### Purpose

1. This report seeks approval for the appointment of an alternate member to the Wellington Water Committee.
2. To make appointments to the Wastewater Treatment Plant and Landfill Joint Committee and to the Waste Forum-Wellington Region.

### Summary

3. Following decisions made at Council meeting on 26 October 2016, some appointments need to be made to joint external committees and groups.

### Recommendations

That the Council:

2. Agree to the appointment of a Councillor as an alternate member to the Wellington Water Committee.
3. Agree to appoint Councillor David Lee to the Wastewater Treatment Plant and Landfill Joint Committee.
4. Agree to appoint Councillor David Lee as the representative and Councillor Iona Pannett as the alternate member to the Waste Forum-Wellington Region.

### Discussion

#### Wellington Water Committee

4. Wellington Water Committee Terms of Reference allows for member Councils to have an alternate representative. Wellington City Council has not yet appointed an alternate member. The Terms of Reference of the Wellington Water Committee state *“Each member appointed to the Committee must have an alternate appointed by the relevant shareholder. The alternate may attend and vote at meetings of the Committee, but only in the event that the primary member is unable to do so.”*

#### Wastewater Treatment Plant and Landfill Joint Committee

5. The recommendation to change the alternate member on the Wastewater Treatment Plant and Landfill Joint Committee ensures that there is alignment with the portfolio of Climate Change. Note that Councillor Nicola Young was appointed to The Wastewater Treatment Plant and Landfill Joint Committee in October 2016.

#### Waste Forum-Wellington Region

6. The recommendation to appoint a representative and alternate member to the Waste Forum-Wellington Region will ensure that there is better alignment with the portfolio.

Note that Councillor Iona Pannett was appointed as the representative to Waste Forum-Wellington Region in October 2016.

### **Next Actions**

## **APPOINTMENT TO THE WELLINGTON-HUTT VALLEY WHAITUA COMMITTEE**

---

### **Purpose**

1. This report informs the Council on the Wellington Regional Council's (GWRC) Whaitua process, in particular the Wellington-Hutt Valley Whaitua Committee. The terms of reference, the committee's delegations and appointments to the committee need to be approved by Council.

### **Summary**

2. Whaitua is a Māori term for a designated area or region. In its Regional Plan, GWRC uses the word 'whaitua' to describe a catchment or sub-catchment (zone) managed as an integrated system.
3. GWRC has identified five areas that place different demands on land and water resources. They are seeking the support of, and input from, communities to help it understand local values associated with freshwater.
4. It is well understood that freshwater quality depends mainly on the dominant land use in a catchment. Consequently, integrating the management of land-development and urban-water-cycle-services at a catchment level makes sense.
5. An important part of Wellington's environment, recreation, heritage and economy are the harbour and the sea surrounding the city. Wellington Harbour is currently exposed to a range of existing impacts from urban activity, which results in environmental impact. Poor water quality affects the enjoyment of our natural environment eg. Beach closures, loss of aquatic biodiversity and the like. Wellington Harbour data show some contaminant levels in excess of guidelines for aquatic life. Without mitigation, planned future development has the potential to hasten this current degradation.
6. Wellington-Hutt Valley Whaitua Committee will be responsible for developing a Whaitua Implementation Programme (WIP). The WIP will outline regulatory and non-regulatory proposals for integrated land and water management within the whaitua boundary. The Wellington Hutt-Valley WIP will then be added as a chapter in the Regional Natural Resources Plan.
7. Terms of reference (Attachment 1), the Committee's delegations and appointments to this Committee need to be approved by the Council.
8. GWRC, Hutt City Council and Upper Hutt City Council will consider the terms of reference and will make appointments at their respective Council meetings later in 2017.

### **Recommendations**

That the Council:

1. Receive the information.
2. Agree the Wellington-Hutt Valley Whaitua Committee Terms of Reference and the delegations outlined in the terms of reference that are included as Appendix One.
3. Note GWRC, Hutt City Council and Upper Hutt City Council will consider the terms of reference and will make appointments at their Council meetings later in 2017.

4. Agree to appoint one Wellington City Councillor, as the Wellington City appointee to the Wellington-Hutt Valley Whaitua Committee.
5. Agree in accordance with clause 30(7) Schedule 7 of the Local Government Act, that the Wellington-Hutt Valley Whaitua Committee is not deemed to be discharged following each triennial election.

## **Discussion**

### **Whaitua overview**

9. This section discusses the context for the Whaitua, the scope of the Whaitua process and why it matters.

#### *National Policy Statement – Freshwater Management*

10. The National Policy Statement for Freshwater Management 2014 (NPS-FW) supports improved freshwater management in New Zealand. It does this by directing regional councils to establish objectives for fresh water in their regional plans to meet community and tāngata whenua values, and to take a more integrated approach to managing fresh and coastal water.
11. GWRC is deploying the whaitua process to 'give effect' to the NPS-FW.

#### *Whaitua process*

12. The Regional Policy Statement notes that the affects arising from activities on land and in water accumulate within a water catchment. Consequently, integrating the management of land-development and urban-water-cycle-services at a catchment level makes sense.
13. GWRC has divided the region into five whaitua<sup>1</sup>. Because each of the whaitua will have different demands on land and water resources, GWRC is taking a localised approach. They have sought the support of, and input from, communities to help it understand specific local values of freshwater. This collaborative approach will make recommendations on how the values and identified issues are to be addressed.
14. Each of the five whaitua will create an advisory group which GWRC will refer to as Whaitua Committees:
  - Ruamāhanga Whaitua Committee for the Wairarapa.
  - Te Awarua o Porirua Whaitua Committee, established in 2015.
  - The Wellington-Hutt Valley Whaitua Committee is scheduled to commence in mid-2017
  - The remainder will be established over the next few years.

#### *Wellington-Hutt Valley Whaitua Committee: Overview*

15. Membership of Wellington-Hutt Valley Whaitua Committee will include:
  - Ngati Toa Rangatira
  - Port Nicholson Block Settlement Trust
  - an elected representative from GWRC's Natural Resource Committee
  - an elected representative from Hutt City Council
  - an elected representative from Upper Hutt City Council
  - an elected representative from Wellington City Council

---

<sup>1</sup> Wairarapa Coast, Ruamāhanga Valley, Wellington/Hutt Valley, Porirua Harbour and Kāpiti Coast.

- Residents with an interest in land and water management issues.
  - Officers from the different agencies support the committee and work as a project team.
16. The Wellington-Hutt Valley Whaitua Committee is responsible for developing a Whaitua Implementation Programme (WIP). The WIP is intended to outline regulatory and non-regulatory proposals for managing activities that can impact water quality within the whaitua boundary, including measures to implement the NPS-FW.
  17. The development of Wellington-Hutt Valley WIP will be eventually added as a chapter in the Regional Natural Resources Plan following stakeholder and wider public consultation.
  18. Once the Wellington-Hutt Valley Whaitua Committee's WIP has been adopted, this Council would then need to give effect to it via the District Plan. This would then require it be given consideration when issuing resource consents and managing the Council's assets.

### **Why it matters**

19. It is well understood that the freshwater quality depends mainly on the dominant land use in a catchment.
20. Human and urban activities generate contaminants that have increased as the population has continued to grow. Traditional piped stormwater networks efficiently move these contaminants to the streams and the sea. Industry best practice, legislative requirements and increasing community expectations represent a shift in how stormwater is managed to address the cumulative negative impacts on fresh and coastal water.
21. Wellington Harbour is currently exposed to a range of human-made impacts that are damaging its environment. During storms drainage systems are inundated causing flooding and sewage directly into the harbour itself. In addition, impacts arising from existing urban activity are damaging the immediate environment. Planned and potential future development, without an integrated management framework, has potential to hasten this degradation.
22. Freshwater quality is the one area where the majority of the community understand the threat to our environment because of their interaction with freshwater, especially drinkability and swimability. The Whaitua process is one way Councils are taking responsibility and showing leadership. Land and water management are both areas Councils have the ability and duty to control.
23. Urban activity is a constant challenge to the use and quality of harbour waters. The combined impacts of urban growth and climate change can positively or negatively affect urban environment and the success of the Whaitua programme, key to this will be a robust collaborative management framework.
24. Urban development that is not aligned with asset management programmes, and vice versa, and a conventional approach to stormwater management will most certainly lead to negative environmental and social impacts.
25. The importance of any policy must be balanced carefully with its affordability and achievability, while at the same time not imposing unreasonable barriers to development. The impacts of these policies, such as the potential cost burden on ratepayers for drainage services and urban development enhancement, need to be clearly understood, justifiable and enable prioritisation of projects that are socially, economically, and environmentally advantageous. Examples of possible policy

outcomes might include stronger mandate of Water Sensitive Urban Design Solutions versus traditional use, water quality targets, monitoring etc.

*Authorising the Committee*

26. The Local Government Act 2002 (Schedule 7 Clause 30) enables Council to establish a governance structure of committees, subcommittees, joint committees or other subordinate decision-making bodies that will assist the Council to effectively perform and fulfil its responsibilities over the triennium.
27. The terms of reference (Attachment 1) for the Whaitua Committee have been agreed with the key stakeholders. Council is being requested to formally approve the terms of reference and make the appointments following the process the terms of reference prescribes.
28. GWRC, Hutt City Council and Upper Hutt City Council will consider the terms of reference and make appointments at their respective Council meetings later in 2017.

*Adminstrating the Committee*

29. While GWRC will provide the administrative and servicing support for the Whaitua Committee, governance costs associated with establishing and running the Committee will be covered by each agency within their respective existing governance programmes.
30. To assist with the continued and smooth functioning of this committee across triennial elections, it is recommended that Council resolves that the Wellington-Hutt Valley Whaitua Committee is not discharged at the end of each triennium. The partners to the Whaitua Committee would however each make new appointments to the Committee at the start of each triennium.

Consultation and Engagement

31. Councillors and officers at GWRC have consulted with the councillors and officers at Hutt City, Upper Hutt City and Wellington City Councils and Port Nicholson Block Settlement Trust and the Te Runanga O Toa Rangatira on the establishment and intent of the Wellington -Hutt Valley Whaitua Committee. The Committee's Terms of Reference has been agreed with all parties.

**Conclusions**

32. A new Whaitua Committee with recognised statutory interests in the harbour and its catchment is proposed.
33. The work of the Whaitua Committee needs to pragmatically and prudently balance the protection of the environment, anticipated and planned growth and the ongoing operation of assets whilst meeting legislation, expanding community expectations, and political and financial challenges.
34. Community input to the setting objectives and improved interagency coordination and collaboration on the WIP is expected to improve the integrated management of land and water activities.
