete, tiles or asphalt without being interrupted by rough surfaces like gravel or rough concrete then they could be so much more functional to the smaller urethane wheels of rollerblades, scooters and skateboards rather than just catering to bicycle tires. And also adding to that as a skateboarder myself, it would be good to see Wellington be more open to the idea of investing in skateboarding facilities/areas in the city and surrounding suburbs. In the last 10 years or so most other major cities and smaller towns in this country have made amazing well designed facilities/areas for skateboarding combining them with multi-use public spaces like parks and playgrounds to the great benefit of these communities. It's quite sad to me that my home town of Wellington hasn't even come close to achieving anything like this in the last 10-15 years. It would be great to see that change during this next "10 year plan". Thank you for taking the time to read.

---

Q21. **Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

First of all - you have a bug in this website. I said I strongly oppose the proposed budget but it then popped up a message indicating I had selected "neutral" - however details.... The proposed rate increases are irresponsible, unaffordable and will ultimately damage the long term prospects for Wellington. The proposed plan is unimaginative and is just about doing the same with more rate payer's money. We need a radical review and rethink of council investments and portfolio. E.g. funding a zoo is both expensive and is completely misaligned with environmental and animal welfare principles. Here are the key questions I put to the council which are glaring gaps in the current proposal. Until these are answered it would be sheer incompetence to sign off on the proposed budget. - What can we stop doing? - What can be done differently? - What should be left to central government? - What should be owned vs leased? - Where could partnering create value and reduce cost? - What should not be owned? Do the mahi.

Please indicate what decision you are commenting on by selecting from the list of item(s) below</b></p>	<p>Investment in three waters infrastructure Cycleways</p>
<p><b>Q17. Your comments on the big decisions (optional)</b></p>	
<p>1) Investment in 3 waters infrastructure: I support accelerating the improvement to infrastructure as it has been neglected for too long by previous councils. However, I do not support an additional 400M+ for growth. Our priority should be fixing the existing infrastructure for the current residents. And, while I understand that growth is important, we need to figure out how to do more with less from a water and sewage perspective. Water meters would be a good start and I support them. 2) Cycleways. While there has been some progress here, it has been too slow. Like the water infrastructure, Wellington has, long ago, outgrown the current roading system. This infrastructure has been dominated by the view that cars are the priority and with that an attitude that cars have rights that override every one else's - pedestrians, cyclists and buses. A change here is overdue. We cannot begin to talk about growing the city if we cannot provide safe and predictable transport to it. Cycleways are a key part of this infrastructure.</p>	
<p><b>Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)</b></p>	<p>not answered</p>
<p><b>Q19. Do you support the proposed budget?</b></p>	<p>Neutral.</p>

Cycleways  
Central Library

---

Q17. Your comments on the big decisions (optional)

The full Cycleway network should take priority over central library remedial work, as climate emergency is very urgent. The library can wait, but cycleways need to happen immediately as it is currently very dangerous to cycle in wellington. There needs to be new laws and enforcement to deter unsafe driving behaviour towards cyclists and safe driving education.

---

Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)

not answered

---

Q19. Do you support the proposed budget?

not answered

---

Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?

I am concerned lower income people may not be able to afford the rate increases and this is a big problem. Contracting out services cost too much and basic maintenance has not been done. The cost of council administration should be reduced. sport stadiums and entertainment facilities should be sold.

Te Ngākau funding for future work

**Q17. Your comments on the big decisions (optional)**

I am opposed to building and/strengthening expensive buildings on unstable land that is prone to earthquakes. I think it is foolhardy to spend hundreds of millions of dollars on the civic square given the land is vulnerable and suspect. Were an earthquake to hit (which scientists are now saying is more and more likely) the civic square precinct would fall back into the harbour.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

I somewhat oppose the proposed budget.

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

Don't know.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

This long term plan aims to fix some significant issues, such as water, for wellington city. However, it provides no consideration of the Housing crisis and our low income families. I would like to see more investment from council for social housing and assistance for community housing providers to boost our housing stock. Significant funds should be placed into these areas. I am not in favour of the Library strengthening but believe the money should instead be spend on supporting local libraries in low social economic suburban areas for people to have community spaces and access to reading and research materials. This ten year plan does not support Low income people to come into the city. Building civic infrastructure, instead, will build community and support local businesses.

Hi,

We have submitted via the online form on the Council website, but in case there are any technical issues, please find our submission below.

## **SUBMISSION**

The Wadestown Toy Library (“WTL”) requests to submit on the proposal to sell the Wadestown Community Centre (“the Centre”), referenced on pp. 57 of the Council’s Long Term Plan (“LTP”).

### **WTL Contribution to Council strategic direction**

The WTL has been successfully servicing Wadestown families out of the Community Centre for 37 years.

Our purpose is to loan educational toys to aid in the mental, physical and social development of children.

With an active membership base, the WTL benefits many families that are members on a regular basis and many more through hiring larger toys like a bouncy castle to non-members or in providing shorter-term rentals in instances where local residents have younger extended family members coming to stay.

By asking members to volunteer either on the Committee or by assisting the Toy Librarian in session at least three times every year, we also facilitate relationships between young families in the area.

Whilst based in Wadestown we have a catchment covering multiple neighbouring suburbs.

The WTL contributes to the Council’s community outcomes framework for Wellington and its environmental, social, cultural and economic objectives of the LTP by providing the opportunity for young families to access a wide range of toys, to save money, build a community, and be kind to the environment by re-reusing our toys.

<b>Environmental:</b> A sustainable, climate friendly eco capital	<b>Social:</b> A people friendly, compact, safe, and accessible capital city	<b>Cultural:</b> An innovative, inclusive, and creative city	<b>Economic:</b> A dynamic and sustainable economy
A city where the natural environment is being preserved, biodiversity improved, natural resources are used sustainably, and the city is mitigating and adapting to climate change – for now and future generations	An inclusive, liveable, and resilient city where people and communities can learn, are connected, well housed, safe, and healthy	Wellington is a vibrant, creative city with the energy and opportunity to connect, collaborate, explore identities, and openly express, preserve, and enjoy arts, culture, and heritage	The city is attracting and developing creative talent to enterprises across the city, creating jobs through innovation and growth while working towards an environmentally sustainable future.

### Community Centre Sale

We agree the Centre is not fit for purpose for the community generally or for our Toy Library members; whilst storage and space allocation works well for WTL, access is poor and the Centre’s layout does not maximise the potential for wider community use.

To this end, we are supportive of the sale of the Centre provided:

- the funds from the sale are ring fenced for a future Wadestown community space; and
- that community groups such as the WTL are supported to find appropriate and financially viable space(s) in a timely manner if a permanent community solution is not in place before the Centre is sold.

If the Council sells the Centre and does not support the WTL with accommodation until a permanent solution is in place, or if the Council doesn’t provide a permanent solution for Wadestown, we will be forced to close.

As a small Not-For-Profit we survive on Membership income, Lotteries Grants and the income from renting out our Bouncy Castle to young families, we do not have the financial means to build or buy a storage unit for our toys from which to operate and any significant increase to the current monthly rent would also put the WTL future in serious doubt.

Operating purely online eliminates any wider community connection the WTL currently provides to members so is not desired by members or the WTL.

Through ongoing communication with other local community bodies such as The Wadestown Residents Association and the Highland Park Residents Association we are aligned and supportive of a new community centre solution that enhances wider community outcomes.

### Solution

We propose a temporary solution if the sale goes ahead before a new community space is built. However, it could work as a permanent solution.

We propose the WTL operates independently out of the Wadestown Public Library, as occurs in some other Council areas (e.g. Carterton, Martinborough, Stokes Valley, Kerikeri).

This would be a “win-win” for the Toy Library and the Council Library, as it would increase foot traffic/patronage for both organisations, encourage greater community connectivity and make great use of the existing Library asset.

Better parking options, access, and opportunities to engage with new customers by being more visible within the community would significantly aid the WTL and the impact it can have for the local communities in and around Wadestown.

Increased foot traffic, opportunities to engage with new visitors, and a visit to the library becoming an extended family outing for families to borrow books and education toys at the same time is all positive for the Council library.

Key facets of the proposed system include:

- Toys stored in a room in library/shed/cabin outside
- WTL Members browse the WTL’s website which tells them what toys are available (<https://wadestowntoylibrary.mibase.co.nz>)
- WTL maintains current hours (Saturday mornings 10am-12pm) and during this period the WTL-employed Toy Librarian works at the Council library and brings a selection of toys out into the seating area near the library entrance or to the children’s area for viewing and then issues toys there from the existing WTL laptop and database. Toy Librarian also cleans any toys returned during the past week to WCC librarians.
- During the week toy library members can come in and request specific toys to be retrieved by WCC librarians. They would tell the WCC librarian the toy and description. No ‘browsing’ of the storage room to reduce time for WCC librarians.
- Members can already browse the entire WTL catalogue on our website on the public computers at the library, or on their own device.
- WCC librarians would have a login to the WTL cataloguing system “Mibase” to issue toys to members.
- WCC librarians not asked to discuss fines, memberships etc with members.

WCC librarian provides WTL contact details or asks people to return 10am Saturday mornings to discuss with the Toy Librarian.

- Sign ups to the WTL only allowed via the Toy Librarian on Saturday mornings.

We believe this solution is a cheap, efficient and elegant solution and helps both the WTL and the Council, and more importantly, assists the Wadestown and wider community.

We request a meeting with Councillors and officials to discuss this proposal.

Regards

Wadestown Toy Library

It's not clear whether free swimming for under 5s still includes free adults? Having the free supervision is key to us being able to support our kids to become comfortable in the water through regular pool access.

Te Atakura (climate change)  
Central Library  
Te Ngākau funding for future work

**Q17. Your comments on the big decisions (optional)**

I am concerned about the plans to spend so much money on Te Ngākau and the Central Library given that they are in an area forecasted to be inundated by rising seas and storm surges due to climate change. This is indicated clearly on your website here: <https://wellington.govt.nz/environment-and-sustainability/climate-change/how-climate-change-will-affect-wellington> Although we could slow sea level rise by actions we and other committed countries choose to take, it is entirely possible that we will not be successful on a planetary scale at stopping global warming. It's likely that we have crossed or will soon cross a point of no-return to 'normal'. For example the Amazon was announced as now being a net carbon emitter last week, and the Arctic is now likely to be ice free in summer around 2034 - much earlier than originally expected. Last year temperatures in Arctic Siberia reached 38 degrees Celsius and so the permafrost is now releasing ever more methane, a powerful greenhouse gas which will raise our oceans further. The younger of us will live to see this trend accelerate considerably. Many expensively produced reports (some listed on your website above) clearly outline where sea level rise will occur in Wellington. For example, NIWA produced this in 2019: <https://www.gw.govt.nz/assets/Climate-change/GWRC-NIWA-climate-extremes-FINAL3.pdf> The Parliamentary Commissioner for the Environment produced this in 2015: <https://www.pce.parliament.nz/media/1390/preparing-nz-for-rising-seas-web-small.pdf> Tonkin and Taylor produced this one in 2013 for WCC: <https://wrgf.co.nz/wp-content/uploads/2020/03/61579-wcc-sea-level-rise-options-min.pdf> As you are no doubt aware, GWRC also has an interactive tool showing the inundated areas due both to rising seas and storm surges here: <https://mapping1.gw.govt.nz/GW/SLR/> These reports are produced by respected scientists and modellers and we should therefore heed their advice. The lifetime of a building is often longer than originally planned, and given the embodied carbon emitted in construction this should be encouraged. Plenty of Wellingtonians live in homes more than 100 years old, and much of our infrastructure is approaching this age. Therefore we could well expect the Civic Square buildings to be in use in 100 or 200 years' time (and likely longer). This will not be the case if they have water lapping at their doors (or are already underwater if the melting of polar ice shelves occurs more quickly). WCC itself says that \$1 billion dollars of its assets will be at risk with 1.4m of sea level rise. The managed retreat legislation (Managed Retreat and Climate Change Adaptation Act (CAA)) that will partly replace the RMA in the next year will likely require concrete actions in this regard and so it would be better to hold off putting more resources into this site. Moving these buildings now will also set a good precedent for when the Council is required to start telling private owners that they cannot build on low-lying coastal land. Although replacing failing water infrastructure currently seems like a massive cost to us, the un-managed retreat from low-lying coastal areas will likely be still far more burdensome for future generations. This city and country is likely to buckle under the extreme costs of adapting to climate change, and at a time when our income may be struggling to keep up. I would strongly suggest WCC looks at developing an alternative site for these key council buildings on higher ground that will not burden future Wellingtonians with any further infrastructure they will need to replace.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

I somewhat support the proposed budget.

Q20. **You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?** not answered

---

Q21. **Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

I'm hugely in favour of Option 4 for the cycleways. This would transform our city making up happier and healthier, and make a real dent in terms of reducing our incessant burning of fossil fuels.

- Q14. **Which of these options do you prefer? (Central Library decision)** None of these options.
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Don't know.

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Cycleways  
Te Atakura (climate change)  
Central Library  
Te Ngākau funding for future work

**Q17. Your comments on the big decisions (optional)**

1) Fiscal responsibility: The economy has taken a hit from the covid response. It is appropriate to show restraint and fiscal responsibility rather than borrowing and taxing to finance vanity projects 2) Library and Civic Square: It is time for the Council to live up to its claims of wanting a vibrant city. This will not be achieved simply by forcing people into apartments and creating child-friendly cafes. The Council has an opportunity to make Civic Square a major focus and a desirable meeting point in the city. The Library should be rebuilt so that it faces Civic Square rather than a dreary part of Victoria Street (while keeping access from Victoria St, of course). Council offices should be replaced with shops and eateries. 3) Cycleways: The Council's cycleway projects are expensive, ill thought out, dangerous to cyclists and frustrating to motorists. As a very regular cyclist, I try to avoid them. 4) "Climate change": - Looking at geological history, it is apparent that we are still at a low point in terms of temperature and atmospheric CO2, which continued to rise over the past year or so despite covid response measures). There is no reason to believe that humanity's contribution to atmospheric CO2 has brought us to crisis point, or indeed that additional CO2, whether derived from human activity or from nature (the far greater part), will be anything but beneficial. Multi cellular life first developed during the Cambrian explosion, when high levels of atmospheric CO2 coincided with high temperatures (Image attached, "Geological time scale"). Unfortunately we appear to be headed for a Maunder minimum, with record low temperatures and snowfalls in the last two Northern Winters - northern hemisphere snow mass is currently an historic 700 gigatons above average - with low temperatures and long ski seasons also being recorded in Australia . - For Wellington, or New Zealand, to aspire to compensating for eg China's 200 new coal-fired power stations is simply ludicrous. - It is a serious worry that so much of the Council's decision-making in this regard is based on unreliable projections. Take, for example, its claim that "30cm of sea level rise is expected to occur in New Zealand over the next 40 years". Data from the gauges at Wismar, Germany, and Fort Dennison, Australia, as well as analyses of measurements from the world's best long-term coastal tide gauges indicate that the global average rate of sea-level change is around 1.4 to 1.5mm per annum, and decelerating. In the New Zealand context, members of the School of Surveying, Otago University and GNS NZ have analysed tide gauge records and vertical land movements for New Zealand, and found an average annual sea level rise of 0.9 mm over four main NZ centres, once subsidence is taken into account (slide from their presentation at the International Surveyors Conference in Helsinki 2017 attached, "Sea level"). So we're talking about an inch or two in 40 years, less if deceleration continues, and this is ignoring the possibility of a major earthquake which will raise the land in Wellington. In sum, WCC should not be spending money or making zoning changes, or making any other decisions, based on junk science. Sweden has vetoed at the last minute a project to fill the atmosphere above the country with calcium carbonate particles to stop the sun and shield us from "global warming". Can we rely on our Council, or our government, to be equally responsible?

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

Cycleways

---

Q17. **Your comments on the big decisions (optional)**

We need separated cycle lanes so cyclists are safe. We need a connected network so cyclists dont need to continually transition between cycleways and regular roads. We need these to encourage as many people as possible out of cars and on to active transport modes: for health and for environmental reasons. Public transport needs better capacity for bikes. It's ridiculous that you cant put your bike on a train at rush hour. Busses need capacity for more than two bikes. There needs to be secure areas where bikes can be locked all over Wellington. There needs to be public awareness campaigns about cycle safety including for drivers. Emphasise safety and best practice design when building cycleways. Lean on international established best practices to avoid design mistakes.

---

Q18. **You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

---

Q19. **Do you support the proposed budget?**

not answered

---

Q20. **You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

---

Q21. **Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Fully fund climate change mitigation and adaptation efforts and listen to the (climate) scientists when implementing solutions. No closed door decisions - influence of fossil fuel lobby groups should be fully disclosed.

Cycleways  
Te Atakura (climate change)

---

**Q17. Your comments on the big decisions (optional)**

I feel that whilst we should finish what we started on some of the cycleways there is far too much proposed investment in them at a time when people will be moving to electric bikes and other forms of travel. Road users will get used to this and the cyclelanes will become superfluous in Wellington as electric bikes and scooters are too fast to be in cyclelanes. (I do support the Wellington to Petone cycleway though). It is also apparent that the cost of 'building' cyclelanes seems out of all proportion to their use. Particularly when you look at some of the poor quality roading material (for example Duthie Street, Karori) that car users and residents have to put up with. Regarding Te Atakura - whilst I believe that people should be encouraged to be as green as possible I think any large scale funding will be misused by political interests to inflict impractical and costly policies on ratepayers at a time when the rates should be used for real needs - like mending pipes! I also wish to object to any raising of the car parking charges at weekend. This discriminates against people with lower incomes and older people who need or simply wish to do business in town. Without cars it is impractical to pick up anything of substance from a shop in town. I do not know why Wellington Council is making life so hard for businesses in town when it needs to recover post covid/earthquakes. No Doubt 'Jones' will be the first of many to leave if these policies continue.

---

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

---

**Q19. Do you support the proposed budget?**

I somewhat oppose the proposed budget.

---

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

I support decreasing spend in the current budget.

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

I wasn't entirely clear with the budget question. It seems hard to justify the 13% rise - as I have real doubts that all the projects will be able to get off the ground so quickly. As I have also said I think many of the anti-car policies for central Wellington have little genuine support, apart from a small but vocal group, will make life difficult for most residents (especially the old) and/or drive businesses out of town.

- Q1. **Full name:** Olivia Gossage
- Q2. **Phone number:** [REDACTED]
- Q3. **Are you making this submission as an individual or on behalf of an organisation?** Individual
- Q4. **What organisation are you submitting on behalf of?** not answered
- Q5. **Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?** No
- Q6. **If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer?** not answered
- Q7. **Oral forum time** not answered
- Q8. **Oral hearing time** not answered
- Q9. **Which of these options do you prefer? (3 waters decision)** Option 2. Enhanced investment (\$2.4bn - the Council's preferred option).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** Option 2. Take ownership (Council's preferred option, \$32m investment).
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 1. Finish started projects (\$29m capital investment, lower debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 2. Medium investment with savings (\$25.4m investment, lower rates and debt).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** Option 4. Sell to support development (no debt or rates impact)
- Q14. **Which of these options do you prefer? (Central Library decision)** Option 2. Council to strengthen Central Library later (complete in 2028 instead of 2025, additional 0.83% rates increase).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 3. Sludge minimisation through Council funding (\$147m to \$208m capital investment, above debt limit, and higher rates)

Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below

Central Library

---

Q17. Your comments on the big decisions (optional)

My preference would be not to try and save the central library - knock it down and rebuild an earthquake safe building.

---

Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)

not answered

---

Q19. Do you support the proposed budget?

Neutral.

---

Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?

Don't know.

---

Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?

I would suggest Council readjusts the portfolio of spending to cover core infrastructure and assets. If you keep putting the rates up, some people will leave Wellington and live in the Hutt, or be in larger amounts of debt. Please think of ALL residents in Wellington when making decisions about increasing rates. We can't have a diverse and wonderful city if not all people can afford to live here.

---

Investment in three waters infrastructure  
Wastewater laterals  
Cycleways  
Te Atakura (climate change)  
Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

I support planning and spending that helps to ensure the built environment and infrastructure for the next 10 years and beyond is planned to maximise climate resilience, reduce our carbon footprint, and begin to reverse the levels of harmful impacts humans have on our waterways, and for other species. Our planet is in crisis and we have put off many changes for too long. Wellington's infrastructure is old and crumbling, these upgrades are well overdue. Unlike many ratepayers I am happy to have rates increases if they are to the long term benefit of our environment and to support a safe climate future.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

I strongly support the proposed budget.

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Most of the fee increases look reasonable to me. I do wonder about the 5% lease increase to arts partnerships and if this will be hard for the arts sector. The property and building compliance fees seem to be the most increased and this might generate some pushback.

Cycleways  
Te Atakura (climate change)  
Central Library

**Q17. Your comments on the big decisions (optional)**

I would be interested to see the proposed carbon emissions reduction as a result of the climate change initiatives compared to the increase in cycle paths (excluding the large emissions caused by the construction of the cycle paths...). It seems slightly bizarre that you have declared a climate emergency but want to allocate \$100m more to cycle paths than to initiatives like electrifying the bus network (and improving the bus network in general so people want to use it) or supporting EV car sharing schemes. These initiatives provide genuine alternatives to using a car small journeys and/or owning a car. Construction and the emissions caused by heating buildings that have poor energy efficiency makes up a huge proportion of greenhouse gas emissions and could be hugely reduced with council support of green building initiatives and incentives to improve building quality and/or sources of heating, yet these are being put on the back burner to provide cycle paths that most cyclists don't even use because they are shared paths filled with pedestrians (see any non-recreational cyclists opinion on the Oriental Bay path). I have no issue with rates increasing to reduce emissions but at least spend it on things that will make the largest impact first. RE the central library: there wasn't an option but my preferred option would be to demolish it and build a new one.

Investment in three waters infrastructure  
 Cycleways  
 Te Atakura (climate change)  
 Central Library

**Q17. Your comments on the big decisions (optional)**

Overall, we are in uncertain times and given shortages in key skills and a period of excessive cost in labour and materials it is a poor time to commit excessive funding to ambitious projects as any overspend that has not been accounted for will risk the ability for council to achieve value and potentially result in abortive work if funding to complete the works becomes unavailable in future. Given the long term plan will be reviewed in 3 years some of these proposals could become viable in 2024 that are not presenting good value now. 1. Investment in Three Waters infrastructure. -Given that the ongoing Three Water's Reform programme it would be better to hold investment decisions until this is finalised and the delivery model is defined. Wellington Water may no longer be the delivery mechanism for this work and as such until things have been clarified additional investment should be avoided. -Current suppliers to Wellington Water are overburdened already, there is a critical shortage of skills in the construction industry with other key roading, housing and private development projects coming online. Additional funding is unlikely able to achieve additional delivery and will likely only increase what is being paid for the work that is already being undertaken. -Wellington Water and their delivery partners are not able to deliver the current spend, ratepayers should not be asked to fund unachievable goals. 2. Cycleways -Given the current uncertain outlook and the tendency for these projects to exceed cost expectations is this the right time to be committing to experimental ambitious projects. -Will impacts on private and business parking be resolved before installing cycle lanes, -Is the uptake and use of the cycle lanes sufficient to justify the expense of their implementation and is the value achievable for rate payers in suburbs not being in receipt of the new facility. 3. Climate Change -Nett Zero should be achievable within existing funding. Making small achievable changes like attending less conferences, producing less paperwork (going digital) or using public transport over private vehicles would offer more value than dedicating teams to developing projects that will likely be unfunded and undeliverable. -For ratepayers, we need the council to ensure future planning enables Wellington residents and businesses to achieve their own nett zero goals and obligations, this should be achievable as a BAU process which will give far more value than navel gazing and money spent on investigating Wellington City Council's own position which will only be undermined by population growth. 4. Central Library -Do we need to return Library facilities to this building. The new facilities are great for accessing literature, and have a great community feel being combined with council facilities. -The central library was oversized and rarely busy and many of the users appeared to be there for shelter rather than reading or research. -The central library could become a white elephant given the move to digital technology and away from central city office working. -Borrowing to fund this will become a burden on future ratepayers. -Has consideration been given to using other wellington facilities such as the National Library to provide the services that are being demanded of the council. -How do the proposed refurbishment costs compare with demolition and rebuilding to the original design if there really is a demand to retain the existing structure.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

I strongly oppose the proposed budget.

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

I support decreasing spend in the current budget.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Given the challenges faced by Wellington, the council should be looking to take bold steps to reduce spend and focus on people in need rather than adopting a business as usual approach to investment. Wellington has been insulated from the worst impacts of COVID to date, but assumptions for growth and the ability for ratepayers to support the increases proposed need to be considered.

Investment in three waters infrastructure  
Te Atakura (climate change)  
Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

It is critical that the city sorts out the ongoing and embarrassing issues relating to our water and sewerage system. On the one hand we like to view ourselves as a vital and forward thinking modern city but with the current state of affairs our critical infrastructure is of a 19th century standard. There is immense pressure to increase the density of housing in the city and inner suburbs without commensurate investment and update of our core infrastructure. Increased density will increase pressure on infrastructure and this must be fixed as a priority. I know it is not sexy or perhaps the legacy that councilors want to be remembered for but let's reframe the issue and make our water supply and treatment and waste treatment/handling a thing to be proud of. In relation to active transportation and climate change goals it is important to look at a range of transportation alternatives. Ride and car sharing platforms offer new options besides people using their own cars. As a user of Mevo it would be great that it (and competitors) have enlarged home zone areas which will lead to use by a greater number of people living in a range of suburbs.

<p><b>Q17. Your comments on the big decisions (optional)</b></p>	
<p>The plan does not talk about expectations to Improve asset management for ALL council infrastructure which is very concerning. How is the council going to avoid the same mistakes with zero accountability and ratepayers having to front up with massive year-on-year rates increases?</p>	
<p><b>Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)</b></p>	<p>not answered</p>
<p><b>Q19. Do you support the proposed budget?</b></p>	<p>I strongly oppose the proposed budget.</p>
<p><b>Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?</b></p>	<p>I support decreasing spend in the current budget.</p>
<p><b>Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?</b></p>	
<p>Consultation period is too short and not wide enough for such big issues. Do Wellingtonians understand what a 13% rates rise will mean to them? How will this link to Govt plans for rent controls? Lack of connection to spatial plan consultation (which I am sure most people missed given COVID) and no consultation on planning/housing in this plan is very concerning. All our young people are moving to Christchurch due to better quality housing with much cheaper rents while Wellington locks up the limited land available requiring resource consent for anything. Homelessness has grown rapidly leading to safety concerns and issues yet the collaboration is not leading to any action and current incentives will drastically reduce rental housing stock.</p>

Cycleways  
Te Atakura (climate change)

**Q17. Your comments on the big decisions (optional)**

CYCLING INFRASTRUCTURE. It's completely daft to be even proposing to not fund future cycling infrastructure. This is a real smoking gun that Council (officers and councillors) isn't taking seriously the power of cycling and micromobility for better towns, suburbs and neighbourhoods, lower emissions, public health and so on and so on. Please grow a spine about this. We're never going to get swathes of the public calling for it; we'll never get businesses on board at the outset. You've got all the data on the net benefits and now you've got central government (and your own) climate change obligations, and mode shift obligations. CLIMATE CHANGE The same pain applies for Te Atakura. Why go through all the work to get a public mandate, then go back to first principles and give people options that would undo all that mandate? Why keep pretending that with more and more granular consultations - that simply allow people the opportunity to exercise our generic cognitive biases around loss perception, risk perception, status quo bias – we'll somehow magically give you a mandate that's so overwhelming you won't need to lead anymore? It's maddening how WCC do this. The choices are this: EITHER trust your good-quality engagement initiatives, which get solid response rates and give solid mandates, and propose implementation options that stand on that mandate and execute the direction people gave you OR stop pretending that public mandate matters with consultations, and just leave it all to councillors. This constant unpicking of mandates in operationalising consultations is shameful and prevents the city from making progress. And it's enraging and burning-out your stakeholder allies. you know, those people who support you all with thousands of hours of our spare time to get lots of public input on those big, original, mandate-forming consultations, only to see Council go out for subsequent consultations like the mandate ones barely happened. (LGWM, anyone?!) The universal recipe for genuine progress includes some spine: there's no recipe for progress wherein a town can substitute a lack of leadership spine for endless consultations.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

**Q19. Do you support the proposed budget?**

I strongly support the proposed budget.

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Get that damn congestion charging in already; twist whatever ministers' arms you need. Or do a special purpose or some other clever workaround. And start properly resourcing parking management! The Parking Policy needs to be implemented pronto, and fully.

Cycleways

Q17. Your comments on the big decisions (optional)

It's critical we address climate change and health and reduce reliance on private car transport. Investing in public transport and cycle ways is very important. Uptake of cycling for many is only a viable option when safety for people on bikes is prioritised over car parking and traffic flow.

- Q8. **Oral hearing time** not answered
- Q9. **Which of these options do you prefer? (3 waters decision)** Option 2. Enhanced investment (\$2.4bn - the Council's preferred option).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** Option 2. Take ownership (Council's preferred option, \$32m investment).
- Q11. **Which of these options do you prefer? (Cycleways decision)** None of these options.
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** Option 1. Demolish and site developed through long-term lease (Council's preferred option).
- Q14. **Which of these options do you prefer? (Central Library decision)** Option 1. Strengthen now by temporarily exceeding debt limit (Council's preferred option, additional 0.79% to rates).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 4. Sludge minimisation through alternate funding (Council's preferred option, \$147m to \$208m capital investment funded through a levy, no additional rates increase)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Cycleways  
Central Library  
Te Ngākau funding for future work

**Q17. Your comments on the big decisions (optional)**

I have attached a document which I circulated to the Committee Members of OBRA as the person asked to prepare a view on the WCC "big decisions"; in my capacity as incoming President of OBRA. This memorandum was reviewed by the Committee and unanimously supported. Within the document it outlines the issues we have with the long term plan; specifically the Cycleways issue. We are totally against the Council's preferred option for reasons stated therein. Depending on the outcome of the Cycleways expenditure, then it would have consequential impacts on our view of the Council's preferred option in respect of the Te Ngakau Civic Precinct. If the Cycleway expenditure were substantially reduced then there is the option of the development being undertaken by WCC. ( The long term cost of the preferred option of a sale and leaseback would exceed a self development ) Please advise urgently if you are unable to open the attached file.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

[https://s3-ap-southeast-2.amazonaws.com/ehq-production-australia/57a25b2464be38a22243a77ac05e48b6730eeeb7/original/1620523192/9c900129612c8de925f5bb4d1dd2f1ec\\_WCC\\_Long\\_Term\\_plan\\_copy\\_copy.docx?1620523192](https://s3-ap-southeast-2.amazonaws.com/ehq-production-australia/57a25b2464be38a22243a77ac05e48b6730eeeb7/original/1620523192/9c900129612c8de925f5bb4d1dd2f1ec_WCC_Long_Term_plan_copy_copy.docx?1620523192)

**Q19. Do you support the proposed budget?**

I somewhat oppose the proposed budget.

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

I support keeping the budget the same but with some changes.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Please see the OBRA document attached to this submission. We have strong views in respect of the proposed changes to the CBD parking fees.

I said that I would put together some reference notes for OBRA's response to the WCC 10 year long term plan...having read it, below are my comments;

The WCC Long term plan essentially asks for feedback on 7 questions in terms of alternatives available to provide or mitigate the following;

- 1) Water pipes repair
- 2) Wastewater laterals
- 3) Cycleways
- 4) Climate change action plan
- 5) Civic Square
- 6) Central library
- 7) Sewage & Sludge

Plus proposals to increase a wide range of council fees.

I have attached below the relevant website which deals in some detail with each of these issues; and provides the WCC preferred option for each. I'm impressed with the iterative nature of the plan in so far as there is an online response option; as well as a form to print, fill out and post/deliver. It would not be at all difficult for the Committee to each respond with the online version; and perhaps for there to be in addition a formal OBRA response if there were to be a consensus.

My view in regard to each of the above issues; plus comments on the proposal to increase fees for WCC services, is as below;

I should add as a pre amble that we do face a Tsunami of problems created by historical shortsightedness; and that doing nothing, or doing part of what needs ultimately to be done slowly and therefore inefficiently, is in my view not an option.

- 1) Water pipes repair

The council's preferred option is to recognise the extent of the problem; but take a considered view on reparation ( you don't know what you don't know ); as opposed to throwing the kitchen sink at the problem. On balance I support their preferred option.

- 2) Wastewater laterals

Agree with the preferred option which is of little consequence anyway

- 3) Cycleways

I think the council has been disingenuous in this proposal. There are 4 options, basically from 1) completing existing commitments ( \$29m ); 2) the first option plus completing the Island Bay cycleway ( total \$39m ); 3) Option 1+2 plus most of the remaining corridors ( Eastern corridor/ Northern connection/Southern connection/Western connection totaling \$120m ); option 4) all of option 3 plus more of each of the components through to full completion so that “people shift their main mode of transport to cycling “ ... totaling \$226m. Given what we know about the Council’s lack of historical ability to deliver either that which works; or in a timely cost effective manner; then allowing the council to have a 10 year free reign on \$220m of cycleways seems to me to be a bridge too far. Yet, there is no half way house...the difference between option 2 and option 3 need not be \$100m. There should be a staged approach about midpoint between the two ( Eastern and Southern; or Northern and Western; but why all four ?)...so I’m not voting for their preferred option 3.

#### 4) Climate change action plan

This is to fully fund an action plan for the consequences of climate change. At a cost of \$9.3m for the preferred option, I agree.

#### 5) Civic square

Essentially the issue here is as to whether the two council admin buildings in Civic square ( which are red stickered ) should be fixed and owned by the Council; or the land ( leasehold interest ) sold to a developer, buildings demolished, and new purpose built admin offices built on a design and leaseback basis to the Council. All things being equal, the Council should retain ownership and retain any development margin; however as a result of the council nearing it’s debt cap, then the option to sell to a developer ( even though suboptimal and is the Council’s preferred option ); should probably be supported.

#### 6 Central Library

This is all to do with the way in which the repairs are financed; and the timing of; the fixing of the Central Library in the amount of circa \$190m. The options are to borrow and do it now, but exceed the WCC debt cap; do it now but finance it through a rates levy of 3%; or defer it by 3 years until it then fits within the debt cap. The Council’s preferred option is option 1...and I probably agree with that, particularly if there is a midpoint in the cycleway expenditure which would remove the need to exceed the debt cap.

## 7) Sewage & Sludge

This is a legacy of incompetence for decades where WCC “sweated the assets” with the \$200m cost to repair now front and centre. Doing nothing is clearly not an option (First world capital city trucking sewage daily from broken pipes to a landfill hardly meets any aspirational message we may want to convey; let alone meet our carbon footprint obligations) So, the lesser of the two evils is the Council’s preferred option, borrow within a special vehicle designed for Local Authorities who have made such a hash of their fiscal management that there is simply no other option.

## 8) Council Fees

Basically the Council is proposing to increase the cost of all facilities and services they provide/administer by between 15-25%...Addressees of this email should carefully look at the schedule of proposed increases because they impact on every area of the City we enjoy.

In particular there are two items that I will comment on; firstly, a plus with the proposal to significantly increase the daily parking charges, which removes a cost anomaly; but then a negative with a proposal to increase the hourly rate for weekend parking in the CBD as if retail isn’t hard enough already...Interesting that these significant Council fee cost increases were added to the consultation document as almost an afterthought with no request to comment formally.

## Conclusion

I would encourage Committee Members to respond via the online document. The ease of use is probably the best part about the plan.

Wouldn’t it have been great if the Council were to be asking us about a proposed \$1b of expenditure for productive/positive projects that would grow Wellington rather than this expenditure necessary to clean up the mess of a successive lot of issues that were never adequately addressed as they occurred.

Happy to receive your feedback

Sludge and waste minimisation  
Te Ngākau funding for future work

**Q17. Your comments on the big decisions (optional)**

Sludge and waste minimisation: I oppose public infrastructure being funded by private funds, who will seek to profit from the funding. The rates increase proposed in Option 3 is less than the proposed levy in Option 4 for many ratepayers. Te Ngākau funding for future work: Similarly, I object to council buildings being privately owned, with the long term cost being higher since the private owners will seek to profit from the buildings. I would rather defer this work until other high priority work (such as the library) is complete and/or seek to increase the level of council debt.

**Q17. Your comments on the big decisions (optional)**

Better information is needed before making these big decisions - what is the cost of carbon abatement for the various options? What is the cost - benefit analysis? What are the alternative options not shown? In addition - given pending three waters reform, NO decision should be made on this aspect of council operations at this stage. The council also needs to go back to the drawing board on the library. WHY do we need to own the building? I understand there is an ideological desire to "have control" but I would argue that having flexibility (at end of lease, council can decide if the space is fit for purpose or not) and devolving the risk of building ownership to an entity that is more expert at managing that risk outweighs any perceived benefits from ownership/control. The council should think a bit more creatively to resolve this issue - eg: could the council partner with, for example, VUW or Massey to develop a co-shared space that is more optimally utilised (and more cost effective).

## WCC Long Term Plan (LTP) Consultation

Submission from Louise Tong

8 May 2021

In addition to my comments on the “big decisions” (for completeness, repeated here):

“Better information is needed before making these big decisions - what is the cost of carbon abatement for the various options? What is the cost - benefit analysis? What are the alternative options not shown?

In addition - given pending three waters reform, NO decision should be made on this aspect of council operations at this stage.

The council also needs to go back to the drawing board on the library. WHY do we need to own the building? I understand there is an ideological desire to "have control" but I would argue that having flexibility (at end of lease, council can decide if the space is fit for purpose or not) and devolving the risk of building ownership to an entity that is more expert at managing that risk outweighs any perceived benefits from ownership/control. The council should think a bit more creatively to resolve this issue - eg: could the council partner with, for example, VUW or Massey to develop a co-shared space that is more optimally utilised (and more cost effective). ”

I have several other concerns regarding the LTP.

### Unprecedented challenges require a new approach

As noted in the LTP, WCC has to make some big decisions on how to address many significant challenges we face. In light of this, it is necessary to step back and think holistically as well as strategically - considering *all* the options available – not following a well-trodden path of simply raising rates in response.

WCC needs to take a long, hard look at *all* the areas of activity in which it is involved and ask some fundamental questions. It is important that in doing so, old ideologies – particularly those with little basis in fact or rationale – are dropped and a fresh perspective is brought to bear. Innate scepticism of commercial or market solutions is not constructive.

### We cannot continue to do (and fund) more and more ad infinitum. What can we stop doing?

We cannot continue to add and add and add to WCC’s areas of focus and expenditure. We need to revisit existing activities, question whether they’re appropriate and/or affordable. With so many challenges ahead, WCC needs to narrow its focus on the things that really matter. Team NZ’s mantra was “only do what makes the boat go faster”. I’d like to see WCC adopt a mantra of “only do what makes our city better”.

One stark example that illustrates this point is the zoo.

Total expenditure over the LTP is \$70m opex (after taking into account revenue) and \$13m capex. This far outstrips the support given to Zealandia (\$19m opex, nil capex). One organisation is focused on exotic animals, housed in cages in an environment that is a far cry from their natural habitat. The other hosts our precious native species, our taonga, many of which are on the brink of extinction. Zealandia has brought life to our city, provides rich opportunities for visitors, residents and researchers alike. The zoo is a colonial folly. Spending \$83m of ratepayers’ money to provide an opportunity for the public to see a bear in a cage, lions on a concrete rock, or monkeys swinging on bare branches in a cage is wrong, on so many levels.

We could take that \$83m and, say, keep pool fees affordable, keep turf fees at a minimum, and redirect the balance to getting the basics right, without causing our rates to go through the roof. The zoo area could be turned into the country's best playground (akin to the Margaret Mahy playground in Christchurch) – providing a valuable asset for residents, an attraction for visitors, and requiring far less ongoing expenditure.

#### WCC needs to act as a kaitiaki of our city – and of ratepayers' money

Every line-item in the LTP needs deep scrutiny and testing to ensure that ratepayers' money is well spent and delivers value. As kaitiaki of the city, and of ratepayers' funds, WCC needs to exert best practice judgement over every dollar spent – and adhere to best practice transparency on where that money is spent and why.

For example, the cost of the cycleway projects (\$120m for recommended option) seems extraordinarily high, I'm sure this would be particularly so if it was assessed on a user or per km basis (unfortunately this data is not actually provided). Are they being scoped correctly, or might a more affordable option be perfectly acceptable and functional and effectively deliver the same benefits?

As per the comment below under "Transparency", it is hard to judge the value of many large expenditure items as very little information is provided eg: what is the \$8.5m Begonia House cost for (you could pretty much get a whole new building for that!), EV Fleet Transformation \$5.25m – what does this provide, is the fleet shrinking, are you leasing or buying; what does the \$28m for Maori engagement relate to; what is the \$35m for EV charging and home energy audits for (it seems strange to lump these two items together);

WCC needs to use ratepayer funds as a last resort when other options are unavailable. For example, WCC should seek third party grants (EECA, Meridian and other parties offer these) to support its fleet conversion – this money is readily accessible and should be sought ahead of (or alongside) ratepayer funding. Could congestion charges fund investment in cycle lanes, while also supporting uptake of public/active transport and a reduction in peak hour vehicle traffic. Could a third party investor provide funding for the landfill projects – and user pay fees be adjusted so they are more reflective of the total long-term cost of this facility.

#### A new approach – rethinking old ideologies

WCC needs to adopt a principal that for many assets, ownership is not necessary, and recognise that ownership is in fact undesirable in many circumstances, due to the complexity in managing, associated risks and required skillsets and organisation focus. This is particularly so for large infrastructure assets such as commercial buildings – but could be extended to the port, airport and water infrastructure.

The library is a prime example. No-one enters a library and makes a judgement on its merits based on who owns the walls and ceiling. It's the service, books, facilities, amenities, and location that matter. Owning the building exposes WCC (and therefore ratepayers) to a myriad of risks, as we are all too aware : earthquake strengthening, insurance risk, construction/development risk, leaky building risk, climate risk etc. In contrast, leasing would provide flexibility – to change location if desirable, to downsize/upsize, to change the way the activity is undertaken (eg; moving to a shared space), to demand a level of sustainability from the building (eg; require the building WCC leases to be Greenstar6, or upgraded to a higher standard in the future). WCC would be an attractive tenant to a prospective developer/owner, allowing it to have a strong negotiating position as a tenant. This would support, for example, long term rental certainty, ability to negotiate attractive terms etc.

Given the unprecedented challenges we face as a city, I think it is an appropriate time to review ownership of all assets. What benefit does WCC get from owning the port? Might they be derived by an option other than ownership? What are the associated risks? What other assets does the council own that it doesn't need to – Farms? Childcare centres? Buildings? Parking meters? Landfill?

By removing the need to manage a large, complex pool of assets this will allow WCC to narrow its focus, and provide better delivery on the basics, as well as execution of the responses to the challenges it faces.

### Scope

WCC needs to carefully consider the activities it is involved in. Many of the large expenditure areas are actually the responsibility of Central Government, not WCC and its ratepayers. We all pay tax, so paying rates to fund investment that our taxes should be used for is a double impost.

To illustrate, I would highlight three key areas where this applies – transport, climate change and social housing. There may well be other areas that this applies – a lens should be applied to all expenditure to ensure it is within WCC's remit and not that of Central Government, or able to be funded or already being provided by other parties.

#### a) Transport

The LTP has the following LGWM expenditure :

- Ngauranga to Airport Corridor	\$40m	Is this not SH1 and therefore Central Govt responsibility?
- City Streets Bus Priority	\$193m	What does this relate to (not covered in the consultation doc?)
- LGWM Early Delivery	\$7M	" "

As a general comment, WCC needs to ensure that Central Government pays for any investment in the highway corridors, as well as providing support for adoption of low carbon transport, or transport generally, equivalent to the support that it makes in other centres (eg: 50% funding of CRL in Auckland). WCC, with our relatively low population base, simply cannot afford a light rail or MRT investment.

#### b) Climate action

Much of what is proposed in WCC's climate action plan is not the responsibility of WCC to fund. EV charging is being provided by private companies already – Contact Energy, Meridian, Chargenet etc. Why is WCC proposing to use ratepayer money for this activity? WCC's role should be limited to facilitating (eg: making consenting for installation of EV charging easy, seamless and affordable, perhaps making special carparking available etc).

Why does WCC offer home energy audits (LTP has \$35m for EV Charging and Home Energy Audits)? This is already provided by the private sector, in many cases for free (eg: smarthomes, Harrisons and the Sustainability Trust all provide free assessments and the Green Building Council has a free online assessment).

Could third party sponsorship be sought for WCC's proposed business climate action support (Zero Carbon Challenge and Climathon funded)? Many public, private and NFP organisations are keen to be seen to be supporting this sort of initiative.

#### c) Social housing

WCC currently has a large social housing portfolio. It is almost unique amongst councils in this regard, with most others having sold their social housing to Central Government and/or community housing providers.

Owning and managing social housing is NOT a core competency of WCC.

I understand there is an agreement with the Government that makes sale of this portfolio more difficult – but I would assert that it does not make it impossible – it’s a matter of reaching agreement with Government.

Burdening ratepayers with the cost and considerable risk of owning such a large and complex portfolio – when it is Central Government’s role to support those in need of social housing – just doesn’t make sense. Particularly when the consequence is that rates will nearly double – this will push up rents, and put home ownership further out of reach, which merely serve to force MORE people into social housing.

The current LTP has not provided an comprehensive, aggregate picture of the implications for ratepayers of owning social housing, but from what I can glean the required expenditure is as follows:

- \$17m to upgrade to current healthy home standards
- \$27m housing upgrade capex
- \$25m housing investment programme capex
- \$27m housing investment programme opex (net of income)
- \$83m community housing operations and maintenance

\$179m total expenditure

I understand that this does not include full funding of the maintenance/upgrades required and that there is a c\$400m shortfall. This simply serves to underline the risk – and cost – of providing this service.

Ironically, WCC does not receive sufficient funding from Government to provide the same level of rent relief that the Government will provide the same tenant directly. Unless further subsidisation is provided by ratepayers, *tenants are worse off in a WCC rental property.*

WCC should immediately come to an agreement with Government to enable WCC to sell its social housing portfolio and focus on providing a city that is attractive and affordable to live and do business in.

### Debt

The consultation documents state: “Our debt levels for this plan, including the value of uninsured assets, range from 134 percent to 239 percent of our annual income. Our proposed limit is 225 percent.”

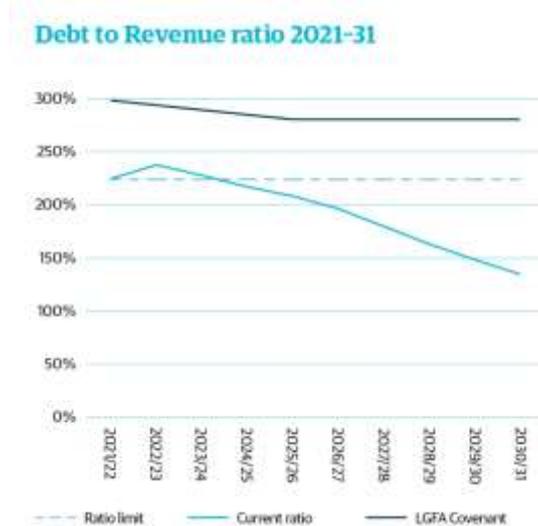

I think this means you have calculated your debt ratio as :

$$\frac{\text{Total debt + value of uninsured assets}}{\text{Annual income (what does this include?)}}$$

The value assumed for uninsured assets is important as it limits WCC’s ability to borrow. What are the uninsured assets? How exposed are they to risk? Does WCC need to own them? If they were impacted by an event, would WCC need to rebuild to the same value (or at all)?

You state the Council's proposed debt/revenue limit is 225% to meet the LGFA covenant ratio. Is this a more restrictive limit than that set by S&P to preserve your AA credit rating? Why does the LGFA covenant ratio change in 24/25?

What is an acceptable long-term stable debt level – the graph in the LTP shows debt continuing to reduce sharply from a peak in 22/23 that is only just over the limit. Given the long-term nature of much of the investment, why is debt being repaid so rapidly and so far below the limit shown?

### Transparency

There is a lack of clear, accessible data on which people can easily make truly informed judgements. I would like to see :

- cost benefit analysis (including impacts and relevant metrics such as cost per cyclist/per km, subsidies per unique visitor etc). WCC is asking its ratepayers to invest considerable amounts (\$600m p.a. by 2031, \$250m p.a. more than current) without a shred of cost benefit analysis.
- carbon abatement cost. Contribution to reducing our emissions is cited as a supporting factor for some of the proposed investment options. But how can we choose between investing more in cycleways or not, without seeing the cost of carbon abatement? How can we choose between sewerage treatment options without seeing the relative carbon costs? What is the carbon abatement cost of the proposed investment in EV infrastructure, charging and fleet transformation?
- more detail is required on what WCC expenditure relates to eg: what is the \$8.5m Begonia House cost for (you could pretty much get a whole new building for that!), EV Fleet Transformation \$5.25m – what does this provide, is the fleet shrinking, are you leasing or buying; what does the \$28m for Maori engagement relate to; what is the \$35m for EV charging and home energy audits for; what does the \$43m “capital replacement fund” relate to?
- there needs to be a clear summary of revenue, opex and capex for each category of activity eg: what is the total revenue, opex and capex for social housing, parks and reserves, zoo, landfill operations etc This information is presented in disparate areas across various consultation documents making it very hard to get a clear understanding of the funding for each area of focus.
- the financial data needs to be provided all in one place and in excel spreadsheet form to support analysis. I've spent more of my weekend than I'd like manually adding up lines of data on a calculator!

WCC might find some useful insights and practices from looking at the nature and presentation of the data released to support other councils' LTP (eg; Auckland Council).

- Q4. **What organisation are you submitting on behalf of?** not answered
- Q5. **Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?** No
- Q6. **If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer?** not answered
- Q7. **Oral forum time** not answered
- Q8. **Oral hearing time** not answered
- Q9. **Which of these options do you prefer? (3 waters decision)** Option 2. Enhanced investment (\$2.4bn - the Council's preferred option).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** Option 2. Take ownership (Council's preferred option, \$32m investment).
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 2. Medium investment programme (\$39m capital investment, lower debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** Option 1. Demolish and site developed through long-term lease (Council's preferred option).
- Q14. **Which of these options do you prefer? (Central Library decision)** None of these options.
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 4. Sludge minimisation through alternate funding (Council's preferred option, \$147m to \$208m capital investment funded through a levy, no additional rates increase)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Te Atakura (climate change)  
Central Library  
Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

1. Three waters: absolutely essential for the future of the city. Must be done well...first time. 2. Te Atakura: We must consider what the city will be like for future generations so addressing climate change is not a nice-to-have. 3. Central library: This is undeniably a nice-to-have but given all the other pressures on the city we cannot afford it. We must keep the rates rise as low as possible otherwise people will simply not be able to afford to live here. 4. Sludge and waste: Along with 1 and 2 above, this is absolutely essential for the longer future of the city. With projected future growth (should that materialise) unless we get on top of this now we are setting ourselves up for a massive increase in waste to landfill - not something a sophisticated first-world capital city should even countenance.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

I somewhat oppose the proposed budget.

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

I support keeping the budget the same but with some changes.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

not answered

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library  
Sludge and waste minimisation  
Te Ngākau funding for future work

**Q17. Your comments on the big decisions (optional)**

The three waters infrastructure is vital. the more speedily the infrastructure is fixed, the less we spend on endless stop gap remediation. Less than this is robbing Peter to pay Paul. Cycleways. Finish the projects. There has been some extremely odd and disturbing decisions and design issues around the cycleway projects. Lets finish what is there, and then have proper consultation on how best to increase the number of cycleways in a way which satisfies cyclists, motorists and pedestrians. Looking at some of the 'shared pathway' models in Europe would be a useful start. Where existing wide paths (Oriental Bay) would have a designated lane on that pathway for wheeled vehicles ... bikes an motorised scooters. A cost effective and sensible approach. Te Ngakau ... keep it for public purposes. Having the National Music School in the square would help the revitalisation of the Square .. at present lacking any sense, or sense of purpose or entertainment. Office buildings - no thank you

Investment in three waters infrastructure  
Te Atakura (climate change)

**Q17. Your comments on the big decisions (optional)**

Thanks for the chance to provide additional comments. On the three waters matter, I think that this is the most critical situation facing Wellington. You have my full support to make dramatic investment into this part of the city's infrastructure. Capital projects are often very difficult to rationalize in the short term, but they are absolutely essential to do and will provide long term benefits to future generations. On the climate change proposal. I just wanted to give me support and feedback on the Mevo car sharing service. As someone who lives very centrally, it is an invaluable resource. I would be very supportive of it expansion both in terms of the number of vehicles offered and the size of the zone. I am happy to be contacted on any of the above matters.
