| Q15. Which of these options do you prefer?(Sewage sludge and waste decision)  | not answered  |

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library

---

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making. Debt comments I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

---

**Q19. Do you support the proposed budget?**

not answered

---

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Central Library

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

---

- Q1. **Full name:** Laura Somerset
- Q2. **Phone number:** [REDACTED]
- Q3. **Are you making this submission as an individual or on behalf of an organisation?** Individual
- Q4. **What organisation are you submitting on behalf of?** not answered
- Q5. **Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?** Yes
- Q6. **If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer?** Oral forum (informal, 60min facilitated table discussion with 2 to 3 Councillors and other submitters)
- Q7. **Oral forum time** Morning
- Q8. **Oral hearing time** not answered
- Q9. **Which of these options do you prefer? (3 waters decision)** Option 3. Accelerated (\$3.3bn investment – higher rates and debt).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** Option 2. Take ownership (Council's preferred option, \$32m investment).
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** Option 1. Demolish and site developed through long-term lease (Council's preferred option).
- Q14. **Which of these options do you prefer? (Central Library decision)** Option 1. Strengthen now by temporarily exceeding debt limit (Council's preferred option, additional 0.79% to rates).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 3. Sludge minimisation through Council funding (\$147m to \$208m capital investment, above debt limit, and higher rates)

Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below

not answered

Q17. Your comments on the big decisions (optional)

not answered

Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)

[REDACTED]

Q19. Do you support the proposed budget?

I somewhat oppose the proposed budget.

Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?

I support increasing spend in the current budget.

Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?

I think Te Tiriti o Waitangi needs to be centred in this decision - making progress, and am concerned it isn't mentioned in the consultation document,

Investment in three waters infrastructure  
Cycleways  
Central Library  
Te Ngākau funding for future work

**Q17. Your comments on the big decisions (optional)**

Three waters: The sooner the better, Cycleways: A luxury we can't afford. Put other money into waste water. Te Ngakau: They will be ugly!! And we will lose the current architecture in these 2 buildings. Library: Preferred total rebuild but WCC chose to ignore public preference - Seeking to establish the process for having input into design of library fix/upgrade and into frank kitts park playground. Have sought councillors advice on how to do this. - No Plan for how to improve things for CBD pedestrians. This does not require us to create one big mall! Which will kill retail in the CBD. We just need better times for crossing at lights, more public toilets (None in upper cuba street!) and to force cyclists OFF the footpaths. - Also , to create seperate spaces for pedestrians on the waterfront, currently unsafe due to cyclists speeding, - Resolve dysfunction in the council so that decision can be made effectively

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

[REDACTED]

**Q19. Do you support the proposed budget?**

not answered

Support for budget depends on what WCC decides to do. You can double it and waste it, or halve it and spend wisely As previous; - consideration for pedestrians - Consideration for CBD retail! (I have no vested interest - I am only interested as a CBD longterm resident and shopper).

Cycleways

**Q17. Your comments on the big decisions (optional)**

I windsurf in Lyall Bay. Stopping accidental sewerage discharges is important to me. This happens too often, we can do better. I commute by bike from Newtown to the city everyday. The route isnt safe. I've had numerous near misses with cars, busses and distracted walkers. The only roading changes in the last 10 years, were in front of the hospital. They made this section of the route more dangerous (Though to be fair, bike boxes have been added to intersections).

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

[Redacted]

**Q19. Do you support the proposed budget?**

I somewhat support the proposed budget.

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

not answered

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

not answered

Q17. Your comments on the big decisions (optional)

There should be someone who WCC could use to ?? a cost effective way of revising sewerage sludge. My rent is already near to 75% of my fortnightly income. My landlord is one of the bvetter ones in this city, but if the rates increase, our rent increases. Please attempt to keep the overalse rise in rates to less than 5% per year. If you plan along lines of must have, should have, could have and nice to have, we should be able to keep to that 5% (Or less!) As a renter in Wgtn, I do not appreciate rates increasing my rent.

Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)

[REDACTED]

Q19. Do you support the proposed budget?

I somewhat oppose the proposed budget.

Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?

I support decreasing spend in the current budget.

Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?

- Q1. Full name: Justin Nehemia
- Q2. Phone number: [REDACTED]
- Q3. Are you making this submission as an individual or on behalf of an organisation? Individual
- Q4. What organisation are you submitting on behalf of? not answered
- Q5. Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum? No
- Q6. If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer? not answered
- Q7. Oral forum time not answered
- Q8. Oral hearing time not answered
- Q9. Which of these options do you prefer? (3 waters decision) Option 2. Enhanced investment (\$2.4bn - the Council's preferred option).
- Q10. Which of these options do you prefer? (Wastewater laterals decision) Option 2. Take ownership (Council's preferred option, \$32m investment).
- Q11. Which of these options do you prefer? (Cycleways decision) Option 3: High investment programme (\$120m capital investment - Council's preferred option)
- Q12. Which of these options do you prefer? (Te Atakura Funding decision) Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. Which of these options do you prefer? (Civic Precinct decision) Option 1. Demolish and site developed through long-term lease (Council's preferred option).
- Q14. Which of these options do you prefer? (Central Library decision) Option 1. Strengthen now by temporarily exceeding debt limit (Council's preferred option, additional 0.79% to rates).
- Q15. Which of these options do you prefer?(Sewage sludge and waste decision) Option 4. Sludge minimisation through alternate funding (Council's preferred option, \$147m to \$208m capital investment funded through a levy, no additional rates increase)

Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below

not answered

---

Q17. Your comments on the big decisions (optional)

not answered

---

Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)

[REDACTED]

Q19. Do you support the proposed budget?

I strongly oppose the proposed budget.

Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?

not answered

Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?

I write this to support my parents who can't afford big rate jump. We agree with Councillor Paul - you all need a kick up the bum! VTAO

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library

---

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making. Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily. Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library

---

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect.

- Q4. **What organisation are you submitting on behalf of?** not answered
- Q5. **Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?** Yes
- Q6. **If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer?**  
Oral forum (informal, 60min facilitated table discussion with 2 to 3 Councillors and other submitters)  
Oral Hearing (formal hearing with set times to speak to full Council, 5mins per individual, 10mins per organisation)
- Q7. **Oral forum time** Morning
- Q8. **Oral hearing time** Morning
- Q9. **Which of these options do you prefer? (3 waters decision)** Option 2. Enhanced investment (\$2.4bn - the Council's preferred option).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** Option 2. Take ownership (Council's preferred option, \$32m investment).
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** Option 1. Demolish and site developed through long-term lease (Council's preferred option).
- Q14. **Which of these options do you prefer? (Central Library decision)** None of these options.
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 3. Sludge minimisation through Council funding (\$147m to \$208m capital investment, above debt limit, and higher rates)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Central Library  
Sludge and waste minimisation  
Te Ngākau funding for future work

**Q17. Your comments on the big decisions (optional)**

My selections in regard to the various options presented by council are driven by the desire to see the city repaired, and upgraded to a first world environment. As a rate payer I want, and are prepared to pay extra rates to achieve the right outcomes for the city. All of the problems with Three Waters are at crisis point, and need substantial amounts of investment, so we need to just get on with it. In regard to the sludge issue, council need to take a long look at how to manage this waste as a profit centre, rather than just a cost. Other countries including UK have used specialty technology for years in this particular area. Council needs to invest heavily in the area of waste minimisation, and dealing with the sludge problem properly would go a long way top achieving this goal, as well as meeting better environmental standards overall. With regard to the library, I believe it should be demolished along with the civic precinct. The whole area should be redeveloped to meet publics future needs. Bringing the building up to code will certainly become a funding nightmare that we clearly can't afford. A complete revamp of that space by a private sector/wcc jopint venture would be cheaper, and add new vigour to the area. I dearly hope that council has the drive, along with guts to tackle the long standing issues that the city faces in a measured way, and fearlessly spend what needs to be spent. I thank you for the opportunity to submit.

Cycleways  
Te Atakura (climate change)  
Central Library  
Te Ngākau funding for future work

**Q17. Your comments on the big decisions (optional)**

CYCLEWAYS AND FOOTPATHS Allied to creating and improving existing cycleways there is a critical need to establish a separate fund and Council staffing for improving safety and amenity for pedestrians. 2. All public thoroughfare spaces should be evaluated within a multi-modal framework. A fundamental principle needs to be that footpaths are for pedestrians only. Where achievable a separate lane should be allocated to bicycles and electric scooters. Otherwise these should be confined to the roadway. 3. Safe and well-maintained footpaths are an essential feature for creating a city that can be enjoyed by all age groups and levels of physical ability. This including parents with prams and people dependent on motorised wheelchairs. TE ATAKURA (CLIMATE CHANGE) 4. The City Council should work strenuously to encourage regional and central government to have all public transport electrified from the national grid. 5. Battery production is dependent on scarce rare minerals increasingly controlled by a few global players. 6. Recycling of batteries and the attendant pollution will be increasingly problematic. By connecting public transport to the national grid, New Zealand will fully enjoy the advantages derived from hydro-electricity and other natural sources of generation. 8. There will moreover be measurable health benefits in our being able to breathe clean air. CENTRAL LIBRARY AND CIVIC SQUARE 9. The restored library could have a glazed terraced extension housing a café opening on to the square at ground level. 10. Any new buildings on ground leases should have interior public space at ground level opening out on to the square. Rehearsal spaces for dance and music could be visible to the public from the square. 11. Accordingly, at ground level interior spaces should be entirely given over to public spaces. FUNDING FOR FUTURE WORK 12. Funds could be set aside for evaluating the enlarging of the Mount Victoria pilot tunnel as a cycle and pedestrian thoroughfare. 13. This would connect the neighbourhoods on the eastern side of Mount Victoria, i.e. Hataitai, Roseneath to the central city in harmony with climate change measures. ALTERNATIVE FUNDING 14. New legislation should permit Councils to issue interest-bearing bonds linked to specific infrastructure projects. Interest paid would thus circulate within the New Zealand community rather than being remitted offshore by overseas-owned banks. 15. Other new legislation could ensure that revenue from traffic congestion charges are shared equally between local and central government. This would be a further way of achieving climate change objectives. 16. By way of infrastructure bonds the Council could create underground service trenches to house all water and communication infrastructure. The deep walkable sealed and secure trenches could be leased to new entrant communication enterprises. 17. This would not only create a new source of income — it would also significantly reduce annual maintenance costs. 18. The walkable trenches built in earthquake resistant reinforced concrete, would be created only in the prime inner-city thoroughfares.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

[REDACTED]

Wastewater laterals

---

Q17. Your comments on the big decisions (optional)

Yes - take ownership (of wastewater laterals) "Currently, residents are responsible" is a clever take on the manner that Council have negated their duty to their ratepayer base. Council have ALWAYS had (legal) responsibility for these, but in the past few decades had changed from recognising this, to forcing property owners to "Pick up the tats", all the way past their legal boundary to the main itself, usually found underneath the roadway. Quite how Council managed this I am uncertain of, but should now reinstate "what always was".

I submit that any cash-flow of ratepayers' expenditure planned for infrastructure at Shelly Bay be more clearly identified in the Plan. Also, that, before Council officers make any (further) agreements regarding the road to Shelly Bay, they present their proposals publicly to elected members together with explanations about a note given to elected members just before they voted to sell Council land at Shelly Bay that ratepayers' outlay on changes proposed at Shelly Bay would not exceed (The fear is that this unsigned note, which was secretly circulated at the last-minute, was a wrong and unjustified attempt to persuade elected members to sell Council land to a developer who was known to its writer - see under the heading "Funding": "Q. Infrastructure costs: Can the rate payer be assured that we will be paying maximum \$10m on infrastructure costs? . . . Yes . . . . I further submit that the presentation requested above includes suitably redacted details of a conversation which Mayor Foster is said to have "described as an 'abrupt' change in the council's views about safety concerns relating to the narrow Shelly Bay Rd. " (The DominionPost, May 7 2021) I ask to be heard on my submission by way of oral presentation.

Cycleways  
Te Atakura (climate change)  
Te Ngākau funding for future work

**Q17. Your comments on the big decisions (optional)**

Te Ngakau - wants rebuild of CAB and MOB Cycleways - Having lived in Palmerston North - wide streets, flat, a cycling town - Wellington and elsewhere, it is not plausible to regard cycling tracks as a high priority for addressing Wellingtons transport problems. Much has been spent and current projects ??, and then a pause to evaluate the uptake over 2 - 3 years or more. If the existing investment proves worthwhile with a high uptake, there's a future programme (of extending, over the years, not dramatic, short-term) could be developed and implemented. Also, I might add that nor does it seem a great health benefit - much of the increase recently is of electric bikes. And the amount of C02 which would be saved is small compared with other investments targetting this. Climate change - Wellington should steadily + moderately work to reducing its GHG emissions. The trend identified of a 7% reduction 2001 - 2019 is great. Agree central govt policies will be very important, but advocacy for this, with all other local governments, should not be costly.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

[REDACTED]

**Q19. Do you support the proposed budget?**

I somewhat support the proposed budget.

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

The importance of Wellingtons "creative capital" status, and the huge role of the arts and innovation with our economy seem overlooked, and should have place in the 10-year plan.

Cycleways  
Central Library  
Te Ngākau funding for future work

**Q17. Your comments on the big decisions (optional)**

Cycleways are prejudiced towards the young, single and wealthy. The same money invested into our bus system, buying it back from investors seems a better investment. Public transport is infrastructure not a service, Cycleways discriminate against families and result in a higher health care costs. We are not the Netherlands. I cycled to work for 26 years previously but do not feel safe in Wellington. Stop all investment in Cycleways & sort the busses and trains. Any city land should never be sold for any reason. These are the assets of the city, which increase in value over time, Office buildings can be turned into assets run by the city and provide low cost offices to start ups as well as city council offices. Private investors can buy the debt bonds, but shouldn't be allowed to directly profit. Debt costs are very low, much lower than investor costs. Debt rates should be rethought.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

Cycleways  
Central Library  
Te Ngākau funding for future work

**Q17. Your comments on the big decisions (optional)**

Central Library - NO rates increase when the awe option, plus all the other branches, work perfectly fine. I am a heavy user of the library and also a ratepayer. The council needs to be realistic with its spending - fine options that don't require a library specific rate rise. Focus spending on basic services, not "nice to have" items like upgrades to arts facilities, more cycleways etc. LIVE WITHIN YOUR MEANS. When the basics are sorted, only then worry about nice to haves.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

[REDACTED]

**Q19. Do you support the proposed budget?**

I strongly oppose the proposed budget.

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

I support decreasing spend in the current budget.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

not answered

Cycleways  
Central Library

**Q17. Your comments on the big decisions (optional)**

Central Library I am a mother with two small children. I use the library for research purposes (My work) and also for my kids. On average, we frequent libraries 3 sessions week. I am finding the pop-up libraries BRILLIANT. Noise levels are preferable to the older central library. There is a warm, friendly atmosphere - very inviting! I have noticed that my children prefer these smaller spaces. The range of libraries available mean that we have different options! I used to like the central library. But I feel like the popups offer a better option, Cycleways I don't feel safe cycling in Wgtn. I have lived in other cities even Auckland where I did feel safe. I want my kids to grow up cycling, so we are teaching them these skills, however most children in our community opt to scooter instead. They don't know how to ride a bike. Can we please have more dedicated spaces and support for children learning to ride. An initiative for schools is necessary. Otherwise, what's the point of cycleways?

Te Ngākau funding for future work

**Q17. Your comments on the big decisions (optional)**

Te Ngakau I am writing to support the establishment of a National Music Centre in the heart of Wellington City. Te Ngakau Civic Square, and including the use of the earthquake strengthened town hall. The National Music Centre would be the first of its kind in NZ and would be the new home of our wonderful and world class NZSO, and Te Henenga Waka - VUW NZSM - Te Koki. Every New Zealander (And visitor) will enjoy the benefits of a new home, purpose built for NZSM. The NZSO will be able to offer a wide variety of performances, initiate new projects and commissions, and collaborate with the school of music, while continuing to excite, entertain, enrich, educate, and surprise new Zealanders with the greatest music ever written. Lets do this! Lets create a National Music Centre in the heart of Wellington.

Investment in three waters infrastructure  
Wastewater laterals

**Q17. Your comments on the big decisions (optional)**

I fully support the proposed decisions to invest in Wellington's three waters infrastructure, and WCC taking responsibility for wastewater laterals from the property owner's boundary. It is unreasonable for private land owners to be responsible for pipes situated under public accessways and traffic corridors as the private landowner has no control over activities on that land, which could impact the condition of the pipes.

--	--

---

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

Cycleways  
Central Library  
Te Ngākau funding for future work

**Q17. Your comments on the big decisions (optional)**

Cycleways The number of cycleways built are to my mind way over the top! For instance, Brooklyn Road is already wide enough for cyclists to travel safely. We are such a hilly capitol that cycling is difficult for many, and the cycleways that have been built do not seem to be greatly used. Please do not build a cycleway in front of Hataitai! It is very crowded in summer and less parking would mean an accident waiting to happen, as young families would often have to cross that busy road. Council offices Any decision demolishing these and rebuilding civic precinct can surely be made when the Council is not so strapped for cash. Infrastructure improvements are much more essential. As work has already been progressing on the Town Hall, I support it being finished, and used as a music centre. Likewise, the Central Library upgrade/demolish (preferred) can wait a few years. Why not consider rebuilding it using the new Christchurch library design - surely that would save millions of dollars?

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

[REDACTED]

**Q19. Do you support the proposed budget?**

I somewhat oppose the proposed budget.

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Housing More housing is essential - social/transitional/emergency types/ Sadly there are far too many people with nowhere (safe) to sleep. Chinese Garden If we do have to have a chinese garden in Wellington, please don't take away Frank Kitts park - it is much loved, and is used for events. The Chinese Garden was originally going to be housed in Waitangi Park. Could a portion of that park be used instead? Hataitai Beach As a Hataitai Beach user (Swimming) I am frustrated by the large yellow line for no parking, stretching northwards from the pedestrian crossing on the beach sides, what is its purpose (Other than removing several car spaces) as there is no distance between the crossing and parking in the other 3 areas. Please make it shorter. CBD vehicles Please do not make Lambton Quay/Golden Mile car free. Parking fees I don't object to car parking fees being increased slightly, but don't take away more parks please. Elderly and disabled etc need to be able to access/park near the places they are utilising whether doctor, dentist etc or just shopping. Retail owners would very likely notice a huge drop in customers/income.

---

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

<p><b>Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)</b></p>	<p>not answered</p>

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

Investment in three waters infrastructure  
Cycleways  
Central Library

---

**Q17. Your comments on the big decisions (optional)**

Cycleways Expensive underutilised luxury. Finsih Evans Bay & Cobham Drive (Both are attractive pedestrian/cycleways). Fix island bay cycleway on "Uphill" side in a fashion similar to Crawford road (It works!). No new projects until sewers are fixed. Central Library - expensive "Vanity project". Suburban & service centres provide good access. Make current building safe or demolish, preserving civic square facade in the event of being able to put a useful building in this space. Apart from civic sq facade, the building is a butt-ugly concrete bunker. Priority MUST be sewers + water otherwise we add 'cholera' to covid!!

---

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

| Q7. Oral forum time   | not answered  |
| Q8. Oral hearing time   | not answered  |
| Q9. Which of these options do you prefer? (3 waters decision)   | Option 3. Accelerated (\$3.3bn investment – higher rates and debt).   |
| Q10. Which of these options do you prefer? (Wastewater laterals decision)   | not answered  |
| Q11. Which of these options do you prefer? (Cycleways decision)   | Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)                    |
| Q12. Which of these options do you prefer? (Te Atakura Funding decision)  | Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).                                 |
| Q13. Which of these options do you prefer? (Civic Precinct decision)  | not answered  |
| Q14. Which of these options do you prefer? (Central Library decision)   | Option 1. Strengthen now by temporarily exceeding debt limit (Council's preferred option, additional 0.79% to rates). |
| Q15. Which of these options do you prefer?(Sewage sludge and waste decision)  | not answered  |

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library

---

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

---

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

---

**Q19. Do you support the proposed budget?**

not answered

---

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

---

Cycleways

Q17. Your comments on the big decisions (optional)

Investment into cycleways is long overdue for several reasons. It will increase the safety for cyclists which will, as a consequence, allow children to also be able to use their bikes as a means of transport to school, and out of school activities. This will reduce the use of cars and buses and free up time for busy periods and reduce the pollution in the city and increase the health of those cycling. We are upset about any person dying of covid-19. but we take into account on a daily basis the deaths of cyclists? Because of the long list of positive follow on effects (incl the reduction of cost such as ACC) the investment into cycleways should not be looked at in isolation and are actually much cheaper long term for individual who take up cycling (eg petrol cost and bus tickets)

Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)

- Q9. **Which of these options do you prefer? (3 waters decision)** Option 3. Accelerated (\$3.3bn investment – higher rates and debt).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** not answered
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** not answered
- Q14. **Which of these options do you prefer? (Central Library decision)** Option 1. Strengthen now by temporarily exceeding debt limit (Council's preferred option, additional 0.79% to rates).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** not answered

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library

---

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

---

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

---

**Q19. Do you support the proposed budget?**

not answered

---

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

Investment in three waters infrastructure  
Wastewater laterals  
Cycleways  
Central Library  
Sludge and waste minimisation  
Te Ngākau funding for future work

**Q17. Your comments on the big decisions (optional)**

3 Waters Infrastructure Central Govt has made clear moves in this area, and hopefully a better outcome will be for all of NZ, including Wellington Region in regards capture, storage, supply, distribution of water and cost for ratepayers. But it looks like in Wellington City the chickens are coming home to roost with the inability of staff and Councillors over the decades to ensure our pipes and supply were protected. I strongly opposed to water meters on residential homes in this city. I was in a group who gathered signatures for a year of over 17000 people to oppose water meters. A Mr Frank Cook, gave a presentation to Councillors as to how he had traced and analysed where all tube water leaks were. 90% is in the shoddy CBD so put water meters on them Wastewater laterals I'm pleased to see the Council taking ownership of the laterals. Cycleways I'm please to see the ongoing development of safe cycleways. But LGWM is coming to a slow death on the major issues. Apart from education (about biking and walking) I wish to see Council foster other ideas such as a greater degree of car/ride sharing. No cars in peak hours unless three persons inside. Also the parallel urgent need to have better\* faster, and cleaner powered buses. Light rail is a non starter. Te Atakura First to Zero I'm please to see funding start on this very important policy. Climate is going to impact in many ways on our city. Civil Precinct Lets see the plan. I suspect like many Council Officer plans it will overstate The benefits and understate the costs CBD Library I submitted to Council that I was in favour as first choice of a new build. I still am. But in spite of the majority of Wellingtonians wanting Council, after some adjusted build costs by officers, resolved to stick with fixing up the present mess. Ok, so I still to see project started, and finished with urgency. The Library was the heart, and its not beating and looks like many years will pass before is opened. What shame! Sludge and waste Yes, we need to jump ahead in this area. We are behind the pump. (pun), Feedback on options: I want to comment on all options — hence these notes — and my expected attendance at an Oral Forum. Proposed 10 year budget "I somewhat oppose the proposed budget" is my position. In all my networks ratepayers are furious as to the predicament we are in. Basically any rate rise about 5% or 6% is sending citizens into revolt. Proposed rate increase is one of the highest in NZ. Appalling. Where is the discussion about options other than accepting huge rate increases. Let's have a DISCUSSION, debate on other options. a) Sell the 34% of airport shares. Maybe \$300m there and freeing ourselves of the shackles of a private company growing their profit. b) Once the Conference Centre is completed: sell it. It will become an elephant for ratepayers anyway. c) Have a moratorium on all projects for 2-3 years in a bid to save \$20 to \$30million. Or have the discussion to trim projects by 20%. The previous Mayor did work with the CEO and Management to gain savings on operations.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

[Redacted]

**Q19. Do you support the proposed budget?**

I somewhat oppose the proposed budget.

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

I support decreasing spend in the current budget.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues to comment on a) Fees increase All liquor Licensing matters should be user pay. That is, licensing fees must also included the full operations of the District Licensing Committee. Dog Licenses are fully recoverable — so should Liquor Licensing be. b) Local Alcohol Policy The city urgently needs one. The Hospitality industry shot down the previous attempt to gain a LAP. I have been involved with communities in the CBD, Newtown and Kilbirnie, and also individually in 20 contested cases regarding alcohol to gain moderation and responsibility since the bad Sale and Supply of Alcohol Act 2012. The Act's authors tout that it was suppose to be easier for communities to have a say which in reality is not the case. A LAP should include: 1) one way door policy — once a punter is in after 11pm, they stay there and don't go off pub crawling. All pubs close at 3am rather than the present default hours. 2) Pubs lower their prices to encourage punters into bars, to reduce pre loading. But neither should licensees encourage excessive drinking. 3) Police step up to some pubs with known bad host responsibilities and close them down. 4) ALL Off Licenses, including supermarkets stop alcohol sales after 8pm both in the CBD and in all suburban areas. Council research showed that persons who brought booze from an Off License in the evening would drink it within 2 hours of purchase. 5) Then there is research that shows that crime and disorder increases within 800 met-res of every Off Licenses (The Courtney Place mess). 6} Police pro actively police the Alcohol Ban areas more. There is much more I could say but will exercise restraint. Social Housing: O dear: This is a bit embarrassing to Council and Officers. (and us ratepayers). The Independent Auditors is critical (page 72 of the Ten Year Plan). She references page 52 that Council Officers have calculated \$446 million is needed over 10 years to complete the legally required upgrade programme and to meet maintenance costs but only \$42.8m has been included in Councils budget. Page 52 states "However City Housing will Chen become insolvent from June 2023." Well, Council seems to be chasing more \$ from Central Govt. Let's hold our breath. If Central Govt doesn't front with the \$ what then? Central to the issue is that the vast majority of ratepayers do not understand the complexity of this situation, but also Council Officers have been remiss at not informing the ratepayers Of this disaster. Some Councils in NZ have hocked off their social housing properties — to their public shame full peril, Other Councils have worked through the financial and political shortcomings. What went wrong — who should be held accountable for this nightmare - who exercises oversight in this multi million dollar bungle

Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?

I applaud and strongly support this decision of the Committee (Referencing Annual Plan/LTP Committee March 4th 2021 meeting where they agreed to include an upgrade of Begonia House, as costed at 7.748m over years 3 - 6) The botanic garden is usually the most visited amenity in the city each year, and th Begonia House a recognised destination and meeting point for many groups. It provides year-round all-weather accessibility for visitors of varied physical abilities to a scientifically important and aesthetically pleasing collection of plants, of which understanding becomes increasingly important as climate change accelerates. It is used for education outside the classroom by groups of both university and high school students. Garden groups and international tourists are frequent visitors in normal times. With adjacent parking, it is one of the few accessible places where disabled people can visit and commune with nature with relative ease. The adjacent cafe makes a useful contribution to operating costs of the garden. The current structure is bedraggled, iyts building services are sub-standard, the temperature control so crucial to the wellbeing of the plant collection is dysfunctional, and the door and window joinery so poor that the shop had to be relocated to the Treehouse, where its earnings are substantially reduced due to the smaller flow of foot traffic. Retaining renovation of the Begonia house in the LTP should facilitate brining the facility up to standard, but also improving the flow around the hothouse-cafe-rose garden precinct. The plans should facilitate holding functions like businesses socials and weddings to increase revenue. Given its north-east orientation and good sun profile, in my dreams I see solar panels on the roof to offer cost savings by meeting some of the energy needs, and to visibly reinforce the Councils commitment to climate change actions. The roof would also provide a great opportunity for water harvesting to help meet plant needs.

Cycleways

---

Q17. Your comments on the big decisions (optional)

Cycleways \$14.8 million as opposed to another cities effort

---

Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)

not answered

---

Q19. Do you support the proposed budget?

I somewhat oppose the proposed budget.

---

Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?

I support decreasing spend in the current budget.

---

Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?

Submission to the Draft Annual Plan for 2021 / 2022. 1. I wish to speak to the Mayor and full complement of Councillors. 2. I would like to state that I fundamentally oppose the proposed 13.5% rates increase for 2021/2022. 3. I oppose the continued shift in the differential. This is unfair to business who carry an unfair burden of the cities rates which the Council just continues to increase. 4. I would like to see more value for the ratepayer dollar. 5. I would like to see more partnerships. You had an opportunity to be in partnership with local lwi in Shelley Bay and you squandered that. 6. I want to see an end to the infighting, poor decision making, poor consultation, poor attendance in the community and want you to start earning the money you are getting paid. Start operating as a Team and put your pathetic self interest away where it belongs. 7. Start being open and transparent and maybe just maybe you will earn the Wellington Public's respect back. Projects Cycleways \$14.8 million as opposed to another cities effort Boat Ramps Virtually no maintenance or upkeep Bus corners Do them a different way for the following reasons. Main roading projects and core infrastructure (pipes) should be a priority for you. Taxi stands and motorcycle stands Central Governance.

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

<p><b>Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)</b></p>	<p>not answered</p>

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library

---

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

---

**Q19. Do you support the proposed budget?**

not answered

---

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

<p><b>Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)</b></p>	<p>not answered</p>

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

---

**Q19. Do you support the proposed budget?**

not answered

---

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

---

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** Option 2. Take ownership (Council's preferred option, \$32m investment).
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** Option 3. Retain and seek to repurpose (higher debt and rates)
- Q14. **Which of these options do you prefer? (Central Library decision)** Option 1. Strengthen now by temporarily exceeding debt limit (Council's preferred option, additional 0.79% to rates).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 4. Sludge minimisation through alternate funding (Council's preferred option, \$147m to \$208m capital investment funded through a levy, no additional rates increase)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Cycleways  
Te Atakura (climate change)  
Central Library

---

**Q17. Your comments on the big decisions (optional)**

Cycleways The development of cycleways should be maximised to encourage wide use of cycling by providing safe cycleways matching - but not necessarily the same roads as the full city bus route coverage! The emphasis should be on safety and providing complete connections. The cycleways should be supported by suitability placed cycloracks, cycle "fixit" stands with pumps and chargable (user pays) ebike charging stations. The plan also needs to clearly distinguish the LGWM components and the plan for their implementation so it is easy understood how it all fits together. Also add some water stations along less populated areas and on hilly cycleways. Te Atakura This needs to be a very high priority! We also need more areas like Kai-cycle in Newtown and greater focus on gardens and composting and provide locally organically grown fruit & vegetables. There is no reference to a food plan in the LTP but it is "to be developed" - this needs high priority! There needs to be mandated green areas in all areas of the spatial design plan and encouraged from wcc. Perhaps free plants - esp for rooftop gardens. Central Library Take measures to enhance the online availability of all media - newspapers, music, film, books, WHILE WE WAIT or the remediation of the building - do some remediation of the....

---

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

---

**Q19. Do you support the proposed budget?**

I somewhat oppose the proposed budget.

---

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

Don't know.

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

I would have preferred to have been provided with more detail to understand the scope and impact of each major component of the 10 year budget. There is a lack of detail on LGWM and its relationship to cycleways, spatial design and climate change. There should be an overarching plan showing how the decisions and designs are interlinked and contributing to the overall WCC objectives for Wellington.

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library

---

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

<p><b>Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)</b></p>	<p>not answered</p>

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
 Cycleways  
 Te Atakura (climate change)  
 Central Library  
 Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)** not answered

**Q19. Do you support the proposed budget?** not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?** not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

--	---

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

<p><b>Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)</b></p>	<p>not answered</p>
---	---------------------

<p><b>Q19. Do you support the proposed budget?</b></p>	<p>not answered</p>
--	---------------------

<p><b>Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?</b></p>	<p>not answered</p>
---	---------------------

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

---

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

| Q14. Which of these options do you prefer? (Central Library decision)   | Option3. Strengthen now by increasing rates further (additional 1.79% rates increase).  |
| Q15. Which of these options do you prefer?(Sewage sludge and waste decision)  | Option 3. Sludge minimisation through Council funding (\$147m to \$208m capital investment, above debt limit, and higher rates) |

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
 Cycleways  
 Te Atakura (climate change)  
 Central Library  
 Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)** not answered

**Q19. Do you support the proposed budget?** not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?** not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library

---

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

<b>Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?</b>	not answered
--	--------------

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

---

| Q4. What organisation are you submitting on behalf of?  | not answered  |
| Q5. Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?  | No  |
| Q6. If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer? | not answered  |
| Q7. Oral forum time   | not answered  |
| Q8. Oral hearing time   | not answered  |
| Q9. Which of these options do you prefer? (3 waters decision)   | Option 3. Accelerated (\$3.3bn investment – higher rates and debt).   |
| Q10. Which of these options do you prefer? (Wastewater laterals decision)   | not answered  |
| Q11. Which of these options do you prefer? (Cycleways decision)   | Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)                              |
| Q12. Which of these options do you prefer? (Te Atakura Funding decision)  | Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).   |
| Q13. Which of these options do you prefer? (Civic Precinct decision)  | not answered  |
| Q14. Which of these options do you prefer? (Central Library decision)   | Option3. Strengthen now by increasing rates further (additional 1.79% rates increase).  |
| Q15. Which of these options do you prefer?(Sewage sludge and waste decision)  | Option 3. Sludge minimisation through Council funding (\$147m to \$208m capital investment, above debt limit, and higher rates) |

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library  
Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

- Q4. What organisation are you submitting on behalf of? not answered
- Q5. Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum? No
- Q6. If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer? not answered
- Q7. Oral forum time not answered
- Q8. Oral hearing time not answered
- Q9. Which of these options do you prefer? (3 waters decision) not answered
- Q10. Which of these options do you prefer? (Wastewater laterals decision) not answered
- Q11. Which of these options do you prefer? (Cycleways decision) Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. Which of these options do you prefer? (Te Atakura Funding decision) not answered
- Q13. Which of these options do you prefer? (Civic Precinct decision) not answered
- Q14. Which of these options do you prefer? (Central Library decision) not answered
- Q15. Which of these options do you prefer?(Sewage sludge and waste decision) Option 3. Sludge minimisation through Council funding (\$147m to \$208m capital investment, above debt limit, and higher rates)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Cycleways  
Sludge and waste minimisation

---

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model.

---

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

---

**Q19. Do you support the proposed budget?**

not answered

---

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

---

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

- Q4. **What organisation are you submitting on behalf of?** not answered
- Q5. **Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?** No
- Q6. **If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer?** not answered
- Q7. **Oral forum time** not answered
- Q8. **Oral hearing time** not answered
- Q9. **Which of these options do you prefer? (3 waters decision)** None of these options.
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** not answered
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** not answered
- Q14. **Which of these options do you prefer? (Central Library decision)** not answered
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** not answered

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Cycleways  
Te Atakura (climate change)

---

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington.

---

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

---

**Q19. Do you support the proposed budget?**

not answered

---

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

---

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library

---

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect.

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

---

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library

---

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

- Q6. **If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer?** not answered
- Q7. **Oral forum time** not answered
- Q8. **Oral hearing time** not answered
- Q9. **Which of these options do you prefer? (3 waters decision)** Option 3. Accelerated (\$3.3bn investment – higher rates and debt).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** not answered
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** not answered
- Q14. **Which of these options do you prefer? (Central Library decision)** Option3. Strengthen now by increasing rates further (additional 1.79% rates increase).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 3. Sludge minimisation through Council funding (\$147m to \$208m capital investment, above debt limit, and higher rates)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library  
Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)** not answered

**Q19. Do you support the proposed budget?** not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?** not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library

---

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

---

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital. I believe WCC doesn't go about building its cycleway in the right manner -- they are piecemeal. Instead they should build a continuous safe path from the outer suburb into the waterfront. Only by having paths that parents can be confident their children can cycle safely on, will we get transformational change.

- Q14. **Which of these options do you prefer? (Central Library decision)** Option3. Strengthen now by increasing rates further (additional 1.79% rates increase).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 3. Sludge minimisation through Council funding (\$147m to \$208m capital investment, above debt limit, and higher rates)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library  
Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital. We need to offer safer cycling for our children and future generations.

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily. Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

**Q19. Do you support the proposed budget?** not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?** not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily. Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

| Q15. Which of these options do you prefer?(Sewage sludge and waste decision)  | Option 3. Sludge minimisation through Council funding (\$147m to \$208m capital investment, above debt limit, and higher rates) |

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library  
Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC supporting Māori to explore ways co-governance can be implemented in Wellington. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.

Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital. Any politician who refuses to accept that global warming is a crisis is either stupid, corrupt, incompetent or a combination of all of these. We need politicians who have some integrity and guts.

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

<p><b>Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)</b></p>	<p>not answered</p>
---	---------------------

<p><b>Q19. Do you support the proposed budget?</b></p>	<p>Don't know.</p>
--	--------------------

<p><b>Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?</b></p>	<p>not answered</p>
---	---------------------

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library

---

**Q17. Your comments on the big decisions (optional)**

Three Waters comments: I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city. I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact. Te Atakura comments: I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action. I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura. I support WCC/GWRC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise. I support WCC/GWRC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change. Cycleways comments: I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency. I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years. I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury. I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport. I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles. Library Comments: I support Council restoring the Central Library as soon as possible by adopting Option 1. I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect. I support Council considering how it can provide community gardens and composting facilities around Wellington. I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Te Tiriti o Waitangi obligations I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards. I think that WCC and GRWC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like. I think that each activity or project WCC/GWRC commit to must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan. I support WCC/GWRC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making. Debt comments I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing. I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs. WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily. Safe Streets comments I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.

 Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)** not answered

**Q19. Do you support the proposed budget?** not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?** not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital. My son and I only cycle, we do not have a car. He is 11, it is dangerous to not have this infrastructure. I dont have a car because I am trying to use as little carbon as possible.

| Q13. Which of these options do you prefer? (Civic Precinct decision)  | not answered  |
| Q14. Which of these options do you prefer? (Central Library decision)   | Option3. Strengthen now by increasing rates further (additional 1.79% rates increase).  |
| Q15. Which of these options do you prefer?(Sewage sludge and waste decision)  | Option 3. Sludge minimisation through Council funding (\$147m to \$208m capital investment, above debt limit, and higher rates) |

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library  
Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital. As we are in a climate emergency, the aim must be to reduce motor traffic substantially and that can only be done by avoiding spending on projects that will encourage people to stay in their cars. So no new large road projects, no new tunnels unless they are solely for public transport, cyclists and pedestrians. Despite knee-jerk opposition to cycleways in Wellington whenever they are planned or even mentioned, we must continue to develop new cycleways apace, as well as pedestrianizing a lot more of the central city, even if retailers oppose it. They will benefit from that in the end, as they have done in countless cities in Europe.

Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital. There are so many people wanting to make the mode shift to cycling. As a cycle instructor I support children and adults to use a bike as a means of transport. Comprehensive and safe infrastructure is essential for this to happen. 247,000 cycle journeys in Wellington last month. Wellingtonians want to ride and are doing so in ever greater numbers. More cycling journeys are one of the easiest ways to solve our city's transport issues.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital. I've been cycling to work most days since June 2020 and it's just so much more convenient than taking my car or public transport. If I need to go somewhere after work it is much faster than driving my car across Wellington.

- Q8. Oral hearing time not answered
- Q9. Which of these options do you prefer? (3 waters decision) Option 3. Accelerated (\$3.3bn investment – higher rates and debt).
- Q10. Which of these options do you prefer? (Wastewater laterals decision) not answered
- Q11. Which of these options do you prefer? (Cycleways decision) not answered
- Q12. Which of these options do you prefer? (Te Atakura Funding decision) Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. Which of these options do you prefer? (Civic Precinct decision) not answered
- Q14. Which of these options do you prefer? (Central Library decision) Option3. Strengthen now by increasing rates further (additional 1.79% rates increase).
- Q15. Which of these options do you prefer?(Sewage sludge and waste decision) Option 3. Sludge minimisation through Council funding (\$147m to \$208m capital investment, above debt limit, and higher rates)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Te Atakura (climate change)  
Central Library  
Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital. As I walk my dog regularly around Newtown shops/Hospital area, I see so many cars driving too fast and ignoring red lights. I cannot believe how often I witness such dangerous driving on those busy, pedestrian heavy streets. Can something be done about this???

These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

- Q4. **What organisation are you submitting on behalf of?** not answered
- Q5. **Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?** No
- Q6. **If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer?** not answered
- Q7. **Oral forum time** not answered
- Q8. **Oral hearing time** not answered
- Q9. **Which of these options do you prefer? (3 waters decision)** Option 3. Accelerated (\$3.3bn investment – higher rates and debt).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** not answered
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** not answered
- Q14. **Which of these options do you prefer? (Central Library decision)** Option3. Strengthen now by increasing rates further (additional 1.79% rates increase).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 3. Sludge minimisation through Council funding (\$147m to \$208m capital investment, above debt limit, and higher rates)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library  
Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

- Q2. Phone number: not answered
- Q3. Are you making this submission as an individual or on behalf of an organisation? Individual
- Q4. What organisation are you submitting on behalf of? not answered
- Q5. Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum? No
- Q6. If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer? not answered
- Q7. Oral forum time not answered
- Q8. Oral hearing time not answered
- Q9. Which of these options do you prefer? (3 waters decision) Option 3. Accelerated (\$3.3bn investment – higher rates and debt).
- Q10. Which of these options do you prefer? (Wastewater laterals decision) not answered
- Q11. Which of these options do you prefer? (Cycleways decision) Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. Which of these options do you prefer? (Te Atakura Funding decision) Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. Which of these options do you prefer? (Civic Precinct decision) not answered
- Q14. Which of these options do you prefer? (Central Library decision) not answered
- Q15. Which of these options do you prefer?(Sewage sludge and waste decision) Option 3. Sludge minimisation through Council funding (\$147m to \$208m capital investment, above debt limit, and higher rates)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

- Q7. **Oral forum time** not answered
- Q8. **Oral hearing time** not answered
- Q9. **Which of these options do you prefer? (3 waters decision)** Option 3. Accelerated (\$3.3bn investment – higher rates and debt).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** not answered
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** not answered
- Q14. **Which of these options do you prefer? (Central Library decision)** Option3. Strengthen now by increasing rates further (additional 1.79% rates increase).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 3. Sludge minimisation through Council funding (\$147m to \$208m capital investment, above debt limit, and higher rates)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
 Cycleways  
 Te Atakura (climate change)  
 Central Library  
 Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)** not answered

**Q19. Do you support the proposed budget?** not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?** not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital. I, as a rate payer and voter am annoyed by my council representatives who when standing for election "say all the right things" then when in power - "change their stance". This undermines our (the voters/their employeers) trust in our elected officials - if you commit then have the moral and ethical strength to follow through. It is time to make big decisions, moves - stop tweeking the knobs and re-arrangig the deck chairs, get on and BE visionary. I know it'll cost me, but look at where deferrig cost has got us :-(

 Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)** not answered

**Q19. Do you support the proposed budget?** not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?** not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

Q19. Do you support the proposed budget?

I strongly oppose the proposed budget.

Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?

not answered

Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?

It's very sad to see everyday rubbish from our Council and staff - so awful - rates to go up on my way house by 13.35%  
You must be joking! No way !! VTAO !!

I somewhat oppose the proposed budget.

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

An idea - more community impact sites (at Council Owned Waste Sites) and a Woranest for more eco-friendly waste management. Then the general public for a fee could buy. This composted soil when applicable. Eg. measured community environment in organic waste. For example I live in a house complex currently at 120 Rintoul St, and there's no way to use organic/compostable waste. Or if there - I'd love to find out.

- Q8. **Oral hearing time** not answered
- Q9. **Which of these options do you prefer? (3 waters decision)** Option 2. Enhanced investment (\$2.4bn - the Council's preferred option).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** Option 2. Take ownership (Council's preferred option, \$32m investment).
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 3: High investment programme (\$120m capital investment - Council's preferred option)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** Option 1. Demolish and site developed through long-term lease (Council's preferred option).
- Q14. **Which of these options do you prefer? (Central Library decision)** Option 1. Strengthen now by temporarily exceeding debt limit (Council's preferred option, additional 0.79% to rates).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 4. Sludge minimisation through alternate funding (Council's preferred option, \$147m to \$208m capital investment funded through a levy, no additional rates increase)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Cycleways

**Q17. Your comments on the big decisions (optional)**

I support the improvement in cycleways, but abit concerned for the safety of cyclists. I think it important to begin to reduce vehicle congestion in the city before we encourage the cyclists. Also, what happens when the cyclists get into the city? I think we need cycle parking sites where cyclists can safely leave their bikes and carry on on foot. I realise, of course, that these decisions may be affected by the government revise.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

[REDACTED]

**Q19. Do you support the proposed budget?**

I strongly support the proposed budget.

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

not answered

- Q3. Are you making this submission as an individual or on behalf of an organisation? Individual
- Q4. What organisation are you submitting on behalf of? not answered
- Q5. Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum? No
- Q6. If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer? not answered
- Q7. Oral forum time not answered
- Q8. Oral hearing time not answered
- Q9. Which of these options do you prefer? (3 waters decision) Option 3. Accelerated (\$3.3bn investment – higher rates and debt).
- Q10. Which of these options do you prefer? (Wastewater laterals decision) Don't know.
- Q11. Which of these options do you prefer? (Cycleways decision) Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. Which of these options do you prefer? (Te Atakura Funding decision) Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. Which of these options do you prefer? (Civic Precinct decision) not answered
- Q14. Which of these options do you prefer? (Central Library decision) Option3. Strengthen now by increasing rates further (additional 1.79% rates increase).
- Q15. Which of these options do you prefer?(Sewage sludge and waste decision) Option 3. Sludge minimisation through Council funding (\$147m to \$208m capital investment, above debt limit, and higher rates)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
 Cycleways  
 Te Atakura (climate change)  
 Central Library  
 Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)** not answered

**Q19. Do you support the proposed budget?** not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?** not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital. I bike to school most days. I would bike more often if there were cycle paths to get to my after school activities but they're the other side of town and too dangerous to get to right now.

I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital. "I support provision of road facilities for e-scooters. I support any development of heavy and light rail. I support prioritising pedestrians over current to road users. And, most importantly, I support hugely increased borrowing, ideally by the issuance of Long- Term (decades long) bonds, to take action on the above and other ventures that enhance life for all Wellington citizens."

 Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)** not answered

**Q19. Do you support the proposed budget?** not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?** not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital. Announcements of new cycling infrastructure need to cover the additional benefits. For example, the Petone to Ngauranga project improves the sea wall for Kiwirail, provides an emergency vehicle access path, etc. The nay sayers latch onto "cycling projects costing X million" when in fact many parties benefit.

---

- Q7. **Oral forum time** not answered
- Q8. **Oral hearing time** not answered
- Q9. **Which of these options do you prefer? (3 waters decision)** Option 3. Accelerated (\$3.3bn investment – higher rates and debt).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** not answered
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** not answered
- Q14. **Which of these options do you prefer? (Central Library decision)** Option3. Strengthen now by increasing rates further (additional 1.79% rates increase).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 3. Sludge minimisation through Council funding (\$147m to \$208m capital investment, above debt limit, and higher rates)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library  
Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

| Q14. Which of these options do you prefer? (Central Library decision)   | not answered  |
| Q15. Which of these options do you prefer?(Sewage sludge and waste decision)  | Option 3. Sludge minimisation through Council funding (\$147m to \$208m capital investment, above debt limit, and higher rates) |

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

not answered

Q17. Your comments on the big decisions (optional)

1. I believe that we think that water is free and endless. Advertising suggests that we need to be so clean. Maybe with a bit of thought we can treat water for what it is - a precious resource to be used wisely and carefully/ 3. Cycleways are a great idea. I really admire and respect cyclists making an effort to reduce carbon emissions. However, many streets have less parked on both sides, seemingly most of the day. It would be very helpful for cyclists to be given more space on the roads. 4. Vehicles, whether petrol, diesel or electric, are and "addiction" really (I'm guilty in this), although I travel to clients for my work. I believe it's necessary to encourage serious thought and action to limit car/vehicle use. During lockdown there was very little traffic around. I assume work was still being done online. More public transport is needed at a very affordable rate. Change car users in some ways and make us think more whether we can find another way to get around. 6. Is it possible to fix the Central Library in parts and have some areas open? I heard that a number of inspections were done and the work needs doing but the library as it is did survive a large earthquake already.

Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)

[Redacted]

Q19. Do you support the proposed budget?

not answered

Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?

not answered

Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?

I am totally against building another tunnel for traffic. It may deal slightly in one are but we need less traffic throughout Wellington. Car sharing would be good buy as individuals we believe it's necessary to have a vehicle and maybe have several in a family. And vehicles seem to be much larger than they used to be. Withing advertisements for vehicles driving over mountains and through rivers makes me think "those shouldn't be driving on our roads in the city or suburbs. Climate change management, proper care of resources, reducing waste. Are we really serious and not abuse what we are doing and how are living?

- Q14. **Which of these options do you prefer? (Central Library decision)** not answered
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** not answered

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library  
Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

- Q1. Full name: Quinn Kueppers
- Q2. Phone number: not answered
- Q3. Are you making this submission as an individual or on behalf of an organisation? Individual
- Q4. What organisation are you submitting on behalf of? not answered
- Q5. Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum? No
- Q6. If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer? not answered
- Q7. Oral forum time not answered
- Q8. Oral hearing time not answered
- Q9. Which of these options do you prefer? (3 waters decision) Option 3. Accelerated (\$3.3bn investment – higher rates and debt).
- Q10. Which of these options do you prefer? (Wastewater laterals decision) not answered
- Q11. Which of these options do you prefer? (Cycleways decision) Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)
- Q12. Which of these options do you prefer? (Te Atakura Funding decision) Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. Which of these options do you prefer? (Civic Precinct decision) not answered
- Q14. Which of these options do you prefer? (Central Library decision) Option3. Strengthen now by increasing rates further (additional 1.79% rates increase).
- Q15. Which of these options do you prefer?(Sewage sludge and waste decision) Option 3. Sludge minimisation through Council funding (\$147m to \$208m capital investment, above debt limit, and higher rates)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library  
Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

not answered

Q17. Your comments on the big decisions (optional)

LGWM (which is not of course included here) is top of my mind: Wgtn has an ever increasing older population who don't ride bikes, shouldn't use cars (both for the environment for general safety). So: fix the buses, fix the pipes and get on with rest with more compromise + negotiation amongst councillors.

Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)

| Q14. Which of these options do you prefer? (Central Library decision)   | Option3. Strengthen now by increasing rates further (additional 1.79% rates increase).  |
| Q15. Which of these options do you prefer?(Sewage sludge and waste decision)  | Option 3. Sludge minimisation through Council funding (\$147m to \$208m capital investment, above debt limit, and higher rates) |

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library  
Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council taking on additional debt by raising its debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)** not answered

**Q19. Do you support the proposed budget?** not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?** not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital. I have read and support the submission of the Wellington Zero Water Community.

| Q3. Are you making this submission as an individual or on behalf of an organisation?  | Individual  |
| Q4. What organisation are you submitting on behalf of?  | not answered  |
| Q5. Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?  | No  |
| Q6. If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer? | not answered  |
| Q7. Oral forum time   | not answered  |
| Q8. Oral hearing time   | not answered  |
| Q9. Which of these options do you prefer? (3 waters decision)   | Option 3. Accelerated (\$3.3bn investment – higher rates and debt).   |
| Q10. Which of these options do you prefer? (Wastewater laterals decision)   | not answered  |
| Q11. Which of these options do you prefer? (Cycleways decision)   | Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)                              |
| Q12. Which of these options do you prefer? (Te Atakura Funding decision)  | Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).   |
| Q13. Which of these options do you prefer? (Civic Precinct decision)  | not answered  |
| Q14. Which of these options do you prefer? (Central Library decision)   | not answered  |
| Q15. Which of these options do you prefer?(Sewage sludge and waste decision)  | Option 3. Sludge minimisation through Council funding (\$147m to \$208m capital investment, above debt limit, and higher rates) |

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

Q17. Your comments on the big decisions (optional)

Not sure where this fits, No 5 probably but I hear many people wanting bike uses to not only be registered but pay towards parking spaces they now get free. It all costs us to give them these services for nothing. There is a lot of cost in providing with footpaths, bike lanes and parking and it's fair they pay. Also on roads they are unaccountable for poor cycling as not only identified. Thanks. Car users especially older owners have little choice , taxis too expensive and buses not in right places for many so it is vital for them to not be discriminated against by making it harder and rare to bring car to town - my med apps are in the city. Be fair/kind etc etc.

Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)

[REDACTED]

Q19. Do you support the proposed budget?

I strongly oppose the proposed budget.

Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?

I support keeping the budget the same but with some changes.

Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?

FOR ALL QUESTION The priority for WCC + ratepayers is to fix the mess that her developed over years pf mismanagement. So need the basic now and leave the flippery for later. The majority (not the one, you choose to survey) do not what more cycleways for a minority to rise on. So Q3, step now or just couple to those undoing as no more roads mixed. Ditto No 4. let supervisor do this it hey or central govt - it is not ratepayers job ass to find these projects. Q5. Use, restore don't waste resources. Q6 Since it closed, many have forced the local hubs work really well - Braton, Molesworth etc and broader so do not have a central library - like local, use local as it near a car into town (or maybe a bar if suits) just to do whatever locally. Sell it to a developer or business or combination and make money waste it. Q9 Many of us do not or cannot keep finding ruse rate increases while WCC continues to waste it on vanity projects. Stick to basics we need infrastructure, water etc. And no more bike lanes at the expenses of elderly needing safe foods.

| Q9. Which of these options do you prefer? (3 waters decision)   | Option 3. Accelerated (\$3.3bn investment – higher rates and debt).   |
| Q10. Which of these options do you prefer? (Wastewater laterals decision)   | not answered  |
| Q11. Which of these options do you prefer? (Cycleways decision)   | Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)                              |
| Q12. Which of these options do you prefer? (Te Atakura Funding decision)  | Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).   |
| Q13. Which of these options do you prefer? (Civic Precinct decision)  | not answered  |
| Q14. Which of these options do you prefer? (Central Library decision)   | Option3. Strengthen now by increasing rates further (additional 1.79% rates increase).  |
| Q15. Which of these options do you prefer?(Sewage sludge and waste decision)  | Option 3. Sludge minimisation through Council funding (\$147m to \$208m capital investment, above debt limit, and higher rates) |

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
 Cycleways  
 Te Atakura (climate change)  
 Central Library  
 Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)** not answered

**Q19. Do you support the proposed budget?** not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?** not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital. "The biggest deterrent (in my opinion) that deters people who currently don't cycle but wish to cycle in Wellington is not the wind, nor the hills, nor cold rainy days but the VEHICLE TRAFFIC and its perceived dangers to cyclists (especially made up during commuter hours of largely single occupant cars). The increased popularity and numbers of e-bikes counter the motorists' arguments of too hilly, too windy, rains every day etc for Wellington not being a city for cycling. The 'narrow streets' particularly in Wellington's suburbs are made even more narrow by hundreds of residents' cars parked on the streets. Organisations like WCC can either promote a given activity by providing infrastructure or facilities, or suppress an activity by not funding it or providing very little funding. So WCC could promote cycling by building more cycle infrastructure, but has a fairly poor track record in this area in past years. A great example of promoting an activity was WCC building the Central Library and when it opened membership surged as the library could exhibit more material in the new building with more space than was possible in the old central library where much material had to be kept in storage. Also WCC had to install a new library computer system to handle the increased borrowing that occurred when the new Central Library opened. Money well spent by WCC! WCC could thus release pent up demand for cycling in Wellington by funding cycling infrastructure e.g. cycleways so that new or hesitant cyclists would be able to cycle around the city without having to compete with motor vehicle traffic on the same part of the roadway. "

Central Library

**Q17. Your comments on the big decisions (optional)**

I am a librarian by profession + while I valued the resources + staff at the Central Library. I have no romantic attachment to the building. I am concerned that Council and ratepayers have committed to so many rebuilds of community spaces, the Town Hall, St Johns, the Embassy (in the past) etc. The pivot of library services through smaller community spaces is to be congratulated. The intimacy these afford communities and the multipurpose facilities should continue this path. The central library was of its time - Be brave do sometime on a smaller scene don't try to be everything to all people. Collections are rapidly changing we are format in Wellington to have Natural library, National Archives, Te Papa + other local authority museums + librarians. no need to build another carefree to books + learning make it a community space merge it with the Council building Art Gallery or ? and provide a dynamic space for all.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

| Q1. Full name:  | Trevor Macdonald  |
| Q2. Phone number:   | not answered  |
| Q3. Are you making this submission as an individual or on behalf of an organisation?  | Individual  |
| Q4. What organisation are you submitting on behalf of?  | not answered  |
| Q5. Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?  | No  |
| Q6. If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer? | not answered  |
| Q7. Oral forum time   | not answered  |
| Q8. Oral hearing time   | not answered  |
| Q9. Which of these options do you prefer? (3 waters decision)   | Option 3. Accelerated (\$3.3bn investment – higher rates and debt).   |
| Q10. Which of these options do you prefer? (Wastewater laterals decision)   | not answered  |
| Q11. Which of these options do you prefer? (Cycleways decision)   | Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)                              |
| Q12. Which of these options do you prefer? (Te Atakura Funding decision)  | Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).   |
| Q13. Which of these options do you prefer? (Civic Precinct decision)  | not answered  |
| Q14. Which of these options do you prefer? (Central Library decision)   | Option3. Strengthen now by increasing rates further (additional 1.79% rates increase).  |
| Q15. Which of these options do you prefer?(Sewage sludge and waste decision)  | Option 3. Sludge minimisation through Council funding (\$147m to \$208m capital investment, above debt limit, and higher rates) |

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library  
Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model.

<p><b>Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)</b></p>	<p>not answered</p>
---	---------------------

---

<p><b>Q19. Do you support the proposed budget?</b></p>	<p>not answered</p>
--	---------------------

---

<p><b>Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?</b></p>	<p>not answered</p>
---	---------------------

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle.

Cycleways  
Te Atakura (climate change)  
Central Library

**Q17. Your comments on the big decisions (optional)**

Cycleways Wellington roads are congested + windy : industry in cycle infrastructure is key to make this a safe and reliable option for us. Considering the CBD excluding private vehicle access instead have open pedestrian/cycle/buses/emergency vehicle access. Cycleways contribute to lowering transport emissions. Mistakes of Island Bay cycleways: please prioritise safe cycleways and car parking- the idea should be to reduce cars and parking. High investment will pay all in the long run. Te Atakura Agree with fully funding. We should not just be 'sufficient', but country and world leaders in climate action and innovation. Integrate with re-nurturing the city: bringing nature species and plants into our streets and around our buildings to contribute to an emissions smoke, air quality and biodiversity. Other - safer streets Investment i creating well-lit populated safe spaces and streets within all of Wellington to reduce sexual harassment and harm and make the city accessible and safe. Central Library High investment is needed in this council community resource. It's a safe house and a place for education and development. The entire time I've lived in Wellington it has been closed and this needs to change. It has already been closed too long.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

[REDACTED]

**Q19. Do you support the proposed budget?**

I somewhat support the proposed budget.

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

- Q14. **Which of these options do you prefer? (Central Library decision)** not answered
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 3. Sludge minimisation through Council funding (\$147m to \$208m capital investment, above debt limit, and higher rates)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

<p><b>Q19. Do you support the proposed budget?</b></p>	<p>not answered</p>
--	---------------------

---

<p><b>Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?</b></p>	<p>not answered</p>
---	---------------------

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

| Q3. Are you making this submission as an individual or on behalf of an organisation?  | Individual  |
| Q4. What organisation are you submitting on behalf of?  | not answered  |
| Q5. Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?  | No  |
| Q6. If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer? | not answered  |
| Q7. Oral forum time   | not answered  |
| Q8. Oral hearing time   | not answered  |
| Q9. Which of these options do you prefer? (3 waters decision)   | Option 3. Accelerated (\$3.3bn investment – higher rates and debt).   |
| Q10. Which of these options do you prefer? (Wastewater laterals decision)   | not answered  |
| Q11. Which of these options do you prefer? (Cycleways decision)   | Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)                              |
| Q12. Which of these options do you prefer? (Te Atakura Funding decision)  | Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).   |
| Q13. Which of these options do you prefer? (Civic Precinct decision)  | not answered  |
| Q14. Which of these options do you prefer? (Central Library decision)   | Option3. Strengthen now by increasing rates further (additional 1.79% rates increase).  |
| Q15. Which of these options do you prefer?(Sewage sludge and waste decision)  | Option 3. Sludge minimisation through Council funding (\$147m to \$208m capital investment, above debt limit, and higher rates) |

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library  
Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

**Q17. Your comments on the big decisions (optional)**

Please fix the library! Just another comment. When I emailed the local City Councillor regarding an issue to do with lighting in our street (no lighting or weeks and weeks), they did not bother to reply. If they can't be bothered replying then maybe time to look for another job.

| Q10. Which of these options do you prefer? (Wastewater laterals decision)   | not answered  |
| Q11. Which of these options do you prefer? (Cycleways decision)   | Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)                              |
| Q12. Which of these options do you prefer? (Te Atakura Funding decision)  | Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).   |
| Q13. Which of these options do you prefer? (Civic Precinct decision)  | not answered  |
| Q14. Which of these options do you prefer? (Central Library decision)   | Option3. Strengthen now by increasing rates further (additional 1.79% rates increase).  |
| Q15. Which of these options do you prefer?(Sewage sludge and waste decision)  | Option 3. Sludge minimisation through Council funding (\$147m to \$208m capital investment, above debt limit, and higher rates) |

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library  
Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council taking on additional debt by raising its debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl.

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital. This represents a real opportunity to transform Wellington's mode of travel in an around the city

- Q5. **Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?** No
- Q6. **If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer?** not answered
- Q7. **Oral forum time** not answered
- Q8. **Oral hearing time** not answered
- Q9. **Which of these options do you prefer? (3 waters decision)** Option 2. Enhanced investment (\$2.4bn - the Council's preferred option).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** Option 2. Take ownership (Council's preferred option, \$32m investment).
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 1. Finish started projects (\$29m capital investment, lower debt and rates)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** Option 1. Demolish and site developed through long-term lease (Council's preferred option).
- Q14. **Which of these options do you prefer? (Central Library decision)** Option 1. Strengthen now by temporarily exceeding debt limit (Council's preferred option, additional 0.79% to rates).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 3. Sludge minimisation through Council funding (\$147m to \$208m capital investment, above debt limit, and higher rates)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Cycleways

**Q17. Your comments on the big decisions (optional)**

Comments on Cycleways: Wellingtons topography (lots of narrow streets - some quite hilly) means that bicycles on the road obstruct the buses. It also means that the bulk of the city residents will always work and/or shopping. That is already evident on days featuring raging wet southerlies and nor-westors. Bus lanes for mass public transit must always be preferred over cycle lanes, because there is not sufficient space for both types of lanes in most situations. One bicycle (carrying at the most one or two passengers) can impede or bus carrying up to 78 or more passengers. Need I say more!!

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library  
Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

Cycleways  
Te Atakura (climate change)

---

**Q17. Your comments on the big decisions (optional)**

Te Atakura Please get LGWM sorted so that we can make a just transition to zero carbon, separate, safe cycleways, pedestrian friendly streets + increase bus frequency to get people out of cars. The bus changes of 2018 resulted in many communities getting back in cars + driving + this has only increased in the last 3 years. Berhampore has become a snarled up car fest, + buses can 't get through. There's no comprehensive, safe, separated cycle infrastructure, which is shocking, given how well-developed other cities is, like Auckland. There aren't any real incentives for people to reduce their carbon footprints + it feels dire!

---

Cycleways  
Te Atakura (climate change)

**Q17. Your comments on the big decisions (optional)**

Our community orchard is a welcoming space, where people meet, learn + share skills + grow food together. We are deeply concerned about climate change and urge the WCC to fully fund Te Atakura. Te atakura is a start, + we all need to work together to do more to achieve a just transition to zero carbon. We need to get people out of cars, to do this, we need to make it as easy as possible to get around. We think this means increasing bus frequency, routes, building safe & separate cycle infrastructure. supporting schools with walling schoolbuses + getting LGWM moving. We can explore alternative technologies to provide electricity security, like the small wind turbines for homes, subsidised solar panels, biogas and so on. Obviously any change made to bus services needs to make sure that drivers are paid well + treated fairly. The WCC and WRC should look at changing bus providers because recent actions by NZBus shows just how vulnerable they are. We need to support Wellingtonians to become resilient - supporting people to learn skills like growing food, reducing waste, and knowing how to support each other in the coming climate crisis. We need to ensure the participation of Maori in driving a just transition process and we need to think about how climate change may affect our taumau (rough sleeping) community, and ensure we have accessible, safe housing for people to live in permanently.

Investment in three waters infrastructure  
Cycleways  
Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

3W infrastructure must take precedence, and I am willing to pay increased rates to see work on this proceed as quickly, and thoroughly as possible, keeping in mind the increasing pressure on the pipes because of increasing population density. This ties in with sludge minimisation - not sure how a levy is any different from rates increase. My decisions about funding is based on my willingness and ability to pay more for a sounder future - as a 67 year old, I know I may not live to see the long-term benefits. As a cyclist, I support the development of cycleways across the city, but am caution of throwing money at good idea or the patchwork planning picking off the easy routes. I am a resident of Berhampore, am very aware of the debate around the Island Bay cycle way, (which incidentally I enjoy as a cyclist) but am staminal when I think about extending this into the CBD.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

[REDACTED]

**Q19. Do you support the proposed budget?**

I somewhat support the proposed budget.

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

During 2018-2019, there were several routes of WCC consultation with Berhampore residents, focusing on improvements to the community environment and in particular, traffic safety. The results of these consultations were put on ice, awaiting outcomes of further planning - Newtown Connections Planning for Growth LGWM etc. I note hat under article 5 of "What are we Planning", commonly upgrade several suburbs are mention - but not Berhampore. This suburb is further disadvantaged by the state of several of the WCC housing estate - Granvilles Rintoul St. Vichery Flats, what have not yet recieved upgrades. We are more than a thoroughfare for vehicular traffic moving north-south and east-west, we have a high density of preschool, primary and intermediate education facilities. It's about time we get support in claiming our identity.

Central Library

---

Q17. Your comments on the big decisions (optional)

In future, please consider making sure that options on the response papers align with the order they were presented in the consultation document I would have liked the opportunity to support a proposal to source private funding towards the library refurbishment given the current requirements in relation to core infrastructure (water pipes etc) now seems like an appropriate time to reconsider the funding options - especially as the projected costs are higher than they were at the time of the previous consultation.

---

Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)

Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?

Please do not increase the charges for under 55 to go swimming, or at least consider only increasing the cost slightly. The possibility of going swimming for free is important to many families and the price increase proposed seems disproportionate to do in one go.

---

Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?

not answered

Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?

Not enough info on budget - Connect the cycleways - Fix the pipes - Provide water meters - Build a filter @ moa point - No more encroachment on the water front - demolish the prison at mount crawford, and make a splendid reserve in perpetuity, of surrounding land,

- Q1. **Full name:** Charlene Anne Kowalski
- Q2. **Phone number:** [Redacted]
- Q3. **Are you making this submission as an individual or on behalf of an organisation?** Individual
- Q4. **What organisation are you submitting on behalf of?** not answered
- Q5. **Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?** No
- Q6. **If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer?** not answered
- Q7. **Oral forum time** not answered
- Q8. **Oral hearing time** not answered
- Q9. **Which of these options do you prefer? (3 waters decision)** Option 2. Enhanced investment (\$2.4bn - the Council's preferred option).
- Q10. **Which of these options do you prefer? (Wastewater laterals decision)** Option 2. Take ownership (Council's preferred option, \$32m investment).
- Q11. **Which of these options do you prefer? (Cycleways decision)** Option 3: High investment programme (\$120m capital investment - Council's preferred option)
- Q12. **Which of these options do you prefer? (Te Atakura Funding decision)** Option 2. Medium investment with savings (\$25.4m investment, lower rates and debt).
- Q13. **Which of these options do you prefer? (Civic Precinct decision)** not answered
- Q14. **Which of these options do you prefer? (Central Library decision)** Option3. Strengthen now by increasing rates further (additional 1.79% rates increase).
- Q15. **Which of these options do you prefer?(Sewage sludge and waste decision)** Option 3. Sludge minimisation through Council funding (\$147m to \$208m capital investment, above debt limit, and higher rates)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Central Library

**Q17. Your comments on the big decisions (optional)**

My opinion is that cannot has two main issues I wish to be prioritised. These are: 1. Reducing sewage/wastewater into our waterways. I do not wish degradation of our coast, sea rivers or streams. This should be Councils Number 1. priority to address and spend our rates to fix. 2. We need our central library to reopen as soon as possible. This is the second priority. It was wonderful as it was and does not require "fancifying". As soon as it is earthquake strengthened it needs to be reopened to the public, with the same secures and new books etc as prior. Why are so many residential properties being completely, or newly, concreted over with no or very little vegetative of grass areas (eg. area around Johnsonville library.) Won't this have a detrimental impact on storm water/flooding and groundwater? Doesn't the District Plan control built site coverage anymore.

- Q14. Which of these options do you prefer? (Central Library decision) Option 1. Strengthen now by temporarily exceeding debt limit (Council's preferred option, additional 0.79% to rates).
- Q15. Which of these options do you prefer?(Sewage sludge and waste decision) Option 4. Sludge minimisation through alternate funding (Council's preferred option, \$147m to \$208m capital investment funded through a levy, no additional rates increase)

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

- Investment in three waters infrastructure
- Cycleways
- Te Atakura (climate change)
- Sludge and waste minimisation
- Te Ngākau funding for future work

**Q17. Your comments on the big decisions (optional)**

Decision 1: Not about pipes, but what goes into them. Many roadsides in my area are Council road reserves. Tree branches frequently overhang footpaths, with leaves, berries etc, ending out on footpaths. These when down slopes and getting wet, become slippery at times; and so a danger to pedestrians. Also this rubbish ends out in gutters and thus down drain. How that Council contracts out much of what it used to do, the standard of work has dropped. Also after parks are mown, grass ends out in gutters. Decision 3: Western connections to the city are often narrow, winding, hilly, and with many blind corners. Often is only a footpath on 1 side of the road, sometimes footpath not very wide. Driving is not easy, with a vehicle needing to stop, so an oncoming one can get through. A cyclist riding uphill is a struggle for all concerned; with no availability for passing for quite a distance. It is nonsense to encourage/push for cycling in these areas; it causes frustration and danger for all road users. As an aside - whilst driving along the street on the suggested western connection, public transport stopped to let a bus pass through, and experienced road rage from the driver behind me.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

**Q19. Do you support the proposed budget?**

I somewhat support the proposed budget.

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Decision 4: Isn't "Lets Get Wellington Moving" meant to mean vehicles between Ngauranga and the Airport? Before workstreams are fully funded (As in option 3) there needs to be higher public transport from city to airport terminal. What is now available won't gain wellington any points in attracting visitors to the city. Crossing a busy intersection, pulling a suitcase, walking with hand luggage; and in all conditions; in wind and rain. Even when there was a "flyer service", there was nowhere at the bus hub, to find when and where the bus could be caught. Many other bus drivers were unaware. Until that is sorted, of necessity will be more cars making their way to the airport. Also since the city has shares in the airport, we - our rate payers - should expect a better service than now provided. Decision 5: Back in the 1990s when demolition was suggested for the Town Hall, one of the major reasons for its retainment was its world class acoustics. For this reason and to make further and better use of this new town hall; it makes sense the MOB be available for the National Music Centre. Among other things the Town Hall would be used as a rehearsal and practise area. I can understand it makes sense that the MOB & CAB be remediated at the same time. Whatever is decided, all building in the Civic Precinct should be in Council ownership/ It would be the "face of the council" for citizens of Wellington. Apart from Parks & Gardens staff it is one of the few ways most citizens can see the Council in action. Decision 7: The wastewater sludge should remain at moa point, thereby adding a longer life for the landfill, and a few less km's of pipeline to maintain. Use option 3 if option 4 unavailable. IT WAS VERY DIFFICULT TO OBTAIN A CONSULTATION DOCUMENT AND SUBMISSION FORM, WITHOUT USING WEBSITES. EVEN THE QUARTERLY 'OUR WELLINGTON' ONLY SHOWS WEBSITES.

Dear Hon. Mayor Foster It is with deep regret and confusion that I once again request disabled car parks in the City. We understand the problems with the Council, but find it diabolical that what is a simple thing. can be so difficult. It is also the time of the disenfranchised of power, here and overseas. Please activate our request as below. The Care of the Aged , is a private philanthropic group established in 1964 to help older people, and disabled people live a full life whilst living in their own homes. At the moment this involves single-older people who came to this country from the major european wars. We are unable to carry out our activities in 2 major streets due to a lack of parking. We therefore request: 1. Two car parks near the synagogue on Webb st, to be shared with Barnadoes Day Care, who have no safe discharge and pick up. The times would work conveniently to both Care and Barnadoes., Barnadoes using the spaces at early morning and evening. Care of Aged would use the spaces from ten to three pm. 2. Two disabled car parks at upper Guzhnee St. opposite temple Sinai, on land Transport land. which is currently a green verge. There is no parking on Guzhnee. and little on Webb ST. The Wellington City Council Parking division has helped us clear the regulations. Reuben is our contact there, and has all the details. We have been unable to have our luncheons, functions, etc at these 2 venues, who charge us nothing because transport is so difficult. Most of our clients are unable to use the bus. During Covid this group of volunteers, and paid workers performed miracles helping folks. Why can you not help? Yours EE Rothman for the Care of the Aged

Te Atakura (climate change)  
None of these

Q17. Your comments on the big decisions (optional)

Wellington City is becoming unliveable and unsustainable much like Auckland City. The inner city is being built up into an unfriendly block of gentrification and commercial expansion which threatened the wellbeing of our CIM. The apartments being built are expensive ugly and unsustainable. In a CIM with a growing population we need inner city to reflect our people: our families and front-line service workers who keep our city moving. We need: - Stricter regulations on new apartment buildings. Look at places in Sweden + Canada. They should be neighbourly, accessible, carbon positive (if not neutral), affordable and pleasant to live in. To be honest, the new council flays are more likable than many of the new builds for sale around. - Studies show that increased green space in cities is highly beneficial to its residents and workers health... and that lack of is harmful. We need to protect the greenspace we have and plan for more to provide safe spaces for our workers to recharge + our inner city swelling families to have places to easily take their tamariui. - Climate change. Things are looking dire and we are at a turning point of history: do you want to lead the charge in a new age of innovation, strengthening our local economy + protecting our citizens? or are you going to fail like those before and not do enough?

Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)

[Redacted]

Q19. Do you support the proposed budget? Neutral.

Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend? I support increasing spend in the current budget.

Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?

- Fees: take into account + provide an out for people on pensions, disabilities, and minimum wage. - Climate change: if not now, its too late. - Accessibility: you are not hearing a fair share of opinions from our city because you have made understanding and acquiring these forms difficult. What could you do: - online forms to fill in - mail a form to every adult voting age resident - advertise better (social media) and more broadly (signs in low decile neighbourhoods). - STOP the brooklyn cycleway! as a cyclist, the road is wide enough! and there are not enough of us to make it count, please stop!

Cycleways  
Te Atakura (climate change)  
Central Library  
Sludge and waste minimisation  
Te Ngākau funding for future work

**Q17. Your comments on the big decisions (optional)**

Climate Emergency Council should only be funding what is needed when it is needed rather than spending 18 - 30m of money that has to be borrowed or extracted from unwilling rate payers, for example electric cars are costly to buy, their production creates pollution and in future disposal of batteries creates another pollution problem. Cycleways Give priority to those that improve safety for cyclists. Te Ngakau Look at the most innovative and economical way to ensure that these buildings are not earthquake prone. Library Look at costings and timing of other projects to avoid breaching borrowing limits. Sludge Needs to be left when not same pressure on funds, monitor research on subject.

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

[REDACTED]

**Q19. Do you support the proposed budget?**

I strongly oppose the proposed budget.

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

I support decreasing spend in the current budget.

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Rates and debt Like all councils, there needs to be a good hard look at all council expenses to see how things are being done, why it is being done, could it be done more efficiently, could it be done more quickly and could it be don with less staff. Also is it really necessary to keep the city running well or is it a nice to have or a trendy thing to have. Another way to look at it is will it wait and save money and debt now so that we will be in a better position in the future to build or purchase something that will be a real asset to the city and its people rather than wasting it on some trendy expenditure. The 2 maori coopted council committee members I object to this being approved as they are not elected by the voters yet are costing I understand \$220k per year, and have voting rights. Fees and charges need to be kept as low as possible to encourage development of needed facilities and housing. An example of what I believe is excessive is that for a joinery workshop in tawa we were required to get a crime prevention report, which had to be peer reviewed. A total waste of money and time as any practical person could have said it in one or two paragraphs instead of a very padded 17 page expensive report. Is the parking department on a commission employment arrangement because the extent they go to not have a fine cancelled when there is a fully fair and reasonable explanation for example expired WOF - car parked waiting for garage to repair. Also I know of a case of a person ticketed for parking in front of his own driveway. Selling assets I would support selling under utilised ones not likely to be required in the future but not shares in the Airport.

Investment in three waters infrastructure

---

**Q17. Your comments on the big decisions (optional)**

Given the catastrophic failure in the maintenance of three waters pipe infrastructure, higher investment in pipe improvement and maintenance than the "enhanced" option seems to me to be more realistic. I am aware the council's recommendation is not made lightly. I do not have access to all the information the council has, and I am concerned about rate increases. But the failure, across multiple council administrations, to adequately maintain three waters infrastructure is so severe as to be a game changer! All the more so given the projected increase in population. Clean water and good health have a long association. I do not wish to see new Wellingtonians dealing with disease outbreaks 10 years down the track.

---

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

---

**Q19. Do you support the proposed budget?**

I somewhat oppose the proposed budget.

---

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

I support increasing spend in the current budget.

---

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

I would like to see more progress on helping the homeless community. I support light rail to the airport. Extension of the airport runway is not primarily in anticipation of an (Unlikely) increase in air traffic. Rather, it is in anticipation of size increases of the planes that will use the runway in line with international trends. On this basis, I support extending the runway.

---

Q17. Your comments on the big decisions (optional)

not answered

---

Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)

[REDACTED]

Q19. Do you support the proposed budget?

I strongly oppose the proposed budget.

Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?

not answered

Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?

In your proposal our rates will go up 13.59%!!? No way will we or can we pay this. Rates only up 5% at most. CEO must tighten belt and downsize!

not answered

Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?

Three waters infrastructure It is unfortunate that the Council has spent inadequately on the "3 waters" infrastructure for many years. Hence my support for the "enhanced option". Cycleways Given Wellington's topography I do not support building further cycleways at considerable capital cost. rather I support public transport developments. Climate Change, Council Buildings, Central Library, Sewage Sludge and Waste My objection to these proposals is based on the financial impact they will have on rates. Essentially the rate increases the Council is proposing in the 1st three years of the plan are far too high. The Council should cut its annual expenditure on these four groups of projects to provide more modest rate increases. An estimated 13.5% rates increase for 2021/22 is unacceptable. I do not support a rates increase for 2021/2022 above 6.6%. the same increase proposed for 2024/2025. This would then be similar to the 6.2% increase for 2012/2022 proposed in the previous 10 year plan (2018-2028).

Q17. Your comments on the big decisions (optional)

Although this version of consultation seems like an improvement over recent council efforts, council begins this exercise with little credibility, especially when the mayor quotes selectively from the feedback these exercises produce in his published messages introducing documents relating to the various issues discussed in this current exercise. The section providing information on fee changes that doesn't invite comment services to remind us, if necessary, that there is so much more to do with the plan that we are not getting comment on beforehand. How much value for money the proposals for climate change mitigation offer is unclear. I want to see actual change; I don't want to see pricey ad campaigns educating us about change. None of the proposals for te ngakau seem good. Option 2 seems least bad. What "self funding model" means is not clear, but previous suggestions for discussions around such possibilities make me suspicious. Sale of council property is a bad idea, and a case for demolishing needs to be better to be persuasive. Relying on vuv for support is a very bad idea. Regarding the library: Councils preferred option seems to good to be true; especially when the Mayor says there's public support for putting things into - even onto - the library that would get in the way of what a library by definition should be. No Capital E, no commercialisation. A library is a bulwark of democracy and foremost a library needs lots of books and lots of shelves with lots of quiet, comfortable places for people to take in information, often serendipitously. Council must stop trying to make the Library into something it thinks the library should be & make the library we want available to us again.

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library  
Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Cycleways  
Te Atakura (climate change)  
Central Library

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital. I have cycled in Wellington city for 50 years for 90% of my transport needs. I am appalled how much freedom and space is given to single occupancy vehicles, which makes it dangerous for other uses, and contributes particulates and emissions which impact both on our safety, health and a safe climate. Car parking should be removed from all arterial routes, giving the space over to public transport and active modes. I support measures that would reduce the need for large infrastructure spend on the three waters, such as requiring rain water collection tanks on new builds and subsidies for attachment to existing houses, grey water recycling, permeable layers on all surfaces, encouraging the use of compost toilets, utilisation of sewage sludge in compost and in urban forests.

---

Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

Cycleways

Q17. Your comments on the big decisions (optional)

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225%

Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)

not answered

Q19. Do you support the proposed budget?

not answered

Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?

not answered

Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

|---|---|
| Q1. Full name:  | Susanna Kent  |
| Q2. Phone number:   | not answered  |
| Q3. Are you making this submission as an individual or on behalf of an organisation?  | Individual  |
| Q4. What organisation are you submitting on behalf of?  | not answered  |
| Q5. Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?  | No  |
| Q6. If yes - we are offering two ways of speaking to Councillors about your submission. Please select which option(s) you would prefer? | not answered  |
| Q7. Oral forum time   | not answered  |
| Q8. Oral hearing time   | not answered  |
| Q9. Which of these options do you prefer? (3 waters decision)   | Option 3. Accelerated (\$3.3bn investment – higher rates and debt).   |
| Q10. Which of these options do you prefer? (Wastewater laterals decision)   | not answered  |
| Q11. Which of these options do you prefer? (Cycleways decision)   | Option 4. Accelerated full investment programme (\$226m capital investment, higher debt and rates)                              |
| Q12. Which of these options do you prefer? (Te Atakura Funding decision)  | Option 3. Fully fund the programme (\$29.9m investment - Council's preferred option).   |
| Q13. Which of these options do you prefer? (Civic Precinct decision)  | not answered  |
| Q14. Which of these options do you prefer? (Central Library decision)   | Option3. Strengthen now by increasing rates further (additional 1.79% rates increase).  |
| Q15. Which of these options do you prefer?(Sewage sludge and waste decision)  | Option 3. Sludge minimisation through Council funding (\$147m to \$208m capital investment, above debt limit, and higher rates) |

**Q16. Do you have any comments you would like to provide on why you selected your preferred options to any of these big decisions, or why you don't support any of the options we proposed? Please indicate what decision you are commenting on by selecting from the list of item(s) below**

Investment in three waters infrastructure  
Cycleways  
Te Atakura (climate change)  
Central Library  
Sludge and waste minimisation

**Q17. Your comments on the big decisions (optional)**

Cycleways comments I support option 4 committing \$226 Million over the next ten years to build a fully-connected cycling network by 2031 I support prioritising new cycling infrastructure in places that support journeys by children and other vulnerable road users I support doubling the Cycling Minor Works Budget to \$2 million per year I support creating a new dedicated funding category to deliver rapid changes to the urban environment, such as Low-Traffic Neighbourhoods, Parklets and Innovating Streets improvements I support ring-fencing the cycling budget so that money allocated for cycling is not used elsewhere Deliverability of Cycleways I support funding to hire more staff to increase the council's capacity to deliver cycling projects and other transport improvements I support streamlining and reducing the frequency of consultative processes in order to reduce the time, resources and budget spent to deliver cycling projects I support the reallocation of existing road space over the creation of new road space in order to minimise the costs of cycling projects Accountability I support the council setting clear and ambitious goals such as a target kilometers of new cycleways delivered and target percentage increase in cycling modeshare every year. These targets should be set higher than existing baseline levels I support the council providing better information around cycling expenditure, such as breaking down the cycling budget by project and providing clear and accessible information when the allocated budget is not spent Funding I support the council increasing rates further to fund essential infrastructure for cycling I support the council taking on additional debt by raising it's debt-to-revenue ratio limit above 225% Three Waters I support the most ambitious option of accelerated Investment for three waters infrastructure. Te Atakura I support fully funding Te Atakura - First to Zero, the climate action plan for Wellington. Sludge I support investing in sludge minimisation to reduce sewerage waste to landfill and reducing the risk that sludge will need to be carried around the coast by truck. I support the council delivering this project through debt rather than an external funding model. Library I support strengthening the Central Library now by increasing rates further, rather than taking money from cycling and other infrastructure projects

**Q18. You can attach any other document supporting your submission here. (Please ensure that the information is on the 10-year Plan)**

not answered

**Q19. Do you support the proposed budget?**

not answered

**Q20. You stated that you were neutral / did not support the proposed budget. Do you support increasing or decreasing spend?**

not answered

**Q21. Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Other issues I support increasing parking fees to encourage mode-shift and improve parking availability and turnover. I support investing more into road resurfacing so that higher quality road surfacing is used that better supports comfortable journeys by bicycle. I oppose the provision of funding for carbon intensive projects such as the Wellington Airport expansion and new roads to enable suburban sprawl. I oppose deferring \$7 million of spending for footpath upgrades. Providing good infrastructure for all active modes is vital.

## Submission to Wellington City Council on Ten-Year Plan Consultation

### Dwell Housing Trust

Dwell Housing Trust is a community housing provider (CHP) with an almost forty-year history of providing quality affordable housing for our people in Wellington on low incomes. Dwell fully supports the concept of investing in more for a city fit for the future. A city that is modern, dynamic, creative and sustainable.

Dwell is more than a landlord. We ensure our residents have access to the support they need, and want, to live well, be well and do well. We want to be able to continue providing our services that are supportive, affordable & inclusive. We would love to see more shared homeownership and below market rents. Dwell stands ready to support organisations that own houses in managing their properties for social good.

Thank you for the opportunity to consult and provide feedback on the 10-year plan, so you as a council are better enabled to make fairer and more effective decisions.

Our submission will be responding to the areas affecting social housing and considerations regarding two key requests:

- Developing a vision and plan for working collaboratively with community housing providers
- Introducing inclusionary zoning

### Housing as a priority

We note that you have identified the need for housing as a *priority objective* to focus on in the next three years. However they do not form part of the 'Seven Big Decisions'. Dwell strongly advocates for housing - affordable, resilient, and safe housing to be a fundamental major decision that requires unequivocal immediate action.

As you are aware our city is growing, and we need to not only plan for it but have the provisions (housing) in place to provide for this growth. The construction industry is very busy and consents granted are at historically high levels, particularly dwellings such as townhouses and apartments, given that a more intensified housing stock will be required to accommodate a rising population in future.

While it is commendable that "Council needs to contribute through a range of housing interventions" we continue to support the vision statement as proposed in the initial 'housing first' concept – that housing is the first intervention required to address social issues and support the wellbeing of individuals and families, to ensure that all Wellingtonians are 'well housed'.

There were 1819 applications on the Ministry of Social Development social housing register for the Wellington region (Wellington City, Lower Hutt City, Upper Hutt City and Porirua) on 30 September 2020.

For Wellington City:

Priority A = 723

Priority B = 49

Total = 772

## Our submission

We stand by our previous submission that only by **growing the supply of housing available** will we see improvements in the social housing statistics as mentioned above. We would like to work in better partnership to achieve this and propose two areas where this can be achieved.

## Inclusionary zoning

We note on page 52 that the annual **operating deficit** for City Housing is forecast to be \$8.7m in year 1 of the plan and only increase from there. We also note that City Housing will then expect to be insolvent from June 2023. These are worrying forecasts for the social housing landscape. With this in mind we would point out that there is solid evidence that the Council would certainly “get more bang for its buck” if it judiciously utilised some of the tactics that have successfully been used in other housing jurisdictions to secure or leverage affordable housing through the planning and urban development process. We are referring to inclusionary planning approaches whereby local authorities use planning systems to create affordable housing. A mandate or incentive would be implemented to include a proportion of its development as affordable dwellings.

A spectrum of inclusionary planning models has been successfully made use of in Australia. These include:

- inclusionary zoning, where development within a designated zone contributes towards affordable housing according to a fixed formula.
- density bonuses, where additional development potential is offered in return for an affordable housing contribution.
- planning concessions, where planning rules are varied for affordable housing development or to enable low-cost market housing.
- negotiated agreements, where affordable housing contributions are negotiated on a case-by-case basis, possibly within a policy framework.
- impact fees, where financial contributions from developers are paid to offset the impact of a project on affordable housing demand or supply.

It is reported that research on inclusionary housing practice in both the US and UK shows that schemes gain traction over time, that private developers accept inclusionary requirements when they are known in advance and levied in a consistent way.

We note that councils have a choice between mandatory affordable housing requirements and voluntary, market-enabling approaches, which are guided by different principles. The mandatory approach seeks to improve affordable housing supply by embedding requirements within the process of land rezoning, with the cost being borne by landholders, rather than developers. The voluntary approach tries to ensure that affordable housing requirements are not seen as a land or development cost but that incentives operate to encourage residential development overall while including affordable and social housing. Our support would be for a **mandatory approach**.

## Collaborative relationships with CHP

In 2017 a report of the Mayor’s Housing Taskforce was released, and recommendations made to:

- In partnership with Central Government and CHPs increase the number of social units in the city to support the needs of the most vulnerable, and
- Support the growth in capacity and capability of the CHP sector, which is required to move towards a system change that enables CHPs to deliver social housing at scale.

We are now in 2021 and would like you to honestly ask yourselves what positive outcomes have been achieved with these recommendations? It appears you are still 'discussing options with central government'. We would like to see a **call to action**.

It is obvious WCC and Kainga Ora cannot meet the needs of Wellington's low and moderate-income earners alone, nor those in need of affordable rentals or pathways into home ownership. CHPs are needed to meet housing needs along the housing continuum and Dwell Housing Trust needs to play a larger role than we currently do.

We believe to facilitate the growth of CHPs in Wellington, WCC needs to support the development of a clear vision with the role of each provider articulated in a collaborative, cohesive working plan.

We have the flexibility to provide a range of solutions and services, respond effectively to local housing needs, and utilise the goodwill of the wider community. Our focus is not just social housing for those in the most need, we want to be able to provide more affordable rentals and more home ownership programmes.

Suggestions to effectively work together include:

- Surplus land or properties being offered to nominated and registered CHPs for the provision of affordable housing and
- Land purchased through CHPs on terms and conditions that facilitate affordable housing.
- WCC can facilitate Dwell and other CHPs to do more by waiving development contributions for new homes built by CHPs for people in housing need.

Positive evidence of these types of partnerships and outcomes can be seen in the examples below.

Dwell purchased surplus WCC land and built four homes on it – two shared home ownership homes for first home buyers and two social housing homes. We are keen to explore more opportunities to repeat this model.

Queenstown Lakes District Council have taken action to improve housing affordability in their area by selling land to their local CHP and requiring developers to contribute. One of the things they do is sell the land for the value it is when zoned as open space. This recognises that the increase in price when land is rezoned to residential should not be a gain to their council alone. They view it as a gain that can be used by the local CHP for public good.

Christchurch City Council implementation of the social housing development contribution rebate.

WCC and Dwell need to clarify the role Dwell, and other CHPs, can play in Wellington City, and the type of new homes and tenures we can supply. There are many ways we can work together, and we would like to be able to explore these with WCC. Dwell Housing Trust stands fully prepared to engage in a supportive way with the Wellington City Council to advance the laudable aims of the priority investment in housing.

**From:** [Lee Sheppard](#)  
**To:** [BUS: Long Term Plan Engagement](#)  
**Subject:** Long Term plan - upgrade of Churton Park Community Centre  
**Date:** 08 May 2021 20:23:49

---

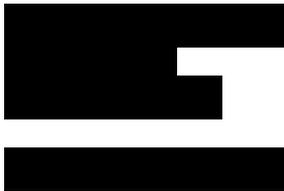

I see in the Social and Recreation section (page 57) of the draft Long Term Plan, that upgrades are planned for the Strathmore, Newtown, Aro Valley, Tawa/Linden and Karori community facilities. Why isn't the Churton Park Community Centre included here?

Our tiny community centre is the heart of our large suburb. It is in constant use and doesn't meet the community's demand for a meeting place. Churton Park's rapid growth means that the problem will only get worse. Neighbouring suburbs have multiple meeting places so why not us?

We have repeatedly raised our concerns with the Churton Park Community Association and have been advised that the matter has been discussed with the current and previous Mayor and with our City Councillors so why are we being ignored?

Yours sincerely

Lee Sheppard

Dear Councillors,

I am writing to you regarding a future change and improvement in the Wellington's accommodation for skateboarding. As someone who has grown up in Wellington, I am aware of the lack of skate facilities provided. Over the years I have seen other cities continue to expand and grow their skate facilities and incorporate skate friendly environments at new council parks and squares. The lack of these in Wellington affected my experience of skating throughout my teenage years. I was unable to enjoy a secure environment to skate, rather it jeopardised the safety of myself and other members of the public, due to having to skate on the streets and in carparks.

Yours sincerely

Bruno Isaacs

Subject: Wellington skateboarding

Kia Ora I am writing this as I would love to see change around the “skate community engagement” survey I am a young woman who has been part of skate culture for a most of my life and it honestly given me a very important outlet in my life as I struggled with learning disabilities at school and found my confidence in skateboarding, as I know a lot of others have. I have seen the skate community flourish immensely over the past ten years growing in a clean and outward fashion especially after talk of the olympics, there are also a lot more girls engaging which has been amazing for me and other girls to build a whanau! It has been known talk that Wellington needs an upgrade and after travelling the country for skate related reasons it is clear and crucial for the progression of athletes and to build and awesome community where skaters and the public can enjoy.

Thanks heaps

Gala

Kia Ora,

I want to see you act upon the findings of the Skate Community Engagement survey. I want to be able to skateboard in this city & enjoy its culture to the fullest. I want to be able to bring more girls into it like myself & show them safe places to skate, however we are seriously lacking. As you treat cycling - a great sport in the public community by spending thousands on public facilities for bikes, I want to see the same care for skateboarding. It is the best way to keep kids occupied & out of trouble, it is my best way to help my mental health & the same for so many others. It is not a bunch of ratbags, it is not the stigma it had 20 years ago, it is a beautiful community of people that help each other of all ages. New Zealand takes pride in its sports doesn't it? Do you? This is literally an Olympic Sport. Imagine if you fostered that and helped us out, the talent in New Zealand could finally develop. Imagine if New Zealand had yet another olympic sport to take home the gold from. You could be a part of that.

Do the right thing, listen.

Nga Mihi,

Roxy Leppan

**Subject:**

Hi there,

I have been a skateboarder in Wellington for the last 12 years. I have to agree with Kevin regarding what appears to be a push against skateboarding in the city.

I think it is an urban design issue as much as anything.

I think the harassment of skateboarders using the Pukeahu war memorial park is unfair.

It is a public space and no one bats an eye at someone kicking a ball around but skateboarders get chased and trespassed. I understand that it is a place of remembrance but if I lost my life for this country I would rather have a memorial park full of smiling active people than a somber empty overpass.

I understand that skateboarding is semi destructive but, with the right advice and incorporating skateboarders in the planning when building new public spaces the damage could be minimised. Think metal edging, hardened concrete not skatestoppers and rough concrete.

I don't want a fancy new skatepark. But employ the people who are already doing things in Wellington out of their own pockets (treetops diy in newtown etc). Build skate friendly spots like Auckland (library, Aotea square).

**Subject:** Wellingtons current skateboarding situation

To those who can make a change

I have spent most of the 37 years of my life in Wellington. For the past 24 of them I have been a skateboarder. Sure I've had different careers and studied, but at the base of it all I am a skateboarder. During this time I have seen a city with enormous charm and tolerance for youth and skateboarding slowly develop into one that practically demonises the culture. Every other country and even city I have visited around the world and New Zealand has grown and enveloped this culture into itself with the building of decent skateboard facilities and even building public plazas for both skateboarders and the general public to share. Wellington has done almost the exact opposite and it really saddens me to have seen this happen.

What Wellington really needs more than anything else is a state of the art indoor facility. Not some puny plywood ramp in a garage. Look to capital cities all over the world for inspiration if you need. Such as Malmö, Sweden with Bryggeriet or BAYSIXTY6 in London. And when you have made your decision on where to build a top rate facility, please get in touch with Rich Landscapes.

Warm regards

Lars Bringzen

**Subject:** Skateboarding facilities

To whom it may concern,

I am writing to you to request a new skate park or skater friendly area in the central Wellington area

Wellington is seriously lacking on skateboarding facilities.

I have been skating in wellington for 15 years, it is the activity that keeps me out of trouble! In those 15 years the only facility in wellington city that's worth going to provided by the council is Waitangi park, this park is seriously out dated and filled with flaws, being designed by architects with little skater input.

There seems to be amazing skateparks popping up all over New Zealand!

I and every other Wellington Skateboarder would agree that it's time for Wellington's Skatepark Birthday.

Please gift us with a new skatepark, it assists with keeping us off the streets and memorials and seriously minimizes the risk of pedestrians being upset.

Sincerely,

Logan Cullen

Hi there.

My names Samuel. I'm from Wellington NZ. I have lived all over the world. Spending a lot of time in Europe and California. I've skated some incredible skate parks and been welcomed into skate communities. I have all ways found, where there are nice new well looked after skate parks, with nice facilities, that the crowds and people have always been happier and friendlier. It welcomes family's and younger children to start skating. Wellington is the perfect city for new and improved skate parks and its definitely well over due. Please find funding for these projects. With new skate parks it will make the city even greater than it all ready is.

Thank you ver much Samuel Henderson.

**Subject:** Skate Community Engagement

Kia ora,

I am writing to express my recommendation that the Wellington City Council include findings from the recent Skate Community Engagement survey to factor in skateboarding when considering investment in recreational facilities in the region and also in future urban design. A good example of successful urban design, which includes skateboarding, can be found at the Napier waterfront where large open spaces and wave-like banks allow people to take part in a multitude of fitness related activities - not exclusively skateboarding. The Wellington waterfront also provides an ideal location to attempt something similar. Just about the whole waterfront area in fact is ripe for a fresh, beautiful and modern design that draws people in and represents today's society. By making this an inclusive, useful space, Wellington has a golden opportunity to not only catch up with the likes of Napier, but to better help serve the city as a vibrant and happening community.

Additionally, and speaking on behalf of the skateboarding community that uses the ramp facilities at Ian Galloway park in Karori, we were really pleased and thankful to have two bbq-type seats provided. It is amazing how much even such a small thing can boost our community and make that area just that much more usable. We're not asking for multi-million dollar stadiums, however, Wellington is really a very long way behind other cities

and even some smaller towns in the facilities provided for skateboarding.

Skatepark design has come a long way from the 90's when most skateparks were built in an almost brutalist style and weren't always attractive or inviting places to visit. Now however, skateparks often include playgrounds, shelter, seating for parents, etc etc. and serve as useful community hubs. Another example from the Hawkes Bay is the skatepark in Hastings which has a sort of booth thing with a person on site during the day, water, snacks, etc., and is a very safe space for people. Island Bay skatepark for example, could really do with this sort of thing and a lift in general. Again, we're really grateful for the little concrete addition there recently, but the park as a whole is very old now.

We understand that skateboarding fits in somewhere below the importance of pipes, buses etc., but it is an ever increasingly popular activity. It appeals to the youth but spans across age groups and is also a relatively sustainable form of transport. It is a physical activity that is now an Olympic sport and deserves attention.

Thank you,

Yours sincerely,

James L Smith

## Kōrero mai mō te mahere 10-tau Have your say on Our 10-Year Plan

All submissions must be received by midnight Monday 10 May 2021

You don't have to give feedback on every decision – just choose the ones you're interested in. You can only submit once. You can include supporting information along with your submission.

Before you start, read about our big decisions and the other supporting information in this consultation document.

### Why we're collecting this information

Your feedback matters. This plan is about the future of Wellington and it affects everyone who lives and works here. That's why we want to hear from as many people as possible. Your views will inform the next steps we take.

### Privacy statement

All submissions (including names and contact details) are provided in their entirety to elected members. Submissions (including names but not contact details) will be made available to the public at our office and on our website.

Your personal information will also be used for the administration of the consultation process, including informing you of the outcome of the consultation.

All information collected will be held by Wellington City Council, 113 The Terrace, Wellington, with submitters having the right to access and correct personal information.

Oral Hearing (formal hearing with set times to speak to full Council, 5mins per individual, 10mins per organisation)	<input type="checkbox"/>	Morning	
	<input type="checkbox"/>	Afternoon	
	<input type="checkbox"/>	Evening	

## Our seven big decisions

The next seven questions relate to the big decisions for the 10-year plan.

- **Decision 1:** Increasing spending on the three waters network to fix the pipes
- **Decision 2:** Taking responsibility for the ownership of wastewater laterals
- **Decision 3:** Increased investment in cycleways
- **Decision 4:** Implementing our Te Atakura: First to Zero action plan
- **Decision 5:** Choosing a plan for earthquake-prone Council Office buildings
- **Decision 6:** Funding the Central Library strengthening and upgrade
- **Decision 7:** Choosing a plan for sludge minimisation

Detailed information on these decisions are on pages 21 to 46 of the Consultation Document.

Question 9 in this submission form is a place for you to comment or provide any other feedback on the decisions.

You are also able to attach further information to your submission at the end of this form.

### **Question 1 – Investment in three waters infrastructure**

There are three different levels of investment in the three waters network to consider. Our preferred level of investment is the **Enhanced** option, which focuses on improving the condition and reliability of the network in an affordable and sustainable way.

Problems with pipes have been a long time in the making, and we cannot fix everything at once. The Enhanced option represents a \$2.4bn investment in our three waters network and is the middle-ground option that we are confident of being able to deliver in this plan. We will be able to review the level of investment in our next Long-term Plan review in 2024, when we will have more information on the network.

A summary of the proposed investment in in the three waters network is on pages 23-27 of the Consultation Document.

**Which of these options do you prefer?**

X	Enhanced (\$2.4b investment – the Council’s preferred option)
	Maintain (\$2.0b investment - lower rates and debt)
	Accelerated (\$3.3b investment – higher rates and debt)
	None of these options
	Don’t know

**Question 2 – Wastewater laterals**

Currently residents are responsible for the maintenance of the pipes connecting their property to the wastewater (sewerage) main underneath the road corridor. These are called wastewater laterals.

We propose that the Council takes ownership of the laterals between the property boundary and the sewerage main underneath the road corridor.

A summary of the proposal to take responsibility for wastewater laterals is on page 28 of the Consultation Document.

**Which of these options do you prefer?**

X	Take ownership (Council’s preferred option, \$32m investment)
	No change (no change in investment, rates or debt)
	None of these options
	Don’t know

### **Question 3 – Cycleways**

Cycleways is an area where we have ambition to seriously lift our game – we'd like to build a network of connected and safe cycleways that allow Wellingtonians to be able to choose cycling as a mode of transport. Our full programme for the network can be viewed at [transportprojects.org.nz](http://transportprojects.org.nz) and if all of the routes were progressed, would be a \$226m investment across the 10 years of this plan.

Our preferred option is a \$45m or 60 percent increase in funding for cycleways than what was planned in the previous Long-Term Plan. It will progress \$120m of the full \$226m programme

We believe the High investment programme option balances the need for increased investment in this area with what is affordable for Council and what we will be able to deliver. It allows time in the programme for robust community engagement and to build capacity in the Council and the sector for the full programme to be eventually delivered.

A summary of the proposed investment to build more cycleways is on pages 30 -33 of the Consultation Document.

#### **Which of these options do you prefer?**

	High investment programme (Council's preferred option, \$120m capital investment)
	Finish started projects (\$29m capital investment, lower debt and rates)
	Medium investment programme (\$39m capital investment, lower debt and rates)
	Full investment programme (\$226m capital investment, higher debt and rates)
X	None of these options
	Don't know

### **Question 4 – Te Atakura First to Zero (Climate Change)**

Te Atakura – First to Zero is our response to the climate and ecological emergency we declared in 2019 but it is not yet funded.

Te Atakura is intended to ensure sufficient activity is undertaken in this decade to reduce our emissions. Council can do this by supporting the transport mode-shift projects, as well as encouraging the uptake of electric cars, providing seed funding to leverage businesses and community impact and supporting residents to be motivated to take action.

Our preferred option is to fully fund Te Atakura, which is included in our 5.3% average increase across 10 years.

A summary of the proposed investment in Te Atakura – First to Zero Action Plan is on pages 34 -37 of the Consultation Document

#### **Which of these options do you prefer?**

	Fully fund the programme (Council's preferred option, \$29.9m investment)
X	Low level of funding (\$18.1m investment, lower rates and debt)
	Medium investment with savings (\$25.4m investment, lower rates and debt)
	None of these options

	Don't know
--	------------

**Question 5 – Te Ngākau Civic Precinct – Council office buildings**

Te Ngākau Civic Square is the musical, creative and democratic heart of Wellington but it has significant resilience challenges.

While we are still working through finalising the Framework for the Square, a specific decision is required in this Long-term Plan with respect to the future of the Council office buildings - the Municipal Office Building (MOB) and the Civic Administration Building (CAB).

As the two buildings are connected, and have similar resilience issues, it is important that the future of them is considered together.

Our preferred option is to demolish and rebuild the MOB and CAB buildings in partnership with private investment through a long-term ground lease for the site.

Combining a MOB and CAB development would enhance this opportunity and significantly decrease the need for additional Council borrowing and ratepayer funding to address these impaired buildings.

A summary of the proposed approach to developing of Te Ngākau Civic Square on pages 38 -41 of the Consultation Document

**Which of these options do you prefer?**

	Demolish and site developed through long-term lease (Council's preferred option)
	Proceed with base build proposal for public purposes (higher debt and rates)
	Retain and seek to repurpose (higher debt and rates)
	Sell to support development (no debt or rates impact)
	None of these options
X	Don't know

**Question 6 –Fixing the Central Library**

Wellington's much-loved Central Library was closed in March 2019 following an engineering assessment saying that the way the floor was designed presented a high level of potential failure in a significant earthquake.

After hearing from Wellingtonians in the 2020 consultation, Council agreed to recommend the high-level remediation option to be part of this plan. This option makes the building resilient to future shocks and supports our ability to deliver an adaptable modern library service, while preserving the buildings heritage. It also allows us to mitigate some climate change impacts in the future.

Now there are choices about how to fund the \$187.4m library remediation project, and when the project should take place.

The preferred option, includes the Council agreeing to temporarily breach its debt limit of 225% to ensure the library can be refurbished in the original timeframe and remain in public ownership. Our debt level will remain at 225%, and Council has agreed to accept the breach in the first three years of this plan. This breach will be mitigated by any capital

underspend being used for the library project rather than on new projects. Our debt level will be back below our limit by year 4 – 2024/25.

A summary of the proposed investment to fund the fixing of the Te Ngākau Civic Square Central Library is on pages 42 -43 of the Consultation Document

**Which of these options do you prefer?**

	Strengthen now by temporarily exceeding debt limit (Council’s preferred option additional 0.79% rates increase)
	Council to strengthen Central Library later (complete in 2028 instead of 2025, additional 0.83% rates increase)
	Strengthen now by increasing rates further (additional 1.79% rates increase)
	None of these options
X	Don’t know

**Question 7 – Reducing sewage sludge and waste**

One of the largest waste categories at the Southern Landfill is wastewater (sewage) sludge. This accounts for about a quarter of the waste that enters the landfill.

Through Te Atakura (our Zero Carbon Plan) and our Regional Waste Minimisation and Management Plan we have formally committed to reducing carbon emissions and reducing waste by a third. Minimising wastewater sludge is a necessary first step to achieving these objectives.

We need to break the link between the Southern Landfill and wastewater sludge and stop pumping sludge across the city, as 2020 highlighted the serious resilience issues and the significant consequences of failure.

Our preferred option is to invest in a sludge minimisation programme through another funding source. This means the project would not be funded by Council, but if it is funded through a Special Purpose Vehicle, a levy of about \$70-\$100 per year will be charged to each ratepayer.

A summary of the proposed investment in sludge and waste minimisation is on pages 45-47 of the Consultation Document.

**Which of these options do you prefer?**

	Sludge minimisation through alternate funding (Council’s preferred option, \$147m-\$208m capital investment funded through a levy, no additional rates increase)
	No change in current practice (no change to investment, rates or debt)
	Invest in technology at Southern Landfill (\$86m-\$134m capital investment and additional 0.39% rates increase)
	Sludge minimisation – through Council funding (\$147m-\$208m capital investment, above debt limit, and additional 1.65% rates increase)
	None of these options
X	Don’t know

### **Question 8 – Feedback on these decisions**

Do you have any comments you would like to provide around why you selected your preferred option to any of these decisions, or why you don't support any of the options we proposed? If yes please indicate what decision/s you wish to provide comment on.

	Investment in three waters infrastructure
	Wastewater laterals
	Cycleways
	Te Atakura (Climate change)
	Central Library
	Sludge and waste minimisation
	Te Ngākau funding for future work
	None of these

If this space is not adequate for your comments, please feel free to attach supporting information to the submission. Please be clear what decision you are commenting on.

### **Question 9 – Proposed 10-year budget** (See section “what this plan will cost” p13. of the Consultation Document for details)

Our draft budget, has an average rates increase for the average ratepayer of 5.3 percent after growth across the 10 years of the plan. We also propose setting a limit on how much we can raise from general rates - \$465m for each year across the first 3 years of the plan and, \$630m each year across years four to ten.

The first year of the plan has a rates increase of 13.5 percent (after growth) and there is an average of 9.9 percent (after growth) over the first three years. This is higher than previous plans because of the **key challenges** faced by the city including infrastructure, housing, earthquake strengthening and COVID-19 impacts. Therefore, we now require a step up in the level of rates we charge. Details of the key challenges are on page xx of the **Consultation Document**.

Our proposed budget also represents our highest ever level of capital investment in Wellington. It addresses the need for increased investment in our three waters infrastructure and transport network and seismic strengthening of key buildings, along with making progress against all our other priority community objectives.

Our debt levels for this plan, including the value of uninsured assets, range from 134 percent to 239 percent of our annual income. Our proposed limit is 225 percent.

We think this is a sensible limit on our borrowing to ensure that the impact on affordability of rates is maintained and leaves enough 'headroom' to ensure we can repay our debt, and respond to expected but unfunded and unexpected future events and opportunities.

**Do you support the proposed 10-year budget?**

<input type="checkbox"/>	I strongly support the proposed budget
<input type="checkbox"/>	I somewhat support the proposed budget
<input type="checkbox"/>	Neutral
<input type="checkbox"/>	I somewhat oppose the proposed budget
<input type="checkbox"/>	I strongly oppose the proposed budget
<input type="checkbox"/>	Don't know

**Question 9.a) – If you stated in Question 1 that you are neutral or do not support the proposed budget. Do you support increasing or decreasing spend?**

<input type="checkbox"/>	I support increasing spend in the current budget
<input type="checkbox"/>	I support decreasing spend in the current budget
<input type="checkbox"/>	I support keeping the budget the same but with some changes
<input type="checkbox"/>	Don't know

**Question 10 – Any other feedback on what is proposed for the 10-year Plan**

**Future decisions**

The Consultation Document also signals other decisions that are coming up in the time of this plan, but that we do not have enough information on at this stage for a detailed consultation.

**Other projects**

We also have many other services and projects detailed in our Statements of Service Provision.

**Council Fees and charges**

We have also made changes to some of our fees and user charges. More information on these are available on our website: <https://wgtn.cc/ltp> and available at our libraries and service centre.

**Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

<p><b>SUBMISSION ON THE WCC LONG TERM PLAN:</b></p> <p>Please accept these comments as my submission on the WCC Long Term Plan consultation.</p> <p>Skating and scooting are a casual activity for many kids, a form of fitness for people of all ages, as well as one of the five new sport to be introduced in the Olympic program in</p>
---

Tokyo! It has been accepted as a sport at high levels, but needs to be given more consideration at a local community level.

**Immediate recommendations include:**

1. Fund the Tawa skatepark, which has already been concept designed.
2. Incorporate a world class skate facility into the Grenada North Sports Hub development or the Kilbirnie Park redevelopment. This could be indoors, see Olympic level and international competition as well as provide a training facility and skate school.
3. Expand Waitangi Park by re-designing the mini ramps and extending the surrounding area.
4. Incorporate smaller indoor mini ramps into upcoming projects like the Alex Moore Park Sports Hub building or the redevelopment of Aro Valley community facilities (an adequate size would be approximately 9 x 6 metres).
5. Complete the Rongotai skatepark (there is a full park design but only one-third was built).
6. Give Treetops and Owen Street DIY spots Council designation as skateparks and funding to include toilet facilities, lights, seating and bins, while allowing for skaters to develop their own skate facilities (thereby keeping the DIY aesthetic).
7. Develop the unused large grass area behind the Karori ramps into a "street" skatepark area.
8. Replace the disused Nairnville ramp with a new fit for purpose mini-ramp.
9. Incorporate skate spots into urban design when opportunities arise and follow through on Council policy to incorporate five skateable "spots" around central Wellington and include an assessment of skate opportunities in the design brief of all new public space upgrades.

**Long Term Recommendations:**

1. Current skateparks are redeveloped to make them fit for purpose and fit for better community use, and ramps or other facilities are placed indoors or under shelter wherever possible.
2. Skateparks include lighting and public toilets to make them safer and more accessible to everyone, including families, women, girls and gender diverse communities.
3. That city-wide skateparks be developed into world-class facilities open to all skill levels and used for international competition and as an elite training facility and skate school for beginners.
4. Either the city-wide skatepark or one of the medium sized skateparks be located indoors
5. New urban design includes skateable spots so that the central city becomes a world-class skate city along the lines of popular "skate" cities like Barcelona.
6. Funding for skate schools such as Waa Hine skate and Girl Skate NZ to further encourage the participation of women, girls and gender diverse communities.

My first recommendation is to fund the Tawa skate park redevelopment. Our youth need this! Its fine to do playgrounds, but what about for our teens, our youth!? This age group is so often forgotten about. Tawa often gets forgotten about, being the furthest suburb

from Wellington central, and closer to Porirua. Local kids and all ages of skatepark users have to travel to Porirua or the city to be able to utilise a decent skate park because the existing Tawa one is so old, run down and boring.

Funding and redeveloping Tawa skatepark is a no-brainer, because the space is already there, a design concept is underway, the community wants it and supports it, many people would use it, and it would be such a positive addition to the Tawa community.

**Benefits include:**

- **Creating a recreational hub** – this location is awesome. The existing skate park site is next to Tawa Pool and Grasslees Reserve (park and playground), meaning that this whole area is becoming something of a recreational hub for families and individuals. The community can use all three areas within easy walking distance, and easily park at each of them. The site is also right next to Te Ara Tawa (the Tawa Pathway) which connects Tawa from Willowbank Reserve through to Porirua, making the skate park safely accessible by bike and foot, as well as via the nearby train stations.
- **Proximity to users** – the skate park is very close to Tawa Intermediate School, Tawa College and can be utilised by the six primary schools in Tawa.
- **Youth** – updating this skate park will give the youth of Tawa and surrounding areas something else to do. Currently, many users will leave Tawa to go to Porirua Skate Park, Waitangi Skate Park and other better skate parks around Wellington. Often parents need to drive the younger users to parks outside the suburb, so giving them something they can use locally is a real bonus.
- **Community** – upgrading an existing space is a great thing for the whole community. It tidies up a run-down area, makes it feel safer, creates a project for the community to get behind, and is creating something that many different people in the community can use.
- **Social** – There is a real sense of skater/scooter community when you visit some of the skate parks. Users looking out for one another, helping each other out, teaching each other and learning respect for the various people using the parks.
- **Safety** – because this area is often empty, it has become a common place for loiterers and for people to ‘hang out’ rather than use as it is intended. Upgrading the area should result in an area that is more regularly used, meaning less loitering and vandalism. Being more regularly used also ensures it is a safer place for our youth to use.
- **Exercise/activity** – rugby, soccer, netball, hockey and other more traditional sports aren’t always for everyone. Being able to skate and scoot all year round means kids can get out and about whenever they like – and aside from having a skateboard or scooter, it’s free! It is very easy to spend hours and hours exploring the different skate parks, streets, and suburbs on a skate board or scooter. Much better than sitting in front of a computer game!
- **All age groups/inclusive** – you only have to visit Waitangi Skate Park on the weekend to see how many different abilities and age groups there are using the park. Young learners on 3 wheeled scooters or 2 wheeled balance bikes, more confident kids, right

up to more experiences users who know all the tricks. There are younger, older, guys, gals, scooters, skaters, all sorts - it's awesome to see such an inclusive activity.

- **Events** – a few years ago there was the Newlands Community Festival, held at the Newlands Skate Park. People of all abilities and ages were having a go scooting and skating, plus there was entertainment, food trucks, stalls, community groups and a whole lot of people enjoying the show. Local businesses sponsored prizes for different age group competitions, and there was a real sense of community for both those taking part in the event and also the spectators. (And Newlands skate park is currently being rebuilt, even though it was already better than Tawa before they started this latest construction!)
- **Availability** – WCC have already agreed that any redevelopment can include the land directly adjacent to the existing skate park. We want to ensure this happens before that land can get used for something else. Using that land in the redevelopment will double the useable space, and would allow for space to include picnic tables, seating, lighting, grass areas, to really make this space suitable for everyone.
- **Longevity** – All around NZ, and in the lower north island, there are a number of skate parks that have been or are being built new or being redeveloped. Councils and communities are investing in an activity that has been around for decades and seems to stand the test of time! This is a great time to invest in upgrading the Tawa Skate Park – we could be creating a training ground for our own budding local Olympians, since skateboarding is going to be at the 2021 Olympics in Japan!

Thank you very much for your submission!

## **SUBMISSION ON THE WCC LONG TERM PLAN:**

Please accept these comments as my submission on the WCC Long Term Plan consultation.

Skating and scooting are a casual activity for many kids, a form of fitness for people of all ages, as well as one of the five new sport to be introduced in the Olympic program in Tokyo! It has been accepted as a sport at high levels, but needs to be given more consideration at a local community level.

### **Immediate recommendations include:**

1. Fund the Tawa skatepark, which has already been concept designed.
2. Incorporate a world class skate facility into the Grenada North Sports Hub development or the Kilbirnie Park redevelopment. This could be indoors, see Olympic level and international competition as well as provide a training facility and skate school.
3. Expand Waitangi Park by re-designing the mini ramps and extending the surrounding area.
4. Incorporate smaller indoor mini ramps into upcoming projects like the Alex Moore Park Sports Hub building or the redevelopment of Aro Valley community facilities (an adequate size would be approximately 9 x 6 metres).
5. Complete the Rongotai skatepark (there is a full park design but only one-third was built).
6. Give Treetops and Owen Street DIY spots Council designation as skateparks and funding to include toilet facilities, lights, seating and bins, while allowing for skaters to develop their own skate facilities (thereby keeping the DIY aesthetic).
7. Develop the unused large grass area behind the Karori ramps into a “street” skatepark area.
8. Replace the disused Nairnville ramp with a new fit for purpose mini-ramp.
9. Incorporate skate spots into urban design when opportunities arise and follow through on Council policy to incorporate five skateable “spots” around central Wellington and include an assessment of skate opportunities in the design brief of all new public space upgrades.

### **Long Term Recommendations:**

1. Current skateparks are redeveloped to make them fit for purpose and fit for better community use, and ramps or other facilities are placed indoors or under shelter wherever possible.
2. Skateparks include lighting and public toilets to make them safer and more accessible to everyone, including families, women, girls and gender diverse communities.
3. That city-wide skateparks be developed into world-class facilities open to all skill levels and used for international competition and as an elite training facility and skate school for beginners.
4. Either the city-wide skatepark or one of the medium sized skateparks be located indoors
5. New urban design includes skateable spots so that the central city becomes a world-class skate city along the lines of popular “skate” cities like Barcelona.
6. Funding for skate schools such as Waa Hine skate and Girl Skate NZ to further encourage the participation of women, girls and gender diverse communities.

My first recommendation is to fund the Tawa skate park redevelopment. Tawa often gets forgotten about, being the furthest suburb from Wellington central, and closer to Porirua. Local kids and skatepark users have to travel to Porirua or the city to be able to utilise a decent skate park because the existing Tawa one is so old, run down and boring.

Funding and redeveloping Tawa skatepark is a no-brainer, because the space is already there, a design concept is underway, the community wants it and supports it, many people would use it, and it would be such a positive addition to the Tawa community.

**Benefits include:**

- **Creating a recreational hub** – this location is awesome. The existing skate park site is next to Tawa Pool and Grasslees Reserve (park and playground), meaning that this whole area is becoming something of a recreational hub for families and individuals. The community can use all three areas within easy walking distance, and easily park at each of them. The site is also right next to Te Ara Tawa (the Tawa Pathway) which connects Tawa from Willowbank Reserve through to Porirua, making the skate park safely accessible by bike and foot, as well as via the nearby train stations.
- **Proximity to users** – the skate park is very close to Tawa Intermediate School, Tawa College and can be utilised by the six primary schools in Tawa.
- **Youth** – updating this skate park will give the youth of Tawa and surrounding areas something else to do. ### Have your say on our 10-Year Plan

All submissions must be received by **midnight Monday 10 May 2021**.

You don't have to give feedback on every decision – just choose the ones you're interested in. You can only submit once. You can include supporting information along with your submission.

Before you start, read about our priorities and projects in our consultation document. There are copies available at your local library and our Service Centre at 12 Manners Street, or visit [wgtm.cc/ltp](http://wgtm.cc/ltp).

#### Why we're collecting this information

Your feedback matters. This plan is about the future of Wellington and it affects everyone who lives and works here. That's why we want to hear from as many people as possible. Your views will inform the next steps we take.

#### Privacy statement

All submissions (including names and contact details) are provided in their entirety to elected members. Submissions (including names but not contact details) will be made available to the public at our office and on our website.

Your personal information will also be used for the administration of the consultation process, including informing you of the outcome of the consultation.

All information collected will be held by Wellington City Council, 113 The Terrace, Wellington, with submitters having the right to access and correct personal information.

Full name: Grant Joseph Fletcher

<input type="checkbox"/> I am a Wellington City Council ratepayer	<input type="checkbox"/> I live in Wellington	<input type="checkbox"/> I work in Wellington	
<input checked="" type="checkbox"/> I own a business in Wellington	<input checked="" type="checkbox"/> I study in Wellington	<input checked="" type="checkbox"/> I am a visitor to Wellington	
Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?			
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No		
If yes - We are offering two ways of speaking to Councillors about your submission. <i>(Please tick which option(s) you would prefer?)</i>			
<b>Oral forum</b> (informal, 60min facilitated table discussion with 2 to 3 Councillors and other submitters)	<input type="checkbox"/> Morning	<input type="checkbox"/> Afternoon	<input type="checkbox"/> Evening
<b>Oral Hearing</b> (formal hearing with set times to speak to full Council, 5mins per individual, 10mins per organisation)	<input type="checkbox"/> Morning	<input type="checkbox"/> Afternoon	<input type="checkbox"/> Evening

## Our seven big decisions

The next seven questions relate to the big decisions for the 10-year plan.

- **Decision 1:** Increasing spending on the three waters network to fix the pipes
- **Decision 2:** Taking responsibility for the ownership of wastewater laterals
- **Decision 3:** Increased investment in cycleways
- **Decision 4:** Implementing our Te Atakura, First to Zero action plan
- **Decision 5:** Choosing a plan for earthquake-prone Council Office buildings
- **Decision 6:** Funding the Central Library strengthening and upgrade
- **Decision 7:** Choosing a plan for sludge minimisation

Detailed information on these decisions are on pages 20 to 47 of the Consultation Document.

**Question 8** in this submission form is a place for you to comment or provide any other feedback on the decisions.

You are also able to attach further information to your submission at the end of this form.

### 1. Investment in three waters infrastructure

There are three different levels of investment in the three waters network to consider. Our preferred level of investment is the **Enhanced** option, which focuses on improving the condition and reliability of the network in an affordable and sustainable way.

Problems with pipes have been a long time in the making, and we cannot fix everything at once. The Enhanced option represents a \$2.4b investment in our three waters network and is the middle-ground option that we are confident of being able to deliver in this plan. We will be able to review the level of investment in our next Long-term Plan review in 2024, when we will have more information on the network.

A summary of the proposed investment in in the three waters network is on pages 22 - 26 of the Consultation Document.

Which of these options do you prefer?

Enhanced (\$2.4b Council's preferred option)	<del>Maintain (\$2.0b investment - lower rates and debt)</del>	<del>Accelerated (\$3.3b investment - higher rates and debt)</del>	<del>None of these options</del>	<del>Don't know</del>
--	--	--	----------------------------------	-----------------------

### 2. Wastewater laterals

Currently residents are responsible for the maintenance of the pipes connecting their property to the wastewater (sewerage) main underneath the road corridor. These are called wastewater laterals.

We propose that the Council takes ownership of the laterals between the property boundary and the sewerage main underneath the road corridor.

A summary of the proposal to take responsibility for wastewater laterals is on pages 28 - 29 of the Consultation Document.

Which of these options do you prefer?

Take ownership (Council's preferred option, \$32m investment)	<del>No change (no change in investment, rates or debt)</del>	<del>Neither of these options</del>	<del>Don't know</del>
---	---	-------------------------------------	-----------------------

### 3. Cycleways

Cycleways is an area where we have ambition to seriously lift our game - we'd like to build a network of connected and safe cycleways that allow Wellingtonians to be able to choose cycling as a mode of transport. Our full programme for the network can be viewed at [transportprojects.org.nz](http://transportprojects.org.nz) and if all of the routes were progressed, there would be a \$226m investment across the 10 years of this plan.

Our preferred option is a \$45m or 60 percent increase in funding for cycleways than what was planned in the previous Long-term Plan. It will progress \$120m of the full \$226m programme

We believe the high investment programme option balances the need for increased investment in this area with what is affordable for Council and what we will be able to deliver. It allows time in the programme for robust community engagement and to build capacity in the Council and the sector for the full programme to be eventually delivered.

A summary of the proposed investment to build more cycleways is on pages 30 - 33 of the Consultation Document.

Which of these options do you prefer?

<del>High investment programme (Council's preferred option, \$120m capital investment)</del>	Finish started projects (\$29m capital investment, lower debt and rates)	<del>Medium investment programme (\$39m capital investment, lower debt and rates)</del>
<del>Accelerated full investment programme (\$226m capital investment, higher debt and rates)</del>	<del>None of these options</del>	<del>Don't know</del>

### 4. Te Atakura First to Zero (Climate Change)

Te Atakura - First to Zero is our response to the climate and ecological emergency we declared in 2019 but it is not yet funded.

Te Atakura is intended to ensure sufficient activity is undertaken in this decade to reduce our emissions. Council can do this by supporting the transport mode-shift projects, as well as encouraging the uptake of electric cars, providing seed funding to leverage businesses and community impact and supporting residents to be motivated to take action.

Our preferred option is to fully fund Te Atakura, which is included in our 5.3 percent average increase across 10 years.

A summary of the proposed investment in Te Atakura - First to Zero Action Plan is on pages 34 - 37 of the Consultation Document.

Which of these options do you prefer?

Fully fund the programme (Council's preferred option, \$29.9m investment)	<del>Medium investment with savings (\$25.4m investment, lower rates and debt)</del>
<del>Low level of funding (\$18.1m investment, lower rates and debt)</del>	<del>None of these options</del> <del>Don't know</del>

### 5. Te Ngākau Civic Precinct - Council office buildings

Te Ngākau Civic Square is the musical, creative and democratic heart of Wellington but it has significant resilience challenges.

While we are still working through finalising the framework for Civic Square, a specific decision is required in this Long-term Plan with respect to the future of the Council office buildings - the Municipal Office Building (MOB) and the Civic Administration Building (CAB).

As the two buildings are connected, and have similar resilience issues, it is important that the future of them is considered together.

Our preferred option is to demolish and rebuild the MOB and CAB buildings in partnership with private investment through a long-term ground lease for the site.

Combining a MOB and CAB development would enhance this opportunity and significantly decrease the need for additional Council borrowing and ratepayer funding to address these impaired buildings.

A summary of the proposed approach to developing of Te Ngākau Civic Square on pages 38 - 41 of the Consultation Document.

Which of these options do you prefer?

Demolish and site developed through long-term lease (Council's preferred option)	<del>Proceed with base build proposal for public purposes (higher debt and rates)</del>
<del>Retain and seek to repurpose (higher debt and rates)</del>	<del>Sell to support development (no debt or rates impact)</del> <del>None of these options</del> <del>Don't know</del>

## 6. Fixing the Central Library

Wellington's much-loved Central Library was closed in March 2019 following an engineering assessment saying that the way the floor was designed presented a high level of potential failure in a significant earthquake.

After hearing from Wellingtonians in the 2020 consultation, Council agreed to recommend the high-level remediation option to be part of this plan. This option makes the building resilient to future shocks and supports our ability to deliver an adaptable modern library service, while preserving the buildings heritage. It also allows us to mitigate some climate change impacts in the future.

Now there are choices about how to fund the \$187.4m library remediation project, and when the project should take place.

The preferred option, includes the Council agreeing to temporarily breach its debt limit of 225 percent to ensure the library can be refurbished in the original timeframe and remain in public ownership. Our debt level will remain at 225 percent, and Council has agreed to accept the breach in the first three years of this plan. This breach will be mitigated by any capital underspend being used for the library project rather than on new projects. Our debt level will be back below our limit by year 4 – 2024/25.

A summary of the proposed investment to fund the fixing of the Te Ngākau Civic Square Central Library is on pages 42 – 44 of the Consultation Document.

Which of these options do you prefer?

Strengthen now by temporarily exceeding debt limit (Council's preferred option, additional 0.79% rates increase)	<del>Council to strengthen Central Library later (complete in 2028 instead of 2025, additional 0.83% rates increase)</del>	
<del>Strengthen now by increasing rates further (additional 1.79% rates increase)</del>	<del>None of these options</del>	<del>Don't know</del>

## 7. Reducing sewage sludge and waste

One of the largest waste categories at the Southern Landfill is wastewater (sewage) sludge. This accounts for about a quarter of the waste that enters the landfill.

Through Te Atakura (our Zero Carbon Plan) and our Regional Waste Minimisation and Management Plan we have formally committed to reducing carbon emissions and reducing waste by a third. Minimising wastewater sludge is a necessary first step to achieving these objectives.

We need to break the link between the Southern Landfill and wastewater sludge and stop pumping sludge across the city, as 2020 highlighted the serious resilience issues and the significant consequences of failure.

Our preferred option is to invest in a sludge minimisation programme through another funding source. This means the project would not be funded by Council, but if it is funded through a Special Purpose Vehicle, a levy of about \$70-\$100 per year will be charged to each ratepayer.

A summary of the proposed investment in sludge and waste minimisation is on pages 45 – 47 of the Consultation Document.

Which of these options do you prefer?

Sludge minimisation through alternate funding (Council's preferred option, \$147m-\$208m capital investment funded through a levy, no additional rates increase)	<del>No change in current practice (no change to investment, rates or debt)</del>	
<del>Invest in technology at Southern Landfill (\$86m-\$134m capital investment and higher rates)</del>	<del>Sludge minimisation through Council funding (\$147m-\$208m capital investment, above debt limit and higher rates)</del>	
<del>None of these options</del>	<del>Don't know</del>	

## 8. Feedback on these decisions

Do you have any comments you would like to provide around why you selected your preferred option to any of these decisions, or why you don't support any of the options we proposed? If yes please indicate what decision/s you wish to provide comment on.

Investment in three waters infrastructure	Wastewater laterals	Cycleways
Te Atakura (climate change)	Central Library	Sludge and waste minimisation
Te Ngākau funding for future work	None of these	

If the space on the next page is not adequate for your comments, please feel free to attach supporting information to the submission. **Please be clear** what decision you are commenting on.

### 9. Proposed 10-year budget (see page 10 for details)

Our draft budget, has an average rates increase for the average ratepayer of 5.3 percent after growth across the 10 years of the plan. We also propose setting a limit on how much we can raise from general rates - \$465m for each year across the first 3 years of the plan and, \$630m each year across years four to ten.

The first year of the plan has a rates increase of 13.5 percent (after growth) and there is an average of 9.9 percent (after growth) over the first three years. This is higher than previous plans because of the **key challenges** faced by the city including infrastructure, housing, earthquake strengthening and and COVID-19 impacts.. Therefore, we now require a step up in the level of rates we charge. Details of the key challenges are on pages 20 - 47 of the **Consultation Document**.

Our proposed budget also represents our highest ever level of capital investment in Wellington. It addresses the need for increased investment in our three waters infrastructure and transport network and seismic strengthening of key buildings, along with making progress against all our other priority community objectives.

Our debt levels for this plan, including the value of uninsured assets, range from 134 percent to 239 percent of our annual income. Our proposed limit is 225 percent.

We think this is a sensible limit on our borrowing to ensure that the impact on affordability of rates is maintained and leaves enough 'headroom' to ensure we can repay our debt, and respond to expected but unfunded and unexpected future events and opportunities.

#### Do you support the proposed 10-year budget?

I strongly support the proposed budget	I somewhat support the proposed budget	Neutral
I somewhat oppose the proposed budget	I strongly oppose the proposed budget	Don't know

#### If you stated in Question 9 that you are neutral or do not support the proposed budget. Do you support increasing or decreasing spend?

I support increasing spend in the current budget	I support decreasing spend in the current budget	I support keeping the budget the same but with some changes	Don't know
--	--	---	------------

## 10. Any other feedback on what is proposed for the 10-year Plan

### **Future decisions**

The Consultation Document also signals other decisions that are coming up in the time of this plan, but that we do not have enough information on at this stage for a detailed consultation.

### **Other projects**

We also have many other services and projects detailed in our Statements of Service Provision.

### **Council Fees and charges**

We have also made changes to some of our fees and user charges. More information on these are available on our website [wgtn.cc/ltp](http://wgtn.cc/ltp) and available at our libraries and service centre.

Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?

# Submission: #1933

**From:** [Samuel Prior](#)  
**To:** [BUS: Long Term Plan Engagement](#)  
**Subject:** Wellington City Skateboarding  
**Date:** Sunday, 9 May 2021 2:31:58 pm

---

Hi my name is Sam and Skateboarding is a big part of my life. I believe the skateparks in Wellington do not meet anywhere near the standards of skateparks across the country, or of other Capital city's. Right now the best places to skate in Wellington have been built and funded by skaters. Please consider a nice indoor park as our wet weather and high winds through winter are not ideal skateboarding conditions.

1. A long-term plan for skateboarding.

Create a 'Long-term/10-year plan' for the future of skateboarding in Wellington City that is inclusive and co-designed. Including the development of international/olympic standard skateparks, skate-friendly urban design, and redevelopment of existing facilities and construction of new facilities. Ensure the longevity and sustainability of community skate projects.

Immediate opportunities include: Waitangi Park, Grenada North, Kilbirnie Park, Tawa, Rongotai, Nairnville, Treetops/Owen Street DIYs, Frank Kitts Park and the waterfront plus other areas.

2. World-class skateboarding in Wellington city.

Create an international/Olympic-standard skate park.

Immediate opportunity: This can be achieved by upgrading Waitangi Park or including it in the current Grenada North or Kilbirnie Park redevelopments. the park would cater for all levels of ability (beginner, intermediate and advanced), and types of skating (Park and Street courses) meet current Olympic standards and could hold local, regional, national, and Olympic qualifying events. The Park should be adequately sheltered from the elements for year round skating.

3. Skateboarding welcomed in public spaces and included in future infrastructure projects.

Provide safe areas for skaters to meet and skate together within the city centre. This is a vital ingredient for a healthy, inclusive skate scene. Removal of "no skateboarding" signs and skate-stoppers in public spaces. Make Wellington city one of the best places in the world to be a skateboarder by ensuring skateboarding is included in future infrastructure and urban design projects.

Immediate opportunities include: Petone to Ngauranga cycle way, Frank Kitts Park redevelopment and other current urban developments

4. Indoor skateboarding facilities.

Currently there are no facilities or anywhere to go skateboarding during the Winter Months or when it is dark, wet, or windy. Improve equity and access for skateboarding year-round.

Immediate opportunities include: Kilbirnie Recreation Centre, Grenada North sports hub, Kilbirnie Park, Alex Moore Park sports hub and other opportunities.

## Submission: #1934

**From:** [Steve Naismith](#)  
**To:** [BUS: Long Term Plan Engagement](#)  
**Subject:** Brooklyn Cycleway  
**Date:** Sunday, 9 May 2021 3:41:25 pm

---

I write to you as a tax payer and Wellington rate payer in utter disbelief and dismay at the cycleway proposal for Brooklyn Hill.

For decades this piece of road has worked admirably, especially in its capacity to allow motorists to pass slow-moving, heavily laden trucks safely in the passing lane provided on the uphill side. Traffic from Nairn and Bidwill Streets merges seamlessly and safely with the current layout, which looks to be severely disrupted under the current proposal. Have all the safety aspects been tabled and reviewed? If so, by who and when? I would be keen to peruse a copy of the safety audit; do you have one available?

When was public consultation undertaken and in which media were the notifications published? I have yet to see any and would appreciate copies of them.

Furthermore; the removal of parking spaces in an area already short on such is preposterous. Access to the busy Central Vet Hospital is already limited and looks set to become even more difficult and dangerous and that is just one example.

Merging from the aforementioned Nairn and Bidwill Streets will also become extremely hazardous with motorists having to negotiate an unnecessary cycle lane. Then there's the ludicrous proposal to move the pedestrian refuge outside 143-145 Ohiro Road to create an exceedingly tight pinch point. This dangerous idea beggars belief.

The whole proposal is unworkable, unsafe and unnecessary. The process, as far as I can ascertain, has been opaque and undemocratic. That alone needs to be fully investigated. In speaking to the DomPost Deputy Mayor Sarah Free stated; "There would be more consultation once the cycleway was installed." That's not good enough. Full consultation needs to be undertaken before these things get underway, not after the fact. The flyer that arrived in our letterbox is a notification of what is going to happen and does not in any way constitute consultation. Once installed, the WCC is likely to be unwilling to remove this so-called 'temporary' cycleway, regardless of its predicted hazardous nature. This is our neighbourhood and our safety that is being affected with what is seemingly a majority strongly opposed to the ill-conceived plan. Was nothing learnt from the Island Bay debacle?

Shared footpaths work well in many overseas locations, why can they not be implemented here? This would allow motorised traffic to flow freely and enhance cyclist safety through their not being adjacent to, or intersecting, faster moving traffic.

I call for a halt to any work on this project until all matters have been resolved through due process with clear public consultation and robust public debate.

Yours sincerely,

Steve Naismith.

# Submission: #1935

**From:** [Olivia Ferguson](#)  
**To:** [BUS: Long Term Plan Engagement](#)  
**Subject:** Wellington Skateparks- 10 year plan  
**Date:** Sunday, 9 May 2021 4:34:49 pm

---

Hello,

My name is Olivia Ferguson, I live and skate in Wellington city. I actually first learnt to skate in Wellington 2 years ago now and it has become an important part of maintaining my mental and physical health, as well as having allowed me to meet many new people.

I am writing to you because I believe skateboarding needs to be an important consideration in Wellington's 10 year plan. Coming from Auckland I can see there is a lack of attention to the skateboarding scene in the capital city compared to Auckland, with very few skateparks and other facilities for skaters. It would be amazing to see skateboarding receive the same investment in Wellington as there is a large skateboarding scene and these facilities would be gladly welcomed. Having more suitable spaces would also encourage more people to learn and build a healthier skate community.

I believe that any new parks or updates to existing ones must be co-designed with members of the skate community. Improper design of these spaces can be dangerous and cause injury, costing taxpayers in ACC claims. An example of poor design of a space supposedly designed for skaters is the use of small stones around the base of the trees at Waitangi skatepark, these small stones are a huge issue that should be addressed and a design feature that should not be repeated. Stones do not belong in skateable places. Improper design of skate parks is an issue in Wellington and feels tokenistic to the skate community, forcing skaters to other public spaces in search of better spots where skaters are told they can not skate, leaving them with few options. Skaters should design skate spaces.

Some other immediate and long term points I along with other members of the skate community feel should be addressed in the 10 year plan include the following:

## **1. A long-term plan for skateboarding.**

Create a 'Long-term/10-year plan' for the future of skateboarding in Wellington City that is inclusive and co-designed. Including the development of international/olympic standard skateparks, skate-friendly urban design, and redevelopment of existing facilities and construction of new facilities. Ensure the longevity and sustainability of community skate projects.

Immediate opportunities include: Waitangi Park, Grenada North, Kilbirnie Park, Tawa, Rongotai, Nairnville, Treetops/Owen Street DIYs, Frank Kitts Park and the waterfront plus other areas.

## **2. World-class skateboarding in Wellington city.**

Create an international/Olympic-standard skate park.

Immediate opportunity: This can be achieved by upgrading Waitangi Park or including it in the current Grenada North or Kilbirnie Park redevelopments. the park would cater for all levels of ability (beginner, intermediate and advanced), and types of skating (Park and Street courses) meet current Olympic standards and could hold local, regional, national, and Olympic qualifying events. The Park should be adequately sheltered from the elements for year round skating.

### **3. Skateboarding welcomed in public spaces and included in future infrastructure projects.**

Provide safe areas for skaters to meet and skate together within the city centre. This is a vital ingredient for a healthy, inclusive skate scene. Removal of "no skateboarding" signs and skate-stoppers in public spaces. Make Wellington city one of the best places in the world to be a skateboarder by ensuring skateboarding is included in future infrastructure and urban design projects.

Immediate opportunities include: Petone to Ngauranga cycle way, Frank Kitts Park redevelopment and other current urban developments

### **4. Indoor skateboarding facilities.**

Currently there are no facilities or anywhere to go skateboarding during the Winter Months or when it is dark, wet, or windy. Improve equity and access for skateboarding year-round.

Immediate opportunities include: Kilbirnie Recreation Centre, Grenada North sports hub, Kilbirnie Park, Alex Moore Park sports hub and other opportunities.

I am looking forward to being a part of the positive changes in the Wellington skate scene.

Thank you for your consideration,

Nga mihi,

Olivia Ferguson

## Our seven big decisions

The next seven questions relate to the big decisions for the 10-year plan.

- **Decision 1:** Increasing spending on the three waters network to fix the pipes
- **Decision 2:** Taking responsibility for the ownership of wastewater laterals
- **Decision 3:** Increased investment in cycleways
- **Decision 4:** Implementing our Te Atakura, First to Zero action plan
- **Decision 5:** Choosing a plan for earthquake-prone Council Office buildings
- **Decision 6:** Funding the Central Library strengthening and upgrade
- **Decision 7:** Choosing a plan for sludge minimisation

Detailed information on these decisions are on pages 20 to 47 of the Consultation Document.

**Question 8** in this submission form is a place for you to comment or provide any other feedback on the decisions.

You are also able to attach further information to your submission at the end of this form.

### 1. Investment in three waters infrastructure

There are three different levels of investment in the three waters network to consider. Our preferred level of investment is the **Enhanced** option, which focuses on improving the condition and reliability of the network in an affordable and sustainable way.

Problems with pipes have been a long time in the making, and we cannot fix everything at once. The Enhanced option represents a \$2.4b investment in our three waters network and is the middle-ground option that we are confident of being able to deliver in this plan. We will be able to review the level of investment in our next Long-term Plan review in 2024, when we will have more information on the network.

A summary of the proposed investment in the three waters network is on pages 22 – 26 of the Consultation Document.

Which of these options do you prefer?

Enhanced (\$2.4b Council's preferred option)	Maintain (\$2.0b investment – lower rates and debt)	Accelerated (\$3.3b investment – higher rates and debt)	None of these options	Don't know
--	---	---	-----------------------	------------

### 2. Wastewater laterals

Currently residents are responsible for the maintenance of the pipes connecting their property to the wastewater (sewerage) main underneath the road corridor. These are called wastewater laterals.

We propose that the Council takes ownership of the laterals between the property boundary and the sewerage main underneath the road corridor.

A summary of the proposal to take responsibility for wastewater laterals is on pages 28 – 29 of the Consultation Document.

Which of these options do you prefer?

Take ownership (Council's preferred option, \$32m investment)	No change (no change in investment, rates or debt)	Neither of these options	Don't know
---	--	--------------------------	------------

### 3. Cycleways

Cycleways is an area where we have ambition to seriously lift our game – we’d like to build a network of connected and safe cycleways that allow Wellingtonians to be able to choose cycling as a mode of transport. Our full programme for the network can be viewed at [transportprojects.org.nz](http://transportprojects.org.nz) and if all of the routes were progressed, there would be a \$226m investment across the 10 years of this plan.

Our preferred option is a \$45m or 60 percent increase in funding for cycleways than what was planned in the previous Long-term Plan. It will progress \$120m of the full \$226m programme

We believe the high investment programme option balances the need for increased investment in this area with what is affordable for Council and what we will be able to deliver. It allows time in the programme for robust community engagement and to build capacity in the Council and the sector for the full programme to be eventually delivered.

A summary of the proposed investment to build more cycleways is on pages 30 – 33 of the Consultation Document.

Which of these options do you prefer?

High investment programme (Council’s preferred option, \$120m capital investment)	Finish started projects (\$29m capital investment, lower debt and rates)	Medium investment programme (\$39m capital investment, lower debt and rates)
Accelerated full investment programme (\$226m capital investment, higher debt and rates)	None of these options	Don’t know

### 4. Te Atakura First to Zero (Climate Change)

Te Atakura – First to Zero is our response to the climate and ecological emergency we declared in 2019 but it is not yet funded. Te Atakura is intended to ensure sufficient activity is undertaken in this decade to reduce our emissions. Council can do this by supporting the transport mode-shift projects, as well as encouraging the uptake of electric cars, providing seed funding to leverage businesses and community impact and supporting residents to be motivated to take action.

Our preferred option is to fully fund Te Atakura, which is included in our 5.3 percent average increase across 10 years.

A summary of the proposed investment in Te Atakura – First to Zero Action Plan is on pages 34 – 37 of the Consultation Document.

Which of these options do you prefer?

Fully fund the programme (Council’s preferred option, \$29.9m investment)	Medium investment with savings (\$25.4m investment, lower rates and debt)
Low level of funding (\$18.1m investment, lower rates and debt)	None of these options Don’t know

### 5. Te Ngākau Civic Precinct – Council office buildings

Te Ngākau Civic Square is the musical, creative and democratic heart of Wellington but it has significant resilience challenges.

While we are still working through finalising the framework for Civic Square, a specific decision is required in this Long-term Plan with respect to the future of the Council office buildings - the Municipal Office Building (MOB) and the Civic Administration Building (CAB).

As the two buildings are connected, and have similar resilience issues, it is important that the future of them is considered together. Our preferred option is to demolish and rebuild the MOB and CAB buildings in partnership with private investment through a long-term ground lease for the site.

Combining a MOB and CAB development would enhance this opportunity and significantly decrease the need for additional Council borrowing and ratepayer funding to address these impaired buildings.

A summary of the proposed approach to developing of Te Ngākau Civic Square on pages 38 – 41 of the Consultation Document.

Which of these options do you prefer?

Demolish and site developed through long-term lease (Council’s preferred option)	Proceed with base build proposal for public purposes (higher debt and rates)
Retain and seek to repurpose (higher debt and rates)	Sell to support development (no debt or rates impact) None of these options Don’t know

## 6. Fixing the Central Library

Wellington's much-loved Central Library was closed in March 2019 following an engineering assessment saying that the way the floor was designed presented a high level of potential failure in a significant earthquake.

After hearing from Wellingtonians in the 2020 consultation, Council agreed to recommend the high-level remediation option to be part of this plan. This option makes the building resilient to future shocks and supports our ability to deliver an adaptable modern library service, while preserving the buildings heritage. It also allows us to mitigate some climate change impacts in the future.

Now there are choices about how to fund the \$187.4m library remediation project, and when the project should take place.

The preferred option, includes the Council agreeing to temporarily breach its debt limit of 225 percent to ensure the library can be refurbished in the original timeframe and remain in public ownership. Our debt level will remain at 225 percent, and Council has agreed to accept the breach in the first three years of this plan. This breach will be mitigated by any capital underspend being used for the library project rather than on new projects. Our debt level will be back below our limit by year 4 – 2024/25.

A summary of the proposed investment to fund the fixing of the Te Ngākau Civic Square Central Library is on pages 42 – 44 of the Consultation Document.

Which of these options do you prefer?

Strengthen now by temporarily exceeding debt limit (Council's preferred option, additional 0.79% rates increase)	Council to strengthen Central Library later (complete in 2028 instead of 2025, additional 0.83% rates increase)	
<b>Strengthen now by increasing rates further (additional 1.79% rates increase)</b>	None of these options	Don't know

## 7. Reducing sewage sludge and waste

One of the largest waste categories at the Southern Landfill is wastewater (sewage) sludge. This accounts for about a quarter of the waste that enters the landfill.

Through Te Atakura (our Zero Carbon Plan) and our Regional Waste Minimisation and Management Plan we have formally committed to reducing carbon emissions and reducing waste by a third. Minimising wastewater sludge is a necessary first step to achieving these objectives.

We need to break the link between the Southern Landfill and wastewater sludge and stop pumping sludge across the city, as 2020 highlighted the serious resilience issues and the significant consequences of failure.

Our preferred option is to invest in a sludge minimisation programme through another funding source. This means the project would not be funded by Council, but if it is funded through a Special Purpose Vehicle, a levy of about \$70-\$100 per year will be charged to each ratepayer.

A summary of the proposed investment in sludge and waste minimisation is on pages 45 – 47 of the Consultation Document.

Which of these options do you prefer?

Sludge minimisation through alternate funding (Council's preferred option, \$147m-\$208m capital investment funded through a levy, no additional rates increase)	No change in current practice (no change to investment, rates or debt)	
Invest in technology at Southern Landfill (\$86m-\$134m capital investment and higher rates)	<b>Sludge minimisation – through Council funding (\$147m-\$208m capital investment, above debt limit and higher rates)</b>	
None of these options	Don't know	

## 8. Feedback on these decisions

Do you have any comments you would like to provide around why you selected your preferred option to any of these decisions, or why you don't support any of the options we proposed? If yes please indicate what decision/s you wish to provide comment on.

<b>Investment in three waters infrastructure</b>	Wastewater laterals	<b>Cycleways</b>
<b>Te Atakura (climate change)</b>	Central Library	Sludge and waste minimisation
Te Ngākau funding for future work	None of these	

If the space on the next page is not adequate for your comments, please feel free to attach supporting information to the submission. **Please be clear** what decision you are commenting on.

Feedback on these issues is included in our “other feedback” section, as they are integrated with the general body of our criticisms.

**9. Proposed 10-year budget (see page 10 for details)**

Our draft budget, has an average rates increase for the average ratepayer of 5.3 percent after growth across the 10 years of the plan. We also propose setting a limit on how much we can raise from general rates - \$465m for each year across the first 3 years of the plan and, \$630m each year across years four to ten.

The first year of the plan has a rates increase of 13.5 percent (after growth) and there is an average of 9.9 percent (after growth) over the first three years. This is higher than previous plans because of the **key challenges** faced by the city including infrastructure, housing, earthquake strengthening and and COVID-19 impacts.. Therefore, we now require a step up in the level of rates we charge. Details of the key challenges are on pages 20 – 47 of the **Consultation Document**.

Our proposed budget also represents our highest ever level of capital investment in Wellington. It addresses the need for increased investment in our three waters infrastructure and transport network and seismic strengthening of key buildings, along with making progress against all our other priority community objectives.

Our debt levels for this plan, including the value of uninsured assets, range from 134 percent to 239 percent of our annual income. Our proposed limit is 225 percent.

We think this is a sensible limit on our borrowing to ensure that the impact on affordability of rates is maintained and leaves enough ‘headroom’ to ensure we can repay our debt, and respond to expected but unfunded and unexpected future events and opportunities.

**Do you support the proposed 10-year budget?**

I strongly support the proposed budget	I somewhat support the proposed budget	Neutral
I somewhat oppose the proposed budget	<b>I strongly oppose the proposed budget</b>	Don't know

**If you stated in Question 9 that you are neutral or do not support the proposed budget. Do you support increasing or decreasing spend?**

<b>I support increasing spend in the current budget</b>	I support decreasing spend in the current budget	I support keeping the budget the same but with some changes	Don't know
---	--	---	------------

## 10. Any other feedback on what is proposed for the 10-year Plan

### Future decisions

The Consultation Document also signals other decisions that are coming up in the time of this plan, but that we do not have enough information on at this stage for a detailed consultation.

### Other projects

We also have many other services and projects detailed in our Statements of Service Provision.

### Council Fees and charges

We have also made changes to some of our fees and user charges. More information on these are available on our website [wgtm.cc/ltp](http://wgtm.cc/ltp) and available at our libraries and service centre.

Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?

This plan is an impressive document. To cover a decade of city maintenance and development, at a time of crisis, and when key industries for these projects are commercialised entirely outside of Council's control – this is a big job. And within this framework the task is huge.

We also salute this Council's recognition of some deep problems facing our city: the “much-needed investment in our infrastructure that our city has been crying out for,” that Mayor Andy Foster identifies in his Welcome, and how “there remains around a decade to take urgent action to reduce greenhouse gas emissions in order to avoid disastrous consequences” – as noted in the 4<sup>th</sup> “Big Decisions” section. However, the proposed solutions to these problems are inadequate.

## Water network

When it comes to water infrastructure, funding option 3 “Accelerated Investment” outlines the core of an appropriate program of action. The preferred funding option, option 2 “Enhanced Investment”, is by its own words incapable of delivering a functional water network. Specifically, option 2 merely allows for “fewer leaks” from drinking water pipes, and suggests “under this option the quality of some of our streams and the marine environment may not worsen.”

The water network problems are a civic crisis more than a century in the making. A functional city is not one where leaks and burst pipes are slightly reduced from endemic; nor one where streams and coast ecologies “not worsening” is merely the exception to a general die-off. It is correct to identify as obstacles to the Accelerated Investment programme the difficulty of mobilising private industry, lack of good information on the state of the network, and uncertainty about the requirements of the city growth plan which is still not finalised. But these obstacles are not insurmountable. Council interventions in the market present a possible solution to the first problem; the rest can be worked around. Water infrastructure should remain under the control of democratically accountable bodies, and funding should continue to be sourced from Council budgets, not from user-pays charges, which unjustly impact low-income households.

## Action on Climate Change

All funding options outlined for climate change efforts are inadequate. The highest funding option suggested provides a \$30 million budget for projects such as: measurement of greenhouse emissions; replacing the Council's own fleet of cars with electric vehicles, and constructing EV charging stations around the city; supporting communities and businesses in their own emissions-reduction efforts, including supporting car-sharing; and “climate change response team funding,” the applications of which are neither specified in this plan nor seemingly in the full Te Atakura Zero Carbon Plan. There is nothing more radical than these measures proposed – though the Zero Carbon Plan and Council's submission to the Climate Change Commission both state strong action is required to transition to sustainable transport models.

In the Council submission to the Climate Change Commission, Andy Foster said that “At 2°C or 3°C, in all likelihood, we will lose the heart of our city to the sea.” Every effort must be made to limit warming, not just for the sake of communities internationally, though this would be sufficient reason, but for our own city too. Even at 1.5 degrees warming, New Zealand will experience flooding, droughts, fires, and storms on a scale much greater than even has been the case in these recent years of climate turbulence. We are not ready for this. And our global position is sheltered from the worst effects of climate change. Tropical regions will be worst hit by weather effects – we already see this – and low lying islands are already facing significant loss of useable land. We have already seen islands submerged entirely. 23 million people were forced to flee their homes as climate refugees each year every year for the past decade (according to the World Meteorological Organization: <https://public.wmo.int/en/our-mandate/climate/wmo-statement-state-of-global-climate> ). The Pacific seems highly likely to be among the most-affected regions. We are already at 1.1° warming. Climate change effects accelerate non-linearly, and this is not taking into account tipping points. Wellington City Council are aware of all this: the Council declared a climate emergency two years ago. Mayor Foster also said in

submission to the CCC that “if we settle for what’s probable and achievable, we may well fail to reach our target. And even worse, we may fail to respond to the climate emergency as the emergency it is.” Can any of the funding models outlined in this plan be called emergency action?

Here is what is required: fast transition to zero emissions. We could be carbon neutral much sooner than 2050. Capitalism is responsible for global warming and environmental destruction. If there was soon a successful struggle to overthrow capitalism and replace it with a democratic socialist society the long hard road to environmental recovery could be commenced with vigour. An effective struggle against disastrous climate change is simultaneously a revolutionary struggle for a new socialist society. That is why it is vital for working people to advocate and organise for Council by urgently prioritising ambitious climate goals, and making sure the costs of such efforts are paid by those who until now have hoarded wealth.

## Transport

Wellington's contribution to national emissions is mainly through transport and stationary energy, as is illustrated in the Te Atakura Zero Carbon Plan. Of these, transport emissions are roughly 1.5 times those from stationary energy. Modes of transport are thus a key concern. We understand Council is leaving details on public transport out of this ten-year plan as they are the purview of Let's Get Wellington Moving, which has not yet produced a full model. However, as public transport is of such significance to Wellington public life and emission cessation, it is inexcusable to not include at least a statement of principles in this area which the Council will commit to work at implementing inside Let's Get Wellington Moving. To make Wellington carbon neutral, free extensive quality public transport under public ownership run for social need and not to return a profit is essential. The population, including mobility-impaired sections, must be able to get anywhere in the city in a reasonable timeframe without a private car. This must be achieved quickly.

## Housing

We have said we salute this Council's recognition of some problems facing our city. But there are others it seems to disregard totally. The “Decisions for the Future” section says of housing: “Affordable housing is important to the Council and we have an aim of ensuring all Wellingtonians are well housed. We are already working towards more affordable housing in Wellington...” To us, embroiled in the Wellington housing crisis, with friends and families likewise, seeing the news confirm our experience with articles on skyrocketing rents and home prices, endemically exploitative leasing, and homes that make people sick – WCC’s plans and actions on this do not seem like a “decision for the future.” Housing constitutes a social emergency requiring immediate action.

We support investment in high-density, community-oriented, public housing developments interspersed with quality infrastructure such as free-access community spaces and parks, with the goal of reducing sprawl while improving quality of living. The Long Term Plan document notes that Wellington City Council is “one of the largest social housing providers in New Zealand”, and this is commendable. The document also notes that WCC “are part way through an upgrade programme of our social housing units”, and in general the housing upgrade has been well executed and has improved the standard of living of those in social housing. However, the WCC reports administering approximately 1,900 “social housing units”, while the 2018 NZ census ( <https://www.stats.govt.nz/tools/2018-census-place-summaries/wellington-city> ) reports around 75,000 occupied dwellings in Wellington City. Therefore, we calculate public housing makes up only approximately 2.5% of all housing in Wellington. Council should urgently further increase its stock of public housing in response to the current crisis.

Public housing reduces the financial burden for less wealthy people in our city, reduces competition for private rentals, and if an adequate quantity were constructed would drive down private rental prices thus benefiting the whole working class and making Wellington a more liveable city. The development costs of public housing are shared amongst the community and consist only of the cost of design, construction, and maintenance, without the need to pay a landlord and developer a profit. Thus, public housing is the most cost-effective approach to resolving the housing crisis. Although we are open to long-term discussions about who is the most appropriate provider of public housing, in the current housing crisis a two-pronged approach of quickly and massively increasing both local government and Central Government public housing is needed.

We note the report states Council housing rents are set “at 70 percent of market rent.” In addition to the above, we advocate for decoupling the rent of public housing from market rates, which even despite slight government controls are dictated by maximisation of investor profit. Instead, rent should be set at the minimum necessary for Council to maintain and grow its public housing stock.

## Te Tiriti Obligations

Council identifies as a core objective for the next three years: “Strong partnerships with mana whenua – upholding Te Tiriti o Waitangi, weaving Te Reo Māori and Te Ao Māori into the social, environmental and economic development of our city and, restore the city’s connection with Papatūānuku (nature).” We applaud this claimed intention. But Te Tiriti is a power sharing-agreement. We see no signs Wellington City Council has made any concrete allowances to share power with sovereign mana whenua structures. This is its obligation as a Crown body.

## Conclusion

We are a revolutionary socialist organisation. We don't believe this Council is capable of resolving the problems facing our city. Instead, the needs of business and the 'bottom line' of capitalism (profitability) will predominate. This will be at a human and environmental cost which workers and this planet cannot sustain. But prove us wrong. This would be a start.

Thank you very much for your submission!

10 May 2021

## **Wellington Culinary Events Trust Long-Term Plan 2021-31 Submission**

The ultimate success of the Wellington Culinary Events Trust (WCET) is measured by the participation, involvement and support of the industry players that take part in our events and festivals, along with the wider economic benefits delivered through these events. These benefits are measured not just through overall dollars spent by attendees, but also by the economic impact on the whole value chain of the hospitality and food & beverage sector. Ultimately: the positive impression that is created by the hospitality offering in Wellington as a great place to live and visit.

The WCET owns and operates the two most significant activities in the annual food calendar in Wellington and New Zealand – Visa Wellington On a Plate (Visa WOAP) and Beervana. In addition, the Trust plays a key role working with local event organisers, the Wellington City Council (WCC)/WellingtonNZ and others to coordinate and enhance food events and the food offerings of other key events where possible.

*This submission is presented in two parts. The **first** part addresses our micro environment; the specific contributions and challenges of the WCET in our delivery of culinary events programming in Wellington and how this relates to the 10-Year Plan. The **second** part of this submission takes a wider view of the macro environment as it relates to the wider hospitality sector, the impact this 10-Year Plan has on it and the support that the WCET has for the options presented.*

### **PART 1: The Micro Environment - Wellington Culinary Event Trust**

#### **About Us**

The WCET, a not-for-profit trust, was established in February 2014 to promote Wellington as the premium New Zealand destination for hospitality experiences. The WCET's role is to champion this by providing experiences throughout the year, working with a wide range of partners, culminating in Visa WOAP, Beervana and several other food & beverage events. Wellington is the only city in New Zealand to have an organisation dedicated to building its food & beverage reputation.

The culinary and hospitality community provide a vital component of Wellington's cultural offering. Our food and beverages are not just an amenity, they are core to the fabric of what makes our city offering unique and distinctive – through food people learn, come together, enjoy, and share their Wellington stories. Our food culture and hospitality play a role in defining us from other parts of New Zealand and exceptional culinary experiences in Wellington also help to make **every event** in Wellington extraordinary.

Positively Wellington Tourism and Grow Wellington (now combined as WellingtonNZ) established Visa WOAP as a joint venture in 2009 to showcase Wellington's food and beverage sector (including producers and suppliers) and to support culinary tourism in and to the region. The festival was also developed as a vehicle to showcase Wellington's culinary identity and to provide a platform for the culinary community to work together to deliver a unified outcome celebrating Wellington hospitality. The WCET was established in 2014 to take on the operation of Visa WOAP and the subsequent acquisition of Beervana.

The WCC has been an active supporter and provides funding to the WCET for Visa WOAP and Beervana. The Board and Executive would like to extend our thanks to the WCC for this ongoing support and we look forward to continuing to work with you.

### *Our Strategic Vision*

*For Wellington to be New Zealand's globally recognised food city*

### *Our Values*

- Innovation - We are driven by the desire to unveil new culinary adventures in Wellington for the adventurous who come along with us.
- Authenticity - The Wellington culinary experiences we deliver are genuine and they will be talked about well after the events themselves.
- Anchoring the community - Food and beverage are best shared, laying the foundations for a stronger and more connected Wellington community.
- Excellence - Delivering the standard expected and enjoyed by our participants - both industry and consumer.
- Collaboration - We partner with a wide variety of the people and communities to deliver our Wellington experiences.

### *Our Purpose*

To deliver tangible economic benefits to the Wellington and New Zealand economy through delivering world class culinary experiences and supporting tourism export growth.

### *Our Strategic Outcomes*

1. Raise the profile of Wellington-produced food and beverage products and create a 'path to market' for regional producers and suppliers.
2. Continue to develop the culinary reputation of the Wellington region by showcasing the Wellington hospitality and culinary community.
3. Collaborate with other Wellington iconic events to create a year-round culinary platform for the Wellington region.

### *What makes us different?*

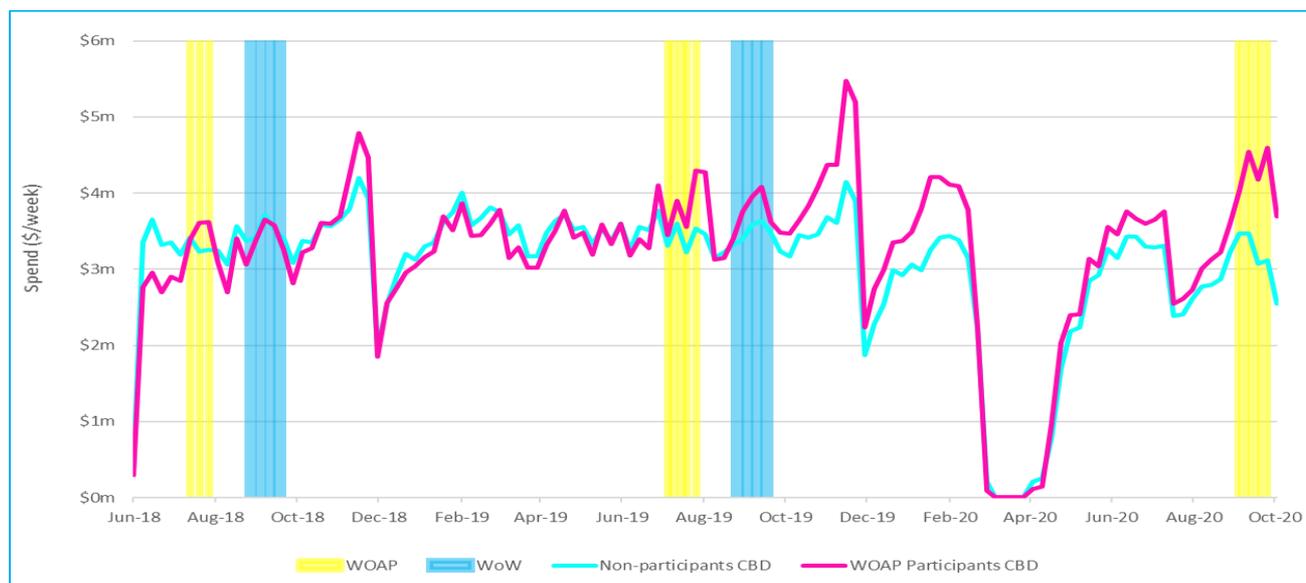

The Visa WOAP festival was the first of its kind in New Zealand. That is to say that restaurants, bars, cafes, event organisers, producers, suppliers, city councils, sponsors and consumers came together for the first annual multi-day

festival anywhere in New Zealand. Visa WOAP connects all players in this sector to position the city and region as *The Culinary Capital of New Zealand*. Since that time, some other regions of New Zealand have attempted to follow our lead.

Visa WOAP is different from most food festivals in that it isn't a single day event; it happens over the course of a whole month (August) and provides offerings across its many platforms which are able to engage a vast range of people. It advocates for local producers and suppliers, putting them at the forefront of the festival and encourages restaurants to use local producers and suppliers in their offering. The festival also advocates for experiences, innovation, and "value" over "deals" and "cheap eats". The festival is designed to excite consumers, drive foot traffic into restaurants and hospitality establishments and provide increased sales and income for the hospitality community during a traditionally quiet time of year.

Visa WOAP was conceived in 2009 because there was a problem in the Wellington hospitality community during the winter months at the end of a recession. No one was eating out and restaurants were suffering; some were closing for weeks at a time during the winter. Visa WOAP addressed this issue head on from two angles as it encouraged restaurants to re-think their wintertime offering and got consumers excited about dining out again. Since then, the festival has steadily grown, and the month of August has gone from being one of the quietest times of the year, to now, being one of the busiest for the hospitality sector in Wellington.

**Weekly spend (Visa WOAP 2020 vs other merchants)**

Source: Merchant Retail Sales Assessment, Research and Evaluation Group, Feb 2021, Wellington City Council

In 2021, we celebrate Visa WOAP's 13th year and as the attendance numbers increase, the festival is achieving recognition far beyond Wellington, gaining attention as New Zealand's most significant culinary festival. This has not been easy to attain, largely because Wellington is not New Zealand's biggest city. But as the festival continues to expand its offerings and consistently delivers results for consumers and the industry year on year, we continue to make progress and gain greater national and international recognition.

## *The Impact of Covid-19 on the Food and Beverage sector*

Covid-19 had an immense and immediate impact on the restaurant and hospitality sector. Business operation was shut down swiftly leaving large numbers of hospitality workers without work, huge amounts of food left to waste and significant levels on uncertainty around the future of these businesses, many of which operate on low margins and a short-term horizon.

As New Zealand moved into lockdown at the end of March 2020, the WCET team started to think about how we could adapt existing systems, networks and knowledge to design new and simple products that would be of benefit to the broader hospitality community during these unprecedented times.

A key idea was to create a comprehensive one stop directory for all food and beverage services in the greater Wellington region operating during Alert Level 3 that would:

- Be a place for businesses to promote their offering to an engaged local audience, particularly smaller businesses with limited resources for marketing and promotion
- Have low/no barrier to entry, be free of charge and easy to keep updated
- Provide consumers with a one-stop easy to use website so they can find and support their local food and beverage/hospitality businesses during the lockdown period also free of charge
- Be easy to use, quick to deliver, offer a personalised but simple experience and be visually enticing to help convert to purchase.

### *Assumptions*

1. We could create something fit for purpose that would have good take up from participants to realise great return on investment
2. We could turn this project around quickly using existing functionality of the Visa WOAP website
3. It would meet the needs of consumers and be a uniquely Wellington solution.

### *The solution*

In collaboration with our Wellington-based web development partners Click Suite and working in partnership with WellingtonNZ we created *At Yours with Visa Wellington On a Plate*, an online directory of food and beverage services offering contactless delivery, click and collect, and/or takeaway during Alert Level 3 of the Covid-19 lockdown.

The time from concept approval to delivery was one week.

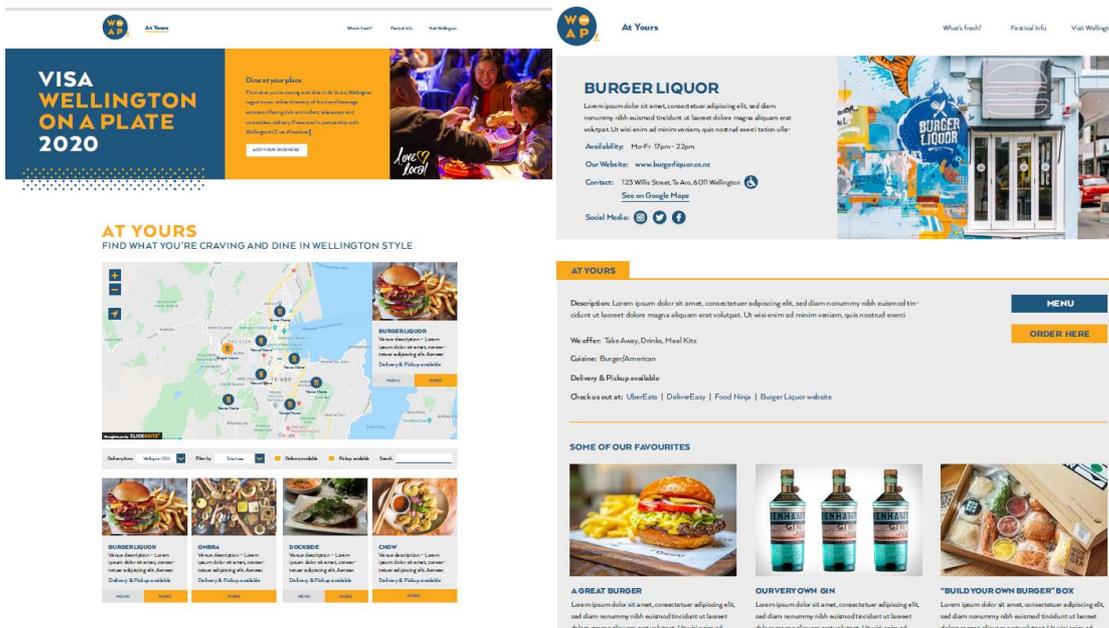

### *At Yours:*

- Showed all venues offering services on a map, as well as in lists
- Used photos to entice diners (a key learning from Visa WOAP)
- Was based on a 'Love Local' principle, with geo-caching that recognised the location of the user, then served up a list of eateries and suppliers closest to that user on an easy to view and navigate map
- Included restaurants, cafes, catering services, breweries, takeaway services - any food and beverage service offering click and collect, takeaway and contactless delivery
- Was free of charge with no cost to either venues wanting to be listed, or to users accessing the website, and there was no commission charged

- Was simple for venues to use and updated at any time, with links through to 3rd party delivery options and the venues own website and social pages so information was always up to date
- Had a small selection of simple filters to aid navigation and decision-making
- Allowed venues to include three images to help communicate their three favourite offerings
- Had no time limitations - new venues could be added at any time, they could add different service options as they became available

We were able to take advantage of existing content on the Visa WOAP database from 2020 applications and bring forward the completion of map functionality that was in development for the Visa WOAP 2020 website to create a unique directory solution that met the immediate needs of both the food and beverage sector looking for promotional channels, as well as consumers looking for easy information about who was/is operating under Alert Level 3 close to their location.

With maps geo-tagged to a user's location, it was easy to find local suppliers and producers offering a range of goods including ready to eat and takeaway meals, local produce and ingredients, frozen meals and beverages and much more.

At Yours homepage and example listing

### Visa Wellington On a Plate's Impact on the Wellington Hospitality Sector

Traditionally, the mid-winter months present many challenges to hospitality businesses in Wellington, the greatest being business sustainability, cash flow, and retention of permanent employees. Visa WOAP was deliberately timed for the month of August as an intervention to support business sustainability.

2020 was a year like no other, with both Visa WOAP and Beervana delayed until October and November respectively, because of the Covid-19 global pandemic.

In the *Retail Sales and Economic Value Assessment*<sup>1</sup> of Visa WOAP conducted by the Research & Evaluation Group of the WCC, the following event insights were reported about Visa WOAP between 2020 and 2019:

- Economists predicted the ‘*world would end*’ economically speaking in late 2020/2021.
- Despite those predictions, Visa WOAP 2020 lifted spend, and during an otherwise quiet period.
- Compared to the pre-event period (July 2020), there was a 19% increase in spend at participating merchants of \$5.8m. This was almost identical to 2019.
- Visitor spend held stable even though international visitors were not present.
- Spend at Visa WOAP 2020 CBD merchants increased by 18% compared to July, whereas non-participating merchant spend declined by 2%.
- Merchant card sales totalled \$29.4m during Visa WOAP 2020, slightly down \$0.9m or -2% compared to Visa WOAP 2019. An incredible result in the middle of a global pandemic
- 26% of customer transactions were from outside the Wellington region

Across the festival in 2020, including Beervana, an estimate of over 340,500 culinary experiences<sup>2</sup> were enjoyed by participants delivered via:

- 132 Festival Events
- 241 Burgers
- 70 Cocktails
- 77 Dine Wellington participants

### ***Beervana’s Impact on the Wellington Visitor Sector***

A total of 14,477 people attended<sup>3</sup> Beervana 2020. 29% of New Zealand tickets purchased were from outside of the Greater Wellington region and approximately 60% of tickets were purchased outside of Wellington city. For obvious reasons, there were no international attendees in 2020. Key highlights from the Event Economics Report<sup>4</sup> commissioned by WellingtonNZ reported:

- 95% of all attendees from out-of-town specifically came to Wellington for Beervana
- The average length of stay for out-of-town visitors attending Beervana was 2.3 nights
- The average spend by visitors attending Beervana was \$479 per person

## PART 2: The Macro Environment - The Wellington Hospitality sector as part of this Long-term Plan

### *Addressing Wellington's Challenges*

Wellington's hospitality community contributes in many ways to Wellington's prosperity and in addressing some of the Big Decisions presented in the Long-term Plan. Specifically, the WCET supports the following options:

- Decision 1: Investment in three waters infrastructure – world class infrastructure is vital to the operation of a world class restaurant and hospitality sector. Our city needs to operate without the burden on constant road closures, water pipe issues and disruption to inner-city business. Wellington needs confidence in the access to our drinking water as well as an assurance of well-functioning wastewater and stormwater facilities. This needs to be futureproofed to ensure that costs are minimised in the future. The WCET accept the recommendation and support the implementation of Option 2.
- Decision 2: Wastewater Laterals – the WCET accept the WCC recommendation and support the implementation of Option 2.
- Decision 3: Cycleways – the WCET accept the WCC recommendation and support the implementation of Option 3.
- Decision 4: Te Atakura First to Zero (climate change) – Having a comprehensive plan for Wellington to reduce emissions and respond to climate change is vital for the health of our city and its people. Effective planning will have a direct impact on the hospitality and restaurant sector. The WCET accept the WCC recommendation and support the implementation of Option 3.
- Decision 5: Te Ngākau Civic Precinct, Council Office Buildings – the WCET accept the WCC recommendation and support the implementation of Option 1.
- Decision 6: Central Library – the WCET accept the WCC recommendation and support the implementation of Option 1.
- Decision 7: Sludge and waste minimisation – the WCET accept the WCC recommendation and support the implementation of Option 4.

### **SUMMARY**

The WCET is ambitious in its vision for the future growth of Visa WOAP and Beervana. 2021 marks the 13<sup>th</sup> year of Visa WOAP and the 20<sup>th</sup> year of Beervana. The focus of the WCET as we look forward is to:

- Continue to deliver exceptional culinary events
- Deliver increased value back to the participating businesses
- Ensure high quality event programming that meet growing consumer demand
- Play a key role in building on Wellington's reputation of "New Zealand's Culinary Capital" – making Wellington a great place to LIVE and VISIT
- Continue to harness the fact that Wellington is the only region in New Zealand that has a dedicated culinary events strategy AND organisation to deliver its outcomes

Delivering increased value to businesses that participate in WCET events is a key priority in ensuring that our hospitality sector continues to thrive. What this means is ensuring that our events are inclusive and that there are low barriers to entry for participation – both to the hospitality and wider attendee community.

### *How we are funded*

As a not for profit, we work hard to ensure that the funds and support required to deliver the Visa WOAP and Beervana are achieved. Funding of the WCET is derived from various sources through the operation of Visa WOAP and Beervana. Our operating funds are sourced from the following:

- Council Funding – provided via WCC/WellingtonNZ
- Participant Fees – industry participation in Visa WOAP (restaurants and events) and Beervana (breweries)
- Commission – ticket sales for Visa WOAP events and Beervana entry
- Sponsorship – Visa WOAP is Visa’s only sponsorship in New Zealand and they have been a festival sponsor for 12 years.
- One-off Grants – operational support from Embassies and High Commissions for example

In addition to our operating funds, over \$1 million of contra support was received from partners and supporters in 2020. Only contra that has a value to WCET operations is counted each year. Overall, the WCET derives 92% of its funding and support from the private sector (i.e., all funding sources excluding Council funding).

The WCET would like to acknowledge the importance of the investment made by the WCC in WellingtonNZ to market the city for tourism and events. The work undertaken by WellingtonNZ is crucial to the activities delivered by the WCET and the wider hospitality sector in the city– it is mutually supportive.

### *Conclusion*

The WCET significantly appreciates the support it receives from the WCC and looks forward to your continued support.

Visa WOAP and Beervana deliver increased spend in Wellington by residents and visitors and have already created many tangible benefits to the wide spectrum of businesses that operate in the food and beverage sector. The WCET’s contribution, to Wellington’s position as the Culinary Capital of New Zealand is significant and fills Wellington’s events calendar during a seasonally slow period for the food industry.

Yours sincerely

Sarah Meikle  
Chief Executive  
Wellington Culinary Events Trust

### Submission for Long-Term Plan – “Changing Places” bathroom for Wellington

1. In 2017 or 2018, Wellington City Council received a public submission from a Lower Hutt couple who were unable to bring their severely disabled adult son to Wellington city because there is no accessible toilet for him to use.
2. In their son’s case, he needs to be laid down horizontally to be changed. Standard “disabled” or “accessible” toilets are too small, too dirty, and have insufficient equipment, to be usable.
3. Their son is one of up to four people in every thousand who are unable to use a standard accessible toilet.
4. The submission was the most heart-rending in our three years on Council. It seems quite unfair that a person who already suffers from a severe disability has the further barrier of being unable to access our wonderful city and enjoy its many attractions, simply because there is not a suitable bathroom for him to use. Carers of such people also miss many opportunities to enjoy the city.
5. Changing Places New Zealand is an organisation set up to make such accessible bathrooms available in New Zealand, based on the Changing Places Consortium, which has built over a thousand fully accessible bathrooms in the United Kingdom. Its website, with further information, is [www.changingplaces.org.nz](http://www.changingplaces.org.nz)
6. In New Zealand, it has established two fully accessible bathrooms, in Hamilton and in Auckland.
7. In Wellington, a suitable venue for the fully accessible bathroom would be in the central city, and it would need immediate access by car, 24 hours a day.
8. Te Papa is “keen to progress” a fully accessible bathroom. The location and access provided at the Te Papa site are ideal. The submitters will be talking to Te Papa about this initiative.
9. The cost of installing a fully accessible bathroom has been estimated at \$200,000 by Changing Places NZ. As with all such projects, we expect that this is a minimum. However, it provides an indication of scale.
10. Te Papa cannot be expected to pay the full cost of the installation, or indeed any of the building cost, given that it may be contributing space and a car park, and that the bathroom will be for the benefit of the whole city.
11. Given the pressure on the Wellington City Council, it would be unrealistic also to expect the full amount of the accessible bathroom to be budgeted in the Long Term Plan. Accordingly, the submitters will embark on fundraising for this project.
12. Nonetheless, WCC will be involved in any development of an accessible bathroom, through the consenting process and other demands on officer time.
13. Accordingly, this submission requests that a small amount of money be put aside in the first year of the Long Term Plan to support the process of building an accessible bathroom in Wellington.
14. In summary, it seems fundamentally unjust for this issue of bathroom access to wait for yet another long-term plan, given that much of Council spending is to support people that already have facilities but, with some justification, would like more and better.
15. We strongly and respectfully urge the Mayor and City Councillors to back this initiative and allocate funds accordingly.
16. Thank you.

Peter Gilberd

Chris Calvi-Freeman

Comments

No comment on 7 key questions

see below section 9 + 10.

9. Proposed 10-year budget (see page 10 for details)

Our draft budget, has an average rates increase for the average ratepayer of 5.3 percent after growth across the 10 years of the plan. We also propose setting a limit on how much we can raise from general rates - \$465m for each year across the first 3 years of the plan and, \$630m each year across years four to ten.

The first year of the plan has a rates increase of 13.5 percent (after growth) and there is an average of 9.9 percent (after growth) over the first three years. This is higher than previous plans because of the **key challenges** faced by the city including infrastructure, housing, earthquake strengthening and and COVID-19 impacts.. Therefore, we now require a step up in the level of rates we charge. Details of the key challenges are on pages 20 - 47 of the **Consultation Document**.

Our proposed budget also represents our highest ever level of capital investment in Wellington. It addresses the need for increased investment in our three waters infrastructure and transport network and seismic strengthening of key buildings, along with making progress against all our other priority community objectives.

Our debt levels for this plan, including the value of uninsured assets, range from 134 percent to 239 percent of our annual income. Our proposed limit is 225 percent.

We think this is a sensible limit on our borrowing to ensure that the impact on affordability of rates is maintained and leaves enough 'headroom' to ensure we can repay our debt, and respond to expected but unfunded and unexpected future events and opportunities.

Do you support the proposed 10-year budget?

I strongly support the proposed budget	I somewhat support the proposed budget	Neutral
I somewhat oppose the proposed budget	I strongly oppose the proposed budget	Don't know

If you stated in Question 9 that you are neutral or do not support the proposed budget. Do you support increasing or decreasing spend?

I support increasing spend in the current budget	I support decreasing spend in the current budget	I support keeping the budget the same but with some changes	Don't know
--	--	---	------------

## 10. Any other feedback on what is proposed for the 10-year Plan

### **Future decisions**

The Consultation Document also signals other decisions that are coming up in the time of this plan, but that we do not have enough information on at this stage for a detailed consultation.

### **Other projects**

We also have many other services and projects detailed in our Statements of Service Provision.

### **Council Fees and charges**

We have also made changes to some of our fees and user charges. More information on these are available on our website [wgtn.cc/ltp](http://wgtn.cc/ltp) and available at our libraries and service centre.

Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?

---

The Strathmore Park Community Centre Trust wishes to submit in relation to one element only of the Plan.

This is relating to the funding allocation to the Social and Recreation area which, as drafted, has no increase in any of the 10 years.

We assume this overall capping of this fund will likely translate into a capping of the WCC operational grant in relation to our mahi operating the Strathmore Park and Raukawa Community Centres. No inflationary increase means, in effect, a reduction in funding. This would risk our capability to deliver the services which serve to achieve important social outcomes in this community. A critical component to achieve these outcomes is our staff. A decrease (in real terms) in funding may lead to a reduction in the number of hours staff can be employed, and the ability to retain and recruit highly capable staff.

Whilst Strathmore Park is a unique community with a high level of deprivation, and minimal community resources, we believe this negative impact of a reduction in the Social and Recreation funding is not only is relevant for Strathmore Park but across the city.

**Re: Wellington City Council Long-term Plan Consultation 2021-2031**

Thank you for the opportunity to provide a written submission on the Wellington City Council Long Term Plan.

Regional Public Health is the public health unit for the greater Wellington region. We work with communities and local organisations to make the region a healthier and safer place to live. Our vision is **Pae Ora: Healthy futures for the greater Wellington region**. We promote good health and work on disease prevention to improve the quality of life for our population, with a particular focus on children, Māori, Pacific peoples and low-income households. Our staff include a range of occupations such as medical officers of health, public health advisors, health protection officers, public health nurses, and public health analysts.

We are happy to provide further advice or clarification on any of the points raised in our written submission. The contact point for this submission is:

Demelza O'Brien, [REDACTED]

## INTRODUCTION

Regional Public Health (RPH) is the public health unit for the greater Wellington region (Wairarapa, Hutt Valley and Capital & Coast District Health Boards). Our business works to improve the health and wellbeing of our population and to reduce health disparities through public health action. We aim to work with others to promote and protect good health and prevent diseases to improve quality of life across the population. We are funded by the Ministry of Health and also have contracts with District Health Boards and other agencies to deliver specific services.

## GENERAL COMMENTS

The Wellington City Council Long Term Plan 2021-2031 clearly demonstrates the wide range of work Council undertake to support community health and wellbeing. We are heartened to see you are using your role as Local Government to strengthen community wellbeing through local economic development and creating a healthy physical and social environment for all residents.

RPH recognise the important role that social, economic, cultural and physical factors such as housing, healthy food, water quality, transport, neighbourhood form and health related behaviours play in our community's health. These factors together drive as much as 80% of health outcomes, leaving only about 20% of modifiable contributors to health of a population related to medical care.<sup>1</sup> Health truly begins where we live, work and play.

RPH **commends** Council on the publication of your Long Term Plan (LTP). We recognise the changing context within which you work, in particular the reform of Three Waters, the Resource Management Act, and the regional approach to managing future population growth.

Our submission will offer some general comments on current public health concerns of relevance to Council as well as some specific comments on elements of your plan that could impact on health outcomes and equity in the Wellington community. We then raise some opportunities to work together to address our shared challenges to help build local resilience and wellbeing.

**80% of our health  
and wellbeing is  
determined by our  
social, economic,  
cultural and physical  
environment**

<sup>1</sup> Magnan S. Social Determinants of Health 101 for Health Care: Five Plus Five. (2017).

## COVID-19

**Together**, we need to ensure that community organisations are well supported, particularly over the next ten years to meet community needs resulting from the social, economic, cultural and health impacts of COVID-19.

Over the past year, the pivotal role of Councils in the response to and recovery from the COVID-19 pandemic has been made clear. The pandemic has highlighted the importance of building local neighbourhood resilience to the challenges our communities face. It has shown how features of our neighbourhoods can all contribute to individual and collective resiliency such as, access to safe and healthy housing, good urban design, community facilities, public transport options, active connections, water quality, parks and open spaces, as well as local food sources.

COVID-19 has also demonstrated the impact of inequitable distribution of these features on our communities. The burden of negative economic and social impacts of COVID-19 continue to be significant for communities and these exacerbate existing inequities for Māori, Pacific, low-income families, disabled, refugees, and older people. The pandemic increased the challenge of providing vulnerable people with access to health and other resources, and safe, secure and healthy accommodation. It also highlighted the level of food insecurity and the need for food resiliency in our communities with demand for food assistance growing exponentially across the country. An enormous amount of work was done by Councils and local groups in providing food parcels to whānau in need of support. RPH **recognises** that greater collective investment and resource is required to address the inequities that continue to exist for communities.

Community organisations and groups in Wellington and across the region were, and continue to be at the forefront of the response and recovery from COVID-19. Many of these groups are under immense pressure to meet the needs of the community. RPH is committed to working with Council to support our communities to ensure everyone has the opportunity to thrive.

## RESPONSE TO SPECIFIC LONG-TERM PLAN QUESTIONS

RPH **supports** Council's investment in three waters infrastructure.

We **support** option 2; enhanced investment. We **commend** Council's focus on improving the condition and reliability of the network in an affordable and sustainable way.

E kore tātau e mōhio ki te waitohu  
nui o te wai kia mimiti rawa te puna.

We never know the worth of water until the well runs dry.

We **acknowledge** the need to improve and increase information about the health and condition of three waters assets, and we understand the need for Council to prioritise its renewals investment toward critical assets. It is important to ensure investment in three waters infrastructure over the

immediate 10 year horizon is sufficient to cope with the increased demand associated with current, planned and potential urban development. The follow-on effects of insufficient investment such as sewerage contamination, insufficient supply and reduced freshwater quality have a significant impact on surrounding communities and the environment.

**RPH supports** the implementation of the full cycleway programme through a priority order.

**RPH commends** Council's investment to provide an opportunity for better access to active transport. Active transport helps to alleviate traffic congestion, saves energy, reduces air and noise pollution, conserves land, and produces various other environmental benefits. Furthermore, active modes of transport can contribute to a reduction in long-term health conditions such as Type 2 Diabetes, and improving safety can reduce injury events.<sup>2</sup>

**RPH commends** Council's progress and commitment to the Te Atakura: First to Zero goals.

**RPH recommends** that the Healthy Streets Design Indicators<sup>3</sup> be considered and incorporated into the design of road types in new developments. These guidelines should be utilised in the design of active transport routes to ensure an effective, accessible and safe space for community use.

**RPH supports** Council in fully funding Te Atakura action plan.

Climate change is a serious and imminent threat to population health. New Zealanders are at risk of both:

- the direct health effects of climate change e.g. extreme weather events, injuries, heat waves and damage to infrastructure
- indirect health effects e.g. changes in ecosystems and subsequent disease patterns, microbiological contamination of water, poor mental health, food insecurity, destruction of infrastructure, homes and livelihoods.

**Strategies to  
address climate  
change can provide  
significant health  
benefits to the  
population**

Climate change is likely to exacerbate inequities in Aotearoa, particularly for Māori, Pacific and low-income communities who are at greater risk of poorer health and social outcomes.<sup>4,5</sup> Reducing emissions involves changes to behaviours and environments that can significantly improve peoples' general health. When implemented appropriately, strategies that address climate change can often

<sup>3</sup> Guide to the Healthy Streets Indicators: Delivering the Healthy Streets Approach, Transport for London. Retrieved 25/06/2020 from: <https://healthystreetscom.files.wordpress.com/2017/11/guide-to-the-healthy-streets-indicators.pdf>

<sup>4</sup> New Zealand College of Public Health Medicine. Policy Statement on Climate Change. Wellington: New Zealand College of Public Health Medicine. (2013).

<sup>5</sup> Howden-Chapman P, Chapman R, Hales S, Britton E, Wilson N. Climate Change and Human Health: Impact and Adaptation Issues for New Zealand. In: Nottage RAC, Wratt DS, Bornman JF, Jones K (eds). Climate Change Adaptation in New Zealand: Future Scenarios and Some Sectoral Perspectives. Wellington: New Zealand Climate Change Centre. (2010).

provide significant health co-benefits (e.g. increased physical activity, dietary improvements and reduced air pollution) and decrease existing inequities.<sup>6</sup>

To ensure a fair and equitable transition we need to consider and address the potential impacts of the proposed climate actions on populations with less access to the personal, neighbourhood and system resources needed to live healthy lives, particularly Māori.

Active consideration must be given to the impacts of climate change policy decisions on Māori, in line with Te Tiriti o Waitangi obligations. Engaging meaningfully with Māori and other population groups will help to ensure a just transition to a low carbon economy for all New Zealanders. It also provides a significant opportunity to foster an environmentally and socially sustainable economy, driving job creation, and job upgrading, social justice and poverty eradication.

Many of these strategies are directly within the locus of control of Councils and will have positive health and social benefits for the community as well as result in reduced emissions. For instance, Wellington City Council has the potential to create environmental, social and wider health co-benefits through:

- continued prioritisation of walking and cycling routes and connections between communities
- ensuring areas of new housing development have community facilities including communal areas to grow food, access water, play and socialise
- supporting initiatives that improve the 'health' of existing housing stock and neighbourhoods across Wellington City.

By investing in areas that provide long term benefits such as three waters, sustainability initiatives and neighbourhood social/community infrastructure, Wellington City Council can build resilience and prevent or reduce the negative health outcomes that could otherwise deepen inequities and prevent our communities from experiencing full wellbeing.

**RPH supports** Council to develop Te Ngākau Civic Precinct, Council Office Buildings and to fix the central library.

Community spaces can provide communities the opportunity to express and explore their identities and provide safe, supportive environments that contribute to healthy lifestyles. Strengthening cultural identity is important for mental wellbeing of our Pasifika and Māori whānau.<sup>7</sup>

RPH strongly supports Council investment in community spaces. These spaces are important in facilitating community resilience.

RPH **recommends** the following key points are considered when designing and investing in community infrastructure facilities to help build community resilience.

- A breastfeeding friendly space

<sup>6</sup> Frumkin. Climate Change: The Public Health Response. (2008).

<sup>7</sup> Ataera-Minster J, Trowland H. Te Kaveinga: Mental health and wellbeing of Pacific peoples. Results from the New Zealand Mental Health Monitor & Health and Lifestyles Survey. Health Promotion Agency. (2018).

- Breastfeeding has many benefits for mother and baby, and is recommended exclusively for the first 6 months of life. A supportive environment for parents to breastfeed includes: comfortable arm chairs, hot water access, power points, microwave, sink and running water, a door/ divider for privacy
- Greenspace or community gardens for mental health
  - Greenspaces provide vital health services as well as environmental services; they reduce socioeconomic health inequalities, facilitate activity and promote better mental health and well-being.<sup>8</sup> Including greenspaces or community gardens can function as an upstream preventive mental health promotion intervention<sup>9</sup>
- Accessibility to the venue to ensure it is able to be used by all
  - Ensuring adequate pedestrian crossings or traffic light, wheelchair and pram accessibility
- Supportive environment for healthy eating
  - Limiting or having no unhealthy food advertising including unbranded drink fridges or vending machines. No or limited sugar sweetened beverages available, and having healthy food available.

Please see the attached infographic for more aspects to consider in the design and development of community facilities.

**RPH supports** Council's decision to minimise sludge and waste through alternative funding.

This decision aligns with waste minimisation and Zero Carbon plans and will remove a significant pathway for pathogens to enter residential environments. Minimising sludge and waste will reduce public health risks from the improper disposal of waste and promote sustainable waste management creating a healthier, safer and more sustainable environment.

## UPCOMING DECISIONS

**Let's Get Wellington Moving**

**RPH supports** Council's vision to ensure Wellington is a great harbour city, accessible to all, with attractive places, shared streets and efficient local and regional journeys.

**RPH supports** the move towards quicker and more reliable bus journeys and a better walking and cycling environment which would be implemented in concept three. Evidence shows that active transport is beneficial for physical health and wellbeing, as well as having economic and environmental benefits.<sup>10</sup>

Transport planning decisions have a significant impact on health and wellbeing by reducing traffic accidents and vehicle emissions, and improving physical activity, access to services, and mental

<sup>10</sup> Ministry of Health. *Regional Data Explorer 2014–17: New Zealand Health Survey*. (2018).

health. By adjusting the bus network in response to public concern, Let's Get Wellington Moving (LGWM) has the opportunity to improve the health and wellbeing of its population.<sup>11</sup>

Affordable Housing  
City housing financial sustainability

**RPH supports** Council's aim that everyone in Wellington is well housed. A warm dry home is the foundation of health and wellbeing throughout life.<sup>12</sup> Housing is an important determinant of health, with housing quality and household crowding playing a major role in respiratory illnesses such as asthma, skin infections and acute rheumatic fever.<sup>12</sup> Housing is contributing to preventable hospitalisation and rehospitalisation rates for children and elderly across Aotearoa. These poor housing conditions also increase the risk of future ill health and poorer performance across a range of social indicators. Māori and Pacific whānau are over represented in the burden of diseases associated with poor housing conditions.

**RPH commends** Council for recognising that increasing access to affordable housing is key to a successful growth plan. The need for affordable housing is high, as evidenced by the increasing demand for social housing. RPH believes that everyone should have access to an affordable home that's safe, warm, dry and liveable in neighbourhoods where they can thrive. Too many people are currently missing out on this opportunity. Access to safe and affordable housing is a prerequisite to ensuring that other important health needs can be met. If housing is not affordable or secure, whānau are unlikely to be able to afford the other requisites of health e.g. access to nutritious food.

**RPH encourages** Council to continue work with iwi, other community partners, social housing providers, agencies working to sustain tenancies, and others to explore how Council can support these issues to be addressed in Wellington.

**RPH commends** Councils progress in the social housing unit programme upgrade. **RPH recommends** Council continue to invest in and support activities that support access to social housing in Wellington.

**RPH supports** Te Mahana (Homelessness strategy). **RPH commends** Council's collaboration with other agencies to work to ensure instances of homelessness are rare, brief and non-recurring.

**RPH recommends** Council continue to invest in and support activities that improve the housing quality of **existing** homes in Wellington. There are approximately 200,000 homes in the Wellington region<sup>13</sup> and according to BRANZ research, as much as 49% of these homes will be damp or mouldy.<sup>14</sup> Key issues contributing to damp and mould are inadequate insulation, ventilation and heating. This is a significant issue for people who rent their homes as rental housing quality is

[https://d39d3mj7qio96p.cloudfront.net/media/documents/SR372\\_Warm\\_dry\\_healthy.pdf](https://d39d3mj7qio96p.cloudfront.net/media/documents/SR372_Warm_dry_healthy.pdf)

generally lower than in owner-occupied housing.<sup>15</sup> Increased rental and housing costs contributes to household crowding, further exacerbating the risk of infectious diseases and hospitalisation.<sup>15</sup>

Council can play an important role in improving housing quality in Wellington e.g. through enabling regulation, advisory and support services, incentives to homeowners and developers, and working with communities to invest in improving housing through retrofitting insulation schemes.

## OPPORTUNITIES TO WORK TOGETHER

Wellington City Council and RPH have a common agenda – working with communities to improve and protect their quality of life. RPH see LTPs as an opportunity to identify areas of collaboration and we are keen to provide our support and expertise to help the Council achieve their outcomes.

We note Council has undertaken a lot of ground work to shape the direction of the Long Term Plan. RPH is always keen to participate in these early direction-setting discussions and understand that this is a significant opportunity to influence. Please add us to your database of community and agency consultation stakeholders.

In addition to the priorities outlined in your Long Term Plan, RPH would like to suggest the following areas where we could work together and with other local partners to build community resilience.

### Food environment

RPH **welcomes** the opportunity to work with Council on strategies for building food resiliency and tackling food insecurity.

**Nāu te rourou, nāku te rourou, ka ora ai te iwi**

**With your food basket and my food basket, the people will prosper.**

Currently too many people in our communities are dependent on charity and food waste from industry. Providing ‘good food for all’ in a way that is mana-enhancing is vital for the well-being of our communities. Our vision is to change our current food system by promoting opportunities for food resilience and locally produced food. We believe a co-ordinated regional response is required to achieve this. In 2020/21 RPH and Common Unity Project Aotearoa co-hosted ‘Kai and our community’ hui across the greater Wellington region to explore the potential and purpose of a regional food network. This identified:

- how fragile our current linear food system is, requiring handouts and dependency for those who can’t afford to participate
- the need to begin a movement to develop a circular food system/economy which is participatory and walking with vulnerable people and communities

<sup>15</sup> Johnson, A., Howden-Chapman, P., Eaub, S., A Stocktake of New Zealand’s Housing. (2018).

- the importance of including those most affected and co-designing for change from the top down and the bottom up.

RPH would like to **invite** Council’s participation in this work to further strengthen food resiliency and security in the city and across the region. It has strong alignment with Council’s structure plan to allow appropriate housing growth and to build in resilience to climate change and other public health threats.

Additionally, RPH recognises that our food system contributes an estimated 24% of greenhouse gas emissions<sup>16</sup> from transportation and the use of artificial fertilizer. A significant lever for reducing our national carbon footprint and building local resilience is therefore producing and consuming food locally, and utilising compost instead of artificial fertilizers.

The draft Wellington Regional Growth Framework implementation plan includes the development of a regional strategy for food production to ensure food security and efficient supply chains and to include an emphasis on employment opportunities. This will require strong partnership between and within local government, iwi, central government and other groups.

RPH **appreciates** Council’s contribution and participation in this work, including with Council officers and the Mayoral Forum. Addressing these issues and regionalising our food system will require a collaborative approach across councils, and has strong alignment with Council’s plans for future housing growth and activities to build in resilience to climate change and other public health threats.

## Housing

RPH **commends** Wellington City Council for your involvement in the cross-sectoral [Wellington Regional Healthy Housing Group](#). Their vision is that “Everyone in the Wellington region lives in warm, dry and safe housing by 2025”.

A key value of the group, from RPH’s perspective, is the strengthened connections between Council members and wider stakeholders such as ourselves on regional housing issues. The Group provides a forum for the sharing of ideas, information and resources and provides meaningful opportunities to work in partnership toward the vision.

## CONCLUSION

Thank you for the opportunity to provide feedback on your Long Term Plan. We would welcome the opportunity to speak with Council officials on the opportunities we have raised.

<sup>16</sup> UN News. Food systems account for over one-third of global greenhouse gas emissions. (2021). Available from: <https://news.un.org/en/story/2021/03/1086822>

# COMMUNITY HUB

Community hubs help to build resilient communities and act as a space for social interaction supporting a sense of community and cultural wellbeing.

## A Community Hub can:

Build resilient communities

Support an active and safe community

Space for social interaction

A sense of community

Cultural wellbeing

Some key aspects to consider in the design and development of a community hub;

### Access to water fountains and drink bottle filling stations

- » Access to potable drinking water.
- » Limiting the need for people to purchase bottled water or other drinks.

### A breastfeeding friendly space

Breastfeeding has many benefits for both mother and baby, and is recommended exclusively for the first 6 months of life.

- » A supportive breastfeeding environment includes providing a space where parents are able to breastfeed, access hot water, sinks and power points for pumping, formula or bottle feeding.

### Adequate toilet facilities

- » Include disabled access toilets.
- » An accessible change table and nappy bin.
- » Gender neutral toilets.
- » An adequate number for the size of the venue.

### Greenspace

Engagement with greenspaces offers benefits in terms of mental health and well-being.<sup>[3]</sup>

- » Green spaces provide vital health services as well as environmental services; they reduce socioeconomic health inequalities, facilitate activity and promote better mental health and well-being.<sup>[3]</sup>

### A supportive environment for healthy eating

- » Healthy food available at an affordable price.
- » Limiting or having no unhealthy food advertising including unbranded drink fridges or vending machines.
- » Having no or limited sugar sweetened beverages available.

### A space for a community garden

- » Opportunity for food and income generation.
- » Opportunity for urban residents to engage in outdoor physical and social activities.
- » Outcomes of community garden participation positively influence community and individual wellbeing.

### A space that encourages being physically active

- » Equipment outside to encourage active play, increased physical activity.
- » Bike stands or storage to encourage active transport to the hub.

### A space that is sustainable

- » Built to an energy efficient design, and using environmentally friendly building practises.
- » Resilient to natural disasters.

### A space that encourages cultural wellbeing

- » Sharing community history.
- » Express and explore identity.
- » Preserve and enjoy arts, culture and heritage.

### Rubbish, recycling and composting options for bins

- » To reduce unnecessary waste and encourage recycling or reusing where possible.

### Accessibility to the venue to ensure it is able to be used by all

- » Ensuring adequate pedestrian crossings or traffic light, wheelchair and pram accessibility.
- » Accessible via public transport route.

Having a safe, supportive environment for a healthy lifestyle is central to achieving greater population health and healthier communities.

# Submission form

## Kōrero mai mō te mahere 10-tau Have your say on Our 10-Year Plan

All submissions must be received by midnight Monday 10 May 2021

You don't have to give feedback on every decision – just choose the ones you're interested in. You can only submit once. You can include supporting information along with your submission.

Before you start, read about our big decisions and the other supporting information in this consultation document.

### Why we're collecting this information

Your feedback matters. This plan is about the future of Wellington and it affects everyone who lives and works here. That's why we want to hear from as many people as possible. Your views will inform the next steps we take.

### Privacy statement

All submissions (including names and contact details) are provided in their entirety to elected members. Submissions (including names but not contact details) will be made available to the public at our office and on our website.

Your personal information will also be used for the administration of the consultation process, including informing you of the outcome of the consultation.

All information collected will be held by Wellington City Council, 113 The Terrace, Wellington, with submitters having the right to access and correct personal information.

<b>Full Name: Darcy Brittliff, Professional Engineer and Director of Orogen Limited</b>					
<b>Contact details: Address:</b> [REDACTED]					
<b>Phone number:</b> [REDACTED]					
<b>Are you making this submission as an individual or on behalf of an organisation?</b> <input type="checkbox"/> Individual <input checked="" type="checkbox"/> Organisation: Orogen Limited					
<b>What is your connection to Wellington? Tick all that apply</b>					
<b>I am a Wellington City Council ratepayer</b>	<input type="checkbox"/>	<b>I live in Wellington</b>	<input type="checkbox"/>	<b>I work in Wellington</b>	<input type="checkbox"/>
<b>I own a business in Wellington</b>	<input checked="" type="checkbox"/>	<b>I study in Wellington</b>	<input type="checkbox"/>	<b>I am a visitor to Wellington</b>	<input type="checkbox"/>
<b>Do you wish to speak to Councillors about your submission at an Oral Hearing or Forum?</b>					
<b>Yes</b>	<input type="checkbox"/>	<b>No</b>	<input checked="" type="checkbox"/>		
<b>If yes - We are offering two ways of speaking to Councillors about your submission.</b>					

Please tick which option(s) you would prefer?	
Oral forum (informal, 60min facilitated table discussion with 2 to 3 Councillors and other submitters)	<input type="checkbox"/> Morning
	<input type="checkbox"/> Afternoon
	<input type="checkbox"/> Evening
Oral Hearing (formal hearing with set times to speak to full Council, 5mins per individual, 10mins per organisation)	<input type="checkbox"/> Morning
	<input type="checkbox"/> Afternoon
	<input type="checkbox"/> Evening

## Our seven big decisions

The next seven questions relate to the big decisions for the 10-year plan.

- **Decision 1:** Increasing spending on the three waters network to fix the pipes
- **Decision 2:** Taking responsibility for the ownership of wastewater laterals
- **Decision 3:** Increased investment in cycleways
- **Decision 4:** Implementing our Te Atakura: First to Zero action plan
- **Decision 5:** Choosing a plan for earthquake-prone Council Office buildings
- **Decision 6:** Funding the Central Library strengthening and upgrade
- **Decision 7:** Choosing a plan for sludge minimisation

Detailed information on these decisions are on pages 21 to 46 of the Consultation Document.

Question 9 in this submission form is a place for you to comment or provide any other feedback on the decisions.

You are also able to attach further information to your submission at the end of this form.

### **Question 1 – Investment in three waters infrastructure**

There are three different levels of investment in the three waters network to consider. Our preferred level of investment is the **Enhanced** option, which focuses on improving the condition and reliability of the network in an affordable and sustainable way.

Problems with pipes have been a long time in the making, and we cannot fix everything at once. The Enhanced option represents a \$2.4bn investment in our three waters network and is the middle-ground option that we are confident of being able to deliver in this plan. We will be able to review the level of investment in our next Long-term Plan review in 2024, when we will have more information on the network.

A summary of the proposed investment in in the three waters network is on pages 23-27 of the Consultation Document.

**Which of these options do you prefer?**

Yes	Enhanced (\$2.4b investment – the Council’s preferred option)
	Maintain (\$2.0b investment - lower rates and debt)
	Accelerated (\$3.3b investment – higher rates and debt)
	None of these options
	Don’t know

**Question 2 – Wastewater laterals**

Currently residents are responsible for the maintenance of the pipes connecting their property to the wastewater (sewerage) main underneath the road corridor. These are called wastewater laterals.

We propose that the Council takes ownership of the laterals between the property boundary and the sewerage main underneath the road corridor.

A summary of the proposal to take responsibility for wastewater laterals is on page 28 of the Consultation Document.

**Which of these options do you prefer?**

Yes	Take ownership (Council’s preferred option, \$32m investment)
	No change (no change in investment, rates or debt)
	None of these options
	Don’t know

### **Question 3 – Cycleways**

Cycleways is an area where we have ambition to seriously lift our game – we’d like to build a network of connected and safe cycleways that allow Wellingtonians to be able to choose cycling as a mode of transport. Our full programme for the network can be viewed at [transportprojects.org.nz](http://transportprojects.org.nz) and if all of the routes were progressed, would be a \$226m investment across the 10 years of this plan.

Our preferred option is a \$45m or 60 percent increase in funding for cycleways than what was planned in the previous Long-Term Plan. It will progress \$120m of the full \$226m programme

We believe the High investment programme option balances the need for increased investment in this area with what is affordable for Council and what we will be able to deliver. It allows time in the programme for robust community engagement and to build capacity in the Council and the sector for the full programme to be eventually delivered.

A summary of the proposed investment to build more cycleways is on pages 30 -33 of the Consultation Document.

#### **Which of these options do you prefer?**

	High investment programme (Council’s preferred option, \$120m capital investment)
Yes	Finish started projects (\$29m capital investment, lower debt and rates)
	Medium investment programme (\$39m capital investment, lower debt and rates)
	Full investment programme (\$226m capital investment, higher debt and rates)
	None of these options
	Don’t know

### **Question 4 – Te Atakura First to Zero (Climate Change)**

Te Atakura – First to Zero is our response to the climate and ecological emergency we declared in 2019 but it is not yet funded.

Te Atakura is intended to ensure sufficient activity is undertaken in this decade to reduce our emissions. Council can do this by supporting the transport mode-shift projects, as well as encouraging the uptake of electric cars, providing seed funding to leverage businesses and community impact and supporting residents to be motivated to take action.

Our preferred option is to fully fund Te Atakura, which is included in our 5.3% average increase across 10 years.

A summary of the proposed investment in Te Atakura – First to Zero Action Plan is on pages 34 -37 of the Consultation Document

#### **Which of these options do you prefer?**

	Fully fund the programme (Council’s preferred option, \$29.9m investment)
Yes	Low level of funding (\$18.1m investment, lower rates and debt)

	Medium investment with savings (\$25.4m investment, lower rates and debt)
	None of these options
	Don't know

## **Question 5 – Te Ngākau Civic Precinct – Council office buildings**

Te Ngākau Civic Square is the musical, creative and democratic heart of Wellington but it has significant resilience challenges.

While we are still working through finalising the Framework for the Square, a specific decision is required in this Long-term Plan with respect to the future of the Council office buildings - the Municipal Office Building (MOB) and the Civic Administration Building (CAB).

As the two buildings are connected, and have similar resilience issues, it is important that the future of them is considered together.

Our preferred option is to demolish and rebuild the MOB and CAB buildings in partnership with private investment through a long-term ground lease for the site.

Combining a MOB and CAB development would enhance this opportunity and significantly decrease the need for additional Council borrowing and ratepayer funding to address these impaired buildings.

A summary of the proposed approach to developing of Te Ngākau Civic Square on pages 38 -41 of the Consultation Document

### **Which of these options do you prefer?**

Yes	Demolish and site developed through long-term lease (Council's preferred option)
	Proceed with base build proposal for public purposes (higher debt and rates)
	Retain and seek to repurpose (higher debt and rates)
	Sell to support development (no debt or rates impact)
	None of these options
	Don't know

## **Question 6 –Fixing the Central Library**

Wellington's much-loved Central Library was closed in March 2019 following an engineering assessment saying that the way the floor was designed presented a high level of potential failure in a significant earthquake.

After hearing from Wellingtonians in the 2020 consultation, Council agreed to recommend the high-level remediation option to be part of this plan. This option makes the building resilient to future shocks and supports our ability to deliver an adaptable modern library service, while preserving the buildings heritage. It also allows us to mitigate some climate change impacts in the future.

Now there are choices about how to fund the \$187.4m library remediation project, and when the project should take place.

The preferred option, includes the Council agreeing to temporarily breach its debt limit of 225% to ensure the library can be refurbished in the original timeframe and remain in

public ownership. Our debt level will remain at 225%, and Council has agreed to accept the breach in the first three years of this plan. This breach will be mitigated by any capital underspend being used for the library project rather than on new projects. Our debt level will be back below our limit by year 4 – 2024/25.

A summary of the proposed investment to fund the fixing of the Te Ngākau Civic Square Central Library is on pages 42 -43 of the Consultation Document

**Which of these options do you prefer?**

	Strengthen now by temporarily exceeding debt limit (Council’s preferred option additional 0.79% rates increase)
	Council to strengthen Central Library later (complete in 2028 instead of 2025, additional 0.83% rates increase)
	Strengthen now by increasing rates further (additional 1.79% rates increase)
Yes	None of these options
	Don’t know

**Question 7 – Reducing sewage sludge and waste**

One of the largest waste categories at the Southern Landfill is wastewater (sewage) sludge. This accounts for about a quarter of the waste that enters the landfill.

Through Te Atakura (our Zero Carbon Plan) and our Regional Waste Minimisation and Management Plan we have formally committed to reducing carbon emissions and reducing waste by a third. Minimising wastewater sludge is a necessary first step to achieving these objectives.

We need to break the link between the Southern Landfill and wastewater sludge and stop pumping sludge across the city, as 2020 highlighted the serious resilience issues and the significant consequences of failure.

Our preferred option is to invest in a sludge minimisation programme through another funding source. This means the project would not be funded by Council, but if it is funded through a Special Purpose Vehicle, a levy of about \$70-\$100 per year will be charged to each ratepayer.

A summary of the proposed investment in sludge and waste minimisation is on pages 45-47 of the Consultation Document.

**Which of these options do you prefer?**

Yes	Sludge minimisation through alternate funding (Council’s preferred option, \$147m-\$208m capital investment funded through a levy, no additional rates increase)
	No change in current practice (no change to investment, rates or debt)
	Invest in technology at Southern Landfill (\$86m-\$134m capital investment and additional 0.39% rates increase)
	Sludge minimisation – through Council funding (\$147m-\$208m capital investment, above debt limit, and additional 1.65% rates increase)

	None of these options
	Don't know

**Question 8 – Feedback on these decisions**

Do you have any comments you would like to provide around why you selected your preferred option to any of these decisions, or why you don't support any of the options we proposed? If yes please indicate what decision/s you wish to provide comment on.

	Investment in three waters infrastructure
	Wastewater laterals
	Cycleways
	Te Atakura (Climate change)
	Central Library
	Sludge and waste minimisation
	Te Ngākau funding for future work
	None of these

If this space is not adequate for your comments, please feel free to attach supporting information to the submission. Please be clear what decision you are commenting on.

It is important that the core infrastructure investment is enhanced by Council to aid in the reduction of environmental and business impacts of future failures of older assets.

It is important that core infrastructure investment is undertaken to enable growth of the City's population that is inevitable.

**Question 9 – Proposed 10-year budget** (See section “what this plan will cost” p13. of the Consultation Document for details)

Our draft budget, has an average rates increase for the average ratepayer of 5.3 percent after growth across the 10 years of the plan. We also propose setting a limit on how much we can raise from general rates - \$465m for each year across the first 3 years of the plan and, \$630m each year across years four to ten.

The first year of the plan has a rates increase of 13.5 percent (after growth) and there is an average of 9.9 percent (after growth) over the first three years. This is higher than previous plans because of the **key challenges** faced by the city including infrastructure, housing, earthquake strengthening and COVID-19 impacts. Therefore, we now require a step up in the level of rates we charge. Details of the key challenges are on page xx of the **Consultation Document**.

Our proposed budget also represents our highest ever level of capital investment in Wellington. It addresses the need for increased investment in our three waters infrastructure and transport network and seismic strengthening of key buildings, along with making progress against all our other priority community objectives.

Our debt levels for this plan, including the value of uninsured assets, range from 134 percent to 239 percent of our annual income. Our proposed limit is 225 percent.

We think this is a sensible limit on our borrowing to ensure that the impact on affordability of rates is maintained and leaves enough 'headroom' to ensure we can repay our debt, and respond to expected but unfunded and unexpected future events and opportunities.

**Do you support the proposed 10-year budget?**

	I strongly support the proposed budget
	I somewhat support the proposed budget
Yes	Neutral
	I somewhat oppose the proposed budget
	I strongly oppose the proposed budget
	Don't know

**Question 9.a) – If you stated in Question 1 that you are neutral or do not support the proposed budget. Do you support increasing or decreasing spend?**

Yes	I support increasing spend in the current budget
	I support decreasing spend in the current budget
	I support keeping the budget the same but with some changes
	Don't know

**Question 10 – Any other feedback on what is proposed for the 10-year Plan**

**Future decisions**

The Consultation Document also signals other decisions that are coming up in the time of this plan, but that we do not have enough information on at this stage for a detailed consultation.

**Other projects**

We also have many other services and projects detailed in our Statements of Service Provision.

**Council Fees and charges**

We have also made changes to some of our fees and user charges. More information on these are available on our website: <https://wgtn.cc/ltf> and available at our libraries and service centre.

**Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

I would like to promote the need for a new water reservoir located on the Woodridge Homes Land called the Horokiwi Reservoir. This reservoir was in the last LTP see below extract:

It is necessary as it supplies 250 new lots in the Woodridge development. It therefore supports housing demand in the City, the businesses involved in planning, designing, building, fitting out, and living in the new homes.

The reservoir integrates to the future Lincolnshire development, Horokiwi Road (potential development areas of ~130ha for longer term City housing needs), and Woodridge. Wellington Water are aware of this need and the below image is from their modelling report showing how it joins the current Council water network demonstrating that it has always been planned.

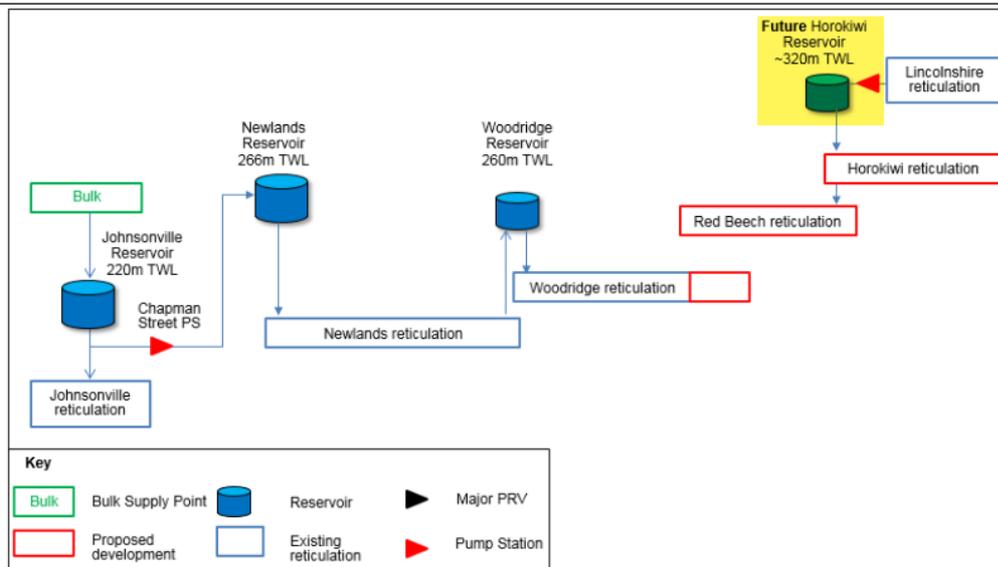

Figure 4 Network Schematic – Final Stage

The current Spatial Planning accommodates the housing at Woodridge however without this reservoir this planned area cannot be realised.

We continue to contribute to the Spatial Plan process and envisage that the investment in this Reservoir provides the following opportunities:

- If this reservoir is filled via Lincolnshire or from Horokiwi Road then it provides increased supply resilience to the Woodridge and Newlands water zones by being able to feed in those directions if needed in an emergency situation.
- Its elevation enables the potential to provide a water supply to much of the land in Horokiwi Road (circa 120 hectares). This means that if Council decided to enabling housing in that area that circa 1000-1500 homes could exist there.

There are various opportunities that this infrastructure can provide for the City so we therefore ask that Council align budget in the LTP for this reservoir named Horokiwi.

Thank you very much for your submission!

# Submission: #1944

## Submission by Richard Bentley on the 2021 – 2031 LTP

10 May 2021

### **1. The Major Deficiency of the LTP**

- The LTP fails to address in any way to address improving the economic development of the city and the region.
- The economic well-being of the City and the region is an absolute priority. Without secure employment and some expectancy about future incomes, Wellingtonians will feel the huge increases in rates about to occur are unacceptable and leave for other regions.
- The Wellington region is ranked 10<sup>th</sup> out of 15 in economic growth rates NZ (Regional GDP data Stats NZ 5 years to 2019), growing at almost half the rate of 6 regions in the North Island and much less than Tasman, Marlborough, and Otago in the South Island. In the past Wellington has had one of the strongest regional economies in NZ. The cause of this decline is the collapse of the corporate sector, the centralization of business leadership in Auckland and Sydney, and the development of new centers of distribution around Palmerston North. Obviously the collapse of the cruise industry is a more recent factor, and this may take years to recover.
- Economic development planning has been poorly executed in Wellington and the GRWC ever since the WCC and GWRC delegated this to WREMO. New thinking is required that reflects that Wellington has a unique competitive advantage which it has failed to exploit for decades – that is the vast capability that exists in Wellington amongst the science and technology faculties at Victoria University and the four CRIs that reside here, including Callaghan. This capability should be harnessed and promoted to create new innovation centres and in turn assist innovative companies in a process that the recent Productivity Commission’s report has foreshadowed. A good example of an idea that was simply ignored by the WCC was the proposals by the GWRC for the WCC and Vic Uni to create a new centre of technology and research into computer science and cyber security. The WCC needs to bring economic development planning into the WCC and the WCC CEO should be wholly responsible and answerable to the Councilors for the development and implementation of an economic development plan.
- Further, a major cost to the city itself and to its citizens is the cost of the current earthquake prone building legislation to building owners. The problem is that the basic premise behind the legislation is fundamentally flawed, with a focus on lateral strength not building resilience. The WCC should have been active, and it is not too late now, to organize a coherent and well-informed criticism of the legislation – before it effectively bankrupts the city and many of its property owners, and most of the rural towns as well (eg Whanganui). However the WCC has no engineering capability at all, and it is reliant on architectural and engineering consultants who arguably feed off this legislation. Efforts to change the legislation are currently underway and the WCC could join up with these, as they could be greatly assisted by strong WCC leadership at the highest political level along with WCC financial support. Strong Local Government support for changes will almost certainly be a prerequisite for getting government attention on the matter. *The writer was involved in fighting the legislation when it was proposed and is an informed observer.*

### **2. Comment on Proposed LTP Priorities**

- I agree with and support the accelerated Decision 1 (3 Waters) and Decision 2 (wastewater laterals). The need for urgency is that within a short time the WCC will be needing to find very large cash resources to replace the rapidly

deteriorating underground electrical wiring distribution system which its Chinese owners (Wellington Electricity) will be surely be reluctant to deal with on their own.

- I agree with the plans to deal with sludge minimization through alternative funding.
- I disagree with any further investment in cycleways or the FirZzero action plan.
- Hold back on the redevelopment of the city precinct until all avenues to correct the deficient earthquake prone building regulations have been pursued.

### SUBMISSION ON WELLINGTON CITY COUNCIL 2021-2031 LONG-TERM PLAN

**To:** ltp@wcc.govt.nz

**Comments provided on behalf of:** Stride Investment Management Limited on behalf of Stride Property Limited and the Diversified NZ Property Trust

**Address:**

[REDACTED]  
[REDACTED]  
[REDACTED] Amy Dresser

[REDACTED]  
[REDACTED] [REDACTED]

#### Introduction

1. On 6 April 2021, Wellington City Council (**Council**) released Tō mātou mahere ngahuru tau: Our 10-Year Plan (**LTP**) and begun public consultation on that draft plan.
2. This document provides comments on the LTP by Stride Investment Management Limited (**Stride**) on behalf of Stride Property Limited (**SPL**) and Diversified NZ Property Trust (**Diversified**).
3. Stride supports the LTP to the extent described below. This is because:
  - (a) Stride owns, develops and manages properties for long-term tenancy;
  - (b) Johnsonville is a regionally significant centre, including the Johnsonville Shopping Centre and Johnsonville Station;
  - (c) Further intensification and a population increase are expected in Johnsonville;
  - (d) Stride supports the strategic direction of the LTP relating to a compact urban form and sustainable economy;

- (e) Stride considers four of the LTP's seven big decisions are most important to investing in a resilient and well-integrated city;
- (f) The LTP should also support investment in infrastructure and housing around metropolitan centres; and
- (g) Stride seeks for the rates increase to be more evenly spread over the first five years of the LTP.

4. We expand below.

**Stride Property Group owns, develops and manages properties for long-term tenancy**

- 5. Stride and SPL are part of the Stride Property Group of companies.
  - (a) Stride is a specialist real estate investment manager which currently manages the property portfolios of SPL, Diversified, Industrie and Investore Property Limited.
  - (b) SPL manages one of New Zealand's largest diversified investment property portfolios with approximately \$3 billion under management at 31 March 2021 including a range of commercial office, retail and industrial properties.
- 6. Diversified is a property trust managed by Stride, which owns \$460 million (as at 30 September 2020) of retail shopping centre property.
- 7. The Stride Property Group's investment strategy is to invest in a portfolio of places with 'enduring demand'. Places that attract the highest demand in all market conditions because they meet the needs of tenants, their staff, their visitors and their customers. The attributes of properties that have enduring demand vary depending on the sector and the market but are a combination of accessibility, amenity, functionality and a value proposition that is compelling.
- 8. The Stride Property Group develops properties with a view to long-term ownership and, therefore, invests in its buildings to meet the needs of its tenants, including transport needs.
- 9. Stride Property Group's investment in centre locations supports the desire to create developments that have high accessibility, amenity and functionality.

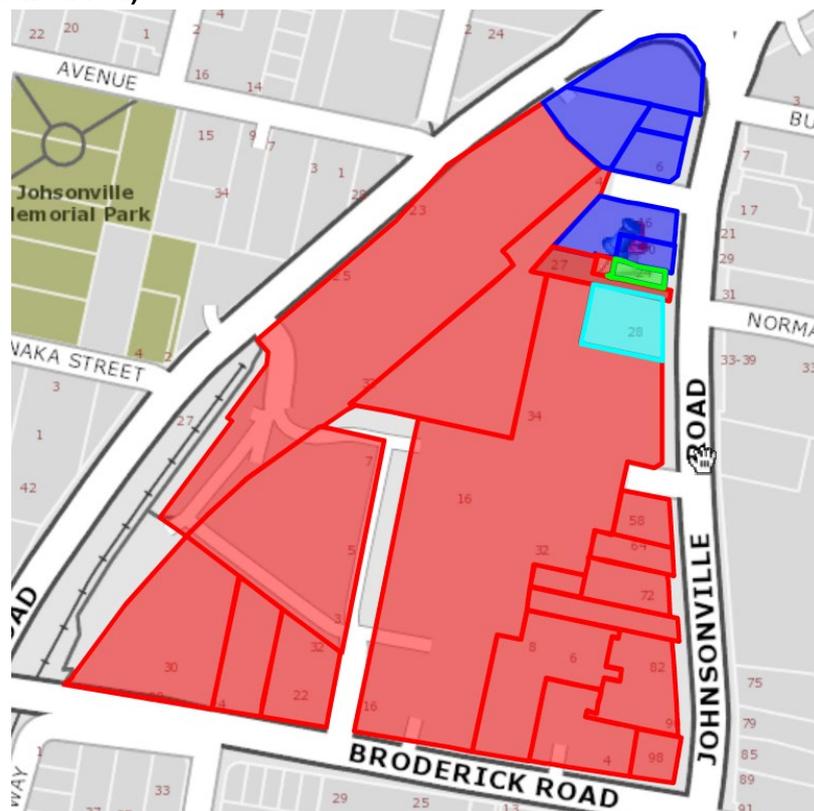

Centres form an important part of the commercial infrastructure of a society, and are critically important to the economic prosperity and vitality of the city. Centres are also key nodes in our existing transport network and intensification in centre locations supports a compact urban form and sustainable development objectives.

**Johnsonville is a regionally significant centre, including the Johnsonville Shopping Centre and Johnsonville Station**

*The Johnsonville Shopping Centre and redevelopment*

- 10. SPL and Diversified each own a 50% share in the land in Johnsonville coloured red on Figure 1 below which is occupied by the Johnsonville Shopping Centre.

**Figure 1 – Land at Johnsonville Shopping Centre owned by SPL and Diversified (coloured red)**

- 11. The Johnsonville Shopping Centre site is approximately 4.2 ha in area and occupies the majority of the block bounded by Johnsonville Road, Moorefield Road and Broderick Road. The Johnsonville train station is located in the

southwestern corner of the block, with a limited number of park and ride spaces. Bus stops are located on Moorefield Road and Johnsonville Road.

12. While the shopping centre has been progressively developed over time, in 2017 resource consent was obtained for a redevelopment of the Johnsonville Shopping Centre (**2017 Consent**).
13. The redevelopment authorised by the 2017 Consent would include:
  - (a) 26,000m<sup>2</sup> of development including retail, cinema and commercial activities;
  - (b) 900 car parking spaces; and
  - (c) pedestrian linkages (including linkages connecting to bus stops and the Johnsonville railway platform) and road widening works.
14. However, in response to systemic changes in consumer behaviour (including as a result of COVID-19), SPL and Diversified are now updating their scheme plans for a mixed-use development at the Johnsonville Shopping Centre site at a far greater density and height than that authorised by the 2017 Consent.
15. Intensive mixed-use development, including commercial and residential activities, at the Johnsonville Shopping Centre site is necessary to ensure that the redevelopment of the centre is commercially viable. The retail market has been disrupted in the last few years with increasing online sales (including New Zealand based online importers, and ease of access to international online market places, this change in behaviour has been further accelerated by COVID-19). In response, shopping centres must become an 'experience' and 'destination' and include a range of entertainment, food and beverage offerings. To ensure the vitality of a centre it is also critical to provide a customer base by incorporating commercial and residential activities as part of the development.
16. This focus on a mixed-use development has a range of other benefits, including efficient access to goods and services, support for active transport modes, and greater use of public transport.
17. The planned intensification of Johnsonville Metropolitan Centre and the surrounding area provides an opportunity to leverage the investment in existing

infrastructure, including the Johnsonville line and State Highway 1, and to provide further investment in a way that will meet the goals and objectives of the LTP, including sustainability goals.

### *Johnsonville is a Metropolitan Centre*

18. The Regional Policy Statement for the Wellington Region (**RPS**) identifies the Johnsonville centre as a regionally significant centre. The RPS supports new development in regionally significant centres to increase the range and diversity of activities occurring in those centres and to maintain the centres' vibrancy and vitality.<sup>1</sup> The RPS also recognises the social and economic benefits of encouraging the development of regionally significant centres.<sup>2</sup>
19. The Draft Wellington Spatial Plan (**Draft Spatial Plan**) recognises the Johnsonville shopping centre as a metropolitan centre.<sup>3</sup> The Johnsonville commercial centre (including the Johnsonville Shopping Centre) falls within the definition of a "metropolitan centre" under the National Planning Standards.
20. The draft Wellington Regional Public Transport Plan acknowledges that Johnsonville rail corridor is a rapid transit service under the National Policy Statement for Urban Development (**NPS-UD**) and Government Policy Statement on Land Transport 2021. This means it is "A quick, frequent, reliable and high-capacity public transport service that operates on a permanent route (road or rail) that is largely separated from other traffic."
21. The NPS-UD requires building heights of at least 6 storeys within at least a walkable catchment of existing and planned rapid transit stops and the edge of metropolitan centre zones.<sup>4</sup> The Draft Spatial Plan gives effect to the NPS-UD and provides for intensification in and around the Johnsonville Centre. Stride's submission on the Draft Spatial Plan also sought that further height and intensification be enabled in the Johnsonville Centre. Further height and intensification in the Johnsonville Centre will enable mixed use development that supports a compact urban form and sustainable economy.

<sup>1</sup> Regional Policy Statement (**RPS**), Section 3.9 *Regional form, design and function*, Objective 22(b) and Policy 30(b).

<sup>2</sup> RPS, Section 3.9 *Regional form, design and function*.

<sup>3</sup> Draft Wellington Spatial Plan (**Draft Spatial Plan**), *Northern Suburbs What's impacted by the NPS-UD?* Outer Suburbs tab.

<sup>4</sup> National Policy Statement on Urban Development 2020, Policy 3(c).

## Further intensification and a population increase are expected in Johnsonville

22. The region's population is projected to grow almost 9 percent in the next 10 years, from approximately 525,000 in 2020 to 570,000 by 2030.<sup>5</sup> Wellington City's population is expected to increase by 50,000 to 80,000 over the next 30 years, including a 5,000 to 6,000 increase of the population of Johnsonville.<sup>6</sup> This is a significant increase, particularly in comparison to other parts of Wellington. Tawa and Karori are the only other suburbs which are expected to have a similar increase in population (excluding the city centre).
23. As the form of the city intensifies, it is critical that the investment in transport infrastructure supports a quality compact urban form. Providing for transport infrastructure that supports alternative modes and enables residential intensification in proximity to the centre and transit network will provide for growth in the right locations and optimise infrastructure investment.
24. The Draft Wellington Regional Growth Framework (**Growth Framework**) provides a 30 year spatial plan for the region. The Growth Framework expects that two thirds of urban development in the region over the next 30 years will occur in existing urban areas, through infill, urban renewal and intensification. The key transport initiatives under the Growth Framework focus on improving levels of service for public transport and multi-modal access.
25. The Growth Framework already recognises Johnsonville as a regionally significant centre connected by infrastructure and public transport (rail and bus) that serves a number of adjacent suburbs, and seeks to maximise the mixed-use and residential opportunities. The Growth Framework also recognises Johnsonville as a future urban renewal area and maximising mixed-use residential opportunities for Johnsonville is an early stage spatial initiative under the Growth Framework.
26. It is important that the LTP is consistent with the Growth Framework and the Spatial Plan to ensure that the necessary infrastructure is in place for the anticipated urban development in existing urban areas. In line with these documents, the Council should focus its investment in urban areas which are

<sup>5</sup> Greater Wellington Regional Council *2021-2031 Long Term Plan: Supporting Information Document*, page 13.

<sup>6</sup> Planning for Growth and Wellington City Council *Our City Tomorrow: Draft Spatial Plan For Wellington City – Citywide Estimated Growth Distribution Figures* (25 September 2020).

expecting high growth to receive the greatest benefits (social, economic and environmental) from that investment.

27. The Spatial Plan recognises that Johnsonville is well suited to development and intensification as it is:
  - (a) “largely situated in a relatively flat basin” (which makes walking and cycling modes easier);
  - (b) serviced by an easily accessible rail station and bus interchange that provides access to the Wellington City centre and to other parts of Wellington City and the region;
  - (c) located in an area which has a lower level of natural hazard risk relative to several other parts of the city.
28. Johnsonville is located in close proximity to three of the greenfields ‘opportunity sites’ for accommodating Wellington City’s population growth identified in the Spatial Plan (Upper Stebbings Valley, Glenside West and Lincolnshire Farm) and the already rapidly growing Churton Park suburb. Johnsonville is also adjacent, and highly connected, to State Highway 1.
29. The NPS-UD mandates intensification in the areas surrounding rapid transit stops and metropolitan centres. The Spatial Plan reflects this by proposing that development of up to six storeys will be enabled in Johnsonville. Wellington City Council will be required to implement this minimum height limit in the Proposed Wellington District Plan, which will be notified in 2022.
30. It is clear from the planning framework that significant residential development and intensification will occur in and in proximity to Johnsonville. It is important that the LTP recognises this and provides appropriate investment to support this growth.

**Stride supports the strategic direction of the LTP relating to a compact urban form and sustainable economy**

31. Stride supports the following Community Outcomes:
  - (a) Social – a people friendly, compact, safe and accessible capital city.

- (i) It is important that the LTP supports compact, people friendly development. Wellington City is expected to have a significant population increase over the next ten years, as noted above, and Johnsonville is expected to accommodate around 10 per cent of that increase.
  - (b) Economic – a dynamic and sustainable economy. This is key because the economy, and in particular the retail market, is still adapting and responding to the impacts of COVID-19.
    - (i) As noted above, the retail market has been disrupted in the last few years with increasing online sales and this change in behaviour has been further accelerated by COVID-19. The impact of COVID-19 has brought forward change in strategic direction in Stride’s master planning for Johnsonville Shopping Centre. The Johnsonville Shopping Centre will be developed into a mixed-use development with retail, residential and office use.
    - (ii) Mixed-use development in an existing centre location will support sustainable compact urban form. The redevelopment of Johnsonville Shopping Centre will facilitate economic recovery from the impacts of COVID-19 while transitioning Johnsonville to a having a more sustainable low carbon economy.
32. Stride recognises that the LTP has six Priority Objectives for the next three years. Stride considers that the following four Priority Objectives are the most important for investment in Wellington City:
- (a) Priority Objective 1 – A functioning, resilient and reliable three waters infrastructure with improving harbour and waterway quality and reducing water usage and waste.
  - (b) Priority Objective 2 – Wellington has affordable, resilient and safe housing within an inclusive, accessible, connected and compact city.
  - (c) Priority Objective 3 – The city’s core transport infrastructure is a safe, resilient, reliable network that supports active and public transport

choices, and an efficient, productive and an environmentally sustainable economy.

- (d) Priority Objective 5 – An accelerating zero-carbon and waste-free transition with communities and the city economy adapting to climate change, development of low carbon infrastructure and buildings, and increased waste minimisation.
33. Stride supports investment which aligns with these Priority Objectives, as explained below.

**Stride considers four of the LTP's seven big decisions are most important to investing in a resilient and well-integrated city**

34. Stride supports Decision 1: Investment in three waters infrastructure.
- (a) In particular, Stride supports prioritising investment in three waters infrastructure in parts of the city expected to have the highest population increases, including Johnsonville. It is important that the critical infrastructure is in place to support sustainable urban development.
  - (b) In addition to Stride's plans to transform the Johnsonville Shopping Centre into a mixed-use development, Johnsonville has been recognised as a metropolitan centre in the Spatial Plan. The Regional Growth Framework also recognises Johnsonville as a Future Urban Development Area, which has been prioritised for early staging. The LTP should prioritise investment consistently with planning documents (and supported by the private sector) to enable integrated development.
35. Stride supports Decision 3: Cycleways.
- (a) In particular, Stride supports:
    - (i) Investment in cycleway connections to the public transport network, including Johnsonville Train Station; and
    - (ii) Investment in northern connections, including Tawa to Johnsonville and Johnsonville to Ngaio.
  - (b) A mode shift to active and public transport is important to transitioning to a low carbon economy. Investing in cycle connections to the public

transport network, including both bike access and storage, will support this mode shift.

- (c) Stride also supports investment in public transport in Johnsonville, in accordance with Priority Objective 3, to support the urban development and population growth anticipated in Johnsonville. The LTP should investigate:
  - (i) the impacts of proposed population growth on the Johnsonville public transport network;
  - (ii) upgrading the facilities and infrastructure at the Johnsonville Station;
  - (iii) how to improve the integration of the Johnsonville Station with the Johnsonville Metropolitan Centre; and
  - (iv) enhancing all forms of multi-modal pedestrian access to Johnsonville Station, including bike, pedestrian and connecting bus access.

36. Stride supports Decision 4: Te Atakura: First to Zero.

- (a) In particular, Stride supports the recognition in the LTP Consultation Document that “one of the most significant actions we can take to reduce the city’s emissions will be shifting transport modes”.<sup>7</sup> The Te Atakura action should prioritise this mode shift. Stride would be interested in being involved in any mode shift projects or plans for Johnsonville.
- (b) Stride also recognises that a compact urban form supports this mode shift. The Council and the Te Atakura action plan should be consistent with the Spatial Plan and Regional Growth Framework to prioritise investment in urban form where population growth is expected, in particular in Johnsonville, as outlined above.

<sup>7</sup> Wellington City Council *Tō mātou mahere ngahuru tau: Our 10-Year Plan – Consultation Document*, page 34.

- (c) The LTP should prioritise investment in business climate action support. This is critical to ensure sustainable development is part of the economic recovery from the effects of COVID-19.
- (d) Stride recognises that the development of low carbon infrastructure and buildings, in line with Strategic Priority 5, will support a reduction in carbon emissions. The LTP should invest in supporting a transition to low carbon development.

**The LTP should also support investment in infrastructure and housing around metropolitan centres**

- 37. The LTP proposes that funding allocations for investment in future infrastructure requirements arising from rezoning under the Spatial Plan and District Plan review will be a key part of the 2024 Long Term Plan. It is important that funding aligns with the rezoning of the city for more intensive development.
- 38. Stride supports investment in infrastructure in the Johnsonville metropolitan centre, to provide for the expected population growth in Johnsonville.
- 39. The Council should consider allocating funding for investment in infrastructure requirements for development in Johnsonville as part of this LTP, since the Council is required to rezone land in Johnsonville for higher density development under the NPS-UD.
  - (a) The NPS-UD is national direction which the Council must amend the district plan to give effect to as soon as practicable. Stride understands the Spatial Plan and district plan review process are in the process of implementing the NPS-UD.
  - (b) The Council is recognised as a tier 1 local authority, which requires the Council to give effect to intensification policies by July 2022. To give effect to these obligations, it is important that the Council directs investment to provide for urban development in areas expected to have high population growth (including Johnsonville).
  - (c) Investing in infrastructure in Johnsonville would be consistent with Priority Objective 2, to support the development of housing in a compact and connected metropolitan centre.

40. Stride supports the Council taking a proactive approach to urban development by working with developers to accommodate the expected population growth in Wellington City and Johnsonville in particular. Co-ordinating local authority government and key stakeholders will enable effective urban development and transport investment, and assist the Council to align with government direction and the Greater Wellington Regional Council's Growth Framework and other plans.

**Stride seeks for the rates increase to be more evenly spread over the first five years of the LTP**

41. The Council proposes an average rates increase of 13.5 percent in 2021/2022 and average rates increases of 9.9 percent over the first three years. These increases assume 0.6 percent growth.
42. Stride appreciates that the Council has faced significant loss of revenue over the last twelve months arising from the effects of the COVID-19 pandemic, and a rates increase is desirable for the Council.
43. However, the LTP does not recognise that businesses have also suffered from loss of revenue and cost increases arising from the effects of the pandemic, and many businesses are still suffering. The retail market has been significantly disrupted, and adversely impacted. In addition, the proposed rates increase is also having a material impact on the feasibility of new development projects. The Council needs to enable new development to achieve the outcomes sought in the LTP, including providing for new residential supply. It is critical that rates are set at a level that will not deter projects from proceeding.
44. Stride seeks for the Council to spread the cost of the rates increase over the first five years of the LTP in order to mitigate the effects on people and businesses.

**Conclusion**

45. Stride appreciates the opportunity to provide a submission on the LTP and would be happy to discuss the matters raised and amendments sought in this submission in further detail.

46. Stride appreciates the importance of the role and function of the Johnsonville metropolitan centre to the region, and seeks for the LTP to provide for well-integrated transport and land use to support a sustainable compact urban form.
47. Stride would also appreciate the opportunity to be involved in the development of a place-based urban development and transport planning committee for managing growth and change in Johnsonville.

## Submission form

### Kōrero mai mō te mahere 10-tau

### Have your say on our 10-Year Plan

All submissions must be received by **midnight Monday 10 May 2021**.

You don't have to give feedback on every decision – just choose the ones you're interested in. You can only submit once. You can include supporting information along with your submission.

Before you start, read about our priorities and projects in our consultation document. There are copies available at your local library and our Service Centre at 12 Manners Street, or visit [wgtn.cc/ltp](http://wgtn.cc/ltp).

#### Why we're collecting this information

Your feedback matters. This plan is about the future of Wellington and it affects everyone who lives and works here. That's why we want to hear from as many people as possible. Your views will inform the next steps we take.

#### Privacy statement

All submissions (including names and contact details) are provided in their entirety to elected members. Submissions (including names but not contact details) will be made available to the public at our office and on our website.

Your personal information will also be used for the administration of the consultation process, including informing you of the outcome of the consultation.

All information collected will be held by Wellington City Council, 113 The Terrace, Wellington, with submitters having the right to access and correct personal information.

## Our seven big decisions

The next seven questions relate to the big decisions for the 10-year plan.

- **Decision 1:** Increasing spending on the three waters network to fix the pipes
- **Decision 2:** Taking responsibility for the ownership of wastewater laterals
- **Decision 3:** Increased investment in cycleways
- **Decision 4:** Implementing our Te Atakura, First to Zero action plan
- **Decision 5:** Choosing a plan for earthquake-prone Council Office buildings
- **Decision 6:** Funding the Central Library strengthening and upgrade
- **Decision 7:** Choosing a plan for sludge minimisation

Detailed information on these decisions are on pages 20 to 47 of the Consultation Document.

**Question 8** in this submission form is a place for you to comment or provide any other feedback on the decisions.

You are also able to attach further information to your submission at the end of this form.

### 1. Investment in three waters infrastructure

There are three different levels of investment in the three waters network to consider. Our preferred level of investment is the **Enhanced** option, which focuses on improving the condition and reliability of the network in an affordable and sustainable way.

Problems with pipes have been a long time in the making, and we cannot fix everything at once. The Enhanced option represents a \$2.4b investment in our three waters network and is the middle-ground option that we are confident of being able to deliver in this plan. We will be able to review the level of investment in our next Long-term Plan review in 2024, when we will have more information on the network.

A summary of the proposed investment in the three waters network is on pages 22 - 26 of the Consultation Document.

Which of these options do you prefer?

Enhanced (\$2.4b Council's preferred option)	Maintain (\$2.0b investment - lower rates and debt)	Accelerated (\$3.3b investment - higher rates and debt)	None of these options	Don't know
--	---	---	-----------------------	------------

### 2. Wastewater laterals

Currently residents are responsible for the maintenance of the pipes connecting their property to the wastewater (**sewerage**) main underneath the road corridor. These are called wastewater laterals.

We propose that the Council takes ownership of the laterals between the property boundary and the sewerage main underneath the road corridor.

A summary of the proposal to take responsibility for wastewater laterals is on pages 28 - 29 of the Consultation Document.

Which of these options do you prefer?

Take ownership (Council's preferred option, \$32m investment)	No change (no change in investment, rates or debt)	Neither of these options	Don't know
---	--	--------------------------	------------

### 3. Cycleways

Cycleways is an area where we have ambition to seriously lift our game - we'd like to build a network of connected and safe cycleways that allow Wellingtonians to be able to choose cycling as a mode of transport. Our full programme for the network can be viewed at [transportprojects.org.nz](http://transportprojects.org.nz) and if all of the routes were progressed, there would be a \$226m investment across the 10 years of this plan.

Our preferred option is a \$45m or 60 percent increase in funding for cycleways than what was planned in the previous Long-term Plan. It will progress \$120m of the full \$226m programme

We believe the high investment programme option balances the need for increased investment in this area with what is affordable for Council and what we will be able to deliver. It allows time in the programme for robust community engagement and to build capacity in the Council and the sector for the full programme to be eventually delivered.

A summary of the proposed investment to build more cycleways is on pages 30 - 33 of the Consultation Document.

Which of these options do you prefer?

High investment programme (Council's preferred option, \$120m capital investment)	Finish started projects (\$29m capital investment, lower debt and rates)	Medium investment programme (\$39m capital investment, lower debt and rates)
Accelerated full investment programme (\$226m capital investment, higher debt and rates)	None of these options	Don't know

### 4. Te Atakura First to Zero (Climate Change)

Te Atakura - First to Zero is our response to the climate and ecological emergency we declared in 2019 but it is not yet funded.

Te Atakura is intended to ensure sufficient activity is undertaken in this decade to reduce our emissions. Council can do this by supporting the transport mode-shift projects, as well as encouraging the uptake of electric cars, providing seed funding to leverage businesses and community impact and supporting residents to be motivated to take action.

Our preferred option is to fully fund Te Atakura, which is included in our 5.3 percent average increase across 10 years.

A summary of the proposed investment in Te Atakura - First to Zero Action Plan is on pages 34 - 37 of the Consultation Document.

Which of these options do you prefer?

Fully fund the programme (Council's preferred option, \$29.9m investment)	Medium investment with savings (\$25.4m investment, lower rates and debt)
Low level of funding (\$18.1m investment, lower rates and debt)	None of these options <i>Deferred</i>
	Don't know

*There's insufficient information on the return on investment and carbon reduction.*

### 5. Te Ngākau Civic Precinct - Council office buildings

Te Ngākau Civic Square is the musical, creative and democratic heart of Wellington but it has significant resilience challenges.

While we are still working through finalising the framework for Civic Square, a specific decision is required in this Long-term Plan with respect to the future of the Council office buildings - the Municipal Office Building (MOB) and the Civic Administration Building (CAB).

As the two buildings are connected, and have similar resilience issues, it is important that the future of them is considered together.

Our preferred option is to demolish and rebuild the MOB and CAB buildings in partnership with private investment through a long-term ground lease for the site.

Combining a MOB and CAB development would enhance this opportunity and significantly decrease the need for additional Council borrowing and ratepayer funding to address these impaired buildings.

A summary of the proposed approach to developing of Te Ngākau Civic Square on pages 38 - 41 of the Consultation Document.

Which of these options do you prefer?

Demolish and site developed through long-term lease (Council's preferred option)	Proceed with base build proposal for public purposes (higher debt and rates)
Retain and seek to	Sell to support
	None of these options
	Don't know

## 6. Fixing the Central Library

Wellington's much-loved Central Library was closed in March 2019 following an engineering assessment saying that the way the floor was designed presented a high level of potential failure in a significant earthquake.

After hearing from Wellingtonians in the 2020 consultation, Council agreed to recommend the high-level remediation option to be part of this plan. This option makes the building resilient to future shocks and supports our ability to deliver an adaptable modern library service, while preserving the buildings heritage. It also allows us to mitigate some climate change impacts in the future.

Now there are choices about how to fund the \$187.4m library remediation project, and when the project should take place.

The preferred option, includes the Council agreeing to temporarily breach its debt limit of 225 percent to ensure the library can be refurbished in the original timeframe and remain in public ownership. Our debt level will remain at 225 percent, and Council has agreed to accept the breach in the first three years of this plan. This breach will be mitigated by any capital underspend being used for the library project rather than on new projects. Our debt level will be back below our limit by year 4 - 2024/25.

A summary of the proposed investment to fund the fixing of the Te Ngākau Civic Square Central Library is on pages 42 - 44 of the Consultation Document.

Which of these options do you prefer?

Strengthen now by temporarily exceeding debt limit (Council's preferred option, additional 0.79% rates increase)	Council to strengthen Central Library later (complete in 2028 instead of 2025, additional 0.83% rates increase)	
Strengthen now by increasing rates further (additional 1.79% rates increase)	None of these options <i>Selling the library</i>	Don't know

*and land to a developer with the proviso to leave back floors for the library.*

## 7. Reducing sewage sludge and waste

One of the largest waste categories at the Southern Landfill is wastewater (sewage) sludge. This accounts for about a quarter of the waste that enters the landfill.

Through Te Atakura (our Zero Carbon Plan) and our Regional Waste Minimisation and Management Plan we have formally committed to reducing carbon emissions and reducing waste by a third. Minimising wastewater sludge is a necessary first step to achieving these objectives.

We need to break the link between the Southern Landfill and wastewater sludge and stop pumping sludge across the city, as 2020 highlighted the serious resilience issues and the significant consequences of failure.

Our preferred option is to invest in a sludge minimisation programme through another funding source. This means the project would not be funded by Council, but if it is funded through a Special Purpose Vehicle, a levy of about \$70-\$100 per year will be charged to each ratepayer.

A summary of the proposed investment in sludge and waste minimisation is on pages 45 - 47 of the Consultation Document.

Which of these options do you prefer?

Sludge minimisation through alternate funding (Council's preferred option, \$147m-\$208m capital investment funded through a levy, no additional rates increase)	No change in current practice (no change to investment, rates or debt) ✓
Invest in technology at Southern Landfill (\$86m-\$134m capital investment and higher rates)	Sludge minimisation - through Council funding (\$147m-\$208m capital investment, above debt limit and higher rates)
None of these options	Don't know

*To be deferred as we have no money for this.*

## 8. Feedback on these decisions

Do you have any comments you would like to provide around why you selected your preferred option to any of these decisions, or why you don't support any of the options we proposed? If yes please indicate what decision/s you wish to provide comment on.

Investment in three waters infrastructure	Wastewater laterals	Cycleways
Te Atakura (climate change)	Central Library	Sludge and waste minimisation 4822
Te Ngākau funding for future work	None of these	

The seven key decisions have no or insufficient outcomes and objectives, that is, what are alternatives or repercussions etc. They are not quantifiable nor measurable.

There is no supporting engagement on operational expenditure nor apparently any effort to reduce expenses.

The council continues to employ high-paid personnel, for example, the recent employment of a "story teller". How absolutely pathetic when they should be economising!

There should be an immediate cap on staff with a freeze on new recruitment for three years. There should be an immediate salary cap for all those paid over £30,000.

On page 55, it is stated that there is a full programme of projects that were agreed on by Council. These should be constantly reviewed and any increased costs studied and questioned and if no additional cost cannot be subtracted, these projects should be cancelled.

Council hasn't considered the costs of LGWM, social housing and other projects. Pressure should be made to central government to pay for these. The council should not be responsible for these and the council should look at selling social housing to central government or other social services.

It's interesting that despite the burgeoning costs and pressure on ratepayers, councillors haven't stopped adding their vanity projects onto the list despite not having any money, they continue to approve these!

**Comments**

**9. Proposed 10-year budget (see page 10 for details)**

Our draft budget, has an average rates increase for the average ratepayer of 5.3 percent after growth across the 10 years of the plan. We also propose setting a limit on how much we can raise from general rates - \$465m for each year across the first 3 years of the plan and, \$630m each year across years four to ten.

The first year of the plan has a rates increase of 13.5 percent (after growth) and there is an average of 9.9 percent (after growth) over the first three years. This is higher than previous plans because of the **key challenges** faced by the city including infrastructure, housing, earthquake strengthening and and COVID-19 impacts.. Therefore, we now require a step up in the level of rates we charge. Details of the key challenges are on pages 20 - 47 of the **Consultation Document**.

Our proposed budget also represents our highest ever level of capital investment in Wellington. It addresses the need for increased investment in our three waters infrastructure and transport network and seismic strengthening of key buildings, along with making progress against all our other priority community objectives.

Our debt levels for this plan, including the value of uninsured assets, range from 134 percent to 239 percent of our annual income. Our proposed limit is 225 percent.

We think this is a sensible limit on our borrowing to ensure that the impact on affordability of rates is maintained and leaves enough 'headroom' to ensure we can repay our debt, and respond to expected but unfunded and unexpected future events and opportunities.

**Do you support the proposed 10-year budget?**

I strongly support the proposed budget	I somewhat support the proposed budget	Neutral
I somewhat oppose the proposed budget	I strongly oppose the proposed budget	Don't know

**If you stated in Question 9 that you are neutral or do not support the proposed budget. Do you support increasing or decreasing spend?**

## 10. Any other feedback on what is proposed for the 10-year Plan

### Future decisions

The Consultation Document also signals other decisions that are coming up in the time of this plan, but that we do not have enough information on at this stage for a detailed consultation.

### Other projects

We also have many other services and projects detailed in our Statements of Service Provision.

### Council Fees and charges

We have also made changes to some of our fees and user charges. More information on these are available on our website [wgtn.cc/ltp](http://wgtn.cc/ltp) and available at our libraries and service centre.

Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?

This highlights the total irresponsibility of the council saying that you know there are other expenses coming up but because of insufficient information, you're not putting in contingency for these but carrying on without any allowance for these! So how do you think these going to be paid for?

These projects should all be frozen or cancelled!

# Submission form

## Kōrero mai mō te mahere 10-tau Have your say on our 10-Year Plan

All submissions must be received by midnight Monday 10 May 2021.

You don't have to give feedback on every decision - just choose the ones you're interested in. You can only submit once. You can include supporting information along with your submission.

Before you start, read about our priorities and projects in our consultation document. There are copies available at your local library and our Service Centre at 12 Manners Street, or visit [wgnn.cc/ftp](http://wgnn.cc/ftp).

### Why we're collecting this information

Your feedback matters. This plan is about the future of Wellington and it affects everyone who lives and works here. That's why we want to hear from as many people as possible. Your views will inform the next steps we take.

### Privacy statement

All submissions (including names and contact details) are provided in their entirety to elected members. Submissions (including names but not contact details) will be made available to the public at our office and on our website.

Your personal information will also be used for the administration of the consultation process, including informing you of the outcome of the consultation.

All information collected will be held by Wellington City Council, 113 The Terrace, Wellington, with submitters having the right to access and correct personal information.

## Our seven big decisions

The next seven questions relate to the big decisions for the 10-year plan.

- **Decision 1:** Increasing spending on the three waters network to fix the pipes
- **Decision 2:** Taking responsibility for the ownership of wastewater laterals
- **Decision 3:** Increased investment in cycleways
- **Decision 4:** Implementing our Te Atakura, First to Zero action plan
- **Decision 5:** Choosing a plan for earthquake-prone Council Office buildings
- **Decision 6:** Funding the Central Library strengthening and upgrade
- **Decision 7:** Choosing a plan for sludge minimisation

Detailed information on these decisions are on pages 20 to 47 of the Consultation Document.

**Question 8** in this submission form is a place for you to comment or provide any other feedback on the decisions.

You are also able to attach further information to your submission at the end of this form.

### 1. Investment in three waters infrastructure

There are three different levels of investment in the three waters network to consider. Our preferred level of investment is the **Enhanced** option, which focuses on improving the condition and reliability of the network in an affordable and sustainable way.

Problems with pipes have been a long time in the making, and we cannot fix everything at once. The **Enhanced** option represents a \$2.4b investment in our three waters network and is the middle-ground option that we are confident of being able to deliver in this plan. We will be able to review the level of investment in our next Long-term Plan review in 2024, when we will have more information on the network.

A summary of the proposed investment in the three waters network is on pages 22 - 26 of the Consultation Document.

Which of these options do you prefer?

Enhanced (\$2.4b Council's preferred option)	Maintain (\$2.0b investment - lower rates and debt)	Accelerated (\$3.3b investment - higher rates and debt)	None of these options	Don't know
--	---	---	-----------------------	------------

### 2. Wastewater laterals

Currently residents are responsible for the maintenance of the pipes connecting their property to the wastewater (sewerage) main underneath the road corridor. These are called wastewater laterals.

We propose that the Council takes ownership of the laterals between the property boundary and the sewerage main underneath the road corridor.

A summary of the proposal to take responsibility for wastewater laterals is on pages 28 - 29 of the Consultation Document.

Which of these options do you prefer?

Take ownership (Council's preferred option, \$32m investment)	No change (no change in investment, rates or debt)	Neither of these options	Don't know
---	--	--------------------------	------------

### 3. Cycleways

Cycleways is an area where we have ambition to seriously lift our game – we'd like to build a network of connected and safe cycleways that allow Wellingtonians to be able to choose cycling as a mode of transport. Our full programme for the network can be viewed at [transportprojects.org.nz](http://transportprojects.org.nz) and if all of the routes were progressed, there would be a \$226m investment across the 10 years of this plan.

Our preferred option is a \$45m or 60 percent increase in funding for cycleways than what was planned in the previous Long-term plan. It will progress \$120m of the full \$226m programme.

We believe the high investment programme option balances the need for increased investment in this area with what is affordable for Council and what we will be able to deliver. It allows time in the programme for robust community engagement and to build capacity in the Council and the sector for the full programme to be eventually delivered.

A summary of the proposed investment to build more cycleways is on pages 30 – 33 of the Consultation Document.

Which of these options do you prefer?

High investment programme (Council's preferred option, \$120m capital investment)	Finish started projects (\$29m capital investment, lower debt and rates)	Medium investment programme (\$39m capital investment, lower debt and rates)
Accelerated full investment programme (\$226m capital investment, higher debt and rates)	None of these options	Don't know

### 4. Te Atakura First to Zero (Climate Change)

Te Atakura – First to Zero is our response to the climate and ecological emergency we declared in 2019 but it is not yet funded.

Te Atakura is intended to ensure sufficient activity is undertaken in this decade to reduce our emissions. Council can do this by supporting the transport mode-shift projects, as well as encouraging the uptake of electric cars, providing seed funding to leverage businesses and community impact and supporting residents to be motivated to take action.

Our preferred option is to fully fund Te Atakura, which is included in our 5.3 percent average increase across 10 years.

A summary of the proposed investment in Te Atakura – First to Zero Action Plan is on pages 34 – 37 of the Consultation Document.

Which of these options do you prefer?

Fully fund the programme (Council's preferred option, \$29.9m investment)	Medium investment with savings (\$25.4m investment, lower rates and debt)
Low level of funding (\$18.1m investment, lower rates and debt)	None of these options
	Don't know

### 5. Te Ngākau Civic Precinct – Council office buildings

Te Ngākau Civic Square is the musical, creative and democratic heart of Wellington but it has significant resilience challenges.

While we are still working through finalising the framework for Civic Square, a specific decision is required in this Long-term Plan with respect to the future of the Council office buildings – the Municipal Office Building (MOB) and the Civic Administration Building (CAB).

As the two buildings are connected, and have similar resilience issues, it is important that the future of them is considered together.

Our preferred option is to demolish and rebuild the MOB and CAB buildings in partnership with private investment through a long-term ground lease for the site.

Combining a MOB and CAB development would enhance this opportunity and significantly decrease the need for additional Council borrowing and ratepayer funding to address these impaired buildings.

A summary of the proposed approach to developing of Te Ngākau Civic Square on pages 38 – 41 of the Consultation Document.

Which of these options do you prefer?

Demolish and site developed through long-term lease (Council's preferred option)	Proceed with base build proposal for public purposes (higher debt and rates)
Retain and seek to repurpose (higher debt and rates)	Sell to support development (no debt or rates impact)
	None of these options
	Don't know

### 6. Fixing the Central Library

Wellington's much-loved Central Library was closed in March 2019 following an engineering assessment saying that the way the floor was designed presented a high level of potential failure in a significant earthquake.

After hearing from Wellingtonians in the 2020 consultation, Council agreed to recommend the high-level remediation option to be part of this plan. This option makes the building resilient to future shocks and supports our ability to deliver an adaptable modern library service, while preserving the buildings heritage. It also allows us to mitigate some climate change impacts in the future.

Now there are choices about how to fund the \$187.4m library remediation project, and when the project should take place.

The preferred option, includes the Council agreeing to temporarily breach its debt limit of 225 percent to ensure the library can be refurbished in the original timeframe and remain in public ownership. Our debt level will remain at 225 percent, and Council has agreed to accept the breach in the first three years of this plan. This breach will be mitigated by any capital underspend being used for the library project rather than on new projects. Our debt level will be back below our limit by year 4 - 2024/25.

A summary of the proposed investment to fund the fixing of the Te Ngākau Civic Square Central Library is on pages 42 - 44 of the Consultation Document.

Which of these options do you prefer?

Strengthen now by temporarily exceeding debt limit (Council's preferred option, additional 0.79% rates increase)	Council to strengthen Central Library later (complete in 2028 instead of 2025, additional 0.83% rates increase)	
Strengthen now by increasing rates further (additional 1.79% rates increase)	None of these options	Don't know

### 7. Reducing sewage sludge and waste

One of the largest waste categories at the Southern Landfill is wastewater (sewage) sludge. This accounts for about a quarter of the waste that enters the landfill.

Through Te Atakura (our Zero Carbon Plan) and our Regional Waste Minimisation and Management Plan we have formally committed to reducing carbon emissions and reducing waste by a third. Minimising wastewater sludge is a necessary first step to achieving these objectives.

We need to break the link between the Southern Landfill and wastewater sludge and stop pumping sludge across the city, as 2020 highlighted the serious resilience issues and the significant consequences of failure.

Our preferred option is to invest in a sludge minimisation programme through another funding source. This means the project would not be funded by Council, but if it is funded through a Special Purpose Vehicle, a levy of about \$70-\$100 per year will be charged to each ratepayer.

A summary of the proposed investment in sludge and waste minimisation is on pages 45 - 47 of the Consultation Document.

Which of these options do you prefer?

Sludge minimisation through alternate funding (Council's preferred option, \$147m-\$208m capital investment funded through a levy, no additional rates increase)	No change in current practice (no change to investment, rates or debt)
Invest in technology at Southern Landfill (\$86m-\$134m capital investment and higher rates)	Sludge minimisation - through Council funding (\$147m-\$208m capital investment, above debt limit and higher rates)
None of these options	Don't know

### 8. Feedback on these decisions

Do you have any comments you would like to provide around why you selected your preferred option to any of these decisions, or why you don't support any of the options we proposed? If yes please indicate what decision/s you wish to provide comment on.

Investment in three waters infrastructure	Wastewater laterals	Cycleways
Te Atakura (climate change)	Central Library	Sludge and waste minimisation
Te Ngākau funding for future work	None of these	

If the space on the next page is not adequate for your comments, please feel free to attach supporting information to the submission. Please be clear what decision you are commenting on.

I WANT THE COUNCIL TO DO THEIR JOB IN MAINTAINING THE MOST BASIC OF NECESSITIES, THAT IS INFRASTRUCTURE FOR THE GROWING CITY.

I DO NOT WANT MY RATES GOING TOWARDS CYCLEWAYS. I WANT THE AGING PIPES FIXED. IT IS AN EMBARRASSMENT FOR A CAPITAL CITY.

WE HAVE EXISTED WITHOUT THE CENTRAL LIBRARY FOR SO LONG, WE CAN CONTINUE WITHOUT IT UNTIL THE THREE WATERS INFRASTRUCTURE IS FIXED.

**9. Proposed 10-year budget (see page 10 for details)**

Our draft budget, has an average rates increase for the average ratepayer of 5.3 percent after growth across the 10 years of the plan. We also propose setting a limit on how much we can raise from general rates - \$465m for each year across the first 3 years of the plan and, \$630m each year across years four to ten.

The first year of the plan has a rates increase of 13.5 percent (after growth) and there is an average of 9.9 percent (after growth) over the first three years. This is higher than previous plans because of the **key challenges** faced by the city including infrastructure, housing, earthquake strengthening and and COVID-19 impacts.. Therefore, we now require a step up in the level of rates we charge. Details of the key challenges are on pages 20 - 47 of the **Consultation Document**.

Our proposed budget also represents our highest ever level of capital investment in Wellington. It addresses the need for increased investment in our three waters infrastructure and transport network and seismic strengthening of key buildings, along with making progress against all our other priority community objectives.

Our debt levels for this plan, including the value of uninsured assets, range from 134 percent to 239 percent of our annual income. Our proposed limit is 225 percent.

We think this is a sensible limit on our borrowing to ensure that the impact on affordability of rates is maintained and leaves enough 'headroom' to ensure we can repay our debt, and respond to expected but unfunded and unexpected future events and opportunities.

**Do you support the proposed 10-year budget?**

I strongly support the proposed budget	I somewhat support the proposed budget	Neutral
I somewhat oppose the proposed budget	<u>I strongly oppose the proposed budget</u>	Don't know

**If you stated in Question 9 that you are neutral or do not support the proposed budget. Do you support increasing or decreasing spend?**

I support increasing spend in the current budget	<u>I support decreasing spend in the current budget</u>	I support keeping the budget the same but with some changes	Don't know

## ***Introduction:***

Te Rūnanga o Toa Rangatira has a vision that sees a strong, vibrant and influential iwi, firmly grounded in our cultural identity and leading change to enable whānau wellbeing and prosperity. Revitalising and strengthening our identity as whānau, hapū, iwi, advancing the health and wellbeing of whānau, growing a sustainable economic base, nurturing a resilient environment to sustain future generations, and building a strong organisation founded on leadership and connection are key objectives that Ngāti Toa seek to pursue in partnership with our Council partners. These objectives are key to sustaining intergenerational prosperity.

From a Mana Whenua perspective, our indigeneity informs the lens we apply to the various issues that face each of the Council's that operate within the rohe of Ngāti Toa. We therefore support any opportunity to empower Mana Whenua to engage in decision-making in their community. It is necessary that appropriate lens to Te Ao Māori is applied to all infrastructural and innovative projects taking place in and around Nelson district and at all levels. This ensures that the prosperity and growth the community is calling for reflects a holistic approach.

## ***Submission:***

### *Climate Change*

Climate change is an intergenerational threat. Our indigeneity offers awareness to climate emergency and the risk that our children, mokopuna and future generations are now facing. It is essential that Council are proactive and begin to respond to climate change immediately.

Wellington City Council declared a state of Climate Emergency in June 2019 and has since taken significant action with the development of the 'Te Atakura, First to Zero' Blueprint plan for Climate Action. The general direction of Government policy has already been signalled through various mechanisms such as the establishment of the New Zealand Climate Change Commission, the Climate Change Response Act 2002, the Climate Change Response (Zero Carbon) Amendment Act 2019, the New Zealand Emissions Trading Scheme and the Carbon Neutral Government Programme. We would encourage local investment in a suite of actions that include mitigation, adaptation, resilience, leadership, and innovation. The nature of central government policy is forever changing. If we are to meet the targets set in the Paris Agreement waiting for Government direction is not preferred. We must act now!

As Mana Whenua, we don't view 'Climate Action' as a key focus to be addressed in our planning – more an overarching perspective that supports our indigenous lens. We approach all key focuses in the long-term plan process by considering how awareness to climate action is threaded through the planning, design and decision-making process.

### *Environmental Resilience*

We all have a duty to care for our environment. In fact, for Mana Whenua, this is an inherent obligation we bare that derives from the whakapapa connection we have with the land and sea. The relationship between Māori and the environment is integral to the cultural survival of tangata whenua **as** tangata whenua. We aspire to see our natural environment reinvigorated with an indigenous imprint. We know a balanced biodiversity and thriving ecosystem contribute to our defence against climate change and shapes the appropriate awareness to the mental and emotional changes our community will have to make in the future to ensure our collective resilience. We look forward to collaborating with our partners on the shared planning we can do to build emotional and mental resilience to our changing natural environment.

### ***The Big Decisions:***

#### *Investment in three waters infrastructure*

We support Councils preferred option to enhance investment in the three waters infrastructure, as a preliminary step to understanding the condition of the network. Alongside this thinking, we view the wellbeing of the three waters infrastructure as a key response in the fight against climate action. Poor water infrastructure has significant adverse cultural effects, that will only be compounded as we deal with the impacts of climate change. Ensuring our resourcing mechanisms are functioning at full capacity minimises future risk for our community. Ngāti Toa support all future intentions and investment to repair the three waters infrastructure in full and appreciate that this option in the LTP is the first step toward this intention.

#### *Wastewater Laterals*

We support Councils preferred option to take ownership of the section of wastewater laterals beneath the legal road to the property boundary. It is encouraging that this concern is being addressed to keep Wellington City more in line with most other Councils in New Zealand.

#### *Cycleways*

Finishing started projects (option 1) is better in line with Ngāti Toa and our vision towards intergenerational prosperity. As there are likely to be ongoing challenges and cost related to the three waters infrastructure and as we gear up to defend our community against climate change, we need to consider the behavioural shifts our community will need to make and how we establish engaging opportunity to ensure this directive. Cycleways don't heavily reflect how our people connect and move about within our rohe as cycling can be costly. Whilst we agree that further investment should go towards endorsing differing modes of transport, we support goals towards lowering emissions in and around our city, however we feel this is better established by strengthening the public transport system towards sustainable operation.

### *Te Atakura*

We support a fully funded plan towards climate action and reducing emissions. We approach all key issues in the long term plan with an acute lens to how plans moving forward will also ensure our defence against climate change. Fully funding stronger efforts towards climate action. Establishing foundations for Te Atakura alongside Mana Whenua is a necessary first step.

### *Sludge and Minimisation funding*

We support all forms of funding to address sludge concerns, to this end option 4 is desirable. Regardless of whether external funding is feasible, repairs to the waste and sludge system is paramount given the indigenous lens we apply to climate action, if external funding is unsuccessful, we also support option 3. As an area of focus across all key decisions and areas of concerns, minimising sludge and damage to the waste system is also a response to climate change as it establishes stronger measures of well-being and protection that could contribute to climate risk otherwise.

### *Governance and Cultural Wellbeing.*

As Mana Whenua, we define our cultural wellbeing through the symbiotic relationship we share with our whenua. In this manner, it is preferable that any council work in this area consider where and how iwi will have opportunity to direct and design planned projects taking place alongside art galleries and museum events. Establishing cultural connectivity should reflect shared governance of cultural expression within our rohe. As Mana Whenua, we set a standard to support interchange and connection with tangata whenua living away from their tūrangawaewae can also connect with. It is our responsibility to honour their presence and contribution to our people through cultural celebration as a form of manaakitanga. We would also like the opportunity to build on such experiences with other cultural identities in our rohe. It is important that Ngāti Toa share opportunity and visibility with the multi-cultural community we watch over as Mana Whenua.

### **Submission on Wellington City Council Long Term Plan 2021 – 2031**

Thank you for the opportunity to comment on Greater Wellington Regional Council's Long Term Plan (LTP).

As a key council planning tool, the LTP process provides an opportunity for Council to support their iwi partners to be able to exercise their mana whenua obligations. It also provides Councils with the opportunity to recognise their obligations under section 4 of the Local Government Act 2002 (LGA),

While improvements can be made to enable iwi participation across all Council activities, we commend Wellington City Council in its approach to engaging with Ngāti Toa, particularly on the kaupapa of resourcing iwi capacity. Our participation in the various work undertaken by Council is significant to Ngāti Toa in the fulfilment of our kaitiaki obligations. This approach reflects a genuine willingness to act in partnership and provides a springboard from which to pursue stronger working relationships.

While the development of the LTP is a large piece of work, this is exacerbated by the LGA given that the process takes place across all Councils around the same time, for Ngāti Toa this means all of our Council partners seek to engage us on the development of their LTPs. We believe that this can be undertaken a mind to effective efficiency in future and would suggest a collaborative process alongside other Councils within Te Upoko o Te Ika when seeking to engage and consult our people.

We would also suggest an approach to engage Ngāti Toa in the development of Activity Management Plans. This is the process undertaken by some of our other Council partners, and ensures that we are able to indicate early on where our interests lie, and what meaningful participation in the various activities of Council can look like.

Several Council's are also seeking to consult on the kaupapa of Māori Wards as part of their LTP consultations. We would note that Ngāti Toa's position on this matter is that while we do not oppose the establishment of Māori Wards, but we are clear that they do not represent Treaty Partnership. Iwi remain the Treaty Partner and having general Māori representation at local government does not change this.

We are currently seeking to build stronger working relationships with all local authorities within the Ngāti Toa rohe and look forward to working alongside Wellington City Council in this regard.

Ngā mihi

Naomi Solomon

**General Manager – Treaty Strategic Relationships**

[Redacted signature area]

# Submission: #1949

M M Wolland - [REDACTED]

## Sludge and waste minimisation; Three waters:

I see the council as a group that represent Wellington therefore supporting practical and realistic investment options for the people of the Wellington region, associated regions, and the visitors to the Wellington. And leading in getting the best for Wellington by working with each community – resident; NZ'er; visitor and business.

Therefore, I support:

- the council priorities for the next ten years in investing in the projects that first and foremost focus on fixing; improving and expanding the cities key utilities & infrastructure and parks. That would allow for the development of a new suburb that could showcase the future of NZ while giving additional housing.

## Te Ngākau funding for future work

- And in investing in future projects that include an improve customer service and better consultation process that involves working with the people that live in the suburban community versus the current blanket approach that does not fit all.
- I support funding for a more accessible and agile WCC customer service where solutions for everyday street issues can be a “hui” (for the small jobs ...verbally discuss the solutions with the street residents) before the change submission is sent out. (or results in a solution without a submission process)
- To have a dedicated person when the job is escalated e.g account manager and/or project manage who can connect all the WCC departments; councillors and get sign off to help the street residents in finding a quick workable solution.
- And more funding to fix everyday issues; that are practical for today's living... the here and now. Interim Solutions.

## Wastewater laterals

- And totally agree to have Wastewater laterals maintain by council as per other councils in NZ and more so where the issue was not caused by the homeowner.

## Housing

### **But I am concern:**

that in the ten-year plan there is reference to potential insolvency within the housing area that WCC oversee; that includes the recent expansion into affordable rental properties; is not one of the seven decisions WCC are looking for feedback on.

Is this not breaking the law; knowingly running a business when it is insolvent? And tad irresponsible expecting the ratepayer to indefinitely cover the ongoing shortfall and pending additional costs for WCC to be a compliant landlord of these houses when there is a is a government department that specialises in housing for all NZ'ers which is funded by NZ taxpayers (technically that also makes the ratepayers paying twice for NZ housing)

Shouldn't WCC be focusing on the infrastructure of the city which needs major upgrades that would assist Housing NZ the government agency. It does not make sense to put the pressure on rate payers to fix the infrastructure that was not maintained as money was diverted to other projects and then cover the debt of housing when there Housing NZ is there to manage housing for all New Zealanders.

## Our seven big decisions

The next seven questions relate to the big decisions for the 10-year plan.

- **Decision 1:** Increasing spending on the three waters network to fix the pipes
- **Decision 2:** Taking responsibility for the ownership of wastewater laterals
- **Decision 3:** Increased investment in cycleways
- **Decision 4:** Implementing our Te Atakura: First to Zero action plan
- **Decision 5:** Choosing a plan for earthquake-prone Council Office buildings
- **Decision 6:** Funding the Central Library strengthening and upgrade
- **Decision 7:** Choosing a plan for sludge minimisation

Detailed information on these decisions are on pages 21 to 46 of the Consultation Document.

Question 9 in this submission form is a place for you to comment or provide any other feedback on the decisions.

You are also able to attach further information to your submission at the end of this form.

### **Question 1 – Investment in three waters infrastructure**

There are three different levels of investment in the three waters network to consider. Our preferred level of investment is the **Enhanced** option, which focuses on improving the condition and reliability of the network in an affordable and sustainable way.

Problems with pipes have been a long time in the making, and we cannot fix everything at once. The Enhanced option represents a \$2.4bn investment in our three waters network and is the middle-ground option that we are confident of being able to deliver in this plan. We will be able to review the level of investment in our next Long-term Plan review in 2024, when we will have more information on the network.

A summary of the proposed investment in in the three waters network is on pages 23-27 of the Consultation Document.

**Which of these options do you prefer?**

Y	Enhanced (\$2.4b investment – the Council’s preferred option)
---	---

	Maintain (\$2.0b investment - lower rates and debt)
	Accelerated (\$3.3b investment – higher rates and debt)
	None of these options
	Don't know

## **Question 2 – Wastewater laterals**

Currently residents are responsible for the maintenance of the pipes connecting their property to the wastewater (sewerage) main underneath the road corridor. These are called wastewater laterals.

We propose that the Council takes ownership of the laterals between the property boundary and the sewerage main underneath the road corridor.

A summary of the proposal to take responsibility for wastewater laterals is on page 28 of the Consultation Document.

### **Which of these options do you prefer?**

Y	Take ownership (Council's preferred option, \$32m investment)
	No change (no change in investment, rates or debt)
	None of these options
	Don't know

### **Question 3 – Cycleways**

Cycleways is an area where we have ambition to seriously lift our game – we'd like to build a network of connected and safe cycleways that allow Wellingtonians to be able to choose cycling as a mode of transport. Our full programme for the network can be viewed at [transportprojects.org.nz](http://transportprojects.org.nz) and if all of the routes were progressed, would be a \$226m investment across the 10 years of this plan.

Our preferred option is a \$45m or 60 percent increase in funding for cycleways than what was planned in the previous Long-Term Plan. It will progress \$120m of the full \$226m programme

We believe the High investment programme option balances the need for increased investment in this area with what is affordable for Council and what we will be able to deliver. It allows time in the programme for robust community engagement and to build capacity in the Council and the sector for the full programme to be eventually delivered.

A summary of the proposed investment to build more cycleways is on pages 30 -33 of the Consultation Document.

#### **Which of these options do you prefer?**

	High investment programme (Council's preferred option, \$120m capital investment)
	Finish started projects (\$29m capital investment, lower debt and rates)
	Medium investment programme (\$39m capital investment, lower debt and rates)
Y	Full investment programme (\$226m capital investment, higher debt and rates)
	None of these options
	Don't know

### **Question 4 – Te Atakura First to Zero (Climate Change)**

Te Atakura – First to Zero is our response to the climate and ecological emergency we declared in 2019 but it is not yet funded.

Te Atakura is intended to ensure sufficient activity is undertaken in this decade to reduce our emissions. Council can do this by supporting the transport mode-shift projects, as well as encouraging the uptake of electric cars, providing seed funding to leverage businesses and community impact and supporting residents to be motivated to take action.

Our preferred option is to fully fund Te Atakura, which is included in our 5.3% average increase across 10 years.

A summary of the proposed investment in Te Atakura – First to Zero Action Plan is on pages 34 -37 of the Consultation Document

#### **Which of these options do you prefer?**

	Fully fund the programme (Council's preferred option, \$29.9m investment)
Y	Low level of funding (\$18.1m investment, lower rates and debt)
	Medium investment with savings (\$25.4m investment, lower rates and debt)
	None of these options

	Don't know
--	------------

**Question 5 – Te Ngākau Civic Precinct – Council office buildings**

Te Ngākau Civic Square is the musical, creative and democratic heart of Wellington but it has significant resilience challenges.

While we are still working through finalising the Framework for the Square, a specific decision is required in this Long-term Plan with respect to the future of the Council office buildings - the Municipal Office Building (MOB) and the Civic Administration Building (CAB).

As the two buildings are connected, and have similar resilience issues, it is important that the future of them is considered together.

Our preferred option is to demolish and rebuild the MOB and CAB buildings in partnership with private investment through a long-term ground lease for the site.

Combining a MOB and CAB development would enhance this opportunity and significantly decrease the need for additional Council borrowing and ratepayer funding to address these impaired buildings.

A summary of the proposed approach to developing of Te Ngākau Civic Square on pages 38 -41 of the Consultation Document

**Which of these options do you prefer?**

Y	Demolish and site developed through long-term lease (Council's preferred option)
	Proceed with base build proposal for public purposes (higher debt and rates)
	Retain and seek to repurpose (higher debt and rates)
	Sell to support development (no debt or rates impact)
	None of these options
	Don't know

**Question 6 –Fixing the Central Library**

Wellington's much-loved Central Library was closed in March 2019 following an engineering assessment saying that the way the floor was designed presented a high level of potential failure in a significant earthquake.

After hearing from Wellingtonians in the 2020 consultation, Council agreed to recommend the high-level remediation option to be part of this plan. This option makes the building resilient to future shocks and supports our ability to deliver an adaptable modern library service, while preserving the buildings heritage. It also allows us to mitigate some climate change impacts in the future.

Now there are choices about how to fund the \$187.4m library remediation project, and when the project should take place.

The preferred option, includes the Council agreeing to temporarily breach its debt limit of 225% to ensure the library can be refurbished in the original timeframe and remain in public ownership. Our debt level will remain at 225%, and Council has agreed to accept the breach in the first three years of this plan. This breach will be mitigated by any capital

underspend being used for the library project rather than on new projects. Our debt level will be back below our limit by year 4 – 2024/25.

A summary of the proposed investment to fund the fixing of the Te Ngākau Civic Square Central Library is on pages 42 -43 of the Consultation Document

**Which of these options do you prefer?**

	Strengthen now by temporarily exceeding debt limit (Council’s preferred option additional 0.79% rates increase)
	Council to strengthen Central Library later (complete in 2028 instead of 2025, additional 0.83% rates increase)
	Strengthen now by increasing rates further (additional 1.79% rates increase)
Y	None of these options
	Don’t know

**Question 7 – Reducing sewage sludge and waste**

One of the largest waste categories at the Southern Landfill is wastewater (sewage) sludge. This accounts for about a quarter of the waste that enters the landfill.

Through Te Atakura (our Zero Carbon Plan) and our Regional Waste Minimisation and Management Plan we have formally committed to reducing carbon emissions and reducing waste by a third. Minimising wastewater sludge is a necessary first step to achieving these objectives.

We need to break the link between the Southern Landfill and wastewater sludge and stop pumping sludge across the city, as 2020 highlighted the serious resilience issues and the significant consequences of failure.

Our preferred option is to invest in a sludge minimisation programme through another funding source. This means the project would not be funded by Council, but if it is funded through a Special Purpose Vehicle, a levy of about \$70-\$100 per year will be charged to each ratepayer.

A summary of the proposed investment in sludge and waste minimisation is on pages 45-47 of the Consultation Document.

**Which of these options do you prefer?**

Y	Sludge minimisation through alternate funding (Council’s preferred option, \$147m-\$208m capital investment funded through a levy, no additional rates increase)
	No change in current practice (no change to investment, rates or debt)
	Invest in technology at Southern Landfill (\$86m-\$134m capital investment and additional 0.39% rates increase)
	Sludge minimisation – through Council funding (\$147m-\$208m capital investment, above debt limit, and additional 1.65% rates increase)
	None of these options
	Don’t know

### **Question 8 – Feedback on these decisions**

Do you have any comments you would like to provide around why you selected your preferred option to any of these decisions, or why you don't support any of the options we proposed? If yes please indicate what decision/s you wish to provide comment on.

	Investment in three waters infrastructure
Y	Wastewater laterals
Y	Cycleways
	Te Atakura (Climate change)
	Central Library
	Sludge and waste minimisation
	Te Ngākau funding for future work
	None of these

If this space is not adequate for your comments, please feel free to attach supporting information to the submission. Please be clear what decision you are commenting on.

**Cycleways**  
 I'm disappointed that the LTP funding for cycleways has been pushed out beyond year three. Funding in that timeframe is largely pointless gesture given there will be another LTP and another opportunity to flip-flop on investment in cycleways. Cycleways are needed now this funding needs to be brought forward. Get them built.

The number of cyclists commuting has boomed. We are vulnerable road users and like all vulnerable road users we need additional protection, Riding on narrow roads with cars travelling at 50kph+ is scary. We need to separate out from motor vehicles on roadways 50kph+ or speeds should be reduced on roads where separation is not possible. The price of an accident is so much higher for us with no metal, seatbelts or airbags to protect us.

More needs to be done to invest to promote and protect vulnerable road users. Footpaths for feet not parked cars, protection and room for scootering and cycling.

**Wastewater laterals**  
 These need to be bought back. I'm pleased that this is proposed. It was a terrible decision to gift these to the residents at a time when many old laterals were beginning to fail and cause environmental damage.

### **Question 9 – Proposed 10-year budget** (See section “what this plan will cost” p13. of the Consultation Document for details)

Our draft budget, has an average rates increase for the average ratepayer of 5.3 percent after growth across the 10 years of the plan. We also propose setting a limit on how much

we can raise from general rates - \$465m for each year across the first 3 years of the plan and, \$630m each year across years four to ten.

The first year of the plan has a rates increase of 13.5 percent (after growth) and there is an average of 9.9 percent (after growth) over the first three years. This is higher than previous plans because of the **key challenges** faced by the city including infrastructure, housing, earthquake strengthening and COVID-19 impacts. Therefore, we now require a step up in the level of rates we charge. Details of the key challenges are on page xx of the **Consultation Document**.

Our proposed budget also represents our highest ever level of capital investment in Wellington. It addresses the need for increased investment in our three waters infrastructure and transport network and seismic strengthening of key buildings, along with making progress against all our other priority community objectives.

Our debt levels for this plan, including the value of uninsured assets, range from 134 percent to 239 percent of our annual income. Our proposed limit is 225 percent.

We think this is a sensible limit on our borrowing to ensure that the impact on affordability of rates is maintained and leaves enough 'headroom' to ensure we can repay our debt, and respond to expected but unfunded and unexpected future events and opportunities.

**Do you support the proposed 10-year budget?**

	I strongly support the proposed budget
Y	I somewhat support the proposed budget
	Neutral
	I somewhat oppose the proposed budget
	I strongly oppose the proposed budget
	Don't know

**Question 9.a) – If you stated in Question 1 that you are neutral or do not support the proposed budget. Do you support increasing or decreasing spend?**

	I support increasing spend in the current budget
	I support decreasing spend in the current budget
	I support keeping the budget the same but with some changes
	Don't know

**Question 10 – Any other feedback on what is proposed for the 10-year Plan**

**Future decisions**

The Consultation Document also signals other decisions that are coming up in the time of this plan, but that we do not have enough information on at this stage for a detailed consultation.

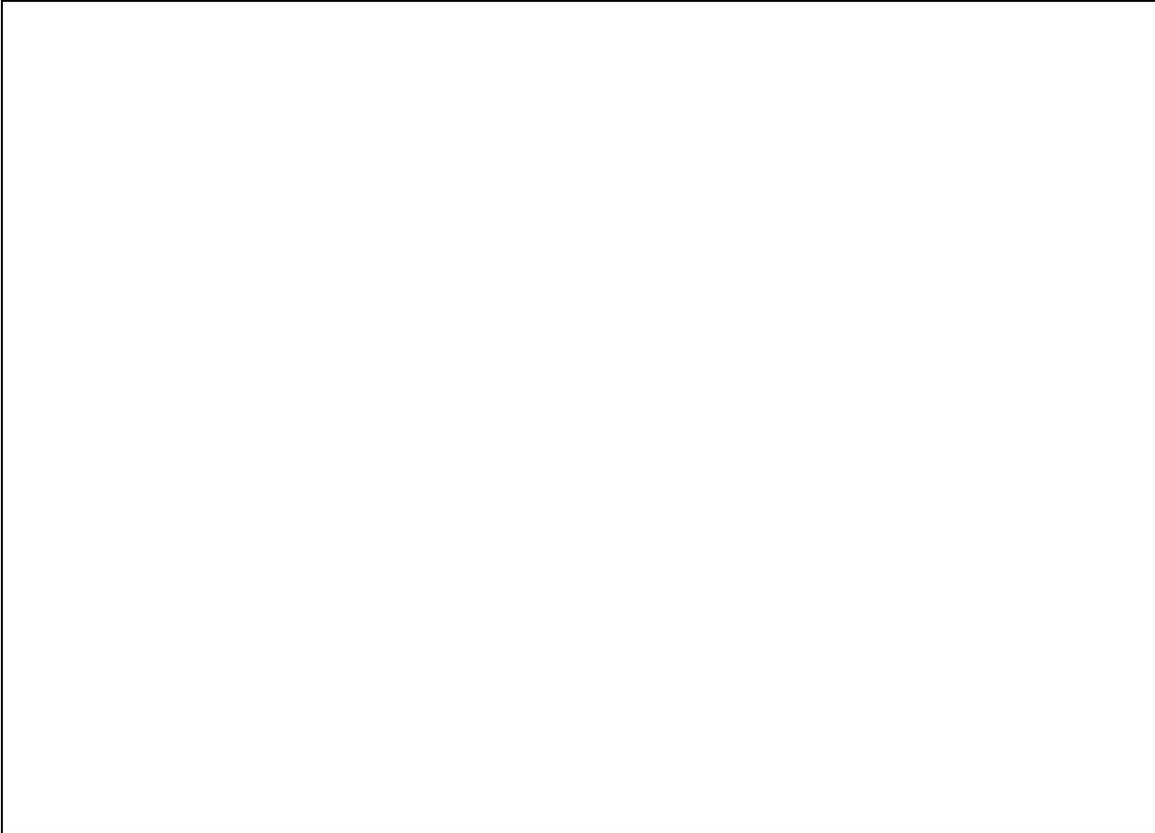

**Other projects**

We also have many other services and projects detailed in our Statements of Service Provision.

**Council Fees and charges**

We have also made changes to some of our fees and user charges. More information on these are available on our website: <https://wgtn.cc/ltp> and available at our libraries and service centre.

**Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

A large, empty rectangular box with a thin black border, intended for users to provide their comments and feedback on the 10-year plan and budget.

Thank you very much for your submission!

commercial/residential combination buildings giving purpose and a sense of community to suburban and heritage centres.

Compliance requirements are mainly to do with exit signage and fire systems. The City Council's administration of these requirements is not complex. The building owner already has to commission another provider to sign off annual systems compliance which is on-forwarded to WCC.

Thank you very much for your submission!

# Submission form

## Kōrero mai mō te mahere 10-tau Have your say on Our 10-Year Plan

All submissions must be received by midnight Monday 10 May 2021

You don't have to give feedback on every decision – just choose the ones you're interested in. You can only submit once. You can include supporting information along with your submission.

Before you start, read about our big decisions and the other supporting information in this consultation document.

## Our seven big decisions

The next seven questions relate to the big decisions for the 10-year plan.

- **Decision 1:** Increasing spending on the three waters network to fix the pipes
- **Decision 2:** Taking responsibility for the ownership of wastewater laterals
- **Decision 3:** Increased investment in cycleways
- **Decision 4:** Implementing our Te Atakura: First to Zero action plan
- **Decision 5:** Choosing a plan for earthquake-prone Council Office buildings
- **Decision 6:** Funding the Central Library strengthening and upgrade
- **Decision 7:** Choosing a plan for sludge minimisation

Detailed information on these decisions are on pages 21 to 46 of the Consultation Document.

Question 9 in this submission form is a place for you to comment or provide any other feedback on the decisions.

You are also able to attach further information to your submission at the end of this form.

### Question 1 – Investment in three waters infrastructure

There are three different levels of investment in the three waters network to consider. Our preferred level of investment is the **Enhanced** option, which focuses on improving the condition and reliability of the network in an affordable and sustainable way.

Problems with pipes have been a long time in the making, and we cannot fix everything at once. The Enhanced option represents a \$2.4bn investment in our three waters network and is the middle-ground option that we are confident of being able to deliver in this plan. We will be able to review the level of investment in our next Long-term Plan review in 2024, when we will have more information on the network.

A summary of the proposed investment in in the three waters network is on pages 23-27 of the Consultation Document.

**Which of these options do you prefer?**

<input type="checkbox"/>	Enhanced (\$2.4b investment – the Council’s preferred
--------------------------	---

	option)
	Maintain (\$2.0b investment - lower rates and debt)
	Accelerated (\$3.3b investment – higher rates and debt)
	None of these options
x	Don't know

## **Question 2 – Wastewater laterals**

Currently residents are responsible for the maintenance of the pipes connecting their property to the wastewater (sewerage) main underneath the road corridor. These are called wastewater laterals.

We propose that the Council takes ownership of the laterals between the property boundary and the sewerage main underneath the road corridor.

A summary of the proposal to take responsibility for wastewater laterals is on page 28 of the Consultation Document.

### **Which of these options do you prefer?**

x	Take ownership (Council's preferred option, \$32m investment)
	No change (no change in investment, rates or debt)
	None of these options
	Don't know

### **Question 3 – Cycleways**

Cycleways is an area where we have ambition to seriously lift our game – we'd like to build a network of connected and safe cycleways that allow Wellingtonians to be able to choose cycling as a mode of transport. Our full programme for the network can be viewed at [transportprojects.org.nz](http://transportprojects.org.nz) and if all of the routes were progressed, would be a \$226m investment across the 10 years of this plan.

Our preferred option is a \$45m or 60 percent increase in funding for cycleways than what was planned in the previous Long-Term Plan. It will progress \$120m of the full \$226m programme

We believe the High investment programme option balances the need for increased investment in this area with what is affordable for Council and what we will be able to deliver. It allows time in the programme for robust community engagement and to build capacity in the Council and the sector for the full programme to be eventually delivered.

A summary of the proposed investment to build more cycleways is on pages 30 -33 of the Consultation Document.

#### **Which of these options do you prefer?**

	High investment programme (Council's preferred option, \$120m capital investment)
	Finish started projects (\$29m capital investment, lower debt and rates)
x	Medium investment programme (\$39m capital investment, lower debt and rates)
	Full investment programme (\$226m capital investment, higher debt and rates)
	None of these options
	Don't know

### **Question 4 – Te Atakura First to Zero (Climate Change)**

Te Atakura – First to Zero is our response to the climate and ecological emergency we declared in 2019 but it is not yet funded.

Te Atakura is intended to ensure sufficient activity is undertaken in this decade to reduce our emissions. Council can do this by supporting the transport mode-shift projects, as well as encouraging the uptake of electric cars, providing seed funding to leverage businesses and community impact and supporting residents to be motivated to take action.

Our preferred option is to fully fund Te Atakura, which is included in our 5.3% average increase across 10 years.

A summary of the proposed investment in Te Atakura – First to Zero Action Plan is on pages 34 -37 of the Consultation Document

#### **Which of these options do you prefer?**

x	Fully fund the programme (Council's preferred option, \$29.9m investment)
	Low level of funding (\$18.1m investment, lower rates and debt)
	Medium investment with savings (\$25.4m investment, lower rates and debt)
	None of these options

	Don't know
--	------------

**Question 5 – Te Ngākau Civic Precinct – Council office buildings**

Te Ngākau Civic Square is the musical, creative and democratic heart of Wellington but it has significant resilience challenges.

While we are still working through finalising the Framework for the Square, a specific decision is required in this Long-term Plan with respect to the future of the Council office buildings - the Municipal Office Building (MOB) and the Civic Administration Building (CAB).

As the two buildings are connected, and have similar resilience issues, it is important that the future of them is considered together.

Our preferred option is to demolish and rebuild the MOB and CAB buildings in partnership with private investment through a long-term ground lease for the site.

Combining a MOB and CAB development would enhance this opportunity and significantly decrease the need for additional Council borrowing and ratepayer funding to address these impaired buildings.

A summary of the proposed approach to developing of Te Ngākau Civic Square on pages 38 -41 of the Consultation Document

**Which of these options do you prefer?**

x	Demolish and site developed through long-term lease (Council's preferred option)
	Proceed with base build proposal for public purposes (higher debt and rates)
	Retain and seek to repurpose (higher debt and rates)
	Sell to support development (no debt or rates impact)
	None of these options
	Don't know

**Question 6 –Fixing the Central Library**

Wellington's much-loved Central Library was closed in March 2019 following an engineering assessment saying that the way the floor was designed presented a high level of potential failure in a significant earthquake.

After hearing from Wellingtonians in the 2020 consultation, Council agreed to recommend the high-level remediation option to be part of this plan. This option makes the building resilient to future shocks and supports our ability to deliver an adaptable modern library service, while preserving the buildings heritage. It also allows us to mitigate some climate change impacts in the future.

Now there are choices about how to fund the \$187.4m library remediation project, and when the project should take place.

The preferred option, includes the Council agreeing to temporarily breach its debt limit of 225% to ensure the library can be refurbished in the original timeframe and remain in public ownership. Our debt level will remain at 225%, and Council has agreed to accept the breach in the first three years of this plan. This breach will be mitigated by any capital

underspend being used for the library project rather than on new projects. Our debt level will be back below our limit by year 4 – 2024/25.

A summary of the proposed investment to fund the fixing of the Te Ngākau Civic Square Central Library is on pages 42 -43 of the Consultation Document

**Which of these options do you prefer?**

	Strengthen now by temporarily exceeding debt limit (Council’s preferred option additional 0.79% rates increase)
	Council to strengthen Central Library later (complete in 2028 instead of 2025, additional 0.83% rates increase)
	Strengthen now by increasing rates further (additional 1.79% rates increase)
x	None of these options
	Don’t know

**Question 7 – Reducing sewage sludge and waste**

One of the largest waste categories at the Southern Landfill is wastewater (sewage) sludge. This accounts for about a quarter of the waste that enters the landfill.

Through Te Atakura (our Zero Carbon Plan) and our Regional Waste Minimisation and Management Plan we have formally committed to reducing carbon emissions and reducing waste by a third. Minimising wastewater sludge is a necessary first step to achieving these objectives.

We need to break the link between the Southern Landfill and wastewater sludge and stop pumping sludge across the city, as 2020 highlighted the serious resilience issues and the significant consequences of failure.

Our preferred option is to invest in a sludge minimisation programme through another funding source. This means the project would not be funded by Council, but if it is funded through a Special Purpose Vehicle, a levy of about \$70-\$100 per year will be charged to each ratepayer.

A summary of the proposed investment in sludge and waste minimisation is on pages 45-47 of the Consultation Document.

**Which of these options do you prefer?**

	Sludge minimisation through alternate funding (Council’s preferred option, \$147m-\$208m capital investment funded through a levy, no additional rates increase)
	No change in current practice (no change to investment, rates or debt)
	Invest in technology at Southern Landfill (\$86m-\$134m capital investment and additional 0.39% rates increase)
	Sludge minimisation – through Council funding (\$147m-\$208m capital investment, above debt limit, and additional 1.65% rates increase)
	None of these options
x	Don’t know

### **Question 8 – Feedback on these decisions**

Do you have any comments you would like to provide around why you selected your preferred option to any of these decisions, or why you don't support any of the options we proposed? If yes please indicate what decision/s you wish to provide comment on.

	Investment in three waters infrastructure
	Wastewater laterals
	Cycleways
	Te Atakura (Climate change)
	Central Library
	Sludge and waste minimisation
	Te Ngākau funding for future work
x	None of these

If this space is not adequate for your comments, please feel free to attach supporting information to the submission. Please be clear what decision you are commenting on.

### **Question 9 – Proposed 10-year budget** (See section “what this plan will cost” p13. of the Consultation Document for details)

Our draft budget, has an average rates increase for the average ratepayer of 5.3 percent after growth across the 10 years of the plan. We also propose setting a limit on how much we can raise from general rates - \$465m for each year across the first 3 years of the plan and, \$630m each year across years four to ten.

The first year of the plan has a rates increase of 13.5 percent (after growth) and there is an average of 9.9 percent (after growth) over the first three years. This is higher than previous plans because of the **key challenges** faced by the city including infrastructure, housing, earthquake strengthening and COVID-19 impacts. Therefore, we now require a step up in the level of rates we charge. Details of the key challenges are on page xx of the **Consultation Document**.

Our proposed budget also represents our highest ever level of capital investment in Wellington. It addresses the need for increased investment in our three waters infrastructure and transport network and seismic strengthening of key buildings, along with making progress against all our other priority community objectives.

Our debt levels for this plan, including the value of uninsured assets, range from 134 percent to 239 percent of our annual income. Our proposed limit is 225 percent.

We think this is a sensible limit on our borrowing to ensure that the impact on affordability of rates is maintained and leaves enough 'headroom' to ensure we can repay our debt, and respond to expected but unfunded and unexpected future events and opportunities.

**Do you support the proposed 10-year budget?**

	I strongly support the proposed budget
	I somewhat support the proposed budget
	Neutral
	I somewhat oppose the proposed budget
x	I strongly oppose the proposed budget
	Don't know

**Question 9.a) – If you stated in Question 1 that you are neutral or do not support the proposed budget. Do you support increasing or decreasing spend?**

	I support increasing spend in the current budget
x	I support decreasing spend in the current budget
	I support keeping the budget the same but with some changes
	Don't know

**Question 10 – Any other feedback on what is proposed for the 10-year Plan**

**Future decisions**

The Consultation Document also signals other decisions that are coming up in the time of this plan, but that we do not have enough information on at this stage for a detailed consultation.

**Other projects**

We also have many other services and projects detailed in our Statements of Service Provision.

**Council Fees and charges**

We have also made changes to some of our fees and user charges. More information on these are available on our website: <https://wgtn.cc/ltp> and available at our libraries and service centre.

**Do you have any comments you would like to provide about the big decisions, fees and user charges changes, other future issues or any other general feedback on our 10-year plan and budget?**

Suggestion of adding another tier to the Building Warrant of Fitness Annual Certificate System. Allowing for 2 – 4 systems and 5 – 10 systems, with an appropriate fee structure, rather than the current band of 2 – 10 systems.

The proposed increase is 256% for 2 – 11 systems from \$163.50 to \$418.56. A good number of buildings with fewer than 5 systems would be small

commercial/residential combination buildings giving purpose and a sense of community to suburban and heritage centres.

Compliance requirements are mainly to do with exit signage and fire systems. The City Council's administration of these requirements is not complex. The building owner already has to commission another provider to sign off annual systems compliance which is on-forwarded to WCC.

Thank you very much for your submission!

TO: WCC

RE Long term Strategic Plan 2021

I attended the Te Papa briefing event.

**I seek that WCC spending should be reduced and that all that should be considered is a small COL increase on rates ( property tax). Existing spending needs to be reduced by more competent Management, structures, organisation and Policy and other revenue/ funding achieved**

1

I

- submitted previously on district scheme, annual plans etc
- read and tried to digest the "alleged" big picture information provided
- was disappointed at lack of information and **no information about evaluating previous plans and WCC ability to deliver**

-am surprised at the focus on money in relation to long term plan and the complete lack of detail of the work required and who will do it let alone consideration of the strategic problems of WCC being captured by service providers, consultants, contractors and big coys.

There also seems no untangling of the web of organisation- other councils including greater wellington and the relations with the port, wellington water, bus coy, wellington electricity, the at least 5 Iwi, transpower, Ferry coys, NZ rail, university, schools, govt agencies and depts Airport coy, TRANZIT, NGO and how WCC is constrained supported,.... .....and potentially a doer, influencer, mover and shaker?

I thought the focus of LTP would be on aspiring goals not stab in dark costing/ projections on option ( when did WCC get a \$ prediction correct-on target? ) and the timeline for achievement and what the pressures might be..

There seems to be no statement of the goals, the things, milestone to be achieved by 2031. and the steps proposed being considered to get there, and beyond, and what threats and opportunities are anticipated.... **not SMART.**

**Its all about the spend. WCC has become merely a broker and and client or customer of companies and consultants .While it informative and important to follow the money it does not seem possible for Councillors let alone residents to really get a grip on where the what proposed spend creates and has it been handled competently.**

2

Step one seems to me to would be evaluate the previous LTP and how annual plans and operational performance has occurred and an appreciation and

analysis of anticipated contextual forces.( e.g. refugees, covid, homelessness, growing gap between rich and poor, rising sea level, more storms, acidification of sea, droughts floods, over emphasis on earthquake proofing etc),

3

I have experienced a significant rates increase - at least 30% solely thru alleged increase in assessed rateable value of property( which in fact has really depreciated) and gather there could well be a further 13.5% increase on top of that. **That was not what was identified in the election comments of this council.**

4

I seem to see proliferate WCC spending and bungling around me.

Over the last 40 years I have had lots of interactions with WCC officials including environment Court, industrial negotiations and organisational development and via community and environmental projects.

As a casual observer of WCC operations, I believe theres lots of scope to reduce spending especially spending not related to recognition of resilience, the core business of infrastructure and facilitation role of WCC with business and community

**There does seem to be lots of unnecessary even wasteful spending and unfocused staff time and inefficient use of resources and failure to honour prior plans election comments, targets budgets etc .**

The councillors it appears are at mercy of the chief executive( the only employee of the councillors) and an unaccountable overpaid and bungling management team with too many dysfunctional "business units" , the legacy of stupid decisions of the past, and too much spending on spin, talk fests, consultants etc

Several examples spring to mind in my little world of unnecessary spending (if we look at a spending - have a money focus) ,

+. \$78000 on rainbow crossing,

+\$150,000 on bond st installation

+\$50,000 on vertical garden

+ \$100,000 on mountain bike tracks in Aro Valley

+\$160000 revamp Aro playground that is not even up to safety standards and it imported from Scandanavia, When WCC meant to be buying local (???) ,

+\$45000 Spraying ( it was a a spray free park ) temp fencing reseeding etc of aro park

And

Complete replacement of footpaths kerb and channel, camber reducing narrowing and resealing (The un requested and arguably unnecessary - theres other priorities)

in Holloway road that took over 12 months and no one has been able to respond to my several request for information ? re costing ( more than \$150,000 I would estimate. )

Surely someone can identify the direct costs and the drivers\policy /plan/requirements that deemed this necessary?

What were the contract and v invoices arrangements with the contractors? ( the prior notified and consulted plan published on WCC website indicated

only half of the footpath would be replaced and the road would be asphalted not chip sealed).

That's without looking into other areas, legal bill, support for business, grants, subsidies, selling off assets, international advertising....

**If the past indicate the future then I see nothing to indicate this LTP is useful other than to get a "feel" on a narrow range of the wcc business - its neither genuine consultation nor an aspirational 10 year and beyond strategic plan**

6

There is also at same time the push to plan, on coping with 900000 new resident ( WCC published research indicate less than 20000 expected in next 10 yrs) and this constant focus and push for growth does not seem to be necessary sensible or supported by evidence.

7

I believe I submitted the short form response, however there is no acknowledgement received or copy retained when done on line. Theres no feedback or dialogue The purpose of consultation as I understood from community, environment and industrial precedents is that it requires the provision of information, dialogue between those affected and the decision makers with a view to have a negotiated agreement on way forward.

I do not see how current consultative arrangements such as this or growth plan annual plan district scheme review, enact those requirements I supported most of the preferred options on the narrow range of big issue/decisions. I did not support that on basis of the costing which appeared to me to have no indication the guesstimates on costing are real  
**There was nothing about what needed to be changed in existing priorities current plans , let alone consideration of were prior plans useful .**

8

I am concerned with some of the rationale  
i.e.

spending on cycle ways as the great and major way to address climate change - theres many other ways to do that and cycle ways alone will not address this.

Seems very narrow way of examining waste especially sludge from existing Moa point, sewage treatment land fill, waste reduction, (gentrification of urban environments is significant fossil fuel user and high waste 75% of landfill is from demo and construction)

No mention of reducing packaging sludge, up cycling repairing gleaning intervening in " market " to limit pollution throwaway and frivolous products in times of austerity and crisis.

What will happen to all WCC petrol and diesel vehicles, let alone the communities when past use by date let alone what to do with old batteries non electric bikes

( every day theres at least one frequently more than 5 WCC vehicle often

large fossil fuel engines, in holloway let alone the Downers Fulton Hogan, why ??? )

What strategy is there to reduce need to travel transport people goods etc (I am amazed at the arrogance of the 100s mountain bikers who converge on aro valley with their vans big utes in their lycra - they drive miles to met here and disturb the residents human and otherwise and seem to think they are environment friendly conservationists and healthy( look at acc stats and no. accidents injuries and emergencies- I think not.)

**Where there is a goal stated it does not seem to stack up with what options being considered**

10

In looking at some of the options I thought some useful creative strategy alternative ideas might be

- to decommission\demolish all the at risk buildings, and re purpose materials and space to provide accommodation, gardens, parks
- use rubble to extend airport runway, seawall and cycle ways,
- have a departure and arrival fossil fuel levy at airport
- rates relief for composting toilets
- rate accommodation on basis on water useage and no of toilets occupants
- ,make city cycle, scooter taxi buses and service only
- all cycles registered and pay a wcc / acc levy same as motorcycles,
- all riders must be licensed
- explore revenue options other than property tax
  - i.e . takeover supermarkets , empty office building , petrol diesel tax
- get rid of logging export at port and car import relocate cook st ferries to log port,
- develop smaller scale localised sewage treatment,
- don't rebuild central library invest in satellite libraries, staffed by local people with skills and knowledge to assist and free wi fi terminals take home digital devices etc that also provide banking govt services like old post offices
- Install generators in storm-water and sea wall+ More wind turbines and solar panel
- rates relief or incentives subsidies assistance for businesses and accommodation that are zero waste
- Go way of SIT/Ingill-fees free subsidised accommodation\services for students
- ferry in interim from Petone and Ngarunga and build tunnels to airport.
- Eliminate commuting by relocating business and residences (most of the cities cleaners, support, service workers come from outside the city
- amend district scheme to enable infill housing especially eliminate requirement to provide off st parking and side yards .

.....many more options could be raised debated and set out in a plan that is

**SMART** Specific Measurable, Achievable, Realistic and Time bound

I'm disappointed at this stage of long term strategic plan development its s all about the proposed spend. When the proposed plan is put together at conclusion of, end of the dialogue, and greement reached i hope its the real

deal- It Describes, Explains, Aims and has Legs/leverage

and recognises WCC has become merely a broker and client or customer of companies and consultants .

**I do not accept the pie has to be larger- residents need to be careful and look at the ingredients, who doing the apportioning and cut it more wisely -to do that we need to be clear and have some consensus about what residents seek and will do!**

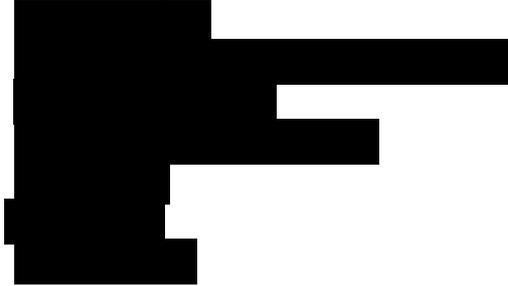

*ma whero, ka oti te mahi*

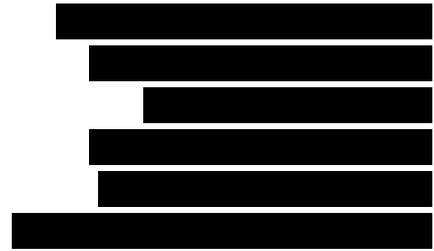

*ma pango,*

About Cycle Wellington	9

## Concerns regarding the Long-Term Plan engagement process

1. We don't understand why cycling has been identified as a key issue to consult Wellingtonians on. The 2018 LTP consulted on essentially the same decision and was supported by 65% of respondents.
2. We note that multiple options put forward for the cycleway program are clearly inconsistent with existing council policies committing the council to delivering cycling infrastructure, such as the Cycling Policy (2008), Wellington Towards 2040: Smart Capital (2015), Wellington Urban Growth Plan 2014–2043 (2015), Wellington Cycleways Master Plan (2015) and Te Atakura: First to Zero (2019).
3. In our opinion the LTP consultation document fails to identify and explain the consequences of the presented decisions on cycling as it omits information regarding the financial benefits of investing in cycling infrastructure.
4. In our opinion the LTP consultation document fails to identify and explain the consequences of the presented decisions on cycling and Te Atakura as it omits information regarding the effects on emissions of each option.

## Cycling

### **Investing in Wellington's future**

5. We support option 4 as the only option presented that has a chance of delivering a fully connected network by 2031. The council's preferred option exposes the cycleway programme to the risk that it will be financially constrained, and fails to invest adequately in the first three years of the plan.
6. Delivering a connected network is key. Currently cyclists in Wellington have some access to safe, separated cycling facilities such as in Island Bay, or Rongotai Road, but these short lengths do not connect to many peoples destinations meaning that many potential cyclists will not use them. Miramar to the city via Cobham Drive and Evans Bay, and the future Cobham drive crossing will deliver Wellington's first example of a section of connected network. The council's preferred option will not deliver the level of connectivity required to facilitate enough modal shift to meet target emissions reductions. This first example needs to be replicated across the entirety of Wellington City by 2030.
7. The council has an ethical responsibility to Wellingtonians to take action on climate change. The council has a mandate from Wellingtonians to take action on climate change. Not investing adequately in cycling infrastructure as a key measure to reduce emissions potentially exposes Wellington City Council to legal risks. In the event that legal action becomes likely, Cycle Wellington would look to be a part of it.
8. Cycling infrastructure is an investment that will deliver incredible returns for

Wellington ratepayers. Chapman et al. (2018)<sup>1</sup> found that investing in active travel interventions in a New Zealand context delivers a benefit/cost ratio of over 10:1.

9. The city council's own website<sup>2</sup> cites Auckland research showing that for every \$1 spent on cycle improvements, more than \$20 is saved due to fewer road traffic injuries, reduced emissions, health benefits of increased exercise, and savings on fuel. We believe that not maximising the potential returns on this investment is a missed opportunity.
10. With a 20:1 return on investment on cycling infrastructure and education campaigns the lost benefits of not investing in Option 4 (compared to Option 3) are over \$2B. It is important to also acknowledge that these are only monetary figures that symbolise avoided costs. It is difficult to quantify the full benefits of lowering car dependency by enabling more people to lead healthy, active lifestyles. The rewards of doing so are diverse and complex, but the co-benefits are a proven means of significantly improving overall wellbeing and population health.
11. The proposed budget relies heavily on Let's Get Wellington Moving to fund and build key parts of the network. We are concerned that if LGWM fails to deliver key routes then the council could be required to significantly reprioritise its delivery schedule and not complete its planned schedule of projects. Providing an increased budget gives more leeway to deliver projects in this eventuality.
12. The City Council has an extremely poor track record of implementing and delivering on cycling projects. Waka Kotahi's 2021 Investment Audit Report – Technical and Procedural Audits of Wellington City Council shows that Wellington constructed only 16 km of cycleways between 2010 and 2020. In the report WCC was graded as “significant improvement needed” for road safety. Cyclists and pedestrians are over-represented for serious injuries and deaths on the road and WCC should be pushing harder to improve safety for all road users.
13. We are not confident that this issue is addressed adequately in the long-term plan given its continued focus on a schedule of expensive projects with long delivery times.

### **Increasing deliverability**

14. When lobbying the council for cycling projects we have been constantly told that the council does not have the financial capability to deliver them. We are not sure why we are expected to believe this is no longer a key limitation. WCC is surely quite familiar with the constraints placed on projects by limited funding.
15. This is most evident in the cycling minor works budget. Option 4 does not provide any increase to this budget over previous years despite the rise in demand for cycle parking and other minor works. We think this budget should be at least doubled from it's proposed amount in order to deliver more improvements that are quick and easy.

---

<sup>1</sup> Chapman, R., Keall, M., Howden-Chapman, P., Grams, M., Witten, K., Randal, E., & Woodward, A. (2018). A Cost Benefit Analysis of an Active Travel Intervention with Health and Carbon Emission Reduction Benefits. *International Journal of Environmental Research and Public Health*, 15(5), 962. doi:10.3390/ijerph15050962

<sup>2</sup> <https://wellington.govt.nz/parking-roads-and-transport/transport/cycling/we-support-cycling/facts-and-figures>

16. We're concerned about the inclusion of tactical "innovating streets" style projects into the minor works budget, as this new category of works will put further strain on an already limited budget.
17. We think cycle lanes could be delivered quicker, easier and cheaper with the addition of a dedicated fund for this type of work. We think the scale needed to deliver a connected cycle network over the next decade requires a well-resourced and dedicated fund. This fund would also deliver public space improvements outside of cycling such as low-traffic neighbourhoods and parklets.
18. The Brooklyn cycleway is an excellent example of how WCC can deliver cycle lanes quickly and cheaply, as well as make adjustments on the fly to things that aren't working. We think that the council should focus on implementing similar projects across the city before investing in more long-term changes.
19. The council has made it harder to deliver cycleways by focusing on creating new space for cycling rather than reallocating existing road space. Prioritising on-street space for moving people over the storage of private vehicles can be done quickly and cheaply, improving on the councils capacity to deliver projects.
20. A lack of commitment and vision from WCC is the prime obstacle to progress. Rather than trying to cater to a minority of residents that make a lot of noise, WCC needs to recognise it's responsibility to drive change and provide leadership.
21. In order to consult on and design cycling projects it is essential that the council hires and invests in staff. Council staff are overworked and this leads to loss of talent and failure to deliver to an appropriate standard. WCC should increase its operational expenditure to improve in this area.
22. Additionally, the council needs to send a strong signal to the private sector that it is committed to a serious and long-term investment in building cycling infrastructure. This will enable private companies to invest in the employees and equipment needed to deliver projects.

### **Prioritisation of routes**

23. Cycling infrastructure in Wellington to date often focuses on commuting journeys. These journeys are the most visible today and do need support. But from an equity point of view, commuting journeys should not be the only focus for the cycling network.
24. The city needs a cohesive plan that improves cycling on all streets, not just key corridors. This means that a comprehensive city-wide safer speeds program, traffic calming and low-traffic neighbourhood program are key elements to a safe cycling network in the same way as the identified cycling corridors.
25. There's also a danger of catering to existing cyclists instead of potential cyclists. For a more equitable approach the network should take into account the needs of those currently most excluded. One of our supporters said, "put the last first' in your decision-making and you build a genuinely more equal city.'

26. We support prioritising investment in cycling infrastructure that supports journeys by people with disabilities. Cycle Wellington is not currently able to best represent the interests of the disabled community so we support consulting disability advocacy groups around the prioritisation of projects.
27. We support prioritising investment in cycling infrastructure that supports children to travel safely to and from school and other activities. We are disappointed that a network of cycle lanes in the northern suburbs has been given a lower priority in this LTP than it was previously. The northern suburbs network would allow over 2500 children to cycle safely to school at Newlands College, Newlands Intermediate and four primary schools in the area. Encouraging children to travel actively reduces traffic congestion and improves children's independence, physical and mental health, and decision making, risk assessment and road safety skills.
28. We support prioritising investment in cycling infrastructure that supports journeys made by women. Women are more likely than men to make multi-stop trips, cycle outside traditional commuting times, and ride with children as passengers.
29. We support prioritising investment in cycling infrastructure in suburbs with higher levels of deprivation. This should mean a prioritisation of routes connecting suburbs such as Strathmore, Berhampore, Newtown, Johnsonville and Newlands.
30. We support prioritising investment in cycling infrastructure in areas with high levels of car-dependency. Suburbs such as Churton Park and Strathmore have the highest levels of car usage in Wellington<sup>3</sup>. The high use of cars by residents in these areas has run-on effects across the whole city, contributing to congestion and creating unsafe streets for people walking and riding bicycles. Residents in areas of high car-dependency often have little choice of alternate travel modes and the council needs to support mode-shift in these areas.
31. Previous consultations on other matters have brought up the issues around wheeled devices operating in pedestrian spaces. We supported making the use of bicycles by adults on footpaths legal only as a temporary safety measure while the council implements a safe network for cycling. We acknowledge that the use of e-scooters and bicycles in pedestrian spaces adversely impacts on the use of those spaces by people walking and other vulnerable user groups such as disabled persons, the elderly, and young children. Our position is therefore that WCC has an obligation to provide space off footpaths for bikes and scooters as rapidly as possible.

### **Holding Wellington City Council accountable**

32. The council has engaged with Wellingtonians about improving the Island Bay Cycleway and building Newtown Connections. It is essential that WCC delivers on these projects or it will further lose Wellingtonians' trust. This harms engagement and the democratic process.
33. The draft statement of service provision includes a single performance target for cycling, and does not set a target. We think WCC should set a target number of kilometers of cycle lanes to deliver as well as a modeshift and safety targets. These

---

<sup>3</sup> 2018 Census data

targets should be ambitious. We also think it's key that the council sets satisfaction with the cycling network and cycle network condition as targets in the same way it does for walking.

34. Previous LTPs included a breakdown of cycling capital expenditure by project. The removal of this data is a reduction in WCC accountability and transparency.
35. WCC has a track record of allocating funding for cycling that then goes unspent. In the last LTP more than \$16 million was assigned for Newtown Connections, the Parade Upgrade and Miramar networks. A commitment was made to invest this money but Wellingtonians are not told what happened to this funding and why such projects now need to be reallocated funding in this LTP.
36. We expect that when the public is consulted on cycling expenditure through the LTP consultation process that the funding proposed is actually spent on cycling.
37. Therefore, we believe WCC should ring-fence cycling funding. This would act as a mechanism to ensure that WCC spends its cycling budget on the projects it has consulted on.
38. The cycle of promise followed by failure to deliver is a major disappointment to the many people who would like to cycle in Wellington.

## Te Atakura First to Zero (Climate Change)

39. Cycle Wellington supports fully funding the programme.
40. Wellingtonians overwhelmingly support action on climate change. In consultation on Te Atakura 92% of respondents stated that prioritising making Wellington city zero carbon by 2050 must be done "no matter what".
41. Fully funding Te Atakura is not enough. The implementation plan results in a 19.6% shortfall by 2030. In order to make up this shortfall it is essential the council provides increased funding for further measures to reduce emissions.
42. Te Atakura's Travel behaviour change action will not be effective unless the council invests in the infrastructure required to enable behaviour change. Programs such as Bikes in Schools and Movin' March are limited in their effectiveness if children are not provided with safe infrastructure to cycle to school on.
43. Te Atakura identified shared mobility options as a key action. Despite being short lived and plagued with issues, ONZO bikeshare provided an affordable mobility option that introduced many new people to cycling, and enabled mobility for low-income individuals. We think that a council-owned and run bikeshare service would deliver the same benefits to Wellingtonians. Publicly owned bikeshare services are highly successful overseas. London's public bikeshare scheme has an annual membership cost of 90GBP (172NZD) and offers free journeys up to 30 minutes, operating with a 16.9% subsidy of operating costs<sup>4</sup>. Public ownership gives the council

---

<sup>4</sup> <http://content.tfl.gov.uk/santander-cycles-transparency-to-end-of-september-2017.pdf>

the ability to finely control the service and provide easier access to certain groups (London’s scheme offers free membership to NHS employees).

44. Electric cars fail to deliver the co-benefits present with supporting cycling, such as improvements to health, safety and reducing congestion and parking demand.
45. Road transport is the largest source of emissions in Wellington. Supporting cycling is the cheapest, easiest and most effective lever the council has control over to reduce emissions.

## Investment in three waters infrastructure

46. Cycle Wellington supports the Accelerated (\$3.3b investment – higher rates and debt) option for investment in three waters infrastructure.
47. Failing to adequately maintain and repair our three-waters infrastructure has resulted in increased costs for the council, making it more difficult to invest in other critical infrastructure, such as cycle lanes.
48. Moving kerbs and making changes to stormwater infrastructure is a significant cost for some cycling projects. We think WCC should make sure that any maintenance or changes made in such infrastructure be done in cooperation with potential improvements to cycling.
49. We note that significant attention has been given to the issues arising from the poor quality of three waters infrastructure. Issues with the safety of roading infrastructure are given less attention as they are often viewed as a ‘necessary cost’, rather than an issue that can be addressed. The amount of money required to provide cycling infrastructure is significantly less than that required to fix three waters infrastructure, while the potential benefits of increased investment are likely much broader.
50. We think that the council should increase rates or take on additional debt in order to fund critical three-waters infrastructure.

## Fixing the Central Library

51. Cycle Wellington supports strengthening the library but not though the council’s preferred option of temporarily exceeding its debt limit. We think that the strengthening of the library should be funded through other means.
52. Mitigating the breach of the debt level through the allocation of capital underspend from other areas is unacceptable, as this could result in money intended for climate-mitigation projects such as cycling being reallocated to the strengthening of the Central Library. We are especially concerned about this possibility given the council’s current issues with inability to deliver on planned cycling projects.
53. Our preference would be that the council pursue an alternative option that delivers a strengthened central library through increased rates or raising the debt limit. Alternatively the mitigation of the breach could specify that it will not reallocate any underspend from the cycling budget, or other capital expenditure intended for projects intended to reduce emissions.

## Reducing sewage sludge and waste

54. Cycle Wellington supports investing in sludge minimisation as part of Te Atakura and to avoid a repeat of the recent situation that put cyclists at risk with the use of sewage trucks to transport sludge to the landfill.
55. We think that using a special purpose vehicle to deliver this project exposes it to unnecessary risks and complications when the project could more easily be funded through debt.

## Proposed 10-year budget

56. Cycle Wellington strongly opposes the proposed budget as it fails to meet the councils legal and ethical responsibilities to Wellingtonians.
57. Cycle Wellington supports increasing spend in the current budget. By increasing its investments in infrastructure the council will ensure that it is maximising the returns on investment for all Wellingtonians.
58. We believe that the council is being more fiscally conservative than it needs to be. We acknowledge the future risks posed by climate change and natural disasters, but also point out that we are in a disaster right now (pandemic) and that investing in infrastructure now is one of the best things we can do to mitigate the effects of these financial risks.
59. WCC's chosen debt-to-asset ratio is much less than the maximum allowed by the Local Government Funding Agency, and is lower than some other councils.
60. We understand the need to allow for future uncertainty, but feel that the council is being too risk-averse. We support the council lifting the debt limit more, especially as borrowing is historically cheap. This will ensure that Wellington does not miss out on the enormous physical, mental, social, environmental and financial benefits of investing in cycling.

## Other Feedback

### Other Projects

61. We oppose funding new roading projects such as Ohariu to Westchester Drive that will enable new greenfield developments. We note that this project alone has a higher cost than the entire preferred cycling option budget and yet it has not been included as part of the consultation process.
62. We oppose the council's plan to defer \$7 million on upgrading footpaths. Providing good infrastructure for all active modes is vital to achieving modeshift.
63. We oppose using lower cost treatments to achieve targeted levels of road resurfacing as poorer quality road surfaces are less comfortable for cycling. Freshly installed chip seal is dangerous for cyclists. Where separated cycling facilities are provided with high

quality surfacing, we are less concerned about the adjacent road surfacing used.

### **Council Fees and Charges**

64. We support increasing parking fees as a method of encouraging mode-shift, and compensating for revenue loss as on-street parking is reduced.

### **About Cycle Wellington**

Cycle Wellington is a voluntary, not-for-profit organisation aimed at improving conditions for existing cyclists and encouraging more people to bike more often. We advocate for cyclists who use their bikes for recreation and transport. Since 1994, we've worked constructively with local and central government, NZTA, businesses, and the community on a wide variety of cycle projects. We represent around 2,000 members and supporters.

Please accept this as my submission - I don't have time to wade through the website form.

My submission:

1. Proceed as soon as possible with light rail and other forms of public transport.
2. Keep as much space open for public use.
3. Make every public space accessible.
4. Keep Frank Kitts Park as it is, and I urge councillors and staff to read the submission by 2,000 people who took the time to say in their own word just how important this place is to us all.

Sincerely

Alana Bowman

## Submission to WCC Long Term Plan

May 2021

### Who are we:

An Association that represents the Residents in the Te Aro and Wellington Central, while recognising 'our space' is also the space used by business, workers, and visitors. This area has become the largest residential suburb in Wellington in terms of population - on the smallest land area.

### Our purpose:

To be a progressive and influential voice for our members through engagement with the appropriate public authorities to enhance the wellbeing of those living in the inner-city.

### Area of interest:

To achieve a sustainable living environment in the inner-city through adherence to UN Sustainable Development Goals, and proactively working to enhance Democratic Resilience through co-design and civic engagement.

Inner City Wellington (ICW) recognises the difficult financial situation that provides the context for the Plan.

In general, we agree with the priorities identified. However, we note that the following items are still under review and have not been factored into the plan.

- Three waters reform and water metering
- Additional LGWM investment
- Social Housing financial sustainability options
- Strategic review of community infrastructure investments
- Divestment programme

Decisions on these major issues could have significant impact for other items in the plan, so it seems somewhat pointless to focus on detail.

**ICW is concerned at the number of items where there is no budget allocated during the term of the plan but would not raise any of them above the absolute priority of fixing our infrastructure.**

We assume identification of the items in the plan means that if/as funding might become available, they will be reconsidered for allocations.

***In this submission, ICW wishes to only emphasise the following key points.***

These are:

- **Infrastructure must be the top priority, including ownership of wastewater lateral pipes and introducing technology at Moa Point to deal with sludge.**
- **We support increasing debt levels as suggested to ensure work on the Central Library can proceed swiftly as the level proposed is still within an acceptable range and is not envisaged to be maintained beyond the Library project.**

- **We support demolishing MOB and CAB - only if the footprint of any new building allows for an increase in public and green space within the precinct.**
- **ICW supports the continuation of the Building Resilience Fund (\$0.5m)**

The Building Resilience Fund provides Wellington ratepayers (owners) in potentially earthquake-prone buildings and earthquake-prone buildings with some financial assistance through the grants to progress work that determines the status of the building and feeds into the owners' decision about what action to take to comply with the earthquake-prone notice requirements. The fund is recognition by WCC that owners face substantial costs to investigate the options before the strengthening or demolition work can even begin. It recognises that some owners face additional pressures due to a priority building status. It recognises that these buildings provide homes for owner-occupiers and tenants, and commercial units for small businesses across Wellington - all an essential part of Wellington's living environment and commercial infrastructure.

That the fund is under-subscribed is largely due, in our view, to the narrow criteria of activities that will be funded. Many multi-owner earthquake-prone apartment buildings have completed the eligible activities but are still facing additional costs to get to a position of making a decision or beginning the work. ICW requests that the Council committee and Council reconsiders the officers' recommendation for an expansion of the criteria in December 2020. ICW believes this would increase the number of applications.

ICW continues to lobby central government for a review of the legislation with respect to multi-owner residential buildings to review the policy basis for the compliance burden placed on home-owners. This is increasingly urgent given the review of the National Seismic Hazard Model due to be completed mid-2022, the likelihood of changes to the building standard as a result, and that there is no certainty being given by the Minister that strengthened buildings will not be impacted by new, and higher, standards. This uncertainty has implications for WCC's spatial planning and densification direction.

**ICW continues to lobby central government for an effective implementation advisory and support service for those owners progressing projects and financial recognition of the scale of the costs incurred by owners to comply with legislated requirements retrospectively applied to compliant buildings. ICW calls on WCC to support these actions.**

ICW thanks you for the opportunity to present this submission and advises we do not wish to make an oral submission.

Yours sincerely

**Rev Stephen King**

## Submission: #1956

**From:** [Councillor Diane Calvert](#)  
**To:** [REDACTED]  
**Subject:** FW: Proposed increase in weekend parking fees  
**Date:** Tuesday, 11 May 2021 4:03:10 pm

---

Hi

Could you add this as a submitter?

Diane

**From:** Gayl and Mike Gaukrodger [REDACTED]  
**Sent:** Sunday, 9 May 2021 11:01 PM  
**To:** Councillor Diane Calvert  
**Subject:** Proposed increase in weekend parking fees

Hi Diane

We've just seen your update in the Independent Herald about the proposed changes to Council's 10 year plan.

With consultation finishing tomorrow, we don't have time to complete a full submission. However, we do want to raise our concerns about the proposed increase in weekend parking fees.

Wellington still needs to regain considerable ground to return to its pre-Covid vibrancy and we feel that retailers and hospitality need all the support they can get. This proposed increase in parking fees can only be a deterrent to visitors to the city, which will contribute further to Wellington's demise.

While we support the use of public transport, for a range of reasons it is not a realistic option for many in the community. Also, with reduced services for public transport on weekends, it is often difficult getting to and from the city at the times you want or need to be there.

In contrast, Petone has a great cafe culture and Queensgate has great shopping and both offer free parking. We would be very sad to see an increase in weekend parking fees increase the exodus from the city towards the Hutt Valley.

We would be grateful if you could make our views known to the Council.

Kind regards

Gayl and Mike Gaukrodger

## Generation Zero's submission on Wellington City Council's Long Term Plan

1. This document is Generation Zero's submission on Wellington City Council's proposed Long Term Plan (2021-31).
2. Generation Zero would like to speak to their submission at the relevant Council meetings.

### **WCC's obligations under Te Tiriti o Waitangi must be met**

Wellington City Council has an obligation to uphold Te Tiriti o Waitangi. We think the Long Term Plan should incorporate actions to uphold these obligations.

### ***Our recommendations - meeting WCC's obligations under Te Tiriti***

Generation Zero recommends that WCC:

3. Continues to implement the 'Investment in Partnerships' programme but consider whether \$5 million in Years 1 and 2 of the plan is sufficient given the significant issues facing Wellington.
4. As part of the 'Investment in Partnerships' programme:
  - o identifies ways it can co-govern with mana whenua
  - o identifies how it can continue to strengthen its existing MoU with mana whenua and Māori strategies (Te Taurapa Strategy and Te Tauihu Te Reo Māori Policy)
  - o identifies ways it can decolonise Wellington
5. Implement the actions identified in the 'Investment in Partnership' programme as soon as possible and seek additional funding through Annual Plans and Long Term Plans when required.
6. Commit to establishing a mana whenua lead teams who will engage with mana whenua and Māori.
7. Provides specific funding and support to ensure mana whenua and Māori aspirations and concerns are reflected in the District Plan, and any other plans that are likely to be required under a reformed resource management system.

### ***Why WCC's obligations under Te Tiriti o Waitangi must be reflected in the LTP***

8. Wellington City Council has an obligation to uphold Te Tiriti o Waitangi, act as a Treaty partner, and to commit to decolonisation. As a Council WCC needs to take a leadership role in this and bring the community along with it.
9. We recognise that WCC has already taken steps to improving Māori representation in Wellington by establishing voting rights for mana whenua on committees and considering the establishment of a Māori ward. However, we think this is the tip of the iceberg and further work is needed.

10. We want to acknowledge that these recommendations were not developed with input from mana whenua so should be subordinate to those made by them

## **WCC must increase debt levels to address the issues facing Wellington**

### **Recommendations - increasing debt levels**

Generation Zero recommends that WCC:

- Increase its self imposed debt levels to 300%, the maximum allowed by the Local Government Financing Agency.
- Identifies ways this debt can be paid off by the community more equitably. This may involve reviewing the rating system and advocating for changes to legislation.

### **Why increasing debt levels is critical**

- Wellington City Council will need to borrow more money to provide the level of investment required to address the critical issues facing Wellington. This will require WCC to increase its self imposed debt limit to the maximum allowed by the Local Government Funding Agency.
- Borrowing now makes financial sense as low interest rates will reduce the interest repayments in the short term.
- If the debt limit is not raised, critical projects will have to be delayed. Delaying projects will make issues worse and make them more expensive to address in the future. This will push costs onto future generations who are already facing significant financial burdens including unaffordable housing and debt.

## **Decarbonising Wellington's transport system**

### ***Recommendation on transport (general)***

Generation Zero recommends that WCC:

11. Reduces funding for roading projects that will lead to an increase in traffic and promote greenfield development.
12. Increase parking fees in the Central Business District but provide relief to people who have to park in it for functional reasons (disabled people, people who work in the CBD and live outside WCC).
13. Does not defer footpath upgrades.
14. Investigate ways it can improve the safety and accessibility of pedestrian spaces in Wellington, particularly in the CBD and Golden Mile.
15. Commit to doubling the small projects fund to creating dedicated funding for small projects that make streets safer and more attractive for pedestrians and other users of active transport.

### ***Recommendations on cycling***

Generation Zero recommends that WCC:

16. Adopts Option 4 (accelerated full programme).
17. Update the Cycleway Rollout Plan for Wellington so that it:
  - Identifies targets for cycling usership in Wellington.
  - Identifies what cycling projects will be delivered over the next 10 years and when they will be operational.
  - Prioritises cycleways project that support journeys for children, disabled people and other vulnerable users
  - Identifies how cycleways will maximise safety for its users and pedestrians, including prioritising separated cycleways and improving visibility.

### **Why decarbonising Wellington's transport system is critical**

18. Transport accounts for over 50% of Wellingtons emissions so should be a key focus for reducing Wellington emissions. Investment in active transport is critical to encourage people to move away from private cars. Delaying spend will not result in a decrease in emissions and will further entrench existing behaviours.

### **Upgrading Wellington's three waters services to ensure it meets current and future demand**

#### ***Generation Zero recommends that Wellington City Council:***

19. Commit to Option 3 Accelerated investment.
20. Develop an Asset Upgrade and Construction Programme that will identify investment must be prioritised over the next three years.
21. Commit to working with Central Government, Water New Zealand and other industry bodies to improve the capability and capacity of the three waters sector.
22. Commit to making a decision on water meters in the next financial year.
23. Commit to investigating ways WCC can better promote the adoption of good practices such as WSUD and Structure Planning and implement these through relevant policy.

### **Why upgrading three waters services is critical**

24. It is clear that WCC needs to invest more in its three waters services (water, wastewater and drinking water) to reduce the number of incidents and ensure the city can continue to grow.

25. Wellington's three waters infrastructure has suffered from decades of under investment and deliberated decisions have been made in the past not to adequately service infrastructure.
26. Council backing off from significant investment will lead to an increase in incidents occurring, and an increase in cost to upgrade infrastructure in the future.
27. In addition to investing more into the delivery of three waters infrastructure council should also consider how it can improve the management of three waters services and ensure the impact of future growth in it can be minimised.

### **Te Atakura should be fully funded and WCC should also support adaptation planning and community climate action**

#### ***Recommendations - Te Atakura and climate action***

Generation Zero recommends that WCC:

28. Commits to fully funding Te Atakura over 10 years covered by the Long Term Plan.
29. Commits to developing a Climate Adaptation and Managed Retreat Plan in partnership with mana whenua. This Plan must identify how Wellington will respond to the pressures climate change will place on Wellington and be developed with input from marginalised groups and the community.
30. Commits to co-learning with the community on climate mitigation and adaptation
31. Commits to supporting community initiatives to reduce climate emissions such as composting and gardens.

#### ***Why funding Te Atakura and climate action is critical***

32. If Wellington is going to meet our target of being net zero by 2050, we need to start taking ambitious and urgent action now. Climate change is just starting to impact Wellington and these effects will only increase in the next few years. To ensure the health and wellbeing of our people and planet, we need to have a fully funded and ambitious plan in place now to eliminate our carbon emissions and adapt to the effects of climate change.
33. For this reason, we support Wellington City Council fully funding their carbon plan, Te Atakura - First to Zero.
34. We also want to acknowledge that achieving an equitable zero carbon city cannot occur without working with mana whenua. We believe the council must prioritise partnering with mana whenua in the implementation of all stages of Te Atakura, and ensure that we transition to a zero-carbon society in a just and equitable way.
35. Partnership with mana whenua is also an essential part to adapting and managing the impacts of climate change. We want the council to partner with mana whenua to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan

must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise.

36. We need to start planning today to ensure the wellbeing and safety of our community, and we need to work with the community to do this. We want the council to establish a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change.

### **The central library must be restored, support for pop-up libraries should also continue and council should expand the community spaces it provides**

#### ***Recommendations - libraries***

Generation Zero recommends that WCC:

37. Adopts Option 1 for the respiration of the central library
38. Continues to support pop-up libraries and digital services.

#### ***Why the central library must be restore and pop-up libraries should be supported***

39. Libraries are a key place for the community in Wellington and this service should be restored. Pop-up libraries should continue to be supported as they increase the reach of Wellington's library services.

#### ***Recommendations - community spaces***

Generation Zero recommends that WCC:

40. Considers how it can provide 'third spaces' in Wellington that provide spaces for people to use, at no cost in Wellington.
41. Considers how it can support community gardens and composting in Wellington.

#### ***Why Council should expand the community facilities it provides***

42. Third spaces (places other than home or work) are important for creating a liveable city that supports health and wellbeing.

### **Funding to Wellington Airport must be stoped and WCC should consider options to divest from the Airport**

#### ***Recommendations - Wellington Airport***

Generation Zero recommends that WCC:

43. Does not provide any funding or grants to Wellington International Airport over the next three years, even if it does affects its shareholdings.
44. Consider the benefits of divesting from the Airport and using the funds to invest in local businesses championing low carbon products and services.

#### ***Why Council should provide no funding to the airport and consider divestment***

45. The Airport is a significant source of emissions and WCC should not support projects that will lead to an increase in emissions from the airport. This funding can be used for other purposes that promote a reduction in carbon emissions and community wellbeing.
46. Wellington Airport has felt entitled to funding and grants in the past and WCC needs to challenge this entitlement. They do not owe the Airport anything.
47. Divestment from the Airport presents both benefits and risks and we think it is time Council considered these, especially given that they have committed to reducing carbon emissions.

**MASSEY AT WELLINGTON STUDENTS' ASSOCIATION INC.**

**A submission prepared by Massey at Wellington Students' Association (MAWSA)**

**on the WCC Long-Term Plan 2021**

**10th May, 2021**

**1. Introduction**

Massey at Wellington Students Association represents approximately 3,000 students studying at the Massey University Wellington Campus. MAWSA agrees with all the WCC preferred options for each decision (bar preferred option for Decision 6: Funding the Central Library strengthening and upgrading). We believe that each decision needs to be executed in the best way possible to make Wellington a well functioning, vibrant city for our students.

In this submission we will be commenting on Decision 3: Increased investment in cycleways, Decision 4: Implementing our Te Atakura, First to Zero action plan and Decision 6: Funding the Central Library strengthening and upgrading, although we strongly believe that each individual decision will impact our students, these particular decisions are of the most direct importance to the student population.

**2. Decision 3: Increased investment in cycleways**

MAWSA fully supports **Option 3: High investment**. The majority of cycleways in Wellington are either non-existent or unsafe. For those who do cycle, the risks are increased during the winter when the weather conditions are more extreme and daylight is limited. MAWSA believes that if there was a stronger focus toward improving conditions of the cycleways; wider and well lit, for them to be accessible and safe for students to use there would be a higher uptake of students cycling, therefore minimising pressure on the roads.

**3. Decision 4: Implementing our Te Atakura, First to Zero action plan**

MAWSA supports **Option 3: Fully fund the programme**. Students deserve a council that is fully committed to minimising climate change within our city and anything less than full funding is not acceptable in this day and age. One point that we would like to emphasise is transport within the First to Zero action plan. Increased funding towards public transport is not included in this plan, and it instead focuses more on electric vehicles. For the majority of students electric vehicles are unobtainable due to their initial cost and we believe that more emphasis should be put on public transport. Within the further decisions, MAWSA believes that improving the quality and engagement of public transport should be a higher priority.

#### **4. Decision 6: Funding the Central Library strengthening and upgrading**

MAWSA supports **Option 3 Strengthen now by increasing rates further** rather than **Option 1 Strengthen now by temporarily exceeding debt limit**. MAWSA would like to see the council making sustainable economic decisions so that future important decisions can be completed when they arise. We would also like to see the library open in 2025 rather than 2028. The central library is a crucial space for students and has been missed since 2019. It is a community hub, a secondary and primary study space for students. The library provides an inclusive, safe space for students in Te Aro to meet as there is currently no other space that provides this. Although the pop-up libraries have fulfilled their purpose, they are not suitable as a long-term option for students and the wider community.

#### **5. Future decisions**

##### **5.1. Let's Get Wellington Moving**

Students consistently rely on well functioning, reliable and safe public transport. This plan is incredibly beneficial for our students, especially to the ones who are unable to take other options. MAWSA hopes to see ongoing consultation and engagement around the decisions for Let Get Wellington Moving with those stakeholder groups particularly impacted by the current state of Wellington's public transport, including students.

##### **5.2. Affordable Housing**

Housing in Wellington is inaccessible and incredibly poor for students right now, and MAWSA believes urgent and drastic action is required to retain Wellington's student population.

Currently, our tuaria are paying excessive rent prices that go beyond financial support provided by Studylink, for houses that are poor quality. This has a direct impact on their mental and physical wellbeing, and ability to succeed at university, which is their primary occupation.

Students are being driven out of the city both for poor quality of life due to this, and because of sheer lack of space. MAWSA believes more affordable housing is needed

urgently in the CBD, both for students and other vulnerable groups who are less able to access housing.

## **6. Conclusion**

Students make up a significant portion of Wellington's population, and MAWSA cannot stress enough about how important it is to have this demographic, as well as other low-income earners, in mind when making decisions related to the Long Term Plan.

## Submission on Wellington City Council - Long Term Plan

Name:	<i>Craig Bond.</i>
Email:	[REDACTED]
Email:	[REDACTED]
Post code:	[REDACTED]
Age (optional):	[REDACTED]
<b>WCC must meet their Te Tiriti o Waitangi obligations</b>	
<input checked="" type="checkbox"/>	I think that WCC can meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards.
<input checked="" type="checkbox"/>	I think that WCC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like.
<input checked="" type="checkbox"/>	I think that each activity or project WCC commits to, must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan.
<input checked="" type="checkbox"/>	I support WCC supporting Māori to explore ways co-governance can be implemented in Wellington.
<input checked="" type="checkbox"/>	I support WCC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.
<b>Te Atakura - WCC's plan to be zero carbon by 2050</b>	
<input checked="" type="checkbox"/>	I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action.
<input checked="" type="checkbox"/>	I support WCC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise.
<input checked="" type="checkbox"/>	I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura.
<input checked="" type="checkbox"/>	I support WCC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change.
<b>Three Waters</b>	
<input checked="" type="checkbox"/>	I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city.
<input checked="" type="checkbox"/>	I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact.
<b>Debts</b>	
<input checked="" type="checkbox"/>	I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing.

<input checked="" type="checkbox"/>	I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs.
<input checked="" type="checkbox"/>	WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.
<b>Cycleways</b>	
<input checked="" type="checkbox"/>	I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency.
<input checked="" type="checkbox"/>	I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years.
<input checked="" type="checkbox"/>	I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury.
<input checked="" type="checkbox"/>	I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport.
<input checked="" type="checkbox"/>	I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles.
<b>Safe and Accessible Streets</b>	
<input checked="" type="checkbox"/>	I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.
<b>Libraries and Community Spaces</b>	
<input checked="" type="checkbox"/>	I support Council restoring the Central Library as soon as possible by adopting Option 1.
<input checked="" type="checkbox"/>	I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect.
<input checked="" type="checkbox"/>	I support Council considering how it can provide community gardens and composting facilities around Wellington.
<input checked="" type="checkbox"/>	I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.
<input type="checkbox"/>	Other:

<b>WCC must meet their Te Tiriti o Waitangi obligations</b>	
<input checked="" type="checkbox"/>	I think that WCC can meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards.
<input checked="" type="checkbox"/>	I think that WCC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like.
<input checked="" type="checkbox"/>	I think that each activity or project WCC commits to, must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan.
<input checked="" type="checkbox"/>	I support WCC supporting Māori to explore ways co-governance can be implemented in Wellington.
<input checked="" type="checkbox"/>	I support WCC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.
<b>Te Atakura - WCC's plan to be zero carbon by 2050</b>	
<input checked="" type="checkbox"/>	I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action.
<input checked="" type="checkbox"/>	I support WCC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise.
<input checked="" type="checkbox"/>	I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura.
<input checked="" type="checkbox"/>	I support WCC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change.
<b>Three Waters</b>	
<input checked="" type="checkbox"/>	I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city.
<input checked="" type="checkbox"/>	I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact.

<b>WCC must meet their Te Tiriti o Waitangi obligations</b>	
<input checked="" type="checkbox"/>	I think that WCC can meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards.
<input checked="" type="checkbox"/>	I think that WCC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like.
<input checked="" type="checkbox"/>	I think that each activity or project WCC commits to, must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan.
<input checked="" type="checkbox"/>	I support WCC supporting Māori to explore ways co-governance can be implemented in Wellington.
<input checked="" type="checkbox"/>	I support WCC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.
<b>Te Atakura - WCC's plan to be zero carbon by 2050</b>	
<input checked="" type="checkbox"/>	I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action.
<input checked="" type="checkbox"/>	I support WCC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise.
<input checked="" type="checkbox"/>	I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura.
<input checked="" type="checkbox"/>	I support WCC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change.
<b>Three Waters</b>	
<input checked="" type="checkbox"/>	I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city.
<input checked="" type="checkbox"/>	I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact.
<b>Debts</b>	
<input checked="" type="checkbox"/>	I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing.

**Submission: #1966**

<input checked="" type="checkbox"/>	I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs.
<input checked="" type="checkbox"/>	WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

### Cycleways

<input type="checkbox"/>	I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency.
<input type="checkbox"/>	I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years.
<input type="checkbox"/>	I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury.
<input type="checkbox"/>	I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport.
<input type="checkbox"/>	I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles.

### Safe and Accessible Streets

<input checked="" type="checkbox"/>	I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.
-------------------------------------	---

### Libraries and Community Spaces

<input checked="" type="checkbox"/>	I support Council restoring the Central Library as soon as possible by adopting Option 1.
<input checked="" type="checkbox"/>	I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect.
<input checked="" type="checkbox"/>	I support Council considering how it can provide community gardens and composting facilities around Wellington.
<input checked="" type="checkbox"/>	I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.
<input type="checkbox"/>	Other:

The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.
<b>Cycleways</b>	
<input checked="" type="checkbox"/>	I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency.
<input checked="" type="checkbox"/>	I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years.
<input checked="" type="checkbox"/>	I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury.
<input checked="" type="checkbox"/>	I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport.
<input checked="" type="checkbox"/>	I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles.
<b>Safe and Accessible Streets</b>	
<input checked="" type="checkbox"/>	I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.
<b>Libraries and Community Spaces</b>	
<input checked="" type="checkbox"/>	I support Council restoring the Central Library as soon as possible by adopting Option 1.
<input checked="" type="checkbox"/>	I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect.
<input checked="" type="checkbox"/>	I support Council considering how it can provide community gardens and composting facilities around Wellington.
<input checked="" type="checkbox"/>	I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.
<input type="checkbox"/>	Other:

<b>WCC must meet their Te Tiriti o Waitangi obligations</b>	
<input checked="" type="checkbox"/>	I think that WCC can meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards.
<input checked="" type="checkbox"/>	I think that WCC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like.
<input checked="" type="checkbox"/>	I think that each activity or project WCC commits to, must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan.
<input checked="" type="checkbox"/>	I support WCC supporting Māori to explore ways co-governance can be implemented in Wellington.
<input checked="" type="checkbox"/>	I support WCC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.
<b>Te Atakura - WCC's plan to be zero carbon by 2050</b>	
<input checked="" type="checkbox"/>	I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action.
<input checked="" type="checkbox"/>	I support WCC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise.
<input checked="" type="checkbox"/>	I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura.
<input checked="" type="checkbox"/>	I support WCC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change.
<b>Three Waters</b>	
<input checked="" type="checkbox"/>	I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city.
<input checked="" type="checkbox"/>	I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact.
<b>Debts</b>	
<input checked="" type="checkbox"/>	I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing.

**Submission: #1973**

<input checked="" type="checkbox"/>	I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs.
<input checked="" type="checkbox"/>	WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

### Cycleways

<input checked="" type="checkbox"/>	I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency.
<input checked="" type="checkbox"/>	I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years.
<input checked="" type="checkbox"/>	I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury.

<input type="checkbox"/>	Other:

Anything else you want Wellington City Council to know?

- Expansion and reduction of cost towards public transport in CBD and outer Suburbs. Outright nationalisation would be neat.
- 30 kph speed limit in city bounds.
- Creation of more community service cooperatives such as the Remchery in Lower Hutt.
- Communication lines established between council/experts/public/gather in Wellington
- Devolution of GWRC into strict regional councils for CBD, outer suburbs.
- Invest in our future, not the interests of private entities.

## Submission on Wellington City Council - Long Term Plan

Name:	<i>Oliver Cheyne</i>

Post code	[REDACTED]
Age (optional)	[REDACTED]
<b>WCC must meet their Te Tiriti o Waitangi obligations</b>	
<input checked="" type="checkbox"/>	I think that WCC can meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards.
<input checked="" type="checkbox"/>	I think that WCC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like.
<input checked="" type="checkbox"/>	I think that each activity or project WCC commits to, must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan.
<input checked="" type="checkbox"/>	I support WCC supporting Māori to explore ways co-governance can be implemented in Wellington.
<input checked="" type="checkbox"/>	I support WCC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.
<b>Te Atakura - WCC's plan to be zero carbon by 2050</b>	
<input checked="" type="checkbox"/>	I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action.
<input checked="" type="checkbox"/>	I support WCC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise.
<input checked="" type="checkbox"/>	I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura.
<input checked="" type="checkbox"/>	I support WCC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change.
<b>Three Waters</b>	
<input checked="" type="checkbox"/>	I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city.
<input checked="" type="checkbox"/>	I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact.
<b>Debts</b>	
<input checked="" type="checkbox"/>	I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing.

**Submission: #1979**

<input checked="" type="checkbox"/>	I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs.
<input checked="" type="checkbox"/>	WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

### Cycleways

<input checked="" type="checkbox"/>	I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency.
<input checked="" type="checkbox"/>	I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years.
<input checked="" type="checkbox"/>	I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury.
<input checked="" type="checkbox"/>	I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport.
<input checked="" type="checkbox"/>	I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles.

### Safe and Accessible Streets

<input checked="" type="checkbox"/>	I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.
-------------------------------------	---

### Libraries and Community Spaces

<input checked="" type="checkbox"/>	I support Council restoring the Central Library as soon as possible by adopting Option 1.
<input checked="" type="checkbox"/>	I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect.
<input checked="" type="checkbox"/>	I support Council considering how it can provide community gardens and composting facilities around Wellington.
<input checked="" type="checkbox"/>	I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.
<input type="checkbox"/>	Other:

Anything else you want Wellington City Council to know?

This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing.

**Submission: #1985**

<input type="checkbox"/>	I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs.
<input type="checkbox"/>	WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.
<b>Cycleways</b>	
<input type="checkbox"/>	I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency.
<input type="checkbox"/>	I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years.
<input type="checkbox"/>	I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury.
<input type="checkbox"/>	I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport.
<input type="checkbox"/>	I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles.
<b>Safe and Accessible Streets</b>	
<input checked="" type="checkbox"/>	I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.
<b>Libraries and Community Spaces</b>	
<input checked="" type="checkbox"/>	I support Council restoring the Central Library as soon as possible by adopting Option 1.
<input checked="" type="checkbox"/>	I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect.
<input checked="" type="checkbox"/>	I support Council considering how it can provide community gardens and composting facilities around Wellington.
<input checked="" type="checkbox"/>	I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.
<input type="checkbox"/>	Other:

<b>WCC must meet their Te Tiriti o Waitangi obligations</b>	
<input checked="" type="checkbox"/>	I think that WCC can meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards.
<input checked="" type="checkbox"/>	I think that WCC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like.
<input checked="" type="checkbox"/>	I think that each activity or project WCC commits to, must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan.
<input checked="" type="checkbox"/>	I support WCC supporting Māori to explore ways co-governance can be implemented in Wellington.
<input checked="" type="checkbox"/>	I support WCC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.
<b>Te Atakura - WCC's plan to be zero carbon by 2050</b>	
<input checked="" type="checkbox"/>	I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action.
<input checked="" type="checkbox"/>	I support WCC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and begin managed retreat from areas at risk from sea level rise.
<input checked="" type="checkbox"/>	I support WCC partnering with mana whenua in the ongoing implementation of Te Atakura.
<input checked="" type="checkbox"/>	I support WCC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change.
<b>Three Waters</b>	
<input checked="" type="checkbox"/>	I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city.
<input checked="" type="checkbox"/>	I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact.
<b>Debts</b>	
<input checked="" type="checkbox"/>	I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing affordable housing and enhancing wellbeing.

<b>WCC must meet their Te Tiriti o Waitangi obligations</b>	
<input checked="" type="checkbox"/>	I think that WCC can meet their Te Tiriti o Waitangi obligations by establishing and supporting Māori wards.
<input checked="" type="checkbox"/>	I think that WCC can also meet their Te Tiriti o Waitangi obligations by committing to decolonisation and working with mana whenua and Māori to identify what this would look like.
<input checked="" type="checkbox"/>	I think that each activity or project WCC commits to, must consider how it can honour Te Tiriti and how a partnership approach can be taken in its delivery. I would like to see these considerations included in the final plan.
<input checked="" type="checkbox"/>	I support WCC supporting Māori to explore ways co-governance can be implemented in Wellington.
<input checked="" type="checkbox"/>	I support WCC establishing a mana whenua lead team to develop and implement a plan for Council to involve iwi and Māori in future decision making.
<b>Te Atakura - WCC's plan to be zero carbon by 2050</b>	
<input checked="" type="checkbox"/>	I support WCC fully funding their zero carbon plan, Te Atakura - First to Zero. I think Wellington needs to take urgent climate action.
<input checked="" type="checkbox"/>	I support WCC partnering with mana whenua and to develop a Climate Adaptation and Managed Retreat Plan for Wellington. This plan must be prepared with the community and identify how the city will adapt to climate change and <u>begin managed retreat from areas at risk from sea level rise. - or mitigation.</u>
<input checked="" type="checkbox"/>	I support WCC partnering with mana whenua in the ongoing implementation of <u>Te Atakura.</u>
<input checked="" type="checkbox"/>	I support WCC establishing a programme to co-learn with the community about how Wellington can reduce its emissions and adapt to climate change.
<b>Three Waters</b>	
<input checked="" type="checkbox"/>	I support the council adapting the most ambitious option (Option 3 - Accelerated Investment) for upgrading our water, wastewater and stormwater network. This will mean Wellington is able to provide more housing and reduce the number of pipe bursts happening around the city.
<input checked="" type="checkbox"/>	I also support council looking into how it can implement good practices (Structure Planning and Water Sensitive Design) that improve how well they operate and reduce their environmental impact.
<b>Debts</b>	
<input checked="" type="checkbox"/>	I support Wellington City Council using all financial resources available to future proof our city. This includes lifting its self imposed debt limit to fund all projects which support our ambitions for reducing carbon emissions, protecting the environment, providing <u>affordable housing</u> and enhancing wellbeing.

**Submission: #1992**

<input checked="" type="checkbox"/>	I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs.
<input checked="" type="checkbox"/>	WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

### Cycleways

<input checked="" type="checkbox"/>	I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency.
<input checked="" type="checkbox"/>	I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years.
<input checked="" type="checkbox"/>	I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury.
<input checked="" type="checkbox"/>	I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport.
<input checked="" type="checkbox"/>	I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles.

### Safe and Accessible Streets

<input checked="" type="checkbox"/>	I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.
-------------------------------------	---

### Libraries and Community Spaces

<input checked="" type="checkbox"/>	I support Council restoring the Central Library as soon as possible by adopting Option 1.
<input checked="" type="checkbox"/>	I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect.
<input checked="" type="checkbox"/>	I support Council considering how it can provide community gardens and composting facilities around Wellington.
<input checked="" type="checkbox"/>	I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.
<input type="checkbox"/>	Other:

Anything else you want Wellington City Council to know?

<input checked="" type="checkbox"/>	I believe spending money now will create more cost effective infrastructure for our future. It will also lessen the financial burden of future generations who are already facing unaffordable housing, and crippling infrastructure and climate adaptation costs.
<input checked="" type="checkbox"/>	WCC must not provide a loan or grant to Wellington Airport for repairs to the sea wall or extension of the airport. The money for this can be used on projects and services that will reduce Wellington's emissions, not increase them. As a private business the Airport can find its own funding easily.

### Cycleways

<input type="checkbox"/>	I support the most ambitious option of the full \$226m roll out of Wellington's cycle network programme (Option four - Accelerated full programme) as this matches the urgency of a climate emergency.
<input checked="" type="checkbox"/>	I support the Council developing a Cycleway Implementation Plan that sets targets and projects the Council must deliver over several years.
<input checked="" type="checkbox"/>	I support the building of new cycleways to be separated from the footpath, and where possible, upgrades to existing cycleways to be separated from the footpath to protect people with disabilities from injury.
<input checked="" type="checkbox"/>	I support the acceleration of maximising the number of people in Wellington who have access to cycleways so that they can utilise the most efficient and low carbon mode of transport.
<input checked="" type="checkbox"/>	I support the building and design of roads and cycleways that prioritise the visibility and safety of cyclists from vehicles.

### Safe and Accessible Streets

<input checked="" type="checkbox"/>	I want Wellington City Council to work with and support community leaders, disabled people and local businesses to ensure that Wellington's streets are safe and accessible to get around on.
-------------------------------------	---

### Libraries and Community Spaces

<input type="checkbox"/>	I support Council restoring the Central Library as soon as possible by adopting Option 1.
<input checked="" type="checkbox"/>	I support the continuation of pop-up libraries because they provide community members with support, resources and a space to connect.
<input type="checkbox"/>	I support Council considering how it can provide community gardens and composting facilities around Wellington.
<input checked="" type="checkbox"/>	I support Council considering how it can provide third spaces across Wellington that provide a free space for a diverse range of people to spend time in.
<input type="checkbox"/>	Other:

Anything else you want Wellington City Council to know?

## Submission: #1999 (late submission)

**Sent:** Friday, 14 May 2021 3:09 PM

**To:** GRP: Councillors

**Subject:** Save Makara Beach – submission on including Makara Beach remedial work in the 10 year plan

Dear Wellington City Councillors

I am writing to request the existing plan to do remedial work at Makara Beach be included in the 10-year plan as I understand that it is not in the current version.

Erosion is threatening Makara Beach - access to the walking track, boat ramp, rare native bird and plant species and activities like swimming, fishing, diving, kayaking or having a coffee and ice cream while watching the sun set into the sea could all be things of the past if this is allowed to continue. These activities are enjoyed by thousands of people from all over Wellington, in particular, from the Western Ward.

The erosion is partly due to the removal of natural sand dunes during WW2, and partly due to the ongoing effects of climate change.

Three years ago, in Cyclone Gita, this was made obvious when the sea came up over the beach. You, the WCC, set up the Makara Beach Community Panel to decide what to do. The Panel was made up of people with an interest in the beach along with people with commercial interests, iwi and Makara residents. The working group was supported by NIWA, Tonkin and Taylor coastal engineers, DoC and GWRC. The Panel process also involved substantial community engagement and feedback loops.

The Panel's recommendations, at the end of 2018, were considered economically and environmentally viable and effective. They consisted of remediating the beach and the creation of two swales. The cost was circa \$450k.

The Makara Ohariu Community Board has found circa \$70k funding for one of the swales so only replenishing the beach and one swale are still required.

Unfortunately, it failed to get into the 2020 budget and now the 10-year plan. This is wrong. The relatively small amount of \$380k needed to save Makara Beach for future generations needs to be included.

I note the feedback on the 10-year plan was overwhelmingly in favour of extra spending on the environment and resilience. Climate change is only going to get worse. Please make sure we do not lose this important leisure, cultural, historical and environmental asset because you could not find the relatively small amount of \$380k to get the much-needed remedial work done. It's up to you to save Makara Beach.

Yours sincerely

Duncan Turnbull
