**Is there anything else we need to consider before we build the Cobham Drive crossing?**

The fact that this will further slow down traffic, and cause backlogs all the way back to the Mt Vic Tunnel. This area is already congested enough and will only make things worse. The crossing should instead be an overbridge. I have read your reasons why this option was not selected, and basically it's that you don't want to spend the money. So instead traffic will become more and more congested. Also, I would question how necessary a crossing is in terms of how many people are going to use this pathway. I imagine given its location it will be well used, but thinking about the cycle way on Rongotai Road, this is barely used. So I hope this isn't the case for Cobham Drive.

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

I am in favour of improved walking and cycling options, however this should be a bridge. An at-grade crossing is a cheap non-solution that will only frustrate thousands of motorists. It's already slow and difficult to get to and from the airport regardless of mode, especially for those living beyond Wellington city. I fail to see how more traffic lights and lower speed limits benefits most people, especially at non-peak times. The emissions reduction argument is scarcely relevant given the rise of electric vehicles, but in the meantime forcing vehicles to stop at another set of traffic lights will increase particulates from tires and brakes and increase fuel consumption due to acceleration. It's obvious that a grade-separated solution for Cobham Drive was never seriously considered and this survey makes it clear that you aren't interested in hearing about one. Well too bad. I'm personally very tired of the current anti-car attitude in officialdom. I don't drive for the sake of it, I drive because it's often the superior option. I also cycle and walk and am grateful for increased amenities but what I really want is for solutions that suit every mode. These changes will not alter my behaviour at all. The reality is that I still need to fly and I am certainly not going to catch the much slower train and the bus from the Hutt Valley, if those are even running. All you are doing is needlessly frustrating and inconveniencing ordinary people who are just going about their lives.

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Yes. Don't do it! Cobham Drive is a nightmare already in terms of traffic going to and from the airport. Traffic is frequently backed up to the roundabout at the peninsula driving to the city. If you go and add traffic lights, it will only make things worse. It will slow Wellington down, not get it moving. The reduced speed limit will also make no difference whatsoever. In stead of trying to make the city more "green" and trying to deter people from driving, why don't you just focus on making SH 1 from the airport to the Terrace Tunnel a priority so that the city can actually "get moving". All this council seems to be interested in is getting cars off the roads but it seems to forget that people are being pushed further and further out of the city because they can't afford to buy a house in the city itself anymore. The majority of these people will still have to get into the city for work and guess what? They'll be driving because public transport is diabolical. If you so desperately want to get cars off the roads, focus on improving public transport first. I don't necessarily oppose cycle ways and all that comes with them, but lets fix the big problems first. And lets get Wellington moving by improving the roads and public transport. And the water pipes. This council has been shockingly bad when it comes to fixing anything in the city. It' ridiculous that it should be spending any more money on cycle ways and crossings before fixing the major problems. Stop wasting our money on frivolous niceties that are nice to have but not needed. What we do need is better infrastructure. Roads, pipes, public transport.

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

It's clear traffic is an issue there, so let's not make it any worse by adding a crossing. We should add a foot bridge if we want pedestrian access there, like they do in Auckland. A crossing here will make car traffic horrendous in peak hours. So much so that the light cycles will need to be such a long wait for pedestrians that the whole point of it is diminished. Build a foot bridge.

Why is a crossing the only option proposed on a SH1 route - a flawed solution for a main highway. A crossing where proposed is going to add to the congestion and queues on the ASB Stadium-St Pats section of SH1, especially when the crossing will be on pedestrian demand (think Otaki township on demand pedestrian crossing congestion at weekends impacting on queues for kilometres in peak times. Why was an underpass or overbridge not considered in the options? these would be superior solutions and preferable over a pedestrian crossing on SH 1.

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Don't lower the speed limit from 80 km/h

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Much less likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Build a bridge over the road. At no point in the decision making process should lights and a controlled pedestrian crossing be considered due to the traffic disruption this will cause.

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Low importance

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

I visit the area (e.g. to shop or visit friends)

Cobham Drive/SH1 Speeds – September 2021

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

60km and then traffic lights.. Drivers are going to get so mad having to go slower on that section of road especially when no cars are there so I appreciate its only lowered 10km but people are still going to be running those yellows and trying to make

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Less likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

I think this is going to make more traffic problems. That area already gets insane amounts of traffic, doing this will bunch traffic into hataitai/kilbirnie/Evans Bay. Fix one solution create an even bigger one. An overbridge would be much better.

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Important

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

No need to change limit on Ruahine St, there are no crossings, and it is one of the few places in town traffic generally flows. On Cobham there is also no need to change, especially if you build a bridge instead of that silly crossing

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Don't build it. Traffic is already frustrating, and this will just add another obstacle, especially when Shelly Bay goes ahead and we add many more cars. Someone will get hurt, guaranteed. The crossing light will have to be short to avoid back ups into intersection at needle, and wait time will be long, people will make a run for it. I agree there needs to be a crossing, but do it right the first time for once, and build a bridge

**What is the primary way you travel through and around the area?**

Bicycle

**How important is it to make changes to improve safety on State Highway 1?**

Not important

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

The proposed crossing is close to the Evan's Bay/Cobham Drive Junction where there is already a crossing - it would therefore be much more valuable to put one in at the Miramar/ Airport end of Cobham Drive. Particularly as this is a point where cyclists/ walkers etc have accessed the length of the new foreshore redevelopment, There is currently no safe crossing point at this end

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Having different speeds for different sections of road could add confusion for drivers that don't pay attention. Roads which have been designed to go 70 on feel painfully slow when driving at slower speeds, effort needs to be made to physiologically ma

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Just make is 50 everywhere. It will have a marginal if any impact on travel times and increase safety. As per previous comment on the crossing, you can't consider these separately. Building the crossing without reducing the speed would not have the desire

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

More likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Agree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

The crossing and speed limit change can't be considered separately. If you build a crossing and maintain the 70kph limit there are increased risks of red light running etc. It probably also makes sense to reduce the speed limit 50 if a crossing is built. I also think that an elevated crossing is maybe not necessary.

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Yes. I'm a cyclist and totally opposed to the crossing proposal. Much better would be a spiral bridge over the road. At present I use the route proposed when biking and find it only a problem at peak hours to cross. The greater problem is at St Pats corner where airport bound traffic has a free left turn, endangering cyclists and pedestrians. This needs to be controlled by lights.

A crossing is a stupid idea as it will disrupt traffic and does not provide pedestrians and cyclists with a significantly safer option. A tunnel or bridge is surely the best option?

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

I believe traffic lights won't work on this road. It also provides more frustration for those in cars and more delays/ traffic jams. Often people push the lights buttons and walk/ cycle through the rights led anyway. I totally support the idea of getting to the other side of that road, as I cycle and walk there often. But I do not believe this is the safest and most convenienced option. I would be more happy with a cycle/ pedestrian bridge.

A safe place to cross is really important, but it should be a bridge or a tunnel so as not to disrupt traffic. There are already so many traffic issues along there, and a traffic light will only add to the problems for buses and cars.

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

I think it could stay the same if you build an overpass. But if you don't build an overpass and a car at 60km runs a red light that person is likely to die if hit on a bike or walking.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Less likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Build an overpass. So many cars run red lights as it is. The danger of this is still so high so realistically an overpass is the only way to go in such a tense driving area as is. I would imagine much cheaper to the public too. Who are the ones paying so should be heard.

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

I think we should adopt a speed limit system based on another jurisdiction (e.g. the Netherlands) where they have a staggeringly high rate of non vehicle journeys. Why invent a system of our own?

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Multiple crossings would be better. The objective should be to make it *\*EASIER\** to travel by a non-car mode. At present this proposal seeks to provide a crossing point without causing too much of an impediment to motorists. This is the wrong philosophy - to effectively encourage mode shift it is necessary make the desired modes of transport more appealing (therefore making it more likely that people will use them) while *\*simultaneously\** making the less desired modes of transport *\*less\** appealing (thereby encouraging the mode shift). If nothing is done to push people out of their cars they will continue to use them no matter how appealing the alternatives.... Therefore *\*multiple\** crossings will not only make it much easier for non-car transport modes to cross when and where they wish, these same crossings will also make it a slow and hopefully annoying journey for motorists. Further, in order to make it as safe as possible the speed limit should be reduced to 50km/h - multiple crossings will ensure a slower overall speed so a 50km/hr limit is sensible. This further extends the motorist journey time and acts a further disincentive for short range trip. Mode shift 101 is that people will preferentially select the mode of transport that is cheaper, faster, or ideally both. The margin of separation will drive the conversion rate....therefore it is imperative that we apply a time tax to all vehicle journeys!

<b>NAME:</b> Daniel McLachlan	<b>SUBURB:</b> Other - Lower Hutt	<b>ON BEHALF OF:</b> Individual	<b>ORAL SUBMISSION:</b> No
----------------------------------	--------------------------------------	------------------------------------	-------------------------------

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

The traffic flow from the airport to the city is very heavy from 3.30pm onwards

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Neutral

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

An overpass

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Important

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

I regularly travel through the area to get to work or school

Cobham Drive/SH1 Speeds – September 2021

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits  
on these roads?**

n/a

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter  
for trips around the Miramar, Kilbirnie and Rongotai area?**

More likely

**The crossing is located in the right spot to help you get to where you want to go in the  
area:**

Neutral

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

This will slow traffic on SH1 down. This route is already highly congested. We need a pedestrian overbridge NOT a crossing. This option would be safer for pedestrians and will not affect traffic flow.

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Important

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to  
the Airport?**

My home or business is accessed directly from the SH1 route

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

n/a

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Less likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Its a silly idea in an already congested area. The crossing will push traffic back right up to the basin. I've never seen a single person cross the road, so i dont know what information you're referencing. The council seems dead set on making it more and more difficult to get around Wellington

**What is the primary way you travel through and around the area?**

Car

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

The congestion is so bad on these roads due to a lack of a second Mt Vic tunnel, four lanes on Ruahine St and a Basin Reserve solution that it will make no difference. I haven't been able to do 70km/h on Ruahine Street for years because of the congestion.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Don't know

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Make sure the light sequence is on demand only ie you have to press the button to make the lights change. There will be low demand compared to vehicles so you need to prioritise vehicles.

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

All European countries have the same speed limit with larger populations, 60kph instead of 50, 70kph instead of 60. It helps traffic in populated areas, like the cbd

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Much less likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Neutral

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

It'll much likely slow down an already slow traffic

**What is the primary way you travel through and around the area?**

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Traffic will get blocked. Look at what happens on motorways when one vehicle goes slowly - traffic builds up quickly. Two questions so far, and for each you simply have to look at what commonly happens elsewhere. I don't think the planners are thinking very deeply with this. Ask children at kindie what happens when you fill the top of a funnel. To help, it overflows because there is a smaller, slower flow out of the bottom.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

It will slow, already congested traffic. Just look at Oriental Bay near the pedestrian crossings. Build a footbridge.

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Important

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

Less likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Neutral

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

This is the only route to the airport. It's already a bottleneck. This is insanity. A safe, sane crossing would be an overbridge. If you can't make the numbers work that would suggest either a crossing isn't needed or you place a low value on human life.

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

It could be worth looking at the roads coming off Calabar Rd at the same time; the roundabout at the Airport end is good but at times it can be hard to get across. The reduction in speed will help but is there anything else that could be done to improve flow along this road for non-airport traffic?

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Neutral

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

A bridge is more viable in my opinion, that area alone is already a terrible spot with traffic  
congestion, adding lights there only adds to the problem.

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Low importance

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to  
the Airport?**

My home or business is accessed directly from the SH1 route

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Sensible proposal. People need to be able to cross ruahine st and get out of the driveway to Hataitai sports ground. Hopefully a lower speed limit will make this easier

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Much more likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Agree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

A crossing with lights is crazy - the road is already really busy and congested - this will make it far worse. It has to be a pedestrian over bridge - that is the only sensible option

**What is the primary way you travel through and around the area?**

Walk

**How important is it to make changes to improve safety on State Highway 1?**

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

No - I think this well considered. In particular the speed restrictions on Ruahine St are very much in line with actual speeds at busier times, and will make the road safer for traffic entering into and emerging from both the Hataitai netball courts and the Hataitai Village, where there are very many near misses in my experience

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Agree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

It appears that there would be greater benefits by building an over/underpass for walkers and cyclists in the future if the crossing encouraged greater walking and cycling. I'd encourage the design to include the ability to measure crossing usage in terms

**What is the primary way you travel through and around the area?**

Car

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

n/a

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Why clog an already busy road further by adding another set of traffic lights? Build an overpass instead of a level crossing

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Neutral

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

I visit the area (e.g. to shop or visit friends)

Cobham Drive/SH1 Speeds – September 2021

**Feedback****1069**

<b>NAME:</b> Peter Webb	<b>SUBURB:</b> Thorndon	<b>ON BEHALF OF:</b> Individual	<b>ORAL SUBMISSION:</b> No
----------------------------	----------------------------	------------------------------------	-------------------------------

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Once again, totally unnecessary. There are very few accidents along these roads over the last few years, other than those caused by drunk drivers.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Neutral

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

It is completely unnecessary. There is already a crossing 200 meters up the road and very few pedestrians from Miramar would ever use it.

**What is the primary way you travel through and around the area?**

Walk

**How important is it to make changes to improve safety on State Highway 1?**

Not important

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

My home or business is accessed directly from the SH1 route

Cobham Drive/SH1 Speeds – September 2021

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Its so congested on these roads that there is no need to change the speed limits as no one can get up to these speeds currently anyway

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Much less likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

You realise that putting another set of lights in is likely to increase congestion as vehicles will be stopping more often emitting more as they are idle

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Low importance

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

My home or business is accessed directly from the SH1 route

Cobham Drive/SH1 Speeds – September 2021

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Leave it at 70, it's not that often in the day the road is clear enough, but at night when there's no one around all your dog is creating a speed trap. Our roads can handle it and we should be working to keep pedestrians away from the road so there's little risk.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Don't know

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Neutral

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Don't build a crossing, build a predated bridge. Highways are no places for lifts and crossings. We don't need to stop traffic up more to make a safe way for pedestrians, we need a clear separation of the two so no one's at risk. Japan does it in spite of

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

I don't believe the change in speed is necessary or warranted. This is an area where traffic builds up significantly and inhibiting the flow in any way (either by putting a crossing in with lights rather than an overpass, or by reducing the speed limit) doesn't seem like the most sensible solution.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

More likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Agree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

As a cyclist I would use this crossing, but I honestly don't believe it is a good idea putting more traffic lights in a route that is already so incredibly congested. Instead I would strongly suggest exploring an overpass or underpass so traffic can conti

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

I don't understand what difference it makes to reduce the speed limit only to 60k/h? Why not simplify it to 50k/h as on surrounding streets. The 60k/h speed limit on Hutt Road isn't very safe especial with the double lanes so I don't think its enough to increase safety here at Cobham Drive.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Reducing the speed limit will increase the time it takes getting goods and services between the airport and city and increase the time it will take to travel from the eastern suburbs to town. This ultimately costs money to people and businesses. A different crossing method must be put in place so therefore traffic can continue to flow at the current speeds.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

During business hours in the day I don't see this having any benefit other than reducing travel times further for private and public transport. The amount of congestion in this area is profound to say the least, this can add to the problem. There's not very often where both ways will be free flowing at 70kms per hour.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

The speed change would make it safer but the lights will simply back traffic up even more into the peninsula and airport. It's already too congested. A pedestrian/ bike overpass is a much more sensible idea.

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

The current traffic situation as roadworks are completed along Cobham drive has made the road almost unusable for traffic during peak hours. Slowing the speed of this road and adding a traffic light so close to the roundabout will likely only exacerbate this. The effects of traffic buildup on traffic can already be observed at the roundabout by the ASB in the morning every weekday.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

A 3 way pedestrian bridge at the roundabout will have a much stronger impact on pedestrian safety without creating a worse traffic situation on the state highway.

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Keep pedestrians out of the road, have them cross on an overbridge

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Much less likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Don't build a pedestrian crossing there, cars will be more aggressive to pedestrians. Pedestrians need an overbridge to be safe

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Very important

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

I visit the area (e.g. to shop or visit friends)

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

I understand the 50km/h on ruahine street, this has residential properties that open directly onto the street, but I see no point in dropping the other two from 70 down to 60, there is no direct residential access, the Cobham drive in particular is a verge-separated, dual-carriageway, and has no need to be dropped in speed. If anything, you should be considering adding a bypass lane onto the roundabout on Cobham drive going towards the airport to ease traffic congestion.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

What a ridiculous idea! This is a main piece of critical road infrastructure, which is already not up to scratch for the volume of traffic, and you want to put more stops in it? Why not just build a pedestrian bridge instead?

**What is the primary way you travel through and around the area?**

Car

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

I think you can strengthen your rationale for changing the speed limits by thinking about the effect on traffic. My observation is that the slower, then faster, then slower speed limits intermixed with signal controlled crossings creates a concertina or bunching effect. I wonder if encouraging a more consistent speed will reduce this effect and smooth traffic flow?

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

More likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Neutral

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Is the stagger in the crossing correct? I thought people using the island were supposed to be directed towards the on coming traffic before crossing the second carriageway.

**What is the primary way you travel through and around the area?**

-----------------------------	---------------------------	------------------------------------	-------------------------------

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Driver Education, the speed limit is not the problem its is the exceeding the limit or not driving to the conditions that are the problems

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Much less likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Bridge the Cobham Drive Road about for a 3 way over bridge

**What is the primary way you travel through and around the area?**

Bus

**How important is it to make changes to improve safety on State Highway 1?**

Important

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

I regularly travel through the area to get to work or school

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

There doesn't need to be a change to the speed limit if you build a bridge instead of a traffic light crossing.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Neutral

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Stop building traffic light crossings! Build a bridge with both stairs and ramps for disabled access.

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Low importance

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

I regularly travel through the area to get to work or school

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Having an airport in the suburbs is always going to mean a balance between traffic flow and allowing cyclists and pedestrians to get across roads safely. As a Hataitai resident, I'd be delighted to see the speed limits lowered.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

More likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Ruahine St 50 limit is probably sensible as most people seem to be unaware that it is 70 here and drive 50km/h anyway. Ideally, the speed limit (and entire system) should allow for safer entry/exit to Wellington Rd/Newtown and the Taurima St intersection. The speed limit for the other locations makes sense when considered with the proposed crossing. Although ideally any crossing could be made in a way that allows for road efficiency (tunnel or overbridge)

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Neutral

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Does this crossing help with journeys by bike, foot, scooter (and public transport) to and from the airport? Is there a better way of accommodating these journeys without reducing road efficiency? How will public transport fit into this (e.g. will there b

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Speed and indeed the crossing should be considered in light of the intended purpose of the road - its State Highway 1 - for vehicular traffic. Pedestrian safety is of utmost importance but the priority is the passage of vehicles. Drones are excluded from flying in certain areas because the airspace is reserved for planes - we don't ask the planes to fly higher for longer in response. Let's be sensible about this issue - im not opposed to the change in speed limit but it shouldn't be to make it safer for people to slow down when the inevitable cues occur because of the traffic lights being introduced

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Less likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Don't do it. Its dangerous still and should have a bridge there instead. Vehicle traffic will made significantly worse - both public and private - and using this as a way to ease congestion closer to the Mt Vic Tunnel is a poor move even for LGWM

**What is the primary way you travel through and around the area?**

Bus

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Only Ruahine Street needs dropped since it's a useless speed increase, the other two allow good flow to and from the airport and could make it harder to get to the airport, especially if you do 60 before sitting at traffic lights.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Much less likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

I don't agree with this as I think it is going to reduce productivity by increasing travel times for individuals. obviously it will only make a small difference off peak and no difference at all during peak hour congestion, but I feel as though the productivity effects that roading 'adjustments' will make is not being considered before these ideas are being conceptualized.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

I don't think that slowing traffic downs improves congestion. With an over bridge you don't need to slow the traffic. I don't think the cars and road users would be very receptive to lowering the speed limit

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Less likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

I don't think that a crossing is a good idea, I think that most people would like a over bridge across the road. People jay walk crossings all the time no matter how busy the road is. So maybe consider something other than a crossing

**What is the primary way you travel through and around the area?**

Bus

**How important is it to make changes to improve safety on State Highway 1?**

Very important

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

The change in speed limit would create more traffic problems and slow down travel. When there is light traffic people should be able to go 70kph as there is plenty of road and space to do so. When there is heavy traffic everyone matched speeds so the speed limit is not an affecting factor.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

People who walk that stretch of road aren't usually going to the asb center or that part of Kilbirnie because they cross the road at other points to get there. That stretch of road flows well and having a crossing and less speed is only going to create more

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Enforcement will be important here. The width and design of the road plus the lack of crossings make it easy to travel much faster than the speed limit. Perhaps consider a new design that encourages slower speeds.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Much more likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Agree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

An offset crossing like this is inappropriate. People (especially those with limited mobility) need to be able to cross the road in one go without waiting in the middle. It is an unpleasant experience to wait between traffic like this and makes non-car

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits  
on these roads?**

Traffic

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter  
for trips around the Miramar, Kilbirnie and Rongotai area?**

Much less likely

**The crossing is located in the right spot to help you get to where you want to go in the  
area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Traffic

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Not important

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to  
the Airport?**

I regularly travel through the area to get to work or school

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

I think 50km/h would be better. There are too many different speed limits in Wellington. Why not simply have 30km/h on the majority of roads and 50km/h on roads with separated cycleways?

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

More likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

If you build an overpass bridge the speed limit won't need to change. The current speed limit on this road is more than adequate and altering it will make the journey slower.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Much less likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Build an overpass bridge and leave the road as it is. Adding traffic lights will just create congestion.

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Not important

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

I only travel through the area when I'm going to the airport

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

It does feel like the focus of LGWM is to slow things down. I don't think you should reduce the speed limit, you are already addressing safety by creating somewhere to cross the road. We need to keep traffic moving as much as possible. The weather is too cold and crappy to bike and walk everywhere every day

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

More likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

It needs to be before the round about as otherwise it crosses to nowhere and doesn't help get to Kilbirnie I don't want a raised section of road. My preference would be a tunnel under the road to prevent traffic delays.

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Reducing speeds is not helping getting Wellington moving. This road needs to remain at the existing speed limits and be upgraded to take into account the traffic volumes that actually use this road, not the idealised view of the world. I don't know of anyone who will walk, bike or scoot to the airport.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Another great idea. People who walk from Hataitai to badminton hall on ruahine street face an almost impossible task of crossing safely. Can you consider a crossing to facilitate this too? If there truly is a desire to shift modes then people who catch buses to Play sport need to be safe getting there. We should be encouraging activity not just AT the sports centre but getting to and from as well.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

More likely

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

How many injuries or crashes have their been. Is thi stretch of road actually unsafe as if there is no evidence then it is stupid to change the limit so

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Much less likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

If I want to go to kilbrunie from. Miramar on a bike or walking I go through the underpass underneath the airport. So does everyone else as it is no less of a hassle. This is a dumb proposal and a waste of money. You are all useless

**What is the primary way you travel through and around the area?**

Bus

**How important is it to make changes to improve safety on State Highway 1?**

Not important

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

n/a

Cobham Drive/SH1 Speeds – September 2021

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

The speed should remain the current speed limits of 70km throughout. there is very little non vehicle activity in that area and no amount of reducing speeds is going to change that. it is windy, disgusting, and even on a nice day there is no reason to be there. people drive to go to mirimar or to the airport. no one wants to walk from haitaitai to mirimar in the wind and rain.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Much less likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

No one will use it, and you are disrupting traffic for the minority, a very very marginal minority. who are unlikely to use the crossing point in the first place. What is it crossing to? what is the crossing servicing? why does there need to be a crossing

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Not important

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

I only travel through the area when I'm going to the airport

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

The 70 kph speed limit is rarely reached in my experience driving along Cobham Drive and Calabar Rd. Slowing down for the roundabouts means you have to accelerate quickly to reach 70 kph only to slow down again so I don't think 60 kph would be any kind of hardship on drivers. I'm all for it.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

More likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Agree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

I would prefer it closer to the eastern roundabout leading to the airport but any safe crossing would be great! I often walk to work from Miramar and my only options are to make a mad dash across 4 lanes of traffic or detour and add considerable distance

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

You are proposing a crossing and reducing speed to solve the same problem - both will add further congestion and slow down travel times even more - at peak your not moving very fast at all. This appears unesscary as a well thought out over bridge will solve the issue with no impact on traffic!

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

This will slow down traffic on an already congested street - a bridge would be much safer and remove the need to also change the speed limit! you appear to be proposed two changes which will impact a high use traffic area where's wan over ridge in the rig

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Good to reduce speed on Ruahine St = yes to 50kmh. No logic to reducing speed on Cobham Drive (many 100km roads have lights - think outside the police college in Porirua) - 70km is not excessive on a quality road like Cobham Drive irrespective of crossing or not (hopefully a pedestrian bridge) = no to 60kmh Calabar Road is lower quality/tighter road than Cobham Drive = yes to 60kmh

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Neutral

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Adding additional sets of lights to SH1 seems to be against lots of the intent of the roading side of LGWM. Agree a form of crossing is needed but long term planning warrants construction of a pedestrian overbridge with ramps for bikes.

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Reducing Cobham drive to 60 makes sense, especially given the need to stop safely with the lights. I don't see the benefit of slowing Ruahine St to 50. 60 would seem more reasonable, though maybe there's nothing too wrong with 70. On Ruahine St the entrance and exit from Haitaitai Park should be changed. Currently it's very hard for people exiting the park and wanting to head East - they must go all the way to Basin Reserve and back. The exit from Haitaitai Park should be South of Goa St so that someone can leave the park when one lane is free and turn into Goa St further on. It may be ok to have the entrance to the park moved to the same location.

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

No need to reduce the speed if you install traffic lights as they will naturally slow traffic and lessen able cars to get up to higher speeds. As there should be no pedestrians crossing the roads, this reduction is less necessary

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Less likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Build a foot bridge over the road. This will mean that pedestrians and cyclists can cross as their leisure and it maintains the flow of traffic, which is the point of having roundabouts. Traffic lights will only slow traffic unnecessarily, in an area that

**What is the primary way you travel through and around the area?**

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

**NO!!! Keep it 70! There's no reason to make it any slower than it already is. 70 is fine through there and lowering the speed limit will just confuse people even more. Don't change what is working fine in the first place.**

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

**"Let's get Wellington moving"... build an over bridge/walkway on order to keep traffic flowing!! Putting a stupid crossing in the middle of Cobham Drive will just effect traffic EVERYTIME it goes red for ONE person to cross. Traffic is already a nightmare**

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Not important

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

I regularly travel through the area to get to work or school

Cobham Drive/SH1 Speeds – September 2021

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

You are going to force cars travelling at 60 to 70 km to stop for lights - this is going to cause more accidents. If you are on a bike and riding from town you are more likely to cross at the lights and ride down the backstreets than ride along Cobham Drive. Have you actually surveyed the cyclists have you done a cost benefit analysis? How many people travel on that road to Miramar and the airport (pre COVID?) how many people cycle. Where is the analysis you cannot expect to consult without a proper analysis being published - why is there not a summary at the start of this survey

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Understandably a crossing is needed to access the sport centre but adding another barrier to traffic is going to increase congestion on the Evan's Bay strip. You just need to head down there in the morning in a school/work day to witness the build up or alternately head their during rush hour on a Saturday morning/arvo to realise the frustration it'll cause people trying to get to and from our airport. The same option would be either a bridge across the four lanes to the other side of the road or if we want to be a revolutionary city and advertise such an overbridge directly to the centre would be a lot more appealing. Not only do we get the crossing but hopefully leveraging the sponsor of the facility will help share costs for the proposal.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Consider how the second Mt Vic tunnel and potential Ruahine St./Wellington Rd. widening will contribute to an easier traffic flow and pedestrian/cyclist safety. An above ground bridged crossing will contribute to both a much safer crossing as well as unlocking a more efficient traffic flow.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Of course it does without saying the speed should be reduced. I know it's a state highway but it's strange that all the surrounding roads are 50k and this one isn't. Also very minimal impact of traffic flows as most of the time it's so congested you can't hit the current speed limit!

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

If you are having a level crossing then it should be 50 not 60 on Cobham Drive

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Neutral

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Do not have a level crossing with lights. Build an over or under bridge to not stop traffic on a proposed 60 kmph road - that seems dangerous and will slow traffic more than it already is around there

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Important

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

I visit the area (e.g. to shop or visit friends)

<b>NAME:</b> Amy Jameson	<b>SUBURB:</b> Maupuia	<b>ON BEHALF OF:</b> Individual	<b>ORAL SUBMISSION:</b> No
-----------------------------	---------------------------	------------------------------------	-------------------------------

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Traffic congestion at busy times - why not build a footbridge instead?

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

The traffic on this road can be heavily congested at times. I live in Maupuia and on Saturdays it can take up to an hour to get to the Basin Reserve. A crossing is only going to make the traffic back up even further. It's a NO from me

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Neutral

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

n/a

Cobham Drive/SH1 Speeds – September 2021

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

New cars are safer than ever so why now decrease the speeds.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Much less likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Build a &lt;profanity&gt; bridge and let traffic flow.

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Not important

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Its a straight well lit road not housing. 70kms is acceptable. Make sure vegetation is maintained to for clear line of sight Especially at roundabouts.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Much less likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Don't! Stops thr traffic flow and encourages people to walk on the road. Put in an overbridge at the same site.

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Low importance

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Make the Cobham Drive and Calabar Rd speed limits 50km/h. That way 50cc scooters (or electric equivalents) could use these roads more safely. Currently these vehicles either represent a hindrance to traffic flow, or they need to make a long detour through the airport, involving 2 gates and 20km/h speed limits, or, which many do, take an illegal shortcut through the pedestrian/cyclist tunnel underneath the runway.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Consider the age demographics of the users. Young children fail to accurately perceive faster speeds and older pedestrians may need more time to cross safely.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

More likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Agree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

The key factor in how useful the signals will be to pedestrians is the amount of time we would have to wait for the signal to change. If we are forced to wait for multiple minutes, we will continue to cross opportunistically and dangerously.

**What is the primary way you travel through and around the area?**

Walk

**How important is it to make changes to improve safety on State Highway 1?**

Very important

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

I visit the area (e.g. to shop or visit friends)

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Cars and buses rarely get to travel this speed in peak hour anyway, and no one polices it outside peak hours so the change wouldn't really affect anything - so fine with this change.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

This is a main arterial route to the airport and eastern suburbs. It's used by cars and buses, and this will add delay and frustration to the journey. Bus journey times to the eastern suburbs are already unacceptable and a reason why people don't bother w

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

In my experience traffic traveling from Calibar Rd towards Evans bay don't drive especially fast. However traffic coming from the opposite direction often put their foot down from the lights intersection and some drivers weave between lanes to get ahead, 60kmph might be too fast to approach the new pedestrian crossing... I'd certainly suggest monitoring it very closely and adjusting to 50 if driver behavior isn't safe enough.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

The reduction on ruahine st makes sense, it's rare to get to even 60kmph on that stretch.  
Reducing the Cobham drive limit seems a little pointless, especially if you put in an overbridge :)

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Agree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

I would think an overbridge would be far preferable to a crossing. It is better for walkers and drivers as the two do not need to interact. Plus it would allow for really cool photo ops!

**What is the primary way you travel through and around the area?**

Bus

**How important is it to make changes to improve safety on State Highway 1?**

Low importance

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

It is very ironic that you keep advocating to get Wellington moving (ie moving faster) and want to do this by making us drive slower. These lower speed limits are nothing but virtue signalling in this era of being anti-motorist. Cobham Drive is perfectly safe to travel at 70 during off-peak times. The level of congestion at other times means vehicles can't usually reach the current limit anyway.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Your own statement "On SH1 between the Mount Victoria Tunnel and the Airport, two people were killed and 16 seriously injured in crashes between 2011 and 2020" shows that the road is not unsafe. One pedestrian was killed in 2016 (FIVE YEARS AGO) and the other death was a youth in a stolen car. No road rules will save this type of moron who lives outside the law. I would rather you put some kind of elevated crossing over Ruahine St so that Hataitai people can walk to Newtown more easily. And put a footpath along from the Badminton Hall to Goa St where there is already a safe crossing point.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

This is a very busy road with traffic from the airport and surrsuburbs. Putting in a pedestrian crossing and changing speed limits will create huge issues for local commuters and travelers.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Build an over bridge instead. Traffic is already terrible at peak times and this will cause more issues than resolve them.

**What is the primary way you travel through and around the area?**

Car

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

The current speed is fine. The proposal for change says slower traffic saves lives. But the only one that has been killed on these roads since I have lived in Miramar was in a stolen vehicle. Accidents do happen but to my knowledge very few are hurt. In Ruahine street, I can't remember any bad accidents happening....

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Agree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Yes - I would prefer an overhead crossing - there is no point in slowing an already highly congested road. Travelling to the airport should a smooth process not stop start. An overhead crossing would be perfect for the few that would use it. At the moment

**What is the primary way you travel through and around the area?**

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

I'd prefer an approach to allow uninterrupted fast motor vehicle flow through from the rest of Wgtn to the airport and the shops in the area

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Put in a bridge for foot/cycle crossing and work towards designing for a smooth drive through the area.

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Neutral

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

I visit the area (e.g. to shop or visit friends)

Cobham Drive/SH1 Speeds – September 2021

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

This is part of SH1. It is a wide road and very safe. Driving it at 70km is not unsafe or dangerous. This road is more than acceptable for this speed limit. A decrease in the speed limit will only add to the congestion which is already bad enough along this stretch of road.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Don't you think an overbridge would be better? Considering the congestion on Cobham Drive without traffic lights and speed reductions. This is not a dangerous piece of road and never has been. There are crossing options already if people want to walk

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Important

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

I regularly travel through the area to get to work or school

Cobham Drive/SH1 Speeds – September 2021

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

The crossing location is too close to the Troy st roundabout. It will cause even worse back up of traffic through the roundabout at the troy st intersection. Most mornings and evenings the tail back from cobham drive stops the traffic through the roundabout at Troy st making it very dangerous to navigate. Build an overbridge and the speed limits do not need to be altered.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

This should be an overbridge Not a crossing at road level

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Very important

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Will the reduction in speeds and lights at the crossing create more tail backs and congestion in peak hours. IT will only be 500 MTRS between the proposed crossing lights and Evans Bay parade lights then the Moxham ave lights. stopping and starting all that traffic load is very inefficient traffic flow. What lights will be removed? Having three sets of traffic control in such a small distance would seem to add issues.. How many people are you expecting to cross per day..?

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Consider making the crossing a overhead Walk way..or installing subways under the existing roundabouts this would give multiple options for walking cycling directions..

**What is the primary way you travel through and around the area?**

Motorcycle/scooter

**How important is it to make changes to improve safety on State Highway 1?**

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Even 60 kmh doesn't make sense for any these short stretches. It's just a waste to accelerate that much between traffic light and roundabout. Especially during peak periods when traffic grinds to a halt. The limit should be even lower.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly agree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

I gave feedback earlier in favour of an over ridge, but after I read the reasoning for traffic lights, especially about height and length of ramps of a potential bridge I'd prefer traffic lights as well. Just make sure people don't have to wait too long

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

I agree with Ruahine Street being lowered but Cobham Drive and Calabar Road is our main arterial routes and I have never once seen an accident there in 30 years. Where is your data coming from that says it isn't safe?

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Much less likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Cobham Drive is already a traffic nightmare and getting to and from the airport will one day have four lanes on it and maybe even light rail. This is very short sighted and may one day be ripped up. A bridge should be considered.

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Not important

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Ruahine st - very little pedestrians use it, there is only a rough footpath on one side of the road. Reducing the speed won't encourage more foot traffic. Cobham drive - requires a grade separated crossing for maximum safety and ease of use, which would allow the speed limit of 70 to remain. A huge amount of cyclists and foot traffic use this area, the crossing lights will be running all the time, which will impede traffic flow substantially. Calabar Rd - not often used by pedestrians, can't be crossed (due to median barrier and fenced-off runway with no foot path on opposite side.) Also this whole section of SH1 is the main route to the airport, if the object of the "get wellington moving" project is to get wellington moving, why would you want to reduce the speed and efficiency of the traffic flow. This seems like the cheap option to sort out pedestrian safety. Grade separation is the correct solution.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

The crossing need to be grade separated (ie - a bridge or similar) . This is the safest option. I also dont like the idea of the speed bump. It is difficult for traffic to see the bump especially at night in the wet. Not good for motorbikes

**What is the primary way you travel through and around the area?**

Motorcycle/scooter

**How important is it to make changes to improve safety on State Highway 1?**

Neutral

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

**I regularly travel through the area to get to work or school**

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

This reduction in speed is fairly pointless. During busy times your lucky to hit 20-30kms anyway. The road is suitable to handle traffic at 70, the incident and accident rate is very low when you review the statistics. It appears most of the accidents are low speed and occur at the traffic lights (nose to tails). Maybe it's worth looking at options to improve flow through those areas rather than solely focusing on speed

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Much less likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

The obvious and significant impact it will have on traffic flow in an already congested area. This should be an over/under pass for pedestrians ect. That would be the safest and most efficient option

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Low importance

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

There is no reason to lower the speed limit on SH1 and Calabar Road if there is no pedestrian crossings being added there, this will just result in additional backlog of traffic for all road users (cars, cycles, scooters).

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

This is going to slow down traffic flow to and from Miramar even more. We are all going to regret this in a few years when the whole way to Miramar is congested because of growing. It already takes half an hour during most times of the day to go to the CBD, this will make it worse.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

nope - good idea

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Neutral

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

A safe means of crossing is good - but with traffic so congested and hung up in this area, adding a set of lights to further congest traffic is not good (consider Newtown at the hospital which is under believably bad now that the extra lights are there. B

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Neutral

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

I visit the area (e.g. to shop or visit friends)

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

The speed proposal isn't visible when I click on the link. Whatever you do, don't make the currently only viable transport option worse (driving) before you actually put into place good, alternative options. Otherwise it's just stupid.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

It has to be an over bridge. The traffic is already horrendous and there are few to no options other than driving to the airport. You have to actually have good public transport options for people to use before you make the only currently viable option (d

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

60km/hr may be a safe speed due to separation but still exceeds the speed that would create a pleasant walking/cycling environment. It also doesn't change the dynamics of driving remaining the quickest way to travel.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

It is welcoming to see a reduction in the speed limit proposed. However, this is an urban area (despite being SH1) and with the opening of the new cycleway and the planned crossing, the area will only get busier with active modes of transport and vulnerable pedestrians. Therefore, the speed limits should be lowered to at least 50kph along the entire stretch where speed limits are proposed.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Much more likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Agree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

The indents at the edges of the crossing should be larger to ensure no encroachment on the cycleway by those waiting to cross. The timing on the traffic lights should favour pedestrians and allow them ample time to cross, this is important from a disab

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Put a pedestrian bridge in and keep the speed limits

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

That people both cyclists and pedestrians want quick efficient means of moving around. This proposal means they will have to wait for two traffic cycles to get from one side to the other. Why else are the pedestrian crossings off set so much? That is NOT

**What is the primary way you travel through and around the area?**

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Great idea. This will also have the additional benefit of slowing the currently unbroken stream of traffic coming off the Troy St roundabout onto Rongotai Rd. Am hoping this will mean cars are growing slower when they reach the Selak St intersection, which is sometimes risky to cross on foot.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Much more likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly agree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Perfect site for it. And will also help those of us living in Kilbirnie and Rongotai have better access to Evans Bay and the peninsula. Maybe also more of us will help with keeping the end of the bay free of rubbish etc. Thank you!

**What is the primary way you travel through and around the area?**

Bicycle

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Slowing the speed limit is not going to change the amount of traffic. Infrastructure needs to be better built and look at cases overseas is proven that slowing speed is not effective.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Much less likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Yes build a bridge structure.

**What is the primary way you travel through and around the area?**

Car

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Keep the speed limit the same as currently. This isn't a problem requiring 'fixing'. All of the issues are due to the bottleneck at the western end of Cobham drive leading up the hill; as the lanes are reduced to one all the way to the basin reserve.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Dont build a crossing! An overbridge is the screamingly obvious solution which wont disrupt the traffic flow for what will a relatively limited number of pedestrians etc needing to cross this busy rd.

**What is the primary way you travel through and around the area?**

Car

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits  
on these roads?**

n/a

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter  
for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the  
area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Put an overbridge in. Please don't disrupt the traffic flow

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Very important

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to  
the Airport?**

n/a

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Seems to work okay at the moment. Stuck in traffic... another tunnel

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Much less likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Make it an over bridge. Don't disrupt the traffic. Dangerous having to cross there look at the crossing by the airport... dangerous and traffic travels at 20 km. I walk down to the st pats lights

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Neutral

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

n/a

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

The change in speed on Ruahine road wont make a difference as 80% of drivers don't know it's a 70 zone and drive 50 which is probably the cause of the accidents

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

What about building under the road, the congestion in this area is bad and putting lights in here is going to make it worse. And drivers frustrated.

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

The only time you can actually travel at the posted speed limit is the middle of the night, so this will make no difference.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly agree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

The roundabout is difficult enough to negotiate without adding stationary traffic caused by traffic lights into the mix. The number of people wanting to cross the road is miniscule and already well served by the existing lights.

**What is the primary way you travel through and around the area?**

Bicycle

**How important is it to make changes to improve safety on State Highway 1?**

Not important

area:**

Disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Make an overbridge or a tunnel instead of traffic lights - this is going to make the traffic flow even more slowly and this is especially dangerous coming out of the roundabout toward the city. Horrible idea.

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

There is no problem with the current speed limit. Cyclists & pedestrians now have the cycle/walkway which is safely away from traffic. This is not a high traffic accident area

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Less likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

A pedestrian/cycle overbridge is a much better solution. Traffic congestion is already a problem along Cobham Drive, adding traffic lights will only add to an existing traffic problem.

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Low importance

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

n/a

<b>NAME:</b> Emma harrison	<b>SUBURB:</b> Hataitai	<b>ON BEHALF OF:</b> Individual	<b>ORAL SUBMISSION:</b> No
-------------------------------	----------------------------	------------------------------------	-------------------------------

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Why 60km? Why not 50km all the way through?

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Less likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Neutral

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

The crossing is an absolutely foolish idea. Cobham drive is a very busy, and congested road. A ramped over bridge would future proof this area

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Very important

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

I visit the area (e.g. to shop or visit friends)

Cobham Drive/SH1 Speeds – September 2021

on these roads?**

n/a

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter  
for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the  
area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Consider an overbridge for pedestrians and bikes. Safer and provides a great spot for  
community messages and advertising.

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Low importance

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to  
the Airport?**

I visit the area (e.g. to shop or visit friends)

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Reducing the speed is going to make no difference, people are just idiots and they will speed no matter what speed limit you put in. Invest in educating people on speed limit & showing more graphic billboards on what happens when you speed, more speed cameras & invest in trafficking the roads with actual Policemen/women

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Much less likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

I think a bridge crossing will have more of a positive impact then having a crossing on the actual road. Traffic is already bad and another 50 seconds, will make it worse!! I've lived in the Eastern Suburbs all my life and traffic is soooo bad that having

<b>NAME:</b> Alpert	<b>SUBURB:</b> Rongotai	<b>ON BEHALF OF:</b> Individual	<b>ORAL SUBMISSION:</b> No
------------------------	----------------------------	------------------------------------	-------------------------------

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

The change in speed limit will impact the routine of many people waaaay more than the pedestrians - especially people who will need to plan or allow more time to get to and from work, catch a flight and so on. The stop lights and slower speed will exponentially impact people's time such as myself who drives to the airport a lot and as a Rongotai local.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Adding a crossing on Cobham would only contribute to congestion that is already terrible on busy times especially for traffic coming from the city. For traffic coming from the city, there are already stop lights at Wellington Road/Kilbirnie Crescent and t

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

The speed along that stretch of road is fine for a straight two lane road. The crossing should be an overhead bridge which would then not impact any vehicles (and therefore not require any speed change) and reduce the likelihood of vehicle vs pedestrian impact to zero.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Much less likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Agree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

The crossing should be an overhead bridge so that it does not impact traffic, and reduces the likelihood of a vehicle hitting a pedestrian to zero.

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Low importance

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Need to enforce the speed limit reduction. Also consider whether 50kmhr speed over the whole route would be more efficient and less confusing for drivers.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Much more likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly agree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

I support a crossing as opposed to a bridge. A bridge would require a longer distance for pedestrians to walk, and a steeper gradient, due to access ramps. The link to view the crossing from this survey is broken. <https://lgwm.nz/our-plan/our-projects/>

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

I think it's ridiculous to put more lights on SH1. That's not getting the traffic moving. Put an  
over bridge in instead or a tunnel under the road like they do in Hamilton and other cities.

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

The most apparent and current issue with the area is the frustration and irritations amongst all the traffic in the area (motorists, pedestrians, cyclists and likes). That is mainly caused by lack of flow (squeezing 4 lane traffic to one lane in the middle and then forcing dangerous merging in between). Putting another crossing and slowing down speed limit will add to this frustration and make traffic situation to much hostile.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

It should be a pedestrian and bikers over bridge that pleases all the parties without disrupting and putting pressures to already stressful traffic situation in the area. An overbridge is far more practical in long term.

Traffic lights on the intersections of: 1) Ruahine St and Wellington Rd (towards Newtown) 2) Ruahine St and Goa St The above will decongest Hataitai in the mornings, it will make access to the Mt Vic tunnel from Hataitai safer and access to Newtown. The traffic lights at Goa St will also improve access to the Hataitai sports facilities. Making Ruahine St wider will also improve the Goa St intersection.

Disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Yes. Build an overbridge and do not disrupt traffic on State Highway 1 with traffic lights. Disrupting traffic seems to be the default option for our councils and government agencies these days and ignoring public wishes is a key part of this "strategy".

**What is the primary way you travel through and around the area?**

Walk

**How important is it to make changes to improve safety on State Highway 1?**

Neutral

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

n/a

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

If there is an overbridge there is no need to adjust the speed limits

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Less likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

No to having an actual crossing, this is not keeping Wellington Moving. Build an overbridge

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Not important

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

I only travel through the area when I'm going to the airport

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

That stretch of road is perfect as 70 on Cobham drive. I think that you can achieve the crossing while maintaining the original 70km/h. The same with Ruahine St. why reduce the speed? that stretch of road is safe to travel at it current speed when not in peak traffic.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Cyclists still use the road even though there's a new cyclist lane and pathway built. Changing the speed limit is not going to improve anything except create more congestion on the roads with the build up of traffic around rush hour. Doesn't seem logical to do it on SH1 when it's the main road to and from the airport.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

area:**

Neutral

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

It seems ridiculous to be slowing traffic down on a state highway by installing additional traffic lights, particularly given this is the main road to and from the airport. A pedestrian crossing via an underpass or over bridge makes much more sense. However

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Low importance

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Congestion. It is the main route into the city for the peninsula. Slowing traffic here including public transport will be bad for the thousands of residents in the eastern suburbs. A cool looking over bridge will add interest and if it is big enough there could be retail opportunities within it.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Neutral

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Should be an overbridge as this road is very congested as it is. A lift or escalator for disabled people and covered walkway.

**What is the primary way you travel through and around the area?**

Car

<b>NAME:</b> Harry Bloomfield	<b>SUBURB:</b> Karori	<b>ON BEHALF OF:</b> Individual	<b>ORAL SUBMISSION:</b> No
----------------------------------	--------------------------	------------------------------------	-------------------------------

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Slower speed does not necessarily mean more safety. Appropriate driver education and education of footpath users, including cyclists, is much more important. If pedestrians, cyclists etc knew how to cross roads properly, there would be fewer fatalities. Lowering speed limits simply increases travel time and encourages pedestrians to cross roads dangerously because cars are going slower

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

You should consider the impacts on traffic flow and travel times for vehicles along Cobham drive and the associates carbon emissions impacts. You should build a foot bridge instead which would enable pedestrians, cyclists, scooters etc to cross safely wit

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Low importance

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Being a major route the focus should be on making it safe at the existing speed, not slowing traffic down that is traveling through the area. Slowing traffic here will make alternate routes more attractive on a perceived travel time basis.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Don't know

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

As this is a major link to the airport the crossing would be better as a cyclist and pedestrian bridge. Adding another set of lights into this road looks like it will cause even more holdups for people traveling to and from the airport.

**What is the primary way you travel through and around the area?**

Car

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Praying that the traffic light option will NOT go ahead a 70km/h speed limit can be maintained on Cobham drive. 50km/h on Ruahine St makes perfect sense. DON't see an issue with 70km/h on Calabar Rd, but 60km/h is also acceptable.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Please, please, please: Adding more traffic lights adds to congestion rather than keep Wellington moving. An over-bridge is the only viable & safe solution for crossing a major state highway that carries a large volume of traffic. This could be beautifull

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

The entire stretch of road, if this development goes ahead, needs speed cameras on each side of the road. Having traffic to stop will encourage them to speed back up again so forcing motorists to abide by the new speed limits will make the whole section of road safer. Traffic is currently doing excess of 80 to 85kph.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

The speed limit is already too low for the size of the road, so lowering it more will only make the road less safe. The amount of traffic coming through needs more throughput, not less stalling. I live directly along the SH1 and would definitely like to see traffic moving more rather than stalled outside my windows. Slower speeds benefit nobody, they only cause more accidents because the difference between those people driving according to the speed the road is designed for and the speed the traffic signs will allow will be way too big, causing sudden stops and crashes.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

I disagree with this proposal. What was the use of putting in all the cycleways if you now have to slow down the cars. If you really think this will make a difference, make it a variable speed limit, so in peak time it is slower. I occasionally drive over to Seatoun early in the morning and there is hardly any cars let along cyclists or pedestrians, so what is the point.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Much less likely

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

The proposed speed change would (negatively) affect driving commuters far more noticeably and regularly than it would benefit pedestrians.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Increased risk of congestion

**What is the primary way you travel through and around the area?**

Bus

**How important is it to make changes to improve safety on State Highway 1?**

Low importance

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

I regularly travel through the area to get to work or school

Cobham Drive/SH1 Speeds – September 2021

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

This is SH1 and as such WCC should not have any say in the speed, light control or doing anything to obstruct the movement of traffic. For the safety of cars if speed needs to be lowered yes, it for the safety of pedestrians there should be a safer construction than lights and a crossing.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Less likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Yes either a bridge or a tunnel. I feel a crossing will cause more accidents just like the Island Bay cycle way has, don't ruin another busy highway in Wellington do the right thing and spend the money to do it right

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Very important

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

Other

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Most people don't travel at that speed due to the surrounding traffic. It's already complex enough going from 50k to 70k down to 30k through the roadworks then back up to 50k and into 70k again. Be consistent. Make the entire stretch 60k if a change is required but I don't really get the point of it.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Much less likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

There is already a lot of congestion that builds up in that area from traffic going to and from the airport. Adding an additional choke point means you will compound that issue especially whilst there is no alternative to get to the airport through public

**What is the primary way you travel through and around the area?**

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

The conditions /factors considered in the travel time impact does not take into account when the route is most in use (non free flowing/peak) with an additional traffic light controlled pedestrian crossing. The assertion of less than 1 minute impact is irrelevant in the context of most material impact to the community from the council's decision. At the times the public are most using the route, why is the measure of impact not applied then? The generalized comment that "in busy times there is often no change in travel times" is a flippant statement given the message focusses on free flowing traffic periods.

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Leave it as it

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

That is the main route to the airport. Doesn't need to have a crossing. Cross at the lights if you need to cross. Do not reduce the speed limit.

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Important

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

I regularly travel through the area to get to work or school

Cobham Drive/SH1 Speeds – September 2021

Agree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Reconsider an over bridge to help alleviate traffic congestion and free flow pedestrian and cycling movements. How can the crossing be raised at proposed speed limits? If cars need to reduce speed at the crossings this will further impact congestion.

**What is the primary way you travel through and around the area?**

Car

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Yes, build a tunnel under the entire CBD then you can consider these reduction measures. It is very concerning how backward this project is being delivered. I've delivered several significant infra programmes across the globe and this is not the way to do it. Start with the big needed congestion busters first please !! It's not rocket science

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Less likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Yes, separation of modes. And the major improvements to the arterials are needed before doing this type of minor tweak work.

**What is the primary way you travel through and around the area?**

Bus

**How important is it to make changes to improve safety on State Highway 1?**

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Ruahine Rd proposal makes sense given the houses and facilities on that stretch. Cobham drive- it's a small change to a relatively short stretch of road, so in practice no big deal, but it does feel like the speed here is lowered every few years, and adding a level crossing to this stretch of sh1 on top of the speed reductions feels like you are intentionally trying to make it painful to use. It feels odd trying to improve pedestrian safety on a state highway which should be designed such that pedestrians never come near it.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Neutral

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Would an under or over pass be feasible? Also, crossings close to roundabout exits tend to cause havoc, especially at roundabouts like these where drivers cannot see all the way around. If the crossing must be at road level, it should be a good distance a

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

This is a state highway. It shouldn't be a local road with local road speeds. I think putting crossings and reducing speeds will mean more pedestrian use ( which is what you're saying you want) but not all using the safe crossing option. I think ppl will treat it more like a local road and attempt crossing in traffic and wherever, way more dangerous. Right now many pedestrians choose other routes

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Please build an under or overpass. A good crossing is definitely needed and I would use it!! but this is a state highway.

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Were the speed limit to be reduced on both Calabar rd and cobham drive traffic flow would be impacted. It may be necessary and desirable if a crossing is put in on cobham drive but not in my view necessary if an overbridge is put in.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Much more likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Neutral

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Yes an overbridge for cyclists and walkers would be preferable. If a crossing were put in it would severely impact traffic flow and make a journey by car much longer

**What is the primary way you travel through and around the area?**

Car

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Absolute joke. This won't stop people. I find people are more likely to make rash decisions when driving slow because they think they have more time. They don't work anywhere else in the city. They're just slowing the city right down and helping no one from getting from A-B. Speed limits like this aren't going to have any effect on fatalities or potential harm. They're just going to cause frustration and potentially create more of an obstacle. Eg. People often jay walk between cars especially in city areas with lower speeds because they think they're fast enough. This could increase the risk to both drivers and pedestrians.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Much less likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

An alternative crossing - overhead rather than at road level with traffic lights

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

People currently walk on the airport side of Cobham Drive - the proposal doesn't appear to consider this group of users. Only one crossing point is proposed - but there's a need that's not addressed for people walking on the southern side of Cobham Drive

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Don't change it. It's a wide 4 lane road with dedicated pedestrian and cycle paths well separated from vehicle traffic. As a cyclist, runner, and walker in the area this will have no affect on me, but as a motorist it will make the drive towards Mirimar/the airport even less pleasant

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Sequence the lights properly with the existing lights at Evans Bay Pde so that traffic can still flow.

**What is the primary way you travel through and around the area?**

Bicycle

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Considering the traffic is so congested you never reach the speed limit anyway. However, I support the speed change regardless as it's not a safe area in terms of people not increasing speed so you have varying speeds already which is not ideal. At least 60km is better than mixing 50 with 70

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

60 is way too fast if some idiot builds a pedestrian more like 40 is much much safer. same for Calabar RD as well approaching a roundabout at 70 or 60 is madness.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Speed on Cobham drive is relevant to it's use ? You are changing it's use, therefore the speed must be lowered. Approaching a pedestrian crossing the traffic must slow down and prepare to stop. Cobham drive works right now because we only slow down /stop

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Very important

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Similarly to my notes as to why a traffic light is NOT an effective idea and a BRIDGE would be a far superior solutions - any reduction in speed limits would also back up traffic. Also if/when Shelly Bay is developed there is going to be a significant increase in traffic that will further congest traffic both ways along Cobham Drive and the feeder roads

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Much less likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

There is already a problem keeping traffic moving along Cobham drive, with much congestion. A BRIDGE over Cobham drive would be much more effective. One that was with a gradual rise so it wouldn't be too hard for bicycles to be carried up too. A traffic l

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Ruahine st is wide and long. I could live with 60k, but 50k is really pushing it. Lowering the speed to 50k may make drivers more irritable (and therefore less safe) or make driving that route no advantage to driving through Newtown which could cause unnecessary congestion there instead.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Neutral

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

n/a

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Important

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

I regularly travel through the area to get to work or school

Cobham Drive/SH1 Speeds – September 2021

<b>NAME:</b> James	<b>SUBURB:</b> Maupuia	<b>ON BEHALF OF:</b> Individual	<b>ORAL SUBMISSION:</b> No
-----------------------	---------------------------	------------------------------------	-------------------------------

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

The speed limits are fine as is. The road is designed for greater speeds, but the speed limit was set at 70km/hr to begin with. No matter what speed you put people will always crash. With only two fatalities along this stretch of road over a 10 year period is insignificant compared to the number of cars that use this road per day.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

The crossing will create huge congestion along Cobram drive and will benefit a very small amount of cyclists wanting to cross over to the ASB sports centre. I cycle to work most days and use the crossing outside St pats. This is adequate as is and I don't

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Why is there a need to lower the speed limit on Ruahine street? Slower moving traffic through there will build up more through the basin which is already a congestion point. Changing that speed limit will not encourage more people to walk along that stretch of road.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Physical separation of pedestrians and cyclists will eliminate the need for reducing speed limits. NZTA drop speed limits instead of fixing the cause of the problem as it's an easy way out.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Much less likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

How about an overpass/underpass like they use at major intersections in Singapore. SH1 should be kept as freely flowing as possible. Some people have long journeys ahead of them as this is the main international airport for the lower north island.

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Very important

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

I only travel through the area when I'm going to the airport

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

I don't think this proposal will keep Wellington moving. Traffic is slow enough as it is through this area. Adding traffic lights is going to make the journey to to the airport and eastern suburbs even longer. I'd be in favour of an overbridge, not traffic lights

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Typical cheap and nasty solution forced upon taxpayers. This is insane. You should be separating walkers and bike riders from motorists. Mingling pedestrians and bike riders with motorists is both unsafe and slows traffic. The solution is either an overbridge or underpass for pedestrians and bike riders. A much better investment of taxpayers money. But our government roading agencies refuse to listen and they perpetuate their mantra of cheap and nasty. "Lets Get Wellington Moving" .....sheeeee....it

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

It appears the council planners put a walkway on the wrong side of a busy road. if a pedestrian fly-over is installed, a speed decrease to 60 would not be required, this would reduce pedestrian/cyclist wait times and not negatively impact travel times for people using other forms of transport (potentially already in a rush to get to the airport!)

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

How many crashes occur on this road? And how many of those are speed related rather than inattentive drivers? Because in my experience the number of fender benders because an idiot was on their phone before the traffic lights isn't reduced by speed limits, its done by encouraging safe driving practices. Wellington drivers are bad drivers - an unfortunate fact (and don't get me started on our over-worked, under-qualified bus drivers) I don't see the speed limit being dangerous here, so it seems like another waste of time and resources. (admittedly I don't drive around this area often, mostly walk)

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

An area of moderate traffic in the area, where (as someone who does walk around there) there aren't many pedestrian walkers gets a crossing. This is at best going to increase traffic in an area already threatening to become a traffic hot-spot, and for min

For Ruahine St, I agree to the change. But for the remainder, 70kmh is already slow enough for such good, straight, easily drivable roads with excellent lines of vision. Speed limits should consider "common sense". 60kmh does not pass the gut-check.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Slowing traffic on Ruahine St to 50 kph is extreme, like 60 kph if it must be slowed down at all. The 70kph to 60kph reductions are not necessary either. There is plenty of room, surface is great and the road is 2 lanes in each direction, there are many times of the day when there is little to no traffic on the road and 70 kph or higher is perfectly safe.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

The crossing will cause accidents, lots of nose to tail ones. Do not do it. Construct a bridge instead, and have it so it services Troy Street as well - like a 3 way structure with the center in the middle of the roundabout. I also object to the

**What is the primary way you travel through and around the area?**

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Why not make all the roads 50kmph? There is very little time difference travelling the road between 50 and 60 and 50 would be safer where there is a pedestrian crossing

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Much more likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Agree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

1. The way people are walking on the crossing is with the traffic, not opposite. They should walk opposite so they can see oncoming traffic. 2. There should be red light cameras installed to ensure cars stop. 3. Pedestrians should get to cross quickly

**What is the primary way you travel through and around the area?**

E scooter, skateboard etc

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Yes. What is the volume of pedestrian traffic, when does it occur and compare this to the volume of traffic using this route to access the airport (and planning for when airport traffic returns to normal after covid is over). This is a permanent change. I think this is an appalling idea to reduce this speed limit. Traffic is already at a standstill through most of the city centre, delaying people trying to use the airport and adding to journey times - particularly from those outside the region. It takes as long to get through Wellington as it does to get to Wellington from places as far away as Upper Hutt. This is a wide, dual carriageway road. 70kph, even with a new crossing (which MUST NOT be raised, as that acts as a speed bump even when not in use) is perfectly safe and gives drivers time to drive when the lights will change. For the majority of time you will simply just be further constraining traffic flow and adding to airport journey times, even when no pedestrians are in the vicinity. It's an appalling idea to reduce the speed and I strongly oppose it.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Don't know

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Yes, the impact that putting in a raised crossing (as shown in the illustrations) will have on the flow of traffic when pedestrians are not using it - which will be for the vast majority of time on a major arterial route to the airport.

**What is the primary way you travel through and around the area?**

area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Cobram Road needs to free flow to airport. Build a pedestrian over bridge. Wellington is the least likely city for walking and biking. The weather is close to 68% unsuitable for all of these activities. Get real WCC.

**What is the primary way you travel through and around the area?**

Car

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

You are changing the speed limits in the wrong places. Do the people who are proposing this rides bikes to work? I cycle every day. What we need is a 30km/h zone from Seatoun School -> dundas -> ferry -> Broadway -> ira st -> miramar ave. The roading areas where there are separate cycle ways i.e. cobham drive don't need to be slowed down

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

This is a bandaid to the real issue. What about light rail connection to the airport. Or designated bus lanes. There's no point in taking public transport when you can't even benefit with quicker transits in peakhour. Sure slow the speed down but how is that going to encourage people to take transport when you are giving them no decent options.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Given the traffic, these speed limits seem fine. Again, I would suggest time and effort on public transport would be a far greater use of time.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

This seems like an insane idea that doesn't take into account the level of traffic that uses the road at peak times. I suggest time, effort, and money would be far better spent on improving public transport links from the city to the eastern suburbs.

**What is the primary way you travel through and around the area?**

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Slowing everything down is contradictory to Get Wellington Moving. The roads in question are suitable for the existing speed limits. There is no evidence provided that the current limits are responsible for the accidents on these stretches of road. Often the volume of traffic prevents travelling at anywhere near the speed limit anyway. Please don't add more frustration to an already frustrating experience trying to get around in this City.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Yes, consider building a bridge which won't place pedestrians in danger and in a location which is more convenient for walking from the sports facility to Miramar.

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Leave Cobham Drive as it is and put in an over bridge. Why change Ruahine St and Calabar Rd. They're capable of taking cars at high speed safely and there is no reason to lower the limit. It's a relief as a driver to be on a high speed stretch as there are so few in Wellington. On the way to the airport one wants to move quickly.

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Put an over bridge not a crossing. Crossing will just cause a headache for drivers on one of the few high speed roads in the city. The speed limit on this stretch used to be 100km. The road is capable of taking traffic at that speed. Let it. Put an over b

**What is the primary way you travel through and around the area?**

Bicycle

**How important is it to make changes to improve safety on State Highway 1?**

Not important

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

I regularly travel through the area to get to work or school

Cobham Drive/SH1 Speeds – September 2021

--------------------------------	----------------------------	------------------------------------	-------------------------------

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

No, I think they changes are fair and safe and will not make much difference to travel times.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Much more likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly agree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

n/a

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Very important

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

I only travel through the area when I'm going to the airport

Cobham Drive/SH1 Speeds – September 2021

Concern over how it will impact vehicles driving over the raised crossing at full speed (60kph), when the crossing light is green for cars. Also, a raised crossing could be dangerous to prams, older people, or really anyone, if you step off the edge - could twist an ankles, take a spill, etc.

You are asking the wrong questions. From conversations I've had with people, nobody wants a crossing,. The road is already slow and congested enough. An overbridge would be safer and wouldn't interfere with the traffic flow. The building of it would also be less detrimental to traffic flow. Please consult to find out what people want before asking where they want it! If an overbridge isn't possible, please tell us why.

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

There is no need to lower the speed on Cobham Drive/Calabar Road unless someone is stupid enough to put an intersection across a road instead of building a bridge over it, or placing a tunnel under it. Your motto is to get Wellington moving. This defeats

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

70 speed is perfect changing speed limit will cause more traffic.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Much less likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

I think there is enough Crossing at the right places at the particular place. Creating a crossing at that place will create more traffic. It's sh1 and people are trying to get to the airport. I think if making a crossing, an over Crossing will be good which won't create more traffic people will easily be able to cross.

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

If you don't introduce pedestrians to Cobram drive there will be NO NEED for a reduced speed limit. Eliminate pedestrians by using the existing underpass and let traffic move.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Less likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

You don't need one. There is a safe underpass from Miramar to robgatai that ELIMINATES the need for vehicle/cycle/pedestrian interaction. This proposal is a LESSER control.

**What is the primary way you travel through and around the area?**

Bicycle

**How important is it to make changes to improve safety on State Highway 1?**

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Has there been multiple accidents in this area to warrant a speed change?

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Surely an over bridge would be much more practical to, everyone using these streets. From 3:30pm everyday till 6pm this street is highly congested, a crossing will only impact more on this.

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Important

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

n/a

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

70 is fine

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Don't know

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Its a great bit of driving, a crossing will be awful. It is great to walk and has a great area. You dont really need to cross the street anyway. If you must and overbridge on tunnel wpuld be much better. And keep the speed at 70, only bit of road in wellington that is wide and flows well

**What is the primary way you travel through and around the area?**

It's 10km/h. What difference will it possibly make? Teach people to increase their following distances and remove all the bushes that lead up to the roundabouts on the median grass so people can see round them early on rather than at the last minute. Besi

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Much less likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Build a tunnel or a bridge. It's State Highway 1 for petes sake. No where in the entire world would they build a pedestrian crossing on a major highway

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

The current speed is a consistent and safe speed, modern cars have greatly increased safety features including better brakes etc, why then are we reducing the speed. There is also the concern that the accidents are generally caused by reckless driving, di

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

The fact that the road is a state highway therefore it should not have traffic lights, the effect the lights will have on congestion. Also the minimal number of accidents on the road and the causes behind the select few are not to do with speed, rather with pedestrians being forced to do dodgy crossings due to poor city planning.

**What is the primary way you travel through and around the area?**

Motorcycle/scooter

50 along ruahine st is a good idea and will reduce the tunnel jams a little.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

More traffic congestion, traffic stopping for pedestrians will cause ques to build, increasing the already congested mt vic traffic. Cobham drive is already busy but with two lanes eases the traffic jams a little, having a crossing will cause another bottle neck, which will most likely flow back to the already congested basin and tunnel issues. Bad idea, spend some more \$\$ and put in a pedestrian bridge like at Hataitai Park, please.

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Lower the speed to a consistent 50kn and put in red light speed cameras. There's no need for 60km when there are red lights and roundabouts within a few hundred metres of each other.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Don't know

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

An overpass is needed to remove the total risk to pedestrians crossing. The traffic backs up from the roundabout and also there are rear ends all of the time there. I would imagine adding a stop would just move the risk to the lights. Also 60km is still too fast for an approach to a crossing and it should potentially be a red light camera crossing due to the high volumes and to monitor compliance for stopping and speed in the area. I think a crossing will be more dangerous on that stretch of road given people will rush to the airport etc and people run red lights all the time given that I think its a very dangerous solution without any red light camera and 60km approach is way to fast.

**What is the primary way you travel through and around the area?**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Consider the drivers. Has the person who's made this proposal even been to this areas? At all hours? Ruahine is desolate half the time. Why make it take ages? Let Wellington be free. Why not make the speed limit 30kmh. Slower doesn't meen better

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Congestions, more congestions with lower speeds, cars will stay there longer. Make it 2 lanes both ways and then can lower the speed.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

A raised pedestrian access way will eliminate the need to introduce new speed limits or traffic lights which is going to exacerbate the already poor traffic and congestion in this area.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

The traffic is horrendous on Saturdays because there are many sports being played in the area. Traffic is often bumper to bumper from ASB Sports Centre round-about all the way to the traffic lights, despite there being two lanes. Adding a crossing and traffic lights is not the right option. An option which should be considered is building a pedestrian access platform built over the road, similar to pedestrian access around railway stations.

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Important

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

n/a

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

A bridge over the top Traffic jams caused by the crossing but also by proposed evelooment of hundreds of extra houses. This could be a major bottleneck Also earthquake resilience. Investing in an area that is prone to liquefaction might not be the best place to help in an emergency

**What is the primary way you travel through and around the area?**

Bicycle

**How important is it to make changes to improve safety on State Highway 1?**

Important

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

I regularly travel through the area to get to work or school

Cobham Drive/SH1 Speeds – September 2021

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Calabar Road being 60 makes no sense, this should also remain at 70

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

This is going to stop Wellington moving, there is hardly any foot or cycle traffic in the area needing to cross. Install an over ramp for pedestrians and cyclists and keep the speed limit the same. All this is going to do is create more traffic problems and cause drivers to speed more often

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Neutral

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

I regularly travel through the area to get to work or school

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Lowering the limit is counter-productive. If people can't drive, educate them, don't bow to the lowest common denominator.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

It will slow traffic and make cars take more risks getting to the airport.

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Neutral

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

Agree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Invest the money and effort to make it an overpass. Do not stop traffic flow in that area, it's already a bottle neck and you're adding further congestion with another stop. Make the effort to keep everyone moving with a pedestrian / cyclist overpass.

**What is the primary way you travel through and around the area?**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

This is unnecessary. There are no accidents at all on these roads. Where is the evidence that the current speed limit is unsafe? The speeds are safe and it would follow down the traffic flow considerably.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Currently pedestrians walking from from Miramar have no convenient way to cross SH1 to reach Kilbirnie. My preference would be for there to be some means of crossing in the section between the airport runway and the sports centre, ideally at the end of Jean Batten St. It's not clear why the proposed location has been chosen for the crossing. I see people jaywalking across SH1 near Jean Batten St (and do it myself) quite frequently, but struggle to think of a time I've seen people crossing at the proposed location. Part of the reason for this, I assume, is that the crossing at Evans Bay Pde already serves anyone coming from the west/city end. Another reason is presumably that there is no way to get into Kilbirnie from the section of road between Evans Bay Pde to Troy St because it's all fenced off from St Pats to the sports centre, and so pedestrians and cyclists have no desire to cross here. Were I to use the proposed crossing, coming from Miramar I would have to double back past the sports centre and then STILL jaywalk across Troy St to get to the part of Kilbirnie I would want to walk to. If the crossing is built, I can say with confidence that I will still continue to jaywalk across Cobham Dr to the end of Jean Batten St.

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

I am not sure of the problem you are trying to solve here? I use this area often - and on the northern side - there is not a lot of pedestrian movement - mainly cyclists - who still use the road. If you crossed onto the southern side - why would you? where would you be going? there is nothing on that stretch of road to entice walkers etc - you are basically creating a crossing to no-where!

**What is the primary way you travel through and around the area?**

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

That proposed crossing is raised, yet you expect cars to be able to safely drive over it at 60KM/hr?

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly agree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Silly idea. There is already a crossing at Evans Bay Pde and a nice under utilised bike way down Rongotai Rd. This will just add more congestion on Cobham Drive, which is already a disaster on weekends, especially with what is happening on wellington rd and future proposals for Ruahine st

**What is the primary way you travel through and around the area?**

Bicycle

**How important is it to make changes to improve safety on State Highway 1?**

Very important

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

I go to school or drop my kids at school or daycare in the area

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Cobram Drive is already heavily congested with traffic heading to the city, the airport & eastern suburbs. Putting a crossing & or traffic lights would make the journey in a vehicle a nightmare for commuters & slowing the city down for transportation as this is a main thoroughfare to & from the Eastern suburbs. Putting an overbridge on Cobham Drive for pedestrians & cyclists is the only sensible answer to keeping the city moving & keeping everyone safe.

**What is the primary way you travel through and around the area?**

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Speed limits on these roads has never been an issue, keep the same speed limits.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Neutral

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

An overbridge would be more practical than traffic lights/crossing on road, the traffic along Cobham drive is heavy at times, this would add to the congestion. If this goes ahead, three sets of traffic lights very close together.

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Low importance

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

I think the speed proposal for Ruahine St is very logical. That is an abysmally designed stretch of road, just rife with user conflict and a safer speed makes total sense... Maybe even a roundabout at the intersection between Hataitai and the recreation f

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

I think there's an opportunity to make the crossing at the lights with Evans bay parade better along with the link into Kilbirnie. The more logical place for a crossing is down by the end of the airstrip in flyover form... It boggles my mind that traffic engineers are still thinking that a crossing at Street level across a 4 Lane road is a good idea. It is the cheap and dirty option, but far from the best option. If you're worried about accessibility build the flyover with a gentle grade. No one bats an eye when you spend millions on a road, yet somehow something that will make active transport easier and more convenient is a luxury?

**What is the primary way you travel through and around the area?**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Agree dropping Ruahine St to 50kph. Part of the road is residential and should be 50kph. Will also help cars turning onto it from Hataitai Park/Goa St. 60kph fine for Cobham/Calabar.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

The proposed location is not helpful for people wanting to go to the eastern end of Kilbirnie/Rongotai from Miramar. They would have to double back from that location. I see more people crossing on the stretch between the two roundabouts than where the crossing is proposed. Also, why not put the crossing at the roundabout, so traffic doesn't have to slow down twice (once for the crossing and once for the roundabout). If placed east of the ASB roundabout, the lights for the eastward traffic could be before the roundabout (but retaining a green arrow for right turning traffic).

**What is the primary way you travel through and around the area?**

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Do not lower speeds on the main State Highway to the airport. If anything, set a variable speed zone so it can be slower during peak times, but for many going to the airport it is early morning prior to pedestrians and cyclists being on the road.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

As a resident in Kilbirnie rather than having a traffic light crossing it would be even better to have an over ramp or underground walkway for pedestrians and cyclists. Kind of like a structural half moon curved shape. Having another traffic light stop on that stretch of road will further add to the congestion that already occurs on that road and slow down commute times which are already painful in the area. And while I have the platform to have my say can I say how boring the new garden areas are in that area now. Where is the colour and vibrancy Wellington has for our visitors arriving? Where has our rainbow sculptures gone? Let's do something in that area to liven up visitors arrival into our awesome colourful and diverse city.

I think the proposed changes from 70kn to 60km are good, but I think Ruahine st could be 60km as opposed to 50km as there are other routes cyclists/ walkers can take for safety, but 60km seems good as it ties in with Cobham, avoiding bottlenecks

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

It needs a bridge. Not a traffic light crossing. Traffics already a nightmare around there and this will make it worse and with the proposed new houses going up in the eastern suburbs. The congestion is only going to worsen. There's mention that it's all about safety. Nothing safer than keeping pedestrians off that road entirely. Regardless of the speed limit, some people are going to speed on those roads. You see it there everyday.

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Fix the road. The speed reduction - if implemented - is not an adequate response to the core problem, which is the choke down to one lane and congestion from there right through the Mt Vic tunnel.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

There is no need for a crossing on Cobham drive. The new walkway along the harbour side is excellent for walk/run/bike to Miramar, and it is easy to get onto the right side of the road at the wind needle. Traffic flow will be negatively impacted by this proposal and it will encourage jay-walking.

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

This is a state highway so the speed as it is (70) should be kept traffic flowing. Furthermore, the speed limit is not the problem. I believe lots of the safety issues on this road come from the traffic congestion as the traffic has to merge into one lane

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

This road is a state highway, a pedestrian crossing does not belong on a state highway. Please consider spending more to create a walking bridge or an under the road pass. The Council has already spent lots of money on the cycle way on Cobham Drive, so it would make sense to spend the little bit extra to create an under bridge (under the road) or over bridge (over the road) that would be safer and create less traffic congestion as there is already a very large traffic problem. If this crossing is put in place I believe it would create more anger on the road and be unsafe for pedestrians as cars would not want to stop for it. I care about the safety on this road but this is not the correct way to improve safety.

The link to the proposal is broken: <https://lgwm.nz/our-plan/our-projects/cobham-drive-crossing-sh1-safer-speeds/have-your-say-cobham-drive-and-sh1-speeds/the-crossing-proposal/>  
The way that this survey is design is skewed towards providing answers that support the proposal, rather than truly allowing people to have their say. 1. Cobham Drive is a main traffic artery between the airport and the city. The current traffic flow at the moment is DIABOLICAL. I fail to see how sticking a pedestrian crossing right in the middle of it is the right solution. It will most likely cause more angst for drivers who are already stuck in long queues of traffic, plus put people in harm's way 2. Building an overpass is way better from a LONG TERM perspective. Yes it is more complex and more expensive, but it is the RIGHT thing to do. Often the right thing to thing to do is not the easiest or cheapest. 3. Future developments along Shelley Bay and to the airport will only add to traffic congestion. Any plans should be considering long term impacts of a number of factors, not just the immediate need.

A crossing exists further down at the intersection by Kilbirnie Park. Less traffic would be nice but the fact of the matter is that this is the road from the airport into the city and the kilbirnie sports centre isn't going to change that.

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

I like the idea but think the staggered crossing would put me off using it, unless it was very responsive to the button being pushed. The reason is a cyclist would have to wait twice to get across the road. The alternative of biking up the footpath to one crossing outside St Pats College would then be more tempting (even though not strictly legal). Also, I presume there is a bike path next to the ASB that leads to these lights? Otherwise they are fairly useless. Most people wanting to use the crossing would be coming from /going to the front of the ASB and surely would cross at the St Pat's lights. The idea would be to have the alleyway between Rongotai Road and the pathway to the new lights linking up, then cyclists coming from Kilbirnie and under the airport could join the Miramar cycleway.

area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Surely it would be wiser to consider an overpass if you are adamant on improving pedestrian safety rather than further congest an important stretch of road.

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Low importance

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to  
the Airport?**

I visit the area (e.g. to shop or visit friends)

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Don't see why the speed limits need to be reduced most of the time you are only going at 50 or less due to congestion on cobham drive - don't see the point.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Less likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Why is there not an overbridge for pedestrians and cyclists being considered. This would eliminate traffic and pedestrians having to stop at traffic lights. It will also reduce the congestion on the road that the proposed crossing will add to the already clogged road due to the merging to one lane at Mt Vic tunnel into town.

**What is the primary way you travel through and around the area?**

E scooter, skateboard etc

**How important is it to make changes to improve safety on State Highway 1?**

Neutral

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

You've got to be kidding right ?! The traffic getting in and out of the Eastern Suburbs is abysmal at best ... adding a crossing to the main outlet is only going to make it worse! Surely you know this ? If this is your pathetic idea to "get Wellington moving" then you're missing the point completely! The issue is not that there is too many cars travelling, it's that there's not enough road! Fix the real f'ing problem ... the Mt Vic Tunnel! There are more than enough walkway/cycleways if people are wanting to travel via other means and people who don't have an option but to drive should not have to pay the price

**What is the primary way you travel through and around the area?**

Much less likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Yes consider an over bridge instead of a crossing. It's going to create a lot more traffic jam and dangerous place for a crossing. An over-bridge is a much more safe way if you want to encourage more people to walk or bike. I will not use this crossing if it goes ahead because I won't feel safe using it.

**What is the primary way you travel through and around the area?**

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

I like it, but again concerned if it will increase congestion

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Much more likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Agree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

I'm a little bit concerned about the impact the crossing will have on congestion for the road. But hopefully it gets more people out of cars.

**What is the primary way you travel through and around the area?**

Bicycle

**How important is it to make changes to improve safety on State Highway 1?**

Very important

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

I regularly travel through the area to get to work or school

Cobham Drive/SH1 Speeds – September 2021

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Disrupting such a busy arterial road for the sake of saving people a short walk down the road to the existing crossing location doesn't seem like a good idea to me. Congestion would build up with traffic lights there, and traffic can already be a nightmare in that area as it is. An overbridge or underpass would be a much more suitable option.

People who walk or bike to Kilbirnie from Miramar can already safely get there by using the subway under the airport runway or using the crossing at the Evans bay parade intersection. Most people who commute to and from Miramar for work are usually traveling a lot further than to Kilbirnie. Adding a set of traffic lights would just add to the congestion. If there really is a need for another safe crossing why not put an over-bridge so the traffic can remain free flowing.

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Yes leave it what it is at the moment. It's a main road. People will still get injured or killed getting hit at 30kph. I believe the road should take far more priority over any cycle walk way. As it's used by more road users. That's pay for it.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

n/a

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Not important

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

It's a dual carriageway with separated east/west traffic. 60km/hr is a braindead move. One of the deaths you're using to justify the speed limit drop was a stolen car crashing into a tree, outcome wouldn't have been different regardless of the speed limit

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Less likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

It should be a <profanity> overbridge. Stop adding traffic lights to state highways

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Neutral

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

I visit the area (e.g. to shop or visit friends)

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Putting a ramped bridge in would also mean no changes needed in speed limits in this area .

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Agree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Have you considered building a ramped bridge crossing? There would be no need to effect people making there way to and from the airport. A ramped bridge as apposed to a step bridge would benefit all including cyclist and wheel chair use with little to no effect on people traveling through the area .

**What is the primary way you travel through and around the area?**

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Why???? There is absolutely nothing wrong with the speed limits!!! Focus your time and money on the real issues we face to get Wellington moving. For example allow people to get through the city quicker by trenching Karo drive as it was intended, bypassin

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Build an over bridge the crossing is a ridiculous idea created by people who obviously don't live in the eastern suburbs. We have lights at Evans bay already just down the road and a subway under the airport! I understand that access to the sports centre from the north side of Cobram drive would be safe but an over bridge would keep kids off the road completely and wouldn't impede traffic

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Never been an issue so why change it now. I've lived in eastern suburbs my whole life and it's never been an issue. Why change it now

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

That is the most ridiculous thing I have ever seen. Have you seen how bad traffic is coming to and from the eastern suburbs. That would cause havoc. Absolutely ridiculous suggestion. Build a bridge over the road if you want to take crossing safer. And if people are walking from Miramar to Kilbirnie they have the new waterfront track with a crossing at St Pats or the subway. Don't know who makes these decisions but it's the stupidest idea I've ever seen.

on these roads?**

n/a

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter  
for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the  
area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Yes when people are crossing traffic from the airport will back up and block the round about

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Important

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to  
the Airport?**

I only travel through the area when I'm going to the airport

Cobham Drive/SH1 Speeds – September 2021

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Agree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

A crossing with lights has potential to slow traffic in the morning even more than now. Cobham drive is already congested each morning from 7am to 9am and having people use the crossing e.g. to get to school could make it wayworse. Have you completed any studies around the traffic flow and what implementing a crossing would do?

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Neutral

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

n/a

Traffic congestion

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

A bridge over instead of lights. Traffic is bad enough as it is , this proposal will cause more issues

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Low importance

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

n/a

Cobham Drive/SH1 Speeds – September 2021
