I could not open the link above but consideration of placement between the roundabout the previous set of lights traveling west to east has been accounted for. The placement should not cause longer commute times to and from the airport.

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Important

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

I regularly travel through the area to get to work or school

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Agree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Adding traffic lights to a (proposed) 60km stretch of road will likely increase the danger rather than decrease it, and increase congestion in an already substandard roading system to the airport. The most effective solution to the crossing situation would be a ramp style bridge allowing both safe crossing for pedestrians, cyclist, push chairs, etc. while ensuring safe and smooth flow of vehicular traffic.

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter  
for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the  
area:**

Strongly agree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

I bike everyday. I use the existing crossing at Cobham Drive / Evans bay parade as it works well. Better idea is use this in combo with improving footpath on south side of SH1. Many people also use Kemp street anyway. It makes no sense / increases driver frustration to add a second crossing when one already exists

**What is the primary way you travel through and around the area?**

Bicycle

**How important is it to make changes to improve safety on State Highway 1?**

n/a

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

i don't think the speed should be reduced. There's a lot of salt spray on cobham drive and slowing things down doesn't benefit anyone. the main problem with cobham drive is that it gets jammed up to a crawl as people filter through victoria tunnel.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Neutral

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

I'm pretty sure people will still run across the road anytime there is a chance. it's windy and cold and people won't walk a long way to a crossing if there's another option.

**What is the primary way you travel through and around the area?**

Motorcycle/scooter

**How important is it to make changes to improve safety on State Highway 1?**

Not important

Should be 50km/hr throughout.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

A crossing is definitely needed but an overbridge, accessible to bikes/scooters/wheelchairs and walkers, would be a far better solution. There is going to be ever more traffic on this section of road given developments proposed in Miramar, future airport expansion etc. Ideally the location (of an overbridge) would be nearer the roundabout so people coming from Miramar can get to the Sports Centre and Kilbirnie easily.

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

The proposed crossing will require traffic speed reduction, but it will need enforcing. It needs speed cameras along the entire length of the road to make speeding without being caught impossible. Unenforced speed reduction might do too much harm - alr

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Agree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

The two separate crossings look like they are intended to operate independently, so pedestrians will have to wait twice, once in each direction. I fear this arrangement will result in more accidents, rather than reducing them, as pedestrians won't want to wait around so long. If the crossing is built, there will need to be speed and red light cameras to protect pedestrians from dangerous drivers. A bridge with ramps would be a safer and quicker solution, as well as being an interesting architectural feature.

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Yeah don't add lights just add a bridge, no stoppage to traffic and the occasional person crossing can just head over, considering there is already a crossing about 100m down the road I think it would be silly to add MORE lights. I bike and if I know I need to go to kilbirnie I go under the airport or just across where the kilbirnie park lights are. I think a bridge is safer as kids can run across and not out in traffic.

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Stop your war against motorists! Getting Wellington moving means making traffic flow better not causing more traffic jams by pointless crossings. What planet do you live on???

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Not important

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

I visit the area (e.g. to shop or visit friends)

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

n/a

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Much less likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

It is not needed. It is simple and safe for people in Miramar to cycle to Kilbirnie through the airport foot/ bike tunnel. My son has cycled through there since year 7. The proposed crossing will only make traffic to and from Miramar worse.

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Low importance

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

I regularly travel through the area to get to work or school

<b>NAME:</b> K Andrea	<b>SUBURB:</b> Other - Porirua	<b>ON BEHALF OF:</b> Individual	<b>ORAL SUBMISSION:</b> No
--------------------------	-----------------------------------	------------------------------------	-------------------------------

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

The speed hasn't typically caused many issues on this route but it needs to be thought in conjunction with the route vis sh1. Anything slowing down and already tedious route is not a good idea. It is an anomaly to have a higher limit for such a short road

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Given the increase in population and no train to airport, no airport flyer as it once was, I strongly disagree with the proposal. I would only accept an over head walk way and cycle path as is on sh1 in Paremata. The amount of traffic and poor design with one tunnel and lack of clear through way due to the basin and beyond means bottle necks all the time. This would significantly add to transport slowdown to the arterial route in and out of the city both impacting flights when they return to higher levels.

**What is the primary way you travel through and around the area?**

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Why is this being looked at? There are safe distances between recreational pedestrians and those cycling / walking to and from Miramar peninsula. The drop in speed only serves as Afghanistan to introduce a crossing that would only be used by a very small

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Is anyone even looking to cross here? Most users would be recreational going around the waterfront and would have already crossed at Kilbirnie or not at all. This seems like a cheap crossing option that would not serve many people and would generate even more congestion on a main route to the airport

**What is the primary way you travel through and around the area?**

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

This is a good idea, with roundabouts, the stretch doesn't really give enough space to achieve 70km/h

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Neutral

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Please consider introducing a bus lane or additional space for rapid transit through the space. Adding the island to the middle reduces the ability to add public transit lanes in the future. Due to the lane reduction at peak hours, there's quite substantial congestions and peak public services can't go through. The reduction in speed is good, and might help flow rates, but a reduction in cars can only be achieved through better more reliable public transport. If it takes 50min to get to the city on a bus during peak times, alternative options loose value.

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Yes, don't drop the speed limit. Keep it as is or increase it and install some barriers to keep pedestrians off the road. They can use an overpass. I live in Titahi Bay and use the airport all the time. There are other places walkers can cross, and there

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

A crossing of this nature is inappropriate. Cars \*must\* be able to continue to flow freely. If you want a crossing, build an overpass. For every 1 or 2 people and dog who uses this 'crossing' there will be 100 cars from all over the Wellington region slowed down in the interest of political correctness. Have your crossing, but don't slow down people trying to get to the airport.

A over bridge is the only sensible option. The traffic in this area is congested enough, adding lights will make it worse. It may be more expensive but it is the right thing to do. It's time to stop thinking what is cheap and start thinking what is right. Let's get Wellington moving, not slow it down further. If this goes ahead it just proves the council is clueless and does not listen.

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

The Ruahine stretch speed is largely controlled by traffic flow anyway (ie peak traffic max speed is often 15kph). What data is there (number of incidents vs quality of traffic) to support the need to lower the speed limit, other than a generic statement

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Neutral

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Traffic flow especially at peak times and weekends. How/where the crossing connects to other cycle/walkways on.kilbirnie side (does this actually promote using less cars or just more people walking the waterfront for recreation). How the crossing would be triggered especially at peak traffic times

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Don't know

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

I regularly travel through the area to get to work or school

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Forget about a pedestrian crossing. Consider an overbridge for pedestrians and cyclists. This would negate the need to lower the speed limit and will not disrupt traffic flow.

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

An overpass wouldn't require a speed limit change. I think lowering the speed limit when people are stressed on the way to the airport will frustrate people and possibly lead to more dangerous driving/situations.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Agree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

I don't believe we should be stopping traffic on this road, it will create mor congestion. A walkover that's wide enough for people to push bikes and prams over would be safer.

**What is the primary way you travel through and around the area?**

Bus

Have there been any accidents/injuries that this change would prevent? It will add at least a couple of minutes to every single journey from the city to the airport. That's years of people's lives when added up.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Are you guys actually insane? Ought to change your name to 'Lets Get Wellington Stopping'. The only justification for this seems to be to assist pedestrians walking from Miramar to the sports centre. With this crossing, it would still be an almost 2km walk from Miramar - down from only 2.6km via the Coutts St tunnel. If people aren't willing to walk 2.6km today, are they really going to be willing to walk 2km in the future? Bet you've not bothered to ask anyone. A quick google says 10,000 people live in Miramar, lets (extremely) generously say that this change would see 1% of people in miramar choose to walk to the sports centre once per fortnight. That's 100 trips per fortnight, or 2,600 trips per year. With an average walking speed of 5km/h over the 600m distance saved, this adds to 312 hours saved per year. Meanwhile, Wellington airport serves >6m passengers per year. If this change costs each passenger on average just 5 additional seconds - the cost will be more than 8,000 hours per year. It will be much more than 5 seconds for many passengers. I've just done this math in 5 minutes using google, how about you do your job and actually do some analysis of crackpot ideas before spending all this money on consultation. Wellington needs better transport infrastructure, not worse - how about you get back to focussing on getting Wellington moving!

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

I've always felt the issue with rushing st isn't the speed but the congestion people create by not merging correctly or not actually doing the the speed limit down the hill section causing it to back up to the lights.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

More likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

An over bridge crossing. I feel like adding a third set of lights along that road is just going to add to the congestion. Driving wise that road should be made as free flowing as possible. I do agree with a crossing but don't feel like a crossing light is the sulotion

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Important

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

The effect of congestion and getting to the airport. We should be making it easier to get to the airport not harder. No body is walking or cycling with a 23kg checked luggage

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Neutral

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Yes the effect it will do for traffic and accessing the airport? It's a state highway after all and getting to the airport as it is already is a pain with all the congestion currently. Lowering the speed limit and adding a set of lights would only making this worse. A raised walkway above the road would be much more ideal

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Important

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

I only travel through the area when I'm going to the airport

Cobham Drive/SH1 Speeds – September 2021

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

n/a

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

More likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

have a crossing point closer to miramar, not two crossing close together. an over ridge or underpass would work better, so that there is no wait time for anyone

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Important

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

n/a

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Strongly disagree, this his a road for vehicle (there is a safe cycle and walkway path on the side for others) , long straight lane, absolutely no reason to reduce the speed on those road sections. Thank you.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Reducing to 60 for the full area makes sense.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

I disagree that we would be putting a crossing in an area that already has so many light controls. The area is already very congested and I dont understand how putting a crossing in here "helps get wellington moving". We should be looking at options that dont impact travel flow like a bridge.

**What is the primary way you travel through and around the area?**

I would like to see the data behind the assumptions made in this proposal. How many people are currently not walking or cycling due to a lack of crossing? How many accidents have happened on that stretch of road? Basically, where's the data to show there's a problem we're fixing with this proposal. Traffic congestion is bad enough as it is without having an additional set of traffic lights. I would suggest that whoever is behind this proposal has not tried to get kids to sport across town from Miramar on a weekend.

I don't like the idea of traffic lights on this stretch of road; it means that using this crossing is a definite stop for vehicles and pedestrians alike. I understand that the traffic lights are the cheapest way to do it, but it seems to me it doesn't fit in with the normal traffic flow without a wider change.

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

What is the point in installing a crossing where no one is going to cross? If you really want cyclists to use the cycle ways, put an underground tunnel so you don't have to compromise car traffic as well.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

congestion, especially during rush hour. And please consider that your crossing is crossing to an area just about no one walks down. The other side also has nothing on it except the beach.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

I frequently drive down this area as well as bike down the strip. The idea that you would lower the speed limit in an already congested area especially during rush hour, is irresponsible. As a cyclist, I believe this money can be better spent elsewhere and, if anything, this proposal makes myself and those else who commute through this area lose faith in the council's ability to represent the interests of those in the community.

**What is the primary way you travel through and around the area?**

Walk

Neutral

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

It's not a visionary solution. And it will slow traffic down. Which is annoying for drivers. People and taxis coming from the airport are not going to walk or cycle - and that is a lot of traffic. What's really needed is a raised crossing over above the large central grass roundabout by the asb. This could be a real design icon and help create a unique entranceway to the city, especially for those coming in by air. And you wouldn't have to adjust speed limits close by. You need to go back to the drawing board.

**What is the primary way you travel through and around the area?**

Car

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits  
on these roads?**

n/a

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter  
for trips around the Miramar, Kilbirnie and Rongotai area?**

Much more likely

**The crossing is located in the right spot to help you get to where you want to go in the  
area:**

Strongly agree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Obviously a pedestrian bridge would be ideal. The crossing is good if this isn't possible due to budget etc.

**What is the primary way you travel through and around the area?**

Bicycle

**How important is it to make changes to improve safety on State Highway 1?**

Important

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to  
the Airport?**

n/a

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Yes, don't put a crossing across the road. Keep the speed the same

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Yes, this is the worst idea in traffic and pedestrian management in the history of wellington. One person crossing in peak traffic will cause traffic jams back throughout the entire city. That's how fragile our traffic flows are. A crossing that goes over the road is the only way to make this safe. Someone will get killed if it actually crosses the road on the ground.

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Low importance

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

I only travel through the area when I'm going to the airport

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

The route from the basin through the Mt Vic tunnel to the start of the new cycle way is the unsafe, unusable high risk area. Focus efforts there rather than where there is a great new separated cycle and walk ways.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

No I am fully supportive of slower speed limits around the city, especially if we are going to build new cycle infrastructure

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Agree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

why has a carpark been built on cobham drive near the end of the airport runway? i mean seriously its 2021 and we are still wasting prime public space by building a carpark. I think this is a complete waste of taxpayer money and is a complete contradiction to the rhetoric we hear from council on wanting to better develop our public spaces. Furthermore it creates safety issues for cyclists using the cycleway, and for motorists who are pulling in and out of a 70km/hr zone. There are already far too many carparks around this great city and we shouldnt be permitting more to be built. Think about how we use our precious whenua.

Less likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

This will significantly slow down traffic for a main route to the airport where there is already a back log of cars at peak hours. Anyone walking to the ASB stadium should take the safer route around the pak n save side. It is not a good to add a traffic light where the speed limit is above 60, causes more dangerous driving and congestion

**What is the primary way you travel through and around the area?**

Car

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Speed limit should remain at current speeds. You can only go that speed off peak. With all the in fill housing traffic will slow down even more. There is no need to have a crossing when an overhead bridge would be better. NZ/Wellington would be considered

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

You should not build a crossing there. I fully support biking and walking. Instead you should build an overhead pathway. If you want you can install a lift both ends for wheel chair users and buggies, like many places have overseas, in addition to a graduated path. Having a crossing would be a nightmare and cause drivers to take risks. This would not help the aim to reduce emissions.

This is ridiculous and will slow traffic immensely to Miramar and the airport. What was the point of the overpass in town if you do this? There is also a crossing on the corner of Kilbernie Park. I wonder if the people proposing this actually drive in this area on a daily basis. The majority of people using this road are travelling somewhere NOT within walking distance, a crossing will hinder more than it will help.

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

This does absolutely nothing to work on the real problem of airport traffic. Pathetic waste of resources for a capital city where getting to and from its airport can take longer than other large cities where their airports are many miles outside of the ci

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Who walks around this area other than local residents?!? The vast majority of traffic around here is to and from the airport. The city should be looking at ways of increasing throughput of this majority, not slowing it down to cater for a minority. Solving the wrong problem and making the others worse as a result. The motto of politicians everywhere.

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Neutral

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

A main aerial route to our only airport. Slowing traffic and putting in traffic lights when I overbridge would negate the need for either.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Much less likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Slowing traffic and putting in traffic lights on a main aerial route that is already heavily congested seems like we are just moving a problem. What happened to the proposed walkway to go over traffic so as to not affect traffic flow?

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

If a crossing is being installed to make Cobham Drive safer to cross, then does the speed limit on Cobham Drive need to decrease as there would now be designated safe place to cross the road?

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

More likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Obviously installing a traffic-light controlled crossing will significantly add to the already heavy congestion on SH1. An overbridge should be considered instead as this would keep car traffic and pedestrians apart (and would therefore be safer), and help to get Wellington "moving" like it so desperately needs to.

**What is the primary way you travel through and around the area?**

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Ruahine St has very low pedestrian traffic and almost no cycle traffic. I believe the speed limit should be lowered to 60, not 50 to remain consistent with Cobham drive and to help clear eastbound vehicles away from the Mt Vic tunnel to avoid increasing t

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

More likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Putting lights in is just going to cause the traffic to back up more than it already does. The crossing is also not in a very convenient place for people travelling to/from Miramar. I believe the crossing should make use of the roundabout outside the ASB centre on Cobham Drive and it should be a bridge/bridges linking the ASB, the Firestation and the waterfront shared paths via the roundabout. That approach keeps total separation between people and vehicles, has no impact on traffic flow, and makes it safer to access the firestation side of the road.

**What is the primary way you travel through and around the area?**

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

This area was once a LSZ changing this would only stall drivers who already frustrated.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Much less likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

You are slowly stalling the traffic. A crossing there is simply wrong. If a crossing is necessary then use an over bridge.

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Not important

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

I go to school or drop my kids at school or daycare in the area

Please do not change the speed. I think it works fine

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Why can't you build a bridge? Traffic is already so congested and slow I can't believe you want to slow it down even more. We are trying to get Wellington moving surely, not slowing. Very rarely can you drive at the speed limit as there is often congestion. On the days you can drive at a reasonable speed I can't believe you want to slow the traffic.

**What is the primary way you travel through and around the area?**

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Keep the traffic light crossing by Evans Bay and make that the main crossing point. 99% of people who travel to the sports stadium will drive because they need changes of clothes. If you put a crossing closer by more people won't cycle or walk just because. Money better spent on fixing all our failed water pipes!!!!!!

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Calabar Rd and Ruahine St dropping could make sense but not sure what the driver is behind that one - have there been serious accidents? If not, leave. The Cobham Dr should stay as is in conjunction with an over or underpass.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

You need to review the bridge design and cost

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

More likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Agree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

I am concerned with the calculations used re: the bridge cost. You have used 200 metre long ramps and 4 metres wide for a total m2 of 1,720. Why have you not used 80m long ramps and a 2 metre wide bridge for a total of 380 m2. This would be adequate and accessibility compliant. Based on your square metre rates this would reduce the cost to \$2.28M to \$3.8M

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

How many people are actually trying to cross there? I am not convinced that there is a demand - for example I often run/ cycle along the new pathway or drive on the road, and can only think of 1 or maybe 2 people who have wanted to cross over the road there. It's not needed

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

I suspect that the decision to lower the speed limit is driven by the fact that Waka Kotahi don't want crossings on 70k roads. But it won't make any difference anyway as the traffic will be so bad due to the crossing that it will be close to stationary. H

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

People will push the buttons and cross if there is a gap in traffic causing cars to stop when no one is crossing. A great deal of traffic going to the airport is people who have never been to the airport before. They are looking for the correct lane to get in and with this crossing will run out of room to do the lane change. This combined with the slower speed means that people on the crossing could get bowled as drivers will be looking for signs, not traffic lights and pedestrians.. At peak times traffic will build in both directions. Heading to the city traffic already builds back to the roundabout at the airport. I suspect that with this crossing it will go back to the airport exit gates. Traffic incidents will increase and effectively isolate Miramar more than now. Traffic even in Covid is already bad and often it is quicker to go round the south coast and over Brooklyn Hill to get to the motorway. It must be remembered that not everyone is travelling to and from the city. Have you considered the effect on emissions of all the stationary traffic? Most people walking or biking to Kilbirnie from Miramar already use the St. Pats lights or the subway under the runway. Very few, if any, will use this proposed crossing as it doesn't actually go anywhere. This crossing is likely to increase Miramar's traffic woes and in the worst case cause people to be hit by cars from trying to dash between cars more that they do now. This is probably the most ridiculously dangerous and harebrained scheme that LGWM has ever come up with. As far as I am aware more people have been murdered in Miramar than have been killed while crossing Cobham Drive in the 25 years I have lived here. I cannot support it and protest that my rates are being used for what can only be described as making a political

statement. What is needed is an enclosed bridge across the roundabout, not a half baked scheme that inconveniences thousands of Miramar residents and airport users.

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

I do not think changing the speed limit is going to make this any more appealing to cyclists or pedestrians

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Less likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

The morning and evening commute from Strathmore park is really slow and often backs up to the airport. Inserting lights will make the issue much worse. When I cycle to work in the summer I travel under the airport and through Kim ironies and around the bays. That area is quite exposed even during summer and I would probably still avoid it for my cycle commute

I travel up and down Calabar Road at least twice a day and have always found the speed to be safe. I can't recall ever seeing a crash / accident, nor have I seen any statistics which suggest the speed is dangerous. I would also note that the walkway is no

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

I strongly oppose the crossing that is proposed. There is currently no viable public transport option from the Airport to the City, which means people are travelling in private transport, taxis or Ubers to and from the airport. Traffic between the Airport and the Victoria Tunnel is almost always heavy causing significant delays (including when travelling by bus). Adding traffic lights and a crossing at the point proposed would only cause further delays (and I expect much longer than 15 seconds!). The weather in Wellington and particularly on Cobham Drive often means walking or biking is not realistic. We live in Strathmore Park, and if we bike into town, we go through the tunnel under the Airport and take the designated cycle route through Kilbirnie to Evans Bay. This route is safe and is more protected from the elements. Those in Miramar can go straight onto the walk way without needing to cross, or can use the tunnel under the Airport to get to Kilbirnie. The proposed crossing might be convenient for a small minority but is not necessary. The traffic using Cobham drive needs to be a priority and should not be outweighed by the minimal number of pedestrians and cyclists who might use the proposed crossing. Again, in the absence of a viable public transport option from the Airport, adding the proposed crossing is not going to encourage so many people to walk or cycle to town to the point that it resolves the traffic issues. While I absolutely support more pathways that are safe for cycling, that's simply not realistic in a city like Wellington with its unpredictable weather and wind which means cycling is often unsafe full stop. If a crossing was to be put in, it should be an overbridge so that it does not interfere with the traffic. Obviously this would be more expensive, but it would be money well spent instead of wasted on something that will just

cause more problems. On a slightly different but related note, it is quite frustrating that Wellington is proposing this when we have had a weekend of heavy rain, causing flooding and sewerage pipes bursting on our street because the Council has not invested in, or maintained our pipes. These are the things I would prefer the Council to spend money on.

Unnecessary change and will only serve to make the journey to the city even longer.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

The reason for the crossing seems based on the amount of people trying to cross Cobham Drive in an unsafe fashion. I am not convinced there are enough people wanting to cross the road to warrant the cost of installing a crossing in this place, and the expected disruption to traffic.

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Neutral

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

I visit the area (e.g. to shop or visit friends)

Agree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

It should be an overpass bridge. Adding a traffic light there will add congestion at the roundabout. This Drive is the main route to Wellington Airport. In the morning because of all of the flights that arrive, there is an abundance of taxis with one person in them clogging up this road. Adding a crossing will congest and already congested pathway. And overhead bridge is best. This mandate to have less emissions is great but there is no common sense being applied anywhere in government or local government. Not everyone can be on a bike. I have to transport 4 yr old daughter around and biking is not an option.

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Most people will speed because it's a ridiculous speed.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

I think it should be heavily considered not making a speed change, but rather creating an overbridge (like in hataitai to get to hataitai courts) and making it a sculpture of somekind (getting inspiration from Melbourne's stunning architecture. It could add so much more to the space and also keep people happy about the speed and inconvenience of a traffic light crossing that will slow them down.

**What is the primary way you travel through and around the area?**

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Please don't do anything that will make the traffic more congested. If you are on a bike it is no slower, even easier to go up to the lights at St Pats on the lovely cycle lane and across to Kilbirnie. Let's hope it doesn't turn out like SH 1 at Levin where people press the walk button then walk across in a gap leaving traffic banking up.

A pedestrian crossing will be incredibly dangerous and will just worsen traffic congestion near the airport. Rather than looking at this issue LGWM should be looking at the incredible increase in traffic in recent times in the area - taxis, ubers, rental cars - before Covid at times the congestion was just impossible and propose restrictions on private vehicle use with one occupant (70-80% are in this category). Please deal with the problem.

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

what amazing plans but i think it will cost too much.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

n/a

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Don't need crossing. Very few people use cycleways and footpaths. Council destroyed Cobham Drive and killed seabirds and lizards.

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Not important

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

I go to school or drop my kids at school or daycare in the area

Cobham Drive/SH1 Speeds – September 2021

<b>NAME:</b> Russell Bell	<b>SUBURB:</b> Brooklyn	<b>ON BEHALF OF:</b> Individual	<b>ORAL SUBMISSION:</b> No
------------------------------	----------------------------	------------------------------------	-------------------------------

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

There is no need to slow the traffic in Cobham Drive. Pedestrian/Cycle traffic is well separated from the roadway, though perhaps an armco barrier would ensure the separation was maintained.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Traffic halted by the use of the crossing will quickly back up and choke the roundabout, delaying traffic bound for Coutts street and also impede egress of Fire Engines from the nearby F&E Station

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Important

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

I only travel through the area when I'm going to the airport

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

60 ok but not 50 that'll really slow traffic to more of a crawl especially if you do introduce a crossing.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Neutral

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Impact on traffic especially peak and in the weekends. Adding this will likely slow traffic even further. Consider peoples' likely routes - they are more likely to stick to the north side footpath if they're going to/from Miramar anyway. Seems like the crossing is more for those who are warming up/down for sports at the sports centre.

**What is the primary way you travel through and around the area?**

Car

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

The Cobham Drive roundabout already backs up with traffic due to lights at Kilbirnie Crescent, adding more lights will only make this worse backing traffic further into Rongotai. It also doesn't help those that may be walking from Rongotai towards Miramar/Airport.

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Okay with suggestions

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

**DO NOT** build a pedestrian crossing across Cobham Drive which will only lead to more traffic congestion buildup particularly during peak times. It's already a nightmare getting to and from the peninsula at peak times, to be made 100's times worse if the Shelly Bay project is allowed to go ahead. Be creative and visionary and build a pedestrian over bridge at or near asb roundabout - it could have 2 entry points on sea side (one north and one south of roundabout) and meet in the middle (above middle of roundabout) where divides into two ramps to take people to either fire station side or asb sports centre side. It must be possible to do at such a gradient to cater for buggies, scooters, elderly, mobility impaired. Surely there are engineers, designers that can design such a structure and put this forward to ratepayers. I'm sure there are many such pedestrian bridges overseas that can be researched!!

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Very important

Very happy with the new speed limits.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

More likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

I think the crossing is a great idea, but I think it's in the wrong area. It needs to be by the airport runway on Cobham Drive so we can walk to Lyall Bay/Kilbirnie shops. Where you're having it we might as well just use the crossing on Evans Bay Parade. I hate having to walk all the way down there to get to kilbirnie shops though. I really want to be able to walk to Lyall Bay shops and Beach easily.

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Build a bridge. Traffic lights will add to congestion and providing a space for it will encourage pedestrians to cross, whether the light is red or not. A bridge may be more expensive but is much safer alternative and will have no impact on traffic flow, while allowing greater ease of use to pedestrians

**What is the primary way you travel through and around the area?**

I've lived in the area for 40 years and haven't seen a single accident on this stretch. Certainly not caused by speed?! Why fix a problem that doesn't exist - fix the bloody Mt Vic tunnel!

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Um - the bloody traffic jams we already have between Miramar and the Basin Reserve! This is just another blocker. No one needs this crossing; I ride between Hataitai and Miramar and while it may be a little more "convenient", it's not a big deal to ride or walk a few hundred meters to the current lights to cross and ride back if you need to. Fix the main traffic problems, don't just add another.

**What is the primary way you travel through and around the area?**

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

The speed is fine as long as you don't have a crossing breaking up to the flow of traffic to and from the airport. It is already gridlock in Mirarmar and Kilbirnie in the weekends and at peak times. You are doing nothing to address this.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

There is an opportunity to build an overpass for people to walk or bike across. Why is this not being considered? This is a main route from the airport, where traffic is necessary - whether it be public transport, vans moving goods, ubers/taxis etc. Why don't you focus on putting cycle and walking lanes away from main roads??? There was already a cycle lane on a road one block back - what in the world would make you want to put a cycle lane and a walking lane right next to a main access route to the airport??? I cannot understand your logic.

**What is the primary way you travel through and around the area?**

Bus

**How important is it to make changes to improve safety on State Highway 1?**

Low importance

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

n/a

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

It's not the right idea atm. With increasing population in Wellington and no increase of roading or public transport to assume lowering speed and adding a crossing to an already busy road is not going to make it safer. It is possible that it may become less safe than it already is due to driver stress and frustration. If that hasn't been factored into your analysis you are either not focused on safety or have incomplete analysis.

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Speed. Limits ok as is. No matter what speed limits are set there are drivers who will never obey the required limit. Along those lines Wellington has so many red light runners the crossing could prove dangerous!

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Much less likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Why not have an over bridge accessible for walkers and bikes. This is a major road to the airport traffic will get congested. Why so much space taken up by walking paths/cycle ways and gardens. Very poor design once again no consideration for traffic flow. Not every one can cycle or walk this cycle/walk way. Once again no consideration for commuters who are reliant on vehicals for transport.

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Build an overbridge to walk on removing pedestrians etc from the traffic flow of cars. It's already a 30 minute crawl from Miramar across Cobram drive in a car in traffic why would you delay the flow even more adding the risk of padestians on that part of an arterial route.

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

An at-grade crossing makes almost no sense to me and I don't even drive. I commute, either by bus or by walking from the city/Kilbirnie to Strathmore, once a week. If safety was truly your main concern here, you would spend the money to build an overpass. You are slowing down a state highway (35,000 trips for 250 users - maximum). If I was travelling from Miramar (or Strathmore) to Kilbirnie, or back, I would use the underpass under the airport as it makes for a less exposed trip. Personally, the benefits do not outweigh the costs.

**What is the primary way you travel through and around the area?**

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

If the crossing goes ahead then a speed limit change is logical; however, a pedestrian flyover meets the aim of granting more access to those who wish to use it without disrupting traffic flows along a stretch of road that already has issues with traffic

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Rather than placing a traffic controlled crossing shortly after/before the roundabout (where there is already a build up of traffic during peak times) have you considered a pedestrian flyover? This would allow ease of access for pedestrians, cyclists, etc while not inhibiting the flow of traffic.

**What is the primary way you travel through and around the area?**

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Please don't decrease the speed along Ruahine Street as 50km/h is far too slow outside of peak times.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Consider the impact to traffic flow, and the waste from stopping and starting driving. Rather than going with the cheap option of more traffic lights do it properly and put in an underpass.

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Neutral

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

I only travel through the area when I'm going to the airport

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

This will be great for walking around Ruahine Street - the current speed limit is very fast. It would be awesome to have more cycle and walking infrastructure around there too, so people can cycle through the tunnel then down to the Cobham Drive cycle pat

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

More likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Agree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

It would be good for it to link with other cycle paths through additional protected cycle routes, e.g. the route under the airport and with the Leonie Gill cycle path

**What is the primary way you travel through and around the area?**

Bicycle

**How important is it to make changes to improve safety on State Highway 1?**

Important

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Speed should be increased with traffic lights removed at Kilbernie. Complete delineation of cyclists/walkers without the need to cross at junctions.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Much less likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

SH1 shouldn't have traffic lights on it. It should be free flowing to get traffic in town and out of Wgtn. The details on the LGWM website are not in depth enough for full consideration. The details linked to in this takes the user to a LGWM error page. No statistics provided on the number of cyclists, walkers, etc. No information provided on the cost of the traffic light option. Only on the bridge option in an argument that the cost is too high. Also, cost/benefit analysis is to be taken on face value with no supporting info.

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Low importance

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Yes, put in a bridge so that you don't make traffic worse!! I agree it would be great to have a safe place to cross, but slowing traffic further will cause so much more congestion and make it impossible to live in the Eastern suburbs and work anywhere els

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

A bridge would be so much better!! It is already impossible to get off the peninsula in the mornings, this will make it sooo much worse!!! Please do not do this.

**What is the primary way you travel through and around the area?**

Car

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

I think 50 is fast enough for all of the city

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

More likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Neutral

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

It should be a bridge not a light, there is a strong need for a safe crossing but the traffic flow is already really bad so a bridge would be a much smarter option.

**What is the primary way you travel through and around the area?**

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Is reducing the speed actually achieving anything how many incidents are there that are caused by speed along this stretch.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Less likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

There is no gain from putting this in in the planned location people traveling from newtown or oriental to Kilburnie will not head that far down to then backtrack into kilburnie they will cross at the intersection evans bay parade and SH1 so no use will come from all traffic that direction. Also the risk of rear ends and near misses at this stop will be high as people are commonly distracted or rushing to the airport.

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

I strongly support a bridge or crossing. As a Cyclist and Walker who lives in Kilbirnie and would love to be able to reach the cycle trail, a coastal walk etc - I am Concerned about the lack of clarity re the Approach to the Crossing. On the seaward side a cyclist needs space to stop, press the button and start. If there are a number of cyclists eg Children they may impede the Cobham Cycle Path. On the Landward side there is No Amenity currently on the footpath, and no cycle track. What would be Essential is an Access to Tacy Street, a safe way for cyclists and walkers to get to the crossing. it would be Downright Dangerous and Crazy to have them walking by the busy Cobham Drive towards the roundabout, especially cyclists and walkers. With Far Better access and egress to and from the Crossing I am In Support. With no amendment on those elements, I wholly Oppose a Poorly thought out proposal. A Bridge over the traffic would be the only safe alternative.

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

I don't agree with Ruahine St going from 70 to 50, why not just make it 60 the whole way through so it's consistent and people can concentrate on the important bit of driving rather than trying to work out what speed they should be doing where (would stil

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

I think a crossing is needed and good that it will be raised (to encourage more careful driving around it) however from the pictures/map it seems WAY too close to the roundabout, which coming from that direction you're quite blind coming out of it, especially in the left lane. It should be moved further west otherwise there will be more accidents as cars slam to a halt (and no I don't think reducing the speed or good signage will help this - its just a bad location)

**What is the primary way you travel through and around the area?**

Car

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

If the crossing takes a few minutes to cross or is not convenient to someone's path, then they'll just do what they've always done and cross when and where they can. It will actually be easier to do so with traffic being slower. So, I don't think this crossing will be used by as many people as planned.

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

An over bridge would be better. Another set of lights when there are already lights outside st pats college and kilbirnie park will just create more stop start queues around the roundabouts on Cobham drive. Most people who want to cross cobham drive do so nearer the runway as they travel to or from the airport/Miramar south, or from Miramar to sports centre - the proposed crossing location won't stop this. Also PLEASE fix the intersection at ruahine street/Wellington road! It is near impossible to safely use this route to turn right either heading towards Newtown from ruahine street, or entering sh1 when coming from Newtown - many drivers rely on others illegally giving way from sh1.

**What is the primary way you travel through and around the area?**

Don't build a crossing! This is patently ridiculous and will place even more pressure on the flow of traffic through to town. You cannot expect families, airport travellers or people with limited mobility to bike. Please build a flyover so people who can bike and walk can do so safely without causing further traffic chaos. Win-win?

Make it an over path. This should really be an over bridge. People don't want to stop major traffic and they don't want to be the "only one" stopping traffic and having everyone wait watching them. Wellington needs more pedestrian over passes/bridges instead of constantly putting in traffic lights and cutting the road smaller.

**What is the primary way you travel through and around the area?**

E scooter, skateboard etc

**How important is it to make changes to improve safety on State Highway 1?**

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

not going to improve the traffic flow, look at the traffic congestion at 5-6pm from the airport going through the Mt Vic tunnel

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

build an over bridge for pedestrians, the traffic flow is bad enough now, let alone slowing the traffic more.....

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Low importance

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

n/a

n/a

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Much more likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly agree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

There needs to be an East By West ferry terminal at Miramar wharf, with a shuttle connection to the airport and ferry connections to town and to Eastbourne. This will reduce the amount of traffic that needs to use Cobham drive (and the Mt Vic Tunnel), and should have been part of LGWM's plans from the start

**What is the primary way you travel through and around the area?**

Bicycle

**How important is it to make changes to improve safety on State Highway 1?**

Very important

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

There is nothing wrong with the speed limits at the moment. There is sufficient berm in between directions and enough space before the pedestrian sidewalk to keep everyone safe.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

It will have a negative impact on traffic, when you consider the amount of people needing to cross compared with number of vehicles using the lanes - put an overbridge instead. Same result (pedestrians have a crossing point), less impact on vehicles on SH1. The current proposal is bound to increase traffic back through the roundabouts down towards Strathmore. This proposal won't keep Wellington moving; it will clog it up even more. If you are encouraging people to walk or use scooters, it isn't that much further to cross at Evans Bay traffic lights if need be.

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Low importance

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

This is a great idea. This is our coastal gateway to the city, slower speeds fit this purpose.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Much more likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly agree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Safe waiting areas for cyclists and pedestrians at the crossing clear of the main path. A widened path ( there is a narrow gravel path there already) connecting directly into the stadium carpark. This is a fantastic simple, cost effective, solution that has no adverse effects on tahitai-only benefits. While a change, any reduced speeds for vehicles are an overall benefit to the city and waterfront. Any small change in travel times is well worth the safety and experience benefits and will support the case for further PT options

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

The 70 km/h area that is proposed to become a 60 Km/h area is currently well separated from the new walking and bike paths, with no driveways coming from it. If this was to remain as such, with a BRIDGE for cyclists and pedestrians, there will be no need

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

A bridge would much better suit the road. Clearly safer, because of no interaction with motorists. When biking, I'd rather not be added into the mix of a congested length of SH1. Frustrated motorists will push limits on orange/red lights. A bridge with ramps is easier for all and keeps everyone moving.

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

I support the changes to 60km as we now frequently as a family along this waterfront track. Keeping it to one speed (60km/hr) is easier to adjust to for drivers - I think it would make more sense to make the speed 60km throughout rather than 70km/hr down

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Access to and from the Eastern suburbs is heavily congested at all times. Imposing a cheap short term crossing with lights will make congestion and travelling time significantly worse. A bridge is required for Cobham, keep the existing speed limit and a second Mt Victoria tunnel is urgent needed. Keep Wellington moving - please do not grind us to a crawl!!

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Neutral

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

I am not an eastern suburbs resident, although I do use Cobham Drive on a reasonably regular basis. The crossing lights need to be "on demand". i.e. default to green for traffic in both directions, changing to red only when the button request is pushed by a cyclist or pedestrian to cross to the middle section. Also the request button should not activate the red traffic light more frequently than say 2 minute intervals. The lights in each direction should be a-synchronous : i.e. pedestrian crosses to the middle protected area then pushes another request button to stop the traffic in the other direction, so traffic lights changing red in one direction would not simultaneously stop traffic in the other direction.

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Important

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

I visit the area (e.g. to shop or visit friends)

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Fully separating foot traffic from road traffic. Building a foot bridge across the road is a better idea to enable safer crossing of state highway 1. Cars, buses and other road users would also be able to move between the city and airport with less congestion and delay on this key arterial route from the Eastern suburbs.

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

This is ridiculous. As a cyclist, runner and driver who has spent my whole life traversing this area, the 70 km speed limits are required and do not create danger. Human error causes the danger and I have never been injured or died crossing at Evans Bay or through the subway which are the common sense routes to take. Your proposed plan is only going to increase congestion which is already the biggest issue in the area. Stopping traffic in this particular point as planned is also incredibly frustrating to see, the most free flowing and incredibly ridiculous point in the area to suggest a crossing which people will rarely use. Your suggestions do not provide statistical data on the amount of people who are expected to use this and the proposed vehicle congestion it will cause. This is one of the windiest points in the city, if people want to get to the ASB centre from Miramar they can take the subway or bus. That is what I do and it has never been an issue, in fact it makes more sense as it does not affect traffic congestion. If I want to go to the CBD I will utilise the cycle way. I currently live in Kilbirnie, your suggestion that Kilbirnie users need to cross at the proposed site in order to use the cycleway is ridiculous. We can use Evans Bay or the subway.

n/a

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Neutral

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Yes. Traffic will back right up into the roundabout and cause a standstill. An overpass would be much better suited. We don't need more congestion. With the proposed Shelly Bay development this only stands to get worse.

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Neutral

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

I regularly travel through the area to get to work or school

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

I understand the desire to reduce the speed limit on Ruahine Street as this is a shocking bit of road with one lane traffic travelling in each direction, several turning bays, and the dangerous intersection that runs down to the Hataitai shops near the Mt

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Neutral

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

This will have a significantly detrimental impact on traffic flow on a) the nation's main State Highway and b) the main arterial road to and from the airport. An overbridge is the correct option even though it is more costly. LGWM need to do things correctly and not expediently or on a restrictive budget as the cost of this proposal far exceeds the cost of development of a crossing or bridge. This plan would be of advantage to the very few while affecting the overwhelming majority in a significantly detrimental way.

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

I support reducing speed limits on ruahine st, it's seldom reached to 70 anyway and reducing it would make vehicles turning out from the side streets safer. But would be ideal if Cobham drive can stick to 70 and have an overhead crossing instead of traffi

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

I don't see a reason to change the speed limit. Most of the time there is so much traffic that you can reach 70 kph on Ruahine St and there's little residential housing and pedestrian volumes Cobham Drive or Calabar Rd.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

The ramifications? Or is this simply designed for when you've banned every car / vehicle you can? People are struggling financially, the traffic is backed up, and we're in a hurry to get from a to b, to get \$ to afford to live. If the cost of living wasn't so high do you think people would really be as opposed to such things!? If we don't have enough \$ for an overpass why not crowd fund? Set a target to be raised for an overpass option. People can put their money where they're mouths are then, yes? You the council can pay what was originally intended/ budgeted and we can add onto that. Seriously though an overpass? Make it artistic, combine art with function - incredible! Get Wellington Moving!

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Reducing speed doesn't change much. Wellington drivers will still drive terribly like they always do. Invest in driving schools to make the roads safer

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Much less likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Don't build it. Traffic needs to move smoother, the traffic is already manic as it is. You need to put an over the road walkway bridge. Your plans are rubbish

**What is the primary way you travel through and around the area?**

Bus

**How important is it to make changes to improve safety on State Highway 1?**

Important

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

I regularly travel through the area to get to work or school

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

I have just been to Tauranga and I saw the bridge near Tauriko, on State Highway 36. The bridge caters for cyclists and pedestrians. I can't understand why you don't have a bridge over State Highway 1 too. A pedestrian crossing does not provide the same degree of safety for pedestrians as a bridge does, and it doesn't help Wellington to keep its traffic moving!

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Lowering the speed limit on Ruahine Street will cause further rat-running on the parallel Moxham Ave. It may also increase traffic on Evans Bay Parade. This will increase danger for people walking in the Hataitai village. Moxham Ave and Evans Bay Parade a

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

More likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Agree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

I strongly support the installation of a useful crossing on Cobham Drive. If there are no budget impacts on other LGWM projects, preference should be given to a grade separated bridge similar to the bridges at Manor Park, Petone or Paremata. A bridge would minimise delay for pedestrians, bikes and traffic. There is space for a bridge mid way between Tacy St and the Troy St roundabout with 100m long straight ramps descending to Tacy St and to the seaward side of the Troy St roundabout. This will provide a safe and direct route for people walking and cycling between Miramar and Kilbirnie. It's important that the ramps don't zig-zag as this will increase the distance people will have to walk to use the bridge. Stairs or an extra ramp can be provided if there is demand to cross from the western end of Cobham Drive. If a bridge is deemed too expensive than a signalised crossing should be timed so that there is minimal delay to people wanting to cross Cobham Drive - otherwise people will take risks by crossing on a red signal.

**What is the primary way you travel through and around the area?**

Walk

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

As per my previous response, this will slow down traffic even more on this route which is already a huge issue. This will make busing from the Eastern suburbs into the CBD less desirable which is also necessary to get Wellington moving.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

The traffic build up on this road is bad enough as it is. This is the quickest route to get into the CBD from the Eastern Bay suburbs and with a crossing and reduced speed limit this is going to make it much worse. Even if you manage to increase the number of buses as opposed to cars on these routes, Wellingtonians will not opt for a bus ride over a car journey as this is already a very long and painful bus ride into the CBD.

**What is the primary way you travel through and around the area?**

Bus

**How important is it to make changes to improve safety on State Highway 1?**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Leave the existing speed limits the same, they work. A cycleway under a raised road is easy to do (best of both worlds). Keeping cyclists off road is the safest solution.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Changing ruahine to 50 is fine because most people do that anyway and it's single lane. Stupid to change cobham to 60. What's the point. It's double lanes with separation between the directions. I guarantee there have been crashes on them at road where a

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Much less likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Yes. You are idiots if you think putting traffic lights in there is a good idea. What a way to increase congestion and piss people off. You are going to people late for their flight running red lights and hitting people. Put in a pedestrian bridge.

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Neutral

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

I regularly travel through the area to get to work or school

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Adding a surface street stop light will naturally curb higher speeds around that area. Since SH1 is actually a highway/speedway, it makes sense to keep the traffic flowing out of the airport and build an overpass/overbridge to keep pedestrians/bikes out

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Much more likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly agree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Love the proposed location for a pedestrian/bike crossing. However, we do not want a street level stop light option. Please make an overpass/over bridge so there is no need to stop traffic as it is SO congested there already. This is much safer for pedestrians and bikes too as they will just feed directly onto/off of the overpass on to the side walk. Keeps foot and vehicle traffic flowing with no risk of injury of added congestion. With a street crossing, injury can still occur, especially at night.

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Very important

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

I regularly travel through the area to get to work or school

Cobham Drive/SH1 Speeds – September 2021

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

The proposed speed limits are more appropriate for the context than the current speed limits. The proposed speed limits are still relatively high by Safe System / Road to Zero standards for places where there may be side impact or vulnerable road user cra

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Much more likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Agree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

1. Please ensure that the crossing is set up using similar technology to the crossings in Lower Hutt, where the crossing phase is called immediately upon pressing the button if it has not been called for some time, and where the crossing phase is extended or shortened based on sensors that detect a person's progress across the crossing. 2. Please connect this crossing into a wider walking and cycling network to the communities and schools to the south. It should be convenient, direct, and legible.

**What is the primary way you travel through and around the area?**

E scooter, skateboard etc

**How important is it to make changes to improve safety on State Highway 1?**

Very important

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

I visit the area (e.g. to shop or visit friends)

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

The pre existing morning and afternoon rush hour traffic, won't slowing down traffic increase the build up? And also the way through the airport will be more populated if traffic slows, to get from Iyall bay to seatoun the fastest way is often through the airport as it is and a slower speed limit would make me go that way everytime...

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

The 70 zone is very useful and cuts travel times down. With traffic lights installed slower speeds shouldn't be necessary.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Much less likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

The location for the proposed crossing will mean that traffic has to slow for the traffic lights and then slow again for the roundabout. If you're going to make a change learn from past shortcomings in future thinking and do it properly, rip out the roundabout and put the traffic lights there so there's only one area traffic has to stop.

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Low importance

The speed limits are probably a good idea

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Less likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

That last statement and the way the questions are angled sounds like you've already made up your minds. I wonder how many other cities put a pedestrian crossing on their main route to their airports. The airlines taken no prisoners with check in times post-9/11. Cobham Drive is one of the busier pieces of road in Wellington. Putting a crossing in simply has to create a new bottle neck - like we need another traffic issue in the eastern suburbs. **WHY NOT HAVE A SUBWAY UNDER COBHAM DRIVE INSTEAD?? IT WOULD PROVIDE EMERGENCY SHELTER FOR WALKERS AND BIKERS, APART FROM ANYTHING ELSE.**

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

The crossing needs to be a flyover at the round about by the asb and fire station to allow all these options as I would also like to walk down passed the fire station. Having a crossing will also encourage jay walkers who decide not to wait for the lights to change. A fly over could be made as another cool art sculpture to blend in with the theme already in this area. Lights are a cheaper option but in the long term cheap isn't always best. A lower speed is in agreed with.

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Why isn't there a tunnel or overbridge being considered instead? The traffic has enough delays without the addition of more traffic lights, and frankly I do not believe the study results stating it would only add a few seconds on to the journey. Are the traffic lights going to be potentially activated every 2 minutes or so or is there going to be a delay between activation? Frustration with travel in the city is high enough without adding more delay, and having seen how some people run red lights this is increasing the risk to pedestrians as a lot seem to step out onto the road without checking that traffic is stopped. This is a disaster waiting to happen.

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Important

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

I regularly travel through the area to get to work or school

With my proposal the current speed limits can be safely maintained. Note that consultations like these should have details of the accident history, to enable sensible CBA.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

There should be no crossing point at all between Miramar and the Evans Bay Parade traffic lights for pedestrians or cyclists. Barriers are needed to stop people making dangerous crossings. Pedestrians and cyclists starting or ending their journey in Kilbirnie should use the intersection with the Evans Bay Parade traffic lights. This cheaper solution would reduce congestion, emissions and increase safety. An improved cycle path along Kilbirnie Park on Evans Bay Parade is the more obvious and better solution to make it easier for people in Kilbirnie, Lyall Bay and Rongotai to get onto the new path. The benefit to Miramar cyclists and walkers for quicker access to the Sports Arena is neither worth the cost to SH1 traffic, and indeed the increased risk that comes with an unnecessary stoppage for vehicular traffic.

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

The question here is, why is the speed limit being reduced from 70km to 60km when that current speed limit is quite adequate. Once again, is this proposal design to make it slower to get round Wellington. This is not a case of LGWM!

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

The WCC is spending \$226m on cycle ways around Wellington. Surely, some of this money could be used to design an attractive walking and cycling bridge over Cobham Drive to address access to both sides of the road instead of the current option. A bridge would be more practical and a commonsense solution to this one. The current option is designed to slow and stopped traffic between the eastern suburbs, airport and Central Wellington, thus making travel time even slower than it currently is. I can get to central Auckland from Auckland airport in 25 minutes in rush hour. Currently, it can take me 45 minutes to one hour to drive half the distance from Wellington airport to city in rush hour. While there is a safety aspect involved in the proposed design, this is not a case of LGWM. It's completely the opposite.

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

- 50km/hr is more appropriate. It's consistent with wider SH1 speed. - The road lane width needs to be narrowed dramatically to support the speed change. A sign won't do much in itself and crossing users will cross in fear than they cars will just speed

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

More likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Agree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Ensuring crossing users feed safe with dual light design. . i.e. enough space for xx pedestrians & bikes to accumulate before the other light turns green.

These s-type crossings are not easy for cyclists. You have to do a narrow turn with pedestrians and posts in they way. Personally I would prefer the crossing went in a straight line with a large fenced island in the middle. Making people turn and dodge obstacles at the same time makes it more difficult and harder. Def get rid of the lightpost in the middle.

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

If an underpass is provided for pedestrians, not a traffic light-controlled crossing, there is absolutely no reason to reduce the speed limit. Cyclists have their own safe pass and should be required by law to use it.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Don't know

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Do we need it? A pedestrian underpass would be a far superior solution, for both pedestrians and motorists. The proposed crossing and traffic lights is just plain balmy, and clearly designed to inconvenience motorists as far as possible.

**What is the primary way you travel through and around the area?**

Bus

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

I strongly support this proposal, and believe it could be even better with speed humps on the approach to the traffic controlled intersection. The positive benefits will be transformational for people wanting to walk and avoid the need to drive between Miramar shops, the ASB Sports Centre or Kilbirnie, and far outweigh any negative effects. As the Ministry of Transport has noted, pedestrians [and cyclists] are legally entitled to be on the road. Motorists have a duty to pay for the facilities needed to keep them safe from motor vehicles.

n/a

**The crossing is located in the right spot to help you get to where you want to go in the area:**

n/a

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Yes - an overpass! What on earth happened to that idea? I appreciate the need for safe crossing but traffic is absolute chaos along here at all times - it is rush hour at almost all hours, on any given day of the week. A pedestrian overpass would support safety and keep traffic moving.

**What is the primary way you travel through and around the area?**

Car

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

No speeds should be reduced

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

More likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Agree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

The at level crossing seems the least ambitious change that you can make. As a pedestrian the timings will all be set for traffic convenience so long waits and twice ... much like crossing to Wellington waterfront at present. Would have been nice to see something more ambitious, an elevated crossing of some sort to enable pedestrians and cyclists to have a seamless crossing.

**What is the primary way you travel through and around the area?**

Car

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Don't build a crossing, build an over bridge. A crossing is going to be inconvenient to stop at on what is an already congested road. I don't think it gets congested by people taking kids to sports in kilbirnie so not sure why you think this will solve traffic issues. I live in Miramar with 2 kids who do sports in Kilbirnie and I love the thought that we could walk or bike there. Alternatively there is the pedestrian tunnel under the airport that connects miramar and kilbirnie but it's be nice to link the waterfront too. Don't change the speed.

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

In your material, you have not made a clear case justifying the need to reduce speed limits, e.g. why Ruahine St should be dropped to 50km/h instead of being kept consistent with the Cobham Dr speed limit, nor why Calabar Rd should be dropped to 60km/h wh

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

It is very unlikely that the crossing itself would add only 15 seconds to the travel time. Using the crossing at the Basin reserve end of Kent Tce as an example, this takes a much longer time (at least 30s) from the orange light, to waiting for the red pedestrian light to finish flashing and the general traffic light to resume its green state. I also find it very hard to believe that there is less traffic in the proposed crossing location than east of the Troy St roundabout, since much of the traffic along Cobham drive would be turning off at Troy St to access the Lyall Bay retail centre - compared to traffic from Miramar & Seatoun. This is especially considering the greater efficiency in travelling via Cobham Dr than through Kilbirnie. It seems like very limited bridge options have been considered in the assessment of its unsuitability. Two concepts that spring to mind are the pedestrian overbridge at Plimmerton, and The High Line walkway in New York, in terms of using seemingly lightweight structure compared to the concrete slabs of the City to Sea bridge. Taking the pedestrian and cycle flow off the main road would eliminate accidents causing serious injury or death - which could still occur from red light runners if a crossing was to be introduced. Based on the questionable facts presented, I would strongly advise that a pedestrian/cycle bridge be constructed instead of a level crossing.

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

A crossing like this is not what is required. A bridge is needed over the roundabout. This way road traffic continues to flow and will reduce the build of vehicles. A bridge that crosses across Cobham Drive and access both sides of the road outside the fire station will make it safer for everyone that walks or bikes or with scooters. The pedestrian crossing is short sighted.

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Many travelling in cars will be slowed down in favor of a few walkers/pedestrians. Shelly Bay development will also eventually add to congestion as well. Reality is that many still need to drive over walking/cycling due to distance traveled, travelling with young children etc. Please build an overpass instead that helps walkers/cyclists but not at the expense of drivers.

The predominant transport users of that area are vehicles mainly because of access to the airport and because the Mirimar peninsular is quite a distance from town. Putting a crossing in the proposed location will cause bottlenecks on Cobham Drive and the surrounding streets. Backed up traffic close to a roundabout always causes problems so you won't just be affecting Coban Drive. Plan for the long term and build a pedestrian overbridge (with ramps for bikes) or an underpass. Putting a crossing in as proposed will have the opposite effect to the name LGWM - it is going to slow things down.

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

I don't have a strong view on the changes to the lowering of the speed as there is always so much traffic, you'd be lucky to go above 50km/h.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Neutral

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

If building a cross bridge is an option in the future, why are we wasting time and money on something temporarily? I am opposed to the crossing on such a significant road to the airport. Has a number count been done of how many people use either side of this stretch of road? it is not sensical

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

This crossing would increase congestion and delays for 35,000 daily road users in favour of an estimated 250 walkers and cyclists. It is on a state highway, which is designed for traffic, not pedestrians. There are other areas off of the main highway that would be a lot more sensible to add a crossing to, not to mention the existing tunnel which provides safe passage to the desired location already. Spend the money doing this up and making it lighter and more appealing to use

Every point in the state highway that adds stop-start impediment to the flow of traffic disadvantages transport efficiency/time and the economy. I expect the short term cost saving in not constructing an overbridge will be outweighed by the overall cost to Wellington businesses and the economy.

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

The current speed limits are perfectly fine as they are. If a SAFE crossing point is created (ie a over or underpass), and bikes and pedestrians are separated from the road, there is no need to modify the speed limit.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Less likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

The safest way to protect cyclists and pedestrians is to separate them from the road, not provide a stopping point for cars to (hopefully) stop to let the pedestrians and cyclists cross the road. Cars run red lights all the time, and this will be the case more here than anywhere else if cars are rushing to the airport. A separate crossing (over or under pass) is a far better - and safer - option. A simple bridge that can accommodate walkers and bikes is not a complicated piece of engineering, and the associated cost would be far less than the economic costs of congestion by holding cars up unnecessarily through an unsafe traffic light controlled crossing. Moreover, the cost of one life lost when a vehicle runs the red light and kills a pedestrian will demonstrate the foolishness of this proposed crossing. Cars and motor vehicles should not mix with cyclists and pedestrians. As a cyclists, I cannot trust cars to not run red lights and see it frequently. I would have no confidence in using a traffic light controlled crossing as proposed. Currently very few people cross the road because it is simply too dangerous - proven by the deaths of some who have crossed this road. A traffic light controlled crossing would encourage more people to cross the road, with only a questionable improvement in safety.

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Ruahini Street is unpopulated, and already has an overpass for foot traffic, making it hard to site safety as the reason for this change. Suggest making this 60, to match the rest of Cobham Drive.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Location of crossing will cause significant traffic congestion on the adjacent roundabout. This will increase travel time at peak times, and increase likelihood of accidents due to traffic queueing on the roundabout.

This project will do nothing to "Get Wellington Moving". There will always be a compromise between Safety and Speed Limits that enable faster travel. Carrying 35,000 vehicles per day the road from the Mt Victoria Tunnel to the Airport carries a significant amount of traffic and is no doubt heavily trafficked and congested in the morning rush hour and perhaps the evening too. Reducing the speed limits can only exacerbate this problem. Traffic congestion in the rush hour probably constrains the speed that traffic can travel at anyway so imposing further reduce speed limits can be a waste of time as it has been with the variable speed limit signs installed on the motorway north of the Terrace Tunnel. Carrying this amount of traffic, only two deaths on it in 10 years hardly makes the case that this road is unsafe, and it is questionable that the proposed amount of the speed reductions will make much difference to that anyway. 2 deaths in 10 years is a very limited sample. If you looked back a further 10 years would you see any more deaths? Traffic light controlled pedestrian crossings positioned in close proximity to roundabouts do not work well especially in heavy traffic when they can cause backing up of traffic around the roundabouts and for hundreds of metres before them. Roundabouts do not work well in heavy traffic conditions at the best of times and adding traffic lights controlling a pedestrian crossing will only make the situation much worse, as we experience in Johnsonville. If provision must be made for pedestrians to cross Cobham Drive that provision should be grade separated from the vehicle traffic, either as an underpass, or if rise in tide levels is considered to be a concern, as a pedestrian overbridge. Leave the speed limits as they are. The case for changing them has not been made !

Neutral

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

It seems your minds have been made up that you will be building this crossing, regardless of public feedback. I think it's a mistake. It's pretty clear that a level crossing will cause northbound traffic to backup into the roundabout, particularly during rush hour, which will cause backups on all entry points. This will affect public transport going into/out of Troy St, so this doesn't just affect car drivers.

**What is the primary way you travel through and around the area?**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

A better long term solution would be to build a pedestrian over bridge. This is the only viable route to the airport from most of the region and is SH1. Even if people aren't traveling in private vehicles to the airport they still travel this road

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Very important

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Given speed is a factor in every crash, and evidence of the severity of injuries to pedestrians and cyclists at higher speeds, plus the proposed increase in pedestrians and cyclists in this area, we would strongly recommend a maximum speed of 50km/h along

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Much more likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Agree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

We support a crossing that is at the same level as the foot/cycle paths, to make it easy for everyone to cross, including people with mobility issues. We support this being a signalised crossing, to help ensure drivers slow down and people can safely cross.

**What is the primary way you travel through and around the area?**

Bus

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

If a bridge is built then there is no requirement to change the speed limit. At least one of the deaths listed for this area was due to high speed well over the 70km limit, so not because of the current limit. However if LGWM go ahead with the pedestrian

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Agree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

I believe that a way to safely cross Cobham Dr is required, however the crossing is the wrong solution. A crossing is an expensive option for the benefit of a few walkers/cyclists compared to the unnecessary slowing of the traffic, and does not link well with the new cycle/walkway. A better and long term option in my opinion would be a bridge similar to the Hataitai sports field bridge. It would link the new cycle way and have no interruption to traffic flow.

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

The 70kmh speed limits have been in place for very many years. People generally manage their speeds on these particular roads sensibly according to traffic density. Slowing the traffic down permanently by speed limit reductions is not needed or justifiabl

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Much less likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

This is a STUPID idea. BEYOND the pale. I believe this has been thought up by people who do not live in the suburbs located on the Miramar Peninsula. We don't need traffic lights on this stretch as the congestion is already terrible, especially in the weekends with various sports events. Elevated crossings have been drawn before, shown before, and would be the safest and most effective addition to Cobham Drive. This is proven in various locations already, including crossing SH2 at Haywards, various intown crossing of SH1, and indeed in Auckland! This flat crossing with traffic lights is a stupid idea.

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

These roads are busy regional thoroughfares. A 70km speed limit is appropriate for these roads. Don't lower the speed limit.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

A ground level crossing is a bad idea. It will delay traffic and create congestion on a crucial regional route. Wellington is growing and there will be many more houses in the Eastern suburbs in the coming years, so the roading capacity will need to be expanded, not reduced. A pedestrian and cycling crossing is a good idea but it must be in the form of a well-designed bridge otherwise it won't be fit for purpose. Spend a bit more money and do it properly.

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Building a level crossing is a bad idea. Specifically for traffic flow. Traffic flow in this area is fraught already, the last thing traffic needs is another reason to come to a grinding halt. A level crossing would also mean that pedestrians have to wait until traffic stops. More waiting. The best long term solution that will encourage more use the area and everything else you're trying to achieve, is to BUILD A BRIDGE.

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

The existing crossing at the western end of Cobham drive is sufficient. Constructing a new crossing and traffic lights at the proposed location, and lowering speed limits along Ruahine Street will slow traffic to Miramar Peninsula, Rongotai, and the Airport in what is already a pinch point. As there doesn't seem to be another free text box for other comments at the end of this survey I'd also like to take the time to suggest that asking leading questions like "How important is it to you to make changes to improve safety on SH1?" should be narrowed to the context - safety should be of the highest importance to everyone, and committing resources to making safety improvements should be concentrated to areas of infrastructure that need them most, not in areas such as this where adequate cycle and pedestrian access is already provided for.

Why do we always have to opt for the cheap and nasty solution. It makes much more sense to have a pedestrian and bike bridge over SH1 here and that would encourage more people to use this pathway. People are going to run the lights here almost constantly making this much less safe for pedestrians and cyclists than a bridge solution. Please rethink this.

If you live in Coutts Street / Yule Street / Ross Street how do you get to the crossing other than walking round the outside of the Stadium. There are no plans for walkway from Rongotai/Kemp Street cut through to the crossing other than negotiating the cars parking in the ASB Stadium. This is unsafe. There are no plans/drawings showing how to get from the crossing to Tacy Street or to the ASB stadium. In particular there are no drawings how people with impaired walking will be able to access the crossing. There is no guidance on how people living behind the fire station will be able to easily access the crossing other than going a long way out of their way. They will continue to cross the usual way (area 2). Pedestrians are not protected from the weather one either side of the crossing or in the middle. Pedestrians are not safe from cyclists, especially if there is a cycling group. Alternatively if there is a group of children/cyclists they will spread out across the cycle lane which will be dangerous if there is a cyclist travelling a speed. There are no warnings to the cyclist to slow down. Whats to stop a cyclist going on the road and then deciding if the lights are activated going off the road on to the cycleway and going into waiting pedestrians. What are the crossing times. What if there is a group of children that take longer to cross than the lights allow. What is in place so that cars don't stop at a crossing without people on it - e.g. a passing pedestrian decides to just press the crossing light without intending to cross, or crosses before the lights are activated. What is the timing between crossing activities so the cars are not constantly on stop start if the crossing button is constantly pressed by pedestrians. It was mentioned that the pedestrian space would be elevated. How will wheelchairs be able to wait at the crossing if there is a slight rise to the crossing (not shown). How will this raised crossing impact the 'boy racers' on Cobham

Drive at night. They won't need to take notice of the lights or speed limit. This could have an unintended impact if they are to continue speeding along Cobham Drive. Has any analysis been undertaken on the potential diversionary tactics taken by cars to avoid the crossing and divert their journey through other roads in the Kilbirnie/Rongotai suburbs? It appears this plan has been designed in isolation of the places it is proposing to link up with. It is another piece of infrastructure in the Eastern Suburbs that hasn't looked at/joined itself up with the rest of the community spaces/access points. There has been negligible 'consultation' on this design. It was stated there were posters in the bus shelters. These were checked - non visible. There will be a lot of people who will be unaware of the proposal - especially those without access to social media. There has been a lot of discussion about an elevated walkway and the comment on this - ie cost is - only one of the reasons for not considering it. It would have been better to have provided the full picture - ie, it will only be considered AFTER decisions on light rail have been made. FYI the Eastern Suburbs have been asking for an elevated walkway since 2009 when the ASB stadium was being planned. It is disappointing that the ratepayers are again not being heard on this. An elevated walkway could have been planned/saved for/built at any time since the ASB was commissioned. And now we have to wait again for a decision that could take another 5 years to be made. Need some way of ensuring cyclists slow down when pedestrians are attempting to use crossing. Need a warning light like Petone off ramp.

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

These are sections of the road where traffic moves reasonably well at the moment so why the need to reduce speed limits.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Neutral

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Any crossing that is built needs to respect that the drivers are the greater users of the road which means that waiting intervals for pedestrians to cross need to be extended out to minimise the efficient flow of vehicles.

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Low importance

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

I don't mind the speed change, but I'm really worried the traffic lights are going to make the traffic coming in/out of Miramar even worse to navigate than it already is.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Why not a bridge over the road instead? If we have traffic lights here, I feel like we should look into how to help ease the traffic pains with Miramar. I really hate driving in and out of there now, it can get backed up for ages- sometimes it takes me 30 minutes to get from the CBD to here, and it can be almost an hour on the #2. This'll only get worse if Shelly Bay development goes forward.

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

It's a good idea to have a crossing, and that stretch of road is hard to cross. An overbridge would probably not be a good solution. My only design worry is whether the tailback from the crossing leads to the roundabout being congested.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter  
for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the  
area:**

Neutral

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Some form of shelter for people waiting to cross

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Neutral

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to  
the Airport?**

I only travel through the area when I'm going to the airport

Cobham Drive/SH1 Speeds – September 2021

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

No - just get on and change it.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Much more likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly agree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Just do it. Unbelievable this isn't already in place.

**What is the primary way you travel through and around the area?**

Bicycle

**How important is it to make changes to improve safety on State Highway 1?**

Very important

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

I visit the area (e.g. to shop or visit friends)

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

The stop lights will add to congested traffic at peak times using state highway 1 and the entries to the roundabouts. It might even encourage traffic to use the residential streets to get around the congestion. Has anyone though of the consequences rather than having a blinkered thinking about a crossing point. What about an appropriately designed overbridge - win win

**What is the primary way you travel through and around the area?**

Car

n/a

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Much less likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Pedestrian and cyclist visibility; the impact of stop/go traffic (and the "ripple effect" this will have back through the previous lights and to the dangerous intersection with the Newtown turnoff); the tendency of pedestrians and cyclists not to wait for favourable light changes but to risk crossing while the lights are against them, particularly if there is a reasonable delay between light changes.

**What is the primary way you travel through and around the area?**

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

There is no specific justification for this proposed reduction in the consultation document. The consultation document sights pedestrian and cyclist deaths as a leading driver for speed reductions, but this is neither a primary cyclist or pedestrian ro

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

There is no explanation of the travel directions of pedestrian / cyclists and total numbers identified as driving the requirement for a crossing in this location. While I support improving pedestrian and cycling links, I do not believe there is a demonstrable need for a controlled crossing in this location. The proposed location has no direct connection to any pathway/street on the southern side. An improved crossing at Evans Bay Parade/SH1 intersection to provide access from Kilbirnie to the new walking/cycle path would be more beneficial overall. Sighting a single pedestrian death in this location is not justification for this crossing and its impact it is likely to have on other road users.

**What is the primary way you travel through and around the area?**

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

You have obviously already decided to build it, why do you bother with the consultation?? The design will lead to people waiting to cross blocking the bike path, which will lead to cyclists going back on the road, and we're back where we started. Think bigger, and do it right the first time for once.

**What is the primary way you travel through and around the area?**

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

I don't have a strong opinion on the speed limit changes - but I would want to see more effort into reducing traffic friction between the peninsula and the CBD. NOT adding traffic lights!

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

I am a frequent cyclist and am all for cycling infrastructure, but I don't support this crossing. Traffic is already horrendous in this area, adding a crossing here will make it worse. This is a terrible idea. Please don't do this.

**What is the primary way you travel through and around the area?**

Bus

**How important is it to make changes to improve safety on State Highway 1?**

Important

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

**Please provide your comments on the short section of local road:  
 Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Build the second Mt Victoria tunnel and develop the well supported four lanes to the airport / eastern suburbs. A lot of the time the road is bumper to bumper so the speed limit discussion has limited benefit.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Don't build the crossing at grade. The traffic is already slow along this are of state highway. There are already two crossings at Kilbirnie Park. If a crossing is to be made it should be elevated above State Highway One. If an elevated crossing is not feasible maybe a fence along the median will stop people crossing the 4 lanes of traffic.

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Low importance

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Why - it's only a short distance? How many accidents or serious harm arises?

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Have other options been considered? Over/under pass to minimise disruption? I anticipate people will still cross at undesignated points across Cobham drive & this will make no material difference other than inconvenience the other road users - bike & motor alike (note plenty of cyclists still use the road as opposed to the cycle path)

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Current speed limits suits this stretch of road

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Less likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

I believe that this stretch of road is not suitable for a crossing . An underground walkway may be an option. Traffic is already banked up with two lanes running into one lane . A more long term strategic plan is required ir widening the tunnel. Cycleways are in and a crossing is not required .

Disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Conduct traffic modeling to understand impacts. The lights and merge at Kilbirnie park cause big tail backs, so if be concerned that introducing more lights would cause further problems. Look at how an overbridge could be made to work.

**What is the primary way you travel through and around the area?**

A crossing is a great idea but can it not be grade-separated to maintain vehicle momentum? While I appreciate the all-abilities access of a surface crossing, and the much lower costs, presumably a bridge has been considered and rejected? All the starting and stopping of cars for the lights will generate additional noise and emissions that detract from the 'active transport experience'.

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

I support the speed limit reductions; however for sake of keeping things simple would argue for a blanket 50kph speed limit. Make enforcement technologies (electronic signs displaying speeds and/or speed cameras) and devices to reduce speeds (i.e., spee

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

More likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Neutral

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Ensure the crossings are raised, and that the vehicle approaches to the crossings have speed cushions (with lights in the road) to reinforce the 50kph speed limit and motorist awareness of the crossing. Design the staggered crossing so that people / cyclists moving along the median between the two crossing sections are facing the oncoming traffic direction. Support any decision on the crossing location with a well designed connection to the cycle network in Kilbirnie.

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Maintain the current speed limits and there is a need to keep the traffic flowing

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Crossing is not the answer. An foot and cycle over bridge is better as it will impact less on traffic flow. The crossing idea will restrict traffic and there will be a continual build up of traffic being due to foot and bike crossing.

Be bold for goodness sake! Don't bother with an underground subway type thing, it'll flood and who would want to walk through that at night? Don't bother with a crossing either it'll just slow down traffic. Instead be bold and build a bloody bridge! Give it some real thought and make it look nice and quirky, like Wellington used to be know for. Make it a real entrance way to the capital, something we can celebrate and enjoy, something that says kia ora and welcome. Be bold and be brave, for the love of god!

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Again value the cost of lost time! As per before. Reducing the travel speed by 10kmhr means for the 10,000 cars a day an additional cost of time. This is not zero. If it is 5 mins extra a day across 10,000 cars assuming even only one per car that is \$60 m

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Stop treating cars as killing machines and start valuing the cost of delays properly. EVERYTIME someone pushes that crossing button is going to cost 5 mins of everyones time. 10,000 cars a day at \$20 an hour. Even once a day is \$60 million in lost time a year. if there are 5 such crossings a day that is \$300 million in additional economic costs A YEAR. ( $\$20/12*10000*365*5$ ). This is another complete was of money. Build a bridge or a tunnel!! Yes it is more expensive but it is even safer and has ZERO economic ongoing costs to car users. Safety for walkers and bikers is not of zero cost. It would be cheaper to pay for a helicopter for them if these maths play out.

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

I support an at-grade (road level) crossing of Cobham Drive. It can be done quickly and cheaply, and unlike a raised crossing, it will be accessible. I do not support a crossing that diverts pedestrians from the road surface and walking desire line via an underpass or bridge, neither of which are suitable at this site.

Why a crossing? Why not an underpass? Free flowing for cyclists, wide enough for cyclists and pedestrians in two different directions, or an overpass if the water is a concern. Either way, definitely make a crossing possible, but ideally without making pedestrians stand and wait, or cars stop and idle. Keep it flowing!

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Firstly, I think a crossing is 100000% necessary. I had a near miss not too long ago when a woman was crossing in the middle of the roundabout by the ASB Sports Centre--I had to slam on the brakes to avoid hitting her. However, I would strongly recommend utilising technology to detect the presence of a pedestrian / cyclist (rather than requiring a button to be pushed). Also, I would strongly recommend adding a 'flashing yellow' phase to the lights so that if a pedestrian isn't crossing (eg has already crossed in a gap or changes mind), vehicles can cautiously begin to circulate.

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Very important

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

I visit the area (e.g. to shop or visit friends)

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

the traffic is terrible as it is - slowing it down isnt going to help anyone

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

yes - what about the impact on traffic? how many people would actually use the crossing at the expense of impacting how many people in cars? build an overbridge if your going to do anything

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Not important

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

Why not build an overpass? There is nothing wrong with walking to the intersection!!! There is nothing but FENCE on the other side of the street! It's a nightmare getting to the airport now rather than stopping for one person to cross the street. Don't be cheap and do a crossing, do an overpass if you really care about safety

I would suggest 60 kph throughout this section is appropriate.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Chronic failures of the Wellington roading system are ill-defined through routes, many of the 'main roads' being cluttered with intersections, lights and crossings, encouraging vehicles to 'bleed out' into alternate distribution roads. This is incredibly inefficient and a result of poor planning and cheap options being taken to road management. The last thing we need is for the main eastern arterial to have a pedestrian crossing, when the path north of it (Evan's Bay) is primarily a commuter route (for bikes) and secondly a recreation path (for runners, bikers etc). It is not sensibly used to access the Rec Centre or anywhere else on route, and likewise the needs case to reach the north-side path mid-way along is rare. It is weak justification to work the northern/Evan's Bay path into a pedestrian 'network': it is an exposed, rugged pathway whose primary users are happy to access from either end. It is never going to be a joyous family playground for toddlers! Unfortunately, some may lazily take 'short cuts' (who for the most part could have taken the legal crossing near Evan's Bay Marina), but this is inevitable for busy roads near built-up areas. Alternatively, should a crossing be deemed to have a high user case (not well demonstrated here), build a pedestrian/bike overpass: no more cheap solutions.

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Unsure why. As a daily commuter the roads are 'safe' when not congested at current speeds, and speed becomes self regulating as traffic builds.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

We are a manufacturer in Miramar since 1978. This latest plan further complicates and slows the traffic which is necessary for our business, travel to work for employees, and travel to meetings. It defies logic in a commercial sense to be adding traffic lights on State Highway 1. Perhaps 4 lanes to Shelly Bay and then bridges to the stadium would relieve congestion through the city and preserve the eastern bays environment.

Agree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Yes, Don't build a crossing.....Build a bridge!! Adding a level pedestrian crossing at this location is madness and backward and old school thinking. This is SH1, not some side street. It will slow down traffic and likely cause more accidents. If it's good enough for Auckland to get a new pedestrian bridge across their harbour then NZTA should step up and fund one across Cobham Drive!! This could be a real opportunity to build something special as a gateway to the city. Don't build a level pedestrian crossing.

Don't know

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

1. Signage (footpath/cycle lane & posts) on both sides of the crossings for visitors to navigate their way to the applicable suburbs e.g. Kilbirnie/Lyall Bay/Hataitai/Evans Bay/Oriental Bay/Miramar etc. 2. Before money is spent on the permanent solution, whether the proposal could be temporarily implemented somehow and monitored whether it would work or needs tweaking. We don't want another cycle lanes debacle where I still see the majority of cyclists using the roads instead of the designed lanes. 3. Sometimes disabilities or age may make crossing slower than the average person, so will there be a countdown clock and a sound on both crossings to help give an idea of time left - not so we can rush but sometimes if the drivers see them in use they're a little more patient. Just another level of security for the user like they do in the CBD since their introductions.

Traffic flows and safety of other users.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

The impacts on the traffic flow to and from the airport/eastern suburbs will slow down if the proposed crossing is installed. Consider an overbridge for pedestrians & cyclists similar to one one across Ruahine Street, rather than the traffic lights. This will not impact on the vehicle traffic.

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

There is no need to do 70 on Cobham Drive anyway but it would be crazy to go from 70 to zero for a crossing

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Much more likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Agree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Crossing now is impossible without risk and also because there is no way of getting on or off the cycle way without kerb jumping except right into the guts of the roundabout. I currently avoid the cycle way because I can't cross

**What is the primary way you travel through and around the area?**

Bicycle

**How important is it to make changes to improve safety on State Highway 1?**

Very important

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

n/a

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

I'm generally supportive of the proposals in relation to speed and the new pedestrian crossing. I don't live in the area, so wouldn't benefit directly, but as someone who sometimes drives that stretch of road, I am happy to support these improvements.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Given the congestion most vehicle are not getting to limit.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Much less likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

With a crossing at the proposed site is more of a hinderance then help. How many people are likely to use it? Any survey to gauge the numbers? Without solving all the issues further upstream this will just create more congestion here. There are crossing at the light and this where people should be using it.

**What is the primary way you travel through and around the area?**

Car

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Makes sense given the crossing suggestion is on SH1 between two slow points of a roundabout and current traffic lights (and I note the consistent speed limit starts/ends alongside the road parallel to the runway)

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Agree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

I do wonder if the way this is being done will actually be challenging to improve safety given the historical higher speed nature of the road, people run red lights (just like any crossing I suppose). Would an overpass be better? But that would not accommodate physically impaired (but no different than today).

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Neutral

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

The fact that there are traffic lights and a safe crossing space a few 100 meters to the west, that this is already an extremely congested and frustrating traffic spot, especially at peak times; that this road is likely to be ripped for the infrastructure needed for the proposed and approved Shelley Bay development so why invest money before then? Also this is an extremely windy and difficult area to run and cycle, the amount of predestination traffic is not proportional to the cost and disruption of this change.

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

No need to reduce the speeds. Please provide data on accidents and injury on this section of road related to speed.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Much less likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Build a bridge or overpass please. Traffic is slow enough as it is. Cars are not going away and EVs are also non emitting. It is great to encourage walking and cycling but for most the only way to get the airport is car or bus

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Don't know

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

Other

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Keep the speed limit as is, but ensures pedestrians/cyclists are completely separate from the road via a bridges and/or underpasses so all traffic can flow efficiently and safely. We want to reduce cars, but keep in mind this road is state highway 1, it's

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

More likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Agree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Agree there needs to be pedestrian and cycling access along this route, however the road is also the main artery from the CBD to the Airport and eastern suburbs. A shared pedestrian/cycling overbridge of some kind would be a better alternative as it would be considerably less disruptive to road traffic while providing safer and easier access for pedestrians. We need to be separating cars and pedestrians/cyclists wherever possible, this is particularly true for the busier roads. That way all transport traffic can flow.

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Important

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

I only travel through the area when I'm going to the airport

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Slowing things down is fine but not clearly necessary but a crosswalk is not needed for the few people who would use it. This is not a clear route to Kilburnie anyway and even if you came from Miramar it would be easier to go under the runway.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

No reason to spend money on this, they can walk near St Pats. This will only slow a difficult area to drive as is. I ride a bike to work and would be upset that when I did need to take a car it would make it more difficult. Surly there are better ways to get Wellington moving then this plan.

**What is the primary way you travel through and around the area?**

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

the road speed will continue to be fine if you get a grade separation crossing. The new seaward side cycleway has hardly been given a chance to see how it impacts cycling and walking behaviours, try studying it first

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

yes, this is a cheap solution that will massively impact the vast majority of travelling public, including those using public transport, not just here but at peak hours no doubt right through to the terrace tunnel, central wellington etc and to all those trying to get to and from the airport and eastern suburbs. There must be a reasonable way to get grade separation for this passive crossing that have not be presented to the public

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Important

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

I visit the area (e.g. to shop or visit friends)

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

This road already has a very high design speed and does not feel like a 60 km/h zone. Please narrow the lanes to increase compliance with the lower speed limit.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

More likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Agree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

A straight crossing would be better than a staggered crossing, especially for cyclists. In Christchurch, there are examples of dual crossings where cyclists have a straight crossing and pedestrians have a staggered crossing. Please use this 'Christchurch type' design.

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

n/a

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Neutral

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

I think traffic lights are a bad idea. I would much prefer a raised walkway separate to the traffic like the one just before the Mt Vic tunnel. If I am cycling to Kilbirnie from Miramar or Strathmore I use the tunnel under the runway. The stopped traffic that the lights will create will make it more car fumeey and less nice to walk and cycle along the new cycle path, as well as probably increasing emissions.

n/a

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Agree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

How many people(cycling, walking) are actually using the crossing Traffic already hectic in the mornings and late afternoon and even over the weekends between 12.00 noon and 3pm, and putting a pedestrian crossing with traffic lights will just cause further disruption and frustration for motorists, especially those coming and going from the airport.

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Important

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

I regularly travel through the area to get to work or school

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

If there were an over bridge, as in Ruahine street currently, there would be no need to slow traffic and make the journey to the eastern suburbs longer.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Neutral

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Building an overbridge as the roads to and from the Peninsula is congested enough already and will continue to worsen with Mt Crawford and Shelley Bay developments.

**What is the primary way you travel through and around the area?**

Car

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Honestly just commit to 50 - it's so slow down there anyway. 60 is still an unsafe speed for pedestrians, and slower than what car users would want. So what's the point?

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly agree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Light rail/MRT in the future...? I don't see enough bravery to put a tunnel through Mt Albert and then expanding the tunnel under the airport from Coutts St (which is a great option) sooo... those images of light rail down Cobham Drive - is that a fantasy as well? 4 lanes to the planes is still better than a non-existent MRT system - and at this point the crossing (albeit very small) doesn't take into account either option

<b>NAME:</b> Melanie Young	<b>SUBURB:</b> Miramar	<b>ON BEHALF OF:</b> Individual	<b>ORAL SUBMISSION:</b> No
-------------------------------	---------------------------	------------------------------------	-------------------------------

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

There is really no need to reduce the current speed limit as it's a double lane straight stretch of road with no crossings, so no one should be crossing the road here.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Neutral

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

I feel an over bridge (to cater for walkers/runners/cyclists/prams) would be better in this case rather than a traffic light crossing. I can see cars getting backed up and holding up the roundabout if a crossing was to be placed here.

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Important

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

I regularly travel through the area to get to work or school

Cobham Drive/SH1 Speeds – September 2021

<b>NAME:</b> Rebecca King	<b>SUBURB:</b> Hataitai	<b>ON BEHALF OF:</b> Individual	<b>ORAL SUBMISSION:</b> No
------------------------------	----------------------------	------------------------------------	-------------------------------

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

The speed limit changes sound great. At the moment Hataitai is very cut off from Newtown for pedestrians, largely due to the speed and volume of cars on Ruahine St. Hataitai and Newtown are also not easily linked by bus without having to cross this road i

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Much more likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly agree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

I regularly walk or skate between Hataitai & Miramar. The new cycleway is brilliant but I agree that crossing the road in this area is scary. I've only felt to cross here once, late at night. This crossing would be a gamechanger.

**What is the primary way you travel through and around the area?**

Walk

**How important is it to make changes to improve safety on State Highway 1?**

Very important

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Maybe think about what the point of it is as you haven't expressed a good reason for it. The costs are self evident so if the benefits, that you're unable to express, don't outweigh these costs then you shouldn't do it.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

I don't think traffic dynamics have been properly taken into account. The impact of stopping traffic is more than the delay at the lights. This is indicative of the light weight analysis of the whole project. Why on earth would you put a crossing over one of the busiest roads in Wellington when you should be trying to improve traffic flow on this route. It a proposal of wishful thinking over common sense.

**What is the primary way you travel through and around the area?**

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Obviously none of you live in this area!! This proposal is absolute insane .. As it is it can take an hour to get to Wellington in rush hour traffic .. Stop this madness!! Remember you work for the people in Wellington, start doing what your paid to do!!! Get Wellington moving! If you insist pushing Your green agenda will have you out of office next council election. Stop and listen to the people, and don't forget you work for us!!! NO ONE apart from the greens want this, there is enough crossings in the area! .. If your really worried about a crossing, build an over bridge!! Your council is absolutely ruining our beautiful city!!

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

This is a residential area where drivers feel empowered to travel at high speed because of the width of the road. This move will redress that effect, to a degree.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

More likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Agree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

The current situation sees cars and trucks intimidating anyone thinking of crossing the road to get to the ASB arena and other sport in the area. The organisation representing those who make money out of that intimidation then use their successful bullying as justification for not doing anything to slow down their members. The Road Transport Federation represents owners and drivers who expect to be allowed to use the size of their vehicles to bully others out of 'fast' roads such as Cobham Drive. This proposal represents an opportunity to redress the imbalance.

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Very important

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

I visit the area (e.g. to shop or visit friends)

Cobham Drive/SH1 Speeds – September 2021

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Not fussed, I like it the way it is now but have no strong feelings either way.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

More likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

I don't like the idea of a traffic light. I would prefer a pedestrian overbridge or tunnel passage. I feel that is a safer option for pedestrians. The light still relies on motorists paying attention and the light will likely increase congestion and minor motor vehicle collisions.

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

The dumbest, most brain dead idea to put traffic lights there. If people must cross build an overbridge! You will NOT stop people driving their cars around Wellington by doing your best to make driving more painful. People drive cars because public transport, and Wellington weather are both abysmal!

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Not important

Disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

The traffic on Cobham Drive in peak hours, all week not just Monday to Friday, can be horrendous; adding a traffic light, adding to the queues, seems more hinderance than help. Even if it is the kind of light that only triggers the lights when activated by a pedestrain, i'd hate using it knowing i'm adding to the backlog of cars.

More likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Consideration for another crossing beside the runway (outside Carter's) as I've encountered every week pedestrians and cyclists trying to get across or crossing here. When walking to or from Kilbirnie/Rongotai/Miramar even I'm not going to want to walk all the way down to the proposed crossing just to head into Rongotai, the Eastern Rongotai Rd area or vice versa. There's been a lot of near misses here with pedestrians and cyclists taking chances.

**What is the primary way you travel through and around the area?**

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Slowing traffic will only increase commute times and frustrate traffic. This frustration will lead to increased danger to pedestrians. Slowing traffic and increasing commute times should not be favoured above separation of traffic from pedestrians.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Much less likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

The crossing needs to be raised above, or lowered below, the road to truly separate pedestrians, cyclists, and scooters from the traffic.

Consider providing centrally mounted traffic lights above the carriageway for better visibility to drivers. How high will the crossing be raised above the road surface. In theory a raised crossing is fair in lower speed situations, but not on a main arterial route where it would have too much negative effect on vehicles. Getting the crossing visibility and traffic lights right is the key.

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

The speed dies not need changing. Most of the time it is to congested to travel the current speed limit. How about actually building a better roading system to the airport.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

This is a ridiculous proposal. Focus should be on improving SH1 carriage way to the airport. Not putting a pedestrian crossing on SH1!

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Important

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

I only travel through the area when I'm going to the airport

for trips around the Miramar, Kilbirnie and Rongotai area?**

More likely

**The crossing is located in the right spot to help you get to where you want to go in the  
area:**

Neutral

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

As a cyclist riding from town to ASB or the airport, once I've crossed the crossing, do I have to use the footpath to get there? I can't ride on the road against the flow of traffic. How well will this work with other pedestrian users, particularly given this number is likely to increase?

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

The link above goes to a "page not found"! Don't decrease the speed limits as this is an arterial route to the airport. Instead separate pedestrians and cyclists from the roads and provide bridges or tunnels for crossings.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Don't know

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Don't put in a crossing that stops SH1 traffic going to the airport. Put in a pedestrian/cycle bridge or a tunnel.

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

You may as well change Cobham drive to 50 as well, especially if there will be new lights part way along. It will be easier to remember what the speed limit is if it is the same the whole way through. I doubt reduced speed limits will add any time to trav

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

More likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

There is an existing crossing at the lights at the intersection of Cobham drive and Evans Bay Parade. Rather than adding more lights and creating another place to congest traffic, to me it would make better sense to build another portion of cyclepath along the other side of Cobham drive, past St Pats and Placemakers, to connect in to the ASB centre. I am all for the new cylcepaths, absolutely love them so thank you for prioritising them

**What is the primary way you travel through and around the area?**

n/a

**Is there anything we need to consider before we make a decision on new speed limits  
on these roads?**

n/a

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter  
for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the  
area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

An over bridge instead of a crossing. People need to get to the International airport. People can cross the road at the earlier crossing

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Neutral

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to  
the Airport?**

I only travel through the area when I'm going to the airport

Cobham Drive/SH1 Speeds – September 2021

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Consider making Ruahine 60 rather than 50, if only for the sake of consistency. But also because 50 is just inappropriate for that road

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

More likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Agree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Consider getting funding from central government for a pedestrian overbridge. Cobham drive is a major road and should be treated as such

**What is the primary way you travel through and around the area?**

Bus

**How important is it to make changes to improve safety on State Highway 1?**

Neutral

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

I visit the area (e.g. to shop or visit friends)

You should consider an overbridge as this will be safer and will not stop traffic flow. I read that you did not even look at the overbridge. How do you get traffic flowing when you have so many traffic lights. Also with the development of Shelley Bay traffic is going to be worse

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

The speed limits need to match the road condition. If the roads remain the same, the real world speeds won't change - or not enough. Please consider changing the environment to encourage slower speeds.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

More likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Agree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Yes. Please consider the level crossing a short term solution, with the possibility of a bridge not completely discounted. A bridge would not only avoid delays and be safer for all users but also be a great (local) tourist attraction - watching planes, overlooking the bay and the new paths. A second crossing between the two roundabouts should also be considered. Many people walk from the airport and end up stranded on the Kilbirnie side. A crossing near the airport end would help them get to the path and vice versa. Giving people a nice alternative to driving to the airport. Also with a level crossing, traffic flows from Miramar will run more freely making it more difficult to enter the roundabout from Kilbirnie. This is already tricky at the best of times, but with the disruption in city traffic it will become worse. A second crossing may create breaks in this traffic helping Kilbirnie traffic get through. As for wait times at the crossing, these need to be almost instantaneous, otherwise pedestrians won't wait, increasing risk to them rather than reducing it. This already happens at the Basin crossing. This would also add to driver frustration.

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Consistency of speed is needed. Changing from 50 to 60 to 7 and back to 50 in a short space is unhelpful, and likely to be ignored, in reality. This is the key road for airport traffic, which is important to Wellington's functioning as a business and govt

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

You should think about a protected crossing on Kemp Street to build a safe corridor all the way to Rongotai. The below are not directly relevant to the crossing, but the consultation does not offer any other space for additional comments. Young people (<20yo) don't seem to have responded to this consultation. How are you ensuring your consultation captures views beyond the white male motorist? When I looked, 77% of respondents were motorists (a reflection of daily user numbers and Wellington's car-oriented urban design), likely opposed to anything that could affect their commute or travel time. How are you accounting for this bias in your analysis of submissions?

**What is the primary way you travel through and around the area?**

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Why not make an Over-Bridge like we have over the railway lines? You could have steps AND long ramps for wheelchairs and cyclists. This would not interfere with vehicles and pedestrians would not need to wait for traffic lights either. Plus the 70Kph spee

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Why reduce if you put in traffic lights. Perhaps you'd like drivers to get out and push their cars along!

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Yes, this is an extremely busy road to the airport, traffic congestion is a real issue. Why not build an overbridge. If the traffic lights are installed then there must be minimum times between red lights, i.e not being activated immediately when the crossing button is pushed, should be only so many red lights in an hour at peak times and this includes the weekends.

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

It's in an excellent position to reduce the need for additional crossings in the future - with good access to both ASB and the school. As it's a controlled crossing it seems unclear why the speed limit needs to reduce. Is there risk of the cars heading towards the city backing up into the roundabout and creating congestion that will be slow to clear?

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Why?? The cyclist riding along cobham drive go faster than the cars and are much more of a danger to us walkers. That 10km will make no difference to accidents but will cause more because of holdups.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Much less likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Yes you need to consider other road users. There are thousands who drive through there and very few walkers and cyclists who will use that crossing. I walk along cobham drive frequently and have never seen someone try to cross the road there. The cyclist go faster than the cars. Maybe something should be done about that. You are not getting wellington moving you are slowing it to a crawl. Clearly LGWM has no idea of transport in Wellington. Its not just about bikes and walkers. Put an overbridge in, don't stop the traffic it will just create yet another snarl up.

**What is the primary way you travel through and around the area?**

Walk

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Safety not an issue it's congestion due to outdated infrastructure. Safety will become an issue if you try to merge traffic and pedestrians into the same space. This is state highway 1 not a local road. Pedestrians / cyclists need to be kept a safe distance

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Agree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Visual and light pollution from more traffic lights, traffic flows disrupted. Subway best option no delays for pedestrians/ cyclists or public transport. More vehicles using Rongotai rd to avoid extra congestion. Best way to enhance safety is to separate transport mode not bring them closer together and increase risk. The proposal will not get Wellington moving, it will add to congestion and increase risk to all users. Please keep them apart and build a subway like other areas of state highway 1!

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

I strongly support the reduction of speed on Ruahine St. It is narrow and has no safe crossing from the overbridge all the way to Kilbirnie Crescent, and often is travelling at less than 70ks anyway. Ideally some traffic islands could be added/improve

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

More likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Agree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Will the footpath on the ASB Sports Centre side also be made a shared cycleway to allow bicycles to continue their journey, or will a cycleway be added through to Tacy St instead? The diagram is not clear and only shows pedestrians using the crossing. Seems pointless having a crossing from a shared pathway but only catering for pedestrians on the crossing and south side.

**What is the primary way you travel through and around the area?**

Bicycle

**How important is it to make changes to improve safety on State Highway 1?**

Very important

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

I notice that there is no actual data given on the rate of serious harm accidents on these roads. I imagine that is because it does not support your assertion that you are 'saving lives'. I understand (and have actually read some of) the lower-speed-safer

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

This seems a very poor choice of location for a crossing, as cycle/foot traffic on the Evans Bay/Cobham path is unlikely to be heading for the sports centre, unless they are coming from North Miramar. Other routes are already available from south Miramar, Kilbirnie, and even Hataitai. It will be a massive expense for a minimum benefit, and a major disruption to the traffic flow on Cobham drive whenever anyone DOES actually use. Very poor idea.

**What is the primary way you travel through and around the area?**

Bicycle

**How important is it to make changes to improve safety on State Highway 1?**

Not important

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

I think the speed proposal is valid.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Neutral

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

I think you should seriously consider the already heavy traffic from town to Miramar and the airport and the future with traffic increasing into Miramar peninsula. I think an overpass or underpass would be smarter in the current situation. I would like to see more effort and resources put into efficient public transport networks like light rail at the same time as we make these bike and walkways.

**What is the primary way you travel through and around the area?**

Car

The aesthetics of the area need to be considered. We have the ASB Stadium that sits beautifully on its site and the new Walk and Cycle path with its recent planting is fabulous, much used and appreciated. To install traffic lights in this area will undo a lot of the work that's gone into beautifying the route to the airport. If safety is indeed a major consideration for walkers and cyclists then I suggest an aesthetically pleasing over bridge is the best option. More expensive yes, but it will keep the traffic moving and separate walkers and cyclists from traffic rather than putting it in the midst.

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

The proposed crossing introduces an interruption in the flow of traffic in a high-use area as motorists (members of the public, visitors to Wellington and workers) ply what is a busy main route to the airport. The proposed site and the proposal of a crossing at all, is counter-intuitive to the normal use and activities of the area, whether for motorists, riders or pedestrians, and will only serve to further hold up traffic. If the aim is to encourage a flow of users, stopping traffic is high risk (from a health and safety perspective) and will be counterproductive. All pedestrians and cyclists know where the current lights and pedestrian crossings (at the lights) are, and that is where the highest use is. As much as quick wins are tempting, and there is pressure to be seen to be delivering on the promises or goals of LGWM...it becomes questionable if resources are committed to an initiative that, from all indications, will be disruptive, not fit-for-purpose and unsafe. The disruption to the flow of traffic during the build and resulting delays all the way back to the tunnel, will deliver more frustration to those plying that route, especially when weighed against the minimal use and respondents' indications from feedback gathered so far that there are more calls against it than for it.

This seems like a great opportunity to add to the Council's beautifying of Cobham Drive and create another wonderful sculpture by having an architecturally designed overbridge. Since you're only in consultation phase now, I'd assume you haven't assigned a budget yet. The proposed crossing is at the point in the road (from airport to city direction) when most lane changing happens. To help drivers, especially non-locals (from the airport) to know which lane to be in, signs should be at the roundabout at the end of the runway (Pacific Grass roundabout)?

the direction of the dog leg between the two halves of the road should be reversed, so pedestrians face towards traffic when moving between the two pedestrian crossings, rather than the traffic coming from behind them. If the dog leg is reversed there is also no need for the fences, as traffic will be stopped on the other side of the crossing. The fences aren't much use anyway: They won't protect pedestrians from cars, trucks or busses that crash and that leave the carriageway, as they will just be run over. Bollards may be a better solution to constrain the vehicles that cause harm

<b>NAME:</b> Peter Skrzynski	<b>SUBURB:</b>	<b>ON BEHALF OF:</b> Individual	<b>ORAL SUBMISSION:</b> No
---------------------------------	----------------	------------------------------------	-------------------------------

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

I support the speed proposal. The Ruahine/Goa intersection is a (dangerous) nightmare on weekends. LGWM and Waka Kotahi should take action to rectify this.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

More likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly agree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Yes. The crossing should be straight across, rather than dog-legged and have a combined phase. It is simply unacceptable to have people waiting in the middle of this busy road for a go signal on the second half of the crossing. Furthermore, since the traffic lights are not required to synchronise with other intersections (as in the CBD), then there should be ZERO wait time from pushing the request button to the crossing phase starting (unless it is within 90 seconds of a previous phase).

**What is the primary way you travel through and around the area?**

Refused to say/ unclear method

**How important is it to make changes to improve safety on State Highway 1?**

Very important

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

n/a

Cobham Drive/SH1 Speeds – September 2021

**Please provide your comments on the short section of local road:  
Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

This is SH1 and a major traffic corridor for both buses and cars. It will make the airport and Wellington East less assessible to the rest of Wellington. LGWM has not provided sufficient detailed information to justify this change and so these proposed

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Don't know

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

A level crossing is not the best solution. A bridge or tunnel should be built. If LGWM is going to do something, let's do it properly.

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Neutral

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**

I visit the area (e.g. to shop or visit friends)

Cobham Drive 100m north of Calabar Road roundabout**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Agree speed should be dropped to ~60kph - make it consistent from the tunnel to the airport.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

A crossing at the same level/grade is the wrong approach. Either drop or raise the road, or drop or raise the pedestrian/bike crossing. Interrupting the flow of road traffic by traffic stop/start more often will make the road more dangerous. Agree speed should be dropped to ~60kph - make it consistent from the tunnel to the airport.

**What is the primary way you travel through and around the area?**

Car

Ahhh, your language clearly shows that this survey is lip service only. Is putting a crossing on STATE HIGHWAY 1 not reason enough to stop this? Traffic congestion in the Eastern Suburbs is already a complete nightmare, this will only make it worse and back it up further. Traffic to and from the airport already congests both roundabouts on Cobham drive. Have you factored in the new Shelly Bay development? More cars, more congestion. So instead of flow you want to stop cars on SH1??? You need to address infrastructure and the public transport before this...it is still more cost effective to take my private car to work than pay for the appalling bus service (if you can call it that). That's it! Nothing else on offer and nothing that is family friendly. An over-bridge would keep traffic flowing while giving pedestrians full safety.

**What is the primary way you travel through and around the area?**

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

Stick with status quo. No crossing. No speed limit changes. Save the money for investing in Waste Water Infrastructure. Or if you are going to invest in roading, invest in getting the flow of traffic moving eg. second tunnel etc.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

Much less likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

As a Miramar resident of 12 years, I find this proposal completely ridiculous and way over the top. Placing a raised crossing with traffic lights in on an already congested SH1 is one of the more stupid ideas from Let's Get Wellington Moving - in that it will achieve precisely the opposite of getting Wellington moving. If there is strong evidence that a crossing of some sort is significantly beneficial, then perhaps we should invest in a raised over bridge so that we don't impact on the flow of traffic AND public transport to and from Miramar and the airport. Please please please live up to your name and "Let's keep Wellington Moving"...DON'T proceed with this proposal...

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly disagree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Don't build it. I live in Miramar and frequently visit Kilbirnie by bike. The existing are fine- there is a subway under the airport and lights at St Pats. The proposed crossing will only make it slightly easier for a very small group of people coming from Miramar north or Mapuia to get to the ASB centre. People in Miramar Sth or Strathmore can go through the existing subway, and people going to Kilbirnie can just go over at the lights at St Pats. This is a waste of money for very little benefit. LGWM have massive bills coming for MRT and other projects that will actually make a difference to traffic in Wellington, save your money for those, goodness know you will need it.

**What is the primary way you travel through and around the area?**

n/a

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

I strongly support the need for an overpass/underpass as the situation is currently horrible for pedestrians - but lowering the speed limit will only make the terrible congestion worse

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Strongly agree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

Some form of crossing is essential given the risks pedestrians take getting across the road currently and how difficult this is to navigate as a pedestrian- also how hard it must be for kids from Evans Bay Intermediate. Why can't there be an overpass or underpass which seems the most effective (and logical) solution to ensure safety while avoiding traffic disruption to an already highly congested road?

**What is the primary way you travel through and around the area?**

Walk

n/a

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

More likely

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Agree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

I'd recommend installing an overbridge (ie a pedestrian and cyclist ramp). Whilst I agree that a safe crossing is needed in this location, the traffic in this area is already a concern. An overbridge would provide a safe crossing, without affecting the road and increasing traffic.

**What is the primary way you travel through and around the area?**

Bus

**Is there anything we need to consider before we make a decision on new speed limits on these roads?**

There is no need to change the speed, it works well as is.

**Would the proposed crossing make you more likely to walk, run, bike or use a scooter for trips around the Miramar, Kilbirnie and Rongotai area?**

No change

**The crossing is located in the right spot to help you get to where you want to go in the area:**

Agree

**Is there anything else we need to consider before we build the Cobham Drive crossing?**

An overpass would be a more sensible approach as it would enable pedestrian crossing without slowing down traffic in an already congested area. The crossing will not effect most commuters who would be coming from Miramar as and commuters from Kilbirnie would like use the existing crossing at the end of Cobham Drive.

**What is the primary way you travel through and around the area?**

Car

**How important is it to make changes to improve safety on State Highway 1?**

Low importance

**What is your main relationship to State Highway 1 from the Mount Victoria Tunnel to the Airport?**
