Richard Murcott	322.13	Strategic Direction / City Economy Knowledge and Prosperity / General CEKP	Oppose	<p>Considers that an enduring, prosperous city will be a liveable city that values character and heritage, and be successful at getting this balance right.</p> <p>Considers that the PDP is attempting to achieve or enable both a solution for the need for more housing as well as encouraging more affordable housing, including by the removal of panning protections in character neighbourhoods. The extent to which blanket upzoning of character and heritage zoning will provide any solution for affordable housing is doubtful because high land values in Thorndon mean private developments will be high-priced.</p> <p>Considers that the PDP is confusing and feels like an inappropriate response to the problem. It is a response that jeopardises aspects of areas of residential Thorndon that are highly desirable and valued by the community, city and nation (especially being in the Capital). The PDP is not adequately protecting the uniqueness of the city (i.e. significant parts of residential Thorndon has protections removed by this PDP).</p> <p>Considers that as it stands, the PDP may allow unintended consequences, and this is avoidable. [Refer to original submission for full reason]</p>	Seeks that the Council changes the incentives for significant property owners in the city to improve existing land use, by using levers outside of the District Plan and recognises the values of the character of the inner residential suburbs.
Yvonne Weeber	340.7	Strategic Direction / City Economy Knowledge and Prosperity / General CEKP	Amend	Considers that the CEKP chapter should reference the need to change our present economic model to reduce climate change.	Seeks that the 'City Economy, Knowledge and Prosperity' chapter reference the need to change the current economic model to reduce climate change.
Restaurant Brands Limited	349.6	Strategic Direction / City Economy Knowledge and Prosperity / General CEKP	Support	Support	Retain CEKP – Te Ohaoha, Mōhioanga me te Taurikura ā-Tāone - City Economy, Knowledge and Prosperity as notified.
Guardians of the Bays	452.6	Strategic Direction / City Economy Knowledge and Prosperity / General CEKP	Amend	The Strategic Direction- City Economy, Knowledge and Prosperity chapter needs to reference the need to change our present economic model to reduce climate change.	Seeks that the City Economy, Knowledge and Prosperity chapter is amended to incorporate references to the need to change our present economic model to reduce climate change
Horokiwi Quarries Ltd	271.16	Strategic Direction / City Economy Knowledge and Prosperity / New CEKP	Amend	Considers that there is an absence of policy recognition within the PDP of a new quarry site, or expansion of an existing site outside the Quarry Zone. Given the importance of quarries to the city and region, Horokiwi would support policy recognition outside the Special Purpose Quarry zone, and specific to the strategic objectives, the provision of a strategic objective which recognises the benefits of mineral utilisation. Such a policy would be consistent with the Greater Wellington Regional Council Proposed Natural Resources Plan Policy 12A, and the Regional Policy Statement Policy 60.	<p>Add new strategic objective as follows:</p> <p><u>CEKP-O6:</u></p> <p><u>When considering proposals that relate to the use of the Region's mineral resources, particular regard will be given to the benefits from the utilisation of those resources in the form of quarrying activities.</u></p>
Woolworths New Zealand	359.9	Strategic Direction / City Economy Knowledge and Prosperity / CEKP-O1	Support	[No specific reason given beyond decision requested - refer to original submission].	Retain Objective CEKP-O1 (A range of commercial and mixed use environments...) as notified.
Kāinga Ora Homes and Communities	391.51	Strategic Direction / City Economy Knowledge and Prosperity / CEKP-O1	Support	Objective CEKP-O1 is generally supported.	Retain Objective CEKP-O1 (A range of commercial and mixed use environments...) as notified.
Investore Property Limited	405.25	Strategic Direction / City Economy Knowledge and Prosperity / CEKP-O1	Support	<p>Supports the provision of a range of commercial and mixed-use environments.</p> <p>The NPS-UD requires intensification in urban areas and sufficient development capacity that is of a form and in locations that meet the diverse needs of communities and encourages well-functioning, liveable urban environments [Refer to original submission for full reason].</p>	Retain CEKP-O1 (Strategic Objectives) as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Wellington International Airport Ltd	406.49	Strategic Direction / City Economy Knowledge and Prosperity / CEKP-O1	Support in part	<p>Considers that modern airports now demand a mix of land uses that either directly service the aviation sector, or feed directly off it. Focus is also increasingly being placed on improving airport revenue to offset operational costs.</p> <p>While it is conceivable that consideration of such activities is contemplated by Objectives CEKP-O1 and CEKP-O3 to O4, WIAL submits that the relevance of these objectives to the Airport Zone should be clearly stated.</p> <p>[See original submission paragraphs 4.11 to 4.15, 4.20 to 4.24 for full reason]</p>	Retain CEKP-O1 (Strategic Objectives) as notified.
Guardians of the Bays Inc	FS44.23	Part 2 / Strategic Direction / City Economy Knowledge and Prosperity / CEKP-O1	Oppose	Considers that Wellington Airport in its entire 'airport zone' should not be added to city centre, centres, mixed use and general industrial zones. Parts of the airport zone have suburban centre functions e.g. Rongotai retail area. However the majority of the 'airport zone' is based around airport activities.	Disallow
Board of Airline Representatives of New Zealand Inc *Late further submission accepted as per Minute 3	FS139.36	Part 2 / Strategic Direction / City Economy Knowledge and Prosperity / CEKP-O1	Support	Support WAIL's submission for the reasons set out in WAIL's submission.	Allow
Willis Bond and Company Limited	416.19	Strategic Direction / City Economy Knowledge and Prosperity / CEKP-O1	Support	Supports the intent of CEKP-O1.	Retain CEKP-O1 (A range of commercial and mixed use environments are provided...) as notified.
Stride Investment Management Limited	470.9	Strategic Direction / City Economy Knowledge and Prosperity / CEKP-O1	Support	Supports CEKP-O1 (A range of commercial and mixed use environments...).	Retain as notified.
Woolworths New Zealand	359.10	Strategic Direction / City Economy Knowledge and Prosperity / CEKP-O2	Oppose in part	<p>Considers that objectives and rationale in the CEKP chapter are concerning, as there is not sufficient information to determine whether the PDP achieves its growth objectives, namely UFD-O5 which states "sufficient land development capacity is available to meet the short-, medium- and long-term business land needs of the City, as identified in the Wellington Regional Housing and Business Capacity Assessment."</p> <p>The PDP states that it has been prepared based on the Housing and Business Development Capacity Assessment – which cites that “the City will require up to 24ha of land that would accommodate 78ha of floor space for future business development and activities over the next 30 years”, based on the Council's population growth estimates.</p> <p>The 'supporting documents' page for the PDP provides a link through to the Regional Housing & Business Development Capacity Assessment 2022. A review of this indicates that so far analysis has only been completed with respect to housing development capacity and that a revision of this assessment will include business land but that analysis will not be completed until June 2024, in such time to inform the 2024 Long-Term Plans and a Future Development Strategy for the Wellington Region. Woolworths considers that there appears to be a timeframe misalignment in that the PDP will be adopted prior to the Business Development Capacity Assessment being undertaken and it is unclear therefore how Council has determined that sufficient areas of land within the various commercial and mixed-use zones (including Centres) have been provided for within the PDP.</p> <p>It is assumed that the PDP has been developed in response to the assessment undertaken in 2019 (as referenced in the Retail and Market Assessment - Sense Partners and Colliers November 2020) which identified a requirement for 49,992m2 of retail floorspace to 2047 (noting that this assessment was undertaken prior to the Covid-19 pandemic).</p>	<p>Seeks that more information is provided to determine whether the PDP achieves its own growth objectives in the City Economy Knowledge and Prosperity chapter.</p> <p>[Inferred decision requested]</p>

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Woolworths New Zealand	359.11	Strategic Direction / City Economy Knowledge and Prosperity / CEKP-O2	Amend	Considers that the wording in CEKP-O2 should be amended to include passers-by activity. Neighbourhood Centres serve passers-by as well as their immediate residential neighbourhood. This wording is consistent with the current wording proposed in NCZ-P2 "Enable a range of activities that contribute positively to the purpose of the Zone and meet the convenience needs of the immediate neighbourhood and passers-by;" and as such this insertion ensures that the Part 3 NCZ provisions are in line with the matters at Part 2. Amending this objective as such would make it adaptive and responsive to evolving retailing, and achieve the best outcomes for the City and its communities.	Amend Objective CEKP-O2 (The City maintains a hierarchy of centres...) as follows: ... 4. Neighbourhood Centres - these centres service the immediate residential neighbourhood <u>and passers-by</u> and offer <u>generally</u> small-scale convenience-based retail for day-to-day needs. These centres are generally for small commercial clusters and community services. Neighbourhood Centres are accessible by public transport and active transport modes.
Waka Kotahi	370.51	Strategic Direction / City Economy Knowledge and Prosperity / CEKP-O2	Amend	Considers this objective should also include a description of the "commercial zone" and spell out expectations around access and connectivity for that zone.	Seeks to include a description of the anticipated role and function of the commercial zone.
Argosy Property No. 1 Limited	383.11	Strategic Direction / City Economy Knowledge and Prosperity / CEKP-O2	Support	Supports the Centres hierarchy and the recognition of the City Centre as the primary centre for the wider region. Supports the Proposed Plan to the extent that it provides for and supports the vibrancy of the city centre	Retain Objective CEKP-O2 as notified
Kāinga Ora Homes and Communities	391.52	Strategic Direction / City Economy Knowledge and Prosperity / CEKP-O2	Support in part	Objective CEKP-O2 is generally supported.	Retain Objective CEKP-O2 (The City maintains a hierarchy of centres...) with amendment.
Wellington International Airport Limited	FS36.23	Part 2/ Strategic Direction / City Economy Knowledge and Prosperity / CEKP-O2	Oppose	WIAL opposes this submission to the extent that it is not clear where the "town centres" are located and the extent to which these may / may not be located within the Air Noise Boundary of 60dB Ldn Noise Boundary for Wellington International Airport.	Disallow / Seeks that part of the submission be disallowed.
Kāinga Ora Homes and Communities	391.53	Strategic Direction / City Economy Knowledge and Prosperity / CEKP-O2	Amend	Considers that Objective CEKP-O2 should be amended to introduce the Town Centre Zone within the centres hierarchy and differentiates between the scale, role and function of Town and Local Centres to achieve consistency with the National Planning Standards, and better reflect growth outcomes and the role and function of centres within the urban environment.	Amend Objective CEKP-O2 (The City maintains a hierarchy of centres...) as follows: The City maintains a hierarchy of centres based on their role and function, as follows: ... 3. <u>Town Centres – these centres service the surrounding suburbs. Town centres contain a range of commercial, community, recreational and entertainment activities. Town Centres are well-connected to the City's public transport network and active transport modes are also provided for. Town Centres will play a role in accommodating and servicing the needs of the existing and forecast population growth that is complementary to the City Centre and Metropolitan Centre Zones. This intensification is due to the capacity of the area to absorb more high-density housing with enablers of growth such as offering a walkable access to public transport, community facilities and services; and</u> 4. <u>Local Centres – these centres service the surrounding residential catchment and neighbouring suburbs. Local Centres contain a range of commercial, community, recreational and entertainment activities. Local Centres are well-connected to the City's public transport network and active transport modes are also provided for. Local Centres will play a role in accommodating and servicing the needs of the existing and forecast population growth that is complementary to the City Centre, and Metropolitan Centre, and Town Centre Zones. This intensification is due to the capacity of the area to absorb more medium density housing with enablers of growth such as walkable access to public transport, and community facilities and services and;</u> 4-5. <u>Neighbourhood Centres - ...</u>

WCC Environmental Reference Group	377.16	Strategic Direction / Historic Heritage and Sites and Areas of Significance to Māori / General HHSASM	Amend	Considers that in the introduction it is stated "Often sites [of significance to Maori] no longer exist physically". The submitter considers this to be clumsy wording as sites exist forever. It is the physical evidence that may no longer exist.	Amend the introduction statement as follows: "Often <u>the physical evidence</u> of sites no longer exists physically however their memory and association remains".
Wellington Heritage Professionals	412.25	Strategic Direction / Historic Heritage and Sites and Areas of Significance to Māori / General HHSASM	Amend	Considers that Wellington's character areas and heritage buildings play a significant role in the liveability of our city.	Amend the introduction to the Historic Heritage and Sites and Areas of Significance to Maori chapter as follows: "Historic and cultural heritage provides a connection with those who lived before us. It helps us define who we are and contributes to our sense of place <u>and to the liveability of the City</u> . Once destroyed, it cannot be replaced. It is a fundamental part of the wellbeing of people and communities."
Guardians of the Bays	452.7	Strategic Direction / Historic Heritage and Sites and Areas of Significance to Māori / General HHSASM	Support	Supports the Strategic Direction provisions in Historic Heritage and Site and Areas of Significance to Māori chapter.	Retain the Historic Heritage and Site and Areas of Significance to Māori chapter as notified.
Waka Kotahi	370.52	Strategic Direction / Historic Heritage and Sites and Areas of Significance to Māori / HHSASM-01	Support	Supports these strategic objectives as written.	Retain Strategic Objective HHSASM-01 (Significant buildings, structures, areas, and sites...) as notified.
Taranaki Whānui ki te Upoko o te Ika	389.36	Strategic Direction / Historic Heritage and Sites and Areas of Significance to Māori / HHSASM-01	Support in part	Supports the recognition and protection of SASMs and Taranaki Whānui role as ahi kā and primary mana whenua in Wellington City. This includes the 'use' or 'activities' in SASMs to enable Taranaki Whanui to exercise tino rangatiratanga on their SASM sites.	Retain HHSASM-01 with amendments.
Taranaki Whānui ki te Upoko o te Ika	389.37	Strategic Direction / Historic Heritage and Sites and Areas of Significance to Māori / HHSASM-01	Amend	Supports the recognition and protection of SASMs and Taranaki Whānui role as ahi kā and primary mana whenua in Wellington City. This includes the 'use' or 'activities' in SASMs to enable Taranaki Whanui to exercise tino rangatiratanga on their SASM sites.	Seeks amendment to: a) include role of Taranaki Whānui as ahi kā and primary mana whenua or b) that is most appropriate to address the submission.
Te Rūnanga o Toa Rangatira	FS138.38	Part 2 / Strategic Direction / Historic Heritage and Sites and Areas of Significance to Māori / HHSASM-01	Oppose	The submitter seeks amendments throughout the plan seeking Taranaki Whānui to hold ahi kā and primary mana whenua status throughout Te Whanganui a Tara rohe. Te Rūnanga o Toa Rangatira understand and acknowledge that Taranaki Whānui have a physical presence within Te Whanganui a Tara. However, if this was implemented in the plan this would mean that their ahi kā would extend across the entire extent of the Wellington City Council boundary. Ngāti Toa Rangatira do have a physical presence in Te Whanganui a Tara and sites of significance which are listed in the plan. This means that Ngāti Toa Rangatira still need to be engaged with in terms of resource management and resource consents.	Disallow
Kāinga Ora Homes and Communities	391.56	Strategic Direction / Historic Heritage and Sites and Areas of Significance to Māori / HHSASM-01	Support	Objective HHSASM-01 is generally supported.	Retain Objective HHSASM-01 (Significant buildings, structures, areas,...) as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Willis Bond and Company Limited	416.24	Strategic Direction / Historic Heritage and Sites and Areas of Significance to Māori / HHSASM-01	Support in part	Supports HHSASM-01 in part. Considers that within HHSAM-02 it should be acknowledged that: - Wellington must achieve a balance between heritage protection and enabling new development; and - heritage buildings, structures, areas and sites must be clearly identified both in order to protect those sites and to provide clarity on where heritage protection does and does not apply.	Retain HHSASM-01 (Significant buildings, structures, areas, and sites that exemplify Wellington's historical...) as notified. [Support is based on requested amendments to HH-01 (Recognising historic heritage) and HH-02 (Protecting historic heritage)]
Te Rūnanga o Toa Rangatira	488.16	Strategic Direction / Historic Heritage and Sites and Areas of Significance to Māori / HHSASM-01	Support in part	Supports the chapter provisions which recognize the risk of natural hazards to significant infrastructure but considers that it is important that the plan provides ways to build resilience for significant cultural infrastructure.	Retain HHSASM-01 (Significant buildings, structures, areas, and sites that exemplify Wellington's historical and cultural values are identified, recognised and protected) as notified.
Waka Kotahi	370.53	Strategic Direction / Historic Heritage and Sites and Areas of Significance to Māori / HHSASM-02	Support	Supports these strategic objectives as written.	Retain Strategic Objective HHSASM-02 (Built heritage is resilient and has a sustainable long term...) as notified.
Taranaki Whānui ki te Upoko o te Ika	389.38	Strategic Direction / Historic Heritage and Sites and Areas of Significance to Māori / HHSASM-02	Support in part	Supports the recognition and protection of SASMs and Taranaki Whānui role as ahi kā and primary mana whenua in Wellington City. This includes the 'use' or 'activities' in SASMs to enable Taranaki Whānui to exercise tino rangatiratanga on their SASM sites.	Retain HHSASM-02 with amendments.
Te Rūnanga o Toa Rangatira	FS138.39	Part 2 / Strategic Direction / Historic Heritage and Sites and Areas of Significance to Māori / HHSASM-02	Oppose	The submitter seeks amendments throughout the plan seeking Taranaki Whānui to hold ahi kā and primary mana whenua status throughout Te Whanganui a Tara rohe. Te Rūnanga o Toa Rangatira understand and acknowledge that Taranaki Whānui have a physical presence within Te Whanganui a Tara. However, if this was implemented in the plan this would mean that their ahi kā would extend across the entire extent of the Wellington City Council boundary. Ngāti Toa Rangatira do have a physical presence in Te Whanganui a Tara and sites of significance which are listed in the plan. This means that Ngāti Toa Rangatira still need to be engaged with in terms of resource management and resource consents.	Disallow
Taranaki Whānui ki te Upoko o te Ika	389.39	Strategic Direction / Historic Heritage and Sites and Areas of Significance to Māori / HHSASM-02	Amend	Supports the recognition and protection of SASMs and Taranaki Whānui role as ahi kā and primary mana whenua in Wellington City. This includes the 'use' or 'activities' in SASMs to enable Taranaki Whānui to exercise tino rangatiratanga on their SASM sites.	Seeks amendment to: a) include role of Taranaki Whānui as ahi kā and primary mana whenua or b) that is most appropriate to address the submission.
Te Rūnanga o Toa Rangatira	FS138.40	Part 2 / Strategic Direction / Historic Heritage and Sites and Areas of Significance to Māori / HHSASM-02	Oppose	The submitter seeks amendments throughout the plan seeking Taranaki Whānui to hold ahi kā and primary mana whenua status throughout Te Whanganui a Tara rohe. Te Rūnanga o Toa Rangatira understand and acknowledge that Taranaki Whānui have a physical presence within Te Whanganui a Tara. However, if this was implemented in the plan this would mean that their ahi kā would extend across the entire extent of the Wellington City Council boundary. Kāinga Ora Homes and Communities	391.60	Strategic Direction / Historic Heritage and Sites and Areas of Significance to Māori / HHSASM-O5	Support	Objective HHSASM-O5 is generally supported.	Retain Objective HHSASM-O5 (Recognise that only mana whenua...) as notified.
Te Rūnanga o Toa Rangatira	488.20	Strategic Direction / Historic Heritage and Sites and Areas of Significance to Māori / HHSASM-O5	Support in part	Supports the chapter provisions which recognize the risk of natural hazards to significant infrastructure but considers that it is important that the plan provides ways to build resilience for significant cultural infrastructure.	Retain HHSASM-O5 (Recognise that only mana whenua can identify impacts on their relationship with their culture, traditions, ancestral lands...) as notified.
Yvonne Weeber	340.9	Strategic Direction / Natural Environment / General NE	Support	[No specific reason given beyond decision requested - refer to original submission].	Retain the 'Natural Environment' chapter as notified.
Royal Forest and Bird Protection Society	345.20	Strategic Direction / Natural Environment / General NE	Oppose in part	As written, the natural environment strategic objectives fail to address the issues identified in the introduction. Furthermore, there is a lack of clear strategic direction to protect and maintain biodiversity values, in accordance with s6, 31, and the RPS.	Amend the NE chapter to address issues identified in the Introduction and clarify strategic direction to protect and maintain biodiversity values in alignment with S6 and S31 of Greater Wellington Regional Policy Statement.
Wellington International Airport Limited	FS36.25	Part 2 / Strategic Direction / Natural Environment / General NE	Oppose	WIAL considers it appropriate to ensure the provisions of the Proposed Plan give effect to Part 2 of the RMA and the Greater Wellington Regional Policy Statement. WIAL opposes the submission however, as no specific drafting has been provided in association with this submission point and therefore WIAL cannot determine the appropriateness or otherwise of the amendments in terms of section 32 of the RMA.	Disallow

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Royal Forest and Bird Protection Society	345.21	Strategic Direction / Natural Environment / General NE	Support in part	Considers the Introduction does not recognise council's function for integrated management, particularly with respect to the maintenance of indigenous biological diversity, the protection of wetlands and Te Mana o Te Wai.	Amend NE - Introduction to recognise council's function for integrated management, particularly with respect to the maintenance of indigenous biological diversity, the protection of wetlands and Te Mana o Te Wai.
Greater Wellington Regional Council	351.57	Strategic Direction / Natural Environment / General NE	Support in part	Supports the Natural Environment Strategic objectives except as noted below.	Retain Natural Environment Objectives, subject to amendments.
Director-General of Conservation	FS106.17	Part 2 / Natural and Environmental Values / Ecosystems and Indigenous Biodiversity / ECO-S4	Support	The reasoning and decision requested by the original submitter is supported.	Allow
Guardians of the Bays	452.8	Strategic Direction / Natural Environment / General NE	Support	Supports the Strategic Direction provisions in Natural Environment chapter.	Retain the Natural Environment Chapter as notified.
Greater Wellington Regional Council	351.58	Strategic Direction / Natural Environment / New NE	Amend	Considers it appropriate to have regard to Proposed RPS Change 1, the use and development of land needs to be undertaken in an integrated manner recognising the many interconnections between the natural and physical resources. The interconnectedness of the whole environment should be recognised at the strategic level to guide all development in a holistic way.	Add a new Objective to the 'Natural Environment' chapter as follows: <u>Natural and physical resources are managed in an integrated manner recognising the importance of ki uta ki tai and the interconnectedness between ecosystems, natural processes and freshwater.</u>
Royal Forest and Bird Protection Society	345.22	Strategic Direction / Natural Environment / NE-O1	Support in part	Considers the objective fails to protect and maintain biodiversity values, in accordance with s6, s31 of the RMA and the RPS. Natural character, features, landscapes and ecosystems are not just of value because they contribute to the City's identity, they include matters of national importance. We seek amendment of the strategic objective to give effect to council's responsibilities under s6 and functions under s31.	Amend NE-O1: The natural character, landscapes and features, <u>indigenous biodiversity</u> and ecosystems, <u>including wetlands, that contribute to the City's identity of the District, including those that</u> and have significance for mana whenua as kaitiaki are identified, recognised, protected, and, where possible, enhanced.
Wellington International Airport Limited	FS36.26	Part 2 / Strategic Direction / Natural Environment / NE-O1	Oppose	The recommended amendments to the objective conflate section 6 and 7 matters of the RMA.	Disallow
WCC Environmental Reference Group	377.17	Strategic Direction / Natural Environment / NE-O1	Support	Considers there is insufficient focus on the cultural heritage of mana whenua compared with European history and culture: this strategic objective helps to re-balance this.	Retain Objective NE-O1 as notified.
Director-General of Conservation	385.15	Strategic Direction / Natural Environment / NE-O1	Support	Supports proposed Objective NE-O1.	Retain objective NE-O1 as notified.
Taranaki Whānui ki te Upoko o te Ika	389.46	Strategic Direction / Natural Environment / NE-O1	Support in part	Support the acknowledgment of Taranaki Whānui connection with environment and water and of the Taranaki Whānui tikanga and mātauranga in the management of the natural environment.	Retain NE-O1 with amendments.
Te Rūnanga o Toa Rangatira	FS138.47	Part 2 / Strategic Direction / Natural Environment / NE-O1	Oppose	The submitter seeks amendments throughout the plan seeking Taranaki Whānui to hold ahi kā and primary mana whenua status throughout Te Whanganui a Tara rohe. Te Rūnanga o Toa Rangatira understand and acknowledge that Taranaki Whānui have a physical presence within Te Whanganui a Tara. However, if this was implemented in the plan this would mean that their ahi kā would extend across the entire extent of the Wellington City Council boundary. Ngāti Toa Rangatira do have a physical presence in Te Whanganui a Tara and sites of significance which are listed in the plan. This means that Ngāti Toa Rangatira still need to be engaged with in terms of resource management and resource consents.	Disallow
Taranaki Whānui ki te Upoko o te Ika	389.47	Strategic Direction / Natural Environment / NE-O1	Amend	Support the acknowledgment of Taranaki Whānui connection with environment and water and of the Taranaki Whānui tikanga and mātauranga in the management of the natural environment.	Seeks amendment to: a) include role of Taranaki Whānui as ahi kā and primary mana whenua or b) that is most appropriate to address the submission.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Te Rūnanga o Toa Rangatira	FS138.48	Part 2 / Strategic Direction / Natural Environment / NE-01	Oppose	The submitter seeks amendments throughout the plan seeking Taranaki Whānui to hold ahi kā and primary mana whenua status throughout Te Whanganui a Tara rohe. Te Rūnanga o Toa Rangatira understand and acknowledge that Taranaki Whānui have a physical presence within Te Whanganui a Tara. However, if this was implemented in the plan this would mean that their ahi kā would extend across the entire extent of the Wellington City Council boundary. Kāinga Ora Homes and Communities	391.61	Strategic Direction / Natural Environment / NE-01	Support	Objective NE-01 is generally supported.	Retain Objective NE-01 (The natural character, landscapes and features,...) as notified.
Wellington International Airport Ltd	406.62	Strategic Direction / Natural Environment / NE-01	Support in part	[No specific reason given beyond decision requested - see original submission.]	Supports NE-01 (Natural character that contributes to city identity and has significance for mana whenua) with amendment.
Wellington International Airport Ltd	406.63	Strategic Direction / Natural Environment / NE-01	Amend	[No specific reason given beyond decision requested - see original submission.]	Amend NE-01 (Natural character that contributes to city identity and has significance for mana whenua) as follows: The natural character, landscapes and features, and ecosystems that contribute to the City's identity and have significance for mana whenua as kaitiaki are identified, recognised, protected <u>maintained</u> and, where possible, enhanced.
Willis Bond and Company Limited	416.26	Strategic Direction / Natural Environment / NE-01	Support	Supports the intent of NE-01.	Retain NE-01 (The natural character, landscapes and features, and ecosystems that contribute ...) as notified.
Paul M Blaschke	435.4	Strategic Direction / Natural Environment / NE-01	Support	NE-01 is supported.	Retain Strategic Objective NE-01 (he natural character, landscapes and features, and ecosystems that contribute to the City's identity and have significance for mana whenua as kaitiaki are identified, recognised, protected, and, where possible, enhanced) as notified.
Royal Forest and Bird Protection Society	345.23	Strategic Direction / Natural Environment / NE-02	Support in part	Considers the objective fails to give effect to the NPS-FW which requires territorial authorities to provide for Te Mana o Te Wai through integrated management ki uta ki tai from mountains to sea. The strategic direction of this plan should recognise the interactions between freshwater, land, water bodies, ecosystems, and sensitive receiving environments. Water quality is not only threatened by future development; poor water quality has resulted from historic development and inadequate investment in infrastructure upgrades. The effects of which also need to be managed. We seek amendment to give effect to the NPS-FW.	Amend NE-02: Future subdivision, <u>land use</u> and development contributes to an improvement in the quality of the City's <u>fresh water</u> , water bodies, <u>ecosystems and sensitive receiving environments</u> and recognises mana whenua and their relationship to water (Te Mana o Te Wai)
Greater Wellington Regional Council	351.59	Strategic Direction / Natural Environment / NE-02	Support in part	Supports the objective to recognise the relationship of to water as this aligns with Policy FW.3 of Proposed RPS Change 1	Retain Objective NE-02, subject to amendments.
Greater Wellington Regional Council	351.60	Strategic Direction / Natural Environment / NE-02	Amend	Considers that this objective should more widely address the values of tangata whenua and seek that those values are protected and enhanced. These amendments will ensure Policy FW.3 is more wholly given regard to.	Amend Objective NE-02 as follows: Future subdivision and development contributes to an improvement in the quality of the City's water bodies, <u>protects and enhances Māori freshwater values</u> and recognises mana whenua and their relationship to water (Te Mana o Te Wai).
Waka Kotahi	370.55	Strategic Direction / Natural Environment / NE-02	Amend	Considers that improving water quality is an extremely high threshold, though Waka Kotahi agrees that gradual improvement is necessary not all works, specifically maintenance activities, can improve water quality. Instead, the submitter seeks that all works shall not worsen water quality.	Amend Strategic Objective NE-02 (Future subdivision and development contributes...) as follows: Future subdivision and development contributes to an improvement in <u>maintains</u> the quality of the City's water bodies, and recognises mana whenua and their relationship to water (Te Mana o Te Wai).

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
KiwiRail Holdings Limited	FS72.9	Part 2 / District-Wide Matters / Strategic Direction / Natural Environment / NE-O2	Support	Agrees that improving water quality is a high threshold for development and maintenance of the quality of water bodies is more appropriate. Considers the relief sought should be allowed because it will (a) will promote the sustainable management of the natural and physical resources in Wellington City, and is therefore consistent with Part 2 and other provisions of the Resource Management Act 1991 (RMA) and the Enabling Housing Supply Amendment Act 2021 (Amendment Act); (b) is consistent with other relevant planning documents, including the Greater Wellington Regional Policy Statement and National Policy Statement for Urban Development 2020; (c) will meet the reasonably foreseeable needs of future generations; (d) will avoid, remedy or mitigate actual and potential adverse effects on the environment; (e) will enable the social, economic and cultural wellbeing of the people of Wellington City; and (f) is the most appropriate way to achieve the objectives of the Proposed Plan in terms of section 32 of the RMA.	Allow
Greater Wellington Regional Council	FS84.90	Part 2 / Strategic Direction / Natural Environment / NE-O2	Oppose	Greater Wellington consider the approach taken by WCC which seeks to improve water quality is appropriate and aligns with the requirements of the NPS-FM and has regard to Proposed RPS Change 1.	Disallow / Seeks that direction for improving the quality of water bodie in NE-O2 is retained.
WCC Environmental Reference Group	377.18	Strategic Direction / Natural Environment / NE-O2	Support	The submitter understand that about 80% of Freshwater bodies within Wellington City have unacceptable pollutant levels: it is important that use and development in natural and rural areas is done in a way that sees us improve water quality, as is being recommended for similar activities in the urban parts of the city. Recognising the relationship of mana whenua to water is an important aspect of this, as it sees water quality put first in terms of importance.	Retain Objective NE-O2 as notified.
Director-General of Conservation	385.16	Strategic Direction / Natural Environment / NE-O2	Support	Supports proposed Objective NE-O2.	Retain objective NE-O2 as notified.
Taranaki Whānui ki te Upoko o te Ika	389.48	Strategic Direction / Natural Environment / NE-O2	Support in part	Support the acknowledgment of Taranaki Whānui connection with environment and water and of the Taranaki Whānui tikanga and mātauranga in the management of the natural environment.	Retain NE-O1 with amendments.
Te Rūnanga o Toa Rangatira	FS138.49	Part 2 / Strategic Direction / Natural Environment / NE-O2	Oppose	The submitter seeks amendments throughout the plan seeking Taranaki Whānui to hold ahi kā and primary mana whenua status throughout Te Whanganui a Tara rohe. Te Rūnanga o Toa Rangatira understand and acknowledge that Taranaki Whānui have a physical presence within Te Whanganui a Tara. However, if this was implemented in the plan this would mean that their ahi kā would extend across the entire extent of the Wellington City Council boundary. Ngāti Toa Rangatira do have a physical presence in Te Whanganui a Tara and sites of significance which are listed in the plan. This means that Ngāti Toa Rangatira still need to be engaged with in terms of resource management and resource consents.	Disallow
Taranaki Whānui ki te Upoko o te Ika	389.49	Strategic Direction / Natural Environment / NE-O2	Amend	Support the acknowledgment of Taranaki Whānui connection with environment and water and of the Taranaki Whānui tikanga and mātauranga in the management of the natural environment.	Seeks amendment to: a) include role of Taranaki Whānui as ahi kā and primary mana whenua or b) that is most appropriate to address the submission.
Te Rūnanga o Toa Rangatira	FS138.50	Part 2 / Strategic Direction / Natural Environment / NE-O2	Oppose	The submitter seeks amendments throughout the plan seeking Taranaki Whānui to hold ahi kā and primary mana whenua status throughout Te Whanganui a Tara rohe. Te Rūnanga o Toa Rangatira understand and acknowledge that Taranaki Whānui have a physical presence within Te Whanganui a Tara. However, if this was implemented in the plan this would mean that their ahi kā would extend across the entire extent of the Wellington City Council boundary. Ngāti Toa Rangatira do have a physical presence in Te Whanganui a Tara and sites of significance which are listed in the plan. This means that Ngāti Toa Rangatira still need to be engaged with in terms of resource management and resource consents.	Disallow
Kāinga Ora Homes and Communities	391.62	Strategic Direction / Natural Environment / NE-O2	Support	Objective NE-O2 is generally supported.	Retain Objective NE-O2 (Future subdivision and development contributes...) as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Willis Bond and Company Limited	416.27	Strategic Direction / Natural Environment / NE-O2	Support	Supports the intent of NE-O2.	Retain NE-O2 (Future subdivision and development contributes to an improvement in the quality...)as notified.
Te Rūnanga o Toa Rangatira	488.21	Strategic Direction / Natural Environment / NE-O2	Support in part	Supports the intention behind NE-O2	Retain NE-O2 (Future subdivision and development contributes to an improvement in the quality of the City's water bodies...) in the Natural Environment chapter as notified, subject to the amendments below.
Te Rūnanga o Toa Rangatira	488.22	Strategic Direction / Natural Environment / NE-O2	Amend	Considers NE-O2 can be strengthened so that subdivision and earthworks would not only 'contribute' but 'maintain and protect' the values the submitter has for water resources.	Amend NE-O2 (Future subdivision and development contributes to an improvement in the quality of the City's water bodies...) to: Future subdivision and development play a key role improving water quality and they support protecting and enhancing freshwater values contributes to an improvement in the quality of the City's water bodies by recognizing mana whenua values and their relationship to water (Te Mana o Te Wai).
Greater Wellington Regional Council	FS84.110	Part 2 / Strategic Direction / Natural Environment / NE-O2	Support	Greater Wellington also consider that NE-O2 can be strengthened to further protect Māori freshwater values.	Allow / Seeks that the NE-O2 be reworded as requested in Greater Wellington's original submission [refer to submission point 351.60].
Kilmarston Developments Limited and Kilmarston Properties Limited	290.23	Strategic Direction / Natural Environment / NE-O3	Support	Considers that it is important for Council to provide appropriate open space connections across the city where enabling residential development of the Submitters land will contribute to creating these connections.	Retain NE-O3 (The City retains an extensive open space network across the City that...) as notified.
Royal Forest and Bird Protection Society	345.24	Strategic Direction / Natural Environment / NE-O3	Support in part	Considers the objective would be clearer with specific use of the words Significant Natural Areas to give effect to s6 and reference to maintenance of indigenous biodiversity to give effect to council's functions under s31. Furthermore, wetlands need to be included to give effect to the RPS	Amend NE-O3: The City retains an extensive open space network across the City that: 1. Is easily accessible; 2. Connects the urban and natural environment; 3. Supports <u>Protects significant natural areas, wetlands and</u> ecological, cultural, and landscape values; and 4. <u>Maintains indigenous biodiversity; and</u> 5. Meets the needs of anticipated future growth.
Wellington International Airport Limited	FS36.27	Part 2 / Strategic Direction / Natural Environment / NE-O3	Oppose	The recommended amendments to the objective are inconsistent with and go further than section 6 and 7 of the RMA.	Disallow
Greater Wellington Regional Council	FS84.98	Part 2 / Strategic Direction / Natural Environment / NE-O3	Support	Greater Wellington agree that replacing "support" with "protect" in clause 3 would give greater effect to the requirements of section 6 of the RMA and that reference to wetlands would align with direction in Proposed RPS Change 1.	Allow
WCC Environmental Reference Group	377.19	Strategic Direction / Natural Environment / NE-O3	Amend	Considers this should be amended to include the concept of protection.	Add an extra point to NE-O3 (The city retains an extensive open space network...) as follows: ... <u>5. Is protected and gazetted under the Reserves Act.</u>
WCC Environmental Reference Group	377.20	Strategic Direction / Natural Environment / NE-O3	Support	Considers that as the population grows, preserving, and where possible, adding to the open space network across the city is increasingly important. Research increasingly shows the importance of access to natural areas, and 'biophilic' environments as keys to human health and well-being, as well as helping reduce crime, and of course being a critical part of protecting biodiversity. On this matter, Wellington as a city is playing a critical role in providing refuge for formerly at risk native birds, e.g. kaka, and with efforts such as the Halo Project and Predator Free initiatives being undertaken by thousands of Wellingtonians, it is important our city's district plan provides legal and policy support to this.	Retain Objective NE-O3 as notified.
Wellington Civic Trust	388.9	Strategic Direction / Natural Environment / NE-O3	Support in part	Supports the intention of NE-O3, as it relates to the city's green network, however as currently worded it suggests that the network is satisfactory and all that is needed is to "retain" the network.	Retain Amend Natural Environment Objective NE-O3 with amendment.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Wellington Civic Trust	388.10	Strategic Direction / Natural Environment / NE-O3	Amend	Considers NE-O3 should be amended to clarify that the open space network can and should be expanded, as well as retained. The current wording suggests that the network is satisfactory and all that is needed is to "retain" the network. As currently written, NE-O3 does not suggest that the City intends to add to the amount of open space accessible and available to City residents, workers and visitors. It is essential that the need for more open space is signalled at the strategic level if the Council is to actively pursue the acquisition of more public open space and that it is going to ensure that new development contributes to this provision.	Amend Natural Environment Objective NE-O3 as follows: The City retains <u>expands its open space network so that</u> an extensive open space network is <u>provided and retained</u> that."
Wellington International Airport Limited	FS36.28	Part 2 / Strategic Direction / Natural Environment / NE-O3	Oppose	WIAL does not have any issue with the open space network being retained and/or expanded throughout the wider District. WIAL opposes this submission to the extent that it may fetter with the ability for WIAL to completed ongoing seawall upgrade and replacement works within the Open Space area located between Moa Point and Lyall Bay.	Disallow / Seeks that part of the submission be disallowed.
Kāinga Ora Homes and Communities	391.63	Strategic Direction / Natural Environment / NE-O3	Support	Objective NE-O3 is generally supported.	Retain Objective NE-O3 (The City retains an extensive open space...) as notified.
Willis Bond and Company Limited	416.28	Strategic Direction / Natural Environment / NE-O3	Support	Supports the intent of NE-O3.	Retain NE-O3 (The City retains an extensive open space network across the City...)as notified.
Royal Forest and Bird Protection Society	345.25	Strategic Direction / Natural Environment / NE-O4	Support	Supports the objective.	Retain NE-O4 as notified.
WCC Environmental Reference Group	377.21	Strategic Direction / Natural Environment / NE-O4	Support	Considers there is insufficient focus on mana whenua and their ability to exercise kaitiaki following their own mātauranga: this strategic objective helps to re-balance this.	Retain Objective NE-O4 as notified.
Taranaki Whānui ki te Upoko o te Ika	389.50	Strategic Direction / Natural Environment / NE-O4	Support in part	Support the acknowledgment of Taranaki Whānui connection with environment and water and of the Taranaki Whānui tikanga and mātauranga in the management of the natural environment.	Retain NE-O1 with amendments.
Te Rūnanga o Toa Rangatira	FS138.51	Part 2 / Strategic Direction / Natural Environment / NE-O4	Oppose	The submitter seeks amendments throughout the plan seeking Taranaki Whānui to hold ahi kā and primary mana whenua status throughout Te Whanganui a Tara rohe. Te Rūnanga o Toa Rangatira understand and acknowledge that Taranaki Whānui have a physical presence within Te Whanganui a Tara. However, if this was implemented in the plan this would mean that their ahi kā would extend across the entire extent of the Wellington City Council boundary. Ngāti Toa Rangatira do have a physical presence in Te Whanganui a Tara and sites of significance which are listed in the plan. This means that Ngāti Toa Rangatira still need to be engaged with in terms of resource management and resource consents.	Disallow
Taranaki Whānui ki te Upoko o te Ika	389.51	Strategic Direction / Natural Environment / NE-O4	Amend	Support the acknowledgment of Taranaki Whānui connection with environment and water and of the Taranaki Whānui tikanga and mātauranga in the management of the natural environment.	Seeks amendment to: a) include role of Taranaki Whānui as ahi kā and primary mana whenua or b) that is most appropriate to address the submission.
Te Rūnanga o Toa Rangatira	FS138.52	Part 2 / Strategic Direction / Natural Environment / NE-O4	Oppose	The submitter seeks amendments throughout the plan seeking Taranaki Whānui to hold ahi kā and primary mana whenua status throughout Te Whanganui a Tara rohe. Te Rūnanga o Toa Rangatira understand and acknowledge that Taranaki Whānui have a physical presence within Te Whanganui a Tara. However, if this was implemented in the plan this would mean that their ahi kā would extend across the entire extent of the Wellington City Council boundary. Ngāti Toa Rangatira do have a physical presence in Te Whanganui a Tara and sites of significance which are listed in the plan. This means that Ngāti Toa Rangatira still need to be engaged with in terms of resource management and resource consents.	Disallow
Kāinga Ora Homes and Communities	391.64	Strategic Direction / Natural Environment / NE-O4	Support	Objective NE-O4 is generally supported.	Retain Objective NE-O4 (Mana whenua are able to exercise their...) as notified.
Willis Bond and Company Limited	416.29	Strategic Direction / Natural Environment / NE-O4	Support	Supports the intent of NE-O4.	Retain NE-O4 (Mana whenua are able to exercise their customary responsibilities ...)as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Royal Forest and Bird Protection Society	345.26	Strategic Direction / Strategic City Assets and Infrastructure / General SCA	Oppose in part	Considers the introduction and objectives are not consistent with sustainable management as per s5 of the RMA. They fail to integrate environmental outcomes and the protection of biodiversity into the objectives for the City/Wellington district.	Amend the Introduction to be consistent with sustainable management as set out in Section 5 of the Resource Management Act.
Wellington International Airport Limited	FS36.30	Part 2 /Strategic Direction / Strategic City Assets and Infrastructure / General SCA	Oppose	Considers it appropriate to ensure the Proposed Plan gives effect to Part 2 of the RMA. WIAL opposes the submission however, as no specific drafting has been provided in association with this submission point and therefore WIAL cannot determine the appropriateness or otherwise of the amendments in terms of section 32 of the RMA.	Disallow
Envirowaste Services Ltd	373.6	Strategic Direction / Strategic City Assets and Infrastructure / General SCA	Support	The SCA objectives for infrastructure under this chapter are supported when considering the addition of waste facilities as inclusive of infrastructure types for the purposes of the strategic objectives.	Retain the Strategic City Assets and Infrastructure chapter as notified.
Wellington International Airport Ltd	406.64	Strategic Direction / Strategic City Assets and Infrastructure / General SCA	Support	Supports the recognition of Wellington International Airport, as regionally significant infrastructure, within the Introduction of the "Strategic City Assets and Infrastructure" section of the District Plan.	Retain Strategic City Assets and Infrastructure Chapter introduction as notified.
Board of Airline Representatives of New Zealand Inc *Late further submission accepted as per Minute 3	FS139.43	Strategic Direction / Strategic City Assets and Infrastructure / General SCA	Support	Support WAIL's submission for the reasons set out in WAIL's submission.	Allow
Willis Bond and Company Limited	416.30	Strategic Direction / Strategic City Assets and Infrastructure / General SCA	Amend	Considers that the objectives for dealing with out-of-sequence development proposals are not appropriate. The submitter considers that developers should be limited to paying the net increased cost associated with the development proposal, as assessed against Council's long-term planning for infrastructure spend. The submitter considers that developers should not be expected to provide infrastructure over and above what is required for a particular development proposal. [See original submission for full reason]	Seeks that out-of-sequence infrastructure costs are dealt with exclusively through the development contributions or financial contributions policy.
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	99.2	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O1	Support	The SCA-O1 is supported as it appropriately recognises and provides for infrastructure.	Retain Strategic City Assets and Infrastructure O1 as notified.
Meridian Energy Limited	228.16	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O1	Support in part	Considers that infrastructure, including regionally significant infrastructure, is essential to support the safe, efficient and effective functioning of Wellington's community. Achieving resilience in infrastructure networks will require continual development, maintenance, adaptation and upgrading of existing infrastructure to meet future growth and changing needs. If Wellington, along with the Wellington region and New Zealand, are to successfully transition away from dependence on fossil fuels and meet the nation's climate change obligations, there will need to be a substantial increase in generation of electricity from renewable sources. Regional and district plans need to anticipate this and enable increased renewable electricity generation.	Retain Objective SCA-O1 (Infrastructure) with amendment.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Meridian Energy Limited	228.17	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O1	Amend	Considers that infrastructure, including regionally significant infrastructure, is essential to support the safe, efficient and effective functioning of Wellington's community. Achieving resilience in infrastructure networks will require continual development, maintenance, adaptation and upgrading of existing infrastructure to meet future growth and changing needs. Considers that if Wellington, along with the Wellington region and New Zealand, are to successfully transition away from dependence on fossil fuels and meet the nation's climate change obligations, there will need to be a substantial increase in generation of electricity from renewable sources. Regional and district plans need to anticipate this and enable increased renewable electricity generation.	Amend Objective SCA-O1 (Infrastructure) as follows or similar wording to achieve the same outcome: Infrastructure is established, operated, maintained, and upgraded in Wellington City so that: 1. The social, economic, cultural, and environmental benefits of this infrastructure are recognised; 2. The City is able to function safely, efficiently and effectively; 3. The infrastructure network is resilient in the long term; 4. <u>Infrastructure, including renewable electricity generation facilities, contribute to the transition away from dependence on fossil fuels;</u> and 5. Future growth and development is enabled and can be sufficiently serviced.
Wellington International Airport Limited	FS36.31	Part 2 / Strategic Direction / Strategic City Assets and Infrastructure / SCA-O1	Oppose	WIAL supports, in principle, the transition away from dependence on fossil fuels and seeks to encourage such changes at the Airport where practicable, including through the gradual electrification of infrastructure at the Airport. WIAL submits however, that there a number of factors outside of its control that will affect the transition towards alternative fuel sources for aircraft using the Airport. WIAL therefore opposes this submission to the extent that the changes need to be qualified, for example, with the term "practicable".	Disallow
Kilmarnston Developments Limited and Kilmarnston Properties Limited	290.24	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O1	Support	Considers that it is important for Council to make provision for new urban development where it can be serviced by appropriate and necessary infrastructure. The residential area of the land will be well connected to transport networks, pedestrian facilities, public open space and other social infrastructure.	Retain SCA-O1 (Infrastructure is established, operated, maintained, and upgraded in Wellington City so that...) as notified.
Firstgas Limited	304.11	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O1	Support	SCA-O1 is generally supported in terms of the outcomes it seeks related to the establishment, operation, maintenance and upgrading of infrastructure.	Retain Objective SCA-O1 as notified.
Transpower New Zealand Limited	315.41	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O1	Support	Supports the provision of a strategic objective specific to Infrastructure, given its importance to the city, region and nation. Considers the objective gives effect to RPS Objective 10 and policies 7 and 8.	Retain SCA-O1 as notified.
Royal Forest and Bird Protection Society	345.27	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O1	Oppose	Considers it is not clear whether this objective should be regarding RSI or not as it appears to reflect policy 7 of the RPS which is for RSI, not infrastructure generally. Infrastructure can have significant adverse effects on the environment from construction to operation, maintenance and upgrades. s6 matters still apply and this objective needs to ensure infrastructure doesn't impact the protection of biodiversity.	Amend SCA-O1: Infrastructure is established, operated, maintained, and upgraded in Wellington City so that: 1. The social, economic, cultural, and environmental benefits of this infrastructure are recognised; 2. The City is able to function safely, efficiently and effectively; 3. The infrastructure network is resilient in the long term; and 4. Future growth and development is enabled and can be sufficiently serviced; <u>and</u> 5. <u>Indigenous biodiversity is retained, protected and enhanced.</u>
Wellington Electricity Lines Limited (WELL)	FS27.17	Part 2 / Strategic Direction / Strategic City Assets and Infrastructure / SCA-O1	Oppose	WELL do not support this submission point as it seeks to, at a high-level, restrict the provision of infrastructure to Wellington City's businesses and communities. Infrastructure is a fundamental component to enable social, cultural and economic wellbeing. The amendments sought by the submitter are unbalanced and in effect will diminish the positive effects of efficient infrastructure provision. The submission point seeking that the words "Indigenous biodiversity is retained, protected and enhanced" is noble, however, is considered to be out of place in the purpose and intent of Proposed SCA-O1.	Disallow

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Wellington International Airport Limited	FS36.32	Part 2 / Strategic Direction / Strategic City Assets and Infrastructure / SCA-01	Oppose	WIAL opposes this submits as it conflicts with WIAL's primary submission that seeks for these objectives to be retained as notified. WIAL also submits that the changes proposed seek to "cherry pick" section 6 and 7 matters. Section 6 and 7 matters are addressed by other provisions within the Strategic Direction of the Proposed Plan. Changes recommended to the Strategic Directions (Transpower 315.40) will clarify that these provisions which give effect to section 6 and 7 of the RMA will apply, ensuring that infrastructure providers have to look to the broader strategic direction provisions, not just those contained in the Strategic City Assets and Infrastructure section.	Disallow
KiwiRail Holdings Limited	FS72.10	Part 2 / District-Wide Matters / Strategic Direction / Strategic City Assets and Infrastructure / SCA-01	Oppose	Rejects deletion of clause 1. Considers benefits of infrastructure must be recognised in strategic direction. KiwiRail also considers that the retention, protection and enhancement of indigenous biodiversity is provided for in NE-01. Considers the relief sought should be declined because it a) will not promote the sustainable management of the natural and physical resources in Wellington City, and is therefore contrary to, or inconsistent with, Part 2 and other provisions of the RMA and the Amendment Act; (b) is inconsistent with other relevant planning documents, including the Greater Wellington Regional Policy Statement and National Policy Statement for Urban Development 2020; (c) will not meet the reasonably foreseeable needs of future generations; (d) will not avoid, remedy or mitigate actual and potential adverse effects on the environment; (e) will not enable the social, economic and cultural wellbeing of people of Wellington City; and (f) is not the most appropriate way to achieve the objectives of the Proposed Plan in terms of section 32 of the RMA.	Disallow
Meridian Energy Limited	FS101.14	Part 2 / Strategic Direction / Strategic City Assets and Infrastructure / SCA-01	Oppose	Considers that all infrastructure, including regionally significant infrastructure, delivers benefits for the Wellington City communities. All relevant benefits should be recognised. There is no mandate in the RMA or any of the higher order documents for retaining, protecting and enhancing all indigenous biodiversity. There is mandate in section (6) of the RMA and the NZCPS for protecting significant indigenous biodiversity and significant habitats of indigenous fauna.	Disallow
New Zealand Defence Force	FS104.3	Part 2 / Strategic Direction / Strategic City Assets and Infrastructure / SCA-01	Oppose	It is important that the social, economic, cultural, and environmental benefits of infrastructure are recognised in Strategic City Assets Objective SCA-01.	Disallow / Reject submitter's relief and retain Strategic City Assets Objective SCA-01 as notified.
Waka Kotahi	370.56	Strategic Direction / Strategic City Assets and Infrastructure / SCA-01	Amend	Considers that additional wording is needed to give effect to carbon reduction.	Amend Strategic Objective SCA-01 (Infrastructure is established, operated, maintained...) as follows: Infrastructure is established, operated, maintained, and upgraded in Wellington City so that: 1. The social, economic, cultural, and environmental benefits of this infrastructure are recognised; 2. The City is able to function safely, efficiently and effectively; 3. The infrastructure network is resilient in the long term; and 4. Future growth and development is enabled and can be sufficiently serviced. <u>5. Infrastructure shall be delivered in a way which provides for carbon reduction targets.</u>
Wellington International Airport Limited	FS36.33	Part 2 / Strategic Direction / Strategic City Assets and Infrastructure / SCA-01	Oppose	Considers that while WIAL has been actively encouraging the transition to lower carbon alternatives where practicable (such as the electrification of GPUs and APUs and investigating the use of renewable energy sources) at the Airport, there a number of factors outside of its control that will affect the transition towards alternative fuel sources for aircraft using the Airport. WIAL therefore opposes this submission to the extent that it requires infrastructure to be delivered in a way that "provides" for carbon reduction targets. Alternative drafting or qualification of this statement (for example, using the term "where practicable") would better reflect this scenario.	Disallow / Seeks that part of the submission be disallowed.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
KiwiRail Holdings Limited	FS72.11	Part 2 / District-Wide Matters / Strategic Direction / Strategic City Assets and Infrastructure / SCA-O1	Support	Agrees that infrastructure shall be delivered in a way that provides for carbon reduction targets. Considers the relief sought should be allowed because it will (a) will promote the sustainable management of the natural and physical resources in Wellington City, and is therefore consistent with Part 2 and other provisions of the Resource Management Act 1991 (RMA) and the Enabling Housing Supply Amendment Act 2021 (Amendment Act); (b) is consistent with other relevant planning documents, including the Greater Wellington Regional Policy Statement and National Policy Statement for Urban Development 2020; (c) will meet the reasonably foreseeable needs of future generations; (d) will avoid, remedy or mitigate actual and potential adverse effects on the environment; (e) will enable the social, economic and cultural wellbeing of the people of Wellington City; and (f) is the most appropriate way to achieve the objectives of the Proposed Plan in terms of section 32 of the RMA.	Allow
Greater Wellington Regional Council	FS84.91	Part 2 / Strategic Direction / Strategic City Assets and Infrastructure / SCA-O1	Support	Greater Wellington strongly support this submission point and consider this amendment would contribute positively to reducing carbon emissions	Allow
WCC Environmental Reference Group	377.22	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O1	Amend	Considers that this objective should be clarified in two ways: Firstly, the infrastructure should provide value rather than value being recognised as a side benefit. Secondly, the protection or enhancement of the environment should be a prerequisite	Amend SCA-O1 (infrastructure is established, operated...) as follows: Infrastructure is established, operated, maintained, and upgraded in Wellington City so that: 1. It provides The social, economic, cultural, and environmental benefits of this infrastructure are recognised; ... 5. <u>The environment is protected or enhanced</u>
Wellington International Airport Limited	FS36.34	Part 2 / Strategic Direction / Strategic City Assets and Infrastructure / SCA-O1	Oppose	WIAL submits that the amendments conflate and oversimplify the directions set out in sections 6 and 7 of the RMA. Furthermore, the environment includes “natural and physical resources”, therefore the amendments do not provide any further assistance in terms of clarifying which resources are to be “protected” or “enhanced”. WIAL submits that other provisions within the Strategic Directions address the issues raised by the submitter.	Disallow
Meridian Energy Limited	FS101.15	Part 2 / Strategic Direction / Strategic City Assets and Infrastructure / SCA-O1	Oppose	Considers that the intention of the objective is, consistent with the approach adopted generally nationwide, that in making decisions about new and upgraded infrastructure the listed benefits must be recognised This approach gives effect to the relevant higher order National Policy statements and is to be preferred over the requested amendment. There is no mandate in the RMA or the higher order policy instruments for protecting or enhancing the environment in an absolute sense as suggested.	Disallow
New Zealand Defence Force	FS104.4	Part 2 / Strategic Direction / Strategic City Assets and Infrastructure / SCA-O1	Oppose	NZDF supports the policy directive of Strategic City Assets Objective SCA-O1 Clause (1) that the social, economic, cultural, and environmental benefits of infrastructure are recognised; as opposed to infrastructure providing for the aforementioned benefits. NZDF opposes the amendment sought to include new Clause (5) to protect or enhance the environment	Disallow / Reject submitter’s relief and retain Strategic City Assets Objective SCA-O1 as notified.
Kāinga Ora Homes and Communities	391.65	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O1	Support	Objective SCA-O1 is generally supported.	Retain Objective SCA-O1 (Infrastructure is established, operated,...) as notified.
Ministry of Education	400.13	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O1	Support in part	Supports Objective SCA-O1 in part.	Retain SCA-O1 (infrastructure is established, operated, maintained, and upgraded in Wellington City so that...) with amendment.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Ministry of Education	400.14	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O1	Amend	<p>Seeks that SCA-O1 includes reference to 'additional infrastructure'. The submitter notes that under the NPS-UD and the Definitions Chapter of the Proposed District Plan, educational facilities are included in the definition of 'additional infrastructure'.</p> <p>The submitter considers that the amendment will ensure educational facilities are enabled to service future growth and support the community's social and educational needs.</p> <p>The submitter seeks to highlight that Council has an obligation under the NPS-UD to ensure sufficient additional infrastructure is provided in development and local authorities must be satisfied that additional infrastructure to service the development capacity is likely to be available</p> <p>[see original submission for full reason].</p>	<p>Amend SCA-O1 (Infrastructure is established, operated, maintained, and upgraded in Wellington City so that...) as follows:</p> <p>Infrastructure and <u>additional infrastructure</u> is established...</p> <p>...</p>
CentrePort Limited	402.33	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O1	Support in part	<p>Considers that the Strategic direction in relation to infrastructure resilience would be enhanced by also referring to the ability to provide for infrastructure recovery after short term natural hazard events.</p>	<p>Retain SCA-O1 (Infrastructure is established, operated, maintained, and upgraded in Wellington City so that...) with amendment.</p>
CentrePort Limited	402.34	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O1	Amend	<p>Considers that the Strategic direction in relation to infrastructure resilience would be enhanced by also referring to the ability to provide for infrastructure recovery after short term natural hazard events.</p>	<p>Amend SCA-O1 (Infrastructure is established, operated, maintained, and upgraded in Wellington City so that...) as follows:</p> <p>...</p> <p>3. The infrastructure network is resilient in the long term <u>and can effectively recover from short term Natural Hazard events</u>; and</p> <p>...</p>

Wellington International Airport Ltd	406.65	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O1	Support	<p>Considers that it is appropriate for the strategic objectives to recognise the significance and importance of regionally significant infrastructure.</p> <p>Supports SCA O1.</p> <p>[See original submission paragraphs 4.11 to 4.15 and 4.20 to 4.24 for full reason]</p>	<p>Retain SCA-O1 (Establishment, operations, maintenance and upgrading of infrastructure) as notified.</p>
Board of Airline Representatives of New Zealand Inc *Late further submission accepted as per Minute 3	FS139.44	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O1	Support	<p>Support WAIL's submission for the reasons set out in WAIL's submission.</p>	<p>Allow</p>
KiwiRail Holdings Limited	408.22	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O1	Support	<p>Supports the strategic direction to establish, operate, maintain and upgrade infrastructure so that clauses 1 to 4 can be achieved. This will ensure the importance of rail and ferry infrastructure is recognised and the network is a resilient network that can function efficiently and effectively in the long term.</p>	<p>Retain SCA-O1 as notified.</p>

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Willis Bond and Company Limited	416.31	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O1	Amend	<p>Considers that the objectives (including SCA-O1) for dealing with out-of-sequence development proposals are not appropriate. The submitter considers that developers should be limited to paying the net increased cost associated with the development proposal, as assessed against Council's long-term planning for infrastructure spend.</p> <p>The submitter considers that developers should not be expected to provide infrastructure over and above what is required for a particular development proposal.</p> <p>[See original submission for full reason]</p>	Not specified.
New Zealand Defence Force	423.6	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O1	Support	Considers that it is important to provide for the establishment, operation, maintenance, and upgrading of infrastructure in Wellington City, and recognise that infrastructure provides a range of benefits through supporting the safe and efficient functioning of the City, along with future growth and development.	Retain SCA-O1 (Infrastructure is established, operated, maintained, and upgraded in Wellington City so that...)as notified.
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	99.3	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O2	Support	The SCA-O2 is supported as it appropriately recognises and provides for infrastructure.	Retain Strategic City Assets and Infrastructure O2 as notified.
Kilmarston Developments Limited and Kilmarston Properties Limited	290.25	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O2	Support	Considers that it is important for Council to make provision for new urban development where it can be serviced by appropriate and necessary infrastructure. The residential area of the land will be well connected to transport networks, pedestrian facilities, public open space and other social infrastructure.	Retain SCA-O2 (New urban development occurs in locations that are supported by sufficient development infrastructure capacity) as notified.
Firstgas Limited	304.12	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O2	Support	SCA-O2 is generally supported in terms of the outcomes it seeks related to infrastructure.	Retain Objective SCA-O2 as notified.
Royal Forest and Bird Protection Society	345.28	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O2	Oppose	Considers the objective does not adequately safeguard matters of national importance in s6 of the RMA as well as give effect to the NPS-FW regarding Te Mana o Te Wai.	<p>Amend SCA-O2:</p> <p>New urban development occurs in locations that are supported by sufficient development infrastructure capacity, <u>protect indigenous biodiversity, and can ensure protection of Te Mana o Te Wai</u> or where this is not the case the development:</p> <ol style="list-style-type: none"> 1. Can meet the development infrastructure costs associated with the development <u>which also provides for the protection of indigenous biodiversity and Te Mana o Te Wai,</u> and 2. Supports a significant increase in development capacity for the City.
Wellington Electricity Lines Limited (WELL)	FS27.18	Part 2 / Strategic Direction / Strategic City Assets and Infrastructure / SCA-O2	Oppose	WELL do not support these submission points because they seek to conflate high-level ecological and biodiversity concepts into an area of the PDP specifically focused on the importance of strategic infrastructure provision and development growth. The matters sought to be inserted in to the objectives by the Submitter would be best placed in to the PDP provisions pertaining to ecological and biodiversity matters – where their effects and sought protection would be better balanced and accounted for as appropriate. WELL seek the purpose and integrity of SCA-O2 and O3 is maintained and for Council to reject these submission points.	Disallow
Meridian Energy Limited	FS101.16	Part 2 / Strategic Direction / Strategic City Assets and Infrastructure / SCA-O2	Oppose	Considers that there is no mandate in the RMA or higher order policy instruments for protection of all indigenous biodiversity. The NPS-FM requirement is that freshwater (as opposed to land resources) is managed to give effect to Te Mana o te Wai (NPS-FM 2020 Policy 1).	Disallow

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Retirement Villages Association of New Zealand Incorporated	350.13	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O2	Oppose in part	Supports the recognition in (1) that development that is not supported by sufficient infrastructure capacity can proceed if it meets its own infrastructure requirements. However, Opposes the qualifier in (2) that requires such development to support a "significant increase in development capacity". This additional qualifier is not necessary if development meets its own infrastructure requirements. This objective is inconsistent with THW-O2.	Opposes SCA-O2 (Strategic Objectives) and seeks amendment.
Retirement Villages Association of New Zealand Incorporated	350.14	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O2	Amend	Supports the recognition in (1) that development that is not supported by sufficient infrastructure capacity can proceed if it meets its own infrastructure requirements. However, Opposes the qualifier in (2) that requires such development to support a "significant increase in development capacity". This additional qualifier is not necessary if development meets its own infrastructure requirements. This objective is inconsistent with THW-O2.	Seeks amendment to SCA-O2 (Strategic Objectives) to provide for development where it is supported by sufficient development infrastructure capacity or where the development can provide for its own infrastructure requirements (e.g. through on-site works).
Wellington Electricity Lines Limited	355.17	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O2	Support in part	Supports Objective SCA-O2 in part as it ensures development and the provision of infrastructure is coordinated and aligned from an infrastructure delivery perspective. However, the use of the limited term 'Development Infrastructure' omits the provision of other key infrastructure such as the Wellington Electricity Lines Limited electricity distribution network.	Retain Strategic City Assets and Infrastructure Objective SCA-O2 with amendment.
Wellington Electricity Lines Limited	355.18	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O2	Amend	Considers that Objective SCA-O2 should be amended to not neglect coverage of critical infrastructure that is not defined as 'Development Infrastructure'. As it stands the Objective supports a "significant increase in development capacity for the City", whereby such development capacity is exclusive to Additional Infrastructure, such as the electricity distribution network. For such higher-level PDP objectives, it is considered that the provision of all key infrastructure is identified at the strategic level – not solely directed towards Council owned or controlled infrastructure as is currently drafted in the objective.	Amend Strategic City Assets and Infrastructure Objective SCA-O2 as follows: <ol style="list-style-type: none"> 1. New urban development occurs in locations that are supported by sufficient development infrastructure capacity, or where this is not the case the development: 1. Can meet the development infrastructure costs associated with the development, and 2. Supports a significant increase in development capacity for the City.
Waka Kotahi	370.57	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O2	Amend	Notes a broken link for the definition of 'development infrastructure'	Amend SCA-O2 (New urban development occurs in locations...) to fix the broken link to 'development infrastructure' definition.
Waka Kotahi	370.58	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O2	Support	Supports this strategic objective as written.	Retain Strategic Objective SCA-O2 (New urban development occurs in locations) as notified.
Kāinga Ora Homes and Communities	391.66	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O2	Support	Objective SCA-O2 is generally supported.	Retain Objective SCA-O2 (New urban development occurs in locations...) as notified.
Willis Bond and Company Limited	416.32	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O2	Amend	Considers that the objectives (including SCA-O2) for dealing with out-of-sequence development proposals are not appropriate. The submitter considers that developers should be limited to paying the net increased cost associated with the development proposal, as assessed against Council's long-term planning for infrastructure spend. The submitter considers that developers should not be expected to provide infrastructure over and above what is required for a particular development proposal. [See original submission for full reason]	Amend SCA-O2 (New urban development occurs in locations that are supported...) as follows: <ol style="list-style-type: none"> 1. New urban development occurs in locations that are supported by sufficient development infrastructure capacity, or where this is not the case the development: 1. Can meet the <u>net increase in</u> development infrastructure costs associated with the development (as assessed against the costs expected to be incurred by Council were it not for the development) and 2. Supports a significant increase in development capacity for the City.
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	99.4	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O3	Oppose in part	The intent of SCA-O3 is supported as it recognises the role of Additional Infrastructure (other than three-waters and transport infrastructure) to support growth. This is consistent with the NPS-UD. However, there is a cross referencing error. The objective cross refers to Objective UFD-O6 which is the previous draft plan reference for this provision. It should be amended to UFD-O7.	Amend Objective SCA-O3 such that the cross reference is made to Objective UFD-O7.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Kilmarston Developments Limited and Kilmarston Properties Limited	290.26	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O3	Support	Considers that it is important for Council to make provision for new urban development where it can be serviced by appropriate and necessary infrastructure. The residential area of the land will be well connected to transport networks, pedestrian facilities, public open space and other social infrastructure.	Retain SCA-O3 (Additional infrastructure is incorporated into new urban developments of a nature and scale that supports Strategic Objective UFD-O6 or provides significant benefits at a regional or national scale) as notified.
Firstgas Limited	304.13	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O3	Support	SCA-O3 is generally supported in terms of the outcomes it seeks related to the incorporation of additional infrastructure.	Retain Objective SCA-O3 as notified.
Royal Forest and Bird Protection Society	345.29	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O3	Support in part	Considers the objective does not sufficiently provide for S6 matters in the RMA.	Amend SCA-O3: Additional infrastructure is incorporated into new urban developments of a nature and scale that supports Strategic Objective UFD-O6 or provides significant benefits at a regional or national scale <u>while protecting indigenous biodiversity.</u>
Wellington Electricity Lines Limited (WELL)	FS27.19	Part 2 / Strategic Direction / Strategic City Assets and Infrastructure / SCA-O3	Oppose	WELL do not support these submission points because they seek to conflate high-level ecological and biodiversity concepts into an area of the PDP specifically focused on the importance of strategic infrastructure provision and development growth. The matters sought to be inserted in to the objectives by the Submitter would be best placed in to the PDP provisions pertaining to ecological and biodiversity matters – where their effects and sought protection would be better balanced and accounted for as appropriate. WELL seek the purpose and integrity of SCA-O2 and O3 is maintained and for Council to reject these submission points.	Disallow
Meridian Energy Limited	FS101.17	Part 2 / Strategic Direction / Strategic City Assets and Infrastructure / SCA-O3	Oppose	Considers that the RMA, NZCPS and RPS require protection of significant indigenous biodiversity (not all indigenous biodiversity).	Disallow
Retirement Villages Association of New Zealand Incorporated	350.15	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O3	Oppose in part	Opposes the requirement for new urban development to incorporate 'additional infrastructure' (e.g. public open space, community facilities) that is not required by the development or relate to effects of the development. Considers that new development will contribute to such infrastructure through development contributions and this provision may result in 'double dipping'.	Delete SCA-O3 (Strategic Objectives) in its entirety as notified.
Waka Kotahi	370.59	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O3	Support	Supports this strategic objective as written.	Retain Strategic Objective SCA-O3 (Additional infrastructure is incorporated into new urban...) as notified.
Southern Cross Healthcare Limited	380.24	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O3	Support in part	Supports strategic objective SCA-O3 subject to hospitals being expressly included in the definition of 'additional infrastructure' as sought above.	Retain SCA-O3 as notified, if the amendment sought to the definition of ADDITIONAL INFRASTRUCTURE' is made.
Southern Cross Healthcare Limited	380.25	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O3	Amend	Considers alternative amendment to strategic objective SCA-O3, to ensure that hospitals are recognised as social infrastructure that must be incorporated in urban developments to provide significant regional and potentially national benefits.	Seeks for strategic objective SCA-O3 to alternatively be amended to the following: "Additional infrastructure (<u>including hospitals</u>) is incorporated into new urban developments of a nature and scale that supports Strategic Objective UFD-O6 or provides significant benefits at a regional or national scale."
Kāinga Ora Homes and Communities	391.67	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O3	Support	Objective SCA-O3 is generally supported.	Retain Objective SCA-O3 (Additional infrastructure is incorporated...) as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Willis Bond and Company Limited	416.33	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O3	Amend	<p>Considers that the objectives (including SCA-O3) for dealing with out-of-sequence development proposals are not appropriate. The submitter considers that developers should be limited to paying the net increased cost associated with the development proposal, as assessed against Council's long-term planning for infrastructure spend.</p> <p>The submitter considers that developers should not be expected to provide infrastructure over and above what is required for a particular development proposal.</p> <p>[See original submission for full reason].</p>	Delete SCA-O3 (Additional infrastructure is incorporated into new urban developments...) in its entirety.
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	99.5	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O4	Support	The SCA-O4 is supported as it appropriately recognises and provides for infrastructure.	Retain Strategic City Assets and Infrastructure O4 as notified.
Meridian Energy Limited	228.18	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O4	Support	Considers objective SCA-O4 (Regionally significant infrastructure) appropriately gives effect to the NPS-Renewable Electricity Generation 2011. The policies and rules of the Plan that give effect to Objective SCA-O4 need to be refined to genuinely provide for renewable electricity generation activities, as an essential form of regionally significant infrastructure, if New Zealand's aim of transitioning away from fossil fuels is to be achieved.	Retain Objective SCA-O4 (Regionally significant infrastructure) as notified.
Firstgas Limited	304.14	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O4	Support	SCA-O4 is generally supported in terms of the outcomes it seeks related to the provision of Regionally Significant Infrastructure and the benefits recognised and provided for.	Retain Objective SCA-O4 as notified.
Transpower New Zealand Limited	315.42	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O4	Support	Supports SCA-O4 on the basis that it recognises the development of new infrastructure, noting SCA-O1 relates to existing infrastructure.	Retain Objective SCA-O4 as notified.
Yvonne Weeber	340.10	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O4	Amend	Considers that SCA-O4 should be reworded to apply to all new infrastructure and to recognise the limits of existing infrastructure's location. It is considered that many present day regional significant infrastructure would not be placed in their present location using present day planning practices. The objective SCA-O4 suggests that existing regionally significant infrastructure e.g. Wellington Airport is in an 'appropriate location'. However, it is unclear whether building Wellington Airport in a location surrounded by residential neighbourhoods and coastal environments would be deemed an 'appropriate location' currently. SCA-O4 should be reworded to apply to all new infrastructure, but recognise existing infrastructure is not always in the most 'appropriate location', does not provide a full suite of benefits and needs to improve its planning and management to create social, cultural and environmental benefits.	Amend Objective SCA-O4 so that it clarifies that it applies to all new infrastructure and recognises the limits of existing infrastructure's location.
Wellington International Airport Limited	FS36.36	Part 2 / Strategic Direction / Strategic City Assets and Infrastructure / SCA-O4	Oppose	WIAL submits that the "limits" sought by this submitter are defined by Objective SCA-O5.	Disallow
Meridian Energy Limited	FS101.18	Part 2 / Strategic Direction / Strategic City Assets and Infrastructure / SCA-O4	Oppose	Meridian does not agree that all existing infrastructure can be considered to be inappropriately located. In the absence of any specific wording, it is not reasonable to properly consider the implications of, or allow, the request.	Disallow

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Royal Forest and Bird Protection Society	345.30	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O4	Support in part	Considers the objective does not align with policy 7 of the RPS that directs the recognition of the benefits of RSI and the consideration of social, economic, cultural and environmental benefits. It does not direct that RSI would be provided for over environmental protections which are to be provided for under s6 of the Act or over Councils functions to maintain indigenous biological diversity. PS objective is for recognition and protection of RSI. Seek amendment to ensure alignment with RPS	Amend SCA-O4: Regionally significant infrastructure is provided for in appropriate locations and the social, cultural economic, and environmental benefits of this infrastructure are recognised and provided for .
Wellington Electricity Lines Limited (WELL)	FS27.20	Part 2 / Strategic Direction / Strategic City Assets and Infrastructure / SCA-O4	Oppose	WELL do not support the sought amendment to SCA-O4 which is the deletion of the words "... and provided for" in relation to the social, cultural, economic and environmental benefits provided for by regionally significant infrastructure. The sought deletion will diminish the purpose and intent of the objective, and as such, the submission point is not supported by WELL.	Disallow
Transpower New Zealand Limited	FS29.14	Part 2 / Strategic Direction / Strategic City Assets and Infrastructure / SCA-O4	Oppose	Policy 1 of the NPSET requires that the "decision makers must recognise and provide for the national, regional, and local benefits of sustainable, secure, and efficient electricity transmission". SCA-O4 as notified is therefore supported.	Disallow
Meridian Energy Limited	FS101.19	Part 2 / Strategic Direction / Strategic City Assets and Infrastructure / SCA-O4	Oppose	Considers that recognising and providing for the benefits of infrastructure gives effect to relevant National Policy Statement direction and is appropriate.	Disallow
Waka Kotahi	370.60	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O4	Support	Supports this strategic objective as written.	Retain Strategic Objective SCA-O4 (Regionally significant infrastructure is provided for in appropriate...) as notified.
Kāinga Ora Homes and Communities	391.68	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O4	Support	Objective SCA-O4 is generally supported.	Retain Objective SCA-O4 (Regionally significant infrastructure is provided...) as notified.
CentrePort Limited	402.35	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O4	Support	Support the intent of this Objective.	Retain SCA-O4 (Regionally significant infrastructure is provided for in appropriate locations and the social, cultural economic, and environmental benefits of this infrastructure are recognised and provided for) as notified.
Wellington International Airport Ltd	406.66	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O4	Support	[No specific reason given beyond decision requested - see original submission.]	Retain SCA-O4 (Regionally significant infrastructure) as notified.
Board of Airline Representatives of New Zealand Inc *Late further submission accepted as per Minute 3	FS139.45	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O4	Support	Support WAIL's submission for the reasons set out in WAIL's submission.	Allow
KiwiRail Holdings Limited	408.23	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O4	Support	Supports that the objective recognises the benefits of and provides for regionally significant infrastructure in appropriate locations.	Retain SCA-O4 as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Willis Bond and Company Limited	416.34	Strategic Direction / Strategic City Assets and Infrastructure / SCA-04	Amend	<p>Considers that the objectives (including SCA-04) for dealing with out-of-sequence development proposals are not appropriate. The submitter considers that developers should be limited to paying the net increased cost associated with the development proposal, as assessed against Council's long-term planning for infrastructure spend [See original submission for full reason].</p> <p>The submitter considers that developers should not be expected to provide infrastructure over and above what is required for a particular development proposal</p> <p>[See original submission for full reason].</p>	Not specified.
Guardians of the Bays	452.9	Strategic Direction / Strategic City Assets and Infrastructure / SCA-04	Amend	<p>Many present day regional significant infrastructure would not be placed in their present location using present day planning practices. This objective suggests that existing regionally significant infrastructure e.g. Wellington Airport is in an 'appropriate location'. However, it is very doubtful if the Wellington Airport location surrounded by residential neighbourhoods and coastal environments would be built now and deemed an 'appropriate location'. Ideally the submitter would like this objective reworded to apply to all new infrastructure but recognising existing infrastructure is not always in the most 'appropriate location' and does not provide a full suite of benefits but needs to improve its planning and management to create social, cultural and environmental benefits.</p>	Amend the wording of the objective to recognise the submitters concerns in respect of existing infrastructure location
Wellington International Airport Limited	FS36.37	Part 2 / Strategic Direction / Strategic City Assets and Infrastructure / SCA-04	Oppose	WIAL submits that the "limits" sought by this submitter are defined by Objective SCA-05.	Disallow
Meridian Energy Limited	FS101.20	Part 2 / Strategic Direction / Strategic City Assets and Infrastructure / SCA-04	Oppose	Meridian does not agree that all existing infrastructure can be considered to be inappropriately located. In the absence of any specific wording, it is not reasonable to properly consider the implications of, or allow, the request.	Disallow
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	99.6	Strategic Direction / Strategic City Assets and Infrastructure / SCA-05	Support	The SCA-05 is supported as it appropriately recognises and provides for infrastructure.	Retain Strategic City Assets and Infrastructure 05 as notified.
Meridian Energy Limited	228.19	Strategic Direction / Strategic City Assets and Infrastructure / SCA-05	Support in part	Considers objective SCA-05 (adverse effects of infrastructure) appropriately gives effect to the NPS-Renewable Electricity Generation 2011. However, the expression adopted by the National Planning Standards and typically used is 'functional needs' and 'operational needs' (rather than 'technical needs') and 'functional need' is a defined term in the Plan.	Retain Objective SCA-05 (The adverse effects of infrastructure are managed having regard to the economic, social, environmental and cultural benefits, and the technical and operational needs of infrastructure.) with amendment.
Meridian Energy Limited	228.20	Strategic Direction / Strategic City Assets and Infrastructure / SCA-05	Amend	Considers objective SCA-05 (adverse effects of infrastructure) appropriately gives effect to the NPS-Renewable Electricity Generation 2011. However, the expression adopted by the National Planning Standards and typically used is 'functional needs' and 'operational needs' (rather than 'technical needs') and 'functional need' is a defined term in the Plan.	<p>Amend Objective SCA-05 (The adverse effects of infrastructure are managed having regard to the economic, social, environmental and cultural benefits, and the technical and operational needs of infrastructure.) to align with the National Planning Standards as follows:</p> <p>The adverse effects of infrastructure are managed having regard to the economic, social, environmental and cultural benefits, and the technical functional and operational needs of infrastructure.</p>

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Kilmarston Developments Limited and Kilmarston Properties Limited	290.27	Strategic Direction / Strategic City Assets and Infrastructure / SCA-05	Support	Considers that it is important for Council to make provision for new urban development where it can be serviced by appropriate and necessary infrastructure. The residential area of the land will be well connected to transport networks, pedestrian facilities, public open space and other social infrastructure.	Retain SCA-05 (The adverse effects of infrastructure are managed having regard to the economic, social, environmental and cultural benefits, and the technical and operational needs of infrastructure) as notified.
Firstgas Limited	304.15	Strategic Direction / Strategic City Assets and Infrastructure / SCA-05	Support	SCA-05 is generally supported in terms of the outcomes it seeks related to the provision of Regionally Significant Infrastructure and the benefits recognised and provided for.	Retain Objective SCA-05 as notified.
Transpower New Zealand Limited	315.43	Strategic Direction / Strategic City Assets and Infrastructure / SCA-05	Support	Supports the provision of a strategic objectives specific to infrastructure, given its importance to the city, region and nation. Considers the objective gives effect to RPS Objective 10 and policies 7 and 8.	Retain Objective SCA-05 as notified.
Royal Forest and Bird Protection Society	345.31	Strategic Direction / Strategic City Assets and Infrastructure / SCA-05	Oppose in part	Considers it is not clear whether this objective should be regarding RSI or not as it appears to reflect policy 7 of the RPS which is for RSI, not infrastructure generally. The RPS acknowledges that regionally significant infrastructure can also have adverse effects on the surrounding environment and community.	Amend SCA-05: The adverse effects of infrastructure are managed avoided while having regard to the economic, social, environmental and cultural benefits, and the technical and operational needs of infrastructure.
Wellington Electricity Lines Limited (WELL)	FS27.21	Part 2 / Strategic Direction / Strategic City Assets and Infrastructure / SCA-05	Oppose	WELL do not support the amendments sought by the submission point as they seek to constrain the provision of development and additional infrastructure which is required to serve Wellington communities and businesses. The submission point seeks to include the word 'avoided' in regard to infrastructure provision – which is considered inappropriate in the context of the strategic growth and development objective. The submission point seeks to unduly influence the provision of effective and efficient infrastructure with unavoidable environmental effects.	Disallow
Transpower New Zealand Limited	FS29.15	Part 2 / Strategic Direction / Strategic City Assets and Infrastructure / SCA-05	Oppose	Notwithstanding whether the strategic objective should apply to RSI or infrastructure generally, a blanket avoid directive with no consideration of the scale or nature of the adverse effect is not supported at a strategic objective level.	Disallow
Wellington International Airport Limited	FS36.38	Part 2 / Strategic Direction / Strategic City Assets and Infrastructure / SCA-05	Oppose	Considers that it is inappropriate for the all adverse effects, regardless of the nature or scale of those effects, to be avoided, nor has such a management threshold been applied to other activities in the District. Furthermore, the submitters concerns appear to relate to the application of this objective to infrastructure more generally (i.e. not just to RSI).	Disallow
KiwiRail Holdings Limited	FS72.12	Part 2 / District-Wide Matters / Strategic Direction / Strategic City Assets and Infrastructure / SCA-05	Oppose	Considers that infrastructure cannot always avoid all adverse effects on the environment, as recognised by the RPS and the PDP. KiwiRail seeks the retention of 'manage' effects of infrastructure and recognition of the benefits of infrastructure in this objective. Considers the relief sought should be declined because it a) will not promote the sustainable management of the natural and physical resources in Wellington City, and is therefore contrary to, or inconsistent with, Part 2 and other provisions of the RMA and the Amendment Act; (b) is inconsistent with other relevant planning documents, including the Greater Wellington Regional Policy Statement and National Policy Statement for Urban Development 2020; (c) will not meet the reasonably foreseeable needs of future generations; (d) will not avoid, remedy or mitigate actual and potential adverse effects on the environment; (e) will not enable the social, economic and cultural wellbeing of people of Wellington City; and (f) is not the most appropriate way to achieve the objectives of the Proposed Plan in terms of section 32 of the RMA.	Disallow

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Meridian Energy Limited	FS101.21	Part 2 / Strategic Direction / Strategic City Assets and Infrastructure / SCA-O5	Oppose	Considers that it is not consistent with the RMA framework, or with the relevant higher order policy instruments, to require all adverse effects of infrastructure to be avoided. Economic, social, environmental and cultural benefits are relevant in terms of the RMA framework and higher order policy instruments.	Disallow
Waka Kotahi	370.61	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O5	Support	Supports this strategic objective as written.	Retain Strategic Objective SCA-O5 (The adverse effects of infrastructure are managed...) as notified.
Kāinga Ora Homes and Communities	391.69	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O5	Support	Objective SCA-O5 is generally supported.	Retain Objective SCA-O5 (The adverse effects of infrastructure...) as notified.
CentrePort Limited	402.36	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O5	Support in part	Considers that the use of the word managed is open to interpretation and is of limited assistance to decision makers.	Retain SCA-O5 (The adverse effects of infrastructure are managed having regard to the economic, social, environmental and cultural benefits, and the technical and operational needs of infrastructure) with amendment.
CentrePort Limited	402.37	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O5	Amend	Considers that the use of the word managed is open to interpretation and is of limited assistance to decision makers.	Amend SCA-O5 (The adverse effects of infrastructure are managed having regard to the economic, social, environmental and cultural benefits, and the technical and operational needs of infrastructure) as follows: The adverse effects of infrastructure are managed avoided, remedied or mitigated having regard to the economic, social, environmental and cultural benefits, and the technical and operational needs of infrastructure.
Wellington International Airport Ltd	406.67	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O5	Support	[No specific reason given beyond decision requested - see original submission.]	Retain SCA-O5 (Adverse effects of infrastructure) as notified.
Board of Airline Representatives of New Zealand Inc *Late further submission accepted as per Minute 3	FS139.46	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O5	Support	Support WAIL's submission for the reasons set out in WAIL's submission.	Allow
KiwiRail Holdings Limited	408.24	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O5	Support	Supports the direction to manage the adverse effects of infrastructure having particular regard to the technical and operational needs of infrastructure.	Retain SCA-O5 as notified.
Willis Bond and Company Limited	416.35	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O5	Amend	Considers that the objectives (including SCA-O5) for dealing with out-of-sequence development proposals are not appropriate. The submitter considers that developers should be limited to paying the net increased cost associated with the development proposal, as assessed against Council's long-term planning for infrastructure spend. The submitter considers that developers should not be expected to provide infrastructure over and above what is required for a particular development proposal. [See original submission for full reason]	Not specified.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	99.7	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O6	Support	The SCA-O6 is supported as it appropriately recognises and provides for infrastructure.	Retain Strategic City Assets and Infrastructure O6 as notified.
Meridian Energy Limited	228.21	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O6	Support	Considers SCA-O6 (efficient and safe infrastructure) appropriately gives effect to the NPS-Renewable Electricity Generation 2011 and is necessary to protect all infrastructure, including regionally significant infrastructure.	Retain Objective SCA-O6 (efficient and safe infrastructure) as notified.
Kilmarston Developments Limited and Kilmarston Properties Limited	290.28	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O6	Support	Considers that it is important for Council to make provision for new urban development where it can be serviced by appropriate and necessary infrastructure. The residential area of the land will be well connected to transport networks, pedestrian facilities, public open space and other social infrastructure.	Retain SCA-O6 (Infrastructure operates efficiently and safely and is protected from incompatible development and activities that may create reverse sensitivity effects) as notified.
Firstgas Limited	304.16	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O6	Support	SCA-O6 is generally supported in terms of the outcomes sought for the efficient and safe operation of the infrastructure, and protection from incompatible development and activities that may create reverse sensitivity effects on the infrastructure.	Retain Objective SCA-O6 as notified.
Transpower New Zealand Limited	315.44	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O6	Support in part	Supports the provision of a strategic objective specific to Infrastructure, given its importance to the city, region and nation. However, an amendment is sought to the SO to reflect that in addition to reverse sensitivity, infrastructure needs to be protected to ensure it is not compromised. Considers the sought amendment would make it clear that effects on infrastructure are not confined to reverse sensitivity.	Supports Strategic Direction SCA-O6, with amendment.
Transpower New Zealand Limited	315.45	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O6	Amend	Supports the provision of a strategic objective specific to Infrastructure, given its importance to the city, region and nation. However, an amendment is sought to the SO to reflect that in addition to reverse sensitivity, infrastructure needs to be protected to ensure it is not compromised. Considers the sought amendment would make it clear that effects on infrastructure are not confined to reverse sensitivity.	Amend Strategic Direction SCA-O6 as follows: Infrastructure operates efficiently and safely and is protected from incompatible development and activities, <u>including those</u> that may create reverse sensitivity effects <u>or compromise the Infrastructure.</u>
Wellington International Airport Limited	FS36.39	Part 2 / Strategic Direction / Strategic City Assets and Infrastructure / SCA-O6	Support	The proposed amendments provide further clarification around the interpretation and application of the objective.	Allow
Meridian Energy Limited	FS101.22	Part 2 / Strategic Direction / Strategic City Assets and Infrastructure / SCA-O6	Support	Meridian agrees that reverse sensitivity is not the only potential adverse effect that can compromise the operation of infrastructure. Examples of other adverse effects include the establishment of activities or allowing traffic activities that have the potential to interfere with safe access to existing lawfully established infrastructure sites, or the establishment of activities or public access that introduces a risk of direct damage to lawfully established infrastructure (including regionally significant infrastructure).	Allow
New Zealand Defence Force	FS104.6	Part 2 / Strategic Direction / Strategic City Assets and Infrastructure / SCA-O6	Support	Support amendment to the objective for the protection of infrastructure from incompatible development and activities, including those that may create reverse sensitivity effects or compromise infrastructure.	Allow
Royal Forest and Bird Protection Society	345.32	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O6	Oppose	This policy appears to give effect to policy 8 of the RPS but again, that is for RSI not infrastructure more generally. We do not support blanket protection of infrastructure from incompatible development. It is for infrastructure to not impact on the environment, not the other way around.	Delete SCA-O6.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Wellington Electricity Lines Limited (WELL)	FS27.22	Part 2 / Strategic Direction / Strategic City Assets and Infrastructure / SCA-O6	Oppose	WELL do not support the submission point to delete SCA-O6 given the high-level and strategic intent of the objective. SCA-O6 is an objective, rather than a policy as indicated by the submitter, and given the strategic importance of infrastructure provision – Objective SCA-O6 should be retained, with the submission point rejected.	Disallow
Transpower New Zealand Limited	FS29.16	Part 2 / Strategic Direction / Strategic City Assets and Infrastructure / SCA-O6	Oppose	Notwithstanding whether the strategic objective should apply to RSI or infrastructure generally, Strategic Objective SCA-O6 is supported in that it recognises the effect of other activities on infrastructure. The provision of such an objective does not negate the need for infrastructure to manage its adverse effects on the environment. On that basis, the relief sought by the submitter is opposed.	Disallow
Wellington International Airport Limited	FS36.40	Part 2 / Strategic Direction / Strategic City Assets and Infrastructure / SCA-O6	Oppose	Considers that reverse sensitivity is a significant concern for a number of infrastructure operators. The concept of reverse sensitivity relates to other activities establishing within proximity to existing and lawfully established (infrastructure) activities, and then complaining about the effects of this activity.	Disallow
KiwiRail Holdings Limited	FS72.13	Part 2 / District-Wide Matters / Strategic Direction / Strategic City Assets and Infrastructure / SCA-O6	Oppose	Rejects the deletion of this objective. Considers it is important that adverse effects on infrastructure are recognised in the Plan and there are appropriate provisions in place to protect infrastructure. Considers the relief sought should be declined because it a) will not promote the sustainable management of the natural and physical resources in Wellington City, and is therefore contrary to, or inconsistent with, Part 2 and other provisions of the RMA and the Amendment Act; (b) is inconsistent with other relevant planning documents, including the Greater Wellington Regional Policy Statement and National Policy Statement for Urban Development 2020; (c) will not meet the reasonably foreseeable needs of future generations; (d) will not avoid, remedy or mitigate actual and potential adverse effects on the environment; (e) will not enable the social, economic and cultural wellbeing of people of Wellington City; and (f) is not the most appropriate way to achieve the objectives of the Proposed Plan in terms of section 32 of the RMA.	Disallow
New Zealand Defence Force	FS104.5	Part 2 / Strategic Direction / Strategic City Assets and Infrastructure / SCA-O6	Oppose	It is appropriate for the policy direction of the Proposed Plan to provide for the protection of infrastructure from incompatible development and activities that may create reverse sensitivity effects.	Disallow / Reject submitter's relief and retain Strategic City Assets Objective SCA-O6 as notified.
Wellington Electricity Lines Limited	355.19	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O6	Support	Supports Objective SCA-O6 as it clearly recognises the protection of existing electricity distribution infrastructure in the wake of housing intensification across the City. It is noted that the PDP is striving to facilitate responsible compact urban development and the consequential infill through the recently imposed Housing Supply Legislation. Consequently it is agreed that the protection of existing RSI and associated facilities are important that such infill does not result in enhance reverse sensitivity effects.	Retain SCA-O6 of the Strategic City Assets and Infrastructure chapter as notified.
Waka Kotahi	370.62	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O6	Support in part	Supports this strategic objective as written.	Retain Strategic Objective SCA-O6 (Infrastructure operates efficiently and safely...), subject to amendment.
Waka Kotahi	370.63	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O6	Amend	Considers it appropriate to add a reference to adverse health effects	Amend Strategic Objective SCA-O6 (Infrastructure operates efficiently and safely...) as follows: Infrastructure operates efficiently and safely and is protected from incompatible development and activities that may create reverse sensitivity effects <u>or adverse health effects</u> .

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Kāinga Ora Homes and Communities	391.70	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O6	Support	Objective SCA-O6 is generally supported.	Retain Objective SCA-O6 (Infrastructure operates efficiently...) as notified.
CentrePort Limited	402.38	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O6	Support	Support the intent of this Objective.	Retain SCA-O6 (Infrastructure operates efficiently and safely and is protected from incompatible development and activities that may create reverse sensitivity effects) as notified.
Wellington International Airport Ltd	406.68	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O6	Support	Considers that it is of significant importance to the ongoing operation and protection of regionally significant infrastructure, such as airports, that adverse reverse sensitivity effects are avoided. Supports the inclusion of SCA-O6. [See original submission paragraphs 4.11 to 4.15 and 4.20 to 4.24 for full reason]	Retain SCA-O6 (Infrastructure operates efficiently and safely) as notified.
Board of Airline Representatives of New Zealand Inc *Late further submission accepted as per Minute 3	FS139.47	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O6	Support	Support WAIL's submission for the reasons set out in WAIL's submission.	Allow
KiwiRail Holdings Limited	408.25	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O6	Support	Supports strategic direction to protect the operation of infrastructure from incompatible development and activities that may create reverse sensitivity effects.	Retain SCA-O6 as notified.
Willis Bond and Company Limited	416.36	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O6	Amend	Considers that the objectives (including SCA-O6) for dealing with out-of-sequence development proposals are not appropriate. The submitter considers that developers should be limited to paying the net increased cost associated with the development proposal, as assessed against Council's long-term planning for infrastructure spend. The submitter considers that developers should not be expected to provide infrastructure over and above what is required for a particular development proposal. [See original submission for full reason]	Not specified.
New Zealand Defence Force	423.7	Strategic Direction / Strategic City Assets and Infrastructure / SCA-O6	Support	Considers that it is important to protect infrastructure from incompatible development and activities that may create reverse sensitivity effects.	Retain SCA-O6 (Infrastructure operates efficiently and safely and is protected from incompatible development and activities that may create reverse sensitivity effects) as notified.
Victoria University of Wellington Students' Association	123.7	Strategic Direction / Sustainability Resilience and Climate Change / General SRCC	Support	Supports the PDP's intentions of 'growing up' instead of out and creating a compact city. Supports compact housing.	Not specified.
Roland Sapsford	305.27	Strategic Direction / Sustainability Resilience and Climate Change / General SRCC	Amend	Considers that the District Plan should focus its action on climate change by applying targeted and focal intensification to create local nodes or "urban villages" rather than broad brush intensification or intensification focussed in already dense areas. Considers that Emission reduction through intensification occurs largely through changes in the ways and distances people travel. Intensifying already dense areas has little effect on emissions. Rather it is modest changes in focal density in lower density areas that has the most impact.	Seeks that the District Plan be amended to focus on reducing existing emissions through focal intensification and the creation of nodes or "urban villages" in areas of relatively low density, rather than simply a broad brush approach to intensification.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Yvonne Weeber	340.11	Strategic Direction / Sustainability Resilience and Climate Change / General SRCC	Support	The net zero emission city' by 2050 goal set for Wellington City is supported. It is considered one of the most important aspects of the plan. Setting a goal of net zero emissions, has to be supported with clear objectives, policies, rules and standards throughout the plan if it is going to be achieved.	Retain the mention of 'net zero emission city by 2050' in the Introduction of the 'Sustainability, Resilience and Climate Change' chapter.
Yvonne Weeber	340.12	Strategic Direction / Sustainability Resilience and Climate Change / General SRCC	Support in part	The fourth paragraph of the Introduction is generally supported, but it is considered that climate change adaptation should be included within the introduction on Sustainability, Resilience and climate change.	Retain the fourth paragraph of the Introduction of the 'Sustainability, Resilience and Climate Change' chapter with amendment.
Yvonne Weeber	340.13	Strategic Direction / Sustainability Resilience and Climate Change / General SRCC	Amend	Considers that climate change adaptation should be included within the introduction of the Sustainability, Resilience and climate change chapter.	Amend the fourth paragraph of the Introduction of the 'Sustainability, Resilience and Climate Change' chapter as follows: ... There remains a level of uncertainty about the full extent of the impacts of climate change and sea level rise. This means the planning framework needs to retain a level of flexibility to enable the City to adapt in response to changing circumstances <u>including includes climate change adaptation</u>
Royal Forest and Bird Protection Society	345.33	Strategic Direction / Sustainability Resilience and Climate Change / General SRCC	Support in part	Supports the intent of the Introduction but are unclear how it integrates across the Plan.	Clarify SRCC - Introduction to integrate across the Plan.
Greater Wellington Regional Council	351.61	Strategic Direction / Sustainability Resilience and Climate Change / General SRCC	Support in part	Supports WCC taking a science-based approach for City-wide carbon emissions target setting.	Retain Introduction, subject to amendments, as outlined other submission points.
Greater Wellington Regional Council	351.62	Strategic Direction / Sustainability Resilience and Climate Change / General SRCC	Amend	Considers there is an inconsistency in the references to carbon reduction objectives across strategic objectives, including 'net zero' 'zero-emission city; and 'zero carbon'.	Seeks to amend the Sustainability, Resilience and Climate Change chapter to ensure references to carbon reduction objectives are consistent and clear.
BP Oil New Zealand, Mobil Oil New Zealand Limited and Z Energy Limited (the Fuel Companies)	372.22	Strategic Direction / Sustainability Resilience and Climate Change / General SRCC	Support	The Sustainability, Resilience and Climate Change chapter is supported, as it signals a direction to reduce carbon emissions and effects on climate change through the use of renewable energy technologies. This direction is reflected in the Renewable Energy Generation chapter which seeks to enable large and small-scale renewable energy investigation and generation activities.	Retain the Sustainability, Resilience and Climate Change chapter as notified.
WCC Environmental Reference Group	377.23	Strategic Direction / Sustainability Resilience and Climate Change / General SRCC	Amend	Considers that the Introduction of the Sustainability, Resilience and Climate Change should be amended to have consistency of language regarding the city's response to climate change. It is laudable to see a commitment to align with the goal of net zero emissions by 2050. However, this section uses inconsistent language and does not fully express the urgency needed to address climate change, nor the critical role that cities can play through their Plans.	Amend the Introduction to the Sustainability, Resilience and Climate Change chapter to give effect to the clarification of "net zero emission " or " zero carbon".
Guardians of the Bays	452.10	Strategic Direction / Sustainability Resilience and Climate Change / General SRCC	Support	Supports the intentions of the chapter. The submitter considers is one of the most important aspects of this plan. Setting a goal of net zero emissions, has to be supported with clear objectives, policies, rules and standards throughout the plan if it is going to be achieved.	Retain the sentence in the introduction of the chapter' Wellington City has a goal of being a net zero emission city by 2050' as notified.
Guardians of the Bays	452.11	Strategic Direction / Sustainability Resilience and Climate Change / General SRCC	Support in part	Supports paragraph four of the Sustainability, Resilience and Climate Change chapter.	Retain paragraph four in the Sustainability, Resilience and Climate Change) chapter subject to amendments below.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Guardians of the Bays	452.12	Strategic Direction / Sustainability Resilience and Climate Change / General SRCC	Amend	Considers climate change adaptation should be included within the introduction on Sustainability, Resilience and climate change	Amend paragraph 4 of the introduction as follows: There remains a level of uncertainty about the full extent of the impacts of climate change and sea level rise. This means the planning framework needs to retain a level of flexibility to enable the City to adapt in response to changing circumstances <u>including includes climate change adaptation.</u>
Te Rūnanga o Toa Rangatira	488.23	Strategic Direction / Sustainability Resilience and Climate Change / New SRCC	Amend	Support the chapter provisions which encourage the used of sustainable transport options, reduction in private vehicle use and aim to improve economic and social resilience.	Seeks that the Sustainability, Resilience and Climate Change objectives are amended to ensure that resilience is built in all spheres, being environmental, cultural, social and economic as they are interconnected and specifically better support cultural resilience.
Meridian Energy Limited	228.22	Strategic Direction / Sustainability Resilience and Climate Change / SRCC-O1	Support	Considers that an increase in the generation of electricity from renewable sources (including wind and solar) is necessary to meet growing demand locally and nationally and to enable New Zealand to meet its objectives for renewable electricity generation and minimise the use of fossil fuels.	Retain Objective SRCC-O1 (built environment) as notified.
Yvonne Weeber	340.14	Strategic Direction / Sustainability Resilience and Climate Change / SRCC-O1	Support in part	The Objective SRCC-O1 is generally supported, but an amendment is sought.	Retain Objective SRCC-O1 with amendment.
Yvonne Weeber	340.15	Strategic Direction / Sustainability Resilience and Climate Change / SRCC-O1	Amend	Considers that Objective SRCC-O1 needs an additional bullet point to reflect the need to consider climate change adaptation.	Amend Objective SRCC-O1 as follows: ... <u>5. Climate change adaptation</u>
Royal Forest and Bird Protection Society	345.34	Strategic Direction / Sustainability Resilience and Climate Change / SRCC-O1	Support in part	Considers that the objectives may allow renewable energy sources (e.g. windfarms) being built in the CMA and the protection of biodiversity and adverse effects being over looked at the expense of renewable energy generation. Suggest tightening relevant objectives to ensure s6 matters are provided for.	Amend SRCC-O1 to ensure matters set out in Section 6 of the Resource Management Act are provided for.
Greater Wellington Regional Council	351.63	Strategic Direction / Sustainability Resilience and Climate Change / SRCC-O1	Support in part	Supports the inclusion of a strategic objective that supports a reduction in carbon emissions.	Retain provision, subject to amendments, as outlined other submission points.
Wellington International Airport Limited	FS36.41	Part 2 / Strategic Direction / Sustainability Resilience and Climate Change / SRCC-O1	Oppose	WIAL has filed as submission with respect to PC1 of the Proposed RPS and the target to achieve net zero carbon emissions by 2050. Considers that it would be premature to impose such requirements on the Proposed Plan, when those provisions have yet to go through the hearings and decision making process.	Disallow
Greater Wellington Regional Council	351.64	Strategic Direction / Sustainability Resilience and Climate Change / SRCC-O1	Amend	Considers the objective is different to the carbon reduction target made by WCC in October 2021 to reduce city emissions by 57% by 2030 compared to 2020 levels, and then net zero by 2050. Proposed RPS Change 1 has a similar target of 50% by 2030 compared to 2019 levels, and then net zero by 2050. Greater Wellington supports WCC for setting this target and seek for this target to be reflected in the PDP. This will ensure consistency and appropriate levels of ambition with regard to WCC's contribution to the region's emission reduction targets	Seeks that the carbon reduction objective should match that made by WCC in October 2021 to reduce city emissions by 57% by 2030 compared to 2020 levels, and to net zero by 2050.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Wellington International Airport Limited	FS36.42	Part 2 / Strategic Direction / Sustainability Resilience and Climate Change / SRCC-01	Oppose	WIAL has filed as submission with respect to PC1 of the Proposed RPS and the target to achieve net zero carbon emissions by 2050. Considers that it would be premature to impose such requirements on the Proposed Plan, when those provisions have yet to go through the hearings and decision making process.	Disallow
Waka Kotahi	370.64	Strategic Direction / Sustainability Resilience and Climate Change / SRCC-01	Amend	As written, O1.3 does not reference the move needed away from private cars to other transport modes, which has additional benefits not captured by O1.1. Freeing up carparking spaces for greener uses, having less embodied energy (in the vehicle fleet) & having greater transport resilience in the event of an earthquake are examples of this.	Amend Strategic Objective SRCC-01 (The City's built environment supports...:) as follows: The City's built environment supports: 1. A net reduction in the City's carbon emissions by 2050; 2. More energy efficient buildings; 3. An increase in the use of renewable energy sources; and 4. <u>Multi-modal transport options including but not limited to walking, cycling, and public transport, and</u> 5. Healthy functioning of native ecosystems and natural processes.
Greater Wellington Regional Council	FS84.92	Part 2 / Strategic Direction / Sustainability Resilience and Climate Change / SRCC-01	Support	Greater Wellington support this submission point which aligns with Proposed RPS Change 1 (Policies CC.1 and CC.3).	Allow
WCC Environmental Reference Group	377.24	Strategic Direction / Sustainability Resilience and Climate Change / SRCC-01	Amend	Considers that Objective SRCC-01 is not worded with a sufficient degree of ambition and urgency. Nor will it achieve the stated goal of being a zero carbon emission city by 2050. It leaves the door open for inadequate incremental progress which could lock us in to a path of failure.	Amend Objective SRCC-01 as follows: The City's built environment supports: 1. A net reduction in the City's carbon emissions <u>to net zero</u> by 2050; 2. More A requirement for all buildings to be energy efficient buildings; 3. An increase in the use of renewable energy sources <u>up to 100% by 2030</u> ; and 4. Healthy functioning of <u>the full range of</u> native ecosystems and natural processes.
Wellington International Airport Limited	FS36.43	Part 2 / Strategic Direction / Sustainability Resilience and Climate Change / SRCC-01	Oppose	WIAL has filed as submission with respect to PC1 of the Proposed RPS and the target to achieve net zero carbon emissions by 2050. Considers that it would be premature to impose such requirements on the Proposed Plan, when those provisions have yet to go through the hearings and decision making process.	Disallow
Meridian Energy Limited	FS101.23	Part 2 / Strategic Direction / Strategic City Assets and Infrastructure / SCA-01	Oppose	Considers that it is not clear what the rationale is for a limit of doubling (increase of 'up to 100%') is necessary or helpful if the ambition is to achieve net zero carbon emissions by 2050.	Disallow
Wellington Civic Trust	388.11	Strategic Direction / Sustainability Resilience and Climate Change / SRCC-01	Support in part	SRCC-01 is generally supported, but there is concerns that sea level rise risks are not well characterised.	Retain Sustainability, Resilience and Climate Change Objective SRCC-01, with amendment.
Sarah Cutten and Matthew Keir	FS91.49	Strategic Direction / Sustainability Resilience and Climate Change / SRCC-01	Oppose	The further submitter is opposed the generic support for all new additions to SCHED1. The further submitter does not believe the original submitter has made any detailed assessment of each scheduled item to inform their view, and as such, believe their submission point should be discounted. [See original further submission for full reason].	Disallow / Seeks that the Council does not add new listings of private homes without owner's consent.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Wellington Civic Trust	388.12	Strategic Direction / Sustainability Resilience and Climate Change / SRCC-01	Amend	Considers that SRCC-01 should be amended to 'tighten up' in respect to climate change and natural hazard risks.	Seeks to clarify SRCC-01 in respect to climate change and natural hazards.
Willis Bond and Company Limited	FS12.3	Part 4 / Schedules Subpart / Schedules / SCHED1 – Heritage Buildings	Oppose	The submitter seeks to include four additional buildings which front Civic Square within SCHED1. Willis Bond and Company Limited agree Wellington Central Library (a Category 1 Historic Place) should be included, but not Michael Fowler, CAB or MOB. We agree with Heritage New Zealand Pouhere Taonga (sub 70.35) that the proposed Te Ngākau Civic Square Precinct provisions adequately address heritage considerations within the area.	Disallow / Disallow the submission (except in respect of Wellington Central Library which should be included in SCHED1).
Kāinga Ora Homes and Communities	391.71	Strategic Direction / Sustainability Resilience and Climate Change / SRCC-01	Support	Objective SRCC-01 is generally supported.	Retain Objective SRCC-01 (The City's built environment supports...) as notified.
Wellington International Airport Ltd	406.69	Strategic Direction / Sustainability Resilience and Climate Change / SRCC-01	Support	Supports the overall intent of SRCC-01, with particular focus on the increase in renewable energy sources. [See paragraph 4.25 to 4.29 in original submission for full reason]	Retain SRCC-01.3 (Increase of renewable energy sources) as notified.
Willis Bond and Company Limited	416.37	Strategic Direction / Sustainability Resilience and Climate Change / SRCC-01	Support	Supports the direction of SRCC-01.	Retain SRCC-01 (The City's built environment supports...) as notified.
Newtown Residents' Association	440.11	Strategic Direction / Sustainability Resilience and Climate Change / SRCC-01	Support in part	SRCC-01 is supported, but the way the objective is reflected in the PDP is lacking.	Retain Strategic Objective SRCC-01 as notified with amendments.
Newtown Residents' Association	440.12	Strategic Direction / Sustainability Resilience and Climate Change / SRCC-01	Amend	<p>Considers that the practical application of SRCC-01 is limited in the PDP and will not be met due to loss of sunlight in residential areas. A central objective of the NPS-UD 2020, and by extension the RMA schedule 3A and the WCC Proposed District Plan, is that "Development supports the creation of a liveable, well-functioning urban environment that enables all people and communities to provide for their social, economic, environmental, and cultural wellbeing, and for their health and safety now and into the future."</p> <p>A extended definition of 'well functioning urban environment' contains these points: f- supports reduction in greenhouse gas emissions; and g - are resilient to the likely current and future effects of climate change</p> <p>When it comes to the built environment, the application of liveable, well-functioning urban environments seems to lead to sporadic development of high rise buildings in narrow, packed, low-rise streets. The major environmental effects come with the loss of sunlight. Sunlight is important for a carbon-zero lifestyle – it fuels solar panels, helps gardens grow, dries the washing, and heats people's homes. If tall buildings are able to overshadow low-rise homes the latter risk becoming cold and damp, leading to illness, and in some cases the homes will become unfit for purpose. Sunlight is vital for everyday life. With new developments the standards require a certain amount of sunlight access but there is no guarantee of this being protected for existing neighbouring properties. [Refer to original submission for full reason]</p>	Seeks that the PDP better ensures that SRCC-01 Objectives are implemented.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Guardians of the Bays	452.13	Strategic Direction / Sustainability Resilience and Climate Change / SRCC-01	Support in part	Supports SRCC-01.	Retain paragraph SRCC-01 subject to amendments below.
Guardians of the Bays	452.14	Strategic Direction / Sustainability Resilience and Climate Change / SRCC-01	Amend	Considers SRCC-01 needs the addition of a further bullet point to reflect the need to consider climate change adaptation	Amend SRCC-01 as follows: The City's built environment supports: 1. A net reduction in the City's carbon emissions by 2050; 2. More energy efficient buildings; 3. An increase in the use of renewable energy sources; and 4. Healthy functioning of native ecosystems and natural processes. <u>5. Climate Change Adaptation</u>
Te Rūnanga o Toa Rangatira	488.24	Strategic Direction / Sustainability Resilience and Climate Change / SRCC-01	Support in part	Support the chapter provisions which encourage the used of sustainable transport options, reduction in private vehicle use and aim to improve economic and social resilience.	Retain SRCC-01 (The City's built environment supports...) as notified, subject to amendments.
Fire and Emergency New Zealand	273.20	Strategic Direction / Sustainability Resilience and Climate Change / SRCC-02	Support	Supports the objective in that it requires the risks from natural hazards, which include fire as per the definition within the Proposed District Plan, to be appropriately managed, mitigated, and where necessary, avoided.	Retain SRCC-02 as notified.
Royal Forest and Bird Protection Society	345.35	Strategic Direction / Sustainability Resilience and Climate Change / SRCC-02	Support in part	Considers that the objectives may allow renewable energy sources (e.g. windfarms) being built in the CMA and the protection of biodiversity and adverse effects being over looked at the expense of renewable energy generation. Suggest tightening relevant objectives to ensure s6 matters are provided for.	Amend SRCC-02 to ensure matters set out in Section 6 of the Resource Management Act are provided for.
Greater Wellington Regional Council	351.65	Strategic Direction / Sustainability Resilience and Climate Change / SRCC-02	Support	Supports this strategic objectives.	Retain Strategic Objective SRCC-02 as notified.
Argosy Property No. 1 Limited	383.13	Strategic Direction / Sustainability Resilience and Climate Change / SRCC-02	Support	Supports risks from natural hazards being appropriately identified, and natural and coastal hazards being identified and risks apportioned appropriately, and in a way which identifies and recognises the existing investment, development and role of the city centre	Retain Objective SRCC-02 as notified
Wellington Civic Trust	388.13	Strategic Direction / Sustainability Resilience and Climate Change / SRCC-02	Support in part	SRCC-02 is generally supported, but there is concerns that sea level rise risks are not well characterised.	Retain Sustainability, Resilience and Climate Change Objective SRCC-02, with amendment.
Wellington Civic Trust	388.14	Strategic Direction / Sustainability Resilience and Climate Change / SRCC-02	Amend	Considers that SRCC-02 should be amended to 'tighten up' in respect to climate change and natural hazard risks. SRCC-02 may not give effect to the New Zealand Coastal Policy Statement in its requirement to avoid increasing the risks from climate change in areas of new development. The bar of avoiding when risks are "intolerable" in item 3 of this objective suggests a very high threshold to prevent further subdivision and development, including intensification, which exposes more people to the effects of sea level rise in the future.	Seeks to clarify SRCC-02 in respect to climate change and natural hazards.
Kāinga Ora Homes and Communities	391.72	Strategic Direction / Sustainability Resilience and Climate Change / SRCC-02	Support	Objective SRCC-02 is generally supported.	Retain Objective SRCC-02 (Risks from natural hazards are...) as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
CentrePort Limited	402.39	Strategic Direction / Sustainability Resilience and Climate Change / SRCC-O2	Support in part	Considers that ensuring that all risks are low in clause 2 may be very difficult to achieve for all infrastructure providers in all circumstances who work within specific constraints. It would be more accurate to state that residual risks after adaptation and mitigation measures have been applied are acceptable.	Retain SRCC-O2 (Risks from Natural Hazards are...) with amendment.
CentrePort Limited	402.40	Strategic Direction / Sustainability Resilience and Climate Change / SRCC-O2	Amend	Considers that ensuring that all risks are low in clause 2 may be very difficult to achieve for all infrastructure providers in all circumstances who work within specific constraints. It would be more accurate to state that residual risks after adaptation and mitigation measures have been applied are acceptable.	Amend SRCC-O2 (Risks from Natural Hazards are...) as follows: ... 2. Planned for through adaptation and mitigation measures to ensure <u>residual</u> risks are low <u>acceptable</u> ; and ...
Wellington International Airport Ltd	406.70	Strategic Direction / Sustainability Resilience and Climate Change / SRCC-O2	Support in part	Intolerable risk to natural hazards is a relative and subjective concept. Given the subjectiveness of the concept of intolerable risk and the strong directive set out in sub-paragraph 3, Objective SRCC-O2 needs to recognise that in the case of regionally significant infrastructure, functional or operational requirements of that infrastructure may necessitate locating in an area that is subject to natural hazard risk.	Retain SRCC-O2 (Risks from natural hazards) with amendments.
Wellington International Airport Ltd	406.71	Strategic Direction / Sustainability Resilience and Climate Change / SRCC-O2	Amend	Intolerable risk to natural hazards is a relative and subjective concept. Given the subjectiveness of the concept of intolerable risk and the strong directive set out in sub-paragraph 3, Objective SRCC-O2 needs to recognise that in the case of regionally significant infrastructure, functional or operational requirements of that infrastructure may necessitate locating in an area that is subject to natural hazard risk.	Amend SRCC-O2 (Risks from natural hazards) as follows: Risks from natural hazards are: 1. Identified and understood; 2. Planned for through adaptation and mitigation measures to ensure the risks are low; 3. <u>Except as provided for in 4, Avoided</u> where the risks are intolerable; <u>and</u> 4. <u>Managed to the extent practicable where an activity has an operational or functional need to locate within an identified natural hazard area.</u>
KiwiRail Holdings Limited	FS72.14	Part 2 / District-Wide Matters / Strategic Direction / Sustainability Resilience and Climate Change / SRCC-O2	Support	Supports recognition of the functional and operational requirements of infrastructure to be located in areas subject to natural hazard risk. Considers the relief sought should be allowed because it will (a) will promote the sustainable management of the natural and physical resources in Wellington City, and is therefore consistent with Part 2 and other provisions of the Resource Management Act 1991 (RMA) and the Enabling Housing Supply Amendment Act 2021 (Amendment Act); (b) is consistent with other relevant planning documents, including the Greater Wellington Regional Policy Statement and National Policy Statement for Urban Development 2020; (c) will meet the reasonably foreseeable needs of future generations; (d) will avoid, remedy or mitigate actual and potential adverse effects on the environment; (e) will enable the social, economic and cultural wellbeing of the people of Wellington City; and (f) is the most appropriate way to achieve the objectives of the Proposed Plan in terms of section 32 of the RMA.	Allow
Wellington International Airport Ltd	406.72	Strategic Direction / Sustainability Resilience and Climate Change / SRCC-O2	Amend	Intolerable risk to natural hazards is a relative and subjective concept. Given the subjectiveness of the concept of intolerable risk and the strong directive set out in sub-paragraph 3, Objective SRCC-O2 needs to recognise that in the case of regionally significant infrastructure, functional or operational requirements of that infrastructure may necessitate locating in an area that is subject to natural hazard risk.	Delete Objective SRCC-O2.
Willis Bond and Company Limited	416.38	Strategic Direction / Sustainability Resilience and Climate Change / SRCC-O2	Support	Supports the direction of SRCC-O2.	Retain SRCC-O2 (Risks from natural hazards are..) as notified.

Kāinga Ora Homes and Communities	391.73	Strategic Direction / Sustainability Resilience and Climate Change / SRCC-03	Support	Objective SRCC-03 is generally supported.	Retain Objective SRCC-03 (Subdivision, development and use: ...) as notified.
CentrePort Limited	402.41	Strategic Direction / Sustainability Resilience and Climate Change / SRCC-03	Support	Support the intent of this Objective.	Retain SRCC-03 (Subdivision, development and use) as notified.
Wellington Heritage Professionals	412.26	Strategic Direction / Sustainability Resilience and Climate Change / SRCC-03	Amend	Considers that: "Early research shows that sympathetically upgrading and reusing existing buildings, rather than demolishing and building new, could dramatically improve a building's energy efficiency and would make substantial energy savings because the CO ₂ emissions already embodied within existing buildings would not be lost through demolition," Historic England Heritage Counts report, 2020.	Amend SRCC-03 as follows: Subdivision, development and use: 1. Effectively manage the risks associated with climate change and sea level rise; 2. Support the City's ability to adapt over time to the impacts of climate change and sea level rise; and 3. Support natural functioning ecosystems and processes to help build resilience into the natural and built environments and ; 4. Recognise the environmental benefits of retaining buildings, especially heritage buildings.
Willis Bond and Company Limited	416.39	Strategic Direction / Sustainability Resilience and Climate Change / SRCC-03	Support	Supports the direction of SRCC-03.	Retain SRCC-03 (Subdivision, development and use...) as notified.
Guardians of the Bays	452.15	Strategic Direction / Sustainability Resilience and Climate Change / SRCC-03	Support in part	Supports SRCC-03.	Retain paragraph SRCC-03 subject to amendments below.
Wellington International Airport Limited	FS36.46	Part 2 / Strategic Direction / Sustainability Resilience and Climate Change / SRCC-05	Oppose	Considers that infrastructure falls within the scope of "activities" identified through the use of the phase "subdivision, use and development". Separately identifying activities that fall within this term (and excluding others) leads to potential interpretation issues.	Disallow
Guardians of the Bays	452.16	Strategic Direction / Sustainability Resilience and Climate Change / SRCC-03	Amend	Considers the objective needs to be amended to add 'infrastructure' in the title.	Amend SRCC-03 as follows: Subdivision, <u>infrastructure</u> , development and use...
Wellington International Airport Limited	FS36.47	Part 2 / Strategic Direction / Sustainability Resilience and Climate Change / SRCC-06	Oppose	Considers that infrastructure falls within the scope of "activities" identified through the use of the phase "subdivision, use and development". Separately identifying activities that fall within this term (and excluding others) leads to potential interpretation issues.	Disallow
Te Rūnanga o Toa Rangatira	488.26	Strategic Direction / Sustainability Resilience and Climate Change / SRCC-03	Support in part	Support the chapter provisions which encourage the used of sustainable transport options, reduction in private vehicle use and aim to improve economic and social resilience.	Retain SRCC-03 (Subdivision, development and use...) as notified, subject to amendments.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Royal Forest and Bird Protection Society	345.37	Strategic Direction / Sustainability Resilience and Climate Change / SRCC-04	Support in part	Considers that the objectives may allow renewable energy sources (e.g. windfarms) being built in the CMA and the protection of biodiversity and adverse effects being over looked at the expense of renewable energy generation. Suggest tightening relevant objectives to ensure s6 matters are provided for.	Amend SRCC-04 to ensure matters set out in Section 6 of the Resource Management Act are provided for.
Retirement Villages Association of New Zealand Incorporated	350.16	Strategic Direction / Sustainability Resilience and Climate Change / SRCC-04	Oppose in part	Opposes the requirement for development to “integrate[e] natural processes that provide opportunities for carbon storage, natural hazard risk reduction and support climate change adaptation” as it is unclear what this objective requires.	Delete SRCC-04 (Strategic Objectives) in its entirety as notified.
Greater Wellington Regional Council	351.67	Strategic Direction / Sustainability Resilience and Climate Change / SRCC-04	Support	Supports this strategic objectives.	Retain Strategic Objective SRCC-04 as notified.
Woolworths New Zealand	359.14	Strategic Direction / Sustainability Resilience and Climate Change / SRCC-04	Amend	Considers that the wording in SRCC-04 should be amended to ensure that there is recognition of the potential for non-natural processes to achieve the same environmental outcomes in an efficient way (e.g., storm filters and other proprietary devices still achieve low impact design and quality / quantity benefits for stormwater runoff and can be more easily accommodated on urban sites where swales, raingardens and other space-intensive activities cannot) such that the matters at the Three Waters chapter are consistent with this Part 2 Objective.	Amend Objective SRCC-04 as follows: Land use, subdivision and development design integrates natural processes that provide opportunities for carbon storage, natural hazard risk reduction and support climate change adaptation, <u>promoting natural processes where possible</u> .
Waka Kotahi	370.65	Strategic Direction / Sustainability Resilience and Climate Change / SRCC-04	Support in part	Supports this strategic objective as written.	Retain Strategic Objective SRCC-04 (Land use, subdivision and development design...), subject to amendments.
Waka Kotahi	370.66	Strategic Direction / Sustainability Resilience and Climate Change / SRCC-04	Amend	Considers it appropriate to add a reference to the need to reduce carbon as an option prior to storing the produced carbon	Amend Strategic Objective SRCC-04 (Land use, subdivision and development design...) as follows: Land use, subdivision and development design integrates natural processes that provide opportunities for <u>carbon reduction</u> , carbon storage, natural hazard risk reduction and support climate change adaptation.
Greater Wellington Regional Council	FS84.93	Part 2 / Strategic Direction / Sustainability Resilience and Climate Change / SRCC-04	Support	Greater Wellington support this submission point and consider carbon reduction provides further opportunities to meet reduced carbon targets.	Allow
Argosy Property No. 1 Limited	383.15	Strategic Direction / Sustainability Resilience and Climate Change / SRCC-04	Support	Supports strategic objectives which support subdivision, development and use that manage the risks associated with climate change and sea level rise and support adaptation, and natural and coastal hazards being identified and risks apportioned appropriately, and in a way which identifies and recognises the existing investment, development and role of the city centre	Retain Objective SRCC-04 as notified.
Wellington Civic Trust	388.17	Strategic Direction / Sustainability Resilience and Climate Change / SRCC-04	Support in part	SRCC-04 is generally supported, but there is concerns that sea level rise risks are not well characterised.	Retain Sustainability, Resilience and Climate Change Objective SRCC-04, with amendment.
Wellington Civic Trust	388.18	Strategic Direction / Sustainability Resilience and Climate Change / SRCC-04	Amend	Considers that SRCC-04 should be amended to 'tighten up' in respect to climate change and natural hazard risks.	Seeks that SRCC-04 in respect to climate change and natural hazards.

Kāinga Ora Homes and Communities	391.74	Strategic Direction / Sustainability Resilience and Climate Change / SRCC-O4	Support	Objective SRCC-O4 is generally supported.	Retain Objective SRCC-O4 (Land use, subdivision and development...) as notified.
Willis Bond and Company Limited	416.40	Strategic Direction / Sustainability Resilience and Climate Change / SRCC-O4	Support	Supports the direction of SRCC-O4.	Retain SRCC-O4 (Land use, subdivision and development design...) as notified.
Te Rūnanga o Toa Rangatira	488.27	Strategic Direction / Sustainability Resilience and Climate Change / SRCC-O4	Support in part	Support the chapter provisions which encourage the used of sustainable transport options, reduction in private vehicle use and aim to improve economic and social resilience.	Retain SRCC-O4 (Land use, subdivision and development design integrates natural processes...) as notified, subject to amendments.
Victoria University of Wellington Students' Association	123.8	Strategic Direction / Urban Form and Development / General UFD	Support	Supports the strategic direction in the PDP to increase housing choice and affordability.	Not specified.
Victoria University of Wellington Students' Association	123.9	Strategic Direction / Urban Form and Development / General UFD	Not specified	[No specific reason given beyond decision requested - refer to original submission].	Seeks that the effects of urban development, including building emissions or land disruption, on native birds or trees in the surrounding areas are monitored.
Tapu-te-Ranga Trust	297.14	Strategic Direction / Urban Form and Development / General UFD	Support	Supports the recognition of an undersupply of housing in the City, and the approach to increase housing choice and affordability by enabling development across the housing spectrum – from assisted housing solutions through to private home ownership.	Retain introduction for the Urban Form and Development chapter as notified.
Restaurant Brands Limited	349.7	Strategic Direction / Urban Form and Development / General UFD	Support	Support	Retain UFD – Te Āhua Tāone me te Whanaketanga - Urban Form and Development as notified.
Greater Wellington Regional Council	351.68	Strategic Direction / Urban Form and Development / General UFD	Support in part	Supports the objectives that aim to ensure development is well connected to the transport network.	Retain the Urban Form and Development Objectives, subject to amendments.
Greater Wellington Regional Council	351.69	Strategic Direction / Urban Form and Development / General UFD	Amend	Considers that these strategic objectives have regard to the qualities and characteristics of well-functioning urban environments as articulated in Objective 22 of Proposed RPS Change 1. This includes (but is not limited to) urban areas that are climate resilient, contribute to the protection of the natural environment and transition to a low-emission region, are compact and well connected, support housing affordability and choice, and enable Māori to express their cultural and traditional norms. Consent decisions should need to consider how particular subdivision, use or development is contributing to the qualities and characteristics of well-functioning urban environments.	Amend wording of these strategic objectives as required to have regard to the qualities and characteristics of well-functioning urban environments, as articulated in Objective 22 of Proposed RPS Change 1.
Waka Kotahi NZ Transport Agency	FS103.1	Part 2 / Strategic Direction / Urban Form and Development / General UFD	Support	It is appropriate that territorial authorities align their plans with directions in the relevant Regional Policy Statement, including its description of well-functioning urban environments to ensure consistency in the application of the National Policy Statement on Urban Development (NPS-UD) across the Tier 1 Councils in the Greater Wellington urban area.	Allow

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Jane Szentivanyi and Ben Briggs	369.7	Strategic Direction / Urban Form and Development / General UFD	Amend	Considers that a staged approach to development capacity is more appropriate. The National Policy Statement on Urban Development requires the Council to enable sufficient development capacity in the short, medium term and long term. This means a staged approach is appropriate given the changing demographics and needs of our city over the next 30 years. Given building consent figures, further development capacity does not appear to be necessary until the medium term (2024 - 2031). [Refer to original submission for full reason and figures]	Seeks that a staged approach to housing development be adopted.
Southern Cross Healthcare Limited	380.26	Strategic Direction / Urban Form and Development / General UFD	Support	Supports the direction of the Proposed Plan to support well functioning urban environments. This is important because the Proposed Plan is required to give effect to the NPS-UD, and the NPS-UD identifies the appropriate level of intensification that should be enabled in tier 1 urban environments such as Wellington – including recognising that urban environments change over time.	Retain Urban Form and Development strategic objectives as notified.
Kāinga Ora Homes and Communities	391.75	Strategic Direction / Urban Form and Development / General UFD	Oppose	Opposes the definition of 'Assisted Housing' and its reference in the UFD chapter.	Opposes the term 'Assisted housing' in the Urban Form and Development chapter.
Kāinga Ora Homes and Communities	391.76	Strategic Direction / Urban Form and Development / General UFD	Amend	Considers that the references to 'assisted housing' should be removed from the UFD Chapter	Amend the Urban Form and Development chapter to remove all references to 'assisted housing'.
Kāinga Ora Homes and Communities	391.77	Strategic Direction / Urban Form and Development / General UFD	Amend	Considers that the references to 'assisted housing' should be removed from the UFD-Introduction.	Amend the Urban Form and Development chapter to remove all references to 'assisted housing' including and not limited to the introduction.
Lucy Harper and Roger Pemberton	401.3	Strategic Direction / Urban Form and Development / General UFD	Support	Supports the principles outlined in the Urban Form and Development chapter and the extension of Wellington City into the greenfield areas identified using those principles.	Retain UFD (Urban form and development) chapter as notified.
Metlifecare Limited	413.4	Strategic Direction / Urban Form and Development / General UFD	Amend	<p>In the Urban Form and Development section, the primary issue identified is population growth resulting in a higher demand for housing in circumstances where capacity modelling shows that this demand is unlikely to be met.</p> <p>The introduction explains this issue but does not explicitly recognise the crucial role that retirement and aged care facilities have in providing for the health and wellbeing of the New Zealand community and the provision of housing for elderly residents.</p> <p>This fails to recognise that the local community benefits from the provision of retirement villages. For example, they release pressure on social and health services and contribute to employment in New Zealand, both in the construction sector and day-to-day operations. They also allow residents to live in familiar suburbs where they often have family and friends in close proximity. Further, Retirement Villages have a crucial role in the general housing market because the supply of retirement village housing releases existing housing stock into the market and reduces pressure on existing infrastructure.</p> <p>Metlifecare seeks amendments to be made to this section to recognise the growing role that retirement villages will have in providing healthy, safe, affordable homes that meet the needs of older people in the community and in keeping up with housing demand. This should then filter down into other objectives and policies in the Proposed Plan</p>	<p>Amend the introduction as follows: “Enabling sufficient land supply for housing and business activity is crucial for the ability of residents to meet their social, economic, environmental, and cultural wellbeing. The National Policy Statement on Urban Development requires the Council to provide sufficient development capacity to meet expected demand for housing and business land over the short (3 years), medium (3-10 years), and long term (10-30 years). This District Plan sets the policy foundation to enable growth to be accommodated beyond the life of the Plan. <u>Particular consideration also needs to be given to the growing demand for housing for the elderly, including retirement villages. The demand for retirement village housing is increasing as more New Zealanders are choosing to live in retirement villages, enjoying the range of facilities, housing options, activities, and social and health benefits on offer which are able to suit the needs of older people in the community.</u>”</p> <p>...</p> <p>The District Plan approach is to increase housing choice and affordability by enabling development across the housing spectrum – from assisted housing solutions through to private home ownership. <u>In doing so, the District Plan must recognise and provide for the functional and operational requirements of these different types of housing solutions, including retirement villages.</u>”</p>
Newtown Residents' Association	440.13	Strategic Direction / Urban Form and Development / General UFD	Not specified	Considers that UFD Objectives are incompatible with requirements from the NPS-UD 2020 and the RMA Schedule 3B and will enable negative unintended consequences.	Not specified.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Greater Wellington Regional Council	351.70	Strategic Direction / Urban Form and Development / New UFD	Amend	Considers that further policy direction is required to achieve these objectives. Specifically, to have regard to Proposed RPS Change 1 (policies CC.1, CC.3 and CC.9), a new policy should be included in the PDP that prioritises development, whether it be greenfield or brownfield development, in areas where there are effective public transport links.	Add a new Objective to the 'Urban Form and Development' chapter that directs the prioritisation of development in locations where there are effective public transport links.
Wellington International Airport Limited	FS36.48	Part 2 / Strategic Direction / Urban Form and Development / New UFD	Oppose	Considers that while WIAL considers it is appropriate to concentrate development along transportation routes, such decision making also needs to take into consideration the presence and proximity of regionally significant infrastructure and potential reverse sensitivity effects.	Disallow
The Retirement Villages Association of New Zealand Incorporated	FS126.55	Part 2 / Strategic Direction / Urban Form and Development / New UFD	Not specified	The RVA does not oppose this submission point in principle, however the RVA's primary position is that retirement villages do not rely on public transport links the same as other residential developments, and therefore the new rule sought should not apply to retirement villages.	Amend / Allow submission point, subject to the exclusion of retirement villages from this objective.
Ryman Healthcare Limited	FS128.55	Part 2 / Strategic Direction / Urban Form and Development / New UFD	Not specified	Ryman does not oppose this submission point in principle, however Ryman's primary position is that retirement villages do not rely on public transport links the same as other residential developments, and therefore the new rule sought should not apply to retirement villages.	Amend / Allow submission point, subject to the exclusion of retirement villages from this objective.
Metlifecare Limited	413.5	Strategic Direction / Urban Form and Development / New UFD	Amend	Consider that as currently drafted this objective does not recognise the importance of housing being able to provide both social and health benefits in the community.	Seeks that a new strategic objective is incorporated as follows: <u>UDF - 09 The housing and care needs of the ageing population are recognised and provided for across the City to meet demand.</u>
Victoria University of Wellington Students' Association	123.10	Strategic Direction / Urban Form and Development / UFD-O1	Support	Support growing new urban centres in highly connected suburbs. Considers that they have the capability to service an intensified community and provide an urban centre for business and recreation. The focus should be on the growth of urban areas along transport routes and in suburbs with easily accessible transport lines.	Seeks that the chosen areas for growing new urban centres should focus on highly connected suburbs with easily accessible transport lines. [Inferred decision requested]
Kilmarston Developments Limited and Kilmarston Properties Limited	290.29	Strategic Direction / Urban Form and Development / UFD-O1	Support	Considers that it is important that Council encourages development that will support a more compact City.	Retain UFD-O1 (Wellington's compact urban form is maintained with the majority of urban development located within the City Centre, in and around Centres, and along major public transport corridors.) as notified.
Woolworths New Zealand	359.15	Strategic Direction / Urban Form and Development / UFD-O1	Support	UFD-O1 is supported.	Retain Objective UFD-O1 (Wellington's compact urban form is maintained...) as notified.
Waka Kotahi	370.67	Strategic Direction / Urban Form and Development / UFD-O1	Support	Supports this strategic objective as written.	Retain Strategic Objective UFD-O1 (Wellington's compact urban form is maintained...) as notified.
KiwiRail Holdings Limited	FS72.15	Part 2 / District-Wide Matters / Strategic Direction / Urban Form and Development / UFD-O1	Support	Supports objective. Considers the relief sought should be allowed because it will (a) will promote the sustainable management of the natural and physical resources in Wellington City, and is therefore consistent with Part 2 and other provisions of the Resource Management Act 1991 (RMA) and the Enabling Housing Supply Amendment Act 2021 (Amendment Act); (b) is consistent with other relevant planning documents, including the Greater Wellington Regional Policy Statement and National Policy Statement for Urban Development 2020; (c) will meet the reasonably foreseeable needs of future generations; (d) will avoid, remedy or mitigate actual and potential adverse effects on the environment; (e) will enable the social, economic and cultural wellbeing of the people of Wellington City; and (f) is the most appropriate way to achieve the objectives of the Proposed Plan in terms of section 32 of the RMA.	Allow

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Argosy Property No. 1 Limited	383.16	Strategic Direction / Urban Form and Development / UFD-01	Support	Supports maintaining Wellington's 'compact urban form'. The National Policy Statement on Urban Development 2020 (NPS-UD) requires intensification in urban areas and sufficient development capacity that is of a form and in locations that meet the diverse needs of communities and encourages well-functioning, liveable urban environments. Argosy supports the strategic direction set by the NPS-UD. The feedback that Argosy provides on the provisions below seeks to ensure that the rules and standards in the District Plan enable this outcome	Retain Objective UFD-01 as notified.
Kāinga Ora Homes and Communities	391.78	Strategic Direction / Urban Form and Development / UFD-01	Support	Objective UFD-01 is generally supported.	Retain Objective UFD-01 (Wellington's compact urban form...) as notified.
Investore Property Limited	405.27	Strategic Direction / Urban Form and Development / UFD-01	Support	Supports provision of a compact urban form and urban intensification provided under UFD-01. The NPS-UD requires intensification in urban areas and sufficient development capacity that is of a form and in locations that meet the diverse needs of communities and encourages well-functioning, liveable urban environments [Refer to original submission for full reason].	Retain UFD-01 (Strategic Objectives) as notified.
Willis Bond and Company Limited	416.41	Strategic Direction / Urban Form and Development / UFD-01	Support	Supports the direction of UFD-01.	Retain UFD-01 (Wellington's compact urban form is maintained...) as notified.
Stride Investment Management Limited	470.11	Strategic Direction / Urban Form and Development / UFD-01	Support	Supports UFD-01 (Wellington's compact urban form is maintained...)	Retain as notified.
Te Rūnanga o Toa Rangatira	488.28	Strategic Direction / Urban Form and Development / UFD-01	Support in part	Considers there is insufficient provision for papakainga in the proposed District Plan.	Retain UFD-01 (Wellington's compact urban form is maintained...) as notified, subject to consistent use of 'active partnership' requested in subsequent submission points
Victoria University of Wellington Students' Association	123.11	Strategic Direction / Urban Form and Development / UFD-02	Support	Supports the goal of UFD-02 (Urban Form and Development - Objectives). Considers that compact urban forms are needed to reduce the city's carbon emissions and the need for residents to travel in private vehicles.	Retain UFD-02 (Urban development in identified greenfield areas) as notified.
Retirement Villages Association of New Zealand Incorporated	350.17	Strategic Direction / Urban Form and Development / UFD-02	Oppose in part	Opposes in part the 'centres and transport corridors' approach to urban intensification. Considers that this approach does not recognise that retirement villages are required in all areas.	Opposes UFD-02 (Strategic Direction) and seeks amendment to recognise that the centres and transport corridor approach is not appropriate for some forms of development.
Retirement Villages Association of New Zealand Incorporated	350.18	Strategic Direction / Urban Form and Development / UFD-02	Amend	Opposes in part the 'centres and transport corridors' approach to urban intensification. Considers that this approach does not recognise that retirement villages are required in all areas.	Seeks amendment to UFD-02 (Strategic Direction) to recognise that the centres and transport corridor approach is not appropriate for some forms of development.
Retirement Villages Association of New Zealand Incorporated	350.19	Strategic Direction / Urban Form and Development / UFD-02	Support in part	Considers that UFD-02 refers to 'identified greenfield areas', but no such identification of the greenfield areas referred to is provided elsewhere in the District Plan.	Retain UFD-02 (Strategic Direction) and seeks clarification as to what/where the 'identified greenfield areas' are located; or seeks amendment UFD-02 (Strategic Direction) as follows:  Urban development in identified greenfield areas: 

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Retirement Villages Association of New Zealand Incorporated	350.20	Strategic Direction / Urban Form and Development / UFD-O2	Amend	Considers that UFD-O2 refers to 'identified greenfield areas', but no such identification of the greenfield areas referred to is provided elsewhere in the District Plan.	Seeks amendment to UFD-O2 (Strategic Direction) either clarify as to what/where the 'identified greenfield areas' are located; or amend UFD-O2 (Strategic Direction) as follows: <div style="border: 1px solid black; padding: 2px;"> Urban development in identified greenfield areas: ... </div>
Woolworths New Zealand	359.16	Strategic Direction / Urban Form and Development / UFD-O2	Support	UFD-O2 is supported.	Retain Objective UFD-O2 (Urban development in identified greenfield areas:...) as notified.
Waka Kotahi	370.68	Strategic Direction / Urban Form and Development / UFD-O2	Amend	The submitter would like to see direction in this section for new greenfield developments to include some areas dedicated to 'central neighbourhood' functions, to meet the day-today needs of future residents without the need for private vehicle travel.	Amend Strategic Objective UFD-O2 (Urban development in identified greenfield areas:...) as follows: Urban development in identified greenfield areas: 1. Is environmentally and ecologically sensitive; 2. Makes efficient use of land; 3. Is well-connected to the public transport network, and 4. Reinforces the City's compact urban form.; and 5. <u>A mix and distribution of land uses within greenfield area to provide opportunities for business activities and employment, community facilities and open space close to where people live.</u>
Kāinga Ora Homes and Communities	391.79	Strategic Direction / Urban Form and Development / UFD-O2	Support	Objective UFD-O2 is generally supported.	Retain Objective UFD-O2 (Urban development in identified greenfield areas:...) as notified.
Wellington International Airport Ltd	406.73	Strategic Direction / Urban Form and Development / UFD-O2	Not specified	Incompatible urban development, particularly greenfield development, has the potential to constrain and/or curtail the operation, development and use of regionally significant infrastructure. Urban development should not be enabled or encouraged where it has the potential to adversely affect the operations of the Airport. [See paragraphs 4.11 to 4.15 of original submission for full reason]	Amend UFD-O2 (Urban development in greenfield areas) as follows: Urban development in identified greenfield areas: 1. Is environmentally and ecologically sensitive; 2. Makes efficient use of land; 3. Is well-connected to the public transport network. and 4. Reinforces the City's compact urban form; <u>and</u> 5. <u>Is compatible with surrounding regionally significant infrastructure.</u>
Guardians of the Bays Inc	FS44.30	Part 2 / Strategic Direction / Urban Form and Development / UFD-O2	Oppose	Considers that regionally significant infrastructure does not need to be included UFD-02 wording UFD-03. [Inferred reference to submission 406.73]	Disallow
Board of Airline Representatives of New Zealand Inc *Late further submission accepted as per Minute 3	FS139.48	Part 2 / Strategic Direction / Urban Form and Development / UFD-O2	Support	Support WAIL's submission for the reasons set out in WAIL's submission.	Allow
Willis Bond and Company Limited	416.42	Strategic Direction / Urban Form and Development / UFD-O2	Support	Supports the direction of UFD-O2.	Retain UFD-O2 (Urban development in identified greenfield areas:...) as notified.
Te Rūnanga o Toa Rangatira	488.29	Strategic Direction / Urban Form and Development / UFD-O2	Support in part	Considers there is insufficient provision for papakainga in the proposed District Plan.	Retain UFD-O2 (Urban development in identified greenfield areas:...) as notified, subject to consistent use of 'active partnership' requested in subsequent submission points

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Victoria University of Wellington Students' Association	123.12	Strategic Direction / Urban Form and Development / UFD-03	Support	Supports growing new urban centres in highly connected suburbs, such as Khandallah. The train line to Khandallah in particular is the fastest train route on offer in the Wellington network and operates every 15 minutes, making this ideal for intensification.	Supports residential intensification in Khandallah due to its transport connectivity.
Wellington's Character Charitable Trust	FS82.24	Part 2 / Strategic Direction / Urban Form and Development / UFD-03	Oppose	Considers submissions are inconsistent with NPS-UD requirements; and no justification for enabling more intensive development in the MDRZ or around rail stations.	Disallow
Phillippa O'Connor	289.3	Strategic Direction / Urban Form and Development / UFD-03	Support	Supports the Objective UFD-03 as notified.	Retain UFD-03 (Medium to high density and assisted housing developments are located in areas that are...) as notified.
Kilmarston Developments Limited and Kilmarston Properties Limited	290.30	Strategic Direction / Urban Form and Development / UFD-03	Support	Considers that it is important that Council encourages development that will support a more compact City.	Retain UFD-03 (Medium to high density and assisted housing developments are located in areas that are...) as notified.
Transpower New Zealand Limited	315.46	Strategic Direction / Urban Form and Development / UFD-03	Amend	Considers that within the General Residential Zone qualifying matter areas may limit the amount of permitted medium density development possible on an allotment. While the policy directive within UFD-03 is supported, the submitter supports reference to qualifying matter areas as they directly influence the capacity for intensification.	Amend Objective UFD-03 as follows: UFD-03 Medium to high density and assisted housing developments are located in areas that are: 1. Connected to the transport network and served by multi-modal transport options; or 2. Within or near a Centre Zone or other area with many employment opportunities; and 3. Served by public open space and other social infrastructure; <u>Noting that medium to high density housing developments may not be appropriate in qualifying matter areas.</u>
Kāinga Ora – Homes and Communities	FS89.24	Part 2 / Strategic Direction / Urban Form and Development / UFD-03	Oppose	Kāinga Ora opposes the amendment which is considered unnecessary and inconsistent with their original submission.	Disallow
Transpower New Zealand Limited	315.47	Strategic Direction / Urban Form and Development / UFD-03	Support in part	Considers that within the General Residential Zone qualifying matter areas may limit the amount of permitted medium density development possible on an allotment. While the policy directive within UFD-03 is supported, the submitter supports reference to qualifying matter areas as they directly influence the capacity for intensification.	Amend UFD-03 as follows: UFD-03 Medium to high density and assisted housing developments are located in areas that are: 1. Connected to the transport network and served by multi-modal transport options; or 2. Within or near a Centre Zone or other area with many employment opportunities; and 3. Served by public open space and other social infrastructure; <u>Noting that medium to high density housing developments may not be appropriate in qualifying matter areas.</u>
Wellington International Airport Limited	FS36.49	Part 2 / Strategic Direction / Urban Form and Development / UFD-03	Support	WIAL considers that it is appropriate for the objective to qualify that intensification may not be appropriate in all locations. The subsequent objectives, policies and overlays identified in the Proposed Plan (such as the Air Noise Boundary) will define where such activities are and are not appropriate.	Allow

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Retirement Villages Association of New Zealand Incorporated	350.21	Strategic Direction / Urban Form and Development / UFD-O3	Oppose in part	Opposes in part the 'centres and transport corridors' approach to urban intensification. Considers that this approach does not recognise that retirement villages are required in all areas. Also considers the requirement for developments to be served by public open space and other social infrastructure may be overly restrictive for retirement villages which provide on-site amenities for their residents. Considers that the use of the phrasing 'are located in' is very restrictive. As large areas of the city have been zoned for medium to high density development (i.e. the Medium Density and High Density Residential Zones) the application of this policy within those zones has the potential to further limit the area within which such developments are supported. Considers that this is contrary to the purpose / function of the Enabling Housing Act.	Opposes UFD-O3 (Strategic Direction) and seeks amendment.
Retirement Villages Association of New Zealand Incorporated	350.22	Strategic Direction / Urban Form and Development / UFD-O3	Amend	Opposes in part the 'centres and transport corridors' approach to urban intensification. Considers that this approach does not recognise that retirement villages are required in all areas. Also considers the requirement for developments to be served by public open space and other social infrastructure may be overly restrictive for retirement villages which provide on-site amenities for their residents. Considers that the use of the phrasing 'are located in' is very restrictive. As large areas of the city have been zoned for medium to high density development (i.e. the Medium Density and High Density Residential Zones) the application of this policy within those zones has the potential to further limit the area within which such developments are supported. Considers that this is contrary to the purpose / function of the Enabling Housing Act.	Amend UFD-O3 (Strategic Direction) as follows: Medium to High high density and assisted housing developments are located <u>encouraged</u> in areas that are: 1. Connected to the transport network and served by multi-modal transport options; or 2. Within or near a Centre Zone or other area with many employment opportunities; and 3. Served by public <u>or on-site</u> open space and other social infrastructure.
Woolworths New Zealand	359.17	Strategic Direction / Urban Form and Development / UFD-O3	Support	UFD-O3 is supported.	Retain Objective UFD-O3 (Medium to high density and assisted housing developments...) as notified.
Kāinga Ora Homes and Communities	391.80	Strategic Direction / Urban Form and Development / UFD-O3	Amend	Considers that the references to 'assisted housing' should be removed from UFD-O3.	Amend the Urban Form and Development chapter to remove all references to 'assisted housing' including and not limited to UFD-O3 (Medium to high density and assisted housing developments...).
Kāinga Ora Homes and Communities	391.81	Strategic Direction / Urban Form and Development / UFD-O3	Support in part	Objective UFD-O3 is partially supported.	Retain Objective UFD-O3 (Medium to high density and assisted housing...) with amendment.
Kāinga Ora Homes and Communities	391.82	Strategic Direction / Urban Form and Development / UFD-O3	Amend	Considers that Objective UFD-O3 should be amended to enable higher density residential living across the city, including the city centre zone. Aligned to the NPSUD.	Amend Objective UFD-O3 (Medium to high density and assisted housing...) as follows: Medium to high High density and assisted housing developments are located in areas that are: 1. Connected to the transport network and served by multi-modal transport options; or 2. Within or near <u>a City Centre Zone or</u> a Centre Zone or other area with many employment opportunities; and 3. Served by public open space and other social infrastructure.
Greater Wellington Regional Council	FS84.28	Part 2 / Strategic Direction / Urban Form and Development / UFD03	Oppose	Greater Wellington oppose enabling further intensified development unless there are the necessary controls to manage potential effects of water bodies and freshwater ecosystems to give effect to the NPS-FM and have regard to Proposed RPS Change 1. Greater Wellington also consider that any further intensification will not be feasible unless there is investment in associated infrastructure.	Disallow / Seeks that additional provisions are included to give effect to the NPS-FM and have regard to proposed RPS change 1 to manage the effects of urban development on freshwater.
Ministry of Education	400.15	Strategic Direction / Urban Form and Development / UFD-O3	Support	The Council has an obligation under the NPS-UD to ensure sufficient additional infrastructure (which includes social infrastructure and schools) is provided in urban growth and development (see Policy 10 and 3.5 of Subpart 1 of Part 3: Implementation, in particular).	Retain UFD-O3 (Medium to high density and assisted housing developments are located in areas that are...) as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Wellington International Airport Ltd	406.74	Strategic Direction / Urban Form and Development / UFD-O3	Not specified	Incompatible urban development, particularly greenfield development, has the potential to constrain and/or curtail the operation, development and use of regionally significant infrastructure. Urban development should not be enabled or encouraged where it has the potential to adversely affect the operations of the Airport. [See paragraphs 4.11 to 4.15 of original submission for full reason]	Delete Objective UFD-O2.
Guardians of the Bays Inc	FS44.31	Part 2 / Strategic Direction / Urban Form and Development / UFD-O3	Oppose	Considers that regionally significant infrastructure does not need to be included UFD-02 wording UFD-03. [Inferred reference to submission 406.74]	Disallow
Kāinga Ora – Homes and Communities	FS89.117	Part 2 / Strategic Direction / Urban Form and Development / UFD-O2	Oppose	Kāinga Ora seeks to retain UFD-O2 as notified. The proposed relief sought provides a potential conflict between urban development around the airport and the airport. Compatible is a relatively high threshold which could have an unintended consequence of unnecessarily limiting development.	Disallow
Board of Airline Representatives of New Zealand Inc *Late further submission accepted as per Minute 3	FS139.49	Part 2 / Strategic Direction / Urban Form and Development / UFD-O2	Support	Support WAIL's submission for the reasons set out in WAIL's submission.	Allow
Wellington International Airport Ltd	406.75	Strategic Direction / Urban Form and Development / UFD-O3	Oppose in part	Incompatible medium and high density housing development, has the potential to constrain and/or curtail the operation, development and use of regionally significant infrastructure. Urban development should not be enabled or encouraged where it has the potential to adversely affect the operations of the Airport. [See paragraphs 4.11 to 4.15 from original submission for full reason]	Opposes UFD-O3 (Medium/high density and assisted housing developments) and seeks amendment.
Guardians of the Bays Inc	FS44.32	Part 2 / Strategic Direction / Urban Form and Development / UFD-O3	Oppose	Considers that regionally significant infrastructure does not need to be included UFD-02 wording UFD-03. [Inferred reference to submission 406.75]	Disallow
Board of Airline Representatives of New Zealand Inc *Late further submission accepted as per Minute 3	FS139.50	Part 2 / Strategic Direction / Urban Form and Development / UFD-O3	Support	Support WAIL's submission for the reasons set out in WAIL's submission.	Allow
Wellington International Airport Ltd	406.76	Strategic Direction / Urban Form and Development / UFD-O3	Amend	Incompatible medium and high density housing development, has the potential to constrain and/or curtail the operation, development and use of regionally significant infrastructure. Urban development should not be enabled or encouraged where it has the potential to adversely affect the operations of the Airport. [See paragraphs 4.11 to 4.15 from original submission for full reason]	Amend UFD-O3 (Medium/high density and assisted housing developments) as follows: Medium to high density and assisted housing developments are located in areas that are: 1. Connected to the transport network and served by multi-modal transport options; or 2. Within or near a Centre Zone or other area with many employment opportunities; and 3. Served by public open space and other social infrastructure; and 4. Compatible with surrounding regionally significant infrastructure.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Guardians of the Bays Inc	FS44.33	Part 2 / Strategic Direction / Urban Form and Development / UFD-03	Oppose	Considers that regionally significant infrastructure does not need to be included UFD-02 wording UFD-03. [Inferred reference to submission 406.76]	Disallow
Kāinga Ora – Homes and Communities	FS89.118	Part 2 / Strategic Direction / Urban Form and Development / UFD-03	Oppose	Kāinga Ora considers that the effects of medium and high density housing development can be managed so as not to constrain and / or curtail the airport operation. Measures proposed in the PDP such as acoustic insulation and ventilation requirements for noise sensitive activities within the Air Noise Overlays will manage the potential effects without constraining development. The neighbourhoods surrounding the airport are well placed for high density development due to transport network, public open spaces and social infrastructure and proximity to employment and commercial activities.	Disallow / Kāinga Ora seeks that UFD-03 is retained and amended as per their original submission.
Board of Airline Representatives of New Zealand Inc *Late further submission accepted as per Minute 3	FS139.51	Part 2 / Strategic Direction / Urban Form and Development / UFD-03	Support	Support WAIL's submission for the reasons set out in WAIL's submission.	Allow
Wellington International Airport Ltd	406.77	Strategic Direction / Urban Form and Development / UFD-03	Amend	Incompatible medium and high density housing development, has the potential to constrain and/or curtail the operation, development and use of regionally significant infrastructure. Urban development should not be enabled or encouraged where it has the potential to adversely affect the operations of the Airport. [See paragraphs 4.11 to 4.15 from original submission for full reason]	Delete Objective UFD-03
Guardians of the Bays Inc	FS44.34	Part 2 / Strategic Direction / Urban Form and Development / UFD-03	Oppose	Considers that regionally significant infrastructure does not need to be included UFD-02 wording UFD-03. [Inferred reference to submission 406.77]	Disallow
Waka Kotahi NZ Transport Agency	FS103.2	Part 2 / Strategic Direction / Urban Form and Development / UFD-03	Oppose	WIAL is justified in its concerns around reverse sensitivity to airport noise. However, an appropriate response would be to allow development where the developer is required to mitigate the effects of airport noise when developing.	Disallow
Board of Airline Representatives of New Zealand Inc *Late further submission accepted as per Minute 3	FS139.52	Part 2 / Strategic Direction / Urban Form and Development / UFD-03	Support	Support WAIL's submission for the reasons set out in WAIL's submission.	Allow
Willis Bond and Company Limited	416.43	Strategic Direction / Urban Form and Development / UFD-03	Amend	Considers that UFD-03 is not consistent with the medium density residential standards as it appears to limit areas in which medium density housing is to be provided.	Amend UFD-03 (Medium to high density and assisted housing developments...) as follows: Medium to high density and assisted housing developments are located in areas that are:
Te Rūnanga o Toa Rangatira	488.30	Strategic Direction / Urban Form and Development / UFD-03	Support in part	Considers there is insufficient provision for papakainga in the proposed District Plan.	Retain UFD-03 (Medium to high density and assisted housing developments...) as notified, subject to consistent use of 'active partnership' requested in subsequent submission points

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Wellington City Council	266.57	Strategic Direction / Urban Form and Development / UFD-O4	Amend	Considers that the housing bottom lines are to be inserted in the PDP without using Schedule 1 and are operative from that point.	Amend by replacing to left of UFD-O4 "P1 Sch1" with a red gavel. Remove P1 Sch 1
Kilmarston Developments Limited and Kilmarston Properties Limited	290.31	Strategic Direction / Urban Form and Development / UFD-O4	Support	Considers that it is important that Council encourages development that will support a more compact City.	Retain UFD-O4 (Housing bottom lines that need to be met or exceeded) as notified.
Wellington Electricity Lines Limited	355.20	Strategic Direction / Urban Form and Development / UFD-O4	Not specified	Neutral' on provision. The term land development capacity in UFD-O4 is applied in such a way as to emphasise the term development infrastructure. The term development infrastructure is exclusive of Additional Infrastructure – thus, by default, excluding the provision of key electricity distribution from this strategic objective. The high-level direction provided for in the PDP is supported, however, this support is based on a suitable level of recognition of the fundamental role and service a secure supply of electricity provides to the Urban Form and Development of the City. [Refer to original submission for full reason]	Not specified.
Woolworths New Zealand	359.18	Strategic Direction / Urban Form and Development / UFD-O4	Support	UFD-O4 is supported provided that Council has an evidential basis which supports the numbers referenced in Objective UFD-O4.	Retain Objective UFD-O4 (In order to achieve sufficient, feasible land development capacity...) as notified.
Jane Szentivanyi and Ben Briggs	369.8	Strategic Direction / Urban Form and Development / UFD-O4	Amend	Considers that UFD-O4 (In order to achieve sufficient, feasible land development capacity to meet expected...) should be amended to have its numbers put into the context of the housing consents granted in Wellington in the last three years. The Council can guide and encourage the location and timing of the development capacity by zoning, objectives, policies, rules and development infrastructure to meet the expected demand. The expected demand figures specified in UFD-O4 (In order to achieve sufficient, feasible land development capacity to meet expected...) needs to be put into the context of the numbers of housing consents granted in Wellington in the last three years (2019 - 2021). The submitter notes that while there will be lag between the granting of building consents and completion of the property, the current rate of building consents appears to far exceed the demand figures specified. To meet the demand figures (including competitiveness margin) for the full thirty year period requires only 1,220 new house per year which is significantly less than the number of building consents granted in each of the years 2019 - 2021. [Refer to original submission for full reason and figures]	Amend UFD-O4 (In order to achieve sufficient, feasible land development capacity to meet expected...) to clarify demand figures according to past numbers of housing consents granted in Wellington.
Kāinga Ora Homes and Communities	391.83	Strategic Direction / Urban Form and Development / UFD-O4	Support in part	Objective UFD-O4 is partially supported and an amendment is sought.	Retain Objective UFD-O4 (In order to achieve sufficient,...) with amendment.
Heritage New Zealand Pouhere Taonga	FS9.41	Part 2 / Historical and Cultural Values / Historic Heritage / HH-S2	Oppose	HH-R4 in conjunction with HH-S2 control the addition of buildings on sites of heritage buildings. New buildings on heritage sites have the potential for significant adverse effects on heritage values and it is appropriate that this matter is controlled by district plan rules.	Disallow / Retain as notified.
Kāinga Ora Homes and Communities	391.84	Strategic Direction / Urban Form and Development / UFD-O4	Amend	Considers that Objective UFD-O4 should be amended to clarify that the specified development capacity is a minimum to be provided in the District Plan rather than a target.	Amend Objective UFD-O4 (In order to achieve sufficient,...)as follows: In order to achieve sufficient, feasible land development capacity to meet expected housing demand, the following housing bottom lines below are to be met or exceeded in the short-medium and long term in Wellington City as contained in the Wellington Regional Housing and Business Capacity Assessment (Housing Update 2022). ...

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Heritage New Zealand Pouhere Taonga	FS9.42	Part 2 / Historical and Cultural Values / Historic Heritage / HH-S2	Oppose	HH-R4 in conjunction with HH-S2 control the addition of buildings on sites of heritage buildings. New buildings on heritage sites have the potential for significant adverse effects on heritage values and it is appropriate that this matter is controlled by district plan rules.	Disallow / Retain as notified.
LIVE WELLington	FS96.9	Part 2 / Strategic Direction / Urban Form and Development / UFD04	Oppose	Changing the requirement to 'exceed' capacity is not warranted. The target for the District Plan should be to provide sufficient land. Making the target more than this makes it meaningless and is not warranted. Specified development capacity already builds in extensive buffers for feasibility – therefore it does not need to be 'exceeded'. The current definition meets the requirements of the NPS-UD. Anything else could have perverse outcomes through 'over upzoning'.	Disallow
Roland Sapsford	FS117.9	Part 2 / Strategic Direction / Urban Form and Development / UFD-04	Oppose	Changing the requirement to 'exceed' capacity is not warranted. The target for the District Plan should be to provide sufficient land. Making the target more than this makes it meaningless and is not warranted. Specified development capacity already builds in extensive buffers for feasibility – therefore it does not need to be 'exceeded'. The current definition meets the requirements of the NPS-UD. Anything else could have perverse outcomes through 'over upzoning'.	Disallow
Investore Property Limited	405.28	Strategic Direction / Urban Form and Development / UFD-04	Support	Supports the recognition of the need to provide sufficient development capacity for housing and business land. The NPS-UD requires intensification in urban areas and sufficient development capacity that is of a form and in locations that meet the diverse needs of communities and encourages well-functioning, liveable urban environments [Refer to original submission for full reason].	Retain UFD-04 (Strategic Objectives) as notified.
Willis Bond and Company Limited	416.44	Strategic Direction / Urban Form and Development / UFD-04	Support in part	Support UFD-04 in part.	Retain UFD-04 (In order to achieve sufficient, feasible land development capacity...), with amendments.
Willis Bond and Company Limited	416.45	Strategic Direction / Urban Form and Development / UFD-04	Amend	Considers that UFD-04 should acknowledge the need to deliver affordable housing. Submitter considers that Wellington's affordability issues are well-documented. A lack of affordable housing risks harming the City's ability to attract workers and to sustain a vibrant arts scene.	Amend UFD-04 (In order to achieve sufficient, feasible land development capacity...) to acknowledge the need to deliver affordable housing.
Newtown Residents' Association	440.14	Strategic Direction / Urban Form and Development / UFD-04	Not specified	Considers that the amount of prescribed housing to meet before 2030 stated in UFD-04 could be met within Medium Density Residential Zones and does not require 6-storey developments.	Not specified.
Stride Investment Management Limited	470.12	Strategic Direction / Urban Form and Development / UFD-04	Support	Supports UFD-04 (In order to achieve sufficient, feasible land development capacity...)	Retain as notified.
The Thorndon Society Inc	487.2	Strategic Direction / Urban Form and Development / UFD-04	Amend	Considers that the demand figures in UFD-04 should be further broken down to better determine the real demand and housing needs. Considers that the figures need clarification over what part of the need is by families (who may need larger properties with more land) and what part by individual people and couples who may enjoy apartment or town house living.	Seeks that the demand figures in UFD-04 (In order to achieve sufficient, feasible land development capacity ...) should be broken down further to better determine the real demand and housing needs.
Thorndon Residents' Association Inc	FS69.84	Part 2 / Strategic Direction / Urban Form and Development / UFD04	Support	Break down housing demand figures Infrastructure capacity insufficient – limit development Construction of buildings for business purposes should not be permitted in a residential area.	Allow

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Historic Places Wellington Inc	FS111.75	Part 2 / Strategic Direction / Urban Form and Development / UFD-04	Support	No specific reason provided.	Allow
Te Rūnanga o Toa Rangatira	488.31	Strategic Direction / Urban Form and Development / UFD-04	Support in part	Considers there is insufficient provision for papakainga in the proposed District Plan.	Retain UFD-04 (In order to achieve sufficient, feasible land development capacity to meet expected housing demand...) as notified, subject to consistent use of 'active partnership' requested in subsequent submission points
Woolworths New Zealand	359.19	Strategic Direction / Urban Form and Development / UFD-05	Support	UFD-05 is supported provided that there is actual sufficient land development capacity available to meet the short-, medium- and long-term business land needs of the City as identified in Objective UFD-05. With particular regard to business land, it is currently unclear if adequate supply has been made in accordance with the Wellington Regional Housing and Business Capacity Assessment.	Retain Objective UFD-05 (Sufficient land development capacity is available...) as notified.
Argosy Property No. 1 Limited	383.17	Strategic Direction / Urban Form and Development / UFD-05	Support	Supports the recognition of the need to provide sufficient development capacity for housing and business land. The National Policy Statement on Urban Development 2020 (NPS-UD) requires intensification in urban areas and sufficient development capacity that is of a form and in locations that meet the diverse needs of communities and encourages well-functioning, liveable urban environments. Argosy supports the strategic direction set by the NPS-UD. The feedback that Argosy provides on the provisions below seeks to ensure that the rules and standards in the District Plan enable this outcome	Retain Objective UFD-05 as notified.
Kāinga Ora Homes and Communities	391.85	Strategic Direction / Urban Form and Development / UFD-05	Support in part	Objective UFD-05 is partially supported and an amendment is sought.	Retain Objective UFD-05 (Sufficient land development capacity...) with amendment.
Kāinga Ora Homes and Communities	391.86	Strategic Direction / Urban Form and Development / UFD-05	Amend	Considers that Objective UFD-05 should be amended to clarify that the specified development capacity is a minimum to be provided in the District Plan rather than a target and feasible development should be provided for.	Amend Objective UFD-05 (Sufficient land development capacity...) as follows: <u>At least</u> sufficient, <u>feasible</u> land development capacity is available to meet the short, medium, and long-term business land needs of the City, as identified in the Wellington Regional Housing and Business Capacity Assessment.
LIVE WELLington	FS96.10	Part 2 / Strategic Direction / Urban Form and Development / UFD-05	Oppose	The target for the District Plan should be to provide sufficient land. Making the target more than this makes it meaningless and is not warranted. Specified development capacity already builds in extensive buffers for feasibility – therefore it does not need to be 'exceeded'. The current definition meets the requirements of the NPS-UD. Anything else could have perverse outcomes through 'over upzoning'.	Disallow
Roland Sapsford	FS117.10	Part 2 / Strategic Direction / Urban Form and Development / UFD-05	Oppose	The target for the District Plan should be to provide sufficient land. Making the target more than this makes it meaningless and is not warranted. Specified development capacity already builds in extensive buffers for feasibility – therefore it does not need to be 'exceeded'. The current definition meets the requirements of the NPS-UD. Investore Property Limited	405.29	Strategic Direction / Urban Form and Development / UFD-05	Support	Supports the recognition of the need to provide sufficient development capacity for housing and business land. The NPS-UD requires intensification in urban areas and sufficient development capacity that is of a form and in locations that meet the diverse needs of communities and encourages well-functioning, liveable urban environments [Refer to original submission for full reason].	Retain UFD-05 (Strategic Objectives) as notified.
Willis Bond and Company Limited	416.46	Strategic Direction / Urban Form and Development / UFD-05	Support in part	Support UFD-05 in part.	Retain UFD-05 (Sufficient land development capacity is available...) with amendments.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Willis Bond and Company Limited	416.47	Strategic Direction / Urban Form and Development / UFD-05	Amend	Considers that UFD-05 should acknowledge the need to deliver affordable housing. Submitter considers that Wellington's affordability issues are well-documented. A lack of affordable housing risks harming the City's ability to attract workers and to sustain a vibrant arts scene.	Amend UFD-05 (Sufficient land development capacity is available...) to acknowledge the need to deliver affordable housing.
Stride Investment Management Limited	470.13	Strategic Direction / Urban Form and Development / UFD-05	Support	Supports UFD-05 (Sufficient land development capacity is available...)	Retain as notified.
Te Rūnanga o Toa Rangatira	488.32	Strategic Direction / Urban Form and Development / UFD-05	Support in part	Considers there is insufficient provision for papakainga in the proposed District Plan.	Retain UFD-05 (Sufficient land development capacity is available to meet the short-, medium- and long-term business land needs...) as notified, subject to consistent use of 'active partnership' requested in subsequent submission points
Oranga Tamariki	83.4	Strategic Direction / Urban Form and Development / UFD-06	Support	Oranga Tamariki support this objective which now specifically provides for supported residential care, as sought through the Draft Plan feedback. This achieves consistency with the underlying residential zone rules which provide for supported residential care activities (up to 10 residents) as a Permitted activity.	Retain UFD-06 (Strategic Objectives) as notified.
Ara Poutama Aotearoa the Department of Corrections	240.9	Strategic Direction / Urban Form and Development / UFD-06	Oppose	Considers that the definition of "residential activity" entirely captures supported and transitional accommodation activities, such as those provided for by Ara Poutama; i.e. people living in a residential situation, who are subject to support and/or supervision by Ara Poutama, and therefore a separate definition of "supported residential care activities" is unnecessary. Such activities are an important component of the rehabilitation and reintegration process for people under Ara Poutama's supervision. They enable people and communities to provide for their social and cultural wellbeing and for their health and safety. However, should Council see it as being absolutely necessary to implement the separate definition of "supported residential care activity", then the wording of Strategic Objective UFD-06 (which references and enables supported residential care activities), should be retained as notified	Seeks that the references to "supported residential care activity" from Strategic Objective UFD-06 (Variety of housing types...) are removed.
Kāinga Ora – Homes and Communities	FS89.6	Part 2 / Strategic Direction / Urban Form and Development / UFD-06	Oppose	Kāinga Ora opposes the deletion of the reference to supported residential care activities and its definition. The objective appropriately describes the range of activities expected across the city.	Disallow
Ara Poutama Aotearoa the Department of Corrections	240.10	Strategic Direction / Urban Form and Development / UFD-06	Oppose in part	Considers that the definition of "residential activity" entirely captures supported and transitional accommodation activities, such as those provided for by Ara Poutama; i.e. people living in a residential situation, who are subject to support and/or supervision by Ara Poutama, and therefore a separate definition of "supported residential care activities" is unnecessary. Such activities are an important component of the rehabilitation and reintegration process for people under Ara Poutama's supervision. They enable people and communities to provide for their social and cultural wellbeing and for their health and safety. However, should Council see it as being absolutely necessary to implement the separate definition of "supported residential care activity", then the wording of Strategic Objective UFD-06 (which references and enables supported residential care activities), should be retained as notified	If council are to retain the "supported residential care activity" definition, then the wording of Strategic Objective UFD-06 (variety of housing types...) should be retained as notified.
Kāinga Ora – Homes and Communities	FS89.7	Part 2 / Strategic Direction / Urban Form and Development / UFD-06	Oppose	Kāinga Ora opposes the deletion of the reference to supported residential care activities and its definition. The objective appropriately describes the range of activities expected across the city.	Disallow
Phillippa O'Connor	289.4	Strategic Direction / Urban Form and Development / UFD-06	Support	Supports the Objective UFD-06 as notified.	Retain UFD-06 (A variety of housing types, sizes and tenures, including assisted housing, supported residential care, and papakainga options, are available across the City to meet the community's diverse social, cultural, and economic housing needs.) as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Kilmarston Developments Limited and Kilmarston Properties Limited	290.32	Strategic Direction / Urban Form and Development / UFD-06	Support	Considers that it is important that Council encourages development that will support a more compact City.	Retain UFD-06 (A variety of housing types, sizes and tenures, including assisted housing, supported residential care, and papakainga options, are available across the City...) as notified.
Tapu-te-Ranga Trust	297.15	Strategic Direction / Urban Form and Development / UFD-06	Support	Support the recognition of papakāinga housing options in Urban Form and Development – Objective 6.	Retain UFD-06 (variety of housing types, sizes and tenures, including assisted housing, supported residential care, and papakainga options) as notified.
Retirement Villages Association of New Zealand Incorporated	350.23	Strategic Direction / Urban Form and Development / UFD-06	Support in part	Supports UFD-06 to the extent it reflects the MDRS Objective 2.	Retain UFD-06 (Strategic Direction) and seeks amendment.
Retirement Villages Association of New Zealand Incorporated	350.24	Strategic Direction / Urban Form and Development / UFD-06	Support in part	Supports UFD-06 to the extent it reflects the MDRS Objective 2.	Seeks amendment to UFD-06 (Strategic Direction) to more closely reflect MDRS Objective 2.
Woolworths New Zealand	359.20	Strategic Direction / Urban Form and Development / UFD-06	Support	UFD-06 is supported.	Retain Objective UFD-06 (A variety of housing types, sizes and tenures,...) as notified.
Argosy Property No. 1 Limited	383.18	Strategic Direction / Urban Form and Development / UFD-06	Support	Supports the creation of 'well-functioning urban environments consistent with the NPS-UD. The National Policy Statement on Urban Development 2020 (NPS-UD) requires intensification in urban areas and sufficient development capacity that is of a form and in locations that meet the diverse needs of communities and encourages well-functioning, liveable urban environments. Argosy supports the strategic direction set by the NPS-UD. The feedback that Argosy provides on the provisions below seeks to ensure that the rules and standards in the District Plan enable this outcome	Retain Objective UFD-06 as notified.
Taranaki Whānui ki te Upoko o te Ika	389.52	Strategic Direction / Urban Form and Development / UFD-06	Amend	Seeks clarification of the use of papakāinga.	Amend Objective UFD-06 to the following: A variety of housing types, sizes and tenures, including assisted housing, supported residential care, and papakāinga papakāinga options, are available across the City to meet the community's diverse social, cultural, and economic housing needs. [Inferred decision requested] [Inferred decision requested]
Kāinga Ora Homes and Communities	391.87	Strategic Direction / Urban Form and Development / UFD-06	Amend	Considers that the references to 'assisted housing' should be removed from UFD-06.	Amend the Urban Form and Development chapter to remove all references to 'assisted housing' including and not limited to UFD-06 (A variety of housing types, sizes and tenures,...)
Kāinga Ora Homes and Communities	391.88	Strategic Direction / Urban Form and Development / UFD-06	Support in part	Objective UFD-06 is partially supported and an amendment is sought.	Retain Objective UFD-06 (A variety of housing types,...) with amendment.
Kāinga Ora Homes and Communities	391.89	Strategic Direction / Urban Form and Development / UFD-06	Amend	Considers that Objective UFD-06 should be amended to clarify that the tenure is not relevant to achieving quality urban environments, but the range of types and sizes of housing are.	Amend Objective UFD-06 (A variety of housing types,...) as follows: A variety of housing types and sizes and tenures, including assisted housing, supported residential care, and papakainga options, are available across the City to meet the community's diverse social, cultural, and economic housing needs.
Metlifecare Limited	413.6	Strategic Direction / Urban Form and Development / UFD-06	Oppose	Consider that as currently drafted this objective does not recognise the importance of housing being able to provide both social and health benefits in the community.	Seeks to ensure that this objective recognises that housing must not only meet social, cultural and economic housing needs, it must also meet health needs.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Metlifecare Limited	413.7	Strategic Direction / Urban Form and Development / UFD-06	Amend	Consider that as currently drafted this objective does not recognise the importance of housing being able to provide both social and health benefits in the community.	Seeks that UDF-06 is amended as follows: A variety of housing types, sizes and tenures, including assisted housing, supported residential care, and papakainga options, are available across the City to meet the community's diverse social, cultural, and economic housing needs <u>and to reflect demand.</u>
Willis Bond and Company Limited	416.48	Strategic Direction / Urban Form and Development / UFD-06	Support in part	Support UFD-06 in part.	Retain UFD-06 (A variety of housing types, sizes and tenures, including assisted housing...) with amendments.
Willis Bond and Company Limited	416.49	Strategic Direction / Urban Form and Development / UFD-06	Amend	Considers that UFD-06 should acknowledge the need to deliver affordable housing. Submitter considers that Wellington's affordability issues are well-documented. A lack of affordable housing risks harming the City's ability to attract workers and to sustain a vibrant arts scene.	Amend UFD-06 (A variety of housing types, sizes and tenures, including assisted housing...) to acknowledge the need to deliver affordable housing.
Willis Bond and Company Limited	416.50	Strategic Direction / Urban Form and Development / UFD-06	Amend	Considers that UFD-06 should acknowledge the need to deliver affordable housing. Submitter considers that Wellington's affordability issues are well-documented. A lack of affordable housing risks harming the City's ability to attract workers and to sustain a vibrant arts scene.	Amend UFD-06 (A variety of housing types, sizes and tenures, including assisted housing...) as follows: A variety of housing types, sizes and tenures, including assisted housing, supported residential care, and papakainga options, <u>and affordable housing options</u> , are available across the City to meet the community's diverse social, cultural, and economic housing needs.
Te Rūnanga o Toa Rangatira	488.33	Strategic Direction / Urban Form and Development / UFD-06	Support in part	Considers there is insufficient provision for papakainga in the proposed District Plan.	Retain UFD-06 (A variety of housing types, sizes and tenures, including assisted housing, supported residential care, and papakainga options...) as notified, subject to consistent use of 'active partnership' requested in subsequent submission points
Te Rūnanga o Toa Rangatira	488.34	Strategic Direction / Urban Form and Development / UFD-06	Support in part	Supports reference to papakainga in UFD-06.	Retain UFD-06 (A variety of housing types, sizes and tenures, including assisted housing, supported residential care, and papakainga options...) as notified.
Oranga Tamariki	83.5	Strategic Direction / Urban Form and Development / UFD-07	Amend	Oranga Tamariki seek amendments to UFD-06 to provide specific direction in relation to community needs and well-being. It is considered that the proposed amended objectives can better provide for Part 2 of the RMA in relation to people and communities providing for their social, economic and well-being and for their health and safety.	Amend UDF-07 (Strategic objectives) as follows: Development supports the creation of liveable, well-functioning urban environments that enables all people and communities to provide for their social, economic, environmental, and cultural wellbeing, and for their health and safety now and into the future. Development will achieve this by: 1. Being accessible and well-designed; 2. Supporting sustainable travel choices, including active and micro mobility modes; 3. Being serviced by the necessary infrastructure appropriate to the intensity, scale and function of the development and urban environment; 4. Being socially inclusive; 5. Being ecologically sensitive; 6. Respecting of the City's historic heritage; 7. Providing for community well-being; and 8. Adapting over time and being responsive to an evolving, more intensive surrounding context; <u>and</u> <u>9. Provides for community well-being.</u>

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	99.8	Strategic Direction / Urban Form and Development / UFD-07	Support	UFD-07 is supported as it appropriately recognises the need for a well-functioning urban environment to be served by the necessary infrastructure appropriate to the intensity, scale and function of the development and urban environment.	Retain Objective UFD-07 as notified.
Kilmarston Developments Limited and Kilmarston Properties Limited	290.33	Strategic Direction / Urban Form and Development / UFD-07	Support	Considers that it is important that Council encourages development that will support a more compact City.	Retain UFD-07 (Development supports the creation of a liveable, well-functioning urban environment) as notified.
Retirement Villages Association of New Zealand Incorporated	350.25	Strategic Direction / Urban Form and Development / UFD-07	Support in part	Supports UFD-07 to the extent it reflects MDRS Objective 1. However, is concerned the objective is overly directive as to how this outcome will be achieved, through listing 8 broad and undefined matters that need to be satisfied.	Retain UFD-07 (Strategic Direction) and seeks amendment.
Retirement Villages Association of New Zealand Incorporated	350.26	Strategic Direction / Urban Form and Development / UFD-07	Amend	Supports UFD-07 to the extent it reflects MDRS Objective 1. However, is concerned the objective is overly directive as to how this outcome will be achieved, through listing 8 broad and undefined matters that need to be satisfied.	Seeks amendment to UFD-07 (Strategic Direction) to acknowledge that development will not achieve all of the listed matters in all cases.
Wellington Electricity Lines Limited	355.21	Strategic Direction / Urban Form and Development / UFD-07	Support	Supports Objective UFD-07 for its effective messaging as to the need of the electricity distribution network in achieving well-functioning urban environments.	Retain UFD-07 of the Urban Form and Development Objective chapter as notified.
Woolworths New Zealand	359.21	Strategic Direction / Urban Form and Development / UFD-07	Support	UFD-07 is supported.	Retain Objective UFD-07 (Development supports the creation of a liveable,...) as notified.
Waka Kotahi	370.69	Strategic Direction / Urban Form and Development / UFD-07	Support	Supports this strategic objective as written.	Retain Strategic Objective UFD-07 as notified.
KiwiRail Holdings Limited	FS72.16	Part 2 / District-Wide Matters / Strategic Direction / Urban Form and Development / UFD-07	Support	Supports objective. Considers the relief sought should be allowed because it will (a) will promote the sustainable management of the natural and physical resources in Wellington City, and is therefore consistent with Part 2 and other provisions of the Resource Management Act 1991 (RMA) and the Enabling Housing Supply Amendment Act 2021 (Amendment Act); (b) is consistent with other relevant planning documents, including the Greater Wellington Regional Policy Statement and National Policy Statement for Urban Development 2020; (c) will meet the reasonably foreseeable needs of future generations; (d) will avoid, remedy or mitigate actual and potential adverse effects on the environment; (e) will enable the social, economic and cultural wellbeing of the people of Wellington City; and (f) is the most appropriate way to achieve the objectives of the Proposed Plan in terms of section 32 of the RMA.	Allow
Southern Cross Healthcare Limited	380.27	Strategic Direction / Urban Form and Development / UFD-07	Support	Supports strategic objective UFD-07 as it recognises that development will support the creation of a liveable, well-functioning urban environment that enables people and communities to provide for their social, economic, environmental, and cultural wellbeing, and for their health and safety, and this will be achieved by environments adapting over time to a more intensive surrounding context.	Retain Urban Form and Development strategic objective UFD-07 as notified

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Kāinga Ora Homes and Communities	391.90	Strategic Direction / Urban Form and Development / UFD-07	Support	Objective UFD-07 is generally supported.	Retain Objective UFD-07 (Development supports the creation...) as notified.
Ministry of Education	400.16	Strategic Direction / Urban Form and Development / UFD-07	Support in part	Requests the inclusion of 'additional infrastructure' to be included within UFD-07. Under the NPS-UD and the Definitions Chapter of the Proposed District Plan, educational facilities are included in the definition of 'additional infrastructure'. This will ensure that subdivision and development include provision for the expansion of existing or new educational facilities to accommodate the demand of development.	Amend UFD-07 (Development supports the creation of...) as follows: ... Development will achieve this by: ... 3. Being serviced by the necessary infrastructure and <u>additional infrastructure</u> appropriate to the intensity, scale and function of the development and urban environment; ...
Investore Property Limited	405.30	Strategic Direction / Urban Form and Development / UFD-07	Support	Supports the creation of well-functioning urban environments under UFD-07, that is consistent with the direction set out in the NPS-UD. The NPS-UD requires intensification in urban areas and sufficient development capacity that is of a form and in locations that meet the diverse needs of communities and encourages well-functioning, liveable urban environments [Refer to original submission for full reason].	Retain UFD-07 (Strategic Objectives) as notified.
Wellington International Airport Ltd	406.78	Strategic Direction / Urban Form and Development / UFD-07	Oppose in part	Poorly sited noise sensitive activity has the potential to constrain and/or curtail the operation, development and use of regionally significant infrastructure. Considers that such activities should not be enabled or encouraged where it has the potential to adversely affect the operations of the Airport. [See original submission paragraphs 4.11 to 4.15 for full reason]	Opposes UFD-07 as is and seeks amendment.
Kāinga Ora – Homes and Communities	FS89.119	Part 2 / Strategic Direction / Urban Form and Development / UFD-07	Oppose	Kāinga Ora considers that the effects of medium and high density housing development can be managed so as not to constrain and / or curtail the airport operation. Measures proposed in the PDP such as acoustic insulation and ventilation requirements for noise sensitive activities within the Air Noise Overlays will manage the potential effects without constraining development. The neighbourhoods surrounding the airport are well placed for high density development due to transport network, public open spaces and social infrastructure and proximity to employment and commercial activities.	Disallow / Kāinga Ora seeks that UFD-07 is retained as notified
Board of Airline Representatives of New Zealand Inc *Late further submission accepted as per Minute 3	FS139.53	Part 2 / Strategic Direction / Urban Form and Development / UFD-07	Support	Support WAIL's submission for the reasons set out in WAIL's submission.	Allow
Wellington International Airport Ltd	406.79	Strategic Direction / Urban Form and Development / UFD-07	Amend	Poorly sited noise sensitive activity has the potential to constrain and/or curtail the operation, development and use of regionally significant infrastructure. Considers that such activities should not be enabled or encouraged where it has the potential to adversely affect the operations of the Airport. [See original submission paragraphs 4.11 to 4.15 for full reason]	Amend UFD-07 (Development supports the creation of a liveable, well-functioning urban environment) as follows: ... 7. Providing for community well-being; and 8. Adapting over time and being responsive to an evolving, more intensive surrounding context; <u>and</u> 9. Avoiding the effects of reverse sensitivity on Regionally Significant Infrastructure.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Board of Airline Representatives of New Zealand Inc *Late further submission accepted as per Minute 3	FS139.54	Part 2 / Strategic Direction / Urban Form and Development / UFD-07	Support	Support WAIL's submission for the reasons set out in WAIL's submission.	Allow
Wellington International Airport Ltd	406.80	Strategic Direction / Urban Form and Development / UFD-07	Amend	Poorly sited noise sensitive activity has the potential to constrain and/or curtail the operation, development and use of regionally significant infrastructure. Considers that such activities should not be enabled or encouraged where it has the potential to adversely affect the operations of the Airport. [See original submission paragraphs 4.11 to 4.15 for full reason]	Delete Objective UFD-07.
Board of Airline Representatives of New Zealand Inc *Late further submission accepted as per Minute 3	FS139.55	Part 2 / Strategic Direction / Urban Form and Development / UFD-07	Support	Support WAIL's submission for the reasons set out in WAIL's submission.	Allow
Willis Bond and Company Limited	416.1	Strategic Direction / Urban Form and Development / UFD-07	Amend	Considers that UFD-07 is too extensive in its demands on development and is not consistent with the more permissive direction in the medium density housing standards and the National Policy Statement on Urban Development 2020 (NPS-UD). The submitter considers that the items mentioned are generally dealt with elsewhere in the PDP.	Seeks that UFD-07 is reviewed for alignment with the medium density housing standards, NPS-UD and the balance of the Proposed District Plan. [If the objective is not deleted in its entirety]
Willis Bond and Company Limited	416.51	Strategic Direction / Urban Form and Development / UFD-07	Oppose	Considers that UFD-07 is too extensive in its demands on development and is not consistent with the more permissive direction in the medium density housing standards and the National Policy Statement on Urban Development 2020 (NPS-UD). The submitter considers that the items mentioned are generally dealt with elsewhere in the PDP.	Delete UFD-07 (Development supports the creation of a liveable, well-functioning...) in its entirety.
Stride Investment Management Limited	470.14	Strategic Direction / Urban Form and Development / UFD-07	Support	Supports UFD-07 (Development supports the creation of a liveable...)	Retain as notified.
Te Rūnanga o Toa Rangatira	488.35	Strategic Direction / Urban Form and Development / UFD-07	Support in part	Considers there is insufficient provision for papakainga in the proposed District Plan.	Retain UFD-07 (Development supports the creation of a liveable, well-functioning urban environment...) as notified, subject to consistent use of 'active partnership' requested in subsequent submission points
Woolworths New Zealand	359.22	Strategic Direction / Urban Form and Development / UFD-08	Support	UFD-08 is supported.	Retain Objective UFD-08 (Areas of identified special character are recognised...) as notified.
Waka Kotahi	370.70	Strategic Direction / Urban Form and Development / UFD-08	Amend	Considers it would be helpful if the District Plan identified under what specific circumstances "where possible" pertains to. As currently written the objective is subjective.	Amend Strategic Objective UFD-08 to clarify what 'where possible' pertains to.
Kāinga Ora Homes and Communities	391.91	Strategic Direction / Urban Form and Development / UFD-08	Oppose	Objective UFD-08 is opposed due to the recognition of 'special character' at the strategic level of the Plan. This is more appropriately addressed through the relevant zone provisions and precincts. Character is not a NPSUD qualifying matter and as these are not referenced here then neither should special character.	Delete Objective UFD-08 (Areas of identified special character...) in its entirety.
Matthew Plummer	FS7.1	Part 2 / Strategic Direction / Urban Form and Development / UFD-08	Oppose	The NPSUD makes provision for "any other matters" determined by the Council to be a qualifying matter. Character Precincts are important to protect the character and heritage of Wellington City in general, and Mount Cook in particular. [Inferred reference to submission 391.91]	Disallow

Energy, Infrastructure and Transport

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Matthew James Underwood	FS17.1	Part 3 / Residential Zones / Medium Density Residential Zone / General MRZ-PREC01	Oppose	Oppose Sub No/Point by Kainga Ora Homes and Communities which seeks to delete Objective UFD-08 and rejects its recognition of “special character” at the strategic level of the Plan on. Support character precincts because they comply with the NPSUD and are an important qualifying matter under the RMA. [Inferred reference to submission 391.91]	Disallow
Thorndon Residents' Association Inc	FS69.11	Part 2 / Strategic Direction / Urban Form and Development / UFD-08	Oppose	WCC summary of submission reads: <i>Objective UFD-08 is opposed due to the recognition of 'special character' at the strategic level of the Plan. This is more appropriately addressed through the relevant zone provisions and precincts. Character is not a NPSUD qualifying matter and as these are not referenced here then neither should special character.</i> Wellington is a boutique capital with unique characteristics that are highly valued and celebrated for collectively adding to the charm of this unique city. The special character of the city's inner residential areas are a well recognised part of the city's international reputation, and these deserve robust consideration and planning control. Special character precincts would seem to enable a more rigorous and sustainable control.	Disallow
Hilary Watson	FS74.1	Part 2 / Strategic Direction / City Economy Knowledge and Prosperity / CEKP-O3	Oppose	Hilary Watson considers that the original submission states that Character is not a NPSUD qualifying matter. Hilary Watson disagrees - NPS-UD has provision for 'any other matter' determined by Council to be a qualifying matter. [Inferred reference to submission 391.91]	Disallow
Willis Bond and Company Limited	416.52	Strategic Direction / Urban Form and Development / UFD-08	Support	Supports the direction of UFD-08.	Retain UFD-08 (Areas of identified special character are recognised...) as notified.
Te Rūnanga o Toa Rangatira	488.36	Strategic Direction / Urban Form and Development / UFD-08	Support in part	Considers there is insufficient provision for papakainga in the proposed District Plan.	Retain UFD-08 (Areas of identified special character are recognised and new development within those areas...) as notified, subject to consistent use of 'active partnership' requested in subsequent submission points
Trelissick Park Group	168.2	Energy Infrastructure and Transport / General point on Energy Infrastructure and Transport / General point on Energy Infrastructure and Transport	Not specified	The submitter recognises the difficulty that some sites would have to achieve neutral or lesser stormwater runoff, compared with pre-development. The suggested offsets would need to be funded by the developer as a part of the consent.	Seeks that the offsets requirements of sites, as suggested by the submitter, would need to be funded by the developer as a part of the consent.
Wellington International Airport Ltd	406.81	Energy Infrastructure and Transport / General point on Energy Infrastructure and Transport / General point on Energy Infrastructure and Transport	Amend	Considers that Wellington Airport has been excluded from the Infrastructure Chapter of the Proposed Plan. This exclusion is to ensure that the consent requirements within the Infrastructure Chapter do not inadvertently capture airport purpose or airport related activities within the Airport Zone Considers that the Airport still comprises “infrastructure” for the purposes of the section 2 of the Act and is a network utility under section 166 of the RMA. Furthermore, WIAL undertakes airport and airport related, albeit beyond the Airport Zone.	Seeks that the wording in the introduction of the Infrastructure Chapter is updated to make clear that the infrastructure chapter, and the infrastructure specific overlay sub-chapters, do not apply to airport and airport related activities within the Airport Zone.

Energy, Infrastructure and Transport - Three Waters

Airways Corporation of New Zealand Limited	FS105.4	Part 2 / Energy Infrastructure and Transport / General point on Energy Infrastructure and Transport / General point on Energy Infrastructure and Transport	Support	This submission point is consistent with Airways' operations and its core functions.	Allow
Board of Airline Representatives of New Zealand Inc *Late further submission accepted as per Minute 3	FS139.56	Part 2 / Energy Infrastructure and Transport / General point on Energy Infrastructure and Transport / General point on Energy Infrastructure and Transport	Support	Support WAIL's submission for the reasons set out in WAIL's submission.	Allow
Aro Valley Community Council	87.29	Energy Infrastructure and Transport / Three Waters / General THW	Not specified	Considers that there are constraints to building in Te Aro that the PDP fails to recognise, including: <ul style="list-style-type: none"> - The Council's GNZ SLIDE geomorphology map indicates expensive foundations would be required to support development higher than 3 storeys. - The groundwater levels on either side of the street are high and require expensive foundations. - The existing three waters infrastructure will not support large increases in population in Aro Valley. 	Not specified.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Generation Zero	FS54.33	Part 2 / Energy Infrastructure and Transport / Three Waters / General THW	Oppose	For character areas, the central test is “other” qualifying matter under clause 3.33(3) of the NPS-UD, alongside the objectives and purpose of the NPS-UD. There is an extremely high bar to creating a character area. The reduction in development capacity must be justified against the national significance of urban development and the objectives of the NPS-UD. Cities are dynamic and changeable. Indeed Wellington underwent many built changes before the currently form was locked in place by modern zoning documents. New housing and residents are a positive to encourage, rather a negative to push out further or crowd into the remaining housing stock. It is significantly more climate friendly to allow denser housing in inner-suburbs, rather than displacing development into greenfields, even accounting for embodied carbon. Character areas are in inner-city suburbs which are highly connected to amenities and already have high-mode share of low emissions transport. This land is often the most resilient. More residents can be easily absorbed in these suburbs and will create a positive impact on that suburb. The counterfactual – the status quo – is that the best quality land in the city is locked away by wealthy residents who seek to preserve an unsustainable way of life and/or their property values. This causes reduced supply and higher prices, higher rents, lower quality, displacement of low-income residents, and pushes residents to worse locations with higher lifetime emissions. The development capacity lost through character areas is extremely weighty; only very ‘character’ of very high quality can be justified. It must also be a site-specific analysis; the current broadbrush suburb-by-suburb analysis in the current District Plan is not allowed. The approaches advocated by the submitters is erroneous under the NPS-UD and should be rejected. Submitters cannot point to individual streets or houses they subjectively find as ‘character’ as this does not meet the stringent evidential requirement of clause 3.33(3). Submitters cannot request to go back to the current District Plan character areas, as these are untenable under the new NPS-UD test. Submitters cannot point to the Boffa Miskel report and adopt its recommendation. The report was written before the enactment of the NPS-UD. And, crucially, this approach begs the question of how the report fits into the NPS-UD test in clause 3.33(3). The approach in the PDP, where only contiguous and coherent pockets of high-quality character are proposed, is legal under the NPS-UD.	Disallow / Disallow the submission in full to the extent that this relates to character areas or reducing the amount of enabled housing. Reject increasing character areas in the PDP.
Hugh Good	90.2	Energy Infrastructure and Transport / Three Waters / General THW	Not specified	Considers that 3-waters infrastructure should not be a qualifying matter that governs where development takes place.	Seeks that three waters infrastructure should not be a qualifying matter that governs where development takes place.
Janice Young	140.5	Energy Infrastructure and Transport / Three Waters / General THW	Not specified	Considers that 3-waters infrastructure should be a qualifying matter that governs where development takes place.	Seeks that 3-waters infrastructure is a qualifying matter that governs where development takes place.
David Stevens	151.7	Energy Infrastructure and Transport / Three Waters / General THW	Not specified	Considers that the state of Three Waters infrastructure throughout the Broadmeadows to Crofton Downs corridor is inadequate to meet any significant or concentrated housing growth.	Not specified.
Trelissick Park Group	168.3	Energy Infrastructure and Transport / Three Waters / General THW	Support	Supports that THW (Three Waters) covers stormwater hydraulic neutrality and water sensitive design.	Retain the Three Waters chapter, with amendments.
Wellington City Youth Council	201.22	Energy Infrastructure and Transport / Three Waters / General THW	Support	Supports Council’s actions for water management under the proposed District Plan	Retain the Three Waters chapter as notified.
Wellington City Youth Council	201.23	Energy Infrastructure and Transport / Three Waters / General THW	Amend	Considers the importance of te mana o te wai to be upheld as it is clear that the current system is failing. Supports a strengthened focus on upholding the rights of mana whenua in relation to water.	Seeks that the PDP is amended to strengthen the focus on upholding the rights of mana whenua in relation to water.
Wellington City Council Environmental Reference Group	FS112.1	Part 2 / Energy Infrastructure and Transport / Three Waters / General THW	Support	WCCERG agree with the need for a strengthened focus on upholding the rights of mana whenua in relation to water.	Allow

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Te Rūnanga o Toa Rangatira	FS138.19	Part 2 / Energy Infrastructure and Transport / Three Waters / General THW	Support	The submitter seeks that the PDP is amended to strengthen the focus on upholding the rights of mana whenua in relation to water. Te Rūnanga o Toa Rangatira support this submission because the rights of mana whenua in relation to wai is a matter of national importance. Alongside this Te Mana o Te Wai should be upheld.	Allow
Wellington City Youth Council	201.24	Energy Infrastructure and Transport / Three Waters / General THW	Not specified	Supports hydraulic neutrality and considers that it should inform future-proof water management approach.	Not specified.
Wellington City Youth Council	201.25	Energy Infrastructure and Transport / Three Waters / General THW	Amend	[No specific reason given beyond decision requested - refer to original submission]	Seeks that council considers how it can better manage and use greywater to avoid inefficient use of our limited clean water resources.
Tyers Stream Group	221.7	Energy Infrastructure and Transport / Three Waters / General THW	Amend	Considers that existing three waters infrastructure in the area has suffered from lack of maintenance and renewals, and shows signs of significant failure, causing adverse environmental effects. [Refer to original submission for full reason]	Seeks that all building developments, including infill housing, mandate at least neutral or lesser stormwater runoff, compared with pre-development.
Tyers Stream Group	221.8	Energy Infrastructure and Transport / Three Waters / General THW	Amend	Considers that pipes can block, causing up and downstream flooding. There is an ongoing cost to keep pipe entrances clear. Pipes remove instream habitat and can impede fish passage, reducing access to suitable habitat. Pipes destroy the natural character of riparian margins. Piping separates people from the streams running through their neighbourhoods, and increases the likelihood of people not knowing about or respecting their waterways.	Seeks addition of piping of waterways other than short sections for access roads and tracks to be non-complying.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Wellington City Council	266.58	Energy Infrastructure and Transport / Three Waters / General THW	Amend	Considers amendments required to wording to align with the NPS-FM.	<p>Amend the Three Waters introduction as follows:</p> <p>(...)</p> <p>Te Mana o te Wai <u>is a hierarchal framework that</u> means that the health and wellbeing of water <u>bodies and freshwater ecosystems</u> must be prioritized <u>first</u>, followed by the health needs of people and then the ability for people and communities to provide for their social, economic and cultural well-being <u>now and in the future</u>. The Three Waters chapter in the District Plan has a role to play by promoting positive effects and avoiding, remedying or mitigating adverse effects of urban development on water in relation to three waters infrastructure, by including objectives, policies and rules which help to achieve these outcomes and contribute towards <u>gives effect to</u> Te Mana o te Wai.</p> <p>The projected increase in urban development in the city will put additional pressure on the existing stormwater network due to increased runoff, with this likely to be further exacerbated by future climate change-induced flooding events. To address this, all new subdivision and development will need to demonstrate that the discharge quantity, and flow rate of associated stormwater runoff generated is no greater than the peak runoff and volumes discharged from the site in an undeveloped state. New development will also need to include water sensitive design methods so that development contributes to promoting positive effects and avoids, remedies or mitigates adverse effects on the health and well-being of water.</p> <p>Degradation of water quality in urban freshwater ecosystems can occur when stormwater runoff from impervious surfaces is channelled directly into streams and rivers. The ‘first flush’ of stormwater during a rain event can include higher levels of contaminants. New development using copper or zinc building materials (two common contaminants) will need to treat these surfaces or the stormwater from these surfaces to avoid copper or zinc from entering stormwater. New development will also need to include water sensitive design methods so that development contributes to promotes positive effects and avoids, remedies or mitigates adverse effects on the health and well-being of water <u>bodies, freshwater ecosystems and receiving environments</u>. The adoption of stormwater capture and retention and water sensitive design techniques will assist in managing the environmental effects of the ‘first flush’ of stormwater as well as peak flows and volumes.</p>
Onslow Residents Community Association	283.7	Energy Infrastructure and Transport / Three Waters / General THW	Amend	<p>Considers that the report on the readiness of the 3-waters infrastructure in our district for development (“Three Waters Assessment – Growth Catchments Mahi Table and Cost Estimates”, Wellington Water, March 2021) shows that it is either already low-pressure (water supply), under-capacity (waste water), or unknown (storm water), so does not support the development enabled by the Proposed District Plan.</p> <p>[Refer to original submission for full reason]</p>	Seeks that the state of the 3-waters infrastructure in Khandallah is considered a qualifying matter.
Tawa Community Board	294.7	Energy Infrastructure and Transport / Three Waters / General THW	Not specified	<p>Considers that the PDP should provide significant encouragement for new developments to include greywater reuse as a means to future-proof the city against water supply issues.</p> <p>Considers that given the time it will take to fix our water infrastructure and the likelihood of extreme weather leading to increased drought events.</p>	Seeks that the Proposed District Plan provides strong enough direction and encouragement to developers on this issue.
Wellington City Council Environmental Reference Group	FS112.2	Part 2 / Energy Infrastructure and Transport / Three Waters / General THW	Support	WCCERG agree that the PDP should provide significant encouragement for new developments to include greywater reuse where practical.	Allow

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Richard Murcott	322.14	Energy Infrastructure and Transport / Three Waters / General THW	Not specified	Considers that population intensification in Thorndon should be throttled back until 3 waters infrastructure investment has been committed. [Refer to original submission for full reason]	Seeks that population intensification in Thorndon be throttled back until infrastructure investment has been committed.
Thorndon Residents' Association Inc	FS69.48	Part 2 / Energy Infrastructure and Transport / Three Waters / General THW	Support	[Refer to Full Submission for reasons and examples of residential character of the Hobson precinct of Thorndon].	Allow
The Sustainability Society	339.2	Energy Infrastructure and Transport / Three Waters / General THW	Amend	Considers that the Three Water chapter should be clarified to avoid confusion and ensure robust retention of stormwater can be achieved when mentioning peak runoff flowrates and overall stormwater volumes.	Amend the 'Three Waters' chapter Introduction as follows: ... "To address this, all new subdivision and development will need to demonstrate that the discharge quantity (<u>volume</u>), and flow rate of associated stormwater runoff generated is no greater than the <u>pre developed volume and</u> peak runoff <u>flowrate and volumes</u> discharged from the site in an undeveloped state." ...
Wellington City Council Environmental Reference Group	FS112.3	Part 2 / Energy Infrastructure and Transport / Three Waters / General THW	Support	Support the addition / clarification suggested, and making clear what should be achieved/measured.	Allow
Restaurant Brands Limited	349.8	Energy Infrastructure and Transport / Three Waters / General THW	Support	Support	Retain THW – Te Tūāhanga o Ngā Wai e Toru - Three Waters as notified.
Greater Wellington Regional Council	351.71	Energy Infrastructure and Transport / Three Waters / General THW	Support	Supports the direction of the three waters chapter to protect and enhance the health and well-being of freshwater bodies, and recognise this is an important step for WCC to give effect to the NPS-FM, the Te Whanganui-a-Tara Whaitua Implementation Programme, Te Mahere Wai, Te Awarua-o-Porirua Whaitua and the Ngāti Toa statement. We recognise the significant work undertaken between the draft District Plan and notification to incorporate water sensitive urban design provisions. This is an important aspect of having regard to Policy FW.3 in the Proposed RPS Change 1	Retain the Three Waters chapter as notified.
Greater Wellington Regional Council	351.72	Energy Infrastructure and Transport / Three Waters / General THW	Amend	Considers that the proposed RPS Change 1 contains a new definition for hydrological controls which set out the requirements for managing stormwater run-off flows or volumes in relation to a site's undeveloped state, and this is referenced in Policies FW.3 and 42. The proposed hydraulic neutrality provisions should have regard to this approach.	Seeks to amend the PDP hydraulic neutrality provisions to have regard to Proposed RPS Change 1 in relation to hydrological controls and how they have been defined.
Wellington City Council Environmental Reference Group	FS112.4	Part 2 / Energy Infrastructure and Transport / Three Waters / General THW	Support	Support the proposal from GWRC that hydraulic neutrality provisions have regard to proposed RPS Change 1. It is important there is consistency between city and region.	Allow
Greater Wellington Regional Council	351.73	Energy Infrastructure and Transport / Three Waters / General THW	Amend	Considers it would also make more sense to have permeable surface provisions in the Three Waters chapter.	Seeks for Wellington City Council to consider whether permeable surface requirements could be included in this chapter.
Greater Wellington Regional Council	351.74	Energy Infrastructure and Transport / Three Waters / General THW	Amend	Considers that for permeable surfaces is currently only in the residential zones where the MDRS apply, and therefore does not apply to properties where there are more than four units.	Seeks for WCC to consider whether permeable surface requirements for more than four units could be included in this chapter.
Wellington City Council Environmental Reference Group	FS112.5	Part 2 / Energy Infrastructure and Transport / Three Waters / General THW	Support	Support the proposal from GWRC that permeable surface provisions should apply to more than just residential zones where MRDS applies. Agree permeable surface provisions should apply to properties where there are more than four units.	Allow
Greater Wellington Regional Council	351.75	Energy Infrastructure and Transport / Three Waters / General THW	Amend	Considers the three waters infrastructure standards in the subdivision chapter to have discrepancies from the standards in the Three Water chapter	Seeks to ensure that the Three Waters rules and standards fully align with the rules and standards in the Subdivision chapter.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Jane Szentivanyi and Ben Briggs	369.9	Energy Infrastructure and Transport / Three Waters / General THW	Amend	Considers that Wellington needs a robust storm water and sewerage regime. The city is facing a climate and ecological emergency illustrated by the weather events that have occurred over the last 12 or so months, causing natural hazards such as flooding and slips throughout the city and the resulting contaminated overflow impacting properties and the harbour. These events elevate the need for a robust storm water and sewerage regime.	Seeks that provisions be made in the District Plan to provide a robust storm water and sewerage regime. [Inferred decision requested]
Jane Szentivanyi and Ben Briggs	369.10	Energy Infrastructure and Transport / Three Waters / General THW	Not specified	Considers that substantial amounts of water have been leaking from the water system. 16 leaks have been notified, by the submitter, to the Council since the 8 March 2022 in various locations in Mt Victoria and the CBD. In some instances those leaks have comprised substantial amounts of water leaking from the water system.	Not specified.
Taranaki Whānui ki te Upoko o te Ika	389.53	Energy Infrastructure and Transport / Three Waters / General THW	Support in part	Support the direction of this chapter.	Support introduction direction, seeks amendment.
Taranaki Whānui ki te Upoko o te Ika	389.54	Energy Infrastructure and Transport / Three Waters / General THW	Amend	Amend to include role of Taranaki Whānui.	Seeks amendment to mention role of Taranaki Whānui transitioning to Entity C and Three Waters reform within introduction.
Kāinga Ora Homes and Communities	391.92	Energy Infrastructure and Transport / Three Waters / General THW	Support in part	The Three Waters chapter is generally supported, but references to Natural Hazard Overlays should be replaced with Natural Hazard Area.	Retain the Three Waters chapter with amendment.
Greater Wellington Regional Council	FS84.56	Part 2 / Energy Infrastructure and Transport / Three Waters / General THW	Oppose	Greater Wellington disagree with the submitter that the flood hazard maps should be removed from the Proposed District Plan and instead be held in a nonstatutory GIS.	Disallow / Seeks that all flood hazard maps are included in the Proposed District Plan
Kāinga Ora Homes and Communities	391.93	Energy Infrastructure and Transport / Three Waters / General THW	Amend	Considers that the Three Waters chapter should be amended so that references to 'Natural Hazard Overlays' are replaced with 'Natural Hazard area'.	Amend the Three Waters chapter as follows: ... Other relevant District Plan Provisions ... - Natural Hazards - the Natural Hazards chapter addresses subdivision, use and development in the Natural Hazard Overlays areas .
Toka Tū Ake EQC	FS70.50	Part 2 / Energy Infrastructure and Transport / Three Waters / General THW	Oppose	MfE discussion paper on National Planning Standards: Zones and Overlays supports the use of the term 'overlay' to mean mapped areas which "introduce more restrictive built form controls than apply to the underlying zone". As this is the purpose of the WCC proposed plan's Natural Hazard Overlays, the term should be retained. Regulatory natural hazard overlays, including for flood, are an important tool to limit subdivision and development within areas subject to natural hazard risk.	Disallow
Survey & Spatial New Zealand Wellington Branch	439.8	Energy Infrastructure and Transport / Three Waters / General THW	Amend	Considers the discussion in the Introduction about hydraulic neutrality is forcing developments (particularly multi-unit developments) to over-compensate for stormwater discharges, and existing capacity constraints in Council infrastructure are reduced in favour of smaller developments. Considers that Council should instead focus on levying development contributions to fund additional infrastructure capacity to accommodate growth, with reference to the Financial Infrastructure Strategy 2021-2051.	Amend the Introduction to: The projected increase in urban development in the city will put additional pressure on the existing stormwater network due to increased runoff, with this likely to be further exacerbated by future climate change-induced flooding events. To address this, all new subdivision and development will need to demonstrate that the discharge quantity, and flow rate of associated stormwater runoff generated is no greater than the peak runoff and volumes discharged from the site in its current or undeveloped state . New development will also need to include water sensitive design methods, <u>where practical</u> , so that development contributes to promoting positive effects and avoids, remedies or mitigates adverse effects on the health and well-being of water. ... In response to these challenges, <u>Council has a significant role</u> , future growth and development in the city will be managed <u>via Council's programmed upgrades and also</u> through the District Plan to...

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Survey & Spatial New Zealand Wellington Branch	439.9	Energy Infrastructure and Transport / Three Waters / General THW	Amend	Notes that "Managing Stormwater Runoff" document is not listed in documents incorporated by reference.	Amend list of materials incorporated by reference to include "Managing Stormwater Runoff"
Peter Jack	450.2	Energy Infrastructure and Transport / Three Waters / General THW	Not specified	Considers that more catchment or reservoir storage be looked at for the future. With all this excessive water we are getting in the winter now rather than let it go, store it.	Not specified.
Te Rūnanga o Toa Rangatira	488.37	Energy Infrastructure and Transport / Three Waters / General THW	Support in part	Supports inclusion of Te Mana o Te Wai in the Three Waters chapter.	Retain reference to Te Mana o Te Wai in the Three Waters Chapter as notified.
Te Rūnanga o Toa Rangatira	488.38	Energy Infrastructure and Transport / Three Waters / General THW	Support	Considers that the Three Waters chapter is a big step forward in improving the quality of freshwater impacted by land use activities and giving effect to NPS-FM.	Retain the Three Waters chapter as notified, subject to amendments below.
Te Rūnanga o Toa Rangatira	488.39	Energy Infrastructure and Transport / Three Waters / General THW	Amend	Considers that it is unclear how financial contributions can be used when stormwater treatment is needed offsite and how this can be incorporated into a Stormwater Management Plan and how costs can be determined.	Seeks that the Three Waters chapter in amended to include financial contributions to be made for offsite stormwater treatment and management.
The Retirement Villages Association of New Zealand Incorporated	FS126.213	Part 2 / Energy Infrastructure and Transport / Three Waters / General THW	Oppose	While clarification is needed on the relief sought, The RVA opposes the relief on the basis that it has the potential to affect the consenting of retirement villages. The RVA opposes any rules relating to financial contributions that allow 'double-dipping' with Council's Development Contributions Policy, do not provide clarity as to contributions payable and that do not take into account retirement villages' substantially lower demand profile compared to standard residential developments.	Disallow
Ryman Healthcare Limited	FS128.213	Part 2 / Energy Infrastructure and Transport / Three Waters / General THW	Oppose	While clarification is needed on the relief sought, Ryman opposes the relief on the basis that it has the potential to affect the consenting of retirement villages. Ryman opposes any rules relating to financial contributions that allow 'double-dipping' with Council's Development Contributions Policy, do not provide clarity as to contributions payable and that do not take into account retirement villages' substantially lower demand profile compared to standard residential developments.	Disallow
Wellington City Council	266.59	Energy Infrastructure and Transport / Three Waters / New THW	Amend	Considers addition of new THW-P6 needed as this policy is more appropriately located in the THW chapter. This policy has been relocated from the MRZ and HRZ chapters (MRZ-P9 and HRZ-P9) and amended to include 'and improve water quality'.	Add a new Policy in the Three Waters chapter as follows: <u>THW-P6 Permeable surface</u> <u>Require development to provide a minimum level of permeable surface to assist with reducing the rate and amount of storm water run-off and improve water quality.</u>
Greater Wellington Regional Council	FS84.3	Part 2 / Energy Infrastructure and Transport / Three Waters / New THW	Support	Greater Wellington agree that the MRZ and HRZ policy and permeable surface rules are better suited to the Three Waters Chapter and support the amendments.	Allow
Greater Wellington Regional Council	FS84.4	Part 2 / Energy Infrastructure and Transport / Three Waters / New THW	Support	Greater Wellington agree that the MRZ and HRZ policy and permeable surface rules are better suited to the Three Waters Chapter and support the amendments.	Allow
Wellington City Council Environmental Reference Group	FS112.12	Part 2 / Energy Infrastructure and Transport / Three Waters / New THW	Support	Support the inclusion of a new permeable surface provision in this chapter, as suggested. Including moving rules to this chapter; and suggest the rules should include development where there are more than four units.	Allow
The Retirement Villages Association of New Zealand Incorporated	FS126.238	Part 2 / Energy Infrastructure and Transport / Three Waters / New THW	Oppose	The RVA oppose the relief sought in this submission as it is inconsistent with The RVA's primary submission and the MDRS.	Disallow
Ryman Healthcare Limited	FS128.238	Part 2 / Energy Infrastructure and Transport / Three Waters / New THW	Oppose	Ryman oppose the relief sought in this submission as it is inconsistent with Ryman's primary submission and the MDRS.	Disallow

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Wellington City Council	266.60	Energy Infrastructure and Transport / Three Waters / New THW	Amend	Considers this new rule arises from the deletion of MRZ-S10 (Permeable surface area) and HRZ-S10 (Permeable surface area) which have been combined and relocated from the Three Waters Chapter. Given that permeable surfaces are not a building provision, but a three waters/infrastructure provision, it is more logical to locate this policy in the THW chapter.	<p>Add a new Rule in the Three Waters chapter as follows:</p> <p>Zones that this rule applies to: Medium Density and High-Density Residential Zones</p> <p><u>THW-R7 Permeable Surface 1-3 residential units</u></p> <p><u>1. Activity status: Permitted</u> <u>Where:</u> a. A minimum of 30% of the net site area is permeable surface.</p> <p><u>2. Activity status: Restricted Discretionary</u> <u>Where:</u> a. Compliance with the requirements of THW-R7.1.a cannot be achieved.</p> <p><u>Matters of discretion are:</u> <u>1. Any measures used to mitigate stormwater runoff;</u> <u>2. The capacity of, and effects on, the stormwater network; and</u> <u>3. The matters in THW-P6.</u></p>
Greater Wellington Regional Council	FS84.5	Part 2 / Energy Infrastructure and Transport / Three Waters / New THW	Support	Greater Wellington agree that the MRZ and HRZ policy and permeable surface rules are better suited to the Three Waters Chapter and support the amendments.	Allow
Wellington City Council Environmental Reference Group	FS112.13	Part 2 / Energy Infrastructure and Transport / Three Waters / New THW	Support	Support the inclusion of a new permeable surface provision in this chapter, as suggested. Including moving rules to this chapter; and suggest the rules should include development where there are more than four units.	Allow
The Retirement Villages Association of New Zealand Incorporated	FS126.239	Part 2 / Energy Infrastructure and Transport / Three Waters / New THW	Oppose	The RVA oppose the relief sought in this submission as it is inconsistent with The RVA's primary submission and the MDRS.	Disallow
Ryman Healthcare Limited	FS128.239	Part 2 / Energy Infrastructure and Transport / Three Waters / New THW	Oppose	Ryman oppose the relief sought in this submission as it is inconsistent with Ryman's primary submission and the MDRS.	Disallow
Wellington City Council	266.61	Energy Infrastructure and Transport / Three Waters / New THW	Amend	Considers this new rule arises from the deletion of LLRZ-S9 (Permeable surface area) that has been relocated from the Three Waters Chapter. Given that permeable surfaces are not a building provision, but a three waters/infrastructure provision, it is more logical to locate this policy in the THW chapter.	<p>Add a new Rule in the Three Waters chapter as follows:</p> <p>Zones that this rule applies to: Large Lot Residential Zone</p> <p><u>THW-R8 Large Lot Residential Zone</u></p> <p><u>1. Activity status: Permitted Where:</u> a. A minimum of 60% of the net site area is permeable surface.</p> <p><u>2. Activity status: Restricted Discretionary Where:</u> a. Compliance with the requirements of THW-R8.1.a cannot be achieved.</p> <p><u>Matters of discretion are:</u> a. Any measures used to mitigate stormwater runoff; b. The capacity of, and effects on, the stormwater network; and c. The matters in THW-P6.</p>

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Greater Wellington Regional Council	FS84.6	Part 2 / Energy Infrastructure and Transport / Three Waters / New THW	Support	Greater Wellington agree that the MRZ and HRZ policy and permeable surface rules are better suited to the Three Waters Chapter and support the amendments.	Allow
Wellington City Council Environmental Reference Group	FS112.14	Part 2 / Energy Infrastructure and Transport / Three Waters / New THW	Support	Support the inclusion of a new permeable surface provision in this chapter, as suggested. Including moving rules to this chapter; and suggest the rules should include development where there are more than four units.	Allow
The Retirement Villages Association of New Zealand Incorporated	FS126.240	Part 2 / Energy Infrastructure and Transport / Three Waters / New THW	Oppose	The RVA oppose the relief sought in this submission as it is inconsistent with The RVA's primary submission and the MDRS.	Disallow
Ryman Healthcare Limited	FS128.240	Part 2 / Energy Infrastructure and Transport / Three Waters / New THW	Oppose	Ryman oppose the relief sought in this submission as it is inconsistent with Ryman's primary submission and the MDRS.	Disallow
The Sustainability Society	339.3	Energy Infrastructure and Transport / Three Waters / New THW	Amend	Considers that the Three Water chapter should have a rule requiring a retention depth metric for future development at all scales. Retention of stormwater to manage stormwater volumes to avoid flashy rainfall runoff requires an initial depth of rainfall to be captured and not allowed to discharge as stormwater. where soils allow, this can be via infiltration but in Wellington is likely to require rainwater harvest and reuse to reduce volume which is fundamental to mimic natural losses from vegetation and undeveloped soils. In other jurisdictions this retention depth generally varies from 5 - 10 mm.	Add a rule in the 'Three Waters' chapter requiring a retention depth for future developments of all scales.
The Sustainability Society	339.4	Energy Infrastructure and Transport / Three Waters / New THW	Amend	Considers that new rules relating to how future development will manage stormwater for contaminants and changed frequent flow hydrology are needed. At present GWRC is looking to have limits for water quality but WCC should be mandating means of meeting these limits through clear and enforceable rules. Without these rules there will be limited ability for WCC, WWL or future Entity C to ensure that development does not persist to degrade freshwater and coastal ecosystems and not uphold the intent of Te Mana o Te Wai and aspirations of mana whenua groups as expressed through the Whaitua process.	Seeks to add new rules in the 'Three Waters' chapter mandating water quality management and limits for future development.
Greater Wellington Regional Council	351.76	Energy Infrastructure and Transport / Three Waters / New THW	Amend	Considers it appropriate to give effect to Section 77E(2) of the RMA and have regard to Proposed RPS Change 1 (Policy FW.4).	Seeks a new policy regarding financial contributions to be paid where stormwater treatment and management is provided offsite under a Stormwater Management Plan.
The Retirement Villages Association of New Zealand Incorporated	FS126.56	Part 2 / Energy Infrastructure and Transport / Three Waters / New THW	Oppose	The RVA opposes the relief sought in this submission point, as it has the potential to affect the consenting of retirement villages. The RVA opposes any rules relating to financial contributions that allow 'double-dipping' with Council's Development Contributions Policy, do not provide clarity as to contributions payable and that do not take into account retirement villages' substantially lower demand profile compared to standard residential developments.	Disallow / Disallow submission point, or amend the relief sought to ensure a clear and proportionate financial contributions regime that prevents double dipping, provides clarity as to contributions payable, and provides a retirement-village specific regime that takes into account retirement villages' substantially lower demand profile compared to standard residential developments.
Ryman Healthcare Limited	FS128.56	Part 2 / Energy Infrastructure and Transport / Three Waters / New THW	Oppose	Ryman opposes the relief sought in this submission point, as it has the potential to affect the consenting of retirement villages. Ryman opposes any rules relating to financial contributions that allow 'double-dipping' with Council's Development Contributions Policy, do not provide clarity as to contributions payable and that do not take into account retirement villages' substantially lower demand profile compared to standard residential developments.	Disallow / Disallow submission point, or amend the relief sought to ensure a clear and proportionate financial contributions regime that prevents double dipping, provides clarity as to contributions payable, and provides a retirement-village specific regime that takes into account retirement villages' substantially lower demand profile compared to standard residential developments.
Greater Wellington Regional Council	351.77	Energy Infrastructure and Transport / Three Waters / New THW	Amend	Considers it appropriate to give effect to Section 77E(2) of the RMA and have regard to Proposed RPS Change 1 (Policy FW.4).	Seeks to Add permitted, controlled or restricted discretionary activity rules with an associated permitted standard, matter of control or matter of discretion (if necessary) that requires payment of the financial contribution (where not already collected as development contribution) (separate or part of subdivision rule conditions).
The Retirement Villages Association of New Zealand Incorporated	FS126.57	Part 2 / Energy Infrastructure and Transport / Three Waters / New THW	Oppose	The RVA opposes the relief sought in this submission point, as it has the potential to affect the consenting of retirement villages. The RVA opposes any rules relating to financial contributions that allow 'double-dipping' with Council's Development Contributions Policy, do not provide clarity as to contributions payable and that do not take into account retirement villages' substantially lower demand profile compared to standard residential developments.	Disallow / Disallow submission point, or amend the relief sought to ensure a clear and proportionate financial contributions regime that prevents double dipping, provides clarity as to contributions payable, and provides a retirement-village specific regime that takes into account retirement villages' substantially lower demand profile compared to standard residential developments.

Ryman Healthcare Limited	FS128.57	Part 2 / Energy Infrastructure and Transport / Three Waters / New THW	Oppose	Ryman opposes the relief sought in this submission point, as it has the potential to affect the consenting of retirement villages. Ryman opposes any rules relating to financial contributions that allow 'double-dipping' with Council's Development Contributions Policy, do not provide clarity as to contributions payable and that do not take into account retirement villages' substantially lower demand profile compared to standard residential developments.	Disallow / Disallow submission point, or amend the relief sought to ensure a clear and proportionate financial contributions regime that prevents double dipping, provides clarity as to contributions payable, and provides a retirement-village specific regime that takes into account retirement villages' substantially lower demand profile compared to standard residential developments.
Greater Wellington Regional Council	351.78	Energy Infrastructure and Transport / Three Waters / New THW	Amend	Considers it appropriate to give effect to Section 77E(2) of the RMA and have regard to Proposed RPS Change 1 (Policy FW.4).	Seeks to include discretionary, non-complying or prohibited activity rule where any required financial contribution is not paid.
The Retirement Villages Association of New Zealand Incorporated	FS126.58	Part 2 / Energy Infrastructure and Transport / Three Waters / New THW	Oppose	The RVA opposes the relief sought in this submission point, as it has the potential to affect the consenting of retirement villages. The RVA opposes any rules relating to financial contributions that allow 'double-dipping' with Council's Development Contributions Policy, do not provide clarity as to contributions payable and that do not take into account retirement villages' substantially lower demand profile compared to standard residential developments.	Disallow / Disallow submission point, or amend the relief sought to ensure a clear and proportionate financial contributions regime that prevents double dipping, provides clarity as to contributions payable, and provides a retirement-village specific regime that takes into account retirement villages' substantially lower demand profile compared to standard residential developments.
Ryman Healthcare Limited	FS128.58	Part 2 / Energy Infrastructure and Transport / Three Waters / New THW	Oppose	Ryman opposes the relief sought in this submission point, as it has the potential to affect the consenting of retirement villages. Ryman opposes any rules relating to financial contributions that allow 'double-dipping' with Council's Development Contributions Policy, do not provide clarity as to contributions payable and that do not take into account retirement villages' substantially lower demand profile compared to standard residential developments.	Disallow / Disallow submission point, or amend the relief sought to ensure a clear and proportionate financial contributions regime that prevents double dipping, provides clarity as to contributions payable, and provides a retirement-village specific regime that takes into account retirement villages' substantially lower demand profile compared to standard residential developments.
Greater Wellington Regional Council	351.79	Energy Infrastructure and Transport / Three Waters / New THW	Amend	Considers it appropriate to give effect to Section 77E(2) of the RMA and have regard to Proposed RPS Change 1 (Policy FW.4).	Seeks to add a method for determining the costs of the contribution may need to be a schedule or appendix.
The Retirement Villages Association of New Zealand Incorporated	FS126.59	Part 2 / Energy Infrastructure and Transport / Three Waters / New THW	Oppose	The RVA opposes the relief sought in this submission point, as it has the potential to affect the consenting of retirement villages. The RVA opposes any rules relating to financial contributions that allow 'double-dipping' with Council's Development Contributions Policy, do not provide clarity as to contributions payable and that do not take into account retirement villages' substantially lower demand profile compared to standard residential developments.	Disallow / Disallow submission point, or amend the relief sought to ensure a clear and proportionate financial contributions regime that prevents double dipping, provides clarity as to contributions payable, and provides a retirement-village specific regime that takes into account retirement villages' substantially lower demand profile compared to standard residential developments.
Ryman Healthcare Limited	FS128.59	Part 2 / Energy Infrastructure and Transport / Three Waters / New THW	Oppose	Ryman opposes the relief sought in this submission point, as it has the potential to affect the consenting of retirement villages. Ryman opposes any rules relating to financial contributions that allow 'double-dipping' with Council's Development Contributions Policy, do not provide clarity as to contributions payable and that do not take into account retirement villages' substantially lower demand profile compared to standard residential developments.	Disallow / Disallow submission point, or amend the relief sought to ensure a clear and proportionate financial contributions regime that prevents double dipping, provides clarity as to contributions payable, and provides a retirement-village specific regime that takes into account retirement villages' substantially lower demand profile compared to standard residential developments.
Greater Wellington Regional Council	351.80	Energy Infrastructure and Transport / Three Waters / New THW	Support in part	Supports the policy direction provided in the Three Waters chapter regarding development occurring where there is sufficient infrastructure to serve the demand.	Retain provision, subject to amendments, as outlined other submission points.
Greater Wellington Regional Council	351.81	Energy Infrastructure and Transport / Three Waters / New THW	Amend	Considers the current policies do not include consideration of how climate change may influence existing water supplies and existing demand for water.	Seeks to Add a new policy to require new development to ensure adequate available water supply including consideration of how climate change may affect existing supplies and the need to develop further water supply sources as a result.
Greater Wellington Regional Council	351.82	Energy Infrastructure and Transport / Three Waters / New THW	Amend	Considers the proposed RPS Change 1 (Policy FW.2) requires district plans to include policies, rules or method to reduce the demand for water, including where practicable improving the efficiency of the end use of water.	Seeks a new policy to encourage water use efficiency and for development design to manage water demand
Tyers Stream Group	221.9	Energy Infrastructure and Transport / Three Waters / THW-O1	Support	Supports THW-O1.	Retain THW-O1 (Protecting water bodies and freshwater ecosystems) as notified.
Claire Nolan, James Fraser, Biddy Bunzl, Margaret Franken, Michelle Wolland, and Lee Muir	275.9	Energy Infrastructure and Transport / Three Waters / THW-O1	Support	Supports THW-O1 (Protecting water bodies and freshwater ecosystems).	Retain THW-O1 (Protecting water bodies and freshwater ecosystems) as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Heidi Snelson, Aman Hunt, Chia Hunt, Ela Hunt	276.6	Energy Infrastructure and Transport / Three Waters / THW-01	Not specified	<p>Considers "Well functioning urban environment" does not apply to THW-01 because it does not comply with points d, f & g in the definition of "Well functioning urban environment" within the PDP.</p> <p>There is no link road from the development site to Churton Park, Glenside or Tawa has been planned.</p> <p>Development area is an isolated area on steep, hilly terrain.</p> <p>The access road from Westchester Drive is flood prone.</p> <p>West Glenside at 395 Middleton Road will not be Climate Change Sustainable and Natural Hazard Resilient.</p> <p>[Refer to original submission for full reason]</p>	Not specified.
WCC Environmental Reference Group	377.25	Energy Infrastructure and Transport / Three Waters / THW-01	Support	Support this objective as written. Protecting water bodies and freshwater ecosystems from the negative effects of development, and where possible ensuring subdivision contributes to overall improvement is very positive. This objective gives effect to clause 3.5 of NPS-FM 2020, particularly subclause (c) requiring local authorities to manage land use and development in an integrated and sustainable way to avoid, remedy or mitigate adverse effects of water bodies.	Retain THW-01 (Protecting water bodies and freshwater ecosystems) as notified.
Tyers Stream Group	221.10	Energy Infrastructure and Transport / Three Waters / THW-02	Support	Supports THW-02.	Retain THW-02 (Infrastructure-enabled urban development) as notified.
Tyers Stream Group	221.11	Energy Infrastructure and Transport / Three Waters / THW-02	Amend	[No specific reason given beyond decision requested - refer to original submission]	Seeks amendment to THW-02 (Infrastructure-enabled urban development) to require that sufficient capacity be in place before and subdivision, use or development takes place.
Fire and Emergency New Zealand	273.21	Energy Infrastructure and Transport / Three Waters / THW-02	Support	Support the objective as it seeks to enable development in urban areas of the city where there is sufficient or planned Three Waters infrastructure capacity or, where this is not possible, development can be satisfactorily serviced by other means.	Retain THW-02 (Infrastructure-enabled urban development) as notified.
Heidi Snelson, Aman Hunt, Chia Hunt, Ela Hunt	276.7	Energy Infrastructure and Transport / Three Waters / THW-02	Not specified	<p>Considers that "Well functioning urban environment" does not apply to THW-02 because it does not comply with points d, f & g in the definition of "Well functioning urban environment" within the PDP.</p> <p>There is no link road from the development site to Churton Park, Glenside or Tawa has been planned.</p> <p>Development area is an isolated area on steep, hilly terrain.</p> <p>The access road from Westchester Drive is flood prone.</p> <p>West Glenside at 395 Middleton Road will not be Climate Change Sustainable and Natural Hazard Resilient.</p> <p>[Refer to original submission for full reason]</p>	Not specified.
Retirement Villages Association of New Zealand Incorporated	350.27	Energy Infrastructure and Transport / Three Waters / THW-02	Support	Supports provision for development where there is sufficient existing or planned infrastructure capacity or alternative servicing is available [Note, the submitter incorrectly references THW-02].	Retain THW-02 (Infrastructure-enabled urban development) as notified.
WCC Environmental Reference Group	377.26	Energy Infrastructure and Transport / Three Waters / THW-02	Support	Supportive of development occurring in places where three waters are already in place.	Retain THW-02 (Infrastructure-enabled urban development) as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Kāinga Ora Homes and Communities	391.94	Energy Infrastructure and Transport / Three Waters / THW-02	Support	Objective THW-02 is generally supported, particularly as it recognises alternative means of servicing development where existing infrastructure is at capacity.	Retain Objective THW-02 (Infrastructure-enabled urban development) as notified.
Survey & Spatial New Zealand Wellington Branch	439.10	Energy Infrastructure and Transport / Three Waters / THW-02	Amend	Considers the objective should also refer to Council's ability to fund infrastructure via development contributions.	Amend THW-02 (Infrastructure enabled urban development) to: Enable subdivision, use or development in urban areas where: 1. Sufficient existing or planned three waters infrastructure capacity and/or level of service is, or will be, available to service the use or development; or 2. <u>Development contributions are levied for infrastructure upgrades; or</u> 3. It can be satisfactorily serviced through an alternative means where existing three waters infrastructure capacity and/or level of service is insufficient.
Trelissick Park Group	168.4	Energy Infrastructure and Transport / Three Waters / THW-03	Support	Supports that THW-03 (Hydraulic Neutrality) covers stormwater hydraulic neutrality and water sensitive design.	Retain THW-03 (Hydraulic Neutrality) as notified.
Tyers Stream Group	221.12	Energy Infrastructure and Transport / Three Waters / THW-03	Support	Supports THW-03.	Retain THW-03 (Hydraulic neutrality) as notified.
Stratum Management Limited	249.1	Energy Infrastructure and Transport / Three Waters / THW-03	Oppose	Considers that the objective seeks that there is no increase in offsite stormwater peak flows and volumes as a result of new development. While this approach seeks to capture existing practice, particularly in respect of residential development where there are stormwater constraints, its universal applicability, and applicability to the City Centre zone is opposed. Policy THW-P5 supports this objective and is discussed below.	Amend THW-03 (Hydraulic neutrality) to support stormwater attenuation where there are infrastructure constraints.
Stratum Management Limited	249.2	Energy Infrastructure and Transport / Three Waters / THW-03	Oppose	Considers that the objective seeks that there is no increase in offsite stormwater peak flows and volumes as a result of new development. While this approach seeks to capture existing practice, particularly in respect of residential development where there are stormwater constraints, its universal applicability, and applicability to the City Centre zone is opposed. Policy THW-P5 supports this objective and is discussed below.	Amend THW-03 (Hydraulic neutrality) to remove its applicability to the City Centre zone.
Stratum Management Limited	249.3	Energy Infrastructure and Transport / Three Waters / THW-03	Oppose	Considers that the objective seeks that there is no increase in offsite stormwater peak flows and volumes as a result of new development. While this approach seeks to capture existing practice, particularly in respect of residential development where there are stormwater constraints, its universal applicability, and applicability to the City Centre zone is opposed. Policy THW-P5 supports this objective and is discussed below.	Amend THW-03 (Hydraulic neutrality) in line with the relief sought to Policy THW-P5.
Heidi Snelson, Aman Hunt, Chia Hunt, Ela Hunt	276.8	Energy Infrastructure and Transport / Three Waters / THW-03	Not specified	Considers that "Well functioning urban environment" does not apply to THW-03 because it does not comply with points d, f & g in the definition of "Well functioning urban environment" within the PDP. There is no link road from the development site to Churton Park, Glenside or Tawa has been planned. Development area is an isolated area on steep, hilly terrain. The access road from Westchester Drive is flood prone. West Glenside at 395 Middleton Road will not be Climate Change Sustainable and Natural Hazard Resilient. [Refer to original submission for full reason]	Not specified.
Retirement Villages Association of New Zealand Incorporated	350.28	Energy Infrastructure and Transport / Three Waters / THW-03	Oppose in part	Opposes requiring hydraulic neutrality in all cases including where there is sufficient capacity in the downstream system and/or the effects of increased water flows can be managed effectively.	Delete THW-03 (Hydraulic neutrality) in its entirety as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
WCC Environmental Reference Group	377.27	Energy Infrastructure and Transport / Three Waters / THW-O3	Amend	Supports hydraulic neutrality but considers that the inclusion of 'in urban areas' is limiting/restrictive. Notes that THW-P5 (Hydraulic Neutrality) does not restrict to urban areas. Notes that a large development in rural areas may therefore be exempt from the objective.	Amend THW-O3 (Hydraulic Neutrality) as follows: There is no increase in offsite stormwater peak flows and volumes as a result of subdivision, use and development in urban areas . Add a definition for 'urban areas' to the interpretation section of the Plan.
Kāinga Ora Homes and Communities	391.95	Energy Infrastructure and Transport / Three Waters / THW-O3	Support	Objective THW-O3 is generally supported.	Retain Objective THW-O3 (Hydraulic neutrality) as notified.
Survey & Spatial New Zealand Wellington Branch	439.11	Energy Infrastructure and Transport / Three Waters / THW-O3	Amend	Considers hydraulic neutrality should refer to the current disposition of a site.	Amend THW-O3 (Hydraulic neutrality) to: There is no increase in offsite stormwater peak flows and volumes <u>from current levels</u> as a result of subdivision, use and development in urban areas
Trelissick Park Group	168.5	Energy Infrastructure and Transport / Three Waters / THW-P1	Support	Supports that THW-P1 (Water sensitive design) covers stormwater hydraulic neutrality and water sensitive design.	Retain THW-P1 (Water sensitive design) as notified.
Tyers Stream Group	221.13	Energy Infrastructure and Transport / Three Waters / THW-P1	Support	Supports THW-P1.	Retain THW-P1 (Water sensitive design) as notified.
Stratum Management Limited	249.4	Energy Infrastructure and Transport / Three Waters / THW-P1	Oppose	Considers that the policy introduces a universal requirement for the incorporation of water sensitive design methods. This requirement will impose additional development costs and does not specify what level of sufficiency is to be achieved in addressing the policy.	Remove THW-P1 (Water sensitive design) or appropriately qualify the policy.
Wellington City Council	266.62	Energy Infrastructure and Transport / Three Waters / THW-P1	Amend	Considers change will integrate "first flush" measures into the policies in accordance with the adopted amendments by the Wellington City Council Planning and Environment Committee on 23 June 2022.	Amend THW-P1 (Water sensitive design) as follows: Water sensitive design methods are incorporated into new subdivision and development and they are designed, constructed and maintained to: 1. Improve the health and well-being of water bodies and freshwater ecosystems; 2. Avoid or mitigate off-site effects from surface water runoff; <u>3. Address effects of first flush;</u> 3. <u>4. Demonstrate best practice approach to the management of stormwater quality and quantity;</u> 4-5. <u>5. Reduce demand on water supplies; and</u> 5-6. <u>6. Reduce wastewater overflows.</u>
Greater Wellington Regional Council	FS84.7	Part 2 / Energy Infrastructure and Transport / Three Waters / THW-P1	Support	Greater Wellington agree that the MRZ and HRZ policy and permeable surface rules are better suited to the Three Waters Chapter and support the amendments. GW Support the submitters requested changes to THW-P1 as this would have better regard to proposed RPS change 1.	Allow
Heidi Snelson, Aman Hunt, Chia Hunt, Ela Hunt	276.9	Energy Infrastructure and Transport / Three Waters / THW-P1	Not specified	Considers that "Well functioning urban environment" does not apply to THW-P1 because it does not comply with points d, f & g in the definition of "Well functioning urban environment" within the PDP. There is no link road from the development site to Churton Park, Glenside or Tawa has been planned. Development area is an isolated area on steep, hilly terrain. The access road from Westchester Drive is flood prone. West Glenside at 395 Middleton Road will not be Climate Change Sustainable and Natural Hazard Resilient. [Refer to original submission for full reason]	Not specified.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Phillippa O'Connor	289.5	Energy Infrastructure and Transport / Three Waters / THW-P1	Amend	Considers that in many instances in urban environments typical water sensitive design methods (swales, raingardens and other space-intensive activities) will not be able to be accommodated while fulfilling the other design requirements of the Plan and as such this amendment seeks to avoid conflict between policies in this regard.	Amend THW-P1 (Water sensitive design) as follows: Water sensitive design methods are incorporated into promoted in new subdivision and development and they are designed, constructed and maintained to: 1. Improve the health and well-being of water bodies and freshwater ecosystems; 2. Avoid or mitigate off-site effects from surface water runoff; 3. Demonstrate best practice approach to the management of stormwater quality and quantity; 4. Reduce demand on water supplies; and 5. Reduce wastewater overflows.
Mt Victoria Residents' Association	342.20	Energy Infrastructure and Transport / Three Waters / THW-P1	Support	Supports Water Sensitive Urban Design as an essential feature of neighbourhoods to manage and improve stormwater quality and run-off. The WSUD car parking along Evans Bay Parade by Kilbirnie Park should be the standard for on-street car parking, with appropriate accessible crossing places. This will have the huge added advantage of slowing cars down near the kerb. Assurance should be provided that the water system will be robust enough to support the community throughout the life of the District Plan.	Retain THW-P1 (Water sensitive design) as notified.
Retirement Villages Association of New Zealand Incorporated	350.29	Energy Infrastructure and Transport / Three Waters / THW-P1	Oppose in part	Opposes aspects of this policy that are not linked to the effects of the particular development e.g. improving (as opposed to maintaining) the health and wellbeing of water bodies and freshwater ecosystems and reducing wastewater overflows which should not be the responsibility of new development, when existing issues have been caused by historic development.	Opposes THW-P1 (Water sensitive design) and seeks amendment.
Retirement Villages Association of New Zealand Incorporated	350.30	Energy Infrastructure and Transport / Three Waters / THW-P1	Amend	Opposes aspects of this policy that are not linked to the effects of the particular development e.g. improving (as opposed to maintaining) the health and wellbeing of water bodies and freshwater ecosystems and reducing wastewater overflows which should not be the responsibility of new development, when existing issues have been caused by historic development.	Seeks amendment to THW-P1 (Water sensitive design) to remove parts of the policy that are not linked to the effects of the particular development.
Greater Wellington Regional Council	351.83	Energy Infrastructure and Transport / Three Waters / THW-P1	Support in part	Supports the use of water sensitive design methods to achieve the matters listed in 1 to 5 of THW-P1.	Retain provision, subject to amendments, as outlined other submission points.
Greater Wellington Regional Council	351.84	Energy Infrastructure and Transport / Three Waters / THW-P1	Amend	Considers that to have regard to Policy FW.3 in Proposed RPS Change 1, this policy should go further to also achieve other amenity, recreational, climate, and cultural outcomes.	Amend THW-P1 (Water sensitive design) to include an additional sub-clause: 6. where feasible, provide for multiple uses including improving amenity, recreation, cultural, ecological and climate values.
Greater Wellington Regional Council	351.85	Energy Infrastructure and Transport / Three Waters / THW-P1	Amend	Considers that clause 5 of THW-P1 to, 'reduce wastewater overflows,' should specify the extent of reduction sought, as the outcome of this policy will be integral to achieving outcomes sought by Te Mahere Wai and Te Whanganui-a-Tara Whaitua Implementation Programme, as well as Proposed RPS Change 1 (Policy 42(r)) which seeks support for growth and consideration of different approaches to wastewater management to resolve overflows	Seeks for WCC to consider specifying the extent of reduction in wastewater overflows sought, including any necessary consequential amendments.
Woolworths New Zealand	359.23	Energy Infrastructure and Transport / Three Waters / THW-P1	Support	The incorporation of water sensitive design for all new developments is generally supported, but an amendment is sought. [Refer to original submission for full reason]	Retain THW-P1 (Water sensitive design) with amendment.
Woolworths New Zealand	359.24	Energy Infrastructure and Transport / Three Waters / THW-P1	Amend	Considers that the incorporation of water sensitive design for all new developments should be promoted rather than required in THW-P1. There are many instances in urban environments where typical water sensitive design methods (swales, raingardens and other space-intensive activities) will not be able to be accommodated while fulfilling the other design requirements of the Plan and as such this amendment seeks to avoid conflict between policies in this regard.	Amend THW-P1 (Water sensitive design) as follows: Water sensitive design methods are incorporated into promoted in new subdivision and development and they are designed, constructed and maintained to: 1. Improve the health and well-being of water bodies and freshwater ecosystems; 2. Avoid or mitigate off-site effects from surface water runoff; 3. Demonstrate best practice approach to the management of stormwater quality and quantity; 4. Reduce demand on water supplies; and 5. Reduce wastewater overflows.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
WCC Environmental Reference Group	377.28	Energy Infrastructure and Transport / Three Waters / THW-P1	Amend	Generally supportive but considers that point 5 is unclear in what it is trying to achieve. Unclear if it is trying to reduce wastewater overflows city wide or reduce wastewater overflows in comparison to the status quo. Considers that the wording of Point 5 should seek to avoid wastewater overflows. This would be in line with the objectives of the National Policy Statement for Freshwater Management 2020 (NPS-FM).	Amend Point 5 of THW-P1 (Water Sensitive Design) as follows: ... 5. <u>Reduce Avoid wastewater overflows wherever practicable.</u>
The Retirement Villages Association of New Zealand Incorporated	FS126.215	Part 2 / Energy Infrastructure and Transport / Three Waters / THW-P1	Oppose	The RVA oppose the relief sought in this submission as it is inconsistent with The RVA's primary submission.	Disallow
Ryman Healthcare Limited	FS128.215	Part 2 / Energy Infrastructure and Transport / Three Waters / THW-P1	Oppose	Ryman oppose the relief sought in this submission as it is inconsistent with Ryman's primary submission.	Disallow
Kāinga Ora Homes and Communities	391.96	Energy Infrastructure and Transport / Three Waters / THW-P1	Support	THW-P1 is generally supported.	Retain THW-P1 (Water sensitive design) as notified.
Survey & Spatial New Zealand Wellington Branch	439.12	Energy Infrastructure and Transport / Three Waters / THW-P1	Amend	Considers that as the definition of "water sensitive urban design" is concerned with managing stormwater at its source, it cannot be used to seek reductions in wastewater overflows in Council sewage networks.	Amend THW-P1 (Water sensitive design) to: Water sensitive design methods are incorporated into new subdivision and development and they are designed, constructed and maintained to: 1. Improve the health and well-being of water bodies and freshwater ecosystems; 2. Avoid or mitigate off-site effects from surface water runoff; 3. Demonstrate best practice approach to the management of stormwater quality and quantity; <u>and</u> 4. Reduce demand on water supplies; <u>and</u> 5. Reduce wastewater overflows
Te Rūnanga o Toa Rangatira	488.40	Energy Infrastructure and Transport / Three Waters / THW-P1	Support in part	Supports the use of water sensitive urban design in the policy.	Retain THW-P1 (Water sensitive design) as notified subject to the amendments below.
Te Rūnanga o Toa Rangatira	488.41	Energy Infrastructure and Transport / Three Waters / THW-P1	Amend	Considers that THW-P1 needs strengthened to specify the reduction sought.	Amend THW-P1 (Water sensitive design) to: Water sensitive design methods are incorporated into new subdivision and development and they are designed, constructed and maintained to: 1. Improve the health and well-being of water bodies and freshwater ecosystems; 2. Avoid or mitigate off-site effects from surface water runoff; 3. Demonstrate best practice approach to the management of stormwater quality and quantity; 4. Reduce demand on water supplies; <u>and</u> 5. Reduce wastewater overflows <u>so that the objectives of Te Whanganui a Tara and Porirua Whaitua Implementation can be delivered.</u>
Te Rūnanga o Toa Rangatira	488.42	Energy Infrastructure and Transport / Three Waters / THW-P1	Amend	Considers that a new clause is needed in THW-P1 to acknowledge the role that water sensitive urban design has contribution to lower catchment outcomes.	Amend THW-P1 (Water sensitive design) to include a new clause that acknowledges the role of Water Sensitive Urban Design in Wellington City to contribute positively to the Porirua Harbour lower catchment outcomes.
Tyers Stream Group	221.14	Energy Infrastructure and Transport / Three Waters / THW-P2	Support	Supports THW-P2.	Retain THW-P2 (Building materials) as notified.
Rimu Architects Ltd	318.14	Energy Infrastructure and Transport / Three Waters / THW-P2	Amend	Considers that TW-P2 fails to acknowledge that where roof water is used as drinking water, the use of copper roofing and downpipes enhances its safety. While this will only matter where access to reticulated water is not guaranteed, the policy should acknowledge this.	Amend THW-P2 (Building materials) to acknowledge the use of copper roofing and downpipes enhances the safety of roof water when it is used as drinking water.
WCC Environmental Reference Group	377.29	Energy Infrastructure and Transport / Three Waters / THW-P2	Support	Supportive and the Policy gives effect to Policy 3 of the NPS-FM.	Retain THW-P2 (Building Materials) as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Kāinga Ora Homes and Communities	391.97	Energy Infrastructure and Transport / Three Waters / THW-P2	Support in part	THW-P2 is generally supported and an amendment is sought.	Retain THW-P2 (Building Materials) with amendment.
Kāinga Ora Homes and Communities	391.98	Energy Infrastructure and Transport / Three Waters / THW-P2	Amend	Considers that THW-P2 should be amended, as the use of avoid in the policy does not match the rule setting for non-compliance (restricted discretionary activity) and it may be appropriate to use these building materials in some instances where there are no impacts on the stormwater system.	Amend THW-P2 (Building Materials) as follows: The use of copper and zinc building materials is avoided or the effects of copper and zinc entering the stormwater system from the use as roofing and guttering materials are mitigated through the use of appropriate treatment.
Greater Wellington Regional Council	FS84.76	Part 2 / Energy Infrastructure and Transport / Three Waters / THW-P2	Oppose	Greater Wellington oppose the submitter's suggested amendment to THW-P2 as it weakens the policy approach to this matter. The wording as notified has better regard to Proposed RPS Change 1. The issue raised by the submitter in relation to the applicable rule status is not significant as the policy has two arms, the first being avoid and the second being to manage effects.	Disallow / Seeks that THW-P2 is retained as notified.
Tyers Stream Group	221.15	Energy Infrastructure and Transport / Three Waters / THW-P3	Support	Supports THW-P3.	Retain THW-P3 (Infrastructure-enabled urban development) with amendment.
Tyers Stream Group	221.16	Energy Infrastructure and Transport / Three Waters / THW-P3	Amend	Considers that this would fit with the requirements of THW-P4.	Seeks that THW-P3 (Infrastructure-enabled urban development) be amended to require that sufficient capacity be in place before and subdivision, use or development takes place.
Fire and Emergency New Zealand	273.22	Energy Infrastructure and Transport / Three Waters / THW-P3	Support	Supports the policy as it seeks to enable development in urban areas where there is sufficient existing or planned capacity to accommodate the development to meet growth demand in the short to medium term.	Retain THW-P3 (Infrastructure-enabled urban development) as notified.
Claire Nolan, James Fraser, Biddy Bunzl, Margaret Franken, Michelle Wolland, and Lee Muir	275.10	Energy Infrastructure and Transport / Three Waters / THW-P3	Support	Supports THW-P3 (Infrastructure-enabled urban development).	Retain THW-P3 (Infrastructure-enabled urban development) as notified.
Retirement Villages Association of New Zealand Incorporated	350.31	Energy Infrastructure and Transport / Three Waters / THW-P3	Support in part	Considers that these policies overlap creating interpretation issues. Supports provision for development where there is sufficient existing or planned infrastructure capacity or alternative servicing is available.	Retain THW-P3 (Infrastructure-enabled urban development) and seeks amendment.
Retirement Villages Association of New Zealand Incorporated	350.32	Energy Infrastructure and Transport / Three Waters / THW-P3	Amend	Considers that these policies overlap creating interpretation issues. Supports provision for development where there is sufficient existing or planned infrastructure capacity or alternative servicing is available.	Amend THW-P3 (Infrastructure-enabled urban development) to remove overlap within THW-P4 (Three waters infrastructure servicing) and ensure the policies provide for alternative servicing where there is not existing/planned capacity.
WCC Environmental Reference Group	377.30	Energy Infrastructure and Transport / Three Waters / THW-P3	Support	THW-P3 is supported for its intent of concentrating subdivision and development in areas where existing three waters infrastructure is in place. This aligns with the NPS-FM.	Retain THW-P3 (Infrastructure-enabled urban development) as notified.
Kāinga Ora Homes and Communities	391.99	Energy Infrastructure and Transport / Three Waters / THW-P3	Support	THW-P3 is generally supported.	Retain THW-P3 (Infrastructure-enabled urban development) as notified.
Survey & Spatial New Zealand Wellington Branch	439.13	Energy Infrastructure and Transport / Three Waters / THW-P3	Amend	Considers that enabling infrastructure should also refer to Council's ability to fund development via Development Contributions	Amend THW-P3 (Infrastructure enabled urban development) to: New subdivision, use or development is enabled in urban areas that have existing or planned three waters infrastructure capacity, <u>including via development contributions</u> , to meet growth demand in the short to medium term
Tyers Stream Group	221.17	Energy Infrastructure and Transport / Three Waters / THW-P4	Support	Supports THW-P4.	Retain THW-P4 (Three waters infrastructure servicing) as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Fire and Emergency New Zealand	273.23	Energy Infrastructure and Transport / Three Waters / THW-P4	Support in part	Supports the policy as it requires all new subdivision or development in urban areas to be serviced by Three Waters infrastructure which meets the Wellington Water Regional Standard for Water Services, which makes references to the FENZ Code of Practice, has sufficient capacity to accommodate the development and is in place prior to the commencement of construction. FENZ is concerned regarding the development of new building hydrant systems being considered an alternative option to the requirement of standard infrastructure hydrant systems in the reticulated area. FENZ notes these systems are not maintained or designed to the level of standard hydrant systems and wishes to add explanatory text highlighting to developers that building hydrant systems cannot be considered an alternative option for the purposes of this provision.	Supports THW-P4 (Three waters infrastructure servicing) with amendment.
Fire and Emergency New Zealand	273.24	Energy Infrastructure and Transport / Three Waters / THW-P4	Amend	Supports the policy as it requires all new subdivision or development in urban areas to be serviced by Three Waters infrastructure which meets the Wellington Water Regional Standard for Water Services, which makes references to the FENZ Code of Practice, has sufficient capacity to accommodate the development and is in place prior to the commencement of construction. FENZ is concerned regarding the development of new building hydrant systems being considered an alternative option to the requirement of standard infrastructure hydrant systems in the reticulated area. FENZ notes these systems are not maintained or designed to the level of standard hydrant systems and wishes to add explanatory text highlighting to developers that building hydrant systems cannot be considered an alternative option for the purposes of this provision.	Amend THW-P4 (Three waters infrastructure servicing) as follows: <u>Note: Building hydrant systems cannot be considered a replacement of standard infrastructure hydrant systems.</u>
Claire Nolan, James Fraser, Biddy Bunzl, Margaret Franken, Michelle Wolland, and Lee Muir	275.11	Energy Infrastructure and Transport / Three Waters / THW-P4	Support	Supports the policy THW-P4: Limit subdivision and development in urban areas where existing three waters capacity and/or level of service is insufficient to service further development.	Retain THW-P4 (Three Waters infrastructure servicing) as notified.
Heidi Snelson, Aman Hunt, Chia Hunt, Ela Hunt	276.10	Energy Infrastructure and Transport / Three Waters / THW-P4	Not specified	Considers that "Well functioning urban environment" does not apply to THW-P4 because it does not comply with points d, f & g in the definition of "Well functioning urban environment" within the PDP. There is no link road from the development site to Churton Park, Glenside or Tawa has been planned. Development area is an isolated area on steep, hilly terrain. The access road from Westchester Drive is flood prone. West Glenside at 395 Middleton Road will not be Climate Change Sustainable and Natural Hazard Resilient. [Refer to original submission for full reason]	Not specified.
Rimu Architects Ltd	318.15	Energy Infrastructure and Transport / Three Waters / THW-P4	Amend	Considers that TWH-P4 omits any mention of planned enhancements to bring the 3 waters infrastructure to a level that is adequate for Medium and High Density residential zones (e.g. by deferring some areas for 5 or 10 years until the required infrastructure is constructed) or even a programme of renewals to bring capacity up service permitted uses under the operative district plan.	Amend THW-P4 (Three waters infrastructure servicing) to add a statement on upgrading infrastructure to meet the level of service required to meet the requirements of permitted uses.
Retirement Villages Association of New Zealand Incorporated	350.33	Energy Infrastructure and Transport / Three Waters / THW-P4	Support in part	Considers that these policies overlap creating interpretation issues. Supports provision for development where there is sufficient existing or planned infrastructure capacity or alternative servicing is available.	Retain THW-P4 (Three waters infrastructure servicing) and seeks amendment to remove overlap within THW-P3 (Infrastructure-enabled urban development) and ensure the policies provide for alternative servicing where there is not existing/planned capacity.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Retirement Villages Association of New Zealand Incorporated	350.34	Energy Infrastructure and Transport / Three Waters / THW-P4	Amend	Considers that these policies overlap creating interpretation issues. Supports provision for development where there is sufficient existing or planned infrastructure capacity or alternative servicing is available.	Seeks amendment to THW-P4 (Three waters infrastructure servicing) to remove overlap within THW-P3 (Infrastructure-enabled urban development) and ensure the policies provide for alternative servicing where there is not existing/planned capacity.
Greater Wellington Regional Council	351.86	Energy Infrastructure and Transport / Three Waters / THW-P4	Support in part	Supports the need for sufficient infrastructure capacity prior to development, and this direction aligns with the Operative RPS.	Retain provision, subject to amendments, as outlined other submission points.
WCC Environmental Reference Group	377.31	Energy Infrastructure and Transport / Three Waters / THW-P4	Amend	THW-P4 is supported for its intent. Notes that the wording 'in urban areas' is not clear as to where the Policy applies and what is meant by urban areas. Concerned that the policy therefore will not apply outside of urban areas.	Amend THW-P4 (Three waters infrastructure servicing) as follows: Subdivision or development in urban areas is serviced by three waters infrastructure that: 1. Meets the Wellington Water Regional Standard for Water Services v3.0 December 2021; 2. Has sufficient capacity to accommodate the development; and 3. Is in position prior to the commencement of construction. Limit subdivision and development in urban areas where existing three waters capacity and/or level of service is insufficient to service further development unless: ...
Kāinga Ora Homes and Communities	391.100	Energy Infrastructure and Transport / Three Waters / THW-P4	Support in part	THW-P4 is generally supported, as it recognises and provides for alternative means servicing development where existing infrastructure is at capacity. An amendment is sought.	Retain THW-P4 (Three waters infrastructure servicing) with amendment.
Kāinga Ora Homes and Communities	391.101	Energy Infrastructure and Transport / Three Waters / THW-P4	Amend	Considers that THW-P4 should be amended, as it fails to recognise that development in urban areas may necessitate additional public investment in expansion of the three waters infrastructure. The appropriate response to this issue is to increase public investment where needed rather than to constrain otherwise appropriate development. The policy should recognise that development in urban areas may necessitate additional public investment in expansion of the three waters infrastructure.	Amend THW-P4 (Three waters infrastructure servicing) as follows: ... Limit <u>Provide for</u> subdivision and development in urban areas where existing three waters capacity and/or level of service is insufficient to service further development, including and: 1. It can be demonstrated there is an alternative solution to avoid or mitigate any adverse effects on the three waters infrastructure network and the health and wellbeing of water bodies and freshwater ecosystems; and or 2. <u>Additional public investment in three waters infrastructure is appropriate and possible to enable the planned urban built form of the underlying zone and achieve a compact urban form. The additional demand generated will not necessitate additional unplanned public investment in, or expansion of, the three waters infrastructure network or compromise its ability to service other activities permitted within the zone.</u>
Generation Zero	FS54.7	Part 2 / Energy Infrastructure and Transport / Three Waters / THW-P4	Support	Support proposed amendment to THW-04 to note that "increase public investment where needed rather than to constrain otherwise appropriate development" and further submit that: Poor infrastructure should not constrain development; Rather, it should be a signal for increased public investment; With appropriate cost recovery from new and existing users, infrastructure renewal and increasing of capacity should be cost neutral to water providers ; Historic underinvestment in infrastructure to keep rates artificially low should not be a reason to stop new development; More residential development can spread the high fixed cost of public infrastructure thus making its average cost more affordable for all.	Allow / Seeks that THW-04 is amended to note that "increase public investment where needed rather than constrain otherwise appropriate development".
Stride Investment Management Limited	FS107.40	Part 2 / Energy Infrastructure and Transport / Three Waters / THW-P4	Support	Stride supports recognising that intensification of existing urban areas provides benefits and it is appropriate to provide for additional public investment in three waters infrastructure to enable intensification.	Allow
Investore Property Limited	FS108.40	Part 2 / Energy Infrastructure and Transport / Three Waters / THW-P4	Support	Investore supports recognising that intensification of existing urban areas provides benefits and it is appropriate to provide for additional public investment in three waters infrastructure to enable intensification.	Allow

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Survey & Spatial New Zealand Wellington Branch	439.14	Energy Infrastructure and Transport / Three Waters / THW-P4	Amend	Considers this policy to be contrary to the NPS-UD Policy 2, as it seeks to limit development unless there is sufficient infrastructure capacity of an alternative solution. Considers this is contrary particularly in regard to Council's responsibility to ensure sufficient development capacity for the short term.	Amend THW-P4 (Three water infrastructure servicing) to: Subdivision or development in urban areas is serviced by three waters infrastructure that: 1. Meets the Wellington Water Regional Standard for Water Services v3.0 December 2021; 2. Has sufficient capacity to accommodate the development; and 3. Is in position prior to the commencement of construction. Limit For subdivision and development in urban areas where existing three waters capacity and/or level of service is insufficient to service further development unless ensure : 1. It can be demonstrated there is an alternative solution to avoid or mitigate any adverse effects on the three waters infrastructure network and the health and wellbeing of water bodies and freshwater ecosystems; and 2. The additional demand generated will not necessitate additional unplanned public investment in, or expansion of, the three waters infrastructure network or compromise its ability to service other activities permitted within the zone.
The Thorndon Society Inc	487.3	Energy Infrastructure and Transport / Three Waters / THW-P4	Amend	Considers that in THW-P4, "Limit subdivision and development in urban areas where existing three waters capacity and/or level of service is insufficient to service further development:" should be changed. If the greatest urban space for further housing is Karori then capacity should be changed there to enable the capacity to be realised.	Amend THW-P4 (Three waters infrastructure servicing) to replace " Limit subdivision and development in urban areas where existing three waters capacity and/or level of service is insufficient to service further development: " with " <u>Where existing three waters capacity and/or level of service is insufficient to service further development then look at means of increasing capacity to enable subdivision and development in urban areas.</u> "
Thorndon Residents' Association Inc	FS69.85	Part 2 / Energy Infrastructure and Transport / Three Waters / THW-P4	Support	Break down housing demand figures Infrastructure capacity insufficient – limit development Construction of buildings for business purposes should not be permitted in a residential area.	Allow
Historic Places Wellington Inc	FS111.76	Part 2 / Energy Infrastructure and Transport / Three Waters / THW-P4	Support	No specific reason provided.	Allow
Rod Halliday	25.19	Energy Infrastructure and Transport / Three Waters / THW-P5	Amend	Considers that THW-P5 does not recognise that there are some parts of the City that drain to the Stebbings Dam and Seton Nossiter Detention Structures which are intended to hold back/throttle flows from a modelled 100 year event. In Stebbings Valley this has been modelled as the RL92 and there are easements over private property to protect this ponding area and keep it free of buildings for the 100 year event. The GWRC designation W4 (Operative Plan) and WRC6 (Proposed Plan) also reflect this purpose for Stebbings and similar designations are in place in the operative (W2) and proposed plans (WRC2) for Seton Nossiter. Previous developments in these catchments, including Churton Park subdivisions over the last 5+ years, have had no requirement for stormwater neutrality.	Seeks that THW-P5 (Hydraulic neutrality) is amended to note that some areas of the City can achieve the intent of this policy due to the presence of the Stebbings Dam and Seton Nossiter Detention Structures.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Glenside Progressive Association (GPA)	FS4.1	Part 2 / Energy Infrastructure and Transport / Three Waters / THW-P5	Oppose	<p>Submitter states that Rule R5 requiring hydrological neutrality for any new housing development should not apply to the Upper Stebbings Valley or Seton Nossiter catchments because both these catchments are protected by detention dams. Submitter argues that previous developments in these catchments, including Churton Park subdivisions over the last 5+ years, have had no requirement for stormwater neutrality - however climate change is accelerating and what was required in the past must change to reduce future negative flood impacts.</p> <p>Serious flooding has occurred in the past from these catchments including some events after the detention dams were constructed. Stebbings detention dam was completed in 1994 and is designed to hold back water arising from a one on one-hundred-year flood event, a target that is now unlikely to be met due to the accelerating effects of climate change.</p> <p>Furthermore, Glenside West catchment is not in the Stebbings Dam or Seton Nossiter catchment and there is no downstream floodwater protection therefore Council should be taking additional measure to reduce the impact of earthworks and housing development on the Glenside West water catchment.</p>	<p>Disallow / Seeks:</p> <ul style="list-style-type: none"> - Acknowledgement by Council that the Government's Policy Statement on Urban Development does not apply to areas such as Glenside West. - That any development in Glenside West takes place with a minimum of earthworks and that natural gullies are not filled in. - That the grey unbuilt area in Glenside West is unsuitable land for housing and that the whole area shown in mustard/yellow (Fig 1) is limited to Large Lot Residential. - Roading and housing doesn't extend into gullies, ephemeral streams, intermittent and perennial streams and is kept away from the ridgetop. - Furthermore no housing is built above the current Glenside-Churton park suburb boundary in order that the ridgeline is offered at least some degree of visual protection. - Significant Natural Areas (SNAs) on this site must be preserved and not impacted by development, if any development is to take place
Heidi Snelson	FS24.5	Part 2 / Energy Infrastructure and Transport / Three Waters / THW-P5	Oppose	<p>Submitter is seeking to reduce mitigation requirements and responsibilities around hydraulic neutrality and permeable surface requirements in the case of storm water management at a unprecedented time of storm water damage in Wellington.</p> <p>Developments should undertake more mitigation not less in all areas given climate change. Especially those posing more risk, such as steep hillsides, abutting/above key infrastructure (roading, power, water, railway), and significant streams, such as at the sites of the current and planned developments in Churton Park and Glenside West.</p> <p>The Glenside West development area is downstream of both detention structures, on extremely steep hillsides, above Porirua Stream, directly above Middleton Road (State Highway 1 motorway detour route) and the North Island railway line (which runs alongside and over the Porirua Stream). This development area must be specifically required to achieve Hydraulic Neutrality. Be that through specific technological infrastructure in build design and water catchment, significant permeable surface requirements/planting. Through Large Lot Residential Only in Glenside West.</p>	<p>Disallow / Seeks that submission be disallowed to ensure strict adherence to hydraulic neutrality in Glenside West Development Area, and Stebbings Valley / Reedy Block Development Area. Seeks minimum standard of hydraulic neutrality required and corresponding requirement of high level of permeable surface mitigations.</p> <p>Seeks that Glenside West be designated Large Lot Residential only.</p>
Trelissick Park Group	168.6	Energy Infrastructure and Transport / Three Waters / THW-P5	Support	Supports that THW-P5 (Hydraulic neutrality) covers stormwater hydraulic neutrality and water sensitive design.	Retain THW-P5 (Hydraulic neutrality) as notified.
Tyers Stream Group	221.18	Energy Infrastructure and Transport / Three Waters / THW-P5	Support	Supports THW-P5.	Retain THW-P5 (Hydraulic neutrality) as notified.
Stratum Management Limited	249.5	Energy Infrastructure and Transport / Three Waters / THW-P5	Oppose	Considers that the policy states: "Require new subdivision and development to be designed, constructed and maintained to sustainably manage the volume and rate of discharge of stormwater to the receiving environment so that the rate of offsite stormwater discharge is reduced as far as practicable to be at or below the modelled peak flow and volume for each site in an undeveloped state." This approach ignores the existing environment and requires stormwater to be attenuated to account for a site in an undeveloped state. This brings with it additional costs in respect of the required modelling, increased costs in attaining the attenuation required, and represents a significant departure from existing practice.	Amend THW-P5 (Hydraulic neutrality) to apply in situations of insufficient infrastructure capacity.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Stratum Management Limited	249.6	Energy Infrastructure and Transport / Three Waters / THW-P5	Oppose	Considers that the policy states: "Require new subdivision and development to be designed, constructed and maintained to sustainably manage the volume and rate of discharge of stormwater to the receiving environment so that the rate of offsite stormwater discharge is reduced as far as practicable to be at or below the modelled peak flow and volume for each site in an undeveloped state." This approach ignores the existing environment and requires stormwater to be attenuated to account for a site in an undeveloped state. This brings with it additional costs in respect of the required modelling, increased costs in attaining the attenuation required, and represents a significant departure from existing practice.	Amend THW-P5 (Hydraulic neutrality) to continue to recognise the existing environment.
Stratum Management Limited	249.7	Energy Infrastructure and Transport / Three Waters / THW-P5	Oppose	Considers that the policy states: "Require new subdivision and development to be designed, constructed and maintained to sustainably manage the volume and rate of discharge of stormwater to the receiving environment so that the rate of offsite stormwater discharge is reduced as far as practicable to be at or below the modelled peak flow and volume for each site in an undeveloped state." This approach ignores the existing environment and requires stormwater to be attenuated to account for a site in an undeveloped state. This brings with it additional costs in respect of the required modelling, increased costs in attaining the attenuation required, and represents a significant departure from existing practice.	Amend THW-P5 (Hydraulic neutrality) to exclude the City Centre Zone.
Heidi Snelson, Aman Hunt, Chia Hunt, Ela Hunt	276.11	Energy Infrastructure and Transport / Three Waters / THW-P5	Not specified	Considers that "Well functioning urban environment" does not apply to THW-P5 because it does not comply with points d, f & g in the definition of "Well functioning urban environment" within the PDP. There is no link road from the development site to Churton Park, Glenside or Tawa has been planned. Development area is an isolated area on steep, hilly terrain. The access road from Westchester Drive is flood prone. West Glenside at 395 Middleton Road will not be Climate Change Sustainable and Natural Hazard Resilient. [Refer to original submission for full reason]	Not specified.
Phillippa O'Connor	289.6	Energy Infrastructure and Transport / Three Waters / THW-P5	Amend	Considers that 'undeveloped state' is too onerous. Identifies that the assessment criteria for THW-R6.2 uses pre-development as a reference point and considers this more appropriate.	Amend THW-P5 (Hydraulic neutrality) as follows: Require new subdivision and development to be designed, constructed and maintained to sustainably manage the volume and rate of discharge of stormwater to the receiving environment so that the rate of offsite stormwater discharge is reduced as far as practicable to be at or below the modelled peak flow and volume for each site in an undeveloped <u>pre-developed</u> state.
Retirement Villages Association of New Zealand Incorporated	350.35	Energy Infrastructure and Transport / Three Waters / THW-P5	Support in part	Supports the term "as far as practicable" in the policy, but considers that it remains unclear if hydraulic neutrality is required in all cases including where there is sufficient capacity in the downstream system and/or the effects of increased water flows can be managed effectively.	Retain THW-P5 (Hydraulic neutrality) and seeks amendment.
Retirement Villages Association of New Zealand Incorporated	350.36	Energy Infrastructure and Transport / Three Waters / THW-P5	Amend	Supports the term "as far as practicable" in the policy, but considers that it remains unclear if hydraulic neutrality is required in all cases including where there is sufficient capacity in the downstream system and/or the effects of increased water flows can be managed effectively.	Seeks amendment to THW-P5 (Hydraulic neutrality) so that hydraulic neutrality is not required (but encouraged) where there is sufficient capacity in the downstream system and/or the effects of increased water flows can be managed effectively.
Woolworths New Zealand	359.25	Energy Infrastructure and Transport / Three Waters / THW-P5	Amend	THW-P5 should be amended to remove reference to an 'undeveloped state' and replace with pre-developed state as the former is overly onerous. It is noted that the matters of discretion at Rule THW-R6.2 include an assessment against "the extent to which the development incorporates stormwater management techniques or controls to mitigate any increase in pre-development peak stormwater runoff" and as such it is considered that pre-development state is the appropriate baseline against which to assess effects in this regard.	Amend THW-P5 (Hydraulic neutrality) as follows: Require new subdivision and development to be designed, constructed and maintained to sustainably manage the volume and rate of discharge of stormwater to the receiving environment so that the rate of offsite stormwater discharge is reduced as far as practicable to be at or below the modelled peak flow and volume for each site in an undeveloped state <u>pre-developed state</u> .

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Stride Investment Management Limited	FS107.3	Part 2 / Energy Infrastructure and Transport / Three Waters / THW-P5	Support	Stride supports this submission point for the reasons provided by the primary submitter.	Allow
Investore Property Limited	FS108.3	Part 2 / Energy Infrastructure and Transport / Three Waters / THW-P5	Support	Investore supports this submission point for the reasons provided by the primary submitter.	Allow
WCC Environmental Reference Group	377.32	Energy Infrastructure and Transport / Three Waters / THW-P5	Support	THW-P5 is strongly supported. Considers hydraulic neutrality should be the baseline for all new development. Requiring this will help avoid increased risks from stormwater from new development as well as improving existing areas as they are developed. The Policy also gives effect to the NPS-FM.	Retain THW-P5 (Hydraulic Neutrality) as notified.
Michelle Rush	436.11	Energy Infrastructure and Transport / Three Waters / THW-P5	Support	THW-P5 is supported. Hydraulic neutrality should be the baseline for all new development of any scale. As urban areas densify, it is particularly important to require hydraulic neutrality to avoid increased stormwater risks from new development, as well as improve existing areas as they are re-developed. Finally, hydraulic neutrality will help contribute to keeping areas green and pleasant to be in, without excessive tracts of hard surfaces. This policy also supports the following sections of NPS-FM 2020: - Objective 2.1 (the Te Mana o Te Wai hierarchy) - Policy 3 - Policy 4 - Clause 3.5	Retain THW-P5 (Hydraulic neutrality) as notified.
Survey & Spatial New Zealand Wellington Branch	439.15	Energy Infrastructure and Transport / Three Waters / THW-P5	Amend	Considers hydraulic neutrality should refer to the current disposition of a site.	Amend THW-P5 (Hydraulic neutrality) to: Require new subdivision and development to be designed, constructed and maintained to sustainably manage the volume and rate of discharge of stormwater to the receiving environment so that the rate of offsite stormwater discharge is reduced as far as practicable to be at or below the modelled peak flow and volume for each site in <u>its current an undeveloped state</u> .
Trelissick Park Group	168.7	Energy Infrastructure and Transport / Three Waters / THW-R1	Support	Supports that THW-R1 (Connection to existing three waters infrastructure – new residential buildings) covers stormwater hydraulic neutrality and water sensitive design.	Retain THW-R1 (Connection to existing three waters infrastructure – new residential buildings) as notified, with amendments.
Trelissick Park Group	168.8	Energy Infrastructure and Transport / Three Waters / THW-R1	Amend	[No specific reason given beyond decision requested - refer to original submission].	Amend THW-R1.2 (Connection to existing three waters infrastructure – new residential buildings) as follows: 2. Activity status: Restricted Discretionary Where: a. Compliance with any of the requirements of THW-R1.1 for <u>Wastewater and Water supply</u> cannot be achieved. ...
Tyers Stream Group	221.19	Energy Infrastructure and Transport / Three Waters / THW-R1	Support in part	[No specific reason given beyond decision requested - refer to original submission]	Retain THW-R1 (Connection to existing three waters infrastructure – new residential buildings) with amendment.
Tyers Stream Group	221.20	Energy Infrastructure and Transport / Three Waters / THW-R1	Amend	[No specific reason given beyond decision requested - refer to original submission]	Seeks amendment to THW-R1 (Connecting to existing three waters infrastructure - new residential buildings) to include compliance with the current status of the 3 waters infrastructure to be a permitted activity as per THW-R2 (Connection to existing three waters infrastructure – four or more residential units and non-residential development).

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Fire and Emergency New Zealand	273.25	Energy Infrastructure and Transport / Three Waters / THW-R1	Support in part	Supports the rule as it permits new residential schemes, outside of the general rural and large lot residential zones, providing compliance is achieved with the level of service in Chapter 6, Tables 6.1 and 6.2 of the Wellington Water Regional Standard for Water Services v3.0 December 2021. While it is noted that the Wellington Water Regional Standard for Water Services includes references to the New Zealand Firefighting Water Supplies Code of Practice, FENZ considers it important for THW-R1 and THW-R2 to directly reference the Code of Practice to ensure firefighting water supply provisions are visible and enforceable through Three Waters Infrastructure provisions.	Support THW-R1 (Connection to existing three waters infrastructure – new residential buildings) with amendment.
Fire and Emergency New Zealand	273.26	Energy Infrastructure and Transport / Three Waters / THW-R1	Amend	Supports the rule as it permits new residential schemes, outside of the general rural and large lot residential zones, providing compliance is achieved with the level of service in Chapter 6, Tables 6.1 and 6.2 of the Wellington Water Regional Standard for Water Services v3.0 December 2021. While it is noted that the Wellington Water Regional Standard for Water Services includes references to the New Zealand Firefighting Water Supplies Code of Practice, FENZ considers it important for THW-R1 and THW-R2 to directly reference the Code of Practice to ensure firefighting water supply provisions are visible and enforceable through Three Waters Infrastructure provisions.	Amend THW-R1 (Connection to existing three waters infrastructure – new residential buildings) to include provision of a firefighting water supply in accordance with New Zealand Fire Service Firefighting Water Supplies Code of Practice SNA PAS 4509:2008 within the permitted activity standards and matters of discretion.
Claire Nolan, James Fraser, Biddy Bunzl, Margaret Franken, Michelle Wolland, and Lee Muir	275.12	Energy Infrastructure and Transport / Three Waters / THW-R1	Oppose	Considers that what is permissible needs more current analysis (given climate change pressures) and should be more localised.	Opposes THW-R1 (Connection to existing three waters infrastructure) and seeks amendment.
WCC Environmental Reference Group	377.33	Energy Infrastructure and Transport / Three Waters / THW-R1	Support	THW-R1 is supported as it operationalises the relevant objectives and policies.	Retain THW-R1 (connection to existing three waters infrastructure - new residential buildings) as notified.
Survey & Spatial New Zealand Wellington Branch	439.16	Energy Infrastructure and Transport / Three Waters / THW-R1	Amend	Considers that this rule makes the Regional Standard for Water Services 2021 a permitted activity standard. Therefore considers that the document (or specific relevant provisions) should be incorporated into the Proposed District Plan to allow submissions on the provisions, rather than being incorporated as a reference document. Considers that the consultation requirements of Schedule 1, Clause 34 of the RMA have therefore not been met. Considers that incorporating material by reference creates uncertainty for developers, as these documents can be amended by other entities (specifically Wellington Water) with no particular process. Notes that while there was some consultation, few issues were resolved. Notes that a District Plan change would be required to incorporate any new variations to the Regional Standard for Water Services 2021.	Remove reference to the Regional Standard for Water Services Add minimum requirements for new connections into the District Plan as required by the Regional Standard for Water Services.
Trelissick Park Group	168.9	Energy Infrastructure and Transport / Three Waters / THW-R2	Support	Supports that THW-R2 (Connection to existing three waters infrastructure – four or more residential units and non-residential development) covers stormwater hydraulic neutrality and water sensitive design.	Retain THW-R2 (Connection to existing three waters infrastructure – four or more residential units and non-residential development) as notified, with amendments.
Trelissick Park Group	168.10	Energy Infrastructure and Transport / Three Waters / THW-R2	Amend	[No specific reason given beyond decision requested - refer to original submission].	Amend THW-R2.2 (Connection to existing three waters infrastructure – four or more residential units and non-residential development) as follows: 2. Activity status: Restricted Discretionary Where: a. Compliance with any of the requirements of THW-R2.1 for <u>Wastewater and Water supply</u> cannot be achieved. ...

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Avryl Bramley	202.10	Energy Infrastructure and Transport / Three Waters / THW-R2	Amend	Considers that the Council may not retain ownership of water.	Amend THW-R2 (Connection to existing three waters) as follows: 1. Activity Status: Permitted <u>Restricted Discretionary</u> ...
Tyers Stream Group	221.21	Energy Infrastructure and Transport / Three Waters / THW-R2	Support in part	Supports the intent of the provision but is concerned that loose wording of matters of discretion such as 'site constraints' will mean that the intent will not be achieved given the prevalence of site constraints such as steep slopes across the city.	Not specified.
Fire and Emergency New Zealand	273.27	Energy Infrastructure and Transport / Three Waters / THW-R2	Support in part	Supports the rule as it permits new residential schemes, outside of the general rural and large lot residential zones, providing compliance is achieved with the level of service in Chapter 6, Tables 6.1 and 6.2 of the Wellington Water Regional Standard for Water Services v3.0 December 2021. While it is noted that the Wellington Water Regional Standard for Water Services includes references to the New Zealand Firefighting Water Supplies Code of Practice, FENZ considers it important for THW-R1 and THW-R2 to directly reference the Code of Practice to ensure firefighting water supply provisions are visible and enforceable through Three Waters Infrastructure provisions.	Support THW-R2 (Connection to existing three waters infrastructure – four or more residential units and non-residential development) with amendment.
Fire and Emergency New Zealand	273.28	Energy Infrastructure and Transport / Three Waters / THW-R2	Amend	Supports the rule as it permits new residential schemes, outside of the general rural and large lot residential zones, providing compliance is achieved with the level of service in Chapter 6, Tables 6.1 and 6.2 of the Wellington Water Regional Standard for Water Services v3.0 December 2021. While it is noted that the Wellington Water Regional Standard for Water Services includes references to the New Zealand Firefighting Water Supplies Code of Practice, FENZ considers it important for THW-R1 and THW-R2 to directly reference the Code of Practice to ensure firefighting water supply provisions are visible and enforceable through Three Waters Infrastructure provisions.	Amend THW-R2 (Connection to existing three waters infrastructure – four or more residential units and non-residential development) to include provision of a firefighting water supply in accordance with New Zealand Fire Service Firefighting Water Supplies Code of Practice SNA PAS 4509:2008 within the permitted activity standards and matters of discretion.
Claire Nolan, James Fraser, Bidy Bunzl, Margaret Franken, Michelle Wolland, and Lee Muir	275.13	Energy Infrastructure and Transport / Three Waters / THW-R2	Oppose	Considers that what is permissible needs more current analysis (given climate change pressures) and should be more localised.	Opposes THW-R2 (Connection to existing three waters infrastructure) and seeks amendment.
Retirement Villages Association of New Zealand Incorporated	350.37	Energy Infrastructure and Transport / Three Waters / THW-R2	Support	Supports the inclusion of a rule that specifically provides for the connecting of multiunit housing, retirement villages, comprehensive development or non-residential buildings to existing three waters infrastructure as a permitted activity when all standards are met, or a restricted discretionary activity when they are not.	Retain THW-R2 (Connection to existing three waters infrastructure – four or more residential units and non-residential development) as notified.
WCC Environmental Reference Group	377.34	Energy Infrastructure and Transport / Three Waters / THW-R2	Support	THW-R2 is supported as it operationalises the relevant objectives and policies.	Retain THW-R2 (connection to existing three waters infrastructure - four or more residential units...) as notified.
Kāinga Ora Homes and Communities	391.102	Energy Infrastructure and Transport / Three Waters / THW-R2	Support	THW-R2 is generally supported.	Retain THW-R2 (Connection to existing three waters infrastructure...) as notified.
Survey & Spatial New Zealand Wellington Branch	439.17	Energy Infrastructure and Transport / Three Waters / THW-R2	Amend	Considers that this rule only permits multi-unit housing where there is three waters infrastructure capacity. Considers that demonstrating compliance with this is problematic, as Wellington Water holds infrastructure capacity information, and it can take some time for developers to receive this information from Wellington Water. Considers that this rule is contrary to the NPS-UD Policy 2, particularly regarding Council's responsibility to ensure sufficient development capacity in the short term.	Amend THW-R2 (Connection to existing three waters infrastructure – four or more residential units and non-residential development) to: a. It involves the construction of multi-unit housing, retirement villages, comprehensive development or a non-residential building; b. There is capacity within the relevant part of the three waters network; and c. Compliance with the following is achieved... Add minimum requirements for new connections into the District Plan as required by the Regional Standard for Water Services.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
The Thorndon Society Inc	487.4	Energy Infrastructure and Transport / Three Waters / THW-R2	Oppose in part	Considers that in THW-R2.1 the construction of a non-residential building should not be permitted in a residential area if it is being built for business purposes.	Amend THW-R2.1 (Connection to existing three waters infrastructure – four or more residential units and non-residential development) as follows: 1. Activity status: Permitted Where: a. It involves the construction of multi-unit housing, retirement villages, comprehensive development or a non-residential building ;
Thorndon Residents' Association Inc	FS69.86	Part 2 / Energy Infrastructure and Transport / Three Waters / THW-R2	Support	Break down housing demand figures Infrastructure capacity insufficient – limit development Construction of buildings for business purposes should not be permitted in a residential area.	Allow
Historic Places Wellington Inc	FS111.77	Part 2 / Energy Infrastructure and Transport / Three Waters / THW-R2	Support	No specific reason provided.	Allow
The Thorndon Society Inc	487.5	Energy Infrastructure and Transport / Three Waters / THW-R2	Amend	Considers that in THW-R2.1 the construction of a non-residential building should not be permitted in a residential area if it is being built for business purposes.	Amend THW-R2.1 (Connection to existing three waters infrastructure – four or more residential units and non-residential development) as follows: 1. Activity status: Permitted Where: a. It involves the construction of multi-unit housing, retirement villages, comprehensive development or a non-residential building ;
Thorndon Residents' Association Inc	FS69.87	Part 2 / Energy Infrastructure and Transport / Three Waters / THW-R2	Support	Break down housing demand figures Infrastructure capacity insufficient – limit development Construction of buildings for business purposes should not be permitted in a residential area.	Allow
Historic Places Wellington Inc	FS111.78	Part 2 / Energy Infrastructure and Transport / Three Waters / THW-R2	Support	No specific reason provided.	Allow
Tyers Stream Group	221.22	Energy Infrastructure and Transport / Three Waters / THW-R3	Support in part	Supports the intent of the provision but is concerned that loose wording of matters of discretion such as 'site constraints' will mean that the intent will not be achieved given the prevalence of site constraints such as steep slopes across the city.	Not specified.
WCC Environmental Reference Group	377.35	Energy Infrastructure and Transport / Three Waters / THW-R3	Support	THW-R3 is supported as it operationalises the relevant objectives and policies.	Retain THW-R3 (copper and zinc building materials - all residential and non-residential development) as notified.
Trelissick Park Group	168.11	Energy Infrastructure and Transport / Three Waters / THW-R4	Support	Supports that THW-R4 (Incorporation of water sensitive design methods – four or more residential units and non-residential activity) covers stormwater hydraulic neutrality and water sensitive design.	Retain THW-R4 (Incorporation of water sensitive design methods – four or more residential units and non-residential activity) as notified, with amendments.
Trelissick Park Group	168.12	Energy Infrastructure and Transport / Three Waters / THW-R4	Amend	Considers that the restricted discretionary activity status of THW-R4 should be deleted. It is considered essential that all building developments, including infill housing, mandate at least neutral or lesser stormwater runoff, compared with pre-development.	Delete THW-R4.2 (Incorporation of water sensitive design methods – four or more residential units and non-residential activity) in its entirety.
Tyers Stream Group	221.23	Energy Infrastructure and Transport / Three Waters / THW-R4	Support in part	Supports the intent of the provision but is concerned that loose wording of matters of discretion such as 'site constraints' will mean that the intent will not be achieved given the prevalence of site constraints such as steep slopes across the city.	Not specified.
Stratum Management Limited	249.8	Energy Infrastructure and Transport / Three Waters / THW-R4	Oppose	Considers that any development of 4 or more units, or any non-residential building, will require resource consent under this rule as a restricted discretionary activity. The rule implements Policy THW-P1 (Water sensitive urban design) but is uncertain. There is no certainty as to what the rule, and underlying policy, are seeking to achieve. The rule references the Wellington Water Regional Standard for Water Services and associated design guidelines.	Remove THW-R4 (Incorporation of water sensitive design methods – four or more residential units and non-residential activity) in its entirety or amend the rule to exclude the City Centre Zone.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Stratum Management Limited	249.9	Energy Infrastructure and Transport / Three Waters / THW-R4	Amend	Considers that any development of 4 or more units, or any non-residential building, will require resource consent under this rule as a restricted discretionary activity. The rule implements Policy THW-P1 (Water sensitive urban design) but is uncertain. There is no certainty as to what the rule, and underlying policy, are seeking to achieve. The rule references the Wellington Water Regional Standard for Water Services and associated design guidelines.	Remove THW-R4 (Incorporation of water sensitive design methods – four or more residential units and non-residential activity) in its entirety or amend the rule to exclude the City Centre Zone.
Phillippa O'Connor	289.7	Energy Infrastructure and Transport / Three Waters / THW-R4	Oppose	Considers that the intent of THW-R4 can be managed through a permitted activity standard or controlled activity status instead of requiring a restricted discretionary resource consent.	Opposes the Restricted Discretionary activity status for rule THW-R4 (Incorporation of water sensitive design methods – four or more residential units and non-residential activity).
Phillippa O'Connor	289.8	Energy Infrastructure and Transport / Three Waters / THW-R4	Amend	Considers that the intent of THW-R4 can be managed through a permitted activity standard or controlled activity status instead of requiring a restricted discretionary resource consent.	Seeks that the activity status for THW-R4 (Incorporation of water sensitive design methods – four or more residential units and non-residential activity) is changed to permitted activity rule or controlled activity.
The Sustainability Society	339.5	Energy Infrastructure and Transport / Three Waters / THW-R4	Amend	Considers that design guidelines should address complexities with rainwater capture and storage and any required on-lot measures to prevent ongoing ecological impacts. Design Guidelines referenced in the Three Waters chapter for inner city development do not appropriately reflect the importance of design for realistic and robust stormwater management.	Seeks that Design Guidelines referenced in the 'Three Waters chapter' address complexities with rainwater capture and storage and any required on-lot measures to prevent ongoing ecological impacts.
Retirement Villages Association of New Zealand Incorporated	350.38	Energy Infrastructure and Transport / Three Waters / THW-R4	Oppose	Considers that the incorporation of water sensitive design methods in retirement villages the rule should not require new development to remedy existing issues (see submission on THW-P1). Considers that such methods should only be used to address the effects of the development and where they are the best practicable option. Notes that THW-R4 is only applicable to activities with 'four or more residential units and non-residential activity', with no equivalent rule provided / applicable to those activities that do not fall into this category.	Delete THW-R4 (Incorporation of water sensitive design methods – four or more residential units and non-residential activity) in its entirety as notified.
Greater Wellington Regional Council	351.87	Energy Infrastructure and Transport / Three Waters / THW-R4	Amend	Considers that the PDP should provide for approved alternative wastewater systems anywhere where there are constraints on the existing network capacity, as well as where connections are not available. Septic tanks are excluded from this recommendation due to their known issues with leakage of untreated wastewater and nitrates, particularly when poorly maintained.	Seeks to include direction in the Three Waters chapter to provide for decentralised wastewater re-use and treatment (of grey and black water) and disposal using alternative wastewater systems (but not septic tanks, due to their existing issues with contamination and leaching) anywhere where there are constraints on the existing network capacity, as well as where connections are not available. where connections are available and there is network capacity, a connection to the wastewater network would still be required.
The Retirement Villages Association of New Zealand Incorporated	FS126.60	Part 2 / Energy Infrastructure and Transport / Three Waters / THW-R4	Support	The RVA supports the relief sought in this submission.	Allow
Ryman Healthcare Limited	FS128.60	Part 2 / Energy Infrastructure and Transport / Three Waters / THW-R4	Support	Ryman supports the relief sought in this submission.	Allow
Woolworths New Zealand	359.26	Energy Infrastructure and Transport / Three Waters / THW-R4	Oppose	THW-R4 is opposed on the grounds that requiring restricted discretionary consent under rule THW-R4 for all non-residential developments introduces additional consenting requirements which could otherwise be dealt with via the introduction of a permitted activity standard, or a controlled activity consent framework. It is considered that this requirement could be more appropriately addressed by way of a permitted activity standard or controlled activity consent (noting that applications under THW-R4.1 are proposed to be considered without limited and public notification). It is considered that the intent of this rule could be incorporated into the provisions of THW-R6. [Refer to original submission for full reason]	Delete THW-R4 (Incorporation of water sensitive design methods – four or more residential units and non-residential activity) in its entirety.
Stride Investment Management Limited	FS107.4	Part 2 / Energy Infrastructure and Transport / Three Waters / THW-R4	Support	Stride supports this submission point for the reasons provided by the primary submitter.	Allow

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Investore Property Limited	FS108.4	Part 2 / Energy Infrastructure and Transport / Three Waters / THW-R4	Support	Investore supports this submission point for the reasons provided by the primary submitter.	Allow
WCC Environmental Reference Group	377.36	Energy Infrastructure and Transport / Three Waters / THW-R4	Support	THW-R4 is supported as it operationalises the relevant objectives and policies.	Retain THW-R4 (incorporation of water sensitive urban design methods...) as notified.
Survey & Spatial New Zealand Wellington Branch	439.18	Energy Infrastructure and Transport / Three Waters / THW-R4	Amend	Considers that the requirement to incorporate water sensitive design is not necessary for developments of up to three dwellings. Considers that the rule as currently stated makes all multi-unit developments an RD activity to enable Council to require water sensitive design on all multi-unit developments. Considers that the rule requiring use of the Guideline is unsuitable because it is aimed at greenfield subdivisions rather than infill multi-unit development.	Amend the matters of discretion for THW-R4 (Incorporation of water sensitive design methods – four or more residential units and non-residential activity) to: Matters of discretion are: 1. The relevant sections of the Wellington Water Regional Standard for Water Services, v2.0, – December 2021 and Wellington Water Limited's Water Sensitive Design for Stormwater: Treatment Device Design Guideline December 2019; 2. Design, location, efficiency and effectiveness of water sensitive design methods; 3. Adoption of best practicable option for stormwater retention and treatment; 4. Ownership, maintenance and operation arrangements; and 5. Any site constraints
Rod Halliday	25.20	Energy Infrastructure and Transport / Three Waters / THW-R5	Amend	Considers that THW-P5 does not recognise that there are some parts of the City that drain to the Stebbings Dam and Seton Nossiter Detention Structures which are intended to hold back/throttle flows from a modelled 100 year event. In Stebbings Valley this has been modelled as the RL92 and there are easements over private property to protect this ponding area and keep it free of buildings for the 100 year event. The GWRC designation W4 (Operative Plan) and WRC6 (Proposed Plan) also reflect this purpose for Stebbings and similar designations are in place in the operative (W2) and proposed plans (WRC2) for Seton Nossiter. Previous developments in these catchments, including Churton Park subdivisions over the last 5+ years, have had no requirement for stormwater neutrality.	Seeks that THW-R5 (Hydraulic neutrality - 1-3 residential units) is amended to note or include an exemption that when 1-3 units are proposed in areas of the City situated within the catchments of the Stebbings and Seton Nossiter Detention structures, then THW-R5 will not apply.
Heidi Snelson	FS24.6	Part 2 / Energy Infrastructure and Transport / Three Waters / THW-R5	Oppose	Submitter is seeking to reduce mitigation requirements and responsibilities around hydraulic neutrality and permeable surface requirements in the case of storm water management at a unprecedented time of storm water damage in Wellington. Developments should undertake more mitigation not less in all areas given climate change. Especially those posing more risk, such as steep hillsides, abutting/above key infrastructure (roading, power, water, railway), and significant streams, such as at the sites of the current and planned developments in Churton Park and Glenside West. The Glenside West development area is downstream of both detention structures, on extremely steep hillsides, above Porirua Stream, directly above Middleton Road (State Highway 1 motorway detour route) and the North Island railway line (which runs alongside and over the Porirua Stream). This development area must be specifically required to achieve Hydraulic Neutrality. Be that through specific technological infrastructure in build design and water catchment, significant permeable surface requirements/planting. Through Large Lot Residential Only in Glenside West.	Disallow / Seeks that submission be disallowed to ensure strict adherence to hydraulic neutrality in Glenside West Development Area, and Stebbings Valley / Reedy Block Development Area. Seeks minimum standard of hydraulic neutrality required and corresponding requirement of high level of permeable surface mitigations. Seeks that Glenside West be designated Large Lot Residential only.
Trelissick Park Group	168.13	Energy Infrastructure and Transport / Three Waters / THW-R5	Support	Supports that THW-R5 (Hydraulic neutrality – 1-3 residential units) covers stormwater hydraulic neutrality and water sensitive design.	Retain THW-R5 (Hydraulic neutrality – 1-3 residential units) as notified, with amendments below.
Trelissick Park Group	168.14	Energy Infrastructure and Transport / Three Waters / THW-R5	Amend	Considers that the restricted discretionary activity status of THW-R5 should be deleted. It is considered essential that all building developments, including infill housing, mandate at least neutral or lesser stormwater runoff, compared with pre-development.	Delete THW-R5.2 (Hydraulic neutrality – 1-3 residential units) in its entirety.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Wellington City Youth Council	201.26	Energy Infrastructure and Transport / Three Waters / THW-R5	Support	Supports hydraulic neutrality as a consideration in developments and thinks that this should inform a future-proof water management approach.	Retain THW-R5 (Hydraulic Neutrality for 1 - 3 residential units) as notified.
Tyers Stream Group	221.24	Energy Infrastructure and Transport / Three Waters / THW-R5	Support in part	Supports the intent of the provision but is concerned that loose wording of matters of discretion such as 'site constraints' will mean that the intent will not be achieved given the prevalence of site constraints such as steep slopes across the city.	Not specified.
Tyers Stream Group	221.25	Energy Infrastructure and Transport / Three Waters / THW-R5	Amend	Considers that it is unclear whether these standards apply to both the short-term site development and the subsequent long-term effects of that development. Considers that both matters need to be addressed if there is to be significant suburban intensification.	Seeks that the rule be clarified that it applies on an ongoing basis.
Stratum Management Limited	249.10	Energy Infrastructure and Transport / Three Waters / THW-R5	Oppose	Considers that this rule requires that a "Wellington Water Limited approved solution" is implemented to achieve hydraulic neutrality for 1-3 units. A Wellington Water approved solution is open to ongoing change, therefore creating uncertainty.	Remove THW-R5 (Hydraulic neutrality - 1-3 units) in its entirety or re-draft the rule to provide appropriate certainty, including limiting the requirement to apply only where existing infrastructure is under-capacity.
Stratum Management Limited	249.11	Energy Infrastructure and Transport / Three Waters / THW-R5	Amend	Considers that this rule requires that a "Wellington Water Limited approved solution" is implemented to achieve hydraulic neutrality for 1-3 units. A Wellington Water approved solution is open to ongoing change, therefore creating uncertainty.	Remove THW-R5 (Hydraulic neutrality - 1-3 units) in its entirety or re-draft the rule to provide appropriate certainty, including limiting the requirement to apply only where existing infrastructure is under-capacity.
WCC Environmental Reference Group	377.37	Energy Infrastructure and Transport / Three Waters / THW-R5	Support	THW-R5 is supported as it operationalises the relevant objectives and policies.	Retain THW-R5 (Hydraulic neutrality...) as notified.
Survey & Spatial New Zealand Wellington Branch	439.19	Energy Infrastructure and Transport / Three Waters / THW-R5	Amend	Considers that a Permitted activity status should not be limited to two pre-approved detention systems, and that there are other solutions available that should be permitted.	Amend THW-R5 (Hydraulic neutrality – 1-3 residential units) to: 1. Activity status: Permitted Where: a. It involves the construction of 1-3 residential units; and b. A Wellington Water Limited approved solution for managing volume and rate of stormwater runoff is installed as part of the development; or <u>c. Stormwater management measures are incorporated which achieve post development peak stormwater flows and volumes which are the same or less than the modelled peak flows and volumes for the site in its current state.</u>
Rod Halliday	25.21	Energy Infrastructure and Transport / Three Waters / THW-R6	Amend	Considers that THW-P5 does not recognise that there are some parts of the City that drain to the Stebbings Dam and Seton Nossiter Detention Structures which are intended to hold back/throttle flows from a modelled 100 year event. In Stebbings Valley this has been modelled as the RL92 and there are easements over private property to protect this ponding area and keep it free of buildings for the 100 year event. The GWRC designation W4 (Operative Plan) and WRC6 (Proposed Plan) also reflect this purpose for Stebbings and similar designations are in place in the operative (W2) and proposed plans (WRC2) for Seton Nossiter. Previous developments in these catchments, including Churton Park subdivisions over the last 5+ years, have had no requirement for stormwater neutrality.	Seeks that THW-R6 (Hydraulic neutrality - four or more residential units and non-residential buildings) is amended to note or include an exemption that when three or more units are proposed in areas of the City situated within the natural catchments of the Stebbings and Seton Nossiter Detention structures, then THW-R6 will not apply.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Glenside Progressive Association (GPA)	FS4.3	Part 2 / Energy Infrastructure and Transport / Three Waters / THW-R6	Oppose	<p>Submitter states that Rule R5 requiring hydrological neutrality for any new housing development should not apply to the Upper Stebbings Valley or Seton Nossiter catchments because both these catchments are protected by detention dams. Submitter argues that previous developments in these catchments, including Churton Park subdivisions over the last 5+ years, have had no requirement for stormwater neutrality - however climate change is accelerating and what was required in the past must change to reduce future negative flood impacts.</p> <p>Serious flooding has occurred in the past from these catchments including some events after the detention dams were constructed. Stebbings detention dam was completed in 1994 and is designed to hold back water arising from a one on one-hundred-year flood event, a target that is now unlikely to be met due to the accelerating effects of climate change.</p> <p>Furthermore, Glenside West catchment is not in the Stebbings Dam or Seton Nossiter catchment and there is no downstream floodwater protection therefore Council should be taking additional measure to reduce the impact of earthworks and housing development on the Glenside West water catchment.</p> <p>[Refer to further submission for full reason]</p>	<p>Disallow / Seeks:</p> <ul style="list-style-type: none"> - Acknowledgement by Council that the Government's Policy Statement on Urban Development does not apply to areas such as Glenside West. - That any development in Glenside West takes place with a minimum of earthworks and that natural gullies are not filled in. - That the grey unbuilt area in Glenside West is unsuitable land for housing and that the whole area shown in mustard/yellow (Fig 1) is limited to Large Lot Residential. - Roading and housing doesn't extend into gullies, ephemeral streams, intermittent and perennial streams and is kept away from the ridgetop. - Furthermore no housing is built above the current Glenside-Churton park suburb boundary in order that the ridgeline is offered at least some degree of visual protection. - Significant Natural Areas (SNAs) on this site must be preserved and not impacted by development, if any development is to take place
Heidi Snelson	FS24.7	Part 2 / Energy Infrastructure and Transport / Three Waters / THW-R6	Oppose	<p>Submitter is seeking to reduce mitigation requirements and responsibilities around hydraulic neutrality and permeable surface requirements in the case of storm water management at a unprecedented time of storm water damage in Wellington.</p> <p>Developments should undertake more mitigation not less in all areas given climate change. Especially those posing more risk, such as steep hillsides, abutting/above key infrastructure (roading, power, water, railway), and significant streams, such as at the sites of the current and planned developments in Churton Park and Glenside West.</p> <p>The Glenside West development area is downstream of both detention structures, on extremely steep hillsides, above Porirua Stream, directly above Middleton Road (State Highway 1 motorway detour route) and the North Island railway line (which runs alongside and over the Porirua Stream). This development area must be specifically required to achieve Hydraulic Neutrality. Be that through specific technological infrastructure in build design and water catchment, significant permeable surface requirements/planting. Through Large Lot Residential Only in Glenside West.</p>	<p>Disallow / Seeks that submission be disallowed to ensure strict adherence to hydraulic neutrality in Glenside West Development Area, and Stebbings Valley / Reedy Block Development Area. Seeks minimum standard of hydraulic neutrality required and corresponding requirement of high level of permeable surface mitigations.</p> <p>Seeks that Glenside West be designated Large Lot Residential only.</p>
Trelissick Park Group	168.15	Energy Infrastructure and Transport / Three Waters / THW-R6	Support	Supports that THW-R6 (Hydraulic neutrality – four or more residential units and non-residential buildings) covers stormwater hydraulic neutrality and water sensitive design.	Retain THW-R6 (Hydraulic neutrality – four or more residential units and non-residential buildings) as notified, with amendments below.
Trelissick Park Group	168.16	Energy Infrastructure and Transport / Three Waters / THW-R6	Amend	Considers that the restricted discretionary activity status of THW-R6 should be deleted. It is considered essential that all building developments, including infill housing, mandate at least neutral or lesser stormwater runoff, compared with pre-development.	Amend THW-R6.2 (Hydraulic neutrality – four or more residential units and non-residential buildings) in its entirety.
Wellington City Youth Council	201.27	Energy Infrastructure and Transport / Three Waters / THW-R6	Support	Supports hydraulic neutrality as a consideration in developments and thinks that this should inform a future-proof water management approach.	Retain THW-R6 (Hydraulic Neutrality for 4+ residential units) as notified.
Tyers Stream Group	221.26	Energy Infrastructure and Transport / Three Waters / THW-R6	Amend	<p>Considers that it is unclear whether these standards apply to both the short-term site development and the subsequent long-term effects of that development.</p> <p>Considers that both matters need to be addressed if there is to be significant suburban intensification.</p>	Seeks that the rule be clarified that it applies on an ongoing basis.
Stratum Management Limited	249.12	Energy Infrastructure and Transport / Three Waters / THW-R6	Oppose	Considers that the rule requires developments of 4 or more units to incorporate stormwater management measures that achieve post development peak stormwater flows and volumes that are the same or less then the modelled peak flows and volumes for the site in an undeveloped state. The rule relates to policy THW-P5 (Hydraulic neutrality) outlined above.	Remove THW-R6 (Hydraulic neutrality - 4+ units) in its entirety or amend the rule to exclude the City Centre Zone.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Stratum Management Limited	249.13	Energy Infrastructure and Transport / Three Waters / THW-R6	Amend	Considers that the rule requires developments of 4 or more units to incorporate stormwater management measures that achieve post development peak stormwater flows and volumes that are the same or less than the modelled peak flows and volumes for the site in an undeveloped state. The rule relates to policy THW-P5 (Hydraulic neutrality) outlined above.	Remove THW-R6 (Hydraulic neutrality - 4+ units) in its entirety or amend the rule to exclude the City Centre Zone.
Phillippa O'Connor	289.9	Energy Infrastructure and Transport / Three Waters / THW-R6	Amend	Considers that 'undeveloped state' is too onerous and considers that the 'pre-developed' state more appropriate of a level of hydraulic neutrality to achieve.	Amend THW-R6 (Hydraulic neutrality – four or more residential units and non-residential buildings) as follows: 1. Activity status: Permitted Where: a. It involves the construction of multi-unit housing, retirement villages, comprehensive development or a non-residential building; and b. Stormwater management measures are incorporated which achieve post development peak stormwater flows and volumes which are the same or less than the modelled peak flows and volumes for the site in an undeveloped state , <u>pre-developed state</u> . Note: Guidance for calculating peak stormwater flows and volumes is contained in the Wellington Water Quick Reference Guide for Design Storm Hydrology; Standardised Parameters for Hydrological Modelling, April 2019. Guidance on which storm events are to be managed is contained in Chapter 4 of the Wellington Water Regional Standard for Water Services v3.0 December 2021.
Phillippa O'Connor	289.10	Energy Infrastructure and Transport / Three Waters / THW-R6	Support	Supports notification preclusions for THW-R6.2	Retain the notification preclusions for rule THW-R6.2 (Hydraulic neutrality – four or more residential units and non-residential buildings) as notified.
Retirement Villages Association of New Zealand Incorporated	350.39	Energy Infrastructure and Transport / Three Waters / THW-R6	Support	Supports the inclusion of a rule that specifically provides for hydraulic neutrality in association with the construction of multi-unit housing, retirement villages, comprehensive development and non-residential buildings as a permitted activity, and restricted discretionary where standards are not met.	Retain THW-R6 (Hydraulic neutrality – four or more residential units and non-residential buildings) as notified.
Woolworths New Zealand	359.27	Energy Infrastructure and Transport / Three Waters / THW-R6	Support in part	Supports the inclusion of the preclusion of notification of applications made in respect of rule THW-R6.2.	Retain THW-R6 (Hydraulic neutrality – four or more residential units and non-residential buildings) with amendment.
Stride Investment Management Limited	FS107.5	Part 2 / Energy Infrastructure and Transport / Three Waters / THW-R6	Support	Stride supports this submission point for the reasons provided by the primary submitter.	Allow
Investore Property Limited	FS108.5	Part 2 / Energy Infrastructure and Transport / Three Waters / THW-R6	Support	Investore supports this submission point for the reasons provided by the primary submitter.	Allow

Energy, Infrastructure and Transport - Infrastructure

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Woolworths New Zealand	359.28	Energy Infrastructure and Transport / Three Waters / THW-R6	Amend	Considers that THW-R6 should be amended to replace 'undeveloped state' with 'pre-developed state' as this the former is overly onerous. The proposed reference within the hydraulic neutrality requirements (THW-R6) to demonstrate that stormwater flows are the same or less than the site in an "undeveloped state" is too onerous and instead the threshold should instead be compared against a pre-developed state. This amendment ensures consistency in the baseline that is applied between the permitted activity standard and the restricted discretionary activity.	Amend THW-R6 (Hydraulic neutrality – four or more residential units and non-residential buildings) as follows: 1. Activity status: Permitted Where: a. It involves the construction of multi-unit housing, retirement villages, comprehensive development or a non-residential building; and b. Stormwater management measures are incorporated which achieve post development peak stormwater flows and volumes which are the same or less than the modelled peak flows and volumes for the site in an undeveloped state <u>pre-developed state</u> .
Stride Investment Management Limited	FS107.6	Part 2 / Energy Infrastructure and Transport / Three Waters / THW-R6	Support	Stride supports this submission point for the reasons provided by the primary submitter.	Allow
Investore Property Limited	FS108.6	Part 2 / Energy Infrastructure and Transport / Three Waters / THW-R6	Support	Investore supports this submission point for the reasons provided by the primary submitter.	Allow
Survey & Spatial New Zealand Wellington Branch	439.20	Energy Infrastructure and Transport / Three Waters / THW-R6	Amend	Considers hydraulic neutrality should refer to the current disposition of a site.	Amend THW-R6 (Hydraulic neutrality – four or more residential units and non-residential buildings) to: 1. Activity status: Permitted Where: a. It involves the construction of multi-unit housing, retirement villages, comprehensive development or a non-residential building; and b. Stormwater management measures are incorporated which achieve post development peak stormwater flows and volumes which are the same or less than the modelled peak flows and volumes for the site in <u>its current</u> an undeveloped state
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	99.9	Energy Infrastructure and Transport / Infrastructure / General INF	Support	The introduction to the INF chapter is supported. It provides clarity on how the infrastructure rules engage with the rest of the District Plan. No infrastructure specific rules should be included in the zone, earthworks or overlay chapters.	Retain introduction to INF chapter as notified.
Airways Corporation of New Zealand Limited	100.3	Energy Infrastructure and Transport / Infrastructure / General INF	Amend	Considers that in advance of any activity occurring within the new 'Air Traffic Control Overlay' for ACNZ3 and ACNZ4, Airways needs the opportunity to adjust its technology if required, to prevent planes being displaced.	Seeks that the planning maps are updated to show a new 'Air Traffic Control Information Overlay' for ACNZ3 and ACNZ4 which would require plan users to consult with Airways before undertaking an activity within the overlay.
Wellington International Airport Limited	FS36.54	Part 2 / Energy Infrastructure and Transport / Infrastructure / General INF	Support	WIAL supports the inclusion of overlays that ensure that Airways air traffic control overlays are protected, thus ensuring the ongoing safety of aircraft on approach to and departure from Wellington International Airport.	Allow
Kāinga Ora – Homes and Communities	FS89.44	Part 2 / Energy / Infrastructure and Transport / Infrastructure / General INF	Oppose	Kāinga Ora opposes the proposed 'air traffic control information' overlay as the overlay has the potential to constrain urban development and result in delays to development as a result of the require consultation.	Disallow

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Airways Corporation of New Zealand Limited	100.4	Energy Infrastructure and Transport / Infrastructure / General INF	Amend	Considers that in advance of any activity occurring within the new 'Air Traffic Control Overlay' for ACNZ3 and ACNZ4, Airways needs the opportunity to adjust its technology if required, to prevent planes being displaced.	If the new 'Air Traffic Control Information Overlay' for ACNZ3 and ACNZ4 does not require plan users to consult with Airways, alternatively: Seeks that the planning maps are updated to allow for a new 'Air Traffic Control Overlay' with associated changes to the plan provisions to include specific restrictions and/or consultation requirements for development and infrastructure within the overlay.
Kāinga Ora – Homes and Communities	FS89.45	Part 2 / Energy / Infrastructure and Transport / Infrastructure / General INF	Oppose	Kāinga Ora opposes the proposed 'air traffic control' overlay as the overlay has the potential to constrain urban development and result in delays to development as a result of the require consultation.	Disallow
Powerco Limited	127.2	Energy Infrastructure and Transport / Infrastructure / General INF	Support	Supports the introduction to the INF chapter is generally as it appropriately sets out the context for the INF Chapter.	Retain the introduction to the INF Chapter as notified.
Powerco Limited	127.3	Energy Infrastructure and Transport / Infrastructure / General INF	Support	Considers that statement in the introduction that rules in the zone, earthworks and overlay chapters do not apply unless specifically stated within an infrastructure rule or standard provides clarity on how the infrastructure rules engage with the rest of the District Plan.	Retain the specific introductory statement and associated mechanism in the INF chapter for how the rules in the infrastructure chapter work. No infrastructure specific rules should be included in the zone, earthworks or overlay chapters.
Meridian Energy Limited	228.23	Energy Infrastructure and Transport / Infrastructure / General INF	Support in part	Considers that the text in the introduction does not clarify that the objectives, policy and rules for renewable electricity generation activities (which are defined as a form of infrastructure and regionally significant infrastructure) are contained in Chapter REG Renewable Electricity Generation. Plan navigation would be improved if this were clarified.	Retain the Introduction of the Infrastructure chapter with amendment.
Meridian Energy Limited	228.24	Energy Infrastructure and Transport / Infrastructure / General INF	Amend	Considers that the text in the introduction does not clarify that the objectives, policy and rules for renewable electricity generation activities (which are defined as a form of infrastructure and regionally significant infrastructure) are contained in Chapter REG Renewable Electricity Generation. Plan navigation would be improved if this were clarified.	Amend the Introduction of the Infrastructure chapter by inserting the following (or similar) clarification note: <u>The objectives, policies and rules applicable to renewable electricity generation activities are contained in Chapter REG Renewable Electricity Generation. The provisions of Chapter INF Infrastructure do not apply to renewable electricity generation activities.</u>
Horokiwi Quarries Ltd	271.17	Energy Infrastructure and Transport / Infrastructure / General INF	Amend	Considers that plan wide policy recognition of the benefits of quarry activities and the functional constraints associated with such activities is needed and suggests that the most logical place for some form of plan wide recognition of quarrying activities would be within the Infrastructure Chapter.	Seeks a plan wide policy recognition of the benefits of quarry activities and the functional constraints associated with such activities.
Tawa Community Board	294.8	Energy Infrastructure and Transport / Infrastructure / General INF	Not specified	Considers that developments should have sufficient infrastructure available to them; however, insufficient infrastructure shouldn't be an excuse to not enable development. [Refer to original submission for full reason]	Seeks that the Council prioritises infrastructure development in Tawa.
Transpower New Zealand Limited	315.48	Energy Infrastructure and Transport / Infrastructure / General INF	Amend	The submitter queries the number of Infrastructure sub chapters, policies (62) and rules relating to Infrastructure and specifically the National Grid. Considers the myriad of provisions is confusing and creates the potential for contradiction between provisions. There are no National Grid specific policies within the Infrastructure sub-chapter. However, there are 18 policies within other sub chapters specific to managing the effects of the National Grid. Considers there are no National Grid specific policies in the plan that specifically recognise the benefits of the National Grid or management of the effects of subdivision, land use and development. Considers policies within other subchapters only relate to managing the effects of the National Grid. Considers that lack of recognition within the general infrastructure chapter does not give effect to the NPS-ET, and that given the national significance of the National Grid Transpower seeks a separate set of provisions within the infrastructure section. Considers that standalone policies are necessary separate to the Gas Transmission Pipeline Corridor, noting the Gas Corridor does not have higher order policy support of an NPS. Considers that multiple overlay provisions could be combined. Considers that the inclusion of rules relating to operation, maintenance and upgrade of existing assets is confusing and in some instances inconsistent with the NESETA [Refer to original submission for full reason].	Seeks a separate suite of National Grid provisions (policies and rules) within a separate Infrastructure sub-chapter. [Refer to original submission, including Appendix F, for suggested provisions and further detail]. Alternatively, should this approach not be adopted, seeks the amendments as outlined in other submission points: - Seeks that in order to give effect to the NPSET, a separate policy framework be provided within the Infrastructure chapter for the National Grid which recognises and provides for the benefits of the National Grid, manages the effects of the development of National Grid, and the effects of other activities on the National Grid); - Policies relating to the National Grid are amended to give effect to the NPS-ET. - The National Grid be separated from the Gas Transmission Pipeline Corridor; - The number of National Grid specific policies and rules be condensed and reduced; and - Rules relating to existing National Grid assets be removed and instead the NES-ETA be relied on (as is the intent of the NES-ETA).

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Firstgas Ltd	FS97.5	Part 2 / Energy Infrastructure and Transport / Infrastructure / General INF	Not specified	Firstgas supports the intent of this submission which is seeking standalone policies in relation to the National Grid so that they are separate from those relating to the Gas Transmission Pipeline Corridor. While Firstgas don't oppose the intent of this submission, Firstgas consider that it is more appropriate for the infrastructure provisions to remain within one section, as the provisions are protecting both nationally and regionally significant infrastructure.	Disallow
Transpower New Zealand Limited	315.49	Energy Infrastructure and Transport / Infrastructure / General INF	Support	Largely supports the introduction to the INF chapter on the basis it articulates the importance of infrastructure and makes specific reference to the NPSET. In particular the submitter supports the clarity provided in the introduction as to the relationship of the Infrastructure chapter provisions to other chapters in the PDP.	Retain the introductory text to the Infrastructure (INF) chapter as notified.
Mt Victoria Residents' Association	342.21	Energy Infrastructure and Transport / Infrastructure / General INF	Amend	[No specific reason given beyond decision requested - refer to original submission].	Seeks that urban infrastructure take into account the needs of all age groups and abilities.
Royal Forest and Bird Protection Society	345.38	Energy Infrastructure and Transport / Infrastructure / General INF	Oppose in part	Considers the chapter appears to give the same policy support for infrastructure as it does for regionally significant infrastructure. Infrastructure is potentially much broader than RSI. F&B seeks that the scope of this chapter is clarified. The objectives, policies and rules of this chapter (including sub-chapters) should be as protective as possible, while still meeting the requirements of national direction. The need to protect biodiversity, natural character and natural landscapes remains, even where there is national direction in place	Clarify the scope of the Infrastructure chapter. Amend the direction of the Infrastructure chapter to be as protective of biodiversity, natural character, and natural landscapes as possible, while still meeting the requirements of national direction
Wellington Electricity Lines Limited (WELL)	FS27.23	Part 2 / Energy Infrastructure and Transport / Infrastructure / General INF	Oppose	WELL do not support this submission point as it seeks to change or significantly diminish the direction of the Infrastructure Chapter to that of biodiversity protection. WELL seek that the direction and integrity of the infrastructure section of the PDP is retained so as to preserve the balance of the planning document.	Disallow
Transpower New Zealand Limited	FS29.17	Part 2 / Energy Infrastructure and Transport / Infrastructure / General INF	Oppose	Notwithstanding the scope of the infrastructure chapter, Transpower opposes any amendments to the chapter that are inconsistent within or do not give effect to the national direction within the NPSET.	Disallow / Seeks that submission is disallowed in part in so far as the relief sought is inconsistent with that sought in Transpower's submission.
Wellington International Airport Limited	FS36.50	Part 2 / Energy Infrastructure and Transport / Infrastructure / General INF	Oppose	WIAL opposes the relief sought by the submitter, for reasons including (but not limited to): 1. It is appropriate for a different planning framework to apply for regionally significant infrastructure in recognition of the social, cultural and economic benefits it provides for the community and the operational and locational constraints of that infrastructure. 2. It is inappropriate to protect the aspects identified to the extent "possible". Almost anything is "possible", therefore using such language could result in the complete curtailment of regionally significant infrastructure, on the grounds it is "possible" to protect the aspects identified.	Disallow
Meridian Energy Limited	FS101.24	Part 2 / Energy Infrastructure and Transport / Infrastructure / General INF	Support	Meridian agrees there is merit in clarifying the scope of the chapter and its relationship to other chapters.	Allow / Seeks that the request is allowed to the extent that it is consistent with Meridian's own submission points on this chapter.
Royal Forest and Bird Protection Society	345.39	Energy Infrastructure and Transport / Infrastructure / General INF	Oppose in part	Considers the objectives are inadequate to provide for protection of indigenous biodiversity, natural character and landscapes, which are dealt with in later INF sub-chapters.	Amend the objectives of INF - Infrastructure to clarify that the objectives of relevant chapters, including Ecosystems and Indigenous Biodiversity, Natural Character, Natural Features and Landscapes, and Coastal Environment apply to all Infrastructure provisions. OR Add a comprehensive set of objectives to be included into the Infrastructure chapter to provide for these matters, mirroring the objectives of the aforementioned chapters.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Transpower New Zealand Limited	FS29.18	Part 2 / Energy Infrastructure and Transport / Infrastructure / General INF	Oppose	Notwithstanding the scope of the infrastructure chapter, Transpower opposes any amendments to the chapter that are inconsistent within or do not give effect to the national direction within the NPSET.	Disallow / Seeks that submission is disallowed in part in so far as the relief sought is inconsistent with that sought in Transpower's submission.
Wellington International Airport Limited	FS36.51	Part 2 / Energy Infrastructure and Transport / Infrastructure / General INF	Oppose	WIAL opposes the relief sought by the submitter, for reasons including (but not limited to): 1. It is appropriate for a different planning framework to apply for regionally significant infrastructure in recognition of the social, cultural and economic benefits it provides for the community and the operational and locational constraints of that infrastructure. 2. It is inappropriate to protect the aspects identified to the extent "possible". Almost anything is "possible", therefore using such language could result in the complete curtailment of regionally significant infrastructure, on the grounds it is "possible" to protect the aspects identified.	Disallow
Meridian Energy Limited	FS101.25	Part 2 / Energy Infrastructure and Transport / Infrastructure / General INF	Support	Meridian agrees there is merit in clarifying the scope of the chapter and its relationship to other chapters. Meridian does not consider it is necessary to replicate the provisions of the other chapters within the Infrastructure chapter.	Allow / Seeks that the request is allowed to the extent that it is consistent with Meridian's own submission points on this chapter. Seeks that part of submission be disallowed to reject the request alternative relief (objectives mirroring objectives of other chapters).
Jane Szentivanyi and Ben Briggs	369.11	Energy Infrastructure and Transport / Infrastructure / General INF	Amend	Considers that the provision of adequate infrastructure to support any increased residential development needs to be planned and funded to ensure that Wellington can continue to grow and prosper. It is therefore important that the District Plan supports a co-ordinated approach to infrastructure planning and a sequencing of development to align with the ongoing infrastructure supply. Wellingtonians' relationship with the land predetermines their relationship with water.	Seeks that provisions be made in the District Plan to provide adequate infrastructure planning and development. [Inferred decision requested]
Wellington Electricity Lines Limited (WELL)	FS27.27	Part 2 / Energy Infrastructure and Transport / Infrastructure / General INF	Support	WELL support this submission point in principle as it aligns with WELL's submission that infrastructure capacity needs to be planned for in advance of development occurring.	Allow
Waka Kotahi	370.71	Energy Infrastructure and Transport / Infrastructure / General INF	Oppose	Opposes INF-Table 5: Minimum Sight Distances at Vehicle Crossings. The submitter seeks longer sight distances, especially for the higher speeds, in alignment with New Zealand Transport Agency Planning Policy Manual: Appendix 5B – Accessway standards and guidelines, Table App5B/1. See Appendix B.	Amend to standards in alignment with New Zealand Transport Agency Planning Policy Manual: Appendix 5B Accessway standards and guidelines, Section 5B/1 Sight distances. [see Appendix B of the original submission]
BP Oil New Zealand, Mobil Oil New Zealand Limited and Z Energy Limited (the Fuel Companies)	372.23	Energy Infrastructure and Transport / Infrastructure / General INF	Support	Supports the infrastructure chapter in general, specifically the recognition of the critical role of this infrastructure, including that necessary for the effective, secure, and efficient transmission or distribution of fuel and the intent of the corresponding provisions which are generally enabling of infrastructure activities. Supports the zone and earthworks chapters not applying to infrastructure, unless specifically stated.	Retain the Infrastructure chapter as notified.
Envirowaste Services Ltd	373.7	Energy Infrastructure and Transport / Infrastructure / General INF	Support in part	Considers that the provision for waste facilities must be considered as an essential part of the services needed for a society to function. This chapter seeks to provide for the operation, maintenance and development of infrastructure within the City. Some amendments will be required to the wording of the objectives, policies and rules to ensure that waste facilities are suitably provided for.	Not specified.
Envirowaste Services Ltd	373.8	Energy Infrastructure and Transport / Infrastructure / General INF	Amend	Considers that the provision for waste facilities must be considered as an essential part of the services needed for a society to function. This chapter seeks to provide for the operation, maintenance and development of infrastructure within the City. Some amendments will be required to the wording of the objectives, policies and rules to ensure that waste facilities are suitably provided for.	Seeks that the Infrastructure chapter be amended so that the wording of the objectives, policies and rules ensure that waste facilities are suitably provided for.
WCC Environmental Reference Group	377.38	Energy Infrastructure and Transport / Infrastructure / General INF	Support in part	Generally supportive of management of three waters infrastructure and renewable energy [suggestions made later in submission and summarised below].	Not specified.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Taranaki Whānui ki te Upoko o te Ika	389.55	Energy Infrastructure and Transport / Infrastructure / General INF	Amend	[No specific reason given beyond decision requested - refer to original submission].	Amend 'Other relevant District Plan provisions' to include Sites and Areas of Significance to Māori chapter.
Greater Wellington Regional Council	FS84.118	Part 2 / Energy Infrastructure and Transport / Infrastructure / General INF	Support	Greater Wellington support the inclusion and protection of SASM.	Allow / Seek provisions which protect SASM.
Kāinga Ora Homes and Communities	391.103	Energy Infrastructure and Transport / Infrastructure / General INF	Oppose in part	The submitter does not believe that public or limited notification is necessary.	Opposes in part and requests amendment so that all Rules in the Infrastructure chapter are to include a notification preclusion statement for activities under Restricted Discretionary
Transpower New Zealand Limited	FS29.5	Part 2 / Energy Infrastructure and Transport / Infrastructure / General INF	Oppose	The provision of notification statements will assist with the application of the PDP. Given the specific technical and safety nature of the effects on the National Grid and the national significance of the National Grid, Transpower opposes the deletion of any notification clauses.	Disallow
Wellington International Airport Limited	FS36.52	Part 2 / Energy Infrastructure and Transport / Infrastructure / General INF	Support	WIAL supports the proposed notification clause for restricted discretionary activities. Special circumstances will still apply, notwithstanding this statement.	Allow
KiwiRail Holdings Limited	FS72.17	Part 2 / District-Wide Matters / Energy, Infrastructure, and Transport / Infrastructure / General INF	Oppose	Considers it necessary to be notified of infrastructure activities adjacent to the rail corridor to ensure KiwiRail has the opportunity to be included in the planning assessment process. Considers the relief sought should be declined because it a) will not promote the sustainable management of the natural and physical resources in Wellington City, and is therefore contrary to, or inconsistent with, Part 2 and other provisions of the RMA and the Amendment Act; (b) is inconsistent with other relevant planning documents, including the Greater Wellington Regional Policy Statement and National Policy Statement for Urban Development 2020; (c) will not meet the reasonably foreseeable needs of future generations; (d) will not avoid, remedy or mitigate actual and potential adverse effects on the environment; (e) will not enable the social, economic and cultural wellbeing of people of Wellington City; and (f) is not the most appropriate way to achieve the objectives of the Proposed Plan in terms of section 32 of the RMA.	Disallow
Onslow Residents Community Association	FS80.26	Part 2 / Energy Infrastructure and Transport / Infrastructure / General INF	Oppose	Considers that the notification and preclusion required in the notified District Plan must be retained to give it teeth and make it effective.	Disallow
Kāinga Ora Homes and Communities	391.104	Energy Infrastructure and Transport / Infrastructure / General INF	Amend	Considers that all rules in the Infrastructure chapter should have a notification preclusion statement (for both public and limited notification) for restricted discretionary activities. The technical nature of these breaches requires technical and/or engineering assessments, and public participation by way of limited or public notification will unlikely add anything to the consideration of the effects of these breaches.	Amend all Rules in the Infrastructure chapter to include a notification preclusion statement for activities under Restricted Discretionary as follows: <u>Notification:</u> <u>Applications under this rule are precluded from being publicly or limited notified in accordance with section 95A or section 95B of the RMA.</u>
Wellington Electricity Lines Limited (WELL)	FS27.9	Part 2 / Energy Infrastructure and Transport / Infrastructure / General INF	Support	WELL support this submission point as it appropriately seeks to have RDA non-notified. The submitted appropriately acknowledges that non-compliance is usually of a technical or operational nature, to which public or limited notification will have little to no ability in resolving.	Allow

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Transpower New Zealand Limited	FS29.6	Part 2 / Energy Infrastructure and Transport / Infrastructure / General INF	Oppose	The provision of notification statements will assist with the application of the PDP. Given the specific technical and safety nature of the effects on the National Grid, the national significance of the National Grid, and that publicly notified applications have to be served on Transpower under clause 10 of the Resource Management Regulations 2003, Transpower opposes the deletion of any notification clauses.	Disallow
Wellington International Airport Limited	FS36.53	Part 2 / Energy Infrastructure and Transport / Infrastructure / General INF	Support	WIAL supports the proposed notification clause for restricted discretionary activities. Special circumstances will still apply, notwithstanding this statement.	Allow
Onslow Residents Community Association	FS80.27	Part 2 / Energy Infrastructure and Transport / Infrastructure / General INF	Oppose	Considers that the notification and preclusion required in the notified District Plan must be retained to give it teeth and make it effective.	Disallow
Kāinga Ora Homes and Communities	391.105	Energy Infrastructure and Transport / Infrastructure / General INF	Oppose in part	Table 1 - 6 in the Infrastructure chapter are opposed. Transport related provisions are divided between the transport and infrastructure chapters. This is inconsistent with best practice and makes navigation of the plan difficult for users.	Delete Table 1 - 6 from the Infrastructure chapter and move them to the Transport chapter.
KiwiRail Holdings Limited	FS72.18	Part 2 / District-Wide Matters / Energy, Infrastructure, and Transport / Infrastructure / General INF	Not specified	KiwiRail has an interest in the relief sought. District Plans throughout the country typically separate transport and infrastructure provisions into different chapters. If this relief sought is approved, KiwiRail seeks to ensure that the introduction text, objectives, policies and methods are updated to keep the suite of provisions relating to the transport network together for accurate plan interpretation and implementation.	Amend / If this relief sought is approved, KiwiRail seeks to ensure that the introduction text, objectives, policies and methods are updated to keep the suite of provisions relating to the transport network together for accurate plan interpretation and implementation.
Kāinga Ora Homes and Communities	391.106	Energy Infrastructure and Transport / Infrastructure / General INF	Oppose in part	Figure 1 - 4 in the Infrastructure chapter are opposed. Transport related provisions are divided between the transport and infrastructure chapters. This is inconsistent with best practice and makes navigation of the plan difficult for users.	Delete Figure 1 - 4 from the Infrastructure chapter and move them to the Transport chapter.
KiwiRail Holdings Limited	FS72.19	Part 2 / District-Wide Matters / Energy, Infrastructure, and Transport / Infrastructure / General INF	Not specified	KiwiRail has an interest in the relief sought. District Plans throughout the country typically separate transport and infrastructure provisions into different chapters. If this relief sought is approved, KiwiRail seeks to ensure that the introduction text, objectives, policies and methods are updated to keep the suite of provisions relating to the transport network together for accurate plan interpretation and implementation.	Amend / If this relief sought is approved, KiwiRail seeks to ensure that the introduction text, objectives, policies and methods are updated to keep the suite of provisions relating to the transport network together for accurate plan interpretation and implementation.
CentrePort Limited	402.42	Energy Infrastructure and Transport / Infrastructure / General INF	Oppose	Opposes structure of dealing with Natural Hazards. Considers that the structure of managing Natural Hazards is confusing. There are Natural Hazards provisions in the infrastructure chapter as well as Natural Hazards chapter, while coastal hazards are in the Coastal Environment Chapter. For CentrePort related matters you potentially have to look at all three. This is considered inefficient and could lead to duplication. Of the hazards listed CentrePort has fault hazard, liquefaction, coastal inundation and tsunami (high) risk.	Seeks that plan is amended so all Natural Hazards requirements are included in one chapter.
Wellington International Airport Limited	FS36.55	Part 2 / Energy Infrastructure and Transport / Infrastructure / General INF	Support	WIAL shares the concerns of CentrePort Limited, that there is a lot of duplication in the Proposed Plan, particularly as it relates to the natural hazard provisions that apply to (regionally significant) infrastructure.	Allow

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
CentrePort Limited	402.43	Energy Infrastructure and Transport / Infrastructure / General INF	Amend	Opposes structure of dealing with Natural Hazards. Considers that the structure of managing Natural Hazards is confusing. There are Natural Hazards provisions in the infrastructure chapter as well as Natural Hazards chapter, while coastal hazards are in the Coastal Environment Chapter. For CentrePort related matters you potentially have to look at all three. This is considered inefficient and could lead to duplication. Of the hazards listed CentrePort has fault hazard, liquefaction, coastal inundation and tsunami (high) risk.	Seeks that plan is amended so all Natural Hazards requirements are included in one chapter.
Wellington International Airport Limited	FS36.56	Part 2 / Energy Infrastructure and Transport / Infrastructure / General INF	Support	WIAL shares the concerns of CentrePort Limited, that there is a lot of duplication in the Proposed Plan, particularly as it relates to the natural hazard provisions that apply to (regionally significant) infrastructure.	Allow
Wellington International Airport Ltd	406.82	Energy Infrastructure and Transport / Infrastructure / General INF	Not specified	As noted in the Introduction, airports and airport related activities are captured by the RMA definition of "infrastructure". As such activities are generally provided for within the Airport Zone, there is potential for airport and airport related activities to be inadvertently captured by the provisions within this chapter, creating an inappropriate duplication of control. While submitter supports the general intent of the exemption described in the text of the Introduction, the exemption should only apply to airport and airport related activities (i.e. the methods in the Airport Zone. It remains appropriate for the Infrastructure chapter and associated provisions to otherwise apply to submitters activities that may occur outside of the Airport Zone or infrastructure that is not provided for by the Airport Zone provisions. It is also not clear whether the introductory text to this chapter also applies to the infrastructure specific overlay sub-chapters. For clarity, further amendments are proposed to the introductory text to ensure that the same exemption for Airport and Airport Related Activities applies to the sub-chapters.	Amend introduction to Infrastructure chapter as follows: ... Further, the Resource Management Act, and therefore the District Plan, share the same broad definition of 'infrastructure', which includes airport and port facilities. <u>Notwithstanding that, this the rules within the Infrastructure Chapter (including the infrastructure specific overlay sub-chapters) does not apply to activities that fall under the definition of airport-activities-purposes or airport related activities located within the Airport Zone (which are dealt with in the Airport Zone chapter), or the definition of port or operational port activities (which are dealt with in the Port Zone chapter). Any infrastructure in the airport or port areas that is inconsistent with those definitions is managed by the provisions in this Infrastructure Chapter.</u> ...
Airways Corporation of New Zealand Limited	FS105.5	Part 2 / Energy Infrastructure and Transport / Infrastructure / General INF	Support	This submission point is consistent with Airways' operations and its core functions.	Allow
Board of Airline Representatives of New Zealand Inc *Late further submission accepted as per Minute 3	FS139.57	Part 2 / Energy Infrastructure and Transport / Infrastructure / General INF	Support	Support WAIL's submission for the reasons set out in WAIL's submission.	Allow
Wellington International Airport Ltd	406.83	Energy Infrastructure and Transport / Infrastructure / General INF	Oppose in part	[See original submission paragraphs 4.111 to 4.113 for full reason]	Opposes the 'Other relevant District Plan provisions' table in the Infrastructure Chapter introduction and seeks amendment.
Board of Airline Representatives of New Zealand Inc *Late further submission accepted as per Minute 3	FS139.58	Energy Infrastructure and Transport / Infrastructure / General INF	Support	Support WAIL's submission for the reasons set out in WAIL's submission.	Allow

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Wellington International Airport Ltd	406.84	Energy Infrastructure and Transport / Infrastructure / General INF	Oppose in part	[See original submission paragraphs 4.111 to 4.113 for full reason]	Amend Other relevant District Plan provisions table in the Infrastructure introduction as follows: Other relevant District Plan provisions ... • Designations – The Designation Chapter lists designations throughout the district and describes the purpose and conditions of any designation and will help determine if approval is required from the Requiring Authority under section 176 of the RMA. ...
Board of Airline Representatives of New Zealand Inc *Late further submission accepted as per Minute 3	FS139.59	Energy Infrastructure and Transport / Infrastructure / General INF	Support	Support WAIL's submission for the reasons set out in WAIL's submission.	Allow
Wellington International Airport Ltd	406.85	Energy Infrastructure and Transport / Infrastructure / General INF	Amend	Notes that Wellington Airport has been excluded from the Infrastructure Chapter of the Proposed Plan. This exclusion is to ensure that the consent requirements within the Infrastructure Chapter do not inadvertently capture airport purpose or airport related activities within the Airport Zone Considers that the Airport still comprises “infrastructure” for the purposes of the section 2 of the Act and is a network utility under section 166 of the RMA. Furthermore, WIAL undertakes airport and airport related, albeit beyond the Airport Zone. Therefore, considers that the objectives and policies of the Infrastructure Chapter should apply to the Airport Chapter.	Seeks that the objectives and policies of the Infrastructure chapter apply to Airport and Airport Related Activities within the Airport Zone. Notes that it is only the methods of the Infrastructure Chapter that should not apply to the Airport and Airport related activities within the Airport Zone.
Airways Corporation of New Zealand Limited	FS105.6	Part 2 / Energy Infrastructure and Transport / Infrastructure / General INF	Support	This submission point is consistent with Airways' operations and its core functions.	Allow
Board of Airline Representatives of New Zealand Inc *Late further submission accepted as per Minute 3	FS139.60	Energy Infrastructure and Transport / Infrastructure / General INF	Support	Support WAIL's submission for the reasons set out in WAIL's submission.	Allow
Living Streets Aotearoa	482.28	Energy Infrastructure and Transport / Infrastructure / General INF	Not specified	Considers that many public spaces are cluttered by poles, signs, café tables, bike parking infrastructure and so on. It is vital that the DP ensures an adequate uncluttered width of footpath, rather than treating an unusable part of the footpath as contributing to provision.	Seeks that new infrastructure should not be located in footpath space.
Wellington Electricity Lines Limited (WELL)	FS27.26	Part 2 / Energy Infrastructure and Transport / Infrastructure / General INF	Oppose	WELL do not agree with this submission point. Although not stated, the submission infers that no new infrastructure is to be placed within 'footpath space'. When possible this is undertaken by WELL as part of the design consideration; however, this is not possible in all circumstances.	Disallow
Living Streets Aotearoa	482.29	Energy Infrastructure and Transport / Infrastructure / General INF	Amend	Considers that the minimum width of footpath on any road should be 2 x 1.8m and not 1.5m. Wider pedestrian spaces have major positive benefits. [Refer to original submission for full detail].	Amend Table 1 - INF: Design of Roads - One Network Framework so that the minimum width of the footpath is 2 x 1.8m. If this cannot be achieved, the road should be a controlled or discretionary activity.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Living Streets Aotearoa	482.30	Energy Infrastructure and Transport / Infrastructure / General INF	Amend	[No specific reason given beyond decision requested - refer to original submission].	Seeks that vehicle accessories should be located on the road and not on the footpath.
Firstgas Limited	304.17	Energy Infrastructure and Transport / Infrastructure / New INF	Amend	Considers that a new Rule should be added to the Infrastructure chapter. The NZ/AS2885 framework and international advice is considered, in respect of the New Zealand context. The separation distances sought, being a separation distance of 20m for living accommodation/residential activities from the pipeline and 30m from the above ground related infrastructure. This will provide a reasonably practicable solution to achieving the safe operation of the network and mitigation of risk for the wellbeing and health and safety of people and communities.	<p>Add a new rule to the Infrastructure chapter as follows:</p> <p><u>Residential activities, including the erection of buildings for residential activities, within 20m of the Gas Transmission Pipeline and/or within 30m of the above ground related infrastructure.</u></p> <p><u>Matters of discretion are:</u></p> <ol style="list-style-type: none"> <u>1. The extent to which the proposed activities are likely to compromise the stability and integrity of the gas transmission pipeline and/or above ground related infrastructure and the operation, maintenance and upgrading of the pipeline;</u> <u>2. The risk of hazards affecting public or individual safety, and the risk of property damage;</u> <u>3. Measures proposed to avoid or mitigate potential adverse effects on the gas transmission pipeline and/or above ground related infrastructure;</u> <u>4. The outcome of any consultation with the owner and operator of the gas transmission pipeline;</u> <p><u>and</u></p> <ol style="list-style-type: none"> <u>5. Whether the sensitive activity could be located a greater distance from the gas transmission pipeline and/or above ground related infrastructure.</u> <p><u>Notification status:</u></p> <p><u>An application for resource consent made in respect of rule INF-R** is precluded from being publicly notified. Notice of any application for resource consent under this rule must be served on the owner and operator of the Gas Transmission Pipeline in accordance with Clause 10(2)(i) of the Resource Management (Forms, Fees, and Procedures) Regulations 2003.</u></p> <p><u>Note:</u></p> <p><u>This rule also applies to the establishment of a residential activity in an existing building, or any change of land use to a residential activity. If a resource consent application is made under this rule, the owner and operator of the Gas Transmission Pipeline will be considered an affected person in accordance with section 95E of the Act and notified of the application, where written approval is not provided.</u></p>
Kāinga Ora – Homes and Communities	FS89.62	Part 2 / Energy Infrastructure and Transport / Infrastructure / New INF	Oppose	Kāinga Ora opposes the changes sought. It is unclear where the spatial application of this rule will apply and as such a cost benefit analysis cannot be undertaken. Kāinga Ora opposes the introduction of the rule.	Disallow
Transpower New Zealand Limited	315.50	Energy Infrastructure and Transport / Infrastructure / New INF	Amend	Generally supports INF-P1 (Recognising and providing for infrastructure). However, seeks that INF-P1 be amended to make reference to the benefits being “provided for” in addition to being “recognised” so that the Policy also reflects the wording in Policy 1 of the NPS-ET, and reflects INF-O1. Given the NPS-ET is specific to the National Grid, the submitter would prefer the provision of a new ‘benefits’ policy (as well as other policies) specific to the National Grid as opposed to amendment to INF-P1. (Option A)	<p>Add a new 'National Grid specific policy as follows:</p> <p><u>INF-NG-P1 Benefits of the National Grid</u></p> <p><u>Recognise and provide for the benefits of the National Grid by enabling the operation, maintenance and upgrade of the existing National Grid and the establishment of new electricity transmission resources.</u></p>
Transpower New Zealand Limited	315.51	Energy Infrastructure and Transport / Infrastructure / New INF	Amend	Considers that given the national significance of the National Grid as recognised in the NPS-ET, the submitter seeks a general policy to give effect to the NPS-ET.	<p>Add a new National Grid specific policy as follows:</p> <p><u>INF-NG-P3 Maintenance, operation, upgrading and development of the National Grid</u></p> <p><u>Enable the operation, maintenance, upgrading and development of the National Grid, recognising its operational, functional and technical constraints, the complexity of the interconnectedness of networks, and its role in servicing existing and planned development.</u></p>

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Transpower New Zealand Limited	315.52	Energy Infrastructure and Transport / Infrastructure / New INF	Amend	<p>Considers that in order to give effects to the NPS-ET, the submitter seeks specific National Grid provisions. Supports in principle INF-P6, however considers it does not reflect or give effect to the NPS-ET and is not specific to the National Grid. Considers it also does not provide a 'seek to avoid' approach for the more sensitive environments and the policy framework in the INF sub chapters for new development of the National Grid within such environments also does not give effect to the 'seek to avoid' policy approach within Policy 8 of the NPS-ET. Considers the provision of a National Grid specific policy provides a comprehensive policy approach that gives effect to the NPS-ET.</p> <p>Considers the development of the National Grid must be managed to ensure the potential for adverse effects is appropriately managed while recognising the significance of the National Grid and the constraints under which it operates. The NPS-ET requires the District Plan to include objectives and policies that:</p> <ul style="list-style-type: none"> - Allow for the consideration of the technical constraints and operational requirements under which the National Grid operates, for example the linear nature of the transmission lines. - Have regard to the extent to which adverse effects have been avoided, remedied or mitigated through the route, site and method selection. - Ensure new planning and development seeks to avoid adverse effects on more sensitive areas. <p>Policies, plans and decision makers must take in to account the characteristics of the National Grid, its technical and operational constraints, and the route, site and method selection process when considering the adverse effects of new National Grid infrastructure on the environment.</p> <p>On this basis, the submitter supports a new policy specific to the development of the National Grid. [Refer to original submission for full reason]</p>	<p>Option 1: Add new National Grid specific policy as follows:</p> <p><u>INF-NG-P6 Development of the National Grid</u></p> <p><u>Provide for the development of the National Grid</u></p> <p><u>1. In urban zoned areas, development should minimise adverse effects on urban amenity and should avoid material adverse effects on the Commercial and Mixed-Use zones, and areas of high recreational or amenity value and existing sensitive activities.</u></p> <p><u>2. Seek to avoid the adverse effects of the National Grid within areas identified in SCHED10 – Outstanding Natural Features and Landscapes, SCHED8 - Significant Natural Areas, and SCHED11 – Special Amenity Landscapes, outside the coastal environment.</u></p> <p><u>3. Where the National Grid has a functional need or operational need to locate within the coastal environment, manage adverse effects by:</u></p> <p><u>a. Seeking to avoid adverse effects on areas identified in SCHED10 – Outstanding Natural Features and Landscapes, SCHED12 - High Coastal Natural Character Areas, SCHED8 - Significant Natural Areas, SCHED11 – Special Amenity Landscapes, and the Coastal Margin.</u></p> <p><u>b. Where it is not practicable to avoid adverse effects on the values of the areas in SCHED10 – Outstanding Natural Features and Landscapes, SCHED12 - High Coastal Natural Character Areas, SCHED8 - Significant Natural Areas, SCHED11 – Special Amenity Landscapes; and the Coastal Margin because of the functional needs or operational needs of the National Grid, remedy or mitigate adverse effects on those values.</u></p> <p><u>c. Seeking to avoid significant adverse effects on:</u></p> <p><u>i. other areas of natural character</u></p> <p><u>ii. natural attributes and character of other natural features and natural landscapes</u></p> <p><u>iii. indigenous biodiversity values that meet the criteria in Policy 11(b) of the NZCPS 2010 d. Avoiding, remedying or mitigating other adverse effects to the extent practicable; and</u></p> <p><u>e. Recognising there may be some areas within SCHED10 – Outstanding Natural Features and Landscapes, SCHED12 - High Coastal Natural Character Areas, SCHED8 - Significant Natural Areas, SCHED11 – Special Amenity Landscapes; and the Coastal Margin, where avoidance of adverse effects is required to protect the identified values and characteristics.</u></p> <p><u>4. Remedy or mitigate any adverse effects from the operation, maintenance, upgrade, major upgrade or development of the National Grid which cannot be avoided, to the extent practicable; and</u></p> <p><u>5. When considering the adverse effects in respect of 1-3 above;</u></p> <p><u>a. Have regard to the extent to which adverse effects have been avoided, remedied or mitigated by the route, site and method selection; and</u></p> <p><u>b. Consider the constraints arising from the operational needs or functional needs of the National Grid, when considering measures to avoid, remedy or mitigate any adverse effects.</u></p>

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Transpower New Zealand Limited	315.53	Energy Infrastructure and Transport / Infrastructure / New INF	Amend	<p>Considers that in order to give effect to the NPS-ET, the submitter seeks specific National Grid provisions. Supports in principle INF-P7, however considers it does not reflect or give effect to the NPS-ET. The primary concerns are:</p> <ul style="list-style-type: none"> - Considers policy title "Reverse sensitivity" only relates to one aspect of Policy 10 of the NPSET and fails to give effect to the second part of this policy - Considers the policy only applies to sensitive activities, ignoring other activities which may compromise the National Grid. Policy INF-P7 does not adequately address Policies 10 and 11 of the NPS-ET - Considers Clause 2. and 3. do not apply to the National Grid. - Considers Clause 1. of the policy is limited to subdivision, ignoring that land use and other development activities (such as earthworks) can compromise the National Grid. - Considers Clause 4. is general in nature and insufficiently directive to give effect the NPS-ET. There is no reference to sensitive activities, or to ensure the National Grid is not compromised. - Considers earthworks are not referenced in the policy, noting there are specific earthworks rules. - Considers given the national significance of the National Grid and non-complying activity status where standards are not complied with, a more directive policy framework is required. As proposed, the policy does not give effect to NPS-ET policies 10 and 11. Use of the word 'manage' within INF-P7 is not sufficiently directive. <p>On this basis Transpower seeks a separate policy framework for the National Grid. [Refer to original submission for full reason]</p>	<p>Seeks a new a National Grid specific policy as follows:</p> <p><u>INF-NG-P4 Adverse effects on the National Grid Protect the safe and efficient operation, maintenance and repair, upgrading, removal and development of National Grid from adverse effects by:</u></p> <ol style="list-style-type: none"> <u>1. Avoiding land uses (including sensitive activities) and buildings and structures within the National Grid Yard that may directly affect or otherwise compromise the National Grid;</u> <u>2. Avoiding reverse sensitivity effects on the National Grid.</u> <u>3. Only allowing subdivision within the National Grid Subdivision Corridor where it can be demonstrated that the National Grid will not be compromised taking into account:</u> <ol style="list-style-type: none"> <u>a. The impact of the subdivision layout and design on the operation, maintenance, and potential upgrade and development of the National Grid, including the ability for continued reasonable access to existing transmission assets for maintenance, inspections and upgrading;</u> <u>b. The ability of any potential future development to comply with NZECP 34.2001 New Zealand Electrical Code of Practice for Electrical Safety Distances; c. The extent to which the design and layout of the subdivision demonstrates that a suitable building platform(s) for a principal building or dwelling can be provided outside of the National Grid Yard for each new lot;</u> <u>d. The risk to the structural integrity of the National Grid;</u> <u>e. The extent to which the subdivision design and consequential development will minimise the risk of injury and/or property damage from the National Grid and the potential reverse sensitivity on and amenity and nuisance effects of the National Grid assets;</u> <u>f. The nature and location of any proposed vegetation to be planted in the vicinity of the National Grid;</u> <u>g. The outcome of any consultation with, and technical advice from, Transpower.</u> <u>4. Only allowing earthworks within the National Grid Yard where it can be demonstrated that the safe and efficient functioning, operation, maintenance and repair, upgrading and development of the National Grid will not be compromised, taking into account:</u> <ol style="list-style-type: none"> <u>a. The extent to which the earthworks may compromise the safe access to and operation, maintenance and repair, upgrading and development of the National Grid;</u> <u>b. The stability of land within and adjacent to the National Grid;</u> <u>c. Risks relating to health or public safety, including the risk of property damage; and</u> <u>d. Technical advice provided by the owner and operator of the National Grid.</u> <p>Should a National Grid specific policy not be provided, Transpower seeks amendment to policy INF-P7 to give effect to the NPSET.</p>
Transpower New Zealand Limited	315.54	Energy Infrastructure and Transport / Infrastructure / New INF	Amend	<p>Considers that it is not clear why INF-NFL-P59 is within the NFL chapter given it relates to the CE and not NFL's. As with other INF-NFL policies, Transpower opposes INF-NFL-P59. Considers policy INF-NFL-P59 has implications for any new Cook Strait cables at Oteranga Bay, and other new National Grid assets within the CE. Considers the avoid directive within the policy does not give effect to the NPS-ET, including Policy 8, noting that it applies to the entire coastal environment and not only the higher values areas. Considers the higher order policy support for the policy is not clear noting the NZCPS does not impose a blanket avoid requirement for the coastal environment, within Policy 6(1)(a) recognising the provision of infrastructure and the transmission of electricity. Seeks a new policy that provides a comprehensive policy approach that gives effect to and reconciles the NPS-ET and NZCPS. Considers given the comprehensive nature of the policy sought, it is proposed to be located in the INF chapter rather than sub chapters.</p>	<p>Add a new National Grid specific policy for Outstanding Natural Features and Landscapes and Significant Amenity Landscapes in the Infrastructure (INF) chapter as follows:</p> <p><u>INF-NG-P6 Development of the National Grid Provide for the development of the National Grid</u></p> <ol style="list-style-type: none"> <u>1. In urban zoned areas, development should minimise adverse effects on urban amenity and should avoid material adverse effects on the Commercial and Mixed-Use zones, and areas of high recreational or amenity value and existing sensitive activities.</u> <u>2. Seek to avoid the adverse effects of the National Grid within areas identified in SCHED10 – Outstanding Natural Features and Landscapes, SCHED8 - Significant Natural Areas, and SCHED11 – Special Amenity Landscapes, outside the coastal environment.</u> <u>3. where the National Grid has a functional need or operational need to locate within the coastal environment, manage adverse effects by:</u>

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
					<p><u>environment, manage adverse effects by:</u></p> <p><u>a. Seeking to avoid adverse effects on areas identified in SCHED10 – Outstanding Natural Features and Landscapes, SCHED12 - High Coastal Natural Character Areas, SCHED8 - Significant Natural Areas, SCHED11 – Special Amenity Landscapes, and the Coastal Margin.</u></p> <p><u>b. where it is not practicable to avoid adverse effects on the values of the areas in SCHED10 – Outstanding Natural Features and Landscapes, SCHED12 - High Coastal Natural Character Areas, SCHED8 - Significant Natural Areas, SCHED11 – Special Amenity Landscapes; and the Coastal Margin because of the functional needs or operational needs of the National Grid, remedy or mitigate adverse effects on those values.</u></p> <p><u>c. Seeking to avoid significant adverse effects on:</u></p> <p><u>i. other areas of natural character</u></p> <p><u>ii. natural attributes and character of other natural features and natural landscapes</u></p> <p><u>iii. indigenous biodiversity values that meet the criteria in Policy 11(b) of the NZCPS 2010</u></p> <p><u>d. Avoiding, remedying or mitigating other adverse effects to the extent practicable; and</u></p> <p><u>e. Recognising there may be some areas within SCHED10 – Outstanding Natural Features and Landscapes, SCHED12 - High Coastal Natural Character Areas, SCHED8 - Significant Natural Areas, SCHED11 – Special Amenity Landscapes; and the Coastal Margin, where avoidance of adverse effects is required to protect the identified values and characteristics.</u></p> <p><u>4. Remedy or mitigate any adverse effects from the operation, maintenance, upgrade, major upgrade or development of the National Grid which cannot be avoided, to the extent practicable; and</u></p> <p><u>5. When considering the adverse effects in respect of 1-3 above:</u></p> <p><u>a. Have regard to the extent to which adverse effects have been avoided, remedied or mitigated by the route, site and method selection; and</u></p> <p><u>b. Consider the constraints arising from the operational needs or functional needs of the National Grid, when considering measures to avoid, remedy or mitigate any adverse effects.</u></p>
Transpower New Zealand Limited	315.55	Energy Infrastructure and Transport / Infrastructure / New INF	Amend	<p>Opposes INF-NFL-P60 and proposes an amended policy framework specific to the National Grid. Has specific concerns the policy does not give effect to the NPSET in that:</p> <ul style="list-style-type: none"> - Specific to clause 1. 2. and 3., considers the NPSET does not require the activity to be of a scale that protects the identified values for ONFL's, not maintains or restores those for SAL's. It does not require the avoidance of visually obtrusive structures within ridgelines and hilltops. The ridgelines and hilltops cover a large extent of the city and given the linear nature of the transmission network and the visual element associated with its support structures, considers it would not be possible or practicable to 'avoid visually obtrusive structures. - In response to clause 4. considers the NPSET does not require significant adverse effects be avoided. - Considers Clause 5. is acceptable in so far as it relates to functional or operational need. Considers the reference to 'reasonably practical alternative locations' is not necessary given the definitions of operational and functional need. Has concerns with the term 'practical' as it is considered to introduce uncertainty. Considers the term 'practicable' is more readily understood. <p>[Refer to original submission for full reason]</p>	<p>Add a new National Grid specific policy, in the Infrastructure (INF chapter), as follows:</p> <p><u>INF-NG-P6 Development of the National Grid</u></p> <p><u>Provide for the development of the National Grid:</u></p> <p><u>1. In urban zoned areas, development should minimise adverse effects on urban amenity and should avoid material adverse effects on the Commercial and Mixed-Use zones, and areas of high recreational or amenity value and existing sensitive activities.</u></p> <p><u>2. Seek to avoid the adverse effects of the National Grid within areas identified in SCHED10 – Outstanding Natural Features and Landscapes, SCHED8 - Significant Natural Areas, and SCHED11 – Special Amenity Landscapes, outside the coastal environment.</u></p> <p><u>3. where the National Grid has a functional need or operational need to locate within the coastal environment, manage adverse effects by:</u></p> <p><u>a. Seeking to avoid adverse effects on areas identified in SCHED10 – Outstanding Natural Features and Landscapes, SCHED12 - High Coastal Natural Character Areas, SCHED8 - Significant Natural Areas, SCHED11 – Special Amenity Landscapes, and the Coastal Margin.</u></p> <p><u>b. where it is not practicable to avoid adverse effects on the values of the areas in SCHED10 – Outstanding Natural Features and Landscapes, SCHED12 - High Coastal Natural Character Areas, SCHED8 - Significant Natural Areas, SCHED11 – Special Amenity Landscapes; and the Coastal Margin because of the functional needs or operational needs of the National Grid, remedy or mitigate adverse effects on those values.</u></p> <p><u>c. Seeking to avoid significant adverse effects on:</u></p>

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
					<p><u>i. other areas of natural character</u></p> <p><u>ii. natural attributes and character of other natural features and natural landscapes</u></p> <p><u>iii. indigenous biodiversity values that meet the criteria in Policy 11(b) of the NZCPS 2010</u></p> <p><u>d. Avoiding, remedying or mitigating other adverse effects to the extent practicable; and</u></p> <p><u>e. oOh!Media Street Furniture New Zealand Limited	316.2	Energy Infrastructure and Transport / Infrastructure / New INF	Amend	<p>Considers that a specific rule is required to provide for ‘transport network’ and ‘ancillary transport network infrastructure’ as a permitted activity. There are no rules which relate to the construction or operation of ‘ancillary transport network infrastructure’ or the ‘transport network’, or any other rules or standards which relate to such activities. However there are rules for other forms of infrastructure and road-based utilities.</p> <p>In the absence of a specific rule for an activity, Rule INF-R15 provides for “Infrastructure buildings and structures not provided for by any other rule in this table” as a permitted activity in all zones, but will result in impractical outcomes for small-scale structures within the road reserve, and will result in a resource consent process being required for all new transport shelters within the road reserve, which is inconsistent with enabling the efficient operation of the transport network.</p> <p>The lack of specific provisions for ‘transport network’ and ‘ancillary transport network infrastructure’ does not efficiently or effectively implement the objectives and policies of the Infrastructure Chapter, namely INF-05 and INF-P9. The provisions, as they are proposed, would result in a requirement for all shelters to obtain resource consent, which is inconsistent with enabling the efficient operation of the transport network.</p> <p>[Refer to original submission for full reason]</p>	<p>Add a new rule in the Infrastructure chapter as follows:</p> <p>INF-R Transport network activities and ancillary transport network structures in the road reserve.</p> <p>All Zones</p> <p>1. Activity status: Permitted</p>
Greater Wellington Regional Council	351.88	Energy Infrastructure and Transport / Infrastructure / New INF	Amend	<p>Considers that the proposed RPS Change 1 (Policies CC.1 and CC.3) seeks District Plans enable infrastructure that supports the uptake of zero and low carbon multi-modal transport that contributes to reducing greenhouse gas emissions. To have regard to this policy, a new policy and rule should be inserted into the PDP to enable the development of this infrastructure such as public EV charging stations.</p>	<p>Seeks to Add a new policy to enable the development of infrastructure required to support zero and low carbon transport and public transport.</p>
Wellington International Airport Limited	FS36.57	Part 2 / Energy Infrastructure and Transport / Infrastructure / General INF	Oppose	<p>WIAL has filed as submission with respect to PC1 of the Proposed RPS and the target to achieve net zero carbon emissions by 2050. It would be premature to impose such requirements on the Proposed Plan, when those provisions have yet to go through the hearings and decision making process.</p>	<p>Disallow</p>
Greater Wellington Regional Council	351.89	Energy Infrastructure and Transport / Infrastructure / New INF	Amend	<p>Considers that the proposed RPS Change 1 (Policies CC.1 and CC.3) seeks District Plans enable infrastructure that supports the uptake of zero and low carbon multi-modal transport that contributes to reducing greenhouse gas emissions. To have regard to this policy, a new policy and rule should be inserted into the PDP to enable the development of this infrastructure such as public EV charging stations.</p>	<p>Seeks to Add a new rule to enable the development of infrastructure required to support zero and low carbon transport and public transport.</p>

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Wellington International Airport Limited	FS36.58	Part 2 / Energy Infrastructure and Transport / Infrastructure / General INF	Oppose	WIAL has filed as submission with respect to PC1 of the Proposed RPS and the target to achieve net zero carbon emissions by 2050. It would be premature to impose such requirements on the Proposed Plan, when those provisions have yet to go through the hearings and decision making process.	Disallow
Waka Kotahi NZ Transport Agency	FS103.3	Part 2 / Energy Infrastructure and Transport / Infrastructure / New INF	Support	New types of infrastructure will be needed to support NZ's conversion to Electric vehicles.	Allow
Greater Wellington Regional Council	351.90	Energy Infrastructure and Transport / Infrastructure / New INF	Amend	Considers that the PDP should encourage greenhouse gas emission reductions and ensure decision making contributes towards achieving future greenhouse emissions targets. Part of this would be the consideration of how new or altered transport infrastructure will operate in a manner which assists in achieving those targets and requiring whole of life carbon emissions assessments. A new policy that encourages consideration of whole of life carbon emissions assessment would have regard to Proposed RPS Change 1 (policy CC.11).	Seeks to include a new policy that encourages an assessment of whole of life carbon emissions for any new or altered transport infrastructure and how new or altered transport infrastructure would assist in meeting reduction targets.
Wellington International Airport Limited	FS36.59	Part 2 / Energy Infrastructure and Transport / Infrastructure / General INF	Oppose	WIAL has filed as submission with respect to PC1 of the Proposed RPS and the target to achieve net zero carbon emissions by 2050. It would be premature to impose such requirements on the Proposed Plan, when those provisions have yet to go through the hearings and decision making process.	Disallow
Waka Kotahi	370.72	Energy Infrastructure and Transport / Infrastructure / New INF	Support	<p>The submitter notes that INF-R3 provides for the “upgrading of existing aboveground infrastructure” as a permitted activity where INF-S1, INF-S3, INF-S4 and INF-S12 are met.</p> <p>It is considered that this rule could be interpreted as applying to the operation, maintenance and repair of the transport network, however: INF-S1 is specific to radiofrequency so it is irrelevant. INF-S3 is specific to earthworks so is relevant.</p> <p>INF-S4 is specific to utilities so is irrelevant.</p> <p>INF-S12 is specific to buildings, structures and activities in the National Grid Yard so is irrelevant.</p> <p>INF-S13, S15, S16, S17 are specific to roads and transport but are not applicable.</p> <p>INF-S18 applies to bus shelters but is not applicable. “Infrastructure” and “Transport Network” are both defined in the interpretation section, but there are no rules specific to the upgrade of the transport network.</p> <p>INF-O5 specifically recognises the benefits of the transport network, which would include the benefits from upgrades.</p> <p>INF-P9 specifically enables upgrading of the transport network, but there is not specific corresponding rule.</p> <p>Accordingly, the submitter notes that it could be interpreted that the upgrading of the transport network is not covered by INF-R3 and a resource consent application would not be assessed against the appropriate standards.</p>	<p>Add a rule in the Infrastructure chapter for the operation, maintenance, repair and upgrading of the transport network:</p> <p><u>INF-RX Operation, maintenance, repair and upgrading of the transport network.</u></p> <p><u>Activity status: permitted</u></p> <p><u>Where compliance is achieved with INF-S3 and INF-S18.</u></p>

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Wellington International Airport Ltd	406.87	Energy Infrastructure and Transport / Infrastructure / New INF	Amend	Considers that it is imperative that infrastructure is protected from incompatible land use activities, including reverse sensitivity effects. [See original submission paragraphs 4.1 to 4.10, 4.11 to 4.15 and 4.56 to 4.69 for full reason]	Add new Policy to INF chapter as follows: <u>INF-P14</u> <u>Avoid where practicable, or otherwise remedy or mitigate adverse effects on infrastructure from subdivision, use and development, including reverse sensitivity effects, which may compromise the operation and capacity of existing, consented and planned infrastructure.</u>
KiwiRail Holdings Limited	FS72.23	Part 2 / District-Wide Matters / Energy, Infrastructure, and Transport / Infrastructure / New INF	Support	Supports a policy to protect infrastructure from adverse effects of land use activities. Considers the relief sought should be allowed because it will (a) will promote the sustainable management of the natural and physical resources in Wellington City, and is therefore consistent with Part 2 and other provisions of the Resource Management Act 1991 (RMA) and the Enabling Housing Supply Amendment Act 2021 (Amendment Act); (b) is consistent with other relevant planning documents, including the Greater Wellington Regional Policy Statement and National Policy Statement for Urban Development 2020; (c) will meet the reasonably foreseeable needs of future generations; (d) will avoid, remedy or mitigate actual and potential adverse effects on the environment; (e) will enable the social, economic and cultural wellbeing of the people of Wellington City; and (f) is the most appropriate way to achieve the objectives of the Proposed Plan in terms of section 32 of the RMA.	Allow
Kāinga Ora – Homes and Communities	FS89.120	Part 2 / Energy Infrastructure and Transport / Infrastructure / New INF	Oppose	Kāinga Ora opposes the addition of the proposed policy which is considered a duplication of INF-P6.	Disallow
Waka Kotahi NZ Transport Agency	FS103.5	Part 2 / Energy Infrastructure and Transport / Infrastructure / New INF	Support	The effect to be controlled is the potential future adverse effect on residents from existing infrastructure. It is appropriate to mitigate that effect when development comes to the nuisance effect (noise from infrastructure).	Allow / Seeks that the that the submission be allowed, but be reworded to focus on the need to mitigate adverse effects on residents locating close to existing infrastructure.
New Zealand Defence Force	FS104.10	Part 2 / Energy Infrastructure and Transport / Infrastructure / New INF	Support	Support the insertion of new Infrastructure Policy INF-P14 to protect infrastructure from incompatible land use activities, including reverse sensitivity effects.	Allow
Board of Airline Representatives of New Zealand Inc *Late further submission accepted as per Minute 3	FS139.62	Part 2 / Energy Infrastructure and Transport / Infrastructure / New INF	Support	Support WAIL's submission for the reasons set out in WAIL's submission.	Allow
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	99.10	Energy Infrastructure and Transport / Infrastructure / INF-01	Support	INF-01 is supported as it sets out a workable and appropriate framework for telecommunications infrastructure.	Retain INF-01 as notified.
Powerco Limited	127.4	Energy Infrastructure and Transport / Infrastructure / INF-01	Support	Considers that these objectives (INF-01, INF-02 and INF-04) set out a workable and appropriate framework for gas infrastructure.	Retain Objective INF-01 (The benefits of Infrastructure) as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Firstgas Limited	304.18	Energy Infrastructure and Transport / Infrastructure / INF-01	Support	INF-01 is generally supported in terms of the outcomes it seeks related to infrastructure.	Retain INF-01 (The benefits of infrastructure) as notified.
Transpower New Zealand Limited	315.56	Energy Infrastructure and Transport / Infrastructure / INF-01	Support	Supports INF-01 (The benefits of infrastructure) in that specific to the National Grid, the objective gives effect to Policy 1 of the NPSET, noting that the objective as proposed is not confined to the National Grid. However, considers that given the national significance of the National Grid and that this significance is recognised in the NPSET, seeks a separate set of provisions for the national grid.	Retain Objective INF-01 (the benefits of infrastructure) as notified.
Wellington Electricity Lines Limited	355.22	Energy Infrastructure and Transport / Infrastructure / INF-01	Support	Supports INF-01 for its intent to recognise and protect the City's electricity distribution network.	Retain INF-01 (The benefits of infrastructure) as notified.
Waka Kotahi	370.74	Energy Infrastructure and Transport / Infrastructure / INF-01	Support	Support these objectives as they refer to infrastructure more broadly and all roads form part of the infrastructure definition, manage adverse effects on infrastructure, provide for infrastructure availability and support transport network	Retain Objective INF-01 (The benefits of infrastructure) as notified.
BP Oil New Zealand, Mobil Oil New Zealand Limited and Z Energy Limited (the Fuel Companies)	372.24	Energy Infrastructure and Transport / Infrastructure / INF-01	Support	[No specific reason given beyond decision requested - refer to original submission]	Retain INF-01 (The benefits of infrastructure) as notified.
Kāinga Ora Homes and Communities	391.107	Energy Infrastructure and Transport / Infrastructure / INF-01	Support	Objective INF-01 is generally supported.	Retain Objective INF-01 (The benefits of infrastructure) as notified.
Ministry of Education	400.17	Energy Infrastructure and Transport / Infrastructure / INF-01	Support in part	Supports INF-01 in part.	Retain INF-01 (The benefits of infrastructure) as notified, with amendments.
Ministry of Education	400.18	Energy Infrastructure and Transport / Infrastructure / INF-01	Amend	Seeks that INF-01 includes reference to 'additional infrastructure', as it includes educational facilities within the definition. The definition of 'infrastructure' does not include educational facilities. The submitter considers that educational facilities are a crucial form of social infrastructure that is needed to support development. The submitter considers that the proposed amendment will allow the importance of educational facilities to be recognised and provided for in Wellington [see original submission for full reason].	Amend INF-01 (The benefits of infrastructure) as follows: The national, regional and local benefits of infrastructure <u>and additional infrastructure</u> are recognised and provided for.
CentrePort Limited	402.44	Energy Infrastructure and Transport / Infrastructure / INF-01	Support	Support the intent of this Objective.	Retain INF-01 (The benefits of infrastructure) as notified.
Wellington International Airport Ltd	406.88	Energy Infrastructure and Transport / Infrastructure / INF-01	Support	[No specific reason given beyond decision requested - see original submission paragraphs 4.1 to 4.10, 4.11 to 4.15.]	Retain INF-01 (Benefits of infrastructure) as notified.
Board of Airline Representatives of New Zealand Inc *Late further submission accepted as per Minute 3	FS139.63	Energy Infrastructure and Transport / Infrastructure / INF-01	Support	Support WAIL's submission for the reasons set out in WAIL's submission.	Allow

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
KiwiRail Holdings Limited	408.26	Energy Infrastructure and Transport / Infrastructure / INF-01	Support	Supports that the objective recognises and provides for the benefits of infrastructure.	Retain INF-01 (The benefits of infrastructure) as notified.
New Zealand Defence Force	423.8	Energy Infrastructure and Transport / Infrastructure / INF-01	Support	Considers that recognising and providing for the national, regional and local benefits of infrastructure, including NZDF facilities, in the District Plan policy framework is important and appropriate.	Retain INF-01 (The benefits of infrastructure) as notified.
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	99.11	Energy Infrastructure and Transport / Infrastructure / INF-02	Support	INF-02 is supported as it sets out a workable and appropriate framework for telecommunications infrastructure.	Retain INF-02 as notified
Powerco Limited	127.5	Energy Infrastructure and Transport / Infrastructure / INF-02	Support	Considers that these objectives (INF-01, INF-02 and INF-04) set out a workable and appropriate framework for gas infrastructure.	Retain Objective INF-02 (Adverse effects of infrastructure) as notified.
Firstgas Limited	304.19	Energy Infrastructure and Transport / Infrastructure / INF-02	Support	INF-02 is generally supported in terms of the outcomes it seeks related to infrastructure.	Retain INF-02 (Adverse effects of infrastructure) as notified.
Transpower New Zealand Limited	315.57	Energy Infrastructure and Transport / Infrastructure / INF-02	Support	Supports the directive within the objective that effects be managed, while recognising functional and operational needs and positive effects.	Retain Objective INF-02 (Adverse effect of infrastructure) as notified.
Wellington Electricity Lines Limited	355.23	Energy Infrastructure and Transport / Infrastructure / INF-02	Support	Supports INF-02 for its intent to manage the adverse effects of infrastructure in the context of positive effects as well as functional need.	Retain INF-02 (Adverse effects of infrastructure) as notified.
Waka Kotahi	370.75	Energy Infrastructure and Transport / Infrastructure / INF-02	Support	Support these objectives as they refer to infrastructure more broadly and all roads form part of the infrastructure definition, manage adverse effects on infrastructure, provide for infrastructure availability and support transport network	Retain Objective INF-02 (Adverse effects of infrastructure) as notified.
BP Oil New Zealand, Mobil Oil New Zealand Limited and Z Energy Limited (the Fuel Companies)	372.25	Energy Infrastructure and Transport / Infrastructure / INF-02	Support	[No specific reason given beyond decision requested - refer to original submission]	Retain INF-02 (Adverse effects of infrastructure) as notified.
Kāinga Ora Homes and Communities	391.108	Energy Infrastructure and Transport / Infrastructure / INF-02	Support in part	Objective INF-02 is partially supported.	Retain Objective INF-02 (Adverse effects of infrastructure) with amendment.
Kāinga Ora Homes and Communities	391.109	Energy Infrastructure and Transport / Infrastructure / INF-02	Amend	Considers that INF-02 should be amended to mitigate and manage any adverse effects from infrastructure on the environment and ensure effects are reduced over time.	Amend Objective INF-02 (Adverse effects of infrastructure) as follows: The adverse effects of infrastructure on the environment are <u>mitigated and</u> managed, while recognising: ...

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Wellington Electricity Lines Limited (WELL)	FS27.10	Part 2 / Energy Infrastructure and Transport / Infrastructure / INF-02	Oppose	WELL do not support the sought amendment to Objective INF-02 as it is considered unnecessary. WELL supported the retention of the Objective as drafted, and consider adding the word 'mitigated' does not materially benefit the high-level purpose and intent of the objective.	Disallow
Waka Kotahi NZ Transport Agency	FS103.6	Part 2 / Energy Infrastructure and Transport / Infrastructure / INF-02	Oppose	Mitigation in this context is part of the toolkit to manage adverse effects. It is not necessary to include it separately.	Disallow
CentrePort Limited	402.45	Energy Infrastructure and Transport / Infrastructure / INF-02	Support in part	Considers that the use of the word managed in the objective is open to interpretation and is of limited assistance to decision makers. In addition the term functional and operational need of infrastructure is not in alignment with the terminology of the Proposed Natural Resources Plan that utilises the terms functional need and operational requirement.	Retain INF-02 (Adverse effects of infrastructure), with amendment.
CentrePort Limited	402.46	Energy Infrastructure and Transport / Infrastructure / INF-02	Amend	Considers that the use of the word managed in the objective is open to interpretation and is of limited assistance to decision makers. In addition the term functional and operational need of infrastructure is not in alignment with the terminology of the Proposed Natural Resources Plan that utilises the terms functional need and operational requirement.	Amend INF-02 (Adverse effects of infrastructure) as follows: The adverse effects of infrastructure on the environment are managed <u>avoided, remedied and mitigated</u> , while recognising: 1. The functional <u>needs</u> and operational <u>need requirements</u> of infrastructure; and 2. That positive effects of infrastructure may be realised locally, regionally or nationally.
Wellington International Airport Ltd	406.89	Energy Infrastructure and Transport / Infrastructure / INF-02	Support	[No specific reason given beyond decision requested - see original submission paragraphs 4.1 to 4.10, 4.11 to 4.15.]	Retain INF-02 (Adverse effects of infrastructure) as notified.
Board of Airline Representatives of New Zealand Inc *Late further submission accepted as per Minute 3	FS139.64	Energy Infrastructure and Transport / Infrastructure / INF-02	Support	Support WAIL's submission for the reasons set out in WAIL's submission.	Allow
KiwiRail Holdings Limited	408.27	Energy Infrastructure and Transport / Infrastructure / INF-02	Support	Supports the objective to recognise the functional and operational need of infrastructure, while managing adverse effects of infrastructure on the environment.	Retain INF-02 (Adverse effects of infrastructure) as notified.
New Zealand Defence Force	423.9	Energy Infrastructure and Transport / Infrastructure / INF-02	Support	Considers that it is important to recognise the functional and operational need of infrastructure along with the positive effects of infrastructure on the City, while acknowledging that infrastructure can have adverse effects on the environment which need to be managed.	Retain INF-02 (Adverse effects of infrastructure) as notified.
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	99.12	Energy Infrastructure and Transport / Infrastructure / INF-03	Support	INF-03 is supported in regard to the intent of managing adverse effects on the function and operation of infrastructure.	Retain INF-03 as notified

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	99.13	Energy Infrastructure and Transport / Infrastructure / INF-03	Oppose in part	The intent of INF-03 in regard to managing adverse effects on the function and operation of infrastructure is supported. However, a typographical error requires correction.	Amend Objective INF-03 as follows: Manage the adverse effects, including reverse sensitivity effects of <u>of</u> subdivision use and development on the function and operation of infrastructure.
KiwiRail Holdings Limited	FS72.24	Part 2 / District-Wide Matters / Energy, Infrastructure, and Transport / Infrastructure / INF-03	Support	Supports correction to ensure the objective reads correctly. Considers the relief sought should be allowed because it will (a) will promote the sustainable management of the natural and physical resources in Wellington City, and is therefore consistent with Part 2 and other provisions of the Resource Management Act 1991 (RMA) and the Enabling Housing Supply Amendment Act 2021 (Amendment Act); (b) is consistent with other relevant planning documents, including the Greater Wellington Regional Policy Statement and National Policy Statement for Urban Development 2020; (c) will meet the reasonably foreseeable needs of future generations; (d) will avoid, remedy or mitigate actual and potential adverse effects on the environment; (e) will enable the social, economic and cultural wellbeing of the people of Wellington City; and (f) is the most appropriate way to achieve the objectives of the Proposed Plan in terms of section 32 of the RMA.	Allow
Meridian Energy Limited	FS101.26	Part 2 / Energy Infrastructure and Transport / Infrastructure / INF-03	Support	Meridian agrees the spelling error ('or') should be amended (to read 'of').	Allow
Powerco Limited	127.6	Energy Infrastructure and Transport / Infrastructure / INF-03	Oppose in part	Considers that the intent of the objective in regard to managing adverse effects on the function and operation of infrastructure is supported. However a typographical error requires connection.	Amend INF-03 (Adverse effect on infrastructure) as follows: Manage the adverse effects, including reverse sensitivity effects of <u>of</u> subdivision use and development on the function and operation of infrastructure.
Meridian Energy Limited	FS101.27	Part 2 / Energy Infrastructure and Transport / Infrastructure / INF-03	Support	Meridian agrees the spelling error ('or') should be amended (to read 'of').	Allow
Heidi Snelson, Aman Hunt, Chia Hunt, Ela Hunt	276.12	Energy Infrastructure and Transport / Infrastructure / INF-03	Not specified	Considers that "Well functioning urban environment" does not apply to INF-03 because it does not comply with points d, f & g in the definition of "Well functioning urban environment" within the PDP. There is no link road from the development site to Churton Park, Glenside or Tawa has been planned. Development area is an isolated area on steep, hilly terrain. The access road from Westchester Drive is flood prone. West Glenside at 395 Middleton Road will not be Climate Change Sustainable and Natural Hazard Resilient. [Refer to original submission for full reason]	Not specified.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Firstgas Limited	304.20	Energy Infrastructure and Transport / Infrastructure / INF-03	Support	INF-03 is generally supported in terms of the outcomes it seeks related to infrastructure.	Retain INF-03 (Adverse effects on infrastructure) as notified.
Transpower New Zealand Limited	315.58	Energy Infrastructure and Transport / Infrastructure / INF-03	Support in part	Supports the provision but seeks a minor grammatical amendment.	Retain INF-03 (Adverse effects on infrastructure), with amendment.
Transpower New Zealand Limited	315.59	Energy Infrastructure and Transport / Infrastructure / INF-03	Amend	Supports the provision but seeks a minor grammatical amendment.	Amend Objective INF-03 (Adverse effects on infrastructure) as follows: INF-03 Adverse effects on infrastructure Manage the adverse effects, including reverse sensitivity effects, of subdivision use and development on the function and operation of infrastructure.
Wellington Electricity Lines Limited	355.24	Energy Infrastructure and Transport / Infrastructure / INF-03	Support	Supports INF-03 as it importantly recognises the need to protect the electricity distribution network against the actual and potential effects of reverse sensitivity.	Retain Objective INF-03 (Adverse effects on infrastructure) as notified.
Waka Kotahi	370.76	Energy Infrastructure and Transport / Infrastructure / INF-03	Support	Support these objectives as they refer to infrastructure more broadly and all roads form part of the infrastructure definition, manage adverse effects on infrastructure, provide for infrastructure availability and support transport network	Retain Objective INF-03 (Adverse effects on infrastructure) as notified.
BP Oil New Zealand, Mobil Oil New Zealand Limited and Z Energy Limited (the Fuel Companies)	372.26	Energy Infrastructure and Transport / Infrastructure / INF-03	Support	[No specific reason given beyond decision requested - refer to original submission]	Retain INF-03 (Adverse effects on infrastructure) as notified.
Kāinga Ora Homes and Communities	391.110	Energy Infrastructure and Transport / Infrastructure / INF-03	Support in part	Objective INF-03 is partially supported. management of adverse effects on the function and operation of the infrastructure network is supported, however reverse sensitivity effects should be deleted.	Retain Objective INF-03 (Adverse effects on infrastructure) with amendment.
Kāinga Ora Homes and Communities	391.111	Energy Infrastructure and Transport / Infrastructure / INF-03	Amend	Considers that INF-03 should be amended to delete reverse sensitivity effects to prevent a single effect from being singled out.	Amend Objective INF-03 (Adverse effects on infrastructure) as follows: Manage the adverse effects, including reverse sensitivity effects, of subdivision use and development on the function and operation of infrastructure.
Wellington Electricity Lines Limited (WELL)	FS27.11	Part 2 / Energy Infrastructure and Transport / Infrastructure / INF-03	Oppose	WELL oppose this submission point for the reasons stated in the original submission. WELL consider that explicit recognition to reverse sensitivity effects is appropriate from an objectives perspective as it provides clear direction to plan users and administrators.	Disallow
Transpower New Zealand Limited	FS29.7	Part 2 / Energy Infrastructure and Transport / Infrastructure / INF-03	Oppose	Transpower supports the objective as notified, noting that Policy 10 of the NPSET makes specific reference to reverse sensitivity effects. On that basis, the relief sought by the submitter is opposed	Disallow

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
KiwiRail Holdings Limited	FS72.25	Part 2 / District-Wide Matters / Energy, Infrastructure, and Transport / Infrastructure / INF-03	Oppose	Rejects the deletion of reverse sensitivity effects. KiwiRail considers it is important to list reverse sensitivity effects within the objection as well as adverse effects. Considers the relief sought should be declined because it a) will not promote the sustainable management of the natural and physical resources in Wellington City, and is therefore contrary to, or inconsistent with, Part 2 and other provisions of the RMA and the Amendment Act; (b) is inconsistent with other relevant planning documents, including the Greater Wellington Regional Policy Statement and National Policy Statement for Urban Development 2020; (c) will not meet the reasonably foreseeable needs of future generations; (d) will not avoid, remedy or mitigate actual and potential adverse effects on the environment; (e) will not enable the social, economic and cultural wellbeing of people of Wellington City; and (f) is not the most appropriate way to achieve the objectives of the Proposed Plan in terms of section 32 of the RMA.	Disallow
Meridian Energy Limited	FS101.29	Part 2 / Energy Infrastructure and Transport / Infrastructure / INF-03	Oppose	Meridian supports retention of the reference to 'reverse sensitivity' (which is a valid potential adverse effect of concern) but agrees the word 'or' should be 'of'.	Allow
New Zealand Defence Force	FS104.7	Part 2 / Energy Infrastructure and Transport / Infrastructure / INF-03	Oppose	It is appropriate for the policy direction of the Proposed Plan to manage the adverse effects of reverse sensitivity, subdivision, use or development on infrastructure.	Disallow / Reject submitter's relief and retain Objective INF-03 as notified.
CentrePort Limited	402.47	Energy Infrastructure and Transport / Infrastructure / INF-03	Support in part	Support with amendment. There is a typographical error.	Retain INF-03 (Adverse effects on infrastructure), with amendment.
CentrePort Limited	402.48	Energy Infrastructure and Transport / Infrastructure / INF-03	Amend	There is a typographical error.	Amend INF-03 (Adverse effects on infrastructure) as follows: Manage the adverse effects, including reverse sensitivity effects or of subdivision use and development on the function and operation of infrastructure.
Meridian Energy Limited	FS101.28	Part 2 / Energy Infrastructure and Transport / Infrastructure / INF-03	Support	Meridian agrees the spelling error ('or') should be amended (to read 'of').	Allow
Wellington International Airport Ltd	406.90	Energy Infrastructure and Transport / Infrastructure / INF-03	Oppose	Considers that it is important that infrastructure is protected from reverse sensitivity effects. [See original submission paragraphs 4.1 to 4.10, 4.11 to 4.15 for further detail.]	Opposes INF-03 and seeks amendment.
Board of Airline Representatives of New Zealand Inc *Late further submission accepted as per Minute 3	FS139.65	Energy Infrastructure and Transport / Infrastructure / INF-03	Support	Support WAIL's submission for the reasons set out in WAIL's submission.	Allow

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Wellington International Airport Ltd	406.91	Energy Infrastructure and Transport / Infrastructure / INF-03	Oppose	Considers that it is important that infrastructure is protected from reverse sensitivity effects. [See original submission paragraphs 4.1 to 4.10, 4.11 to 4.15 for further detail.]	Amend INF-03 (Adverse effects on infrastructure) as follows: ... Manage the adverse effects, including reverse sensitivity effects or subdivision use and development on the function and operation of infrastructure. <u>Infrastructure is protected from incompatible subdivision, use and development, including reverse sensitivity effects.</u>
Kāinga Ora – Homes and Communities	FS89.121	Part 2 / Energy Infrastructure and Transport / Infrastructure / INF-03	Oppose	Kāinga Ora opposes the proposed amendment as adverse effects can be managed so infrastructure development, function and operation is not constrained. Use of the term 'incompatible' does not provide sufficient clarity for Plan users and may unnecessarily constrain development opportunities.	Disallow / Kāinga Ora seeks that INF-03 is retained and amended as per their original submission
New Zealand Defence Force	FS104.8	Part 2 / Energy Infrastructure and Transport / Infrastructure / INF-03	Support	Support amendment to the objective to adopt a more directive policy intent to protecting infrastructure from incompatible subdivision, use and development, including reverse sensitivity effects	Allow
Board of Airline Representatives of New Zealand Inc *Late further submission accepted as per Minute 3	FS139.66	Part 2 / Energy Infrastructure and Transport / Infrastructure / INF-03	Support	Support WAIL's submission for the reasons set out in WAIL's submission.	Allow
Wellington International Airport Ltd	406.92	Energy Infrastructure and Transport / Infrastructure / INF-03	Oppose	Considers that it is important that infrastructure is protected from reverse sensitivity effects. [See original submission paragraphs 4.1 to 4.10, 4.11 to 4.15 for further detail.]	Delete INF-03 (Adverse effects on infrastructure).
Board of Airline Representatives of New Zealand Inc *Late further submission accepted as per Minute 3	FS139.67	Energy Infrastructure and Transport / Infrastructure / INF-03	Support	Support WAIL's submission for the reasons set out in WAIL's submission.	Allow
KiwiRail Holdings Limited	408.28	Energy Infrastructure and Transport / Infrastructure / INF-03	Support	Supports that the objective protects infrastructure from adverse effects of subdivision, use and development, including reverse sensitivity.	Retain INF-03 (Adverse effects on infrastructure) as notified.
New Zealand Defence Force	423.10	Energy Infrastructure and Transport / Infrastructure / INF-03	Support	Considers that it is appropriate to provide for the management of reverse sensitivity effects from development on the function and operation of infrastructure.	Retain INF-03 (Adverse effects on infrastructure) as notified.
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	99.14	Energy Infrastructure and Transport / Infrastructure / INF-04	Support	INF-04 is supported as it sets out a workable and appropriate framework for telecommunications infrastructure.	Retain INF-04 as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Powerco Limited	127.7	Energy Infrastructure and Transport / Infrastructure / INF-04	Support	Considers that these objectives (INF-01, INF-02 and INF-04) set out a workable and appropriate framework for gas infrastructure.	Retain Objective INF-04 (Infrastructure availability) as notified.
Fire and Emergency New Zealand	273.29	Energy Infrastructure and Transport / Infrastructure / INF-04	Support	Supports the objective as it promotes the provision of safe, effective and resilient infrastructure for subdivision, use and development.	Retain INF-04 (Infrastructure availability) as notified.
Heidi Snelson, Aman Hunt, Chia Hunt, Ela Hunt	276.13	Energy Infrastructure and Transport / Infrastructure / INF-04	Not specified	<p>Considers that "Well functioning urban environment" does not apply to INF-04 because it does not comply with points d, f & g in the definition of "Well functioning urban environment" within the PDP.</p> <p>There is no link road from the development site to Churton Park, Glenside or Tawa has been planned.</p> <p>Development area is an isolated area on steep, hilly terrain.</p> <p>The access road from Westchester Drive is flood prone.</p> <p>West Glenside at 395 Middleton Road will not be Climate Change Sustainable and Natural Hazard Resilient.</p> <p>[Refer to original submission for full reason]</p>	Not specified.
Firstgas Limited	304.21	Energy Infrastructure and Transport / Infrastructure / INF-04	Support	INF-04 is generally supported in terms of the outcomes it seeks related to infrastructure.	Retain INF-04 (Infrastructure availability) as notified.
Wellington Electricity Lines Limited	355.25	Energy Infrastructure and Transport / Infrastructure / INF-04	Support	Supports INF-04 as it clearly expresses the need for safe effective and resilient infrastructure for both existing and planned development.	Retain Objective INF-04 (Infrastructure availability) as notified.
Waka Kotahi	370.77	Energy Infrastructure and Transport / Infrastructure / INF-04	Support	Support these objectives as they refer to infrastructure more broadly and all roads form part of the infrastructure definition, manage adverse effects on infrastructure, provide for infrastructure availability and support transport network	Retain Objective INF-04 (Infrastructure availability) as notified.
BP Oil New Zealand, Mobil Oil New Zealand Limited and Z Energy Limited (the Fuel Companies)	372.27	Energy Infrastructure and Transport / Infrastructure / INF-04	Support	[No specific reason given beyond decision requested - refer to original submission]	Retain INF-04 (Infrastructure availability) as notified.
Kāinga Ora Homes and Communities	391.112	Energy Infrastructure and Transport / Infrastructure / INF-04	Support	Objective INF-04 is generally supported.	Retain Objective INF-04 (Infrastructure availability) as notified.
Ministry of Education	400.19	Energy Infrastructure and Transport / Infrastructure / INF-04	Support in part	Supports INF-04 in part.	Retain INF-04 (Infrastructure availability) as notified, with amendments.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Ministry of Education	400.20	Energy Infrastructure and Transport / Infrastructure / INF-04	Amend	Seeks that INF-04 includes reference to 'additional infrastructure', as it includes educational facilities within the definition. The definition of 'infrastructure' does not include educational facilities. The submitter notes that under the NPS-UD Council has an obligation to ensure sufficient additional infrastructure (which includes educational facilities) is provided in development and local authorities must be satisfied that additional infrastructure to service the development capacity is likely to be available [see original submission for full reason].	Amend INF-04 (Infrastructure availability) as follows: Safe, effective and resilient infrastructure <u>and additional infrastructure</u> is available for, and integrated with, existing and planned subdivision, use and development.
KiwiRail Holdings Limited	408.29	Energy Infrastructure and Transport / Infrastructure / INF-04	Support	Supports the objective to integrate safe, effective and resilient infrastructure will existing and planned use and development.	Retain INF-04 (Infrastructure availability) as notified.
Onslow Residents Community Association	FS80.47	Part 2 / Energy Infrastructure and Transport / Infrastructure / INF-04	Support	Supports the submission that public safety at level crossings is crucial, and protection of sightlines is a key means of ensuring this.	Allow / Seeks to incorporate sightline rule changes as outlined by the submitter.
Tawa Business Group	107.12	Energy Infrastructure and Transport / Infrastructure / INF-05	Not specified	Considers that currently there is no clear plan for the upgrading of the existing transport network and ongoing transport planning is needed in order to ensure the traffic congestion of Main Road is not worsened as a result of increased density within both Tawa and the locality.	Seeks that an integrated transport strategy enables improved accessibility to public transport and provision of shared paths to encourage walking, cycling, scooters etc.
Tawa Business Group	107.13	Energy Infrastructure and Transport / Infrastructure / INF-05	Amend	Considers that INF-05 should be clarified to better understand Council's role in the active upgrading and development of the existing transport network. Considers that currently there is no clear plan for this upgrading and ongoing transport planning is needed in order to ensure the traffic congestion of Main Road is not worsened as a result of increased density within both Tawa and the locality.	Seeks that INF-05 (Transport Network) should go further to clarify Council's role in the active upgrading and development of the existing transport network.
Heidi Snelson, Aman Hunt, Chia Hunt, Ela Hunt	276.14	Energy Infrastructure and Transport / Infrastructure / INF-05	Not specified	Considers that "Well functioning urban environment" does not apply to INF-05 because it does not comply with points d, f & g in the definition of "Well functioning urban environment" within the PDP. There is no link road from the development site to Churton Park, Glenside or Tawa has been planned. Development area is an isolated area on steep, hilly terrain. The access road from Westchester Drive is flood prone. West Glenside at 395 Middleton Road will not be Climate Change Sustainable and Natural Hazard Resilient. [Refer to original submission for full reason]	Not specified.
Paihikara Ki Pōneke Cycle Wellington	302.14	Energy Infrastructure and Transport / Infrastructure / INF-05	Support	INF-05 is supported as it provides infrastructure that enables people of all ages and abilities to cycle aligns with CW's objectives.	Retain Objective INF-05 (Transport network) as notified.
Waka Kotahi	370.78	Energy Infrastructure and Transport / Infrastructure / INF-05	Support	Support these objectives as they refer to infrastructure more broadly and all roads form part of the infrastructure definition, manage adverse effects on infrastructure, provide for infrastructure availability and support transport network	Retain Objective INF-05 (Transport network) as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
BP Oil New Zealand, Mobil Oil New Zealand Limited and Z Energy Limited (the Fuel Companies)	372.28	Energy Infrastructure and Transport / Infrastructure / INF-05	Support	[No specific reason given beyond decision requested - refer to original submission]	Retain INF-05 (Transport network) as notified.
Kāinga Ora Homes and Communities	391.113	Energy Infrastructure and Transport / Infrastructure / INF-05	Oppose in part	Objective INF-05 is opposed as it divides transport related provisions between the transport and infrastructure chapters. This is inconsistent with best practice and makes navigation of the plan difficult for users.	Delete Objective INF-05 (Transport network) and move the objective to the Transport chapter.
KiwiRail Holdings Limited	FS72.26	P+E1399art 2 / District-Wide Matters / Energy, Infrastructure, and Transport / Infrastructure / INF-05	Not specified	KiwiRail has an interest in the relief sought. District Plans throughout the country typically separate transport and infrastructure provisions into different chapters. If this relief sought is approved, KiwiRail seeks to ensure that the introduction text, objectives, policies and methods are updated to keep the suite of provisions relating to the transport network together for accurate plan interpretation and implementation.	Amend
Ministry of Education	400.21	Energy Infrastructure and Transport / Infrastructure / INF-05	Support	Supports INF-05. The submitter considers that INF-05 will enable a well-functioning and connected city while recognising the need for the transport network to support additional infrastructure.	Retain INF-05 (Transport network) as notified.
KiwiRail Holdings Limited	408.30	Energy Infrastructure and Transport / Infrastructure / INF-05	Support	Supports a transport network that improves connectivity, supports the health and well-being of people and supports development infrastructure.	Retain INF-05 (Transport network) as notified.
BP Oil New Zealand, Mobil Oil New Zealand Limited and Z Energy Limited (the Fuel Companies)	372.29	Energy Infrastructure and Transport / Infrastructure / INF-06	Support	[No specific reason given beyond decision requested - refer to original submission]	Retain INF-06 (Amateur radio configurations) as notified.
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	99.15	Energy Infrastructure and Transport / Infrastructure / INF-P1	Support	INF-P1 is supported as it provides a workable and appropriate framework for telecommunications infrastructure.	Retain INF-P1 (Recognising and providing for infrastructure) as notified.
Powerco Limited	127.8	Energy Infrastructure and Transport / Infrastructure / INF-P1	Support	Considers that these policies (INF-P1 to INF-P6, INF-P12 and INF-P13) provide a workable and appropriate framework for gas distribution infrastructure.	Retain Policy INF-P1 (Recognising and providing for infrastructure) as notified.
Fire and Emergency New Zealand	273.30	Energy Infrastructure and Transport / Infrastructure / INF-P1	Support	Supports the policy as it seeks to enable the effective and efficient operation of existing infrastructure whilst also providing for upgrades to, and the development of new infrastructure in appropriate locations. The policy also recognises the importance of infrastructure lifeline utilities during an emergency, which for FENZ the road network and reticulated water network.	Retain INF-P1 (Recognising and providing for infrastructure) as notified.
Firstgas Limited	304.22	Energy Infrastructure and Transport / Infrastructure / INF-P1	Support	INF-P1 is generally supported in terms of the outcomes they seek related to infrastructure.	Retain INF-P1 (Recognising and providing for infrastructure) as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Transpower New Zealand Limited	315.60	Energy Infrastructure and Transport / Infrastructure / INF-P1	Support in part	Generally supports INF-P1 (Recognising and providing for infrastructure). However, seeks that INF-P1 be amended to make reference to the benefits being "provided for" in addition to being "recognised" so that the Policy also reflects the wording in Policy 1 of the NPS-ET, and reflects INF-O1. Given the NPS-ET is specific to the National Grid, the submitter would prefer the provision of a new 'benefits' policy (as well as other policies) specific to the National Grid as opposed to amendment to INF-P1.	Retain INF-P1 (Recognising and providing for infrastructure), with either an amendment or a new policy specific to the National Grid.
Transpower New Zealand Limited	315.61	Energy Infrastructure and Transport / Infrastructure / INF-P1	Amend	Generally supports INF-P1 (Recognising and providing for infrastructure). However, seeks that INF-P1 be amended to make reference to the benefits being "provided for" in addition to being "recognised" so that the Policy also reflects the wording in Policy 1 of the NPS-ET, and reflects INF-O1. Given the NPS-ET is specific to the National Grid, the submitter would prefer the provision of a new 'benefits' policy (as well as other policies) specific to the National Grid as opposed to amendment to INF-P1. (Option B)	Seeks that should a National Grid specific policy not be provided, policy INF-P1 (Recognising and providing for infrastructure) should be amended to give effect to the NPS-ET.
Wellington Electricity Lines Limited	355.26	Energy Infrastructure and Transport / Infrastructure / INF-P1	Support	Supports INF-P1 as it broadly meets the requirements for the submitter in providing electricity distribution and supply functions across the City.	Retain INF-P1 (Recognising and providing for infrastructure) as notified.
Waka Kotahi	370.79	Energy Infrastructure and Transport / Infrastructure / INF-P1	Support	Support policies as worded as they provide for infrastructure, the coordination of infrastructure with land use, subdivision and development growth, any technological advances and undergrounding of infrastructure in urban areas where feasible.	Retain INF-P1 (Recognising and providing for infrastructure) as notified.
BP Oil New Zealand, Mobil Oil New Zealand Limited and Z Energy Limited (the Fuel Companies)	372.30	Energy Infrastructure and Transport / Infrastructure / INF-P1	Support	[No specific reason given beyond decision requested - refer to original submission]	Retain INF-P1 (Recognising and providing for infrastructure) as notified.
Kāinga Ora Homes and Communities	391.114	Energy Infrastructure and Transport / Infrastructure / INF-P1	Support	INF-P1 is generally supported.	Retain INF-P1 (Recognising and providing for infrastructure) as notified.
Ministry of Education	400.22	Energy Infrastructure and Transport / Infrastructure / INF-P1	Support in part	Supports INF-P1 in part.	Retain INF-P1 (Recognising and providing for infrastructure), with amendment.
Ministry of Education	400.23	Energy Infrastructure and Transport / Infrastructure / INF-P1	Amend	Seeks that INF-P1 includes reference to 'additional infrastructure', as it includes educational facilities within the definition. The submitter notes that educational facilities are a crucial form of infrastructure to allow communities to meet their social and economic wellbeing. The proposed amendment will allow the importance of educational facilities to be recognised and provided for in Wellington [see original submission for full reason].	Amend INF-P1 (Recognising and providing for infrastructure), as follows: Recognise the benefits of infrastructure by: ... 3. Providing for significant upgrades to, and the development of new infrastructure <u>and additional infrastructure</u> ; and ...
CentrePort Limited	402.49	Energy Infrastructure and Transport / Infrastructure / INF-P1	Support	Support the intent of this policy.	Retain INF-P1 (Recognising and providing for infrastructure) as notified.
Wellington International Airport Ltd	406.93	Energy Infrastructure and Transport / Infrastructure / INF-P1	Support	[No specific reason given beyond decision requested - see original submission paragraphs 4.1 to 4.10, 4.11 to 4.15.]	Retain INF-P1 (Recognising and providing for infrastructure) as notified.
KiwiRail Holdings Limited	408.31	Energy Infrastructure and Transport / Infrastructure / INF-P1	Support	Supports recognising and providing for infrastructure in policy. KiwiRail support provision for operation, maintenance, repair, removal of infrastructure as well as upgrades to, and new infrastructure.	Retain INF-P1 (Recognising and providing for infrastructure) as notified.
New Zealand Defence Force	423.11	Energy Infrastructure and Transport / Infrastructure / INF-P1	Support	Considers that it is important for the District Plan policy framework to recognise the benefits of infrastructure, including providing for the functions and responsibilities of infrastructure as lifeline utilities during an emergency.	Retain INF-P1 (Recognising and providing for infrastructure) as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	99.16	Energy Infrastructure and Transport / Infrastructure / INF-P2	Support	INF-P2 is supported as it provides a workable and appropriate framework for telecommunications infrastructure.	Retain INF-P2 (Coordinating infrastructure with land use, subdivision, development and urban growth) as notified.
Tawa Business Group	107.14	Energy Infrastructure and Transport / Infrastructure / INF-P2	Amend	Considers that INF-P2 should be clarified to better understand Council's role in the active upgrading and development of the existing transport network. Considers that currently there is no clear plan for this upgrading and ongoing transport planning is needed in order to ensure the traffic congestion of Main Road is not worsened as a result of increased density within both Tawa and the locality.	Seeks that INF-P2 (Coordinating infrastructure with land use, subdivision, development and urban growth) should go further to clarify Council's role in the active upgrading and development of the existing transport network.
Powerco Limited	127.9	Energy Infrastructure and Transport / Infrastructure / INF-P2	Support	Considers that these policies (INF-P1 to INF-P6, INF-P12 and INF-P13) provide a workable and appropriate framework for gas distribution infrastructure.	Retain Policy INF-P2 Coordinating infrastructure with land use, subdivision, development and urban growth) as notified.
Fire and Emergency New Zealand	273.31	Energy Infrastructure and Transport / Infrastructure / INF-P2	Support	Supports the policy as it seeks the coordination of infrastructure planning and delivery with land use, subdivision, development and urban growth. Feedback points on the necessity for specific rules and standards to provide the necessary connections to three waters infrastructure where subdivision consent is not expressly required is set out in each relevant zone	Retain INF-P2 (Coordinating infrastructure with land use, subdivision, development and urban growth) as notified.
Firstgas Limited	304.23	Energy Infrastructure and Transport / Infrastructure / INF-P2	Support	INF-P2 is generally supported in terms of the outcomes they seek related to infrastructure.	Retain INF-P2 (Coordinating infrastructure with land use, subdivision, development and urban growth) as notified.
Bruce Rae	334.3	Energy Infrastructure and Transport / Infrastructure / INF-P2	Support	INF-P2 is supported, as it considers transport networks as one of the components of infrastructure and matches the intensity of land use to the public transport infrastructure serving them. The draft plan did this on a fairly consistent basis for all the stations within WCC boundaries served by Wellington's electrified train network.	Retain INF-P2 (Coordinating infrastructure with land use, subdivision, development and urban growth) as notified.
Wellington Electricity Lines Limited	355.27	Energy Infrastructure and Transport / Infrastructure / INF-P2	Support in part	Supports INF-P2 for its intent as it reflects the previous feedback to Council under the preliminary consultation phase of the PDP. This Policy is supported as it ensures that development will be appropriately coordinated with the upgrading of development of the electricity supply network so service current and future development needs. However, it is considered that the Policy could be slightly improved.	Retain INF-P2 (Coordinating infrastructure with land use, subdivision, development and urban growth) with amendment.
Wellington Electricity Lines Limited	355.28	Energy Infrastructure and Transport / Infrastructure / INF-P2	Amend	Considers that INF-P2 could be slightly improved so as to also include infrastructure renewal and replacement –i.e., brownfields as well as greenfields where practical.	Amend INF-P2 (Coordinating infrastructure with land use, subdivision, development and urban growth) as follows: Enable the efficient coordination, integration and alignment of infrastructure planning and delivery with land use, subdivision, development and urban growth so that <u>existing and</u> future land use and infrastructure is integrated, efficient and aligned.
Waka Kotahi	370.80	Energy Infrastructure and Transport / Infrastructure / INF-P2	Support	Support policies as worded as they provide for infrastructure, the coordination of infrastructure with land use, subdivision and development growth, any technological advances and undergrounding of infrastructure in urban areas where feasible.	Retain INF-P2 (Coordinating infrastructure with land use, subdivision, development and urban growth) as notified.
BP Oil New Zealand, Mobil Oil New Zealand Limited and Z Energy Limited (the Fuel Companies)	372.31	Energy Infrastructure and Transport / Infrastructure / INF-P2	Support	[No specific reason given beyond decision requested - refer to original submission]	Retain INF-P2 (Coordinating infrastructure with land use, subdivision, development and urban growth) as notified.
Kāinga Ora Homes and Communities	391.115	Energy Infrastructure and Transport / Infrastructure / INF-P2	Support	INF-P2 is generally supported.	Retain INF-P2 (Coordinating infrastructure with land use, subdivision, development and urban growth) as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Ministry of Education	400.24	Energy Infrastructure and Transport / Infrastructure / INF-P2	Support in part	Supports INF-P2 in part.	Retain INF-P2 (Coordinating infrastructure with land use, subdivision, development and urban growth), with amendment.
Ministry of Education	400.25	Energy Infrastructure and Transport / Infrastructure / INF-P2	Amend	Seeks that INF-P2 includes reference to 'additional infrastructure', as it includes educational facilities within the definition. The submitter notes that the NPS-UD requires local authorities to engage with providers of development infrastructure and additional infrastructure to achieve integrated land use and infrastructure planning. The submitter considers that additional infrastructure, including educational facilities, need to be carefully planned and coordinated to meet the demand of growing communities [see original submission for full reason].	Amend INF-P2 (Coordinating infrastructure with land use, subdivision, development and urban growth), as follows: Enable the efficient coordination, integration and alignment of infrastructure <u>and additional infrastructure</u> planning and delivery with land use, subdivision, development and urban growth so that future land use and infrastructure is integrated, efficient and aligned.
CentrePort Limited	402.50	Energy Infrastructure and Transport / Infrastructure / INF-P2	Support	Support the intent of this policy.	Retain INF-P2 (Coordinating infrastructure with land use, subdivision, development and urban growth) as notified.
KiwiRail Holdings Limited	408.32	Energy Infrastructure and Transport / Infrastructure / INF-P2	Support	Supports coordination of infrastructure with land use, subdivision, development and urban growth.	Retain INF-P2 (Coordinating infrastructure with land use, subdivision, development and urban growth) as notified.
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	99.17	Energy Infrastructure and Transport / Infrastructure / INF-P3	Support	INF-P3 is supported as it provides a workable and appropriate framework for telecommunications infrastructure.	Retain INF-P3 (Technological advances) as notified.
Powerco Limited	127.10	Energy Infrastructure and Transport / Infrastructure / INF-P3	Support	Considers that these policies (INF-P1 to INF-P6, INF-P12 and INF-P13) provide a workable and appropriate framework for gas distribution infrastructure.	Retain Policy INF-P3 (Technological advances) as notified.
Transpower New Zealand Limited	315.62	Energy Infrastructure and Transport / Infrastructure / INF-P3	Support	[No specific reason provided beyond decision requested - refer to original submission]	Retain INF-P3 (Technological advances) as notified.
Wellington Electricity Lines Limited	355.29	Energy Infrastructure and Transport / Infrastructure / INF-P3	Support	Supports INF-P1 as it correctly acknowledges that technical advances in the supply and use of electricity will be experienced throughout the life of the PDP. As New Zealand advances toward a more decarbonised society, the use of technology (i.e., EV and associated infrastructure) will change and thus have an impact on the services provided by the electricity distribution network. It is agreed that in order to adapt to new technologies the PDP should contain appropriate flexibility – with such flexibility being reflected throughout the rule and standards sections of the PDP.	Retain INF-P3 (Technological advances) as notified.
Waka Kotahi	370.81	Energy Infrastructure and Transport / Infrastructure / INF-P3	Support	Support policies as worded as they provide for infrastructure, the coordination of infrastructure with land use, subdivision and development growth, any technological advances and undergrounding of infrastructure in urban areas where feasible.	Retain INF-P3 (Technological advances) as notified.
BP Oil New Zealand, Mobil Oil New Zealand Limited and Z Energy Limited (the Fuel Companies)	372.32	Energy Infrastructure and Transport / Infrastructure / INF-P3	Support	[No specific reason given beyond decision requested - refer to original submission]	Retain INF-P3 (Technological advances) as notified.
Kāinga Ora Homes and Communities	391.116	Energy Infrastructure and Transport / Infrastructure / INF-P3	Support	INF-P3 is generally supported.	Retain INF-P3 (Technological advances) as notified.
CentrePort Limited	402.51	Energy Infrastructure and Transport / Infrastructure / INF-P3	Support	Support the intent of this policy.	Retain INF-P3 (Technological advances) as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Wellington International Airport Ltd	406.94	Energy Infrastructure and Transport / Infrastructure / INF-P3	Support	[No specific reason given beyond decision requested - see original submission paragraphs 4.1 to 4.10, 4.11 to 4.15.]	Retain INF-P3 (Technological advances) as notified.
KiwiRail Holdings Limited	408.33	Energy Infrastructure and Transport / Infrastructure / INF-P3	Support	Supports policy that recognises the benefits that new technologies can bring to rail in terms of efficiency of the operation and safety and resilience of the network.	Retain INF-P3 (Technological advances) as notified.
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	99.18	Energy Infrastructure and Transport / Infrastructure / INF-P4	Support	INF-P4 is supported as it provides a workable and appropriate framework for telecommunications infrastructure.	Retain INF-P4 (Undergrounding of infrastructures) as notified.
Powerco Limited	127.11	Energy Infrastructure and Transport / Infrastructure / INF-P4	Support	Considers that these policies (INF-P1 to INF-P6, INF-P12 and INF-P13) provide a workable and appropriate framework for gas distribution infrastructure.	Retain Policy INF-P4 (Undergrounding of infrastructure) as notified.
Firstgas Limited	304.24	Energy Infrastructure and Transport / Infrastructure / INF-P4	Support	INF-P4 is generally supported in terms of the outcomes they seek related to infrastructure.	Retain INF-P4 (Undergrounding of infrastructure) as notified.
Transpower New Zealand Limited	315.63	Energy Infrastructure and Transport / Infrastructure / INF-P4	Support	Supports the policy, and specifically the use of the word 'encourage', and references to where 'practicable' and 'technically feasible'.	Retain INF-P4 (Undergrounding of infrastructure) as notified.
Wellington Electricity Lines Limited	355.30	Energy Infrastructure and Transport / Infrastructure / INF-P4	Support in part	Supports INF-P4 as the wording allows for overhead infrastructure where undergrounding assets is not practicable or technically feasible. However, the provision should include a reference to economic and technical feasibility.	Retain INF-P4 (Undergrounding of infrastructure) with amendment.
Wellington Electricity Lines Limited	355.31	Energy Infrastructure and Transport / Infrastructure / INF-P4	Amend	Considers that INF-P4 should be amended to reference to economic and technical feasibility. Underground infrastructure can be as unfeasible from a technical perspective, as well as being cost prohibitive to construct. Notwithstanding the above, it is also noted that some underground infrastructure depends on some above ground cabinets or additional overhead supports to facilitate a new underground section.	Amend INF-P4 (Undergrounding of infrastructure) as follows: Encourage the undergrounding of new infrastructure in urban areas where it is practicable, financially and technically feasible.
Waka Kotahi	370.82	Energy Infrastructure and Transport / Infrastructure / INF-P4	Support	Support policies as worded as they provide for infrastructure, the coordination of infrastructure with land use, subdivision and development growth, any technological advances and undergrounding of infrastructure in urban areas where feasible.	Retain INF-P4 (Undergrounding of infrastructure) as notified.
BP Oil New Zealand, Mobil Oil New Zealand Limited and Z Energy Limited (the Fuel Companies)	372.33	Energy Infrastructure and Transport / Infrastructure / INF-P4	Support	[No specific reason given beyond decision requested - refer to original submission]	Retain INF-P4 (Undergrounding of infrastructure) as notified.
Kāinga Ora Homes and Communities	391.117	Energy Infrastructure and Transport / Infrastructure / INF-P4	Support	INF-P4 is generally supported.	Retain INF-P4 (Undergrounding of infrastructure) as notified.
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	99.19	Energy Infrastructure and Transport / Infrastructure / INF-P5	Support	INF-P5 is supported as it provides a workable and appropriate framework for telecommunications infrastructure.	Retain INF-P5 (Adverse effects of infrastructure) as notified.
Powerco Limited	127.12	Energy Infrastructure and Transport / Infrastructure / INF-P5	Support	Considers that these policies (INF-P1 to INF-P6, INF-P12 and INF-P13) provide a workable and appropriate framework for gas distribution infrastructure.	Retain Policy INF-P5 (Adverse effects of infrastructure) as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Firstgas Limited	304.25	Energy Infrastructure and Transport / Infrastructure / INF-P5	Support	INF-P5 is generally supported in terms of the outcomes they seek related to infrastructure.	Retain INF-P5 (Adverse effects of infrastructure) as notified.
Transpower New Zealand Limited	315.64	Energy Infrastructure and Transport / Infrastructure / INF-P5	Support	Considers that given the general nature of INF-P5 (Adverse effects of infrastructure), the submitter is supportive of the policy. In particular the use of the word 'manage' is supported. However, as highlighted in other points, in order to give effect to the NPS-ET, a specific National Grid provision is sought.	Retain INF-P5 (Adverse effects of infrastructure) as notified, notwithstanding that the submitter has sought a specific suite of National Grid provisions.
Transpower New Zealand Limited	315.65	Energy Infrastructure and Transport / Infrastructure / INF-P5	Support in part	<p>Considers that in order to give effects to the NPS-ET, the submitter seeks specific National Grid provisions. Supports in principle INF-P6, however considers it does not reflect or give effect to the NPS-ET and is not specific to the National Grid. Considers it also does not provide a 'seek to avoid' approach for the more sensitive environments and the policy framework in the INF sub chapters for new development of the National Grid within such environments also does not give effect to the 'seek to avoid' policy approach within Policy 8 of the NPS-ET. Considers the provision of a National Grid specific policy provides a comprehensive policy approach that gives effect to the NPS-ET. Considers the development of the National Grid must be managed to ensure the potential for adverse effects is appropriately managed while recognising the significance of the National Grid and the constraints under which it operates. The NPS-ET requires the District Plan to include objectives and policies that:</p> <ul style="list-style-type: none"> - Allow for the consideration of the technical constraints and operational requirements under which the National Grid operates, for example the linear nature of the transmission lines. - Have regard to the extent to which adverse effects have been avoided, remedied or mitigated through the route, site and method selection. - Ensure new planning and development seeks to avoid adverse effects on more sensitive areas. <p>Policies, plans and decision makers must take in to account the characteristics of the National Grid, its technical and operational constraints, and the route, site and method selection process when considering the adverse effects of new National Grid infrastructure on the environment.</p> <p>On this basis, the submitter supports a new policy specific to the development of the National Grid. [Refer to original submission for full reason]</p>	Retain INF-P6 (Consideration of the adverse effects of infrastructure) with either an amendment or a new policy specific to the National Grid.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Transpower New Zealand Limited	315.66	Energy Infrastructure and Transport / Infrastructure / INF-P5	Amend	<p>Considers that in order to give effects to the NPS-ET, the submitter seeks specific National Grid provisions. Supports in principle INF-P6, however considers it does not reflect or give effect to the NPS-ET and is not specific to the National Grid. Considers it also does not provide a 'seek to avoid' approach for the more sensitive environments and the policy framework in the INF sub chapters for new development of the National Grid within such environments also does not give effect to the 'seek to avoid' policy approach within Policy 8 of the NPS-ET. Considers the provision of a National Grid specific policy provides a comprehensive policy approach that gives effect to the NPS-ET.</p> <p>Considers the development of the National Grid must be managed to ensure the potential for adverse effects is appropriately managed while recognising the significance of the National Grid and the constraints under which it operates. The NPS-ET requires the District Plan to include objectives and policies that:</p> <ul style="list-style-type: none"> - Allow for the consideration of the technical constraints and operational requirements under which the National Grid operates, for example the linear nature of the transmission lines. - Have regard to the extent to which adverse effects have been avoided, remedied or mitigated through the route, site and method selection. - Ensure new planning and development seeks to avoid adverse effects on more sensitive areas. <p>Policies, plans and decision makers must take in to account the characteristics of the National Grid, its technical and operational constraints, and the route, site and method selection process when considering the adverse effects of new National Grid infrastructure on the environment.</p> <p>On this basis, the submitter supports a new policy specific to the development of the National Grid. [Refer to original submission for full reason]</p>	Option 2: Seeks that should a National Grid specific policy not be provided, INF-P6 (Consideration of the adverse effects of infrastructure) is amended to give effect to the NPS-ET.
Royal Forest and Bird Protection Society	345.40	Energy Infrastructure and Transport / Infrastructure / INF-P5	Oppose in part	Considers the policy should also apply to the operation, maintenance, repair and removal of infrastructure. It also needs amendment to include direction that effects are not only to be managed, but that certain areas, including overlays, need to be protected. This includes values in the coastal environment. Remove reference to 'identified' values	<p>Amend INF-P5 (Adverse effects of infrastructure) to :</p> <ul style="list-style-type: none"> - also apply to operation, maintenance, repair, and removal of infrastructure; and - include direction that effects are not only to be managed, but that in certain areas needs to be protected; and - remove reference to "identified" values.
Transpower New Zealand Limited	FS29.19	Part 2 / Energy Infrastructure and Transport / Infrastructure / INF-P5	Oppose	Notwithstanding the relief sought in the Transpower submission for a National Grid specific policy, Transpower opposes the relief sought in the submission on the basis it ignores the operating nature of existing infrastructure and would result in uncertainty in the application of the policy. In the absence of specific wording, the implications of the sought wording are unclear.	Disallow
Wellington International Airport Limited	FS36.60	Part 2 / Energy Infrastructure and Transport / Infrastructure / INF-P5	Oppose	WIAL submits that first two bullet points are addressed by provisions located elsewhere within the Infrastructure subchapters. It is therefore inappropriate to duplicate / replicate them here. With respect to values, it is appropriate to focus the management response on the values, as the purpose of the overlay is to identify the specific values of an area / feature. Without this reference, erroneous management of effects may be required – for example, the air noise overlay could trigger consideration of effects management for unrelated matters.	Disallow
KiwiRail Holdings Limited	FS72.27	Part 2 / District-Wide Matters / Energy, Infrastructure, and Transport / Infrastructure / INF-P5	Oppose	Rejects the submission and seeks that the policy applies to upgrades and development of new infrastructure where there may be adverse effects as notified in the Plan.	Disallow
Meridian Energy Limited	FS101.30	Part 2 / Energy Infrastructure and Transport / Infrastructure / INF-P5	Support	Meridian agrees the policy should apply to the establishment, operation (including maintenance and repair) and removal of infrastructure. Meridian considers it is important that the policy refers to 'identified values' so that Plan users have certainty about how to manage activities in overlays.	<p>Allow / Seeks that the specification of the 'operation (including maintenance and repair) and removal of infrastructure' be allowed.</p> <p>Seeks that part of submission requesting the deletion of 'identified values' of overlays be disallowed.</p>

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Waka Kotahi	370.83	Energy Infrastructure and Transport / Infrastructure / INF-P5	Support	Support policies as worded as they provide for infrastructure, the coordination of infrastructure with land use, subdivision and development growth, any technological advances and undergrounding of infrastructure in urban areas where feasible.	Retain INF-P5 (Adverse effects of infrastructure) as notified.
BP Oil New Zealand, Mobil Oil New Zealand Limited and Z Energy Limited (the Fuel Companies)	372.34	Energy Infrastructure and Transport / Infrastructure / INF-P5	Support	[No specific reason given beyond decision requested - refer to original submission]	Retain INF-P5 (Adverse effects of infrastructure) as notified.
Kāinga Ora Homes and Communities	391.118	Energy Infrastructure and Transport / Infrastructure / INF-P5	Support	INF-P5 is generally supported.	Retain INF-P5 (Adverse effects of infrastructure) as notified.
CentrePort Limited	402.52	Energy Infrastructure and Transport / Infrastructure / INF-P5	Support in part	Considers that the use of the word managed in the policy is open to interpretation and is of limited assistance to decision makers.	Retain INF-P5 (Adverse effects of infrastructure), with amendment.
CentrePort Limited	402.53	Energy Infrastructure and Transport / Infrastructure / INF-P5	Amend	Considers that the use of the word managed in the policy is open to interpretation and is of limited assistance to decision makers.	Amend INF-P5 (Adverse effects of infrastructure) as follows: Manage <u>Avoid, remedy or mitigate</u> the adverse effects of upgrades to, or the development of new infrastructure, including effects on:
Wellington International Airport Ltd	406.95	Energy Infrastructure and Transport / Infrastructure / INF-P5	Support	[No specific reason given beyond decision requested - see original submission paragraphs 4.1 to 4.10, 4.11 to 4.15.]	Retain INF-P5 (Adverse effects of infrastructure) as notified.
KiwiRail Holdings Limited	408.34	Energy Infrastructure and Transport / Infrastructure / INF-P5	Support	Supports policy for managing the adverse effects of upgrades to, or development of new infrastructure.	Retain INF-P5 (Adverse effects of infrastructure) as notified.
New Zealand Defence Force	423.12	Energy Infrastructure and Transport / Infrastructure / INF-P5	Support	Considers that it is appropriate to acknowledge that new or upgraded infrastructure can have adverse effects, including on the natural and physical environment, amenity values and the health safety and wellbeing of people and communities, which may need to be managed.	Retain INF-P5 (Adverse effects of infrastructure) as notified.
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	99.20	Energy Infrastructure and Transport / Infrastructure / INF-P6	Support	INF-P6 is supported as it provides a workable and appropriate framework for telecommunications infrastructure.	Retain INF-P6 (Consideration of the adverse effects of infrastructure) as notified.
Powerco Limited	127.13	Energy Infrastructure and Transport / Infrastructure / INF-P6	Support	Considers that these policies (INF-P1 to INF-P6, INF-P12 and INF-P13) provide a workable and appropriate framework for gas distribution infrastructure.	Retain Policy INF-P6 (Consideration of the adverse effects of infrastructure) as notified.
Firstgas Limited	304.26	Energy Infrastructure and Transport / Infrastructure / INF-P6	Support	INF-P6 is generally supported in terms of the outcomes they seek related to infrastructure.	Retain INF-P6 (Consideration of the adverse effects of infrastructure) as notified.
Royal Forest and Bird Protection Society	345.41	Energy Infrastructure and Transport / Infrastructure / INF-P6	Oppose	Considers the policy conflicts with the policies in the Infrastructure sub-chapters and should be deleted.	Delete INF-P6 (Consideration of the adverse effects of infrastructure).

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
KiwiRail Holdings Limited	FS72.28	Part 2 / District-Wide Matters / Energy, Infrastructure, and Transport / Infrastructure / INF-P6	Oppose	<p>Considers that this policy is important as it outlines matters to have regard to when considering the adverse effects of infrastructure. There may be instances where adverse effects cannot be avoided, and this policy provides helpful direction for the assessment of these instances.</p> <p>Considers the relief sought should be declined because it a) will not promote the sustainable management of the natural and physical resources in Wellington City, and is therefore contrary to, or inconsistent with, Part 2 and other provisions of the RMA and the Amendment Act; (b) is inconsistent with other relevant planning documents, including the Greater Wellington Regional Policy Statement and National Policy Statement for Urban Development 2020; (c) will not meet the reasonably foreseeable needs of future generations; (d) will not avoid, remedy or mitigate actual and potential adverse effects on the environment; (e) will not enable the social, economic and cultural wellbeing of people of Wellington City; and (f) is not the most appropriate way to achieve the objectives of the Proposed Plan in terms of section 32 of the RMA.</p>	Disallow
Wellington Electricity Lines Limited	355.32	Energy Infrastructure and Transport / Infrastructure / INF-P6	Support	Supports INF-P6 as it appropriately balances the functional need of infrastructure, and that by its very nature not all adverse effects can be avoided. Replacement infrastructure which is larger to facilitate growth may be considered adverse, however necessary to meet the City's growth needs as envisioned under the PDP.	Retain INF-P6 (Consideration of the adverse effects of infrastructure) as notified.
Waka Kotahi	370.84	Energy Infrastructure and Transport / Infrastructure / INF-P6	Support	Support policies as worded as they provide for infrastructure, the coordination of infrastructure with land use, subdivision and development growth, any technological advances and undergrounding of infrastructure in urban areas where feasible. INF-P6 manages the effects of upgrades or development of new infrastructure on sensitive activities.	Retain INF-P6 (Consideration of the adverse effects of infrastructure) as notified.
BP Oil New Zealand, Mobil Oil New Zealand Limited and Z Energy Limited (the Fuel Companies)	372.35	Energy Infrastructure and Transport / Infrastructure / INF-P6	Support	[No specific reason given beyond decision requested - refer to original submission]	Retain INF-P6 (Consideration of the adverse effects of infrastructure) as notified.
Kāinga Ora Homes and Communities	391.119	Energy Infrastructure and Transport / Infrastructure / INF-P6	Support	INF-P6 is generally supported.	Retain INF-P6 (Consideration of the adverse effects of infrastructure) as notified.
CentrePort Limited	402.54	Energy Infrastructure and Transport / Infrastructure / INF-P6	Support	Support the intent of this policy.	Retain INF-P6 (Consideration of the adverse effects of infrastructure) as notified.
Wellington International Airport Ltd	406.96	Energy Infrastructure and Transport / Infrastructure / INF-P6	Amend	<p>Considers that it is not always possible or practicable for infrastructure to avoid, remedy or mitigate all environmental effects.</p> <p>Considers that it is not appropriate for the policy framework to require that all adverse effects, irrespective of their significance, be avoided, remedied or mitigated. This is particularly relevant in the context of regionally significant infrastructure.</p> <p>[See original submission paragraphs 4.1 to 4.10, 4.11 to 4.15 for further detail.]</p>	<p>Amend INF-P6 (Consideration of adverse effects of infrastructure) as follows:</p> <p>...</p> <p>When considering the adverse effects of infrastructure on the environment recognise that there may be situations where all adverse effects, including construction effects, cannot be avoided, <u>remedied or mitigated</u> and as such must be remedied or mitigated through having regard to the following:</p> <p>...</p>
Wellington International Airport Ltd	406.97	Energy Infrastructure and Transport / Infrastructure / INF-P6	Amend	<p>Considers that it is not always possible or practicable for infrastructure to avoid, remedy or mitigate all environmental effects.</p> <p>Considers that it is not appropriate for the policy framework to require that all adverse effects, irrespective of their significance, be avoided, remedied or mitigated. This is particularly relevant in the context of regionally significant infrastructure.</p> <p>[See original submission paragraphs 4.1 to 4.10, 4.11 to 4.15 for further detail.]</p>	Delete INF-P6 (Consideration of adverse effects of infrastructure)

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
KiwiRail Holdings Limited	408.35	Energy Infrastructure and Transport / Infrastructure / INF-P6	Support	Supports that effects of infrastructure cannot always be avoided and the inclusion of a policy framework for the consideration of adverse effects of infrastructure, and remediation or mitigation of these effects. In particular, KiwiRail support recognition of the functional and operational need of the infrastructure in this assessment.	Retain INF-P6 (Consideration of the adverse effects of infrastructure) as notified.
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	99.21	Energy Infrastructure and Transport / Infrastructure / INF-P7	Support	INF-P7 is supported as it provides a workable and appropriate framework for telecommunications infrastructure.	Retain INF-P7 (Reverse sensitivity) as notified.
Powerco Limited	127.14	Energy Infrastructure and Transport / Infrastructure / INF-P7	Oppose in part	Considers that the provision protecting infrastructure from reverse sensitivity effects of land disturbance and sensitive activities locating in close proximity to network utilities (other than electricity transmission and gas transmission) is unclear. Further clarity is needed to ensure that such infrastructure is protected from reverse sensitivity effects.	Amend Clause 4 of Policy INF-P7 (Reverse sensitivity) as follows: 4. Managing <u>land disturbance and the activities sensitive to others network utilities</u> through set-backs and design controls where it is necessary to achieve appropriate protection of infrastructure
Firstgas Ltd	FS97.6	Part 2 / Energy Infrastructure and Transport / Infrastructure / INF-P7	Support	In addition to seeking more explicit reference to the Gas Transmission Network within Provision INF-P7, Firstgas supports the intent of this submission which seeks for more clarity within Clause 4 of Policy INF-P7. This is essential so that it is clear that those activities sensitive to network utilities are appropriately managed.	Allow
Firstgas Limited	304.27	Energy Infrastructure and Transport / Infrastructure / INF-P7	Support in part	INF-P7 is generally supported but more explicit reference to the Gas Transmission Network within the policy is requested.	Retain INF-P7 (Reverse sensitivity) with amendment.
Firstgas Limited	304.28	Energy Infrastructure and Transport / Infrastructure / INF-P7	Amend	INF-P7 is generally supported but more explicit reference to the Gas Transmission Network within the policy is requested.	Seeks that INF-P7 (Reverse sensitivity) is amended as follows: ... 2. Managing land disturbance and activities sensitive to gas transmission to avoid or mitigate potential adverse effects of, and on, <u>the Gas Transmission Network gas transmission pipelines</u> ; 3. Requiring subdivision of sites containing <u>the Gas Transmission Network a gas transmission pipeline</u> to retain the ability for the network utility operator to access, operate, maintain, repair and upgrade the <u>Gas Transmission Network the gas transmission pipeline</u> ; and...

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Transpower New Zealand Limited	315.67	Energy Infrastructure and Transport / Infrastructure / INF-P7	Amend	<p>Considers that in order to give effect to the NPS-ET, the submitter seeks specific National Grid provisions. Supports in principle INF-P7, however considers it does not reflect or give effect to the NPSET. The primary concerns are:</p> <ul style="list-style-type: none"> - Considers policy title "Reverse sensitivity" only relates to one aspect of Policy 10 of the NPSET and fails to give effect to the second part of this policy - Considers the policy only applies to sensitive activities, ignoring other activities which may compromise the National Grid. Policy INF-P7 does not adequately address Policies 10 and 11 of the NPS-ET - Considers Clause 2. and 3. do not apply to the National Grid. - Considers Clause 1. of the policy is limited to subdivision, ignoring that land use and other development activities (such as earthworks) can compromise the National Grid. - Considers Clause 4. is general in nature and insufficiently directive to give effect the NPS-ET. There is no reference to sensitive activities, or to ensure the National Grid is not compromised. - Considers earthworks are not referenced in the policy, noting there are specific earthworks rules. - Considers given the national significance of the National Grid and non-complying activity status where standards are not complied with, a more directive policy framework is required. As proposed, the policy does not give effect to NPS-ET policies 10 and 11. Use of the word 'manage' within INF-P7 is not sufficiently directive. <p>On this basis Transpower seeks a separate policy framework for the National Grid. [Refer to original submission for full reason]</p>	Seeks that should a National Grid specific policy not be provided, INF-P7 (Reverse sensitivity) should be amended to give effect to the NPS-ET.
Wellington Electricity Lines Limited	355.33	Energy Infrastructure and Transport / Infrastructure / INF-P7	Support in part	Supports INF-P7 in part, but seeks amendment to include new requirements for scaffolding that encroach and breach prescribed electrical safety distances.	Retain INF-P7 (Reverse sensitivity) with amendment.
Wellington Electricity Lines Limited	355.34	Energy Infrastructure and Transport / Infrastructure / INF-P7	Amend	Considers that INF-P7 should be amended to include industry Codes of Practice. Council (and the PDP) should be aware of not only building setbacks from infrastructure, but also to include new requirements for scaffolding which encroaches and breaches prescribed electrical safety distances.	<p>Amend INF-P7 (Reverse sensitivity) as follows:</p> <p>Manage the establishment or alteration of sensitive activities near existing lawfully established infrastructure, including by:</p> <p>...</p> <p>4. Managing the activities of others through set-backs and design controls and industry Codes of Practice where it is necessary to achieve appropriate protection of infrastructure.</p>
Waka Kotahi	370.85	Energy Infrastructure and Transport / Infrastructure / INF-P7	Support	Support policies as worded as they provide for infrastructure, the coordination of infrastructure with land use, subdivision and development growth, any technological advances and undergrounding of infrastructure in urban areas where feasible. INF-P7 deals with the adverse effects of new activities on the existing infrastructure.	Retain INF-P7 (Reverse sensitivity) as notified.
BP Oil New Zealand, Mobil Oil New Zealand Limited and Z Energy Limited (the Fuel Companies)	372.36	Energy Infrastructure and Transport / Infrastructure / INF-P7	Support	[No specific reason given beyond decision requested - refer to original submission]	Retain INF-P7 (Reverse sensitivity) as notified.
Kāinga Ora Homes and Communities	391.120	Energy Infrastructure and Transport / Infrastructure / INF-P7	Oppose	INF-P7 is opposed and removal is sought. Is considered that the objective of INF-P7 is readily captured by Objective 2 and Policy 6 of the Infrastructure chapter. Deletion and consequential changes to the PDP are sought.	Delete INF-P7 (Reverse sensitivity) in its entirety.
Wellington Electricity Lines Limited (WELL)	FS27.12	Part 2 / Energy Infrastructure and Transport / Infrastructure / INF-P7	Oppose	The submitter seeks the removal of Policy INF-P7 – to which WELL are opposed. WELL supported this Policy in its original submission as it clearly recognized the adverse effects on infrastructure of reverse sensitivity. WELL seek the retention of the Policy as drafted as it provides a clear understanding to plan users and administrators for the importance of avoiding reverse sensitivity.	Disallow

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Transpower New Zealand Limited	FS29.8	Part 2 / Energy Infrastructure and Transport / Infrastructure / INF-P7	Oppose	Transpower opposes the deletion of the policy in so far as the relief sought is inconsistent with that sought in Transpower's submission. Policy INF-P7 relates to the effects <u>on</u> infrastructure whereas Policy INF-P7 relates to the adverse effect <u>of</u> infrastructure. As such, the policies are not interchangeable.	Disallow
KiwiRail Holdings Limited	FS72.29	Part 2 / District-Wide Matters / Energy, Infrastructure, and Transport / Infrastructure / INF-P7	Oppose	Considers it appropriate to have specific policy direction for the management of sensitive activities near lawfully established infrastructure. The rail corridor is vulnerable to reverse sensitivity effects when incompatible activities are located near the rail corridor without appropriate controls in place. KiwiRail seeks the retention of INF-P7, particular clause 4. Considers the relief sought should be declined because it a) will not promote the sustainable management of the natural and physical resources in Wellington City, and is therefore contrary to, or inconsistent with, Part 2 and other provisions of the RMA and the Amendment Act; (b) is inconsistent with other relevant planning documents, including the Greater Wellington Regional Policy Statement and National Policy Statement for Urban Development 2020; (c) will not meet the reasonably foreseeable needs of future generations; (d) will not avoid, remedy or mitigate actual and potential adverse effects on the environment; (e) will not enable the social, economic and cultural wellbeing of people of Wellington City; and (f) is not the most appropriate way to achieve the objectives of the Proposed Plan in terms of section 32 of the RMA.	Disallow
CentrePort Limited	402.55	Energy Infrastructure and Transport / Infrastructure / INF-P7	Amend	Considers that there is no specific recognition in the policy of discouraging new noise sensitive activities from establishing within the Port Noise Boundary. The same could be applied to the Air Noise Boundary.	Amend INF-P7 (Reverse sensitivity) as follows: ... 3. Requiring subdivision of sites containing a gas transmission pipeline to retain the ability for the network utility operator to access, operate, maintain, repair and upgrade the gas transmission pipeline; and 4. Managing the activities of others through set-backs and design controls where it is necessary to achieve appropriate protection of infrastructure; and <u>5. Discouraging new noise sensitive uses without mitigation within the Port Noise and Airport Noise Boundaries.</u>
CentrePort Limited	402.56	Energy Infrastructure and Transport / Infrastructure / INF-P7	Support in part	Considers that there is no specific recognition in the policy of discouraging new noise sensitive activities from establishing within the Port Noise Boundary. The same could be applied to the Air Noise Boundary.	Retain INF-P7 (Reverse sensitivity), with amendment.
Wellington International Airport Limited	FS36.61	Part 2 / Energy Infrastructure and Transport / Infrastructure / INF-P7	Oppose	WIAL supports this submission and agrees that a new policy is required to address the potential reverse sensitivity effects arising on both the port and the airport.	Allow
Wellington International Airport Ltd	406.98	Energy Infrastructure and Transport / Infrastructure / INF-P7	Oppose	Considers that it is imperative that infrastructure is protected from incompatible land use activities, including reverse sensitivity effects. [See original submission paragraphs 4.1 to 4.10, 4.11 to 4.15 and 4.56 to 4.69 for full reason]	Opposes INF-P7 (Reverse Sensitivity) and seeks amendment.
Wellington International Airport Ltd	406.99	Energy Infrastructure and Transport / Infrastructure / INF-P7	Amend	Considers that it is imperative that infrastructure is protected from incompatible land use activities, including reverse sensitivity effects. [See original submission paragraphs 4.1 to 4.10, 4.11 to 4.15 and 4.56 to 4.69 for full reason]	Amend INF-P7 (Reverse Sensitivity) as follows: INF-P7 Reverse Sensitivity <u>regarding the National Grid and gas transmission</u>
Transpower New Zealand Limited	FS29.41	Part 2 / Energy Infrastructure and Transport / Infrastructure / INF-P7	Support	Transpower supports the addition of wording which would make it clear the policy applies to the National Grid and gas transmission only. However, it is noted that clause 4. is not specific to National Grid and gas transmission and could arguably apply to activities such as structures near railway level crossings (INF-R26). As such the appropriateness of the text sought by the submitter requires consideration.	Allow / Seeks that the submission be accepted in part.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
KiwiRail Holdings Limited	FS72.30	Part 2 / District-Wide Matters / Energy, Infrastructure, and Transport / Infrastructure / INF-P7	Oppose	Rejects narrowing the scope of this policy to the National grid and gas transmission. Other infrastructure networks are susceptible to reverse sensitivity effects. Clause 4 is interpreted to be applied to all infrastructure, including the rail network and KiwiRail supports this. Considers the relief sought should be declined because it a) will not promote the sustainable management of the natural and physical resources in Wellington City, and is therefore contrary to, or inconsistent with, Part 2 and other provisions of the RMA and the Amendment Act; (b) is inconsistent with other relevant planning documents, including the Greater Wellington Regional Policy Statement and National Policy Statement for Urban Development 2020; (c) will not meet the reasonably foreseeable needs of future generations; (d) will not avoid, remedy or mitigate actual and potential adverse effects on the environment; (e) will not enable the social, economic and cultural wellbeing of people of Wellington City; and (f) is not the most appropriate way to achieve the objectives of the Proposed Plan in terms of section 32 of the RMA.	Disallow
Firstgas Ltd	FS97.7	Part 2 / Energy Infrastructure and Transport / Infrastructure / INF-P7	Support	Firstgas supports this submission which seeks to amend INF-P7 so that it only applies to the National Grid and Gas Transmission. However, while acknowledging the intent of the submission Firstgas is seeking for this policy to remain as notified, with an amendment so that it specifically makes reference to the Gas Transmission Network.	Allow
KiwiRail Holdings Limited	408.36	Energy Infrastructure and Transport / Infrastructure / INF-P7	Support	Supports the management of reverse sensitivity effects from the establishment or alteration of sensitive activities near infrastructure. In particular, KiwiRail support clause 4 of this policy regarding the management of adverse effects on infrastructure through setbacks and design controls.	Retain INF-P7 (Reverse sensitivity) as notified.
BP Oil New Zealand, Mobil Oil New Zealand Limited and Z Energy Limited (the Fuel Companies)	372.37	Energy Infrastructure and Transport / Infrastructure / INF-P8	Support	[No specific reason given beyond decision requested - refer to original submission]	Retain INF-P8 (Amateur radio configurations) as notified.
Tawa Business Group	107.15	Energy Infrastructure and Transport / Infrastructure / INF-P9	Amend	Considers that INF-P2 should be clarified to better understand Council's role in the active upgrading and development of the existing transport network. Considers that currently there is no clear plan for this upgrading and ongoing transport planning is needed in order to ensure the traffic congestion of Main Road is not worsened as a result of increased density within both Tawa and the locality.	Seeks that INF-P9 (Upgrading and development of the transport network) should go further to clarify Council's role in the active upgrading and development of the existing transport network.
Fire and Emergency New Zealand	273.32	Energy Infrastructure and Transport / Infrastructure / INF-P9	Support in part	Supports the policy as it seeks to ensure that the upgrading and development of the transport network does not compromise the safe and effective functioning of the existing network. Therefore considers it is critical that any new or upgrade works to the existing network do not hinder the ability of the submitter to respond to emergencies effectively and efficiently. An additional policy criterion was therefore requested to ensure that this is given sufficient consideration in proposals affecting the transport network. This also links with the road specifications set out within Table 1 of this chapter which make specific reference to achieving road widths which provide unobstructed access for fire appliances.	Supports INF-P9 (Upgrading and development of the transport network) with amendment.
Fire and Emergency New Zealand	273.33	Energy Infrastructure and Transport / Infrastructure / INF-P9	Amend	Supports the policy as it seeks to ensure that the upgrading and development of the transport network does not compromise the safe and effective functioning of the existing network. Therefore considers it is critical that any new or upgrade works to the existing network do not hinder the ability of the submitter to respond to emergencies effectively and efficiently. An additional policy criterion was therefore requested to ensure that this is given sufficient consideration in proposals affecting the transport network. This also links with the road specifications set out within Table 1 of this chapter which make specific reference to achieving road widths which provide unobstructed access for fire appliances.	Amend INF-P9 (Upgrading and development of the transport network) as follows: ... <u>7. Does not hinder the ability for emergency vehicles, including fire appliances, to utilise the transport network to respond to emergency call outs.</u>

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Paihikara Ki Pōneke Cycle Wellington	302.15	Energy Infrastructure and Transport / Infrastructure / INF-P9	Support	INF-P9 is supported as it specifically seeks to provide for cycling safety and improve accessibility including to public transport. The allocation of adequate space in transport corridors for cycling is a key component of improving cycling uptake and safety.	Retain INF-P9 (Upgrading and development of the transport network) as notified.
Waka Kotahi	370.86	Energy Infrastructure and Transport / Infrastructure / INF-P9	Support	INF-P9 is supported.	Retain INF-P9 (Upgrading and development of the transport network) as notified.
BP Oil New Zealand, Mobil Oil New Zealand Limited and Z Energy Limited (the Fuel Companies)	372.38	Energy Infrastructure and Transport / Infrastructure / INF-P9	Support	[No specific reason given beyond decision requested - refer to original submission]	Retain INF-P9 (Upgrading and development of the transport network) as notified.
Kāinga Ora Homes and Communities	391.121	Energy Infrastructure and Transport / Infrastructure / INF-P9	Support in part	INF-P9 is generally supported but the division of transport related provisions between the transport and infrastructure chapters is inconsistent with best practice and makes navigation of the plan difficult for users.	Retain INF-P9 (Upgrading and development of the transport network) with amendment.
CentrePort Limited	402.57	Energy Infrastructure and Transport / Infrastructure / INF-P9	Support	Support the intent of this policy.	Retain INF-P9 (Upgrading and development of the transport network) as notified.
KiwiRail Holdings Limited	408.37	Energy Infrastructure and Transport / Infrastructure / INF-P9	Support	Supports the policy to enable the upgrading and development of the transport network.	Retain INF-P9 (Upgrading and development of the transport network) as notified.
Living Streets Aotearoa	482.31	Energy Infrastructure and Transport / Infrastructure / INF-P9	Amend	Considers that INF-P9 definition of upgraded transport network could be taken to mean increase the vehicle carrying capacity of roads and should instead support sustainable active modes.	Seeks that INF-P9 (Upgrading and development of the transport network) support sustainable active modes rather than upgrades that increase the vehicle carrying capacity of roads. [Inferred decision requested].
Waka Kotahi	370.87	Energy Infrastructure and Transport / Infrastructure / INF-P10	Support	Support the policies wording as INF-P10 refers to Waka Kotahi New Zealand Transport Agency's One Network Framework.	Retain INF-P10 (Classification of roads) as notified.
BP Oil New Zealand, Mobil Oil New Zealand Limited and Z Energy Limited (the Fuel Companies)	372.39	Energy Infrastructure and Transport / Infrastructure / INF-P10	Support	[No specific reason given beyond decision requested - refer to original submission]	Retain INF-P10 (Classification of roads) as notified.
Kāinga Ora Homes and Communities	391.122	Energy Infrastructure and Transport / Infrastructure / INF-P10	Support in part	INF-P10 is generally supported but the division of transport related provisions between the transport and infrastructure chapters is inconsistent with best practice and makes navigation of the plan difficult for users.	Retain INF-P10 (Classification of roads) with amendment.
Waka Kotahi	370.88	Energy Infrastructure and Transport / Infrastructure / INF-P11	Support	INF-P11 enables safe and effective connections between sites and the transport network	Retain INF-P11 (Connections to roads) as notified.
BP Oil New Zealand, Mobil Oil New Zealand Limited and Z Energy Limited (the Fuel Companies)	372.40	Energy Infrastructure and Transport / Infrastructure / INF-P11	Support	[No specific reason given beyond decision requested - refer to original submission]	Retain INF-P11 (Connections to roads) as notified.
Kāinga Ora Homes and Communities	391.123	Energy Infrastructure and Transport / Infrastructure / INF-P11	Support in part	INF-P11 is generally supported but the division of transport related provisions between the transport and infrastructure chapters is inconsistent with best practice and makes navigation of the plan difficult for users.	Retain INF-P11 (Connection to roads) with amendment.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
KiwiRail Holdings Limited	408.38	Energy Infrastructure and Transport / Infrastructure / INF-P11	Support	Supports policy that enables the safe functioning of the transport network. Enabling safe and effective connections between sites and the transport network is important to KiwiRail, particularly where vehicle crossings are located near rail level crossings.	Retain INF-P11 (Connections to roads) as notified.
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	99.22	Energy Infrastructure and Transport / Infrastructure / INF-P12	Support	INF-P12 is supported as it provides a workable and appropriate framework for telecommunications infrastructure.	Retain INF-P12 (Infrastructure within roads) as notified.
Powerco Limited	127.15	Energy Infrastructure and Transport / Infrastructure / INF-P12	Support	Considers that these policies (INF-P1 to INF-P6, INF-P12 and INF-P13) provide a workable and appropriate framework for gas distribution infrastructure.	Retain Policy INF-P12 (Infrastructure within roads) as notified.
Wellington Electricity Lines Limited	355.35	Energy Infrastructure and Transport / Infrastructure / INF-P12	Support	Supports INF-P12 as it references the National Code of Practice for Utility Operators' Access to Transport Corridors 2019 for electricity infrastructure contained or constructed within road reserve.	Retain INF-P12 (Infrastructure within roads) as notified.
Waka Kotahi	370.89	Energy Infrastructure and Transport / Infrastructure / INF-P12	Support	Support this policy as this is common for other infrastructure to be included in state highway road reserves.	Retain INF-12 (Infrastructure within roads) as notified.
BP Oil New Zealand, Mobil Oil New Zealand Limited and Z Energy Limited (the Fuel Companies)	372.41	Energy Infrastructure and Transport / Infrastructure / INF-P12	Support	[No specific reason given beyond decision requested - refer to original submission]	Retain INF-P12 (Infrastructure within roads) as notified.
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	99.23	Energy Infrastructure and Transport / Infrastructure / INF-P13	Support	INF-P13 is supported as it provides a workable and appropriate framework for telecommunications infrastructure.	Retain INF-P13 (Infrastructure within riparian margins) as notified.
Powerco Limited	127.16	Energy Infrastructure and Transport / Infrastructure / INF-P13	Support	Considers that these policies (INF-P1 to INF-P6, INF-P12 and INF-P13) provide a workable and appropriate framework for gas distribution infrastructure.	Retain Policy INF-P13 (Infrastructure within riparian margins) as notified.
Royal Forest and Bird Protection Society	345.42	Energy Infrastructure and Transport / Infrastructure / INF-P13	Support in part	Considers the policy needs amendment to require protection and maintenance of natural character as noted in paragraph 1.	Amend INF-P13 (Infrastructure within riparian margins): Delete paragraph 2 of the policy. OR Require adverse effects to be avoided, remedied, or mitigated in accordance with the requirements of other chapters regarding natural character in the Plan.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Meridian Energy Limited	FS101.31	2 Part 2 / Energy Infrastructure and Transport / Infrastructure / INF-P13	Oppose	Considers that it will not be practicable to avoid all adverse effects on natural character in all situations (neither is it required in all situations). Meridian supports the alternative relief wording (avoiding, remedying, or mitigating adverse effects on natural character in accordance with the requirements of other chapters) but does not consider it needs stating in this policy (because the other policies are applicable in any event).	Disallow / Disallow the requested deletion of clause (2).
Waka Kotahi NZ Transport Agency	FS103.7	Part 2 / Energy Infrastructure and Transport / Infrastructure / INF-P13	Oppose	The policy directs a balance between providing for infrastructure and maintaining natural character. That balance is considered to be appropriate.	Disallow
BP Oil New Zealand, Mobil Oil New Zealand Limited and Z Energy Limited (the Fuel Companies)	372.42	Energy Infrastructure and Transport / Infrastructure / INF-P13	Support	[No specific reason given beyond decision requested - refer to original submission]	Retain INF-P13 (Infrastructure within riparian margins) as notified.
KiwiRail Holdings Limited	408.39	Energy Infrastructure and Transport / Infrastructure / INF-P13	Support	Supports policy to provide for infrastructure within riparian margins where natural character is maintained.	Retain INF-P13 (Infrastructure within riparian margins) as notified.
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	99.24	Energy Infrastructure and Transport / Infrastructure / INF-R1	Oppose in part	INF-R1 requires compliance with Standard INF-S2 which relates to installing underground infrastructure. This clause should be deleted.	Delete clause 1(c)(i) of Rule INF-R1 (Operation, maintenance and repair, or removal of existing above and underground infrastructure and ancillary vehicle access tracks).
Powerco Limited	127.17	Energy Infrastructure and Transport / Infrastructure / INF-R1	Oppose in part	Considers that the rule relates to the removal of above ground redundant infrastructure. However, Clause 1(c)(i) requires compliance with Standard INF-S2 which relates to installing underground infrastructure.	Delete clause 1(c)(i) of Rule INF-R1 (Operation, maintenance and repair or removal of existing above and underground infrastructure and ancillary vehicle access tracks) as follows: ... Where: a. All above ground structures that are no longer required for the operation of the infrastructure are removed within twelve months of being replaced or becoming redundant; and b. Compliance is achieved with INF-S1, and c. Compliance is achieved with the following standards: In relation to existing underground infrastructure, INF-S2, INF-S3, and INF-S12.
Avryl Bramley	202.11	Energy Infrastructure and Transport / Infrastructure / INF-R1	Amend	Considers that large companies acquire the right to trespass without notification.	Amend INF-R1 (Operation, maintenance and repair, or removal of existing above and underground infrastructure and ancillary vehicle access tracks) so that it is not a permitted activity and that notification is mandatory to relevant home owners for upgrading an infrastructure.
Powerco Limited	FS61.24	Part 2 / Energy Infrastructure and Transport / Infrastructure / INF-R1	Oppose	Not a relevant Resource Management Act consideration.	Disallow
Firstgas Limited	304.29	Energy Infrastructure and Transport / Infrastructure / INF-R1	Support	INF-R1 is generally supported as it relates to the operation, maintenance and repair, or removal of existing above and underground infrastructure and ancillary vehicle access tracks.	Retain INF-R1 (Operation, maintenance and repair, or removal of existing above and underground infrastructure and ancillary vehicle access tracks) as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Transpower New Zealand Limited	315.68	Energy Infrastructure and Transport / Infrastructure / INF-R1	Support	Considers that specific to the National Grid, the Resource Management (National Environmental Standards for Electricity Transmission Activities) Regulations 2009 (“NESETA”) provides prevailing provisions for maintenance, reconductoring, increasing voltage, structure addition or replacement, and removal, for the National Grid, and on this basis, INF-R1 for existing National Grid structures captured by the NESETA is of limited relevance to Transpower in respect of rule application. It is noted the NESETA provides a Discretionary activity status under Regulations 39 of the NESETA for those activities subject to the NESETA but not otherwise captured under other regulations in the NESETA.	Retain INF-R1 (Operation, maintenance and repair, or removal of existing above ground infrastructure and ancillary vehicle access tracks) as notified.
BP Oil New Zealand, Mobil Oil New Zealand Limited and Z Energy Limited (the Fuel Companies)	372.43	Energy Infrastructure and Transport / Infrastructure / INF-R1	Support	INF-R1 is supported as it enables the operation, maintenance, repair and removal of existing above ground and underground infrastructure, and provision of new underground infrastructure, as permitted activities subject to compliance with standards.	Retain INF-R1 (Operation, maintenance and repair, or removal of existing above and underground infrastructure and ancillary vehicle access tracks) as notified.
Wellington International Airport Ltd	406.100	Energy Infrastructure and Transport / Infrastructure / INF-R1	Support in part	Supports the inclusion of rules listed as they create an appropriate consenting pathway for infrastructure. Considers that some of the conditions included in these rules will require consequential changes to account for the proposed new objectives and policies identified by the submitter. [See original submission paragraphs 4.11 to 4.15 for full reason]	Supports INF-R1 (Operation, maintenance and repair) and seeks amendment.
Wellington International Airport Ltd	406.101	Energy Infrastructure and Transport / Infrastructure / INF-R1	Amend	Supports the inclusion of rules listed as they create an appropriate consenting pathway for infrastructure. Considers that some of the conditions included in these rules will require consequential changes to account for the proposed new objectives and policies identified by the submitter. [See original submission paragraphs 4.11 to 4.15 for full reason]	Seeks that INF-R1 (Operation, maintenance and repair) is amended to include reference to submitters proposed new objectives and policies within the relevant matters of discretion. [Inferred decision requested]
KiwiRail Holdings Limited	408.40	Energy Infrastructure and Transport / Infrastructure / INF-R1	Support	Supports the permitted activity status of the operation, maintenance, repair, and removal of existing rail infrastructure and ancillary vehicle access tracks, subject to standards.	Retain INF-R1 (Operation, maintenance and repair, or removal of existing above and underground infrastructure and ancillary vehicle access tracks) as notified.
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	99.25	Energy Infrastructure and Transport / Infrastructure / INF-R2	Support	INF-R2 is supported as it appears to be satisfactory for telecommunications networks.	Retain INF-R2 (New underground infrastructure (including customer connections), and upgrading of existing underground infrastructure) as notified.
Powerco Limited	127.18	Energy Infrastructure and Transport / Infrastructure / INF-R2	Oppose	Considers that while a gas lateral customer connection from an adjacent distribution network is primarily laid to the customer underground, there is an above ground component to connect it to the customer premises. This needs to be addressed in rule INF-R2, or alternatively in the above ground customer connection rule INF-R5. [Refer to image in original submission]	Seeks that Rule INF-R2 (New underground infrastructure (including customer connections), and upgrading of existing underground infrastructure), as alternative relief to the changes sought to Rule INF-R5 (New aboveground customer connection line), as necessary such that the above ground component of an underground gas customer connection to facilitate connection to a customer premises is a permitted activity. Standard INF-S5(2) could be applied, which applies to the diameter of pipes in regard to above ground customer connections.
Avryl Bramley	202.12	Energy Infrastructure and Transport / Infrastructure / INF-R2	Amend	Considers that large companies acquire the right to trespass without notification.	Amend INF-R2 (New underground infrastructure (including customer connections), and upgrading of existing underground infrastructure) so that it is not a permitted activity and that notification is mandatory to relevant home owners for upgrading an infrastructure.
Powerco Limited	F561.25	Part 2 / Energy Infrastructure and Transport / Infrastructure / INF-R2	Oppose	Not a relevant Resource Management Act consideration.	Disallow

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Firstgas Limited	304.30	Energy Infrastructure and Transport / Infrastructure / INF-R2	Support	INF-R2 is generally supported.	Retain INF-R2 (New underground infrastructure (including customer connections), and upgrading of existing underground infrastructure) as notified.
Transpower New Zealand Limited	315.69	Energy Infrastructure and Transport / Infrastructure / INF-R2	Support	[No specific reason provided beyond decision requested - refer to original submission]	Retain INF-R2 (New underground infrastructure (including customer connections), and upgrading of existing underground infrastructure) as notified.
BP Oil New Zealand, Mobil Oil New Zealand Limited and Z Energy Limited (the Fuel Companies)	372.44	Energy Infrastructure and Transport / Infrastructure / INF-R2	Support	INF-R2 is supported as it enables the operation, maintenance, repair and removal of existing above ground and underground infrastructure, and provision of new underground infrastructure, as permitted activities subject to compliance with standards.	Retain INF-R2 (New underground infrastructure (including customer connections), and upgrading of existing underground infrastructure) as notified.
KiwiRail Holdings Limited	408.41	Energy Infrastructure and Transport / Infrastructure / INF-R2	Support	Supports the ability to install new, and upgrade existing underground infrastructure as a permitted activity, subject to standards.	Retain INF-R2 (New underground infrastructure (including customer connections), and upgrading of existing underground infrastructure) as notified.
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	99.26	Energy Infrastructure and Transport / Infrastructure / INF-R3	Support	INF-R3 is supported as it appears to be satisfactory for telecommunications networks.	Retain INF-R3 (Upgrading of existing aboveground infrastructure) as notified.
Powerco Limited	127.19	Energy Infrastructure and Transport / Infrastructure / INF-R3	Support	Considers that these rules (INF-R3, INF-R4, INF-R6 and INF-R8) appear to be satisfactory for gas distribution networks.	Retain Rule INF-R3 (Upgrading of existing aboveground infrastructure) as notified.
Avryl Bramley	202.13	Energy Infrastructure and Transport / Infrastructure / INF-R3	Amend	Considers that large companies acquire the right to trespass without notification.	Amend INF-R3 (Upgrading of existing aboveground infrastructure) so that it is not a permitted activity and that notification is mandatory to relevant home owners for upgrading an infrastructure.
Powerco Limited	FS61.26	Part 2 / Energy Infrastructure and Transport / Infrastructure / INF-R3	Oppose	Not a relevant Resource Management Act consideration.	Disallow
Firstgas Ltd	FS97.8	Part 2 / Energy Infrastructure and Transport / Infrastructure / INF-R3	Oppose	Firstgas opposes this submission which seeks to amend INF-R3 so that the upgrading of existing aboveground infrastructure is not Permitted and seeks that notification is mandatory to relevant homeowners for upgrading infrastructure. Firstgas seek for this activity to remain Permitted to allow Firstgas to undertake upgrades where the permitted standards are achieved. In relation to notifying homeowners, this is a legal matter that is dealt with outside of the District Plan/planning framework. Where an activity is Permitted within the District Plan, it does not specifically allow for access over private land.	Disallow
Firstgas Limited	304.31	Energy Infrastructure and Transport / Infrastructure / INF-R3	Support	INF-R3 is generally supported.	Retain INF-R3 (Upgrading of existing aboveground infrastructure) as notified.
Transpower New Zealand Limited	315.70	Energy Infrastructure and Transport / Infrastructure / INF-R3	Support	[No specific reason provided beyond decision requested - refer to original submission]	Retain INF-R3 (Upgrading of existing aboveground infrastructure) as notified.
BP Oil New Zealand, Mobil Oil New Zealand Limited and Z Energy Limited (the Fuel Companies)	372.45	Energy Infrastructure and Transport / Infrastructure / INF-R3	Support	[No specific reason given beyond decision requested - refer to original submission]	Retain INF-R3 (Upgrading of existing aboveground infrastructure) as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Wellington International Airport Ltd	406.102	Energy Infrastructure and Transport / Infrastructure / INF-R3	Support in part	Supports the inclusion of rules listed as they create an appropriate consenting pathway for infrastructure. Considers that some of the conditions included in these rules will require consequential changes to account for the proposed new objectives and policies identified by the submitter. [See original submission paragraphs 4.11 to 4.15 for full reason]	Supports INF-R3 (Upgrading of existing aboveground infrastructure) and seeks amendment.
Wellington International Airport Ltd	406.103	Energy Infrastructure and Transport / Infrastructure / INF-R3	Amend	Supports the inclusion of rules listed as they create an appropriate consenting pathway for infrastructure. Considers that some of the conditions included in these rules will require consequential changes to account for the proposed new objectives and policies identified by the submitter. [See original submission paragraphs 4.11 to 4.15 for full reason]	Seeks that INF-R3 (Upgrading of existing aboveground infrastructure) is amended to include reference to submitters proposed new objectives and policies within the relevant matters of discretion. [Inferred decision requested]
KiwiRail Holdings Limited	408.42	Energy Infrastructure and Transport / Infrastructure / INF-R3	Support	Supports the ability to upgrade existing aboveground infrastructure as a permitted activity, subject to standards. The rail network requires ongoing maintenance and upgrade to continue to operate safely and efficiently.	Retain INF-R3 (Upgrading of existing aboveground infrastructure) as notified.
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	99.27	Energy Infrastructure and Transport / Infrastructure / INF-R4	Support	INF-R4 is supported as it appears to be satisfactory for telecommunications networks.	Retain INF-R4 (New vehicle access tracks for infrastructure) as notified.
Powerco Limited	127.20	Energy Infrastructure and Transport / Infrastructure / INF-R4	Support	Considers that these rules (INF-R3, INF-R4, INF-R6 and INF-R8) appear to be satisfactory for gas distribution networks.	Retain Rule INF-R4 (New vehicle access tracks for infrastructure) as notified.
Avryl Bramley	202.14	Energy Infrastructure and Transport / Infrastructure / INF-R4	Amend	Considers that large companies acquire the right to trespass without notification.	Amend INF-R4 (New vehicle access tracks for infrastructure) to make notification mandatory to relevant home owners for upgrading an infrastructure.
Powerco Limited	FS61.27	Part 2 / Energy Infrastructure and Transport / Infrastructure / INF-R4	Oppose	Not a relevant Resource Management Act consideration.	Disallow
Firstgas Limited	304.32	Energy Infrastructure and Transport / Infrastructure / INF-R4	Support	INF-R4 is generally supported.	Retain INF-R4 (New vehicle access tracks for infrastructure) as notified.
Transpower New Zealand Limited	315.71	Energy Infrastructure and Transport / Infrastructure / INF-R4	Support	[No specific reason provided beyond decision requested - refer to original submission]	Retain INF-R4 (New vehicle access tracks for infrastructure) as notified.
BP Oil New Zealand, Mobil Oil New Zealand Limited and Z Energy Limited (the Fuel Companies)	372.46	Energy Infrastructure and Transport / Infrastructure / INF-R4	Support	[No specific reason given beyond decision requested - refer to original submission]	Retain INF-R4 (New vehicle access tracks for infrastructure) as notified.
Kāinga Ora Homes and Communities	391.124	Energy Infrastructure and Transport / Infrastructure / INF-R4	Oppose in part	INF-R4 is opposed as it divides transport related provisions between the transport and infrastructure chapters. This is inconsistent with best practice and makes navigation of the plan difficult for users.	Delete INF-R4 (New vehicle access tracks for infrastructure) and move the Rule to the Transport chapter.
KiwiRail Holdings Limited	408.43	Energy Infrastructure and Transport / Infrastructure / INF-R4	Support	Supports the ability to construct and extend vehicle access tracks, as a permitted activity in all zones. Vehicle access to the rail corridor is required to undertake inspections and carry out regular maintenance of the rail network, as well as any upgrade works.	Retain INF-R4 (New vehicle access tracks for infrastructure) as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	99.28	Energy Infrastructure and Transport / Infrastructure / INF-R5	Support	INF-R5 is supported as it appears to be satisfactory for telecommunications networks.	Retain INF-R5 (New aboveground customer connection line) as notified.
Powerco Limited	127.21	Energy Infrastructure and Transport / Infrastructure / INF-R5	Oppose	Considers that while a gas lateral customer connection from an adjacent distribution network is primarily laid to the customer underground, there is an above ground component to connect it to the customer premises. This needs to be addressed in rule INF-R5, or alternatively in the underground customer connection rule INF-R2.	Amend Rule INF-R5 (New aboveground customer connection line) as necessary such that the above ground component of an underground gas customer connection to facilitate connection to a customer premises is a permitted activity. The rule currently only applies to lines. Standard INF-S5 (New aboveground customer connections) already applies which limits the diameter of customer connection pipes to 30mm. Alternatively, this could be addressed as an amendment to INF-R2 (New underground infrastructure (including customer connections, and upgrading of existing underground infrastructure) as per the separate submission point on that rule.
Avryl Bramley	202.15	Energy Infrastructure and Transport / Infrastructure / INF-R5	Amend	Considers that large companies acquire the right to trespass without notification.	Amend INF-R5 (New aboveground customer connection line) so that it is not a permitted activity and that notification is mandatory to relevant home owners for upgrading an infrastructure.
Powerco Limited	FS61.28	Part 2 / Energy Infrastructure and Transport / Infrastructure / INF-R5	Oppose	Not a relevant Resource Management Act consideration.	Disallow
BP Oil New Zealand, Mobil Oil New Zealand Limited and Z Energy Limited (the Fuel Companies)	372.47	Energy Infrastructure and Transport / Infrastructure / INF-R5	Support	[No specific reason given beyond decision requested - refer to original submission]	Retain INF-R5 (New aboveground customer connection line) as notified.
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	99.29	Energy Infrastructure and Transport / Infrastructure / INF-R6	Support	INF-R6 is supported as it appears to be satisfactory for telecommunications networks.	Retain INF-R6 (Temporary infrastructure) as notified.
Powerco Limited	127.22	Energy Infrastructure and Transport / Infrastructure / INF-R6	Support	Considers that these rules (INF-R3, INF-R4, INF-R6 and INF-R8) appear to be satisfactory for gas distribution networks.	Retain Rule INF-R6 (Temporary infrastructure) as notified.
Avryl Bramley	202.16	Energy Infrastructure and Transport / Infrastructure / INF-R6	Amend	Considers that large companies acquire the right to trespass without notification.	Amend INF-R6 (Temporary infrastructure) so that it is not a permitted activity and that notification is mandatory to relevant home owners for upgrading an infrastructure.
Powerco Limited	FS61.29	Part 2 / Energy Infrastructure and Transport / Infrastructure / INF-R6	Oppose	Not a relevant Resource Management Act consideration.	Disallow
Transpower New Zealand Limited	315.72	Energy Infrastructure and Transport / Infrastructure / INF-R6	Support	[No specific reason provided beyond decision requested - refer to original submission]	Retain INF-R6 (Temporary infrastructure) as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
BP Oil New Zealand, Mobil Oil New Zealand Limited and Z Energy Limited (the Fuel Companies)	372.48	Energy Infrastructure and Transport / Infrastructure / INF-R6	Support	[No specific reason given beyond decision requested - refer to original submission]	Retain INF-R6 (Temporary infrastructure) as notified.
Wellington International Airport Ltd	406.104	Energy Infrastructure and Transport / Infrastructure / INF-R6	Support in part	Supports the inclusion of rules listed as they create an appropriate consenting pathway for infrastructure. Considers that some of the conditions included in these rules will require consequential changes to account for the proposed new objectives and policies identified by the submitter. [See original submission paragraphs 4.11 to 4.15 for full reason]	Supports INF-R6 (Temporary infrastructure) and seeks amendment.
Wellington International Airport Ltd	406.105	Energy Infrastructure and Transport / Infrastructure / INF-R6	Amend	Supports the inclusion of rules listed as they create an appropriate consenting pathway for infrastructure. Considers that some of the conditions included in these rules will require consequential changes to account for the proposed new objectives and policies identified by the submitter. [See original submission paragraphs 4.11 to 4.15 for full reason]	Seeks that INF-R6 (Temporary infrastructure) is amended to include reference to submitters proposed new objectives and policies within the relevant matters of discretion. [Inferred decision requested]
KiwiRail Holdings Limited	408.44	Energy Infrastructure and Transport / Infrastructure / INF-R6	Support	Supports the ability to install, operate and remove temporary infrastructure as a permitted activity.	Retain INF-R6 (Temporary infrastructure) as notified.
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	99.30	Energy Infrastructure and Transport / Infrastructure / INF-R7	Support	INF-R7.5 is supported as it appears to be satisfactory for telecommunications networks.	Retain INF-R7.5 (Structures associated with infrastructure including: Communications kiosks) as notified.
Powerco Limited	127.23	Energy Infrastructure and Transport / Infrastructure / INF-R7	Oppose	Considers that the reference to the term “gas regulation valve” is confusing and could capture typical regulation equipment on customer conditions such as a shut off valve which could be within 2m of a residential boundary. Further, this equipment may be located within a road underground within 2m of an adjacent residential property.	Amend Rule INF-R7 (structures associated with infrastructure) as follows: ... b. Any substation, gas regulation valve and/or takeoff station or energy storage batteries are set back at least 2m from a residential site boundary;
Avryl Bramley	202.17	Energy Infrastructure and Transport / Infrastructure / INF-R7	Amend	Considers that large companies acquire the right to trespass without notification.	Amend INF-R7 (Structures associated with infrastructure) so that it is not a permitted activity and that notification is mandatory to relevant home owners for upgrading an infrastructure.
Powerco Limited	FS61.30	Part 2 / Energy Infrastructure and Transport / Infrastructure / INF-R7	Oppose	Not a relevant Resource Management Act consideration.	Disallow
Firstgas Ltd	FS97.9	Part 2 / Energy Infrastructure and Transport / Infrastructure / INF-R7	Oppose	Firstgas opposes this submission which seeks to amend INF-R7 so that structures associated with infrastructure are not Permitted and that notification is mandatory to relevant homeowners when installing structures associated with infrastructure. Firstgas seek for this activity to remain Permitted to allow Firstgas to install structures associated with gas transmission where permitted standards are achieved. In relation to notifying homeowners, this is a legal matter that is dealt with outside of the District Plan/planning framework. Where an activity is Permitted within the District Plan, it does not specifically allow for access over private land.	Disallow

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Wellington City Council	266.63	Energy Infrastructure and Transport / Infrastructure / INF-R7	Amend	Considers the rule needs to make it clear that bus shelters are a permitted activity under this rule.	Amend INF-R7 (Structures associated with infrastructure...) as follows: Structures associated with infrastructure including: 1. Substations (including switching stations); 2. Transformers; 3. Gas transmission and distribution structures; 4. Energy storage batteries not enclosed by a building; and 5. Communications kiosks; <u>and</u> 6. <u>Bus shelters</u> .
Transpower New Zealand Limited	315.73	Energy Infrastructure and Transport / Infrastructure / INF-R7	Support	Supports the provision of a rule specific to new substations, and the provision of a restricted discretionary activity status (noting Standard INF-S1 would be complied with).	Retain INF-R7 (Structures associated with infrastructure...) as notified.
Retirement Villages Association of New Zealand Incorporated	350.40	Energy Infrastructure and Transport / Infrastructure / INF-R7	Support	Supports the provision of structures associated with infrastructure (including transformers) as a permitted activity when all standards are met, or a restricted discretionary activity when they are not.	Retain INF+D5868:J5874-R7 (Structures associated with infrastructure including...) as notified.
Wellington Electricity Lines Limited	355.36	Energy Infrastructure and Transport / Infrastructure / INF-R7	Support in part	Supports INF-R7 in part and seeks amendment.	Retain INF-P12 (Structures associated with infrastructure including: 1. Substations (including switching stations); 2. Transformers; 3. Gas transmission and distribution structures; 4. Energy storage batteries not enclosed by a building; and 5. Communications kiosks), with amendment.
Wellington Electricity Lines Limited	355.37	Energy Infrastructure and Transport / Infrastructure / INF-R7	Amend	Considers that INF-R7 should be amended so that equipment located within the road reserve is included and so that front boundaries be exempt from the 2m setback. It is considered that the 2m residential boundary setback will not easily be achieved for batteries, transformers, pillars or switchgear that is contained within cabinets (i.e., common road reserve equipment), especially in from boundaries. Furthermore, the rule should clearly include associated equipment (i.e., transformers or energy storage batteries) that may be pole-mounted or otherwise contained within the road reserve. To keep electricity prices as low as possible while achieving the above; consequently, the WCC should work with infrastructure providers to ensure an efficient long term strategy and network capacity forecasts are implemented. [Refer to original submission for full reason]	Amend INF-R7.1 (Structures associated with infrastructure including: ...) as follows: Structures <u>and equipment</u> associated with infrastructure including: ... 1. Activity Status: Permitted Where: a. In the Rural Production, Rural Lifestyle or General Industrial Zones, the maximum building and structure height standard for that Zone is complied with. In all other zones INF-S6 must be complied with; b. Any substation, gas regulation valve and/or takeoff station or energy storage batteries are set back at least 2m from a residential site <u>side or rear</u> boundary; c. Compliance is achieved with INF-S7 and INF-S15; and d. Compliance is achieved with INF-S1.
BP Oil New Zealand, Mobil Oil New Zealand Limited and Z Energy Limited (the Fuel Companies)	372.49	Energy Infrastructure and Transport / Infrastructure / INF-R7	Support	[No specific reason given beyond decision requested - refer to original submission]	Retain INF-R7 (Structures associated with infrastructure) as notified.
Wellington International Airport Ltd	406.106	Energy Infrastructure and Transport / Infrastructure / INF-R7	Oppose in part	Submitter is concerned that the use of the term "including" in this rule means that it may not be exhaustive and could inadvertently capture airport structures located outside of the Airport Zone. To be enforceable, the rule must be clear and concise in its application.	Opposes INF-R7 (Structures associated with infrastructure) and seeks amendment.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Wellington International Airport Ltd	406.107	Energy Infrastructure and Transport / Infrastructure / INF-R7	Amend	Submitter is concerned that the use of the term "including" in this rule means that it may not be exhaustive and could inadvertently capture airport structures located outside of the Airport Zone. To be enforceable, the rule must be clear and concise in its application.	Amend INF-R7 (Structures associated with infrastructure) as follows: INF-R7 Structures associated with infrastructure including :
KiwiRail Holdings Limited	408.45	Energy Infrastructure and Transport / Infrastructure / INF-R7	Support	Supports the permitted activity status of structures associated with infrastructure, subject to standards.	Retain INF-R7 (Structures associated with infrastructure including: Substations (including switching stations); Transformers; Gas transmission and distribution structures; Energy storage batteries not enclosed by a building; and Communications kiosks) as notified.
Firstgas Ltd	FS97.10	Part 2 / Energy Infrastructure and Transport / Infrastructure / INF-R7	Support	Firstgas supports this submission which seeks to retain INF – R7 as notified which provides for structures associated with infrastructure (including gas transmission and distribution structures) as a Permitted Activity subject to achieving relevant standards.	Allow
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	99.31	Energy Infrastructure and Transport / Infrastructure / INF-R8	Support	INF-R8 is supported as it appears to be satisfactory for telecommunications networks.	Retain INF-R8 (New infrastructure contained within existing buildings) as notified.
Powerco Limited	127.24	Energy Infrastructure and Transport / Infrastructure / INF-R8	Support	Considers that these rules (INF-R3, INF-R4, INF-R6 and INF-R8) appear to be satisfactory for gas distribution networks.	Retain Rule INF-R8 (New infrastructure contained within existing buildings) as notified.
BP Oil New Zealand, Mobil Oil New Zealand Limited and Z Energy Limited (the Fuel Companies)	372.50	Energy Infrastructure and Transport / Infrastructure / INF-R8	Support	[No specific reason given beyond decision requested - refer to original submission]	Retain INF-R8 (New infrastructure contained within existing buildings) as notified.
Avryl Bramley	202.18	Energy Infrastructure and Transport / Infrastructure / INF-R9	Amend	Considers that large companies acquire the right to trespass without notification.	Amend INF-R9 (Navigational aids, sensing and environmental monitoring equipment) so that it is not a permitted activity and that notification is mandatory to relevant home owners for upgrading an infrastructure.
Powerco Limited	FS61.31	Part 2 / Energy Infrastructure and Transport / Infrastructure / INF-R9	Oppose	Not a relevant Resource Management Act consideration.	Disallow
BP Oil New Zealand, Mobil Oil New Zealand Limited and Z Energy Limited (the Fuel Companies)	372.51	Energy Infrastructure and Transport / Infrastructure / INF-R9	Support	[No specific reason given beyond decision requested - refer to original submission]	Retain INF-R9 (Navigational aids, sensing and environmental monitoring equipment (including air quality and meteorological)) as notified.
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	99.32	Energy Infrastructure and Transport / Infrastructure / INF-R10	Oppose	INF-R10 should be amended to also provide for above ground telecommunications lines.	Amend the title of INF-R10 (New overhead lines and associated support structures that convey electricity below 110kV) as follows: New overhead lines and associated support structures that <u>either</u> convey electricity below 110kV <u>or are for telecommunications</u> .
Transpower New Zealand Limited	315.74	Energy Infrastructure and Transport / Infrastructure / INF-R10	Support	Supports the provision of a rule specific to new overhead lines and associated support structures that convey electricity below 110kV, and the provision of a restricted discretionary or discretionary activity status.	Retain INF-R10 (New overhead lines and associated support structures that convey electricity below 110kV) as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Wellington Electricity Lines Limited	355.38	Energy Infrastructure and Transport / Infrastructure / INF-R10	Support in part	Supports INF-R10 in part, but considers this should include associated equipment in its title.	Retain INF-R10 (New overhead lines and associated support structures that convey electricity below 110kV) with amendment.
Wellington Electricity Lines Limited	355.39	Energy Infrastructure and Transport / Infrastructure / INF-R10	Amend	Considers that the wording in the title of Rule INF-R10 should be amended to include associated equipment identified with overhead networks. This is to ensure provision of additional pole-mounted transformers and or battery storage cabinets are contained within the PDP.	Amend the title of INF-R10 (New overhead lines and associated support structures that convey electricity below 110kV) as follows: INF-R10 (New overhead lines and associated support structures <u>and equipment</u> that convey electricity below 110kV)
BP Oil New Zealand, Mobil Oil New Zealand Limited and Z Energy Limited (the Fuel Companies)	372.52	Energy Infrastructure and Transport / Infrastructure / INF-R10	Support	[No specific reason given beyond decision requested - refer to original submission]	Retain INF-R10 (New overhead lines and associated support structures that convey electricity below 110kV) as notified.
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	99.33	Energy Infrastructure and Transport / Infrastructure / INF-R11	Support	INF-R11 is supported as it appears to be satisfactory for telecommunications networks.	Retain INF-R11 (Telecommunications or radiocommunication activities (not otherwise provided for by another rule in this table and not regulated by the NESTF)) as notified.
Avryl Bramley	202.19	Energy Infrastructure and Transport / Infrastructure / INF-R11	Amend	Considers that large companies acquire the right to trespass without notification.	Amend INF-R11 (Telecommunications or radiocommunication activities) so that it is not a permitted activity and that notification is mandatory to relevant home owners for upgrading an infrastructure.
Powerco Limited	FS61.32	Part 2 / Energy Infrastructure and Transport / Infrastructure / INF-R11	Oppose	Not a relevant Resource Management Act consideration.	Disallow
BP Oil New Zealand, Mobil Oil New Zealand Limited and Z Energy Limited (the Fuel Companies)	372.53	Energy Infrastructure and Transport / Infrastructure / INF-R11	Support	[No specific reason given beyond decision requested - refer to original submission]	Retain INF-R11 (Telecommunications or radiocommunication activities (not otherwise provided for by another rule in this table and not regulated by the NESTF)) as notified.
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	99.34	Energy Infrastructure and Transport / Infrastructure / INF-R12	Support	INF-R12 is supported as it appears to be satisfactory for telecommunications networks.	Retain INF-R12 (New telecommunications poles and new antennas (regulated by the NESTF that do not meet the permitted activity standards in those Regulations)) as notified.
BP Oil New Zealand, Mobil Oil New Zealand Limited and Z Energy Limited (the Fuel Companies)	372.54	Energy Infrastructure and Transport / Infrastructure / INF-R12	Support	[No specific reason given beyond decision requested - refer to original submission]	Retain INF-R12 (New telecommunications poles and new antennas (regulated by the NESTF that do not meet the permitted activity standards in those Regulations)) as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	99.35	Energy Infrastructure and Transport / Infrastructure / INF-R13	Support	INF-R13 is supported as it appears to be satisfactory for telecommunications networks.	Retain INF-R13 (New antenna attached to a building (regulated by the NESTF that do not meet the permitted standards in the NESTF)) as notified.
BP Oil New Zealand, Mobil Oil New Zealand Limited and Z Energy Limited (the Fuel Companies)	372.55	Energy Infrastructure and Transport / Infrastructure / INF-R13	Support	[No specific reason given beyond decision requested - refer to original submission]	Retain INF-R13 (New antenna attached to a building (regulated by the NESTF that do not meet the permitted standards in the NESTF)) as notified.
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	99.36	Energy Infrastructure and Transport / Infrastructure / INF-R14	Support	INF-R14 is supported as it appears to be satisfactory for telecommunications networks.	Retain INF-R14 (New telecommunications cabinets (regulated by the NESTF that do not meet the permitted standards of the NESTF)) as notified.
BP Oil New Zealand, Mobil Oil New Zealand Limited and Z Energy Limited (the Fuel Companies)	372.56	Energy Infrastructure and Transport / Infrastructure / INF-R14	Support	[No specific reason given beyond decision requested - refer to original submission]	Retain INF-R14 (New telecommunications cabinets (regulated by the NESTF that do not meet the permitted standards of the NESTF)) as notified.
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	99.37	Energy Infrastructure and Transport / Infrastructure / INF-R15	Support	INF-R15 is supported as it appears to be satisfactory for telecommunications networks.	Retain INF-R15 (Infrastructure buildings and structures not provided for by any other rule in this table) as notified.
Transpower New Zealand Limited	315.75	Energy Infrastructure and Transport / Infrastructure / INF-R15	Support	[No specific reason provided beyond decision requested - refer to original submission]	Retain INF-R15 (Infrastructure buildings and structures not provided for by any other rule in this table) as notified.
BP Oil New Zealand, Mobil Oil New Zealand Limited and Z Energy Limited (the Fuel Companies)	372.57	Energy Infrastructure and Transport / Infrastructure / INF-R15	Support	[No specific reason given beyond decision requested - refer to original submission]	Retain INF-R15 (Infrastructure buildings and structures not provided for by any other rule in this table) as notified.
Wellington International Airport Ltd	406.108	Energy Infrastructure and Transport / Infrastructure / INF-R15	Support in part	Supports the inclusion of rules listed as they create an appropriate consenting pathway for infrastructure. Considers that some of the conditions included in these rules will require consequential changes to account for the proposed new objectives and policies identified by the submitter. [See original submission paragraphs 4.11 to 4.15 for full reason]	Supports INF-R15 (Infrastructure, buildings and structures not provided for by any other rule) and seeks amendment.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Wellington International Airport Ltd	406.109	Energy Infrastructure and Transport / Infrastructure / INF-R15	Amend	Supports the inclusion of rules listed as they create an appropriate consenting pathway for infrastructure. Considers that some of the conditions included in these rules will require consequential changes to account for the proposed new objectives and policies identified by the submitter. [See original submission paragraphs 4.11 to 4.15 for full reason]	Seeks that INF-R15 (Infrastructure, buildings and structures not provided for by any other rule) is amended to include reference to submitters proposed new objectives and policies within the relevant matters of discretion. [Inferred decision requested]
KiwiRail Holdings Limited	408.46	Energy Infrastructure and Transport / Infrastructure / INF-R15	Support	Supports infrastructure buildings and structures being a permitted activity subject to standards.	Retain INF-R15 (Infrastructure buildings and structures not provided for by any other rule in this table) as notified.
Transpower New Zealand Limited	315.76	Energy Infrastructure and Transport / Infrastructure / INF-R16	Support	Supports the default rule and provided restricted discretionary activity status. Considers the rule and activity status give effect to the NPS-ET and in particular Policies 1 and 2. Considers the cross references to policies would need to be updated on the basis a separate suite of National Grid policies is provided.	Retain Rule INF-R16 (New electricity lines and associated support structures (including poles and towers) that convey electricity of 110kV or above) as notified. [But amend the policy cross references to reference the proposed National Grid specific policies]
Transpower New Zealand Limited	315.77	Energy Infrastructure and Transport / Infrastructure / INF-R16	Amend	Supports the default rule and provided restricted discretionary activity status. Considers the rule and activity status give effect to the NPS-ET and in particular Policies 1 and 2. Considers the cross references to policies would need to be updated on the basis a separate suite of National Grid policies is provided.	Retain Rule INF-R16 (New electricity lines and associated support structures (including poles and towers) that convey electricity of 110kV or above) as notified. [But amend the policy cross references to reference the proposed National Grid specific policies]
BP Oil New Zealand, Mobil Oil New Zealand Limited and Z Energy Limited (the Fuel Companies)	372.58	Energy Infrastructure and Transport / Infrastructure / INF-R16	Support	[No specific reason given beyond decision requested - refer to original submission]	Retain INF-R16 (New electricity lines and associated support structures (including poles and towers) that convey electricity of 110kV or above) as notified.
Powerco Limited	127.25	Energy Infrastructure and Transport / Infrastructure / INF-R17	Oppose in part	Considers that this rule applies to above ground pipelines and the submitter is opposed only insofar as its potential to apply to the above ground portion of an underground customer connection.	Amend the rules for customer connections (either INF-R2 (New underground infrastructure) or INF-R5 (New aboveground customer connection line)) such that INF-R17 does not apply to the above ground component of a gas customer connection. Provided this is addressed in other rules then no amendment to INF-R17 is required.
BP Oil New Zealand, Mobil Oil New Zealand Limited and Z Energy Limited (the Fuel Companies)	372.59	Energy Infrastructure and Transport / Infrastructure / INF-R17	Support	[No specific reason given beyond decision requested - refer to original submission]	Retain INF-R17 (New aboveground pipelines) as notified.
BP Oil New Zealand, Mobil Oil New Zealand Limited and Z Energy Limited (the Fuel Companies)	372.60	Energy Infrastructure and Transport / Infrastructure / INF-R18	Support	[No specific reason given beyond decision requested - refer to original submission]	Retain INF-R18 (New water, wastewater and stormwater pump stations) as notified.
BP Oil New Zealand, Mobil Oil New Zealand Limited and Z Energy Limited (the Fuel Companies)	372.61	Energy Infrastructure and Transport / Infrastructure / INF-R19	Support	[No specific reason given beyond decision requested - refer to original submission]	Retain INF-R19 (New water treatment plants) as notified.
BP Oil New Zealand, Mobil Oil New Zealand Limited and Z Energy Limited (the Fuel Companies)	372.62	Energy Infrastructure and Transport / Infrastructure / INF-R20	Support	[No specific reason given beyond decision requested - refer to original submission]	Retain INF-R20 (New wastewater treatment plants) as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
BP Oil New Zealand, Mobil Oil New Zealand Limited and Z Energy Limited (the Fuel Companies)	372.63	Energy Infrastructure and Transport / Infrastructure / INF-R21	Support	[No specific reason given beyond decision requested - refer to original submission]	Retain INF-R21 (Amateur radio configuration) as notified.
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	99.38	Energy Infrastructure and Transport / Infrastructure / INF-R22	Support	INF-R22 is supported as it appears to be satisfactory for telecommunications networks.	Retain INF-R22 (Buildings, structures and activities in the National Grid Yard) as notified.
Transpower New Zealand Limited	315.78	Energy Infrastructure and Transport / Infrastructure / INF-R22	Amend	Considers that, on the basis that the National Grid is a qualifying matter, rule INF-R22 should be included as part of the ISPP process.	Seeks that, subject to other amendments sought by the submitter to INF-R22 (Buildings, structures and activities in the National Grid Yard), the rule be included within the IPI and made subject to the ISPP process.
Transpower New Zealand Limited	315.79	Energy Infrastructure and Transport / Infrastructure / INF-R22	Support in part	<p>Supports INF-R22 on the basis that it gives effect to Policy 10 and Policy 11 of the NPSET.</p> <p>Considers activities established in close proximity to lines and structures can generate reverse sensitivity effects on existing infrastructure. Considers that the provisions sought in relation to the National Grid Yard are intended to allow for the reasonable use of land inside the transmission line corridor. Specific to the 10-12 m 'National Grid Yard', the submitter considers that there are some activities within the National Grid Yard that will not compromise the operation, maintenance or any upgrade of the network, due to their nature and small scale. Conversely, considers that there are examples of development that should be avoided in the National Grid Yard. Considers that of particular relevance in terms of the effects of activities on the National Grid are NPS-ET Policies 10 and 11.</p> <p>Considers that notwithstanding support for the rule, amendments are sought as follows:</p> <ul style="list-style-type: none"> - Insertion of a list of non-complying activities to make it clear to Plan users those activities that are not permitted. This will assist with plan interpretation and application and given the national significance of the National Grid and non-complying activity status for those activities which are not appropriate in the National Grid Yard, will provide certainty for plan users. - On the basis of the sought non-complying activity clause b., permitted activities a. and b. relating to sensitive activities and hazardous substances can be removed as they are more appropriately addressed and framed as non-complying activities. <p>[Refer to original submission for full reason]</p>	Supports INF-R22 (Buildings, structures and activities in the National Grid Yard) with amendments.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Transpower New Zealand Limited	315.80	Energy Infrastructure and Transport / Infrastructure / INF-R22	Amend	<p>Supports INF-R22 on the basis that it gives effect to Policy 10 and Policy 11 of the NPS-ET.</p> <p>Considers activities established in close proximity to lines and structures can generate reverse sensitivity effects on existing infrastructure. Considers that the provisions sought in relation to the National Grid Yard are intended to allow for the reasonable use of land inside the transmission line corridor. Any building or structure not otherwise provided for under INF-R22.1.</u> ... </p>
BP Oil New Zealand, Mobil Oil New Zealand Limited and Z Energy Limited (the Fuel Companies)	372.64	Energy Infrastructure and Transport / Infrastructure / INF-R22	Support	[No specific reason given beyond decision requested - refer to original submission]	Retain INF-R22 (Buildings, structures and activities in the National Grid Yard) as notified.
Kāinga Ora Homes and Communities	391.125	Energy Infrastructure and Transport / Infrastructure / INF-R22	Support in part	INF-R22 is partially supported but an amendment is sought to remove the establishment of new sensitive activities from the National Grid Yard as a permitted activity.	Retain INF-R22 (Buildings, structures and activities in the National Grid Yard) with amendment.
Transpower New Zealand Limited	FS29.9	Part 2 / Energy Infrastructure and Transport / Infrastructure / INF-R22	Oppose	The intent of the relief sought is not clear. In its submission Transpower sought amendment to R22 to make it clear that sensitive activities are a non-complying activity within the National Grid Yard. The relief sought by Kainga Ora is opposed if the intent is to permit such activities.	Disallow

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Kāinga Ora Homes and Communities	391.126	Energy Infrastructure and Transport / Infrastructure / INF-R22	Amend	Considers that INF-R22.1 should be amended to remove the establishment of new sensitive activities from the National Grid Yard as a permitted activity. The rule is considered to appropriately cover the alteration and addition to existing sensitive activities.	Amend INF-R22.1 (Buildings, structures and activities in the National Grid Yard) as follows: 1. Activity status: Permitted Where: a. The activity is not a sensitive activity; b. a. The building or structure is not for the handling or storage of sus with explosive or flammable intrinsic properties (except this does not apply to the accessory use and storage of hazardous substances in domestic scale quantities); and c. The structure is a fence not exceeding 2.5m in height; d. The building is an uninhabited farm or horticultural structure or building (but not commercial greenhouses, protective canopies, wintering barns, produce packing facilities, or milking/dairy sheds (excluding ancillary stockyards and platforms)); e. Alterations and additions to an existing building or structure for a sensitive activity , which does not involve an increase in the building height or building footprint; or f. An accessory building associated with an existing residential activity that is less than 10m2 in footprint and 2.5m in height; g. Infrastructure undertaken by a network utility operator as defined in the Resource Management Act 1991 or any part of electricity infrastructure that connects to the National Grid; and h. Compliance is achieved with INF-S12
Transpower New Zealand Limited	FS29.10	Part 2 / Energy Infrastructure and Transport / Infrastructure / INF-R22	Oppose	The intent of the relief sought is not clear. In its submission Transpower sought amendment to R22 to make it clear that sensitive activities are a non-complying activity within the National Grid Yard. The relief sought by Kainga Ora is opposed if the intent is to permit such activities.	Disallow
Kāinga Ora Homes and Communities	391.127	Energy Infrastructure and Transport / Infrastructure / INF-R22	Amend	Considers that INF-R22.2 should be amended to remove the requirement that all applications for resource consent under INF-R22 require the written approval of Transpower New Zealand.	Amend INF-R22.2 (Buildings, structures and activities in the National Grid Yard) as follows: 2. Activity status: Non-complying Where: a. Compliance with INF-R22.1 cannot be achieved. Notification status: An application for resource consent made in respect of rule INF-R22.2 is precluded from being publicly <u>or limited</u> notified. Notice of any application for resource consent under this rule must be served on Transpower New Zealand Limited in accordance with Clause 10(2)(i) of the Resource Management (Forms, Fees, and Procedures) Regulations 2003.
Transpower New Zealand Limited	FS29.11	Part 2 / Energy Infrastructure and Transport / Infrastructure / INF-R22	Oppose	The NPSET recognises the operation, maintenance, upgrade and development of the National Grid to be of national significance. Any development within the National Grid Yard can have implications for both the grid itself as well as the public. Given the technical aspects of the National Grid rule (including NZECP34) it is important Transpower is able to be involved in the resource consent process.	Disallow

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Firstgas Limited	304.33	Energy Infrastructure and Transport / Infrastructure / INF-R23	Amend	Considers that INF-R23 should be amended to implement a separation distance of 60m from the gas transmission network, so as to provide a reasonably practicable solution to achieving the safe operation of the network and mitigation of risk for the wellbeing and health and safety of people and communities. The NZ/AS2885 framework and international advice in respect of the New Zealand context should be considered. Consideration has been given to sensitive activities (excluding residential activities) where the consequences of a pipeline failure may be increased because it is developed for use by sectors of the community who may be unable to protect themselves. Sensitive activities have a higher population density than residential activities and therefore greater separation distances are sought.	Amend INF-R23 (Sensitive activities, including the erection of buildings for sensitive activities, within the Gas Transmission Pipeline Corridor) as follows: Sensitive activities (excluding residential activities), including the erection of buildings for sensitive activities, <u>within 60m of the Gas Transmission Network</u> . Matters of discretion are: 1. The extent to which the proposed activities are likely to compromise the stability and integrity of the gas transmission pipeline network and the operation, maintenance and upgrading of the <u>Gas Transmission Network</u> pipeline network ; 2. The risk of hazards affecting public or individual safety, and the risk of property damage; 3. Measures proposed to avoid or mitigate potential adverse effects on the Gas Transmission pipeline Network ; 4. The outcome of any consultation with the owner and operator of the Gas Transmission pipeline Network and Gas Transmission Pipeline Network ; and Whether the sensitive activity could be located a greater distance from the Gas Transmission pipeline Network Gas Transmission Pipeline Network Notice of any application for resource consent under this rule must be served on the owner and operator of the Gas Transmission Pipeline Network in accordance with Clause 10(2)(i) of the Resource Management (Forms, Fees, and Procedures) Regulations 2003. Note: This rule also applies to the establishment of a sensitive activity in an existing building, or any change of land use to a sensitive activity. If a resource consent application is made under this rule, the owner and operator of the Gas Transmission Network Pipeline will be considered an affected person in accordance with section 95E of the Act and notified of the application, where written approval is not provided.
Kāinga Ora – Homes and Communities	FS89.63	Part 2 / Energy Infrastructure and Transport / Infrastructure / INF-R23	Oppose	Kāinga Ora opposes the changes sought. It is unclear where the spatial application of this rule will apply and as such a cost benefit analysis cannot be undertaken. Kāinga Ora opposes the amendments and introduction of the rule.	Disallow
BP Oil New Zealand, Mobil Oil New Zealand Limited and Z Energy Limited (the Fuel Companies)	372.65	Energy Infrastructure and Transport / Infrastructure / INF-R23	Support	[No specific reason given beyond decision requested - refer to original submission]	Retain INF-R23 (Sensitive activities, including the erection of buildings for sensitive activities, within the Gas Transmission Pipeline Corridor) as notified.
Firstgas Ltd	FS97.11	Part 2 / Energy Infrastructure and Transport / Infrastructure / INF-R23	Support	Firstgas supports this submission which seeks to retain Rule INF – R23 as notified. Rule INF – R23 provides for sensitive activities, including the erection of buildings for sensitive activities, within the Gas Transmission Pipeline Corridor as a Restricted Discretionary Activity. The requirement for consent as a Restricted Discretionary Activity allows for the proposed activity to be assessed against the relevant matters of discretion. This ensures that the activity is appropriately managed in relation to the potential effects associated with the Gas Transmission Pipeline. Firstgas as the owner and operator of the Gas Transmission Pipeline will be notified of an application under this rule where written approval has not been provided.	Allow
Wellington City Council	266.64	Energy Infrastructure and Transport / Infrastructure / INF-R24	Amend	Considers that Rule INF-R24.2 (Connections to roads) states that the matters of discretion are “The matters in INF-P13.” However, INF-P13 relates to Infrastructure within riparian margins. This should instead reference (INF-P11 Connections to roads).	Amend matters of discretion under INF-R24.2 (Connections to roads) as follows: a. The matters in INF- P13 <u>P11</u> .

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Fire and Emergency New Zealand	273.34	Energy Infrastructure and Transport / Infrastructure / INF-R24	Support in part	Supports the rule as it requires connections to roads to comply with a list of standards. Considers it necessary to ensure that connections to roads accommodate access for fire appliances in situations where the site is located in an unreticulated area, or the length of the driveway exceeds hose run distances. Therefore supports INF-R24, subject to the relief sought under INF-S16.	Retain INF-R24 (Connections to roads) as notified.
BP Oil New Zealand, Mobil Oil New Zealand Limited and Z Energy Limited (the Fuel Companies)	372.66	Energy Infrastructure and Transport / Infrastructure / INF-R24	Support	[No specific reason given beyond decision requested - refer to original submission]	Retain INF-R24 (Connections to roads) as notified.
Kāinga Ora Homes and Communities	391.128	Energy Infrastructure and Transport / Infrastructure / INF-R24	Oppose in part	INF-R24 is opposed as it divides transport related provisions between the transport and infrastructure chapters. This is inconsistent with best practice and makes navigation of the plan difficult for users.	Delete INF-R24 (Connections to roads) and move the Rule to the Transport chapter.
Waka Kotahi NZ Transport Agency	FS103.8	Part 2 / Energy Infrastructure and Transport / Infrastructure / INF-R24	Oppose	The transport network is a type of infrastructure. There are matters that are common to transport and other types of infrastructure and there are matters specific to transport. It is sensible and appropriate to group them as drafted in the proposed plan.	Disallow
Survey & Spatial New Zealand Wellington Branch	439.21	Energy Infrastructure and Transport / Infrastructure / INF-R24	Amend	Considers there may be a reference error in this rule - it refers to INF-S16 and INF-S17, but should instead refer to INF-15 and INF-16.	Amend INF-R24 (Connections to roads) to: 1. Activity status: Permitted Where: a. The connection provides site access for sites with no driveway, on-site parking or loading; and b. Compliance is achieved with INF-S16 INF-S15; Or c. The connection provides site access to an Urban Road (except a Transit Corridor) or a Rural Road (except National Highway) as identified in mapped in the road classification overlay; and d. Compliance is achieved with INF-S17 INF-S16.
Fire and Emergency New Zealand	273.35	Energy Infrastructure and Transport / Infrastructure / INF-R25	Support in part	Supports the rule subject to amendments sought under INF-S13 and related Table 1. Amendments sought to INF-S13 includes the need to provide for unhindered vehicle access, including fire appliance access, on all roads. Considers it is necessary to ensure that controlled and discretionary activities under this rule require compliance with INF-S13, subject to the relief sought. In turn, a matter of control should include the consideration of fire access for activities which infringe this rule and associated standards. Considers it will give better effect to policy INF-P1 which seeks to provide for the functions and responsibilities of infrastructure as lifeline utilities during an emergency, as well as the relief sought under INF-P9.	Retain INF-R25 (New roads) as notified.
BP Oil New Zealand, Mobil Oil New Zealand Limited and Z Energy Limited (the Fuel Companies)	372.67	Energy Infrastructure and Transport / Infrastructure / INF-R25	Support	[No specific reason given beyond decision requested - refer to original submission]	Retain INF-R25 (New roads) as notified.
Kāinga Ora Homes and Communities	391.129	Energy Infrastructure and Transport / Infrastructure / INF-R25	Oppose in part	INF-R25 is opposed as it divides transport related provisions between the transport and infrastructure chapters. This is inconsistent with best practice and makes navigation of the plan difficult for users.	Delete INF-R25 (New roads) and move the Rule to the Transport chapter.
BP Oil New Zealand, Mobil Oil New Zealand Limited and Z Energy Limited (the Fuel Companies)	372.68	Energy Infrastructure and Transport / Infrastructure / INF-R26	Support	[No specific reason given beyond decision requested - refer to original submission]	Retain INF-R26 (Structures near railway level crossings) as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
KiwiRail Holdings Limited	408.47	Energy Infrastructure and Transport / Infrastructure / INF-R26	Amend	Considers that public safety at level crossings is crucial, and protection of sightlines is a key means of ensuring this. KiwiRail therefore support the inclusion of a rule and standard for sight triangles for railway level crossings. KiwiRail seek amendment to this rule to ensure it applies to all potential visual obstructions, not just structures, as listed in INF-S14.	Amend INF-R26 (Structures near railway level crossings) as follows: Structures near Sightlines at railway level crossings 1. Activity status: Permitted Where: a. Compliance is achieved with INF-S14.
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	99.39	Energy Infrastructure and Transport / Infrastructure / INF-S1	Support	INF-S1 is supported as it is considered to be workable for telecommunications networks.	Retain INF-S1 (Health and safety) as notified.
Transpower New Zealand Limited	315.81	Energy Infrastructure and Transport / Infrastructure / INF-S1	Support	[No specific reason provided beyond decision requested - refer to original submission]	Retain INF-S1 (Health and safety) as notified.
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	99.40	Energy Infrastructure and Transport / Infrastructure / INF-S2	Support	INF-S2 is supported as it is considered to be workable for telecommunications networks.	Retain INF-S2 (Underground infrastructure) as notified.
Powerco Limited	127.26	Energy Infrastructure and Transport / Infrastructure / INF-S2	Support	Considers that these standards (INF-S2, INF-S3, INF-S4, INF-S5, INF-S6 and INF-S7) are all workable for gas distribution networks.	Retain standard INF-S2 (Underground infrastructure) as notified.
Transpower New Zealand Limited	315.82	Energy Infrastructure and Transport / Infrastructure / INF-S2	Support in part	Supports INF-S2, noting that where used in INF-R1, it has been clarified the standard applies to existing underground infrastructure.	Retain INF-S2 (Underground infrastructure), with amendment.
Transpower New Zealand Limited	315.83	Energy Infrastructure and Transport / Infrastructure / INF-S2	Support in part	Supports INF-S2, noting that where used in INF-R1, it has been clarified the standard applies to existing underground infrastructure.	Amend INF-S2 (Underground infrastructure) to include the clarification in INF-R1 that specifies that the standard applies to existing underground infrastructure (refer to INF-R1.1.c.i).
Wellington Electricity Lines Limited	355.40	Energy Infrastructure and Transport / Infrastructure / INF-S2	Support	Supports INF-S2 as it allows for electricity conductors to be placed beneath a natural waterbody.	Retain INF-S2 (Underground infrastructure) as notified.
Rod Halliday	25.22	Energy Infrastructure and Transport / Infrastructure / INF-S3	Amend	INF-S3.3 is too restrictive as it is unrealistic to restrict trenching to 120m at any one time. This length is arbitrary and unworkable. Trenches are critical short term works necessary to enable infrastructure to be put in the ground and in our experience do not lead to significant erosion and sediment control issues.	Amend INF-S3 (Earthworks) as follows (Delete point 3.): 1. Earthworks must not create a dust nuisance; 2. As soon as practical, but not later than three months after the completion of earthworks or stages of earthworks, the earthworks area must be stabilised with vegetation or sealed, paved, metalled or built over; 3. Trenching must be progressively closed and stabilised such that no more than 120m of continuous trench is exposed to erosion at any one time; ...
Heidi Snelson	FS24.3	Part 2 / Energy Infrastructure and Transport / Infrastructure / INF-S3	Oppose	Submitter seeks to undertake extensive earthworks without defined limits as specified by PDP in relation to depth or width or extent (across and beyond development).	Disallow / Seeks that submission be disallowed in part to limit prescribed/allowed earthworks to build areas only and check this is the case.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	99.41	Energy Infrastructure and Transport / Infrastructure / INF-S3	Support	INF-S3 is supported as it is considered to be workable for telecommunications networks.	Retain INF-S3 (Earthworks) as notified.
Powerco Limited	127.27	Energy Infrastructure and Transport / Infrastructure / INF-S3	Support	Considers that these standards (INF-S2, INF-S3, INF-S4, INF-S5, INF-S6 and INF-S7) are all workable for gas distribution networks.	Retain standard INF-S3 (earthworks) as notified.
Transpower New Zealand Limited	315.84	Energy Infrastructure and Transport / Infrastructure / INF-S3	Support	[No specific reason provided beyond decision requested - refer to original submission]	Retain INF-S3 (Earthworks) as notified.
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	99.42	Energy Infrastructure and Transport / Infrastructure / INF-S4	Oppose	INF-S4 relates to upgrading above ground infrastructure. Whilst it enables the upgrade of telecommunications poles to the greater of the existing height or standards in INF-S8, it does not include any provision for replacement of antennas, or making changes to the width of an antenna support headframe (only the support pole itself). Changes to address this are requested.	Amend Standard INF-S4 (Upgrading of aboveground infrastructure) as follows: ... 4. The diameter or width of a replacement pole or telecommunications pole or <u>telecommunications pole antenna support headframe</u> : a. Must not exceed twice that of the replaced pole at its widest point; or b. Where a single pole is replaced with a pi pole, the width of the pi pole structure must not exceed 4.2m; <u>4.A. The size of any antenna attached to a telecommunications pole shall not exceed the standards in INF-S9.</u>
Powerco Limited	127.28	Energy Infrastructure and Transport / Infrastructure / INF-S4	Support	Considers that these standards (INF-S2, INF-S3, INF-S4, INF-S5, INF-S6 and INF-S7) are all workable for gas distribution networks.	Retain standard INF-S4 (Upgrading of aboveground infrastructure) as notified.
Transpower New Zealand Limited	315.85	Energy Infrastructure and Transport / Infrastructure / INF-S4	Support	Considers that specific to the National Grid, the Resource Management (National Environmental Standards for Electricity Transmission Activities) Regulations 2009 ("NESETA") provides prevailing provisions for maintenance, reconductoring, increasing voltage, structure addition or replacement, and removal, for the National Grid. On this basis, considers INF-S4 is of limited relevance to Transpower, but as notified, is supported.	Retain INF-S4 (Upgrading of aboveground infrastructure) as notified.
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	99.43	Energy Infrastructure and Transport / Infrastructure / INF-S5	Support	INF-S5 is supported as it is considered to be workable for telecommunications networks.	Retain INF-S5 (New aboveground customer connections) as notified.
Powerco Limited	127.29	Energy Infrastructure and Transport / Infrastructure / INF-S5	Support	Considers that these standards (INF-S2, INF-S3, INF-S4, INF-S5, INF-S6 and INF-S7) are all workable for gas distribution networks.	Retain standard INF-S5 (New aboveground customer connections) as notified.
Wellington Electricity Lines Limited	355.41	Energy Infrastructure and Transport / Infrastructure / INF-S5	Support in part	Supports INF-S5 in general, but considers the provision should specify conductor diameter.	Retain INF-S5 (New aboveground customer connections) with amendment,
Wellington Electricity Lines Limited	355.42	Energy Infrastructure and Transport / Infrastructure / INF-S5	Amend	Considers that INF-S5 should be amended to have the specification for the conductor diameter increased to 43mm to reflect technical considerations.	Amend INF-S5 (New aboveground customer connections) as follows: 1. The connection must not exceed three additional poles; and 2. The diameter of conductors, lines, pipes or cables must not exceed 30mm, <u>and 43mm for conductors.</u>

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	99.44	Energy Infrastructure and Transport / Infrastructure / INF-S6	Support	INF-S6 is supported as it is considered to be workable for telecommunications networks.	Retain INF-S6 (Structures) as notified.
Powerco Limited	127.30	Energy Infrastructure and Transport / Infrastructure / INF-S6	Support	Considers that these standards (INF-S2, INF-S3, INF-S4, INF-S5, INF-S6 and INF-S7) are all workable for gas distribution networks.	Retain standard INF-S6 (Structures) as notified.
Transpower New Zealand Limited	315.86	Energy Infrastructure and Transport / Infrastructure / INF-S6	Support	[No specific reason provided beyond decision requested - refer to original submission]	Retain INF-S6 (Structures) as notified.
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	99.45	Energy Infrastructure and Transport / Infrastructure / INF-S7	Support	INF-S7 is supported as it is considered to be workable for telecommunications networks.	Retain INF-S7 (Riparian setbacks) as notified.
Powerco Limited	127.31	Energy Infrastructure and Transport / Infrastructure / INF-S7	Support	Considers that these standards (INF-S2, INF-S3, INF-S4, INF-S5, INF-S6 and INF-S7) are all workable for gas distribution networks.	Retain standard INF-S7 (Riparian setbacks) as notified.
Transpower New Zealand Limited	315.87	Energy Infrastructure and Transport / Infrastructure / INF-S7	Support	[No specific reason provided beyond decision requested - refer to original submission]	Retain INF-S7 (Riparian setbacks) as notified.
Wellington Electricity Lines Limited	355.43	Energy Infrastructure and Transport / Infrastructure / INF-S7	Support in part	Supports INF-S7 in part, but seeks amendment to ensure consistency with INF-S2 that the riparian setbacks do not apply to infrastructure beneath the waterbody's bed.	Retain INF-S7 (Riparian setbacks), with amendment.
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	FS25.2	Part 2 / Energy Infrastructure and Transport / Infrastructure / INF-S7	Support	Removing unnecessary regulations from underground infrastructure in riparian margins associated with waterway crossings is supported.	Allow
Powerco Limited	FS61.2	Part 2 / Energy Infrastructure and Transport / Infrastructure / INF-S7	Support	Removing unnecessary regulations from underground infrastructure in riparian margins associated with waterway crossings is supported.	Allow
Wellington Electricity Lines Limited	355.44	Energy Infrastructure and Transport / Infrastructure / INF-S7	Amend	Considers that INF-S7 should be amended to ensure consistency with INF-S2, which states that the riparian setbacks do not apply to infrastructure beneath the waterbody's bed.	Amend INF-S7 (Riparian setbacks) as follows: 1. No infrastructure shall be located on or in land within 10 metres of the bed of any river. This setback does not apply to infrastructure that is located within formed legal road or crosses a river along a bridge or beneath the bed of the river.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	99.46	Energy Infrastructure and Transport / Infrastructure / INF-S8	Support	INF-S8 is supported as it is considered to be workable for telecommunications networks.	Retain INF-S8 (Height of telecommunication poles and associated antennas, lines and single pole support structures and meteorological masts) as notified.
Wellington Electricity Lines Limited	355.45	Energy Infrastructure and Transport / Infrastructure / INF-S8	Support in part	Supports INF-S8 in part, but seeks amendment to clarify the standard.	Retain INF-S8 (Height of telecommunication poles and associated antennas, lines and single pole support structures and meteorological masts) with amendment.
Wellington Electricity Lines Limited	355.46	Energy Infrastructure and Transport / Infrastructure / INF-S8	Amend	Considers that INF-S8 should be clarified so that it applies to electricity infrastructure. As currently worded an interpretation could be made that the standards only apply to Telecommunication poles.	Amend the title of INF-S8 (Height of telecommunication poles and associated antennas, lines and single pole support structures and meteorological masts) as follows: Height of <u>electricity and</u> telecommunication poles and associated antennas, lines and single pole support structures and meteorological masts.
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	99.47	Energy Infrastructure and Transport / Infrastructure / INF-S9	Support	INF-S9 is supported as it is considered to be workable for telecommunications networks.	Retain INF-S9 (Antenna size) as notified.
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	99.48	Energy Infrastructure and Transport / Infrastructure / INF-S10	Support	INF-S10 is supported as it is considered to be workable for telecommunications networks.	Retain INF-S10 (Height of antenna attached to buildings) as notified.
Transpower New Zealand Limited	315.88	Energy Infrastructure and Transport / Infrastructure / INF-S12	Amend	Considers that, on the basis that the National Grid is a qualifying matter, INF-S12 should be included part of the ISPP process.	Seeks that, subject to other amendments sought by the submitter to INF-S12 (Buildings, structures and activities in the National Grid Yard), the standard be included within the IPI and made subject to the ISPP process.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Transpower New Zealand Limited	315.89	Energy Infrastructure and Transport / Infrastructure / INF-S12	Support in part	<p>Supports standard INF-S12 which supports INF-R22 on the basis it gives effect to Policy 10 and Policy 11 of the NPS-ET.</p> <p>Seeks amendment to the standard as follows:</p> <ul style="list-style-type: none"> - Replacement of clause 1 and 2 with a reference to general compliance with the New Zealand Electrical Code of Practice for Safe Electrical Distances (NZECP 34:2001). Considers This ensures all the safety distances are complied with for all activities (and not just clearance distances). - Insertion of a new clause 2. relating to ensuring vehicular access is maintained to support structures. Considers access is an important component of the electricity transmission network and planning framework. Considers physical access to transmission lines achieves NPS-ET policies 2 and 10. Considers the rule is appropriate in the district plan as while Transpower has the legal right under the Electricity Act 1992 to access the lines, the physical ability to access the lines also needs to be protected and ensure the NPS-ET is given effect to, and the line is able to be operated and maintained. Resource consent at the land use stage is an appropriate time and mechanism in which to manage the effects - Renumbering of clause 3.c. to make it a subset of the exemption within clause 3.b. Considers this means that compliance with clause 2.4.1 of NZECP as an exception, only applies to artificial crop and support structures as opposed to fences or any other activity. <p>[Refer to original submission for full reason]</p>	Supports Standard INF-S12 (Buildings, structures and activities in the National Grid Yard), with amendment.
Transpower New Zealand Limited	315.90	Energy Infrastructure and Transport / Infrastructure / INF-S12	Amend	<p>Supports standard INF-S12 which supports INF-R22 on the basis it gives effect to Policy 10 and Policy 11 of the NPS-ET.</p> <p>Seeks amendment to the standard as follows:</p> <ul style="list-style-type: none"> - Replacement of clause 1 and 2 with a reference to general compliance with the New Zealand Electrical Code of Practice for Safe Electrical Distances (NZECP 34:2001). Considers This ensures all the safety distances are complied with for all activities (and not just clearance distances). - Insertion of a new clause 2. relating to ensuring vehicular access is maintained to support structures. Considers access is an important component of the electricity transmission network and planning framework. Considers physical access to transmission lines achieves NPS-ET policies 2 and 10. Considers the rule is appropriate in the district plan as while Transpower has the legal right under the Electricity Act 1992 to access the lines, the physical ability to access the lines also needs to be protected and ensure the NPS-ET is given effect to, and the line is able to be operated and maintained. Resource consent at the land use stage is an appropriate time and mechanism in which to manage the effects - Renumbering of clause 3.c. to make it a subset of the exemption within clause 3.b. Considers this means that compliance with clause 2.4.1 of NZECP as an exception, only applies to artificial crop and support structures as opposed to fences or any other activity. <p>[Refer to original submission for full reason]</p>	<p>Amend Standard INF-S12 (Buildings, structures and activities in the National Grid Yard) as follows:</p> <p>INF-S12 Buildings, structures and activities in the National Grid Yard All Zones</p> <p>1. <u>All buildings and structures in the National Grid Yard must comply with the New Zealand Electrical Code of Practice for Safe Electrical Distances (NZECP 34:2001) ISSN 01140663 under all transmission line and building operating conditions. The building or structure must have a minimum vertical clearance of 10m below the lowest point of a conductor under all transmission line and building operating conditions; or</u></p> <p>2. Must not result in the loss of vehicular access to a National Grid support structure. Must meet the safe electrical clearance distances required by New Zealand Electrical Code of Practice for Safe Electrical Distances (NZECP 34:2001) ISSN 01140663 under all transmission line and building operating conditions.</p> <p>3. ...</p> <p>e. <u>iii.</u> Meets the requirements of clause 2.4.1 of New Zealand Electrical Code of Practice for Safe Electrical Distances (NZECP 34:2001) ISSN 01140663.</p>
Kāinga Ora Homes and Communities	391.130	Energy Infrastructure and Transport / Infrastructure / INF-S12	Oppose in part	INF-S12 is opposed as it provides specific requirements regarding the National Grid and amendments to the package of the provisions is sought.	Opposes INF-S12 (Buildings, structures and activities in the National Grid Yard) and seeks amendment.
Transpower New Zealand Limited	FS29.12	Part 2 / Energy Infrastructure and Transport / Infrastructure / INF-S12	Oppose	<p>The submission is not clear as to why INF-S12 is opposed and the reasoning for the amendments sought.</p> <p>Subject to amendment as sought in its submission, Transpower supports INF-S12 on the basis it gives effect to policies 10 and 11 of the NPSET.</p>	Disallow

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Avryl Bramley	202.20	Energy Infrastructure and Transport / Infrastructure / INF-S13	Amend	Considers that cycles have different speeds and should be classified differently.	Amend Table 1 of the Infrastructure chapter (Design of roads) to remove requirements for Footpath and Cycles until further work is undertaken to classify different types of cycles.
Powerco Limited	FS61.33	Part 2 / Energy Infrastructure and Transport / Infrastructure / INF-S13	Oppose	Not a relevant Resource Management Act consideration.	Disallow
Fire and Emergency New Zealand	273.36	Energy Infrastructure and Transport / Infrastructure / INF-S13	Support in part	Supports the standard insofar as it requires minimum road widths to be constructed in accordance with Table 1, to provide unhindered vehicle access including fire appliance access. Notwithstanding, the minimum requirements for Local Street M5 P3 are insufficient for fire appliances. Therefore considers it is appropriate to ensure that criterion 3 of this standard ensures that the minimum width of roads provides for fire appliance access, as well as the other considerations listed.	Support INF-S13 (Design of roads) with amendment.
Fire and Emergency New Zealand	273.37	Energy Infrastructure and Transport / Infrastructure / INF-S13	Amend	Supports the standard insofar as it requires minimum road widths to be constructed in accordance with Table 1, to provide unhindered vehicle access including fire appliance access. Notwithstanding, the minimum requirements for Local Street M5 P3 are insufficient for fire appliances. Therefore considers it is appropriate to ensure that criterion 3 of this standard ensures that the minimum width of roads provides for fire appliance access, as well as the other considerations listed.	Amend INF-S13 (Design of roads) as follows: ... 3. Roads must have at least the minimum widths in accordance with Table 1 – INF: Design of Roads –One Network Framework: a. Minimum total, legal width; and b. Minimum width to provide for: ... vi. Infrastructure, and vii. Street trees, and viii. Fire appliance access
Fire and Emergency New Zealand	273.38	Energy Infrastructure and Transport / Infrastructure / INF-S13	Support in part	Notes that a fire appliance requires, as a minimum, access which is 4 metres in width and 4 metres in height clearance, with a maximum gradient of 1 in 5 (and accompanying transition ramps). Within urban areas, Table 1 states that roads classified as 'Local Street M5 P3' are only required to have a minimum of one lane with a traffic width of 3.5m which would be insufficient for fire appliances. Local Street M5 P3 applies to roads with no vehicle access to frontage and may result in the full length of a single lane road being used for parking (with no breaks usually achieved with vehicle accesses). Street design, including beautification features such as street trees and furniture, can further hinder the ability for FENZ to efficiently and effectively respond to emergency call outs.	Supports Table 1 - INF: Design of Roads - One Network Framework, with amendment.
Fire and Emergency New Zealand	273.39	Energy Infrastructure and Transport / Infrastructure / INF-S13	Amend	Notes that a fire appliance requires, as a minimum, access which is 4 metres in width and 4 metres in height clearance, with a maximum gradient of 1 in 5 (and accompanying transition ramps). Within urban areas, Table 1 states that roads classified as 'Local Street M5 P3' are only required to have a minimum of one lane with a traffic width of 3.5m which would be insufficient for fire appliances. Local Street M5 P3 applies to roads with no vehicle access to frontage and may result in the full length of a single lane road being used for parking (with no breaks usually achieved with vehicle accesses). Street design, including beautification features such as street trees and furniture, can further hinder the ability for FENZ to efficiently and effectively respond to emergency call outs.	Amend Table 1 - INF: Design of Roads - One Network Framework: Local Street M5 P3: 1 x 3.5 1 x 4
Waka Kotahi	370.90	Energy Infrastructure and Transport / Infrastructure / INF-S13	Amend	Definition of target speed has been removed from this chapter but Table 1 still has target speed.	Seeks to remove target speed from table 1 of INF-13 (Design of roads).

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Waka Kotahi	370.91	Energy Infrastructure and Transport / Infrastructure / INF-S13	Amend	Considers that roads should be designed to suit the desired form and function (under the One Network Framework), with the posted speed limit being an output of that process, rather than an input and aligned with the current speed management review.	Seeks for the policy to align existing posted speed limits with the One Network Framework and current speed management review.
Kāinga Ora Homes and Communities	391.131	Energy Infrastructure and Transport / Infrastructure / INF-S13	Oppose in part	INF-S13 is opposed as it divides transport related provisions between the transport and infrastructure chapters. This is inconsistent with best practice and makes navigation of the plan difficult for users.	Delete INF-S13 (Design of roads) from the Infrastructure Chapter and move the Standard to the Transport chapter.
Living Streets Aotearoa	482.32	Energy Infrastructure and Transport / Infrastructure / INF-S13	Amend	Supports the use of native Wellington species as street trees.	Seeks that Table 3 - INF: Street Tree Species List is amended to have more native Wellington tree species used as street trees. [Inferred decision requested]
Living Streets Aotearoa	482.33	Energy Infrastructure and Transport / Infrastructure / INF-S13	Not specified	Considers that vehicle space should be limited on all roads to support the desired mode shift. Additional vehicle lane width or numbers have negative effects. [Refer to original submission for full detail].	Seeks that vehicle space is limited on all roads.
KiwiRail Holdings Limited	408.48	Energy Infrastructure and Transport / Infrastructure / INF-S14	Amend	Seeks amendment to INF-S14 to ensure the standard captures all visual obstructions, including structures and planting, and to provide protection for the sightlines in the event of any new level crossing being established. KiwiRail note that there are no Stop or Give Way Controlled public level crossings in Wellington City at the present time. While KiwiRail typically do not support the creation of new level crossings given the safety risks associated with this, the potential for Stop of Give Way Controlled level crossings being established over the expected life of the District Plan cannot be eliminated, noting Let's Get Wellington Moving light rail proposals.	Amend INF-S14 (Sight Triangles for Railway Level Crossings) as follows: Buildings, structures, planting or other visual obstructions must not be located within the restart or approach sightline areas of railway level crossings as shown in the shaded areas of Figure 1 – INF: Restart Sightlines and Figure 2 – INF: Approach Sightlines below
KiwiRail Holdings Limited	408.49	Energy Infrastructure and Transport / Infrastructure / INF-S14	Amend	Seeks amendment to INF-S14 to ensure the standard captures all visual obstructions, including structures and planting, and to provide protection for the sightlines in the event of any new level crossing being established. KiwiRail note that there are no Stop or Give Way Controlled public level crossings in Wellington City at the present time. While KiwiRail typically do not support the creation of new level crossings given the safety risks associated with this, the potential for Stop of Give Way Controlled level crossings being established over the expected life of the District Plan cannot be eliminated, noting Let's Get Wellington Moving light rail proposals.	Add new figure being Figure 2 – INF: Approach Sightlines to INF-S14 (Sight Triangles for Railway Level Crossings). [Refer to original submission for figure that is sought to be added]
Survey & Spatial New Zealand Wellington Branch	439.22	Energy Infrastructure and Transport / Infrastructure / INF-S15	Amend	Considers that a 1.5m minimum pedestrian access width is more appropriate than the proposed 1.8m.	Amend INF-S15 (Connection to roads - sites with pedestrian, cycling and micromobility site access only) to: 1) For sites with frontage to a road: a) The direct legal road frontage must have a width of at least 1.8m <u>1.5m</u> . 2) For sites with no frontage to a road: a) Access must be provided to a road via an access easement with a width of at least 1.8m <u>1.5m</u>
Fire and Emergency New Zealand	273.40	Energy Infrastructure and Transport / Infrastructure / INF-S16	Support in part	Considers a 3m driveways are insufficient where driveway lengths are such that fire appliances could not tackle property or vegetation fires from an accessible, legal road. A fire appliance requires, as a minimum, access which is 4 metres in width and 4m in height clearance, with a required to provide access for fire appliances, which may need to include access to on-site firefighting water supply maximum gradient of 15% (and accompanying transition ramps). It is considered therefore that an exclusion to maximum driveway access widths, for the full length of any driveway, ought to be included for driveways which are required to provide access for fire appliances, which may need to include access to on-site firefighting water supply.	Amend INF-S16 (Connection to roads - driveways), with amendment.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Pukepuke Pari Residents Incorporated	FS37.25	Part 2 / Energy Infrastructure and Transport / Infrastructure / INF-S16	Support	Support the Fire Service access requirements and note that this is relevant to health and safety issues raised in their September 2022 submission as Qualifying Matters relating to Hay Street and the 'Hay Street Extension'. The narrowness of Hay St and the Hay St Extension in particular make high density intensification inappropriate.	Allow
Don MacKay	FS94.25	Part 2 / Energy Infrastructure and Transport / Infrastructure / INF-S16	Support	Supports the Fire Service access requirements and note that this is relevant to health and safety issues raised above as Qualifying Matters relating to Wilkinson Street. The steepness and narrowness of Wilkinson Street make high density intensification inappropriate.	Allow
Fire and Emergency New Zealand	273.41	Energy Infrastructure and Transport / Infrastructure / INF-S16	Amend	Considers a 3m driveways are insufficient where driveway lengths are such that fire appliances could not tackle property or vegetation fires from an accessible, legal road. A fire appliance requires, as a minimum, access which is 4 metres in width and 4m in height clearance, with a required to provide access for fire appliances, which may need to include access to on-site firefighting water supply maximum gradient of 15% (and accompanying transition ramps). It is considered therefore that an exclusion to maximum driveway access widths, for the full length of any driveway, ought to be included for driveways which are required to provide access for fire appliances, which may need to include access to on-site firefighting water supply.	Amend INF-S16 (connections to roads - driveways) as follows: ... <u>10. Any access to a site located in an area where no fully reticulated water supply system is available, or having a length greater than 50 metres when connected to a road that has a fully reticulated water supply system including hydrants, must be designed to accommodate a fire appliance design vehicle of at least 2.5 metres wide and 13 metres long and with a minimum gross mass of 25 tonne including:</u> <u>a. a gradient of no more than 15% at any point; and</u> <u>b. a minimum clear passageway and/or vehicle crossing of at least 3.5 metres width at the site entrance, internal entrances and between buildings; and</u> <u>c. a minimum formed carriageway width of 4 metres; and</u> <u>d. a height clearance of at least 4 metres; and</u> <u>e. a design that is free of obstacles that could hinder access for emergency service vehicles.</u> <u>f. The provision of hardstand and turnaround areas with maximum gradient of 5% in all directions</u>
The Retirement Villages Association of New Zealand Incorporated	FS126.33	Part 2 / Energy Infrastructure and Transport / Infrastructure / INF-S16	Oppose	The RVA opposes the relief sought in this submission as matters relating to fire-fighting servicing are already provided for under the Building Act and it is inappropriate to duplicate controls under the Proposed Pan.	Disallow
Ryman Healthcare Limited	FS128.33	Part 2 / Energy Infrastructure and Transport / Infrastructure / INF-S16	Oppose	Ryman opposes the relief sought in this submission as matters relating to fire-fighting servicing are already provided for under the Building Act and it is inappropriate to duplicate controls under the Proposed Pan.	Disallow

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Rimu Architects Ltd	318.16	Energy Infrastructure and Transport / Infrastructure / INF-S16	Amend	<p>Considers that INF-S16 should be amended due to the following reasons:</p> <p>At 1, The section does not allow for ROW from another site creating what is apparently a second vehicle crossing for a site.</p> <p>At 2, The section requiring a 99th percentile vehicle is in not consistent with the TR-S6 requirement that the minimum design vehicle for driveways must be a 4.91m x 1.87m vehicle (85th percentile vehicle).</p> <p>At 3, level 1, 2 and 3 Driveways listed are described in the transport section at Table 8- TR (setting out the vehicle movements each category allows for) and Table 9- TR (setting out the design requirements for each of the categories. A link or reference would have been useful the requirements of Table 9 -TR mean that a driveway may need to approach the carriageway at an angle rather than perpendicularly. The proposed wording at d. addresses this.</p> <p>There is also no mention of the TR-R3 1b) requirement that 'the access is not to a state highway.'</p> <p>Apart from this, it is common for houses to have a double garage or double carport facing the street. this situation should also be allowed for. The proposed wording at c. addresses this.</p>	<p>Amend INF-S16 (Connection to roads - driveways) as follows:</p> <ol style="list-style-type: none"> The number of vehicle crossings per site must not exceed one. <u>Where a vehicle crossing serves a right of way from another site it shall be assigned to that site and not to the site where the crossing is located.</u> The minimum design vehicle for a vehicle crossing is a <u>4.51m x 1.87m vehicle (85th percentile vehicle)</u>. 5.20m x 1.94m vehicle (99th percentile vehicle) For Urban Roads, the length of a vehicle crossing parallel to the road must be no more than: <ol style="list-style-type: none"> 3m for driveways level 1 6m for driveways level 2 and 4 <u>6m for a crossing leading to a double garage or double carport within 5m of the street boundary d. where meeting the requirements of Table 9-TR means a driveway perpendicular to the carriageway is not possible, the maximum vehicle crossing length increases to 6m for driveways level 1 and 9m for driveways level 2 and 3</u> For Rural Roads: <p>....</p> <p>(See Table 8 -TR for the classification of driveways and Table 9 - TR for the design of driveways)</p>
Waka Kotahi	370.92	Energy Infrastructure and Transport / Infrastructure / INF-S16	Amend	<p>Considers that longer setback for driveways on local roads that intersect with a state highway, in accordance with New Zealand Transport Agency Planning Policy Manual: Appendix 5B – Accessway standards and guidelines, Table App5B/3. [See original submission Appendix A]</p>	<p>Amend to include a standard requiring that roads intersecting a state highway intersection comply with the New Zealand Transport Agency Planning Policy Manual: Appendix 5B – Accessway standards and guidelines, Table App5B/3 – Guidelines for minimum accessway spacing requirements</p> <p>[see original submission Appendix A].</p>
Waka Kotahi	370.93	Energy Infrastructure and Transport / Infrastructure / INF-S16	Amend	<p>Considers that longer sight distances, especially for the higher speeds, in alignment with New Zealand Transport Agency Planning Policy Manual: Appendix 5B – Accessway standards and guidelines, Table App5B/1. [See original submission Appendix B.]</p>	<p>Amend to standards in alignment with New Zealand Transport Agency Planning Policy Manual: Appendix 5B Accessway standards and guidelines, Section 5B/1 Sight distances.</p> <p>[see original submission Appendix B].</p>
Kāinga Ora Homes and Communities	391.132	Energy Infrastructure and Transport / Infrastructure / INF-S16	Oppose in part	<p>INF-S16 is opposed as it divides transport related provisions between the transport and infrastructure chapters. This is inconsistent with best practice and makes navigation of the plan difficult for users.</p>	<p>Delete INF-S16 (Connection to roads - driveways) from the Infrastructure Chapter and move the Standard to the Transport chapter.</p>
KiwiRail Holdings Limited	408.50	Energy Infrastructure and Transport / Infrastructure / INF-S16	Support	<p>Supports the requirement for vehicle crossings to be setback a minimum of 30m from a railway level crossing as specified in clause 8.</p>	<p>Retain INF-S16 (Connection to roads - driveways) as notified.</p>
Kāinga Ora Homes and Communities	391.133	Energy Infrastructure and Transport / Infrastructure / INF-S17	Oppose in part	<p>INF-S17 is opposed as it divides transport related provisions between the transport and infrastructure chapters. This is inconsistent with best practice and makes navigation of the plan difficult for users.</p>	<p>Delete INF-S17 (Intersections) from the Infrastructure Chapter and move the Standard to the Transport chapter.</p>
Meridian Energy Limited	228.25	Energy Infrastructure and Transport / Infrastructure Coastal Environment / General INF-CE	Oppose in part	<p>Considers the expression 'infrastructure' potentially captures regionally significant infrastructure, including renewable electricity generation activities. Meridian understood the intention of the Plan to be that the rules for renewable electricity generation activities, structures and buildings would be wholly contained in the REG chapter.</p> <p>Considers the note in the preamble is not entirely helpful in clarifying this in relation to regionally significant infrastructure such as renewable electricity generation activities. The standards listed for general infrastructure activities in the coastal environment are entirely inappropriate for renewable electricity generation activities and structures and should not be construed as a 'permitted baseline' for renewable electricity generation activities there, and particularly not for existing wind farms.</p>	<p>Amend the Introduction to Chapter INF-CE Infrastructure Coastal Environment Rules, by inserting the following (or similar) clarification note:</p> <p><u>The rules applicable to renewable electricity generation activities in the coastal environment, including in areas of high and very high coastal natural character, are contained in Chapter REG Renewable Electricity Generation. The rules in Chapter INF-CE Infrastructure Coastal Environment do not apply to renewable electricity generation activities in the coastal environment, including in areas of high and very high coastal natural character in the coastal environment.</u></p>

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Meridian Energy Limited	228.26	Energy Infrastructure and Transport / Infrastructure Coastal Environment / General INF-CE	Amend	<p>Considers the expression 'infrastructure' potentially captures regionally significant infrastructure, including renewable electricity generation activities. Meridian understood the intention of the Plan to be that the rules for renewable electricity generation activities, structures and buildings would be wholly contained in the REG chapter.</p> <p>Considers the note in the preamble is not entirely helpful in clarifying this in relation to regionally significant infrastructure such as renewable electricity generation activities. The standards listed for general infrastructure activities in the coastal environment are entirely inappropriate for renewable electricity generation activities and structures and should not be construed as a 'permitted baseline' for renewable electricity generation activities there, and particularly not for existing wind farms.</p>	<p>Amend the Introduction to the Infrastructure Coastal Environment Rules chapter, by inserting the following (or similar) clarification note:</p> <p><u>The rules applicable to renewable electricity generation activities in the coastal environment, including in areas of high and very high coastal natural character, are contained in Chapter REG Renewable Electricity Generation. The rules in Chapter INF-CE Infrastructure Coastal Environment do not apply to renewable electricity generation activities in the coastal environment, including in areas of high and very high coastal natural character in the coastal environment.</u></p>
Transpower New Zealand Limited	315.91	Energy Infrastructure and Transport / Infrastructure Coastal Environment / General INF-CE	Amend	<p>The submitter has existing assets within the coastal environment, including the Kaiwharawhara Supply Point substation (designation TPR6) and underground cable, Oteranga Bay (designation TPR4) and associated lines, and Te Hikowhenua Shore Electrode Station (designation TPR5) and associated lines. Both the Oteranga Bay (designation TPR4) and Te Hikowhenua Shore Electrode Station (designation TPR5) are within areas of "High Coastal Natural Character" noting there are no existing assets within the identified "High Coastal Natural Character" outside the designations.</p> <p>Transpower has no existing assets in area of "Very High Coastal Natural Character".</p> <p>Supports the introductory text but seeks clarification that the National Grid is subject to specific policies and rules within the sub-chapter and the general sub-chapter provisions do not apply.</p> <p>[see original submission for images supplied]</p>	<p>Amend the introduction to the Infrastructure Coastal Environment (INF-CE) chapter as follows:</p> <p>This sub-chapter applies to infrastructure within the Coastal Environment. It applies in addition to the principal Infrastructure Chapter.</p> <p><u>Included within the sub-chapter are provisions specific to the National Grid (NG) and Gas Transmission Pipelines Corridor (GTPC). For the avoidance of doubt, other sub-chapter policies and rules within this sub-chapter do not apply to the National Grid.</u></p> <p>Note: The objectives of the Infrastructure Chapter apply.</p>
Royal Forest and Bird Protection Society	345.43	Energy Infrastructure and Transport / Infrastructure Coastal Environment / General INF-CE	Support in part	<p>Considers the provisions should be no less protective than those in the Coastal Environment chapter. The provisions in this chapter should mirror the Coastal Environment provisions, with the amendments made as sought by F&B in respect of that chapter. We also repeat the submissions made in respect of the Coastal Environment chapter. Provisions that only protect areas of high natural character, and do not also protect other areas of natural character in the coastal environment, do not give effects to policy 13 Zipser therefore seek that any provisions in this chapter that apply to high natural character apply to all areas of natural character in the coastal environment.</p>	<p>Amend the INF-CE chapter to be as protective as the Coastal Environment chapter and align with direction set out in Policy 13 of the NZ Coastal Policy Statement.</p>
Transpower New Zealand Limited	FS29.20	Part 2 / Energy Infrastructure and Transport / Infrastructure Coastal Environment / General INF-CE	Oppose	<p>Given the general nature of the relief sought, Transpower opposes the submission point.</p>	<p>Disallow / Seeks that submission is disallowed in part in so far as the relief sought is inconsistent with that sought in Transpower's submission.</p>
Wellington International Airport Limited	FS36.62	Part 2 / Energy Infrastructure and Transport / Infrastructure Coastal Environment / General INF-CE	Oppose	<p>WIAL submits that there are numerous provisions within the NZCPS that need to be considered and balanced within the Proposed Plan, not just Policy 13. Furthermore, the Coastal Environment has been broadly defined in the Proposed Plan, meaning that broadly drafted provisions could have perverse outcomes for existing, built up, urban areas of the District.</p>	<p>Disallow</p>
Meridian Energy Limited	FS101.32	Part 2 / Energy Infrastructure and Transport / Infrastructure Coastal Environment / General INF-CE	Oppose	<p>Considers that the RMA, NZCPS and RPS do not require that all of the natural character of the coastal environment (which includes modified natural character) is to be protected.</p>	<p>Disallow</p>

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Waka Kotahi NZ Transport Agency	FS103.9	Part 2 / Energy Infrastructure and Transport / Infrastructure Coastal Environment / General INF-CE	Oppose	NZCPS Policy 13 stipulates that the coastal environment be protected from inappropriate subdivision, use and development. Waka Kotahi considers that the INF-CE chapter is clear on what grounds infrastructure is appropriate for that environment.	Disallow
Royal Forest and Bird Protection Society	345.44	Energy Infrastructure and Transport / Infrastructure Coastal Environment / General INF-CE	Support in part	Considers that the rules of the INF-CE chapter be amended to give effect to submission points on INF-CE policies above, and also to mirror the rules (as amendment by F&B submissions) in the CE chapters. Rules should be as protective as those sought by F&B in the CE chapter.	Amend the rules of the INF-CE chapter to align with feedback provided on previous submission points on this chapter.
Transpower New Zealand Limited	FS29.21	Part 2 / Energy Infrastructure and Transport / Infrastructure Coastal Environment / General INF-CE	Oppose	Given the general nature of the relief sought, Transpower opposes the submission point.	Disallow / Seeks that submission is disallowed in part in so far as the relief sought is inconsistent with that sought in Transpower's submission.
Wellington International Airport Limited	FS36.63	Part 2 / Energy Infrastructure and Transport / Infrastructure Coastal Environment / General INF-CE	Oppose	WIAL submits that there are numerous provisions within the NZCPS that need to be considered and balanced within the Proposed Plan, not just Policy 13. Furthermore, the Coastal Environment has been broadly defined in the Proposed Plan, meaning that broadly drafted provisions could have perverse outcomes for existing, built up, urban areas of the District.	Disallow
Meridian Energy Limited	FS101.33	Part 2 / Energy Infrastructure and Transport / Infrastructure Coastal Environment / General INF-CE	Oppose	Meridian does not agree that the rules in the CE chapter should be replicated in this INF-CE chapter, for the reasons explained in its own submission point 228.25. The CE chapter rules are not tailored for or appropriate for large scale renewable electricity generation facilities.	Disallow
Taranaki Whānui ki te Upoko o te Ika	389.56	Energy Infrastructure and Transport / Infrastructure Coastal Environment / General INF-CE	Amend	[No specific reason given beyond decision requested - refer to original submission].	Amend 'Other relevant District Plan provisions' to include Sites and Areas of Significance to Māori chapter.
Greater Wellington Regional Council	FS84.119	Part 2 / Energy Infrastructure and Transport / Infrastructure Coastal Environment / General INF-CE	Support	Greater Wellington support the inclusion and protection of SASM.	Allow / Seek provisions which protect SASM.
Wellington International Airport Ltd	406.110	Energy Infrastructure and Transport / Infrastructure Coastal Environment / General INF-CE	Amend	Considers that many infrastructure providers have a functional or operational requirement to locate in a certain area, even if that area is subject to natural hazard risk. Such infrastructure providers natural hazard tolerance is therefore inherently different to those without the same operational and functional need to locate in such areas. [See original submission for full reason]	Seeks that infrastructure located within the high hazard area of the Coastal Hazard Overlay, between Lyall Bay and Moa Point, is exempt from the provisions relating to the high hazard area of the Coastal Hazard Overlay.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	99.49	Energy Infrastructure and Transport / Infrastructure Coastal Environment / New INF-CE	Oppose	Considers that the INF-CE chapter is unclear and should have a new rule clarifying if customer connections are regulated by this chapter. If they are it is assumed that the rules that apply to new infrastructure would then apply which may inappropriately constrain provision of customer connections to existing activities within the Coastal Environment.	Add a new rule to the Infrastructure Coastal Environment chapter providing for customer connections in the Coastal Environment as a permitted activity, provided any underground connection complies with INF-S3, and any overhead connection is only permitted where it is from existing overhead network reticulation.
Wellington Electricity Lines Limited (WELL)	FS27.1	Part 2 / Energy Infrastructure and Transport / Infrastructure Coastal Environment / New INF-CE	Support	WELL support the submission point as the new rule will similarly enable customer connections to the electricity supply network without inadvertently requiring land use consent. WELL agree with the submitter that customer connections in the Coastal Environment should be clearly identified as a permitted activity, yet subject to the connection being underground and compliant with INF-S3. Accepting this submission point will assist in clarifying WELL's activities in the Coastal Environment.	Allow
Transpower New Zealand Limited	315.92	Energy Infrastructure and Transport / Infrastructure Coastal Environment / New INF-CE	Amend	<p>Considers that Transpower has existing assets within the coastal environment, including the Kaiwharawhara Supply Point substation (designation TPR6) and underground cable, Oteranga Bay (designation TPR4) and associated lines, and Te Hikohenua Shore Electrode Station (designation TPR5) and associated lines.</p> <p>Considers the existing assets are regulated by the designations and the NESETA, noting that s43D RMA prescribes the relationship between designations and the NESETA. Policy P26 relates to existing National Grid assets within the Coastal Environment, and recognises the existing assets. The policy approach within P26 is supported and gives effect to Policies 2 and 5 of the NPS-ET. A minor amendment is sought to include "minor upgrade", in recognition of the existing assets. A minor upgrade may be something like increasing the height of a pole support structure, or moving the same dimensioned pole within 5m of its existing location, or adding on an additional insulator.</p>	<p>Option 2: Add new National Grid specific policy as follows:</p> <p><u>INF-NG-P2 Operation, and maintenance and minor upgrade of the National Grid</u></p> <p><u>Provide for the operation, maintenance and minor upgrade of the National Grid while managing the adverse effects of these activities.</u></p>
Transpower New Zealand Limited	315.93	Energy Infrastructure and Transport / Infrastructure Coastal Environment / New INF-CE	Amend	<p>Opposes INF-CE-P32 and proposes an amended policy framework specific to the National Grid.</p> <p>Considers that the policy does not give effect to the NPS-ET (noting the NPS-ET also applies to the coastal environment) in that:</p> <ul style="list-style-type: none"> - The directive wording "only allow" within the policy does not reflect the enabling wording used in the NPS-ET. - The NPS-ET does not require that natural character be maintained or restored. Rather Policy 8 of the NPS-ET requires a 'seek to avoid' approach with policies 3 and 4 prescribing the matters to consider and have regard to. - The NPS-ET does not require significant adverse effects be avoided, rather policy 8 prescribes a seek to avoid approach. <p>It is also noted that although the National Grid is recognised of national significance within the NPS-ET (being a higher order policy document) it is afforded the exact same policy framework as other infrastructure (as provided in INF-CE P25). This further reinforces Transpower's concerns the PDP does not give effect to the NPS-ET.</p>	<p>Add a new National Grid specific in the Infrastructure Coastal Environment chapter policy as follows:</p> <p><u>INF-NG-P6 Development of the National Grid Provide for the development of the National Grid</u></p> <p><u>1. In urban zoned areas, development should minimise adverse effects on urban amenity and should avoid material adverse effects on the Commercial and Mixed-Use zones, and areas of high recreational or amenity value and existing sensitive activities.</u></p> <p><u>2. Seek to avoid the adverse effects of the National Grid within areas identified in SCHED10 – Outstanding Natural Features and Landscapes, SCHED8 - Significant Natural Areas, and SCHED11 – Special Amenity Landscapes, outside the coastal environment.</u></p> <p><u>3. where the National Grid has a functional need or operational need to locate within the coastal environment, manage adverse effects by:</u></p> <ul style="list-style-type: none"> a. <u>Seeking to avoid adverse effects on areas identified in SCHED10 – Outstanding Natural Features and Landscapes, SCHED12 - High Coastal Natural Character Areas, SCHED8 - Significant Natural Areas, SCHED11 – Special Amenity Landscapes, and the Coastal Margin.</u> b. <u>where it is not practicable to avoid adverse effects on the values of the areas in SCHED10 – Outstanding Natural Features and Landscapes, SCHED12 - High Coastal Natural Character Areas, SCHED8 - Significant Natural Areas, SCHED11 – Special Amenity Landscapes; and the Coastal Margin because of the functional needs or operational needs of the National Grid, remedy or mitigate adverse effects on those values.</u> c. <u>Seeking to avoid significant adverse effects on:</u> <ul style="list-style-type: none"> i. <u>other areas of natural character</u> ii. <u>natural attributes and character of other natural features and natural landscapes</u>

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
					<p><u>iii. indigenous biodiversity values that meet the criteria in Policy 11(b) of the NZCPS 2010</u></p> <p><u>d. Avoiding, remedying or mitigating other adverse effects to the extent practicable; and</u></p> <p><u>e. Recognising there may be some areas within SCHED10 – Outstanding Natural Features and Landscapes, SCHED12 - High Coastal Natural Character Areas, SCHED8 - Significant Natural Areas, SCHED11 – Special Amenity Landscapes; and the Coastal Margin, where avoidance of adverse effects is required to protect the identified values and characteristics.</u></p> <p><u>4. Remedy or mitigate any adverse effects from the operation, maintenance, upgrade, major upgrade or development of the National Grid which cannot be avoided, to the extent practicable; and</u></p> <p><u>5. When considering the adverse effects in respect of 1-3 above;</u></p> <p><u>a. Have regard to the extent to which adverse effects have been avoided, remedied or mitigated by the route, site and method selection; and</u></p> <p><u>b. Consider the constraints arising from the operational needs or functional needs of the National Grid, when considering measures to avoid, remedy or mitigate any adverse effects</u></p>
Royal Forest and Bird Protection Society	345.45	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P14	Oppose	Considers the policy does not give effect to Policy 13 of NZCPS. Considers it is not appropriate to apply an 'allow' direction to activities in the coastal environment, particularly not for upgrading, which can cause significant adverse effects	Amend INF-CE-P14 (Operation, maintenance, and repair of existing infrastructure within the coastal environment) to not "allow" for infrastructure activities in the coastal environment.
Meridian Energy Limited	FS101.34	Part 2 / Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P14	Oppose	Considers that policy INF-P14 applies to existing lawfully established facilities. It is appropriate to allow upgrading of existing facilities, which potentially has substantially lesser environmental effects that having to establish new or expanded renewable electricity generation facilities elsewhere (including in the coastal environment).	Disallow
Waka Kotahi	370.94	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P14	Support	These provisions provide clear guidance in how to balance different interests where infrastructure overlaps with other areas and values.	Retain INF-CE-P14 (Operation, maintenance and repair of existing infrastructure within the coastal environment: - Outside of high coastal natural character areas; and - Outside of coastal and riparian margins) as notified.
Director-General of Conservation	385.17	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P14	Support	Supports proposed Policy INF-CE-P14 (Operation, maintenance and repair of existing infrastructure within the coastal environment: Outside of high coastal natural character areas; and Outside of coastal and riparian margins.)	Retain policy INF-CE-P14 (Operation, maintenance and repair of existing infrastructure within the coastal environment: Outside of high coastal natural character areas; and Outside of coastal and riparian margins) as notified.
CentrePort Limited	402.58	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P14	Support	Support the intent of this policy.	Retain INF-CE-P14 (Operation, maintenance and repair of existing infrastructure within the coastal environment: Outside of high coastal natural character areas; and Outside of coastal and riparian margins) as notified.
Wellington International Airport Ltd	406.111	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P14	Oppose	Opposes this policy insofar as it encourages the duplication of controls within the coastal environment that can otherwise be managed by the general infrastructure provisions. [See paragraphs 4.30 to 4.31 and 4.46 to 4.49 of original submission for full reason]	Delete INF-CE-P14 (Operation, maintenance and repair of existing infrastructure with the coastal environment) in its entirety.
KiwiRail Holdings Limited	408.51	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P14	Support	Supports providing for the operation, maintenance, repair and upgrading of existing infrastructure, and new infrastructure within the coastal environment. Parts of the rail network in Wellington City are within the coastal environment area.	Retain INF-CE-P14 (Operation, maintenance and repair of existing infrastructure within the coastal environment: Outside of high coastal natural character areas; and Outside of coastal and riparian margins) as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Royal Forest and Bird Protection Society	345.46	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P15	Support in part	Considers the policy needs to be extended to apply to any area of natural character in the coastal environment.	Amend INF-CE-P15 (Operation, maintenance, and repair of existing infrastructure within the coastal environment) to apply to any area of natural character in the coastal environment.
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	FS25.3	Part 2 / Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P15	Oppose	No revised policy wording has been proposed to determine the impact of any change. We reserve our position on any amendments to this policy pending ensuring any revised wording does not seek a threshold more restrictive than avoiding significant adverse effects in areas in the coastal environment given that no areas of outstanding natural character have been included in the Proposed District Plan.	Disallow
Wellington International Airport Limited	FS36.64	Part 2/ Energy Infrastructure and Transport / Infrastructure Coastal Environment / General INF-CE-P15	Oppose	WIAL submits that there are numerous provisions within the NZCPS that need to be considered and balanced within the Proposed Plan. Furthermore, the Coastal Environment has been broadly defined in the Proposed Plan, meaning that broadly drafted provisions could have perverse outcomes for existing, built up, urban areas of the District.	Disallow
Powerco Limited	FS61.3	Part 2 / Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P15	Oppose	No revised policy wording has been proposed to determine the impact of any change. We reserve our position on any amendments to this policy pending ensuring any revised wording does not seek a threshold more restrictive than avoiding significant adverse effects in areas in the coastal environment given that no areas of outstanding natural character have been included in the Proposed Plan.	Disallow
KiwiRail Holdings Limited	FS72.31	Part 2 / District-Wide Matters / Energy, Infrastructure, and Transport / Infrastructure Coastal Environment / INF-CE-P15	Oppose	Rejects broadening the application of this policy and considers reference to the overlays as notified should be retained. Considers the relief sought should be declined because it a) will not promote the sustainable management of the natural and physical resources in Wellington City, and is therefore contrary to, or inconsistent with, Part 2 and other provisions of the RMA and the Amendment Act; (b) is inconsistent with other relevant planning documents, including the Greater Wellington Regional Policy Statement and National Policy Statement for Urban Development 2020; (c) will not meet the reasonably foreseeable needs of future generations; (d) will not avoid, remedy or mitigate actual and potential adverse effects on the environment; (e) will not enable the social, economic and cultural wellbeing of people of Wellington City; and (f) is not the most appropriate way to achieve the objectives of the Proposed Plan in terms of section 32 of the RMA.	Disallow
Meridian Energy Limited	FS101.35	Part 2 / Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P15	Oppose	Considers that the RMA, NZCPS and RPS do not require that all of the natural character of the coastal environment (which includes modified natural character) is to be managed in the way the submitter proposes.	Disallow
Waka Kotahi	370.95	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P15	Support	These provisions provide clear guidance in how to balance different interests where infrastructure overlaps with other areas and values.	Retain INF-CE-P15 (Operation, maintenance and repair of existing infrastructure within the coastal environment: - Within high coastal natural character areas) as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Director-General of Conservation	385.18	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P15	Support	Supports proposed Policy INF-CE-P15 (Operation, maintenance and repair of existing infrastructure within the coastal environment: Within high coastal natural character areas).	Retain policy INF-CE-P15 (Operation, maintenance and repair of existing infrastructure within the coastal environment: Within high coastal natural character areas) as notified.
Yvonne Weeber	340.18	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P16	Amend	Considers INF-CE-P16 should be amended to include the maintenance and restoration of the natural character and avoid any significant adverse effects on the natural character in the same way as INF-CE-P19.	Amend INF-CE-P16 (Operation, maintenance and repair of existing infrastructure within the coastal environment in the Residential Zones, Commercial and Mixed Use Zones, Industrial Zones, Airport and Port Zones) as follows: - Within coastal and riparian margins. Allow for the operation, maintenance and repair of existing infrastructure within areas of coastal margins and riparian margins in the coastal environment in the Residential Zones, Commercial and Mixed Use Zones, Industrial Zones, Airport and Port Zones- <u>where:</u> <u>1. Related earthworks are of a scale that consider the maintenance and restoration the natural character; and</u> <u>2. Any significant adverse effects on the natural character are avoided and any other adverse effects on the natural character are avoided, remedied or mitigated.</u> <u>3. Any significant adverse effects on the natvral character are avoided and any adverse effects on the natural character are avoided, remedied or mitigated.</u>
Wellington International Airport Limited	FS36.65	Part 2/ Energy Infrastructure and Transport / Infrastructure Coastal Environment / General INF-CE-P15	Oppose	The proposed amendments seek to replicate provisions of the NZCPS. This does not assist plan users as it provides no further direction than that set out in higher order documents. Furthermore, it is inappropriate to apply the NZCPS to riparian (river) margins.	Disallow / Seeks that part of the submission be disallowed.
Royal Forest and Bird Protection Society	345.47	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P16	Oppose in part	Considers this policy does not give effect to policy 13 of NZCPS.	Amend INF-CE-P16 (Operation, maintenance and repair of existing infrastructure within the coastal environment in the Residential Zones, Commercial and Mixed Use Zones, Industrial Zones, Airport and Port Zones) to require protection of natural character regardless of zoning.
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	FS25.4	Part 2 / Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P16	Oppose	Operation and maintenance and repair of existing infrastructure in urban zones in the coastal environment should have a permissive regulatory regime supported by Policy INF-CE-P16 as notified.	Disallow
Wellington International Airport Limited	FS36.67	Part 2 / Energy Infrastructure and Transport / Infrastructure Coastal Environment / General INF-CE-P16	Oppose	WIAL opposes the submission as the amendments over simplify the management approach set out in the NZCPS nor do they consider the broadly defined area of the District that is included within the Coastal Environment. Furthermore, no specific drafting has been provided, thus it is difficult to evaluate the appropriateness of such changes in terms of section 32 of the RMA.	Disallow

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Powerco Limited	FS61.4	Part 2 / Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P16	Oppose	Operation and maintenance and repair of existing infrastructure in urban zones in the coastal environment should have a permissive regulatory regime supported by Policy INF-CE-P16 as notified.	Disallow
Waka Kotahi	370.96	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P16	Support	These provisions provide clear guidance in how to balance different interests where infrastructure overlaps with other areas and values.	Retain INF-CE-P16 (Operation, maintenance and repair of existing infrastructure within the coastal environment in the Residential Zones, Commercial and Mixed Use Zones, Industrial Zones, Airport and Port Zones: - Within coastal and riparian margins) as notified.
Director-General of Conservation	385.19	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P16	Support	Supports proposed Policy INF-CE-P16 (Operation, maintenance and repair of existing infrastructure within the coastal environment in the Residential Zones, Commercial and Mixed Use Zones, Industrial Zones, Airport and Port Zones: Within coastal and riparian margins).	Retain policy INF-CE-P16 (Operation, maintenance and repair of existing infrastructure within the coastal environment in the Residential Zones, Commercial and Mixed Use Zones, Industrial Zones, Airport and Port Zones: Within coastal and riparian margins) as notified.
CentrePort Limited	402.59	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P16	Support	Support the intent of this policy.	Retain INF-CE-P16 (Operation, maintenance and repair of existing infrastructure within the coastal environment in the Residential Zones, Commercial and Mixed Use Zones, Industrial Zones, Airport and Port Zones: Within coastal and riparian margins) as notified.
Wellington International Airport Ltd	406.112	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P16	Support in part	Supports INF-CE-P16 in part.	[Not specified]
Wellington International Airport Ltd	406.113	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P16	Amend	Supports this policy in part as relates to activities within the coastal environment that are not otherwise managed in the general infrastructure provisions. Considers that this provision also needs to include the area of Natural Open Space zoned land, between Lyall Bay and Moa Point, which is highly modified and is used by WIAL for a range of ancillary airport activities (such as navigational aids and meteorological equipment). [See paragraphs 4.30 to 4.31 and 4.46 to 4.49 of original submission for full reason]	Amend INF-CE-P16 (Operation, maintenance and repair of existing infrastructure within the coastal environment in the Residential Zones, Commercial and Mixed Use Zones, Industrial Zones, Airport and Port Zones) as follows: Operation, maintenance and repair of existing infrastructure within the coastal environment in the Residential Zones, Commercial and Mixed Use Zones, Industrial Zones, Airport, and Port Zones <u>and</u> the area of Natural Open Space Zone located between Lyall Bay and Moa Point: ... Allow for the operation, maintenance and repair of existing infrastructure within areas of coastal margins and riparian margins in the coastal environment in the Residential Zones, Commercial and Mixed Use Zones, Industrial Zones, Airport, and Port Zones <u>and</u> the area of Natural Open Space Zone located between Lyall Bay and Moa Point Road.
Airways Corporation of New Zealand Limited	FS105.7	Part 2 / Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P16	Support	This submission point is consistent with Airways' operations and its core functions.	Allow
Wellington International Airport Ltd	406.114	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P16	Amend	Submitter also has a submission filed with respect to the appropriateness of this zoning, therefore consequential changes may be required to this policy to address the zoning of the site. [See paragraphs 4.30 to 4.31 and 4.46 to 4.49 of original submission for full reason]	If amendments are not made to INF-CE-P16 (Operation, maintenance and repair of existing infrastructure within the coastal environment in the Residential Zones, Commercial and Mixed Use Zones, Industrial Zones, Airport and Port Zones): Seeks amendment to have relief to a similar effect if the area of Natural Open Space zoned land is rezoned to an alternative zoning.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
KiwiRail Holdings Limited	408.52	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P16	Support	Supports policy that allows for the operation, maintenance and repair of existing infrastructure within areas of coastal margins and riparian margins in the coastal environment. The railyard area, ferry terminal and Wairarapa Line are adjacent to the Wellington Harbour and therefore parts of the network are within the coastal margin.	Retain INF-CE-P16 (Operation, maintenance and repair of existing infrastructure within the coastal environment in the Residential Zones, Commercial and Mixed Use Zones, Industrial Zones, Airport and Port Zones: Within coastal and riparian margins) as notified.
Guardians of the Bays	452.17	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P16	Amend	Considers an amendment is required to include the maintenance and restoration of the natural character and avoid any significant adverse effects on the natural character in the same way as INF-CE-P19 (Upgrading of existing infrastructure within the coastal environment that is located aboveground and outside an existing road reserve).	Amend INF-CE-P16 as follows: Add at the end of the policy: <u>where:</u> <u>1. Related earthworks are of a scale that consider the maintenance and restoration the natural character; and</u> <u>2. Any significant adverse effects on the natural character are avoided and any other adverse effects on the natural character are avoided, remedied or mitigated</u>
Wellington International Airport Limited	FS36.66	Part 2/ Energy Infrastructure and Transport / Infrastructure Coastal Environment / General INF-CE-P15	Oppose	The proposed amendments seek to replicate provisions of the NZCPS. This does not assist plan users as it provides no further direction than that set out in higher order documents. Furthermore, it is inappropriate to apply the NZCPS to riparian (river) margins.	Disallow / Seeks that part of the submission be disallowed.
Royal Forest and Bird Protection Society	345.48	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P17	Support	Supports the policy.	Retain INF-CE-P17 (Operation, maintenance and repair of existing infrastructure within the coastal environment in the Rural Zone and Open Space and Recreation Zones) as notified.
Waka Kotahi	370.97	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P17	Support	These provisions provide clear guidance in how to balance different interests where infrastructure overlaps with other areas and values.	Retain INF-CE-P17 (Operation, maintenance and repair of existing infrastructure within the coastal environment in the Rural Zone and Open Space and Recreation Zones: - Within coastal and riparian margins) as notified.
Director-General of Conservation	385.20	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P17	Support	Supports proposed Policy INF-CE-P17 (Operation, maintenance and repair of existing infrastructure within the coastal environment in the Rural Zone and Open Space and Recreation Zones: Within coastal and riparian margins).	Retain policy INF-CE-P17 (Operation, maintenance and repair of existing infrastructure within the coastal environment in the Rural Zone and Open Space and Recreation Zones: Within coastal and riparian margins) as notified.
Wellington International Airport Ltd	406.115	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P17	Oppose in part	Opposes INF-CE-P17 to the extent that it places an unduly onerous constraint on the use of the highly modified area of Natural Open Space zone between Lyall Bay and Moa Point. [See paragraphs 4.40 to 4.45 of original submission for full reason]	Opposes INF-CE-P17 (Operation, maintenance and repair of existing infrastructure within the coastal environment in the Rural Zone and Open Space and Recreation Zones) and seeks amendment.
Wellington International Airport Ltd	406.116	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P17	Amend	Opposes INF-CE-P17 to the extent that it places an unduly onerous constraint on the use of the highly modified area of Natural Open Space zone between Lyall Bay and Moa Point. [See paragraphs 4.40 to 4.45 of original submission for full reason]	Amend INF-CE-P17 (Operation, maintenance and repair of existing infrastructure within the coastal environment in the Rural Zone and Open Space and Recreation Zones) as follows: Operation, maintenance and repair of existing infrastructure within the coastal environment in the Rural Zone and Open Space and Recreation Zones <u>(excluding the area located between Lyall Bay and Moa Point)</u> : • Within coastal and riparian margins. Provide for the operation, maintenance and repair of existing infrastructure within coastal margins and riparian margins in the coastal environment in the Rural Zone and Open Space and Recreation Zones <u>(excluding the area located between Lyall Bay and Moa Point)</u> , where: 1.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Wellington International Airport Ltd	406.117	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P17	Amend	Opposes INF-CE-P17 to the extent that it places an unduly onerous constraint on the use of the highly modified area of Natural Open Space zone between Lyall Bay and Moa Point. [See paragraphs 4.40 to 4.45 of original submission for full reason]	Delete INF-CE-P17 (Operation, maintenance and repair of existing infrastructure within the coastal environment in the Rural Zone and Open Space and Recreation Zones).
KiwiRail Holdings Limited	408.53	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P17	Support	Supports policy that allows for the operation, maintenance and repair of existing infrastructure within areas of coastal margins and riparian margins in the coastal environment. The railyard area, ferry terminal and Wairarapa Line are adjacent to the Wellington Harbour and therefore parts of the network are within the coastal margin.	Retain INF-CE-P17 (Operation, maintenance and repair of existing infrastructure within the coastal environment in the Rural Zone and Open Space and Recreation Zones: Within coastal and riparian margins) as notified.
Royal Forest and Bird Protection Society	345.49	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P18	Oppose	Considers the policy does not direction as to the management of effects and does not give effect to policy 13 NZCPS.	Amend INF-CE-P18 (Upgrading of existing infrastructure within the coastal environment) to give effect to policy 13 of the NZ Coastal Policy Statement.
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	FS25.5	Part 2 / Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P18	Oppose	The rules for upgrading control the allowable effects envelope to an appropriate scale. Accordingly, the policy as notified allowing for upgrading outside of the most sensitive coastal environment areas is appropriate.	Disallow
Powerco Limited	FS61.5	Part 2 / Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P18	Oppose	The rules for upgrading control the allowable effects envelope to an appropriate scale. Accordingly, the policy as notified allowing for upgrading outside of the most sensitive coastal environment areas is appropriate.	Disallow
Meridian Energy Limited	FS101.36	Part 2 / Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P18	Oppose	Considers that the policy INF-CE-P18 applies outside areas of high natural character and outside riparian areas, and does not conflict with NZCPS Policy 13.	Disallow
Waka Kotahi	370.98	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P18	Support	These provisions provide clear guidance in how to balance different interests where infrastructure overlaps with other areas and values.	Retain INF-CE-P18 (Upgrading of existing infrastructure within the coastal environment: - Outside of high coastal natural character areas; and - Outside of coastal and riparian margins) as notified.
Director-General of Conservation	385.21	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P18	Support	Supports proposed Policy INF-CE-P18 (Upgrading of existing infrastructure within the coastal environment: Outside of high coastal natural character areas; and Outside of coastal and riparian margins)	Retain policy INF-CE-P18 (Upgrading of existing infrastructure within the coastal environment: Outside of high coastal natural character areas; and Outside of coastal and riparian margins) as notified.
CentrePort Limited	402.60	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P18	Support	Support the intent of this policy.	Retain INF-CE-P18 (Upgrading of existing infrastructure within the coastal environment: Outside of high coastal natural character areas; and Outside of coastal and riparian margins) as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Wellington International Airport Ltd	406.118	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P18	Oppose	Opposes this policy insofar as it encourages the duplication of controls within the coastal environment that can otherwise be managed by the general infrastructure provisions. [See paragraphs 4.30 to 4.31 and 4.46 to 4.49 of original submission for full reason]	Delete INF-CE-P18 (Upgrading of existing infrastructure within the coastal environment) in it's entirety.
KiwiRail Holdings Limited	408.54	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P18	Support	Supports policy that allows for upgrading of existing infrastructure within the coastal environment outside of high coastal natural character areas (noting there are none of these areas within the rail corridor) and coastal margins.	Retain INF-CE-P18 (Upgrading of existing infrastructure within the coastal environment: Outside of high coastal natural character areas; and Outside of coastal and riparian margins) as notified.
Royal Forest and Bird Protection Society	345.50	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P19	Oppose	Considers that while undergrounding may usually be preferable, a blanket 'allow' policy is inappropriate as it does not give direction to consider whether the effects are appropriate.	Amend INF-CE-P19 (Upgrading of existing infrastructure within the coastal environment that is located underground or within an existing road reserve) to provide direction about acceptable effects of undergrounding.
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	FS25.6	Part 2 / Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P19	Oppose	Undergrounding of infrastructure in the coastal environment should be allowed as promoted in the policy. Waka Kotahi	370.99	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P19	Support	These provisions provide clear guidance in how to balance different interests where infrastructure overlaps with other areas and values.	Retain INF-CE-P19 (Upgrading of existing infrastructure within the coastal environment that is located underground or within an existing road reserve: - Within high coastal natural character areas.) as notified.
Director-General of Conservation	385.22	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P19	Support	Supports proposed Policy INF-CE-P19 (Upgrading of existing infrastructure within the coastal environment that is located underground or within an existing road reserve: Within high coastal natural character areas)	Retain policy INF-CE-P19 (Upgrading of existing infrastructure within the coastal environment that is located underground or within an existing road reserve: Within high coastal natural character areas) as notified.
Royal Forest and Bird Protection Society	345.51	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P20	Support in part	Considers it appropriate to delete reference to operational need.	Amend INF-CE-P20 (Upgrading of existing infrastructure within the coastal environment that is located aboveground and outside an existing road reserve) Within high coastal natural character areas. Only allow for the upgrading of existing infrastructure that is located above ground and outside an existing road reserve within high coastal natural character areas where: 1. The activity is of a scale that maintains or restores the identified values described in SCHED13 or the natural character; 2. Any significant adverse effects are avoided and any other adverse effects are avoided, remedied or mitigated; and 3. There is a functional need or operational need for the activity to be undertaken inside a high coastal natural character areas.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	FS25.7	Part 2 / Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P20	Oppose	Operational need is a relevant consideration to determine if infrastructure is appropriate in a coastal environment context, and accordingly should not be deleted from the policy.	Disallow
Powerco Limited	FS61.7	Part 2 / Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P20	Oppose	Operational need is a relevant consideration to determine if infrastructure is appropriate in a coastal environment context, and accordingly should not be deleted from the policy.	Disallow
Meridian Energy Limited	FS101.37	Part 2 / Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P20	Oppose	Considers that the policy INF-CE-P20 requires that the activity is of a scale that maintains or restores the identified values of Schedule SCHED13 or natural character and requires avoidance of significant adverse effects (and other adverse effects are avoided, remedied or mitigated). Operational need is a legitimate consideration for infrastructure that has limited locational or operational options within the coastal environment.	Disallow
Waka Kotahi	370.100	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P20	Support	These provisions provide clear guidance in how to balance different interests where infrastructure overlaps with other areas and values.	Retain INF-CE-P20 (Upgrading of existing infrastructure within the coastal environment that is located aboveground and outside an existing road reserve: - Within high coastal natural character areas.) as notified.
Director-General of Conservation	385.23	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P20	Support	Supports proposed Policy INF-CE-P20 (Upgrading of existing infrastructure within the coastal environment that is located aboveground and outside an existing road reserve: Within high coastal natural character areas).	Retain policy INF-CE-P20 (Upgrading of existing infrastructure within the coastal environment that is located aboveground and outside an existing road reserve: Within high coastal natural character areas) as notified.
Avryl Bramley	202.21	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P21	Oppose	Considers the policy too permissive. Access to the coastline is highly prized even rocky outcrops and small beaches. We have already have the Oriental Bay to Kilbirnie cycleway where concrete has been poured and fencing erected eradicating a number of small waterside enclaves and denying access to the water.	Not specified.
Royal Forest and Bird Protection Society	345.52	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P21	Oppose	Considers the policy does not direction as to the management of effects and does not give effect to policy 13 NZCPS.	Amend INF-CE-P21 (Upgrading of existing infrastructure within the coastal environment of the Residential Zones, Commercial and Mixed Use Zones, Industrial Zones and Special Purpose Zones) to give effect to policy 13 of the NZ Coastal Policy Statement.
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	FS25.8	Part 2 / Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P21	Oppose	Upgrading of existing infrastructure in urban zones in the coastal environment should have a permissive regulatory regime supported by Policy INF-CE-P21 as notified	Disallow

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Powerco Limited	FS61.8	Part 2 / Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P21	Oppose	Upgrading of existing infrastructure in urban zones in the coastal environment should have a permissive regulatory regime supported by Policy INF-CE-P21 as notified.	Disallow
Waka Kotahi	370.101	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P21	Support	These provisions provide clear guidance in how to balance different interests where infrastructure overlaps with other areas and values.	Retain INF-CE-P21 (Upgrading of existing infrastructure within the coastal environment of the Residential Zones, Commercial and Mixed Use Zones, Industrial Zones and Special Purpose Zones: - Within coastal and riparian margins.) as notified.
Director-General of Conservation	385.24	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P21	Support	Supports proposed Policy INF-CE-P21 (Upgrading of existing infrastructure within the coastal environment of the Residential Zones, Commercial and Mixed Use Zones, Industrial Zones and Special Purpose Zones: Within coastal and riparian margins).	Retain policy INF-CE-P21 (Upgrading of existing infrastructure within the coastal environment of the Residential Zones, Commercial and Mixed Use Zones, Industrial Zones and Special Purpose Zones: Within coastal and riparian margins) as notified.
CentrePort Limited	402.61	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P21	Support	Support the intent of this policy.	Retain INF-CE-P21 (Upgrading of existing infrastructure within the coastal environment of the Residential Zones, Commercial and Mixed Use Zones, Industrial Zones and Special Purpose Zones: Within coastal and riparian margins) as notified.
Wellington International Airport Ltd	406.119	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P21	Support in part	For the reasons set out in paragraphs 4.11 to 4.15 of the covering submission, WIAL supports this policy in part. Considers that this provision also needs to include the area of Natural Open Space zoned land, between Lyall Bay and Moa Point, which is highly modified and is and used by WIAL for a range of ancillary airport activities (such as navigational aids and meteorological equipment). [See paragraphs 4.11 to 4.15 of original submission for full reason]	Supports INF-CE-P21 (Upgrading of existing infrastructure within the coastal environment of the Residential Zones, Commercial and Mixed Use Zones, Industrial Zones and Special Purpose Zones) and seeks amendment.
Airways Corporation of New Zealand Limited	FS105.8	Part 2 / Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P21	Support	This submission point is consistent with Airways' operations and its core functions.	Allow
Wellington International Airport Ltd	406.120	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P21	Amend	For the reasons set out in paragraphs 4.11 to 4.15 of the covering submission, WIAL supports this policy in part. Considers that this provision also needs to include the area of Natural Open Space zoned land, between Lyall Bay and Moa Point, which is highly modified and is and used by WIAL for a range of ancillary airport activities (such as navigational aids and meteorological equipment). [See paragraphs 4.11 to 4.15 of original submission for full reason]	Amend INF-CE-P21 (Upgrading of existing infrastructure within the coastal environment of the Residential Zones, Commercial and Mixed Use Zones, Industrial Zones and Special Purpose Zones) as follows: Upgrading of existing infrastructure within the coastal environment of the Residential Zones, Commercial and Mixed Use Zones, Industrial Zones and Special Purpose Zones: • Within coastal and riparian margins. Allow for the upgrading of existing infrastructure within coastal margins and riparian margins in the coastal environment in the Residential Zones, Commercial and Mixed Use Zones, Industrial Zones, and Special Purpose Zones <u>and the area of Natural Open Space Zone located between Lyall Bay and Moa Point Road.</u>

Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	FS25.11	Part 2 / Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P24	Oppose	No revised policy wording has been proposed to determine the impact of any change. We reserve our position on any amendments to this policy pending ensuring any revised wording does not seek a threshold more restrictive than avoiding significant adverse effects in areas in the coastal environment given that no areas of outstanding natural character have been included in the Proposed District Plan.	Disallow
Powerco Limited	FS61.11	Part 2 / Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P24	Oppose	No revised policy wording has been proposed to determine the impact of any change. We reserve our position on any amendments to this policy pending ensuring any revised wording does not seek a threshold more restrictive than avoiding significant adverse effects in areas in the coastal environment given that no areas of outstanding natural character have been included in the Proposed Plan.	Disallow
Meridian Energy Limited	FS101.39	Part 2 / Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P23	Oppose	Considers that the policy INF-CE-P24 applies outside areas of high natural character and outside riparian margins and does not conflict with NZCPS Policy 13.	Disallow
Greater Wellington Regional Council	351.91	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P24	Oppose in part	Considers that the New Zealand Coastal Policy Statement (NZCPS) Policy 13(1)(a) requires that for areas of outstanding natural character, adverse effects are avoided. NZCPS Policy 13(1)(b) requires that for natural character in all other areas of the coastal environment, significant adverse effects are avoided, and all other adverse effects are avoided, remedied or mitigated.	Retain provision, subject to amendments, as outlined other submission points.
Greater Wellington Regional Council	351.92	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P24	Amend	Considers that In order to give effect to Policy 13 of the NZCPS and to achieve the outcomes sought by CE-O1, the wording of this policy needs to be strengthened to apply to all other areas of the coastal environment.	Seeks to Amend INF-CE-P24 (New infrastructure within the coastal environment) as follows: New infrastructure within the coastal environment: <ul style="list-style-type: none"> ▲ Outside of high coastal natural character areas; and ▲ Outside of coastal and riparian margins. <u>Allow for new infrastructure within the coastal environment where it is located outside of high coastal natural character areas and outside of coastal margins and riparian margins. Only allow for new infrastructure in the coastal environment where any significant adverse effects on natural character are avoided and other adverse effects on natural character are avoided, remedied or mitigated.</u>
Meridian Energy Limited	FS101.40	Part 2 / Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P24	Support	Meridian agrees that the 'avoid significant adverse effects' and 'avoid, remedy or mitigate other effects' is appropriate. However, Meridian also considers it remains valid to consider functional and operational needs in the circumstances covered by Policy INF-CE-P24.	Amend / Amend provision to insert a reference to considering the functional needs and operational needs of the proposed infrastructure.
Waka Kotahi	370.104	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P24	Support	These provisions provide clear guidance in how to balance different interests where infrastructure overlaps with other areas and values.	Retain INF-CE-P24 (New infrastructure within the coastal environment: <ul style="list-style-type: none"> - Outside of high coastal natural character areas; and - Outside of coastal and riparian margins.) as notified.
Director-General of Conservation	385.27	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P24	Support	Supports proposed Policy INF-CE-P24 (New infrastructure within the coastal environment: Outside of high coastal natural character areas; and Outside of coastal and riparian margins).	Retain policy INF-CE-P24 (New infrastructure within the coastal environment: Outside of high coastal natural character areas; and Outside of coastal and riparian margins) as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
CentrePort Limited	402.62	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P24	Support	Support the intent of this policy.	Retain INF-CE-P24 (New infrastructure within the coastal environment: Outside of high coastal natural character areas; and Outside of coastal and riparian margins) as notified.
Wellington International Airport Ltd	406.127	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P24	Oppose	Opposes this policy insofar as it encourages the duplication of controls within the coastal environment that can otherwise be managed by the general infrastructure provisions. [See paragraphs 4.30 to 4.31 and 4.47 to 4.48 of original submission for full reason]	Delete INF-CE-P24 (New infrastructure within the coastal environment) in its entirety.
Meridian Energy Limited	FS101.41	Part 2 / Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CEP-P24	Oppose	Considers that the policy INF-CE-P24 may not be relevant for the airport but remains relevant for other infrastructure in the coastal environment.	Disallow
KiwiRail Holdings Limited	408.57	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P24	Support	Supports recognition that there are specific circumstances in which new infrastructure may be appropriate within coastal margins, is supported. In particular, KiwiRail support that these policies link to functional and operational needs of infrastructure.	Retain INF-CE-P24 (New infrastructure within the coastal environment: Outside of high coastal natural character areas; and Outside of coastal and riparian margins) as notified.
Royal Forest and Bird Protection Society	345.56	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P25	Support in part	Considers it appropriate to delete reference to "identified" values and operational need.	Amend INF-CE-P25 (New infrastructure within the coastal environment): Within high coastal natural character areas; or within coastal and riparian margins. Only allow for new infrastructure within high coastal natural character areas and within coastal margins and riparian margins in the coastal environment, where: 1. The activity is of a scale that maintains or restores the identified values described in SCHED12 or the natural character; 2. Any significant adverse effects are avoided and any other adverse effects are avoided, remedied or mitigated; and 3. There is a functional or operational need for the activity to be undertaken within these areas.
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	FS25.12	Part 2 / Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P25	Oppose	Operational need is a relevant consideration to determine if infrastructure is appropriate in a coastal environment context, and accordingly should not be deleted from the policy.	Disallow
Powerco Limited	FS61.12	Part 2 / Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P25	Oppose	Operational need is a relevant consideration to determine if infrastructure is appropriate in a coastal environment context, and accordingly should not be deleted from the policy.	Disallow
Meridian Energy Limited	FS101.42	Part 2 / Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P25	Oppose	Considers that the reference to the 'identified' values in Schedule SCHED12 is valid (in the interests of certainty in Plan implementation). Operational need is a relevant consideration, alongside the other considerations that seek to protect the natural character and values of the coastal environment.	Disallow

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Greater Wellington Regional Council	351.93	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P25	Oppose	<p>Considers that the distinction between INF-CE-P24 and INF-CE-P25 is unnecessary and should be replaced with one policy that applies to the coastal environment.</p> <p>Further, it should be noted that providing for the functional need and operational requirement is in regard to the CMA in isolation as opposed to the terrestrial area (see NZCPS Policy 6(e)) and therefore Greater Wellington does not request this provision to be included in the provision for new infrastructure in the coastal environment.</p>	Delete INF-CE-P25 (New infrastructure within the coastal environment: ...) in its entirety.
Meridian Energy Limited	FS101.43	Part 2 / Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P25	Oppose	Meridian does not agree that a combined policy is the most appropriate way to achieve the Plan's objectives and opposes the suggested deletion of functional need and operational requirements as a consideration.	Disallow
Waka Kotahi	370.105	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P25	Support	These provisions provide clear guidance in how to balance different interests where infrastructure overlaps with other areas and values.	Retain INF-CE-P25 (New infrastructure within the coastal environment: - Within high coastal natural character areas; or within coastal and riparian margins.) as notified.
Director-General of Conservation	385.28	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P25	Support	Supports proposed Policy INF-CE-P25 (New infrastructure within the coastal environment: Within high coastal natural character areas; or within coastal and riparian margins).	Retain policy INF-CE-P25 (New infrastructure within the coastal environment: Within high coastal natural character areas; or within coastal and riparian margins) as notified.
CentrePort Limited	402.63	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P25	Support in part	Considers that the term functional and operational need of infrastructure is not in alignment with the terminology of the Proposed Natural Resources Plan that utilises the terms functional need and operational requirement.	Retain INF-CE-P25 (New infrastructure within the coastal environment: Within high coastal natural character areas; or within coastal and riparian margins), with amendment.
CentrePort Limited	402.64	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P25	Amend	Considers that the term functional and operational need of infrastructure is not in alignment with the terminology of the Proposed Natural Resources Plan that utilises the terms functional need and operational requirement.	<p>Amend INF-CE-P25 (New infrastructure within the coastal environment: Within high coastal natural character areas; or within coastal and riparian margins) as follows:</p> <p>...</p> <p>3. There is a functional <u>need</u> or operational need <u>requirement</u> for the activity to be undertaken within these areas.</p>
Wellington International Airport Ltd	406.128	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P25	Oppose	<p>Opposes INF-CE-P25.</p> <p>Considers that the policy goes further than the NZCPS which requires the avoidance of significant adverse effects and the avoidance, remediation and mitigation of other effects on natural character, natural features and landscapes. Amendments are proposed to the policy which therefore bring the policy into line with the NZCPS.</p> <p>[See paragraphs 4.46 to 4.49 of original submission for full reason]</p>	Delete INF-CE-P25 (New infrastructure within the coastal environment) in it's entirety.
Meridian Energy Limited	FS101.44	Part 2 / Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P25	Oppose	Considers that the policy INF-CE-P25 may not be relevant for the airport but remains relevant for other infrastructure in the coastal environment.	Disallow

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Wellington International Airport Ltd	406.129	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P25	Amend	<p>Opposes INF-CE-P25.</p> <p>Considers that the policy goes further than the NZCPS which requires the avoidance of significant adverse effects and the avoidance, remediation and mitigation of other effects on natural character, natural features and landscapes. Amendments are proposed to the policy which therefore bring the policy into line with the NZCPS.</p> <p>[See paragraphs 4.46 to 4.49 of original submission for full reason]</p>	<p>If INF-CE-P25 (New infrastructure within the coastal environment) is not deleted, amend as follows:</p> <p>INF-CE-P25 New infrastructure within the coastal environment:</p> <p>...</p> <p>2. Any significant adverse effects are avoided and any other adverse effects are avoided, remedied or mitigated on <u>natural character and natural features and landscapes</u>; and</p> <p>...</p>
KiwiRail Holdings Limited	408.58	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P25	Support	<p>Supports recognition that there are specific circumstances in which new infrastructure may be appropriate within coastal margins, is supported. In particular, KiwiRail support that these policies link to functional and operational needs of infrastructure.</p>	<p>Retain INF-CE-P25 (New infrastructure within the coastal environment: Within high coastal natural character areas; or within coastal and riparian margins) as notified.</p>
Transpower New Zealand Limited	315.94	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P26	Amend	<p>Considers that Transpower has existing assets within the coastal environment, including the Kaiwharawhara Supply Point substation (designation TPR6) and underground cable, Oteranga Bay (designation TPR4) and associated lines, and Te Hikowhenua Shore Electrode Station (designation TPRS) and associated lines.</p> <p>Considers the existing assets are regulated by the designations and the NESETA, noting that s43D RMA prescribes the relationship between designations and the NESETA. Policy P26 relates to existing National Grid assets within the Coastal Environment, and recognises the existing assets. The policy approach within P26 is supported and gives effect to Policies 2 and 5 of the NPSET. A minor amendment is sought to include “minor upgrade”, in recognition of the existing assets. A minor upgrade may be something like increasing the height of a pole support structure, or moving the same dimensioned pole within 5m of its existing location, or adding on an additional insulator.</p>	<p>Option 1: Retain INF-CE-P26 (Operation, maintenance and repair of existing National Grid (NG) & Gas Transmission Pipeline Corridor (GTPC) infrastructure within the coastal environment) with an amendment as follows:</p> <p>INF-CE-P26 Operation, maintenance, and repair and <u>minor upgrade</u> of existing National Grid (NG) & Gas Transmission Pipeline Corridor (GTPC) infrastructure within the coastal environment</p> <p>Allow for the operation, maintenance, repair <u>and minor upgrade</u> of existing National Grid (NG) & Gas Transmission Pipeline Corridor (GTPC) infrastructure within the coastal environment.</p>
Transpower New Zealand Limited	315.95	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P27	Support	<p>Considers Transpower has existing assets within the coastal environment, including the Kaiwharawhara Supply Point substation (designation TPR6) and underground cable, Oteranga Bay (designation TPR4) and associated lines, and Te Hikowhenua Shore Electrode Station (designation TPRS) and associated lines. Both the Oteranga Bay (designation TPR4) and Te Hikowhenua Shore Electrode Station (designation TPRS) are within areas of “High Coastal Natural Character” noting there are no existing assets within the identified “High Coastal Natural Character” outside the designations. Transpower has no existing assets in area of “Very High Coastal Natural Character”.</p> <p>Considers that while Transpower’s assets in high coastal natural character areas and potentially the coastal margin are within the designations, given the relationship between designations and the NESETA (as prescribed by s43D of the RMA), works to the existing lines and cables within the designation subject to the NESETA, and that that trigger consent under the NESETA, would be subject to the PDP policies. Considers as such P27 and P28 have implications for Transpower. Transpower supports P27 noting that while the coastal margin is defined, given the CMA line is not identified, it is not clear where the 10m margin area is located. This is particularly the case for more dynamic coastal environments where the CMA is not readily identifiable. Given the policy implications of defining the coastal margin, considers clarity is required (and sought in the submission to the definition) as to the physical application of the defined Coastal margin to enable efficient and effective plan implementation.</p>	<p>Retain INF-CE-P27 (Upgrading of existing National Grid (ND) & Gas Transmission Pipeline Corridor (GTPC) infrastructure within the coastal environment...) as notified.</p> <p>[And, as sought in another submission point, clearly identify the coastal margin]</p>

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Transpower New Zealand Limited	315.96	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P28	Amend	Considers that Transpower has existing assets within the coastal environment, including the Kaiwharawhara Supply Point substation (designation TPR6) and underground cable, Oteranga Bay (designation TPR4) and associated lines, and Te Hikowhenua Shore Electrode Station (designation TPR5) and associated lines. Both the Oteranga Bay (designation TPR4) and Te Hikowhenua Shore Electrode Station (designation TPR5) are within areas of "High Coastal Natural Character" and there are no existing assets within the identified "High Coastal Natural Character" outside the designations. Transpower has no existing assets in area of "Very High Coastal Natural Character". Given the nature of the existing assets (which at Oteranga Bay are underground within the coastal margin and the High Natural Character Area and at Te Hikowhenua, are underground in the coastal margin and a single line for a small portion in the High Natural Character Area), that they are designated, and that the policy is specific to upgrades which are provided for and regulated under the NESETA, Transpower is comfortable with the policy. However, it reserves its position depending on the outcome of other submission points and relief sought as many of the National Grid provisions cannot be considered in isolation. Some minor amendments are sought to reflect that the policy considerations relate to the upgrade, thereby recognising existing assets.	Amend INF-CE-P28 (Upgrading of existing National Grid (NG) infrastructure within the coastal environment...) as follows: INF-CE-P28 Upgrading of existing National Grid (NG) infrastructure within the coastal environment: • Within high coastal natural character areas; or • Within coastal and riparian margins. Provide for the upgrading of existing National Grid (NG) infrastructure within high coastal natural character areas or within coastal margins and riparian margins in the coastal environment where: 1. The <u>upgrade</u> activity is of a scale that maintains or restores the identified values described in SCHED12 for natural character; 2. Any significant adverse effects <u>of the upgrade</u> are avoided and any other adverse effects are avoided, remedied or mitigated; and 3. There is a functional need or an operational need for the activity to be undertaken inside a high coastal natural character areas or within coastal margins or riparian margins in the coastal environment.
Avryl Bramley	202.23	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P30	Amend	Considers the rule too permissive. Access to the coastline is highly prized even rocky outcrops and small beaches. We have already have the Oriental Bay to Kilbirnie cycleway where concrete has been poured and fencing erected eradicating a number of small waterside enclaves and denying access to the water.	Amend INF-CE-R30 (Upgrading of existing infrastructure and new infrastructure within the coastal environment: Outside of high coastal natural character areas; and Outside of coastal and riparian margins) so that it is not a permitted activity and that notification is mandatory.
Wellington International Airport Limited	FS36.68	Part 2 / Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P30	Oppose	Considers that it is inappropriate to require resource consent and notification for all infrastructure activities, regardless of their nature, scale or extent, within the coastal environment. Furthermore, such controls are not imposed on other activities within the District.	Disallow
Avryl Bramley	202.24	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P31	Amend	Considers the rule too permissive. Access to the coastline is highly prized even rocky outcrops and small beaches. We have already have the Oriental Bay to Kilbirnie cycleway where concrete has been poured and fencing erected eradicating a number of small waterside enclaves and denying access to the water.	Amend INF-CE-R31 (Upgrading of existing infrastructure within the coastal environment: Within coastal or riparian margins) so that it is not a permitted activity and that notification is mandatory.
Wellington International Airport Limited	FS36.69	Part 2 / Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P31	Oppose	Considers that it is inappropriate to require resource consent and notification for all infrastructure activities, regardless of their nature, scale or extent, within the coastal environment. Furthermore, such controls are not imposed on other activities within the District.	Disallow
Transpower New Zealand Limited	315.97	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P31	Support	[No specific reason provided beyond decision requested - refer to original submission]	Retain INF-CE-P31 (New National Grid (NG) & Gas Transmission Pipeline Corridor (GTPC) infrastructure within the coastal environment) as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Transpower New Zealand Limited	315.98	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P32	Oppose	<p>Opposes INF-CE-P32 and proposes an amended policy framework specific to the National Grid.</p> <p>Considers that the policy does not give effect to the NPS-ET (noting the NPS-ET also applies to the coastal environment) in that:</p> <ul style="list-style-type: none"> - The directive wording "only allow" within the policy does not reflect the enabling wording used in the NPS-ET. - The NPS-ET does not require that natural character be maintained or restored. Rather Policy 8 of the NPS-ET requires a 'seek to avoid' approach with policies 3 and 4 prescribing the matters to consider and have regard to. - The NPS-ET does not require significant adverse effects be avoided, rather policy 8 prescribes a seek to avoid approach. <p>It is also noted that although the National Grid is recognised of national significance within the NPS-ET (being a higher order policy document) it is afforded the exact same policy framework as other infrastructure (as provided in INF-CE P25). This further reinforces Transpower's concerns the PDP does not give effect to the NPS-ET.</p>	<p>Delete INF-CE-P32 (New National Grid (NG) & Gas Transmission Pipeline Corridor (GTPC) infrastructure within the coastal environment) in its entirety.</p> <p>[And add a new National Grid specific policy as per separate submission point]</p>
Waka Kotahi	370.106	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-R27	Support	These provisions provide clear guidance in how to balance different interests where infrastructure overlaps with other areas and values.	<p>Retain INF-CE-R27 (Operation, maintenance, repair of existing infrastructure within the coastal environment:</p> <ul style="list-style-type: none"> - Outside of high coastal natural character areas; and - Outside of coastal and riparian margins.) as notified.
CentrePort Limited	402.65	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-R27	Support	Support the intent of this policy.	Retain INF-CE-R27 (Operation, maintenance, repair of existing infrastructure within the coastal environment: Outside of high coastal natural character areas; and Outside of coastal and riparian margins) as notified.
Wellington International Airport Ltd	406.130	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-R27	Oppose	<p>Opposes INF-CE-P27.</p> <p>[See paragraphs 4.30 to 4.31 and 4.47 and 4.47 and 4.48 of original submission for full reason]</p>	Delete INF-CE-R27 (Operation, maintenance, repair of existing infrastructure within the coastal environment) in its entirety.
Meridian Energy Limited	FS101.45	Part 2 / Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-R27	Support	Meridian agrees that Rule INF-CE-R27 will be redundant where consents (and consent conditions) authorise infrastructure in the coastal environment.	Allow
KiwiRail Holdings Limited	408.59	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-R27	Support	Supports that the operation, maintenance and repair of existing infrastructure is provided for as a permitted activity in the coastal environment, outside of coastal margins.	Retain INF-CE-R27 (Operation, maintenance, repair of existing infrastructure within the coastal environment: Outside of high coastal natural character areas; and Outside of coastal and riparian margins) as notified.
Waka Kotahi	370.107	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-R28	Support	These provisions provide clear guidance in how to balance different interests where infrastructure overlaps with other areas and values.	<p>Retain INF-CE-R28 (Operation, maintenance and repair of existing infrastructure within the coastal environment:</p> <ul style="list-style-type: none"> - Within high coastal natural character areas.) as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Avryl Bramley	202.25	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-R29	Amend	Considers the rule too permissive. Access to the coastline is highly prized even rocky outcrops and small beaches. We have already have the Oriental Bay to Kilbirnie cycleway where concrete has been poured and fencing erected eradicating a number of small waterside enclaves and denying access to the water.	Amend INF-CE-R29 (Operation, maintenance and repair of existing infrastructure within the coastal environment: Within coastal or riparian margins) so that it is not a permitted activity and that notification is mandatory.
Wellington International Airport Limited	FS36.70	Part 2 / Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-P29	Oppose	Considers that it is inappropriate to require resource consent and notification for all infrastructure activities, regardless of their nature, scale or extent, within the coastal environment. Furthermore, such controls are not imposed on other activities within the District.	Disallow
Meridian Energy Limited	FS101.46	Part 2 / Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-R29	Oppose	Considers that the rule applies to existing established infrastructure (not new infrastructure). The terms on which such infrastructure is able to be established and operate within the coastal environment will be determined by consent conditions or the permitted activity rule under which it is established. In this respect, the rule may not be strictly necessary in any event. The request by the submitter to require notification is not relevant (or appropriate).	Disallow
Waka Kotahi	370.108	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-R29	Support	These provisions provide clear guidance in how to balance different interests where infrastructure overlaps with other areas and values.	Retain INF-CE-R29 (Operation, maintenance and repair of existing infrastructure within the coastal environment: - Within coastal or riparian margins.) as notified.
CentrePort Limited	402.66	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-R29	Support	Support the intent of this policy.	Retain INF-CE-R29 (Operation, maintenance and repair of existing infrastructure within the coastal environment: Within coastal or riparian margins) as notified.
Wellington International Airport Ltd	406.131	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-R29	Support in part	Supports INF-CE-P29 in part. Considers that that this provision also needs to include the area of Natural Open Space zoned land, between Lyall Bay and Moa Point, which is highly modified and is and used by WIAL for a range of ancillary airport activities (such as navigational aids and meteorological equipment). [See paragraphs 4.11 to 4.15 of original submission for further detail]	Not specified.
Airways Corporation of New Zealand Limited	FS105.12	Part 2 / Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-R29	Support	This submission point is consistent with Airways' operations and its core functions.	Allow

Transpower New Zealand Limited	315.100	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-R36	Amend	Considers that while the rule and activity status are supported, specific to the National Grid, the existing designations, and the NESETA provides prevailing provisions for maintenance, reconductoring, increasing voltage, structure addition or replacement, and removal, for the National Grid. On this basis, R36 for existing National Grid infrastructure (that are otherwise captured by the NESETA and the existing designations) is of no relevance to Transpower in respect of rule application and only adds confusion and potential errors in the application of rules.	Seeks to delete reference to the National Grid within INF-CE-R36 (Upgrading of existing National Grid (NG) & Gas Transmission Pipeline Corridor (GTPC) infrastructure: outside of high...)
Avryl Bramley	202.28	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-R37	Amend	Considers that Gas and electric reticulation are treated the same and Gas will be phased out by 2040. Without stricter rules surrounding these, run the risk of the Gas companies undertaking unnecessary repairs or renewals and then attempting to be recompensated for stranded assets by consumers. [Refer to original submission for full reason]	Amend INF-CE-R37 (Coastal Environment upgrades) to have controls on gas company activity to ensure that only maintenance necessary to keep the network functioning at a minimal level until final phase out is permitted.
Powerco Limited	FS61.36	Part 2 / Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-R37	Oppose	Not a relevant Resource Management Act consideration.	Disallow
Transpower New Zealand Limited	315.101	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-R37	Oppose	Considers while the rule and activity status are supported, specific to the National Grid, the existing designations, and the NESETA provides prevailing provisions for maintenance, reconductoring, increasing voltage, structure addition or replacement, and removal, for the National Grid. On this basis, R37 for existing National Grid infrastructure (that are otherwise captured by the NESETA and the existing designations) is of no relevance to Transpower in respect of rule application and only adds confusion and potential errors in the application of rules.	Delete Rule INF-CE-R37 (Upgrading of existing National Grid (NG) infrastructure within the coastal environment: within high coastal natural character areas; or within coastal or riparian margins) in its entirety.
Avryl Bramley	202.29	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-R38	Amend	Considers that Gas and electric reticulation are treated the same and Gas will be phased out by 2040. Without stricter rules surrounding these, run the risk of the Gas companies undertaking unnecessary repairs or renewals and then attempting to be recompensated for stranded assets by consumers. [Refer to original submission for full reason]	Amend INF-CE-R38 (Gas transmission pipeline corridor) to have controls on gas company activity to ensure that only maintenance necessary to keep the network functioning at a minimal level until final phase out is permitted.
Powerco Limited	FS61.37	Part 2 / Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-R38	Oppose	Not a relevant Resource Management Act consideration.	Disallow
Transpower New Zealand Limited	315.102	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-R39	Support	Considers the NESETA does not apply to new National Grid assets. On this basis, Transpower supports the permitted rule, noting that other applicable INF chapter rules would apply.	Retain INF-CE-R39 (New National Grid (NG) & Gas Transmission Pipeline Corridor (GTPC) infrastructure within the coastal environment: Outside of high coastal natural character areas; and Outside of coastal or riparian margins) as notified.
Transpower New Zealand Limited	315.103	Energy Infrastructure and Transport / Infrastructure Coastal Environment / INF-CE-R40	Support	Considers the NESETA does not apply to new National Grid assets. On this basis, Transpower supports the default discretionary activity rule as it provides a robust consenting framework whilst still recognising the national significance of the National Grid.	Retain INF-CE-R40 (New National Grid (NG) & Gas Transmission Pipeline Corridor (GTPC) infrastructure within the coastal environment: Within high coastal natural character areas; or Within coastal or riparian margins) as notified

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Meridian Energy Limited	228.27	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / General INF-ECO	Oppose in part	<p>Considers that the Introduction to the INF-ECO chapter should include, under the heading 'Other relevant District Plan provisions', a statement that seeks to clarify the interaction between the INF-ECO chapter and other Plan chapters.</p> <p>Meridian understood the intention of the Plan to be that the rules for renewable electricity generation activities, structures and buildings would be wholly contained in the REG chapter. Meridian supports this approach.</p> <p>Considers the note in the preamble is not entirely helpful in clarifying this.</p> <p>Meridian accepts that the objectives and policies of the ECO Ecosystems and Indigenous Biodiversity chapter are applicable to renewable electricity generation activities. However, considers the standards listed for general infrastructure activities in the INF-ECO chapter are entirely inappropriate for renewable electricity generation activities and structures and should not be construed as a 'permitted baseline' for renewable electricity generation activities there, and particularly not for existing wind farms.</p>	Retain the Introduction to Chapter INF-ECO with amendment.
Meridian Energy Limited	228.28	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / General INF-ECO	Amend	<p>Considers that the Introduction to the INF-ECO chapter should include, under the heading 'Other relevant District Plan provisions', a statement that seeks to clarify the interaction between the INF-ECO chapter and other Plan chapters.</p> <p>Meridian understood the intention of the Plan to be that the rules for renewable electricity generation activities, structures and buildings would be wholly contained in the REG chapter. Meridian supports this approach.</p> <p>Considers the note in the preamble is not entirely helpful in clarifying this.</p> <p>Meridian accepts that the objectives and policies of the ECO Ecosystems and Indigenous Biodiversity chapter are applicable to renewable electricity generation activities. However, considers the standards listed for general infrastructure activities in the INF-ECO chapter are entirely inappropriate for renewable electricity generation activities and structures and should not be construed as a 'permitted baseline' for renewable electricity generation activities there, and particularly not for existing wind farms.</p>	<p>Amend the Introduction to Chapter INF-ECO, by inserting under the heading 'Other relevant District Plan provisions', the following (or similar) clarification note:</p> <p><u>The rules applicable to renewable electricity generation activities are contained in Chapter REG Renewable Electricity Generation. The rules in Chapter INF-ECO Infrastructure Ecosystems and Indigenous Biodiversity do not apply to renewable electricity generation activities.</u></p>

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Transpower New Zealand Limited	315.104	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / General INF-ECO	Amend	<p>Considers Transpower's operational activities involve upgrading and 'recutting' access tracks, vegetation trimming and vegetation removal. Transpower's maintenance and climate change adaptation activities will involve making foundations stronger/bigger, and relocating assets (among other things). Transpower is required to clear paths and undertake vegetation trimming/clearance to:</p> <ul style="list-style-type: none"> • Ensure clearance under and adjacent to the lines; • Provide access to the lines and support structure assets, including for fault response purposes; • Enable maintenance of support structures including painting, foundation strengthening and replacement; and • Reconductor lines. <p>Transpower has a cyclical maintenance programme, but typically inspections can occur any time between 6 and 18 months. The decision to trim or clear vegetation on inspection depends on factors such as the age of the support structure, nature of the vegetation, landowner relationships, and the operational requirements of the asset. The requirement to provide sufficient clearance under the lines is a regulatory requirement of the Electricity (Hazards from Trees) Regulations 2003. Clearance is required for safety reasons (primarily to prevent flashovers). While trimming/ clearance is a safety requirement, it is subject to local authority plan provisions (such as when the site is an SNA which is a 'Natural Area' for the purpose of the National Environmental Standards for Electricity Transmission Activities (NESETA)). Considers that it is important that it is recognised in the PDP that some of these activities will have unavoidable impacts and will sometimes be in SNAs given the extent and location of Transpower's assets. These activities are critical to the functioning of the National Grid, and should be provided for.</p>	Seeks to amend the Infrastructure - Ecosystems and Indigenous Biodiversity (INF-ECO) chapter provisions to recognise and provide for the National Grid as set out in subsequent submission points.
Transpower New Zealand Limited	315.105	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / General INF-ECO	Amend	Supports the introductory text but seeks clarification that the National Grid is subject to specific policies and rules and the general sub-chapter provisions do not apply.	<p>Amend the introduction to the Infrastructure - Ecosystems and Indigenous Biodiversity (INF-ECO) as follows:</p> <p>This sub-chapter applies to infrastructure within Natural Features and Landscape Overlays. It applies in addition to the principal Infrastructure Chapter.</p> <p><u>Included within the sub-chapter are provisions specific to the National Grid (NG) and Gas Transmission Pipelines Corridor (GTPC). For the avoidance of doubt, other sub-chapter policies and rules within this sub-chapter do not apply to the National Grid.</u></p> <p>Note: The objectives of the Infrastructure Chapter apply.</p>
Transpower New Zealand Limited	315.106	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / General INF-ECO	Oppose in part	Considers that on the basis INF-ECO-R44 is to be amended [as requested in other submission point regarding this rule] so it does not apply to the National Grid, considers Standard S19 will not be applicable to the National Grid. If the intent is for S19 to apply to the National Grid Transpower opposes its application as the submitter considers the NESETA manages vegetation works for existing National Grid infrastructure and the provision of a standard to apply to the National Grid adds unnecessary confusion and interpretation issues.	Opposes reference to INF-ECO-S19 (Trimming or removal of indigenous vegetation or trees within a significant natural area) in any National Grid specific rules.
Transpower New Zealand Limited	315.107	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / General INF-ECO	Amend	Considers that on the basis INF-ECO-R44 is to be amended [as requested in other submission point regarding this rule] so it does not apply to the National Grid, considers Standard S19 will not be applicable to the National Grid. If the intent is for S19 to apply to the National Grid, Transpower opposes its application as the submitter considers the NESETA manages vegetation works for existing National Grid infrastructure and the provision of a standard to apply to the National Grid adds unnecessary confusion and interpretation issues.	Seeks to delete reference to INF-ECO-S19 (Trimming or removal of indigenous vegetation or trees within a significant natural area) from any National Grid specific rules.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Transpower New Zealand Limited	315.108	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / General INF-ECO	Oppose in part	Considers that on the basis INF-ECO-R44 is to be amended so it does not apply to the National Grid, INF-ECO-S20 will not be applicable to the National Grid. If the intent is for INF-ECO S20 to apply to the National Grid Transpower opposes its application as it duplicates the NESETA and adds unnecessary confusion and interpretation issues.	Opposes reference to INF-ECO-S20 (Earthworks within a significant natural area) in any National Grid specific rules.
Transpower New Zealand Limited	315.109	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / General INF-ECO	Amend	Considers that on the basis INF-ECO-R44 is to be amended so it does not apply to the National Grid, Standard S20 will not be applicable to the National Grid. If the intent is for S20 to apply to the National Grid Transpower opposes its application as it duplicates the NESETA and adds unnecessary confusion and interpretation issues.	Seeks to delete reference to INF-ECO-S20 (Earthworks within a significant natural area) from any National Grid specific rules.
Royal Forest and Bird Protection Society	345.57	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / General INF-ECO	Support in part	Notes that the introduction to this sub-chapter states that the objectives of the Infrastructure chapter apply. Further, that this sub-chapter applies in addition to the Infrastructure chapter. That means that both the policies in the Infrastructure chapter as well as those in this sub-chapter will apply to use and development in SNAs. Forest & Bird's overarching submission for this chapter is that the provisions should be no less protective than those in the ECO chapter. The provisions in this chapter should mirror the ECO provisions, with the amendments made as sought by F&B in respect of that chapter.	Amend chapter to mirror ECO - Ecosystems and Indigenous Biodiversity chapter to apply a similar level of protection.
Transpower New Zealand Limited	FS29.22	Part 2 / Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / General INF-ECO	Oppose	Given the general nature of the relief sought, Transpower opposes the submission point.	Disallow / Seeks that submission is disallowed in part in so far as the relief sought is inconsistent with that sought in Transpower's submission.
Wellington International Airport Limited	FS36.71	Part 2 / Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / General INF-ECO	Oppose	WIAL opposes the relief sought by the submitter as it is appropriate for a different planning framework to apply for regionally significant infrastructure in recognition of the social, cultural and economic benefits it provides for the community and the operational and locational constraints of that infrastructure.	Disallow
Meridian Energy Limited	FS101.48	Part 2 / Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / General INF-ECO	Oppose	Meridian does not agree that the objectives for significant natural areas (in the SNA chapter) should be replicated in this INF-ECO chapter.	Disallow
Waka Kotahi NZ Transport Agency	FS103.10	Part 2 / Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / General INF-ECO	Oppose	The purpose of this chapter is evidently to help understand the balance and reconcile the need to provide for infrastructure with the need to protect areas of important biodiversity. It is therefore not appropriate to mirror the level of stringency in the ECO chapter as applied more broadly.	Disallow
WCC Environmental Reference Group	377.39	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / General INF-ECO	Support	Supportive of the entire sub-chapter as it is logical and strikes a good balance between use and protection.	Retain the Infrastructure (Ecosystems and Biodiversity) chapter as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Taranaki Whānui ki te Upoko o te Ika	389.57	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / General INF-ECO	Amend	[No specific reason given beyond decision requested - refer to original submission].	Amend 'Other relevant District Plan provisions' to include Sites and Areas of Significance to Māori chapter.
Greater Wellington Regional Council	FS84.120	Part 2 / Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / General INF-ECO	Support	Greater Wellington support the inclusion and protection of SASM.	Allow / Seek provisions which protect SASM.
Transpower New Zealand Limited	315.110	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / New INF-ECO	Amend	<p>Considers that Transpower has existing assets within identified SNAs [see full submission for image supplied].</p> <p>Transpower is required to undertake vegetation trimming/clearance necessary for the safe and efficient operation, maintenance, upgrading and development of the National Grid, including (but not limited to) trimming that may be required by the Electricity (Hazards from Trees) Regulations 2003. Related, is the operational requirement for clearance of vegetation on access tracks to enable Transpower to access the grid infrastructure to undertake its operation, maintenance and upgrade. Submitter considers the policy does not give effect to the NPS-ET. Considers the policy directive within INF-ECO-P35 that works "do not adversely affect the biodiversity values" does not give effect to the NPS-ET. Considers the policy is drafted such that all and any adverse effects are to be avoided. Considers that such a requirement is onerous given the policy relates to existing infrastructure which will often have safety requirements and obligations in respect of adjacent vegetation. Transpower seeks amendment to the policy to reflect the realities of maintaining the National Grid and ensuring safe and necessary vegetation clearance distances.</p> <p>(Option B) [Refer to original submission for full reason]</p>	<p>Add a new National Grid specific policy as follows:</p> <p><u>INF-NG-P2 Operation, and maintenance and minor upgrade of the National Grid</u></p> <p><u>Provide for the operation, maintenance and minor upgrade of the National Grid while managing the adverse effects of these activities.</u></p>
Transpower New Zealand Limited	315.111	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / New INF-ECO	Amend	<p>The submitter does not oppose the identification of SNAs, but considers the policy approach has to be cognisant of the need to develop the National Grid and also give effect to the NPS-ET. Transpower proposes an amended policy approach specific to the National Grid [in general]. Considers that key to the approach is the recognition of the need to provide and enable the National Grid, whilst also providing a robust framework to manage effects. Specific to INF-ECO-P37, while Transpower accepts the policy does have regard to the route, site and method selection process, and operational needs, considers they apply in context of the policy chapeau to 'give priority to avoiding adverse effects'. Submitter queries how the term "give priority to avoiding adverse effects" would be implemented. Queries if this requires avoidance as the default position. Transpower's preference is for development within SNA's to be addressed in the specific National Grid development policy (within the INF chapter). Considers this would enable any new National Grid development to be considered in a comprehensive manner.</p>	<p>Add new National Grid specific policy to replace INF-ECO-P37 (New development of National Grid within significant natural areas) as follows:</p> <p><u>INF-NG-P6 Development of the National Grid</u></p> <p><u>Provide for the development of the National Grid</u></p> <p><u>1. In urban zoned areas, development should minimise adverse effects on urban amenity and should avoid material adverse effects on the Commercial and Mixed-Use zones, and areas of high recreational or amenity value and existing sensitive activities.</u></p> <p><u>2. Seek to avoid the adverse effects of the National Grid within areas identified in SCHED10 – Outstanding Natural Features and Landscapes, SCHED8 - Significant Natural Areas, and SCHED11 – Special Amenity Landscapes, outside the coastal environment.</u></p> <p><u>3. Where the National Grid has a functional need or operational need to locate within the coastal environment, manage adverse effects by:</u></p> <p><u>a. Seeking to avoid adverse effects on areas identified in SCHED10 – Outstanding Natural Features</u></p>

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
					<p><u>and Landscapes, SCHED12 - High Coastal Natural Character Areas, SCHED8 - Significant Natural Areas, SCHED11 – Special Amenity Landscapes, and the Coastal Margin.</u></p> <p><u>b. Where it is not practicable to avoid adverse effects on the values of the areas in SCHED10 – Outstanding Natural Features and Landscapes, SCHED12 - High Coastal Natural Character Areas, SCHED8 - Significant Natural Areas, SCHED11 – Special Amenity Landscapes; and the Coastal Margin because of the functional needs or operational needs of the National Grid, remedy or mitigate adverse effects on those values.</u></p> <p><u>c. Seeking to avoid significant adverse effects on:</u></p> <p><u>i. other areas of natural character</u></p> <p><u>ii. natural attributes and character of other natural features and natural landscapes.</u></p> <p><u>iii. indigenous biodiversity values that meet the criteria in Policy 11(b) of the NZCPS 2010</u></p> <p><u>d. Avoiding, remedying or mitigating other adverse effects to the extent practicable; and</u></p> <p><u>e. Recognising there may be some areas within SCHED10 – Outstanding Natural Features and Landscapes, SCHED12 - High Coastal Natural Character Areas, SCHED8 - Significant Natural Areas, SCHED11 – Special Amenity Landscapes; and the Coastal Margin, where avoidance of adverse effects is required to protect the identified values and characteristics.</u></p> <p><u>4. Remedy or mitigate any adverse effects from the operation, maintenance, upgrade, major upgrade or development of the National Grid which cannot be avoided, to the extent practicable; and</u></p> <p><u>5. When considering the adverse effects in respect of 1-3 above:</u></p> <p><u>a. Have regard to the extent to which adverse effects have been avoided, remedied or mitigated by the route, site and method selection; and</u></p> <p><u>b. Consider the constraints arising from the operational needs or functional needs of the National Grid, when considering measures to avoid, remedy or mitigate any adverse effects.</u></p>
Royal Forest and Bird Protection Society	345.58	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / New INF-ECO	Amend	Considers Policy 11 of NZCPS is not given effect to by the current policies. Seeks new policy to do so.	<p>Add new policy INF-ECO-PX (All infrastructure activities in the coastal environment):</p> <p><u>Only allow activities within a significant natural area in the coastal environment where it can be demonstrated that they:</u></p> <p><u>1. Avoid adverse effects on the matters in Policy 11(a) of the New Zealand Coastal Policy Statement 2010;</u></p> <p><u>2. Avoid significant adverse effects and avoid, remedy or mitigate other adverse effects of activities on the matters in Policy 11(b) of the New Zealand Coastal Policy Statement 2010; and</u></p> <p><u>3. Protect other indigenous biodiversity values in accordance with ECO-P1</u></p>
Transpower New Zealand Limited	FS29.23	Part 2 / Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / New INF-ECO	Oppose	In its submission Transpower seeks a specific National Grid policy approach to give effect to the NPSET and the NZCPS.	Disallow / Seeks that submission is disallowed in part in so far as the relief sought is inconsistent with that sought in Transpower's submission.
Meridian Energy Limited	FS101.49	Part 2 / Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / New INF-ECO	Oppose	Meridian considers that, taken together, the objectives and policies of the INF-ECO chapter do give effect to the NZCPS.	Disallow

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Wellington International Airport Ltd	406.143	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / New INF-ECO	Amend	<p>Considers that that a new policy and method is required to allow for the removal of vegetation within significant natural areas where necessary to provide for the safe and/or efficient operation of regionally significant infrastructure.</p> <p>[See paragraphs 4.50 to 4.55 in original submission for full reason]</p>	<p>Add new policy as follows:</p> <p><u>INF-ECO-P38 Appropriate vegetation removal in significant natural areas</u></p> <p><u>Enable vegetation removal within significant natural areas identified within SCHED8 where:</u></p> <p><u>1. The vegetation removal is required to provide for the ongoing and safe operation of regionally significant infrastructure; and,</u></p> <p><u>2. Any adverse effects on indigenous biodiversity values within a significant natural area are considered in accordance with ECO-P1.</u></p>
KiwiRail Holdings Limited	FS72.32	Part 2 / District-Wide Matters / Energy, Infrastructure, and Transport / Infrastructure Ecosystems and Biodiversity / New INF-ECO	Support	<p>Supports provisions that allow for vegetation removal within SNA's as required for the safe and efficient operation of regionally significant infrastructure such as rail.</p> <p>Considers the relief sought should be allowed because it will (a) will promote the sustainable management of the natural and physical resources in Wellington City, and is therefore consistent with Part 2 and other provisions of the Resource Management Act 1991 (RMA) and the Enabling Housing Supply Amendment Act 2021 (Amendment Act); (b) is consistent with other relevant planning documents, including the Greater Wellington Regional Policy Statement and National Policy Statement for Urban Development 2020; (c) will meet the reasonably foreseeable needs of future generations; (d) will avoid, remedy or mitigate actual and potential adverse effects on the environment; (e) will enable the social, economic and cultural wellbeing of the people of Wellington City; and (f) is the most appropriate way to achieve the objectives of the Proposed Plan in terms of section 32 of the RMA.</p>	Allow
Meridian Energy Limited	FS101.50	Part 2 / Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / New INF-ECO	Support	Meridian agrees that the additional policy and proposed new rule, providing for appropriate vegetation removal in significant natural areas, have merit.	Allow
Wellington International Airport Ltd	406.144	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / New INF-ECO	Amend	<p>Considers that that a new policy and method is required to allow for the removal of vegetation within significant natural areas where necessary to provide for the safe and/or efficient operation of regionally significant infrastructure.</p> <p>[See paragraphs 4.50 to 4.55 in original submission for full reason]</p>	<p>Add new rule as follows:</p> <p><u>INFR-ECO-R43A</u></p> <p><u>All Zones</u></p> <p><u>Removal of vegetation within significant natural areas to protect regionally significant infrastructure</u></p> <p><u>1. Activity Status: Restricted discretionary</u></p> <p><u>Matters of discretion are:</u></p> <p><u>3. The matters in INF-ECO-P38</u></p>

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
KiwiRail Holdings Limited	FS72.33	Part 2 / District-Wide Matters / Energy, Infrastructure, and Transport / Infrastructure Ecosystems and Biodiversity / New INF-ECO	Support	Supports provisions that allow for vegetation removal within SNA's as required for the safe and efficient operation of regionally significant infrastructure such as rail. Considers the relief sought should be allowed because it will (a) will promote the sustainable management of the natural and physical resources in Wellington City, and is therefore consistent with Part 2 and other provisions of the Resource Management Act 1991 (RMA) and the Enabling Housing Supply Amendment Act 2021 (Amendment Act); (b) is consistent with other relevant planning documents, including the Greater Wellington Regional Policy Statement and National Policy Statement for Urban Development 2020; (c) will meet the reasonably foreseeable needs of future generations; (d) will avoid, remedy or mitigate actual and potential adverse effects on the environment; (e) will enable the social, economic and cultural wellbeing of the people of Wellington City; and (f) is the most appropriate way to achieve the objectives of the Proposed Plan in terms of section 32 of the RMA.	Allow
Meridian Energy Limited	FS101.51	Part 2 / Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / New INF-ECO	Support	Meridian agrees that the additional policy and proposed new rule, providing for appropriate vegetation removal in significant natural areas, have merit.	Allow / Allow the requested addition of the policy and rule.
Royal Forest and Bird Protection Society	345.59	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-P33	Support	Supports the policy.	Retain INF-ECO-P33 (Operation, maintenance and repair of existing infrastructure within a significant natural area) as notified.
Waka Kotahi	370.114	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-P33	Support	Support this policy as under the maintenance and repair definition it 'means any work or activity necessary to continue the operation or functioning of existing infrastructure.' Waka Kotahi consider this sufficient to cover off health and safety risks such as vegetation control to preserve sight lines.	Retain INF-ECO-P33 (Operation, maintenance and repair of existing infrastructure within a significant natural area) as notified.
Waka Kotahi	370.115	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-P33	Support	These provisions provide clear guidance in how to balance different interests where infrastructure overlaps with other areas and values.	Retain INF-ECO-P33 (Operation, maintenance and repair of existing infrastructure within a significant natural area) as notified.
Director-General of Conservation	385.29	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-P33	Support	Supports proposed policy INF-ECO-P33 (Operation, maintenance and repair of existing infrastructure within a significant natural area).	Retain policy INF-ECO-P33 (Operation, maintenance and repair of existing infrastructure within a significant natural area) as notified.
Wellington International Airport Ltd	406.145	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-P33	Oppose in part	Opposes INF-ECO-P33 [See paragraphs 4.49 to 4.54 of original submission for full reason]	Opposes INF-ECO-P33 (Operation, maintenance and repair of existing infrastructure within a significant natural area) in part and seeks amendment.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Wellington International Airport Ltd	406.146	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-P33	Amend	Opposes INF-ECO-P33 [See paragraphs 4.49 to 4.54 of original submission for full reason]	Amend INF-ECO-P33 (Operation, maintenance and repair of existing infrastructure within a significant natural area) as follows: Provide for the operation, maintenance and repair of existing infrastructure within significant natural areas where the activity, including associated earthworks, not adversely affect the biodiversity values—it can be demonstrated that: <u>1. There is an operational need or functional need that means the infrastructure's location cannot be practicably avoided; and</u> <u>2. Any adverse effects on indigenous biodiversity values within a significant natural area are applied in accordance with ECO-P1.</u>
Meridian Energy Limited	FS101.52	Part 2 / Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-P33	Oppose	Meridian considers Policy INF-ECO-P33 is appropriate and necessary, to provide for existing lawfully authorised infrastructure, so opposes its deletion. Meridian supports the proposed clause 2 (which requires adverse effects to be managed in accordance with Policy ECO-P1). The policy applies to existing infrastructure such that the locational considerations may not be relevant.	Amend / Amend provision to disallow requested deletion, but allow in part the requested amendments (clause 2).
Wellington International Airport Ltd	406.147	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-P33	Amend	Opposes INF-ECO-P33 [See paragraphs 4.49 to 4.54 of original submission for full reason]	Delete INF-ECO-P33 (Operation, maintenance and repair of existing infrastructure within a significant natural area) in its entirety.
Meridian Energy Limited	FS101.53	Part 2 / Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-P33	Oppose	Meridian considers Policy INF-ECO-P33 is appropriate and necessary, to provide for existing lawfully authorised infrastructure, so opposes its deletion. Meridian supports the proposed clause 2 (which requires adverse effects to be managed in accordance with Policy ECO-P1). The policy applies to existing infrastructure such that the locational considerations may not be relevant.	Amend / Amend provision to disallow requested deletion, but allow in part the requested amendments (clause 2).
KiwiRail Holdings Limited	408.65	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-P33	Support	Supports policy which provides for the operation, maintenance and repair of infrastructure within SNAs. KiwiRail note there are mapped Significant Natural Areas that include KiwiRail land. The SNAs as proposed, recognise established rail infrastructure and do not include existing structures or railway tracks but do cover KiwiRail land adjacent to infrastructure on the Johnsonville Line and at Hawkins Hill. KiwiRail therefore have an interest in these provisions.	Retain INF-ECO-P33 (Operation, maintenance and repair of existing infrastructure within a significant natural area) as notified.
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	99.50	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-P34	Oppose in part	INF-ECO-P34 incorrectly cross-refers to the effects management hierarchy in Policy ECO-P2. This needs to be amended to ECO-P1 where the hierarchy sits.	Amend Policy INF-ECO-P34 (Upgrades to and new infrastructure in significant natural areas) so the cross-reference to the effects management hierarchy is ECO-P1.
Meridian Energy Limited	FS101.54	Part 2 / Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-P34	Support	Meridian agrees the correct reference is to Policy P1.	Allow / Allow the requested amendment (replacing ECO-P2 with ECO-P1)

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Powerco Limited	127.32	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-P34	Oppose in part	Considers that this policy incorrectly cross-refers to the effects management hierarchy in Policy ECO-P2 (Appropriate vegetation removal in significant natural areas). This needs to be amended to ECO-P1 where the hierarchy sits.	Amend Policy INF-ECO-P34 (Upgrades to and new infrastructure in significant natural areas) as follows: Allow for upgrades to existing infrastructure and for new infrastructure within significant natural areas where it can be demonstrated that: 1. There is an operational need or functional need that means the infrastructure's location cannot be avoided; and 2. Any adverse effects on indigenous biodiversity values within a significant natural area are applied in accordance with ECO-P1, ECO-P2
Meridian Energy Limited	FS101.55	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-P34	Support	Meridian agrees the correct reference is to Policy P1.	Allow / Allow the requested amendment (replacing ECO-P2 with ECO-P1)
Royal Forest and Bird Protection Society	345.60	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-P34	Oppose in part	Supports the requirement that ECO P1 is met, although this should be expressed more clearly. We have made submissions about ECO-P1, and seek that those amendments are also given effect to via this policy. Opposes the inclusion of paragraph 1 in this policy, as it adds another standard that arguably will lessen the protections required to be given by ECO-P1. If it is to remain, we oppose the reference to operational need, as that encompasses a very broad range of considerations. We have sought that ECO P1 reference ECO P5. If that does not occur, ECO P5 will also need to be referenced in this policy. Notes that the reference to ECO-P2 in this policy should be ECO-P1.	Amend INF-ECO-P34 (Upgrades to and new infrastructure in significant natural areas): Consider allowing Allow for upgrades to existing infrastructure and for new infrastructure within significant natural areas <u>only</u> where it can be demonstrated that: 1. There is an operational need or functional need that means the infrastructure's location cannot be avoided; and 2. Any adverse effects on indigenous biodiversity values within a significant natural area are managed applied in accordance with ECO-P1 and ECO P5 .
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	FS25.13	Part 2 / Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-P34	Oppose	Operational need and functional need are relevant considerations to determine if infrastructure is appropriate insignificant natural areas, and accordingly should not be deleted from the policy.	Disallow
Powerco Limited	FS61.13	Part 2 / Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-P34	Oppose	Operational need and functional need are relevant considerations to determine if infrastructure is appropriate insignificant natural areas, and accordingly should not be deleted from the policy.	Disallow

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
KiwiRail Holdings Limited	FS72.34	Part 2 / District-Wide Matters / Energy, Infrastructure, and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-P34	Oppose	<p>Considers it appropriate to include operational and functional needs within this policy. These terms are well defined in relation to infrastructure activities and KiwiRail seeks that the needs of infrastructure are recognised and provided for in policy.</p> <p>Considers the relief sought should be declined because it a) will not promote the sustainable management of the natural and physical resources in Wellington City, and is therefore contrary to, or inconsistent with, Part 2 and other provisions of the RMA and the Amendment Act; (b) is inconsistent with other relevant planning documents, including the Greater Wellington Regional Policy Statement and National Policy Statement for Urban Development 2020; (c) will not meet the reasonably foreseeable needs of future generations; (d) will not avoid, remedy or mitigate actual and potential adverse effects on the environment; (e) will not enable the social, economic and cultural wellbeing of people of Wellington City; and (f) is not the most appropriate way to achieve the objectives of the Proposed Plan in terms of section 32 of the RMA.</p>	Disallow
Meridian Energy Limited	FS101.57	Part 2 / Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-P33	Support	Meridian agrees the correct reference is to Policies P1 and P5.	Allow / Allow the requested amendment (replacing ECO-P2 with ECO-P1 and ECO-P5)
Waka Kotahi	370.116	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-P34	Support	These provisions provide clear guidance in how to balance different interests where infrastructure overlaps with other areas and values.	Retain INF-ECO-P34 (Upgrades to and new infrastructure in significant natural areas) as notified.
Director-General of Conservation	385.30	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-P34	Support	Supports proposed policy INF-ECO-P34 (Upgrades to and new infrastructure in significant natural areas).	Retain policy INF-ECO-P34 (Upgrades to and new infrastructure in significant natural areas) as notified.
Wellington International Airport Ltd	406.148	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-P34	Oppose	<p>Opposes INF-ECO-P34</p> <p>[See paragraphs 4.50 to 4.55 of original submission for full reason]</p>	Opposes INF-ECO-P34 (Upgrades to and new infrastructure in significant natural areas as follows) and seeks amendment.
Wellington International Airport Ltd	406.149	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-P34	Amend	<p>Opposes INF-ECO-P34</p> <p>[See paragraphs 4.50 to 4.55 of original submission for full reason]</p>	Delete INF-ECO-P34 (Upgrades to and new infrastructure in significant natural areas as follows) in its entirety.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Wellington International Airport Ltd	406.150	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-P34	Amend	Opposes INF-ECO-P34 [See paragraphs 4.50 to 4.55 of original submission for full reason]	Amend INF-ECO-P34 (Upgrades to and new infrastructure in significant natural areas as follows): Allow for upgrades to existing infrastructure and for new infrastructure within significant natural areas where it can be demonstrated that: 1. There is an operational need or functional need that means the infrastructure's location cannot be <u>practicably</u> avoided; and 2. Any adverse effects on indigenous biodiversity values within a significant natural area are applied in accordance with ECO-P2 <u>ECO-P1</u> .
Meridian Energy Limited	FS101.56	Part 2 / Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-P34	Support	Meridian agrees the correct reference is to Policy P1.	Allow / Allow the requested amendment (replacing ECO-P2 with ECO-P1)
KiwiRail Holdings Limited	408.66	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-P34	Support	Supports policy to allow for upgrades to and new infrastructure in SNAs.	Retain INF-ECO-P34 (Upgrades to and new infrastructure in significant natural areas) as notified.
Transpower New Zealand Limited	315.112	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-P35	Amend	Considers that Transpower has existing assets within identified SNAs [see full submission for image supplied]. Transpower is required to undertake vegetation trimming/clearance necessary for the safe and efficient operation, maintenance, upgrading and development of the National Grid, including (but not limited to) trimming that may be required by the Electricity (Hazards from Trees) Regulations 2003. Related, is the operational requirement for clearance of vegetation on access tracks to enable Transpower to access the grid infrastructure to undertake its operation, maintenance and upgrade. Submitter considers the policy does not give effect to the NPS-ET. Considers the policy directive within INF-ECO-P35 that works "do not adversely affect the biodiversity values" does not give effect to the NPS-ET. Considers the policy is drafted such that all and any adverse effects are to be avoided. Considers that such a requirement is onerous given the policy relates to existing infrastructure which will often have safety requirements and obligations in respect of adjacent vegetation. Transpower seeks amendment to the policy to reflect the realities of maintaining the National Grid and ensuring safe and necessary vegetation clearance distances. (Option A) [Refer to original submission for full reason]	Amend policy INF-ECO-P35 (Operation, maintenance and repair of existing National Grid infrastructure within a significant natural area) as follows: Provide for the operation, maintenance, and repair <u>and minor upgrade of</u> existing transmission lines within significant natural areas where the activity, including associated earthworks, does not adversely affect the biodiversity values, while managing the adverse effects of these activities.
Royal Forest and Bird Protection Society	345.61	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-P35	Support	Supports the policy.	Retain INF-ECO-P35 (Operation, maintenance, and repair of existing National Grid Infrastructure with a significant natural area) as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Transpower New Zealand Limited	FS29.24	Part 2 / Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECOP35	Oppose	While Transpower supports the provision of a policy specific to the National Grid, in its submission Transpower seeks amendment to the policy to give effect to the NPSET and to ensure safe and necessary vegetation clearance distances.	Disallow / Seeks that submission is disallowed in part in so far as the relief sought is inconsistent with that sought in Transpower's submission.
Waka Kotahi	370.117	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-P35	Support	These provisions provide clear guidance in how to balance different interests where infrastructure overlaps with other areas and values.	Retain INF-ECO-P35 (Operation, maintenance and repair of existing National Grid infrastructure within a significant natural area) as notified.
Director-General of Conservation	385.31	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-P35	Support	Supports proposed policy INF-ECO-P35 (Operation, maintenance and repair of existing National Grid infrastructure within a significant natural area).	Retain policy INF-ECO-P35 (Operation, maintenance and repair of existing National Grid infrastructure within a significant natural area) as notified.
Transpower New Zealand Limited	315.113	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-P36	Oppose	Considers that Transpower has existing assets within identified SNA's and is required to provide a reliable and efficient transmission network. The SNA's across the city are extensive and cover both the open space and rural environments. The intent of the NPS-ET and NESETA is to provide a comprehensive regime for the National Grid recognising its national significance. Of relevance to the upgrading of the National Grid are policies 1-6. Considers that, as currently drafted, Transpower has concerns INF-ECO-P36 does not give effect to the NPS-ET. The cross references to the ECO hierarchy policy 2 (noting this cross reference appears an error and it should be ECO-P1) does not give effect to the NPS-ET. While Transpower is not outright opposed to the cross reference to the ECO policies, it has reservations that a direct cross reference to general policies will not reflect the nuanced approach that is required in order to give effect to the NPS-ET. Furthermore the cross reference to the effects management hierarchy is not appropriate for all maintenance activities given the necessity of the works. Transpower has proposed an amended policy approach to give effect to the NPS-ET. [Refer to original submission for full reason]	Opposes policy INF-ECO-P36 (Upgrading the National Grid within significant natural areas) and seeks amendment.
Transpower New Zealand Limited	315.114	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-P36	Amend	Considers that Transpower has existing assets within identified SNA's and is required to provide a reliable and efficient transmission network. The SNA's across the city are extensive and cover both the open space and rural environments. The intent of the NPS-ET and NESETA is to provide a comprehensive regime for the National Grid recognising its national significance. Of relevance to the upgrading of the National Grid are policies 1-6. Considers that, as currently drafted, Transpower has concerns INF-ECO-P36 does not give effect to the NPS-ET. The cross references to the ECO hierarchy policy 2 (noting this cross reference appears an error and it should be ECO-P1) does not give effect to the NPS-ET. While Transpower is not outright opposed to the cross reference to the ECO policies, it has reservations that a direct cross reference to general policies will not reflect the nuanced approach that is required in order to give effect to the NPS-ET. Furthermore the cross reference to the effects management hierarchy is not appropriate for all maintenance activities given the necessity of the works. Transpower has proposed an amended policy approach to give effect to the NPS-ET. [Refer to original submission for full reason]	Amend policy INF-ECO-P36 (Upgrading the National Grid within significant natural areas) as follows: INF-ECO-P36 Upgrading the National Grid within significant natural areas Provide for upgrading of the National Grid within significant natural areas by applying the effects management hierarchy in ECO-P2. <u>In providing for the upgrading of existing National Grid (NG) infrastructure within significant natural areas:</u> <u>1. Seek to avoid adverse effects on biodiversity values.</u> <u>2. When considering major upgrades, have regard to the extent to which adverse effects have been avoided, remedied or mitigated by the route, site and method selection;</u> <u>3. Recognise the constraints arising from the operational needs and functional needs of the National Grid, when considering measures to avoid, remedy or mitigate any adverse effects; and</u> <u>4. Recognise the potential benefits of upgrades to the National Grid to people and communities;</u>

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Royal Forest and Bird Protection Society	345.62	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-P36	Support	Notes incorrect reference to ECO-P2, considers ECO-P5 should also be referenced.	Amend INF-ECO-P36 (Upgrading the National Grid within significant natural areas): <u>Consider providing Provide for upgrading of the National Grid within significant natural areas <u>only</u> where it can be demonstrated that any adverse effects on indigenous biodiversity are managed in accordance with by applying the effects management hierarchy in ECO-P21 and ECO-P5.</u>
Transpower New Zealand Limited	FS29.25	Part 2 / Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECOP36	Oppose	While Transpower supports the provision of a policy specific to the National Grid, in its submission Transpower seeks amendment to the policy to give effect to the NPSET and to ensure safe and necessary vegetation clearance distances.	Disallow / Seeks that submission is disallowed in part in so far as the relief sought is inconsistent with that sought in Transpower's submission.
Waka Kotahi	370.118	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-P36	Support	These provisions provide clear guidance in how to balance different interests where infrastructure overlaps with other areas and values.	Retain INF-ECO-P36 (Upgrading the National Grid within significant natural areas) as notified.
Director-General of Conservation	385.32	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-P36	Support	Supports proposed policy INF-ECO-P36 (Upgrading the National Grid within significant natural areas).	Retain policy INF-ECO-P36 (Upgrading the National Grid within significant natural areas) as notified.
Transpower New Zealand Limited	315.115	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-P37	Oppose	The submitter does not oppose the identification of SNAs, but considers the policy approach has to be cognisant of the need to develop the National Grid and also give effect to the NPS-ET. Transpower proposes an amended policy approach specific to the National Grid [in general]. Considers that key to the approach is the recognition of the need to provide and enable the National Grid, whilst also providing a robust framework to manage effects. Specific to INF-ECO-P37, while Transpower accepts the policy does have regard to the route, site and method selection process, and operational needs, considers they apply in context of the policy chapeau to 'give priority to avoiding adverse effects'. Submitter queries how the term "give priority to avoiding adverse effects" would be implemented. Queries if this requires avoidance as the default position. Transpower's preference is for development within SNA's to be addressed in the specific National Grid development policy (within the INF chapter). Considers this would enable any new National Grid development to be considered in a comprehensive manner.	Delete INF-ECO-P37 (New development of National Grid within significant natural areas) in its entirety. [And add a new National Grid specific policy]
Royal Forest and Bird Protection Society	345.63	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-P37	Support in part	Notes incorrect reference to ECO-P2. Supports direction to give priority to avoiding adverse effects. Considers this policy confusing, as it covers different and potentially conflicting standards. Considers it would be simpler, and still meet the direction provided by the NPSET require adherence to ECO-P1, which contains an inherent consideration of the extent to which effects have been avoided, remedied or mitigated. Notes it is also subject to part 2, including the requirement to protect significant indigenous biodiversity under s6(c).	Amend INF-ECO-P37 (New development of National Grid within significant natural areas): Give priority to avoiding adverse effects of the National Grid on significant natural areas by applying the effects management hierarchy in ECO-P21 when located within significant natural areas, by: 1. Having regard to the extent to which adverse effects have been avoided, remedied or mitigated by the route, site and method selection and techniques and measures proposed; and 2. Considering the constraints arising from the operational needs and functional needs of the National Grid, when considering measures to avoid, remedy or mitigate any adverse effects.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Transpower New Zealand Limited	FS29.26	Part 2 / Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECOP37	Oppose	In its submission Transpower seeks deletion of reference to the National Grid within the rule given the NESETA prevails.	Disallow / Seeks that submission is disallowed in part in so far as the relief sought is inconsistent with that sought in Transpower's submission.
Greater Wellington Regional Council	351.94	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-P37	Amend	Considers the wording of this policy is inconsistent with the 'avoid, minimise, remedy' direction of the effects management hierarchy in ECO-P1 and should be amended to be consistent.	Amend INF-ECO-P37 (New development of National Grid within significant natural areas) to reference the effects management hierarchy and ensure consistency with the 'avoid, minimise, remedy' direction in ECO-P1 (Protection of significant natural areas).
Transpower New Zealand Limited	FS29.3	Part 2 / Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECOP37	Oppose	Oppose the submission in so far as it is inconsistent with the relief sought in the Transpower submission.	Disallow
Waka Kotahi	370.119	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-P37	Support	These provisions provide clear guidance in how to balance different interests where infrastructure overlaps with other areas and values.	Retain INF-ECO-P37 (New development of National Grid within significant natural areas) as notified.
Director-General of Conservation	385.33	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-P37	Support	Supports proposed policy INF-ECO-P37 (New development of National Grid within significant natural areas).	Retain policy INF-ECO-P37 (New development of National Grid within significant natural areas) as notified.
Royal Forest and Bird Protection Society	345.64	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-R41	Oppose in part	Notes INF-ECO-S19 provides for cutting new tracks up to 2.5m wide in SNAs. Considers this is not appropriate as a permitted activity, and does not give effect to INF-ECO P33. Seeks either deletion of this activity from INF-ECO-S19, or amend this Permitted activity rule. Considers that new tracks should be a RD activity. Notes INF-ECO-S20 is not clear as to whether it applies to earthworks for the maintenance of existing tracks, or for new tracks. Considers that new tracks should not be a Permitted activity as this does not give effect to INF-ECO P33. Considers that new tracks should be clearly excluded from being a Permitted activity.	Amend INF-ECO-R41 (Operation, maintenance, repair, and removal of existing infrastructure within a significant natural area) to exclude new tracks from being a Permitted activity. Add new sub-rule making new tracks a Restricted Discretionary activity.
Royal Forest and Bird Protection Society	345.65	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-R41	Oppose in part	Considers new tracks (vegetation trimming, removal and earthworks) for operation, maintenance repair and removal should be included in this RD activity rule. Considers this rule should not apply in the coastal environment where there are policy 11 (NZCPS) matters present. Seeks to amend the matters of discretion as they are considered too narrow to provide for proper consideration of biodiversity values, and do not give effect to INF-ECO P33. Considers this approach is out of step with the rest of the plan, which generally provides for matters of discretion that refer back to the relevant policies. Corresponding amendments to the assessment criteria for ECO-INF-S19 and ECO-INF-S20 have also been sought.	Amend INF-ECO-R41 (Operation, maintenance, repair, and removal of existing infrastructure within a significant natural area): 2. Activity status: Restricted Discretionary Where: a. Compliance with any of the requirements of INF-ECO-R41.1 cannot be achieved; and b. <u>The significant natural area does not contain any matters identified in Policy 11 of the New Zealand Coastal Policy Statement 2010 where located within the Coastal Environment.</u> Matters of discretion are: 1. <u>The matters in INF-ECO-P33 (or refer back to ECO P1)</u> 2. The extent and effect of non-compliance with any relevant standard not met as specified in the associated assessment criteria for the infringed standard.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Royal Forest and Bird Protection Society	345.66	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-R41	Amend	Seeks new rule to give effect to policy 11 of NZCPS.	Add new rule INF-ECO-R41.3 (Operation, maintenance, repair, and removal of existing infrastructure within a significant natural area): <u>6. Activity status: Non Complying</u> <u>Where:</u> <u>a. Compliance with the requirements of INF-ECO R41.1 cannot be achieved; and</u> <u>b. The significant natural area includes matters identified in Policy 11 of the New Zealand Coastal Policy Statement 2010 where located within the Coastal Environment.</u> <u>Section 88 information requirements for applications:</u> <u>Applications for activities within an identified significant natural area must provide, in addition to the standard information requirements, an ecological assessment in accordance with APP15:</u> <u>1. Identifying the indigenous biodiversity values and potential impacts from the proposal; and</u> <u>2. Demonstrating that ECO P5 (or refer to the new policy 11 policy sought above) has first been met, and the effects management hierarchy at ECO-P1 has been applied to other adverse effects.</u>
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	FS25.14	Part 2 / Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-R41	Oppose	Non-complying activity status for operation, maintenance, repair and removal of infrastructure from significant natural areas not meeting permitted activity standard is not supported. The current restricted discretionary activity status allows necessary work to be considered on its merits and level of effects.	Disallow
Powerco Limited	FS61.14	Part 2 / Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-P41	Oppose	Non-complying activity status for operation, maintenance, repair and removal of infrastructure from significant natural areas not meeting permitted activity standard is not supported. The current restricted discretionary activity status allows necessary work to be considered on its merits and level of effects.	Disallow
KiwiRail Holdings Limited	FS72.35	Part 2 / District-Wide Matters / Energy, Infrastructure, and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-R41	Oppose	Considers the restricted discretionary status is acceptable where requirements of INF-ECO-R41.1 cannot be met. Considers the relief sought should be declined because it a) will not promote the sustainable management of the natural and physical resources in Wellington City, and is therefore contrary to, or inconsistent with, Part 2 and other provisions of the RMA and the Amendment Act; (b) is inconsistent with other relevant planning documents, including the Greater Wellington Regional Policy Statement and National Policy Statement for Urban Development 2020; (c) will not meet the reasonably foreseeable needs of future generations; (d) will not avoid, remedy or mitigate actual and potential adverse effects on the environment; (e) will not enable the social, economic and cultural wellbeing of people of Wellington City; and (f) is not the most appropriate way to achieve the objectives of the Proposed Plan in terms of section 32 of the RMA.	Disallow
Meridian Energy Limited	FS101.58	Part 2 / Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-R41	Oppose	Meridian opposes the requested non-complying activity status. The rule is not necessary because, within SNAs, most infrastructure will require a consent to establish and the terms of the consent will manage effects on the values of the SNA of operation, maintenance and repair. Removal of infrastructure does not warrant noncomplying activity status. It is also relevant that this activity status has not been retained in the Natural and Built Environments Bill.	Disallow

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Waka Kotahi	370.120	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-R41	Support	These provisions provide clear guidance in how to balance different interests where infrastructure overlaps with other areas and values.	Retain INF-ECO-R41 (Operation, maintenance, repair and removal of existing infrastructure within a significant natural area) as notified.
KiwiRail Holdings Limited	408.67	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-R41	Support	Supports the ability to operate, maintain, repair and remove existing infrastructure within a SNA as a permitted activity, subject to standards.	Retain INF-ECO-R41 (Operation, maintenance, repair and removal of existing infrastructure within a significant natural area) as notified.
Royal Forest and Bird Protection Society	345.67	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-R42	Oppose in part	Considers it is unclear why the matters of discretion refer to the standards, as no standards appear to be relevant to the activity. Supports the matters of discretion referring back to INF-ECO-P33. Seeks that ECO-P1 is also referred to. If exemption suggested is accepted, then seeks that the rule become a Non-complying activity status for upgrading existing infrastructure.	Amend INF-ECO-R42 (Upgrades to existing infrastructure within a significant natural area): 1. Activity status: Restricted Discretionary Matters of discretion are: 1. The matters in INF-ECO-P33 and <u>ECO-P1</u> ; and 1. The extent and effect of non-compliance with any relevant standard not met as specified in the associated assessment criteria for the infringed standard. <u>Exemption: The significant natural area does not contain any matters identified in Policy 11 of the New Zealand Coastal Policy Statement 2010 where located within the Coastal Environment.</u> Add new rule INF-ECO-R42.2: <u>2. Activity status: Non Complying</u> <u>Where:</u> <u>1. The significant natural area includes matters identified in Policy 11 of the New Zealand Coastal Policy Statement 2010 where located within the Coastal Environment.</u> <u>Section 88 information requirements for applications:</u> <u>Applications for activities within an identified significant natural area must provide, in addition to the standard information requirements, an ecological assessment in accordance with APP15:</u> <u>1. Identifying the indigenous biodiversity values and potential impacts from the proposal; and</u> <u>2. Demonstrating that ECO P5 (or refer to the new policy 11 policy sought above) has first been met, and the effects management hierarchy at ECO-P1 has been applied to other adverse effects.</u>

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
KiwiRail Holdings Limited	FS72.36	Part 2 / District-Wide Matters / Energy, Infrastructure, and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-R42	Oppose	Considers the restricted discretionary status is acceptable for upgrades to existing infrastructure. Considers the relief sought should be declined because it a) will not promote the sustainable management of the natural and physical resources in Wellington City, and is therefore contrary to, or inconsistent with, Part 2 and other provisions of the RMA and the Amendment Act; (b) is inconsistent with other relevant planning documents, including the Greater Wellington Regional Policy Statement and National Policy Statement for Urban Development 2020; (c) will not meet the reasonably foreseeable needs of future generations; (d) will not avoid, remedy or mitigate actual and potential adverse effects on the environment; (e) will not enable the social, economic and cultural wellbeing of people of Wellington City; and (f) is not the most appropriate way to achieve the objectives of the Proposed Plan in terms of section 32 of the RMA.	Disallow
Meridian Energy Limited	FS101.59	Part 2 / Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-R42	Oppose	Meridian agrees that reference to Policy ECOP1 is appropriate but opposes the requested non-complying activity status.	Amend / Allow the correction of the reference to ECO-P1. Disallow the requested exemption and the proposed new non-complying activity rule.
Waka Kotahi	370.121	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-R42	Support	These provisions provide clear guidance in how to balance different interests where infrastructure overlaps with other areas and values.	Retain INF-ECO-R42 (Upgrades to existing infrastructure within a significant natural area) as notified.
KiwiRail Holdings Limited	408.68	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-R42	Support	Supports the ability to upgrade existing infrastructure as a restricted discretionary activity and construct new infrastructure as a discretionary activity within a SNA.	Retain INF-ECO-R42 (Upgrades to existing infrastructure within a significant natural area) as notified.
Royal Forest and Bird Protection Society	345.68	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-R43	Oppose	Considers this rule should have a non-complying activity status to give effect to S6(c) policy 11 NZCPS.	Amend INF-ECO-R43 (New infrastructure within a significant natural area): 1. Activity status: Discretionary <u>Non-complying</u>
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	FS25.16	Part 2 / Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-R43	Oppose	Non-complying activity status for new infrastructure in significant natural areas is not supported. This may be unavoidable in some circumstances due to functional need and operational need, and does not take into account the scale of any work and associated effects. It is important that infrastructure has a consent pathway in appropriate circumstances.	Disallow
Powerco Limited	FS61.16	Part 2 / Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-P43	Oppose	Non-complying activity status for new infrastructure in significant natural areas is not supported. This may be unavoidable in some circumstances due to functional need and operational need, and does not take into account the scale of any work and associated effects. It is important that infrastructure has a consent pathway in appropriate circumstances.	Disallow

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
KiwiRail Holdings Limited	FS72.37	Part 2 / District-Wide Matters / Energy, Infrastructure, and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-R43	Oppose	<p>Considers the discretionary status is acceptable for new infrastructure.</p> <p>Considers the relief sought should be declined because it a) will not promote the sustainable management of the natural and physical resources in Wellington City, and is therefore contrary to, or inconsistent with, Part 2 and other provisions of the RMA and the Amendment Act; (b) is inconsistent with other relevant planning documents, including the Greater Wellington Regional Policy Statement and National Policy Statement for Urban Development 2020; (c) will not meet the reasonably foreseeable needs of future generations; (d) will not avoid, remedy or mitigate actual and potential adverse effects on the environment; (e) will not enable the social, economic and cultural wellbeing of people of Wellington City; and (f) is not the most appropriate way to achieve the objectives of the Proposed Plan in terms of section 32 of the RMA.</p>	Disallow
Meridian Energy Limited	FS101.60	Part 2 / Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-R43	Oppose	Meridian opposes the requested non-complying activity status. The submission does not provide reasoning that supports non-complying activity status in terms of the requirements of s. 32AA of the RMA.	Disallow
Waka Kotahi	370.122	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-R43	Support	These provisions provide clear guidance in how to balance different interests where infrastructure overlaps with other areas and values.	Retain INF-ECO-R43 (New infrastructure within a significant natural area) as notified.
KiwiRail Holdings Limited	408.69	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-R43	Support	Supports the ability to upgrade existing infrastructure as a restricted discretionary activity and construct new infrastructure as a discretionary activity within a SNA.	Retain INF-ECO-R43 (New infrastructure within a significant natural area) as notified.
Transpower New Zealand Limited	315.116	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-R44	Oppose	<p>Considers that, specific to the National Grid, the NESETA manages the trimming, felling and removal of vegetation and earthworks, with the activity status under the NESETA determined by the provisions in the PDP. The NESETA provides for earthworks and trimming, felling or removal of any vegetation as permitted activities subject to conditions. Considers that the default activity status of Restricted discretionary under clause 3 does not reflect that provided under regulation 34 of the NESETA. Given the NESETA prevails, Transpower considers clause 1 of Rule R44 is not required as the control of earthworks within an SNA is managed under the NESETA. With respect to vegetation works, under Regulation 30 of the NESETA, resource consent is required under Regulation 31 (for a controlled activity) or Regulation 32 for a restricted discretionary activity) if:</p> <p>A. A rule prohibits or restricts the works (Reg 30(2)(a)); or</p> <p>B. The vegetation is in a "natural area" (a term defined in NESETA) (Reg 30(2)(b)). It is noted the standards within INF-ECO-S19 do not reflect that in the NESETA and therefore Transpower does not support them applying to the National Grid. The purpose of the NESETA is to provide a comprehensive, nationally consistent framework for existing National Grid Assets. Transpower opposes the imposition of rules to manage existing assets, noting those provided in Rule R44 do not reflect the NESETA. Considers the potential is for confusion over plan interpretation and implementation.</p> <p>[Refer to original submission for full reason]</p>	Opposes reference to the National Grid in INF-ECO-R44 (Operation, maintenance and repair of existing National Grid (NG) & Gas Transmission Pipeline Corridor (GTPC) infrastructure within a significant natural area).

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Transpower New Zealand Limited	315.117	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-R44	Amend	<p>Considers that, specific to the National Grid, the NESETA manages the trimming, felling and removal of vegetation and earthworks, with the activity status under the NESETA determined by the provisions in the PDP. The NESETA provides for earthworks and trimming, felling or removal of any vegetation as permitted activities subject to conditions. Considers that the default activity status of Restricted discretionary under clause 3 does not reflect that provided under regulation 34 of the NESETA. Given the NESETA prevails, Transpower considers clause 1 of Rule R44 is not required as the control of earthworks within an SNA is managed under the NESETA. With respect to vegetation works, under Regulation 30 of the NESETA, resource consent is required under Regulation 31 (for a controlled activity) or Regulation 32 for a restricted discretionary activity) if:</p> <p>A. A rule prohibits or restricts the works (Reg 30(2)(a)); or</p> <p>B. The vegetation is in a “natural area” (a term defined in NESETA) (Reg 30(2)(b)). It is noted the standards within INF-ECO-S19 do not reflect that in the NESETA and therefore Transpower does not support them applying to the National Grid. The purpose of the NESETA is to provide a comprehensive, nationally consistent framework for existing National Grid Assets. Transpower opposes the imposition of rules to manage existing assets, noting those provided in Rule R44 do not reflect the NESETA. Considers the potential is for confusion over plan interpretation and implementation.</p> <p>[Refer to original submission for full reason]</p>	Amend INF-ECO-R44 (Operation, maintenance and repair of existing National Grid (NG) & Gas Transmission Pipeline Corridor (GTPC) infrastructure within a significant natural area) by deleting reference to the National Grid from the rule.
Royal Forest and Bird Protection Society	345.69	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-R44	Oppose in part	<p>INF-ECO-S19 provides for cutting new tracks up to 2.5m wide in SNAs, which is not considered appropriate as a permitted activity, and does not give effect to INF-ECO P33. Seeks to either delete this activity from INF-ECO-S19, or amend this Permitted activity rule. Considers new tracks should be RD activity. INF-ECO-S20 is not clear as to whether it applies to earthworks for the maintenance of existing tracks, or for new tracks - considers new tracks should not be Permitted as this does not give effect to INF-ECO P33. Considers new tracks should be clearly excluded from this Permitted activity rule.</p>	Amend INF-ECO-R44 (Operation, maintenance and repair of existing National Grid (NG) & Gas Transmission Pipeline Corridor (GTPC) infrastructure within a significant natural area) to exclude new tracks from being a Permitted activity. Add new sub-rule making new tracks a Restricted Discretionary activity.
Transpower New Zealand Limited	FS29.27	Part 2 / Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECOR44	Oppose	<p>In its submission Transpower seeks deletion of reference to the National Grid within the rule given the NESETA prevails.</p>	Disallow / Seeks that submission is disallowed in part in so far as the relief sought is inconsistent with that sought in Transpower’s submission.
Royal Forest and Bird Protection Society	345.70	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-R44	Oppose in part	<p>Considers that if this activity is to remain controlled, it should have some parameters around it, for example how close the vegetation removal needs to be to the lines to still come within the controlled rule.</p>	Add additional matters of control to INF-ECO-R22.2 to include additional parameters, e.g. how close vegetation removal can be to the lines to come within the Controlled activity status.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Royal Forest and Bird Protection Society	345.71	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-R44	Oppose in part	INF-ECO-R44.3: Supports the matters of discretion referring back to INF-ECO-P33, and also seeks that ECO-P1 is referred to. Considers rule should include an exemption for SNA's not including matters listed in policy 11 of NZCPS. If exemption suggested is accepted, then seeks that the rule become a Non-complying activity status activities in SNA's with policy 11 matters.	<p>Amend INF-ECO-R44 (Operation, maintenance and repair of existing National Grid (NG) & Gas Transmission Pipeline Corridor (GTPC) infrastructure within a significant natural area):</p> <p>3. Activity status: Restricted Discretionary Where: a. Compliance with the requirements of INF-ECO-R44.1 or INF-ECO-R44.2 cannot be achieved. Matters of discretion are: 1. The extent and effect of non-compliance with any relevant standard not met as specified in the associated assessment criteria for the infringed standard; and 2. The matters in INF-ECO-P33 and ECO-P1. <u>Exemption: The significant natural area does not contain any matters identified in Policy 11 of the New Zealand Coastal Policy Statement 2010 where located within the Coastal Environment.</u></p> <p>Add new sub-rule INF-ECO-R44.4:</p> <p>4. Activity status: Non Complying Where: 1. The significant natural area includes matters identified in Policy 11 of the New Zealand Coastal Policy Statement 2010 where located within the Coastal Environment. <u>Section 88 information requirements for applications:</u> <u>Applications for activities within an identified significant natural area must provide, in addition to the standard information requirements, an ecological assessment in accordance with APP15:</u> 1. Identifying the indigenous biodiversity values and potential impacts from the proposal; and 2. Demonstrating that ECO P5 (or refer to the new policy 11 policy sought above) has first been met, and the effects management hierarchy at ECO-P1 has been applied to other adverse effects.</p>
Transpower New Zealand Limited	FS29.28	Part 2 / Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-R44	Oppose	In its submission Transpower seeks deletion of reference to the National Grid within the rule given the NESETA prevails.	Disallow
Transpower New Zealand Limited	315.118	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-R45	Oppose	Considers that, specific to the National Grid, the Resource Management (National Environmental Standards for Electricity Transmission Activities) Regulations 2009 ("NESETA") provides prevailing provisions for maintenance, reconductoring, increasing voltage, structure addition or replacement, and removal, for the National Grid, and on this basis, INF-ECO-R45 for existing National Grid structures captured by the NESETA is of limited relevance to Transpower in respect of rule application. It is noted the NESETA provides a Discretionary activity status under Regulations 39 of the NESETA for those activities subject to the NESETA but not otherwise captured under other regulations in the NESETA. The purpose of the NESETA is to provide a comprehensive, nationally consistent framework for existing National Grid Assets. Transpower opposes the imposition of rules to manage existing assets and instead seeks reliance on the NESETA.	Delete Rule INF-ECO-R45 (Upgrading of existing National Grid (NG) infrastructure within a significant natural area) in its entirety.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Royal Forest and Bird Protection Society	345.72	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-R45	Support in part	Supports matters of discretion referring to INF-ECO-P36 subject to the submission point made on that policy. Seeks that ECO-P1 also be referred to. If exemption suggested is accepted, then seeks that the rule become a Non-complying activity status for upgrading existing infrastructure.	<p>Amend INF-ECO-R45 (Upgrading of existing National Grid (NG) infrastructure within a significant natural area):</p> <p>1. Activity status: Restricted Discretionary Matters of discretion are: 1. The matters in INF-ECO-P36 and <u>ECO-P1</u>. <u>Exemption: The significant natural area does not contain any matters identified in Policy 11 of the New Zealand Coastal Policy Statement 2010 where located within the Coastal Environment.</u></p> <p>Add new sub-rule:</p> <p><u>2. Activity status: Non-complying</u> <u>Where:</u> <u>1. The significant natural area includes matters identified in Policy 11 of the New Zealand Coastal Policy Statement 2010 where located within the Coastal Environment.</u> <u>Section 88 information requirements for applications:</u> <u>Applications for activities within an identified significant natural area must provide, in addition to the standard information requirements, an ecological assessment in accordance with APP15:</u> <u>1. Identifying the indigenous biodiversity values and potential impacts from the proposal; and</u> <u>2. Demonstrating that ECO P5 (or refer to the new policy 11 policy sought above) has first been met, and the effects management hierarchy at ECO-P1 has been applied to other adverse effects.</u></p>
Transpower New Zealand Limited	FS29.29	Part 2 / Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-R45	Oppose	In its submission Transpower seeks deletion of reference to the National Grid within the rule given the NESETA prevails.	Disallow

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Royal Forest and Bird Protection Society	345.73	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-R46	Support in part	Supports the matters of discretion referring back to INF-ECO-P39, subject to amendments sought on that policy. Seek that ECO-P1 is also referred to. Should include exemption for activities in SNAs not containing any policy 11 matters. Seeks to add subsequent Non-complying activity status rule for activities in breach of this exemption.	Amend INF-ECO-R46 (Upgrading existing gas transmission pipeline corridor within a significant natural area): 1. Activity status: Restricted Discretionary Where: a. The infrastructure is located underground; or b. The infrastructure is located within an existing road reserve. <u>Exemption: he significant natural area does not contain any matters identified in Policy 11 of the New Zealand Coastal Policy Statement 2010 where located within the Coastal Environment.</u> Matters of discretion are: The matters in INF-ECO-P36 and ECO-P1. <u>Add new sub-rule INF-ECO-R46.X:</u> <u>Activity status: Non Complying</u> <u>Where:</u> <u>1. The significant natural area includes matters identified in Policy 11 of the New Zealand Coastal Policy Statement 2010 where located within the Coastal Environment.</u> <u>Section 88 information requirements for applications:</u> <u>Applications for activities within an identified significant natural area must provide, in addition to the standard information requirements, an ecological assessment in accordance with APP15:</u> <u>1. Identifying the indigenous biodiversity values and potential impacts from the proposal; and</u> <u>2. Demonstrating that ECO P5 (or refer to the new policy 11 policy sought above) has first been met, and the effects management hierarchy at ECO-P1 has been applied to other adverse effects.</u>
Royal Forest and Bird Protection Society	345.74	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-R46	Oppose in part	Considers the activity should be non-complying.	Amend INF-ECO-R46 (Upgrading existing gas transmission pipeline corridor within a significant natural area): 2. Activity status: Discretionary <u>Non-complying</u> Where: Compliance with any of the requirements of INF-ECO-R46.1 cannot be achieved.
Transpower New Zealand Limited	315.119	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-R47	Support	Considers the activity status and associated policies provide an appropriate framework in which to manage the National Grid.	Retain INF-ECO-R47 (New National Grid (NG) & Gas Transmission Pipeline Corridor (GTPC) infrastructure within a significant natural area) as notified.
Royal Forest and Bird Protection Society	345.75	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-R47	Oppose in part	Considers this rule should have a non-complying activity status.	Amend INF-ECO-R47 (New National Grid (NG) & Gas Transmission Pipeline Corridor (GTPC) infrastructure within a significant natural area): 1. Activity status: Discretionary <u>Non-complying</u>
Transpower New Zealand Limited	FS29.30	Part 2 / Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-R47	Oppose	Transpower supports the discretionary activity status. The activity status and associated policies provide an appropriate framework in which to manage the National Grid, and a non-complying activity status would not give effect to the NPSET (particularly Policies 2, 3 and 8).	Disallow

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Fire and Emergency New Zealand	273.42	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-S19	Support in part	Considers that a new assessment matter should be added in order to ensure that fire risk mitigation is taken into account when assessing applications to trim or remove indigenous vegetation in areas subject to high fire risk.	Amend INF-ECO-S19 (Trimming or removal of indigenous vegetation or trees within a significant natural area), with amendment.
Fire and Emergency New Zealand	273.43	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-S19	Amend	Considers that a new assessment matter should be added in order to ensure that fire risk mitigation is taken into account when assessing applications to trim or remove indigenous vegetation in areas subject to high fire risk.	Amend INF-ECO-S19 (Trimming or removal of indigenous vegetation or trees within a significant natural area) as follows: Assessment criteria: ... <u>3. The degree to which the trimming or removal of affected vegetation will provide for the health and safety of people, property, and the environment through the management of fire risk.</u>
Royal Forest and Bird Protection Society	345.76	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-S19	Oppose in part	Considers the width in paragraph 1 should be limited to 2m to accommodate an existing track. Opposes new tracks being a Permitted activity. Replace assessment criteria with that listed under ECO-S1 to give effect to INF-ECO-P33.	Amend INF-ECO-S19 (Trimming or removal of indigenous vegetation or trees within a significant natural area): <u>1. Trimming or removal of indigenous vegetation or trees within a significant natural area must be limited to 2m within the footprint of existing infrastructure, access tracks or fences to accommodate an existing track.</u> Assessment criteria: 1. Operational or functional needs of infrastructure; and 2. The effect of the activity and removal on the identified biodiversity values of the significant natural area and the measures taken to avoid, minimise or remedy the effects and where relevant the ability to offset biodiversity impacts. <u>1. The extent to which the trimming or removal of indigenous vegetation limits the loss, damage or disruption to the ecological processes, functions and integrity of the significant natural area; and</u> <u>2. The effect of the vegetation removal on the identified biodiversity values.</u>
Transpower New Zealand Limited	FS29.31	Part 2 / Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECOS19	Oppose	On the basis INF-ECO-R44 is to be amended so it does not apply to the National Grid, Standard S19 will not be applicable to the National Grid. If the intent is for S19 to apply to the National Grid Transpower opposes its application as the NESETA manages vegetation works for existing National Grid infrastructure and the provision of a standard to apply to the National Grid adds unnecessary confusion and interpretation issues.	Disallow / Seeks that submission is disallowed in part in so far as the relief sought is inconsistent with that sought in Transpower's submission.
Meridian Energy Limited	FS101.61	Part 2 / Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-S19	Oppose	Considers that the subject matter of the requested amendments is addressed already by the wording of the standard as notified. The requested amendments are unnecessary.	Disallow
Greater Wellington Regional Council	351.95	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-S19	Amend	Considers that Policy 24 of the RPS directs councils to protect indigenous ecosystems and habitats with significant indigenous biodiversity values. The 'identified' qualifier limits the consideration of effects to those values identified within the SNA at the time of plan notification. The values of most SNAs have been identified only at a high-level, and often only through desktop analysis. The assessment required to identify the scope of effects may identify additional values and this should be part of the consideration of effects at the time consent is applied for.	Seeks to amend wording to remove 'identified' before 'significant biodiversity values' when referring to adverse effects caused by activities or maintenance of biodiversity values.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Meridian Energy Limited	FS101.62	Part 2 / Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-S19	Oppose	Considers that the values of concern should be those that have been identified as the reason for identification of the area as significant. Broadening the consideration to all values, as proposed by the submission, will create uncertainty and potential unwarranted costs for applicants for consents.	Disallow / Disallow the requested deletion of 'identified'.
Wellington City Council Environmental Reference Group	FS112.6	Part 2 /Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity /INF-ECO-S19	Support	Support the proposal from GWRC to remove 'identified' before 'significant biodiversity values'. We agree with them that the assessment required to identify the scope of effects may identify additional values, and this should be part of the consideration of effects at the time consent is applied for.	Allow
Greater Wellington Regional Council	351.96	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-S19	Amend	Vegetation trimming standards and rules should be amended so that they also apply to both indigenous and non-indigenous vegetation. This would make it clear that all vegetation (aside from pest plants) is to be protected in these areas, except where otherwise specified for restoration or other purposes. Any non-indigenous plants within SNAs that are not pest plants may provide significant habitat for indigenous biodiversity such as birds, bats and lizards. This understanding is recognised in section 6(c) of the Act which directs the protection of the "significant habitats of indigenous fauna" not the significant indigenous habitats of indigenous fauna.	Seeks to amend standard (where relevant) to change 'indigenous vegetation' to 'vegetation'.
Wellington Electricity Lines Limited	355.47	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-S19	Support	Supports INF-ECO-S19 for its aspirations to protect and enhance the City's SNA. Notwithstanding this support, it is considered appropriate to enable the continued safe and efficient operation of electricity lines though the provisions of the Electricity (Hazards from Trees) Regulations 2003 or the Telecommunications Act 2001.	Retain INF-ECO-S19 (Trimming or removal of indigenous vegetation or trees within a significant natural area) as notified.
Waka Kotahi	370.123	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-S19	Support	These provisions provide clear guidance in how to balance different interests where infrastructure overlaps with other areas and values.	Retain INF-ECO-S19 (Trimming or removal of indigenous vegetation or trees within a significant natural area) as notified.
KiwiRail Holdings Limited	408.70	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-S19	Amend	Supports a standard for trimming or removing indigenous vegetation within a SNA. However, KiwiRail request the limit for this be increased to 5m within the footprint of existing infrastructure. KiwiRail typically clear vegetation within 5m of railway tracks as part of routine corridor maintenance throughout the country. This is the optimum clearance distance to ensure the rail network can operate safely and efficiently.	Amend INF-ECO-S19 (Trimming or removal of indigenous vegetation or trees within a significant natural area) as follows: 1. Trimming or removal of indigenous vegetation or trees within a significant natural area must be limited to 5m <u>5m</u> within the footprint of existing infrastructure, access tracks or fences.
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	99.51	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-S20	Oppose	INF-ECO-S20 should be amended to at least provide a nominal allowance for other infrastructure that may require some localised earthworks in significant natural areas (e.g. for maintenance and upgrading). The provision provides for 50m3 of earthworks per transmission line support structure as a permitted activity and is otherwise consistent with the Resource Management (National Environmental Standards for Electricity Transmission Line Activities) Regulations 2009. The Auckland Unitary Plan for example provides for 5m3 of earthworks in significant natural areas for infrastructure works.	Amend INF-ECO-S20 (Earthworks within a significant natural area) as follows: 1. Earthworks within a significant natural area must not exceed: a. More than 50m3 per transmission line support structure; or b. More than 5m3 for other infrastructure; or <u>More than 5m3 for other infrastructure; or</u> 100m3 per access track.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Wellington Electricity Lines Limited (WELL)	FS27.2	Part 2 / Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-S20	Support	WELL support this submission point to the extent that a permitted earthworks quantum should be provided for infrastructure located within SNAs. Similar to the submitter, WELL own and operate linear infrastructure that, through functional need, traverse SNAs. So as to enable the continued operation and maintenance of such infrastructure, a permitted activity standard for soil disturbing activities is considered appropriate in the PDP. WELL note that a 50m3 quantum has been sought for transmission line support structures; however, a 5m3 volume for pole structures is also supported as per the submission point.	Allow
Powerco Limited	127.33	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-S20	Oppose	Considers that whilst this is consistent with the Resource Management (National Environmental Standards for Electricity Transmission Line Activities) Regulations 2009, there should be at least a nominal allowance for other infrastructure that may require some localised earthworks in significant natural areas (e.g. for maintenance and upgrading). The Auckland Unitary Plan for example provides for 5m3 of earthworks in significant natural areas for infrastructure works.	Amend standard INF-ECO-S20 (Earthworks within a significant natural area) as follows: 1. Earthworks within a significant natural area must not exceed: a. More than 50m3 per transmission line support structure; or b. More than 5m3 for other infrastructure; or b. c. 100m3 per access track.
Wellington Electricity Lines Limited (WELL)	FS27.14	Part 2 / Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-S20	Support	WELL support this submission point to the extent that a permitted earthworks quantum should be provided for infrastructure located within SNAs. Similar to the submitter, WELL own and operate linear infrastructure that, through functional need, traverse or are located within SNAs. So as to enable the continued operation and maintenance of such infrastructure, a permitted activity standard for soil disturbing activities is considered appropriate in the PDP. WELL note that a 50m3 quantum has been sought for transmission line support structures; however, a 5m3 volume for pole structures is also supported as per the submission point.	Allow
Royal Forest and Bird Protection Society	345.77	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-S20	Oppose in part	Considers that this should be limited to maintenance of existing tracks if it is to be a Permitted activity. Replace assessment criteria with that listed under ECO-S1 to give effect to INF-ECO-P33.	Amend INF-ECO-S20 (Earthworks within a significant natural area): 1. Earthworks within a significant natural area must <u>be limited to maintenance of existing tracks. not exceed:</u> More than 50m3 per transmission line support structure; or 100m3 per access track. Assessment criteria: 1. Operational or functional needs of infrastructure; and 2. The effect of the activity and removal on the identified biodiversity values of the significant natural area and the measures taken to avoid, minimise or remedy the effects and where relevant the ability to offset biodiversity impacts. <u>1. The extent to which the earthworks limits the loss, damage or disruption to the ecological processes, functions and integrity of the significant natural area; and</u> <u>2. The effect of the earthworks on the identified biodiversity values.</u>
Transpower New Zealand Limited	FS29.32	Part 2 / Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECOS20	Oppose	On the basis INF-ECO-R44 is to be amended so it does not apply to the National Grid, Standard S20 will not be applicable to the National Grid. If the intent is for S20 to apply to the National Grid Transpower opposes its application as it duplicates the NESETA and adds unnecessary confusion and interpretation issues.	Disallow / Seeks that submission is disallowed in part in so far as the relief sought is inconsistent with that sought in Transpower's submission.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
KiwiRail Holdings Limited	FS72.38	Part 2 / District-Wide Matters / Energy, Infrastructure, and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-S20	Oppose	<p>Considers that it is appropriate to provide for earthworks as a permitted activity subject to standards and this shouldn't be limited to access tracks only. KiwiRail also seeks the retention of the assessment criteria as proposed which recognises the operational or functional needs of infrastructure.</p> <p>Considers the relief sought should be declined because it a) will not promote the sustainable management of the natural and physical resources in Wellington City, and is therefore contrary to, or inconsistent with, Part 2 and other provisions of the RMA and the Amendment Act; (b) is inconsistent with other relevant planning documents, including the Greater Wellington Regional Policy Statement and National Policy Statement for Urban Development 2020; (c) will not meet the reasonably foreseeable needs of future generations; (d) will not avoid, remedy or mitigate actual and potential adverse effects on the environment; (e) will not enable the social, economic and cultural wellbeing of people of Wellington City; and (f) is not the most appropriate way to achieve the objectives of the Proposed Plan in terms of section 32 of the RMA.</p>	Disallow
Meridian Energy Limited	FS101.63	Part 2 / Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-S20	Oppose	Considers that the standards are very restrictive, limiting the potential for adverse effects to minor, and ensuring that earthworks with the potential for adverse effects more than minor will require consent. The requested amendments are not necessary.	Disallow
Greater Wellington Regional Council	351.97	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-S20	Amend	Considers that Policy 24 of the RPS directs councils to protect indigenous ecosystems and habitats with significant indigenous biodiversity values. The 'identified' qualifier limits the consideration of effects to those values identified within the SNA at the time of plan notification. The values of most SNAs have been identified only at a high-level, and often only through desktop analysis. The assessment required to identify the scope of effects may identify additional values and this should be part of the consideration of effects at the time consent is applied for.	Seeks to amend wording to remove 'identified' before 'significant biodiversity values' when referring to adverse effects caused by activities or maintenance of biodiversity values.
Meridian Energy Limited	FS101.64	Part 2 / Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-S19	Oppose	Considers that the values of concern should be those that have been identified for the SNA as the reason why the area is significant.	Disallow / Disallow the requested deletion of 'identified'.
Wellington City Council Environmental Reference Group	FS112.7	Part 2 / Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-S20	Support	Support the proposal from GWRC to remove 'identified' before 'significant biodiversity values'. Agree with them that the assessment required to identify the scope of effects may identify additional values and this should be part of the consideration of effects at the time consent is applied for.	Allow
Wellington Electricity Lines Limited	355.48	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-S20	Support in part	<p>Supports INF-ECO-S20 as it provides stricter earthworks parameters for infrastructure within a demonstrable SNA.</p> <p>Considers that sub-clause b should be amended so as not to only apply to 'transmission'. [Submitter refers to sub-clause b, but requests amendment in sub-clause a]</p>	Retain INF-ECO-S20 (Earthworks within a significant natural area) with amendment.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Wellington Electricity Lines Limited	355.49	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-S20	Amend	Considers that INF-ECO-S20 should be amended so sub-clause a does not only apply to 'transmission'. [Submitter refers to sub-clause b, but requests amendment in sub-clause a]	Amend INF-ECO-S20 (Earthworks within a significant natural area) as follows: <ol style="list-style-type: none"> 1. Earthworks within a significant natural area must not exceed: <ol style="list-style-type: none"> a. More than 50m3 per transmission electricity line support structure; or b. 100m3 per access track.
Waka Kotahi	370.124	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-S20	Support	These provisions provide clear guidance in how to balance different interests where infrastructure overlaps with other areas and values.	Retain INF-ECO-S20 (Earthworks within a significant natural area) as notified.
KiwiRail Holdings Limited	408.71	Energy Infrastructure and Transport / Infrastructure Ecosystems and Biodiversity / INF-ECO-S20	Support	Supports a standard for earthworks within a SNA, noting 100m3 per access track is permitted by this standard.	Retain INF-ECO-S20 (Earthworks within a significant natural area) as notified.
John Tiley	142.5	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / General INF-NFL	Amend	<p>Considers that the Northern Reserves Management Plan 2008 (NRMP) reflects and guides how the Council values its landscape features including the approach to protection. [Inferred reason provided].</p> <p>The PDP facilitates development as a priority instead of protecting ridgelines, setting aside any adverse effects which harm community and amenity values.</p> <p>The NRMP adopts a philosophy that ridgelines, and associated open spaces, are significantly important to communities and the landscape must be protected accordingly. Continuing this approach would be consistent with precepts set out by Council over the last twenty years.</p> <p>Any protections provided are couched in terms of development effects being mitigated, minimised, remedied, minor, or carefully designed and managed. All these terms are subjective and fail to address the harm done by any intrusion on a ridgeline.</p> <p>As the city continues to grow, landscape values on a local and community scale assume greater importance to many without easy access to open space and the enjoyment of views of preserved areas such as the Town Belt and Outer Green Belt. Ridgelines across the city must enjoy protection to benefit their respective communities.</p> <p>[Refer to original submission for full reasons].</p>	Seeks that all city ridgelines remain free of any development.
Roseneath Residents' Association	FS49.2	Part 2 / Natural and Environmental Values / Natural Features and Landscapes / General NFL	Support	<p>Supports Mr Tiley's submission about the importance of these listed ridgelines to Wellington's landscape, environment, and liveability. Mount Victoria ridgeline is one of the identified ridgelines in the Proposed District Plan, as it is also in the Operative District Plan. The submitter seeks that number 22 Alexandra Road must remain within the identified Mount Victoria Ridgeline as it is in the Operative Plan, rather than be removed from it as is proposed under the Proposed District Plan. The submitter also considers that the intention to remain relatively undeveloped as a crucially important ridgeline should be achieved by retaining the Operative District Plan Open Space zoning rather than rezoning to Residential as is proposed in the Proposed District Plan.</p> <p>[Inferred reference to submission point 142.5]</p>	Allow / Seeks that that number 22 Alexandra Road retains the Open Space zoning and Ridgeline and Hilltops protection status as it is in the Operative District Plan.

Matthew Wells, Adelina Reis and Sarah Rennie	FS50.2	Part 2 / Natural and Environmental Values / Natural Features and Landscapes / General NFL	Support	<p>Supports Mr Tiley's submission about the importance of these listed ridgelines to Wellington's landscape, environment, and liveability. Mount Victoria ridgeline is one of the identified ridgelines in the Proposed District Plan, as it is also in the Operative District Plan. The submitter seeks that number 22 Alexandra Road must remain within the identified Mount Victoria Ridgeline as it is in the Operative Plan, rather than be removed from it as is proposed under the Proposed District Plan. The submitter also considers that the intention to remain relatively undeveloped as a crucially important ridgeline should be achieved by retaining the Operative District Plan Open Space zoning rather than rezoning to Residential as is proposed in the Proposed District Plan.</p> <p>[Inferred reference to submission point 142.5]</p> <p>[Refer to further submission for full reason]</p>	Allow / Seeks that number 22 Alexandra Road retains the Open Space zoning and Ridgeline and Hilltops protection status as it is in the Operative District Plan.
Wellington Civic Trust	FS83.74	Part 2 / Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / General INF-NFL	Support	The submissions identify the need for greater clarity and better protection in the Plan for the city's identified ridgelines and hilltops. Wellington Civic Trust supports these points	Allow
Andy Foster	FS86.27	Part 2 / Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / General INF-NFL	Oppose	<p>Supports Glenside Progressive Association's submission regarding the protection of Ridgelines citywide.</p> <p>[See original Further Submission for full reasoning].</p> <p>[Inferred reference to submission 142.5].</p>	Allow
Meridian Energy Limited	FS101.65	Part 2 / Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / General INF-NFL	Oppose	Considers that some ridgelines in the rural area feature lawfully established wind turbines and wind farm infrastructure. Their presence should be acknowledged. The aim of being 'free of any development' is unachievable and not relevant for those situations.	Disallow / Disallow the request in relation to existing built development within ridgeline overlays.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Churton Park Community Association	189.5	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / General INF-NFL	Amend	<p>Considers that the Northern Reserves Management Plan 2008 (NRMP) reflects and guides how the Council values its landscape features including the approach to protection. [Inferred reason provided].</p> <p>Considers that the PDP facilitates development as a priority instead of protecting ridgelines, setting aside any adverse effects which harm community and amenity values.</p> <p>The NRMP adopts a philosophy that ridgelines, and associated open spaces, are significantly important to communities and the landscape must be protected accordingly. Continuing this approach would be consistent with precepts set out by Council over the last twenty years.</p> <p>Any protections provided are couched in terms of development effects being mitigated, minimised, remedied, minor, or carefully designed and managed. All these terms are subjective and fail to address the harm done by any intrusion on a ridgeline.</p> <p>As the city continues to grow, landscape values on a local and community scale assume greater importance to many without easy access to open space and the enjoyment of views of preserved areas such as the Town Belt and Outer Green Belt. Ridgelines across the city must enjoy protection to benefit their respective communities.</p> <p>[Refer to original submission for full reasons].</p>	Seeks that all city ridgelines remain free of any development.
Roseneath Residents' Association	FS49.4	Part 2 / Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / General INF-NFL	Support	<p>Supports submission 189 in seeking to change the Proposed District Plan to more fully protect and enhance the City's natural landscapes including Outstanding Natural Landscapes, Special Amenity Landscapes and Ridgelines and Hilltops, and request that all the CPCA proposals are adopted. It is the view of the submitter that the only new activities to be allowed in these areas should be those essential pieces of infrastructure that cannot be located anywhere else. Housing development should not be allowed.</p> <p>[Inferred reference to submission point 189.5]</p>	Allow
Matthew Wells, Adelina Reis and Sarah Rennie	FS50.11	Part 2 / Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / General INF-NFL	Support	<p>Supports submission 189 in seeking to change the Proposed District Plan to more fully protect and enhance the City's natural landscapes including Outstanding Natural Landscapes, Special Amenity Landscapes and Ridgelines and Hilltops, and request that all the CPCA proposals are adopted. It is our strong view that the only new activities to be allowed in these areas should be those essential pieces of infrastructure that cannot be located anywhere else. Housing development should not be allowed.</p> <p>[Inferred reference to submission point 189.5]</p>	Allow
Andy Foster	FS86.38	Part 2 / Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / General INF-NFL	Oppose	<p>Supports Glenside Progressive Association's submission regarding the protection of Ridgelines citywide.</p> <p>[See original Further Submission for full reasoning].</p> <p>[Inferred reference to submission 189.5].</p>	Allow
Meridian Energy Limited	FS101.66	Part 2 / Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / General INF-NFL	Oppose	<p>Considers that some ridgelines in the rural area feature lawfully established wind turbines and wind farm infrastructure. Their presence should be acknowledged. The aim of being 'free of any development' is unachievable and not relevant for those situations.</p>	Disallow / Disallow the request in relation to existing built development within ridgeline overlays.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Meridian Energy Limited	228.29	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / General INF-NFL	Oppose in part	<p>Considers the Introduction to the INF-NFL chapter should include, under the heading 'Other relevant District Plan provisions', a statement that seeks to clarify the interaction between the INF-NFL chapter and other Plan chapters.</p> <p>Meridian understood the intention of the Plan to be that the rules for renewable electricity generation activities, structures and buildings would be wholly contained in the REG chapter. Meridian supports this approach. Considers the note in the preamble is not entirely helpful in clarifying this. Meridian accepts that the objectives and policies of the NFL Natural Features and Landscapes chapter are applicable to renewable electricity generation activities. However, considers the standards listed for general infrastructure activities in the INF-NFL chapter are entirely inappropriate for renewable electricity generation activities and structures and should not be construed as a 'permitted baseline' for renewable electricity generation activities there, and particularly not for existing wind farms.</p>	Retain the preamble to Chapter INF-NFL Infrastructure Natural Features and Landscapes with amendment.
Meridian Energy Limited	228.30	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / General INF-NFL	Amend	<p>Considers the Introduction to the INF-NFL chapter should include, under the heading 'Other relevant District Plan provisions', a statement that seeks to clarify the interaction between the INF-NFL chapter and other Plan chapters.</p> <p>Meridian understood the intention of the Plan to be that the rules for renewable electricity generation activities, structures and buildings would be wholly contained in the REG chapter. Meridian supports this approach. Considers the note in the preamble is not entirely helpful in clarifying this. Meridian accepts that the objectives and policies of the NFL Natural Features and Landscapes chapter are applicable to renewable electricity generation activities. However, considers the standards listed for general infrastructure activities in the INF-NFL chapter are entirely inappropriate for renewable electricity generation activities and structures and should not be construed as a 'permitted baseline' for renewable electricity generation activities there, and particularly not for existing wind farms.</p>	<p>Amend the preamble to Chapter INF-NFL Infrastructure Natural Features and Landscapes, under the heading 'Other relevant District Plan provisions', by inserting the following (or similar) clarification note:</p> <p><u>The rules applicable to renewable electricity generation activities in the coastal environment are contained in Chapter REG Renewable Electricity Generation. The rules in Chapter INF-NFL Natural Features and Landscapes do not apply to renewable electricity generation activities.</u></p>
Transpower New Zealand Limited	315.120	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / General INF-NFL	Amend	As a general comment, Transpower notes there are ten policies within the INF-NFL sub-chapter that are exclusive to the National Grid and the Gas Transmission Pipeline Corridor. Considers the number of policies is excessive and they could be rationalised.	Seeks to rationalise the number of policies in the Infrastructure - Natural Features and Landscapes (INF-NFL) chapter specific to the National Grid in the form of a revised set of National Grid specific policies.
Transpower New Zealand Limited	315.121	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / General INF-NFL	Amend	Supports the introductory text to the INF-NFL chapter but seeks clarification that the National Grid is subject to specific policies and rules (P51 – P60 and R53. R54, R56 and R57) and the general sub-chapter provisions do not apply.	<p>Amend the introduction the Infrastructure - Natural Features and Landscapes chapter as follows:</p> <p>This sub-chapter applies to infrastructure within Natural Features and Landscape Overlays. It applies in addition to the principal Infrastructure Chapter.</p> <p><u>Included within the sub-chapter are provisions specific to the National Grid (NG) and Gas Transmission Pipelines Corridor (GTPC). For the avoidance of doubt, other sub-chapter policies and rules within this sub-chapter do not apply to the National Grid.</u></p> <p>Note: The objectives of the Infrastructure Chapter apply.</p>
Royal Forest and Bird Protection Society	345.78	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / General INF-NFL	Not specified	Considers that the provisions for this chapter should be no less protective than those in the Natural Features and Landscape chapter. The provisions (objectives, policies and rules) in this chapter should mirror the Natural Features and Landscape provisions, with the amendments made as sought by Forest & Bird in respect of that chapter.	Amend the chapter to mirror the Natural Features and Landscapes, and be as protective as that chapter.

Transpower New Zealand Limited	315.122	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / New INF-NFL	Amend	<p>The policy approach is supported and considers it gives effect to Policies 2 and 5 of the NPS-ET.</p> <p>Considers that, notwithstanding the policy support, given the wider issues with how the policy framework within the INF-NFL chapter gives effect to the NPS-ET, Transpower seeks an amended policy framework specific to the National Grid that address all the natural environment overlays. Reference is also sought to include minor upgrade within the policy to reflect the permitted activity status for minor upgrade works within the NESETA and enabling policy framework within the NPS-ET.</p>	<p>Option 1: Seeks to add a new policy as follows:</p> <p><u>NF-NFL-X Operation, maintenance, repair and minor upgrade of existing National Grid (NG) infrastructure within identified ridgelines and hilltops, special amenity landscapes, and outstanding natural features and outstanding landscapes (including within the coastal environment).</u></p> <p><u>Allow for the operation, maintenance, repair and minor upgrade of existing National Grid (NG) infrastructure within identified ridgelines and hilltops, special amenity landscapes, and outstanding natural features and outstanding landscapes (including within the coastal environment), while managing the adverse effects of these activities.</u></p>
Transpower New Zealand Limited	315.123	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / New INF-NFL	Amend	<p>The policy approach is supported and considers it gives effect to Policies 2 and 5 of the NPS-ET.</p> <p>Considers that, notwithstanding the policy support, given the wider issues with how the policy framework within the INF-NFL chapter gives effect to the NPS-ET, Transpower seeks an amended policy framework specific to the National Grid that address all the natural environment overlays. Reference is also sought to include minor upgrade within the policy to reflect the permitted activity status for minor upgrade works within the NESETA and enabling policy framework within the NPS-ET.</p>	<p>Option 2: Seeks to add a new National Grid specific policy as follows:</p> <p><u>INF-NG-P2 Operation, and maintenance and minor upgrade of the National Grid</u></p> <p><u>Provide for the operation, maintenance and minor upgrade of the National Grid while managing the adverse effects of these activities</u></p>
Transpower New Zealand Limited	315.124	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / New INF-NFL	Amend	<p>Transpower has existing assets within identified areas of significant amenity landscapes. Considers the activity status for upgrades is regulated by the NESETA. Supports that component of the policy to “provide for the upgrading of existing National Grid infrastructure” on the basis it gives effect to the NPS-ET and in particular policy 2 and 5. However, submitter opposes the matters within the policy for the following reasons:</p> <ul style="list-style-type: none"> - Clause 1. Considers the term ‘at a scale’ is subjective and does not recognise the characterises and technical and operational requirements and constraints of the National Grid. The NPS-ET does not require the activity to be of a scale that protects the identified values. Considers the identified values in the scheduled areas are very broad and it is unclear what aspects of the values are to be maintained or restored. - Clause 3. Considers this is not applicable to the National Grid in that there are no assets within SAL’s with the coastal environment. <p>Transpower has concerns the policy does not give effect to the NPS-ET and therefore opposes INF-NFL-P57 and proposes an amended policy framework (to apply to SALs and ONFL’s) specific to the National Grid. The proposed approach has a ‘seek to avoid’ directive, considers this reflects policy 8 of the NPS-ET and provides a more appropriate and comprehensive policy framework that recognises the existing assets. Considers that utilisation and upgrading of existing National Grid assets should be facilitated in that it makes use of existing assets and will generally have less adverse environmental effect than that associated with the creation of new assets.</p>	<p>Add a new National Grid specific policy for Outstanding Natural Features and Landscapes and Significant Amenity Landscapes as follows:</p> <p><u>NF-NFL-XX Upgrade of existing National Grid (NG) infrastructure within special amenity landscapes, and outstanding natural features and outstanding landscapes (including within the coastal environment)</u></p> <p><u>In providing for the upgrade of existing National Grid (NG) infrastructure within special amenity landscapes, and outstanding natural features and outstanding landscapes (including within the coastal environment):</u></p> <ol style="list-style-type: none"> <u>1. Seek to avoid adverse effects on special amenity landscapes, and outstanding natural features and outstanding landscapes</u> <u>2. When considering major upgrades, have regard to the extent to which adverse effects have been avoided, remedied or mitigated by the route, site and method selection;</u> <u>3. Recognise the constraints arising from the operational needs and functional needs of the National Grid, when considering measures to avoid, remedy or mitigate any adverse effects; and</u> <u>4. Recognise the potential benefits of upgrades to the National Grid to people and communities.</u>

Royal Forest and Bird Protection Society	345.81	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / New INF-NFL	Amend	Seeks new policy to give effect to policy 11 of NZCPS.	<p>Add new policy INF-NFL-PX (All infrastructure activities in ridgelines and hilltops, special amenity landscapes, outstanding natural features and landscapes):</p> <p><u>Only allow activities within a significant natural area in the coastal environment where it can be demonstrated that they:</u> <u>1. Avoid adverse effects on the matters in Policy 11(a) of the New Zealand Coastal Policy Statement 2010;</u> <u>2. Avoid significant adverse effects and avoid, remedy or mitigate other adverse effects of activities on the matters in Policy 11(b) of the New Zealand Coastal Policy Statement 2010; and</u> <u>3. Protect other indigenous biodiversity values in accordance with ECO-P1.</u></p>
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	FS25.18	Part 2 / Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / New INF-NFL	Oppose	Adding a policy in regard to Policy 11 of the NZCPS (indigenous biodiversity) in the INF-NFL sub chapter is opposed. This matter should be addressed in the INF-ECO sub chapter.	Disallow
Transpower New Zealand Limited	FS29.35	Part 2 / Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / New INFNFL	Oppose	In its submission Transpower seeks a specific National Grid policy approach to give effect to the NPSET.	Disallow / Seeks that submission is disallowed in part in so far as the relief sought is inconsistent with that sought in Transpower's submission.
Wellington International Airport Limited	FS36.75	Part 2 / Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / New INF-NFL	Oppose	WIAL opposes the relief sought by the submitter as it is appropriate for a different planning framework to apply for regionally significant infrastructure in recognition of the social, cultural and economic benefits it provides for the community and the operational and locational constraints of that infrastructure. Furthermore, the INF-CE subchapter deals with matters in the Coastal Environment. Considers that it is inappropriate to duplicate/replicate controls in multiple chapters of the Proposed Plan.	Disallow

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Powerco Limited	FS61.18	Part 2 / Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / New INF-NFL	Oppose	Adding a policy in regard to Policy 11 of the NZCPS (indigenous biodiversity) in the INF-NFL sub chapter is opposed. This matter should be addressed in the INF-ECO sub chapter.	Disallow
Meridian Energy Limited	FS101.70	Part 2 / Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / New INF-NFL	Oppose	Considers that NZCPS Policy 11 addresses indigenous biological diversity (not natural features and landscapes). The requested text is not relevant for chapter INF-NFL. F2410	Disallow
Royal Forest and Bird Protection Society	345.82	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-P38	Oppose	Opposes blanket provision for operation of infrastructure without consideration of related policy NFL-P2. Seek redrafting to ensure consideration of other relevant policies, or include wording in this policy to mirror NFL-P2.	Amend INF-NFL-P38 (Operation, maintenance and repair of existing infrastructure within ridgelines and hilltops): Allow for the operation, maintenance and repair of existing infrastructure within ridgelines and hilltops <u>with consideration given to NFL-P2.</u>
Waka Kotahi	370.125	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-P38	Support	These provisions provide clear guidance in how to balance different interests where infrastructure overlaps with other areas and values.	Retain INF-NFL-P38 (Operation, maintenance and repair of existing infrastructure within ridgelines and hilltops) as notified.
KiwiRail Holdings Limited	408.72	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-P38	Support	Supports policy to allow for the operation, maintenance, repair and upgrade of existing infrastructure within identified ridgelines and hilltops. KRH-2 is located within the ridgelines and hilltops overlay.	Retain INF-NFL-P38 (Operation, maintenance and repair of existing infrastructure within ridgelines and hilltops) as notified.
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	99.52	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-P39	Oppose in part	INF-NFL-P39 relates to Significant Amenity Landscapes and incorrectly refers to SCHED 12 and should refer to SCHED 11. It does correctly hyperlink to SCHED 11 in the ePlan.	Amend Policy INF-NFL-P39 (Operation, maintenance and repair of existing infrastructure within special amenity landscapes (including within the coastal environment)) to refer to SCHED 11 rather than SCHED 12.
Powerco Limited	127.34	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-P39	Oppose in part	Considers that the policy relates to Significant Amenity Landscapes and incorrectly refers to SCHED 12 and should refer to SCHED 11. It does correctly hyperlink to SCHED 11 in the ePlan.	Amend policy INF-NFL-P39 (Operation, maintenance and repair of existing infrastructure within special amenity landscapes (including the coastal environment)) to refer to SCHED11 (Special Amenity Landscapes) rather than SCHED12 (High Coastal Natural Character Areas) as follows: Allow for the operation, maintenance and repair of existing infrastructure located within special amenity landscapes where: 1. Associated earthworks and vegetation removal are of a scale that maintains or restores the identified values as described in <u>SCHED11</u> . SCHED12.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Royal Forest and Bird Protection Society	345.83	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-P39	Oppose in part	Considers the policy needs to be no less protective than those in NFL chapter. Opposes use of "identified" as per previous submission comments and also seek that this cross references NFL and ECO provisions that provide for protection of biodiversity. Considers that amendments are needed include direction that effects are not only to be managed, but that certain areas, including overlays, need to be protected. This includes values in the coastal environment.	Amend INF-NFL-P39 (Operation, maintenance and repair of existing infrastructure within special amenity landscapes (including within the coastal environment): Allow for the operation, maintenance and repair of existing infrastructure located within special amenity landscapes where: 1. Associated earthworks and vegetation removal are of a scale that maintains or restores the identified values as described in SCHED12. 2. <u>[Insert reference to relevant NFL and ECO provisions for biodiversity protection]</u> 3. <u>[Insert direction that effects are not only need to be managed but protected in certain areas]</u>
Meridian Energy Limited	FS101.71	Part 2 / Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-P39	Oppose	Considers that the relevant values are (only) those that give rise to the identification of the area in the Schedule. The provisions of the NFL and ECO chapters apply anyway (that is clear in the structure of this Plan) and the requested references to these chapters are unnecessary. [Inferred reference to submission point 345.83 not 345.82]	Disallow
Waka Kotahi	370.126	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-P39	Support	These provisions provide clear guidance in how to balance different interests where infrastructure overlaps with other areas and values.	Retain INF-NFL-P39 (Operation, maintenance and repair of existing infrastructure within special amenity landscapes (including within the coastal environment)) as notified.
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	99.53	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-P40	Oppose in part	INF-NFL-P40 relates to Outstanding Natural Features and Outstanding Natural Landscapes and incorrectly refers to SCHED 11 and should refer to SCHED 10. It does correctly hyperlink to SCHED 10 in the ePlan.	Amend Policy INF-NFL-P40 (Operation, maintenance and repair of existing infrastructure within outstanding natural features and outstanding natural landscapes (including within the coastal environment)) to refer to SCHED 10 rather than SCHED 11.
Royal Forest and Bird Protection Society	345.84	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-P40	Oppose in part	Oppose blanket 'allow' direction for operation of existing infrastructure in ONFLs. We seek clearer direction to enable assessment of effects at the time of consenting. We oppose 'identified' values. This policy needs to give effect to policy 11 of the NZCPS. We also point out the drafting error in this policy as it should refer to SCHED10, rather than SCHED11.	Amend INF-NFL-P40 (Operation, maintenance and repair of existing infrastructure within outstanding natural features and outstanding natural landscapes (including within the coastal environment)): Allow for the operation, maintenance and repair of existing infrastructure located within outstanding natural features and outstanding natural landscapes where: 1. Associated earthworks and vegetation removal are of a scale that protects the identified values described in SCHED110. <u>[Add direction to enable assessment of effects at consenting stage, and amend overall policy to give effect to policy 11 of the NZ Coastal Policy Statement]</u>
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	FS25.19	Part 2 / Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-P40	Oppose	Adding further direction in this policy in regard to Policy 11 (indigenous biodiversity) of the NZCPS is not supported. This matter should be addressed in the INF-ECO sub chapter and not the INF-NFL provisions.	Disallow

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Wellington Electricity Lines Limited (WELL)	FS27.24	Part 2 / Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-P40	Oppose	The submission point tries to assign an activity status to existing infrastructure within Natural Features and Landscapes areas. It is unclear how this is to take place as the infrastructure will be lawfully established. The term or undertaking of "reconsenting" in relation to existing infrastructure is unclear to WELL – consequently, the submission point is requested to be rejected.	Disallow
Powerco Limited	FS61.19	Part 2 / Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-P40	Oppose	Adding further direction in this policy in regard to Policy 11 (indigenous biodiversity) of the NZCPS is not supported. This matter should be addressed in the INF-ECO sub chapter and not the INF-NFL provisions.	Disallow
Meridian Energy Limited	FS101.72	Part 2 / Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-P40	Oppose	Considers that the request in relation to 'reconsenting' is confusing because land use consents are generally not time limited. The relevant values are (only) those that give rise to the identification of the area in the Schedule. The requested 'direction' in relation to NZCPS Policy 11 is also confusing because that policy addresses indigenous biological diversity, not landscape values, so is not directly relevant for the INFNFL chapter.	Disallow
Waka Kotahi	370.127	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-P40	Support	These provisions provide clear guidance in how to balance different interests where infrastructure overlaps with other areas and values.	Retain INF-NFL-P40 (Operation, maintenance and repair of existing infrastructure within outstanding natural features and outstanding natural landscapes (including within the coastal environment)) as notified.
Royal Forest and Bird Protection Society	345.85	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-P41	Oppose in part	Seek amendment to say "Only allow" to ensure matters considered are provisional on meeting this policy.	Amend INF-NFL-P41 (Upgrading of existing infrastructure within ridgelines and hilltops): <u>Only allow</u> for the upgrading of existing infrastructure within ridgelines and hilltops where: 1. The activities is compliant with the underlying infrastructure provisions; and 2. Any adverse effects on the visual amenity and landscape values can be managed.
Waka Kotahi	370.128	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-P41	Support	These provisions provide clear guidance in how to balance different interests where infrastructure overlaps with other areas and values.	Retain INF-NFL-P41 (Upgrading of existing infrastructure within ridgelines and hilltops) as notified.
KiwiRail Holdings Limited	408.73	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-P41	Support	Supports policy to allow for the operation, maintenance, repair and upgrade of existing infrastructure within identified ridgelines and hilltops. KRH-2 is located within the ridgelines and hilltops overlay.	Retain INF-NFL-P41 (Upgrading of existing infrastructure within ridgelines and hilltops) as notified.
Royal Forest and Bird Protection Society	345.86	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-P42	Oppose in part	Considers a blanket "allow" policy is inappropriate as it gives no direction as to whether the effects of undergrounding may be appropriate.	Amend INF-NFL-P42 (Upgrading of existing infrastructure within a special amenity landscape (including within the coastal environment) that is located underground or within an existing legal road): Allow for the upgrading of existing infrastructure within a special amenity landscape area where the infrastructure is located underground or within an existing legal road <u>add direction about what effects are considered appropriate when undergrounding</u>

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	FS25.20	Part 2 / Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-P42	Oppose	Allowing for upgrading of underground infrastructure and infrastructure in existing roads in special amenity landscapes is an appropriate policy direction.	Disallow
Powerco Limited	FS61.20	Part 2 / Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-P42	Oppose	Allowing for upgrading of underground infrastructure and infrastructure in existing roads in special amenity landscapes is an appropriate policy direction.	Disallow
Waka Kotahi	370.129	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-P42	Support	These provisions provide clear guidance in how to balance different interests where infrastructure overlaps with other areas and values.	Retain INF-NFL-P42 (Upgrading of existing infrastructure within a special amenity landscape (including within the coastal environment) that is located underground or within an existing legal road.) as notified.
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	99.54	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-P43	Oppose in part	INF-NFL-P43 relates to Significant Amenity Landscapes and incorrectly refers to SCHED 12 and should refer to SCHED 11. It does correctly hyperlink to SCHED 11 in the ePlan.	Amend Policy INF-NFL-P43 (Upgrading of existing infrastructure within a special amenity landscape (including within the coastal environment) that is located aboveground and outside an existing legal road) to refer to SCHED 11 rather than SCHED 12.
Powerco Limited	127.35	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-P43	Oppose in part	Considers that the policy relates to Significant Amenity Landscapes and incorrectly refers to SCHED 12 and should refer to SCHED 11. It does correctly hyperlink to SCHED 11 in the ePlan.	Amend policy INF-NFL-P43 (Upgrading of existing infrastructure within a special amenity landscaped (including within the coastal environment) that is located aboveground and outside an existing legal road) to refer to SCHED11 (Special Amenity Landscapes) rather than SCHED12 (High Coastal Natural Character Areas) as follows: Provide for the upgrading of existing infrastructure that is located above ground and outside an existing legal road within a special amenity landscape where: 1. The activity is of a scale that maintains or restores the identified values as described in <u>SCHED11</u> ; SCHED12 ; ...

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Royal Forest and Bird Protection Society	345.87	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-P43	Oppose in part	Considers it inappropriate to apply a 'provide for' direction to activities in the coastal environment, particularly for upgrading as it can cause significant adverse effects. Considers the matters for consideration don't provide for the protection of biodiversity and need to include relevant ECO and NFL provisions. Opposes 'identified' values and seeks deletion of point 4.	Amend INF-NFL-P43 (Upgrading of existing infrastructure within a special amenity landscape (including within the coastal environment) that is located aboveground and outside an existing legal road): Provide for the upgrading of existing infrastructure that is located above ground and outside an existing legal road within a special amenity landscape where: 1. The activity is of a scale that maintains or restores the identified values as described in SCHED12; 2. If located outside the coastal environment any adverse effects on the identified values can be avoided, remedied or mitigated; 3. If located within the coastal environment any significant adverse effects on the identified values can be avoided and any other adverse effects on the identified values can be avoided, remedied or mitigated; and 4. There is a functional need or an operational need for the activity to be undertaken within the special amenity landscape. 4. It aligns with the matters set out in [the relevant ECO and NFL policies]
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	FS25.21	Part 2 / Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-P43	Oppose	Operational need and functional need are relevant considerations to determine if infrastructure is appropriate in special amenity landscapes, and accordingly should not be deleted from the policy. Reference to other NFL chapter policies is not supported as the intent is for the INF chapter to be generally self-contained to properly consider infrastructure specific issues.	Disallow
Powerco Limited	FS61.21	Part 2 / Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-P43	Oppose	Operational need and functional need are relevant considerations to determine if infrastructure is appropriate in special amenity landscapes, and accordingly should not be deleted from the policy. Reference to other NFL chapter policies is not supported as the intent is for the INF chapter to be generally self-contained to properly consider infrastructure specific issues.	Disallow
KiwiRail Holdings Limited	FS72.39	Part 2 / District-Wide Matters / Energy, Infrastructure, and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-P43	Oppose	Seeks the retention of the assessment criteria as notified which recognises the operational or functional needs of infrastructure. Considers the relief sought should be declined because it a) will not promote the sustainable management of the natural and physical resources in Wellington City, and is therefore contrary to, or inconsistent with, Part 2 and other provisions of the RMA and the Amendment Act; (b) is inconsistent with other relevant planning documents, including the Greater Wellington Regional Policy Statement and National Policy Statement for Urban Development 2020; (c) will not meet the reasonably foreseeable needs of future generations; (d) will not avoid, remedy or mitigate actual and potential adverse effects on the environment; (e) will not enable the social, economic and cultural wellbeing of people of Wellington City; and (f) is not the most appropriate way to achieve the objectives of the Proposed Plan in terms of section 32 of the RMA.	Disallow
Meridian Energy Limited	FS101.73	Part 2 / Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-P43	Oppose	Considers that the relevant values are (only) those that give rise to the identification of the area in the Schedule. Functional and operational need are relevant considerations. The proposed additional clause 4 is not necessary because the objectives and policies of the referenced chapters are applicable in any event.	Disallow

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Waka Kotahi	370.130	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-P43	Support	These provisions provide clear guidance in how to balance different interests where infrastructure overlaps with other areas and values.	Retain INF-NFL-P43 (Upgrading of existing infrastructure within a special amenity landscape (including within the coastal environment) that is located aboveground and outside an existing legal road) as notified.
Royal Forest and Bird Protection Society	345.88	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-P44	Oppose in part	Considers a blanket "allow" policy is inappropriate as it gives no direction as to whether the effects of undergrounding may be appropriate. Considers the policy needs to be conditional on considering other policies such as ECO-P1, NFL-P5 & P6 as well as the additional ECO and NFL policies sought by Forest & Bird to maintain biodiversity.	Amend INF-NFL-P44 (Upgrading of existing infrastructure within outstanding natural features and outstanding natural landscapes (including within the coastal environment) that is located underground or within an existing legal road): Provide for the upgrading of existing infrastructure within outstanding natural features and outstanding natural landscapes where the infrastructure is located underground or within an existing legal road <u>with consideration given to the appropriateness of effects as set out in ECO-P1, NFL-P5, NFL-P6 [and any other relevant ECO and NFL policies]</u>
Waka Kotahi	370.131	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-P44	Support	These provisions provide clear guidance in how to balance different interests where infrastructure overlaps with other areas and values.	Retain INF-NFL-P44 (Upgrading of existing infrastructure within outstanding natural features and outstanding natural landscapes (including within the coastal environment) that is located underground or within an existing legal road) as notified.
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	99.55	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-P45	Oppose	This policy applies to upgrading of infrastructure outside legal road and above ground within Outstanding Natural Features and Outstanding Natural Landscapes. Clause 1 of the policy has a requirement that the activity is of a scale that protects the identified values in SCHED10. This could have the effect of being treated as an "avoid" provision and appears to go beyond RPS Policy 26 which requires policies, rules or methods to protect outstanding natural features and outstanding natural landscapes from <u>inappropriate</u> subdivision, use or development. For functional and operational reasons some infrastructure such as telecommunications infrastructure may need to be located in these environments (e.g. for line of sight radio links). Therefore, it is important that the policy framework allows for this in appropriate circumstances, particularly where a facility may have significant community benefits, can not be reasonably located elsewhere and adverse effects are mitigated to the extent practicable.	Amend Policy INF-NFL-P45 (Upgrading of existing infrastructure within outstanding natural features and outstanding natural landscapes (including within the coastal environment) that is located above ground and outside an existing legal road) as follows: Only allow for the upgrading of existing infrastructure that is located outside an existing legal road and above ground within outstanding natural features and outstanding natural landscapes where: 1. <u>Having regard to the matters in Policy INF-P6, the activity is of a scale that protects the identified values described in SCHED10 from inappropriate development;</u>
Wellington Electricity Lines Limited (WELL)	FS27.3	Part 2 / Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-P45	Support	WELL agree with the submitter that as currently drafted INF-NFL-P45 will be overly restrictive in undertaking upgrades to the electricity distribution network that may be located within the Outstanding Natural Features and Outstanding Natural Landscapes policy areas. WELL agree that the policy is more restrictive than required (under the RPS), and consequently should be amended. The proposed amendments posed by the submitter are considered to be suitable in that they can also be applied to other infrastructure providers with assets within the Outstanding Natural Features and Outstanding Natural Landscapes Policy areas.	Allow

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Royal Forest and Bird Protection Society	345.89	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-P45	Oppose in part	Considers the policy fails to give effect to policies 11 and 15 of the NZCPS. Considers activities should be subject to consideration of NFL-P5 and P6, the INF-NFL-PXX policy sought below and all relevant ECO provisions. Opposes the use of "identified" values given the shortcomings of SCHED10, and seeks deletion of point 4.	Amend INF-NFL-P45 (Upgrading of existing infrastructure within outstanding natural features and outstanding natural landscapes (including within the coastal environment) that is located above ground and outside an existing legal road): Only allow for the upgrading of existing infrastructure that is located outside an existing legal road and above ground within outstanding natural features and outstanding natural landscapes where: 1. The activity is of a scale that protects the identified values described in SCHED10; 2. If located outside the coastal environment any significant adverse effects on the identified values can be avoided and any other adverse effects on the identified values can be avoided, remedied or mitigated; 3. If located within the coastal environment any adverse effects on the identified values can be avoided; and 4. There is a functional need or operational need for the activity to be undertaken within the outstanding natural features and outstanding natural landscapes. 4. It aligns with the matters set out in NFL-P5, NFL-P6, INF-NFL-PX, and ECO-P1. <u>[Amend overall policy to give effect to Policies 11 and 15 of NZ Coastal Policy Statement]</u>
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	FS25.22	Part 2 / Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-P45	Oppose	Operational need and functional need are relevant considerations to determine if infrastructure is appropriate in outstanding natural landscapes and features, particularly as the policy has broader application than the coastal environment, and accordingly should not be deleted from the policy. Reference to other NFL chapter policies is not supported as the intent is for the INF chapter to be generally self-contained to properly consider infrastructure specific issues.	Disallow
Powerco Limited	FS61.22	Part 2 / Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-P45	Oppose	Operational need and functional need are relevant considerations to determine if infrastructure is appropriate in outstanding natural landscapes and features, particularly as the policy has broader application than the coastal environment, and accordingly should not be deleted from the policy. Reference to other NFL chapter policies is not supported as the intent is for the INF chapter to be generally self-contained to properly consider infrastructure specific issues.	Disallow
KiwiRail Holdings Limited	FS72.40	Part 2 / District-Wide Matters / Energy, Infrastructure, and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-P45	Oppose	Seeks the retention of the assessment criteria as notified which recognises the operational or functional needs of infrastructure. Considers the relief sought should be declined because it a) will not promote the sustainable management of the natural and physical resources in Wellington City, and is therefore contrary to, or inconsistent with, Part 2 and other provisions of the RMA and the Amendment Act; (b) is inconsistent with other relevant planning documents, including the Greater Wellington Regional Policy Statement and National Policy Statement for Urban Development 2020; (c) will not meet the reasonably foreseeable needs of future generations; (d) will not avoid, remedy or mitigate actual and potential adverse effects on the environment; (e) will not enable the social, economic and cultural wellbeing of people of Wellington City; and (f) is not the most appropriate way to achieve the objectives of the Proposed Plan in terms of section 32 of the RMA.	Disallow
Meridian Energy Limited	FS101.74	Part 2 / Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-P45	Oppose	Considers that the relevant values are (only) those that give rise to the identification of the area in the Schedule. The request to give effect to NZCPS Policy 11 is confusing because that policy addresses indigenous biological diversity, not landscape values, so is not directly relevant for the INF-NFL chapter. Meridian considers the policy already gives effect to NZCPS Policy 15, in the manner intended by that policy. The references to policies in other chapters of the plan are not necessary because, in the structure of this Plan, they are applicable anyway.	Disallow

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Waka Kotahi	370.132	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-P45	Support	These provisions provide clear guidance in how to balance different interests where infrastructure overlaps with other areas and values.	Retain INF-NFL-P45 (Upgrading of existing infrastructure within outstanding natural features and outstanding natural landscapes (including within the coastal environment) that is located above ground and outside an existing legal road) as notified.
Royal Forest and Bird Protection Society	345.90	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-P46	Oppose in part	Opposes the 'allow' direction of this policy. Seek amendment to "Only allow..."	Amend INF-NFL-P46 (New infrastructure within identified ridgelines and hilltops): <u>Only allow</u> for the installation of new infrastructure within identified ridgelines and hilltops where: 1. The activities is compliant with the underlying zone provisions and general rules; and 2. Any adverse effects on the visual amenity and landscape values can be managed.
Waka Kotahi	370.133	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-P46	Support	These provisions provide clear guidance in how to balance different interests where infrastructure overlaps with other areas and values.	Retain INF-NFL-P46 (New infrastructure within identified ridgelines and hilltops) as notified.
KiwiRail Holdings Limited	408.74	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-P46	Support	Supports policy to allow for new infrastructure within identified ridgelines and hilltops.	Retain INF-NFL-P46 (New infrastructure within identified ridgelines and hilltops) as notified.
Royal Forest and Bird Protection Society	345.91	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-P47	Oppose in part	Considers it inappropriate to apply a 'provide for' direction to activities in the coastal environment, particularly for new infrastructure as it an cause significant adverse effects. While undergrounding is usually preferable, considers a blanket "provide for" policy is inappropriate as it does not give direction as to whether the effects are appropriate. Considers the matters for consideration don't provide for the protection of biodiversity and need to include relevant ECO and NFL provisions.	Amend INF-NFL-P47 (New infrastructure within a special amenity landscape (including within the coastal environment) that is located underground or within an existing legal road): Provide for the installation of new infrastructure within special amenity landscapes where the infrastructure is located underground or within an existing legal road <u>[with consideration given to the appropriateness of effects in reference to relevant ECO and NFL provisions]</u> .
Waka Kotahi	370.134	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-P47	Support	These provisions provide clear guidance in how to balance different interests where infrastructure overlaps with other areas and values.	Retain INF-NFL-P47 (New infrastructure within a special amenity landscape (including within the coastal environment) that is located underground or within an existing legal road) as notified.
Royal Forest and Bird Protection Society	345.92	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-P48	Oppose in part	Considers the policy fails to give effect to policy 11 of the NZCPS. Activities should be subject to consideration of NFL-P3 & P4, ECO-P1 and the INF-NFL-PXX policy sought below. Opposes the use of 'identified' values and seeks deletion of point 4.	Amend INF-NFL-P48 (New infrastructure within a special amenity landscape (including within the coastal environment) that is located above ground and outside and existing legal road): Only allow for new infrastructure that is located outside an existing legal road and above ground within a special amenity landscape where: 1. The activity is of a scale that maintains or restores the identified values as described in SCHED11; 2. If located outside the coastal environment any adverse effects on the identified values can be avoided, remedied or mitigated; 3. If located within the coastal environment any significant adverse effects on the identified values can be avoided and any other adverse effects on the identified values can be avoided, remedied or mitigated; and 4. There is a functional need or an operational need for the activity to be undertaken within the special amenity landscape <u>4. It aligns with the matters set out in NFL-P5, NFL-P6, INF-NFL-PX, and ECO-P1.</u> <u>[Amend overall policy to give effect to Policy 11 of NZ Coastal Policy Statement]</u>

KiwiRail Holdings Limited	FS72.41	Part 2 / District-Wide Matters / Energy, Infrastructure, and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-P48	Oppose	Seeks the retention of the assessment criteria as notified which recognises the operational or functional needs of infrastructure. Considers the relief sought should be declined because it a) will not promote the sustainable management of the natural and physical resources in Wellington City, and is therefore contrary to, or inconsistent with, Part 2 and other provisions of the RMA and the Amendment Act; (b) is inconsistent with other relevant planning documents, including the Greater Wellington Regional Policy Statement and National Policy Statement for Urban Development 2020; (c) will not meet the reasonably foreseeable needs of future generations; (d) will not avoid, remedy or mitigate actual and potential adverse effects on the environment; (e) will not enable the social, economic and cultural wellbeing of people of Wellington City; and (f) is not the most appropriate way to achieve the objectives of the Proposed Plan in terms of section 32 of the RMA.	Disallow
Meridian Energy Limited	FS101.75	Part 2 / Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-P48	Oppose	Considers that the relevant values are (only) those that give rise to the identification of the area in the Schedule. Functional and operational need are relevant considerations. The proposed additional clause 4 is not necessary because the objectives and policies of the referenced chapters are applicable in any event. The request to give effect to NZCPS Policy 11 (indigenous biological diversity) is not directly relevant for special amenity landscapes.	Disallow
Waka Kotahi	370.135	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-P48	Support	These provisions provide clear guidance in how to balance different interests where infrastructure overlaps with other areas and values.	Retain INF-NFL-P48 (New infrastructure within a special amenity landscape (including within the coastal environment) that is located above ground and outside and existing legal road) as notified.
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	99.56	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-P49	Oppose	This policy applies to new Infrastructure within Outstanding Natural Features and Outstanding Natural Landscapes outside of the Coastal Environment. Clause 1 of the policy has a requirement that the activity is of a scale that protects the identified values in SCHED10. This could have the effect of being treated as an "avoid" provision and appears to go beyond RPS Policy 26 which requires policies, rules or methods to protect outstanding natural features and outstanding natural landscapes from <u>inappropriate</u> subdivision, use or development. For functional and operational reasons some infrastructure such as telecommunications infrastructure may need to be located in these environments (e.g. for line of sight radio links). Therefore, it is important that the policy framework allows for this is appropriate circumstances, particularly where a facility may have significant community benefits, cannot be reasonably located elsewhere and adverse effects are mitigated to the extent practicable.	Amend Policy INF-NFL-P49 (New infrastructure within outstanding natural features and outstanding natural landscapes outside the coastal environment) as follows: Only allow new infrastructure within outstanding natural features and outstanding natural landscapes when located outside the coastal environment, where; 1. <u>Having regard to the matters in Policy INF-P6</u> , the activity is of a scale that protects the identified values described in SCHED10 <u>from inappropriate development</u> ;

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Wellington Electricity Lines Limited (WELL)	FS27.4	Part 2 / Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-P49	Support	WELL agree with the submitter to the same extent as expressed above in the previous submission point (99.55). The PDP needs to be consistent with the RPS, consequently, provision in the PDP should be provided for appropriate development within the Outstanding Natural Features and Outstanding Natural Landscapes policy areas.	Allow
Royal Forest and Bird Protection Society	345.93	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-P49	Oppose in part	Considers activities should be subject to consideration of NFL-P5 and P6, the new INF-NFL-PXX policy (sought in below submission point) and ECO-P1. We oppose the use of "identified" and seek deletion of point 3	Amend INF-NFL-P49 (New infrastructure within outstanding natural features and outstanding natural landscapes outside the coastal environment): Only allow new infrastructure within outstanding natural features and outstanding natural landscapes when located outside the coastal environment, where: 1. The activity is of a scale that protects the identified values described in SCHED10; 2. Any significant adverse effects are avoided and any other adverse effects are avoided, remedied or mitigated; and 3. There is a functional need or operational need for the activity to be undertaken within an outstanding natural feature or outstanding natural landscape in the coastal environment. 3. It aligns with the matters set out in NFL-P5, NFL-P6, INF-NFL-PX, and ECO-P1.
KiwiRail Holdings Limited	FS72.42	Part 2 / District-Wide Matters / Energy, Infrastructure, and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-P49	Oppose	Seeks the retention of the assessment criteria as notified which recognises the operational or functional needs of infrastructure. Considers the relief sought should be declined because it a) will not promote the sustainable management of the natural and physical resources in Wellington City, and is therefore contrary to, or inconsistent with, Part 2 and other provisions of the RMA and the Amendment Act; (b) is inconsistent with other relevant planning documents, including the Greater Wellington Regional Policy Statement and National Policy Statement for Urban Development 2020; (c) will not meet the reasonably foreseeable needs of future generations; (d) will not avoid, remedy or mitigate actual and potential adverse effects on the environment; (e) will not enable the social, economic and cultural wellbeing of people of Wellington City; and (f) is not the most appropriate way to achieve the objectives of the Proposed Plan in terms of section 32 of the RMA.	Disallow
Meridian Energy Limited	FS101.76	Part 2 / Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-P49	Oppose	Considers that the relevant values are (only) those that give rise to the identification of the area in the Schedule. Functional and operational need are relevant considerations. The proposed additional clause 4 is not necessary because the objectives and policies of the referenced chapters are applicable in any event.	Disallow
Waka Kotahi	370.136	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-P49	Support	These provisions provide clear guidance in how to balance different interests where infrastructure overlaps with other areas and values.	Retain INF-NFL-P49 (New infrastructure within outstanding natural features and outstanding natural landscapes outside the coastal environment) as notified.
Royal Forest and Bird Protection Society	345.94	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-P50	Support in part	Opposes the use of "identified" values. Sports the avoidance of new infrastructure within ONFLs within the coastal environment.	Amend INF-NFL-P50 (New infrastructure within outstanding natural features and outstanding natural landscapes within the coastal environment): Avoid new infrastructure within outstanding natural features and outstanding natural landscapes within the coastal environment, unless it can shown that any adverse effects on the identified values can be avoided.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Wellington Electricity Lines Limited (WELL)	FS27.25	Part 2 / Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-P50	Oppose	WELL oppose this submission point as the intention is to essentially prohibit infrastructure locating and operating within Natural Features and Landscapes areas.	Disallow
Meridian Energy Limited	FS101.77	Part 2 / Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-P50	Oppose	Considers that the relevant values are (only) those that give rise to the identification of the area in the Schedule.	Disallow
Waka Kotahi	370.137	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-P50	Support	These provisions provide clear guidance in how to balance different interests where infrastructure overlaps with other areas and values.	Retain INF-NFL-P50 (New infrastructure within outstanding natural features and outstanding natural landscapes within the coastal environment) as notified.
Transpower New Zealand Limited	315.126	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-P51	Support in part	The policy approach is supported and considers it gives effect to Policies 2 and 5 of the NPSET. Considers that, notwithstanding the policy support, given the wider issues with how the policy framework within the INF-NFL chapter gives effect to the NPSET, Transpower seeks an amended policy framework specific to the National Grid that address all the natural environment overlays. Reference is also sought to include minor upgrade within the policy to reflect the permitted activity status for minor upgrade works within the NESETA and enabling policy framework within the NPSET.	Supports the policy approach within the Infrastructure - Natural Features and Landscapes chapter, but seeks amendments.
Transpower New Zealand Limited	315.127	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-P51	Amend	The policy approach is supported and considers it gives effect to Policies 2 and 5 of the NPS-ET. Considers that, notwithstanding the policy support, given the wider issues with how the policy framework within the INF-NFL chapter gives effect to the NPS-ET, Transpower seeks an amended policy framework specific to the National Grid that address all the natural environment overlays. Reference is also sought to include minor upgrade within the policy to reflect the permitted activity status for minor upgrade works within the NESETA and enabling policy framework within the NPS-ET.	Delete reference to the National Grid from INF-NFL-P51 (Operation, maintenance and repair of existing National Grid (NG) & Gas Transmission Pipeline Corridor (GTPC) infrastructure within identified ridgelines and hilltops).
Transpower New Zealand Limited	315.128	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-P52	Amend	The policy approach is supported and considers it gives effect to Policies 2 and 5 of the NPS-ET. Considers that, notwithstanding the policy support, given the wider issues with how the policy framework within the INF-NFL chapter gives effect to the NPS-ET, Transpower seeks an amended policy framework specific to the National Grid that address all the natural environment overlays. Reference is also sought to include minor upgrade within the policy to reflect the permitted activity status for minor upgrade works within the NESETA and enabling policy framework within the NPS-ET.	Delete reference to the National Grid from INF-NFL-P52 (Operation, maintenance and repair of existing National Grid (NG) & Gas Transmission Pipeline Corridor (GTPC) infrastructure within special amenity landscapes (including within the coastal environment)).

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Transpower New Zealand Limited	315.129	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-P53	Amend	<p>The policy approach is supported and considers it gives effect to Policies 2 and 5 of the NPS-ET.</p> <p>Considers that, notwithstanding the policy support, given the wider issues with how the policy framework within the INF-NFL chapter gives effect to the NPS-ET, Transpower seeks an amended policy framework specific to the National Grid that address all the natural environment overlays. Reference is also sought to include minor upgrade within the policy to reflect the permitted activity status for minor upgrade works within the NESETA and enabling policy framework within the NPS-ET.</p>	Delete reference to the National Grid from INF-NFL-P53 (Operation, maintenance and repair of existing National Grid (NG) & Gas Transmission Pipeline Corridor (GTPC) infrastructure within outstanding natural features and outstanding landscapes (including within the coastal environment)).
Transpower New Zealand Limited	315.130	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-P54	Amend	<p>Considers the existing National Grid assets traverse identified ridgelines and hilltops, and that the activity status for upgrades is regulated by the NESETA. Supports that component of the policy to “allow for the upgrading of existing National Grid infrastructure” on the basis it gives effect to the NPSET and in particular policy 2 which provides a very clear directive to ‘recognise and provide’ for the upgrade of the National Grid, and policy 5 to ‘enable’ the minor upgrade. However, opposes matters 1 and 2, within the policy for the following reasons:</p> <ul style="list-style-type: none"> - Clause 1. requires that “activities is compliant with the underlying infrastructure provisions”. <p>Considers the policy directive is unclear in that it is not known what are the specific infrastructure provisions to which the directive relates and what is meant by the term ‘complaint with’.</p> <ul style="list-style-type: none"> - Clause 2. considers that the directive has wide implication in that it requires any adverse effects be managed, regardless of scale. Ridgeline and Hilltop values are not defined or described in the PDP and therefore considers it is unclear what outcomes are sought but the policy. <p>Considers that ridgelines and hilltops are not a section 6 RMA matter, and are distinct from section 7 RMA significant amenity landscapes. Considers that given the national significance of the National Grid, the enabling policy framework within the NPSET, that ridgelines and hilltops have no higher order policy support, and that the policy relates to the upgrade of existing National Grid assets, seeks amendment to exclude the qualifiers from applying to the National Grid. Considers the policy does not give effect to the NPS-ET, and therefore opposes INF-NFL-P54 and instead proposes an amended policy framework specific to the National Grid. [Refer to original submission for full reason]</p>	<p>Amend policy INF-NFL-P54 (Upgrading of existing National Grid (NG) and Gas Transmission Pipeline Corridor (GTPC) infrastructure within identified ridgelines and hilltops as follows:</p> <p>INF-NFL-P54 Upgrading of existing National Grid (NG) and Gas Transmission Pipeline Corridor (GTPC) infrastructure within identified ridgelines and hilltops</p> <p>Allow for the upgrading of existing National Grid (NG) or Gas Transmission Pipeline Corridor (GTPC) infrastructure within identified ridgelines and hilltops, <u>and specific to the Gas Transmission Pipeline Corridor (GTPC)</u>, where:</p> <ol style="list-style-type: none"> 1. The activities is compliant with the underlying infrastructure provisions; and 2. Any adverse effects on the visual amenity and landscape values can be managed.
Transpower New Zealand Limited	315.131	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-P55	Oppose	<p>Considers Transpower has no existing assets in a significant amenity landscape that is located underground or within an existing legal road. As such considers the policy is not applicable to the National Grid and references to the Grid shall be deleted.</p>	Opposes reference to the National Grid in policy INF-NFL-P55 (Upgrading of existing National Grid (NG) or Gas Transmission Pipeline Corridor (GTPC) infrastructure within a special amenity landscape (including within the coastal environment) that is located underground or within an existing legal road).
Transpower New Zealand Limited	315.132	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-P55	Amend	<p>Considers Transpower has no existing assets in a significant amenity landscape that is located underground or within an existing legal road. As such the policy is not applicable to the National Grid and references to the Grid shall be deleted.</p>	<p>Delete reference to the National Grid from policy INF-NFL-P55 (Upgrading of existing National Grid (NG) or Gas Transmission Pipeline Corridor (GTPC) infrastructure within a special amenity landscape (including within the coastal environment) that is located underground or within an existing legal road) as follows:</p> <p>INF-NFL-P55 Upgrading of existing National Grid (NG) or Gas Transmission Pipeline Corridor (GTPC) infrastructure within a special amenity landscape (including within the coastal environment) that is located underground or within an existing legal road</p> <p>Allow for the upgrading of existing National Grid (NG) or Gas Transmission Pipeline Corridor (GTPC) infrastructure within a special amenity landscape where the infrastructure is located underground or within an existing legal road.</p>

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Transpower New Zealand Limited	315.133	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-P56	Oppose	Considers the relationship between P55 and P56 is not clear (noting that P55 includes the proviso within the coastal environment and P56 relates to outside the coastal environment). Transpower has no existing assets in a significant amenity landscape that is located underground or within an existing legal road. As such considers the policy is not applicable to the National Grid and references to the Grid shall be deleted.	Opposes reference to the National Grid in (Upgrading of existing National Grid (NG) and Gas Transmission Pipeline Corridor (GTPC) infrastructure within special amenity landscapes (outside of the coastal environment) that is located underground or within an existing legal road) policy INF-NFL-P56.
Transpower New Zealand Limited	315.134	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-P56	Amend	Considers the relationship between P55 and P56 is not clear (noting that P55 includes the proviso within the coastal environment and P56 relates to outside the coastal environment). Transpower has no existing assets in a significant amenity landscape that is located underground or within an existing legal road. As such considers the policy is not applicable to the National Grid and references to the Grid shall be deleted.	Delete reference to the National Grid from policy INF-NFL-P56 (Upgrading of existing National Grid (NG) and Gas Transmission Pipeline Corridor (GTPC) infrastructure within special amenity landscapes (outside of the coastal environment) that is located underground or within an existing legal road) as follows: INF-NFL-P56 Upgrading of existing National Grid (NG) and Gas Transmission Pipeline Corridor (GTPC) infrastructure within special amenity landscapes (outside of the coastal environment) that is located underground or within an existing legal road Provide for the upgrading of existing infrastructure (outside CE) where the infrastructure is located underground or within an existing legal road.
Transpower New Zealand Limited	315.135	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-P57	Oppose	Transpower has existing assets within identified areas of significant amenity landscapes. Considers the activity status for upgrades is regulated by the NESETA. Supports that component of the policy to “provide for the upgrading of existing National Grid infrastructure” on the basis it gives effect to the NPS-ET and in particular policy 2 and 5. However, submitter opposes the matters within the policy for the following reasons: - Clause 1. Considers the term ‘at a scale’ is subjective and does not recognise the characterises and technical and operational requirements and constraints of the National Grid. The NPS-ET does not require the activity to be of a scale that protects the identified values. Considers the identified values in the scheduled areas are very broad and it is unclear what aspects of the values are to be maintained or restored. - Clause 3. Considers this is not applicable to the National Grid in that there are no assets within SAL’s with the coastal environment. Transpower has concerns the policy does not give effect to the NPS-ET and therefore opposes INF-NFL-P57 and proposes an amended policy framework (to apply to SALs and ONFL’s) specific to the National Grid. The proposed approach has a ‘seek to avoid’ directive, considers this reflects policy 8 of the NPS-ET and provides a more appropriate and comprehensive policy framework that recognises the existing assets. Considers that utilisation and upgrading of existing National Grid assets should be facilitated in that it makes use of existing assets and will generally have less adverse environmental effect than that associated with the creation of new assets.	Opposes reference to the National Grid in policy INF-NFL-P57 (Upgrading of existing National Grid (NG) or Gas Transmission Pipeline Corridor (GTPC) infrastructure within a special amenity landscape (including within the coastal environment) that is located aboveground and outside an existing legal road). [And add new policy specific to the National Grid for Outstanding Natural Features and Landscapes and Significant Amenity Landscapes]

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Transpower New Zealand Limited	315.136	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-P57	Amend	<p>Transpower has existing assets within identified areas of significant amenity landscapes. Considers the activity status for upgrades is regulated by the NESETA. Supports that component of the policy to "provide for the upgrading of existing National Grid infrastructure" on the basis it gives effect to the NPSET and in particular policy 2 and 5. However, submitter opposes the matters within the policy for the following reasons:</p> <ul style="list-style-type: none"> - Clause 1. Considers the term 'at a scale' is subjective and does not recognise the characterises and technical and operational requirements and constraints of the National Grid. The NPSET does not require the activity to be of a scale that protects the identified values. Considers the identified values in the scheduled areas are very broad and it is unclear what aspects of the values are to be maintained or restored. - Clause 3. Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Transpower New Zealand Limited	315.138	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-P58	Amend	<p>Transpower has existing assets within identified areas of significant amenity landscapes. Considers the activity status for upgrades is regulated by the NESETA. Supports that component of the policy to "provide for the upgrading of existing National Grid infrastructure" on the basis it gives effect to the NPSET and in particular policy 2 and 5. However, submitter opposes the matters within the policy for the following reasons:</p> <ul style="list-style-type: none"> - Clause 1. Considers the term 'at a scale' is subjective and does not recognise the characterises and technical and operational requirements and constraints of the National Grid. The NPSET does not require the activity to be of a scale that protects the identified values. Considers the identified values in the scheduled areas are very broad and it is unclear what aspects of the values are to be maintained or restored. - Clause 3. Considers this is not applicable to the National Grid in that there are no assets within SAL's with the coastal environment. <p>Transpower has concerns the policy does not give effect to the NPSET and therefore opposes INF-NFL-P57 and proposes an amended policy framework (to apply to SALs and ONFL's) specific to the National Grid. The proposed approach has a 'seek to avoid' directive, considers this reflects policy 8 of the NPSET and provides a more appropriate and comprehensive policy framework that recognises the existing assets. Considers that utilisation and upgrading of existing National Grid assets should be facilitated in that it makes use of existing assets and will generally have less adverse environmental effect than that associated with the creation of new assets.</p>	<p>Delete reference to the National Grid from policy INF-NFL-P58 (Upgrading of existing National Grid (NG) and Gas Transmission Pipeline Corridor (GTPC) infrastructure within outstanding natural features and outstanding landscapes (including within the coastal environment).</p> <p>[And add new policy specific to the National Grid for Outstanding Natural Features and Landscapes and Significant Amenity Landscapes]</p>
Transpower New Zealand Limited	315.139	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-P59	Oppose	<p>Considers that it is not clear why INF-NFL-P59 is within the NFL chapter given it relates to the CE and not NFL's. As with other INF-NFL policies, Transpower opposes INF-NFL-P59. Considers policy INF-NFL-P59 has implications for any new Cook Strait cables at Oteranga Bay, and other new National Grid assets within the CE. Considers the avoid directive within the policy does not give effect to the NPS-ET, including Policy 8, noting that it applies to the entire coastal environment and not only the higher values areas. Considers the higher order policy support for the policy is not clear noting the NZCPS does not impose a blanket avoid requirement for the coastal environment, within Policy 6(1)(a) recognising the provision of infrastructure and the transmission of electricity. Seeks a new policy that provides a comprehensive policy approach that gives effect to and reconciles the NPS-ET and NZCPS. Considers given the comprehensive nature of the policy sought, it is proposed to be located in the INF chapter rather than sub chapters.</p>	<p>Delete policy INF-NFL-P59 (New National Grid (NG) & Gas Transmission Pipeline Corridor (GTPC) infrastructure within the coastal environment) in its entirety.</p> <p>[And add new policy specific to the National Grid in the Infrastructure (INF) chapter]</p>
Transpower New Zealand Limited	315.140	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-P60	Oppose	<p>Opposes INF-NFL-P60 and proposes an amended policy framework specific to the National Grid. Has specific concerns the policy does not give effect to the NPSET in that:</p> <ul style="list-style-type: none"> - Specific to clause 1. 2. and 3., considers the NPS-ET does not require the activity to be of a scale that protects the identified values for ONFL's, not maintains or restores those for SAL's. It does not require the avoidance of visually obtrusive structures within ridgelines and hilltops. The ridgelines and hilltops cover a large extent of the city and given the linear nature of the transmission network and the visual element associated with its support structures, considers it would not be possible or practicable to 'avoid visually obtrusive structures. - In response to clause 4. considers the NPS-ET does not require significant adverse effects be avoided. - Considers Clause 5. is acceptable in so far as it relates to functional or operational need. Considers the reference to 'reasonably practical alternative locations' is not necessary given the definitions of operational and functional need. Has concerns with the term 'practical' as it is considered to introduce uncertainty. Considers the term 'practicable' is more readily understood. <p>[Refer to original submission for full reason</p>	<p>Delete INF-NFL-P60 (New National Grid (NG) & Gas Transmission Pipeline Corridor (GTPC) infrastructure within outstanding natural features and outstanding landscapes, special amenity landscapes or identified landscapes or identified ridgelines and hilltops, outside the coastal environment).</p> <p>[And add a new National Grid specific policy in the Infrastructure chapter]</p>

Waka Kotahi	370.142	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-R52	Support	These provisions provide clear guidance in how to balance different interests where infrastructure overlaps with other areas and values.	Retain INF-NFL-R52 (New infrastructure within special amenity landscapes or identified ridgelines and hilltops) as notified.
Taranaki Whānui ki te Upoko o te Ika	389.59	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-R52	Amend	Considers that in relation to Natural Features and Landscapes chapter that there are no triggers for active engagement with Mana Whenua.	Seeks amendment to INF-NFL-R52.2 (New infrastructure within special amenity landscapes or identified ridgelines and hilltops) to include triggers for active engagement with Taranaki Whānui in relation to SASM as matter of discretion under rule.
KiwiRail Holdings Limited	408.77	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-R52	Amend	Supports provision for new infrastructure within identified ridgelines and hilltops. However, KiwiRail seek amendment to allow for new infrastructure.	Amend INF-NFL-R52 (New infrastructure within special amenity landscapes or identified ridgelines and hilltops) as follows: Activity status: Permitted Where: a. The infrastructure is located underground; or b. The infrastructure is located within an existing rail or road reserve.
Transpower New Zealand Limited	315.141	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-R53	Oppose	Considers existing National Grid assets traverse Outstanding Natural Landscapes (at Oteranga Bay noting that while some of the assets are within the Oteranga Bay designation, others are not), Special Amenity Landscapes across the city, and Ridgelines and Hilltops across the city. The existing assets within the Boom Rock/Pipinui Point Escarpment Outstanding Natural Features overlay are within the Transpower Te Hikowhenua Shore Electrode Station Designation (ID: TPR5) and are therefore no subject to any rule. Considers the NESETA provides prevailing provisions for maintenance, reconductoring, increasing voltage, structure addition or replacement, and removal, for the National Grid. Considers that INF-NFL-R53 for existing National Grid structures captured by the NESETA is of no relevance to Transpower in respect of rule application and only adds confusion and potential errors in the application of rules.	Opposes reference to the National Grid in INF-NFL-R53 (Operation, maintenance and repair of existing National Grid (NG) & Gas Transmission Pipeline Corridor (GTPC) infrastructure within outstanding natural features and outstanding landscapes, special amenity landscapes or identified ridgelines and hilltops (including within the coastal environment).
Transpower New Zealand Limited	315.142	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-R53	Amend	Considers existing National Grid assets traverse Outstanding Natural Landscapes (at Oteranga Bay noting that while some of the assets are within the Oteranga Bay designation, others are not), Special Amenity Landscapes across the city, and Ridgelines and Hilltops across the city. The existing assets within the Boom Rock/Pipinui Point Escarpment Outstanding Natural Features overlay are within the Transpower Te Hikowhenua Shore Electrode Station Designation (ID: TPR5) and are therefore no subject to any rule. Considers the NESETA provides prevailing provisions for maintenance, reconductoring, increasing voltage, structure addition or replacement, and removal, for the National Grid. Considers that INF-NFL-R53 for existing National Grid structures captured by the NESETA is of no relevance to Transpower in respect of rule application and only adds confusion and potential errors in the application of rules.	Delete reference to the National Grid from Rule INF-NFL-R53 (Operation, maintenance and repair of existing National Grid (NG) & Gas Transmission Pipeline Corridor (GTPC) infrastructure within outstanding natural features and outstanding landscapes, special amenity landscapes or identified ridgelines and hilltops (including within the coastal environment) as follows: INF-NFL-R53 Operation, maintenance and repair of existing National Grid (NG) & Gas Transmission Pipeline Corridor (GTPC) infrastructure within outstanding natural features and outstanding landscapes, special amenity landscapes or identified ridgelines and hilltops (including within the coastal environment) All Zones 1. Activity status: Permitted

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Transpower New Zealand Limited	315.143	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-R54	Oppose	Considers that existing National Grid assets traverse Outstanding Natural Landscapes (at Oteranga Bay noting that while some of the assets are within the Oteranga Bay designation, others are not), Special Amenity Landscapes across the city, and Ridgelines and Hilltops across the city. Considers the existing assets within the Boom Rock/Pipinui Point Escarpment Outstanding Natural Features overlay are within the Transpower Te Hikowhenua Shore Electrode Station Designation (ID: TPR5) and are therefore no subject to any rule. Considers the NESETA provides prevailing provisions for the upgrading of the National Grid. The NESETA provides a Discretionary activity status under Regulations 39 of the NESETA for those activities subject to the NESETA but not otherwise captured under other regulations in the NESETA. Considers INF-NFL-R54 for existing National Grid structures captured by the NESETA is of no relevance to Transpower in respect of rule application and adds confusion and potential errors in the application of rules.	Delete rule INF-NFL-54 (Upgrading of existing National Grid (NG) infrastructure within outstanding natural features and outstanding landscapes, special amenity landscapes, or identified ridgelines and hilltops) in its entirety.
Transpower New Zealand Limited	315.144	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-R56	Support in part	Considers that the NESETA does not apply to new National Grid assets. On this basis, Transpower supports the default discretionary activity rule as it provides a robust consenting framework whilst still recognising the national significance of the National Grid. Notwithstanding its support for a discretionary activity status, Transpower does query whether a discretionary activity status is appropriate for Ridgelines and Hilltops and seeks a restricted discretionary activity status for Ridgelines and Hilltops. Transpower is concerned Ridgelines and Hilltops are afforded the same policy framework as ONFL's even they are not section 6 RMA matters. The rationalise and even need for the Ridgelines and Hilltops is not evident given the identification of ONFLs and SALs.	Retain INF-NFL-R56 (New National Grid (NG) & Gas Transmission Pipeline Corridor (GTPC) infrastructure within outstanding natural features and outstanding landscapes, special amenity landscapes or identified ridgelines and hilltops), with amendment.
Transpower New Zealand Limited	315.145	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-R56	Amend	Considers that the NESETA does not apply to new National Grid assets. On this basis, Transpower supports the default discretionary activity rule as it provides a robust consenting framework whilst still recognising the national significance of the National Grid. Notwithstanding its support for a discretionary activity status, Transpower does query whether a discretionary activity status is appropriate for Ridgelines and Hilltops and seeks a restricted discretionary activity status for Ridgelines and Hilltops. Transpower is concerned Ridgelines and Hilltops are afforded the same policy framework as ONFL's even they are not section 6 RMA matters. The rationalise and even need for the Ridgelines and Hilltops is not evident given the identification of ONFLs and SALs.	Amend the activity status under INF-NFL-R56 (New National Grid (NG) & Gas Transmission Pipeline Corridor (GTPC) infrastructure within outstanding natural features and outstanding landscapes, special amenity landscapes or identified ridgelines and hilltops) insofar as it relates to ridgelines and hilltops to Restricted Discretionary as follows: INF-NFL-R56.1 New National Grid (NG) & Gas Transmission Pipeline Corridor (GTPC) infrastructure within outstanding natural features and outstanding landscapes, <u>and</u> special amenity landscapes or identified ridgelines and hilltops . 1. Activity Status: Discretionary <u>INF-NFL-R56.2 New National Grid (NG) & Gas Transmission Pipeline Corridor (GTPC) infrastructure within identified ridgelines and hilltops</u> 2. Activity Status: Restricted Discretionary
Transpower New Zealand Limited	315.146	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-R57	Oppose	Considers the entire southern and western coastline is identified as an ONFL [see original submission for supplied image]. Opposes the non-complying activity status on the basis it does not give effect to the NPS-ET. The rule and associated policy framework would mean essential and nationally significant (as recognised in the NPS-ET) new National Grid assets (such as a new Cook Strait Cable within the existing Cook Strait Cable Protection Zone) would potentially not be able to secure consent in that it would be subject to a non-complying activity status and an 'avoid' policy directive (under P59) and therefore unable to pass the s104 RMA 'gateway test'. The activity status does not give effect to the NPS-ET.	Opposes the non-complying activity status for the new National Grid infrastructure within Rule INF-NFL-R57 (New National Grid (NG) & Gas Transmission Pipeline Corridor (GTPC) infrastructure within outstanding natural features and outstanding landscapes, special amenity landscapes or identified ridgelines and hilltops).

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Transpower New Zealand Limited	315.147	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-R57	Amend	<p>Considers the entire southern and western coastline is identified as an ONFL [see original submission for supplied image].</p> <p>Opposes the non-complying activity status on the basis it does not give effect to the NPS-ET. The rule and associated policy framework would mean essential and nationally significant (as recognised in the NPS-ET) new National Grid assets (such as a new Cook Strait Cable within the existing Cook Strait Cable Protection Zone) would potentially not be able to secure consent in that it would be subject to a non-complying activity status and an 'avoid' policy directive (under P59) and therefore unable to pass the s104 RMA 'gateway test'. The activity status does not give effect to the NPS-ET.</p>	<p>Amend the activity status for the new National Grid infrastructure within Rule INF-NFL-R57 (New National Grid (NG) & Gas Transmission Pipeline Corridor (GTPC) infrastructure within outstanding natural features and outstanding landscapes, special amenity landscapes or identified ridgelines and hilltops) from non-complying to discretionary activity status, as follows:</p> <p>INF-NFL-R57 New National Grid (NG) & Gas Transmission Pipeline Corridor (GTPC) infrastructure within outstanding natural features and outstanding landscapes, within the coastal environment</p> <p>All Zones 1. Activity status: Non-Complying</p> <p><u>INF-NFL-R57a New National Grid (NG) infrastructure within outstanding natural features and outstanding landscapes, within the coastal environment</u></p> <p><u>All Zones 1. Activity status: Discretionary</u></p>
Firstgas Limited	304.36	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-S21	Amend	<p>Considers that INF-NFL-S21 should be amended. The ability to excavate up to a maximum volume of 350m3 per project during maintenance and repair works on existing infrastructure is required. This volume is based on the depth of the pipeline and standard operating procedures for trenching.</p>	<p>Amend INF-NFL-S21 (Earthworks) as follows:</p> <p>1. Earthworks must not exceed:</p> <p>a. More than 50m3 per transmission line support structure; or</p> <p>b. 100m3 per access track; and</p> <p>c. <u>More than 350m3 per maintenance or repair project.</u></p>
Transpower New Zealand Limited	315.148	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-S21	Not specified	<p>Considers standard INF-NFL-S21 is applied to Rule INF-NFL-R48 which is not applicable to the National Grid. On that basis submitter is neutral on INF-NFL-S21. Considers that if the intent is for INF-NFL-S21 to apply to the National Grid (under Rules R53, 56 and 57) Transpower opposes its application as it either duplicates the NESETA or has not basis for inclusion as a standard for new National Grid assets. [Submitter has stated position as Neutral]</p>	<p>Retain INF-NFL-S21 (Earthworks) as notified, on the basis that it is not applicable to the National Grid.</p> <p>[Submitter has stated position as neutral]</p>
Greater Wellington Regional Council	351.98	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-S21	Amend	<p>Considers that Policy 24 of the RPS directs councils to protect indigenous ecosystems and habitats with significant indigenous biodiversity values. The 'identified' qualifier limits the consideration of effects to those values identified within the SNA at the time of plan notification. The values of most SNAs have been identified only at a high-level, and often only through desktop analysis. The assessment required to identify the scope of effects may identify additional values and this should be part of the consideration of effects at the time consent is applied for.</p>	<p>Seeks to amend wording to remove 'identified' before 'significant biodiversity values' when referring to adverse effects caused by activities or maintenance of biodiversity values.</p>
Wellington City Council Environmental Reference Group	FS112.8	Part 2 / Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-S21	Support	<p>Support the proposal from GWRC to remove 'identified' before 'significant biodiversity values'. Agree with them that the assessment required to identify the scope of effects may identify additional values and this should be part of the consideration of effects at the time consent is applied for.</p>	<p>Allow</p>
Waka Kotahi	370.143	Energy Infrastructure and Transport / Infrastructure Natural Features and Landscapes / INF-NFL-S21	Support	<p>These provisions provide clear guidance in how to balance different interests where infrastructure overlaps with other areas and values.</p>	<p>Retain INF-NFL-S21 (Earthworks) as notified.</p>

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Antony Kitchener and Simin Littschwager	199.5	Energy Infrastructure and Transport / Infrastructure Natural Hazards / General INF-NH	Amend	Considers that it is unclear how Council will ensure and enforce compliance with seismic building standards and the quality of construction for the multi-storey buildings. [Refer to original submission for full reasons].	Seeks that assurances are given to people who, due to seismic concerns, may have consciously decided to live in an area characterised by low-rise buildings, and suddenly have to navigate high rises in their neighbourhoods.
Heidi Snelson, Aman Hunt, Chia Hunt, Ela Hunt	276.15	Energy Infrastructure and Transport / Infrastructure Natural Hazards / General INF-NH	Not specified	Considers that "Well functioning urban environment" does not apply to INF-NH because it does not comply with points d, f & g in the definition of "Well functioning urban environment" within the PDP. There is no link road from the development site to Churton Park, Glenside or Tawa has been planned. Development area is an isolated area on steep, hilly terrain. The access road from Westchester Drive is flood prone. West Glenside at 395 Middleton Road will not be Climate Change Sustainable and Natural Hazard Resilient. [Refer to original submission for full reason]	Not specified.
Kimberley Vermaey	348.2	Energy Infrastructure and Transport / Infrastructure Natural Hazards / General INF-NH	Amend	Considers that buildings in the Flood Hazard Overlay with water depths less than 0.5m should not require resource consents, subject to minimum floor levels. For buildings with floodwater depths 0.5m or greater, resource consent should be needed as proposed, with displacement effects considered.	Seeks that buildings with flood water depth of less than 0.5m in the Flood Hazard Overlay not require resource consents.
Taranaki Whānui ki te Upoko o te Ika	389.60	Energy Infrastructure and Transport / Infrastructure Natural Hazards / General INF-NH	Amend	[No specific reason given beyond decision requested - refer to original submission].	Amend 'Other relevant District Plan provisions' to include Sites and Areas of Significance to Māori chapter.
Greater Wellington Regional Council	FS84.122	Part 2 / Energy Infrastructure and Transport / Infrastructure Natural Hazards / General INFNH	Support	Greater Wellington support the inclusion and protection of SASM.	Allow / Seek provisions which protect SASM.
CentrePort Limited	402.71	Energy Infrastructure and Transport / Infrastructure Natural Hazards / General INF-NH	Oppose	Considers that there is a structural difficulty with Natural Hazards being included in the Infrastructure section when there is a separate and standalone chapter that specifically references Natural Hazards as well as coastal hazards included in the Coastal Environment. This creates uncertainty. For an infrastructure provider and for ease of plan usage these provisions should be in the Natural Hazards Chapter.	Seeks that Infrastructure Natural Hazards provisions are located within the Natural Hazards Chapter.
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	FS25.24	Part 2 / Energy Infrastructure and Transport / Infrastructure Natural Hazards / General INF-NH	Oppose	Retaining the infrastructure rules related to natural hazards in the INF-NH sub-chapter rather than the general NH Chapter is preferred to keep the INF provisions largely self-contained in one location.	Disallow

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Wellington International Airport Limited	FS36.76	Part 2 / Energy Infrastructure and Transport / Infrastructure Natural Hazards / General INF-NH	Support	WIAL shares the concerns of CentrePort Limited, that there is a lot of duplication in the Proposed Plan, particularly as it relates to the natural hazard provisions that apply to (regionally significant) infrastructure.	Allow
Powerco Limited	FS61.38	Part 2 / Energy Infrastructure and Transport / Infrastructure Natural Hazards / General INF-NH	Oppose	Retaining the infrastructure rules related to natural hazards in the INF-NH sub-chapter rather than the general NH Chapter is preferred to keep the INF provisions largely self-contained in one location.	Disallow
CentrePort Limited	402.72	Energy Infrastructure and Transport / Infrastructure Natural Hazards / General INF-NH	Amend	Considers that there is a structural difficulty with Natural Hazards being included in the Infrastructure section when there is a separate and standalone chapter that specifically references Natural Hazards as well as coastal hazards included in the Coastal Environment. This creates uncertainty. For an infrastructure provider and for ease of plan usage these provisions should be in the Natural Hazards Chapter.	Seeks that Infrastructure Natural Hazards provisions are located within the Natural Hazards Chapter.
Wellington International Airport Limited	FS36.77	Part 2 / Energy Infrastructure and Transport / Infrastructure Natural Hazards / General INF-NH	Support	WIAL shares the concerns of CentrePort Limited, that there is a lot of duplication in the Proposed Plan, particularly as it relates to the natural hazard provisions that apply to (regionally significant) infrastructure.	Allow
Victoria University of Wellington Students' Association	123.13	Energy Infrastructure and Transport / Infrastructure Natural Hazards / New INF-NH	Amend	Considers that students are vulnerable to the risks natural hazards pose to rental properties. Considers that students, due to affordability concerns, are likely to be renting older properties and if maintenance of existing infrastructure to mitigate the risks of natural hazards is not mandatory, this could place renters at risk. [Refer to original submission for full reasons].	Seeks that maintenance of existing rental property infrastructure to mitigate the risks of natural hazards should be mandatory. [Inferred decision requested].
Victoria University of Wellington Students' Association	123.14	Energy Infrastructure and Transport / Infrastructure Natural Hazards / INF-NH-P61	Support	Supports that any new builds that become rental properties will have controls in place to reduce natural hazard risks. [Refer to original submission for full reasons].	Retain INF-NH-P61 (Infrastructure and structures in Natural Hazard and Coastal Hazard Overlays) as notified.
Fire and Emergency New Zealand	273.44	Energy Infrastructure and Transport / Infrastructure Natural Hazards / INF-NH-P61	Amend	Notes a typo in INF-NH-P61	Amend INF-NH-P61 (Infrastructure and structures in Natural Hazard and Coastal Hazard overlays) as follows: When located in an overland flow path, stream corridor, or high coastal hazard area hazard area , have a functional need or operational need that means the infrastructure's location cannot be avoided and there are no reasonable alternatives.
Transpower New Zealand Limited	315.149	Energy Infrastructure and Transport / Infrastructure Natural Hazards / INF-NH-P61	Support	Generally supports INF-NH-P61 as considers it provides an appropriate policy framework in which to consider both new and existing infrastructure within hazard areas. Considers that given the linear nature of the Grid, while it can be designed in a manner that does not place the National Grid, people or properties at risk (nor exacerbate any risks), it cannot always avoid locating within or traversing through hazard overlays (and particularly stream corridors and ponding areas and fault lines).	Retain policy INF-NH-P61 (Infrastructure and structures in Natural Hazard and Coastal Hazard Overlays) as notified
Greater Wellington Regional Council	351.99	Energy Infrastructure and Transport / Infrastructure Natural Hazards / INF-NH-P61	Support	Supports this policy directs that infrastructure is only established in the natural hazard and coastal Hazard Overlays where the risk is low, the risk is mitigated, or the location is unavoidable. This is appropriate and aligned with RPS direction (Policy 29).	Retain INF-NH-P61 (Infrastructure and structures in Natural Hazard and Coastal Hazard Overlays) as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Waka Kotahi	370.144	Energy Infrastructure and Transport / Infrastructure Natural Hazards / INF-NH-P61	Support	Considers these provisions provide clear guidance in how to balance different interests where infrastructure overlaps with other areas and values.	Retain INF-NH-P61 (Infrastructure and structures in Natural Hazard and Coastal Hazard Overlays) as notified.
CentrePort Limited	402.73	Energy Infrastructure and Transport / Infrastructure Natural Hazards / INF-NH-P61	Support in part	Supports policy INF-NH-P61 but considers that for ease of plan usage it should instead be included in the overarching Natural Hazard Overlays chapter.	Retain INF-NH-P61 (Infrastructure and structures in Natural Hazard and Coastal Hazard Overlays) at notified, but relocate to the Natural Hazards Chapter.
CentrePort Limited	402.74	Energy Infrastructure and Transport / Infrastructure Natural Hazards / INF-NH-P61	Amend	Considers that for ease of plan usage policy INF-NH-P61 should instead be included in the overarching Natural Hazard Overlays chapter.	Seeks that INF-NH-P61 (Infrastructure and structures in Natural Hazard and Coastal Hazard Overlays) is relocated to the Natural Hazards Chapter.
Wellington International Airport Ltd	406.151	Energy Infrastructure and Transport / Infrastructure Natural Hazards / INF-NH-P61	Oppose	Opposes INF-NH-P61. [See paragraphs 4.85 to 4.91 in original submission for full reason]	Opposes INF-NH-P61 (Infrastructure and structures in Natural Hazard and Coastal Hazard Overlays) and seeks amendment.
Wellington International Airport Ltd	406.152	Energy Infrastructure and Transport / Infrastructure Natural Hazards / INF-NH-P61	Amend	Opposes INF-NH-P61. [See paragraphs 4.85 to 4.91 in original submission for full reason]	Opposes INF-NH-P61 (Infrastructure and structures in Natural Hazard and Coastal Hazard Overlays) and seeks amendment. Infrastructure and structures in Natural Hazard and Coastal Hazard Overlays Only allow for new infrastructure, and any associated structures in the Natural Hazard Overlays and Coastal Hazard Overlays where the infrastructure or associated structures: 1. Do not create an intolerable level of increase the risk from the natural hazard to people, or other property or infrastructure; 2. Incorporate design measures to reduce the potential for damage to the infrastructure following a natural hazard or coastal hazard event to the extent reasonably practicable; and 3. <u>Have an operational or functional need to locate within Natural Hazard Overlays and Coastal Hazard Overlays; and</u> 2-4 When located in an overland flowpath, stream corridor, or high coastal hazard area, have a functional need or operational need that means the infrastructure's location cannot be avoided and there are no reasonably practicable alternatives.
KiwiRail Holdings Limited	FS72.43	Part 2 / District-Wide Matters / Energy, Infrastructure, and Transport / Infrastructure Natural Hazards / INF-NH-P61	Support	Supports recognition that there is, in some instances, an operational or functional need to locate infrastructure within a natural hazard overlay. Considers the relief sought should be allowed because it will (a) will promote the sustainable management of the natural and physical resources in Wellington City, and is therefore consistent with Part 2 and other provisions of the Resource Management Act 1991 (RMA) and the Enabling Housing Supply Amendment Act 2021 (Amendment Act); (b) is consistent with other relevant planning documents, including the Greater Wellington Regional Policy Statement and National Policy Statement for Urban Development 2020; (c) will meet the reasonably foreseeable needs of future generations; (d) will avoid, remedy or mitigate actual and potential adverse effects on the environment; (e) will enable the social, economic and cultural wellbeing of the people of Wellington City; and (f) is the most appropriate way to achieve the objectives of the Proposed Plan in terms of section 32 of the RMA.	Allow
Wellington International Airport Ltd	406.153	Energy Infrastructure and Transport / Infrastructure Natural Hazards / INF-NH-P61	Amend	Opposes INF-NH-P61. [See paragraphs 4.85 to 4.91 in original submission for full reason]	Delete INF-NH-P61 (Infrastructure and structures in Natural Hazard and Coastal Hazard Overlays) in its entirety.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
KiwiRail Holdings Limited	408.78	Energy Infrastructure and Transport / Infrastructure Natural Hazards / INF-NH-P61	Support	Supports recognition that in some instances there are operational and functional needs for activities to locate in certain locations, which can include within hazard areas. KiwiRail has existing infrastructure which is located within the mapped Natural Hazard Overlays. The rail network has been in place for many years and for various operational reasons, is unable to be easily relocated to avoid such hazard areas.	Retain INF-NH-P61 (Infrastructure and structures in Natural Hazard and Coastal Hazard Overlays) as notified.
Victoria University of Wellington Students' Association	123.15	Energy Infrastructure and Transport / Infrastructure Natural Hazards / INF-NH-R58	Support	Supports INF-NH-R58 in its entirety. Supports the increased restrictions on building in areas that are deemed at higher risk of natural hazards.	Retain INF-NH-R58 (New underground infrastructure (including customer connections), and maintenance or upgrading of existing underground infrastructure in Natural Hazard and Coastal Hazard Overlays) as notified.
Powerco Limited	127.36	Energy Infrastructure and Transport / Infrastructure Natural Hazards / INF-NH-R58	Oppose	Stated that Powerco has existing gas distribution network in the road running along the coastal margins of the Island Bay area. This road along with several adjacent properties who may require connection to the gas network are located within the High Hazard Area of the Coastal Hazard Overlay. Considers that under this proposed rule maintenance and repair of the existing gas distribution infrastructure or providing a customer connection to an adjacent customer would require resource consent. Amendments to the rule are requested to reflect that existing gas distribution network in this hazard area may need to be maintained or upgraded, and adjacent properties if already established should be able to have a connection from this network. [refer to image in original submission]	Amend Rule INF-NH-R58 (New underground infrastructure (including customer connections), and maintenance or upgrading of existing underground infrastructure in Natural Hazard and Coastal Hazard Overlays) as follows: 1. Activity status: Permitted Where: a. The underground infrastructure does not result in a permanent change to the ground level within the: i. Ponding or overland flow path areas of the flood hazard extent; or ii. Stream corridor area of the flood hazard extent; and b. The underground infrastructure is not located within the high hazard area of the Coastal Hazard Overlays (other than in regard to maintenance and upgrading of infrastructure in a road or customer connections); or c. If the underground infrastructure is located within the high hazard area of the Coastal Hazard Overlay it is also within the City Centre Zone.
Toka Tū Ake EQC	282.3	Energy Infrastructure and Transport / Infrastructure Natural Hazards / INF-NH-R58	Amend	Considers that new underground infrastructure should not be located in hazardous areas unless it will not worsen any impacts of an event, and includes resilience features to reduce any damage from events. Identifies that power generating facilities, water treatment and wastewater treatment, other public utilities, and infrastructure containing hazardous materials are BIC 3 structures, and references the MfE Active Fault Guidelines which recommends that such infrastructure is not built within 20 m of a fault with a recurrence interval of 5000 years or less. Understands the need to transport water, wastewater and electricity across the Wellington fault due to the location of the fault. However, considers that key network facilities such as substations and water and waste-water treatment should not be situated within 20 m of the Fault Hazard Overlays.	Amend INF-NH-R58-1 (New underground infrastructure (including customer connections), and maintenance or upgrading of existing underground infrastructure in Natural Hazard and Coastal Hazard Overlays) as follows: 1. Activity status: Permitted Where: a. The underground infrastructure does not result in a permanent change to the ground level within the: i. Ponding or overland flow path areas of the flood hazard extent; or ii. Stream corridor area of the flood hazard extent; and b. The underground infrastructure is not located within the high hazard area of the Coastal Hazard Overlays; or c. If the underground infrastructure is located within the high hazard area of the Coastal Hazard Overlay it is also within the City Centre Zone, and where it can be demonstrated that the infrastructure does not increase hazard impacts in a coastal hazard event; d. New infrastructure with the potential to increase impacts of the hazard in the event of an earthquake is not located within the Wellington, Ohariu, or Shepherd's Gully Fault Overlay. e. New and existing infrastructure include resilience features to reduce damage from natural hazard events.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	FS25.25	Part 2 / Energy Infrastructure and Transport / Infrastructure Natural Hazards / INF-NH-R58	Oppose	Amendments to clause (c) to require demonstration that infrastructure does not increase a natural hazard event in the central city zone is not supported. This may lead to unnecessary investigations or regulation via rules for business as usual works in the city centre such as customer connections.	Disallow
Powerco Limited	FS61.39	Part 2 / Energy Infrastructure and Transport / Infrastructure Natural Hazards / INF-NH-R58	Oppose	Amendments to clause (c) to require <u>demonstration</u> that infrastructure does not increase a natural hazard event in the central city zone is not supported. This may lead to unnecessary investigations or regulation via rules for business as usual works in the city centre such as customer connections.	Disallow
Firstgas Limited	304.37	Energy Infrastructure and Transport / Infrastructure Natural Hazards / INF-NH-R58	Support	INF-NH-R58 is supported as it provides the ability to construct new underground infrastructure (including customer connections), and maintenance or upgrading of existing underground infrastructure in Natural Hazard and Coastal Hazard Overlays where the infrastructure does not result in a permanent change to the ground level within the ponding or overland flow path areas of the flood hazard extent; or stream corridor area of the flood hazard extent.	Retain INF-NH-R58 (New underground infrastructure (including customer connections), and maintenance or upgrading of existing underground infrastructure in Natural Hazard and Coastal Hazard Overlays) as notified.
Transpower New Zealand Limited	315.150	Energy Infrastructure and Transport / Infrastructure Natural Hazards / INF-NH-R58	Support	The submitter considers they have underground assets within the Ohariu Fault (at the Karori Golf Club) and the within the Overland Flowpath and Inundation Area at Kaiwharawhara Road. Considers the NESETA provides prevailing provisions for maintenance, reconductoring, increasing voltage, structure addition or replacement, and removal, for the National Grid, and on this basis, Rules INF-NH-R58 and INF-NH-R59 (with limits), for existing National Grid structures captured by the NESETA are of limited relevance to Transpower in respect of rule application. It is noted the NESETA provides a Discretionary activity status under Regulations 39 of the NESETA for those activities subject to the NESETA but not otherwise captured under other regulations in the NESETA. Considers that notwithstanding the application of the NESETA, the maintenance and upgrade of the existing underground assets would be able to comply with the permitted activity standards. Supports the restricted discretionary activity status for the assets as coupled with the policy framework, considers the rule provides a robust but pragmatic framework in which to consider infrastructure in hazard areas.	Retain INF-NH-R58 (New underground infrastructure (including customer connections), and maintenance or upgrading of existing underground infrastructure in Natural Hazard and Coastal Hazard Overlays) as notified.
Waka Kotahi	370.145	Energy Infrastructure and Transport / Infrastructure Natural Hazards / INF-NH-R58	Support	Considers these provisions provide clear guidance in how to balance different interests where infrastructure overlaps with other areas and values.	Retain INF-NH-R58 (New underground infrastructure (including customer connections), and maintenance or upgrading of existing underground infrastructure in Natural Hazard and Coastal Hazard Overlays) as notified.
CentrePort Limited	402.75	Energy Infrastructure and Transport / Infrastructure Natural Hazards / INF-NH-R58	Oppose	Opposes that resource consent for new underground infrastructure within the Special Port Zone is required. While new underground infrastructure is permitted outside of the high coastal inundation overlay three parts of the Commercial Port Area are subject to this overlay. It is non sensible to require resource consent for new underground infrastructure within the Special Port Zone where by its very nature underground infrastructure must be located where it is required to support operational Port activities.	Seeks that the Special Purpose Port Zone is excluded from INF-NH-R58 (New underground infrastructure (including customer connections), and maintenance or upgrading of existing underground infrastructure in Natural Hazard and Coastal Hazard Overlays).
KiwiRail Holdings Limited	408.79	Energy Infrastructure and Transport / Infrastructure Natural Hazards / INF-NH-R58	Support	Supports new underground infrastructure, and maintenance or upgrading of existing underground infrastructure in Natural Hazard and Coastal Hazard Overlays being a permitted activity, subject to standards.	Retain INF-NH-r58 (New underground infrastructure (including customer connections), and maintenance or upgrading of existing underground infrastructure in Natural Hazard and Coastal Hazard Overlays) as notified.
Victoria University of Wellington Students' Association	123.16	Energy Infrastructure and Transport / Infrastructure Natural Hazards / INF-NH-R59	Support	Supports INF-NH-R59 in its entirety. Supports the increased restrictions on building in areas that are deemed at higher risk of natural hazards.	Retain INF-NH-R59 (Temporary infrastructure in Natural Hazard Overlays and Coastal Hazard Overlays) as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Transpower New Zealand Limited	315.151	Energy Infrastructure and Transport / Infrastructure Natural Hazards / INF-NH-R59	Support	Supports the permitted and default restricted discretionary activity status for temporary infrastructure as coupled with the policy framework, considers the rule provides a robust but pragmatic framework in which to consider infrastructure in hazard areas.	Retain INF-NH-R59 (Temporary infrastructure in Natural Hazard Overlays and Coastal Hazard Overlays) as notified.
Waka Kotahi	370.146	Energy Infrastructure and Transport / Infrastructure Natural Hazards / INF-NH-R59	Support	Considers these provisions provide clear guidance in how to balance different interests where infrastructure overlaps with other areas and values.	Retain INF-NH-R59 (Temporary infrastructure in Natural Hazard Overlays and Coastal Hazard Overlays) as notified.
CentrePort Limited	402.76	Energy Infrastructure and Transport / Infrastructure Natural Hazards / INF-NH-R59	Oppose	Opposes that resource consent for temporary activities within the overlay in the Special Port Zone is required. Temporary activities are permitted outside of the high coastal inundation overlay and it is considered unnecessary to require resource consent for temporary activities within the overlay in the Special Port Zone.	Seeks that the Special Purpose Port Zone is excluded from INF-NH-R59 (Temporary infrastructure in Natural Hazard Overlays and Coastal Hazard Overlays).
Wellington International Airport Ltd	406.154	Energy Infrastructure and Transport / Infrastructure Natural Hazards / INF-NH-R59	Oppose	Opposes INF-NH-R59. [See paragraphs 4.85 to 4.91 in original submission for full reason]	Opposes INF-NH-R59 (Temporary infrastructure in Natural Hazard Overlays and Coastal Hazard Overlays) and seeks amendment.
Wellington International Airport Ltd	406.155	Energy Infrastructure and Transport / Infrastructure Natural Hazards / INF-NH-R59	Amend	Opposes INF-NH-R59. [See paragraphs 4.85 to 4.91 in original submission for full reason]	Amend INF-NH-R59 (Temporary infrastructure in Natural Hazard Overlays and Coastal Hazard Overlays) as follows: 1. Activity status: Permitted Where: a. The temporary infrastructure is not located within the: iv. <u>The high hazard area of the Coastal Hazard Overlay outside of the Natural Open Space Zone located between Lyall Bay and Moa Point</u>
Toka Tū Ake EQC	FS70.88	Part 2 / Energy Infrastructure and Transport / Infrastructure Natural Hazards / INF-NH-R59	Oppose	The coast between Lyall Bay and Moa Point is subject to multiple coastal hazards, particularly coastal inundation, erosion and tsunamis. This area is also at risk from liquefaction in the event of an earthquake. Coastal hazard risk will increase in the near future due to sea level rise and other effects of climate change. Limiting restriction on infrastructure development in this area may allow for development in inappropriate areas which are not sustainable in the long term.	Disallow
Wellington International Airport Ltd	406.156	Energy Infrastructure and Transport / Infrastructure Natural Hazards / INF-NH-R59	Amend	Opposes INF-NH-R59. [See paragraphs 4.85 to 4.91 in original submission for full reason]	Delete INF-NH-R59 (Temporary infrastructure in Natural Hazard Overlays and Coastal Hazard Overlays) in its entirety.
Toka Tū Ake EQC	FS70.89	Part 2 / Energy Infrastructure and Transport / Infrastructure Natural Hazards / INF-NH-R59	Oppose	The coast between Lyall Bay and Moa Point is subject to multiple coastal hazards, particularly coastal inundation, erosion and tsunamis. This area is also at risk from liquefaction in the event of an earthquake. Coastal hazard risk will increase in the near future due to sea level rise and other effects of climate change. Limiting restriction on infrastructure development in this area may allow for development in inappropriate areas which are not sustainable in the long term.	Disallow
KiwiRail Holdings Limited	408.80	Energy Infrastructure and Transport / Infrastructure Natural Hazards / INF-NH-R59	Support	Supports provision for temporary activities within hazard overlays as a permitted activity, subject to standards.	Retain INF-NH-R59 (Temporary infrastructure in Natural Hazard Overlays and Coastal Hazard Overlays) as notified.
Victoria University of Wellington Students' Association	123.17	Energy Infrastructure and Transport / Infrastructure Natural Hazards / INF-NH-R60	Support	Supports INF-NH-R60 in its entirety. Supports the increased restrictions on building in areas that are deemed at higher risk of natural hazards.	Retain INF-NH-R60 (New above ground infrastructure in Natural Hazard Overlays and Coastal Hazard Overlays) as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Toka Tū Ake EQC	282.4	Energy Infrastructure and Transport / Infrastructure Natural Hazards / INF-NH-R60	Amend	Considers that new above ground infrastructure should not be located in hazardous areas unless it will not worsen any impacts of an event, and includes resilience features to reduce any damage from events. References the MfE Active Fault Guidelines that recommend that such infrastructure is not built within 20 m of a fault with a recurrence interval of 5000 years or less. Considers that this would be the Wellington, Ohariu and Shepherd's Gully Faults, but not the Terawhiti Fault has a recurrence interval greater than 5000 years. Understands the need to transport water, wastewater and electricity across faults due to their location. However, considers that new key network facilities such as substations and water and wastewater treatment should not be situated within 20 m of the Fault Hazard Overlays: A. Within 20 m of the Hazard Overlays of faults with recurrence intervals of 5000 years or lower; or, B. Within the high hazard area of the Coastal Hazard Zone Considers that if this infrastructure is severely damaged due to placement on a fault rupture, they can cause cascading additional hazards such as fire or waste contamination. Additionally, damage to key infrastructure due to its placement on the fault rupture reduces the city's resilience and continued functionality in the event of an earthquake.	Amend INF-NH-R60-1 (New above ground infrastructure in Natural Hazard Overlays and Coastal Hazard Overlays) as follows: 1. Activity status: Permitted Where: a. The infrastructure is located within: i. The ponding area of the flood hazard extent; ii. The low and medium hazard areas of the Coastal Hazard Overlays; iii. The Sheppards Gully Fault Overlay, Ohariu Fault Overlay or the Terawhiti Fault Overlay; iv. The Liquefaction Overlay; or v. High hazard area of the Coastal Hazard Overlay within the City Centre Zone, <u>where it can be demonstrated that the infrastructure does not increase the hazard impacts in a coastal hazard event.</u> b. <u>The infrastructure includes resilience features to reduce damage from natural hazards</u>
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	FS25.26	Part 2 / Energy Infrastructure and Transport / Infrastructure Natural Hazards / INF-NH-R60	Oppose	Amendments to the permitted activity standards to require demonstration that infrastructure does not increase a natural hazard event in the central city zone is not supported. This may lead to unnecessary investigations or regulation via rules for business as usual works in the city centre. Further, the requirement to include resilience features may not be appropriate or practical in all instances for routine works. Infrastructure in the city centre is necessary to serve development there.	Disallow
Powerco Limited	FS61.40	Part 2 / Energy Infrastructure and Transport / Infrastructure Natural Hazards / INF-NH-R60	Oppose	Amendments to the permitted activity standards to require demonstration that infrastructure does not increase a natural hazard event in the central city zone is not supported. This may lead to unnecessary investigations or regulation via rules for business as usual works in the city centre. Further, the requirement to include resilience features may not be appropriate or practical in all instances for routine works. Infrastructure in the city centre is necessary to serve development there.	Disallow
Transpower New Zealand Limited	315.152	Energy Infrastructure and Transport / Infrastructure Natural Hazards / INF-NH-R60	Support	Considers that given the linear nature of the National Grid and locational constraints, while Transpower would endeavour to avoid locating new National Grid assets within hazard overlays, it is not always possible. Supports the restricted discretionary activity status for new assets which are not permitted as considers that coupled with the policy framework, the activity status, the rule provides a robust but pragmatic framework in which to consider infrastructure in hazard areas.	Retain INF-NH-R60 (New above ground infrastructure in Natural Hazard Overlays and Coastal Hazard Overlays) as notified.
Waka Kotahi	370.147	Energy Infrastructure and Transport / Infrastructure Natural Hazards / INF-NH-R60	Support	Considers these provisions provide clear guidance in how to balance different interests where infrastructure overlaps with other areas and values.	Retain INF-NH-R60 (New above ground infrastructure in Natural Hazard Overlays and Coastal Hazard Overlays) as notified.
CentrePort Limited	402.77	Energy Infrastructure and Transport / Infrastructure Natural Hazards / INF-NH-R60	Oppose	Opposes that resource consent for new above ground infrastructure within the overlay in the Special Port Zone is required. While new above ground infrastructure is permitted outside of the high coastal inundation overlay three parts of the Commercial Port Area are subject to this overlay. It is non sensible to require resource consent for new above ground infrastructure within the Special Port Zone where by its very nature above ground infrastructure must be located where it is required to support operational Port activities.	Seeks that the Special Purpose Port Zone is excluded from INF-NH-R60 (New above ground infrastructure in Natural Hazard Overlays and Coastal Hazard Overlays).
Wellington International Airport Ltd	406.157	Energy Infrastructure and Transport / Infrastructure Natural Hazards / INF-NH-R60	Oppose in part	Opposes INF-NH-R60. [See paragraphs 4.85 to 4.91 in original submission for full reason]	Opposes INF-NH-R60 (New above ground infrastructure in Natural Hazard Overlays and Coastal Hazard Overlays) in part and seeks amendment.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Wellington International Airport Ltd	406.158	Energy Infrastructure and Transport / Infrastructure Natural Hazards / INF-NH-R60	Amend	Opposes INF-NH-R60. [See paragraphs 4.85 to 4.91 in original submission for full reason]	Amend INF-NH-R60 (New above ground infrastructure in Natural Hazard Overlays and Coastal Hazard Overlays) as follows: 1. Activity status: Permitted Where: a. The infrastructure is located within: ... <u>vi. High hazard area of the Coastal Hazard Overlay within the Natural Open Space Zone between Lyall Bay and Moa Point.</u> 2. Activity status: Restricted Discretionary Where: a. The infrastructure is located within the: ... iv. High hazard area of the Coastal Hazard Overlay outside of the City Centre Zone <u>or outside of the Natural Open Space Zone between Lyall Bay and Moa Point.</u> ...
Toka Tū Ake EQC	FS70.87	Part 2 / Energy Infrastructure and Transport / Infrastructure Natural Hazards / INF-NH-R60	Oppose	The coast between Lyall Bay and Moa Point is subject to multiple coastal hazards, particularly coastal inundation, erosion and tsunamis. This area is also at risk from liquefaction in the event of an earthquake. Coastal hazard risk will increase in the near future due to sea level rise and other effects of climate change. Limiting restriction on infrastructure development in this area may allow for development in inappropriate areas which are not sustainable in the long term. [Inferred reference to submission point 406.158]	Disallow
Wellington International Airport Ltd	406.159	Energy Infrastructure and Transport / Infrastructure Natural Hazards / INF-NH-R60	Amend	Opposes INF-NH-R60. [See paragraphs 4.85 to 4.91 in original submission for full reason]	Delete INF-NH-R60 (New above ground infrastructure in Natural Hazard Overlays and Coastal Hazard Overlays) in its entirety.
Toka Tū Ake EQC	FS70.90	Part 2 / Energy Infrastructure and Transport / Infrastructure Natural Hazards / INF-NH-R60	Oppose	The coast between Lyall Bay and Moa Point is subject to multiple coastal hazards, particularly coastal inundation, erosion and tsunamis. This area is also at risk from liquefaction in the event of an earthquake. Coastal hazard risk will increase in the near future due to sea level rise and other effects of climate change. Limiting restriction on infrastructure development in this area may allow for development in inappropriate areas which are not sustainable in the long term. [Inferred reference to submission point 406.159]	Disallow
KiwiRail Holdings Limited	408.81	Energy Infrastructure and Transport / Infrastructure Natural Hazards / INF-NH-R60	Support	Supports provision for new above ground infrastructure within hazard overlays as a permitted or restricted discretionary activity if standards cannot be met.	Retain INF-NH-R60 (New above ground infrastructure in Natural Hazard Overlays and Coastal Hazard Overlays) as notified.
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	99.57	Energy Infrastructure and Transport / Infrastructure Other Overlays / General INF-OL	Oppose	The preamble to this section states that the notable trees chapter applies. All infrastructure notable tree rules should be included in the Other Overlays Sub Chapter. Rule TREE-S4 in the notable trees chapter should be a standard in the Other Overlays Sub-Chapter.	Amend the other Infrastructure Overlays Sub-Chapter as necessary such that the general notable trees chapter does not apply and all rules and standards for infrastructure work affecting notable trees is included within the Infrastructure Other Overlays Sub-Chapter.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Powerco Limited	127.37	Energy Infrastructure and Transport / Infrastructure Other Overlays / General INF-OL	Oppose in part	Considers that there are a number of piped awa shown in the SASM mapped overlay. This are located in built up areas of central Wellington. It is unclear if undertaking infrastructure work above these piped awa (e.g., routine work in roads) are considered to impact in this overlay, or if it is only if the piped awa is physically altered. This should be clearly clarified in the rules.	Amend the Infrastructure - Other Overlay rules relating to Sites and Areas of Significance to Māori as necessary to clarify that work not directly affecting a piped awa (e.g. infrastructure work in the roads above) is not affected by the overlay and related rules.
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	99.58	Energy Infrastructure and Transport / Infrastructure Other Overlays / New INF-OL	Amend	Standard TREE-S4 should be relocated from the Notable Trees chapter to the Infrastructure – Other Overlays Sub-Chapter. The current wording is based on the Auckland Unitary Plan and was requested by the telecommunications submitters on the draft plan.	Seeks that TREE-S4 (Works in the root protection area) be relocated to the Infrastructure - Other Overlays sub-chapter.
Transpower New Zealand Limited	315.153	Energy Infrastructure and Transport / Infrastructure Other Overlays / INF-OL-P62	Amend	<p>Considers, in terms of existing National Grid assets, in addition to single sites and features, the National Grid traverses the heritage area at Wilton (being the Otari Native Botanic Garden), the Old Coach Road in Johnsonville, a number of Sites of Significance to Māori (lines), Sites of Significance to Maori (Extent) including Kumuhore Ngakingaan and Ohariu-the Ika a Maru Takiwā, and a Site and Area of Significance to Maori at Oteranga Bay. Considers that, while Transpower endeavours to avoid the overlay areas identified in INF-OL-P62, given the linear nature of the National Grid and its associated operational and technical constraints, avoidance is not always practicable. Supports reference within the policy to INF-P6.</p> <p>In terms of the specific wording of the policy, Transpower makes the following comments:</p> <p>- Considers the term ‘give priority’ is not a common planning term and may give rise to interpretation issues. If the term in effect means avoid submitter is opposed. Recommends instead that the term be amended to ‘Seek’</p> <p>- Does not support the term ‘where possible’ as considers it sets a very high bar. Considers the term ‘practicable’ is more widely understood and has been agreed through consent order in the Greater Wellington Regional Council Proposed Natural Resource Plan. Transpower would support this term.</p>	<p>Amend INF-OL-P62 (Adverse effects of infrastructure on: 1. Historic heritage; 2. Notable trees; 3. Sites and areas of significance to Māori; and 4. Viewshafts) as follows:</p> <p>INF-OL-P62 Adverse effects of infrastructure on:</p> <ol style="list-style-type: none"> 1. Historic heritage; 2. Notable trees; 3. Sites and areas of significance to Māori; and 4. Viewshafts. <p>In the overlays identified in clauses 1-4 above:</p> <p>a. Give priority Seek to avoiding the adverse effects of substantial upgrades to, or the development of new infrastructure, on the values and attributes of the above overlays; and</p> <p>b. where the avoidance of adverse effects under clause a. is not possible practicable, the appropriateness of the substantial upgrades to, or the development of, new infrastructure will be determined by having regard to the matters listed in INF-P6.</p>
Waka Kotahi	370.148	Energy Infrastructure and Transport / Infrastructure Other Overlays / INF-OL-P62	Support	Considers these provisions provide clear guidance in how to balance different interests where infrastructure overlaps with other areas and values.	Retain INF-OL-P62 (Adverse effects of infrastructure on: 1. Historic heritage; 2. Notable trees; 3. Sites and areas of significance to Māori; and 4. Viewshafts.) as notified.
CentrePort Limited	402.78	Energy Infrastructure and Transport / Infrastructure Other Overlays / INF-OL-P62	Support	Support the intent of this policy.	Retain INF-OL-P62 (Adverse effects of infrastructure on: Historic heritage; Notable trees; Sites and areas of significance to Māori; and Viewshafts) as notified.
Wellington International Airport Ltd	406.160	Energy Infrastructure and Transport / Infrastructure Other Overlays / INF-OL-P62	Oppose	<p>Opposes INF-OL-P62.</p> <p>Considers that use of the term “possible” within limb b should be amended to “practicable”. “Possible” is defined as “able to be done or achieved”. This sets a unreasonably high threshold, as it may be “possible” to avoid and effect, but is not “practicable” due to siting, design and costing constraints (for example).</p> <p>[See paragraphs 4.81 to 4.84 of original submission for full reason]</p>	Opposes INF-OL-P62 (Adverse effects of infrastructure) and seeks amendment.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Wellington International Airport Ltd	406.161	Energy Infrastructure and Transport / Infrastructure Other Overlays / INF-OL-P62	Amend	<p>Opposes INF-OL-P62.</p> <p>Considers that use of the term “possible” within limb b should be amended to “practicable”. “Possible” is defined as “able to be done or achieved”. This sets a unreasonably high threshold, as it may be “possible” to avoid and effect, but is not “practicable” due to siting, design and costing constraints (for example).</p> <p>[See paragraphs 4.81 to 4.84 of original submission for full reason]</p>	<p>Amend INF-OL-P62 (Adverse effects of infrastructure) as follows:</p> <p>...</p> <p>In the overlays identified in clauses 1-4 above:</p> <p>...</p> <p>b. Where the avoidance of adverse effects under clause a. is not possible <u>reasonably practicable</u>, the appropriateness of the substantial upgrades to, or the development of, new infrastructure will be determined by having regard to the matters listed in INF-P6.</p> <p>...</p>
Wellington International Airport Ltd	406.162	Energy Infrastructure and Transport / Infrastructure Other Overlays / INF-OL-P62	Amend	<p>Opposes INF-OL-P62.</p> <p>Considers that use of the term “possible” within limb b should be amended to “practicable”. “Possible” is defined as “able to be done or achieved”. This sets a unreasonably high threshold, as it may be “possible” to avoid and effect, but is not “practicable” due to siting, design and costing constraints (for example).</p> <p>[See paragraphs 4.81 to 4.84 of original submission for full reason]</p>	Delete INF-OL-P62 (Adverse effects of infrastructure) in its entirety.
KiwiRail Holdings Limited	408.82	Energy Infrastructure and Transport / Infrastructure Other Overlays / INF-OL-P62	Support	Supports policy where if avoidance of adverse effects on values and attributes of the other overlays isn't possible, assessment against matters listed in INF-P6 will determine whether the infrastructure is appropriate.	Retain INF-OL-P62 (Adverse effects of infrastructure on: Historic heritage; Notable trees; Sites and areas of significance to Māori; and Viewshafts) as notified.
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	99.59	Energy Infrastructure and Transport / Infrastructure Other Overlays / INF-OL-R61	Oppose	Maintenance and upgrading of underground infrastructure is permitted subject to conditions. Aside from viewshafts, earthworks are only permitted to the extent they are not located in areas undisturbed by <u>the</u> infrastructure. Further allowances where the ground has been disturbed by other infrastructure or road transport infrastructure is sought to this rule.	<p>Amend Rule INF-OL-R61 (Maintenance or upgrading of existing underground infrastructure in Other Overlays) as follows:</p> <p>1. Activity status: Permitted Where:</p> <p>a. The infrastructure is located on <u>a</u> site within a viewshaft listed in SCHED5; and/or</p> <p><u>b. The maintenance or upgrading does not involve earthworks on ground previously undisturbed by the infrastructure, or is located within a formed road corridor; or</u></p> <p><u>c. In the case of works within the protected root zone of a notable tree, complies with [new rule reference on Overlays Sub-Chapter for TREE-S4]</u></p>
Powerco Limited	127.38	Energy Infrastructure and Transport / Infrastructure Other Overlays / INF-OL-R61	Oppose	Considers that further allowances where the ground has been disturbed by other infrastructure or road transport infrastructure should be included in this rule.	<p>Amend Rule INF-OL-R61 (Maintenance or upgrading of existing underground infrastructure in Other Overlays) as follows:</p> <p>1. Activity status: Permitted</p> <p>Where:</p> <p>a. The infrastructure is located within a viewshaft listed in SCHED5; and/or</p> <p>b. The maintenance or upgrading does not involve earthworks on ground previously undisturbed by the infrastructure; or is located within a formed road corridor; or</p> <p><u>c. In the case of works within the protected root zone of a notable tree, complies with TREE-S4.</u></p>
Wellington Electricity Lines Limited (WELL)	FS27.15	Part 2 / Energy Infrastructure and Transport / Infrastructure Other Overlays / INF-OL-R61	Support	WELL consider that the Submitters amendments to INF-OL-R61 are sensible in regard to enabling standard network utility operator activities to occur within Outstanding Landscape areas which will not cause an adverse effect on the environment. WELL agree that enabling such activities within the road reserve as a permitted activity will help ensure that adverse environmental effects will be avoided given the already modified environment.	Allow

KiwiRail Holdings Limited	408.84	Energy Infrastructure and Transport / Infrastructure Other Overlays / INF-OL-R62	Support	Supports the ability to install new underground infrastructure in other overlays as a restricted discretionary activity.	Retain INF-OL-R62 (New underground infrastructure in Other Overlays) as notified.
Waka Kotahi	370.151	Energy Infrastructure and Transport / Infrastructure Other Overlays / INF-OL-R63	Support	Considers these provisions provide clear guidance in how to balance different interests where infrastructure overlaps with other areas and values.	Retain INF-OL-R63 (New aboveground customer connection lines in Other Overlays) as notified.
Wellington Heritage Professionals	412.27	Energy Infrastructure and Transport / Infrastructure Other Overlays / INF-OL-R63	Oppose	Considers that customer connections at heritage areas, heritage structures and archaeological sites should also be controlled as these places have values that are at least as significant as heritage buildings and SASMs.	Retain Rule INF-OL-R63 (New aboveground customer connection lines in Other Overlays) with amendment.
Wellington Heritage Professionals	412.28	Energy Infrastructure and Transport / Infrastructure Other Overlays / INF-OL-R63	Amend	Considers that customer connections at heritage areas, heritage structures and archaeological sites should also be controlled as these places have values that are at least as significant as heritage buildings and SASMs.	Amend Rule INF-OL-R63 (New aboveground customer connection lines in Other Overlays) so that within heritage areas and archaeological sites it is a controlled activity.
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	FS25.29	Part 2 / Energy Infrastructure and Transport / Infrastructure Other Overlays / INF-OL-R63	Oppose	Permitted activity status for customer connections in heritage areas and archaeological sites as notified is preferred to minimise unnecessary regulation for routine service connections which reflect the pattern of development and general values of these areas in any case. Connections to the fabric of scheduled buildings is a controlled activity to address the method of connection in those instances.	Disallow
Powerco Limited	FS61.43	Part 2 / Energy Infrastructure and Transport / Infrastructure Other Overlays / INF-OL-R63	Oppose	Permitted activity status for customer connections in heritage areas and archaeological sites as notified is preferred to minimise unnecessary regulation for routine service connections which reflect the pattern of development and general values of these areas in any case. Connections to the fabric of scheduled buildings is a controlled activity to address the method of connection in those instances.	Disallow
Transpower New Zealand Limited	315.156	Energy Infrastructure and Transport / Infrastructure Other Overlays / INF-OL-R64	Support	Supports the rules and accompanying activity status, noting the NESETA applies to existing National Grid assets.	Retain Rule INF-OL-R64 (Operation, maintenance and repair, or removal, of existing aboveground infrastructure in Other Overlays) as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Waka Kotahi	370.152	Energy Infrastructure and Transport / Infrastructure Other Overlays / INF-OL-R64	Support	Considers these provisions provide clear guidance in how to balance different interests where infrastructure overlaps with other areas and values.	Retain INF-OL-R64 (Operation, maintenance and repair, or removal, of existing aboveground infrastructure in Other Overlays) as notified.
CentrePort Limited	402.81	Energy Infrastructure and Transport / Infrastructure Other Overlays / INF-OL-R64	Support	Support the intent of this rule.	Retain INF-OL-R64 (Operation, maintenance and repair, or removal, of existing aboveground infrastructure in Other Overlays) as notified.
Wellington International Airport Ltd	406.163	Energy Infrastructure and Transport / Infrastructure Other Overlays / INF-OL-R64	Support	[See paragraphs 4.81 to 4.84 of original submission for full reason]	Retain INF-OL-R64 (Operation, maintenance and repair, or removal, of existing aboveground infrastructure in Other Overlays) as notified.
KiwiRail Holdings Limited	408.85	Energy Infrastructure and Transport / Infrastructure Other Overlays / INF-OL-R64	Support	Supports the ability to operate, maintain, repair and remove existing above ground infrastructure within other overlays as a permitted activity.	Retain INF-OL-R64 (Operation, maintenance and repair, or removal, of existing aboveground infrastructure in Other Overlays) as notified.
Transpower New Zealand Limited	315.157	Energy Infrastructure and Transport / Infrastructure Other Overlays / INF-OL-R65	Support	Supports the rules and accompanying activity status, noting the NESETA applies to existing National Grid assets.	Retain Rule INF-OL-R65 (Upgrading of existing aboveground infrastructure in Other Overlays) as notified.
Waka Kotahi	370.153	Energy Infrastructure and Transport / Infrastructure Other Overlays / INF-OL-R65	Support	Considers these provisions provide clear guidance in how to balance different interests where infrastructure overlaps with other areas and values.	Retain INF-OL-R65 (Upgrading of existing aboveground infrastructure in Other Overlays) as notified.
Taranaki Whānui ki te Upoko o te Ika	389.61	Energy Infrastructure and Transport / Infrastructure Other Overlays / INF-OL-R65	Not specified	Seeks clarification of the relationship between rule and Category A Sites and areas of significance.	Clarify how Category A Sites and areas of significance fits in rule INF-OL-R65 (Upgrading of existing aboveground infrastructure in Other Overlays).
CentrePort Limited	402.82	Energy Infrastructure and Transport / Infrastructure Other Overlays / INF-OL-R65	Support	Support the intent of this rule.	Retain INF-OL-R65 (Upgrading of existing aboveground infrastructure in Other Overlays) as notified.
Wellington International Airport Ltd	406.164	Energy Infrastructure and Transport / Infrastructure Other Overlays / INF-OL-R65	Oppose in part	Considers that both limbs 1 and 2 reference Category A of the Schedule 7. It is therefore not clear which rule applies to Category A Sites and areas of significance to Māori. Supports INF-OL-R65, subject to submitters proposed amendments to INF-OL-P62 being accepted.	Opposes INF-OL-R65 (Upgrading of existing aboveground infrastructure in Other Overlays) and seeks amendment.
Wellington International Airport Ltd	406.165	Energy Infrastructure and Transport / Infrastructure Other Overlays / INF-OL-R65	Oppose in part	Considers that both limbs 1 and 2 reference Category A of the Schedule 7. It is therefore not clear which rule applies to Category A Sites and areas of significance to Māori. Supports INF-OL-R65, subject to submitters proposed amendments to INF-OL-P62 being accepted.	Delete INF-OL-R65 (Upgrading of existing aboveground infrastructure in Other Overlays) in its entirety.
Wellington International Airport Ltd	406.166	Energy Infrastructure and Transport / Infrastructure Other Overlays / INF-OL-R65	Amend	Considers that both limbs 1 and 2 reference Category A of the Schedule 7. It is therefore not clear which rule applies to Category A Sites and areas of significance to Māori. Supports INF-OL-R65, subject to submitters proposed amendments to INF-OL-P62 being accepted.	Seeks that INF-OL-R65 (Upgrading of existing aboveground infrastructure in Other Overlays) is amended to refer to either Category A or Category B areas (not both).
Wellington International Airport Ltd	406.167	Energy Infrastructure and Transport / Infrastructure Other Overlays / INF-OL-R65	Amend	Considers that both limbs 1 and 2 reference Category A of the Schedule 7. It is therefore not clear which rule applies to Category A Sites and areas of significance to Māori. Supports INF-OL-R65, subject to submitters proposed amendments to INF-OL-P62 being accepted.	If INF-OL-R65 (Upgrading of existing aboveground infrastructure in Other Overlays) is not amended to refer to either Category A or Category B areas (not both): Seeks that INF-OL-R65 is amended to refine the matters of discretion to reflect that operational and functional constraints of infrastructure mean that adverse effects cannot always be avoided, remedied or mitigated.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
KiwiRail Holdings Limited	408.86	Energy Infrastructure and Transport / Infrastructure Other Overlays / INF-OL-R65	Support	Supports the ability to upgrade existing infrastructure as a permitted activity and construct new infrastructure as a restricted discretionary activity within other overlays.	Retain INF-OL-R65 (Upgrading of existing aboveground infrastructure in Other Overlays) as notified.
Wellington Heritage Professionals	412.29	Energy Infrastructure and Transport / Infrastructure Other Overlays / INF-OL-R65	Amend	Considers that upgrading of infrastructure in heritage areas, archaeological sites and SASMs should also be restricted discretionary as these places have values that are at least as significant as heritage buildings and structures.	Amend Rule INF-OL-R65 (Upgrading of existing aboveground infrastructure in Other Overlays) so that within heritage areas, sites and areas of significance to maori and archaeological sites it is a restricted discretionary activity.
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	FS25.30	Part 2 / Energy Infrastructure and Transport / Infrastructure Other Overlays / INF-OL-R65	Oppose	Permitted activity status in the stated overlays is appropriate for upgrading of existing above ground infrastructure. Existing infrastructure already forms part of the values/visual environment of an area, and the extent of upgrades in managed by standard INF-S4.	Disallow
Powerco Limited	FS61.44	Part 2 / Energy Infrastructure and Transport / Infrastructure Other Overlays / INF-OL-R65	Oppose	Permitted activity status in the stated overlays is appropriate for upgrading of existing above ground infrastructure. Existing infrastructure already forms part of the values/visual environment of an area, and the extent of upgrades in managed by standard INF-S4.	Disallow
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	99.61	Energy Infrastructure and Transport / Infrastructure Other Overlays / INF-OL-R66	Oppose	All new above ground infrastructure and temporary infrastructure in Other Overlays not otherwise provided for is a restricted discretionary activity. It is considered that there is scope for some permitted activity allowances in heritage overlays such as telecommunications cabinets in roads complying with the permitted activity standards in the NESTF. These are small structures that would have minimal impact where within existing road corridors.	Amend Rule INF-OL-R66 (New aboveground infrastructure and temporary infrastructure in Other Overlays not otherwise provided for) by adding a new permitted activity clause as follows: <u>Activity status: Permitted</u> <u>Where:</u> <u>a. The infrastructure is located on a site identified in SCHED3 (Heritage areas) and is within a road; and</u> <u>b. Complies with the permitted activity standards (size, footprint area and group rules) of the NES-TF.</u>
Wellington Electricity Lines Limited (WELL)	FS27.5	Part 2 / Energy Infrastructure and Transport / Infrastructure Other Overlays / INF-OL-R66	Support	WELL support this submission point to the extent that minor network utility equipment (i.e., cabinets) should be enabled in the PDP to be placed within the road reserve of heritage areas. WELL agree with the submitter that such minor structures "...are small structures that would have minimal impact where within existing road corridors", and consequently consider that a permitted activity rule is appropriate from an effects perspective. The wording in the proposed sub-clause a put forward by the submitter is considered to adequately cover WELL's electricity distribution equipment to be contained within cabinets within the road reserve. The NES-TF does not apply to WELLS electricity distribution network, so sub-clause b as proposed by the submitter is not specifically supported by WELL.	Amend / Seeks that part of the submission in relation to sub clause a, be accepted as follows: <u>"a. The infrastructure is located on a site identified in SCHED3 (Heritage areas) and is within a road"</u> ...

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Powerco Limited	127.40	Energy Infrastructure and Transport / Infrastructure Other Overlays / INF-OL-R66	Oppose	Considers that there is scope for some permitted activity allowances in heritage overlays such as minor utility cabinets in roads. These are small structures that would have minimal impact where within existing road corridors. [Refer to image in original submission]	Amend Rule INF-OL-R66 (New aboveground infrastructure and temporary infrastructure in Other Overlays not otherwise provided for) by adding a new permitted activity clause as follows: ... <u>Activity status: Permitted</u> <u>Where:</u> <u>a. The infrastructure is located on a site identified in SCHED3 (Heritage areas) and is within a road; and</u> <u>b. Any minor network utility structures in roads do not exceed 2m high x 2m2 footprint area.</u>
Wellington Electricity Lines Limited (WELL)	FS27.13	Part 2 / Energy Infrastructure and Transport / Infrastructure Other Overlays / INF-OL-R66	Support	WELL support this submission point as it is agreed that there is scope for permitted activities for network utility operators within heritage overlays. WELL consider that the submitter is correct in identifying that small, or minor NUO structures (such as those contained within cabinets) will pose negligible adverse effects in any given areas subject to Heritage area overlays, and within the road reserve. WELL support the addition of the proffered permitted activity rule standard.	Allow
Transpower New Zealand Limited	315.158	Energy Infrastructure and Transport / Infrastructure Other Overlays / INF-OL-R66	Support	Supports the activity status and framework for new aboveground and temporary infrastructure within the defined Other Overlay areas. While Transpower endeavours to avoid the Overlay areas identified in INF-OL-P62, given the linear nature of the National Grid and its associated operational and technical constraints, avoidance is not always practicable.	Retain Rule INF-OL-R66 (New above ground infrastructure and temporary infrastructure in Other Overlays not otherwise provided for) as notified.
Waka Kotahi	370.154	Energy Infrastructure and Transport / Infrastructure Other Overlays / INF-OL-R66	Support	Considers these provisions provide clear guidance in how to balance different interests where infrastructure overlaps with other areas and values.	Retain INF-OL-R66 (New aboveground infrastructure and temporary infrastructure in Other Overlays not otherwise provided for) as notified.
CentrePort Limited	402.83	Energy Infrastructure and Transport / Infrastructure Other Overlays / INF-OL-R66	Support	Support the intent of this rule.	Retain INF-OL-R66 (New aboveground infrastructure and temporary infrastructure in Other Overlays not otherwise provided for) as notified.
Wellington International Airport Ltd	406.168	Energy Infrastructure and Transport / Infrastructure Other Overlays / INF-OL-R66	Support in part	Supports INF-OL-R66 in part, subject to submitters proposed amendments to INF-OL-P62 being adopted.	Retain INF-OL-R66 (New aboveground infrastructure and temporary infrastructure in Other Overlays not otherwise provided for) as notified, provided submitters amendment to INF-OL-R62 is adopted.
Wellington International Airport Ltd	406.169	Energy Infrastructure and Transport / Infrastructure Other Overlays / INF-OL-R66	Amend	[No specific reason given beyond decision requested - see original submission]	If submitters amendments to INF-OL-R62 (New aboveground infrastructure and temporary infrastructure in Other Overlays not otherwise provided for) are not adopted: Seeks that INF-OL-R66 is amended to refine the matters of discretion to reflect that operational and functional constraints of infrastructure mean that adverse effects cannot always be avoided, remedied or mitigated.
KiwiRail Holdings Limited	408.87	Energy Infrastructure and Transport / Infrastructure Other Overlays / INF-OL-R66	Support	Supports the ability to upgrade existing infrastructure as a permitted activity and construct new infrastructure as a restricted discretionary activity within other overlays.	Retain INF-OL-R66 (New aboveground infrastructure and temporary infrastructure in Other Overlays not otherwise provided for) as notified.
Victoria University of Wellington Students' Association	123.18	Energy Infrastructure and Transport / Renewable Electricity Generation / General REG	Not specified	[No specific reason given beyond decision requested - refer to original submission].	Seeks that native animals are considered when planning large-scale renewable electricity generation activities.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Avryl Bramley	202.30	Energy Infrastructure and Transport / Renewable Electricity Generation / General REG	Amend	[No specific reason given beyond decision requested - refer to original submission]	Seeks the removal of any provisions which restrict the ability of a property owner to generate own use power on site.
Bruce Crothers	319.5	Energy Infrastructure and Transport / Renewable Electricity Generation / General REG	Not specified	Considers that distributed solar generation should be encouraged and supported.	Not specified.
Royal Forest and Bird Protection Society	345.95	Energy Infrastructure and Transport / Renewable Electricity Generation / General REG	Not specified	Considers that for the overall chapter, the provisions should be no less protective than those in the ECO chapter. The provisions in this chapter should mirror the ECO provisions, with the amendments made as sought by F&B in respect of that chapter. Delete any references to 'operational need', and 'identified' values.	Amend the chapter to mirror the Ecosystems and Indigenous Biodiversity provisions, and be as protective as that chapter. Delete all references to "operational need" and "identified" values in the chapter.
Meridian Energy Limited	FS101.78	Part 2 / Energy Infrastructure and Transport / Renewable Electricity Generation / General REG	Oppose	Considers that it is not necessary to include the same level of protection as in the ECO chapter because the objectives and policies of that chapter apply anyway. Operational need is a valid consideration in the policy framework, particularly for regionally significant infrastructure, and ensures the Plan gives effect to the NPS-Renewable Electricity Generation. The values considered in the policy framework should be those identified in the Plan as the basis for identification of the area in the Plan Schedule(s).	Disallow
Royal Forest and Bird Protection Society	345.96	Energy Infrastructure and Transport / Renewable Electricity Generation / General REG	Oppose in part	Considers the Introduction is silent on the potential adverse effects from renewable electricity generation on indigenous biodiversity, landscape and natural character values. Amend to make it clear that these are important values that may be adversely affected, and which require protection.	Amend REG-Introduction to clarify that indigenous biodiversity, landscape, and natural character values are important values that may be affected by renewable energy generation, and that these values require protection.
Meridian Energy Limited	FS101.79	Part 2 / Energy Infrastructure and Transport / Renewable Electricity Generation / General REG	Oppose	Considers that the potential for renewable electricity generation activities to create adverse environmental effects is acknowledged in the REG chapter (Objective REG-O2 and Policies REG-P3, REG-P4, REGP5, REG-P6, REG-7, REG-P8, REG-P9 and in the REG rules which require consents for certain REG activities to ensure potential adverse effects are assessed and managed.	Disallow
Royal Forest and Bird Protection Society	345.97	Energy Infrastructure and Transport / Renewable Electricity Generation / General REG	Oppose in part	Considers the objectives REG-O1 to REG-O4 are inadequate to protect indigenous biodiversity. Seeks that the objectives of the relevant chapters, including Ecosystems and Indigenous Biodiversity, Natural Character, Natural Features and Landscapes, and Coastal Environment apply to all Renewable Electricity Generation provisions. Alternatively, seeks that a comprehensive set of objectives to be included into the REG chapter to provide for these matters, mirroring the objectives of the aforementioned chapters. Notes that the key NPS policy is C2: When considering any residual environmental effects of renewable electricity generation activities that cannot be avoided, remedied or mitigated, decision-makers shall have regard to offsetting measures or environmental compensation including measures or compensation which benefit the local environment and community affected.	Amend chapter so that Ecosystems and Indigenous Biodiversity, Natural Character, Natural Features and Landscapes, and Coastal Environment objectives all apply to Renewable Energy Generation provisions, and ensure that NPS policy C2 is given effect to through the objectives.
Meridian Energy Limited	FS101.80	Part 2 / Energy Infrastructure and Transport / Renewable Electricity Generation / General REG	Oppose	Considers that the potential for renewable electricity generation activities to create adverse environmental effects is acknowledged in the REG chapter (Objective REG-O2 and Policies REG-P3, REG-P4, REGP5, REG-P6, REG-7, REG-P8, REG-P9 and in the REG rules which require consents for certain REG activities to ensure potential adverse effects are assessed and managed. The objectives and policies that describe the values of indigenous biodiversity, landscape and natural character are set out in the relevant ECO chapters (ECO, NFL,NATC).	Disallow

Energy, Infrastructure and Transport - Renewable Energy Generation

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Greater Wellington Regional Council	351.100	Energy Infrastructure and Transport / Renewable Electricity Generation / General REG	Support	Supports the provisions and direction in this chapter, including the recognition of the contributions that renewable energy can make to greenhouse gas emissions reduction. The chapter enables small scale renewable energy generation and provides for community and large-scale renewable energy generation. This direction is consistent with Proposed RPS Change 1 climate change policies, particularly Policy 11, and connects to the SRCC strategic objectives.	Retain provision, subject to amendments, as outlined other submission points.
BP Oil New Zealand, Mobil Oil New Zealand Limited and Z Energy Limited (the Fuel Companies)	372.69	Energy Infrastructure and Transport / Renewable Electricity Generation / General REG	Support	The Renewable Electricity Generation chapter is supported, as it signals a direction to reduce carbon emissions and effects on climate change through the use of renewable energy technologies. This direction is reflected in the Renewable Energy Generation chapter which seeks to enable large and small-scale renewable energy investigation and generation activities.	Retain the Renewable Electricity Generation chapter as notified.
350 Wellington	396.1	Energy Infrastructure and Transport / Renewable Electricity Generation / General REG	Not specified	Supports the enabling and encouraging small and community-scale renewable energy generation projects.	Not specified.
Meridian Energy Limited	228.31	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-O1	Support	Considers the objective gives effect to the NPS-REG, the plan's Strategic Objectives and promotes an increase in renewable electricity generation.	Retain Objective REG-O1 (Benefits of renewable energy use and development) as notified.
Transpower New Zealand Limited	315.159	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-O1	Support	Supports the directive of the objective to enable the use and development of the renewable energy sources.	Retain Objective REG-O1 (Benefits of renewable energy use and development) as notified.
Greater Wellington Regional Council	351.101	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-O1	Amend	Considers the District Plan going as far as it can to promote energy efficient design of buildings and developments, including alterations to have regard to Policy 11 of Proposed RPS Change 1.	Seeks to ensure the renewable electricity generation and subdivision provisions have regard to Policy 11 of Proposed RPS Change 1 such that the District Plan goes as far as it can to promote energy efficient design of buildings and developments and enable renewable energy generation. This could also include provisions in the zones chapters.
Meridian Energy Limited	FS101.81	Part 2 / Energy Infrastructure and Transport / Renewable Electricity Generation / REG-O1	Support	Considers that the original submission seeks to ensure the renewable electricity generation provisions in the Plan go as far as they can to promote energy efficient design of buildings and enable renewable energy generation. Meridian agrees this is important in order to facilitate the transition from fossil fuel dependence to low or zero emissions economy (this being part of the purpose of GWRC's proposed RPS Change No. 1). Meridian considers there is scope for the Plan to do better in this regard and its own submission proposes refinements to better achieve the outcome GWRC seeks. Meridian does not agree that additional provisions in zone chapters are required to achieve this outcome (the framework of a self-contained REG chapter plus objectives and policies addressing other values in other chapters works well for this purpose).	Disallow / Seeks to retain the structure of the Plan as notified and, otherwise, allow the submission point and the amendments Meridian and other submitters seek to better enable the generation of electricity from renewable sources.
Wellington International Airport Ltd	406.170	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-O1	Support	Supports REG-O1 insofar as it encourage and enable the development of renewable energy and thus will help submitter achieve its sustainability and climate change goals. [See paragraph 4.25 to 4.29 of original submission for further detail.]	Retain REG-O1 (Benefits of renewable energy use and development) as notified.
M&P Makara Family Trust	159.2	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-O2	Amend	Considers that the addition of "...and the potential national benefits" subsequent to the DDP is unnecessary. National benefit is recognised by REG-O1 and unfairly weights REG-O2 in favour of the renewable generation activity, which is and should not be not the point of this Objective. Between the two objectives the appropriate balance is achieved.	Amend REG-O2 (Adverse effects of renewable electricity generation activities) as follows: The actual and potential adverse effects on the environment and communities of the investigation, development, operation, maintenance and repair, and upgrading of renewable electricity generation activities are effectively managed, while recognising the functional needs and operational needs of renewable electricity generation activities and the potential national benefits.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Meridian Energy Limited	FS101.82	Part 2 / Energy Infrastructure and Transport / Renewable Electricity Generation / REG-O2	Oppose	Considers that the recognition of the potential national benefits is relevant in both objectives is appropriate.	Disallow
Meridian Energy Limited	228.32	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-O2	Support in part	Supports the outcome sought by Objective REG-O2 (adverse effects of renewable electricity generation activities) but considers the wording might be improved by deleting some superfluous words.	Retain Objective REG-O2 (Adverse effects of renewable electricity generation activities) with amendment.
Meridian Energy Limited	228.33	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-O2	Amend	Supports the outcome sought by Objective REG-O2 (adverse effects of renewable electricity generation activities) but considers the wording might be improved by deleting some superfluous words.	Amend Objective REG-O2 (Adverse effects of renewable electricity generation activities) as follows: The actual and potential adverse effects on the environment and communities of the investigation, development, operation, maintenance and repair, and upgrading of renewable electricity generation activities are effectively managed, while recognising the functional needs and operational needs of renewable electricity generation activities and the potential national benefits.
Royal Forest and Bird Protection Society	345.98	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-O2	Oppose in part	In addition to the above submission point, considers that REG-O2 needs revision to clarify that certain natural values need protection, rather than adverse effects being 'effectively managed'.	Amend REG-O2 (Adverse effects of renewable electricity generation activities) to clarify that some values require protection.
Meridian Energy Limited	FS101.83	Part 2 / Energy Infrastructure and Transport / Renewable Electricity Generation / REG-O2	Oppose	Considers that the clarification that certain values need protection is provided in the relevant chapters addressing natural features and landscapes, indigenous biodiversity, heritage etc.	Disallow
Wellington International Airport Ltd	406.171	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-O2	Support	Supports REG-O2 insofar as it encourage and enable the development of renewable energy and thus will help submitter achieve its sustainability and climate change goals. [See paragraph 4.25 to 4.29 of original submission for further detail.]	Retain REG-O2 (Adverse effects of renewable electricity generation activities) as notified.
Meridian Energy Limited	228.34	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-O3	Support	Considers the objective is important for maintaining the operability and efficiency of existing renewable electricity generation activities.	Retain Objective REG-O3 (Adverse effects on renewable electricity generation activities) as notified.
Wellington International Airport Ltd	406.172	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-O3	Support	Supports REG-O3 insofar as it encourage and enable the development of renewable energy and thus will help submitter achieve its sustainability and climate change goals. [See paragraph 4.25 to 4.29 of original submission for further detail.]	Retain REG-O3 (Adverse effects on renewable electricity generation activities) as notified.
Greater Wellington Regional Council	351.102	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-O4	Amend	Considers the District Plan going as far as it can to promote energy efficient design of buildings and developments, including alterations to have regard to Policy 11 of Proposed RPS Change 1.	Seeks to ensure the renewable electricity generation and subdivision provisions have regard to Policy 11 of Proposed RPS Change 1 such that the District Plan goes as far as it can to promote energy efficient design of buildings and developments and enable renewable energy generation. This could also include provisions in the zones chapters.
Wellington International Airport Ltd	406.173	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-O4	Support	Supports REG-O4 insofar as they encourage and enable the development of renewable energy and thus will help submitter achieve its sustainability and climate change goals. [See paragraph 4.25 to 4.29 of original submission for further detail.]	Retain REG-O4 (Energy efficiency and conservation) as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Meridian Energy Limited	228.35	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P1	Support	Considers that Policy REG-P1 is necessary to give effect to the NPS-REG and the Plan's Reg and Strategic objectives.	Retain Policy REG-P1 (Recognising the significance and benefits of the use and development of renewable energy) as notified.
Transpower New Zealand Limited	315.160	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P1	Support	Supports the policy recognition of the benefits of the use and development of renewable energy sources and generation.	Retain Policy REG-P1 (Recognising the significance and benefits of the use and the development of renewable energy) as notified.
Royal Forest and Bird Protection Society	345.99	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P1	Support in part	Considers that as the objectives and policies of the Natural Environment Values and Coastal Environment chapters are not intended to apply to this chapter, this policy needs to include clauses recognising that natural values need to be protected, and may be adversely impacted by renewable generation.	Amend REG-P1 (Recognising the significance and benefits of the use and development of renewable energy) to include clauses recognising that natural values need protection as they may be adversely affected by renewable energy generation.
M&P Makara Family Trust	FS41.31	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P1	Support	While the intent of the PDP and the REG chapter is to create an easier pathway for renewable energy generation, the underlying natural, coastal and ecological and cultural values need to be recognised and maintained. Wind turbines in particular are temporary structures and can be removed so retention and protection of the underlying landscape values should be supported where possible for future benefit. "Adaptive management" complicates the RMA s5(2)(c) requirement for effects to be avoided, remedied or mitigated, and it's beneficial relationship to the "environment or affected community" limits the necessary considerations.	Allow
Meridian Energy Limited	FS101.84	Part 2 / Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P1	Oppose	Considers that the clarification that certain values need protection is provided in the relevant chapters addressing natural features and landscapes, indigenous biodiversity, heritage etc.	Disallow
Greater Wellington Regional Council	351.103	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P1	Amend	Considers the District Plan going as far as it can to promote energy efficient design of buildings and developments, including alterations to have regard to Policy 11 of Proposed RPS Change 1.	Seeks to ensure the renewable electricity generation and subdivision provisions have regard to Policy 11 of Proposed RPS Change 1 such that the District Plan goes as far as it can to promote energy efficient design of buildings and developments and enable renewable energy generation. This could also include provisions in the zones chapters.
Wellington International Airport Ltd	406.174	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P1	Support	Supports REG-P1 insofar as they encourage and enable the development of renewable energy and thus will help submitter achieve its sustainability and climate change goals. [See paragraph 4.25 to 4.29 of original submission for further detail.]	Retain REG-P1 (Recognising the significance and benefits of the use and development of renewable energy) as notified.
Meridian Energy Limited	228.36	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P2	Support	Considers that Policy Reg-P2 is necessary to give effect to the NPS-REG and the Plan's REG and Strategic objectives.	Retain Policy REG-P2 (Providing for renewable electricity generation activities) as notified.
Transpower New Zealand Limited	315.161	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P2	Support	Supports the policy recognition of the constraints and needs of renewable electricity generation activities, and the benefits of locating renewable electricity generation activities close to end use and to electricity transmission infrastructure. Considers the policy provides the framework to appropriately consider the issues with renewable electricity generation	Retain Policy RED-P2 (Providing for renewable electricity generation activities) as notified.
Royal Forest and Bird Protection Society	345.100	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P2	Oppose in part	Considers that the policy is silent on the need to protect natural values. Given that the objectives and policies of the Natural Environment Values and Coastal Environment chapters are not intended to apply to this chapter, considers this policy needs to be amended to include clauses requiring that natural and coastal values are protected and should also clarify what the relationship between this policy and the later policies of this chapter are, as the later policies already appear to provide comprehensive decision making guidance	Amend REG-P2 (Providing for renewable electricity generation activities) to include clauses recognising that natural values need protection, and clarify the relationship between this policy and subsequent policies.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
M&P Makara Family Trust	FS41.32	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P2	Support	While the intent of the PDP and the REG chapter is to create an easier pathway for renewable energy generation, the underlying natural, coastal and ecological and cultural values need to be recognised and maintained. Wind turbines in particular are temporary structures and can be removed so retention and protection of the underlying landscape values should be supported where possible for future benefit. "Adaptive management" complicates the RMA s5(2)(c) requirement for effects to be avoided, remedied or mitigated, and it's beneficial relationship to the "environment or affected community" limits the necessary considerations.	Allow
Meridian Energy Limited	FS101.85	Part 2 / Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P2	Oppose	Considers that the clarification that certain values need protection is provided in the relevant chapters addressing natural features and landscapes, indigenous biodiversity, heritage etc.	Disallow
Wellington International Airport Ltd	406.175	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P2	Support	Supports REG-P2 insofar as they encourage and enable the development of renewable energy and thus will help submitter achieve its sustainability and climate change goals. [See paragraph 4.25 to 4.29 of original submission for further detail.]	Retain REG-P2 (Providing for renewable electricity generation activities) as notified.
Meridian Energy Limited	228.37	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P3	Support	Considers provision for renewable electricity generation investigation activities in all areas is necessary to give effect to the NPS-REG and the Plan's REG and Strategic objectives.	Retain Policy REG-P3 (Renewable electricity generation investigation activities) as notified.
Royal Forest and Bird Protection Society	345.101	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P3	Oppose in part	In point 1, supports the intent to avoid overlays and other sensitive areas in this policy, the Plan has not identified all areas that may be sensitive and require protection under higher order document. For example other areas of natural character in the coastal environment are required to be protected under policy 13 NZCPS. Further, residential SNAs are currently not protected. The direction to enable these activities where effects are minimised is contrary to the requirement in s5(2)(c) that effects are avoided, remedied or mitigated. Effects might be 'minimised' but still be very significant. Amend to include more appropriate direction to create the least amount of effects, while also avoiding, remedying or mitigating. 'Enable' should be amended to 'consider enabling'.	Amend REG-P3 (Renewable electricity generation investigation activities): 1. Replace "enable" with "consider enabling". Amend to include direction to create least amount of effects while also avoiding, remedying, or mitigating remaining effects.
M&P Makara Family Trust	FS41.33	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P3	Support	While the intent of the PDP and the REG chapter is to create an easier pathway for renewable energy generation, the underlying natural, coastal and ecological and cultural values need to be recognised and maintained. Wind turbines in particular are temporary structures and can be removed so retention and protection of the underlying landscape values should be supported where possible for future benefit. "Adaptive management" complicates the RMA s5(2)(c) requirement for effects to be avoided, remedied or mitigated, and it's beneficial relationship to the "environment or affected community" limits the necessary considerations.	Allow
Meridian Energy Limited	FS101.86	Part 2 / Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P3	Oppose	Considers that the amendment inserting 'consider' adds no meaningful value to the policy.	Disallow

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Royal Forest and Bird Protection Society	345.102	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P3	Oppose in part	<p>In point 2, generally supports the requirement to avoid significant adverse effects in overlays and other sensitive areas. However, this does not give effect to areas that contain NZCPS policy 11(a) matters. In that case, all adverse effects must be avoided. Amend this policy to give effect to NZCPS.</p> <p>'Allow' should be changed to 'consider allowing'. Delete 'identified' for the reasons given elsewhere in this submission.</p> <p>The list of ways to avoid, remedy or mitigate effects is not appropriate to ensure that natural values are protected. For example, ii. says nothing about the circumstances in which effects may need to be avoided in order to protect the values present. It starts from a presumption that there will not be avoidance, and that the adverse effects will be acceptable, where they are kept as small as possible. In our view it is not appropriate to include an exhaustive list of how to deal with effects in sensitive areas – unless that list includes direction that nonsignificant effects may need to be avoided altogether.</p>	<p>Amend REG-P3 (Renewable electricity generation investigation activities):</p> <p>2. Replace "allow" with "consider allowing". Delete "identified" in point b. Amend to give effect to S11(a) of NZ Coastal Policy Statement. Remove list of ways to avoid, remedy, or mitigate effects.</p>
M&P Makara Family Trust	FS41.34	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P3	Support	<p>While the intent of the PDP and the REG chapter is to create an easier pathway for renewable energy generation, the underlying natural, coastal and ecological and cultural values need to be recognised and maintained. Wind turbines in particular are temporary structures and can be removed so retention and protection of the underlying landscape values should be supported where possible for future benefit. "Adaptive management" complicates the RMA s5(2)(c) requirement for effects to be avoided, remedied or mitigated, and it's beneficial relationship to the "environment or affected community" limits the necessary considerations.</p>	Allow
Meridian Energy Limited	FS101.87	Part 2 / Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P3	Oppose	<p>Considers that the amendment inserting 'consider' adds no meaningful value to the policy.</p>	Disallow
Wellington International Airport Ltd	406.176	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P3	Oppose in part	<p>Considers that the policy should expressly state which overlays apply to the site.</p> <p>Based on the subparagraphs, it appears to be confined to overlays relating to the natural environment, historic and cultural values and natural hazards. There are, however, a number of other overlays within the plan that are captured by the broad use of the term "overlay" which are in no way relevant to the establishment of renewable electricity generation.</p>	Opposes REG-P3 (Renewable electricity generation investigation activities) and seeks amendment.
Wellington International Airport Ltd	406.177	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P3	Amend	<p>Considers that the policy should expressly state which overlays apply to the site.</p> <p>Based on the subparagraphs, it appears to be confined to overlays relating to the natural environment, historic and cultural values and natural hazards. There are, however, a number of other overlays within the plan that are captured by the broad use of the term "overlay" which are in no way relevant to the establishment of renewable electricity generation.</p>	Seeks that REG-P3 (Renewable electricity generation investigation activities) is amended to refer to the specific overlays of relevance.
Victoria University of Wellington Students' Association	123.19	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P4	Support	<p>Supports REG-P4 in its entirety.</p>	Retain REG-P4 (Small scale renewable electricity generation outside Overlays, high coastal natural character areas, and coastal and riparian margins) as notified.
Meridian Energy Limited	228.38	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P4	Support	<p>Considers provision for all scales of renewable electricity in all areas is necessary to give effect to the NPS-REG and to the Plan's REG and Strategic objectives.</p>	Retain Policy REG-P4 (Small scale renewable electricity generation outside Overlays, high coastal natural character areas, and coastal and riparian margins) as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Royal Forest and Bird Protection Society	345.103	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P4	Oppose in part	Supports intent to avoid overlays and other sensitive areas in this policy, but considers the Plan has not identified all areas that may be sensitive and require protection under higher order document. For example other areas of natural character in the coastal environment are required to be protected under policy 13 NZCPS. Further, residential SNAs are currently not protected. Change 'enable' to 'consider enabling'.	Amend REG-P4 (Small scale renewable electricity generation outside Overlays, high coastal natural character areas, and coastal and riparian margins) to identify areas that may be sensitive and require protection under higher order documents. Change "enable" to "consider enabling".
M&P Makara Family Trust	FS41.35	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P4	Support	While the intent of the PDP and the REG chapter is to create an easier pathway for renewable energy generation, the underlying natural, coastal and ecological and cultural values need to be recognised and maintained. Wind turbines in particular are temporary structures and can be removed so retention and protection of the underlying landscape values should be supported where possible for future benefit. "Adaptive management" complicates the RMA s5(2)(c) requirement for effects to be avoided, remedied or mitigated, and it's beneficial relationship to the "environment or affected community" limits the necessary considerations.	Allow
Meridian Energy Limited	FS101.88	Part 2 / Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P4	Oppose	Considers that the amendment inserting 'consider' adds no meaningful value to the policy.	Disallow
Wellington International Airport Ltd	406.178	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P4	Oppose in part	Considers that the policy should expressly state which overlays apply to the site. Based on the subparagraphs, it appears to be confined to overlays relating to the natural environment, historic and cultural values and natural hazards. There are, however, a number of other overlays within the plan that are captured by the broad use of the term "overlay" which are in no way relevant to the establishment of renewable electricity generation.	Opposes REG-P4 (Small scale renewable electricity generation outside Overlays, high coastal natural character areas, and coastal and riparian margins) and seeks amendment.
Wellington International Airport Ltd	406.179	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P4	Amend	Considers that the policy should expressly state which overlays apply to the site. Based on the subparagraphs, it appears to be confined to overlays relating to the natural environment, historic and cultural values and natural hazards. There are, however, a number of other overlays within the plan that are captured by the broad use of the term "overlay" which are in no way relevant to the establishment of renewable electricity generation.	Seeks that REG-P4 (Small scale renewable electricity generation outside Overlays, high coastal natural character areas, and coastal and riparian margins) is amended to refer to the specific overlays of relevance.
Victoria University of Wellington Students' Association	123.20	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P5	Support	Supports REG-P5 in its entirety.	Retain REG-P5 (Small-scale renewable electricity generation activities within Overlays, high coastal natural character areas, and coastal and riparian margins) as notified.
Meridian Energy Limited	228.39	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P5	Support	Considers provision for all scales of renewable electricity in all areas is necessary to give effect to the NPS-REG and to the Plan's REG and Strategic objectives.	Retain Policy REG-P5 (Small-scale renewable electricity generation activities within Overlays, high coastal natural character areas, and coastal and riparian margins) as notified.
Royal Forest and Bird Protection Society	345.104	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P5	Oppose in part	Delete references to 'operational need', and 'identified' values. Change 'allow' to 'only allow' or 'consider allowing'. Point 3 - Considers the direction to enable these activities where effects are minimised is contrary to the requirement in s5(2)(c) that effects are avoided, remedied or mitigated. Effects might be 'minimised' but still be very significant. Amend to include more appropriate direction to create the least amount of effects, while also avoiding, remedying or mitigating.	Amend REG-P5 (Small-scale renewable electricity generation activities within Overlays, high coastal natural character areas, and coastal and riparian margins): <u>Consider Allowing</u> small scale renewable electricity generation activities within Overlays, high coastal natural character areas, or coastal margins and riparian margins within the coastal environment, where: ... 3. If located within an area identified as ridgelines and hilltops, any adverse effects on visual amenity and landscape values are minimised; <u>[Add direction to create least amount of effects while avoiding, remedying, or mitigating]</u> .

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
M&P Makara Family Trust	FS41.36	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P5	Support	While the intent of the PDP and the REG chapter is to create an easier pathway for renewable energy generation, the underlying natural, coastal and ecological and cultural values need to be recognised and maintained. Wind turbines in particular are temporary structures and can be removed so retention and protection of the underlying landscape values should be supported where possible for future benefit. "Adaptive management" complicates the RMA s5(2)(c) requirement for effects to be avoided, remedied or mitigated, and it's beneficial relationship to the "environment or affected community" limits the necessary considerations.	Allow
Meridian Energy Limited	FS101.89	Part 2 / Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P5	Oppose	Considers that the operational need is a relevant consideration. The values that should be considered are those that are identified for the relevant identified areas. The amendment inserting 'consider' adds no meaningful value to the policy. The requested 'direction' to create 'least amount of effects while avoiding, remedying or mitigating' doesn't make sense. The matters in NFL-P3, NFL-P4, ECO-P2, ECO-P7, CE-P5, CE-P6 and CE-P7 are matters to which regard should be had (not applied) in the consenting framework proposed by this Plan (consistent with s. 104 of the RMA). Policy REG-P5 correctly applies the mitigation hierarchy intended by the NZCPS for the coastal environment.	Disallow
Royal Forest and Bird Protection Society	345.105	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P5	Oppose in part	Delete references to 'operational need', and 'identified' values. Change 'allow' to 'only allow' or 'consider allowing'. Point 4 - Amend to include the same level of protection that SALs receive under the ONFL chapter. Amend a. to "The activity is of a scale and nature ...". Amend 'having regard to' the NFL policies to 'while applying'.	Amend REG-P5 (Small-scale renewable electricity generation activities within Overlays, high coastal natural character areas, and coastal and riparian margins): <u>Consider</u> <u>Allowing</u> small scale renewable electricity generation activities within Overlays, high coastal natural character areas, or coastal margins and riparian margins within the coastal environment, where: ... 4. If located within an area identified in SCHED11 - Special Amenity Landscapes: <u>Amend to include same level of protection as SALs receive under NFL chapter</u> a. The activity is of a scale <u>and nature</u> that maintains or restores the identified values, including restoration and conservation activities; b. Outside the coastal environment any adverse effects are avoided, remedied or mitigated; c. Within the coastal environment, any significant adverse effects are avoided and any other adverse effects are avoided, remedied or mitigated; and d. There is a functional need or operational need for the activity to be undertaken inside a Special Amenity Landscape and there are no reasonably practical alternative locations outside of these areas; while having regard to <u>applying</u> the matters in NFL-P3 and NFL-P4;
M&P Makara Family Trust	FS41.37	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P5	Support	While the intent of the PDP and the REG chapter is to create an easier pathway for renewable energy generation, the underlying natural, coastal and ecological and cultural values need to be recognised and maintained. Wind turbines in particular are temporary structures and can be removed so retention and protection of the underlying landscape values should be supported where possible for future benefit. The matters in ECO-P2, ECO-P3, ECO-P4, ECO-P7, CE-P5, CE-P6, CE-P7, NFLP2, NFL-P4, NFL-P5 and NFL-P6 are matters to which regard should be had (not applied) in the consenting framework proposed by this Plan (consistent with s. 104 of the RMA). The requested 'direction' to create 'least amount of effects while avoiding, remedying or mitigating' doesn't make sense. Any proposed adaptive management which may benefit the local environment is a relevant consideration and will be considered in accordance with APP2 and APP3 in any event.	Disallow
Royal Forest and Bird Protection Society	345.115	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P7	Support in part	Point 11 - Considers it is not clear how this paragraph apply in relation to the previous paragraphs of this policy. Amend to clarify.	Amend REG-P7 (Community scale generation in other zones and within sensitive areas): ... 11. There is an operational need or functional need for the identified location and there are no reasonable alternatives; and <u>[clarify how this point applies to previous points]</u>
Meridian Energy Limited	FS101.98	Part 2 / Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P7	Oppose	Considers that it is not necessary to include the same level of protection as in the ECO chapter because the objectives and policies of that chapter apply anyway. The matters in ECO-P2, ECO-P3, ECO-P4, ECO-P7, CE-P5, CE-P6, CE-P7, NFLP2, NFL-P4, NFL-P5 and NFL-P6 are matters to which regard should be had (not applied) in the consenting framework proposed by this Plan (consistent with s. 104 of the RMA). The requested 'direction' to create 'least amount of effects while avoiding, remedying or mitigating' doesn't make sense. Any proposed adaptive management which may benefit the local environment is a relevant consideration and will be considered in accordance with APP2 and APP3 in any event.	Disallow
Royal Forest and Bird Protection Society	345.116	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P7	Support in part	Points 12 - Considers it is not clear how this paragraph apply in relation to the previous paragraphs of this policy. Amend to clarify. In terms of 12.k., opposes term 'adaptive management'. Opposes the phrase 'which may benefit the local environment or the community affected' as this introduces a different consideration to the offsetting and compensation principles in APP2 and APP3.	Amend REG-P7 (Community scale generation in other zones and within sensitive areas): ... 12. Adverse effects are avoided, remedied or mitigated having regard to... <u>[clarify how this point applies to previous points]</u> k. Any adaptive management , offsetting measures or environmental compensation which may benefit the local environment or the community affected.
M&P Makara Family Trust	FS41.45	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P7	Support	While the intent of the PDP and the REG chapter is to create an easier pathway for renewable energy generation, the underlying natural, coastal and ecological and cultural values need to be recognised and maintained. Wind turbines in particular are temporary structures and can be removed so retention and protection of the underlying landscape values should be supported where possible for future benefit. "Adaptive management" complicates the RMA s5(2)(c) requirement for effects to be avoided, remedied or mitigated, and it's beneficial relationship to the "environment or affected community" limits the necessary considerations.	Allow
Meridian Energy Limited	FS101.99	Part 2 / Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P7	Oppose	Considers that it is not necessary to include the same level of protection as in the ECO chapter because the objectives and policies of that chapter apply anyway. The matters in ECO-P2, ECO-P3, ECO-P4, ECO-P7, CE-P5, CE-P6, CE-P7, NFLP2, NFL-P4, NFL-P5 and NFL-P6 are matters to which regard should be had (not applied) in the consenting framework proposed by this Plan (consistent with s. 104 of the RMA). The requested 'direction' to create 'least amount of effects while avoiding, remedying or mitigating' doesn't make sense. Any proposed adaptive management which may benefit the local environment is a relevant consideration and will be considered in accordance with APP2 and APP3 in any event.	Disallow

350 Wellington	396.2	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P7	Amend	<p>Considers that the wording in REG-P7 (Community-scale renewable electricity generation activities within other zones, locations and Overlays) should be amended to be more permissive and less restrictive, in line with other REG policies, regarding community-scale generation projects outside of the General Rural Zone.</p> <p>The wording in REG-P7, "Only allow community-scale renewable energy generation activities", currently means that approval for these projects must prove why they should be allowed as opposed to being evaluated for if there is cause to disallow them or require amendments. This is in contrast with wording in the majority of REG policies which is to "provide for" various scale renewable energy generation projects. REG-P7 projects should have wording to "Provide for" them, unless through the consenting process it is found that they are at odds with the restrictions outlined.</p>	<p>Amend REG-P7 (Community-scale renewable electricity generation activities within other zones, locations and Overlays) as follows:</p> <p>Only allow Provide for community-scale renewable energy generation activities in other zones, locations and Overlays where:</p> <p>...</p>
350 Wellington	396.3	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P7	Support in part	Support the restrictions in REG-P7 (Community-scale renewable electricity generation activities within other zones, locations and Overlays) as outlined to protect natural and cultural environments from adverse affects of such projects.	Retain REG-P7 (Community-scale renewable electricity generation activities within other zones, locations and Overlays) as notified, subject to wording changes suggested by this submission.
Ministry of Education	400.27	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P7	Support	Supports REG-P7 as having particular regard to the location of the renewable electricity generation activity from existing sensitive activities (including educational facilities) and whether there is adequate separation and buffering provided to manage any effects on educational facilities and reduce reverse sensitivity effects.	Retain REG-P7 (Community-scale renewable electricity generation activities within other zones, locations and Overlays) as notified.
Wellington International Airport Ltd	406.184	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P7	Oppose in part	<p>Considers that the policy should expressly state which overlays apply to the site.</p> <p>Based on the subparagraphs, it appears to be confined to overlays relating to the natural environment, historic and cultural values and natural hazards. There are, however, a number of other overlays within the plan that are captured by the broad use of the term "overlay" which are in no way relevant to the establishment of renewable electricity generation.</p>	Opposes REG-P7 (Community-scale renewable electricity generation activities within other zones, locations and Overlays) and seeks amendment.
Wellington International Airport Ltd	406.185	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P7	Amend	<p>Considers that the policy should expressly state which overlays apply to the site.</p> <p>Based on the subparagraphs, it appears to be confined to overlays relating to the natural environment, historic and cultural values and natural hazards. There are, however, a number of other overlays within the plan that are captured by the broad use of the term "overlay" which are in no way relevant to the establishment of renewable electricity generation.</p>	Seeks that REG-P7 (Community-scale renewable electricity generation activities within other zones, locations and Overlays) is amended to refer to the specific overlays of relevance.
Victoria University of Wellington Students' Association	123.23	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P8	Support	<p>Supports REG-P8 in its entirety.</p> <p>Considers that it is important to ensure the maintenance and improvement of our renewable energy infrastructure.</p>	Retain REG-P8 (Upgrading existing large scale renewable electricity generation activities) as notified.
M&P Makara Family Trust	159.3	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P8	Amend	Considers that REG-S11 (Upgrading of existing large scale renewable electricity generation activities) allows only a 5m alteration of position it seems that many factors provided for in 3 have already been considered and dealt with (as already consented), but this may be explained by clarifying the relationship between REG-P8 and REG-P11.	Clarify the relationship between REG-P8 (Upgrading existing large scale renewable electricity generation activities) and REG-P11 (Upgrading existing renewable electricity generation activities and providing for technological advances).
M&P Makara Family Trust	159.4	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P8	Amend	Considers that as REG-S11 (Upgrading of existing large scale renewable electricity generation activities) provides a definition of "Upgrade" which covers replacement, then use of the word "replacement" is unnecessary.	<p>Amend REG-P8 (Upgrading existing large scale renewable electricity generation activities) as follows:</p> <p>Provide for the upgrading of existing large scale renewable electricity generation activities, including replacing or upgrading wind turbines and their support structures and ancillary facilities within existing wind farms, where the activity:</p> <p>...</p>

Meridian Energy Limited	FS101.100	Part 2 / Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P8	Oppose	Considers that upgrading may necessarily (usually does) involve replacing turbine components.	Disallow
M&P Makara Family Trust	159.5	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P8	Amend	Considers that it appears that “adverse effects” on neighbouring properties and the community has been left out, while only management or benefits to the “affected community” may be considered. Specific inclusion of adverse effects on neighbours and/or the local community needs to be included.	Amend REG-P8 (Upgrading existing large scale renewable electricity generation activities) as follows: 3. ... a. Landscape, visual or amenity values of the site and surrounding area <u>including adjoining sites and the local community</u> , having regard to: ...
Meridian Energy Limited	228.43	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P8	Support in part	Supports in principle the approach of Policy REG-P8 in providing for upgrading. Considers that in any assessment of the effects of upgrading, it is important that the existing environment (as modified by the presence of the existing renewable electricity generation activity) is the baseline for assessment.	Retain Policy REG-P8 (Upgrading existing large scale renewable electricity generation activities) with amendment.
M&P Makara Family Trust	FS41.49	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P8	Oppose	Changing the baseline assessment from that which existed when the original resource consent was granted, to a ‘modified’ baseline which includes the activity consented, is unreasonable and circular, especially when “upgrading” does not require new consents. M&P Trust strongly opposes the inclusion of the additional wording proposed by MEL.	Disallow
Meridian Energy Limited	228.44	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P8	Amend	Supports in principle the approach of Policy REG-P8 in providing for upgrading. Considers that in any assessment of the effects of upgrading, it is important that the existing environment (as modified by the presence of the existing renewable electricity generation activity) is the baseline for assessment.	Amend Policy REG-P8 (Upgrading existing large scale renewable electricity generation activities) as follows (or similar): Upgrading existing large scale renewable electricity generation activities Provide for the upgrading of existing large scale renewable electricity generation activities, including replacing or upgrading wind turbines and their support structures and ancillary facilities within existing wind farms, where the activity: 1. Avoids significant adverse effects and avoids, remedies or mitigates other adverse effects on the identified values of any Overlay or any adjacent Overlay, high coastal natural character area, or coastal margin or riparian margin in the coastal environment, <u>recognising the character of the existing environment</u> ; 2. Has a functional need or operational need for its location; and 3. Minimises adverse effects, including adverse cumulative effects, on: ...
M&P Makara Family Trust	FS41.50	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P8	Oppose	Changing the baseline assessment from that which existed when the original resource consent was granted, to a ‘modified’ baseline which includes the activity consented, is unreasonable and circular, especially when “upgrading” does not require new consents. M&P Trust strongly opposes the inclusion of the additional wording proposed by MEL.	Disallow
Meridian Energy Limited	228.45	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P8	Support in part	Supports the policy with relief sought by the submitter and considers it can be combined with Policy REG-P11.	Seeks that police REG-P8 (Upgrading existing large scale renewable electricity generation activities) and REG-P11 (Upgrading existing renewable electricity generation activities and providing for technological advances) are combined, ensuring that all of the matters listed in each is retained.
M&P Makara Family Trust	FS41.51	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P8	Support	Noting that MEL supports M&P Trusts request to remove “replacing” and add to 3(a) “including adjoining sites and the local community” after “surrounding area”.	Allow

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Royal Forest and Bird Protection Society	345.117	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P8	Oppose in part	Amend 'provide for' to 'consider providing for'. Amend to ensure that this policy provides the same level of protection to natural and coastal values as is given by the relevant Natural Environment Values and Coastal Environment chapters. Point 1 - Support. However this needs amendment to give effect to the requirements of NZCPS policy 11(a) and 15(a).	Amend REG-P8 (Upgrading existing large scale generation activities): <u>Consider providing</u> for the upgrading of existing large scale renewable electricity generation activities, including replacing or upgrading wind turbines and their support structures and ancillary facilities within existing wind farms, where the activity: <u>Amend to make policy provide same level of protection to natural and coastal values as Natural Environment Values and Coastal Environment chapters</u> 1. Avoids significant adverse effects and avoids, remedies or mitigates other adverse effects on the identified values of any Overlay or any adjacent Overlay, high coastal natural character area, or coastal margin or riparian margin in the coastal environment; <u>Amend to give effect to the requirements of NZCPS policy 11(a) and 15(a).</u>
M&P Makara Family Trust	FS41.46	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P8	Support	While the intent of the PDP and the REG chapter is to create an easier pathway for renewable energy generation, the underlying natural, coastal and ecological and cultural values need to be recognised and maintained. Wind turbines in particular are temporary structures and can be removed so retention and protection of the underlying landscape values should be supported where possible for future benefit. "Adaptive management" complicates the RMA s5(2)(c) requirement for effects to be avoided, remedied or mitigated, and it's beneficial relationship to the "environment or affected community" limits the necessary considerations.	Allow
Meridian Energy Limited	FS101.101	Part 2 / Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P7	Oppose	Considers that the addition of 'consider' adds no meaningful value to the policy. It is not necessary to include the same level of protection as in the ECO chapter because the objectives and policies of that chapter apply anyway. The requested 'direction' to create 'least amount of effects while avoiding, remedying or mitigating' doesn't make sense. Any proposed adaptive management which may benefit the local environment is a relevant consideration and will be considered in accordance with APP2 and APP3 in any event. The policy framework, as a whole, already gives effect to the NZCPS. Operational need is a relevant consideration.	Disallow
Royal Forest and Bird Protection Society	345.118	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P8	Oppose in part	Amend to ensure that this policy provides the same level of protection to natural and coastal values as is given by the relevant Natural Environment Values and Coastal Environment chapters. Point 2 - Delete 'operational need'	Amend REG-P8 (Upgrading existing large scale generation activities): ... 2. Has a functional need or operational need for its location; and
M&P Makara Family Trust	FS41.47	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P8	Support	While the intent of the PDP and the REG chapter is to create an easier pathway for renewable energy generation, the underlying natural, coastal and ecological and cultural values need to be recognised and maintained. Wind turbines in particular are temporary structures and can be removed so retention and protection of the underlying landscape values should be supported where possible for future benefit. "Adaptive management" complicates the RMA s5(2)(c) requirement for effects to be avoided, remedied or mitigated, and it's beneficial relationship to the "environment or affected community" limits the necessary considerations.	Allow
Meridian Energy Limited	FS101.102	Part 2 / Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P7	Oppose	Considers that the addition of 'consider' adds no meaningful value to the policy. It is not necessary to include the same level of protection as in the ECO chapter because the objectives and policies of that chapter apply anyway. The requested 'direction' to create 'least amount of effects while avoiding, remedying or mitigating' doesn't make sense. Any proposed adaptive management which may benefit the local environment is a relevant consideration and will be considered in accordance with APP2 and APP3 in any event. The policy framework, as a whole, already gives effect to the NZCPS. Operational need is a relevant consideration.	Disallow
Royal Forest and Bird Protection Society	345.119	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P8	Oppose in part	Amend to ensure that this policy provides the same level of protection to natural and coastal values as is given by the relevant Natural Environment Values and Coastal Environment chapters. Point 3 - The direction to provide for upgrading large scale generation activities where effects are minimised is contrary to the requirement in s5(2)(c) that effects are avoided, remedied or mitigated. Effects might be 'minimised' but still be very significant. Amend to include more appropriate direction to create the least amount of effects, while also avoiding, remedying or mitigating. Oppose 'adaptive management'. Also oppose the phrase 'which may benefit the local environment or the community affected' as this introduces a different consideration to the offsetting and compensation principles in APP2 and APP3.	Amend REG-P8 (Upgrading existing large scale generation activities): ... 3. Minimises adverse effects, including adverse cumulative effects, on: <u>Amend to include more direction to create the least amount of effects, while also avoiding, remedying or mitigating</u> ... while having regard to any adaptive management , offsetting measures or environmental compensation which may benefit the local environment or affected community.

Any proposed adaptive management which may benefit the local environment is a relevant consideration and will be considered in accordance with APP2 and APP3 in any event. The policy framework, as a whole, already gives effect to the NZCPS. Operational need is a relevant consideration.	Disallow
WCC Environmental Reference Group	377.41	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P9	Support	Supportive of the policy due to its commitment to the development of large scale renewable energy infrastructure that aligns with the Wellington region's long term sustainability goals and supports energy independence and security alongside the transition to net zero.	Retain REG-P9 (New large scale renewable electricity generation activities in the General Rural Zone outside Overlays...) as notified.
Ministry of Education	400.29	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P9	Support	Supports REG-P9 as having particular regard to landscape and visual effects and consideration of the separation of renewable electricity generation activities from existing sensitive activities.	Retain REG-P9 (New large scale renewable electricity generation activities in the General Rural Zone outside Overlays, high coastal natural character areas, and coastal and riparian margins) as notified.
Meridian Energy Limited	228.49	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P10	Oppose	Seeks discretionary activity provision for large-scale renewable electricity generation activities in all parts of the General Rural Zone.	Delete Policy REG-P10 (New large-scale renewable electricity generation activities in other zones, locations and Overlays) in its entirety.
Meridian Energy Limited	228.50	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P10	Amend	Seeks discretionary activity provision for large-scale renewable electricity generation activities in all parts of the General Rural Zone.	Replace Policy REG-P10 (New large-scale renewable electricity generation activities in other zones, locations and Overlays) with an enabling policy as follows (or similar wording to achieve the outcome of provision for large scale renewable electricity activities throughout the General Rural Zone): <u>New Large scale renewable electricity generation activities in the General Rural</u> <u>Enable new large scale renewable electricity generation activities in the General Rural Zone including within the coastal environment, areas of Very High and High Coastal Natural Character where:</u> <u>1. significant adverse effects on coastal natural character and the values of Overlay areas and riparian margins are avoided; and</u> <u>2. other adverse effects on coastal character, the values of Overlay areas and riparian margins are minimised, recognising the functional needs and operational needs of renewable electricity generation activities.</u>
Royal Forest and Bird Protection Society	345.123	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P10	Support	Supports the policy.	Retain REG-P10 (New large-scale renewable electricity generation activities in other zones, locations and Overlays) as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Victoria University of Wellington Students' Association	123.25	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P11	Support	Supports REG-P11 in its entirety. Considers that it is important to ensure the maintenance and improvement of our renewable energy infrastructure.	Retain REG-P11 (Upgrading existing renewable electricity generation activities and providing for technological advances) as notified.
M&P Makara Family Trust	159.6	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P11	Amend	Considers that it is unclear what the relationship between REG-P11 and REG-P8 is.	Clarify the relationship between REG-P8 (Upgrading existing large scale renewable electricity generation activities) and REG-P11 (Upgrading existing renewable electricity generation activities and providing for technological advances).
M&P Makara Family Trust	159.7	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P11	Not specified	Considers that it is unclear what the difference is between "repowering" and "upgrading", and if different and REG-S11 is not relevant, this needs explanation and defining.	Seeks that if "repowering" is different to "upgrading" and if REG-S11 (Upgrading of existing large scale renewable electricity generation activities) is not considered relevant, new considerations need to be provided.
Meridian Energy Limited	228.51	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P11	Support in part	Supports the policy with relief sought by the submitter and considers it can be combined with Policy REG-P8.	Seeks that police REG-P8 (Upgrading existing large scale renewable electricity generation activities) and REG-P11 (Upgrading existing renewable electricity generation activities and providing for technological advances) are combined, ensuring that all of the matters listed in each is retained.
Royal Forest and Bird Protection Society	345.124	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P11	Support in part	Include reference to the need to still manage adverse effects on natural values, even where those benefits are present.	Amend REG-P11 (Upgrading existing renewable electricity generation activities and providing for technological advances) to refer to the need to manage adverse effects on natural values even where those benefits are present.
Meridian Energy Limited	FS101.107	Part 2 / Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P11	Oppose	Considers that it not necessary to refer to the need to protect natural values because other applicable policies already do this.	Disallow
Meridian Energy Limited	228.52	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P12	Support	Considers that policy REG-P12 (Reverse sensitivity effects) is necessary to give effect to the NPS-REG and the Plan's REG and Strategic objectives.	Retain Policy REG-P12 (Reverse sensitivity effects) as notified.
Royal Forest and Bird Protection Society	345.125	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P12	Support	Supports the policy.	Retain REG-P12 (Reverse sensitivity effects) as notified.
Royal Forest and Bird Protection Society	345.126	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P13	Support	Supports the policy.	Retain REG-P13 (Energy efficient subdivision and development) as notified.
Greater Wellington Regional Council	351.104	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P13	Amend	Considers the District Plan going as far as it can to promote energy efficient design of buildings and developments, including alterations to have regard to Policy 11 of Proposed RPS Change 1.	Seeks to ensure the renewable electricity generation and subdivision provisions have regard to Policy 11 of Proposed RPS Change 1 such that the District Plan goes as far as it can to promote energy efficient design of buildings and developments and enable renewable energy generation. This could also include provisions in the zones chapters.
350 Wellington	396.4	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-P13	Amend	Considers that the wording in REG-P13 should be stronger in regards to encouraging responsible subdivision design enhancing sustainability of energy access in new subdivisions. Considers that the Council can take a stronger position towards incentivising responsible design of sustainable energy provision in subdivisions and other large scale development projects.	Amend REG-P13 (Energy efficient subdivision and development) as follows: Encourage Incentivise subdivision and development to be designed so that buildings can utilise energy and conservation measures, including by orientation to the sun and the use of energy efficient materials, to assist in improving energy efficiency and reducing energy consumption.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Meridian Energy Limited	228.53	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-R1	Not specified	Meridian questions whether Rule REG-R1 (Maintenance and repair of existing renewable electricity generation activities) is necessary, because all existing renewable electricity generation activities (certainly existing large scale renewable electricity generation activities) required and have obtained consents and their conditions of consent provide for maintenance and repair. The Plan proposes that community scale and large scale renewable electricity generation activities will all require consents. It is reasonable to expect the terms and conditions of consent to address maintenance and repair.	Seeks Rule REG-R1 (Maintenance and repair of existing renewable electricity generation activities)is revisited for its necessity, particularly in relation to large scale renewable electricity generation activities.
Royal Forest and Bird Protection Society	345.127	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-R1	Oppose in part	REG-R1.1 - Query why the note refers to operation and removal, when this PA is about maintenance and repair.	Amend REG-R1 (Maintenance and repair of existing renewable electricity generation activities): REG-R1.1 - Clarify why reference to operation and removal is included in the note.
Royal Forest and Bird Protection Society	345.128	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-R1	Oppose in part	REG-R1.2. PA within SNAS where S1 and 2 met. Oppose in part. Accept a level of vegetation removal for maintenance and repair. Point b - oppose 2m from each side of a road or track, as this allows for a very large amount of clearance. Amend to 1m. Support this being limited to existing facilities. Should be made clear that it is also limited to existing roads/tracks/fences. Refer to other submissions points regarding REG-S1 and S2 below. Considers it is not clear what policy provides the basis for maintenance and repair within SNAs. Consider including a new policy to provide this basis.	Amend REG-R1 (Maintenance and repair of existing renewable electricity generation activities): REG-R1.2 - Amend to allow a limited amount of vegetation removal as a Permitted activity.
Royal Forest and Bird Protection Society	345.129	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-R1	Oppose in part	REG-R1.3 - RDA within SNAs where S1 and 2 are not met. Oppose matters of discretion. The only reference is to P1 and P2, which are silent on the need to protect natural values. Amend the matters of discretion to refer to ECO policies. Add an exclusion from the RDA for policy 11(a) matters, and an accompanying non-complying rule.	Amend REG-R1 (Maintenance and repair of existing renewable electricity generation activities): REG-R1.3 - Amend matters of discretion to refer to relevant Ecosystems and Indigenous Biodiversity policies. Add an exclusion from the RDA for policy 11(a) matters, and an accompanying non-complying rule.
Meridian Energy Limited	FS101.108	Part 2 / Energy Infrastructure and Transport / Renewable Electricity Generation / REG-R1	Oppose	Meridian agrees reference to the relevant ECO chapter policies has merit but opposes the requested exclusion for NZCPS Policy 11 matters and proposed non-complying activity status.	Disallow
Meridian Energy Limited	228.54	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-R2	Support	Meridian supports the permitted activity rule and standards for renewable electricity generation investigation activities and the standards proposed in REG-R2.1.	Retain REG-R2.1 (Renewable electricity generation investigation activities) as notified.
Meridian Energy Limited	228.55	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-R2	Support	Meridian supports the restricted discretionary activity status and the proposed matters of discretion.	Retain REG-R2.2 (Renewable electricity generation investigation activities) as notified.
Meridian Energy Limited	228.56	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-R2	Support	Supports the restricted discretionary activity status and the proposed matters of discretion relating to where standards are not met, and when within an overlay and scheduled area.	Retain rule REG-R2.3 (Renewable electricity generation investigation activities) as notified.
Royal Forest and Bird Protection Society	345.130	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-R2	Oppose in part	REG-R2.1 - Support in part. F&B has sought a general vegetation clearance rule to maintain biodiversity. We seek that compliance with vegetation removal rules is also required for this PA.	Amend REG-R2 (Renewable electricity generation investigation activities): REG-R2.1 - Add requirement for compliance with REG-S1 (Trimming and removal of vegetation) for Permitted activity status.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Meridian Energy Limited	FS101.109	Part 2 / Energy Infrastructure and Transport / Renewable Electricity Generation / REG-R2	Oppose	Meridian does not oppose the request to add compliance with the vegetation clearance standard but notes the standard would need to be refined to also apply to investigation activities.	Disallow
Royal Forest and Bird Protection Society	345.131	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-R2	Support in part	REG-R2.2 - Supported provided that REG-P1-3 are amended in the way sought by F&B submissions.	Retain REG-R2.2 (Renewable electricity generation investigation activities) as notified, subject to other relief sought by submitter.
Royal Forest and Bird Protection Society	345.132	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-R2	Oppose in part	REG-R2.3 - Support matters of discretion referring to the relevant Natural Environment Values and Coastal Environment chapter policies. Ensure ECO policies are referenced correctly. An exclusion from the RDA is needed for policy 11(a) and 15(a) matters, and an accompanying non-complying rule. Oppose the prohibition on notification.	Amend REG-R2 (Renewable electricity generation investigation activities): REG-R2.3 - Remove prohibition on notification. Add an exclusion for policy 11(a) and 15(a) matters, and add an accompanying non-complying rule.
Meridian Energy Limited	FS101.110	Part 2 / Energy Infrastructure and Transport / Renewable Electricity Generation / REG-R2	Oppose	Meridian opposes the proposed exclusion for NZCPS Policy 11 and Policy 15 matters and the proposed non-complying activity status	Disallow
Royal Forest and Bird Protection Society	345.133	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-R3	Support in part	REG-R3.1 - Support	Retain REG-R3.1 (Small scale renewable electricity generation activities) as notified.
Royal Forest and Bird Protection Society	345.134	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-R3	Support in part	REG-R3.2 - Support, but matters of discretion need to refer to ECO and other overlay/CE chapter policies, given that the assessment criteria in the standards require consideration of ecological/biodiversity values, other natural values, and the values of adjacent overlays.	Amend REG-R3 (Small scale renewable electricity generation activities): REG-R3.2 - Amend matters of discretion to refer to Ecosystem and Indigenous Biodiversity, Natural Features and Landscapes, and Coastal Environment (and any other relevant overlay) policies.
Royal Forest and Bird Protection Society	345.135	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-R3	Support in part	REG-R3.3 - Oppose matters of discretion. Seek instead a replication of the approach in REG-R2, which refers to the relevant policies in other chapters. An exclusion from the RDA is needed for policy 11(a) and 15(a) matters, and an accompanying non-complying rule.	Amend REG-R3 (Small scale renewable electricity generation activities): REG-R3.3 - Delete matters of discretion. Replace with matters of discretion listed in REG-R2.3. Add exclusion for policy 11(a) and 15(a) matters, and an accompanying non-complying rule.
Meridian Energy Limited	228.57	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-R4	Support in part	Supports restricted discretionary activity provision for community scale and discretionary activity provision for large scale renewable electricity generation activities in all areas within the General Rural Zone (including within overlay areas).	Retain Rule REG-R4 (Community scale renewable electricity generation activities) as notified
Royal Forest and Bird Protection Society	345.136	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-R4	Support in part	REG-R4.1 - General Rural Zone, General Industrial Zone, Airport Zone: RDA Support, but matters of discretion need to refer to ECO and other overlay/CE chapter policies, given that the assessment criteria in the standards require consideration of ecological/biodiversity values, other natural values, and the values of adjacent overlays.	Amend REG-R4 (Community scale renewable electricity generation activities): REG-R4.1 - Amend matters of discretion to refer to Ecosystem and Indigenous Biodiversity, Natural Features and Landscapes, and Coastal Environment (and any other relevant overlay) policies.
Royal Forest and Bird Protection Society	345.137	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-R4	Support in part	REG-R4.2 - Above zones: Discretionary where RDA not met	Retain REG-R4.2 (Community scale renewable electricity generation activities) as notified.
Royal Forest and Bird Protection Society	345.138	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-R4	Support in part	REG-R4.3 - All other zones: Discretionary	Retain REG-R4.3 (Community scale renewable electricity generation activities) as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Royal Forest and Bird Protection Society	345.139	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-R4	Support in part	REG-R4.4 -Sensitive areas: Discretionary. Support, provided that the policies in this chapter make clear that the policies from the natural values/CE chapters apply (as sought in above submissions). An exclusion from the discretionary rule is needed for policy 11(a) and 15(a) matters, and an accompanying non-complying rule.	Amend REG-R4 (Community scale renewable electricity generation activities): REG-R4.4 - Clarify that Ecosystem and Indigenous Biodiversity, Natural Features and Landscapes, and Coastal Environment (and any other relevant overlay) policies apply. Add exclusion for policy 11(a) and 15(a) matters, and an accompanying non-complying rule.
Meridian Energy Limited	228.58	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-R5	Support in part	Supports in principle the restricted discretionary activity provision for upgrading of large scale renewable electricity generation activities and supports the matters of discretion. Considers that proposed standards REG-S9 and REG-S10 address matters that are addressed already under the relevant standard (NZS6808:2010) which is also a requirement of the rule.	Retain REG-R5 (Upgrading of existing large scale renewable electricity generation activities) with amendments.
M&P Makara Family Trust	FS41.52	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-R5	Oppose	For Discretionary (Restricted) consideration, and respectful community engagement, it is imperative that compliance with these standards are explicitly retained.	Disallow
Meridian Energy Limited	228.59	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-R5	Amend	Supports in principle the restricted discretionary activity provision for upgrading of large scale renewable electricity generation activities and supports the matters of discretion. Considers that proposed standards REG-S9 and REG-S10 address matters that are addressed already under the relevant standard (NZS6808:2010) which is also a requirement of the rule.	Amend Rule REG-R5.1 (Upgrading of existing large scale renewable electricity generation activities) by deleting the requirement to comply with Standards REG-S9 (Wind turbine noise limits) and REG-S10 (Wind turbine special audible characteristics (SAC's)).
M&P Makara Family Trust	FS41.53	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-R5	Oppose	For Discretionary (Restricted) consideration, and respectful community engagement, it is imperative that compliance with these standards are explicitly retained.	Disallow
Meridian Energy Limited	228.60	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-R5	Support	Supports discretionary activity as the ultimate 'default' for renewable electricity generation activities that do not meet standards, including throughout the Rural General Zone and in all overlay areas.	Retain REG-R5.2 (Upgrading of existing large scale renewable electricity generation activities) as notified.
Royal Forest and Bird Protection Society	345.140	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-R5	Support in part	REG-R5.1 - General Rural Zone and Brooklyn Turbine Zone RDA The matters of discretion need to refer to the ECO and other overlay/CE chapter policies, given that the assessment criteria in the standards require consideration of ecological/biodiversity values, other natural values, and the values of adjacent overlays.	Amend REG-R5.1 (Upgrading of existing large scale renewable electricity generation activities): Amend matters of discretion to refer to Ecosystem and Indigenous Biodiversity, Natural Features and Landscapes, and Coastal Environment (and any other relevant overlay) policies.
Meridian Energy Limited	FS101.111	Part 2 / Energy Infrastructure and Transport / Renewable Electricity Generation / REG-R5	Oppose	Considers that it is important that the rule does not allow for relitigation of effects on values (including values identified in the referenced chapters) that were settled through the consent process that established the facility. This rule addresses upgrading (not establishment).	Disallow
Royal Forest and Bird Protection Society	345.141	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-R5	Support in part	REG-R5.2 Accept provided that the policies in this chapter make clear that the policies from the natural values/CE chapters apply (as sought in above submissions).	Retain REG-R5.2 (Upgrading of existing large scale renewable electricity generation activities) subject to relief sought on policies relating to the REG - Renewable Energy Generation chapter.
Meridian Energy Limited	FS101.112	Part 2 / Energy Infrastructure and Transport / Renewable Electricity Generation / REG-R5	Oppose	Considers that it is important that the rule does not allow for relitigation of effects on values (including values identified in the referenced chapters) that were settled through the consent process that established the facility. This rule addresses upgrading (not establishment).	Disallow
Victoria University of Wellington Students' Association	123.26	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-R6	Support	Supports REG-R6 not allowing the development of new large-scale renewable electricity generation activities within any sites, areas, items and/or features identified in SCHED7 - Sites and Areas of Significance to Māori.	Retain REG-R6 (New large scale renewable electricity generation activities) as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Victoria University of Wellington Students' Association	123.27	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-R6	Support	Supports REG-R6 not allowing the development of new large-scale renewable electricity generation activities within the root protection area of a tree identified in SCHED6 - Schedule of Notable Trees.	Retain REG-R6 (New large scale renewable electricity generation activities) as notified.
Victoria University of Wellington Students' Association	123.28	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-R6	Support	Supports REG-R6 not allowing the development of new large-scale renewable electricity generation activities within any area identified as SCHED10 - Outstanding Natural Features and Landscapes.	Retain REG-R6 (New large scale renewable electricity generation activities) as notified.
Victoria University of Wellington Students' Association	123.29	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-R6	Support	Supports REG-R6 not allowing the development of new large-scale renewable electricity generation activities within any area identified as SCHED12 - High Coastal Natural Character Areas.	Retain REG-R6 (New large scale renewable electricity generation activities) as notified.
Meridian Energy Limited	228.61	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-R6	Oppose in part	Supports in principle discretionary activity provision REG-R6.1 for new large scale renewable electricity generation activities in all areas of the General Rural Zone (including in overlay areas).	Retain REG-R6.1 (New large scale renewable electricity generation activities) with amendment.
Meridian Energy Limited	228.62	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-R6	Oppose	Supports in principle the restricted discretionary activity provision for upgrading of large scale renewable electricity generation activities and supports the matters of discretion. Considers that proposed standards REG-S9 and REG-S10 address matters that are addressed already under the relevant standard (NZS6808:2010) which is also a requirement of the rule. Considers discretionary activity status will allow these matters to be considered in full where these effects are likely and a standard is not necessary (and may constrain full consideration by creating an inappropriate 'permitted baseline').	Amend Rule REG-R6.1 (New large scale renewable electricity generation activities) by deleting the requirement to comply with Standards REG-S9 (Wind turbine noise limits) and REG-S10 (Wind turbine special audible characteristics (SAC's)).
M&P Makara Family Trust	F541.54	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-R6	Oppose	For Discretionary (Restricted) consideration, and respectful community engagement, it is imperative that compliance with these standards are explicitly retained.	Disallow
Meridian Energy Limited	228.63	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-R6	Amend	Considers Non complying activity status is not necessary or appropriate, particularly in this Plan where the relevant objectives and policies provide clear guidance on the values to be protected and effects to be avoided, remedied or mitigated within overlay areas.	Delete Rule REG-R6.2 (New large scale renewable electricity generation activities) and re-number Rule REG-R6.3 as 'REG-R6.2'.
Royal Forest and Bird Protection Society	345.142	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-R6	Support in part	Support, but make clear in the REG policies that the ECO and other natural value/coastal environmental policies apply.	Amend REG-R6 (New large scale renewable electricity generation activities) to refer to Ecosystem and Indigenous Biodiversity, Natural Features and Landscapes, and Coastal Environment policies.
Royal Forest and Bird Protection Society	345.143	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-R7	Support	Support and make clear in the REG policies that the ECO and other natural value/coastal environment policies apply.	Amend REG-R7 (Renewable electricity generation activities not otherwise provided for) to refer to Ecosystem and Indigenous Biodiversity, Natural Features and Landscapes, and Coastal Environment policies.
Victoria University of Wellington Students' Association	123.30	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-S1	Amend	Considers that increased protection should be given to ecological sites of importance, habitats for endangered species, and native biodiversity. Such sites need to be treated as the homes of animals and as crucial to the survival of our wildlife first and foremost, not just seen in terms of their development potential.	Clarify REG-S1 (Trimming, pruning or removal of indigenous vegetation within a significant natural area) to specify this standard also applies to ecological sites of importance, habitats for endangered species, and native biodiversity. [Inferred decision requested].
Fire and Emergency New Zealand	273.45	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-S1	Support in part	Considers that a new assessment matter should be added in order to ensure that fire risk mitigation is taken into account when assessing applications to trim or remove indigenous vegetation in areas subject to high fire risk.	Support REG-S1 (Trimming, pruning, removal of indigenous vegetation within a significant natural area) with amendment.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Fire and Emergency New Zealand	273.46	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-S1	Amend	Considers that a new assessment matter should be added in order to ensure that fire risk mitigation is taken into account when assessing applications to trim or remove indigenous vegetation in areas subject to high fire risk.	Amend REG-S1 (Trimming, pruning, removal of indigenous vegetation within a significant natural area) as follows: Assessment criteria where the standard is infringed: ... <u>3. The degree to which the trimming or removal of affected vegetation will provide for the health and safety of people, property, and the environment through the management of fire risk.</u>
Royal Forest and Bird Protection Society	345.144	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-S1	Support in part	REG-S1.1.b - Oppose 2m from each side of a road or track, as this allows for a very large amount of clearance. Amend to 1m. Support this being limited to existing facilities. Should be made clear that it is also limited to existing roads/tracks/fences. Delete assessment criteria 1. Amend to include assessment criteria 1. and 2. from ECO S1.	Amend REG-S1 (Trimming, pruning or removal of indigenous vegetation within a significant natural area): ... 1. Trimming, pruning or removal of indigenous vegetation or trees within a significant natural area must be limited to: a. Within 2m of the existing renewable electricity generation activity building or structure, measured at ground level; b. 2 <u>1</u> m either side of any <u>existing</u> ancillary road or access track or fence; and ... Assessment criteria: 1. Operational needs, functional needs or other technical considerations; and 2. The effects on the identified ecological and biodiversity values of the significant natural area and the measures taken to avoid, remedy or mitigate the effects and where relevant the ability to offset effects. <u>3. The extent to which the trimming or removal of indigenous vegetation limits the loss, damage or disruption to the ecological processes, functions and integrity of the significant natural area; and</u> <u>4. The effect of the vegetation removal on the identified biodiversity values.</u>
Meridian Energy Limited	FS101.113	Part 2 / Energy Infrastructure and Transport / Renewable Electricity Generation / REG-S1	Oppose	Considers that the operational needs, functional needs and technical considerations are relevant considerations where non-compliance with the standard is being assessed.	Disallow / Disallow the requested deletion of assessment criterion 1.
Greater Wellington Regional Council	351.105	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-S1	Amend	Vegetation trimming standards and rules should be amended so that they also apply to both indigenous and non-indigenous vegetation. This would make it clear that all vegetation (aside from pest plants) is to be protected in these areas, except where otherwise specified for restoration or other purposes. Any non-indigenous plants within SNAs that are not pest plants may provide significant habitat for indigenous biodiversity such as birds, bats and lizards. This understanding is recognised in section 6(c) of the Act which directs the protection of the "significant habitats of indigenous fauna" not the significant indigenous habitats of indigenous fauna.	Seeks to amend standard (where relevant) to change 'indigenous vegetation' to 'vegetation'.
WCC Environmental Reference Group	377.42	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-S1	Amend	Understanding of the importance of sustainable power infrastructure. However, it is important that this is done with respect to the cultural significance of the environment.	Requests the addition of cultural values to the list of assessment criteria where REG-S1 (Trimming, pruning or removal of indigenous vegetation within a significant natural area) is infringed, as follows: Assessment criteria where the standard is infringed: 1. Operational needs, functional needs or other technical considerations; and 2. The effects on the identified ecological, <u>cultural</u> and biodiversity values of <u>or within</u> the significant natural area and the measures taken to avoid, remedy or mitigate the effects and where relevant the ability to offset effects.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Royal Forest and Bird Protection Society	345.145	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-S2	Oppose in part	Query the volume of earthworks allowed, which may need to have tighter limits. Is this intended to apply at the same time as the vegetation removal standard, i.e. would S1 first have to be met for removing vegetation, and then the volumes here would apply? Or where earthworks were done, would S1 be irrelevant? Delete the assessment criteria, and replace with the assessment criteria for ECO-S1, replacing 'trimming or removal of vegetation' with 'earthworks'.	Amend REG-S2 (Earthworks within a significant natural area) to reduce the volume of permitted earthworks. Clarify whether this standard applies in conjunction with REG-S1 or not. Delete assessment criteria, replace with: <u>1. The extent to which the earthworks limits the loss, damage or disruption to the ecological processes, functions and integrity of the significant natural area; and</u> <u>2. The effect of the earthworks on the identified biodiversity values.</u>
Greater Wellington Regional Council	351.106	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-S2	Amend	Considers that Policy 24 of the RPS directs councils to protect indigenous ecosystems and habitats with significant indigenous biodiversity values. The 'identified' qualifier limits the consideration of effects to those values identified within the SNA at the time of plan notification. The values of most SNAs have been identified only at a high-level, and often only through desktop analysis. The assessment required to identify the scope of effects may identify additional values and this should be part of the consideration of effects at the time consent is applied for.	Seeks to amend wording to remove 'identified' before 'significant biodiversity values' when referring to adverse effects caused by activities or maintenance of biodiversity values.
Meridian Energy Limited	FS101.114	Part 2 / Energy Infrastructure and Transport / Renewable Electricity Generation / REG-S2	Oppose	Considers that the relevant values are those identified in the Schedule	Disallow
Royal Forest and Bird Protection Society	345.146	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-S3	Support in part	Include ecological and biodiversity effects in the assessment criteria.	Amend REG-S3 (Renewable electricity generation investigation activities) to include "ecological and biodiversity effects" in the assessment criteria.
Royal Forest and Bird Protection Society	345.147	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-S5	Support in part	Include ecological and biodiversity effects in the assessment criteria, given the risks to birds from turbines.	Amend REG-S5 (Small scale renewable electricity generation activities - roof-mounted wind turbines) to include "ecological and biodiversity effects" in the assessment criteria.
WCC Environmental Reference Group	377.43	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-S5	Amend	The reasoning behind limiting the number of roof mounted wind turbines seems extremely unclear, considering the increased risk to health and safety as well as character caused by constructing larger, broader turbines to generate the same power. Furthermore the standard discourages personal electricity generation through its limitations.	Amend REG-S5 (Small scale renewable electricity generation activities - roof-mounted wind turbines) as follows: 1. The wind turbine must not exceed: a. the permitted building height of the underlying Zone by more than 3m measured vertically; b. the permitted height in relation to boundary for the underlying Zone by more than 1m measured vertically; or c. a maximum rotor diameter of 2.5m. 2. There must be no more than one wind turbine per site.
Andrew Hodge	8.1	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-S6	Amend	Considers that the current height and distance to buildings restrictions in REG-S6.2 will only allow freestanding wind turbines to be built on large rural properties. This will reduce wind energy generation potential in the Wellington District. [Refer to original submission for full reason]	Amend REG-S6.2 (Small scale renewable electricity generation activities - freestanding wind turbines) as follows: ... 2. The wind turbine must not be located within the greater of: a. 60m of a habitable building on an adjacent site; or b. A distance of 10 times the wind turbine tower's height above ground level from any site boundary that is not held in the same record of title; <u>2. The wind turbine must not be located within 15m of a habitable building on an adjacent site.</u>

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Royal Forest and Bird Protection Society	345.148	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-S6	Support	Supports the standard.	Retain REG-S6 (Small scale renewable electricity generation activities - freestanding wind turbines) as notified.
Royal Forest and Bird Protection Society	345.149	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-S7	Support	Supports the standard.	Retain REG-S7 (Community scale wind turbines) as notified.
Meridian Energy Limited	228.64	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-S8	Support in part	Considers that the 150m ² limit on the cumulative area of solar panels on a site (in Standard REG-S8) is too small to support meaningful community scale solar electricity generation and there need to be different controls for freestanding solar panels compared with those that will occupy the existing surface of a building.	Retain REG-S8 (Community scale freestanding solar panels) with amendment.
Meridian Energy Limited	228.65	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-S8	Amend	Considers that the 150m ² limit on the cumulative area of solar panels on a site (in Standard REG-S8) is too small to support meaningful community scale solar electricity generation and there need to be different controls for freestanding solar panels compared with those that will occupy the existing surface of a building.	Amend Standard REG-S8 (Community scale freestanding solar panels) as follows (or similar to increase the maximum area limit for solar panels): 1. Any structure must not exceed: a. The permitted height in relation to boundary for the underlying Zone; b. The permitted setback standards for the underlying Zone; or c. A maximum height of 6m above ground level; 2. The cumulative area of solar panels on the site must not exceed 150m² ; <u>a. The horizontal area of the building's roof, where the solar panels are fixed to a building roof; and</u> <u>b. 1,500m² where the solar panels are freestanding or fixed to the walls of buildings.</u>
Royal Forest and Bird Protection Society	345.150	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-S8	Support	Supports the standard.	Retain REG-S8 (Community scale freestanding solar panels) as notified.
WCC Environmental Reference Group	377.44	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-S8	Amend	Limitation of community scale solar panel operations goes against Wellington's long term sustainability goals. If restrictions are necessary then the standard could be rewritten to include them however the outwrite limitation seems senseless, particularly as the standard applies to cumulative area, preventing larger communities from exploring new areas for solar installations after their quota has been met.	Amend REG-S8 (Community scale freestanding solar panels) as follows: 1. Any structure must not exceed: a. The permitted height in relation to boundary for the underlying Zone; b. The permitted setback standards for the underlying Zone; or c. A maximum height of 6m above ground level; 2. The cumulative area of solar panels on the site must not exceed 150m².
Meridian Energy Limited	228.66	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-S9	Oppose in part	Opposes proposed standards REG-S9. Considers REG-S9 is addressed already under the relevant standard (NZS6808:2010) Considers these matters will be better considered as discretionary matters rather than as standards where these effects are likely.	Delete standard REG-S9 (Wind turbine noise limits) in its entirety.
M&P Makara Family Trust	FS41.55	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-S9	Oppose	For Discretionary (Restricted) consideration, and respectful community engagement, it is imperative that compliance with these standards are explicitly retained.	Disallow
Ministry of Education	400.30	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-S9	Support	Supports REG-S9 as the submitter supports the management of noise generated from wind turbines on any nearby noise sensitive activities, including educational facilities.	Retain REG-S9 (Wind turbine noise limits) as notified.
M&P Makara Family Trust	FS41.57	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-S9	Support	Not specified.	Allow

Energy, Infrastructure and Transport - Transport

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Meridian Energy Limited	228.67	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-S10	Oppose in part	Opposes proposed standards REG-S9. Considers REG-S9 is addressed already under the relevant standard (NZS6808:2010) Considers these matters will be better considered as discretionary matters rather than as standards where these effects are likely.	Delete standard REG-S10 (Wind turbine special audible characteristics (SAC's)) in its entirety.
M&P Makara Family Trust	FS41.56	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-S10	Oppose	For Discretionary (Restricted) consideration, and respectful community engagement, it is imperative that compliance with these standards are explicitly retained.	Disallow
M&P Makara Family Trust	159.8	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-S11	Amend	Considers that in order to remain discretionary (restricted), Point 2 should be amended to require a wind turbine to not exceed the existing height by more than 5%. 10% is an extra height allowance of 12.5m for existing large scale wind turbines in the rural area. Original resource consents for these turbines was predicated on visual amenity assessments provided for affected neighbouring properties, and an additional 12.5m height could significantly change some of these effects. In addition, noise levels at neighbouring residences are affected by line-of-sight - i.e. the more visible, the more likely there is to be more noise.	Amend REG-S11 (Upgrading of existing large scale renewable electricity generation activities) as follows (change 10% to 5%): ... 2. A replacement building or structure (including any wind turbine) must not exceed the height of the existing building or structure to be replaced by more than 10% 5%;
Meridian Energy Limited	FS101.115	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-S11	Oppose	Meridian considers the standards as notified are already conservative. The assessment criteria are appropriate.	Disallow
M&P Makara Family Trust	159.9	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-S11	Amend	Considers that REG-S11 Assessment Criteria Point 9 should be removed as it is too broad a consideration. If compliance with the standard is impractical, the upgrade should not be allowed.	Amend REG-S11 (Upgrading of existing large scale renewable electricity generation activities) as follows: Assessment criteria where the standard is infringed: ... 9. Whether there are topographical or other site constraints that make compliance with the standard impractical;
Meridian Energy Limited	FS101.116	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-S11	Oppose	Meridian considers the standards as notified are already conservative. The assessment criteria are appropriate.	Disallow
Royal Forest and Bird Protection Society	345.151	Energy Infrastructure and Transport / Renewable Electricity Generation / REG-S11	Support	Supports the standard.	Retain REG-S11 (Upgrading of existing large scale renewable electricity generation activities) as notified.
Aro Valley Community Council	87.30	Energy Infrastructure and Transport / Transport / General TR	Not specified	Considers that while Aro Valley is included in the 10 minute walkable catchment from a rapid transit zone, 46% already use active transport to move around the city. The remainder find that public transport (the bus service) is unreliable, not accessible to differently abled people, or safe in all weather conditions.	Not specified.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Generation Zero	FS54.34	Part 2 / Energy Infrastructure and Transport / Transport / General TR	Oppose	For character areas, the central test is “other” qualifying matter under clause 3.33(3) of the NPS-UD, alongside the objectives and purpose of the NPS-UD. There is an extremely high bar to creating a character area. The reduction in development capacity must be justified against the national significance of urban development and the objectives of the NPS-UD. Cities are dynamic and changeable. Indeed Wellington underwent many built changes before the currently form was locked in place by modern zoning documents. New housing and residents are a positive to encourage, rather a negative to push out further or crowd into the remaining housing stock. It is significantly more climate friendly to allow denser housing in inner-suburbs, rather than displacing development into greenfields, even accounting for embodied carbon. Character areas are in inner-city suburbs which are highly connected to amenities and already have high-mode share of low emissions transport. This land is often the most resilient. More residents can be easily absorbed in these suburbs and will create a positive impact on that suburb. The counterfactual – the status quo – is that the best quality land in the city is locked away by wealthy residents who seek to preserve an unsustainable way of life and/or their property values. This causes reduced supply and higher prices, higher rents, lower quality, displacement of low-income residents, and pushes residents to worse locations with higher lifetime emissions. The development capacity lost through character areas is extremely weighty; only very ‘character’ of very high quality can be justified. It must also be a site-specific analysis; the current broadbrush suburb-by-suburb analysis in the current District Plan is not allowed. The approaches advocated by the submitters is erroneous under the NPS-UD and should be rejected. Submitters cannot point to individual streets or houses they subjectively find as ‘character’ as this does not meet the stringent evidential requirement of clause 3.33(3). Submitters cannot request to go back to the current District Plan character areas, as these are untenable under the new NPS-UD test. Submitters cannot point to the Boffa Miskel report and adopt its recommendation. The report was written before the enactment of the NPS-UD. And, crucially, this approach begs the question of how the report fits into the NPS-UD test in clause 3.33(3). The approach in the PDP, where only contiguous and coherent pockets of high-quality character are proposed, is legal under the NPS-UD.	Disallow / Disallow the submission in full to the extent that this relates to character areas or reducing the amount of enabled housing. Reject increasing character areas in the PDP.
Interprofessional Trust	96.2	Energy Infrastructure and Transport / Transport / General TR	Not specified	Considers that car-parking should be by owners choice.	[Not specified]
M J & P B Murtagh	98.1	Energy Infrastructure and Transport / Transport / General TR	Amend	Considers that residents in rented properties are unable to find parking for their cars. Considers that vehicle traffic has increased each year.	Seeks that garaging is required in Mount Victoria. [Inferred submission point]
Victoria University of Wellington Students' Association	123.31	Energy Infrastructure and Transport / Transport / General TR	Support	Supports the emphasis on pedestrian and public transport access and the active prioritisation of this in development. Considers that students should be easily able to move around the City without cars	Supports that a range of transport options are accommodated to serve diverse transport needs, including active, public, taxis/ubers, and mobility vehicles.
Victoria University of Wellington Students' Association	123.32	Energy Infrastructure and Transport / Transport / General TR	Not specified	Considers that the city should serve people first, not cars.	Not specified.
Victoria University of Wellington Students' Association	123.33	Energy Infrastructure and Transport / Transport / General TR	Not specified	Supports infrastructure that supports the prioritisation of public transport, pedestrians, and cyclists. Understands that accommodating pedestrians and cyclists can be difficult in some areas due to narrow roads or steep hills.	Seeks that the WCC aims to support the safety and accessibility of pedestrians and cyclists even in narrow road or steep hill areas.
Olivier Reuland	134.7	Energy Infrastructure and Transport / Transport / General TR	Not specified	Considers that the increased density of cars parked in streets, and traffic congestion, is not wholly a negative effect despite what the RMA would say. It can be a helpful contributor to traffic calming and safer streets.	Seeks that traffic congestion and parking effects are viewed as not wholly a negative effect.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Braydon White	146.8	Energy Infrastructure and Transport / Transport / General TR	Not specified	Considers that the traffic congestion and the increased density of cars parked on streets can be a helpful contributor to traffic calming and safer streets by slowing down traffic, discouraging rat-running, and adding an extra nudge for those "on the fence" to maybe travel another way for those short trips.	Seeks that traffic congestion and parking effects are viewed as an interim contributor to traffic calming and safer streets, and used tactically as such.
Braydon White	146.9	Energy Infrastructure and Transport / Transport / General TR	Not specified	Considers that universal accessibility, and active and sustainable travel, must be prioritised for access to public transport so that people don't need to drive to stations, nor traverse inhospitable park-and-rides once they get there.	Seeks that universal accessibility, and active and sustainable travel, is prioritised for access to public transport.
Jill Ford	163.4	Energy Infrastructure and Transport / Transport / General TR	Amend	[No specific reason given beyond decision requested - refer to original submission].	Seeks that G99-G102 (External Storage) in the Residential Design Guide should be referenced in to specific Rules, Policies, and Objectives in the Transport chapter. [Inferred decision requested].
Amos Mann	172.14	Energy Infrastructure and Transport / Transport / General TR	Not specified	Considers that universal accessibility, and active and sustainable travel must be prioritised for access to public transport so that people don't need to drive to stations, nor traverse inhospitable park-and-rides once they get there.	Seeks that universal accessibility, and active and sustainable travel is prioritised for access to public transport.
Patrick Wilkes	173.9	Energy Infrastructure and Transport / Transport / General TR	Not specified	Considers that the increased density of cars parked in streets, and traffic congestion, can be a helpful contributor to traffic calming and safer streets by slowing down traffic	Seeks that traffic congestion and parking effects are viewed as an interim contributor to traffic calming and safer streets.
Patrick Wilkes	173.10	Energy Infrastructure and Transport / Transport / General TR	Amend	[No specific reason given beyond decision requested - refer to original submission].	Amend objectives, policies and rules of the Transport Chapter to include reference to Residential Design Guide guidance GG 99-102 (external bike storage).
Pete Gent	179.7	Energy Infrastructure and Transport / Transport / General TR	Not specified	Considers that the increased density of cars parked in streets, and traffic congestion, is not wholly a negative effect despite what the RMA would say. It can be a helpful contributor to traffic calming and safer streets.	Seeks that traffic congestion and parking effects are viewed as not wholly a negative effect.
Pete Gent	179.8	Energy Infrastructure and Transport / Transport / General TR	Not specified	Considers that universal accessibility, and active and sustainable travel must be prioritised for access to public transport so that people don't need to drive to stations, nor traverse inhospitable park-and-rides once they get there.	Seeks that universal accessibility, and active and sustainable travel is prioritised for access to public transport.
James Harris	180.5	Energy Infrastructure and Transport / Transport / General TR	Not specified	Considers that universal accessibility, and active and sustainable travel must be prioritised for access to public transport so that people don't need to drive to stations, nor traverse inhospitable park-and-rides once they get there.	Seeks that universal accessibility, and active and sustainable travel is prioritised for access to public transport.
Antony Kitchener and Simin Littschwager	199.6	Energy Infrastructure and Transport / Transport / General TR	Amend	Considers that it is unclear how people will be incentivised to use other modes of transport instead of cars. Ngaio does not have a supermarket in easy walking distance. People still need to rely on cars to drive their kids to and from school, and other activities and amenities. [Refer to original submission for full reasons].	Not specified.
Sam Stocker & Patricia Lee	216.4	Energy Infrastructure and Transport / Transport / General TR	Amend	Considers that we live in a society that relies on cars and taking away street parking will make the historic area unliveable. The simple answer to making our neighbourhood more cycle and walking friendly is to lower the speed limit across the city. Considers that the neighbourhood needs to retain its carparks. [Refer to original submission for full reason]	Seeks that new developments in historic areas include carparks.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Claire Nolan, James Fraser, Margaret Franken, Bidy Bunzel, Michelle Wooland, Lee Muir	FS68.49	Energy Infrastructure and Transport / Transport / General TR	Support	Supports submission that seeks character precinct extensions in Newtown.	Allow
Tyers Stream Group	221.27	Energy Infrastructure and Transport / Transport / General TR	Amend	[No specific reason given beyond decision requested - refer to original submission]	Seeks that building on unbuilt or built legal roads providing access to Reserves including Tyers Stream Reserve should be non-complying.
Stratum Management Limited	249.14	Energy Infrastructure and Transport / Transport / General TR	Amend	Considers the requirements apply to the City centre, Metropolitan, Local Centre, Neighbourhood and Mixed Use zones. Under the requirements, residential developments in these zones must provide for a minimum of 1 space per residential unit, and 1 short-stay space per 10 residential units. An apartment building of significant size will require substantial floor area for bicycle storage. This brings with it significant cost, impacting on the ultimate affordability of the apartment building. Assuming a requirement of 2.5m ² per bike in addition to associated access and circulation space, this would lead to an additional floor area requirement of some 300m ² , for a 100 unit apartment building. This would equate to an additional cost of \$3.9M. Not all apartment owners will utilise bike storage space. Therefore the requirement also risks a significant degree of sunk cost in meeting the standard. The provision of cycle parking is supported but Stratum opposes a requirement for such storage, and opposes the current requirement of 1 space per units. The residential requirement is also significantly above, in ultimate floor area requirements, those of other activity types in Table 7. Short stay, or visitor bike parking requirements are also opposed where they need to be provided on-site. The public realm remains an appropriate means of providing for visitor bike parking.	Seeks to remove the cycle and micromobility requirement for residential development (Table 7 TR: Minimum number of on-site cycling and micromobility device parking spaces).
Richard Hovey	FS60.1	Part 2 / Energy Infrastructure and Transport / Transport / General TR	Oppose	<p>Oppose the submissions from Stratum Management Limited on the basis that while developers may enjoy the cost reduction benefits that the removal of the requirement to provide car parks has brought they cannot simply privatise that gain and expect some sort of external transport storage solution to be provided for the residents of their developments.</p> <p>People in urban environments should have a choice of transport and bikes/e-bikes/e-scooters are a perfect match for everyday urban transport needs. They contribute to a healthier, happier and more appealing city.</p> <p>Developers should celebrate how much less space is required to facilitate bicycle storage than private motor vehicles and provide a reasonable level of space and facility for this purpose.</p> <p>While it may be presented simply as a 'cost' which some people may not wish to pay it should be seen as part of the investment in better residential development which will either be valued by those living there or rented out to others (in exactly the way car parks are).</p>	Disallow / Seeks that the part of the submission arguing against a good level of bicycle storage being required for residential developments is disallowed.
Jane O'Loughlin	FS99.1	Part 2 / Energy Infrastructure and Transport / Transport / General TR	Oppose	A minimum of 1 cycle park per residential unit should be required. The requirements for cycle and micromobility storage/parking is fundamental to achieve the mode shift required to achieve net zero carbon emissions, and has associated health and equity benefits. This is consistent with WCC's Te Atakura and mode shift goals.	Disallow / Seeks that a minimum of 1 cycle park per residential unit should be required.
Wellington City Council Environmental Reference Group	FS112.16	Part 2 / Energy Infrastructure and Transport / Transport / General TR	Oppose	Oppose the submission that cycle and micro-mobility parking requirements for residential development be removed. WCCERG suggest the m2 requirement may be substantially less than suggested in many cases, and would draw attention to the bike racks used by WCC that allow two vertical layers of bike storage as one example of how bikes can be stored in smaller areas. The requirements for cycle and micro-mobility storage/parking is fundamental to achieve the mode-shift required to achieve the city's net zero carbon emissions, and has associated health and equity benefits.	Disallow

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Fire and Emergency New Zealand	273.47	Energy Infrastructure and Transport / Transport / General TR	Support in part	Notes that as previously referenced under the feedback point for TR0R3, the standards within Table 9 may be insufficient for fire appliance access in certain circumstances.	Supports Table 9 - TR: Design of Driveways, with amendment.
Fire and Emergency New Zealand	273.48	Energy Infrastructure and Transport / Transport / General TR	Amend	Notes that as previously referenced under the feedback point for TR0R3, the standards within Table 9 may be insufficient for fire appliance access in certain circumstances.	Amend Table 9 - TR: Design of Driveways Classification: Driveway Level 1 Minimum Width (m) – Vehicles <ul style="list-style-type: none"> • 1 x 3.0 • Passing bays at 50m maximum spacing; • Clear line of sight between passing bays • <u>Where driveways will result in any building served from the driveway to be more than 70m away from a legal road, the site access and full length of the driveway must provide unhindered access for fire appliances in accordance with the NZ Fire Service Firefighting Water Supplies Code of Practice SNA PAS 4509:2008.</u>
The Retirement Villages Association of New Zealand Incorporated	FS126.34	Part 2 / Energy Infrastructure and Transport / Transport / General TR	Oppose	The RVA opposes the relief sought in this submission as matters relating to fire-fighting servicing are already provided for under the Building Act and it is inappropriate to duplicate controls under the Proposed Plan.	Disallow
Ryman Healthcare Limited	FS128.34	Part 2 / Energy Infrastructure and Transport / Transport / General TR	Oppose	Ryman opposes the relief sought in this submission as matters relating to fire-fighting servicing are already provided for under the Building Act and it is inappropriate to duplicate controls under the Proposed Plan.	Disallow
Richard Hovey	280.1	Energy Infrastructure and Transport / Transport / General TR	Amend	Considers that E-Bikes and e-scooters are growing in popularity and require specific storage. E-Bikes and e-scooters can weigh from 25kg to 40kg and require storage, they can be used more when storage has charging capacity, and are high-value targets for theft. Lack of storage can be a barrier to entry for people using these vehicles. [Refer to original submission for full reason]	Seeks that there is more definition regarding requirements and recommendations for provision of bike and micromobility device storage.
Johanna Carter	296.4	Energy Infrastructure and Transport / Transport / General TR	Amend	Considers that private vehicles will still be part of the fabric of the city for many years. For example, people need to be able to accommodate vehicles for work (trade vehicles), and to store private vehicles to access areas of NZ not accessible by public transport. Not all people are able to use public transport due to age, disability or they are a family with competing demands that public transport cannot cater for. To completely remove all parking requirements will result in more on street parking and where this is limited more competition for the parking that is available.	Seeks that the removal of all parking requirements is re-examined and revisited.
Paihikara Ki Pōneke Cycle Wellington	302.16	Energy Infrastructure and Transport / Transport / General TR	Not specified	Considers that cycle parking and charging facilities should be adequate to meet increasing demand for secure parking and charging facilities, to meet climate commitments, safety and mode shift goals.	Not specified.
Paihikara Ki Pōneke Cycle Wellington	302.17	Energy Infrastructure and Transport / Transport / General TR	Support in part	Table 7 - TR: Minimum number of on-site cycling and micromobility device parking spaces in the Transport chapter is supported, as it provides requirements for cycle parking in the listed zones. However, long stay cycle parking should also require a reduced number of charging facilities.	Retain Table 7 - TR: Minimum number of on-site cycling and micromobility device parking spaces in the 'Transport' chapter, with amendment.
Paihikara Ki Pōneke Cycle Wellington	302.18	Energy Infrastructure and Transport / Transport / General TR	Amend	Considers that Table 7 - TR: Minimum number of on-site cycling and micromobility device parking spaces should be amended to require a reduced number of charging facilities in long stay cycle parking.	Amend Table 7 - TR: Minimum number of on-site cycling and micromobility device parking spaces to include charging facilities for e-cycles in the 'Long stay (staff*, residents, students)' column.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Aggregate and Quarry Association	303.12	Energy Infrastructure and Transport / Transport / General TR	Not specified	Considers that it is important that the PDP does not shut off access to potential aggregate sources to provide for Wellington's current and future construction needs. As aggregate is expensive to transport, sources of this need to be close to the place of construction.	Seeks that the Proposed District Plan provisions enable the importation of aggregate from other areas outside of the Wellington City Council jurisdiction.
Wellington City Council Environmental Reference Group	FS112.32	Part 2 / Energy Infrastructure and Transport / Transport / General TR	Oppose	A number of submission points made by the Aggregate & Quarry Association (please see multiple points in their submission relating to the same theme) argue that "it is important that the PDP does not shut off access to potential aggregate sources to provide for Wellington's current and future construction needs. As aggregate is expensive to transport, sources of this need to be close to the place of construction."Elsewhere, they also say: "... the District Plan must not unreasonably curtail expansion of existing quarries and establishment of new quarries..." WCCERG disagree, on the basis of primary and secondary greenhouse gas emissions from quarrying, which are no longer tenable; and the opportunity to re-use existing materials (instead of sending them to landfill, as is currently the case).	Disallow / Seeks that instead of allowing new mining or quarrying activities and changes of use, WCC requires no expansion of any kind of mining or quarrying activities, and a second policy stating that these activities be phased out by (for example), 2030.
Svend Heeselholt Henne Hansen	308.4	Energy Infrastructure and Transport / Transport / General TR	Not specified	Considers that the increased density of cars parked in streets, and traffic congestion, is not wholly a negative effect despite what the RMA would say. It can be a helpful contributor to traffic calming and safer streets.	Seeks that traffic congestion and parking effects are viewed as not wholly a negative effect.
Mt Victoria Residents' Association	342.22	Energy Infrastructure and Transport / Transport / General TR	Not specified	Considers that removing car parking requirements will allow more efficient use of the site and support the city's Carbon Zero goals. It could also contribute to the affordability of housing developments by removing a significant cost to provide the parking, provided this is not captured by developers. However, it will also make it harder for residents manage parking.	Not specified.
Restaurant Brands Limited	349.9	Energy Infrastructure and Transport / Transport / General TR	Support	Support	Retain Table 7 (Minimum number of on-site cycling and micromobility device parking spaces) as notified.
Foodstuffs North Island	FS23.33	Part 2 / E nergy Infrastructure and Transport / Transport / New TR	Support	Submission point 349.9 partly supports FSNI submission 476.7 however FSNI seeks an amendment.	Allow / Allow submission in part.
Restaurant Brands Limited	349.10	Energy Infrastructure and Transport / Transport / General TR	Support	Support	Retain Table 8 (Classification of driveways) as notified.
Restaurant Brands Limited	349.11	Energy Infrastructure and Transport / Transport / General TR	Support	Support	Retain Table 9 (Design of driveways) as notified.
Restaurant Brands Limited	349.12	Energy Infrastructure and Transport / Transport / General TR	Support	Support	Retain Table 10 Parking Space dimensions) as notified.
Retirement Villages Association of New Zealand Incorporated	350.41	Energy Infrastructure and Transport / Transport / General TR	Oppose in part	Considers that due to the age and frequency of mobility constraints amongst retirement village residents, it is not necessary or practicable to apply the Table 7 minimum number of onsite cycling and micromobility device parking space requirements to retirement villages at the same rate as it is applied to other residential activities.	Opposes Table 7 (TR: Minimum number of on-site cycling and micromobility device parking spaces) and seeks amendment.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Retirement Villages Association of New Zealand Incorporated	350.42	Energy Infrastructure and Transport / Transport / General TR	Amend	Considers that due to the age and frequency of mobility constraints amongst retirement village residents, it is not necessary or practicable to apply the Table 7 minimum number of onsite cycling and micromobility device parking space requirements to retirement villages at the same rate as it is applied to other residential activities.	Amend Table 7 (TR: Minimum number of on-site cycling and micromobility device parking spaces) to Add "retirement villages" as a new activity with the following minimum number of onsite cycling and micromobility device parking spaces: - Not applicable for Short Stay (visitors); - Minimum 1, 0.1 per staff member*
Greater Wellington Regional Council	351.107	Energy Infrastructure and Transport / Transport / General TR	Support in part	Supports the removal of on-site carparking required by the NPS-UD as it will mean a more proactive approach to managing on-street parking across the city than in the past. Also supports the requirement for the provision of cycling and micro-mobility parking as part of new development.	Not specified.
Woolworths New Zealand	359.29	Energy Infrastructure and Transport / Transport / General TR	Support	Supports Table 7 - TR: Minimum number of on-site cycling and micromobility device parking spaces. [Refer to original submission for full reason]	Retain Table 7 (TR: Minimum number of on-site cycling and micromobility device parking spaces) in the Transport chapter as notified.
Z Energy Limited	361.9	Energy Infrastructure and Transport / Transport / General TR	Support in part	The Transport strategic direction of the PDP is supported, as it seeks to reduce carbon emissions and effects on climate change through the use of renewable energy technologies.	Retain the Transport chapter with amendment.
Waka Kotahi	370.155	Energy Infrastructure and Transport / Transport / General TR	Amend	Consider 200 vehicles per day to be a high number for any activity within the district plan. It was not clear from the support documents where this number has come from. Waka Kotahi seeks to work with Council to determine appropriate thresholds for specific activities accessing both the state highway and local roads	Seeks to Amend Table 8 (TR: Classification of driveways) to institute a threshold of 100 car equivalent vehicle movements per day where a proposal accesses the state highway, and lower thresholds where the safety of the transport network warrants it. Note – car equivalent movements are defined as (as noted in the New Zealand Transport Agency Planning Policy Manual: Appendix 1 – Glossary): • 1 car to and from the property = 2 equivalent car movements • 1 truck to and from property = 6 equivalent car movements • 1 truck and trailer to and from property = 10 equivalent car movements
BP Oil New Zealand, Mobil Oil New Zealand Limited and Z Energy Limited (the Fuel Companies)	372.70	Energy Infrastructure and Transport / Transport / General TR	Support in part	The Transport chapter is generally supported, but needs provisions to enable EV charging stations. The submitter considers that the use of EVs to be a key utilisation of new renewable technologies that will help achieve Wellington's carbon reduction and climate change goals. INF-S18 provides for EV charging stations but only as optional ancillary infrastructure for when a new road is created (through Rule INF-R25 (New Roads)). EVs are also not defined in the PDP and there are no objectives, policies or rules that seek to enable the use of EVs, specifically through the provision of EV charging stations. As such, as it stands, the submitter notes that it appears that the only directly enabling EV provision is Standard INF-S18. There does not appear to be any other provisions in the PDP that recognise or enable EV charging stations and it is therefore assumed that where such EV charging is ancillary to a proposed or existing activity, the same activity status of the primary activity applies. [Refer to original submission for full reason]	Retain the Transport chapter with amendment.
WCC Environmental Reference Group	377.45	Energy Infrastructure and Transport / Transport / General TR	Support	This will help support provision for multiple modes.	Retain Table 7-TR (Minimum number of on-site cycling and micromobility device parking spaces) as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
WCC Environmental Reference Group	377.46	Energy Infrastructure and Transport / Transport / General TR	Support in part	Generally supportive. However, the submitter has significant concerns about the declassification of Johnsonville as a rapid transport service and suggest this is amended as it is contrary to both the GWRC Regional Land Transport Plan and the National Policy Statement for Urban Development: this line enables high passenger capacity, meets the definition of 'rapid' in that at peak times it operates on a 12 minute schedule, and has potential, with additional loops, to become even more frequent as demand grows in the future. [Refer to original submission for full reason]	Not specified.
Henry Bartholomew Nankivell Zwart	378.9	Energy Infrastructure and Transport / Transport / General TR	Not specified	Considers that universal accessibility, and active and sustainable travel must be prioritised for access to public transport so that people don't need to drive to stations, nor traverse inhospitable park-and-rides once they get there.	Seeks that universal accessibility, and active and sustainable travel is prioritised for access to public transport.
Kāinga Ora Homes and Communities	391.134	Energy Infrastructure and Transport / Transport / General TR	Oppose in part	The submitter does not believe that public or limited notification is necessary.	Opposes in part and requests amendment so that all Rules in the Infrastructure chapter are to include a notification preclusion statement for activities under Restricted Discretionary
Onslow Residents Community Association	FS80.28	Part 2 / Energy Infrastructure and Transport / Transport / General TR	Oppose	Considers that the notification and preclusion required in the notified District Plan must be retained to give it teeth and make it effective.	Disallow
Kāinga Ora Homes and Communities	391.135	Energy Infrastructure and Transport / Transport / General TR	Amend	Considers that all rules in the Transport chapter should have a notification preclusion statement (for both public and limited notification) for restricted discretionary activities. The technical nature of these breaches requires technical and/or engineering assessments, and public participation by way of limited or public notification will unlikely add anything to the consideration of the effects of these breaches.	Amend all Rules in the Transport chapter to include a notification preclusion statement for activities under Restricted Discretionary as follows: <u>Notification:</u> <u>Applications under this rule are precluded from being publicly or limited notified in accordance with section 95A or section 95B of the RMA.</u>
KiwiRail Holdings Limited	FS72.44	Energy, Infrastructure, and Transport / Transport / General TR	Oppose	Considers it necessary to be notified of infrastructure activities adjacent to the rail corridor to ensure KiwiRail has the opportunity to be included in the planning assessment process. Considers the relief sought should be declined because it a) will not promote the sustainable management of the natural and physical resources in Wellington City, and is therefore contrary to, or inconsistent with, Part 2 and other provisions of the RMA and the Amendment Act; (b) is inconsistent with other relevant planning documents, including the Greater Wellington Regional Policy Statement and National Policy Statement for Urban Development 2020; (c) will not meet the reasonably foreseeable needs of future generations; (d) will not avoid, remedy or mitigate actual and potential adverse effects on the environment; (e) will not enable the social, economic and cultural wellbeing of people of Wellington City; and (f) is not the most appropriate way to achieve the objectives of the Proposed Plan in terms of section 32 of the RMA.	Disallow
Onslow Residents Community Association	FS80.29	Energy, Infrastructure, and Transport / Transport / General TR	Oppose	Considers that the notification and preclusion required in the notified District Plan must be retained to give it teeth and make it effective.	Disallow
Stride Investment Management Limited	FS107.41	Energy, Infrastructure, and Transport / Transport / General TR	Support	Stride supports notification being precluded from applications for resource consent under rules in the Transport chapter, which would appropriately reflect the technical rule of such rules and that public participation is unlikely to assist decisions on consents required under this chapter.	Allow
Investore Property Limited	FS108.41	Energy, Infrastructure, and Transport / Transport / General TR	Support	Investore supports notification being precluded from applications for resource consent under rules in the Transport chapter, which would appropriately reflect the technical rule of such rules and that public participation is unlikely to assist decisions on consents required under this chapter.	Allow

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Matthew Tamati Reweti	394.8	Energy Infrastructure and Transport / Transport / General TR	Not specified	Considers that the increased density of cars parked in streets, and traffic congestion, can be a helpful contributor to traffic calming and safer streets by slowing down traffic	Seeks that traffic congestion and parking effects are viewed as an interim contributor to traffic calming and safer streets.
Stephen Minto	FS100.5	Energy Infrastructure and Transport / Transport / General TR	Oppose	<p>Submitter 394 seeks to have traffic congestion and inadequate parking viewed as positives. 'traffic calming and safer streets'</p> <p>This works against emergency services access e.g. fire service and ambulance. See Fire Service submission point number 273.201. There are not always bus lanes for emergency services to use. And congestion can encourage 'rat-running' (submitters terminology) into using bus lanes which would damage public transport flows and emergency services access.</p> <p>Congestion can impact public transport flow because there are not always bus lanes which tends to negate the submitters next point 472.10 about encouraging access to public transport.</p> <p>[Inferred reference to submission point 394.8]</p>	Disallow
Matthew Tamati Reweti	394.9	Energy Infrastructure and Transport / Transport / General TR	Not specified	Considers that universal accessibility, and active and sustainable travel must be prioritised for access to public transport so that people don't need to drive to stations, nor traverse inhospitable park-and-rides once they get there.	Seeks that universal accessibility, and active and sustainable travel is prioritised for access to public transport.
David Cadman	398.7	Energy Infrastructure and Transport / Transport / General TR	Not specified	Considers that the increased density of cars parked in streets, and traffic congestion, can be a helpful contributor to traffic calming and safer streets by slowing down traffic	Seeks that traffic congestion and parking effects are viewed as an interim contributor to traffic calming and safer streets.
Stephen Minto	FS100.2	Energy Infrastructure and Transport / Transport / General TR	Oppose	<p>Submitter 398 seeks to have traffic congestion and inadequate parking viewed as positives. 'traffic calming and safer streets'</p> <p>This works against emergency services access e.g. fire service and ambulance. See Fire Service submission point number 273.201. There are not always bus lanes for emergency services to use. And congestion can encourage 'rat-running' (submitters terminology) into using bus lanes which would damage public transport flows and emergency services access.</p> <p>Congestion can impact public transport flow because there are not always bus lanes which tends to negate the submitters next point 472.10 about encouraging access to public transport.</p> <p>[Inferred reference to submission point 398.7]</p>	Disallow
David Cadman	398.8	Energy Infrastructure and Transport / Transport / General TR	Not specified	Considers that universal accessibility, and active and sustainable travel must be prioritised for access to public transport so that people don't need to drive to stations, nor traverse inhospitable park-and-rides once they get there.	Seeks that universal accessibility, and active and sustainable travel is prioritised for access to public transport.
Wellington International Airport Ltd	406.186	Energy Infrastructure and Transport / Transport / General TR	Not specified	[No specific reason given beyond decision requested - see original submission]	Clarify whether rules and standards will apply based on cumulative effects within a site or based on individual activities.
Wellington International Airport Ltd	406.187	Energy Infrastructure and Transport / Transport / General TR	Not specified	Considers that the Airport already generates a large volume of traffic, a consent would arguably be triggered for every new activity established, irrespective of the nature or scale of the activity.	Not specified.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Wellington International Airport Ltd	406.188	Energy Infrastructure and Transport / Transport / General TR	Not specified	Airports facilitate the movement of people to and from the District. Many of the activities undertaken at airports are purely intended to support this function and provide services for passengers, staff and “meters and greeters”. They are therefore not vehicle generating activities in themselves. For the purposes of implementing the relevant trip generation methods, it would be difficult to distinguish between what is a facilitating and what is a generating activity.	Clarify what is and isn't a vehicle generating activity.
Wellington International Airport Ltd	406.189	Energy Infrastructure and Transport / Transport / General TR	Amend	Considers that as the management of people to and from the airport and its environs is a role that WIAL oversees and accounts for as its role as airport operator.	Seeks that the Trip Generation provisions do not apply within the Airport Zone.
KiwiRail Holdings Limited	408.88	Energy Infrastructure and Transport / Transport / General TR	Support	Supports the introduction text which outlines that matters concerning the operation, maintenance, repair and renewal, upgrading and development of the transport network and connections to the transport network are provided in the Infrastructure Chapter. This is an important message as district plans commonly contain provisions relating to vehicle crossing setbacks from level crossings and level crossing sightline restrictions, within transport chapters. KiwiRail support text which helps with plan-user navigation to all relevant parts of the Plan.	Retain the Transport chapter introduction as notified.
Emma Osborne	410.6	Energy Infrastructure and Transport / Transport / General TR	Amend	Considers that the increased density of cars parked in streets, and traffic congestion, is not wholly a negative effect despite what the RMA would say. It can be a helpful contributor to traffic calming and safer streets. [Refer to original submission for full reason].	Seeks that traffic congestion and parking effects are viewed as not wholly a negative effect. [Inferred decision requested]
Stephen Minto	FS100.3	Energy Infrastructure and Transport / Transport / General TR	Oppose	Submitter 410 seeks to have traffic congestion and inadequate parking viewed as positives. ‘traffic calming and safer streets’ This works against emergency services access e.g. fire service and ambulance. See Fire Service submission point number 273.201. There are not always bus lanes for emergency services to use. And congestion can encourage ‘rat-running’ (submitters terminology) into using bus lanes which would damage public transport flows and emergency services access. Congestion can impact public transport flow because there are not always bus lanes which tends to negate the submitters next point 472.10 about encouraging access to public transport. [Inferred reference to submission point 410.6]	Disallow
VicLabour	414.19	Energy Infrastructure and Transport / Transport / General TR	Support	Supports the sustainable transport hierarchy and a shift from private vehicles to active and public transport. [Refer to original submission for full reasons]	Retain reference to sustainable transport hierarchy in the transport chapter introduction as notified. [Inferred decision requested]
Luke Stewart	422.4	Energy Infrastructure and Transport / Transport / General TR	Not specified	Considers that the traffic congestion and the increased density of cars parked on streets can be a helpful contributor to traffic calming and safer streets by slowing down traffic, discouraging rat-running, and adding an extra nudge for those “on the fence” to maybe travel another way for those short trips.	Seeks that traffic congestion and parking effects are viewed as an interim contributor to traffic calming and safer streets, and used tactically as such.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Stephen Minto	FS100.4	Energy Infrastructure and Transport / Transport / General TR	Oppose	<p>Submitter 422 seeks to have traffic congestion and inadequate parking viewed as positives. 'traffic calming and safer streets'</p> <p>This works against emergency services access e.g. fire service and ambulance. See Fire Service submission point number 273.201. There are not always bus lanes for emergency services to use. And congestion can encourage 'rat-running' (submitters terminology) into using bus lanes which would damage public transport flows and emergency services access.</p> <p>Congestion can impact public transport flow because there are not always bus lanes which tends to negate the submitters next point 472.10 about encouraging access to public transport.</p> <p>[Inferred reference to submission point 422.4]</p>	Disallow
Luke Stewart	422.5	Energy Infrastructure and Transport / Transport / General TR	Not specified	Considers that universal accessibility, and active and sustainable travel, must be prioritised for access to public transport so that people don't need to drive to stations, nor traverse inhospitable park-and-rides once they get there.	Seeks that universal accessibility, and active and sustainable travel, is prioritised for access to public transport.
Survey & Spatial New Zealand Wellington Branch	439.23	Energy Infrastructure and Transport / Transport / General TR	Amend	Considers that Driveway Level 3 (7-20 dwellings) widths are excessive in Table 9 - TR Design of Driveways. Considers that this provision is inconsistent with the overall direction of the PDP attempting to reduce areas of sealed surfaces to minimise stormwater discharge and improve runoff quality. Considers that the 6m width required by this standard provides no traffic management benefits and it should be reduced to 4.5m as this provides enough space for firetrucks, passing vehicles, and encourages a safe speed environment.	<p>Amend Table 9 - TR Design of Driveways:</p> <p>Driveway Level 3: Footpath = 1 x 1.5 <u>1.0</u> Vehicles = 2 x 3.0 <u>1 x 4.5</u> Berm = 1 x 1.0 <u>or 2 x 0.5</u> Overall legal width = 8.0 <u>6.5</u></p>
Daniel Christopher Murray Grantham	468.3	Energy Infrastructure and Transport / Transport / General TR	Amend	Considers that universal accessibility, and active and sustainable travel, must be prioritised for access to public transport so that people don't need to drive to stations, nor traverse inhospitable park-and-rides once they get there.	Seeks that universal accessibility, and active and sustainable travel, is prioritised for access to public transport.
Alicia Hall on behalf of Parents for Climate Aotearoa	472.9	Energy Infrastructure and Transport / Transport / General TR	Amend	Considers that the traffic congestion and the increased density of cars parked on streets can be a helpful contributor to traffic calming and safer streets by slowing down traffic, discouraging rat-running, and adding an extra nudge for those "on the fence" to maybe travel another way for those short trips.	Seeks that traffic congestion and parking effects are viewed as an interim contributor to traffic calming and safer streets, and used tactically as such.
Stephen Minto	FS100.1	Energy Infrastructure and Transport / Transport / General TR	Oppose	<p>Submitter 472 seeks to have traffic congestion and inadequate parking viewed as positives. 'traffic calming and safer streets'</p> <p>This works against emergency services access e.g. fire service and ambulance. See Fire Service submission point number 273.201. There are not always bus lanes for emergency services to use. And congestion can encourage 'rat-running' (submitters terminology) into using bus lanes which would damage public transport flows and emergency services access.</p> <p>Congestion can impact public transport flow because there are not always bus lanes which tends to negate the submitters next point 472.10 about encouraging access to public transport.</p>	Disallow
Alicia Hall on behalf of Parents for Climate Aotearoa	472.10	Energy Infrastructure and Transport / Transport / General TR	Not specified	Considers that universal accessibility, and active and sustainable travel must be prioritised for access to public transport so that people don't need to drive to stations, nor traverse inhospitable park-and-rides once they get there.	Seeks that universal accessibility, and active and sustainable travel is prioritised for access to public transport.
Ben Barrett	479.20	Energy Infrastructure and Transport / Transport / General TR	Amend	<p>Considers that the District Plan needs to recognise that Newtown's main roads are single lane roads, not major transport corridors.</p> <p>There are practical limitations to the intensification of actual road width that have been ignored by intensification planning to date.</p>	Seeks that the District Plan recognises that Newtown's main roads are single lane roads, not major transport corridors.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Catharine Underwood	481.18	Energy Infrastructure and Transport / Transport / General TR	Amend	Not specified.	Seeks that there should be much more mandatory provisions for storage and charging for ebikes and personal storage lockers for other gear.
Living Streets Aotearoa	482.34	Energy Infrastructure and Transport / Transport / General TR	Support	Supports the removal of minimum parking requirements. Considers that we need to be moving to a situation where more households are car-less and this can be addressed through not forcing houses to have parking spaces.	Retain having no minimum parking requirements in the plan.
Living Streets Aotearoa	482.35	Energy Infrastructure and Transport / Transport / General TR	Not specified	Considers that the transport section is inadequate in terms of ensuring there is good pedestrian infrastructure.	Seeks that in the Transport chapter, any permitted activity is consistent with the NZTA guidelines (or equivalent standard).
Living Streets Aotearoa	482.36	Energy Infrastructure and Transport / Transport / General TR	Amend	Considers that in Table 9 - TR Design of driveways, the 6 metre total width of driveways at the footpath is too wide and particularly with Driveway Level 3, the design speed is too high at 20km/h.	Seeks that Table 9 - TR Design of driveways should consider reducing both the width and speed of the driveways.
Living Streets Aotearoa	482.37	Energy Infrastructure and Transport / Transport / General TR	Not specified	Considers that growth in rural areas means roads should be upgraded with pedestrian footpaths	Rural roads in Wellington City should still have dedicated pedestrian space, particularly in areas that have been identified for further development
Living Streets Aotearoa	482.38	Energy Infrastructure and Transport / Transport / General TR	Not specified	Considers that growth in rural areas means roads should be upgraded with pedestrian footpaths	Shared paths should be a controlled or discretionary use in all cases.
Susan Rotto	63.1	Energy Infrastructure and Transport / Transport / New TR	Amend	MRZ-P8.4 (Achieve attractive and safe streets), MRZ-P11 (Attractive and safe streets and public open spaces) and MRZ-R6 (Visitor accommodation) cannot work without provision for off-street parking. Lack of off-street parking drives parking on-street which packs up streets, which are unsafe and provide no space for workers.	Seeks that at least one off-street car park per residential unit on a site in the Medium Density Residential Chapter. [Inferred decision requested]
Susan Rotto	63.2	Energy Infrastructure and Transport / Transport / New TR	Amend	MRZ-P8.4 (Achieve attractive and safe streets), MRZ-P11 (Attractive and safe streets and public open spaces) and MRZ-R6 (Visitor accommodation) cannot work without provision for off-street parking. Lack of off-street parking drives parking on-street which packs up streets, which are unsafe and provide no space for workers.	Seeks that 1 > off-street car parks is required on sites in the Medium Density Residential Zone that are used for non-residential purposes. [Inferred decision requested]
Tawa Community Board	294.9	Energy Infrastructure and Transport / Transport / New TR	Amend	Considers that due to the Central Governments lack of review of the Building Act, there are loop holes regarding accessibility that the PDP should address. [Refer to original submission for full reason]	Seeks that the PDP address accessibility for residents with mobility issues.
Greater Wellington Regional Council	351.108	Energy Infrastructure and Transport / Transport / New TR	Amend	Considers that additional policy direction would be required to have regard to Proposed RPS Change 1 direction (Policies CC.1 and CC.3) which directs the provision of infrastructure to promote the uptake of cycling as a means of transport. This direction would require the provision of cycle parking that is safe, convenient, and secure and end of journey facilities for staff such as showers and lockers.	Add a new Policy to the Transport chapter that provides more explicit direction regarding the support for cycle transport, as follows: <u>Encourage cycle transport through the provision of cycle parking that is sheltered, convenient, safe and secure and end-of-journey facilities for staff including showers, lockers and dedicated changing spaces.</u>
The Retirement Villages Association of New Zealand Incorporated	FS126.61	Part 2 / Energy Infrastructure and Transport / Transport / New TR	Not specified	The RVA supports the intent of this submission point in principle, however due to the age and frequency of mobility constraints amongst retirement village residents and based on the RVA's primary position that active modes / public transport are less relevant considerations for retirement villages (given their functional and operational needs), the RVA considers that this provision should not apply to retirement villages.	Amend / The RVA seeks that this submission point is allowed, subject to the exclusion of retirement villages from this policy.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Ryman Healthcare Limited	FS128.61	Part 2 / Energy Infrastructure and Transport / Transport / New TR	Not specified	Ryman supports the intent of this submission point in principle, however due to the age and frequency of mobility constraints amongst retirement village residents and based on Ryman's primary position that active modes / public transport are less relevant considerations for retirement villages (given their functional and operational needs), Ryman considers that this provision should not apply to retirement villages.	Amend / Ryman seeks that this submission point is allowed, subject to the exclusion of retirement villages from this policy.
Greater Wellington Regional Council	351.109	Energy Infrastructure and Transport / Transport / New TR	Amend	Considers it appropriate to include a new standard that sets out the minimum end-of-trip facilities for staff to support cycling as a means of transport. This can be based on the number of cycling spaces required to be provided. For example, 1 shower and 1 locker per 10 staff cycle parks. This standard should be linked with TR-S2 and Table TR-7. The relevant Proposed RPS Change 1 policies are CC.1 and CC.3.	Add a new standard to that sets out the minimum end-of-trip facilities for staff to support cycling as a means of transport. This could relate to a minimum number of showers and lockers to be provided.
The Retirement Villages Association of New Zealand Incorporated	FS126.62	Part 2 / Energy Infrastructure and Transport / Transport / New TR	Not specified	The RVA supports the intent of this submission point in principle, however due to the age and frequency of mobility constraints amongst retirement village residents and based on the RVA's primary position that active modes / public transport are less relevant considerations for retirement villages (given their functional and operational needs), the RVA considers that this provision should not apply to retirement villages.	Amend / The RVA seeks that this submission point is allowed, subject to the exclusion of retirement villages from this policy.
Ryman Healthcare Limited	FS128.62	Part 2 / Energy Infrastructure and Transport / Transport / New TR	Not specified	Ryman supports the intent of this submission point in principle, however due to the age and frequency of mobility constraints amongst retirement village residents and the requirements for care for staff and based on Ryman's primary position that active modes / public transport are less relevant considerations for retirement villages (given their functional and operational needs), Ryman considers that these various provisions should not apply to retirement villages.	Amend / Ryman seeks that this submission point is allowed, subject to the exclusion of retirement villages from this objective.
Z Energy Limited	361.10	Energy Infrastructure and Transport / Transport / New TR	Amend	Considers the use of electric vehicles (EVs) to be a key utilisation of new renewable technologies that will help achieve Wellington's carbon reduction and climate change goals. However, EVs are not defined in the PDP and there are no objectives, policies or rules that seek to enable the use of EVs, specifically through the provision of EV charging stations. The only exception being Standard INF-S18 in the Infrastructure chapter which is only applicable where new roads are created. In comparison, the Residential zone and Centre zone under the Operative District Plan contain objectives, policies and methods that look to specifically enable EV charging stations.	Add a new Rule in the Transport chapter as follows: <u>TR-R7 (Electric Vehicle Charging Stations)</u> <u>All Zones</u> <u>1. Activity Status: Permitted</u> <u>Where:</u> <u>a. Compliance with TR-S7 is achieved; and</u> <u>b. Compliance with TR-S10 is achieved;</u> <u>2. Activity status: Restricted Discretionary</u> <u>where</u> <u>a. Compliance with TR-R7.1 cannot be achieved</u> <u>Matters of discretion:</u> <u>1. The matters in TR-P3; and</u> <u>2. The extent and effect of non-compliance with standard TR-S10 as specified in the associated assessment criteria for the infringed standard;</u>
Z Energy Limited	361.11	Energy Infrastructure and Transport / Transport / New TR	Amend	Considers the use of electric vehicles (EVs) to be a key utilisation of new renewable technologies that will help achieve Wellington's carbon reduction and climate change goals. However, EVs are not defined in the PDP and there are no objectives, policies or rules that seek to enable the use of EVs, specifically through the provision of EV charging stations. The only exception being Standard INF-S18 in the Infrastructure chapter which is only applicable where new roads are created. In comparison, the Residential zone and Centre zone under the Operative District Plan contain objectives, policies and methods that look to specifically enable EV charging stations.	Add a new standard in the Transport chapter as follows: <u>TR-S10 (Ancillary structures for electric vehicle charging)</u> <u>1. The structures (excluding poles and cables) must:</u> <u>a. Not exceed a maximum height above ground level of 3m; and</u> <u>b. Not exceed a maximum combined footprint of 5m2; and</u> <u>c. Comply with zone Boundary Setback standards.</u> <u>Assessment criteria when the standard is infringed:</u> <u>1. Streetscape and visual amenity effects; and</u> <u>2. Whether landscaping is required to mitigate streetscape and visual amenity effects.</u>

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Waka Kotahi	370.156	Energy Infrastructure and Transport / Transport / New TR	Amend	Considers it appropriate that any change of land use involving direct access onto the state highway require consent, at least as a restricted discretionary activity, with discretion restricted to the matters in TR-P3.	Add a new Rule to the Transport chapter as follows: <u>Change of land use for activities having direct access to the state highway</u> <u>Restricted discretionary activity</u> <u>Discretion restricted to the matters in TR-P3.</u>
BP Oil New Zealand, Mobil Oil New Zealand Limited and Z Energy Limited (the Fuel Companies)	372.71	Energy Infrastructure and Transport / Transport / New TR	Amend	Considers that a new provision should be added to the Transport chapter to recognise or enable EV charging stations as a permitted activity in all zones, subject to compliance with specific standards. This rule would support a broader network of EV charging stations and therefore greater uptake of EV use in the district and would contribute to Wellington's carbon reduction and climate change goals. [See original submission for full reason]	Add new Rule in the Transport chapter as follows: <u>TR-R7 (Electric Vehicle Charging Stations)</u> <u>All Zones</u> <u>1. Activity Status: Permitted</u> <u>Where:</u> <u>a. Compliance with TR-S7 is achieved; and</u> <u>b. Compliance with TR-S10 is achieved;</u> <u>2. Activity status: Restricted Discretionary</u> <u>Where</u> <u>a. Compliance with TR-R7.1 cannot be achieved.</u> <u>Matters of discretion:</u> <u>1. The matters in TR-P3; and</u> <u>2. The extent and effect of non-compliance with standard TR-S10 as specified in the associated assessment criteria for the infringed standard;</u>
BP Oil New Zealand, Mobil Oil New Zealand Limited and Z Energy Limited (the Fuel Companies)	372.72	Energy Infrastructure and Transport / Transport / New TR	Amend	Considers that a new provision should be added to the Transport chapter to provide height, boundary setbacks and amenity standards for EV charging stations. As the plan stands, EV charging stations are currently interpreted as an ancillary activity and ancillary structure(s) to a site's primary activity and would only subject to building and structure standards to ensure appropriate built form outcomes are achieved. [See original submission for full reason]	Add new Standard in the Transport chapter as follows: <u>TR-S10 (Ancillary structures for electric vehicle charging)</u> <u>1. The structures (excluding poles and cables) must:</u> <u>a. Not exceed a maximum height above ground level of 3m; and</u> <u>b. Not exceed a maximum combined footprint of 5m2; and</u> <u>c. Comply with zone Boundary Setback standards.</u> <u>Assessment criteria when the standard is infringed:</u> <u>1. Streetscape and visual amenity effects; and</u> <u>2. Whether landscaping is required to mitigate streetscape and visual amenity effects.</u>
Kāinga Ora Homes and Communities	391.136	Energy Infrastructure and Transport / Transport / New TR	Amend	Considers that Objective INF-O5 should be amended to be reviewed and moved to the Transport chapter.	Seeks that Objective INF-O5 (Transport network) be reviewed, amended and moved from the Infrastructure chapter to the Transport Chapter.
KiwiRail Holdings Limited	FS72.45	Part 2 / District-Wide Matters / Energy, Infrastructure, and Transport / Transport / New TR	Not specified	KiwiRail has an interest in the relief sought. District Plans throughout the country typically separate transport and infrastructure provisions into separate chapters. If this relief sought is approved, KiwiRail seeks to ensure that the introduction text, objectives, policies and methods are updated to keep the suite of provisions relating to the transport network together for accurate plan interpretation and implementation.	Amend
Kāinga Ora Homes and Communities	391.137	Energy Infrastructure and Transport / Transport / New TR	Amend	Considers that all transport-related provisions (objectives, policies, rules and definitions) in the Infrastructure chapter should be reviewed, amended and moved to the Transport chapter. Some provisions may be deleted in the process.	Seeks that transport related provisions be reviewed, amended and moved from the Infrastructure chapter to the Transport Chapter.
KiwiRail Holdings Limited	FS72.46	Part 2 / District-Wide Matters / Energy, Infrastructure, and Transport / Transport / New TR	Not specified	KiwiRail has an interest in the relief sought. District Plans throughout the country typically separate transport and infrastructure provisions into separate chapters. Amend

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Kāinga Ora Homes and Communities	391.144	Energy Infrastructure and Transport / Transport / New TR	Amend	Considers that INF-S12 should be amended to have less specific requirements.	Amend INF-S12 (Buildings, structures and activities in the National Grid Yard) as follows: 1. The building or structure must have a minimum vertical clearance of 10m below the lowest point of a conductor under all transmission line and building operating conditions; or 2. Must meet the safe electrical clearance distances required by New Zealand Electrical Code of Practice for Safe Electrical Distances (NZECP 34:2001) ISSN 01140663 under all transmission line and building operating conditions. 3. The building or structure must be located at least 12m from the outer visible edge of a foundation of a National Grid transmission line tower or pole, except where it: a. Is a fence not exceeding 2.5m in height that is located at least: i. 6m from the outer visible edge of a foundation of a National Grid transmission line tower; or ii. 5m from the outer visible edge of a foundation of a National Grid transmission line pole. b. Is an artificial crop protection structure or crop support structure not exceeding 2.5m in height and located at least 8m from a National Grid transmission line pole that: i. Is removable or temporary to allow a clear working space of 12m from the pole for maintenance; and ii. Allows all weather access to the pole and a sufficient area for maintenance equipment, including a crane; or c. Meets the requirements of clause 2.4.1 of New Zealand Electrical Code of Practice for Safe Electrical Distances (NZECP 34:2001) ISSN 01140663.
KiwiRail Holdings Limited	FS72.53	Part 2 / District-Wide Matters / Energy, Infrastructure, and Transport / Transport / New TR	Not specified	KiwiRail has an interest in the relief sought. District Plans throughout the country typically separate transport and infrastructure provisions into separate chapters. If this relief sought is approved, KiwiRail seeks to ensure that the introduction text, objectives, policies and methods are updated to keep the suite of provisions relating to the transport network together for accurate plan interpretation and implementation.	Amend
Kāinga Ora Homes and Communities	391.145	Energy Infrastructure and Transport / Transport / New TR	Amend	Considers that all transport-related provisions in the Infrastructure chapter, including INF-S13, should be reviewed, amended and moved to the Transport chapter. Some provisions may be deleted in the process.	Seeks INF-S13 (Design of roads) be reviewed, amended and moved from the Infrastructure chapter to the Transport Chapter.
KiwiRail Holdings Limited	FS72.54	Part 2 / District-Wide Matters / Energy, Infrastructure, and Transport / Transport / New TR	Not specified	KiwiRail has an interest in the relief sought. District Plans throughout the country typically separate transport and infrastructure provisions into separate chapters. If this relief sought is approved, KiwiRail seeks to ensure that the introduction text, objectives, policies and methods are updated to keep the suite of provisions relating to the transport network together for accurate plan interpretation and implementation.	Amend
Kāinga Ora Homes and Communities	391.146	Energy Infrastructure and Transport / Transport / New TR	Amend	Considers that Table 1 - 6 in the Infrastructure chapter should be reviewed, amended and moved to the Transport chapter.	Seeks that Table 1 - 6 in the Infrastructure chapter be reviewed, amended and moved from the Infrastructure chapter to the Transport Chapter.
Kāinga Ora Homes and Communities	391.147	Energy Infrastructure and Transport / Transport / New TR	Amend	Considers that Figure 1 - 4 in the Infrastructure chapter should be reviewed, amended and moved to the Transport chapter.	Seeks that Figure 1 - 4 in the Infrastructure chapter be reviewed, amended and moved from the Infrastructure chapter to the Transport Chapter.
Foodstuffs North Island	476.7	Energy Infrastructure and Transport / Transport / New TR	Amend	The provision "Car sharing activities" has the same provision number (TR-R5) as TR-R5 "On-site vehicle parking and manoeuvring".	Amend the provision number and all references for "Car sharing activities" from TR-R5 to TR-R6.
Jill Ford	163.5	Energy Infrastructure and Transport / Transport / TR-O1	Support	Supports TR-O1.4. as notified.	Retain TR-O1.4. (Purpose) as notified.
Patrick Wilkes	173.11	Energy Infrastructure and Transport / Transport / TR-O1	Support	[No specific reason given beyond decision requested - refer to original submission].	Retain Objective TR-O1 (4) (New development provides appropriate on-site facilities for cycling and Micromobility users) as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Peter Nunns	196.9	Energy Infrastructure and Transport / Transport / TR-01	Not specified	Considers that accommodating increased development within Wellington City's existing footprint will increase transport demand within the city and this will only be feasible if it is accompanied by a shift towards public and active transport.	Seeks that improved transport infrastructure and service provision is provided to support the shift towards public and active transport.
Stratum Management Limited	249.15	Energy Infrastructure and Transport / Transport / TR-01	Amend	Opposes the requirement of 1 bike parking space per residential unit in a city centre apartment is opposed. An amendment is sought to the objective to reflect that the cycle and micromobility parking requirement is proportionate to expected demand.	Amend TR-01 (Purpose) as follows: Land use and development is managed to ensure that: ... 4. New development provides for appropriate on-site facilities for cycling and micromobility users <u>to meet expected demand</u> ; and ...
Richard Hovey	FS60.2	Part 2 / Energy Infrastructure and Transport / Transport / TR-01	Oppose	Oppose the submissions from Stratum Management Limited on the basis that while developers may enjoy the cost reduction benefits that the removal of the requirement to provide car parks has brought they cannot simply privatise that gain and expect some sort of external transport storage solution to be provided for the residents of their developments. People in urban environments should have a choice of transport and bikes/e-bikes/e-scooters are a perfect match for everyday urban transport needs. They contribute to a healthier, happier and more appealing city. Developers should celebrate how much less space is required to facilitate bicycle storage than private motor vehicles and provide a reasonable level of space and facility for this purpose. While it may be presented simply as a 'cost' which some people may not wish to pay it should be seen as part of the investment in better residential development which will either be valued by those living there or rented out to others (in exactly the way car parks are).	Disallow / Seeks that the part of the submission arguing against a good level of bicycle storage being required for residential developments is disallowed.
Cycling Action Network	FS99.2	Part 2 / Energy Infrastructure and Transport / Transport / TR-01	Oppose	A minimum of 1 cycle park per residential unit should be required. The requirements for cycle and micromobility storage/parking is fundamental to achieve the mode shift required to achieve net zero carbon emissions, and has associated health and equity benefits. This is consistent with WCC's Te Atakura and mode shift goals.	Disallow / Seeks that a minimum of 1 cycle park per residential unit should be required.
Paihikara Ki Pōneke Cycle Wellington	302.19	Energy Infrastructure and Transport / Transport / TR-01	Support	TR-01 is supported as it seeks to provide for a range of modes within the transport network, including requiring new development to provide facilities for cycling.	Retain the Objective TR-01 (Purpose) as notified.
Bruce Crothers	319.6	Energy Infrastructure and Transport / Transport / TR-01	Support	Supports TR-01 (4) with respect to the requirement for new development to provide on-site facilities for cycling and micromobility users.	Retains TR-01 (Purpose) as notified.
Joan Fitzgerald	323.2	Energy Infrastructure and Transport / Transport / TR-01	Support	Supports the Objective TR-01, especially subclause 4: New development provides appropriate on-site facilities for cycling and micromobility users;	Retain Objective TR-01 (Purpose) as notified.
Restaurant Brands Limited	349.13	Energy Infrastructure and Transport / Transport / TR-01	Support	Support	Retain TR-01 (Purpose) as notified.
Retirement Villages Association of New Zealand Incorporated	350.43	Energy Infrastructure and Transport / Transport / TR-01	Oppose in part	Considers that the reference to 'effective' on-site parking is no longer considered relevant in light of the NPSUD direction to remove carparking minimums.	Opposes TR-01 (Purpose) and seeks amendment.
Retirement Villages Association of New Zealand Incorporated	350.44	Energy Infrastructure and Transport / Transport / TR-01	Amend	Considers that the reference to 'effective' on-site parking is no longer relevant in light of the NPSUD direction to remove carparking minimums.	Amend TR-01 (Purpose) to replace the reference to 'effective on-site parking' to 'safe and functional on-site parking'.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Waka Kotahi	370.157	Energy Infrastructure and Transport / Transport / TR-O1	Support in part	Support this objective as it provides for the management on land use activities and development on the transport network.	Retain Objective TR-O1 (Purpose) with amendment.
Waka Kotahi	370.158	Energy Infrastructure and Transport / Transport / TR-O1	Amend	Support this objective as it provides for the management on land use activities and development on the transport network.	Amend Objective TR-O1 (Purpose) as follows: ... <u>6. The proposal leads to a reduced reliance on fossil fuels over time</u>
WCC Environmental Reference Group	377.47	Energy Infrastructure and Transport / Transport / TR-O1	Support	Provision for a range of transport modes, and reduced reliance on private vehicle use is important for the city both to achieve its carbon reduction targets, reduce congestion and improve the liveability of the city.	Retain TR-O1 (Purpose) as notified.
Ministry of Education	400.31	Energy Infrastructure and Transport / Transport / TR-O1	Support in part	Supports TR-O1 in part, as it promotes an efficient and integrated transport network for the district that encourages mode shift.	Retain TR-O1 (Purpose), with amendment.
Ministry of Education	400.32	Energy Infrastructure and Transport / Transport / TR-O1	Amend	Seeks that TR-O1 be amended to ensure it reflects the NPS-UD which removed the minimum standards for on-site parking except for accessible spaces in District Plans for Tier 1 territorial authorities.	Amend TR-O1 (Purpose) as follows: Land use and development is managed to ensure that: ... <u>5. Safe and effective on-site accessible parking, loading, access and manoeuvring is provided.</u>
KiwiRail Holdings Limited	408.89	Energy Infrastructure and Transport / Transport / TR-O1	Support	Supports policy that seeks to ensure the safety and effectiveness of the transport is not compromised by high trip generated activities, and that development provides safe and effective access and maneuvering.	Retain TR-O1 (Purpose) as notified.
Victoria University of Wellington Students' Association	123.34	Energy Infrastructure and Transport / Transport / TR-P1	Support	Supports TR-P1 in its entirety.	Retain TR-P1 (High trip generating use and development) as notified.
Paihikara Ki Pōneke Cycle Wellington	302.20	Energy Infrastructure and Transport / Transport / TR-P1	Support	TR-P1 is supported as it seeks to provide for a range of modes within the transport network, including requiring new development to provide facilities for cycling.	Retain TR-P1 (High trip generating use and development) as notified.
Restaurant Brands Limited	349.14	Energy Infrastructure and Transport / Transport / TR-P1	Support	Support	Retain TR-P1 (High trip generating use and development) as notified.
Retirement Villages Association of New Zealand Incorporated	350.45	Energy Infrastructure and Transport / Transport / TR-P1	Support in part	Considers regulation of trip generation should be based on peak hour movements, not daily movements, as those determine capacity. Supports TR-P1 and its provision for high vehicle trip generating activities where they safely and effectively integrate with the transport network and provide for pedestrian and public transport modes. However, considers that due to the age and frequency of mobility constraints amongst retirement village residents, the TR-P1's requirement to provide for cycling and micromobility transport modes at the same rate as other residential activities is not practicable in the retirement village setting. Further, considers that the policy should recognise that trip generation from a site is an anticipated component of development and the focus of regulation should be on higher than anticipated trip generation.	Retain TR-P1 (High trip generating use and development) and seeks amendment.
Retirement Villages Association of New Zealand Incorporated	350.46	Energy Infrastructure and Transport / Transport / TR-P1	Amend	Considers regulation of trip generation should be based on peak hour movements, not daily movements, as those determine capacity. Supports TR-P1 and its provision for high vehicle trip generating activities where they safely and effectively integrate with the transport network and provide for pedestrian and public transport modes. However, considers that due to the age and frequency of mobility constraints amongst retirement village residents, the TR-P1's requirement to provide for cycling and micromobility transport modes at the same rate as other residential activities is not practicable in the retirement village setting. Further, considers that the policy should recognise that trip generation from a site is an anticipated component of development and the focus of regulation should be on higher than anticipated trip generation.	Amend TR-P1 (High trip generating use and development) as follows: Provide for high vehicle trip generating activities where they: 1. Safely and effectively integrate with the transport network, including planned network upgrades and service improvements; and 2. Provide for pedestrian, cycling, micromobility and public transport modes <u>at an appropriate scale to the nature of the high vehicle trip generating activity ; and</u> <u>3. Enable development that generates the same or less traffic than anticipated by the site zoning.</u>

Retirement Villages Association of New Zealand Incorporated	350.47	Energy Infrastructure and Transport / Transport / TR-P1	Oppose in part	Considers regulation of trip generation should be based on peak hour movements, not daily movements, as those determine capacity. Supports TR-P1 and its provision for high vehicle trip generating activities where they safely and effectively integrate with the transport network and provide for pedestrian and public transport modes. However, considers that due to the age and frequency of mobility constraints amongst retirement village residents, theTR-P1's requirement to provide for cycling and micromobility transport modes at the same rate as other residential activities is not practicable in the retirement village setting. Further, considers that the policy should recognise that trip generation from a site is an anticipated component of development and the focus of regulation should be on higher than anticipated trip generation.	Opposes TR-P1 (High trip generating use and development) and seeks amendment.
Retirement Villages Association of New Zealand Incorporated	350.48	Energy Infrastructure and Transport / Transport / TR-P1	Amend	Considers regulation of trip generation should be based on peak hour movements, not daily movements, as those determine capacity. Supports TR-P1 and its provision for high vehicle trip generating activities where they safely and effectively integrate with the transport network and provide for pedestrian and public transport modes. However, considers that due to the age and frequency of mobility constraints amongst retirement village residents, theTR-P1's requirement to provide for cycling and micromobility transport modes at the same rate as other residential activities is not practicable in the retirement village setting. Further, considers that the policy should recognise that trip generation from a site is an anticipated component of development and the focus of regulation should be on higher than anticipated trip generation.	Amend TR-P1 (High trip generating use and development) as follows: Provide for high vehicle trip generating activities where they: 1. Safely and effectively integrate with the transport network, including planned network upgrades and service improvements; and 2. Provide for pedestrian, cycling, micromobility and public transport modes <u>at an appropriate scale to the nature of the high vehicle trip generating activity ; and</u> 3. Enable development that generates the same or less traffic than anticipated by the site zoning.
Greater Wellington Regional Council	351.110	Energy Infrastructure and Transport / Transport / TR-P1	Support in part	Supports Policy TR-P1 (High trip generating use and development)	Retain TR-P1 (High trip generating use and development), subject to amendments.
The Retirement Villages Association of New Zealand Incorporated	FS126.63	Part 2 / Energy Infrastructure and Transport / Transport / TR-P1	Not specified	Ryman supports the intent of this submission point in principle, however due to the age and frequency of mobility constraints amongst retirement village residents and based on Ryman's primary position that active modes / public transport are less relevant considerations for retirement villages (given their functional and operational needs), Ryman considers that these various provisions should not apply to retirement villages.	Amend / Ryman seek that this submission point is allowed, subject to the exclusion of retirement villages from the changes sought, and granting the relief sought by Ryman in relation to TR-P1.
Ryman Healthcare Limited	FS128.63	Part 2 / Energy Infrastructure and Transport / Transport / TR-P1	Not specified	Ryman supports the intent of this submission point in principle, however due to the age and frequency of mobility constraints amongst retirement village residents and based on Ryman's primary position that active modes / public transport are less relevant considerations for retirement villages (given their functional and operational needs), Ryman considers that these various provisions should not apply to retirement villages.	Amend / Ryman seek that this submission point is allowed, subject to the exclusion of retirement villages from the changes sought, and granting the relief sought by Ryman in relation to TR-P1.
Greater Wellington Regional Council	351.111	Energy Infrastructure and Transport / Transport / TR-P1	Amend	Considers it appropriate to amend to have regard to Proposed RPS Change 1, specifically Policy CC.2. Proposed policy TR-P1 should be amended to ensure private vehicle use is minimised and active and public transport modes are maximised. The policy wording should be stronger than simply providing for these alternative modes. To have regard to Proposed RPS Change 1 Policy CC.10, any high trip generating (as per TR-S1) activity or freight distribution activity should be required to provide a travel demand management plan and this be assessed as part of the consent process. Freight distribution activities should also be located where efficient freight movements can minimise greenhouse gas emission. Considers the requirement to provide a travel demand management plan should extend to activities associated with subdivision, larger commercial developments where they may not trigger non-compliance with the vehicle trip generation activity rule.	Seeks to amend TR-P1 (High trip generating use and development) as follows: Provide for high vehicle trip generating activities where they: 1. Safely and effectively integrate with the transport network, including planned network upgrades and service improvements; and <u>2a. Enable reductions in greenhouse gas emissions by locating activities with significant freight servicing requirements in proximity to efficient transport networks;</u> 2. Provide for <u>Enable the uptake of</u> pedestrian, cycling, micro-mobility and public transport modes; <u>and</u> 3. <u>Avoid or mitigate adverse effects through the implementation of a travel demand management plan where vehicle trip generation thresholds in TR-S1 are exceeded, which identifies measures to reduce travel demand, including reducing the number of vehicle trips, offering travel choices, and influencing modes</u>
Kāinga Ora – Homes and Communities	FS89.15	Part 2 / Energy Infrastructure and Transport / Transport / TR-P1	Oppose	Kāinga Ora opposes the amendments which seek for the inclusion and requirement of a travel demand management plan in the District Plan	Disallow

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Waka Kotahi NZ Transport Agency	FS103.11	Part 2 / Energy Infrastructure and Transport / Transport / TR-P1	Support	It is vital to consider potential efficiencies from land use transport integration in plan making. A travel demand management plan is a useful tool to mitigate the effects of high trip-generating activities.	Allow
Stride Investment Management Limited	FS107.16	Part 2 / Energy Infrastructure and Transport / Transport / TR-P1	Oppose	Stride is opposed to extending the requirement to provide a travel demand management plan as this has the potential to create additional administrative costs and unnecessary delays.	Disallow
Investore Property Limited	FS108.16	Part 2 / Energy Infrastructure and Transport / Transport / TR-P1	Oppose	Investore is opposed to extending the requirement to provide a travel demand management plan as this has the potential to create additional administrative costs and unnecessary delays.	Disallow
The Retirement Villages Association of New Zealand Incorporated	FS126.64	Part 2 / Energy Infrastructure and Transport / Transport / TR-P1	Not specified	The RVA supports the intent of this submission point in principle, however due to the age and frequency of mobility constraints amongst retirement village residents and based on the RVA's primary position that active modes / public transport are less relevant considerations for retirement villages (given their functional and operational needs), the RVA considers that this provision should not apply to retirement villages.	Amend / The RVA seeks that this submission point is allowed, subject to the exclusion of retirement villages from this policy.
Ryman Healthcare Limited	FS128.64	Part 2 / Energy Infrastructure and Transport / Transport / TR-P1	Not specified	Ryman supports the intent of this submission point in principle, however due to the age and frequency of mobility constraints amongst retirement village residents and based on Ryman's primary position that active modes / public transport are less relevant considerations for retirement villages (given their functional and operational needs), Ryman considers that these various provisions should not apply to retirement villages.	Amend / Ryman seek that this submission point is allowed, subject to the exclusion of retirement villages from the changes sought, and granting the relief sought by Ryman in relation to TR-P1.
Woolworths New Zealand	359.30	Energy Infrastructure and Transport / Transport / TR-P1	Amend	Considers that the current thresholds for requiring restricted discretionary consent to infringe Rule TR-R2 will result in all new supermarkets requiring consent and the provision of an ITA. The matters of discretion refer only to Policy TR-P1 for consideration. Supermarkets will infringe the 8 per week heavy vehicle trip number by virtue of their general operation. The proposed amendment to Policy TR-P1 seeks to recognise that high vehicle trip generating activities should not be penalised when there are genuine functional and operational requirements for being considered a 'high vehicle trip generating activity'. [Refer to original submission for full reason]	Amend TR-P1 (High trip generating use and development) as follows: Provide for high vehicle trip generating activities where they: 1. Safely and effectively integrate with the transport network, including planned network upgrades and service improvements; and 2. Provide for pedestrian, cycling, micromobility and public transport modes; and 3. <u>Demonstrate functional and operational requirements commensurate with high vehicle trip generation.</u>
Stride Investment Management Limited	FS107.7	Part 2 / Energy Infrastructure and Transport / Transport / TR-P1	Support	Stride supports this submission point for the reasons provided by the primary submitter. It is important to recognise that supermarkets and other large-format retail activities have functional requirements for generating high vehicle trips.	Allow
Investore Property Limited	FS108.7	Part 2 / Energy Infrastructure and Transport / Transport / TR-P1	Support	Investore supports this submission point for the reasons provided by the primary submitter. It is important to recognise that supermarkets and other large-format retail activities have functional requirements for generating high vehicle trips.	Allow
Waka Kotahi	370.159	Energy Infrastructure and Transport / Transport / TR-P1	Support	Support this policy as it protects the transport network and manage activities that do not meet standards.	Retain TR-P1 (High trip generating use and development) as notified.
WCC Environmental Reference Group	377.48	Energy Infrastructure and Transport / Transport / TR-P1	Support	This policy gives an important signal to traffic-generating activities to provide for multiple modes, which is necessary to achieve carbon reduction targets, reduce congestion and improve the liveability of the city	Retain TR-P1 (High trip generating use and development) as notified.
Kāinga Ora Homes and Communities	391.148	Energy Infrastructure and Transport / Transport / TR-P1	Support	TR-P1 is generally supported.	Retain TR-P1 (High trip generating use and development) as notified.
Ministry of Education	400.33	Energy Infrastructure and Transport / Transport / TR-P1	Support	Supports TR-P1 as it promotes the safe and efficient operation of the integrated transport network and provides for the safe and effective integration of high vehicle trip generating activities.	Retain TR-P1 (High trip generating use and development) as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Wellington International Airport Ltd	406.190	Energy Infrastructure and Transport / Transport / TR-P1	Oppose	Opposes TR-P1. [See paragraphs 4.107 to 4.108 of original submission for full reason]	Opposes TR-P1 (High trip generating use and development) and seeks amendment.
Wellington International Airport Ltd	406.191	Energy Infrastructure and Transport / Transport / TR-P1	Amend	Opposes TR-P1. [See paragraphs 4.107 to 4.108 of original submission for full reason]	Seeks that TR-P1 (High trip generating use and development) is amended to exclude Airport Zone.
KiwiRail Holdings Limited	408.90	Energy Infrastructure and Transport / Transport / TR-P1	Support	Supports that high trip generating use and on-site transportation facilities and driveways are required to be provided in a manner which does not compromise the safety and efficiency of the transport network.	Retain TR-P1 (High trip generating use and development) as notified.
Victoria University of Wellington Students' Association	123.35	Energy Infrastructure and Transport / Transport / TR-P2	Support	Supports TR-P2 in its entirety.	Retain TR-P2 (Enabled activities) as notified.
Fire and Emergency New Zealand	273.49	Energy Infrastructure and Transport / Transport / TR-P2	Support	Supports TR-P2 insofar as this seeks to enable on-site transport facilities and driveways that provide for the safe and effective use of the site and functioning of the transport network.	Retain TR-P2 (Enabled activities) as notified.
Paihikara Ki Pōneke Cycle Wellington	302.21	Energy Infrastructure and Transport / Transport / TR-P2	Support	TR-P2 is supported as it seeks to provide for a range of modes within the transport network, including requiring new development to provide facilities for cycling.	Retain TR-P2 (Enabled activities) as notified.
Restaurant Brands Limited	349.15	Energy Infrastructure and Transport / Transport / TR-P2	Support	Support	Retain TR-P2 (Enabled Activities) as notified.
Retirement Villages Association of New Zealand Incorporated	350.49	Energy Infrastructure and Transport / Transport / TR-P2	Oppose in part	Considers that the reference to 'effective' on-site parking is no longer relevant in light of the NPSUD direction to remove carparking minimums.	Opposes TR-P2 (Enabled activities) and seeks amendment to refer to 'safe and functional on-site parking' only.
Retirement Villages Association of New Zealand Incorporated	350.50	Energy Infrastructure and Transport / Transport / TR-P2	Amend	Considers that the reference to 'effective' on-site parking is no longer relevant in light of the NPSUD direction to remove carparking minimums.	Amend TR-P2 (Enabled activities) to refer to 'safe and functional on-site parking' only.
Waka Kotahi	370.160	Energy Infrastructure and Transport / Transport / TR-P2	Amend	Considers that direct access onto the state highway has the potential to cause significant traffic and safety effects. Policy direction should reflect this by qualifying the enabled activities	Amend TR-P3 (Enabled activities) as follows: Enable on-site transport facilities and driveways that: 1. Provide for the safe and effective use of the site and functioning of the transport network; 2. Meet the reasonable demands of site users; and 3. Promote the uptake and use of pedestrian, cycling, micromobility and public transport modes.; and 4. <u>Do not compromise the safe and efficient function of the state highway network.</u>
Stride Investment Management Limited	FS107.25	Part 2 / Energy Infrastructure and Transport / Transport / TR-P2	Oppose	Stride is opposed to amending the policy to require development to take into account the safety and efficiency of the state highway network. This is unnecessary in light of the existing measures to enable the safety and efficiency of the transport network, including designations, and it would be inappropriate.	Disallow
Investore Property Limited	FS108.25	Part 2 / Energy Infrastructure and Transport / Transport / TR-P2	Oppose	Investore is opposed to amending the policy to require development to take into account the safety and efficiency of the state highway network. This is unnecessary in light of the existing measures to enable the safety and efficiency of the transport network, including designations, and it would be inappropriate.	Disallow
WCC Environmental Reference Group	377.49	Energy Infrastructure and Transport / Transport / TR-P2	Support	This policy gives an important signal to traffic-generating activities to provide for multiple modes, which is necessary to achieve carbon reduction targets, reduce congestion and improve the liveability of the city	Retain TR-P2 (Enabled activities) as notified.
Kāinga Ora Homes and Communities	391.149	Energy Infrastructure and Transport / Transport / TR-P2	Support	TR-P2 is generally supported.	Retain TR-P2 (Enabled activities) as notified.
KiwiRail Holdings Limited	408.91	Energy Infrastructure and Transport / Transport / TR-P2	Support	Supports that high trip generating use and on-site transportation facilities and driveways are required to be provided in a manner which does not compromise the safety and efficiency of the transport network.	Retain TR-P2 (Enabled activities) as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Living Streets Aotearoa	482.39	Energy Infrastructure and Transport / Transport / TR-P2	Amend	Considers that while everyone can walk (or use a wheelchair) not all people can use scooter and similar devices. Walking is also a far safer mode.	Clarify TR-P2.3. (Enabled activities) so that it promotes those modes that include physical activity. [Inferred decision requested]
Victoria University of Wellington Students' Association	123.36	Energy Infrastructure and Transport / Transport / TR-P3	Support	Supports TR-P3 in its entirety.	Retain TR-P3 (Managed activities) as notified.
Stratum Management Limited	249.16	Energy Infrastructure and Transport / Transport / TR-P3	Amend	Following on from the change sought to Objective TR-O1 (Purpose), an equivalent change is proposed to TR-P3 (Managed activities).	Amend TR-P3 (Managed activities) as follows: Only allow on-site transport facilities and driveways that do not meet standards where: ... 4. The projected demand for loading spaces or cycling and micromobility parking will be lower than that required in the standards or can be accommodated by public, shared or reciprocal arrangements; ...
Fire and Emergency New Zealand	273.50	Energy Infrastructure and Transport / Transport / TR-P3	Support	Supports TR-P2 insofar as this seeks to enable on-site transport facilities and driveways that provide for the safe and effective use of the site and functioning of the transport network, but requests amendment so that the policy refers to the appropriate firefighting standards.	Retain TR-P3 (Managed activities) with amendment.
Fire and Emergency New Zealand	273.51	Energy Infrastructure and Transport / Transport / TR-P3	Amend	Supports TR-P2 insofar as this seeks to enable on-site transport facilities and driveways that provide for the safe and effective use of the site and functioning of the transport network, but requests amendment so that the policy refers to the appropriate firefighting standards.	Amend TR-P3 (Managed activities) as follows: ... 5. Safe and effective access for firefighting purposes is provided; and 6. There are site and topographical constraints that make compliance unreasonable; and 7. <u>Safe and effective access for firefighting is provided in accordance with NZS 4404: 2010 and the New Zealand Fire Service Firefighting Water Supplies Code of Practice SNA PAS 4509: 2008.</u>
The Retirement Villages Association of New Zealand Incorporated	FS126.35	Part 2 / Energy Infrastructure and Transport / Transport / TR-P3	Oppose	The RVA opposes the relief sought in this submission as matters relating to fire-fighting servicing are already provided for under the Building Act and it is inappropriate to duplicate controls under the Proposed Plan.	Disallow
Ryman Healthcare Limited	FS128.35	Part 2 / Energy Infrastructure and Transport / Transport / TR-P3	Oppose	Ryman opposes the relief sought in this submission as matters relating to fire-fighting servicing are already provided for under the Building Act and it is inappropriate to duplicate controls under the Proposed Plan.	Disallow
Paihikara Ki Pōneke Cycle Wellington	302.22	Energy Infrastructure and Transport / Transport / TR-P3	Support	TR-P3 is supported as it seeks to provide for a range of modes within the transport network, including requiring new development to provide facilities for cycling.	Retain TR-P3 (Managed activities) as notified.
Restaurant Brands Limited	349.16	Energy Infrastructure and Transport / Transport / TR-P3	Support	Support	Retain TR-P3 (Managed Activities) as notified.
Retirement Villages Association of New Zealand Incorporated	350.51	Energy Infrastructure and Transport / Transport / TR-P3	Oppose in part	Support TR-P3's acknowledgement that there are some instances where 'the projected demand for loading spaces or cycling and micromobility parking will be lower than that required in the standards'. However, considers the requirement for parking to be 'effective' in meeting the needs of the activity on-site is no longer considered appropriate in light of the NPSUD direction to remove carparking minimums. Also opposes (5) referring to safe and effective access for firefighting purposes as this matter is regulated under the Building Act.	Opposes TR-P3 (Managed activities) and seeks amendment.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Fire and Emergency New Zealand	FS14.2	Part 2 / Energy Infrastructure and Transport / Transport / TR-P3	Oppose	Fire and Emergency acknowledge that the New Zealand Building Code (NZBC) C5 specifies access and safety requirements for firefighting operations, where certain buildings must be designed and constructed so that there is a low probability of firefighters or other emergency services personnel being delayed or impeded from assisting in rescue operations and performing firefighting operations. Buildings must also be designed and constructed so that there is a low probability of illness or injury to firefighters or other emergency services personnel during rescue and firefighting operations. Of particular note, a performance requirement of C5 is that buildings must be provided with access for fire service vehicles to a hard-standing from which there is an unobstructed path to the building within 20m of the firefighter access into the building and the inlets to automatic fire sprinkler systems or fire hydrant systems, where these are installed (among other requirements). These performance requirements do however not apply to detached dwellings, within household units in multi-unit dwellings, or to outbuildings and ancillary buildings. Fire and Emergency are concerned that where pedestrian only access developments are sought, these will not be adequate for responders to efficiently access properties in the event of a fire or emergency or to use tools, equipment and appliances effectively, where required. This has the potential to significantly increase the risk to life and property. Until such time as there is a review of the NZBC to 'catch up' with the changing urban environment, Fire and Emergency consider that the Resource Management Act 1991 (RMA) needs to address this matter up front in order to manage the use, development and protection of natural and physical resources which enables people and communities to provide for their social, economic, and cultural well-being, and for their health and safety in accordance with Section 5 of the RMA.	Disallow / Seeks that point 5, 'safe and effective access for firefighting purposes is provided' within TR-P3 is retained to support effective and efficient access and manoeuvring of crew and equipment for firefighting and emergency responses.
Retirement Villages Association of New Zealand Incorporated	350.52	Energy Infrastructure and Transport / Transport / TR-P3	Amend	Support TR-P3's acknowledgement that there are some instances where 'the projected demand for loading spaces or cycling and micromobility parking will be lower than that required in the standards'. However, considers the requirement for parking to be 'effective' in meeting the needs of the activity on-site is no longer considered appropriate in light of the NPSUD direction to remove carparking minimums. Also opposes (5) referring to safe and effective access for firefighting purposes as this matter is regulated under the Building Act.	Amend TR-P3 (Managed activities) as follows: Only allow on-site transport facilities and driveways that do not meet standards where: 1. The transport facilities and driveways are effective safe and functional in meeting the operational needs and functional needs of the activity on the site; 2. The safety and effectiveness of the transport network is not compromised; 3. Public health and safety, including the safety of pedestrians, cyclists and micromobility users travelling through any parking areas, is not compromised; 4. The projected demand for loading spaces or cycling and micromobility parking will be lower than that required in the standards or can be accommodated by public, shared or reciprocal arrangements; <u>and</u> 5. Safe and effective access for firefighting purposes is provided; and 6.5. There are site and topographical constraints that make compliance unreasonable.
Greater Wellington Regional Council	351.112	Energy Infrastructure and Transport / Transport / TR-P3	Support in part	Supports the management of activities that do not meet standards provided that the use of low or zero carbon, active or public transport modes are maximised, to have regard to Proposed RPS Change 1 Policy CC.2.	Retain TR-P3 (Managed activities), subject to amendments.
Greater Wellington Regional Council	351.113	Energy Infrastructure and Transport / Transport / TR-P3	Amend	Considers that Policy TR-P3 should be amended to include recognition of this and it be assessed in consent applications in restricted activity rules.	Amend TR-P3 (Managed activities) to allow activities that do not meet standards provided the use of low or zero carbon, active or public transport modes are maximised.
Waka Kotahi	370.161	Energy Infrastructure and Transport / Transport / TR-P3	Support	Support this policy as it protects the transport network and manage activities that do not meet standards.	Retain TR-P3 (Managed activities) as notified.
WCC Environmental Reference Group	377.50	Energy Infrastructure and Transport / Transport / TR-P3	Support	This policy provides for some flexibility within limits, and in light of Wellington's real geographic constraints is reasonable to include	Retain TR-P3 (Managed activities) as notified.
KiwiRail Holdings Limited	408.92	Energy Infrastructure and Transport / Transport / TR-P3	Support	Supports that high trip generating use and on-site transportation facilities and driveways are required to be provided in a manner which does not compromise the safety and efficiency of the transport network.	Retain TR-P3 (Managed activities) as notified.
Living Streets Aotearoa	482.40	Energy Infrastructure and Transport / Transport / TR-P3	Amend	Considers that TR-P3 is unclear in its intent and what is trying to be achieved.	Clarify the intent of TR-P3 (Managed activities) and what it is trying to achieve.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Restaurant Brands Limited	349.17	Energy Infrastructure and Transport / Transport / TR-R1	Support	Support	Retain TR-R1 (All activities except for trip generation, site access, on-site cycling and micromobility paths, and on-site vehicle parking and manoeuvring) as notified.
Retirement Villages Association of New Zealand Incorporated	350.53	Energy Infrastructure and Transport / Transport / TR-R1	Oppose in part	Considers that TR-R1 covers all transport activities other than trip generation, site access, on-site cycling and micromobility paths, and on-site vehicle parking and manoeuvring.	Opposes TR-R1 (All activities except for trip generation, site access, on-site cycling and micromobility paths, and on-site vehicle parking and manoeuvring) and seeks amendment.
Retirement Villages Association of New Zealand Incorporated	350.54	Energy Infrastructure and Transport / Transport / TR-R1	Amend	Considers that TR-R1 covers all transport activities other than trip generation, site access, on-site cycling and micromobility paths, and on-site vehicle parking and manoeuvring.	Amend TR-R1 (All activities except for trip generation, site access, on-site cycling and micromobility paths, and on-site vehicle parking and manoeuvring) as follows: 1. Activity status: Permitted Where: a. Compliance with the following standards is achieved: i. TR-S2 (<u>not applicable to retirement villages</u>); ii. TR-S3 (<u>not applicable to retirement villages</u>); iii. TR-S8; and iv. TR-S9.
Ministry of Education	400.34	Energy Infrastructure and Transport / Transport / TR-R1	Support	Support TR-R1 as it promotes the safe and efficient use of the site and provides for alternative and public modes of transport outlined in standards TR-S2 and TR-S3.	Retain TR-R1 (All activities except for trip generation, site access, on-site cycling and micromobility paths, and on-site vehicle parking and manoeuvring) as notified.
Wellington International Airport Ltd	406.192	Energy Infrastructure and Transport / Transport / TR-R1	Support	Supports TR-R1. Supports and provide opportunities for the use of alternative modes of transport to and from Wellington Airport. However, due to the characteristics of passengers (i.e. typically carrying luggage), the uptake of pedestrian, cycling and micromobility transportation is and will likely continue to be much lower than alternative vehicular options such as private car, taxi or bus in the Airport Zone. Supports the exclusion of the Airport Zone from Table TR-7, and thus TR-S2, TR-S3 not being relevant to the Airport Zone.	Retain TR-R1 (All activities except for trip generation, on site cycling and micro-mobility paths and on-site vehicle parking and manoeuvring) as notified.
Restaurant Brands Limited	349.18	Energy Infrastructure and Transport / Transport / TR-R2	Amend	Oppose. Despite claiming to apply a threshold based on vehicle trip generation (rather than activity type), Rule TR-R2 has identified drive-through restaurant activities as requiring resource consent as a restricted discretionary activity in every instance. There are many other commercial activities that are equally reliant on private vehicle movements but are not subject to the same requirement to obtain a resource consent for trip generation in every instance, regardless of the actual trip generation characteristics of the activity.	Amend TR-R2 (Trip generation) as follows: TR-R2 Trip generation 1. Activity status: Permitted Where: a. Compliance with TR-S1 is achieved; and b. The activity is not: i. a service station; or ii. a drive through activity.
McDonald's Restaurants New Zealand Limited	FS45.1	Part 2 / Energy Infrastructure and Transport / Transport / TR-R2	Support	McDonald's Restaurants New Zealand Limited supports this submission to remove the requirement for a resource consent due to trip generation of a drive-through activity. Many other activities rely on private vehicles and it is not appropriate to single out two land use activities while applying a threshold to others.	Allow
Retirement Villages Association of New Zealand Incorporated	350.55	Energy Infrastructure and Transport / Transport / TR-R2	Support	Considers that retirement villages should not be regulated by the high vehicle trip generating classification of the District Plan in the same way as other activities. Acknowledges that resource consent for trip generation as a restricted discretionary activity under TR-R2 is appropriate, and an accompanying Integrated Transport Assessment in the typical scenario. The matters of discretion for high trip generating activities under TR-R2 are the matters in TR-P1. Overall, considers that TR-P1 needs amending to acknowledge that not all high trip generating activities have the same pedestrian, cycling, micromobility and public transport needs and recognise that trip generation from a site is an anticipated component of development and the focus of regulation should be on higher than anticipated trip generation.	Retain TR-R2 (Trip generation) and seeks amendment to either: exclude 'retirement villages' from the policy; or to ensure the different trip generation characteristics of retirement villages are considered appropriately.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Retirement Villages Association of New Zealand Incorporated	350.56	Energy Infrastructure and Transport / Transport / TR-R2	Amend	Considers that retirement villages should not be regulated by the high vehicle trip generating classification of the District Plan in the same way as other activities. Acknowledges that resource consent for trip generation as a restricted discretionary activity under TR-R2 is appropriate, and an accompanying Integrated Transport Assessment in the typical scenario. The matters of discretion for high trip generating activities under TR-R2 are the matters in TR-P1. Overall, considers that TR-P1 needs amending to acknowledge that not all high trip generating activities have the same pedestrian, cycling, micromobility and public transport needs and recognise that trip generation from a site is an anticipated component of development and the focus of regulation should be on higher than anticipated trip generation.	Retain TR-R2 (Trip generation) and seeks amendment to either: exclude 'retirement villages' from the policy; or to ensure the different trip generation characteristics of retirement villages are considered appropriately.
Z Energy Limited	361.12	Energy Infrastructure and Transport / Transport / TR-R2	Amend	Rule TR-R2 (Trip Generation) is unclear and should be clarified. The provision permits activities where the activity is not a service station (TR-R2.1(b)(i)). where compliance with Rule TR-R2.1 cannot be achieved, restricted discretionary consent is required. Rule TR-R2.1(b)(i) should be clarified on whether it relates to changes to existing operations, maintenance and upgrades of existing service stations. It is not considered appropriate to require resource consent for trip generation purposes for changes to existing operations, in particular where operations, maintenance and upgrades will not change the number of trips generated to / from an existing activity [submitter is neutral on provision [Refer to original submission for full reason].	Amend TR-R2 (Trip Generation) as follows: All zones 1. Permitted Where: a. Compliance with TR-S1 is achieved; and b. The activity is not: i. A <u>new</u> service station; or ii. A drive-through activity
Waka Kotahi NZ Transport Agency	FS103.12	Part 2 / Energy Infrastructure and Transport / Transport / TR-R2	Oppose	Service stations are, by their nature, high trip-generating activities and lead to many cars crossing over the footpath to the adjacent land. Where a site is being upgraded, the site may be reconfigured and accesses moved. It would be appropriate to consider effects on other road-users and neighbouring sites from such a change	Disallow
BP Oil New Zealand, Mobil Oil New Zealand Limited and Z Energy Limited (the Fuel Companies)	372.73	Energy Infrastructure and Transport / Transport / TR-R2	Support in part	TR-R2 is supported but clarity and/or relief is sought in relation to Rule TR-R2 (Trip Generation).	Retain TR-R2 (Trip generation) with amendment.
BP Oil New Zealand, Mobil Oil New Zealand Limited and Z Energy Limited (the Fuel Companies)	372.74	Energy Infrastructure and Transport / Transport / TR-R2	Amend	Considers that TR-S2 should be amended to clarify whether Rule TR-R2.1(b)(i) relates to changes to existing operations, maintenance and upgrades of existing service stations. where compliance with Rule TR-R2.1 cannot be achieved, restricted discretionary consent is required. It is not considered appropriate to require resource consent for trip generation purposes for changes to existing operations, in particular where operations, maintenance and upgrades will not materially change vehicle movements to / from an existing lawful activity. It is considered that sub-standard TR-R2.1(b)(i) need only apply to new service stations.	Amend TR-R2 (Trip generation) as follows: All Zones 1. Activity status: Permitted Where: a. Compliance with TR-S1 is achieved; and b. The activity is not: i. A <u>new</u> service station; or ii. A drive-through activity
WCC Environmental Reference Group	377.51	Energy Infrastructure and Transport / Transport / TR-R2	Support	This rule gives an important signal to traffic-generating activities to provide for multiple modes, which is necessary to achieve carbon reduction targets, reduce congestion and improve the liveability of the city	Retain TR-R2 (Trip generation) as notified.
Ministry of Education	400.35	Energy Infrastructure and Transport / Transport / TR-R2	Support	Supports TR-R2 as it permits trip generation where the activity complies with the thresholds outlined in standard TR-S1. The submitter supports the activity flow to Restricted Discretionary where the permitted trip generation thresholds are exceeded. The Ministry considers these thresholds as well as the requirement to undertake an Integrated Transport Assessment (where thresholds are exceeded) to be reasonable. This will help provide for the safe and efficient function of the transport network for Educational Facilities [see original submission for full reason]	Retain TR-R2 (Trip generation) as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Wellington International Airport Ltd	406.193	Energy Infrastructure and Transport / Transport / TR-R2	Oppose	Opposes TR-P2. [See paragraphs 4.107 to 4.108 of original submission for full reason]	Opposes TR-R2 (Trip Generation) and seeks amendment.
Wellington International Airport Ltd	406.194	Energy Infrastructure and Transport / Transport / TR-R2	Amend	Opposes TR-P2. [See paragraphs 4.107 to 4.108 of original submission for full reason]	Seeks that TR-R2 (Trip Generation) is amended to exclude Airport Zone.
Fire and Emergency New Zealand	273.52	Energy Infrastructure and Transport / Transport / TR-R3	Support in part	Notes that Table 9 sets out minimum unhindered vehicle access widths and maximum gradients. The minimum widths and maximum gradients for Driveway Levels 1 and 2 (in part) would not be sufficient for fire appliances. A fire appliance requires, as a minimum, access which is 4m in width and 4min height clearance, with a maximum gradient of 15% (and accompanying transition ramps). Driveways classified under Levels 1 and 2 are access roads which could accommodate up to 60 light vehicle movements per day or four heavy vehicle movements per week and could therefore cater for a range of uses including multiple residential and non-residential units. Table 9 states that passing bays will need to be provided at a maximum spacing of 50m along driveways confirming that driveways in excess of 50m would be required to meet these standards. Typically, buildings more than 50m away from legal roads require site access to be designed to meet the Code of Practice to ensure fire appliances can access a fire. The proposed rules do not guarantee that adequate site access will be achieved via new driveways to access buildings that are in excess of 50m from the nearest legal road with an unhindered vehicular access width of 4m or more. Considers this would pose an unacceptable risk to any new buildings, its occupiers and any surrounding vegetation, as well as neighbouring properties and occupiers. This would conflict with Policy TR-P3 which seeks to provide for safe and effective access for fighting purposes. Requests that driveways which would be used to access buildings more than 50m from the nearest legal road be constructed to provide access in accordance with the NZ Fire Service Firefighting Water Supplies Code of Practice SNA PAS 4509:2008. Furthermore, in circumstances where the activity status would be restricted discretionary, matters of discretion are limited to matters in TR-P2. This would not require consideration as to whether safe and effective access for firefighting purposes is provided. At present, there does not appear to be a matter of discretion which links back to this consideration, currently contained within Policy TR-P3. In order for schemes to accord with the policy aims of TR-P3 in full, it is considered that both permitted activities and those requiring resource consent much ensure safe and effective access for firefighting purposes.	Supports TR-R3 (Site access) with amendment.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Fire and Emergency New Zealand	273.53	Energy Infrastructure and Transport / Transport / TR-R3	Amend	Notes that Table 9 sets out minimum unhindered vehicle access widths and maximum gradients. The minimum widths and maximum gradients for Driveway Levels 1 and 2 (in part) would not be sufficient for fire appliances. A fire appliance requires, as a minimum, access which is 4m in width and 4min height clearance, with a maximum gradient of 15% (and accompanying transition ramps). Driveways classified under Levels 1 and 2 are access roads which could accommodate up to 60 light vehicle movements per day or four heavy vehicle movements per week and could therefore cater for a range of uses including multiple residential and non-residential units. Table 9 states that passing bays will need to be provided at a maximum spacing of 50m along driveways confirming that driveways in excess of 50m would be required to meet these standards. Typically, buildings more than 50m away from legal roads require site access to be designed to meet the Code of Practice to ensure fire appliances can access a fire. The proposed rules do not guarantee that adequate site access will be achieved via new driveways to access buildings that are in excess of 50m from the nearest legal road with an unhindered vehicular access width of 4m or more. Considers this would pose an unacceptable risk to any new buildings, its occupiers and any surrounding vegetation, as well as neighbouring properties and occupiers. This would conflict with Policy TR-P3 which seeks to provide for safe and effective access for fighting purposes. Requests that driveways which would be used to access buildings more than 50m from the nearest legal road be constructed to provide access in accordance with the NZ Fire Service Firefighting Water Supplies Code of Practice SNA PAS 4509:2008. Furthermore, in circumstances where the activity status would be restricted discretionary, matters of discretion are limited to matters in TR-P2. This would not require consideration as to whether safe and effective access for firefighting purposes is provided. At present, there does not appear to be a matter of discretion which links back to this consideration, currently contained within Policy TR-P3. In order for schemes to accord with the policy aims of TR-P3 in full, it is considered that both permitted activities and those requiring resource consent much ensure safe and effective access for firefighting purposes.	Amend TR-R3 (Site access) as follows: Matters of discretion: ... <u>2. The matters in TR-P3.</u>
Rimu Architects Ltd	318.17	Energy Infrastructure and Transport / Transport / TR-R3	Amend	Considers that TR-R3 should be amended to require compliance with INF-S16. It is noted that: Table 8- TR sets out the vehicle movements each category of driveway allows for level 1 - up to 30 light/day + up to 2 heavy/week, level 2 - 31-60 light/day + 3-4 heavy/week, level 3 - 61-200 light/day + 5-6 heavy/week. Table 9- TR sets out the design requirements for each of the categories. However, neither here nor in the introductory 'other relevant district plan provisions' section is there a mention of Infrastructure as a relevant section, nor of the INF-S16 standard. Among other things, INF-S16 states (at 1) there is a maximum of 1 vehicle crossing per site, the where the site fronts more than 1 road the crossing must be to the less used road(at 6) and gives minimum distances from intersections (at 7 & referring to figure 2-INF).	Amend TR-R3.1 (Site access) as follows: 1. Activity status: Permitted Where: a) compliance with <u>INF-S16</u> , TR-S5 and TR-S6 is achieved and b) the access is not to a state highway.
Waka Kotahi NZ Transport Agency	FS103.13	Part 2 / Energy Infrastructure and Transport / Transport / TR-R3	Support	For the plan to be clear, there should be a link between TR-R3 and INF-S16.	Allow
Restaurant Brands Limited	349.19	Energy Infrastructure and Transport / Transport / TR-R3	Support	Support	Retain TR-R3 (Site access) as notified.
Survey & Spatial New Zealand Wellington Branch	439.24	Energy Infrastructure and Transport / Transport / TR-R3	Amend	Considers the notification status for this rule should preclude both public and limited notification.	Amend TR-R3 (Site access) to: Notification status: An application under Rule TR-R3 is precluded from being <u>either</u> publicly <u>or</u> limited notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Restaurant Brands Limited	349.20	Energy Infrastructure and Transport / Transport / TR-R4	Support	Support	Retain TR-R4 (On-site cycling and micromobility paths) as notified.
WCC Environmental Reference Group	377.52	Energy Infrastructure and Transport / Transport / TR-R4	Support	This rule will help support provision for multiple modes, which is necessary to achieve carbon reduction targets, reduce congestion, improve the liveability of the city and redress the current imbalance favouring the private vehicle transport mode	Retain TR-R4 (On-site cycling and micromobility paths) as notified.
Ministry of Education	400.36	Energy Infrastructure and Transport / Transport / TR-R4	Support	Supports TR-R4 as promotes the safe and efficient use of the site and provides for alternative and public modes of transport.	Retain TR-R4 (On-site cycling and micromobility paths) as notified.
McDonald's	274.5	Energy Infrastructure and Transport / Transport / TR-R5	Support	Supports no minimum or maximum on-site vehicle parking requirements. Also supports the preclusion of public notification of an infringement.	Retain TR-R5 (On-site vehicle parking and manoeuvring), subject to amendment to fix typo as outlined in the submission point below.
McDonald's	274.6	Energy Infrastructure and Transport / Transport / TR-R5	Amend	Supports the preclusion of public notification of an infringement to TR-R5 but notes that the rule incorrectly references TR-R4.	Seek that TR-R5 (On-site vehicle parking and manoeuvring is amended as follows: Notification status: An application under Rule TR-R4 TR-R5 is precluded from being publicly notified.
Restaurant Brands Limited	349.21	Energy Infrastructure and Transport / Transport / TR-R5	Support	Support	Retain TR-R5 (On-site vehicle parking and manoeuvring) as notified.
Foodstuffs North Island	FS23.34	Part 2 / Energy Infrastructure and Transport / Transport / TR-R5	Support	Submission point 349.21 partly supports FSNI submission points 476.8 - 476.10, however FSNI seeks some amendments.	Allow / Allow submission in part.
Waka Kotahi	370.162	Energy Infrastructure and Transport / Transport / TR-R5	Amend	Notes that there are two TR-R5s but are slightly different activities.	Seeks to correct the double TR-R5 in the Transport chapter.
WCC Environmental Reference Group	377.53	Energy Infrastructure and Transport / Transport / TR-R5	Support	This rule will support reduced private vehicle ownership, and more efficient use of vehicles by vehicles able to be shared: this will help meet carbon reduction targets, reduce congestion, reduce 'parking clutter' in residential areas, and widen the transport choices available to Wellingtonians.	Retain TR-R5 (On-site vehicle parking and manoeuvring) as notified.
Survey & Spatial New Zealand Wellington Branch	439.25	Energy Infrastructure and Transport / Transport / TR-R5	Amend	Considers the notification status for this rule should preclude both public and limited notification.	Amend TR-R5 (On-site vehicle parking and manoeuvring) to: Notification status: An application under Rule TR-R4 TR-R5 is precluded from being <u>either publicly or limited</u> notified.
Foodstuffs North Island	476.8	Energy Infrastructure and Transport / Transport / TR-R5	Support	Supports that TR-R5 has no minimum or maximum on-site vehicle parking requirements and precludes of public notification of an infringement to TR-R5.	Retain TR-R5 (On-site vehicle parking and manoeuvring) as notified, with amendments.
Foodstuffs North Island	476.9	Energy Infrastructure and Transport / Transport / TR-R5	Amend	Supports that TR-R5 has the preclusion of public notification of an infringement to TR-R5. Notes that the provision incorrectly references TR-R4 instead of TR-R5.	Amend TR-R5 (On-site vehicle parking and manoeuvring) as follows: ... Notification status: An application under Rule TR-R4 TR-R5 is precluded from being publicly notified.
Foodstuffs North Island	476.10	Energy Infrastructure and Transport / Transport / TR-R5	Support in part	The provision "Car sharing activities" has the same provision number (TR-R5) as TR-R5 "On-site vehicle parking and manoeuvring".	Retain TR-R5 (Car sharing activities) with amendment.
Rimu Architects Ltd	318.18	Energy Infrastructure and Transport / Transport / TR-S1	Amend	Considers that TR-1 should mention garages and reduce the amount of light vehicles considered to be associated with residential activity. 10 light vehicles seems a high, and not consistent with the methodology set out at b. and c. Allowing for different levels of use at weekdays and weekends, an average of 6 seems more likely, particularly considering efforts elsewhere in the plan to provide alternatives to private vehicle use.	Amend TR-S1 (Vehicle trip generation) as follows: ... For the purpose of the above assessment : a. An on-site carpark <u>or garage</u> associated with a residential activity is considered to generate <u>6</u> 10 light vehicle movements per day;

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Restaurant Brands Limited	349.22	Energy Infrastructure and Transport / Transport / TR-S1	Amend	<p>Oppose.</p> <p>Considers that thresholds contained within Standard TR-S1 are too low. There are many activities that will have insignificant effects on the transport network that generate 200 or more light vehicle trips per day and Standard TR-S1 will lead to too many developments requiring resource consents in respect of this matter.</p> <p>Considers that an increase the thresholds to reflect a development of 100 light vehicles per hour. In Restaurant Brands' opinion, that is a more appropriate intensity of traffic effects to require a specific assessment of traffic capacity and safety.</p>	<p>Amend TR-S1 (Vehicle trip generation) as follows:</p> <p>1. Activities must not exceed <u>100 vehicle movements per hour</u>. the following maximum vehicle movement thresholds:</p> <p>[delete table in its entirety]</p> <p>For the purpose of the above assessment:</p> <p>a. ...</p>
Retirement Villages Association of New Zealand Incorporated	350.57	Energy Infrastructure and Transport / Transport / TR-S1	Oppose in part	Considers that due to the age and frequency of mobility constraints amongst retirement village residents, it is not practicable to apply TR-S2 and the cycling and micromobility parking requirements to retirement villages at the same rate as it is applied to other residential activities.	Opposes content within Table 7 that is cross referenced in TR-S1 (Vehicle trip generation). See amendment sought to Table 7 in the specific submission point.
Retirement Villages Association of New Zealand Incorporated	350.58	Energy Infrastructure and Transport / Transport / TR-S1	Amend	Considers that due to the age and frequency of mobility constraints amongst retirement village residents, it is not practicable to apply TR-S2 and the cycling and micromobility parking requirements to retirement villages at the same rate as it is applied to other residential activities.	Seeks to amend content within Table 7 that is cross referenced in the standard. See amendment sought to Table 7 in the specific submission point.
Woolworths New Zealand	359.31	Energy Infrastructure and Transport / Transport / TR-S1	Amend	Considers that thresholds in TR-S1 are unnecessarily low, onerous and complex and should be amended. The proposed thresholds are very low and lack any nuance in terms of activities and zones and it is considered that the resulting consenting requirements would be that for almost all activities within commercial zones an ITA would be required with an assessment against a baseline of only 200 light vehicle movements per day and eight heavy vehicle movements per week. Most large commercial activities will be required to prepare an ITA irrespective of if the activity is already contemplated in the PDP. A GFA approach is simpler, has more nuance, has been in practice in the Auckland Unitary Plan for over four years and is widely accepted.	Amend TR-S1 (Vehicle trip generation) as shown in original submission (page 59).
Stride Investment Management Limited	FS107.8	Part 2 / Energy Infrastructure and Transport / Transport / TR-S1	Support	Stride supports this submission point for the reasons provided by the primary submitter.	Allow
Investore Property Limited	FS108.8	Part 2 / Energy Infrastructure and Transport / Transport / TR-S1	Support	Investore supports this submission point for the reasons provided by the primary submitter.	Allow
Woolworths New Zealand	359.32	Energy Infrastructure and Transport / Transport / TR-S1	Support in part	The restricted discretionary activity status of infringing TR-S1 is supported, as well as the incorporated reference to the ITA being prepared in accordance with The Waka Kotahi NZ Transport Agency guidelines ("Research Report 422: Integrated Transport Assessment Guidelines, November 2010").	Retain the Restricted Discretionary activity status in TR-S1 (Vehicle trip generation) as notified.
Stride Investment Management Limited	FS107.9	Part 2 / Energy Infrastructure and Transport / Transport / TR-S1	Support	Stride supports this submission point for the reasons provided by the primary submitter.	Allow
Investore Property Limited	FS108.9	Part 2 / Energy Infrastructure and Transport / Transport / TR-S1	Support	Investore supports this submission point for the reasons provided by the primary submitter.	Allow

Waka Kotahi	370.163	Energy Infrastructure and Transport / Transport / TR-S1	Oppose	Consider 200 vehicles per day to be a high number for any activity within the district plan. It was not clear from the support documents where this number has come from. Waka Kotahi seeks to work with Council to determine appropriate thresholds for specific activities accessing both the state highway and local roads	Seeks to Amend TR-S1 (Vehicle trip generation) to institute a threshold of 100 car equivalent vehicle movements per day where a proposal accesses the state highway, and lower thresholds where the safety of the transport network warrants it. Note – car equivalent movements are defined as (as noted in the New Zealand Transport Agency Planning Policy Manual: Appendix 1 – Glossary): <ul style="list-style-type: none"> • 1 car to and from the property = 2 equivalent car movements • 1 truck to and from property = 6 equivalent car movements • 1 truck and trailer to and from property = 10 equivalent car movements
Kāinga Ora – Homes and Communities	FS89.17	Part 2 / Energy Infrastructure and Transport / Transport / TR-S1	Oppose	Kāinga Ora opposes any reduction in the vehicle trip generation threshold.	Disallow
Stride Investment Management Limited	FS107.26	Part 2 / Energy Infrastructure and Transport / Transport / TR-S1	Oppose	Stride is opposed to applying a lower threshold for vehicle trip generation and associated transport assessments as this is inappropriate and will impose additional, unreasonable costs on smaller scale development.	Disallow
Investore Property Limited	FS108.26	Part 2 / Energy Infrastructure and Transport / Transport / TR-S1	Oppose	Investore is opposed to applying a lower threshold for vehicle trip generation and associated transport assessments as this is inappropriate and will impose additional, unreasonable costs on smaller scale development.	Disallow
Kāinga Ora Homes and Communities	391.150	Energy Infrastructure and Transport / Transport / TR-S1	Support in part	TR-S1 is partially supported and various amendments are sought.	Retain TR-S1 (Vehicle trip generation) with amendment.
Kāinga Ora Homes and Communities	391.151	Energy Infrastructure and Transport / Transport / TR-S1	Amend	Considers that TR-S1 should be amended to clarify the evidential basis for the assessment criteria.	Amend TR-S1 (Vehicle trip generation) to clarify the evidential basis of the assessment criteria. Increase the light vehicle threshold as follows: 1. Activities must not exceed the following maximum vehicle movement thresholds: Type of vehicle Light 200 500 per day Heavy 8 per week ...
Ministry of Education	400.37	Energy Infrastructure and Transport / Transport / TR-S1	Support	Supports TR-S1 as it aims to identify and manage high trip generating activities to ensure the safe and efficient operation of the integrated transport network.	Retain TR-S1 (Vehicle trip generation) as notified.
Amos Mann	172.15	Energy Infrastructure and Transport / Transport / TR-S2	Support	Supports the bicycle and micro-mobility device parking requirements for commercial and community facilities in the Centres and Mixed Use zones.	Retain TR-S2 (Micromobility device parking) as notified. [Inferred decision requested].
Paihikara Ki Pōneke Cycle Wellington	302.23	Energy Infrastructure and Transport / Transport / TR-S2	Support in part	TR-S2 is partially supported, but it is unclear whether it also applies to cycles, as the heading only refers to micromobility.	Retain TR-S2 (Micromobility device parking) with amendment.
Paihikara Ki Pōneke Cycle Wellington	302.24	Energy Infrastructure and Transport / Transport / TR-S2	Amend	Considers that TR-S2 is unclear on whether it also applies to cycles, as the heading only refers to micromobility.	Amend the title of TR-S2 (Micromobility device parking) as follows: <u>Cycle and</u> Micromobility device parking
Restaurant Brands Limited	349.23	Energy Infrastructure and Transport / Transport / TR-S2	Support	Support	Retain TR-S2 (Micromobility device parking) as notified.
Ministry of Education	400.38	Energy Infrastructure and Transport / Transport / TR-S2	Support	Supports TR-S2 as it promotes the safe and efficient use of the site and provides for alternative and public modes of transport.	Retain TR-S2 (Micromobility device parking) as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Wellington International Airport Ltd	406.195	Energy Infrastructure and Transport / Transport / TR-S2	Support	Supports TR-S2 not being relevant in the Airport Zone.	Retain TR-S2 (Micromobility device parking) as notified.
Living Streets Aotearoa	482.41	Energy Infrastructure and Transport / Transport / TR-S2	Amend	Considers that in the absence of good provisions for micromobility and cycle parking at places like big box retailers, they end up parked on the footpath, locked to handrails or trees etc.	Seeks that Table 7 - TR: Minimum number of on-site cycling and micromobility device parking spaces is adjusted so that the number of parks provided is also related to the number of carparks provided, not just to the size of the building. There should be at least one for every carpark.
Waka Kotahi NZ Transport Agency	FS103.14	Part 2 / Energy Infrastructure and Transport / Transport / TR-S2	Support	It is appropriate to also link the number of cycle parking spaces with the number of on-site car parks (or the numbers in TR-Table7, whichever is the greater). The cycle parking should also be located close to the building entrance.	Allow
Jill Ford	163.6	Energy Infrastructure and Transport / Transport / TR-S3	Support in part	Supports TR-S3 with a suggested improvement.	Amend TR-S3 (Micromobility parking design) to improve the Micromobility parking design to the 90th percentile for current e-bikes and cargo bikes.
Jill Ford	163.7	Energy Infrastructure and Transport / Transport / TR-S3	Amend	Considers that TR-S3 should be amended to improve the Micromobility parking design to the 90th percentile for current e-bikes and cargo bikes, as the 2019 Waka Kotahi technical note does not provide adequate guidance for all new residential developments, include manoeuvring and charging.	Amend TR-S3 (Micromobility parking design) to improve the Micromobility parking design to the 90th percentile for current e-bikes and cargo bikes.
Patrick Wilkes	173.12	Energy Infrastructure and Transport / Transport / TR-S3	Support in part	[No specific reason given beyond decision requested - refer to original submission].	Retain Standard TR-S3 (Micromobility parking design) with amendment.
Patrick Wilkes	173.13	Energy Infrastructure and Transport / Transport / TR-S3	Amend	Considers that micromobility parking design to 90%-ile for current e-bikes and cargo bikes, as the 2019 Waka Kotahi technical note does not provide adequate guidance for all new residential developments,	Amend Standard TR-S3 (Micromobility parking design) with amendment to include requirements for manoeuvring and charging.
Paihikara Ki Pōneke Cycle Wellington	302.25	Energy Infrastructure and Transport / Transport / TR-S3	Support in part	TR-S3 is partially supported, but it is unclear whether it also applies to cycles, as the heading only refers to micromobility.	Retain TR-S3 (Micromobility parking design) with amendment.
Paihikara Ki Pōneke Cycle Wellington	302.26	Energy Infrastructure and Transport / Transport / TR-S3	Amend	Considers that TR-S3 is unclear on whether it also applies to cycles, as the heading only refers to micromobility.	Amend the title of TR-S3 (Micromobility parking design) as follows: <u>Cycle and Micromobility parking design</u>
Paihikara Ki Pōneke Cycle Wellington	302.27	Energy Infrastructure and Transport / Transport / TR-S3	Amend	Considers that TR-S3 should be amended, as cycle dimensions are also not sufficient to accommodate cargo cycles and some spaces should be larger so that all ages and abilities are provided for.	Amend TR-S3 (Micromobility parking design) so that dimensions are appropriate for cargo bike parking.
Waka Kotahi NZ Transport Agency	FS103.15	Energy Infrastructure and Transport / Transport / TR-S3	Support	Bike parks should be designed to provide for extra-large bikes. Cargo bikes may well become more common as e-bike prices become more affordable.	Allow
Bruce Crothers	319.7	Energy Infrastructure and Transport / Transport / TR-S3	Support in part	Considers that micromobility parking design to 90%-ile is required for current e-bikes and cargo bikes, as the 2019 Waka Kotahi technical note does not provide adequate guidance for all new residential developments, include manoeuvring and charging.	Retain TR-S3 (Micromobility parking design), with amendment.
Bruce Crothers	319.8	Energy Infrastructure and Transport / Transport / TR-S3	Amend	Considers that micromobility parking design to 90%-ile is required for current e-bikes and cargo bikes. Considers that the Council must take action to ensure a deliberation reduction on economic activity, less cars, less planes, energy consumption reductions by using less heating and cooling, less wasteful consumption and a return to values of the past that put humans above money as the 2019 Waka Kotahi technical note does not provide adequate guidance for all new residential developments, include manoeuvring and charging.	Amend TR-S3 (Micromobility parking design), with reference to the 90th percentile. [Inferred decision requested]
Joan Fitzgerald	323.3	Energy Infrastructure and Transport / Transport / TR-S3	Support	[No specific reason given beyond decision requested - refer to original submission].	Retain TR-S3 (Micromobility parking design) with amendments.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Joan Fitzgerald	323.4	Energy Infrastructure and Transport / Transport / TR-S3	Amend	TR-S3 should be improved to 90%-ile for current e-bikes and cargo bikes and should be amended to include manoeuvring and charging. The 2019 Waka Kotahi technical note does not provide adequate guidance for all new residential developments.	Amend TR-S3 (Micromobility parking design) to include manoeuvring and charging, as well as reach 90th percentile for current e-bikes and cargo bike.
Disabled Persons Assembly New Zealand Incorporated	343.1	Energy Infrastructure and Transport / Transport / TR-S3	Amend	Supports specific mention of people with mobility impairments and vision impairments as an at-risk group in terms of safety in micromobility parking spaces as determined in TR-S3(d)(ii). However, considers that the clause can be strengthened and notes that anyone traversing within a pedestrian space is at risk of encountering a person using a micromobility vehicle unsafely in any space, and not just people with mobility and vision impairments. Considers that amendments are required to this clause to strengthen the requirement. [Submitter has referenced Centres and Mixed Use Design Guide in their submission rather than the Residential Design Guide.]	Amend TR-S3(d)(ii) (Micromobility parking design) as follows: 1. Where short stay cycling and micromobility parking spaces are required to be provided by TR-S2 they must meet the following minimum specifications: ... d. Cycling and Micromobility parking facilities must be located: ... ii. So they do not impede pedestrian thoroughfares; <u>this will provide enhanced safety for all pedestrians, and this includes for at risk groups in terms of, for example, pedestrians with mobility and vision impairments, and children, etc. including areas used by people whose mobility or vision is restricted.</u> [Inferred decision requested]
Living Streets Aotearoa	FS130.18	Part 2 / Energy Infrastructure and Transport / Transport / TR-S3	Support	Support clarifying that micromobility use and parking do not impede pedestrian space and preferably are located off footpaths and other pedestrian public spaces.	Allow
Disabled Persons Assembly New Zealand Incorporated	343.2	Energy Infrastructure and Transport / Transport / TR-S3	Amend	Considers that TR-S3 currently does not make any reference to licensing conditions to operate under trading bylaws and that there should be direct links made. [Submitter has referenced Centres and Mixed Use Design Guide in their submission rather than the Residential Design Guide.]	Seeks to amend TR-S3 (Micromobility parking design) to link to relevant trading bylaws relating to micromobility vehicle trading and hiring. [Inferred decision requested]
Living Streets Aotearoa	FS130.19	Part 2 / Energy Infrastructure and Transport / Transport / TR-S3	Support	Support clarifying that micromobility use and parking do not impede pedestrian space and preferably are located off footpaths and other pedestrian public spaces.	Allow
Restaurant Brands Limited	349.24	Energy Infrastructure and Transport / Transport / TR-S3	Support	Support	Retain TR-S3 (Micromobility parking design) as notified.
Greater Wellington Regional Council	351.114	Energy Infrastructure and Transport / Transport / TR-S3	Amend	Considers it is not clear whether the needs of increasing uptake of e-bikes, including cargo and multipassenger e-bikes have been provided for in the standards. E.g. sufficient dimensions for longer/wider e-bikes and electric charging points as per TR-S7 2 (d) relating to design requirements for on-site car parking spaces. The relevant Proposed RPS Change 1 policies are CC.1 and CC.3.	Amend TR-S3 (Micromobility parking design) to include provision for e-bikes in standards, including a requirement for charging stations.
Stride Investment Management Limited	FS107.17	Part 2 / Energy Infrastructure and Transport / Transport / TR-S3	Oppose	While Stride supports providing for micromobility, we consider that it is unnecessary to include specific requirements around e-bikes. These provisions are insufficiently flexible and are likely to become irrelevant as technology changes.	Disallow
Investore Property Limited	FS108.17	Part 2 / Energy Infrastructure and Transport / Transport / TR-S3	Oppose	While Investore supports providing for micromobility, we consider that it is unnecessary to include specific requirements around e-bikes. These provisions are insufficiently flexible and are likely to become irrelevant as technology changes.	Disallow
WCC Environmental Reference Group	377.54	Energy Infrastructure and Transport / Transport / TR-S3	Amend	Generally supportive but notes that the dimensions for a standard bike do not accommodate the current variety of bike sizes, as envisaged by G102 in the Residential Design Guide.	Amend TR-S3 (Micromobility parking design) to reflect the 85th percentile for current e-bikes and cargo bikes. For comparison, the Auckland Plan Change 79 has the dimensions: 1.9 length x 1.25 height x 0.7m width
Ministry of Education	400.39	Energy Infrastructure and Transport / Transport / TR-S3	Support	Supports TR-S3 as it promotes the safe and efficient use of the site and provides for alternative and public modes of transport.	Retain TR-S3 (Micromobility parking design) as notified.
Wellington International Airport Ltd	406.196	Energy Infrastructure and Transport / Transport / TR-S3	Support	Supports TR-S3 not being relevant in the Airport Zone.	Retain TR-S3 (Micromobility parking design) as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Living Streets Aotearoa	482.42	Energy Infrastructure and Transport / Transport / TR-S3	Amend	Considers that TR-S3.1.d. should be amended to ensure that parking for micromobility devices is not on the footpath. This is important to help support walking.	Amend TR-S3.1.d. to ensure that parking for micromobility devices is not on the footpath. [Inferred submission meant 'cycling and micromobility devices' when it used 'vehicles'].
Paihikara Ki Pōneke Cycle Wellington	302.28	Energy Infrastructure and Transport / Transport / TR-S4	Support in part	TR-S4 is supported as it has a requirement to provide a ramp on one side of the stairs to allow for cycle access. However, the standard also needs to specify a maximum angle for the ramp so that this is usable.	Retain TR-S4 (On-site pedestrian, cycling and micromobility paths) with amendment.
Paihikara Ki Pōneke Cycle Wellington	302.29	Energy Infrastructure and Transport / Transport / TR-S4	Amend	Considers that TR-S4 should be amended to specify a maximum angle for the wheeling ramp so that it is usable.	Amend TR-S4 (On-site pedestrian, cycling and micromobility paths) as follows: 1. On-site pedestrian, cycling and micromobility paths must achieve the following: ... e. If stairs are necessary between cycling and micromobility storage and the legal road, a <u>wheeling ramp</u> at least 300mm wide on one side of the stairs <u>that does not exceed a gradient of 50%</u> must be provided.
Restaurant Brands Limited	349.25	Energy Infrastructure and Transport / Transport / TR-S4	Support	Support	Retain TR-S4 (On-site pedestrian, cycling and micromobility paths) as notified.
Greater Wellington Regional Council	351.115	Energy Infrastructure and Transport / Transport / TR-S4	Amend	Considers it is not clear whether the needs of increasing uptake of e-bikes, including cargo and multipassenger e-bikes have been provided for in the standards. E.g. sufficient dimensions for longer/wider e-bikes and electric charging points as per TR-S7 2 (d) relating to design requirements for on-site car parking spaces. The relevant Proposed RPS Change 1 policies are CC.1 and CC.3.	Amend TR-S4 (On-site pedestrian, cycling and micromobility paths) to include provision for e-bikes in standards, including a requirement for charging stations.
Ministry of Education	400.40	Energy Infrastructure and Transport / Transport / TR-S4	Support	Supports TR-S4 as it promotes the safe and efficient use of the site and provides for alternative and public modes of transport.	Retain TR-S4 (On-site pedestrian, cycling and micromobility paths) as notified.
Living Streets Aotearoa	482.43	Energy Infrastructure and Transport / Transport / TR-S4	Amend	Considers that TR-S4 is unclear what the 1.8m minimum width refers to. If this is a footpath, it should be clearly stated.	Clarify TR-S4 (On-site pedestrian, cycling and micromobility paths) to state what the 1.8m minimum width refers to.
Restaurant Brands Limited	349.26	Energy Infrastructure and Transport / Transport / TR-S5	Support	Support	Retain TR-S5 (Classification of driveways) as notified.
Waka Kotahi	370.164	Energy Infrastructure and Transport / Transport / TR-S5	Amend	The submitter requests the provisions be made clearer that, where there is a new activity, the driveway classification and design is relative to that new activity.	Seeks to clarify TR-S5 (Classification of driveways).
Fire and Emergency New Zealand	273.54	Energy Infrastructure and Transport / Transport / TR-S6	Support in part	As noted in the submission point on INF-S16, seeks to amend TR-S6 to provide sufficient access for firefighting appliances to sites in unreticulated areas, or areas where the driveway exceeds hose run distances.	Supports TR-S6 (Design of driveways) with amendment.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Fire and Emergency New Zealand	273.55	Energy Infrastructure and Transport / Transport / TR-S6	Amend	As noted in the submission point on INF-S16, seeks to amend TR-S6 to provide sufficient access for firefighting appliances to sites in unreticulated areas, or areas where the driveway exceeds hose run distances.	Amend TR-S6 (Design of driveways) as follows: ... <u>3. Any access to a site located in an area where no fully reticulated water supply system is available, or having a length greater than 50 metres when connected to a road that has a fully reticulated water supply system including hydrants, must be designed to accommodate a fire appliance design vehicle of at least 2.5 metres wide and 13 metres long and with a minimum gross mass of 25 tonne including:</u> <u>a. a gradient of no more than 15% at any point; and</u> <u>b. a minimum clear passageway and/or vehicle crossing of at least 3.5 metres width at the site entrance, internal entrances and between buildings; and</u> <u>c. a minimum formed carriageway width of 4 metres; and</u> <u>d. a height clearance of at least 4 metres; and</u> <u>e. a design that is free of obstacles that could hinder access for emergency service vehicles.</u> <u>f. The provision of hardstand and turnaround areas with maximum gradient of 5% in all directions</u>
The Retirement Villages Association of New Zealand Incorporated	FS126.36	Part 2 / Energy Infrastructure and Transport / Transport / TR-S6	Oppose	The RVA opposes the relief sought in this submission as matters relating to fire-fighting servicing are already provided for under the Building Act and it is inappropriate to duplicate controls under the Proposed Plan.	Disallow
Ryman Healthcare Limited	FS128.36	Part 2 / Energy Infrastructure and Transport / Transport / TR-S6	Oppose	Ryman opposes the relief sought in this submission as matters relating to fire-fighting servicing are already provided for under the Building Act and it is inappropriate to duplicate controls under the Proposed Plan.	Disallow
Restaurant Brands Limited	349.27	Energy Infrastructure and Transport / Transport / TR-S6	Support	Support	Retain TR-S6 (Design of driveways) as notified.
Waka Kotahi	370.165	Energy Infrastructure and Transport / Transport / TR-S6	Amend	The submitter requests the provisions be made clearer that, where there is a new activity, the driveway classification and design is relative to that new activity.	Seeks to clarify TR-S6 (Design of driveways).
Fire and Emergency New Zealand	273.56	Energy Infrastructure and Transport / Transport / TR-S7	Support in part	Notes that when a site is located in an unreticulated area or has a driveway greater than 50m in length, it is vital that fire appliances are able to access and manoeuvre through the site to effectively respond to an emergency onsite. Therefore seeks to amend TR-S7 to require onsite vehicle circulation and manoeuvring to provide for heavy rigid vehicles.	Supports TR-S7 (Design requirements for on-site vehicle parking, circulation and manoeuvring) with amendment.
Fire and Emergency New Zealand	273.57	Energy Infrastructure and Transport / Transport / TR-S7	Amend	Notes that when a site is located in an unreticulated area or has a driveway greater than 50m in length, it is vital that fire appliances are able to access and manoeuvre through the site to effectively respond to an emergency onsite. Therefore seeks to amend TR-S7 to require onsite vehicle circulation and manoeuvring to provide for heavy rigid vehicles.	Amend TR-S7 (Design requirements for on-site vehicle parking, circulation and manoeuvring) as follows: 1. Where provided on a site, car parking spaces and associated circulation and manoeuvring areas must be designed to accommodate a 4.91m x 1.87m vehicle (85th percentile vehicle) as the minimum design vehicle, with 300mm clearance per side to obstructions and a minimum outside turning radius of 5.8m; <u>unless:</u> <u>a. The site is located in an area where no fully reticulated water supply system is available, or the site access has a length greater than 50 metres when connected to a road that has a fully reticulated water supply system including hydrants. Then circulation and manoeuvring areas must be designed to accommodate a heavy rigid vehicle as per AS2890.2.</u>
The Retirement Villages Association of New Zealand Incorporated	FS126.37	Part 2 / Energy Infrastructure and Transport / Transport / TR-S7	Oppose	The RVA opposes the relief sought in this submission as matters relating to fire-fighting servicing are already provided for under the Building Act and it is inappropriate to duplicate controls under the Proposed Plan.	Disallow

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Ryman Healthcare Limited	FS128.37	Part 2 / Energy Infrastructure and Transport / Transport / TR-S7	Oppose	Ryman opposes the relief sought in this submission as matters relating to fire-fighting servicing are already provided for under the Building Act and it is inappropriate to duplicate controls under the Proposed Plan.	Disallow
Rimu Architects Ltd	318.19	Energy Infrastructure and Transport / Transport / TR-S7	Amend	Considers that TR-S7 should be amended to have an exception for streets with a steeper gradient than 12.5%. It is noted that given Wellington's topography and road layout, it may not be possible to meet the gradient requirements of 4. or to keep circulation and manoeuvring wholly outside the road reserve as required by 6. The provision is otherwise supported for later installation of electric vehicle charging at 2d. (rather than actual installation).	Amend TR-S7 (Design requirements for on-site vehicle parking, circulation and manoeuvring) as follows: ... 4. On-site circulation and manoeuvring areas must have a maximum gradient of 12.5% <u>except when connecting to a street with a steeper gradient than this, where the limit is set by the street gradient.</u> ...
Restaurant Brands Limited	349.28	Energy Infrastructure and Transport / Transport / TR-S7	Support	Support	Retain TR-S7 (Design requirements for on-site vehicle parking, circulation and manoeuvring) as notified.
Kāinga Ora Homes and Communities	391.152	Energy Infrastructure and Transport / Transport / TR-S7	Support in part	TR-S7 is partially supported and amendments are sought.	Retain TR-S7 (Design requirements for on-site vehicle parking, circulation and manoeuvring) with amendment.
Design Network Architecture Limited	FS73.1	Part 2 / Energy Infrastructure and Transport / Transport / TR-S7	Support	Agree that TR-S7 be amended in part. Seek clarification of TR-S7 2 (c) with regard to the car parking minimum height clearance of 2.3m. Is this height specifically for the parking space itself? Or is it also a requirement for the garage door height? Suggest clarification to ensure that garage door heights can be lower than this (to align with typical building construction methods).	Not specified / Seeks clarification of TR-S7 2 (c) with regard to the car parking minimum height clearance of 2.3m to ensure that garage door heights can be lower than this (to align with typical building construction methods).
Kāinga Ora Homes and Communities	391.153	Energy Infrastructure and Transport / Transport / TR-S7	Amend	Considers that design requirements in TR-S7 should be amended.	Amend TR-S7 (Design requirements for on-site vehicle parking, circulation and manoeuvring) as follows: 1. Where provided on a site, car parking spaces and associated circulation and manoeuvring areas must be designed to accommodate a 4.91m x 1.87m vehicle (85th percentile vehicle) as the minimum design vehicle, with 300mm clearance per side to obstructions and a minimum outside turning radius of 5.8m; 2. Car parking spaces must: a. Comply with the minimum dimensions of Figure 5 – TR: Parking and Table 10 – TR: Parking Space Dimensions; b. Have a maximum gradient of 5% in any direction; and c. Have a minimum height clearance of 2.3m; and d. For residential on-site car parking spaces, be electric vehicle charging ready by being serviced with an electrical cable conduit from the electricity supply to the edge of the carpark; ...
Greater Wellington Regional Council	FS84.77	Part 2 / Energy Infrastructure and Transport / Transport / TR-S7	Oppose	Greater Wellington oppose the deletion of this standard as it inhibits the uptake of low or zero carbon private vehicles which is directed in Proposed RPS Change 1.	Disallow / Seeks that TR-S7 is retained as notified.
Miriam Moore	433.11	Energy Infrastructure and Transport / Transport / TR-S7	Support	Support 1 bicycle park per residential unit	Retain Transport - Table 7- TR: Minimum number of on-site cycling and micromobility device parking spaces as notified
Survey & Spatial New Zealand Wellington Branch	439.26	Energy Infrastructure and Transport / Transport / TR-S7	Amend	Considers that point 4 of this standard limits the gradient of on-site circulation and manoeuvring to a maximum of 12.5%. However, Table 9 allows a driveway to have a steeper gradient. Considers there may be confusion between a circulation route and a driveway in residential situations	Amend TR-S7 (Design requirements for on-site vehicle parking, circulation and manoeuvring) to: 4. On-site circulation (<u>excluding residential driveways</u>) and manoeuvring areas must have a maximum gradient of 12.5%;

Hazards and Risks - Contaminated Land

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Precinct Properties New Zealand Limited	139.3	Energy Infrastructure and Transport / Transport / TR-S8	Oppose	Opposed to this standard that requires provision of an on-site loading area for buildings over 450m2 . There may be sites where it is impractical and unnecessary to provide on-site loading and this standard may unnecessarily constrain appropriate development.	Delete TR-S8 (Provision of on-site loading areas) in its entirety.
Restaurant Brands Limited	349.29	Energy Infrastructure and Transport / Transport / TR-S8	Support	Support	Retain TR-S8 (Provision of on-site loading areas) as notified.
Retirement Villages Association of New Zealand Incorporated	350.59	Energy Infrastructure and Transport / Transport / TR-S8	Oppose in part	Considers that the requirement for at least one on-site loading area for buildings with a footprint of 450 m2 or more is not practicable when applied to a retirement village environment where it is common to have multiple buildings of this size. Because retirement villages are centrally operated, one on-site loading area is sufficient for the whole village. It is considered more appropriate to assess loading area requirements based on the activity being undertaken on the site.	Opposes TR-S8 (Provision of on-site loading areas) and seeks amendment.
Retirement Villages Association of New Zealand Incorporated	350.60	Energy Infrastructure and Transport / Transport / TR-S8	Amend	Considers that the requirement for at least one on-site loading area for buildings with a footprint of 450 m2 or more is not practicable when applied to a retirement village environment where it is common to have multiple buildings of this size. Because retirement villages are centrally operated, one on-site loading area is sufficient for the whole village. It is considered more appropriate to assess loading area requirements based on the activity being undertaken on the site.	Amend TR-S8 (Provision of on-site loading areas) as follows: 1. <u>No on-site loading areas are required for buildings with a building footprint of less than 450m2;</u> 2. <u>At least one on-site loading area must be provided for buildings with a building footprint of 450m2 or more; and</u> 3. <u>For retirement villages, one on-site loading area shall be provided. No on-site loading areas are required for buildings with a building footprint of less than 450m2.</u>
Precinct Properties New Zealand Limited	139.4	Energy Infrastructure and Transport / Transport / TR-S9	Oppose	Opposes TR-S9 and seeks that it is deleted because a design requirement based on a 8 x 2.5m truck, and a 4.5m height clearance is excessive and unnecessary to provide for loading requirements. This will constrain appropriate designs and have negative effects on streetscape and urban design. This is counter to the strategic direction of the Proposed District Plan and the objectives and policies of the City Centre Zone, particularly around promoting a walkable city (CCZ-P8, Sense of Place) and quality design outcomes (CCZ-P9, Quality design outcomes) as requiring oversized vehicle crossings and loading areas will reduce pedestrian amenity.	Delete TR-S9 (Design requirements for on-site loading, circulation and manoeuvring) in its entirety.
Restaurant Brands Limited	349.30	Energy Infrastructure and Transport / Transport / TR-S9	Support	Support	Retain TR-S9 (Design requirements for on-site loading, circulation and manoeuvring) as notified.
Greater Wellington Regional Council	351.116	Hazards and Risks / Contaminated Land / General CL	Support	Supports the approach taken on contaminated land, as this aligns with Policy 34 of the operative RPS.	Retain the Contaminated Land chapter as notified.
BP Oil New Zealand, Mobil Oil New Zealand Limited and Z Energy Limited (the Fuel Companies)	372.75	Hazards and Risks / Contaminated Land / General CL	Support	The Contaminated Land chapter is generally supported. The chapter contains objectives and policies for the assessment of resource consent applications required under the NESCS, noting that the NESCS only contains rules and standards. In terms of rules, it is considered that the NESCS provides appropriate land use controls for both land disturbance activities and changes of use in relation to contaminated soils. As such, given there are no rules in this chapter, this approach is supported.	Retain the Contaminated Land chapter as notified.
BP Oil New Zealand, Mobil Oil New Zealand Limited and Z Energy Limited (the Fuel Companies)	372.76	Hazards and Risks / Contaminated Land / CL-O1	Support	CL-O1 is supported as drafted, as it seeks that contaminated land is identified and managed to protect human health.	Retain CL-O1 (Protection of human health from contaminants) as notified.
Wellington International Airport Ltd	406.197	Hazards and Risks / Contaminated Land / CL-O1	Support	Considers that the Contaminated Land chapter does not contain methods. Generally supports the approach taken within this chapter and considers that it is appropriate to avoid unnecessary duplication where other legislation comprehensively and effectively controls such matters.	Retain CL-O1 (Protection of human health from contaminants) as notified

Hazards and Risks - Hazardous Substances

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Wellington International Airport Ltd	406.198	Hazards and Risks / Contaminated Land / CL-O2	Support	Considers that the Contaminated Land chapter does not contain methods. Generally supports the approach taken within this chapter and considers that it is appropriate to avoid unnecessary duplication where other legislation comprehensively and effectively controls such matters.	Retain CL-O2 (Benefit of remediating contaminated land) as notified
Wellington International Airport Ltd	406.199	Hazards and Risks / Contaminated Land / CL-P1	Support	Considers that the Contaminated Land chapter does not contain methods. Generally supports the approach taken within this chapter and considers that it is appropriate to avoid unnecessary duplication where other legislation comprehensively and effectively controls such matters.	Retain CL-P1 (Benefit of remediating contaminated land) as notified
Wellington International Airport Ltd	406.200	Hazards and Risks / Contaminated Land / CL-P2	Support	Considers that the Contaminated Land chapter does not contain methods. Generally supports the approach taken within this chapter and considers that it is appropriate to avoid unnecessary duplication where other legislation comprehensively and effectively controls such matters.	Retain CL-P2 (Identification of contaminated and potentially contaminated land) as notified
Wellington Tenth's Trust	363.2	Hazards and Risks / Contaminated Land / CL-P3	Support	Supports CL-P3 on the basis that it provides for the development of its future aspirations.	Retain CL-P3 (Management of contaminated land) as notified.
BP Oil New Zealand, Mobil Oil New Zealand Limited and Z Energy Limited (the Fuel Companies)	372.77	Hazards and Risks / Contaminated Land / CL-P3	Support	CL-P3 is supported as the wording is considered appropriate. Particular regard to management options and best practice remediation options that ensures risks to human health are minimised, whilst ensuring the land is suitable for its intended use is supported.	Retain CL-P3 (Management of contaminated land) as notified.
Taranaki Whānui ki te Upoko o te Ika	389.62	Hazards and Risks / Contaminated Land / CL-P3	Amend	Seeks clarification of the implementation of CL-P3.	Seeks that CL-P3 (Management of contaminated land) is amended to reflect Taranaki Whānui partnership opportunities in the assessment of contaminated land practices and restoration and recovery processes too.
Wellington International Airport Ltd	406.201	Hazards and Risks / Contaminated Land / CL-P3	Support	Considers that the Contaminated Land chapter does not contain methods. Generally supports the approach taken within this chapter and considers that it is appropriate to avoid unnecessary duplication where other legislation comprehensively and effectively controls such matters.	Retain CL-P3 (Management of contaminated land) as notified
Greater Wellington Regional Council	351.117	Hazards and Risks / Hazardous Substances / General HS	Oppose	Considers the 2017 amendments to the RMA repealed the provisions of s30 and s31 relating to the function of regional councils and territorial authorities with respect to management of the use of, or use of land for, hazardous substances. This is no longer a function of either the WCC or Greater Wellington, and hazardous substance use is managed under the HSNO Act by the Environmental Protection Authority. Greater Wellington controls the discharge of hazardous substances only because they are a 'contaminant', and RMA s15 applies. Greater Wellington notes that the purpose of HSNO Act is to prevent or manage any adverse effects of hazardous substances, so there is no category of risk that is not managed under the HSNO Act	Seeks the consideration of the deletion of the chapter.
BP Oil New Zealand, Mobil Oil New Zealand Limited and Z Energy Limited (the Fuel Companies)	372.78	Hazards and Risks / Hazardous Substances / General HS	Support in part	The approach to hazardous substances and the Hazardous Substances Chapter as set out in the section 32 report is supported. In particular, efforts to only control matters in relation to hazardous substances that are not covered by other more specific legislation including the Hazardous Substances and New Organisms Act 1996 (HSNO) and the Health and Safety at Work Act 2015 (HSWA).	Retain the Hazardous substances chapter as notified, with amendments.
BP Oil New Zealand, Mobil Oil New Zealand Limited and Z Energy Limited (the Fuel Companies)	372.79	Hazards and Risks / Hazardous Substances / General HS	Support	Supports the introduction to the chapter.	Retain the introduction to the Hazardous Substances chapter. [Inferred decision requested].

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Firstgas Limited	304.38	Hazards and Risks / Hazardous Substances / New HS	Amend	<p>Considers that a new rule should be added to the Hazardous Substances chapter. The Plan should adopt a precautionary approach to hazard risk management. The use of explosives (e.g. for quarrying purposes) near the Gas Transmission Network poses a health and safety, and environmental risk should the activity not be properly managed. It is sought that the Plan apply a new rule, which requires that the use of explosives within 100 metres of the Gas Transmission Network be assessed as a restricted discretionary activity.</p> <p>The reverse sensitivity effects from such activities are not specifically addressed under the Hazardous Substances and New Organisms Act 1996 (HSNO). In particular, there are no controls or rules around the use of explosives within the HSNO. There are also no controls around the use of explosives within proximity to pipelines. The use of a rule is consistent with HS-01 (Protection from unacceptable residual risk) which provides direction that the use of a rule would be appropriate in this circumstance.</p> <p>The gas network delivers significant benefits to people and communities, supporting their social and economic well-being, as well as providing for their health and safety. Potential degradation to the gas network, resulting from explosive activities, has the potential to result in risk to people and communities. Explosive activities which may result in potentially adverse effects on the integrity of the network, and consequently the health and wellbeing of people and communities, shall be required to demonstrate the residual risk can be avoided, remedied or mitigated to an acceptable level.</p>	<p>Add a new Rule to the Hazardous Substances chapter as follows:</p> <p><u>Restricted Discretionary Activities</u> <u>The use of explosives within 100 metres of the Gas Transmission Network</u></p> <p><u>Matters of discretion are restricted to:</u></p> <p>i) <u>The risk of hazards affecting public or individual safety, and the risk of property damage;</u> ii) <u>Measures proposed to avoid or mitigate potential adverse effects on the Gas Transmission Network;</u> iii) <u>Technical advice from the owner and operator of the Gas Transmission Network, including an assessment of the level of risk;</u> iv) <u>The outcome of any consultation with the owner and operator of the Gas Transmission Network;</u> <u>and</u> v) <u>Whether the use of explosives could be located a greater distance from the Gas Transmission Network</u></p>
Fire and Emergency New Zealand	273.58	Hazards and Risks / Hazardous Substances / HS-01	Support	Supports the objective on the basis that the objective seeks to protect people, communities and identified areas from unacceptable residual risks associated with the handling of hazardous substances within appropriate facilities and activities.	Retain HS-01 (Protection from unacceptable residual risk) as notified.
BP Oil New Zealand, Mobil Oil New Zealand Limited and Z Energy Limited (the Fuel Companies)	372.80	Hazards and Risks / Hazardous Substances / HS-01	Support	HS-01 is supported, as it seeks to protect people and communities from unacceptable residual risks from facilities and activities involving the manufacture, use, storage, transportation or disposal of hazardous substances.	Retain Objective HS-01 (Protection from unacceptable residual risk) as notified.
Wellington International Airport Ltd	406.202	Hazards and Risks / Hazardous Substances / HS-01	Support	<p>The Hazardous Substances chapter only seeks to manage the residual and cumulative risks associated with hazardous substances.</p> <p>Generally supports the approach taken within this chapter and considers that it is appropriate to avoid unnecessary duplication where other legislation comprehensively and effectively controls the storage, transportation and use of such substances.</p>	Retain HS-01 (Protection from unacceptable residual risk) as notified.
BP Oil New Zealand, Mobil Oil New Zealand Limited and Z Energy Limited (the Fuel Companies)	372.81	Hazards and Risks / Hazardous Substances / HS-02	Support	HS-02 is supported, as it seeks that sensitive activities are appropriately located to minimise reverse sensitivity effects and unacceptable residual risk from established hazardous facilities.	Retain Objective HS-02 (Protection of established facilities) as notified.
Ministry of Education	400.41	Hazards and Risks / Hazardous Substances / HS-02	Support	Supports HS-02 to encourage sensitive activities, including educational facilities, to be located away from established hazardous facilities.	Retain HS-02 (Protection of established facilities) as notified.
Wellington International Airport Ltd	406.203	Hazards and Risks / Hazardous Substances / HS-02	Support	<p>The Hazardous Substances chapter only seeks to manage the residual and cumulative risks associated with hazardous substances.</p> <p>Generally supports the approach taken within this chapter and considers that it is appropriate to avoid unnecessary duplication where other legislation comprehensively and effectively controls the storage, transportation and use of such substances.</p>	Retain HS-02 (Protection of established facilities) as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Fire and Emergency New Zealand	273.59	Hazards and Risks / Hazardous Substances / HS-P1	Support	Notes that fire stations and associated firefighting activities involve the use and storage of hazardous substances at quantities that are considered minor. However, there is sometimes a need temporarily store large quantities of product in an emergency. The policy allows the flexibility to utilise hazardous substances when and where necessary for operations and to ensure an effective response to a fire or other emergency.	Retain HS-P1 (Residual risk to people and communities) as notified.
BP Oil New Zealand, Mobil Oil New Zealand Limited and Z Energy Limited (the Fuel Companies)	372.82	Hazards and Risks / Hazardous Substances / HS-P1	Oppose	HS-P1 is opposed as it extends to a range of matters which are not specific to hazardous substances and which would be better managed through provisions applicable to all activities affected by these specific areas or overlays (i.e. in their own chapters). HS-P1 could potentially conflict with these chapters including, for example, the Natural Hazards chapter which does not explicitly seek to avoid hazardous substances in natural hazard areas. Instead, hazardous substance activities would be more appropriately determined on a case-by-case basis depending on, for example, the specific activity's sensitivity to natural hazard risk.	Delete HS-P1 (Residual risk to people and communities) in its entirety and instead determine hazardous activities on a case-by-case basis.
CentrePort Limited	402.84	Hazards and Risks / Hazardous Substances / HS-P1	Amend	Considers that this is an avoid policy. Large parts of the Special Port Zone are within natural hazards areas especially the Wellington fault. CentrePort is a Major Hazard facility under the Health and Safety at Work (Major Hazard Facilities) Regulations 2016. The policy should recognise that there may be functional need or operational requirements for hazardous substances to be handled within these areas.	Amend HS-P1 (Residual risk to people and communities) as follows: 7. ... Unless <u>1. There is a functional need or operational requirement and there are no practicable alternatives;</u> <u>and</u> <u>2. it can be demonstrated that the residual risk to human health, people and communities or these identified areas and their values will be avoided or, if avoidance is not possible, unacceptable risk is adequately mitigated.</u>
Wellington International Airport Ltd	406.204	Hazards and Risks / Hazardous Substances / HS-P1	Support	The Hazardous Substances chapter only seeks to manage the residual and cumulative risks associated with hazardous substances. Generally supports the approach taken within this chapter and considers that it is appropriate to avoid unnecessary duplication where other legislation comprehensively and effectively controls the storage, transportation and use of such substances.	Retain HS-P1 (Residual risk to people and communities) as notified.
BP Oil New Zealand, Mobil Oil New Zealand Limited and Z Energy Limited (the Fuel Companies)	372.83	Hazards and Risks / Hazardous Substances / HS-P2	Support	HS-P2 is supported as it seeks to appropriately locate hazardous activities and facilities to mitigate individual and cumulative residual risk associated with multiple hazardous activities and facilities and to avoid unacceptable residual risks to people and sensitive activities by internalising effects through site layout and design.	Retain HS-P2 (Location of hazardous facilities and activities) as notified.
CentrePort Limited	402.85	Hazards and Risks / Hazardous Substances / HS-P2	Support	Support the intent of this policy.	Retain HS-P2 (Location of hazardous facilities and activities) as notified.
Wellington International Airport Ltd	406.205	Hazards and Risks / Hazardous Substances / HS-P2	Support	The Hazardous Substances chapter only seeks to manage the residual and cumulative risks associated with hazardous substances. Generally supports the approach taken within this chapter and considers that it is appropriate to avoid unnecessary duplication where other legislation comprehensively and effectively controls the storage, transportation and use of such substances.	Retain HS-P2 (Location of hazardous facilities and activities) as notified.
BP Oil New Zealand, Mobil Oil New Zealand Limited and Z Energy Limited (the Fuel Companies)	372.84	Hazards and Risks / Hazardous Substances / HS-P3	Support	HS-P3 is supported as it seeks to avoid locating sensitive activities in close proximity to MHF where there is potential to be exposed to unacceptable residual risks and/or constrain the development, operation, upgrading or maintenance of an existing MHF.	Retain HS-P3 (Sensitive activities) as notified.
Ministry of Education	400.42	Hazards and Risks / Hazardous Substances / HS-P3	Support	Supports HS-P3 ensure sensitive activities, including educational facilities, are located away from established major hazardous facilities.	Retain HS-P3 (Sensitive activities) as notified.
CentrePort Limited	402.86	Hazards and Risks / Hazardous Substances / HS-P3	Support	Support the intent of this policy.	Retain HS-P3 (Sensitive activities) as notified.

Hazards and Risks - Natural Hazards

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Wellington International Airport Ltd	406.206	Hazards and Risks / Hazardous Substances / HS-P3	Support	The Hazardous Substances chapter only seeks to manage the residual and cumulative risks associated with hazardous substances. Generally supports the approach taken within this chapter and considers that it is appropriate to avoid unnecessary duplication where other legislation comprehensively and effectively controls the storage, transportation and use of such substances.	Retain HS-P3 (Sensitive activities) as notified.
BP Oil New Zealand, Mobil Oil New Zealand Limited and Z Energy Limited (the Fuel Companies)	372.85	Hazards and Risks / Hazardous Substances / HS-R1	Support	HS-R1 is supported as it enables the manufacture, use, storage, transportation or disposal of hazardous substances as a permitted activity and provides an appropriate rule framework relating to new and existing MHFs and the requirements for Quantitative Risk Assessments (QRA) in specific situations (e.g. greater than a 10% increase in the volume of hazardous substances).	Retain HS-R1 (The manufacture, use, storage, transportation or disposal of hazardous substances) as notified.
CentrePort Limited	402.87	Hazards and Risks / Hazardous Substances / HS-R1	Support	Support the intent of this rule.	Retain HS-R1 (The manufacture, use, storage, transportation or disposal of hazardous substances) as notified.
Wellington International Airport Ltd	406.207	Hazards and Risks / Hazardous Substances / HS-R1	Support	The Hazardous Substances chapter only seeks to manage the residual and cumulative risks associated with hazardous substances. Generally supports the approach taken within this chapter and considers that it is appropriate to avoid unnecessary duplication where other legislation comprehensively and effectively controls the storage, transportation and use of such substances.	Retain HS-R1 (The manufacture, use, storage, transportation or disposal of hazardous substances) as notified.
BP Oil New Zealand, Mobil Oil New Zealand Limited and Z Energy Limited (the Fuel Companies)	372.86	Hazards and Risks / Hazardous Substances / HS-R2	Support	[No specific reason given beyond decision requested - refer to original submission]	Retain HS-R2 (Existing major hazard facility) as notified.
Ministry of Education	400.43	Hazards and Risks / Hazardous Substances / HS-R2	Support	Supports HS-R2 as the submitter supports the Section 88 information requirements for existing major hazards facilities to consider any adverse effects on nearby sensitive activities (including educational facilities). The submitters considers that this will help to identify any risks to appropriately manage and mitigate them.	Retain HS-R2 (Existing major hazard facility) as notified.
CentrePort Limited	402.88	Hazards and Risks / Hazardous Substances / HS-R2	Support	Support the intent of this rule.	Retain HS-R2 (Existing major hazard facility) as notified.
BP Oil New Zealand, Mobil Oil New Zealand Limited and Z Energy Limited (the Fuel Companies)	372.87	Hazards and Risks / Hazardous Substances / HS-R3	Support	[No specific reason given beyond decision requested - refer to original submission]	Retain HS-R3 (New major hazard facility) as notified.
CentrePort Limited	402.89	Hazards and Risks / Hazardous Substances / HS-R3	Support in part	Considers that the Special Purpose Port Zone should be listed as a discretionary option under this rule for any proposal for a new major hazard activity as there is for the General Industrial Zone.	Retain HS-R3 (New major hazard facility), with amendment.
CentrePort Limited	402.90	Hazards and Risks / Hazardous Substances / HS-R3	Amend	Considers that the Special Purpose Port Zone should be listed as a discretionary option under this rule for any proposal for a new major hazard activity as there is for the General Industrial Zone.	Amend HS-R3 (New major hazard facility) as follows: 1. Activity status: Discretionary Where: a. The activity is located within the General Industrial Zone <u>or the Special Purpose Port Zone.</u> ...
Victoria University of Wellington Students' Association	123.37	Hazards and Risks / Natural Hazards / General NH	Not specified	Considers that community resilience is an incredibly important factor in terms of natural hazard response.	Seeks that infrastructure facilitates bringing people together.
Tyers Stream Group	221.28	Hazards and Risks / Natural Hazards / General NH	Amend	[No specific reason given beyond decision requested - refer to original submission]	Seeks stricter management of rules to restrict buildings and infrastructure in areas covered by the Stream Corridor Overlay, the Overland Flow Path Overlay and the Ponding Overlay.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	FS25.27	Part 2 / Hazards and Risks / Natural Hazards / General NH	Oppose	The submission seeking stricter rules to manage infrastructure in stated hazard areas is too uncertain. Infrastructure may need to be located in these areas such to operational need or functional need. The existing framework in the INF-NH chapter is considered to be satisfactory. Any provision for infrastructure should also be contained in the INF-NH chapter and not the general NH chapter to which the submission relates.	Disallow
Powerco Limited	FS61.41	Part 2 / Hazards and Risks / Natural Hazards / General NH	Oppose	The submission seeking stricter rules to manage infrastructure in stated hazard areas is too uncertain. Infrastructure may need to be located in these areas such to operational need or functional need. The existing framework in the INF-NH chapter is considered to be satisfactory. Any provision for infrastructure should also be contained in the INF-NH chapter and not the general NH chapter to which the submission relates.	Disallow
Tyers Stream Group	221.29	Hazards and Risks / Natural Hazards / General NH	Support	Supports Natural Hazards chapter as it relates to the Tyers stream catchment	Retain Natural Hazards chapter as notified. [Inferred decision requested]
Wellington City Council	266.65	Hazards and Risks / Natural Hazards / General NH	Amend	Considers there is a need to clarify and add detail in relation to sensitivity rating definitions.	Amend the first sentence of paragraph one of the introduction under 'Hazard Sensitivity' as follows: To assist with determining the consequences associated with natural hazards, buildings and activities have been allocated a sensitivity rating (see Definitions – <u>less hazard sensitive activities, potentially hazard sensitive activities, hazard sensitive activities</u>).
Wellington City Council	266.66	Hazards and Risks / Natural Hazards / General NH	Amend	Considers 'Sheppards Gully' is spelled incorrectly and should instead be 'Shepards Gully'.	Amend, in the introduction, the Natural Hazard Overlay title as follows: Sheppards <u>Shepards</u> Gully Fault Overlay Consequential re-naming of 'Sheppards Gully' in the following provisions: INF-NH-R60.1.a.iii NH-R5.1.b SUB-R17 (rule title) SUB-R18 (rule title) SUB- R18.1.1 SUB-R22 (rule title) Planning maps
Toka Tū Ake EQC	282.5	Hazards and Risks / Natural Hazards / General NH	Amend	Considers that the provisions for landslide hazard mitigation in the earthworks section of the Proposed Plan are not sufficient, as they rely on individual assessments of sites and could be applied inconsistently. They also allow for developments which do not require earthworks in areas which are at risk of slope failure. Applying a Landslide Hazard overlay (such as the nonregulatory landslide overlay) and restricting development within high-hazard areas will preclude inconsistent application of earthworks rules and prevent subdivision and development on slopes prone to failure. Considers that while there is a restrictive disclaimer on the existing non-regulatory GNS Science SLIDE Geomorphology Map, the uncertainties in a landslide hazard overlay developed from this map can be managed through policy.	Seeks that objectives, policies and rules are developed in the Natural Hazards chapter to restrict hazard sensitive activities and potentially hazard sensitive activities in high risk land located as a new landslide hazard overlay.
Greater Wellington Regional Council	FS84.127	Part 2 / Hazards and Risks / Natural Hazards / General NH	Support	Greater Wellington support the submitter's request for additional provisions to control development on land that is at higher risk of slope failure. By identifying and managing this risk, the risk to life, property and well-being of future urban intensification can be appropriately minimised. These changes would have regard to Proposed RPS Plan Change 1, specifically Policy 51.	Allow / Supports the submission in part and seeks additional controls on landslide hazards to manage landslide risk on steep land. Considers that some controls should apply to slopes from ~20-34°. Seeks that the matters of control for these areas include a site-specific geotechnical investigation to ensure slope failure hazards are appropriately managed.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Toka Tū Ake EQC	282.6	Hazards and Risks / Natural Hazards / General NH	Amend	Considers that the terminology 'Fault Hazard Overlay' should be consistent with the MFE guidelines i.e. Fault Avoidance Zone, and that including the use of confined, unconfined, distributed and uncertain fault areas where appropriate. Considers that the supporting s32 information indicates that the Fault Hazard Overlay are the mapped Fault Avoidance Zones that are mapped in the supporting report; however, this is not explained in the s32. Considers that the description of 'fault hazard' needs to be clarified or amended to reflect how it is shown on the maps i.e., a band, which are at different widths on the map, which we assume reflects the certainty of the fault location.	Seeks that the term "Fault Hazard Overlay" in the Natural Hazards chapter is changed to "Fault Avoidance Zone" and include confined, unconfined, distributed, and uncertain fault areas.
Aggregate and Quarry Association	303.13	Hazards and Risks / Natural Hazards / General NH	Not specified	Considers that it is important that the PDP does not shut off access to potential aggregate sources to provide for Wellington's current and future construction needs. As aggregate is expensive to transport, sources of this need to be close to the place of construction.	Seeks that the Proposed District Plan provisions do not rule out quarries along the faultline.
Wellington City Council Environmental Reference Group	FS112.33	Part 2 / Hazards and Risks / Natural Hazards / General NH	Oppose	A number of submission points made by the Aggregate & Quarry Association (please see multiple points in their submission relating to the same theme) argue that "it is important that the PDP does not shut off access to potential aggregate sources to provide for Wellington's current and future construction needs. As aggregate is expensive to transport, sources of this need to be close to the place of construction." Elsewhere, they also say: "... the District Plan must not unreasonably curtail expansion of existing quarries and establishment of new quarries..." WCCERG disagree, on the basis of primary and secondary greenhouse gas emissions from quarrying, which are no longer tenable; and the opportunity to re-use existing materials (instead of sending them to landfill, as is currently the case).	Disallow / Seeks that instead of allowing new mining or quarrying activities and changes of use, WCC requires no expansion of any kind of mining or quarrying activities, and a second policy stating that these activities be phased out by (for example), 2030.
David Karl	309.5	Hazards and Risks / Natural Hazards / General NH	Amend	Considers that whanau's homes should not be unnecessarily impacted by inaccurate modelling. Further development should also not occur in areas that it should not. There is emotional pain and significant costs linked to Council holding information that is not publicly available and then requiring costly changes to building plans before providing approval.	Seeks that objectives, policies and rules relevant to Hazard zoning be drafted to ensure that the relevant zones (as shown on a map) can most easily be updated to reflect new information.
Mt Cook Mobilised	331.8	Hazards and Risks / Natural Hazards / General NH	Amend	The Natural Hazards chapter is missing emergency management requirements in the event of major earthquakes or disasters. The population will have a need for water and sewage disposal following a major earthquake, the Proposed District Plan should address this. Mount Cook is especially vulnerable in times of earthquake, as it has several major education facilities that could be cut-off from whānau. Residents that travel between the CBD and Mt Cook may also be cut-off from their home by impassable roads. Finally, the PDP should include provisions to ensure the population's safety in times of natural disaster, as this will focus the attention of Body Corporates on planning for emergency situations.	Seeks that the Natural Hazards chapter include provisions relating to emergency management in times of a major earthquake or natural disaster.
Mt Cook Mobilised	331.9	Hazards and Risks / Natural Hazards / General NH	Amend	Considers that Wellington City's water storage should be focused around the city to relieve pressure on emergency water supplies. Wellington's water supply could be disrupted for up to 100 days in the aftermath of an earthquake, as the pipes could all break. With up to 400,000 people relying on the network, the city should be making it easy, and in some cases compulsory, for householders to install potable water tanks that will make them self-sufficient for longer. 200 litre tanks are already available, subsidised by Wellington City Council. Kāinga Ora and WREMO both advise that individuals and households be responsible for their own water storage. However, some may not be able to comply and planning rules need to do more to make it easier to store more water privately and in public places.	Seeks that water storage capacity be increased in the City in preparation for a major earthquake.
Property Council New Zealand	338.6	Hazards and Risks / Natural Hazards / General NH	Amend	Considers that the natural hazard overlays (i.e. flooding, fault rupture, tsunami and coastal) should be included in the Council's LIM reports. Supporting and assessing risks in a way that is more proactive will result in restrictions on building in high-risk areas, with work arounds for the lower-risk areas (taking into account the sensitivity of the proposed activity).	Seeks that natural hazards overlays be included in LIM reports.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Kimberley Vermaey	348.3	Hazards and Risks / Natural Hazards / General NH	Amend	Considers that areas in the Fault Hazard Overlay are not well defined or understood. The objective, policy and rule frameworks for the fault hazards overlay need to be updated to reflect this differing understanding of the fault hazard overlays. In areas where there is a good understanding of the fault hazard location, there should be more restrictive objectives, policies and rules (similar to what is proposed in the draft plan). where there is a poorer understanding of the fault location, then less restrictive objectives, policies and rules should apply (for example a policy framework that requires the identification of the position of the fault and a corresponding permitted, controlled, or restricted discretionary activity status.	Seeks that where there is poorer understanding of the fault location then less restrictive objectives, policies and rules should apply. The new policy framework would require the identification of the position of the fault and a corresponding permitted, controlled, or restricted discretionary activity status. These provisions need to be drafted and included in the District Plan.
Kimberley Vermaey	348.4	Hazards and Risks / Natural Hazards / General NH	Amend	Considers that rules relating to additions in the Coastal Hazards Overlay do not address alterations to existing buildings. There is the potential for alterations to increase the risk from the conversion of non-habitable buildings. There needs to be consideration as to whether it is appropriate for conversions to existing buildings to be covered. This is to ensure the rule frameworks are consistent with the additions framework.	Seeks that rules relating to additions in the Coastal Inundation Overlay address alterations to existing buildings.
Kimberley Vermaey	348.5	Hazards and Risks / Natural Hazards / General NH	Amend	Considers that rules relating to additions in the Natural Hazards Overlay do not address alterations to existing buildings. There is the potential for alterations to increase the risk from the conversion of non-habitable buildings. There needs to be consideration as to whether it is appropriate for conversions to existing buildings to be covered. This is to ensure the rule frameworks are consistent with the additions framework.	Seeks that provisions relating to additions in the Natural Hazard Overlays address alterations to existing buildings.
Kimberley Vermaey	348.6	Hazards and Risks / Natural Hazards / General NH	Amend	Considers that the current coastal hazard framework does not have any consideration of the inundation depths. As a result, areas with 2m of inundation depth would be treated the same as areas with 0.1m of inundation depth. There may be a need to refine the policy and rule frameworks to recognise different inundation depths and this may have some implications of the hazard classification frameworks. (Option A)	Seeks that classification of inundation depths be reassessed for the Coastal Inundation Overlay.
Kimberley Vermaey	348.7	Hazards and Risks / Natural Hazards / General NH	Amend	Considers that the current coastal hazard framework does not have any consideration of the inundation depths. Alternatively, the hazard map overlays may be adjusted to remove inundation depths below a certain level as they will not reach a level that constitutes a hazard that warrants land use planning. Expert advice on this may be required as to what is the most appropriate depth, but it may be 0.15m and less. (Option B)	Seeks that the Coastal Inundation Overlay be adjusted to remove inundation depths below a certain low-hazard level.
Restaurant Brands Limited	349.31	Hazards and Risks / Natural Hazards / General NH	Support	Support	Retain NH – Ngā Mōrearea ā-Taiao - Natural Hazards as notified.
Greater Wellington Regional Council	351.118	Hazards and Risks / Natural Hazards / General NH	Amend	Considers that intensification in any flood hazard zone is not in line with regional, national or international direction on hazards or climate change, and would impact Greater Wellington's ability to discharge its flood risk management functions. Increasing densities within Wellington City area may result in an increase in the vulnerability of people and property to flood hazards, and there will also be a need to introduce more sophisticated flood forecasting and warning systems to the region.	Seeks that WCC continues to work with Greater Wellington to discuss the City's flood hazards in relation to the proposed intensification.
Toka Tū Ake EQC	FS70.20	Part 2 / Hazards and Risks / Natural Hazards / General NH	Support	Toka Tū Ake EQC support natural hazard provisions based on current and accurate research. Continued collaboration between agencies is important to keep hazard information up to date and consistent across the region.	Allow
Jane Szentivanyi and Ben Briggs	369.12	Hazards and Risks / Natural Hazards / General NH	Not specified	Considers that natural hazard such as flooding and slips are an important qualifying factor in determining future development.	Not specified.
BP Oil New Zealand, Mobil Oil New Zealand Limited and Z Energy Limited (the Fuel Companies)	372.88	Hazards and Risks / Natural Hazards / General NH	Support in part	The Natural Hazard chapter is supported for its intent, as it seeks to protect people, property and infrastructure from natural hazards. The chapter's 'risk-based approach' is also supported as it seeks to manage effects from natural hazards by classifying activities and providing separate provisions for these activities depending on their level of hazard sensitivity.	Retain the Natural Hazard chapter, with amendments.
WCC Environmental Reference Group	377.55	Hazards and Risks / Natural Hazards / General NH	Support	The Natural Hazards chapter' Introduction is supported, including the risk framework, the use of both buildings and activities, and the three focus areas of people, property and infrastructure.	Retain the Natural Hazards chapter's Introduction as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Argosy Property No. 1 Limited	383.19	Hazards and Risks / Natural Hazards / General NH	Support in part	Supports the Introduction to the extent that it takes an adaptation approach to natural hazards. Retreat from the Wellington CBD is unlikely to occur, and therefore it would be more appropriate for the Proposed Plan to anticipate a protection or adaptation approach to climate change hazards. Argosy opposes hazard rankings being attributed to the various natural hazards. For example, the Liquefaction Hazard Overlay being identified as a 'high' risk. This is because the natural hazards overlays apply to all levels of risk either in the same way, or specific to the type of risk. It does not have a practical implication to attribute hazard rankings to the natural hazards and is inappropriate. Notes that the hazard overlays are wide ranging in terms of risk and feasible approaches to mitigate that risk. By including all the hazard overlays together the Proposed Plan applies the same risk and mitigation approach to all hazard overlays. This is inappropriate for some overlays, such as liquefaction and tsunami (discussed below), where the risk cannot be mitigated and the probability of an event is low	Delete "Natural Hazard Overlay" table in Introduction.
Toka Tū Ake EQC	FS70.1	Part 2 / Hazards and Risks / Natural Hazards / General NH	Oppose	High, medium and low risk ranking is important in assessing the level of activity appropriate in areas at risk from natural hazards.	Disallow
Taranaki Whānui ki te Upoko o te Ika	389.63	Hazards and Risks / Natural Hazards / General NH	Amend	Considers further engagement with Council is appropriate to ensure existing consents can be implemented without future impediment and to ensure the District Plan reflects the aspirations of Taranaki Whānui. Natural Hazard overlays are identified over Te Motu Kairangi / Miramar Peninsula, Mount Crawford, and Shelly Bay Taikuru.	Seeks that amendments that are most appropriate to address concerns around ensuring that Taranaki Whānui can implement existing consents around Te Motu Kairangi / Miramar Peninsula, Mount Crawford, and Shelly Bay Taikuru without future impediment.
Buy Back the Bay	FS79.5	Part 2 / Hazards and Risks / Natural Hazards / General NH	Oppose	Submission 389 states as a Submission Point, that "Taranaki Whānui opposes the zoning and extent of overlays proposed over Te Motu Kairangi / Miramar Peninsula, Mount Crawford." It lists the relevant PDP Chapter as: <ul style="list-style-type: none">• Planning maps• He Rohe Ahoaho Māori Natural Open Space Zone chapter• Ngā Wāhi Tapu ki te Māori Sites and Areas of Significance to Māori chapter• Ngā Pūnaha Rauropi me te Kanorau Koiora Taketake Ecosystems and Indigenous Biodiversity chapter• Te Ahurei o Ngā Hanga Māori Natural Character chapter• Ngā Hanga Māori me Ngā Nohopae Natural Features and Landscapes chapter• Wawaetanga Subdivision chapter• Taiao Takutai Coastal Environment chapter Opposes in total Submission 389 on these points, which appears to be a wholesale rejection of planning rules in these areas.	Disallow

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Buy Back the Bay	FS79.22	Part 2 / Hazards and Risks / Natural Hazards / General NH	Oppose	<p>Submission 389 states: "Taranaki Whānui's RFR [Right of First Refusal] opportunities in Te Motu Kairangi: Taranaki Whānui have a significant interest in Te Motu Kairangi which includes Mount Crawford and Watts Peninsula, these landholdings hold significant interest - culturally, socially, environmentally and commercially to Taranaki Whānui. These opportunities include the Mount Crawford Prison site as well as the 'Watts Peninsula' sites being 75.85 hectares of former Defence Land."</p> <p>Buy Back the Bays notes that the Submission does not include maps however they (Buy Back the Bays) are very concerned to see that Taranaki Whānui appears to be seeking possible commercial development of 75.85 hectares of former defence land on Watts Peninsula. This appears to be the heart of the long-promised Watts Peninsula park and a major part of the proposed national heritage park.</p> <p>Buy Back the Bays strongly oppose rezoning on Watts Peninsula to facilitate any development there that is incompatible with the park plans. More generally, Buy Back the Bays oppose Submission 389's attempt to remove the proposed public interest controls from Watts Peninsula and Mount Crawford. Considers that where Submission 389 states "Illustrated on Figure One below, the following zone and overlays are proposed for Taranaki Whānui's RFR properties in Te Motu Kairangi," Buy Back the Bays oppose the changes it seeks. This includes opposing Submission 389's request for "The proposed zoning over Part Lot 1 DP 4741, Section 4 SO 477035, PT LOT 1 DP 4741 - WELLINGTON PRISON, Section 1 SO 477035, Part Section 20 Watts Peninsula DIST [to be] amended from Natural Open Space Zone to: a. Medium Density Residential; and b. Special Purpose Zone – Māori Purpose Zone."</p>	Disallow
Buy Back the Bay	FS79.41	Part 2 / Hazards and Risks / Natural Hazards / General NH	Oppose	<p>Refers to submission 389 states: Taranaki Whānui opposes the extent of the proposed zoning of Shelly Bay Taikuru and the proposed height control limits." Buy Back the Bays opposes the submission on both points.</p> <p>Specifically, the Submission 389 for Taranaki Whānui seeks that:</p> <p>"1. The Mixed Use Zone is extended across the allotments illustrated in Figure Two below or amended to follow the extent of consented development area outlined in the approved masterplan and engineering drawings.</p> <p>2. The Height Control Area is amended to 27m being the maximum height of development consented under the Shelly Bay Masterplan resource consent."</p> <p>Buy Back the Bays opposes both parts. Buy Back the Bays note that neither part affects Taranaki Whānui's commercial or other interests. Considers that both parts only affect the tall apartment buildings planned by and for the exclusive commercial benefit of The Wellington Company, not the leasing of lower existing buildings that The Wellington Company has offered to Taranaki Whānui as its stake in the project.</p>	Disallow
Kāinga Ora Homes and Communities	391.154	Hazards and Risks / Natural Hazards / General NH	Support in part	The inclusion of rules in relation to flood hazards is partially supported, as well as the risk-based approach to the management of natural hazards. However, an amendment is sought.	Retain the Natural Hazards chapter with amendment.
Kāinga Ora Homes and Communities	391.155	Hazards and Risks / Natural Hazards / General NH	Amend	Considers that rules related to flood hazards should not be linked to static maps.	Amend the Natural Hazards chapter so that rules do not refer to static maps.
Toka Tū Ake EQC	FS70.51	Part 2 / Hazards and Risks / Natural Hazards / General NH	Oppose	Accurate and risk-based regulatory hazard maps are an important tool in the WCC Proposed District Plan to limit subdivision and development within areas subject to natural hazard risk. Removing part or all of these regulatory maps opens the possibility that rules controlling development in flood-prone areas will be inconsistently applied, exposing people and their properties to unnecessary flood risk.	Disallow

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Greater Wellington Regional Council	FS84.57	Part 2 / Hazards and Risks / Natural Hazards / General NH	Oppose	Greater Wellington disagree with the submitter that the flood hazard maps should be removed from the Proposed District Plan and instead be held in a nonstatutory GIS.	Disallow / Seeks that all flood hazard maps are included in the Proposed District Plan
Kāinga Ora Homes and Communities	391.156	Hazards and Risks / Natural Hazards / General NH	Oppose in part	<p>The inclusion of flood hazard mapping as part of the District Plan is opposed, despite the risk-based approach to the management of natural hazards being generally supported. Including Flood Hazard overlays in the District Plan ignores the dynamic nature of flood hazards and will create unnecessary additional cost and uncertainty for landowners and land developers. It is considered appropriate to include rules in relation to flood hazards but sought that the rules are not linked to static maps.</p> <p>The Auckland Unitary Plan (“AUP”) adopts a set of non-statutory flood hazard overlay maps which operate as interactive maps on the Council’s ‘Geo Maps’ website – a separate mapping viewer to the statutory maps. The advantage of this approach is the ability to operate a separate set of interactive maps which are continually subject to improvement and updates, outside of and without a reliance on the Schedule 1 process under the RMA.</p> <p>It is noted that there is no formal requirement for flooding overlay maps to be included within a district plan. It is also noted that the National Planning Standards 2016 – Mapping Standard Table 20 includes a number of specific overlay and other symbols, but none relate to flooding. The removal of the mapped flooding Natural Hazard Overlays from within the District Plan is sought. This should instead be included as a non-statutory, information only mapping layer that sits outside the Proposed District Plan and refer to “Natural Hazard Overlays” as “Natural Hazard Areas”.</p> <p>The mapping of other, non-flooding natural hazards to be incorporated into the District Plan maps, such as Liquefaction and Fault Hazards (in addition to Coastal Hazards) are otherwise supported, as these hazards are less subject to change.</p>	Seeks that natural hazard flooding overlays from the District Plan are deleted and that the information be held in non-statutory GIS maps instead.
Thorndon Residents' Association Inc	FS69.6	Part 2 / Hazards and Risks / Natural Hazards / General NH	Oppose	<p>Thorndon is susceptible to flooding. This must be an urban planning consideration.</p> <p>Recent weather events have caused underground streams to daylight themselves in areas predicted by the planning map. Climate change is anticipated to increase the frequency and impact of deluges on Thorndon’s catchments (Te Ahumairangi Hill and the Pipitea Stream).</p> <p>This is critical information for planning scenarios. It must have impactful (and legal) significance.</p> <p>There is a vulnerability to flooding in Thorndon and this information must be formally woven into the DP to regulate urban development. This must also be assessed alongside, and with equivalent status, to other natural hazard vulnerabilities in Thorndon e.g. seismic, slope erosion, underground geology, etc.</p> <p>[Refer to Further submission for included map].</p>	Disallow
Toka Tū Ake EQC	FS70.52	Part 2 / Hazards and Risks / Natural Hazards / General NH	Oppose	Accurate and risk-based regulatory hazard maps are an important tool in the WCC Proposed District Plan to limit subdivision and development within areas subject to natural hazard risk. Removing part or all of these regulatory maps opens the possibility that rules controlling development in flood-prone areas will be inconsistently applied, exposing people and their properties to unnecessary flood risk.	Disallow
Onslow Residents Community Association	FS80.32	Part 2 / Hazards and Risks / Natural Hazards / General NH	Oppose	Considers that mapping flood hazards remains an important priority for residents.	Disallow
Greater Wellington Regional Council	FS84.58	Part 2 / Hazards and Risks / Natural Hazards / General NH	Oppose	Greater Wellington disagree with the submitter that the flood hazard maps should be removed from the Proposed District Plan and instead be held in a nonstatutory GIS.	Disallow / Seeks that all flood hazard maps are included in the Proposed District Plan

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Kāinga Ora Homes and Communities	391.157	Hazards and Risks / Natural Hazards / General NH	Oppose in part	The term "Natural Hazard Overlays" is opposed and should be removed and replaced by a newly defined term "Natural Hazard Areas". Natural Hazard Overlays should instead be included as non-statutory, information-only mapping layer that sits outside the Proposed District Plan.	Delete all references to "Natural Hazard Overlays" and refer to the newly defined term of Natural Hazard Areas instead.
Thorndon Residents' Association Inc	FS69.7	Part 2 / Hazards and Risks / Natural Hazards / General NH	Oppose	<p>Thorndon is susceptible to flooding. This must be an urban planning consideration.</p> <p>Recent weather events have caused underground streams to daylight themselves in areas predicted by the planning map. Climate change is anticipated to increase the frequency and impact of deluges on Thorndon's catchments (Te Ahumairangi Hill and the Pipitea Stream).</p> <p>This is critical information for planning scenarios. It must have impactful (and legal) significance.</p> <p>There is a vulnerability to flooding in Thorndon and this information must be formally woven into the DP to regulate urban development. This must also be assessed alongside, and with equivalent status, to other natural hazard vulnerabilities in Thorndon e.g. seismic, slope erosion, underground geology, etc.</p> <p>[Refer to Further submission for included map].</p>	Disallow
Toka Tū Ake EQC	FS70.53	Part 2 / Hazards and Risks / Natural Hazards / General NH	Oppose	MfE discussion paper on National Planning Standards: Zones and Overlays supports the use of the term 'overlay' to mean mapped areas which "introduce more restrictive built form controls than apply to the underlying zone". As this is the purpose of the WCC proposed plan's Natural Hazard Overlays, the term should be retained. Regulatory natural hazard overlays, including for flood, are an important tool to limit subdivision and development within areas subject to natural hazard risk.	Disallow
Elliott Thornton	399.1	Hazards and Risks / Natural Hazards / General NH	Amend	Considers that while the PDP regulates the location and sitting of buildings to be sufficiently flood-free, it does not address people trying to traverse flood waters, which is one of the primary causes of death or injury from flooding.	Seeks that the permitted depth for access is set at 0.3m, consistent with the Greater Wellington Regional Council's Flood Hazard Modelling Standard, and where not meeting that standard, a risk management approach which could consider matters such as the duration of the flood hazard, velocity, the ability for emergency vehicle access, or ability to provide alternative access during a major flood event.
CentrePort Limited	402.91	Hazards and Risks / Natural Hazards / General NH	Oppose	Considers that there is a structural difficulty with Natural Hazards being included in the Infrastructure section when there is a separate and standalone chapter that specifically references Natural Hazards as well as coastal hazards included in the Coastal Environment. This creates uncertainty. For an infrastructure provider and for ease of plan usage these provisions should be in the Natural Hazards Chapter.	Seeks that Infrastructure Natural Hazards provisions are located within the Natural Hazards Chapter.
CentrePort Limited	402.92	Hazards and Risks / Natural Hazards / General NH	Amend	Considers that there is a structural difficulty with Natural Hazards being included in the Infrastructure section when there is a separate and standalone chapter that specifically references Natural Hazards as well as coastal hazards included in the Coastal Environment. This creates uncertainty. For an infrastructure provider and for ease of plan usage these provisions should be in the Natural Hazards Chapter.	Seeks that Infrastructure Natural Hazards provisions are located within the Natural Hazards Chapter.
CentrePort Limited	402.93	Hazards and Risks / Natural Hazards / General NH	Amend	Supports policy INF-NH-P61 but considers that for ease of plan usage it should instead be included in the overarching Natural Hazard Overlays chapter.	Seeks that INF-NH-P61 (Infrastructure and structures in Natural Hazard and Coastal Hazard Overlays) is relocated to the Natural Hazards Chapter.
CentrePort Limited	402.94	Hazards and Risks / Natural Hazards / General NH	Oppose	Opposes structure of dealing with Natural Hazards. Considers that the structure of managing Natural Hazards is confusing. There are Natural Hazards provisions in the infrastructure chapter as well as Natural Hazards chapter, while coastal hazards are in the Coastal Environment Chapter. For CentrePort related matters you potentially have to look at all three. This is considered inefficient and could lead to duplication. Of the hazards listed CentrePort has fault hazard, liquefaction, coastal inundation and tsunami (high) risk.	Seeks that plan is amended so all Natural Hazards requirements are included in one chapter.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
CentrePort Limited	402.95	Hazards and Risks / Natural Hazards / General NH	Amend	Opposes structure of dealing with Natural Hazards. Considers that the structure of managing Natural Hazards is confusing. There are Natural Hazards provisions in the infrastructure chapter as well as Natural Hazards chapter, while coastal hazards are in the Coastal Environment Chapter. For CentrePort related matters you potentially have to look at all three. This is considered inefficient and could lead to duplication. Of the hazards listed CentrePort has fault hazard, liquefaction, coastal inundation and tsunami (high) risk.	Seeks that plan is amended so all Natural Hazards requirements are included in one chapter.
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	FS25.28	Part 2 / Hazards and Risks / Natural Hazards / General NH	Oppose	Retaining the infrastructure rules related to natural hazards in the INF-NH sub-chapter rather than the general NH Chapter is preferred to keep the INF provisions largely self-contained in one location.	Disallow
Powerco Limited	FS61.42	Part 2 / Hazards and Risks / Natural Hazards / General NH	Oppose	Retaining the infrastructure rules related to natural hazards in the INF-NH sub-chapter rather than the general NH Chapter is preferred to keep the INF provisions largely self-contained in one location.	Disallow
Oyster Management Limited	404.7	Hazards and Risks / Natural Hazards / General NH	Oppose in part	Opposes the Proposed Plan in part.	Seeks that the Proposed District Plan recognises the benefits of existing investment in the CBD in relation to natural hazards and coastal hazards.
Oyster Management Limited	404.8	Hazards and Risks / Natural Hazards / General NH	Oppose in part	Opposes the Proposed Plan in part.	Seeks that the Proposed District Plan applies appropriate provisions to reflect the probability and limitations in mitigating risks of liquefaction and tsunamis.
Oyster Management Limited	404.9	Hazards and Risks / Natural Hazards / General NH	Oppose in part	Opposes the Proposed Plan in part.	Seeks that the Proposed District Plan provides consistency in the approach to potentially hazard sensitive activities in the Natural Hazards and Coastal Hazards Overlays.
Oyster Management Limited	404.10	Hazards and Risks / Natural Hazards / General NH	Support in part	The submitter's properties at 6 Hurring Place and 12 Newlands Road are partly within the Flood Hazard Overlay – Inundation Area and 6 Hurring Place is partly within the Flood Hazard Overlay – Overland Flowpath.	Retain the Natural Hazards Introduction as notified to the extent that it takes an adaptation approach to natural hazards, with amendments. [Refer to original submission for maps of the submitter's properties under the Proposed District Plan].
Oyster Management Limited	404.11	Hazards and Risks / Natural Hazards / General NH	Oppose in part	The submitter's properties at 6 Hurring Place and 12 Newlands Road are partly within the Flood Hazard Overlay – Inundation Area and 6 Hurring Place is partly within the Flood Hazard Overlay – Overland Flowpath.	Not specified. [Refer to original submission for maps of the submitter's properties under the Proposed District Plan].
Oyster Management Limited	404.12	Hazards and Risks / Natural Hazards / General NH	Support	Supports the Introductory text to the extent that it takes an adaptation approach to natural hazards.	Retain NH (Natural Hazards) - Introduction as notified.
Wellington International Airport Ltd	406.208	Hazards and Risks / Natural Hazards / General NH	Support	Supports Natural Hazards chapter introduction. Supports the recognition of Wellington Airport within the introductory text.	Retain Natural Hazards chapter introduction as notified.
VicLabour	414.20	Hazards and Risks / Natural Hazards / General NH	Support in part	Supports restrictions on development in areas at risk of coastal inundation and tsunami with amendment as detailed in other submission point.	Retain coastal inundation and tsunami provisions with amendment.
VicLabour	414.21	Hazards and Risks / Natural Hazards / General NH	Not specified	Considers that the reality of sea level rise means Council must start considering a programme of managed retreat. Considers that Council must lay the groundwork now and begin the difficult conversations with communities about the longevity of their placement within areas susceptible to considerable risk from sea level rise	Seeks that the Council start considering a programme of managed retreat.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Fabric Property Limited	425.9	Hazards and Risks / Natural Hazards / General NH	Oppose in part	<p>It is important that the Proposed Plan accurately conveys the probabilities of different natural hazards, and does not unduly create an impression of greater risk than is the case.</p> <p>The introduction to the Natural Hazards chapter identifies the Liquefaction Hazard Overlay with a 'High' hazard ranking. However, the provisions associated with the Liquefaction Overlay suggest that these are areas of lower hazard risk. We also note the natural hazards overlays apply to all levels of risk either in the same way, or in relation to the specific type of risk. Accordingly, Fabric seeks amendments to the introduction to remove the Liquefaction Hazard Overlay from the 'High' hazard ranking, to better reflect the risks associated with liquefaction and to achieve better consistency with the associated provisions.</p>	Option 1: Seeks that the introduction to the Natural Hazards chapter is amended to delete the hazard rankings from the table.
Toka Tū Ake EQC	FS70.10	Part 2 / Hazards and Risks / Natural Hazards / General NH	Oppose	High, medium and low risk ranking is important in assessing the level of activity appropriate in areas at risk from natural hazards. Deleting the rankings will undermine the risk-based approach that has been taken.	Disallow
Fabric Property Limited	425.10	Hazards and Risks / Natural Hazards / General NH	Oppose in part	<p>It is important that the Proposed Plan accurately conveys the probabilities of different natural hazards, and does not unduly create an impression of greater risk than is the case.</p> <p>The introduction to the Natural Hazards chapter identifies the Liquefaction Hazard Overlay with a 'High' hazard ranking. However, the provisions associated with the Liquefaction Overlay suggest that these are areas of lower hazard risk. We also note the natural hazards overlays apply to all levels of risk either in the same way, or in relation to the specific type of risk. Accordingly, Fabric seeks amendments to the introduction to remove the Liquefaction Hazard Overlay from the 'High' hazard ranking, to better reflect the risks associated with liquefaction and to achieve better consistency with the associated provisions.</p>	<p>Option 2: If the hazards ranking table is not deleted from the Natural Hazards chapter introduction:</p> <p>Amend the Natural Hazards chapter introduction to remove the 'High' hazard ranking for the Liquefaction Hazard Overlay.</p>
Toka Tū Ake EQC	FS70.11	Part 2 / Hazards and Risks / Natural Hazards / General NH	Oppose	Liquefaction is a hazard associated with earthquakes. Much of central Wellington is built on ground likely to liquefy in an earthquake, and the risk of earthquakes in Wellington is high. Liquefaction is a real risk that has already been experienced in Wellington (e.g. during the 2016 Kaikoura earthquake), and ignoring the liquefaction risk in Christchurch resulted in catastrophic damage and retirement of land. MBIE guidelines for development in areas at risk from liquefaction ³ recommend both land use planning to avoid more vulnerable activities in high risk areas and requiring liquefaction resistant foundations for those buildings which are appropriate to develop in medium and high risk areas.	Disallow
Argosy Property No. 1 Limited	383.20	Hazards and Risks / Natural Hazards / New NH	Amend	Considers here should be an additional objective in the Natural Hazards overlays which provides for a range of activities that maintain the vibrancy and vitality of the City Centre zone, while also ensuring that subdivision, development and use in these areas do not increase the risk to people, property, and infrastructure. This would be consistent with Objective CE-O8 in relation to coastal hazards. It is appropriate for a similar approach to be taken to coastal hazards and natural hazards to recognise that here is significant existing investment in the CBD and there are social and economic benefits to enabling development that does not increase risks arising from natural hazards.	<p>Add new objective NH-OX to the Natural Hazards chapter as follows:</p> <p><u>Provide for a range of activities that maintain the vibrancy and vitality of the City Centre Zone, while also ensuring that subdivision, development and use in these areas do not increase the risk to people, property, and infrastructure</u></p>
Argosy Property No. 1 Limited	383.21	Hazards and Risks / Natural Hazards / New NH	Amend	Considers there should be an additional policy which recognises that development in the natural hazard overlays in the City Centre zone is appropriate in some instances. This would be consistent with Policies CE-921 and CE-P22. As noted above, it is appropriate for a similar approach to be taken to coastal hazards and natural hazards.	<p>Add new policy NH-PX to the Natural Hazards chapter as follows:</p> <p><u>Enable subdivision, development and use associated within the City Centre Zone and within all of the Natural Hazard Overlays, where they do not involve the construction of new buildings which will be occupied by members of the public or the creation of vacant allotments</u></p>
Toka Tū Ake EQC	FS70.2	Part 2 / Hazards and Risks / Natural Hazards / New NH	Oppose	Some areas within natural hazard overlays are not appropriate for development and the NH provisions in the plan are reflective of this.	Disallow

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Argosy Property No. 1 Limited	383.22	Hazards and Risks / Natural Hazards / New NH	Amend	Considers there should be an additional policy which recognises that development in the natural hazard overlays in the City Centre zone is appropriate in some instances. This would be consistent with Policies CE-921 and CE-P22. As noted above, it is appropriate for a similar approach to be taken to coastal hazards and natural hazards.	Add new policy NH-PX to the Natural Hazards chapter as follows: <u>Manage subdivision, development and use within the City Centre Zone and within all of the Natural Hazard Overlays, where they involve the construction of new buildings which will be occupied by members of the public or result in the creation of a vacant allotment by ensuring that the activity, building or subdivision incorporates measures that reduce or not increase the risk to people, and property.</u>
Fabric Property Limited	425.11	Hazards and Risks / Natural Hazards / New NH	Amend	Considers that there should be an additional objective in the Natural Hazards overlays which provides for a range of activities that maintain the vibrancy and vitality of the City Centre zone, while also ensuring that subdivision, development and use in these areas do not increase the risk to people, property, and infrastructure. This would be consistent with Objective CE-O8 in relation to coastal hazards. It is appropriate for a similar approach to be taken to coastal hazards and natural hazards to recognise that there is significant existing investment in the CBD and there are social and economic benefits to enabling development that does not increase risks arising from natural hazards.	Add new Objective as follows: <u>NH-O5 (City Centre Zone):</u> <u>Provide for a range of activities that maintain the vibrancy and vitality of the City Centre Zone, while also ensuring that subdivision, development and use in these areas do not increase the risk to people, property, and infrastructure.</u>
Greater Wellington Regional Council	351.119	Hazards and Risks / Natural Hazards / NH-O1	Amend	Considers it appropriate to amend to have regard to the Proposed RPS Change 1 Objectives 19 and 20 and Policies 51 and 52. Minimise is defined as “as low as reasonably practicable (ALARP)” and is in line with standard risk-based hazard management approaches. This leaves room for reduction as far as practicable but is a clearer signal than ‘reduce or do not increase’, to actively look to bring down the risk in the design and planning of the development.	Amend NH-O1 (Risk from natural hazards) as follows: Subdivision, use and development within the Natural Hazard Overlays <u>minimises</u> reduce or do not increase the risk from natural hazards to people, property and infrastructure.
Toka Tū Ake EQC	FS70.21	Part 2 / Hazards and Risks / Natural Hazards / NH-O1	Support	Toka Tū Ake EQC consider it appropriate for terminology consistent with GRWC proposed RPS Change 1, based on standard risk based hazard management approaches, to be used throughout the WCC proposed district plan. We agree that ‘minimise’ natural hazard risk is a clearer instruction to bring risk in development to levels as low as reasonably practical than ‘reduce’ and ‘reduce or do not increase’.	Allow
Stride Investment Management Limited	FS107.10	Part 2 / Hazards and Risks / Natural Hazards / NH-O1	Oppose	Stride is opposed to amending the wording of the natural hazard policies from “reduce or avoid an increase in risk” to “minimise risk” which would impose an unreasonable and greater burden than the current wording of the Proposed Plan.	Disallow
Investore Property Limited	FS108.10	Part 2 / Hazards and Risks / Natural Hazards / NH-O1	Oppose	Investore is opposed to amending the wording of the natural hazard policies from “reduce or avoid an increase in risk” to “minimise risk” which would impose an unreasonable and greater burden than the current wording of the Proposed Plan.	Disallow
Argosy Property No. 1 Limited	383.23	Hazards and Risks / Natural Hazards / NH-O1	Support	Supports the objective as it enables use and development within the Natural Hazard Overlays that do not increase the risk from natural hazards to people, property and infrastructure	Retain NH-O1 (Risk from natural hazards) as notified.
Ministry of Education	400.44	Hazards and Risks / Natural Hazards / NH-O1	Support	Supports NH-O1 to reduce risk to people, property, and infrastructure. The submitter acknowledges there are existing Educational Facilities within the Coastal Hazard Area and that any development of these would be subject to these provisions (if not designated).	Retain NH-O1 (Risk from natural hazards) as proposed.
Waka Kotahi NZ Transport Agency	FS103.50	Part 2 / Hazards and Risks / Natural Hazards / NH-O1	Support	Waka Kotahi supports providing for subdivision and development where this does not increase risk to people property and infrastructure.	Allow
CentrePort Limited	402.96	Hazards and Risks / Natural Hazards / NH-O1	Support	Support the intent of this Objective.	Retain NH-O1 (Risk from natural hazards) as notified.
Oyster Management Limited	404.13	Hazards and Risks / Natural Hazards / NH-O1	Support	Supports NH-O1 to the extent that it enables use and development within the natural hazard overlays that do not increase the risk from natural hazards to people, property, and infrastructure.	Retain NH-O1 (Risks from natural hazards) as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Wellington International Airport Ltd	406.209	Hazards and Risks / Natural Hazards / NH-O1	Oppose	Opposes NH-O1. Furthermore, and as set out in Objective SRCC-O2, the risks from natural hazards should be avoided where they are intolerable. This concept should be brought into this policy and acknowledges that people, activities, property and infrastructure have varying levels of coastal hazard tolerance. [See paragraph 4.85 to 4.92 in original submission for full reason]	Opposes NH-O1 (Risk from natural hazards) and seeks amendment.
Wellington International Airport Ltd	406.210	Hazards and Risks / Natural Hazards / NH-O1	Amend	Opposes NH-O1. Furthermore, and as set out in Objective SRCC-O2, the risks from natural hazards should be avoided where they are intolerable. This concept should be brought into this policy and acknowledges that people, activities, property and infrastructure have varying levels of coastal hazard tolerance. [See paragraph 4.85 to 4.92 in original submission for full reason]	Submitter seeks either deletion of NH-O1 (Risk from natural hazards) or an amendment to NH-O1 (Risk from natural hazards) as follows: Subdivision, use and development in the Natural Hazard Overlays <u>do not create an intolerable level of risk</u> or <u>does not increase the risk</u> to people, property, and infrastructure.
Toka Tū Ake EQC	FS70.91	Part 2 / Hazards and Risks / Natural Hazards / NH-O1	Oppose	Toka Tū Ake supports the suggestion that the concept of risk tolerance be included in natural hazard provisions. However, natural hazard risk tolerance is a concept which varies widely between people and communities, and it is impractical to include it in this instance as a comprehensive definition of 'tolerable' risk has not been developed, nor has one been offered. Deletion of this provision is not an appropriate alternative to including risk tolerance, as it is important to limit development in areas at risk from natural hazards.	Disallow
KiwiRail Holdings Limited	408.93	Hazards and Risks / Natural Hazards / NH-O1	Support	Supports the objective to provide for operational port activities, passenger port facilities and rail activities while ensuring these activities do not increase the risk to people, property and infrastructure.	Retain NH-O1 (Risk from natural hazards) as notified.
Greater Wellington Regional Council	351.120	Hazards and Risks / Natural Hazards / NH-O2	Amend	Supports the inclusion of "catchment management" in the objective as notified.	Retain NH-O2 (Planned natural hazard mitigation works), subject to amendments.
Greater Wellington Regional Council	351.121	Hazards and Risks / Natural Hazards / NH-O2	Amend	Considers it appropriate to amend to have regard to the Proposed RPS Change 1 Objectives 19 and 20 and Policies 51 and 52. Minimise is defined as "as low as reasonably practicable (ALARP)" and is in line with standard risk-based hazard management approaches. This leaves room for reduction as far as practicable but is a clearer signal than 'reduced', to actively look to bring down the risk in the design and planning of the development.	Amend NH-O2 (Planned natural hazard mitigation works) as follows: There is reduced risk The risk to people, property and infrastructure from flood hazards through planned mitigation works and catchment management is <u>minimised</u> .
Toka Tū Ake EQC	FS70.22	Part 2 / Hazards and Risks / Natural Hazards / NH-O2	Support	Toka Tū Ake EQC consider it appropriate for terminology consistent with GRWC proposed RPS Change 1, based on standard risk based hazard management approaches, to be used throughout the WCC proposed district plan. We agree that 'minimise' natural hazard risk is a clearer instruction to bring risk in development to levels as low as reasonably practical than 'reduce' and 'reduce or do not increase'.	Allow
CentrePort Limited	402.97	Hazards and Risks / Natural Hazards / NH-O2	Support	Support the intent of this Objective.	Retain NH-O2 (Planned natural hazard mitigation works) as notified.
Fire and Emergency New Zealand	273.60	Hazards and Risks / Natural Hazards / NH-O3	Support	Supports the policy as it seeks to protect natural features that reduce the susceptibility of people, communities, property and infrastructure from damage by natural hazards. Such natural features could include fire breaks which can comprise a natural physical barrier against the spread of fire from or into any area of continuous flammable material.	Retain NH-O3 (Natural systems and features) as notified.
Greater Wellington Regional Council	351.122	Hazards and Risks / Natural Hazards / NH-O3	Support	Considers the wording of this objective is generally consistent with the expectations of Greater Wellington in respect of natural features and RPS direction.	Retain NH-O3 (Natural systems and features) as notified.
CentrePort Limited	402.98	Hazards and Risks / Natural Hazards / NH-O3	Support	Support the intent of this Objective.	Retain NH-O3 (Natural systems and features) as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Greater Wellington Regional Council	351.123	Hazards and Risks / Natural Hazards / NH-O4	Support	Considers this approach is appropriate	Retain NH-O4 (Operational port activities, passenger port facilities and rail activities) as notified.
CentrePort Limited	402.99	Hazards and Risks / Natural Hazards / NH-O4	Support	Support specific objective for Port Activities.	Retain NH-O4 (Operational port activities, passenger port facilities and rail activities) as notified.
Wellington International Airport Ltd	406.211	Hazards and Risks / Natural Hazards / NH-O4	Oppose in part	Opposes NH-O4. The activities listed have operational and functional constraints which ultimately govern the location of these activities, including within areas exposed to natural hazard risk. This objective needs to appropriately recognise this, and consistent with the directive contained within SRCC-O2, avoid areas where the risks are intolerable, taking into consideration operational and functional constraints associated with identified activities.	Opposes NH-O4 (Operational port activities, passenger port facilities and rail activities) and seeks amendment.
Wellington International Airport Ltd	406.212	Hazards and Risks / Natural Hazards / NH-O4	Amend	Opposes NH-O4. The activities listed have operational and functional constraints which ultimately govern the location of these activities, including within areas exposed to natural hazard risk. This objective needs to appropriately recognise this, and consistent with the directive contained within SRCC-O2, avoid areas where the risks are intolerable, taking into consideration operational and functional constraints associated with identified activities.	Submitter seeks either deletion of NH-O4 (Operational port activities, passenger port facilities and rail activities) or an amendment to NH-O4 (Operational port activities, passenger port facilities and rail activities) as follows: NH-O4 Airport , Operational port activities, passenger port facilities and rail activities Airport , Operational port activities, passenger port facilities and rail activities are provided for, while also ensuring that subdivision, development and use of land occupied by operational port activities, passenger port facilities and rail activities do not <u>create an intolerable level of increase the risk to people, property, and infrastructure.</u>
Greater Wellington Regional Council	351.124	Hazards and Risks / Natural Hazards / NH-P1	Support	Supports a risk-based approach to manage subdivision use and development within the identified areas, specifically sensitivity to impacts and the hazard posed to lives and wellbeing. This aligns with RPS direction on natural hazards. Considers that Changes requested to the policies may necessitate amendments to the rules to have regard to the natural hazard direction in Proposed RPS Change 1.	Retain NH-P1 (Identification of natural hazards) as notified.
Waka Kotahi NZ Transport Agency	FS103.51	Part 2 / Hazards and Risks / Natural Hazards / NH-P1	Support	Waka Kotahi supports a risk-based approach in providing for subdivision and development based on the likelihood and consequence to people property and infrastructure.	Allow
Argosy Property No. 1 Limited	383.24	Hazards and Risks / Natural Hazards / NH-P1	Support	Supports the policy in that the risk-based approach needs to consider the impact, likelihood and consequences of different natural hazard events.	Retain NH-P1 (Identification of natural hazards) as notified.
Ministry of Education	400.45	Hazards and Risks / Natural Hazards / NH-P1	Support in part	Support NH-P1 in part.	Retain NH-P1 (Identification of natural hazards) with amendment.
Ministry of Education	400.46	Hazards and Risks / Natural Hazards / NH-P1	Amend	Seeks that NH-P1 be amended. The submitter acknowledges the risk that natural hazards pose to hazard sensitive activities. However the submitter seeks that this policy be amended so that an operational need for the Ministry to locate educational facilities in natural hazard areas to serve existing communities can be considered when managing development in natural hazard areas.	Amend NH-P1 (Identification of natural hazards) as follows: Identify natural hazards within the District Plan and take a risk-based approach to the management of subdivision, use and development based on: 1. The sensitivity of the activities to the impacts of natural hazards; and 2. The hazard posed to people's lives and wellbeing, property and infrastructure, by considering the likelihood and consequences of natural hazard events; and 3. <u>The operational need for some activities to locate in natural hazard areas.</u>
Wellington International Airport Limited	FS36.78	Part 2 / Hazards and Risks / Natural Hazards / NH-P1	Support	WIAL supports the intent of this relief to the extent that it is consistent with the outcomes sought from its primary submission.	Allow / Seeks that part of submission to be allowed.
Oyster Management Limited	404.14	Hazards and Risks / Natural Hazards / NH-P1	Support	Supports NH-P1 to the extent that the risk-based approach needs to consider the impact, likelihood, or consequences of different natural hazard events.	Retain NH-P1 (Identification of natural hazards) as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Wellington International Airport Ltd	406.213	Hazards and Risks / Natural Hazards / NH-P1	Oppose	Opposes NH-P1. The concept of tolerability also needs to be brought into the policy, as per Objective SRCC-O2, to recognise that different activities, people, property and infrastructure will have a different tolerance to the effects of coastal hazards. [See paragraph 4.85 to 4.92 of original submission for full reason]	Opposes NH-P1 (Identification of natural hazards) and seeks amendment.
Wellington International Airport Ltd	406.214	Hazards and Risks / Natural Hazards / NH-P1	Amend	Opposes NH-P1. The concept of tolerability also needs to be brought into the policy, as per Objective SRCC-O2, to recognise that different activities, people, property and infrastructure will have a different tolerance to the effects of coastal hazards. [See paragraph 4.85 to 4.92 of original submission for full reason]	Seeks that NH-P1 (Identification of natural hazards) is amended to introduce the concept of tolerability.
Horokiwi Quarries Ltd	271.18	Hazards and Risks / Natural Hazards / NH-P2	Support	Supports the risk-based approach within the policy.	Retain NH-P2 (Levels of risk) as notified.
Fire and Emergency New Zealand	273.61	Hazards and Risks / Natural Hazards / NH-P2	Support	Supports the policy as the policy makes an allowance for buildings or activities in the low, medium and high hazard areas where mitigation measures are incorporated to address the impacts from the relevant natural hazards to people, property and infrastructure. A number of established fire stations are located in either the low, medium or high hazard areas and it is supported that an opportunity exists for future additions or site layout amendments.	Retain NH-P2 (Levels of risk) as notified.
Greater Wellington Regional Council	351.125	Hazards and Risks / Natural Hazards / NH-P2	Amend	Considers it appropriate to amend to have regard to the Proposed RPS Change 1 Objectives 19 and 20 and Policies 51 and 52. Minimise is defined as “as low as reasonably practicable (ALARP)” and is in line with standard risk-based hazard management approaches. This leaves room for reduction as far as practicable but is a clearer signal than ‘reduce or do not increase’, to actively look to bring down the risk in the design and planning of the development. Considers that Changes requested to the policies may necessitate amendments to the rules to have regard to the natural hazard direction in Proposed RPS Change 1.	Amend NH-P2 (Levels of risk) as follows: Subdivision, use and development minimises reduce or do not increase the risk to people, property and infrastructure by:...
Toka Tū Ake EQC	FS70.23	Part 2 / Hazards and Risks / Natural Hazards / NH-P2	Support	Toka Tū Ake EQC consider it appropriate for terminology consistent with GRWC proposed RPS Change 1, based on standard risk based hazard management approaches, to be used throughout the WCC proposed district plan. We agree that ‘minimise’ natural hazard risk is a clearer instruction to bring risk in development to levels as low as reasonably practical than ‘reduce’ and ‘reduce or do not increase’.	Allow
Stride Investment Management Limited	FS107.11	Part 2 / Hazards and Risks / Natural Hazards / NH-P2	Oppose	Stride is opposed to amending the wording of the natural hazard policies from “reduce or avoid an increase in risk” to “minimise risk” which would impose an unreasonable and greater burden than the current wording of the Proposed Plan.	Disallow
Investore Property Limited	FS108.11	Part 2 / Hazards and Risks / Natural Hazards / NH-P2	Oppose	Investore is opposed to amending the wording of the natural hazard policies from “reduce or avoid an increase in risk” to “minimise risk” which would impose an unreasonable and greater burden than the current wording of the Proposed Plan.	Disallow

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Argosy Property No. 1 Limited	383.25	Hazards and Risks / Natural Hazards / NH-P2	Oppose in part	Consider NH-P2.1 is restrictive to allow only low occupancy or low replacement value development within the Natural Hazard Overlays. The Liquefaction Hazard Overlay applies to approximately half of the CBD. It is considered that this policy does not appropriately recognise this context and existing built environment. Considers NH-P2.2 is unrealistic to provide that mitigation can address the impacts from natural hazards. This will not always be possible or practical. Further, Policy NH-P.2 should apply in all hazard areas. Considers NH-P2.3 is similarly restrictive and equally fails to recognise that a significant portion of the CBD is subject to high hazard areas under the Liquefaction Hazard Overlay. Policy NH-P2.3 should apply to the Fault Hazard Overlay only, and also recognise functional need in this location. Notes that all activities except emergency service facilities are permitted within the Liquefaction Hazard Overlay. The policy should be consistent with the level of risk reflected in the rules	Amend NH-P2 (Levels of risk) as follows: Subdivision, use and development reduce or do not increase the risk to people, property and infrastructure by: 1. Allowing for those buildings and activities that have either low occupancy or low replacement value within the low, medium and high hazard areas of the Natural Hazard Overlays; 2. Requiring buildings and activities to reduce or not increase mitigate the impacts from natural hazards to people, property and infrastructure in the low hazard, and medium and high hazard areas within the Natural Hazard Overlays; and 3. Avoiding buildings and activities in the high hazard areas of the Natural Fault Hazard Overlays unless there is a functional an exceptional reason for the building or activity to be located in this area and the activity mitigates the impacts from natural hazards to people, property and infrastructure.
Ministry of Education	400.47	Hazards and Risks / Natural Hazards / NH-P2	Support in part	Support NH-P2 in part.	Retain NH-P2 (Levels of risk) with amendment.
Ministry of Education	400.48	Hazards and Risks / Natural Hazards / NH-P2	Amend	Seeks that NH-P2 be amended. The submitter acknowledges the risk that natural hazards pose to hazard sensitive activities. However the submitter considers that, at times, there is an operational need for the submitter to locate educational facilities in these areas to serve existing communities. The submitters seeks an amendment so that this need can be considered when managing development in natural hazard areas, whilst also requiring natural hazard risk to be mitigated through any new development.	Amend NH-P2 (Levels of risk) as follows: Subdivision, use and development reduce or do not increase the risk to people, property and infrastructure by: ... 3. Avoiding buildings and activities in the high hazard areas of the Natural Hazard Overlays unless there is an exceptional reason or operational need for the building or activity to be located in this area and the activity mitigates the impacts from natural hazards to people, property and infrastructure.
Waka Kotahi NZ Transport Agency	FS103.52	Part 2 / Hazards and Risks / Natural Hazards / NH-P2	Support	Waka Kotahi supports a risk-based approach in providing for subdivision and development, and only in circumstances where there is an operational need provide for activities to be undertaken in the high hazard area.	Allow
CentrePort Limited	402.100	Hazards and Risks / Natural Hazards / NH-P2	Support in part	Considers that the area within the Special Purpose Port Zone has a number of hazard risks including those categorised as high. However this policy seeks to only allow buildings and activities in exceptional circumstances rather than recognising there may be a functional need or operational requirement for the building or activity.	Retain NH-P2 (Levels of risk), with amendment.
CentrePort Limited	402.101	Hazards and Risks / Natural Hazards / NH-P2	Amend	Considers that the area within the Special Purpose Port Zone has a number of hazard risks including those categorised as high. However this policy seeks to only allow buildings and activities in exceptional circumstances rather than recognising there may be a functional need or operational requirement for the building or activity.	Amend NH-P2 (Levels of risk) as follows: ... 3. Avoiding buildings and activities in the high hazard areas of the Natural Hazard Overlays unless there is an there is a functional need or operational requirement or other exceptional reason for the building or activity to be located in this area, and the activity mitigates the impacts from natural hazards to people, property and infrastructure.
Wellington International Airport Limited	FS36.79	Part 2 / Hazards and Risks / Natural Hazards / NH-P2	Support	WIAL supports the intent of this relief to the extent that it is consistent with the outcomes sought from its primary submission.	Allow / Seeks that part of submission to be allowed.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Wellington International Airport Ltd	406.215	Hazards and Risks / Natural Hazards / NH-P2	Oppose	<p>Opposes NH-P2.</p> <p>The concept of tolerability also needs to be brought into the policy, as per Objective SRCC-O2, to recognise that different activities, people, property and infrastructure will have a different tolerance to the effects of coastal hazards.</p> <p>[See paragraph 4.85 to 4.92 of original submission for full reason]</p>	Opposes NH-P2 (Levels of risk) and seeks amendment.
Wellington International Airport Ltd	406.216	Hazards and Risks / Natural Hazards / NH-P2	Amend	<p>Opposes NH-P2.</p> <p>The concept of tolerability also needs to be brought into the policy, as per Objective SRCC-O2, to recognise that different activities, people, property and infrastructure will have a different tolerance to the effects of coastal hazards.</p> <p>[See paragraph 4.85 to 4.92 of original submission for full reason]</p>	Seeks that NH-P2 (Levels of risk) is either deleted or amended to introduce the concept of tolerability.
Toka Tū Ake EQC	FS70.92	Part 2 / Hazards and Risks / Natural Hazards / NH-P2	Oppose	<p>Toka Tū Ake supports the suggestion that the concept of risk tolerance be included in natural hazard provisions. However, natural hazard risk tolerance is a concept which varies widely between people and communities, and it is impractical to include it in this instance as a comprehensive definition of 'tolerable' risk has not been developed nor has one been offered. Deletion of this provision is not an appropriate alternative to including risk tolerance, as it is important to limit development in areas at risk from natural hazards.</p>	Disallow
Fabric Property Limited	425.12	Hazards and Risks / Natural Hazards / NH-P2	Oppose in part	<p>Considers that NH-P2.1 is very restrictive to allow only low occupancy or low replacement value development within the Natural Hazard Overlays. The Liquefaction Hazard Overlay applies to approximately half of the CBD. This policy does not appropriately recognise this context and exacerbates the undue representation of risk.</p> <p>Considers that NH-P2.2 is unrealistic to provide that mitigation can address the impacts from natural hazards because mitigation will not always be possible or practical. Further, Policy NH-P.2 should apply in all hazard areas.</p> <p>Considers that NH-P2.3 is similarly restrictive and equally fails to recognise that a significant portion of the CBD is subject to high hazard areas under the Liquefaction Hazard Overlay. Policy NHP2.3 should apply to the Fault Hazard Overlay only, and also recognise functional need in this location.</p> <p>Notes that all activities except emergency service facilities are permitted within the Liquefaction Hazard Overlay. The policy should be consistent with the level of risk reflected in the rules.</p>	Opposes NH-P2 (Levels of risk) in part.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Fabric Property Limited	425.13	Hazards and Risks / Natural Hazards / NH-P2	Amend	<p>Considers that NH-P2.1 is very restrictive to allow only low occupancy or low replacement value development within the Natural Hazard Overlays. The Liquefaction Hazard Overlay applies to approximately half of the CBD. This policy does not appropriately recognise this context and exacerbates the undue representation of risk.</p> <p>Considers that NH-P2.2 is unrealistic to provide that mitigation can address the impacts from natural hazards because mitigation will not always be possible or practical. The policy should be consistent with the level of risk reflected in the rules.</p>	<p>Amend NH-P2 (Levels of risk) as follows:</p> <p>...</p> <p>1. Allowing for those buildings and activities that have either low occupancy or low replacement value within the low, medium and high hazard areas of the Natural Hazard Overlays.</p> <p>1. 2- Requiring buildings and activities to reduce or not increase mitigate the impacts from natural hazards to people, property and infrastructure in the low, and medium and high hazard areas within the Natural Hazard Overlays;</p> <p>2. 3- Avoiding buildings and activities in the high hazard areas of the Natural Fault Hazard Overlays unless there is a functional or operational or exceptional reason for the building or activity to be located in this area and the activity mitigates the impacts from natural hazards to people, property and infrastructure.</p>
Toka Tū Ake EQC	FS70.12	Part 2 / Hazards and Risks / Natural Hazards / NH-P2	Oppose	The WCC proposed district plan liquefaction hazard overlay is based on the high and very high liquefaction zones shown in the GWRC liquefaction hazard maps, and it is appropriate to require low occupancy development and mitigation of the impact of natural hazards in this area and within all other Natural Hazard Overlays. Liquefaction is a real risk that has already been experienced in Wellington (e.g. during the 2016 Kaikoura earthquake), and ignoring the liquefaction risk in Christchurch resulted in catastrophic damage and retirement of land. MBIE guidelines for development in areas at risk from liquefaction recommend both land use planning to avoid more vulnerable activities in high risk areas, and requiring liquefaction resistant foundations for those buildings which are appropriate to develop in medium and high risk areas.	Disallow
Horokiwi Quarries Ltd	271.19	Hazards and Risks / Natural Hazards / NH-P3	Support	Supports the risk-based approach within the policy NH-P3 (Less hazard sensitive activities).	Retain NH-P3 (Less hazard sensitive activities) as notified.
Greater Wellington Regional Council	351.126	Hazards and Risks / Natural Hazards / NH-P3	Support	Supports for allowing for less hazard sensitive activities within certain areas is considered appropriate, where the risks are acceptable and flowpaths and stream corridors will be managed in accordance with this policy. Considers that Changes requested to the policies may necessitate amendments to the rules to have regard to the natural hazard direction in Proposed RPS Change 1.	Retain NH-P3 (Less hazard sensitive activities) as notified.
Precinct Properties New Zealand Limited	139.5	Hazards and Risks / Natural Hazards / NH-P4	Support	Supports NH-P4 (Additions to buildings for potentially hazard sensitive activities and hazard sensitive activities in an identified inundation area of the flood hazard overlay) to the extent that it "provides for" additions to buildings that accommodate existing potentially hazard sensitive activities and hazard sensitive activities in an identified inundation area.	Retain NH-P4 (Additions to buildings for potentially hazard sensitive activities and hazard sensitive activities in an identified inundation area of the flood hazard overlay) as notified.
Fire and Emergency New Zealand	273.62	Hazards and Risks / Natural Hazards / NH-P4	Support in part	Supports the policy as it seeks to only allow new buildings or additions to buildings that accommodate existing Potentially Hazard Sensitive Activities and Hazard Sensitive Activities within identified hazardous areas where certain conditions can be met. Notwithstanding, these policies form relevant matters of discretion where related rules are infringed. Submitter considers they may have a functional or operational need to locate in identified hazardous areas.	Supports NH-P4 (Additions to buildings for potentially hazard sensitive activities and hazard sensitive activities in an identified inundation area of the flood hazard overlay) with amendment.
Fire and Emergency New Zealand	273.63	Hazards and Risks / Natural Hazards / NH-P4	Amend	Supports the policy as it seeks to only allow new buildings or additions to buildings that accommodate existing Potentially Hazard Sensitive Activities and Hazard Sensitive Activities within identified hazardous areas where certain conditions can be met. Notwithstanding, these policies form relevant matters of discretion where related rules are infringed. Submitter considers they may have a functional or operational need to locate in identified hazardous areas.	<p>Amend NH-P4 (Additions to buildings for potentially hazard sensitive activities and hazard sensitive activities in an identified inundation area of the flood hazard overlay) as follows:</p> <p>...</p> <p><u>The activity, excluding additions to existing building, has an operational and/or functional need to locate within the Wellington Fault Overlay and Ohariu Fault Overlay and locating outside of these Overlays is not a practicable option.</u></p>

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Greater Wellington Regional Council	351.127	Hazards and Risks / Natural Hazards / NH-P4	Support	Supports where buildings containing hazard sensitive activities are located within the inundation flood hazard overlay, it is appropriate to allow additions to these buildings in certain circumstances and where the risks are acceptable. Considers that Changes requested to the policies may necessitate amendments to the rules to have regard to the natural hazard direction in Proposed RPS Change 1.	Retain NH-P4 (Additions to buildings for potentially hazard sensitive activities and hazard sensitive activities in an identified inundation area of the flood hazard overlay) as notified.
Argosy Property No. 1 Limited	383.26	Hazards and Risks / Natural Hazards / NH-P4	Support	Supports this policy to the extent that enables additions to buildings that accommodate potentially hazard sensitive activities.	Retain NH-P4 (Additions to buildings for potentially hazard sensitive activities and hazard sensitive activities in an identified inundation area of the flood hazard overlay) as notified.
Oyster Management Limited	404.15	Hazards and Risks / Natural Hazards / NH-P4	Support	Supports NH-P4 to the extent that it enables additions to buildings that accommodate potentially hazard sensitive activities.	Retain NH-P4 (Additions to buildings for potentially hazard sensitive activities and hazard sensitive activities in an identified inundation area of the flood hazard overlay) as notified.
Fire and Emergency New Zealand	273.64	Hazards and Risks / Natural Hazards / NH-P5	Support in part	Supports the policy as it seeks to only allow new buildings or additions to buildings that accommodate existing Potentially Hazard Sensitive Activities and Hazard Sensitive Activities within identified hazardous areas where certain conditions can be met. Notwithstanding, these policies form relevant matters of discretion where related rules are infringed. Submitter considers they may have a functional or operational need to locate in identified hazardous areas.	Support NH-P5 (Additions to buildings for potentially hazard sensitive activities and hazard sensitive activities within the overland flow paths and stream corridors of the Flood Hazard Overlays) with amendment.
Fire and Emergency New Zealand	273.65	Hazards and Risks / Natural Hazards / NH-P5	Amend	Supports the policy as it seeks to only allow new buildings or additions to buildings that accommodate existing Potentially Hazard Sensitive Activities and Hazard Sensitive Activities within identified hazardous areas where certain conditions can be met. Notwithstanding, these policies form relevant matters of discretion where related rules are infringed. Submitter considers they may have a functional or operational need to locate in identified hazardous areas.	Amend NH-P5 (Additions to buildings for potentially hazard sensitive activities and hazard sensitive activities within the overland flow paths and stream corridors of the Flood Hazard Overlays) as follows: ... <u>The activity, excluding additions to existing building, has an operational and/or functional need to locate within the Wellington Fault Overlay and Ohariu Fault Overlay and locating outside of these Overlays is not a practicable option.</u>
Greater Wellington Regional Council	351.128	Hazards and Risks / Natural Hazards / NH-P5	Support	Supports this approach.	Retain NH-P5 (Additions to buildings for potentially hazard sensitive activities and hazard sensitive activities within the overland flowpaths and stream corridors of the Flood Hazard Overlays) as notified.
Southern Cross Healthcare Limited	380.28	Hazards and Risks / Natural Hazards / NH-P5	Oppose in part	Opposes in part to Policy NH-P5.3 (Additions to buildings for potentially hazard sensitive activities and hazard sensitive activities within the overland flowpaths and stream corridors of the Flood Hazard Overlays). Policy NH-P5.3 only allows additions to buildings that accommodate existing potentially hazard sensitive activities and hazard sensitive activities within overland flowpaths and stream corridors where overland flowpaths and stream corridors are “unimpeded, and unobstructed to allow for the conveyancing of flood waters”.	Opposes Policy NH-P5 (Additions to buildings for potentially hazard sensitive activities and hazard sensitive activities within the overland flowpaths and stream corridors of the Flood Hazard Overlays) in its current form and seeks amendment.
Southern Cross Healthcare Limited	380.29	Hazards and Risks / Natural Hazards / NH-P5	Amend	Seeks to amend Policy NH-P5.3 (Additions to buildings for potentially hazard sensitive activities and hazard sensitive activities within the overland flowpaths and stream corridors of the Flood Hazard Overlays). Considers that the intention is that additions to buildings will allow for the conveyancing of flood waters, but the current wording of the policy is impractical. Considers that the terms “unimpeded, and unobstructed” may be restrictive that no additions would be allowed within overland flowpaths and stream corridors under this policy (with the effect that it could become a de facto avoidance policy). where an addition to a building is proposed to be constructed in an overland flowpath, the overland flowpath is likely to be obstructed to some extent. Seeks for this policy to be amended to allow for additions to buildings in overland flowpaths and stream corridors that allow for the conveyance of flood waters.	Amend Policy NH-P5.3 (Additions to buildings for potentially hazard sensitive activities and hazard sensitive activities within the overland flowpaths and stream corridors of the Flood Hazard Overlays) as follows: Only Allow additions to buildings that accommodate existing potentially hazard sensitive activities and hazard sensitive activities within the overland flowpaths and stream corridors, where it can be demonstrated that: 1. The risk from the 1% Annual Exceedance Probability flood event is low due to either the: a. Proposed mitigation measures; b. Size of the addition; or c. Nature of the activities undertaken within the addition; and 2. The risk to people and property is reduced or not increased from the 1% Annual Exceedance Probability flood; and 3. Overland flowpaths and stream corridors or other mechanisms are unimpeded, and unobstructed to allow for the conveyancing of flood waters.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Precinct Properties New Zealand Limited	139.6	Hazards and Risks / Natural Hazards / NH-P6	Oppose	Supports NH-P6 (Potentially hazard sensitive activities and hazard sensitive activities within the identified inundation areas of the Flood Hazard Overlays) as it provides for potentially hazard sensitive activities within the inundation area.	Retain NH-P6 (Potentially hazard sensitive activities and hazard sensitive activities within the identified inundation areas of the Flood Hazard Overlays) as notified.
Fire and Emergency New Zealand	273.66	Hazards and Risks / Natural Hazards / NH-P6	Support in part	Supports the policy as it seeks to only allow new buildings or additions to buildings that accommodate existing Potentially Hazard Sensitive Activities and Hazard Sensitive Activities within identified hazardous areas where certain conditions can be met. Notwithstanding, these policies form relevant matters of discretion where related rules are infringed. Submitter considers they may have a functional or operational need to locate in identified hazardous areas.	Support NH-P6 (Potentially hazard sensitive activities and hazard sensitive activities within the identified inundation areas of the Flood Hazard Overlays) with amendment.
Fire and Emergency New Zealand	273.67	Hazards and Risks / Natural Hazards / NH-P6	Amend	Supports the policy as it seeks to only allow new buildings or additions to buildings that accommodate existing Potentially Hazard Sensitive Activities and Hazard Sensitive Activities within identified hazardous areas where certain conditions can be met. Notwithstanding, these policies form relevant matters of discretion where related rules are infringed. Submitter considers they may have a functional or operational need to locate in identified hazardous areas.	Amend NH-P6 (Potentially hazard sensitive activities and hazard sensitive activities within the identified inundation areas of the Flood Hazard Overlays) as follows: ... <u>The activity, excluding additions to existing building, has an operational and/or functional need to locate within the Wellington Fault Overlay and Ohariu Fault Overlay and locating outside of these Overlays is not a practicable option.</u>
Greater Wellington Regional Council	351.129	Hazards and Risks / Natural Hazards / NH-P6	Amend	Considers it appropriate to amend to have regard to the Proposed RPS Change 1 Objectives 19 and 20 and Policies 51 and 52. Minimise is defined as “as low as reasonably practicable (ALARP)” and is in line with standard risk-based hazard management approaches. This leaves room for reduction as far as practicable but is a clearer signal than ‘reduce or do not increase’, to actively look to bring down the risk in the design and planning of the development. Considers that Changes requested to the policies may necessitate amendments to the rules to have regard to the natural hazard direction in Proposed RPS Change 1.	Amend NH-P6 (Potentially hazard sensitive activities and hazard sensitive activities within the identified inundation areas of the Flood Hazard Overlays) as follows: Provide subdivision development and use for potentially hazard sensitive activities and hazard sensitive activities within the inundation area provided that mitigation measures are incorporated to ensure the risk to people and property both on the site and on adjacent properties is minimised not increased or is reduced.
Toka Tū Ake EQC	FS70.24	Part 2 / Hazards and Risks / Natural Hazards / NH-P6	Support	Toka Tū Ake EQC consider it appropriate for terminology consistent with GRWC proposed RPS Change 1, based on standard risk based hazard management approaches, to be used throughout the WCC proposed district plan. We agree that ‘minimise’ natural hazard risk is a clearer instruction to bring risk in development to levels as low as reasonably practical than ‘reduce’ and ‘reduce or do not increase’.	Allow
Stride Investment Management Limited	FS107.12	Part 2 / Hazards and Risks / Natural Hazards / NH-P6	Oppose	Stride is opposed to amending the wording of the natural hazard policies from “reduce or avoid an increase in risk” to “minimise risk” which would impose an unreasonable and greater burden than the current wording of the Proposed Plan.	Disallow
Investore Property Limited	FS108.12	Part 2 / Hazards and Risks / Natural Hazards / NH-P6	Oppose	Investore is opposed to amending the wording of the natural hazard policies from “reduce or avoid an increase in risk” to “minimise risk” which would impose an unreasonable and greater burden than the current wording of the Proposed Plan.	Disallow
Argosy Property No. 1 Limited	383.27	Hazards and Risks / Natural Hazards / NH-P6	Support	Supports this policy to the extent that it enables potentially hazard sensitive activities within the identified inundation areas of the Flood Hazard Overlays.	Retain NH-P6 (Potentially hazard sensitive activities and hazard sensitive activities within the identified inundation areas of the Flood Hazard Overlays) as notified.
Ministry of Education	400.49	Hazards and Risks / Natural Hazards / NH-P6	Support	Supports NH-P6 and its requirement for mitigation measures to be incorporated into the development of hazard sensitive activities in inundation areas of flood hazard overlays.	Retain NH-P6 (Potentially hazard sensitive activities and hazard sensitive activities within the identified inundation areas of the Flood Hazard Overlays) as notified.
Oyster Management Limited	404.16	Hazards and Risks / Natural Hazards / NH-P6	Support in part	Supports NH-P6 to the extent it enables potentially hazard sensitive activities within the inundation areas of the Flood Hazard Overlays.	Retain NH-P6 (Potentially hazard sensitive activities and hazard sensitive activities within the identified inundation areas of the Flood Hazard Overlays) with amendments.
Oyster Management Limited	404.17	Hazards and Risks / Natural Hazards / NH-P6	Oppose in part	Supports NH-P6 to the extent it enables potentially hazard sensitive activities within the inundation areas of the Flood Hazard Overlays. Seeks to amend the policy so that it only applies when significant risk is posed to people and property.	Amend NH-P6 (Potentially hazard sensitive activities and hazard sensitive activities within the identified inundation areas of the Flood Hazard Overlays) to: Provide <u>for</u> subdivision, development and use for potentially hazard sensitive activities and hazard sensitive activities within the inundation area provided that mitigation measures are incorporated to ensure the <u>that significant</u> risk to people and property both on the site and on adjacent properties is not increased or is reduced.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Oyster Management Limited	404.18	Hazards and Risks / Natural Hazards / NH-P6	Amend	Supports NH-P6 to the extent it enables potentially hazard sensitive activities within the inundation areas of the Flood Hazard Overlays. Seeks to amend the policy so that it only applies when significant risk is posed to people and property.	Amend NH-P6 (Potentially hazard sensitive activities and hazard sensitive activities within the identified inundation areas of the Flood Hazard Overlays) to: Provide <u>for</u> subdivision, development and use for potentially hazard sensitive activities and hazard sensitive activities within the inundation area provided that mitigation measures are incorporated to ensure the <u>that significant</u> risk to people and property both on the site and on adjacent properties is not increased or is reduced.
Toka Tū Ake EQC	FS70.66	Part 2 / Hazards and Risks / Natural Hazards / NH-P6	Oppose	The submission does not make it clear what constitutes a “significant risk”, and the level of risk deemed significant may vary between communities. While the level of risk may vary within the flood inundation overlay, it is appropriate to require mitigation measures for hazard sensitive and potentially hazard sensitive activities throughout the zone. Any risk (not just significant risk) to people and property on the site and adjacent properties should be reduced or not increased.	Disallow
Fire and Emergency New Zealand	273.68	Hazards and Risks / Natural Hazards / NH-P7	Support in part	Supports the policy as it seeks to only allow new buildings or additions to buildings that accommodate existing Potentially Hazard Sensitive Activities and Hazard Sensitive Activities within identified hazardous areas where certain conditions can be met. Notwithstanding, these policies form relevant matters of discretion where related rules are infringed. Submitter considers they may have a functional or operational need to locate in identified hazardous areas.	Supports NH-P7 (Potentially hazard sensitive activities and hazard sensitive activities within the overland flow paths of the Flood Hazard Overlays) with amendment.
Fire and Emergency New Zealand	273.69	Hazards and Risks / Natural Hazards / NH-P7	Amend	Supports the policy as it seeks to only allow new buildings or additions to buildings that accommodate existing Potentially Hazard Sensitive Activities and Hazard Sensitive Activities within identified hazardous areas where certain conditions can be met. Notwithstanding, these policies form relevant matters of discretion where related rules are infringed. Submitter considers they may have a functional or operational need to locate in identified hazardous areas.	Amend NH-P7 (Potentially hazard sensitive activities and hazard sensitive activities within the overland flow paths of the Flood Hazard Overlays) as follows: ... <u>The activity, excluding additions to existing building, has an operational and/or functional need to locate within the Wellington Fault Overlay and Ohariu Fault Overlay and locating outside of these Overlays is not a practicable option.</u>
Greater Wellington Regional Council	351.130	Hazards and Risks / Natural Hazards / NH-P7	Amend	Considers it appropriate to amend to have regard to the Proposed RPS Change 1 Objectives 19 and 20 and Policies 51 and 52. Minimise is defined as “as low as reasonably practicable (ALARP)” and is in line with standard risk-based hazard management approaches. This leaves room for reduction as far as practicable but is a clearer signal than ‘reduce or do not increase’, to actively look to bring down the risk in the design and planning of the development. Considers that Changes requested to the policies may necessitate amendments to the rules to have regard to the natural hazard direction in Proposed RPS Change 1.	Amend NH-P7 (Potentially hazard sensitive activities and hazard sensitive activities within the overland flowpaths of the Flood Hazard Overlays) as follows: Manage subdivision, development and use associated with potentially hazard sensitive activities and hazard sensitive activities within the overland flowpaths by: 1. Incorporating mitigation measures that <u>minimise the reduce or avoid an increase</u> in risk to people and property from the 1% Annual Exceedance Probability flood; ...
Toka Tū Ake EQC	FS70.25	Part 2 / Hazards and Risks / Natural Hazards / NH-P7	Support	Toka Tū Ake EQC consider it appropriate for terminology consistent with GRWC proposed RPS Change 1, based on standard risk based hazard management approaches, to be used throughout the WCC proposed district plan. We agree that ‘minimise’ natural hazard risk is a clearer instruction to bring risk in development to levels as low as reasonably practical than ‘reduce’ and ‘reduce or do not increase’.	Allow
Stride Investment Management Limited	FS107.13	Part 2 / Hazards and Risks / Natural Hazards / NH-P7	Oppose	Stride is opposed to amending the wording of the natural hazard policies from “reduce or avoid an increase in risk” to “minimise risk” which would impose an unreasonable and greater burden than the current wording of the Proposed Plan.	Disallow
Investore Property Limited	FS108.13	Part 2 / Hazards and Risks / Natural Hazards / NH-P7	Oppose	Investore is opposed to amending the wording of the natural hazard policies from “reduce or avoid an increase in risk” to “minimise risk” which would impose an unreasonable and greater burden than the current wording of the Proposed Plan.	Disallow
Ministry of Education	400.50	Hazards and Risks / Natural Hazards / NH-P7	Support	Supports NH-P7 and the management of development in overland flow paths of the flood hazard overlays as proposed, in order to reduce the impacts of natural hazards on hazard sensitive activities.	Retain NH-P7 (Potentially hazard sensitive activities and hazard sensitive activities within the overland flowpaths of the Flood Hazard Overlays) as notified.
Oyster Management Limited	404.19	Hazards and Risks / Natural Hazards / NH-P7	Support in part	Supports NH-P7 to the extent it enables potentially hazard sensitive activities within the inundation areas of the Flood Hazard Overlays.	Retain NH-P7 (Potentially hazard sensitive activities and hazard sensitive activities within the overland flowpaths of the Flood Hazard Overlays) with amendments.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Oyster Management Limited	404.20	Hazards and Risks / Natural Hazards / NH-P7	Oppose in part	Supports NH-P7 to the extent it enables potentially hazard sensitive activities within the inundation areas of the Flood Hazard Overlays. Seeks to amend the policy so that it only applies when significant risk is posed to people and property.	Amend NH-P7 (Potentially hazard sensitive activities and hazard sensitive activities within the overland flowpaths of the Flood Hazard Overlays) as follows: Incorporating mitigation measures that reduce or avoid an increase in <u>significant</u> risk to people and property from the 1% Annual Exceedance Probability flood;
Oyster Management Limited	404.21	Hazards and Risks / Natural Hazards / NH-P7	Amend	Supports NH-P7 to the extent it enables potentially hazard sensitive activities within the inundation areas of the Flood Hazard Overlays. Seeks to amend the policy so that it only applies when significant risk is posed to people and property.	Amend NH-P7 (Potentially hazard sensitive activities and hazard sensitive activities within the overland flowpaths of the Flood Hazard Overlays) as follows: Incorporating mitigation measures that reduce or avoid an increase in <u>significant</u> risk to people and property from the 1% Annual Exceedance Probability flood;
Toka Tū Ake EQC	FS70.67	Part 2 / Hazards and Risks / Natural Hazards / NH-P7	Oppose	The submission does not make it clear what constitutes a “significant risk”, and the level of risk deemed significant may vary between communities. Unimpeded overland flowpaths are important in allowing floodwater to escape and recede, and development within them should be restricted. Any risk (not just significant risk) to people and property on the site and adjacent properties should be reduced or not increased.	Disallow
Fire and Emergency New Zealand	273.70	Hazards and Risks / Natural Hazards / NH-P8	Support in part	Supports the policy as it seeks to only allow new buildings or additions to buildings that accommodate existing Potentially Hazard Sensitive Activities and Hazard Sensitive Activities within identified hazardous areas where certain conditions can be met. Notwithstanding, these policies form relevant matters of discretion where related rules are infringed. Submitter considers they may have a functional or operational need to locate in identified hazardous areas.	Supports NH-P8 (Potentially hazard sensitive activities and hazard sensitive activities within the stream corridors of the Flood Hazard Overlay) with amendment.
Fire and Emergency New Zealand	273.71	Hazards and Risks / Natural Hazards / NH-P8	Amend	Supports the policy as it seeks to only allow new buildings or additions to buildings that accommodate existing Potentially Hazard Sensitive Activities and Hazard Sensitive Activities within identified hazardous areas where certain conditions can be met. Notwithstanding, these policies form relevant matters of discretion where related rules are infringed. Submitter considers they may have a functional or operational need to locate in identified hazardous areas.	Amend NH-P8 (Potentially hazard sensitive activities and hazard sensitive activities within the stream corridors of the Flood Hazard Overlay) as follows: ... <u>The activity, excluding additions to existing building, has an operational and/or functional need to locate within the Wellington Fault Overlay and Ohariu Fault Overlay and locating outside of these Overlays is not a practicable option.</u>
Retirement Villages Association of New Zealand Incorporated	350.61	Hazards and Risks / Natural Hazards / NH-P8	Oppose in part	Considers that the use of both ‘avoid’ and ‘unless it can be demonstrated’ in NH-P8 is contradictory, and that the policy should be amended to be enabling when standards are met, rather than restrictive when standards are not met.	Opposes NH-P8 (Potentially hazard sensitive activities and hazard sensitive activities within the stream corridors of the Flood Hazard Overlay) and seeks amendment.
Retirement Villages Association of New Zealand Incorporated	350.62	Hazards and Risks / Natural Hazards / NH-P8	Amend	Considers that the use of both ‘avoid’ and ‘unless it can be demonstrated’ in NH-P8 is contradictory, and that the policy should be amended to be enabling when standards are met, rather than restrictive when standards are not met.	Amend NH-P8 (Potentially hazard sensitive activities and hazard sensitive activities within the stream corridors of the Flood Hazard Overlay) as follows: Avoid Enable subdivision development and use associated with potentially hazard sensitive activities and hazard sensitive activities within the stream corridors, unless where it can be demonstrated that: ...
Greater Wellington Regional Council	351.131	Hazards and Risks / Natural Hazards / NH-P8	Amend	Considers it appropriate to amend to have regard to the Proposed RPS Change 1 Objectives 19 and 20 and Policies 51 and 52. Minimise is defined as “as low as reasonably practicable (ALARP)” and is in line with standard risk-based hazard management approaches. This leaves room for reduction as far as practicable but is a clearer signal than ‘reduce or do not increase’, to actively look to bring down the risk in the design and planning of the development. Considers that Changes requested to the policies may necessitate amendments to the rules to have regard to the natural hazard direction in Proposed RPS Change 1.	Amend NH-P8 (Potentially hazard sensitive activities and hazard sensitive activities within the stream corridors of the Flood Hazard Overlay) as follows: Avoid subdivision development and use associated with potentially hazard sensitive activities and hazard sensitive activities within the stream corridors, unless it can be demonstrated that: ... 2. Mitigation measures are incorporated that minimise the reduce or avoid an increase in risk to people and property from the 1% Annual Exceedance Probability Flood; ...
Toka Tū Ake EQC	FS70.26	Part 2 / Hazards and Risks / Natural Hazards / NH-P8	Support	Toka Tū Ake EQC consider it appropriate for terminology consistent with GRWC proposed RPS Change 1, based on standard risk based hazard management approaches, to be used throughout the WCC proposed district plan. We agree that ‘minimise’ natural hazard risk is a clearer instruction to bring risk in development to levels as low as reasonably practical than ‘reduce’ and ‘reduce or do not increase’.	Allow

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Stride Investment Management Limited	FS107.14	Part 2 / Hazards and Risks / Natural Hazards / NH-P8	Oppose	Stride is opposed to amending the wording of the natural hazard policies from “reduce or avoid an increase in risk” to “minimise risk” which would impose an unreasonable and greater burden than the current wording of the Proposed Plan.	Disallow
Investore Property Limited	FS108.14	Part 2 / Hazards and Risks / Natural Hazards / NH-P8	Oppose	Investore is opposed to amending the wording of the natural hazard policies from “reduce or avoid an increase in risk” to “minimise risk” which would impose an unreasonable and greater burden than the current wording of the Proposed Plan.	Disallow
Ministry of Education	400.51	Hazards and Risks / Natural Hazards / NH-P8	Support	Supports NH-P8 as the submitter acknowledges the risk which flood hazards can pose to people and property. However the submitter considers, at times, there is an operational need for the submitter to locate educational facilities in flood hazard overlays to provide for existing communities. The submitter therefore supports the provision as proposed.	Retain NH-P8 (Potentially hazard sensitive activities and hazard sensitive activities within the stream corridors of the Flood Hazard Overlay) as notified.
Fire and Emergency New Zealand	273.72	Hazards and Risks / Natural Hazards / NH-P9	Support	Supports the policy insofar as it seeks to avoid the development of new emergency facilities within the liquefaction overlay, unless it can be demonstrated that the facility will be able to maintain functionality following an earthquake and emergency vehicles will be able to service the impacted community.	Supports NH-P9 (Emergency facilities in the Liquefaction Overlay).
Fire and Emergency New Zealand	273.73	Hazards and Risks / Natural Hazards / NH-P9	Support in part	Supports the policy as it seeks to only allow new buildings or additions to buildings that accommodate existing Potentially Hazard Sensitive Activities and Hazard Sensitive Activities within identified hazardous areas where certain conditions can be met. Notwithstanding, these policies form relevant matters of discretion where related rules are infringed. Submitter considers they may have a functional or operational need to locate in identified hazardous areas.	Supports NH-P9 (Emergency facilities in the Liquefaction Overlay) with amendment.
Fire and Emergency New Zealand	273.74	Hazards and Risks / Natural Hazards / NH-P9	Amend	Supports the policy as it seeks to only allow new buildings or additions to buildings that accommodate existing Potentially Hazard Sensitive Activities and Hazard Sensitive Activities within identified hazardous areas where certain conditions can be met. Notwithstanding, these policies form relevant matters of discretion where related rules are infringed. Submitter considers they may have a functional or operational need to locate in identified hazardous areas.	Amend NH-P9 (Emergency facilities in the Liquefaction Overlay) as follows: ... <u>The activity, excluding additions to existing building, has an operational and/or functional need to locate within the Wellington Fault Overlay and Ohariu Fault Overlay and locating outside of these Overlays is not a practicable option.</u>
Greater Wellington Regional Council	351.132	Hazards and Risks / Natural Hazards / NH-P9	Amend	Considers there is a risk here from allowing critical infrastructure in liquefaction prone areas. It is important to specify that the foundations are designed to the highest standard to minimise the risk that the building will be able to operate after an event. Good geotechnical design is able to achieve this and the clause would not add an unreasonable burden to the development design and makes it clear what is required. Considers that Changes requested to the policies may necessitate amendments to the rules to have regard to the natural hazard direction in Proposed RPS Change 1.	Amend NH-P9 (Emergency facilities in the Liquefaction Overlay) to add a clause to say that the foundation designs must be designed and certified by qualified Geotech engineer in order to prevent liquefaction induced deformation of the building and in doing so maintains its post event functionality.
Toka Tū Ake EQC	FS70.27	Part 2 / Hazards and Risks / Natural Hazards / NH-P9	Support	Toka Tū Ake EQC support requiring a qualified geotechnical engineer to certify foundation designs for emergency facilities within the liquefaction hazard overlay, to increase resilience of the building and maintain post-event functionality.	Allow
CentrePort Limited	402.102	Hazards and Risks / Natural Hazards / NH-P9	Amend	The equivalent definition is Emergency Service Facilities which should be used here as Emergency Facility may be subject to interpretation.	Amend NH-P9 (Emergency facilities in the Liquefaction Overlay) as follows: Only allow new emergency <u>service</u> facilities within the Liquefaction Overlay where it can be demonstrated that: 1. <u>The emergency service facility will be able to maintain post disaster functionality following an earthquake; and</u> 2. <u>...</u>
CentrePort Limited	402.103	Hazards and Risks / Natural Hazards / NH-P9	Support in part	The equivalent definition is Emergency Service Facilities which should be used here as Emergency Facility may be subject to interpretation.	Support NH-P9 (Emergency facilities in the Liquefaction Overlay), with amendment.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Wellington City Council	266.67	Hazards and Risks / Natural Hazards / NH-P10	Amend	Considers policy needs to be amended for clarity and consistency.	Amend NH-P10 (Potentially hazard sensitive activities within the Wellington Fault Overlay and Ohariu Fault Overlay)as follows: Manage subdivision, development or use associated with potentially hazard sensitive activities, including additions to existing buildings within the Wellington Fault Overlay and Ohariu Fault Overlay by ensuring that: 1. The activity is located more than 20m of <u>from</u> the Wellington Faultline or Ohariu Faultline; and ...
Fire and Emergency New Zealand	273.75	Hazards and Risks / Natural Hazards / NH-P10	Support in part	Supports the policy as it seeks to only allow new buildings or additions to buildings that accommodate existing Potentially Hazard Sensitive Activities and Hazard Sensitive Activities within identified hazardous areas where certain conditions can be met. Notwithstanding, these policies form relevant matters of discretion where related rules are infringed. Submitter considers they may have a functional or operational need to locate in identified hazardous areas.	Supports NH-P10 (Potentially hazard sensitive activities within the Wellington Fault Overlay and Ohariu Fault Overlay) with amendment:
Fire and Emergency New Zealand	273.76	Hazards and Risks / Natural Hazards / NH-P10	Amend	Supports the policy as it seeks to only allow new buildings or additions to buildings that accommodate existing Potentially Hazard Sensitive Activities and Hazard Sensitive Activities within identified hazardous areas where certain conditions can be met. Notwithstanding, these policies form relevant matters of discretion where related rules are infringed. Submitter considers they may have a functional or operational need to locate in identified hazardous areas.	Amend NH-P10 (Potentially hazard sensitive activities within the Wellington Fault Overlay and Ohariu Fault Overlay) as follows: ... <u>The activity, excluding additions to existing building, has an operational and/or functional need to locate within the Wellington Fault Overlay and Ohariu Fault Overlay and locating outside of these Overlays is not a practicable option.</u>
Greater Wellington Regional Council	351.133	Hazards and Risks / Natural Hazards / NH-P10	Amend	Considers it appropriate to amend to have regard to the Proposed RPS Change 1 Objectives 19 and 20 and Policies 51 and 52. Minimise is defined as “as low as reasonably practicable (ALARP)” and is in line with standard risk-based hazard management approaches. This leaves room for reduction as far as practicable but is a clearer signal than ‘reduce or do not increase’, to actively look to bring down the risk in the design and planning of the development. Considers that Changes requested to the policies may necessitate amendments to the rules to have regard to the natural hazard direction in Proposed RPS Change 1.	Amend NH-P10 (Potentially hazard sensitive activities within the Wellington Fault Overlay and Ohariu Fault Overlay) as follows: Manage subdivision, development or use associated with potentially hazard sensitive activities, including additions to existing buildings within the Wellington Fault Overlay and Ohariu Fault Overlay by ensuring that: ... 3. The activity incorporates mitigation measures that ensure the risk from fault rupture to people, property and infrastructure is <u>minimised</u> reduced or not increased ; or ...
Toka Tū Ake EQC	FS70.28	Part 2 / Hazards and Risks / Natural Hazards / NH-P10	Support	Toka Tū Ake EQC consider it appropriate for terminology consistent with GRWC proposed RPS Change 1, based on standard risk based hazard management approaches, to be used throughout the WCC proposed district plan. We agree that ‘minimise’ natural hazard risk is a clearer instruction to bring risk in development to levels as low as reasonably practical than ‘reduce’ and ‘reduce or do not increase’.	Allow
WCC Environmental Reference Group	377.56	Hazards and Risks / Natural Hazards / NH-P10	Amend	Considers that NH-P10 should be clarified, namely the 20 meter rule. It is assumed 20m is meant to be a buffer and amended wording is proposed to reflect this.	Amend NH-P10 (Potentially hazard sensitive activities within the Wellington Fault Overlay and Ohariu Fault Overlay) as follows: Manage subdivision, development or use associated with potentially hazard sensitive activities, including additions to existing buildings within the Wellington Fault Overlay and Ohariu Fault Overlay by ensuring that: 1. The activity is located more than 20m of <u>from</u> the Wellington Faultline or Ohariu Faultline; and 2. The activity incorporates mitigation measures that ensure the risk from fault rupture to people, property and infrastructure is reduced or not increased.
Ministry of Education	400.52	Hazards and Risks / Natural Hazards / NH-P10	Support	Supports NH-P10 and the management of development in the Wellington Fault Overlay and Ohariu Fault Overlay as proposed.	Retain NH-P10 (Potentially hazard sensitive activities within the Wellington Fault Overlay and Ohariu Fault Overlay) as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
CentrePort Limited	402.104	Hazards and Risks / Natural Hazards / NH-P10	Support	Support the intent of this policy.	Retain NH-P10 (Potentially hazard sensitive activities within the Wellington Fault Overlay and Ohariu Fault Overlay) as notified.
Fire and Emergency New Zealand	273.77	Hazards and Risks / Natural Hazards / NH-P11	Amend	Supports the policy as it seeks to only allow new buildings or additions to buildings that accommodate existing Potentially Hazard Sensitive Activities and Hazard Sensitive Activities within identified hazardous areas where certain conditions can be met. Notwithstanding, these policies form relevant matters of discretion where related rules are infringed. Submitter considers they may have a functional or operational need to locate in identified hazardous areas.	Retain NH-P11 (Hazard sensitive activities, excluding a single residential dwelling on an existing site, within the Wellington Fault Overlay and Ohariu Fault Overlay) as notified.
Toka Tū Ake EQC	282.7	Hazards and Risks / Natural Hazards / NH-P11	Amend	Considers that the plan does not adequately manage the risks of fault rupture, with single residential dwellings able to be located within the Wellington and Ohariu Fault Overlays. References the MfE guidelines for planning around an active fault that advise that Buildings Importance Category (BIC) 2 (residential) structures are not developed within the fault avoidance zones (within 20 m of the fault race) of Recurrence Interval Class (RIC) I (≤2000 years) faults on brownfield sites and RIC I and II (2000 – 3500 years) on greenfield sites. The Wellington Fault is RIC I and the Ohariu Fault is RIC II. Considers that any residential development within the Fault Overlays should be avoided within 20 m of the Wellington Fault, even on an existing site.	Amend NH-P11 (Hazard sensitive activities, excluding a single residential dwelling on an existing site, within the Wellington Fault Overlay and Ohariu Fault Overlay) as follows: Hazard sensitive activities, excluding a single residential dwelling on an existing site, within the Wellington Fault Overlay and Ohariu Fault Overlay Avoid subdivision, development or use associated with hazard sensitive activities, excluding a single residential dwelling on an existing site, within the Wellington Fault Overlay and Ohariu Fault Overlay unless it can be demonstrated that: 1. The activity is located more than 20m from the Wellington Faultline or Ohariu Faultline, or 2. The activity, excluding additions to existing building, has a operational and functional need to locate within the Wellington Fault Overlay and Ohariu Fault Overlay and locating outside of these Overlays is not a practicable option; and 3. The activity incorporates mitigation measures that ensure the risk from fault rupture to people and property is reduced or not increased; or 4. For additions to existing buildings, the change in risk from fault rupture to people and property is reduced or not increased.
Retirement Villages Association of New Zealand Incorporated	350.63	Hazards and Risks / Natural Hazards / NH-P11	Oppose in part	Considers that the use of both 'avoid' and 'unless it can be demonstrated' in NH-P11 is contradictory, and that the policy should be amended to be enabling when standards are met, rather than restrictive when standards are not met.	Opposes NH-11 (Hazard sensitive activities, excluding a single residential dwelling on an existing site, within the Wellington Fault Overlay and Ohariu Fault Overlay) and seeks amendment.
Retirement Villages Association of New Zealand Incorporated	350.64	Hazards and Risks / Natural Hazards / NH-P11	Amend	Considers that the use of both 'avoid' and 'unless it can be demonstrated' in NH-P11 is contradictory, and that the policy should be amended to be enabling when standards are met, rather than restrictive when standards are not met.	Amend NH-11 (Hazard sensitive activities, excluding a single residential dwelling on an existing site, within the Wellington Fault Overlay and Ohariu Fault Overlay) as follows: Avoid Enable subdivision, development or use associated with hazard sensitive activities, excluding a single residential dwelling on an existing site, within the Wellington Fault Overlay and Ohariu Fault Overlay unless where it can be demonstrated that:
Greater Wellington Regional Council	351.134	Hazards and Risks / Natural Hazards / NH-P11	Amend	Considers it appropriate to amend to have regard to the Proposed RPS Change 1 Objectives 19 and 20 and Policies 51 and 52. Minimise is defined as "as low as reasonably practicable (ALARP)" and is in line with standard risk-based hazard management approaches. This leaves room for reduction as far as practicable but is a clearer signal than 'reduce or do not increase', to actively look to bring down the risk in the design and planning of the development. Considers that Changes requested to the policies may necessitate amendments to the rules to have regard to the natural hazard direction in Proposed RPS Change 1.	Amend NH-P11 (Hazard sensitive activities, excluding a single residential dwelling on an existing site, within the Wellington Fault Overlay and Ohariu Fault Overlay) as follows: Avoid subdivision, development or use associated with hazard sensitive activities, excluding a single residential dwelling on an existing site, within the Wellington Fault Overlay and Ohariu Fault Overlay unless it can be demonstrated that... 3. The activity incorporates mitigation measures that ensure the risk from fault rupture to people and property is minimised reduced or not increased; or 4. For additions to existing buildings, the change in risk from fault rupture to people and property is minimised reduced or not increased.
Toka Tū Ake EQC	FS70.29	Part 2 / Hazards and Risks / Natural Hazards / NH-P11	Support	Toka Tū Ake EQC consider it appropriate for terminology consistent with GRWC proposed RPS Change 1, based on standard risk based hazard management approaches, to be used throughout the WCC proposed district plan. We agree that 'minimise' natural hazard risk is a clearer instruction to bring risk in development to levels as low as reasonably practical than 'reduce' and 'reduce or do not increase'.	Allow

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
WCC Environmental Reference Group	377.57	Hazards and Risks / Natural Hazards / NH-P11	Amend	Considers that NH-P11 should be amended, as it appears to allow for single residential buildings to be constructed on existing sites. Such as for a replacement dwelling or possibly in accordance with new rules allowing for infill housing on a single site. It may be prudent to not allow any new housing even on existing sites so that over time the fault lines are de-populated, reducing the risk of loss of life, reducing future insurance burdens and ultimately providing for more green corridors within the city.	Amend NH-P11 (Hazard sensitive activities, excluding a single residential dwelling on an existing site, within the Wellington Fault Overlay and Ohariu Fault Overlay) as follows: Hazard sensitive activities, excluding a single <u>existing</u> residential dwelling on an existing site, within the Wellington Fault Overlay and Ohariu Fault Overlay Avoid subdivision, development or use associated with hazard sensitive activities, excluding a single existing residential dwelling on an <u>existing</u> site, within the Wellington Fault Overlay and Ohariu Fault Overlay.
Ministry of Education	400.53	Hazards and Risks / Natural Hazards / NH-P11	Support	Supports NH-P11 as the submitter acknowledges the risk that natural hazards can pose to people and property. However the submitter considers that, at times, there is an operational need for the submitter to locate educational facilities in fault overlays to provide for existing communities. The Ministry therefore supports the provision as proposed.	Retain NH-P11 (Hazard sensitive activities, excluding a single residential dwelling on an existing site, within the Wellington Fault Overlay and Ohariu Fault Overlay) as notified.
Fire and Emergency New Zealand	273.78	Hazards and Risks / Natural Hazards / NH-P12	Support in part	Supports the policy as it seeks to only allow new buildings or additions to buildings that accommodate existing Potentially Hazard Sensitive Activities and Hazard Sensitive Activities within identified hazardous areas where certain conditions can be met. Notwithstanding, these policies form relevant matters of discretion where related rules are infringed. Submitter considers they may have a functional or operational need to locate in identified hazardous areas.	Retain NH-P12 (Potentially hazard sensitive activities and hazard sensitive activities within the Sheppard's Fault Overlay and Terawhiti Fault Overlay) with amendment.
Fire and Emergency New Zealand	273.79	Hazards and Risks / Natural Hazards / NH-P12	Amend	Supports the policy as it seeks to only allow new buildings or additions to buildings that accommodate existing Potentially Hazard Sensitive Activities and Hazard Sensitive Activities within identified hazardous areas where certain conditions can be met. Notwithstanding, these policies form relevant matters of discretion where related rules are infringed. Submitter considers they may have a functional or operational need to locate in identified hazardous areas.	Amend NH-P12 (Potentially hazard sensitive activities and hazard sensitive activities within the Sheppard's Fault Overlay and Terawhiti Fault Overlay) as follows: ... <u>The activity, excluding additions to existing building, has an operational and/or functional need to locate within the Wellington Fault Overlay and Ohariu Fault Overlay and locating outside of these Overlays is not a practicable option.</u>
Greater Wellington Regional Council	351.135	Hazards and Risks / Natural Hazards / NH-P12	Amend	Considers it appropriate to amend to have regard to the Proposed RPS Change 1 Objectives 19 and 20 and Policies 51 and 52. Minimise is defined as "as low as reasonably practicable (ALARP)" and is in line with standard risk-based hazard management approaches. This leaves room for reduction as far as practicable but is a clearer signal than 'reduce or do not increase', to actively look to bring down the risk in the design and planning of the development. Considers that Changes requested to the policies may necessitate amendments to the rules to have regard to the natural hazard direction in Proposed RPS Change 1.	Amend NH-P12 (Potentially hazard sensitive activities and hazard sensitive activities within the Sheppard's Fault Overlay and Terawhiti Fault Overlay) as follows: Allow for potentially hazard sensitive activities and hazard sensitive activities within the Sheppard's Fault Overlay and Terawhiti Fault Overlay with the exception of educational facilities, health care facilities and emergency facilities, where it can be demonstrated that the activity is more than 20m from either the Sheppard's Fault or Terawhiti Fault and the development incorporates mitigation measures that ensure the risk from fault rupture to people and property is <u>minimised</u> reduced or not increased.
Toka Tū Ake EQC	FS70.30	Part 2 / Hazards and Risks / Natural Hazards / NH-P12	Support	Toka Tū Ake EQC consider it appropriate for terminology consistent with GRWC proposed RPS Change 1, based on standard risk based hazard management approaches, to be used throughout the WCC proposed district plan. We agree that 'minimise' natural hazard risk is a clearer instruction to bring risk in development to levels as low as reasonably practical than 'reduce' and 'reduce or do not increase'.	Allow
Ministry of Education	400.54	Hazards and Risks / Natural Hazards / NH-P12	Support in part	Supports NH-P12 in part.	Retain NH-P12 (Potentially hazard sensitive activities and hazard sensitive activities within the Sheppard's Fault Overlay and Terawhiti Fault Overlay) with amendment.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Ministry of Education	400.55	Hazards and Risks / Natural Hazards / NH-P12	Amend	<p>Seeks that NH-P12 be amended. The submitter acknowledges the risk that natural hazards can pose to people and property. However, at times, there is an operational need for the submitter to locate educational facilities in fault overlays to provide for existing communities.</p> <p>The submitter therefore requests an amendment to this policy to provide for development in fault overlays where there is an operational need to locate there.</p> <p>The submitter notes that this would still require resource consent as a Discretionary Activity, which is considered appropriate and is supported.</p>	<p>Amend NH-P12 (Potentially hazard sensitive activities and hazard sensitive activities within the Sheppard's Fault Overlay and Terawhiti Fault Overlay) as follows:</p> <p>Allow for potentially hazard sensitive activities and hazard sensitive activities within the Sheppard's Fault Overlay and Terawhiti Fault Overlay with the exception of educational facilities, health care facilities and emergency facilities (<u>unless it can be demonstrated that these facilities have an operational need to be located in these areas</u>), where it can be demonstrated that the activity is more than 20m from either the Sheppard's Fault or Terawhiti Fault and the development incorporates mitigation measures that ensure the risk from fault rupture to people and property is reduced or not increased.</p>
Fire and Emergency New Zealand	FS14.5	Part 2 / Hazards and Risks / Natural Hazards / NH-P12	Support	Fire and Emergency may have an operational and functional need to locate in the Sheppard's Fault Overlay and Terawhiti Fault Overlay to ensure Fire and Emergency can maintain efficient and effective emergency response times to growing / changing communities.	Allow
Toka Tū Ake EQC	282.8	Hazards and Risks / Natural Hazards / NH-P13	Amend	Considers that the plan does not adequately manage the risks of fault rupture, with single residential dwellings able to be located within the Wellington and Ohariu Fault Overlays. MfE guidelines for planning around an active fault advise that Buildings Importance Category (BIC) 2 (residential) structures are not developed within the fault avoidance zones (within 20 m of the fault race) of Recurrence Interval Class (RIC) I (≤2000 years) faults on brownfield sites and RIC I and II (2000 – 3500 years) on greenfield sites. The Wellington Fault is RIC I and the Ohariu Fault is RIC II. Considers that any residential development within the Fault Overlays should be avoided within 20 m of the Wellington Fault, even on an existing site.	<p>Amend NH-P13 (Subdivision, use and development which will be occupied by members of the public, or employees associated with the operational port activities, passenger port facilities and rail activities in the Wellington Fault Overlay.) as follows:</p> <p>Provide for subdivision, development and use associated with the operational port activities, passenger port facilities and rail activities, within the Wellington Fault Overlay, where the subdivision, development and use does not involve the construction of new buildings which will be occupied by more than 10 employees associated with the operational port activities, passenger port facilities and rail activities or any members of the public, <u>and where it can be demonstrated that the activity is located more than 20 m from the Wellington Fault.</u></p>
Greater Wellington Regional Council	351.136	Hazards and Risks / Natural Hazards / NH-P13	Support	Considers this provision is appropriate.	Retain NH-P13 (Subdivision, use and development which will be occupied by members of the public, or employees associated with the operational port activities, passenger port facilities and rail activities in the Wellington Fault Overlay) as notified.
CentrePort Limited	402.105	Hazards and Risks / Natural Hazards / NH-P13	Oppose	Opposes NH-P13 as it is considered unnecessary. Large parts of the Port Operations including the Kaiwharawhara ferry terminal location are included within the fault overlay. A policy limitation to 10 passengers or 10 employees would therefore render large parts of the Special Purpose Port Zone unusable for these activities.	Delete NH-P13 (Subdivision, use and development which will be occupied by members of the public, or employees associated with the operational port activities, passenger port facilities and rail activities in the Wellington Fault Overlay) in its entirety.
KiwiRail Holdings Limited	408.94	Hazards and Risks / Natural Hazards / NH-P13	Support	Supports policy that provides for and manages subdivision, development and use associated within the operational port activities, passenger port facilities and rail activities within the Wellington Fault Overlay.	Retain NH-P13 (Subdivision, use and development which will be occupied by members of the public, or employees associated with the operational port activities, passenger port facilities and rail activities in the Wellington Fault Overlay) as notified.
Toka Tū Ake EQC	282.9	Hazards and Risks / Natural Hazards / NH-P14	Amend	Considers that the plan does not adequately manage the risks of fault rupture, with single residential dwellings able to be located within the Wellington and Ohariu Fault Overlays. MfE guidelines for planning around an active fault advise that Buildings Importance Category (BIC) 2 (residential) structures are not developed within the fault avoidance zones (within 20 m of the fault race) of Recurrence Interval Class (RIC) I (≤2000 years) faults on brownfield sites and RIC I and II (2000 – 3500 years) on greenfield sites. The Wellington Fault is RIC I and the Ohariu Fault is RIC II. Considers that any residential development within the Fault Overlays should be avoided within 20 m of the Wellington Fault, even on an existing site.	<p>Amend NH-P14 (Subdivision, use and development which will be occupied by members of the public, or employees associated with the operational port activities, passenger port facilities and rail activities in the Wellington Fault Overlay) as follows:</p> <p>Manage subdivision, development and use associated within the operational port activities, passenger port facilities and rail activities within the Wellington Fault Overlay where the subdivision, development and use involves the construction of new buildings which will be occupied by members of the public, or more than 10 employees associated with the operational port activities, passenger port facilities and rail activities by ensuring that:</p> <ol style="list-style-type: none"> Mitigation measures are incorporated that avoid an increase in risk to people, property and infrastructure from the fault rupture of the Wellington Fault; <u>and</u> <u>Where it can be demonstrated that the activity is located more than 20 m from the Wellington Fault.</u>

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Greater Wellington Regional Council	351.137	Hazards and Risks / Natural Hazards / NH-P14	Amend	Considers it appropriate to amend to have regard to the Proposed RPS Change 1 Objectives 19 and 20 and Policies 51 and 52. Minimise is defined as “as low as reasonably practicable (ALARP)” and is in line with standard risk-based hazard management approaches. This leaves room for reduction as far as practicable but is a clearer signal than ‘reduce or do not increase’, to actively look to bring down the risk in the design and planning of the development. Considers that Changes requested to the policies may necessitate amendments to the rules to have regard to the natural hazard direction in Proposed RPS Change 1.	Amend NH-P14 (Subdivision, use and development which will be occupied by members of the public, or employees associated with the operational port activities, passenger port facilities and rail activities in the Wellington Fault Overlay) as follows: Manage subdivision, development and use associated within the operational port activities, passenger port facilities and rail activities within the Wellington Fault Overlay where the subdivision, development and use involves the construction of new buildings which will be occupied by members of the public, or more than 10 employees associated with the operational port activities, passenger port facilities and rail activities by ensuring that: 1. Mitigation measures are incorporated that <u>minimises the</u> avoid an increase in risk to people, property and infrastructure from the fault rupture of the Wellington Fault.
Toka Tū Ake EQC	FS70.31	Part 2 / Hazards and Risks / Natural Hazards / NH-P14	Support	Toka Tū Ake EQC consider it appropriate for terminology consistent with GRWC proposed RPS Change 1, based on standard risk based hazard management approaches, to be used throughout the WCC proposed district plan. We agree that ‘minimise’ natural hazard risk is a clearer instruction to bring risk in development to levels as low as reasonably practical than ‘reduce’ and ‘reduce or do not increase’.	Allow
CentrePort Limited	402.106	Hazards and Risks / Natural Hazards / NH-P14	Oppose	Opposes NH-P14 as it is considered unnecessary. Large parts of the Port Operations including the Kaiwharawhara ferry terminal location are included within the fault overlay. A policy limitation to 10 passengers or 10 employees would therefore render large parts of the Special Purpose Port Zone unusable for these activities.	Opposes NH-P14 (Subdivision, use and development which will be occupied by members of the public, or employees associated with the operational port activities, passenger port facilities and rail activities in the Wellington Fault Overlay) and seeks amendment.
CentrePort Limited	402.107	Hazards and Risks / Natural Hazards / NH-P14	Amend	Opposes NH-P14 as it is considered unnecessary. Large parts of the Port Operations including the Kaiwharawhara ferry terminal location are included within the fault overlay. A policy limitation to 10 passengers or 10 employees would therefore render large parts of the Special Purpose Port Zone unusable for these activities.	Amend NH-P14 (Subdivision, use and development which will be occupied by members of the public, or employees associated with the operational port activities, passenger port facilities and rail activities in the Wellington Fault Overlay) as follows: Manage subdivision, development and use associated within the operational port activities, passenger port facilities and rail activities within the Wellington Fault Overlay where the subdivision, development and use involves the construction of new buildings which will be occupied by members of the public, or more than 10 employees associated with the operational port activities, passenger port facilities and rail activities by ensuring that: 1. Mitigation measures are incorporated that avoid an increase in risk to people, property and infrastructure from the fault rupture of the Wellington Fault.
KiwiRail Holdings Limited	408.95	Hazards and Risks / Natural Hazards / NH-P14	Support	Supports policy that provides for and manages subdivision, development and use associated within the operational port activities, passenger port facilities and rail activities within the Wellington Fault Overlay.	Retain NH-P14 (Subdivision, use and development which will be occupied by members of the public, or employees associated with the operational port activities, passenger port facilities and rail activities in the Wellington Fault Overlay) as notified.
Greater Wellington Regional Council	351.138	Hazards and Risks / Natural Hazards / NH-P15	Support	Considers it is essential to provide for the maintenance and enhancement of natural systems and features where these features reduce the risk of the hazard. This aligns with operative RPS direction (Policies 51 and 52). Considers that Changes requested to the policies may necessitate amendments to the rules to have regard to the natural hazard direction in Proposed RPS Change 1.	Retain NH-P15 (Natural systems and features) as notified.
WCC Environmental Reference Group	377.58	Hazards and Risks / Natural Hazards / NH-P15	Support	NH-P15 is supported, as natural systems and features have multiple benefits including for carbon sequestration, amenity value, attractiveness, cost-effectiveness and supporting biodiversity and ecosystems	Retain NH-P15 (Natural systems and features) as notified.
Greater Wellington Regional Council	351.139	Hazards and Risks / Natural Hazards / NH-P16	Amend	Considers that NH-P16 as notified implies that the mitigation works will be hard-engineering based. This may not be the case, but it would be good to clarify in the policy that the mitigation works could consist of a range of options as outlined in NH-P17 and Policy 52 in Proposed RPS Change 1. Considers that Changes requested to the policies may necessitate amendments to the rules to have regard to the natural hazard direction in Proposed RPS Change 1.	Amend NH-P16 (Natural hazard mitigation works) as follows: Enable natural hazard mitigation or stream and river management works undertaken by a statutory agency or their nominated contractors or agents within Natural Hazard Overlays where <u>there is no other practicable option and</u> these will significantly decrease the existing risk to people’s lives and wellbeing, property and infrastructure.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Waka Kotahi NZ Transport Agency	FS103.53	Part 2 / Hazards and Risks / Natural Hazards / NH-P16	Support	Waka Kotahi supports enabling hazard mitigation or stream and river management works within the Natural Hazard Overlay where this will decrease the risk to people's lives and wellbeing, property and infrastructure.	Allow
Greater Wellington Regional Council	351.140	Hazards and Risks / Natural Hazards / NH-P17	Amend	Considers it appropriate to amend for consistency with Policy 52 in Proposed RPS Change 1. Green infrastructure has been defined in the WCC PDP with a strong focus on engineering systems that mimic natural systems, however there are other natural hazard mitigation measures that the Proposed RPS Change directs consideration of, which aren't captured by green infrastructure. We therefore seek for this policy to be broadened. Considers that Changes requested to the policies may necessitate amendments to the rules to have regard to the natural hazard direction in Proposed RPS Change 1.	Amend NH-P17 (Green infrastructure) as follows: Encourage the use of green infrastructure, non-structural, soft engineering or Mātauranga Māori approaches when undertaking natural hazard mitigation or stream and river management works by a statutory agency or their nominated contractors or agents within Natural Hazard Overlays.
WCC Environmental Reference Group	377.59	Hazards and Risks / Natural Hazards / NH-P17	Amend	Considers that NH-P17 should be amended so that Green Infrastructure is the default choice for undertaking natural hazard mitigation, with other options considered in circumstances where green infrastructure solutions do not exist, are not suitable, or are prohibitively expensive.	Amend NH-P17 (Green Infrastructure) as follows: Encourage <u>Require</u> the use of green infrastructure when undertaking natural hazard mitigation or stream and river management works by a statutory agency or their nominated contractors or agents within Natural Hazard Overlays <u>unless green infrastructure solutions do not exist, are not suitable or are prohibitively expensive.</u>
Wellington City Council	266.68	Hazards and Risks / Natural Hazards / NH-R1	Amend	Considers amendment needed for clarity and consistency.	Amend NH-R1 (Less hazard sensitive activities within all hazard areas) as follows: Less hazard sensitive activities within all hazard areas <u>Natural Hazard Overlays</u>
Kāinga Ora – Homes and Communities	FS89.103	Part 2 / Hazards and Risks / Natural Hazards / NH-R1	Oppose	Kāinga Ora opposes this submission as it is not consistent with the Kāinga Ora's primary submission.	Disallow
Horokiwi Quarries Ltd	271.20	Hazards and Risks / Natural Hazards / NH-R1	Support	Supports the provision of a permitted rule for activities within hazard areas.	Retain NH-R1 (Less hazard sensitive activities within all hazard areas) as notified.
Greater Wellington Regional Council	351.141	Hazards and Risks / Natural Hazards / NH-R3	Amend	Considers there appears to be a numbering error in respect of the discretionary activity rule for green infrastructure.	Seeks to amend numbering to state '2', not '1' as notified.
Precinct Properties New Zealand Limited	139.7	Hazards and Risks / Natural Hazards / NH-R4	Support	Supports NH-R4 (Additions to all buildings in the inundation area, overland flow paths or the stream corridor) and in particular supports the Permitted activity status, and the Restricted Discretionary activity status for additions to buildings in the inundation area and overland flow paths where the permitted activity status is not achieved.	Retain NH-R4 (Additions to all buildings in the inundation area, overland flow paths or the stream corridor) as notified.
Wellington City Council	266.69	Hazards and Risks / Natural Hazards / NH-R4	Amend	Considers amendment needed for clarity and consistency.	Amend NH-R4 (Additions to all buildings in the inundation area, overland flow paths or the stream corridor) as follows: Additions to all buildings in the inundation area, overland flow paths or the stream corridor within the Flood Hazard Overlay
Kāinga Ora – Homes and Communities	FS89.104	Part 2 / Hazards and Risks / Natural Hazards / NH-R1	Oppose	Kāinga Ora opposes this submission as it is not consistent with the Kāinga Ora's primary submission.	Disallow
Fire and Emergency New Zealand	273.80	Hazards and Risks / Natural Hazards / NH-R4	Support in part	Subject to the relief sought for NH-P4 (which forms a matter of discretion where permitted conditions are infringed), is supportive of this rule which seeks to provide for additions to buildings in the Ponding Area and Overland Flow path as permitted, restricted discretionary or discretionary activities. Notes that additions within a Stream Corridor would amount to a non-complying activity. The submitter has an existing fire station within a Stream Corridor which may need to be extended in the future and therefore seeks a discretionary activity status under such circumstances	Supports NH-R4 (Additions to all buildings in the inundation area, overland flow paths or the stream corridor) with amendment.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Fire and Emergency New Zealand	273.81	Hazards and Risks / Natural Hazards / NH-R4	Amend	Subject to the relief sought for NH-P4 (which forms a matter of discretion where permitted conditions are infringed, is supportive of this rule which seeks to provide for additions to buildings in the Ponding Area and Overland Flow path as permitted, restricted discretionary or discretionary activities. Notes that additions within a Stream Corridor would amount to a non-complying activity. The submitter has an existing fire station within a Stream Corridor which may need to be extended in the future and therefore seeks a discretionary activity status under such circumstances	Amend NH-R4.3 (Additions to all buildings in the inundation area, overland flow paths or the stream corridor) as follows: 3. Activity status: Discretionary Where: a. Compliance with the requirements of NH-R4.1.a cannot be achieved. b. Compliance with the requirements of NH-R4.1.c cannot be achieved but there is a functional and operational need for such an infringement.
Rimu Architects Ltd	318.20	Hazards and Risks / Natural Hazards / NH-R4	Amend	Considers that NH-R4 should be amended to clarify its wording. The wording used here conflicts with itself. Finished floor level cannot be at "the bottom of the floor joists or the base of the concrete floor slab". There should also be some provision to allow small additions to be built at the existing floor level. It may be impractical and very likely serve no purpose to have the addition built at a higher level if the entire ground floor of the dwelling is subject to inundation as the result of extreme rain events.	Amend NH-R4 (Additions to all buildings in the inundation area, overland flowpaths or the stream corridor) as follows: 1. Activity status: Permitted Where: a. When located within a inundation area, the finished floor levels of the addition for hazard sensitive and potentially hazard sensitive activities are demonstrated to be above the <u>level of 1% Flood Annual Exceedance Probability level plus the height of including an allowance for freeboard, where the finished floor level is to the bottom of the floor joists or the base of the concrete floor slab and an allowance for freeboard</u> ; or b. The additions are not located within an overland flowpaths; or c. The additions are not located within a stream corridor <u>or where the floor area of the extension is no more than 30m².</u>
BP Oil New Zealand, Mobil Oil New Zealand Limited and Z Energy Limited (the Fuel Companies)	372.89	Hazards and Risks / Natural Hazards / NH-R4	Support	NH-R4 is supported as it permits additions to all buildings in the Inundation Area of the Flood Hazard Overlay where the finished floor levels of the addition for Hazard Sensitive and Potentially Hazard Sensitive Activities are located above the 1% Flood Annual Exceedance Probability Level. This rule is supported as it would enable minor upgrading and maintenance works where those works will have minimal effect on the flood bearing capacity of the land.	Retain NH-R4 (Additions to all buildings in the inundation area, overland flowpaths or the stream corridor) as notified.
Southern Cross Healthcare Limited	380.30	Hazards and Risks / Natural Hazards / NH-R4	Support in part	Supports additions to buildings in an inundation area to be permitted where they comply with NH-R4.1a and restricted discretionary if they do not comply. Considers that these are appropriate controls.	Retain rule NH-R4.1a (Construction of new buildings and structures) as notified.
Southern Cross Healthcare Limited	380.31	Hazards and Risks / Natural Hazards / NH-R4	Oppose in part	Seeks that the provisions for NH-R4.2 are amended to be restricted discretionary. Considers that it is inappropriate for additions to existing buildings to trigger a discretionary process, where the existing building is already subject to an overland flowpath. Considers it would be more appropriate for additions to buildings within an overland flowpath to be a restricted discretionary activity, which would still give a consent authority appropriate discretion to consider natural hazard risks.	Opposes Policy NH-R4.2 (Additions to all buildings in the inundation area or overland flowpaths) in its current form and seeks amendment.
Southern Cross Healthcare Limited	380.32	Hazards and Risks / Natural Hazards / NH-R4	Amend	Seeks that the provisions for NH-R4.2 are amended to be restricted discretionary. Considers that it is inappropriate for additions to existing buildings to trigger a discretionary process, where the existing building is already subject to an overland flowpath. Considers it would be more appropriate for additions to buildings within an overland flowpath to be a restricted discretionary activity, which would still give a consent authority appropriate discretion to consider natural hazard risks. The amendments sought by Southern Cross would apply a consistent approach to inundation areas and overland flowpaths. These features can intersect, and do in this case, and it would be practical to take the same approach (which still allows for appropriate risk assessment by the Council).	Amend NH-R4.2 (Additions to all buildings in the inundation area, overland flowpaths or the stream corridor) as follows: 2. Activity status: Restricted discretionary Where: a. Compliance with the requirements of NH-R4.1.a and <u>NH-R4.1.b</u> cannot be achieved.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Southern Cross Healthcare Limited	380.33	Hazards and Risks / Natural Hazards / NH-R4	Oppose	<p>Considers that it is inappropriate for additions to existing buildings to trigger a discretionary process, where the existing building is already subject to an overland flowpath.</p> <p>Considers it would be more appropriate for additions to buildings within an overland flowpath to be a restricted discretionary activity, which would still give a consent authority appropriate discretion to consider natural hazard risks.</p> <p>The amendments sought by Southern Cross would apply a consistent approach to inundation areas and overland flowpaths. These features can intersect, and do in this case, and it would be practical to take the same approach (which still allows for appropriate risk assessment by the Council).</p>	<p>Amend NH-R4 (Additions to all buildings in the inundation area, overland flowpaths or the stream corridor) as follows:</p> <p>....</p> <p>2. Activity status: Discretionary</p> <p>Where:</p> <p>a. Compliance with the requirements of NH-R4.1 b cannot be achieved.</p> <p>...</p>
Argosy Property No. 1 Limited	383.28	Hazards and Risks / Natural Hazards / NH-R4	Support	Supports the direction of this rule to enable additions to buildings within a Flood Hazard Overlay - Inundation Area as a permitted activity or restricted discretionary activity.	Retain NH-R4 (Additions to all buildings in the inundation area, the overland flowpaths, or the stream corridor) as notified.
Oyster Management Limited	404.22	Hazards and Risks / Natural Hazards / NH-R4	Support	Supports the direction of this rule to enable additions to buildings within a Flood Hazard Overlay - Inundation Area as a permitted activity where compliance with NH-R4.1 cannot be achieved.	Retain NH-R4 (Additions to all buildings in the inundation area, overland flowpaths or the stream corridor) as notified.
Fabric Property Limited	425.14	Hazards and Risks / Natural Hazards / NH-R4	Support	Supports NH-R4 and in particular supports the Restricted Discretionary activity status for additions to buildings in the Inundation Area where the permitted activity status is not achieved.	Retain NH-R4 (Additions to all buildings in the inundation area, overland flowpaths or the stream corridor) as notified.
Wellington City Council	266.70	Hazards and Risks / Natural Hazards / NH-R5	Amend	Considers it necessary to fix a drafting error where both matters of discretion in NH-R5 (Additions to a building for a hazard-sensitive activity within a Fault Overlay) refer to potentially hazard sensitive activities.	<p>Amend NH-R5.2 (Additions to a building for a hazard-sensitive activity within a Fault Overlay) as follows:</p> <p>(...)</p> <p>Matters of discretion are:</p> <p>1. For additions to potentially hazard sensitive activities - the matters in NH-P11; and 2. For additions to potentially hazard sensitive activities - the matters in NH-P10.</p>
Fire and Emergency New Zealand	273.82	Hazards and Risks / Natural Hazards / NH-R5	Support in part	Supports this rule as it seeks to provide for additions to buildings for hazard-sensitive activities within a Fault Overlay as permitted or restricted discretionary activity. Notes that emergency service facilities are considered a hazard-sensitive activity and, as such, seeks the addition of a permitted activity standard which allows additions to buildings within a Fault Overlay when there is a functional and operational need to do so.	Supports NH-R5 (Additions to a building for a hazard-sensitive activity within a Fault Overlay) with amendment.
Fire and Emergency New Zealand	273.83	Hazards and Risks / Natural Hazards / NH-R5	Amend	Supports this rule as it seeks to provide for additions to buildings for hazard-sensitive activities within a Fault Overlay as permitted or restricted discretionary activity. Notes that emergency service facilities are considered a hazard-sensitive activity and, as such, seeks the addition of a permitted activity standard which allows additions to buildings within a Fault Overlay when there is a functional and operational need to do so.	<p>Amend NH-R5 (Additions to a building for a hazard-sensitive activity within a Fault Overlay) as follows:</p> <p>1. Activity status: Permitted</p> <p>Where:</p> <p>....</p> <p>d. The additions do not increase the Gross Floor Area of a Potentially Hazard Sensitive Activity in Wellington Fault Overlay or the Ohariu Fault Overlay by more than 30m²; <u>or</u></p> <p>e. <u>There is a functional and operational need for the activity in the Fault Overlay.</u></p>

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Toka Tū Ake EQC	282.10	Hazards and Risks / Natural Hazards / NH-R6	Amend	Considers that the plan does not adequately manage the risks of fault rupture, with single residential dwellings able to be located within the Wellington and Ohariu Fault Overlays. MfE guidelines for planning around an active fault advise that Buildings Importance Category (BIC) 2 (residential) structures are not developed within the fault avoidance zones (within 20 m of the fault race) of Recurrence Interval Class (RIC) I (≤2000 years) faults on brownfield sites and RIC I and II (2000 – 3500 years) on greenfield sites. The Wellington Fault is RIC I and the Ohariu Fault is RIC II. Considers that any residential development within the Fault Overlays should be avoided within 20 m of the Wellington Fault, even on an existing site.	Amend NH-R6-1 (Construction of a residential unit or conversion of any non-residential building into a residential unit in the Wellington Fault and Ohariu Fault Overlays) as follows: 1. Activity Status: Permitted Where: a. The development involves the construction of no more than one additional residential unit on a site; and b. The total number of residential units on a site is no more than two; <u>and</u> c. <u>It can be demonstrated that the unit is more than 20 m away from the Wellington or Ohariu Faults.</u>
Kimberley Vermaey	348.8	Hazards and Risks / Natural Hazards / NH-R6	Amend	Considers that due to the hazard and potential impacts presented by the Wellington fault, the maximum number of permitted dwellings should be limited to 1 instead of the proposed 2 dwellings. Any proposals involving more than 1 dwelling should be a non-complying activity within the fault hazard overlay.	Amend NH-R6 (Construction of a residential unit or conversion of any non-residential building into a residential unit in the Wellington Fault and Ohariu Fault Overlays) to allow only 1 residential unit per site. More than one dwelling per site should be assessed as a non-complying activity .
Fire and Emergency New Zealand	273.84	Hazards and Risks / Natural Hazards / NH-R7	Support in part	Considers they may have a functional or operational need to locate in Sheppard Fault and Terawhiti Fault Overlays. As such, FENZ seeks to remove the exclusion of emergency service facilities from the permitted activity rule in order to ensure efficient and effective emergency response times.	Supports NH-R7 (Hazard sensitive or potentially hazard sensitive activities in the Sheppard Fault and Terawhiti Fault Overlays) with amendment.
Fire and Emergency New Zealand	273.85	Hazards and Risks / Natural Hazards / NH-R7	Amend	Considers they may have a functional or operational need to locate in Sheppard Fault and Terawhiti Fault Overlays. As such, FENZ seeks to remove the exclusion of emergency service facilities from the permitted activity rule in order to ensure efficient and effective emergency response times.	Amend NH-R7 (Hazard sensitive or potentially hazard sensitive activities in the Sheppard Fault and Terawhiti Fault Overlays) as follows: 3. Activity Status: Permitted Where: a. The development does not involve the establishment of either: i. Educational facilities; ii. Health care facilities; or iii. Emergency service facilities.
Toka Tū Ake EQC	282.11	Hazards and Risks / Natural Hazards / NH-R7	Amend	Considers that hazard sensitive or potentially hazard sensitive activities should be located 20m away from the Sheppard or Terawhiti Faults. References the MfE guidelines for planning around active faults which indicate to avoid hazardous facilities and major hazardous facilities within 20 m of RIC III faults. Considers that no hazardous activities should be permitted within 20 m of either fault trace given Shepherd's Gully Fault is RIC III (3500 – 5000 years), and the Terawhiti fault has not yet had its recurrence interval calculated, no hazardous activities should be permitted within 20 m of either fault trace.	Amend NH-R7-1 (Hazard sensitive or potentially hazard sensitive activities in the Sheppard Fault and Terawhiti Fault Overlays) as follows: 1. Activity Status: Permitted Where: <u>a. It can be demonstrated that the activity is more than 20 m away from the Shepherd's Gully or Terawhiti Fault; and</u> <u>b. The development does not involve the establishment of either:</u> i. Educational facilities; ii. Health care facilities; or iii. Emergency service facilities; <u>or</u> <u>iv. Hazardous facilities and Major Hazardous Facilities.</u>
Ministry of Education	400.56	Hazards and Risks / Natural Hazards / NH-R7	Support in part	Support NH-R7 in part. In particular, the submitter supports the Discretionary Activity status for educational facilities and considers it to be appropriate.	Retain NH-R7 (Hazard sensitive or potentially hazard sensitive activities in the Sheppard Fault and Terawhiti Fault Overlays) with amendments.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Ministry of Education	400.57	Hazards and Risks / Natural Hazards / NH-R7	Amend	Seeks that NH-R7 be amended. The submitter seeks changes to this rule to more accurately reflect the policy direction outlined in NH-P12.	Amend NH-R7 (Hazard sensitive or potentially hazard sensitive activities in the Sheppard Fault and Terawhiti Fault Overlays) as follows: 1. Activity Status: Permitted Where: a. The development does not involve the establishment of either: iv. Educational facilities; v. Health care facilities; or vi. Emergency service facilities; <u>and</u> <u>b. The activity is located more than 20 m away from either the Sheppard's Fault or Terawhiti Fault;</u> <u>and</u> <u>c. The development incorporates mitigation measures that ensure the risk from fault rupture to people and property is reduced or not increased.</u> 2. Activity status: Discretionary Where: a. Compliance with the requirements of NH-R7.1.a, <u>b or c</u> cannot be achieved.
CentrePort Limited	402.108	Hazards and Risks / Natural Hazards / NH-R8	Support in part	Support subject to submission points on NH-P13 (Subdivision, use and development which will be occupied by members of the public, or employees associated with the operational port activities, passenger port facilities and rail activities in the Wellington Fault Overlay) and NH-P14 (Subdivision, use and development which will be occupied by members of the public, or employees associated with the operational port activities, passenger port facilities and rail activities in the Wellington Fault Overlay). Large parts of the Port are subject to Natural Hazards.	Retain NH-R8 (Operational port activities, passenger port facilities and rail activities) as notified, subject to amendments sought relating to NH-P13 (Subdivision, use and development which will be occupied by members of the public, or employees associated with the operational port activities, passenger port facilities and rail activities in the Wellington Fault Overlay) and NH-P14 (Subdivision, use and development which will be occupied by members of the public, or employees associated with the operational port activities, passenger port facilities and rail activities in the Wellington Fault Overlay).
KiwiRail Holdings Limited	408.96	Hazards and Risks / Natural Hazards / NH-R8	Support	Supports the ability to undertake operational port activities, passenger port facilities and rail activities as a permitted activity.	Retain NH-R8 (Operational port activities, passenger port facilities and rail activities) as notified.
Precinct Properties New Zealand Limited	139.8	Hazards and Risks / Natural Hazards / NH-R9	Support	Supports NH-R9 (Activities in the Liquefaction Hazard Overlay) as it provides for all activities except emergency service facilities in the Liquefaction Hazard Overlay to occur as a permitted activity.	Retain NH-R9 (Activities in the Liquefaction Hazard Overlay) as notified.
Fire and Emergency New Zealand	273.86	Hazards and Risks / Natural Hazards / NH-R9	Support in part	Considers they may have a functional or operational need to locate in the Liquefaction Hazard Overlay. As such, FENZ seeks to remove the exclusion of emergency service facilities from the permitted activity rule in order to ensure efficient and effective emergency response times.	Supports NH-R9 (Activities in the liquefaction hazard overlay) with amendment.
Fire and Emergency New Zealand	273.87	Hazards and Risks / Natural Hazards / NH-R9	Amend	Considers they may have a functional or operational need to locate in the Liquefaction Hazard Overlay. As such, FENZ seeks to remove the exclusion of emergency service facilities from the permitted activity rule in order to ensure efficient and effective emergency response times.	Amend NH-R9 (Activities in the liquefaction hazard overlay) as follows: 1. Activity Status: Permitted Where: a. It involves a less hazard sensitive or potentially hazard sensitive activity, or b. It involves a hazard sensitive activity that is not an emergency service facility.
Argosy Property No. 1 Limited	383.29	Hazards and Risks / Natural Hazards / NH-R9	Support	Supports potentially hazard sensitive activities being permitted in the Liquefaction Hazard Overlay.	Retain NH-R9 (Activities in the liquefaction hazard overlay) as notified.
Ministry of Education	400.58	Hazards and Risks / Natural Hazards / NH-R9	Support	Supports NH-R9, in particular the permitted activity status for the establishment of educational facilities in the Liquefaction Hazard Overlay.	Retain NH-R9 (Activities in the Liquefaction Hazard Overlay) as notified.
Fabric Property Limited	425.15	Hazards and Risks / Natural Hazards / NH-R9	Support	Supports NH-R9 as it provides for all activities except emergency service facilities in the Liquefaction Hazard Overlay to occur as a permitted activity. This is appropriate and proportionate to the risk level and ability to mitigate that risk.	Retain NH-R9 (Activities in the Liquefaction Hazard Overlay) as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Precinct Properties New Zealand Limited	139.9	Hazards and Risks / Natural Hazards / NH-R10	Support in part	Supports NH-R10 (Potentially hazard sensitive activities in the inundation area of the Flood Hazard Overlay), as it provides for Potentially Hazard Sensitive Activities in the Inundation Area of the Flood Hazard Overlay as a Permitted activity where conditions around floor levels are met.	Retain NH-R10.1 (Potentially hazard sensitive activities in the inundation area of the Flood Hazard Overlay) as notified.
Precinct Properties New Zealand Limited	139.10	Hazards and Risks / Natural Hazards / NH-R10	Support in part	Supports the Restricted Discretionary status for Potentially Hazard Sensitive Activities that do not comply with the conditions of NH-R10.1.	Retain NH-R10.2 (Potentially hazard sensitive activities in the inundation area of the Flood Hazard Overlay) as notified.
Rimu Architects Ltd	318.21	Hazards and Risks / Natural Hazards / NH-R10	Amend	Considers that NH-R10 should be amended to clarify its wording. The wording used here conflicts with itself. Finished floor level cannot be at "the bottom of the floor joists or the base of the concrete floor slab".	Amend NH-R10 (Potentially hazard sensitive activities in the inundation area of the Flood Hazard Overlay) as follows: 1. Activity Status: Permitted Where: a. When located within a Inundation Area of the Flood Hazard Overlay, the finished floor levels of the building for the potentially hazard sensitive activity is located above the 1% Flood Annual Exceedance Probability level, plus the height of including an allowance for freeboard, where the finished floor level is to the bottom of the floor joists or the base of the concrete floor slab <u>and an allowance for freeboard.</u> ...
BP Oil New Zealand, Mobil Oil New Zealand Limited and Z Energy Limited (the Fuel Companies)	372.90	Hazards and Risks / Natural Hazards / NH-R10	Support	NH-R10 is supported as it enables Potentially Hazard Sensitive Activities in the Inundation Area of the Flood Hazard Overlay as a permitted activity where the finished floor levels of the building for the Potentially Hazard Sensitive Activity is located above the 1% Flood Annual Exceedance Probability Level. This approach is supported in principle, which (in accordance with Policy NH-P6) seeks that measures be incorporated to ensure the risk to people, property and infrastructure both on the site and on adjacent properties is not significantly increased by Potentially Hazard Sensitive Activities.	Retain NH-R10 (Potentially hazard sensitive activities in the inundation area of the Flood Hazard Overlay) as notified.
Argosy Property No. 1 Limited	383.30	Hazards and Risks / Natural Hazards / NH-R10	Support	Supports the direction of this rule to enable potentially hazard sensitive activities within a Flood Hazard Overlay - Inundation Area as a permitted activity, or restricted discretionary activity if NH-R10.1 cannot be achieved.	Retain NH-R10 (Potentially hazard sensitive activities in the inundation area of the flood hazard overlay) as notified.
Oyster Management Limited	404.23	Hazards and Risks / Natural Hazards / NH-R10	Support	Supports direction of this rule to enable potentially hazard sensitive activities within a Flood Hazard Overlay - Inundation Area as a permitted activity, or restricted discretionary activity if NH-R10.1 cannot be achieved.	Retain NH-R10 (Potentially hazard sensitive activities in the inundation area of the Flood Hazard Overlay) as notified.
Investore Property Limited	405.31	Hazards and Risks / Natural Hazards / NH-R10	Support	Supports the provisions setting permitted and restricted discretionary activity status. Considers that this provides for an appropriate balance of risk management while retaining appropriate discretion to address natural hazard risks. [Refer to original submission for full reason].	Retain NH-R10 (Potentially hazard sensitive activities in the inundation area of the Flood Hazard Overlay) as notified.
Fabric Property Limited	425.16	Hazards and Risks / Natural Hazards / NH-R10	Support in part	Supports NH-R10, as it provides for Potentially Hazard Sensitive Activities in the Inundation Area of the Flood Hazard Overlay as a Permitted activity where conditions around floor levels are met. The commercial activities carried out at Fabric's properties are potentially hazard sensitive activities.	Retain NH-R10.1 (Potentially hazard sensitive activities in the inundation area of the Flood Hazard Overlay) as notified.
Fabric Property Limited	425.17	Hazards and Risks / Natural Hazards / NH-R10	Support in part	Supports the Restricted Discretionary activity status for Potentially Hazard Sensitive Activities that do not comply with the conditions of NH-R10.1. The restricted discretionary activity status provides for an appropriate balance of risk management while retaining appropriate discretion to address natural hazards.	Retain NH-R10.2 (Potentially hazard sensitive activities in the inundation area of the Flood Hazard Overlay) as notified.
Reading Wellington Properties Limited	441.1	Hazards and Risks / Natural Hazards / NH-R10	Support	Supports permitting potentially sensitive activities in the Flood Inundation overlay with mitigation (as outlined in NH-R10).	Retain NH-R10 (Potentially hazard sensitive activities in the inundation area of the Flood Hazard Overlay) as notified.
Stride Investment Management Limited	470.15	Hazards and Risks / Natural Hazards / NH-R10	Support	Supports the Potentially Hazard Sensitive Activities in the Inundation Area of the Flood Hazard Overlay being a Permitted Activity, as the commercial activities at the Johnsonville Town Centre are potentially hazard sensitive activities.	Retain NH-R10.1 (potentially hazard sensitive activities in the inundation area of the Flood Hazard Overlay) as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Stride Investment Management Limited	470.16	Hazards and Risks / Natural Hazards / NH-R10	Support	Supports the Restricted Discretionary Activity status for activities not complying with the conditions of NH-R10.1. (potentially hazard sensitive activities in the inundation area of the Flood Hazard Overlay)	Retain NH-R10.2 (potentially hazard sensitive activities in the inundation area of the Flood Hazard Overlay) as notified.
Fire and Emergency New Zealand	273.88	Hazards and Risks / Natural Hazards / NH-R11	Support in part	Considers they may have a functional or operational need to locate in the Flood Hazard Overlay. As such, FENZ seeks to remove the exclusion of emergency service facilities from the permitted activity rule in order to ensure efficient and effective emergency response times.	Supports NH-R11 (Hazard sensitive activities in the inundation area of the Flood Hazard Overlay) with amendment.
Fire and Emergency New Zealand	273.89	Hazards and Risks / Natural Hazards / NH-R11	Amend	Considers they may have a functional or operational need to locate in the Flood Hazard Overlay. As such, FENZ seeks to remove the exclusion of emergency service facilities from the permitted activity rule in order to ensure efficient and effective emergency response times.	Amend NH-R11 (Hazard sensitive activities in the inundation area of the Flood Hazard Overlay) as follows: Matters of discretion are: 1. The impact from the 1% Annual Exceedance Probability flood is low due to either the: a. Implementation mitigation measures; b. The shallow depth of the flood waters within the building; or c. Type of activity undertaken within the building; and 2. The risk to people and property is reduced or not increased; <u>and</u> 3. <u>There is a functional and operational need for the activity in the inundation area of the Flood Hazard overlay</u>
Rimu Architects Ltd	318.22	Hazards and Risks / Natural Hazards / NH-R11	Amend	Considers that NH-R11 should be amended to clarify its wording. The wording used here conflicts with itself. Finished floor level cannot be at "the bottom of the floor joists or the base of the concrete floor slab".	Amend NH-R11 (Hazard sensitive activities in the inundation area of the Flood Hazard Overlay) as follows: 1. Activity Status: Permitted Where: a. When located within a Inundation Area of the Flood Hazard Overlay, the finished floor levels of the building for the hazard sensitive activity is located above the 1% Flood Annual Exceedance Probability level, <u>plus the height of including an allowance for freeboard, where the finished floor level is to the bottom of the floor joists or the base of the concrete floor slab and an allowance for freeboard.</u>
BP Oil New Zealand, Mobil Oil New Zealand Limited and Z Energy Limited (the Fuel Companies)	372.91	Hazards and Risks / Natural Hazards / NH-R11	Support	NH-R11 is supported, as it enables Hazard Sensitive Activities in the Inundation Area of the Flood Hazard Overlay as a restricted discretionary activity where the finished floor levels of the building for the Hazard Sensitive Activity is located above the 1% Flood Annual Exceedance Probability Level. This rule is supported for the same reason as NH-R10.	Retain NH-R11 (Hazard sensitive activities in the inundation area of the Flood Hazard Overlay) as notified.
Southern Cross Healthcare Limited	380.34	Hazards and Risks / Natural Hazards / NH-R11	Support in part	Supports hazard sensitive activities in inundation areas being restricted discretionary where the finished floor levels of the building are located above the 1% Flood Annual Exceedance Probability level (including an allowance for freeboard, where the finished floor level is to the bottom of the floor joists or the base of the concrete floor slab.)	Retain rule NH-R11.1 (Hazard sensitive activities in the inundation area of the Flood Hazard Overlay) as notified.
Southern Cross Healthcare Limited	380.35	Hazards and Risks / Natural Hazards / NH-R11	Oppose in part	Seeks for the activity status for hazard sensitive activities in an inundation area that do not comply with Rule NH-R11.1 be discretionary. The activity status of non-complying may overstate the risk of locating such activities in an inundation area. It is appropriate for a consent authority to use its full discretion to undertake an assessment of the activity with the benefit of a consent application, and an assessment under s 104D of the Resource Management Act 1991 is not required.	Opposes Policy NH-R11.2 (Hazard sensitive activities in the inundation area of the Flood Hazard Overlay) in its current form and seeks amendment.
Southern Cross Healthcare Limited	380.36	Hazards and Risks / Natural Hazards / NH-R11	Amend	Seeks for the activity status for hazard sensitive activities in an inundation area that do not comply with Rule NH-R11.1 be discretionary. The activity status of non-complying may overstate the risk of locating such activities in an inundation area. It is appropriate for a consent authority to use its full discretion to undertake an assessment of the activity with the benefit of a consent application, and an assessment under s 104D of the Resource Management Act 1991 is not required.	Amend NH-R11.2 (Hazard sensitive activities in the inundation area of the Flood Hazard Overlay) as follows: 2. Activity Status: <u>Discretionary Non-Complying</u> Where: a. Compliance with the requirements of NHR11.1. a cannot be achieved.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Kāinga Ora Homes and Communities	391.158	Hazards and Risks / Natural Hazards / NH-R11	Oppose in part	NH-R11 is opposed, as identified flooding inundation areas carry the lowest risk of natural hazard potential and are more than capable of being mitigated.	Retain NH-R11 (Hazard sensitive activities in the inundation area of the Flood Hazard Overlay) with amendment.
Thorndon Residents' Association Inc	FS69.8	Part 2 / Hazards and Risks / Natural Hazards / General NH	Oppose	<p>Thorndon is susceptible to flooding. This must be an urban planning consideration.</p> <p>Recent weather events have caused underground streams to daylight themselves in areas predicted by the planning map. Climate change is anticipated to increase the frequency and impact of deluges on Thorndon's catchments (Te Ahumairangi Hill and the Pipitea Stream).</p> <p>This is critical information for planning scenarios. It must have impactful (and legal) significance.</p> <p>There is a vulnerability to flooding in Thorndon and this information must be formally woven into the DP to regulate urban development. This must also be assessed alongside, and with equivalent status, to other natural hazard vulnerabilities in Thorndon e.g. seismic, slope erosion, underground geology, etc.</p> <p>[Refer to Further submission for included map].</p>	Disallow
Kāinga Ora Homes and Communities	391.159	Hazards and Risks / Natural Hazards / NH-R11	Amend	Considers that NH-R12 should be amended to have a permitted activity pathway. Identified flooding inundation areas carry the lowest risk of natural hazard potential and are more than capable of being mitigated. Therefore it is considered that a permitted activity pathway should be available for development that achieves the 1% Flood Annual Exceedance Probability level, including allowance for freeboard.	<p>Amend NH-R11.1 (Hazard sensitive activities in the inundation area of the Flood Hazard Overlay) and its title as follows:</p> <p>Hazard sensitive activities in the inundation area of the Flood Hazard <u>Overlay Area</u></p> <p>1. Activity Status: Restricted Discretionary <u>Permitted</u></p> <p>Where:</p> <p>a. When located within a Inundation Area of the Flood Hazard <u>Overlay Area</u>, the finished floor levels of the building for the hazard sensitive activity is located above the 1% Flood Annual Exceedance Probability level, including an allowance for freeboard, where the finished floor level is to the bottom of the floor joists or the base of the concrete floor slab.</p> <p>Matters of discretion are:</p> <p>1. The impact from the 1% Annual Exceedance Probability flood is low due to either the:-</p> <p>a. Implementation mitigation measures;</p> <p>b. The shallow depth of the flood waters within the building; or</p> <p>c. Type of activity undertaken within the building; and</p> <p>2. The risk to people and property is reduced or not increased.</p>

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Thorndon Residents' Association Inc	FS69.9	Part 2 / Hazards and Risks / Natural Hazards / General NH	Oppose	<p>Thorndon is susceptible to flooding. This must be an urban planning consideration.</p> <p>Recent weather events have caused underground streams to daylight themselves in areas predicted by the planning map. Climate change is anticipated to increase the frequency and impact of deluges on Thorndon's catchments (Te Ahumairangi Hill and the Pipitea Stream).</p> <p>This is critical information for planning scenarios. It must have impactful (and legal) significance.</p> <p>There is a vulnerability to flooding in Thorndon and this information must be formally woven into the DP to regulate urban development. Toka Tū Ake EQC	FS70.54	Part 2 / Hazards and Risks / Natural Hazards / NH-R11	Oppose	<p>It is not appropriate for hazard sensitive activities, which include emergency facilities, hospitals, major hazardous facilities and childcare, within the flood inundation hazard overlay to have permitted status. Flooding is the most common natural hazard faced in Aotearoa, and repeated flooding events can have severe effects on properties and the wellbeing of residents. As the depth of expected flood inundation and thus risk varies within the overlay, restricted discretionary status allows for restriction of development within higher risk areas of the overlay. As discussed elsewhere, regulatory hazard overlays for flooding should remain in the district plan.</p>	Disallow
Greater Wellington Regional Council	FS84.78	Part 2 / Hazards and Risks / Natural Hazards / NH-R11	Oppose	<p>Greater Wellington oppose a permitted activity for hazard sensitive activities in the Flood Hazard Overlay as it does not allow sufficient oversight of development in natural hazard areas.</p>	Disallow / Seeks that NH-R11 is retained as notified.
Kāinga Ora Homes and Communities	391.160	Hazards and Risks / Natural Hazards / NH-R11	Amend	<p>Considers that NH-R12 should be amended to have a permitted activity pathway. Identified flooding inundation areas carry the lowest risk of natural hazard potential and are more than capable of being mitigated. Therefore it is considered that a permitted activity pathway should be available for development that achieves the 1% Flood Annual Exceedance Probability level, including allowance for freeboard.</p>	<p>Amend NH-R11.2 (Hazard sensitive activities in the inundation area of the Flood Hazard Overlay) as follows:</p> <p>Activity Status: Non-Complying <u>Restricted Discretionary</u></p> <p>Where:</p> <p>a. Compliance with the requirements of NH-R11.1.a cannot be achieved.</p> <p><u>Matters of discretion are:</u></p> <p><u>1. The degree to which the impact from the 1% Annual Exceedance Probability flood is low due to either the:</u></p> <p><u>a) Implementation of mitigation measures</u></p> <p><u>b) The shallow depth of the flood waters within the building; or</u></p> <p><u>c) Type of activity undertaken within the building</u></p> <p><u>2. Toka Tū Ake EQC	FS70.55	Part 2 / Hazards and Risks / Natural Hazards / NH-R11	Oppose	Hazard sensitive activities, which include emergency facilities, hospitals, major hazardous facilities and childcare, within the inundation area of the flood hazard zone should remain non-compliant when the floor level required for restricted discretionary status is not met. Amending this to discretionary provides a path for development which puts more people at risk from flood hazard.	Disallow
Oyster Management Limited	404.24	Hazards and Risks / Natural Hazards / NH-R11	Support	Supports the direction of this rule that hazard sensitive activities (e.g. emergency service facilities) are a RD activity within the Flood Hazard Overlay - Inundation Area	Retain NH-R11 (Hazard sensitive activities in the inundation area of the Flood Hazard Overlay) as notified.
Investore Property Limited	405.32	Hazards and Risks / Natural Hazards / NH-R11	Support in part	<p>Supports in part, as it provides for Hazard Sensitive Activities in the Inundation Area as a Restricted Discretionary activity where conditions around floor levels are met.</p> <p>Considers that the non-complying status where the restricted discretionary rule cannot be met is too onerous. Considers that a discretionary activity status is more appropriate and would be consistent with the approach taken to Hazard Sensitive Activities within the Overland Flowpaths (as provided in rule NH-R13).</p>	Retain NH-R11.2 (Hazard sensitive activities in the inundation area of the Flood Hazard Overlay) and seeks amendment.
Investore Property Limited	405.33	Hazards and Risks / Natural Hazards / NH-R11	Amend	Considers that the non-complying status where the restricted discretionary rule cannot be met is too onerous. Considers that a discretionary activity status is more appropriate and would be consistent with the approach taken to Hazard Sensitive Activities within the Overland Flowpaths (as provided in rule NH-R13).	<p>Amend NH-R11.2 (Hazard sensitive activities in the inundation area of the Flood Hazard Overlay) as follows:</p> <p>2. Activity Status: Non-Complying Discretionary</p> <p>Where:</p> <p>a. Compliance with the requirements of NH-R11.1.a cannot be achieved.</p>
Toka Tū Ake EQC	FS70.41	Part 2 / Hazards and Risks / Natural Hazards / NH-R11	Oppose	Hazard sensitive activities, which include emergency facilities, hospitals, major hazardous facilities and childcare, within the inundation area of the flood hazard zone should remain non-compliant when the floor level required for restricted discretionary status is not met. Amending this to discretionary provides a path for development which puts more people and property at risk from flood hazard.	Disallow
Investore Property Limited	405.34	Hazards and Risks / Natural Hazards / NH-R11	Support in part	<p>Supports in part, as it provides for Hazard Sensitive Activities in the Inundation Area as a Restricted Discretionary activity where conditions around floor levels are met.</p> <p>Considers that the non-complying status where the restricted discretionary rule cannot be met is too onerous. Considers that a discretionary activity status is more appropriate and would be consistent with the approach taken to Hazard Sensitive Activities within the Overland Flowpaths (as provided in rule NH-R13).</p>	Retain NH-R12.2 (Potentially Hazard sensitive activities in the inundation area of the Flood Hazard Overlay) and seeks amendment.
Investore Property Limited	405.35	Hazards and Risks / Natural Hazards / NH-R11	Amend	Considers that the non-complying status where the restricted discretionary rule cannot be met is too onerous. Considers that a discretionary activity status is more appropriate and would be consistent with the approach taken to Hazard Sensitive Activities within the Overland Flowpaths (as provided in rule NH-R13).	<p>Amend NH-R11.2 (Hazard sensitive activities in the inundation area of the Flood Hazard Overlay) as follows:</p> <p>2. Activity Status: Non-Complying Discretionary</p> <p>Where:</p> <p>a. Compliance with the requirements of NH-R12.1.a cannot be achieved.</p>

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Toka Tū Ake EQC	FS70.42	Part 2 / Hazards and Risks / Natural Hazards / NH-R12	Oppose	Potentially hazard sensitive activities, which include commercial activities, offices, and retail activities, within the inundation area of the flood hazard zone should remain non-compliant when the floor level required for restricted discretionary status is not met. Amending this to discretionary provides a path for development which puts more people and property at risk from flood hazard.	Disallow
Fabric Property Limited	425.18	Hazards and Risks / Natural Hazards / NH-R11	Support in part	Supports NH-R11.1 in part, as it provides for Hazard Sensitive Activities in the Inundation Area as a Restricted Discretionary activity where conditions around floor levels are met.	Supports NH-R11.1 (Hazard sensitive activities in the inundation area of the Flood Hazard Overlay), with amendment.
Fabric Property Limited	425.19	Hazards and Risks / Natural Hazards / NH-R11	Amend	Seeks amendments to NH-R11.2 to make the default activity status Discretionary within the Inundation Area for Hazard Sensitive Activities that do not comply with NHR11.1, rather than Non-Complying. Considers this would be consistent with the approach taken to Hazard Sensitive Activities within the Overland Flowpaths (as provided in rule NH-R13).	Amend NH-R11.2 as follows: 1. Activity Status: Non-Complying <u>Discretionary</u> Where: Compliance with the requirements of NH-R11.1.a cannot be achieved.
Stride Investment Management Limited	470.17	Hazards and Risks / Natural Hazards / NH-R11	Support in part	Supports in part NH-R11 (Hazard sensitive activities in the inundation area of the Flood Hazard Overlay), as it provides for Hazard Sensitive Activities in the Inundation Area as a Restricted Discretionary.	Retain NH-R11 (Hazard sensitive activities in the inundation area of the Flood Hazard Overlay) as notified, with amendments.
Stride Investment Management Limited	470.18	Hazards and Risks / Natural Hazards / NH-R11	Amend	Seeks amendments to NH-R11.2 (Hazard sensitive activities in the inundation area of the Flood Hazard Overlay) to make the default activity status Discretionary within the Inundation Area for Hazard Sensitive Activities that do not comply with NH-R11.1, rather than Non-Complying. Considers that this would be consistent with the approach taken to Hazard Sensitive Activities within the Overland Flowpaths (as provided in rule NH-R13).	Amend NH-R11.2 (Hazard sensitive activities in the inundation area of the Flood Hazard Overlay) as follows: 1. Activity Status: Non-Complying <u>Discretionary</u> Where: a. Compliance with the requirements of NH-R11.1.a cannot be achieved
Toka Tū Ake EQC	FS70.81	Part 2 / Hazards and Risks / Natural Hazards / NH-R11	Oppose	Hazard sensitive activities, which include emergency facilities, hospitals, major hazardous facilities and childcare, within the inundation area of the flood hazard zone should remain non-compliant when the floor level required for restricted discretionary status is not met. Amending this to discretionary provides a path for development which puts more people at risk from flood hazard.	Disallow
Precinct Properties New Zealand Limited	139.11	Hazards and Risks / Natural Hazards / NH-R12	Support in part	Supports NH-R12 (Potentially hazard sensitive activities in the overland flow path of the Flood Hazard Overlay) in part, as it provides for Potentially Hazard Sensitive Activities in the overland flow path overlay as a Restricted Discretionary activity where conditions around floor levels are met.	Not specified.
Precinct Properties New Zealand Limited	139.12	Hazards and Risks / Natural Hazards / NH-R12	Amend	Seeks amendments to NH-R12.2 to make the default activity status Discretionary within the overland flow path for Potentially Hazard Sensitive Activities that do not comply with NH-R12.1, rather than Non-Complying. This would be consistent with the approach taken to Hazard Sensitive Activities within the overland flow path overlay (as provided in rule NH-R13 (Hazard sensitive activities within the overland flow paths of the Flood Hazard Overlay)).	Amend NH-R12.2 (Potentially hazard sensitive activities in the overland flowpath of the Flood Hazard Overlay) as follows: 1. Activity Status: Non-Complying <u>Discretionary</u> Where: Compliance with the requirements of NH-R12.1.a cannot be achieved.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Rimu Architects Ltd	318.23	Hazards and Risks / Natural Hazards / NH-R12	Amend	Considers that NH-R12 should be amended to clarify its wording. The wording used here conflicts with itself. Finished floor level cannot be at "the bottom of the floor joists or the base of the concrete floor slab".	Amend NH-R12 (Potentially hazard sensitive activities in the overland flowpath of the Flood Hazard Overlay) as follows: 1. Activity Status: Permitted Where: a. When located within an overland flowpath of the Flood Hazard Overlay, the finished floor levels of the building for the potentially hazard sensitive activity is located above the 1% Flood Annual Exceedance Probability level, plus the height of including an allowance for freeboard, where the finished floor level is to the bottom of the floor joists or the base of the concrete floor slab and an allowance for freeboard.
Kāinga Ora Homes and Communities	391.161	Hazards and Risks / Natural Hazards / NH-R12	Support in part	NH-R12 is supported for its general approach that impacts on hazard sensitive activities should be mitigated in medium risk areas in accordance with NH-P2. On this basis rule NH-R12.2 needs to be amended as overland flowpaths are identified as a medium risk area in the chapter introduction.	Retain NH-R12 (Potentially hazard sensitive activities in the overland flowpath of the Flood Hazard Overlay) with amendment.
Kāinga Ora Homes and Communities	391.162	Hazards and Risks / Natural Hazards / NH-R12	Amend	Considers that NH-R12 should be amended to have a discretionary activity status. Overland flowpaths are identified as a medium risk area in the chapter introduction. Consequently, it is sought that the consent status of NH-R12 be made discretionary rather than non-complying as non-complying status is generally utilised for avoidance rather than mitigation.	Amend NH-R12.2 (Potentially hazard sensitive activities in the overland flowpath of the Flood Hazard Overlay) as follows: Activity Status: Non-Complying <u>Discretionary</u> Where: a. Compliance with the requirements of NH-R12.1.a cannot be achieved
Toka Tū Ake EQC	FS70.56	Part 2 / Hazards and Risks / Natural Hazards / NH-R12	Oppose	Hazard sensitive activities, which include emergency facilities, hospitals, major hazardous facilities and childcare, within the overland flowpath area of the flood hazard overlay should remain non-compliant when freeboard levels are not met. Unimpeded overland flowpaths are important in allowing floodwater to escape and recede. Amending this to discretionary provides a path for development which puts more people at risk from flood hazard and may worsen the effects of flooding in the surrounding area.	Disallow
Greater Wellington Regional Council	FS84.79	Part 2 / Hazards and Risks / Natural Hazards / NH-R12	Oppose	Greater Wellington oppose the discretionary pathway suggested by the submitter as this undermines the risk-based approach adopted in the Proposed District Plan.	Disallow / Seeks that NH-R12 is retained as notified.
Oyster Management Limited	404.25	Hazards and Risks / Natural Hazards / NH-R12	Oppose in part	Supports restricted discretionary activity status for NH-R12.1, but considers that if RD status is not achieved, the activity status should become Discretionary rather than NC.	Amend NH-R12 (Potentially hazard sensitive activities in the overland flowpath of the Flood Hazard Overlay) to: 2. Activity status: Non-complying <u>Discretionary</u> Where: a. Compliance with the requirements of NH-R12.1.a cannot be achieved
Oyster Management Limited	404.26	Hazards and Risks / Natural Hazards / NH-R12	Support in part	Supports restricted discretionary activity status for NH-R12.1, but considers that if RD status is not achieved, the activity status should become Discretionary rather than NC.	Retain NH-R12.1 (Potentially hazard sensitive activities in the overland flowpath of the Flood Hazard Overlay) as notified.
Oyster Management Limited	404.27	Hazards and Risks / Natural Hazards / NH-R12	Amend	Supports restricted discretionary activity status for NH-R12.1, but considers that if RD status is not achieved, the activity status should become Discretionary rather than NC.	Amend NH-R12 (Potentially hazard sensitive activities in the overland flowpath of the Flood Hazard Overlay) as follows: 2. Activity status: Non-complying <u>Discretionary</u> Where: a. Compliance with the requirements of NH-R12.1.a cannot be achieved

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Toka Tū Ake EQC	FS70.68	Part 2 / Hazards and Risks / Natural Hazards / NH-R12	Oppose	Potentially hazard sensitive activities, which include commercial activities, offices, and retail activities, within the overland flowpath area of the flood hazard overlay should remain non-compliant when freeboard levels are not met. Unimpeded overland flowpaths are important in allowing floodwater to escape and recede. Impeded overland flowpaths may also lead to larger effects on the environment, such as contaminated flood water from commercial activities affecting water quality and human and environmental health. Amending this to discretionary provides a path for development which puts more people at risk from flood hazard and may worsen the effects of flooding in the surrounding area.	Disallow
Stride Investment Management Limited	470.19	Hazards and Risks / Natural Hazards / NH-R12	Support in part	Supports in part NH-R12 (Potentially hazard sensitive activities in the overland flowpath of the Flood Hazard Overlay) as it provides for Potentially Hazard Sensitive Activities in the Overland Flowpath of the Flood Hazard Overlay as a Restricted Discretionary activity where conditions around floor levels are met.	Retain NH-R12 (Potentially hazard sensitive activities in the overland flowpath of the Flood Hazard Overlay) as notified, with amendments.
Stride Investment Management Limited	470.20	Hazards and Risks / Natural Hazards / NH-R12	Amend	Seeks amendments to make the default activity status Discretionary within the Overland Flowpath overlay for Potentially Hazard Sensitive Activities that do not comply with NH-R12.1, rather than Non-Complying. Considers that the risks from activities within an overland flowpath overlay can be appropriately assessed as a Discretionary Activity. Considers that a Discretionary status would also be consistent with the activity status for Hazard Sensitive Activities in the Overland Flowpath as set out in NH-R13.	Amend NH-R12.2 (Potentially hazard sensitive activities in the overland flowpath of the Flood Hazard Overlay) as follows: 2. Activity Status: Non-Complying <u>Discretionary</u> Where: a. Compliance with the requirements of NH-R12.1.a cannot be achieved
Toka Tū Ake EQC	FS70.82	Part 2 / Hazards and Risks / Natural Hazards / NH-R12	Oppose	Potentially hazard sensitive activities, which include commercial activities, offices, and retail activities, within the inundation area of the flood hazard zone should remain non-compliant when the floor level required for restricted discretionary status is not met. Amending this to discretionary provides a path for development which puts more people at risk from flood hazard.	Disallow
Southern Cross Healthcare Limited	380.37	Hazards and Risks / Natural Hazards / NH-R13	Oppose in part	Seeks that hazard sensitive activities within an overland flowpath are a restricted discretionary activity. This would be more consistent with Policy NH-P1 to take a risk-based approach to subdivision, use and development based on the hazards posed. It would be more appropriate for the Proposed Plan to take a consistent approach to assessing hazard sensitive activities in overland flowpaths and inundation areas. While we appreciate that the Council has identified overland flowpaths and inundation areas as having different hazard rankings, the level of risk arising from the hazard will depend on the actual activity. This rule relates to the risk to people involved in hazard sensitive activities, and the risks are similar to people involved in hazard sensitive activities in an inundation area to hazard sensitive activities in an overland flowpath.	Opposes NH-R13 (Hazard sensitive activities within the overland flowpaths of the Flood Hazard Overlay) in its current form and seeks amendment.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Southern Cross Healthcare Limited	380.38	Hazards and Risks / Natural Hazards / NH-R13	Amend	<p>Seeks that hazard sensitive activities within an overland flowpath are a restricted discretionary activity. This would be more consistent with Policy NH-P1 to take a risk-based approach to subdivision, use and development based on the hazards posed.</p> <p>It would be more appropriate for the Proposed Plan to take a consistent approach to assessing hazard sensitive activities in overland flowpaths and inundation areas.</p> <p>While we appreciate that the Council has identified overland flowpaths and inundation areas as having different hazard rankings, the level of risk arising from the hazard will depend on the actual activity. This rule relates to the risk to people involved in hazard sensitive activities, and the risks are similar to people involved in hazard sensitive activities in an inundation area to hazard sensitive activities in an overland flowpath.</p>	<p>Amend NH-R13 (Hazard sensitive activities within the overland flowpaths of the Flood Hazard Overlay) as follows:</p> <p>1. Activity Status: <u>Restricted</u> Discretionary</p>
Ministry of Education	400.59	Hazards and Risks / Natural Hazards / NH-R13	Support	Supports NH-R13 as it enables the establishment of educational facilities within the overland flowpaths of the Flood Hazard Overlay as a Discretionary Activity. The submitter considers this to be appropriate.	Retain NH-R13 (Hazard sensitive activities within the overland flowpaths of the Flood Hazard Overlay) as notified.
Oyster Management Limited	404.28	Hazards and Risks / Natural Hazards / NH-R13	Amend	Considers that this rule should provide a tiered approach to activity status, specifically where compliance with the floor level (as per NH-12.1.a) is a RD activity.	<p>Amend NH-R13 (Hazard sensitive activities within the overland flowpaths of the Flood Hazard Overlay) as follows:</p> <p><u>1. Activity status: Restricted discretionary</u> <u>Where:</u> <u>a. Compliance with NH-R13.1.a is achieved.</u></p> <p>2. Activity status: Discretionary Where: a. Compliance with NH-R13.1.a is not achieved.</p> <p>[Inferred decision requested].</p>
Toka Tū Ake EQC	FS70.69	Part 2 / Hazards and Risks / Natural Hazards / NH-R13	Oppose	Hazard sensitive activities, which include emergency facilities, hospitals, major hazardous facilities and childcare, within the overland flowpath area of the flood hazard overlay should remain discretionary. Unimpeded overland flowpaths are important in allowing floodwater to escape and recede. Impeded overland flowpaths may also lead to larger effects on the environment, such as contaminated flood water from commercial activities affecting water quality and human and environmental health. Amending this to restricted discretionary provides a path for development which puts more people at risk from flood hazard and may worsen the effects of flooding in the surrounding area.	Disallow
Oyster Management Limited	404.29	Hazards and Risks / Natural Hazards / NH-R13	Oppose in part	Considers that this rule should provide a tiered approach to activity status, specifically where compliance with the floor level (as per NH-12.1.a)) is a RD activity.	<p>Amend NH-R13 (Hazard sensitive activities within the overland flowpaths of the Flood Hazard Overlay) as follows:</p> <p><u>1. Activity status: Restricted discretionary</u> <u>Where:</u> <u>a. Compliance with NH-R13.1.a is achieved.</u></p> <p>2. Activity status: Discretionary Where: a. Compliance with NH-R13.1.a is not achieved.</p> <p>[Inferred decision requested].</p>
Investore Property Limited	405.36	Hazards and Risks / Natural Hazards / NH-R13	Support	Supports the Discretionary activity status for Hazard Sensitive Activities.	Retain NH-R13 (Hazard sensitive activities within the overland flowpaths of the Flood Hazard Overlay) as notified.

Historical and Cultural Values - Historic Heritage

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Stride Investment Management Limited	470.21	Hazards and Risks / Natural Hazards / NH-R13	Support	Supports NH-R13 (Hazard sensitive activities within the overland flowpaths of the Flood Hazard Overlay).	Retain NH-R13 (Hazard sensitive activities within the overland flowpaths of the Flood Hazard Overlay) as notified.
Ministry of Education	400.60	Hazards and Risks / Natural Hazards / NH-R15	Support	Supports NH-R15 as the submitter considers that the non-complying activity status for hazard sensitive activities within the stream corridors of the Flood Hazard Overlay is appropriate.	Retain NH-R15 (Potentially hazard sensitive activities and hazard sensitive activities within the stream corridors of the Flood Hazard Overlay) as notified.
Toka Tū Ake EQC	282.12	Hazards and Risks / Natural Hazards / NH-R16	Amend	Considers that residential units should be included as hazard sensitive activities within the Wellington and Ohariu Fault Overlays. References the MfE guidelines for planning around an active fault that advise that Buildings Importance Category (BIC) 2 (residential) structures are not developed within the fault avoidance zones (within 20 m of the fault race) of Recurrence Interval Class (RIC) I (≤2000 years) faults on brownfield sites and RIC I and II (2000 – 3500 years) on greenfield sites. The Wellington Fault is RIC I and the Ohariu Fault is RIC II. Considers that any residential development within the Fault Overlays should be avoided within 20 m of the Wellington Fault, even on an existing site.	Amend NH-R16-1 (Hazard sensitive activities (excluding a single residential unit) within the Wellington Fault and Ohariu Fault Overlay) as follows: Hazard sensitive activities (excluding a single residential unit) within the Wellington Fault and Ohariu Fault Overlay 1. Activity status: Non-Complying
Ministry of Education	400.61	Hazards and Risks / Natural Hazards / NH-R16	Support	Supports NH-R16 as the submitter considers that non-complying activity status for hazard sensitive activities within the Wellington Fault and Ohariu Fault Overlay is appropriate.	Retain NH-R16 (Hazard sensitive activities (excluding a single residential unit) within the Wellington Fault and Ohariu Fault Overlay) as notified.
James Coyle	307.3	Historical and Cultural Values / General point on Historical and Cultural Values / General point on Historical and Cultural Values	Support	Supports Heritage and Culture as they give a sense of place. Projects that retain elements of heritage should be supported and encouraged.	Retain the Historical and Cultural Values chapter as notified. [Inferred decision requested]
WCC Environmental Reference Group	377.60	Historical and Cultural Values / General point on Historical and Cultural Values / General point on Historical and Cultural Values	Support in part	Generally supportive.	Not specified.
Andrew Haddleton	23.1	Historical and Cultural Values / Historic Heritage / General HH	Oppose	Considers that in other cities, such as Auckland and Christchurch, councillors have pushed back to protect their heritage. WCC should do the same. Wellington is famous for its heritage housing and appearance. Allowing more concrete and glass buildings will ruin the tourist appeal of the city.	Not specified.
Heritage New Zealand Pouhere Taonga	70.13	Historical and Cultural Values / Historic Heritage / General HH	Support in part	[No reasons given other than decision]	Supports Historic Heritage Introduction with amendment.
Onslow Historical Society	FS6.3	Part 2 / Historical and Cultural Values / Historic Heritage / General HH	Support	OHS supports robust provisions for protecting historic heritage from inappropriate activities.	Allow
Historic Places Wellington Inc	FS111.2	Part 2 / Historical and Cultural Values / Historic Heritage / General HH	Support	HPW supports robust provisions for protecting historic heritage from inappropriate activities.	Allow

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Heritage New Zealand Pouhere Taonga	70.14	Historical and Cultural Values / Historic Heritage / General HH	Amend	Considers that as Appendix 1 (Historic Heritage Advice Notes) contains reference to the NZ Archaeological Association data base and the role of HNZPT with regards to archaeological sites, it would also be beneficial for plan users reading the Historic Heritage chapter to be reminded of the provisions which apply to both recorded and unrecorded archaeological sites.	Amend the introduction section of the Historic Heritage Chapter where it refers to APP1 - Historic Heritage Advice Notes as follows: ... APP1 - Historic Heritage Advice Notes contains useful information on assessing effects on heritage values and the different ways in which historic heritage is addressed by regulation and advocacy. <u>APP1 also contains reference to the provisions of the Heritage New Zealand Pouhere Taonga Act 2014 which protect all archaeological sites.</u> ...
Onslow Historical Society	FS6.4	Part 2 / Historical and Cultural Values / Historic Heritage / General HH	Support	OHS supports robust provisions for protecting historic heritage from inappropriate activities.	Allow
Historic Places Wellington Inc	FS111.3	Part 2 / Historical and Cultural Values / Historic Heritage / General HH	Support	HPW supports robust provisions for protecting historic heritage from inappropriate activities.	Allow
Lucy Telfar Barnard	72.1	Historical and Cultural Values / Historic Heritage / General HH	Oppose	Opposes the inclusion of 134 Brougham Street within the Moir Street Heritage Area (Item 44 of SCHED3 - Heritage Areas). 134 Brougham Street (The property) is not a heritage example of Edwardian or character housing. Relevance to the Moir family home has been lost because of significant alterations to the property. Structure and weather proofing of the property is deteriorating and heritage area status makes repairs and development difficult. John Moir only lived in the property for <5 years. Most of the Heritage Assessment Criteria do not specifically or reasonably apply to the property. Heritage Area status will reduce ability to densify Mt Victoria and maximise the development potential of this particular site. [See original submission for further detail]	Seeks that 134 Brougham Street is excluded from the Moir Street Heritage Area (Item 44 of SCHED3 - Heritage Areas).
Turi & Jane Park	73.2	Historical and Cultural Values / Historic Heritage / General HH	Not specified	Considers that there was insufficient correspondence from the Council on the proposed inclusion of 134 Brougham Street within the Moir Street Heritage Area and that they have been let down by the Council	[Not specified]
Oliver Sangster	112.8	Historical and Cultural Values / Historic Heritage / General HH	Amend	Opposed to the inclusion of the Gordon Wilson Flats on SCHED1-Heritage buildings (# 299). Considers that the flats are an embarrassing and sorry sight in a time when there is a growing problem of homelessness and high rents in Wellington. Considers that the flats need to be demolished to make way for more housing near our city centre and Victoria University. Considers that because they already have Heritage New Zealand protection, further protection under the district plan is unnecessary.	Seeks that the demolition or alteration of any kind of Item 299 (Gordon Wilson Flats) on SCHED1- Heritage Buildings be a permitted activity.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Sophie Kahn	161.2	Historical and Cultural Values / Historic Heritage / General HH	Not specified	[Refer to original submission for full reasons]	Seeks that only public owned structures should listed as heritage in the Proposed District Plan, unless privately owned property has the agreement of an owner.
Ian Attwood	FS16.11	Historical and Cultural Values / Historic Heritage / General HH	Support	Privately-owned, independent suburban homes should not be included in the Plan unless within a recognised precinct or with the agreement of the owner.	Allow / Seeks that Kahn House to be wholly removed from Schedule 1 'Heritage Buildings'.
Sarah Cutten and Matthew Keir	FS91.33	Historical and Cultural Values / Historic Heritage / General HH	Support	The further submitter supports the view in relation to private and isolated homes. Notes that it is unfair to burden private homeowners so significantly and discount and dismiss the impact of their economic wellbeing and property rights.	Allow / Seeks that Item 520 (Khan House) be removed from SCHED1-Heritage Buildings. The Council does not list private homes in SCHED1 without owners consent. Especially in the case where these are homes are isolated and not part of a cohesive precinct or area that can be appreciated by the public.
Sophie Kahn	161.3	Historical and Cultural Values / Historic Heritage / General HH	Not specified	Considers that the Council should offer to purchase those homes it proposed to list when owners are not supportive of listing.	[None specified].
Ian Attwood	FS16.12	Historical and Cultural Values / Historic Heritage / General HH	Support	If Council wishes to preserve architectural heritage to the benefit of citizens and community and without owners incurring losses, then it should be required to acquire the properties and/or financially support the retention and maintenance.	Allow / Seeks that Kahn House to be wholly removed from Schedule 1 'Heritage Buildings'.
Sarah Cutten and Matthew Keir	FS91.34	Historical and Cultural Values / Historic Heritage / General HH	Support	The further submitter supports council offering to purchase homes proposed for listing. Notes that the point the original submitter makes is aligned with the section titles "No nonregulatory incentive options for protection have been considered" on page 47 of our submission and "The Council is naturally incentivised to over-provide Heritage" on page 21. Notes that requiring the Council to compensate owners for the heritage services they mandate, or for them to purchase properties where owners are opposed, would provide important balance and restraint to their incentives to over procure heritage as they bear no cost of doing so.	Allow / Seeks that the Council offer to purchase homes proposed for listing when the owners are opposed. Seeks that the Council investigate other non-regulatory incentive schemes (as expected under the RMA) including enduring rates remissions for private owners providing heritage services to the city.
Historic Places Wellington	182.8	Historical and Cultural Values / Historic Heritage / General HH	Support in part	[No specific reason given beyond decision requested - refer to original submission]	Retain the HH - Historic Heritage chapter with amendment.
Historic Places Wellington	182.9	Historical and Cultural Values / Historic Heritage / General HH	Support	Supports continuing to promote seismic strengthening of heritage places.	Not specified.
Historic Places Wellington	182.10	Historical and Cultural Values / Historic Heritage / General HH	Oppose in part	Considers the chapter has become too permissive in its drafting and opposes it to this degree.	Seeks that the chapter takes a more mandatory, conservation and preservation focus.
Parliamentary Service	FS48.3	Part 2 / Historical and Cultural Values / Historic Heritage / General HH	Oppose	Parliamentary Service opposes this submission as it does not recognise that in some circumstances, a mandatory focus on conservation and preservation is not appropriate and cannot enable the sustainable long-term use of heritage buildings.	Disallow
Historic Places Wellington	182.11	Historical and Cultural Values / Historic Heritage / General HH	Amend	Opposes facadism as an outcome for heritage buildings.	Add a new policy or rule to the HH - Historic Heritage Chapter to make it clear that only in exceptional instances will facadism be appropriate, and only if consistent with ICOMOS guidelines.
Mike Camden	226.2	Historical and Cultural Values / Historic Heritage / General HH	Amend	Considers that HH rules are very "Enabling".	Seeks that the Historic Heritage chapter is amended to support more reuse, refurbishment and conservation.
Mike Camden	226.3	Historical and Cultural Values / Historic Heritage / General HH	Amend	[No specific reason given beyond decision requested - refer to original submission]	Seeks amendments to the Historic Heritage chapter for protection for stained and decorative heritage glass windows in Heritage Buildings.
Lorraine and Richard Smith	230.11	Historical and Cultural Values / Historic Heritage / General HH	Amend	Considers that historic elements in the Wellington Botanic Gardens (e.g. Talavera Cable Car Station) should be given heritage protection. [Refer to original submission for details]	Seeks that heritage protection is extended in the Botanic Gardens.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Pukepuke Pari Residents Incorporated	237.3	Historical and Cultural Values / Historic Heritage / General HH	Not specified	Considers that Hay Street has heritage values, as evidenced in the report titled 'Hay Street Heritage Area - Heritage Assessment' included with the submission.	Seeks that development in Hay Street is restricted due to the heritage values (as a qualifying matter).
Escape Investments Limited	FS136.86	Part 2 / Historical and Cultural Values / Historic Heritage / General HH	Oppose	The submitter oppose points 237.2, 237.3, & 237.5 to restrict development due to 'qualifying matters' and retain Hay Street as MRZ. Qualifying Matters are set out in s771 of the RMA Enabling Housing Supply and Other Matters Amendment Act 2021. Hay Street itself does not have any qualifying matters. Site specific limitations are addressed in a s88 RMA report Assessment of Environmental Effects. While Oriental Bay's special character has been addressed in the special Precinct Height Control's (PREC-03) overlay, it is not a Qualifying Matter. [See original Further Submission for full reasoning].	Disallow
Cherie Jacobson	251.2	Historical and Cultural Values / Historic Heritage / General HH	Not specified	Considers that heritage is given inadequate weight in the PDP. The heritage policies have a focus on enabling works as opposed to enabling conservation. There is a lack of evidence indicating that the existing heritage and character provisions in the District Plan are affecting the housing market in Wellington. Heritage and character can make a significant contribution to Wellington's climate change goals by reducing emissions and waste through sustainable resource use.	Not specified.
Dean Knight and Alan Wendt	265.2	Historical and Cultural Values / Historic Heritage / General HH	Amend	Considers that when Salisbury Garden Court was listed as a heritage area, at the initiative of owners and residents, the key heritage feature sought to be protected was historic connectedness. The heritage controls imposed are, in practice, too heavy and go well beyond what is sought to be protected. [Refer to original submission for full reason]	Seeks that Item 24 (Salisbury Garden Court) of SCHED3 - Heritage Areas) is exempt from all Heritage Zone Controls except HH-P14 (New buildings and structures within heritage areas), HH-R13 (New buildings and structures within heritage areas), HH-P16 (Total demolition of contributing buildings and structures) and HH-R1 (Total demolition of contributing buildings and structures).
Wellington City Council	266.71	Historical and Cultural Values / Historic Heritage / General HH	Amend	Considers minor amendment necessary for consistency. In addition it is considered that this section makes no mention of the recognised heritage values of buildings.	Amend Historic Heritage Introduction as follows: (...) Sustainable long-term use One of the best ways to protect <u>the recognised heritage values of</u> built heritage is to ensure that it remains in a sustainable long term <u>long-term</u> use.
Property Council New Zealand	338.7	Historical and Cultural Values / Historic Heritage / General HH	Support in part	Supports heritage as a qualifying matter. Retaining genuine heritage in Wellington is critical in maintaining a high quality, desirable and liveable building environment. It is however important that the Council ensures Wellington has sufficient development capacity when engaging with property owners on proposed new heritage listings.	Not specified.
Parliamentary Service	375.1	Historical and Cultural Values / Historic Heritage / General HH	Support in part	The Historical Heritage chapter introduction is generally supported, but wording in the Sustainable long-term use objective should be amended. The objective needs to more clearly recognise the need to ensure heritage buildings are able to continue to be used in a practicable way – "sustainable long-term use" does not adequately capture the concept of ensuring buildings are able to continue to be used in a practicable and functional way.	Retain the Historic Heritage Introduction with amendments.
Parliamentary Service	375.2	Historical and Cultural Values / Historic Heritage / General HH	Amend	Considers that the Sustainable long-term use objective needs to more clearly recognise the need to ensure heritage buildings are able to continue to be used in a practicable way – "sustainable long-term use" does not adequately capture the concept of ensuring buildings are able to continue to be used in a practicable and functional way.	Amend the Historic Heritage Chapter Introduction to acknowledge that it is important to ensure that built heritage can continue to be used in a practicable and functional way.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Argosy Property No. 1 Limited	383.31	Historical and Cultural Values / Historic Heritage / General HH	Support	Supports the Introduction to the extent that it recognises that 'reuse' (defined as "changing the use of a building or object from that which it was originally constructed for") of a heritage building can be appropriate and facilitated by additions or alterations. This is important to balance the importance of retaining heritage values while enabling appropriate use of heritage buildings	Retain HH - Introduction as notified.
Parliamentary Service	FS48.1	Part 2 / Historical and Cultural Values / Historic Heritage / General HH	Support	Parliamentary Service supports this submission because "reuse" and "appropriate use" may facilitate works which enable the continued practicable and functional use of heritage buildings.	Allow
Taranaki Whānui ki te Upoko o te Ika	389.64	Historical and Cultural Values / Historic Heritage / General HH	Amend	[No specific reason given beyond decision requested - refer to original submission].	Seeks that within the 'Cross references to other relevant District Plan provisions' that it is amended to include Sites and Areas of Significance to Māori chapter.
Taranaki Whānui ki te Upoko o te Ika	389.65	Historical and Cultural Values / Historic Heritage / General HH	Amend	[No specific reason given beyond decision requested - refer to original submission].	Seeks that chapter includes appropriate rules to ensure protection of SASMs in or near identified Historic Heritage sites.
Greater Wellington Regional Council	FS84.123	Part 2 / Historical and Cultural Values / Historic Heritage / General HH	Support	Greater Wellington support the inclusion and protection of SASM.	Allow / Seek provisions which protect SASM.
Kāinga Ora Homes and Communities	391.163	Historical and Cultural Values / Historic Heritage / General HH	Oppose in part	The Historic Heritage chapter is partially opposed as it is unclear which rules apply to a scheduled heritage building, a non-scheduled contributing building, and a non-scheduled non-contributing buildings.	Opposes the Historic Heritage chapter and seeks amendments.
Kāinga Ora Homes and Communities	391.164	Historical and Cultural Values / Historic Heritage / General HH	Amend	Considers that the Historic Heritage chapter should be amended to provide further clarification and should define contributing and non-contributing buildings, scheduled and non-scheduled building. It is not clear which rules apply to a scheduled heritage building, a non-scheduled contributing building, and a non-scheduled non-contributing buildings. Amendments are required throughout the chapter to provide clarity to when rules apply to respective buildings in Historic Heritage chapter.	Seeks amendments to the Historic Heritage chapter to provide clarity in provisions applying to: - Scheduled heritage buildings, - Non-scheduled heritage buildings considered to be contributing buildings; and - Non-scheduled heritage buildings that are non-contributing.
Murray Pillar	393.10	Historical and Cultural Values / Historic Heritage / General HH	Support in part	Supports the heritage rules but notes that they are very "enabling" i.e. permissive.	Not specified.
Murray Pillar	393.11	Historical and Cultural Values / Historic Heritage / General HH	Amend	Supports the heritage rules but notes that they are very "enabling" i.e. permissive.	Seeks that the heritage rules are drafted to support more conservation.
Parliamentary Service	FS48.4	Part 2 / Historical and Cultural Values / Historic Heritage / General HH	Oppose	Parliamentary Service opposes this submission as it does not recognise that in some circumstances, a focus on conservation is not appropriate and cannot enable the sustainable long-term use of heritage buildings.	Disallow
Wellington Heritage Professionals	412.30	Historical and Cultural Values / Historic Heritage / General HH	Oppose	Considers that there is a lack of evidence to support the heritage content of the PDP, including for the following reasons: - The provisions lack a reliable evidence base and a qualitative report on the effectiveness of the operative plan provisions in necessary. - There is little evidence to support claims that the provisions are working as intended - There is little evidence that the heritage and character provisions are affecting the housing market in wellington. [Refer to original submission for full reason]	Not specified

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Wellington Heritage Professionals	412.31	Historical and Cultural Values / Historic Heritage / General HH	Not specified	<p>Considers that Wellington has struggled to retain its historic heritage and continues to lose listed and unlisted heritage of national significance.</p> <p>Considers that the city centre only retains a small pool of representative heritage from its past, and this is dominated by public buildings and clusters of commercial buildings. Many of Wellington's surviving historic buildings have been significantly altered, partially demolished or incorporated into larger buildings.</p>	Not specified
Wellington Heritage Professionals	412.32	Historical and Cultural Values / Historic Heritage / General HH	Oppose	<p>Considers that some of the heritage and plan content does not reflect best practice.</p> <p>Considers that the heritage policies have a focus on enabling works as opposed to enabling conservation, based on an assumption that heritage protection has prevented necessary development.</p> <p>Opposes more permissive rules for historic heritage and considers that finite environmental values like historic heritage need discretion through consent processes</p> <p>Considers that this is a fundamental misunderstanding of ICOMOS New Zealand charter and the principles of heritage conservation.</p>	Not specified.
Parliamentary Service	FS48.5	Part 2 / Historical and Cultural Values / Historic Heritage / General HH	Oppose	Parliamentary Service opposes this submission as it does not provide for appropriate activities or recognise that a focus on conservation may prevent works that enable the sustainable long-term use of heritage buildings.	Disallow
Wellington Heritage Professionals	412.33	Historical and Cultural Values / Historic Heritage / General HH	Oppose	<p>Considers concern that if the plan as proposed is implemented, historic heritage and character which is of significance to current and future Wellingtonians, will be lost or altered.</p> <p>Considers concern that the proposed plan's more permissive rules for historic heritage, the inadequacy of the schedule in reflecting Wellington's heritage, and the reductive approach to character areas.</p> <p>[See original submission for full reasons]</p>	Not specified.
Wellington Heritage Professionals	412.34	Historical and Cultural Values / Historic Heritage / General HH	Oppose	<p>Considers that there is little reliable evidence that the current district plan has been effective at preventing or mitigating the loss of Wellington's historic heritage.</p> <p>Considers that the move in the PDP towards making more activities permitted is likely to result in adverse effects on historic heritage.</p> <p>Considers that finite environmental values like historic heritage need discretion through consent processes. As such, we are concerned that the more permissive rules in the proposed district plan for historic heritage will not adequately provide for the protection of historic heritage as a matter of national importance under section 6f of the RMA and will not achieve objective HH-02 Protecting Historic Heritage.</p>	Seeks that more historic heritage related activities need the activity status of discretionary. [Inferred decision requested].
Wellington Heritage Professionals	412.35	Historical and Cultural Values / Historic Heritage / General HH	Amend	Considers that it is not necessary to refer to partial demolition as a way of facilitating sustainable long term use as it is captured by 'alterations' and suggests partial demolition applications would be welcome, whereas they should be discouraged.	Amend the introduction to the Historic Heritage chapter as follows: ... Both ongoing use and reuse can be a sustainable long term use for built heritage and can be facilitated by compatible additions and alterations, and/or carefully done partial demolition.
Wellington Heritage Professionals	412.36	Historical and Cultural Values / Historic Heritage / General HH	Amend	Considers that the reference to 'continuity of buildings and structures' as it relates to heritage areas is not clear. Some significant heritage areas are not 'continuous' and contain gaps where non-contributing buildings are located.	[inferred decision requested] clarify the meaning of 'continuity of buildings and structures' under the description of heritage areas.
Wellington Heritage Professionals	412.37	Historical and Cultural Values / Historic Heritage / General HH	Amend	Considers that the 'sustainable long term use' section should explicitly allow for stabilisation and mothballing. This section is very focussed on 'use' as the be all and end all. However, if there isn't a reasonable use right now that doesn't mean the only other option is demolition.	Amend the section on sustainable long term use to explicitly allow for stabilisation and mothballing.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Parliamentary Service	FS48.6	Part 2 / Historical and Cultural Values / Historic Heritage / General HH	Oppose	Parliamentary Service opposes this submission as it does not provide for appropriate activities or recognise that a focus on conservation may prevent works that enable the sustainable long-term use of heritage buildings.	Disallow
Wellington Heritage Professionals	412.38	Historical and Cultural Values / Historic Heritage / General HH	Amend	<p>Considers that the description of Heritage areas should be explicit (like the current District Plan) that it is 'because of their contribution to the value of the heritage area the contributor buildings warrant the same treatment and control as listed heritage items'.</p> <p>Considers that the values of contributing buildings in heritage areas should be protected to the same degree as individual heritage buildings in heritage areas to ensure that the heritage values of the area as a whole are maintained.</p> <p>Considers that there is not reliable evidence in the s32 report to support this change.</p>	Amend the introduction to the Historic Heritage chapter description of heritage areas to be explicit that it is 'because of their contribution to the value of the heritage area the contributor buildings warrant the same treatment and control as listed heritage items'.
Wellington Heritage Professionals	412.39	Historical and Cultural Values / Historic Heritage / General HH	Amend	Considers that In line with submission point on EW-S10reference to the application of the earthworks chapter should be removed for scheduled archaeological sites, as HH-P20, HH-R18 provide a more nuanced approach to assessing the effects of earthworks on scheduled archaeological sites	Amend the 'Cross references to other relevant district plan provisions' note so that scheduled archaeological sites are not referenced and accordingly not managed by the earthworks provisions.
VicLabour	414.22	Historical and Cultural Values / Historic Heritage / General HH	Support	Supportive of more flexible heritage building protections to allow for more sustainable changes to be made.	Not specified
Sarah Cutten and Matthew Keir	415.4	Historical and Cultural Values / Historic Heritage / General HH	Not specified	<p>Considers that Council has misinterpreted their obligations to provide for the protection of heritage under the purpose of the RMA. Incentives for the Council to protect heritage are unbalanced and without proper diligence to the Section 32 evaluation may not actually be delivering a net benefit to society that is simply assumed. Council has interpreted Section 6(f) to mean that heritage is a fait accompli and trumps other societal value. However, a High Court ruling stated that "the consent authority must ensure its consideration is founded upon an assessment of whether or not destruction of historic heritage is a balanced response, and a fair, appropriate and reasonable outcome".</p> <p>Council has focused on regulatory solutions alone and has dismissed any consequences or costs of their regime as inconsequential. There is no confidence that there are net benefits to society from the heritage listing at 28 Robieson St, because Council did not fully identify the effects of their proposal or take quantitative assessment to a required level of detail that is proportional to the scale and significance of the regulatory intervention.</p> <p>[Refer to original submission for full reasons, including attachments]</p>	Not specified.
Ian Attwood	FS16.3	Part 2 / Historical and Cultural Values / Historic Heritage / General HH	Support	The veracity of Council claims about heritage value and societal benefits are questioned.	Allow / Seeks that 28 Robieson Street be wholly removed from Schedule 1 'Heritage Buildings'.
Sarah Cutten and Matthew Keir	415.5	Historical and Cultural Values / Historic Heritage / General HH	Not specified	<p>Considers that Heritage listings would have a direct impact of \$319 million. This indicates the order of magnitude of the scale and significance of the proposal and should not be diminished or dismissed. It requires that the Council apply a level detail and rigour that is proportional. It requires them to invest more effort. Council will cost hundreds of thousands of dollars to owners to meet quotas that have little merit of basis.</p> <p>[Refer to original submission for full reason, including attachments]</p>	Not specified.
Sarah Cutten and Matthew Keir	415.6	Historical and Cultural Values / Historic Heritage / General HH	Not specified	<p>Considers that heritage and building evaluation and classification from Council is weak. The evidence base for historic heritage section of the Section 32 evaluation is lacking in transparency and accountability.</p> <p>Futhermore, many modern buildings are not recorded as modern by the Council due to a lack of any robust classification system or process.</p> <p>[Refer to original submission for full reason, including attachments]</p>	Seeks that Council use a more robust and transparent heritage assessment and classification system. [Inferred decision requested]

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Ian Attwood	FS16.4	Part 2 / Historical and Cultural Values / Historic Heritage / General HH	Support	Process of identification seems arbitrary and inequitable impacting some and not others. Regrettably precedence where to be consistent any home designed by an award-winning architect should be considered heritage and scheduled.	Allow / Seeks that 28 Robieson Street be wholly removed from Schedule 1 'Heritage Buildings'.
Sarah Cutten and Matthew Keir	415.7	Historical and Cultural Values / Historic Heritage / General HH	Not specified	Considers modern movement architects have a long history of contributing to public debate around affordable housing design, social housing, urban planning, and heritage. Many, including Bill Toomath and the Architecture Centre wrote or contributed to sustainable housing manifestos for architectural interest groups. [Refer to original submission for full reason, including attachments]	Not specified.
Sarah Cutten and Matthew Keir	415.8	Historical and Cultural Values / Historic Heritage / General HH	Not specified	Considers that the Council does not know how many of the existing scheduled heritage listings are private homes. The existing heritage inventory was analysed, and it is estimated that 224 private homes have individual heritage protection. In the District Plan, the Council has proposed the inclusion of 52 new heritage listings, of which half are homes (26 homes), and 11 new heritage areas which affects 350 homes. This is on top of the existing 224 individual homes listed and the 100 homes within the existing heritage areas. Character areas impact another 5000 homes in Wellington. Considers it is notable that Wellington has nearly three times the number of houses protected relative to the total housing stock in Auckland. [Refer to original submission for full reasons, including attachments]	Not specified.
Sarah Cutten and Matthew Keir	415.9	Historical and Cultural Values / Historic Heritage / General HH	Not specified	Considers that the council is proposing to expand homes with heritage protection from about 324 homes to about 700. This increase is an additional 376 homes and means under the proposal, almost 1% of all the homes in Wellington will be protected and have their development restricted, in the suburbs and within walking distance of the city centre and transport hubs. [Refer to original submission for full reasons, including attachments]	Not specified.
Sarah Cutten and Matthew Keir	415.10	Historical and Cultural Values / Historic Heritage / General HH	Not specified	Considers the council is naturally incentivised to over-provide Heritage protection, and interest groups have similar incentives to Council. Considers no non-regulatory mechanisms or options were considered in the Proposed District Plan which misses an opportunity to rethink and rebalance how incentives work to better deliver on the requirement in the RMA to treat the protection of heritage with importance. [Refer to original submission for full reasons, including attachments]	Not specified.
Sarah Cutten and Matthew Keir	415.11	Historical and Cultural Values / Historic Heritage / General HH	Not specified	Considers that the Council is failing its responsibilities under the RMA . Their level of rigour, policies, approach to identification, evaluation frameworks, consideration of options, and level of performance assessment against heritage objectives are all lacking in the context of national importance prescribed within the Act. For instance, Section 6(f) of the RMA has been misinterpreted by Council. Furthermore, it is considered that there is an implicit expectation of access when closely interpreting the definition of historic heritage in the RMA. This would reasonably remove or reduce the heritage value of isolated private suburban homes compared to publicly accessible heritage buildings and landmarks. Considers that it seems likely that when the RMA was drafted in 1991 and heritage was defined, policy makers had not envisioned isolated homes from the 1960's, with no real stand out qualities form others on the street, no public access, and limited visibility, would be targeted for heritage protection. [Refer to original submission for full reason, including attachments]	Seeks that the Council better identify, evaluate, consider and assess heritage objectives in the context of national importance prescribed within the Act, particularly in regard to heritage listing specific properties. [Inferred decision requested]
Ian Attwood	FS16.5	Part 2 / Historical and Cultural Values / Historic Heritage / General HH	Support	Not specified.	Allow / Seeks that all privately-owned, independent suburban homes not in an identified heritage precinct removed from the District Plan.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Sophie Kahn	FS76.4	Historical and Cultural Values / Historic Heritage / General HH	Support	<p>The Submitter (415) points to the implicit expectation of public access to Historic Heritage when the RMA was drafted. This calls for an independent evaluation of the WCC's justification for the inclusion of private homes that will never be accessible to the public (and in many cases are not at all or barely visible to the public) onto the Plan.</p> <p>The submission (415) points out that is highly probable originators of the RMA would not have imagined that Councils of the future would interpret their document to mean homes like 28 Robieson St and Kahn House which are inaccessible and barely visible should be targeted for protection.</p> <p>The Submitters (415) query what the Council is trying to achieve by placing private homes that are visually unremarkable in their surrounds and that are outside any recognised heritage precinct on the Plan and submit that this achieves none of the objectives of the NPS-UD and DP regarding efficient use of land and housing supply.</p>	<p>Amend / Delete Item 514 (28 Robieson St) from SCHED 1 - Heritage Buildings</p> <p>Seeks that Council: -seek and make publicly available an independent legal evaluation of the the RMA's expectation of access, and if the proposed WCC's inclusion of inaccessible private homes are aligned with the independent evaluation</p>
Willis Bond and Company Limited	415.13	Historical and Cultural Values / Historic Heritage / General HH	Not specified	<p>Considers that there is a significant power imbalance between the Council and isolated homeowners in regard to heritage listings. Considers the powers granted to consent authorities under the RMA to regulate are significant. Considers individuals and isolated homeowners have less voice, weight, time, or energy, to stand up for themselves. Considers the Council has both direct authority to regulate property owners, access to better information, and greater resources. [Refer to original submission for full reasons, including attachments]</p>	Not specified.
Sophie Kahn	FS76.7	Historical and Cultural Values / Historic Heritage / General HH	Support	<p>The Submitters express their concern regarding the significant imbalance of power that exists in this process. Refer to submission for their detailed illustrations of this point.</p> <p>The further submitter agrees with their concern and has taken all reasonable steps to attempt to minimise the devastating effects of this power imbalance during my opposition to the listing of the Kahn House, including many attempts to engage with Council staff. The Submitters imply that an independent review needs to be carried out to ensure WCC acts fairly and reasonably with the extreme power they possess over Wellington's homeowners. The further submitter concurs.</p>	<p>Amend / Delete Item 514 (28 robieson St) from SCHED 1 - Heritage Buildings.</p> <p>- Appoint an independent body to assess that Council are acting fairly and reasonably with owners of private homes</p>
Sarah Cutten and Matthew Keir	415.16	Historical and Cultural Values / Historic Heritage / General HH	Amend	<p>Considers that the Council needs to be cognisant of the selection biases they have imbedded in their identification processes for historic heritage. by selecting 10 streets at random and checking every building on them for any historic significance. Such an approach might generate a fairer and more representative list of buildings for historic consideration, the same way randomisation is embedded in medical trials to prevent biases. [Refer to original submission for full reasons, including attachments]</p>	<p>Seeks that the Council amend its heritage identification process to include more randomisation, so as to prevent bias. [Inferred decision requested]</p>
Sarah Cutten and Matthew Keir	415.17	Historical and Cultural Values / Historic Heritage / General HH	Not specified	<p>Considers the evaluation of the effectiveness and performance of the current regulatory settings is extremely limited in regard to heritage protection. Considers that the heritage protection regime needs to find a balance heritage protection required by the RMA, the desire to identify historic heritage, the value of heritage to the wider community, the performance of an operative plan, and the cohesive integration with other policies.</p> <p>It is considered that the Council has dismissed the burden imposed on private property owners of proposed heritage listings, which is not aligned with the intent of the RMA.</p> <p>The heritage protection regime does not incentivise documentation, identification, nomination or preservation of historic heritage. It does not educate owners of heritage properties, and instead incentivises owners of unlisted properties to remove, destroy or significantly alter unknown heritage value to preserve monetary value, and even accelerate destruction prior to any proposed listing. Financial incentives are also considered inadequate. It is considered that there are significant issues with the current heritage protection regime. Considers that no evaluation of the effectiveness of the current regime against objectives and principles has taken place. [Refer to original submission for full reasons, including attachments]</p>	<p>Seeks that the current regime's effectiveness be evaluated against objectives and principles and this be used to inform a future regime, which should find a balance between the importance of heritage protection in the Resource Management Act, the desire to identify historic heritage, the value of heritage to the wider community abnd other factors such as teh burden imposed of private property owners of heritage listings. [Inferred decision requested, refer to original submission]</p>

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Sarah Cutten and Matthew Keir	415.18	Historical and Cultural Values / Historic Heritage / General HH	Not specified	Considers that the council has only considered a narrow set of high-level options to protect heritage in their section 32 report. Considers that there is a singular focus on a regulatory approach, and costs relating to owners on newly listed properties has been dismissed. [Refer to original submission for full reasons, including attachments]	Not specified.
Sarah Cutten and Matthew Keir	415.19	Historical and Cultural Values / Historic Heritage / General HH	Not specified	Considers there are issues with the Heritage Issues and Options report including that it contains unsubstantiated claims, disputes findings within the paper e.g. that categorisation of buildings is not appropriate, and considers the state of some of the report content is very poor. Considers a heritage database of unlisted items as referred to in the report should be made public. [Refer to original submission for full reasons]	Not specified.
Sarah Cutten and Matthew Keir	415.20	Historical and Cultural Values / Historic Heritage / General HH	Not specified	Considers that no non-regulatory incentive options for heritage protection have been considered. [Refer to original submission for full reasons]	Seeks that the council considers non-regulatory incentive options for heritage protection [Inferred decision requested]
Sarah Cutten and Matthew Keir	415.21	Historical and Cultural Values / Historic Heritage / General HH	Not specified	Considers that no options for a collaborative or regional approach to heritage protection have been considered [Refer to original submission for full reasons]	Seeks that the council considers options for a collaborative or regional approach to heritage protection [Inferred decision requested]
Sarah Cutten and Matthew Keir	415.22	Historical and Cultural Values / Historic Heritage / General HH	Not specified	Considers that digital heritage protection should be considered by Council. Having historic heritage digitally preserved provides many benefits over physical protection and may increase collective heritage value to society. Knowing a physical structure is already digitally preserved also changes the interpretation of what is an appropriate or inappropriate physical modification. A digital approach is less costly to society and would offer real value and convenience in the sustainable management of natural and physical resources, so people can interact, and experience natural and physical resources virtually, without any impact on the resources themselves. Good examples of digital heritage protection are provided by Google Street View Time Machine and CityViewAR. [Refer to original submission for full reasons]	Seeks that the Council considers digital heritage protection techniques.[Inferred decision requested]
Sarah Cutten and Matthew Keir	415.23	Historical and Cultural Values / Historic Heritage / General HH	Not specified	Considers that the digital innovation team at Wellington City Council should get in touch with the Heritage Team at the Council to collaborate on options regarding digital preservation and integration of heritage into the Wellington digital twin programme. [Refer to original submission for full reasons]	Seeks that digital heritage preservation be integrated into the Wellington digital twin programme.
Sarah Cutten and Matthew Keir	415.24	Historical and Cultural Values / Historic Heritage / General HH	Not specified	Considers that the Council has failed to effectively consider cost and benefits of protection of heritage, which is required under Section 32 of the RMA. The responsibility in 'providing for' the protection of heritage does not require scheduling of buildings, it does not preclude incentive regimes, and it does not rule out the Council establishing a voluntary regime. Considers that section 32 evaluations must contain a level of detail that corresponds to the scale and significance of economic, social, and cultural effects that are anticipated from the implementation of the proposal. [Refer to original submission for full reasons, including attachments]	Not specified.
Ian Attwood	FS16.7	Part 2 / Historical and Cultural Values / Historic Heritage / General HH	Support	No evidence presented by WCC of the costs and benefits of heritage protection for 28 Robieson Street.	Allow / Seeks that 28 Robieson Street be wholly removed from Schedule 1 'Heritage Buildings'.
Sophie Kahn	FS76.6	Historical and Cultural Values / Historic Heritage / General HH	Support	The Submitters contend that an accurate and professional-level cost:benefit analysis be required in the case of Heritage. The Submitters point out that no such analysis has been done by the WCC and that given the scale and significance of the economic, social and cultural outcomes this is unjustifiable. The further submitter fully support this position and echo this point for the Kahn House. A detailed cost:benefit analysis is required under Section 32 of the RMA. As this has not been carried out and provided to homeowners, all private homes without owner support should be removed from the plan.	Amend / Delete Item 514 (28 Robieson St) from SCHED 1 - Heritage Buildings. Seeks to remove all privately-owned homes from the list where the owner is opposed to listing as no analysis on the costs owners will face has been performed. Seeks the decision that private homes cannot be listed without appropriate considerations of the cost and benefits, as required in the RMA.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Sarah Cutten and Matthew Keir	415.25	Historical and Cultural Values / Historic Heritage / General HH	Not specified	Considers the Council has failed to identify the full range of effects and describe their scale and significance in regard to the heritage listing of 28 Robieson Street. [Refer to original submission for full reasons, including attachments]	Not specified.
Ian Attwood	FS16.8	Part 2 / Historical and Cultural Values / Historic Heritage / General HH	Support	Council has not adequately assessed and accounted for the impact of loss of capital value (financial loss to owners), the increased compliance costs, the constraints on development and alterations, and impact on marketability because of scheduling.	Allow / Seeks that 28 Robieson Street be wholly removed from Schedule 1 'Heritage Buildings'.
Sarah Cutten and Matthew Keir	415.26	Historical and Cultural Values / Historic Heritage / General HH	Not specified	Considers the council has failed to quantify costs and benefits of their proposal (heritage listing of 28 Robieson Street), including largely ignoring the way society responds to their incentives, the cost to society of having more restrictive use of land and the costs that fall on owners. [Refer to original submission for full reasons, including attachments]	Not specified.
Sarah Cutten and Matthew Keir	415.27	Historical and Cultural Values / Historic Heritage / General HH	Not specified	Considers the Council has failed to include a level of information and certainty or properly identify risks in regard to the heritage listing of 28 Robieson Street. [Refer to original submission for full reasons, including attachments]	Not specified.
Sarah Cutten and Matthew Keir	415.28	Historical and Cultural Values / Historic Heritage / General HH	Not specified	The Section 32 evaluation is considered to be inadequate in regard to the heritage listing of 28 Robieson Street. A detailed list of objections is provided. [Refer to original submission for full reasons, including attachments]	Not specified.
Sarah Cutten and Matthew Keir	415.29	Historical and Cultural Values / Historic Heritage / General HH	Not specified	Considers that the heritage assessment of the Toomath House (28 Robieson Street) is weak and overstates the heritage value of the building, while ignoring costs. The Council's report makes unsubstantiated claims, or errors. [Refer to original submission for full reasons, including attachments]	Not specified.
Ian Attwood	FS16.9	Part 2 / Historical and Cultural Values / Historic Heritage / General HH	Support	Heritage assessment is not balanced by alternative views on architectural merit and heritage value. There is no provision at the outset for the architectural merit or significance/influence to be debated or challenged, or an opposing view to be recorded.	Allow / Seeks that 28 Robieson Street be wholly removed from Schedule 1 'Heritage Buildings'.
Sarah Cutten and Matthew Keir	415.30	Historical and Cultural Values / Historic Heritage / General HH	Not specified	Considers that while the heritage assessment provided by the Council attempts to assess the significance of heritage in the submitter's home (28 Robieson Street), it makes no attempt to consider or assess the heritage value. Considers that a framework that assesses "Use" and "non-use" values is appropriate. [Refer to original submission for full reasons, including attachments]	Not specified.
Willis Bond and Company Limited	416.53	Historical and Cultural Values / Historic Heritage / General HH	Support in part	Support Historic Heritage protection in part. [Refer to original submission for full reason].	Retain Historic Heritage provisions, with amendments [inferred decision requested].
Willis Bond and Company Limited	416.54	Historical and Cultural Values / Historic Heritage / General HH	Amend	Submitter seeking further certainty regarding Historic Heritage provisions. Submitter recognises the importance of Wellington's historic heritage. It is an important aspect of the City and must be protected. In the submitter's experience, however, the lines can become blurred at the boundaries between heritage areas and other areas of the City. Submitter considers that they need greater certainty in proximity controls so that all plan users understand where heritage protections do and do not apply.	Seeks greater certainty in the Historic Heritage proximity controls so that all plan users understand where heritage protections do and do not apply. [Inferred decision requested]
Penny Griffith	418.5	Historical and Cultural Values / Historic Heritage / General HH	Amend	[No specific reason given beyond decision requested - see original submission for full reason]	Seeks that Wellington City Council formally recognises Historic Places Wellington as an organisation with specialist knowledge, who get consulted with on heritage policy issues.
Paul Gregory Rutherford	424.12	Historical and Cultural Values / Historic Heritage / General HH	Amend	[No specific reason beyond decision requested - refer to original submission]	Seeks that the Proposed District Plan add a new objective that reflects the positive contributions heritage, character and quality design, and the ability to read stories in the urban landscape, make to overall wellbeing.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Paul Gregory Rutherford	424.13	Historical and Cultural Values / Historic Heritage / General HH	Amend	Considers that Wellington's liveability, and its character and heritage, can be protected at the same time as new housing is added. Not every old building needs to be retained, but neither are people's sense of connection and place disposable commodities. Rather than wholesale deregulation and the widespread removal of protections, heritage and character can be considered as part of community dialogue, while new construction focuses first on under-utilised land.	Seeks that I submit that the draft District Plan needs to better recognise and provide for the protection of heritage from inappropriate development and better take into account the need to maintain and enhance amenity values.
Peter Fordyce	431.3	Historical and Cultural Values / Historic Heritage / General HH	Amend	Considers that Heritage Areas should be expanded. Wellington's built heritage comprises a vital part of the city, featuring a cityscape that is not only unique within New Zealand, but the world. This contributes to not only tourism, but fosters a sense of "place" for residents. While the rules as they currently exist provide some protection, this does not go far enough, and irreplaceable buildings and streetscapes are at risk of being lost.	Seeks that Heritage Areas be expanded.
Kay Larsen	447.7	Historical and Cultural Values / Historic Heritage / General HH	Amend	[No specific reason given beyond decision requested - see original submission]	Seeks that the history and character of the southern end of the terrace is protected.
David Lee	454.2	Historical and Cultural Values / Historic Heritage / General HH	Not specified	Considers there is the Climate change issue to consider. Demolishing wooden heritage housing (which the Plan will allow of right) will release carbon into the atmosphere. Considers that more carbon will be used in building replacements made of concrete, steel and glass. 'Old is greener than new'.	No specified.
Marilyn Head	457.7	Historical and Cultural Values / Historic Heritage / General HH	Oppose	Opposed to how the Proposed Plan protects Heritage Areas. [Refer to original submission for full reason]	Not specified.
Rachel Underwood	458.3	Historical and Cultural Values / Historic Heritage / General HH	Amend	While supporting the heritage rules, considers they should be drafted to enable more conservation rather than permissive development. Considers there are many details that should be included such as stained and decorative heritage glass window in heritage listed buildings.	Seeks that the historic heritage provisions are amended to enable more conservation.
Christina Mackay	478.6	Historical and Cultural Values / Historic Heritage / General HH	Not specified	Considers that Neighbourhood clusters of houses set against the backdrop of the green town belt present Wellington's historical character and in the aggregate is of national significance under RMA s.6.	Not specified.
Christina Mackay	478.7	Historical and Cultural Values / Historic Heritage / General HH	Not specified	Considers that the maintenance, conservation and upgrading of 19th Century timber houses is not easy and VUW research found a shortage of heritage design and building craft skills and knowledge.	Seeks that WCC adopts policies to promote and encourage sustainable re-use and restoration and provide evidence-based design and technical based resources. [Inferred decision requested]
Paul Burnaby	44.3	Historical and Cultural Values / Historic Heritage / New HH	Amend	Considers that a provision should be made for 'transferable development rights' from sites containing listed heritage buildings to adjoining sites that do not fall within an identified heritage area.	Seeks that 'transferable development rights' be created for sites adjoining Heritage areas.
Tim Bright	75.4	Historical and Cultural Values / Historic Heritage / New HH	Amend	Considers that a setback of more than 1m should be required to allow for more of a transition zone between Heritage Areas or Character Precincts.	Seeks that a setback of more than 1m is required from boundaries in or adjoining Heritage Areas in the Medium Density Residential Zone. [Inferred decision requested]
Historic Places Wellington	182.12	Historical and Cultural Values / Historic Heritage / New HH	Amend	Considers that replacement of decorative and coloured glass be disallowed and discouraged.	Seeks that a new rule be added to the Historic Heritage Chapter that requires resource consent for the removal of heritage decorative or stained glass as a restricted discretionary activity.
Historic Places Wellington	182.13	Historical and Cultural Values / Historic Heritage / New HH	Amend	Considers that there is a gap in the current regulatory framework whereby property owners of heritage listed buildings can neglect to maintain or repair buildings so they are effectively "demolished by neglect". Demolition by neglect is addressed in the English National Planning Framework. Considers that adding a provision addressing demolition by neglect would address situations where an owner argues that the benefits of a newbuilding (which substantially demolishes a listed heritage building) outweighs its value as an intact or restored heritage building. Considers that such arguments should not be available to owners who have not undertaken maintenance or repair.	Add a new policy to the Historic Heritage Chapter along the lines of: <u>"Where there is evidence of deliberate neglect of, or damage to, a heritage asset, the deteriorated state of the heritage asset should not be taken into account in any decision".</u>

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Heritage New Zealand Pouhere Taonga	FS9.11	Part 2 / Historical and Cultural Values / Historic Heritage / New HH	Support	HNZPT supports the addition of a new policy to the Historic Heritage Chapter as mentioned in the submission.	Allow
The Retirement Villages Association of New Zealand Incorporated	FS126.70	Part 2 / Historical and Cultural Values / Historic Heritage / New HH	Oppose	The RVA opposes the relief sought in this submission as this is considered particularly onerous and is not consistent with the Enabling Housing Act and NPSUD.	Disallow
Ryman Healthcare Limited	FS128.70	Part 2 / Historical and Cultural Values / Historic Heritage / New HH	Oppose	Ryman opposes the relief sought in this submission as this is considered particularly onerous and is not consistent with the Enabling Housing Act and NPSUD.	Disallow
Historic Places Wellington	182.14	Historical and Cultural Values / Historic Heritage / New HH	Amend	Considers that HPW specific bulk and shading controls should apply at and near to boundaries of sites which are near heritage listed sites to address the principles set out in various High Court decisions such as: Sydney Substation Ltd v WCC [2017] NZHC 2489.	Seeks that the Proposed District Plan is amended to include bulk and shading controls at, and near to, the boundaries of sites which are near to each heritage listed site where special height and design controls apply to protect context and curtilage setting of heritage listed buildings.
Onslow Historical Society	FS6.30	Part 2 / Historical and Cultural Values / Historic Heritage / New HH	Support	It is important for heritage buildings to be viewed by the public and not to be overshadowed in bulk and form by adjacent buildings.	Allow
Kāinga Ora – Homes and Communities	FS89.77	Part 2 / Historical and Cultural Values / Historic Heritage / New HH	Oppose	Kāinga Ora is concerned about the potential loss in intensification opportunities if the proposed relief is granted.	Disallow
The Retirement Villages Association of New Zealand Incorporated	FS126.71	Part 2 / Historical and Cultural Values / Historic Heritage / New HH	Oppose	The RVA opposes the relief sought in this submission as this is not consistent with the Enabling Housing Act and NPSUD.	Disallow
Ryman Healthcare Limited	FS128.71	Part 2 / Historical and Cultural Values / Historic Heritage / New HH	Oppose	Ryman opposes the relief sought in this submission as this is not consistent with the Enabling Housing Act and NPSUD.	Disallow

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Historic Places Wellington	182.15	Historical and Cultural Values / Historic Heritage / New HH	Amend	<p>Considers that the Character Precincts together with the new “heritage areas” do not sufficiently protect heritage buildings from inappropriate development under RMA s.6. In particular, buildings with heritage value which are outside concentrations of buildings with similar values, or those in poor condition, will be at risk of inappropriate development.</p> <p>Considers that while “heritage is not the same as character”, it has been through character protections in the ODP that heritage has been acknowledged and protected in the existing planning regime (despite not being listed).</p> <p>Considers that Wellington’s unique heritage and character is represented in its native timber oldest inner city suburbs. The heritage values of those buildings are irreplaceable and unable to replicate.</p> <p>Considers that the proposal is consistent with the overlay proposed in the Councils Draft Spatial Plan. Considers that the proposal would protect the heritage of specific buildings where there is not a sufficient cluster of higher quality character streetscape sites, which would otherwise make available a level of protection under RMA s.7.</p> <p>Considers that without such a procedural overlay, the effects on the environment (specifically on heritage) of any ‘level of development’ would be incompatible and inappropriate, by not being considered at all.</p> <p>Considers that the demolition control overlay would see a negligible reduction in additional housing capacity. It would also provide an accumulative benefit from not demolishing NZ’s oldest native timber buildings which have low carbon emissions instead of constructing new buildings using materials (such as concrete and steel) with significant whole of life carbon emissions. [See original submission for full reasons]</p>	<p>Seeks that a 'heritage demolition control' be added for all areas identified by:</p> <ul style="list-style-type: none"> - The Pre-1930s character area review as 'Primary' 'Contributory' or 'omitted'; and - The Heritage New Zealand Pouhere Taonga's submission on the Draft Spatial Plan.
Kāinga Ora – Homes and Communities	FS89.78	Part 2 / Historical and Cultural Values / Historic Heritage / New HH	Oppose	Further clarification is needed to understand the implications on intensification opportunities of applying the proposed changes.	Disallow

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Historic Places Wellington	182.16	Historical and Cultural Values / Historic Heritage / New HH	Amend	<p>Considers that the Character Precincts together with the new "heritage areas" do not sufficiently protect heritage buildings from inappropriate development under RMA s.6. In particular, buildings with heritage value which are outside concentrations of buildings with similar values, or those in poor condition, will be at risk of inappropriate development.</p> <p>Considers that while "heritage is not the same as character", it has been through character protections in the ODP that heritage has been acknowledged and protected in the existing planning regime (despite not being listed).</p> <p>Considers that Wellington's unique heritage and character is represented in its native timber oldest inner city suburbs. [See original submission for full reasons]</p>	<p>Seeks that within the 'heritage demolition control' the following provisions apply:</p> <ul style="list-style-type: none"> - The demolition of any building or structure, excluding ancillary structures, built before 1930 be a restricted discretionary activity. - Intensification provisions would apply (being the level of development enabled under the MDRS and NPSUD policy 3).
Kāinga Ora – Homes and Communities	FS89.79	Part 2 / Historical and Cultural Values / Historic Heritage / New HH	Oppose	Further clarification is needed to understand the implications on intensification opportunities of applying the proposed changes.	Disallow
Wellington's Character Charitable Trust	233.11	Historical and Cultural Values / Historic Heritage / New HH	Amend	Considers that there should be a specific process of heritage identification and assessment of all existing buildings in the inner city suburbs (noting that the Boffa Miskell 2019 report was not commissioned for the purpose of making a process to identify heritage and assessment of values, but rather identifying concentrations of "Character").	Seeks that a provision is added to make a process of specific heritage identification and assessment of heritage values for all building in the inner city suburbs.
Thorndon Residents' Association Inc	FS69.90	Part 2 / Historical and Cultural Values / Historic Heritage / New HH	Support	<p>Appropriate protection of pre-1930s buildings</p> <p>10min walkable catchment</p> <p>Specific heritage identification and assessment</p> <p>Views contributing to sense of place and identity</p> <p>Extend Character Precincts per Boffa Miskell</p> <p>Boffa Miskell streetscapes</p> <p>Appropriate protection of pre-1930s buildings</p> <p>CCZ encroachment on residential zones</p> <p>Old St Pauls height controls</p> <p>Preserve viewshalls</p>	Allow
Wellington's Character Charitable Trust	233.12	Historical and Cultural Values / Historic Heritage / New HH	Amend	Supports evidence submitted by Historic Places Wellington.	Seeks a new rule so that the removal of decorative/coloured glass from heritage buildings requires resource consent as a restricted discretionary activity.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Argosy Property No. 1 Limited	383.32	Historical and Cultural Values / Historic Heritage / New HH	Amend	Considers there should be an additional rule clarifying that additions, alterations and demolition of non-listed heritage features of scheduled heritage buildings and heritage structures be permitted. This is consistent with the purpose of identifying features of heritage buildings that are not scheduled as not having heritage values, and is currently a gap in the Proposed Plan. For completeness, we note that it we do not consider it necessary for any of the existing standards in the Proposed Plan to apply to this rule.	Add a new rule HH-RX to the Historic Heritage chapter as follows: <u>Additions, alterations and demolition of features that are excluded from the listing of scheduled heritage buildings and heritage</u> <u>1. Activity status: Permitted</u>
The Retirement Villages Association of New Zealand Incorporated	FS126.10	Part 2 / Historical and Cultural Values / Historic Heritage / New HH	Support	Provides greater clarity to the Plan.	Allow
Ryman Healthcare Limited	FS128.10	Part 2 / Historical and Cultural Values / Historic Heritage / New HH	Support	Provides greater clarity to the Plan.	Allow
Murray Pillar	393.12	Historical and Cultural Values / Historic Heritage / New HH	Amend	[No specific reason given beyond decision requested - refer to original submission].	Seeks that protection for stained and decorative heritage glass windows is provided for heritage listed buildings.
Willis Bond and Company Limited	416.55	Historical and Cultural Values / Historic Heritage / New HH	Amend	The submitter supports the general protection given to historic heritage in chapter HH. Considers that it must be clear where heritage protections apply to provide certainty for development. The submitter considers that Wellington must achieve a balance between heritage protection and enabling new development.	Add a new objective (or similar) within the HH chapter after HH-O2 (Protecting historic heritage) as follows: <u>Clearly identify historic heritage and provide certainty on the extent of heritage protection.</u>
Willis Bond and Company Limited	416.56	Historical and Cultural Values / Historic Heritage / New HH	Amend	The submitter supports the general protection given to historic heritage in chapter HH. Considers that it must be clear where heritage protections apply to provide certainty for development. The submitter considers that Wellington must achieve a balance between heritage protection and enabling new development.	Add a new objective (or similar) within the HH chapter after HH-O2 (Protecting historic heritage) as follows: <u>Recognise the importance of achieving a balance between heritage protection and enabling new development.</u>
Parliamentary Service	FS48.2	Part 2 / Historical and Cultural Values / Historic Heritage / New HH	Support	Parliamentary Service supports this submission on the basis that ensuring certainty for new development and enabling new development may facilitate the continued.	Allow
Peter Fordyce	431.4	Historical and Cultural Values / Historic Heritage / New HH	Amend	Considers that the Heritage chapter should have a provision to protect original windows with stained and decorative glass on buildings within the character precincts, and heritage structures. As the chapter stands, provisions have little protection for the windows of heritage buildings, particularly stained and decorative glass, and there is a significant risk that this will be lost with the push for double glazing. Where possible, original window frames should be retained, and new or modified windows must contain the original decorative glass.	Add a new rule in the Historic Heritage chapter providing protection of original windows and stained and decorative window glass on heritage buildings and structures. [Inferred decision requested - note: relief sought refers to heritage structures and character precincts]
Peter Fordyce	431.5	Historical and Cultural Values / Historic Heritage / New HH	Amend	Considers that the Heritage chapter should have a provision to protect original windows with stained and decorative glass on buildings within the character precincts, and heritage structures. As the chapter stands, provisions have little protection for the windows of heritage buildings, particularly stained and decorative glass, and there is a significant risk that this will be lost with the push for double glazing. Where possible, original window frames should be retained, and new or modified windows must contain the original decorative glass.	Add a new Rule in the Historic Heritage chapter providing protection of original windows and stained and decorative window glass on buildings in Heritage Areas. [Inferred decision requested - note: relief sought refers to heritage structures and character precincts]
Christina Mackay	478.8	Historical and Cultural Values / Historic Heritage / New HH	Amend	Considers that in order to combat intentional neglect the submitter support a new policy to the PDP's Historic Heritage Chapter on Maintenance and Repair.	Add a new policy as follows: "Where there is evidence of deliberate neglect of, or damage to, a heritage asset, the deteriorated state of the heritage asset should not be taken into account in any decision."

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Cherie Jacobson	251.3	Historical and Cultural Values / Historic Heritage / HH-O1	Not specified	<p>Considers that the schedule does not represent what is distinctive about Wellington, the region and New Zealand.</p> <p>Objective HH-01 Recognising Historic Heritage will not be met if the schedule is not representative. This objective is that 'historic heritage [is] recognised for its contribution to an understanding and appreciation of the history, culture and sense of place of Wellington City, the Wellington region and New Zealand.'</p> <p>WCC has not adequately sought the views of the community on historic heritage in the development of the PDP.</p>	Not specified.
Sarah Cutten and Matthew Keir	FS91.3	Historical and Cultural Values / Historic Heritage / HH-O1	Support	<p>The further submitters supports the point that there are significant weaknesses in the Council's heritage protection regime, and this includes the Council's engagement and understanding of what the community values.</p> <p>The Council should spend the time and effort to understand how much value the community places on different types of heritage. This work would then inform Council resourcing and support quantitative net benefit assessments of listings as expected under s32 of the RMA.</p> <p>[See original further submission for full reason].</p>	Allow / The Council commission a study to improve understanding and quantify the value the broader community places on heritage across different types of heritage including isolated homes not visible or accessible to the public.
WCC Environmental Reference Group	377.61	Historical and Cultural Values / Historic Heritage / HH-O1	Support	This objective recognises the importance of heritage to Wellington's identity and sense of place.	Retain HH-O1 (Recognising historic heritage) as notified.
Argosy Property No. 1 Limited	383.33	Historical and Cultural Values / Historic Heritage / HH-O1	Support	Supports the objectives relating to historic heritage to the extent they recognise the benefits of enabling sustainable long-term use of heritage buildings.	Retain HH-O1 (Recognising historic heritage) as notified.
Lucy Harper and Roger Pemberton	401.4	Historical and Cultural Values / Historic Heritage / HH-O1	Support	Supports HH-O1 as it is consistent with the direction of Part 2 of the Act and the direction of the RPS for the Wellington Region to maintain the historic heritage values of the city, while providing for upkeep and maintenance. The policy direction of avoiding demolition of heritage buildings and structures and buildings in heritage areas strongly discourages demolition and the rule structure supports this intention.	Retain HH-O1 (Recognising historic heritage) as notified.
Wellington Heritage Professionals	412.40	Historical and Cultural Values / Historic Heritage / HH-O1	Amend	the objective is missing a word.	<p>Amend HH-O1 (Recognising historic heritage) as follows:</p> <p>Historic heritage <u>is</u> recognised for its contribution to an understanding and appreciation of the history, culture and sense of place of Wellington City, the Wellington region and New Zealand.</p>
Willis Bond and Company Limited	416.57	Historical and Cultural Values / Historic Heritage / HH-O1	Support in part	Supports HH-O1 in part. The submitter supports the general protection given to historic heritage in chapter HH.	Retain HH-O1 (Recognising historic heritage...) as notified.
WCC Environmental Reference Group	377.62	Historical and Cultural Values / Historic Heritage / HH-O2	Support	This objective recognises the importance of heritage to Wellington's identity and sense of place.	Retain HH-O2 (Protecting historic heritage) as notified.
Argosy Property No. 1 Limited	383.34	Historical and Cultural Values / Historic Heritage / HH-O2	Support	Supports the objectives relating to historic heritage to the extent they recognise the benefits of enabling sustainable long-term use of heritage buildings.	Retain HH-O2 (Protecting historic heritage) as notified
Lucy Harper and Roger Pemberton	401.5	Historical and Cultural Values / Historic Heritage / HH-O2	Support	Supports HH-O2 as it is consistent with the direction of Part 2 of the Act and the direction of the RPS for the Wellington Region to maintain the historic heritage values of the city, while providing for upkeep and maintenance. The policy direction of avoiding demolition of heritage buildings and structures and buildings in heritage areas strongly discourages demolition and the rule structure supports this intention.	Retain HH-O2 (Protecting historic heritage) as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Willis Bond and Company Limited	416.58	Historical and Cultural Values / Historic Heritage / HH-O2	Support in part	Supports HH-O2 in part. The submitter supports the general protection given to historic heritage in chapter HH.	Retain HH-O2 (Protecting historic heritage...), as notified.
Parliamentary Service	375.3	Historical and Cultural Values / Historic Heritage / HH-O3	Support in part	Supports but submits that the objective needs to more clearly recognise the need to ensure heritage buildings are able to continue to be used in a practicable way – “sustainable long-term use” does not adequately capture the concept of ensuring buildings are able to continue to be used in a practicable and functional way.	Retain HH-O3 (Healthy, safe and accessible living environments) with amendments.
Parliamentary Service	375.4	Historical and Cultural Values / Historic Heritage / HH-O3	Amend	Supports but submits that the objective needs to more clearly recognise the need to ensure heritage buildings are able to continue to be used in a practicable way – “sustainable long-term use” does not adequately capture the concept of ensuring buildings are able to continue to be used in a practicable and functional way.	Amend HH-O3 (Healthy, safe and accessible living environments) as follows: Sustainable long-term use One of the best ways to protect built heritage is to ensure that it remains in a sustainable <u>and practicable</u> long term use. ...
WCC Environmental Reference Group	377.63	Historical and Cultural Values / Historic Heritage / HH-O3	Support	This objective recognises the importance of heritage to Wellington’s identity and sense of place. It also recognises the importance of maintaining built heritage as part of sustainable use and waste reduction: construction waste is a major waste stream issue for Wellington - building re-use, as far as possible, needs to be incentivised.	Retain HH-O3 (Sustainable long-term use) as notified.
Argosy Property No. 1 Limited	383.35	Historical and Cultural Values / Historic Heritage / HH-O3	Support	Supports the objectives relating to historic heritage to the extent they recognise the benefits of enabling sustainable long-term use of heritage buildings.	Retain HH-O3 (Sustainable long-term use) as notified.
Parliamentary Service	FS48.7	Part 2 / Historical and Cultural Values / Historic Heritage / HH@O3	Support	Parliamentary Service supports this submission as it recognises that works to built heritage should encompass maintenance, repair, reuse, and reasonable works; all of which are broadly aligned with the objective of facilitating and enabling practicable and functional use.	Allow
Lucy Harper and Roger Pemberton	401.6	Historical and Cultural Values / Historic Heritage / HH-O3	Support	Supports HH-O3 as it is consistent with the direction of Part 2 of the Act and the direction of the RPS for the Wellington Region to maintain the historic heritage values of the city, while providing for upkeep and maintenance. The policy direction of avoiding demolition of heritage buildings and structures and buildings in heritage areas strongly discourages demolition and the rule structure supports this intention.	Retain HH-O3 (Sustainable long-term use) as notified.
Wellington Heritage Professionals	412.41	Historical and Cultural Values / Historic Heritage / HH-O3	Amend	The objective of the chapter is best captured by HH-01 and HH-02. Concerned that HH-03 could lead to unnecessary demolition of built heritage where current circumstances do not allow for sustainable use. Considers that stabilisation and mothballing may also be an appropriate approach depending on the circumstances.	Amend HH-O3 (Sustainable long term use) as follows: Built heritage is well-maintained, resilient, and kept in sustainable long term use.
Parliamentary Service	FS48.8	Part 2 / Historical and Cultural Values / Historic Heritage / HH@O3	Oppose	Parliamentary Service opposes this submission as the objective needs to recognise the importance of the sustainability of use of built heritage.	Disallow
Willis Bond and Company Limited	416.59	Historical and Cultural Values / Historic Heritage / HH-O3	Support in part	Supports HH-O3 in part. The submitter supports the general protection given to historic heritage in chapter HH.	Retain HH-O3 (Sustainable long-term use ...), as notified.
Anna Kemble Welch	434.6	Historical and Cultural Values / Historic Heritage / HH-O3	Not specified	Not specified.	Not specified.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
WCC Environmental Reference Group	377.64	Historical and Cultural Values / Historic Heritage / HH-P1	Amend	Generally supportive but considers more emphasis to Māori heritage is needed, to be in line with Section 6 of the RMA.	Amend HH-P1 (Identifying historic heritage) as follows: Identify buildings, structures, areas and archaeological sites with significant historic heritage values, or that contribute to an understanding and appreciation of Māori history, <u>relationship to their ancestral lands, water, sites, waahi tapu, other taonga and culture.</u>
Taranaki Whānui ki te Upoko o te Ika	389.66	Historical and Cultural Values / Historic Heritage / HH-P1	Amend	Considers appropriate to amend to include objectives, policies, rules and standards to minimise impact of earthworks or developments on cultural value to Taranaki Whānui. Requests focus on HH-P1.	Seeks that with the amendments to minimise impact of earthworks or developments on cultural value to Taranaki Whānui, that HH-P1 (Identifying historic heritage) is focused on.
Lucy Harper and Roger Pemberton	401.7	Historical and Cultural Values / Historic Heritage / HH-P1	Support	Supports HH-P1 as it is consistent with the direction of Part 2 of the Act and the direction of the RPS for the Wellington Region to maintain the historic heritage values of the city, while providing for upkeep and maintenance. The policy direction of avoiding demolition of heritage buildings and structures and buildings in heritage areas strongly discourages demolition and the rule structure supports this intention.	Retain HH-P1 (Identifying historic heritage) as notified.
WCC Environmental Reference Group	377.65	Historical and Cultural Values / Historic Heritage / HH-P2	Support	This policy is helpful in that it signals the need for adherence to conservation principles when maintaining or repairing built heritage.	Retain HH-P2 (Maintenance and repair) as notified.
Argosy Property No. 1 Limited	383.36	Historical and Cultural Values / Historic Heritage / HH-P2	Support in part	Supports the policies to the extent that they enable maintenance, repair and reasonable works to built heritage. It is important to enable works to built heritage to provide for long-term sustainable use to buildings, including where that long-term use is different to the use for which the built heritage was scheduled. Suggests amendments, consistent with the Introduction to this chapter, which clarify that enabling a sustainable long-term use of a building includes adaptive reuse. Subject to these amendments proposed, supports Policy HH-P2 to the extent that it encourages the maintenance and repair of built heritage where undertaken in accordance with recognised conservation principles and methods.	Retain HH-P2 (Maintenance and repair) as notified.
Lucy Harper and Roger Pemberton	401.8	Historical and Cultural Values / Historic Heritage / HH-P2	Support	Supports HH-P2 as it is consistent with the direction of Part 2 of the Act and the direction of the RPS for the Wellington Region to maintain the historic heritage values of the city, while providing for upkeep and maintenance. The policy direction of avoiding demolition of heritage buildings and structures and buildings in heritage areas strongly discourages demolition and the rule structure supports this intention.	Retain HH-P2 (Maintenance and repair) as notified.
Fire and Emergency New Zealand	273.90	Historical and Cultural Values / Historic Heritage / HH-P3	Support	Supports the policy as it allows internal alterations to heritage buildings unless it involves interior features that are specifically scheduled.	Retain HH-P3 (Internal works) as notified.
WCC Environmental Reference Group	377.66	Historical and Cultural Values / Historic Heritage / HH-P3	Support	This policy is helpful in that it helps make renovations easier - fostering re-use of built heritage.	Retain HH-P3 (Internal works) as notified.
Argosy Property No. 1 Limited	383.37	Historical and Cultural Values / Historic Heritage / HH-P3	Oppose	Opposes heritage controls on new floor levels where only the exterior of a heritage building is scheduled. These are unnecessary because the internal additions to buildings are unlikely to detract from the heritage values of the exterior of a heritage building. Instead, this policy imposes an unreasonable burden on internal works. We understand that the purpose of this policy is to prevent additional or mezzanine floors being constructed which are visible through tall windows and would have a material impact on the heritage value of the building. The drafting of the policy is not sufficiently clear to restrict its application to these circumstances. It does not address the effect on the heritage values but applies to any floor structure that is visible.	Delete HH-P3 (Internal works) in its entirety.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Lucy Harper and Roger Pemberton	401.9	Historical and Cultural Values / Historic Heritage / HH-P3	Support	Supports HH-P4 as it is consistent with the direction of Part 2 of the Act and the direction of the RPS for the Wellington Region to maintain the historic heritage values of the city, while providing for upkeep and maintenance. The policy direction of avoiding demolition of heritage buildings and structures and buildings in heritage areas strongly discourages demolition and the rule structure supports this intention.	Retain HH-P4 (Enabling approach to works) as notified.
Wellington Heritage Professionals	412.42	Historical and Cultural Values / Historic Heritage / HH-P3	Amend	Considers that the policy should be rewritten to focus on conservation as opposed to 'works' and reflect the ICOMOS New Zealand Charter approach to conservation.	Seeks that HH-P3 (Internal works) is rewritten with a focus on conservataion as per the ICOMOS New Zealand Charter.
Wellington Heritage Professionals	412.43	Historical and Cultural Values / Historic Heritage / HH-P3	Amend	Considers that temporary works referred to in the Heritage Design Guide should be enabled as this is likely to prevent unnecessary demolition.	Amend HH-P3 (Internal works) so that temporary works are enabled as referred in the heritage design guide.
Wellington Heritage Professionals	412.44	Historical and Cultural Values / Historic Heritage / HH-P3	Amend	As per the current District Plan, structural strengthening which is visible from the exterior of the building should not be a permitted activity as this is likely to have an adverse effect on heritage values. There is little reliable evidence in the s32 report to support this change. See our commentary below on HH-S1.	Amend HH-P3 (Internal works) as follows: Enable works internal to built heritage, except where: 1. The works involve interiors or interior features which are specifically scheduled; or 2. New floor levels <u>and structural strengthening</u> that will be visible from the exterior of buildings.
Heritage New Zealand Pouhere Taonga	FS9.12	Part 2 / Historical and Cultural Values / Historic Heritage / HH-P3	Support	HNZPT supports the submission because structural strengthening visible from the exterior of the building can have an adverse effect on heritage values.	Allow
Precinct Properties New Zealand Limited	139.13	Historical and Cultural Values / Historic Heritage / HH-P4	Support	Supports HH-P4 (Enabling approach to works) as it is enabling of works to built heritage and seeks that it is retained.	Retain HH-P4 (Enabling approach to works) as notified.
Historic Places Wellington	182.17	Historical and Cultural Values / Historic Heritage / HH-P4	Support	Supports the Council encouraging and supporting work on heritage places that increases their resilience and accessibility, contributes to sustainable long-term use and recovers or restores heritage values.	Retain HH-P4 as notified. [Inferred decision requested]
Wellington City Council	266.72	Historical and Cultural Values / Historic Heritage / HH-P4	Amend	Considers amendment necessary to enable works to built heritage that are undertaken in accordance with recognised conservation principles and methods.	Amend HH-P4 (Enabling approach to works) as follows: Enable works to built heritage that: 1. Increase resilience through seismic strengthening, either in isolation or as part of additions and alterations; 2. Support providing a sustainable long-term use; 3. <u>Are undertaken in accordance with recognised conservation principles and methods;</u> 3-4 <u>4</u> Increase accessibility and support means of escape from fire; or 4-5 <u>5</u> Provide the opportunity to promote, enhance, recover or reveal heritage values.
Heritage New Zealand Pouhere Taonga	FS9.13	Part 2 / Historical and Cultural Values / Historic Heritage / HH-P4	Support	HNZPT supports the submission so that works are undertaken in accordance with recognised conservation principles and methods.	Allow
Fire and Emergency New Zealand	273.91	Historical and Cultural Values / Historic Heritage / HH-P4	Support	Supports this policy as it enables works to heritage buildings for the purposes of seismic resilience and/or supporting a sustainable long-term use.	Retain HH-P4 (Enabling approach to works) as notified.
Parliamentary Service	FS48.10	Part 2 / Historical and Cultural Values / Historic Heritage / HH-P4	Support	Parliamentary Service supports this submission to the extent that it emphasises the need for HH-P4 to provide for maintenance, repair, and reasonable works to built heritage with a view to practicable and functional sustainable long-term use.	Allow

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Parliamentary Service	375.5	Historical and Cultural Values / Historic Heritage / HH-P4	Support in part	HH-P4 is supported as it is important to acknowledge that works will be required on heritage buildings to ensure they continue to be useable, as with any building. However, it is submitted that the concept of "sustainable long-term use" does not capture the need to ensure that buildings are retained in a state that ensures heritage buildings are able to continue to be used in a practicable way.	Retain HH-P4 (Enabling approach to works) with amendment.
Parliamentary Service	375.6	Historical and Cultural Values / Historic Heritage / HH-P4	Amend	Considers that the concept of "sustainable long-term use" does not capture the need to ensure that buildings are retained in a state that ensures heritage buildings are able to continue to be used in a practicable way.	Amend HH-P4 (Enabling approach to works) as follows: Enable works to built heritage that: 1. Increase resilience through seismic strengthening, either in isolation or as part of additions and alterations; 2. Support providing a sustainable <u>and practicable</u> long-term use; 3. Increase accessibility and support means of escape from fire; or 4. Provide the opportunity to promote, enhance, recover or reveal heritage values.
WCC Environmental Reference Group	377.67	Historical and Cultural Values / Historic Heritage / HH-P4	Support	This policy is helpful in that it helps achieve seismic strengthening - very necessary to many heritage structures - and helping remove regulatory impediments to this work	Retain HH-P4 (Enabling approach to works) as notified.
Argosy Property No. 1 Limited	383.38	Historical and Cultural Values / Historic Heritage / HH-P4	Amend	Supports the policies to the extent that they enable maintenance, repair and reasonable works to built heritage. It is important to enable works to built heritage to provide for long-term sustainable use to buildings, including where that long-term use is different to the use for which the built heritage was scheduled. Suggests amendments, consistent with the Introduction to this chapter, which clarify that enabling a sustainable long-term use of a building includes adaptive reuse. Subject to these amendments proposed, supports Policy HH-P4 as it recognises that works to built heritage will sometimes be required, and are appropriate where certain outcomes are achieved, including providing a sustainable long-term use.	Amend HH-P4 (Enabling approach to works): Enable works to built heritage that: ... 2. Support providing a sustainable long-term use (<u>including reuse</u>);
Heritage New Zealand Pouhere Taonga	FS9.14	Part 2 / Historical and Cultural Values / Historic Heritage / HH-P4	Support	HNZPT supports the submission because referring to adaptive re-use clarifies the provision.	Allow
Parliamentary Service	FS48.9	Part 2 / Historical and Cultural Values / Historic Heritage / HH-P4	Support	Parliamentary Service supports this submission as it recognises that works to built heritage should encompass maintenance, repair, reuse, and reasonable works; all of which are broadly aligned with the objective of facilitating and enabling practicable and functional use.	Allow
Lucy Harper and Roger Pemberton	401.10	Historical and Cultural Values / Historic Heritage / HH-P4	Support	Supports HH-P5 as it is consistent with the direction of Part 2 of the Act and the direction of the RPS for the Wellington Region to maintain the historic heritage values of the city, while providing for upkeep and maintenance. The policy direction of avoiding demolition of heritage buildings and structures and buildings in heritage areas strongly discourages demolition and the rule structure supports this intention.	Retain HH-P5 (Conservation Plans) as notified.
Foster+Melville Architects Limited	141.1	Historical and Cultural Values / Historic Heritage / HH-P5	Amend	Considers that HH-P5 should be clarified as the proposed wording is misleading (too open and would be mis-interpreted) and will result in confusion. The wording suggests even owners of properties of lesser significance will be required to provide a Conservation Plan. Conservation Plan costs are high and limited funding is much better directed towards building materials, which contribute positively to the ongoing viability of heritage buildings, rather than reports.	Amend HH-P5 (Conservation Plans) as follows: Encourage the preparation of conservation plans <u>for items of greatest significance</u> , and take them into account when considering the effects of development proposals on the identified heritage values of built heritage.
Heritage New Zealand Pouhere Taonga	FS9.15	Part 2 / Historical and Cultural Values / Historic Heritage / HH-P5	Oppose	It is appropriate that conservation plans are encouraged for all scheduled heritage places, and not limited to the 'most significant'. It is also noted that the policy does not make conservation plans compulsory, but only 'encourages' their development and use.	Disallow / Retain as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Sarah Cutten and Matthew Keir	FS91.37	Historical and Cultural Values / Historic Heritage / HH-P5	Support	The further submitter supports and expands on the benefits of categorisation in the section "Specific issues with the Heritage Issues and Options report" on page 45 of their submission. [See original further submission for full reason].	Allow / Seeks that the Council commission an independent review into the performance and effectiveness of the current or adopted heritage protection regime in relation to achieving desired heritage outcomes and meeting the requirements of the RMA Seeks that the Council commission an independent evaluation of the costs and benefits of incorporating heritage categories into the heritage regime, and publish this, to the development or future development of the heritage protection regime.
WCC Environmental Reference Group	377.68	Historical and Cultural Values / Historic Heritage / HH-P5	Support	This policy is helpful in that conservation plans can provide ongoing certainty and continuity in respect of maintaining and sustaining built heritage over time	Retain HH-P5 (Conservation Plans) as notified.
Lucy Harper and Roger Pemberton	401.11	Historical and Cultural Values / Historic Heritage / HH-P5	Support	Supports HH-P6 as it is consistent with the direction of Part 2 of the Act and the direction of the RPS for the Wellington Region to maintain the historic heritage values of the city, while providing for upkeep and maintenance. The policy direction of avoiding demolition of heritage buildings and structures and buildings in heritage areas strongly discourages demolition and the rule structure supports this intention.	Retain HH-P6 (Removal of unreinforced masonry chimneys) as notified.
Wellington Heritage Professionals	412.45	Historical and Cultural Values / Historic Heritage / HH-P5	Amend	Considers that this policy should come first in the Built heritage section as conservation planning comes after identification and before works are carried out.	Amend the numbering of HH-P5 (Conservation Plans) to HH-P1
WCC Environmental Reference Group	377.69	Historical and Cultural Values / Historic Heritage / HH-P6	Support	This policy is helpful in that it provides for mitigation the seismic risk of unreinforced masonry chimneys in a manner sensitive to the built heritage.	Retain HH-P6 (Removal of unreinforced masonry chimneys) as notified.
Lucy Harper and Roger Pemberton	401.12	Historical and Cultural Values / Historic Heritage / HH-P6	Support	Supports HH-P7 as it is consistent with the direction of Part 2 of the Act and the direction of the RPS for the Wellington Region to maintain the historic heritage values of the city, while providing for upkeep and maintenance. The policy direction of avoiding demolition of heritage buildings and structures and buildings in heritage areas strongly discourages demolition and the rule structure supports this intention.	Retain HH-P7 (Additions, alterations and partial demolition of heritage buildings and structures) as notified.
Wellington Heritage Professionals	412.46	Historical and Cultural Values / Historic Heritage / HH-P6	Oppose	Considers that chimneys are often important parts of heritage buildings and that very few of Wellington's buildings have heritage protection meaning the plan should be encouraging their conservation, not enabling demolition. Considers that the plan would more usefully provide a set of considerations in the heritage design guide to be used when deciding whether to allow removal of a chimney Disagrees with the intent as stated in the s32 report that the approach to chimneys aligns more closely with the way that Council manages removal of chimneys under the Building Act. Considers this is not appropriate as the BA is focussed on safety whereas the RMA is focussed on effects on the environment.	Delete policy HH-P6 (Removal of unreinforced masonry chimneys)
Precinct Properties New Zealand Limited	139.14	Historical and Cultural Values / Historic Heritage / HH-P7	Support in part	Supports HH-P7 (Additions, alterations and partial demolition of heritage buildings and structures) to the extent that it is enabling of additions and alterations.	Retain HH-P7 (Additions, alterations and partial demolition of heritage buildings and structures) to the extent that it is enabling of additions ad alterations. [Inferred decision requested]
Parliamentary Service	FS48.11	Part 2 / Historical and Cultural Values / Historic Heritage / HH-P7	Support	Parliamentary Service supports this submission to the extent that rule HH-P7 enables works that facilitate the practicable and functional use of heritage buildings	Allow

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Foster+Melville Architects Limited	141.2	Historical and Cultural Values / Historic Heritage / HH-P7	Amend	Considers that HH-P7 should be amended to reflect that a successful alteration or addition is not achieved by whether or not the main determinants of the architectural style have been maintained. The wording is very limiting and would have made previous award winning architecture projects impossible. [Refer to original submission for award winning projects reference].	Amend HH-P7 (Additions, alterations and partial demolition of heritage buildings and structures) as follows (Delete HH-P7.1.c.): ... 1. ... c. Retains the main determinants of the architectural style or design of the heritage building or heritage structure; ...
Heritage New Zealand Pouhere Taonga	FS9.16	Part 2 / Historical and Cultural Values / Historic Heritage / HH-P7	Oppose	Having regard to the architectural style or design of a heritage building is an important factor to have regard to.	Disallow / Retain as notified.
Parliamentary Service	FS48.12	Part 2 / Historical and Cultural Values / Historic Heritage / HH-P7	Support	Parliamentary Service supports this submission as it emphasises the need for HH-P7 to enable appropriate works on heritage buildings and structures.	Allow
Wellington City Council	266.73	Historical and Cultural Values / Historic Heritage / HH-P7	Amend	Considers amendments necessary to be consistent in wording between HH-P7 (Heritage buildings and structures), HH-P8 (New buildings and structures, and modifications to existing non-scheduled buildings...), HH-P13 (Additions and alterations to, and partial demolition of buildings and structures within heritage areas) and HH-P14 (New buildings and structures within heritage areas).	Amend HH-P7 (Additions, alterations and partial demolition of heritage buildings and structures) as follows: 1. (...) d. Is compatible with the scale, form, proportions, <u>design</u> and materials of the heritage building or heritage structure;
Heritage New Zealand Pouhere Taonga	FS9.17	Part 2 / Historical and Cultural Values / Historic Heritage / HH-P7	Support	HNZPT supports the submission because the addition of the word 'design' is appropriate in this policy.	Allow
Fire and Emergency New Zealand	273.92	Historical and Cultural Values / Historic Heritage / HH-P7	Support	Supports the policy as it allows additions, alterations and the partial demolition of heritage buildings and structures subject to considerations which seek to retain the heritage values of listed buildings.	Retain HH-P7 (Additions, alterations and partial demolition of heritage buildings and structures) as notified.
Parliamentary Service	375.7	Historical and Cultural Values / Historic Heritage / HH-P7	Support in part	HH-P4 is supported as it is important to acknowledge that works will be required on heritage buildings to ensure they continue to be useable, as with any building. However, it is submitted that the concept of "sustainable long-term use" does not capture the need to ensure that buildings are retained in a state that ensures heritage buildings are able to continue to be used in a practicable way.	Retain HH-P7 (Additions, alterations and partial demolition of heritage buildings and structures) with amendment.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Parliamentary Service	375.8	Historical and Cultural Values / Historic Heritage / HH-P7	Amend	Considers that the concept of “sustainable long-term use” does not capture the need to ensure that buildings are retained in a state that ensures heritage buildings are able to continue to be used in a practicable way.	Amend HH-P7 (Additions, alterations and partial demolition of heritage buildings and structures) as follows: ... <u>2. The viability of the building or structure and the activities associated with it, with and/or without the work;</u> <u>3. For the Parliamentary Precinct, the extent to which the proposal supports the efficient, effective and safe functioning of Parliament and the Executive;</u> 2 4. The visibility of the work from street frontages; 3 <u>5</u> . Whether the works would lead to cumulative adverse effects on identified heritage values; 4 <u>6</u> . Whether there has been any change in circumstances since scheduling in the District Plan, including damage from natural disaster; 5 <u>7</u> . Any advice that has been obtained from a suitably qualified heritage professional including Heritage New Zealand Pouhere Taonga; and 6 <u>8</u> . The identified heritage values of the heritage area, where located within a heritage area.
Heritage New Zealand Pouhere Taonga	FS9.18	Part 2 / Historical and Cultural Values / Historic Heritage / HH-P7	Oppose	Policy HH-P7 includes reference to sustainable longterm use and the additions requested in this submission are not necessary or desirable.	Disallow / Retain as notified.
WCC Environmental Reference Group	377.70	Historical and Cultural Values / Historic Heritage / HH-P7	Support	This policy is helpful in that it enables use change whilst signalling the need for this to occur in a manner sensitive to heritage values.	Retain HH-P7 (Additions, alterations and partial demolition of heritage buildings and structures) as notified.
Argosy Property No. 1 Limited	383.39	Historical and Cultural Values / Historic Heritage / HH-P7	Amend	Supports the policies to the extent that they enable maintenance, repair and reasonable works to built heritage. It is important to enable works to built heritage to provide for long-term sustainable use to buildings, including where that long-term use is different to the use for which the built heritage was scheduled. Suggests amendments, consistent with the Introduction to this chapter, which clarify that enabling a sustainable long-term use of a building includes adaptive reuse. Subject to these amendments proposed, supports Policy HH-P7 to the extent that it enables additions and alterations to, and partial demolition of heritage buildings where it can be demonstrated that the work does not detract from the identified heritage values	Amend HH-P7 (Additions, alterations, and partial demolition of heritage buildings and structures): Provide for additions and alterations to, and partial demolition of heritage buildings and heritage structures where it can be demonstrated that the work does not detract from the identified heritage values, having regard to: 1. The extent to which the work: a. Supports the heritage building or heritage structure having a sustainable long term use (<u>including reuse</u>);
Parliamentary Service	FS48.13	Part 2 / Historical and Cultural Values / Historic Heritage / HH-P7	Support	Parliamentary Service supports this submission as it emphasises the need for the heritage rules to support and provide for reuse; which may, in turn, allow for works enabling practicable and functional use.	Allow
Kāinga Ora Homes and Communities	391.165	Historical and Cultural Values / Historic Heritage / HH-P7	Support in part	HH-P7 is generally supported as it provides for alterations and additions to heritage buildings and structures. However blanket reference to the extent to which work fulfils the intent of the Heritage Design Guide is considered unnecessary when the other arms of the Policy (1(a) to (j) and 2-6) provides more than adequate guidance as to which specific matters need to be considered.	Retain HH-P7 (Additions, alterations and partial demolition of heritage buildings and structures) with amendment.
Wellington’s Character Charitable Trust	FS82.120	Part 2 / Historical and Cultural Values / Historic Heritage / HH-P7	Oppose	Considers the Residential Design Guide and Heritage Design Guide is a valuable touchstone for testing proposed development and ought to be a statutory criterion.	Disallow

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Kāinga Ora Homes and Communities	391.166	Historical and Cultural Values / Historic Heritage / HH-P7	Amend	Considers that HH-P7 should be amended to focus on identified heritage values as outlined in the Wellington Heritage Inventory and balance the outcomes sought within the Zone the buildings and structures are located within. Blanket reference to the extent to which work fulfils the intent of the Heritage Design Guide is considered unnecessary when the other arms of the Policy (1(a) to (i) and 2-6) provide more than adequate guidance as to which specific matters need to be considered. The Heritage Design Guide should only be used as a reference document as the detail in the guide is high level and of limited value and should be utilised as a non-statutory document.	Amend HH-P7 (Additions, alterations and partial demolition of heritage buildings and structures) and its title as follows: Additions, alterations and partial demolition of <u>scheduled</u> heritage buildings and structures Provide for additions and alterations to, and partial demolition of <u>scheduled</u> heritage buildings and heritage structures where it can be demonstrated that the work does not detract from the identified heritage values, having regard to: 1. The extent to which the work: ... j. Fulfils the intent of the Heritage Design Guide; 2. The visibility of the work from street frontages; ... 6. The identified heritage values of the heritage area, where located within a heritage area. <u>Note - Please refer to the Heritage Design Guide for further guidance.</u>
Heritage New Zealand Pouhere Taonga	FS9.19	Part 2 / Historical and Cultural Values / Historic Heritage / HH-P7	Oppose	It is appropriate to retain reference to the Heritage Design Guide in this policy. [Inferred reference to submission 391.66]	Disallow / Retain as notified.
Wellington's Character Charitable Trust	FS82.121	Part 2 / Historical and Cultural Values / Historic Heritage / HH-P7	Oppose	Considers the Residential Design Guide and Heritage Design Guide is a valuable touchstone for testing proposed development and ought to be a statutory criterion.	Disallow
LIVE WELLington	FS96.11	Part 2 / Historical and Cultural Values / Historic Heritage / HH-P7	Oppose	The proposed change to refer to scheduled heritage buildings only is opposed. The intent of the section is to have wider application within heritage areas, and is explained in the section above in the DP referring to heritage areas	Disallow
Roland Sapsford	FS117.11	Part 2 / Historical and Cultural Values / Historic Heritage / HH-P8	Oppose	The proposed change to refer to scheduled heritage buildings only is opposed. The intent of the section is to have wider application within heritage areas, and is explained in the section above in the DP referring to heritage areas.	Disallow
Lucy Harper and Roger Pemberton	401.13	Historical and Cultural Values / Historic Heritage / HH-P7	Support	Supports HH-O3 as it is consistent with the direction of Part 2 of the Act and the direction of the RPS for the Wellington Region to maintain the historic heritage values of the city, while providing for upkeep and maintenance. The policy direction of avoiding demolition of heritage buildings and structures and buildings in heritage areas strongly discourages demolition and the rule structure supports this intention.	Retain HH-O3 (Sustainable long-term use) as notified.

Kāinga Ora Homes and Communities	391.168	Historical and Cultural Values / Historic Heritage / HH-P8	Amend	Considers that HH-P8 should be amended to focus on the identified heritage values outlined in the Wellington Heritage Inventory balanced with the outcomes sought within the Zone the buildings and structures are located within. The Heritage Design Guide should only be used as a reference document as the detail in the guide is high level and of limited value.	Amend HH-P8 (New buildings and structures, and modifications to existing non-scheduled buildings on the site of a heritage building or structure) as follows: Provide for new buildings and structures, and modifications to existing non-scheduled buildings and structures on the same site as <u>scheduled</u> heritage buildings or heritage structures where it can be demonstrated that the work does not detract from the identified heritage values, having regard to: 1. The extent to which the work: a. Is compatible with the scale, form, proportion and materials of the <u>scheduled</u> heritage building or heritage structure; b. Respects the identified relationship of the heritage building or heritage structure with its setting; and c. Fulfills the intent of the Heritage Design Guide. <u>Note - Please refer to the Heritage Design Guide for further guidance.</u>
Heritage New Zealand Pouhere Taonga	FS9.21	Part 2 / Historical and Cultural Values / Historic Heritage / HH-P8	Oppose	It is appropriate to retain reference to the Heritage Design Guide in this policy.	Disallow / Retain as notified.
Wellington's Character Charitable Trust	FS82.123	Part 2 / Historical and Cultural Values / Historic Heritage / HH-P8	Oppose	Considers the Residential Design Guide and Heritage Design Guide is a valuable touchstone for testing proposed development and ought to be a statutory criterion.	Disallow
LIVE WELLington	FS96.12	Part 2 / Historical and Cultural Values / Historic Heritage / HH-P8	Oppose	Deletion of Heritage Design Guide is opposed. This is a means to ensure the heritage area can remain intact and there is sufficient direction about what heritage is being protected.	Disallow
LIVE WELLington	FS96.13	Part 2 / Historical and Cultural Values / Historic Heritage / HH-P8	Oppose	Deletion of Heritage Design Guide is opposed. This is a means to ensure the heritage area can remain intact and there is sufficient direction about what heritage is being protected.	Disallow
Roland Sapsford	FS117.12	Part 2 / Historical and Cultural Values / Historic Heritage / HH-P11	Oppose	Deletion of Heritage Design Guide is opposed. This is a means to ensure the heritage area can remain intact and there is sufficient direction about what heritage is being protected.	Disallow
Lucy Harper and Roger Pemberton	401.14	Historical and Cultural Values / Historic Heritage / HH-P8	Support	Supports HH-P8 as it is consistent with the direction of Part 2 of the Act and the direction of the RPS for the Wellington Region to maintain the historic heritage values of the city, while providing for upkeep and maintenance. The policy direction of avoiding demolition of heritage buildings and structures and buildings in heritage areas strongly discourages demolition and the rule structure supports this intention.	Retain HH-P8 (New buildings and structures, and modifications to existing non-scheduled buildings on the site of a heritage building or structure) as notified.
Heritage New Zealand Pouhere Taonga	70.15	Historical and Cultural Values / Historic Heritage / HH-P9	Oppose in part	Considers that the HH-P9.3 states that 'relocation is considered ... to be a reasonable option' which can be taken to mean that relocation is one reasonable option among other options. Considers that stronger wording is needed to protect heritage values from inappropriate relocation. Relocation should be seen as a 'last resort' to save a building from demolition.	Opposes HH-P9 (Repositioning and relocation of a heritage building or structure) as notified and seeks amendment.
Onslow Historical Society	FS6.5	Part 2 / Historical and Cultural Values / Historic Heritage / HH-P9	Support	OHS supports robust provisions for protecting historic heritage from inappropriate activities.	Allow

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Historic Places Wellington Inc	FS111.4	Part 2 / Historical and Cultural Values / Historic Heritage / HH-P9	Support	HPW supports robust provisions for protecting historic heritage from inappropriate activities.	Allow
Heritage New Zealand Pouhere Taonga	70.16	Historical and Cultural Values / Historic Heritage / HH-P9	Oppose in part	Considers that the HH-P9.3 states that 'relocation is considered ... to be a reasonable option' which can be taken to mean that relocation is one reasonable option among other options. Considers that stronger wording is needed to protect heritage values from inappropriate relocation. Relocation should be seen as a 'last resort' to save a building from demolition.	Amend HH-P9 (Repositioning and relocation of a heritage building or structure) as follows: ... 3. In the case of relocation, alternatives have been explored and relocation is considered by Council to be a reasonable option <u>to avoid total demolition.</u>
Onslow Historical Society	FS6.6	Part 2 / Historical and Cultural Values / Historic Heritage / HH-P9	Support	OHS supports robust provisions for protecting historic heritage from inappropriate activities.	Allow
Historic Places Wellington Inc	FS111.5	Part 2 / Historical and Cultural Values / Historic Heritage / HH-P9	Support	HPW supports robust provisions for protecting historic heritage from inappropriate activities.	Allow
Wellington City Council	266.75	Historical and Cultural Values / Historic Heritage / HH-P9	Amend	Considers an additional point is required to only allow heritage buildings and heritage structures to be repositioned on the existing site or relocated to another site where it can be demonstrated that the repositioning or relocation work are undertaken in accordance with recognised conservation principles and methods.	Amend HH-P9 (Repositioning and relocation of a heritage building or structure) as follows: (...) <u>4. The work will be undertaken in accordance with recognised conservation principles and methods.</u>
Heritage New Zealand Pouhere Taonga	FS9.22	Part 2 / Historical and Cultural Values / Historic Heritage / HH-P9	Support	HNZPT supports this submission so that works are undertaken in accordance with recognised conservation principles and methods.	Allow /
Waka Kotahi	370.166	Historical and Cultural Values / Historic Heritage / HH-P9	Support in part	Supports direction of policy.	Retain HH-P9 (Repositioning and relocation of a heritage building or structure), with amendment.
Waka Kotahi	370.167	Historical and Cultural Values / Historic Heritage / HH-P9	Amend	Considers that the wording should be amended to be less subjective – the policy requires an assessment of options and heritage values to be undertaken. Waka Kotahi agree that relocation should only be undertaken where other options are not available. The Council officer or decision maker will need to be satisfied that this has been demonstrated – it does therefore not need to be written into the condition.	Amend HH-P9 (Repositioning and relocation of a heritage building or structure) as follows: ... 3. In the case of relocation, <u>there are no practical alternatives</u> alternatives have been explored and relocation is considered by Council to be a reasonable option.
WCC Environmental Reference Group	377.72	Historical and Cultural Values / Historic Heritage / HH-P9	Support	This policy signals a preference for maintaining built heritage in situ.	Retain HH-P9 (Repositioning and relocation of a heritage building or structure) as notified.
Lucy Harper and Roger Pemberton	401.15	Historical and Cultural Values / Historic Heritage / HH-P9	Support	Supports HH-P9 as it is consistent with the direction of Part 2 of the Act and the direction of the RPS for the Wellington Region to maintain the historic heritage values of the city, while providing for upkeep and maintenance. The policy direction of avoiding demolition of heritage buildings and structures and buildings in heritage areas strongly discourages demolition and the rule structure supports this intention.	Retain HH-P9 (Repositioning and relocation of a heritage building or structure) as notified.
WCC Environmental Reference Group	377.73	Historical and Cultural Values / Historic Heritage / HH-P10	Support	Avoiding demolition unless specific conditions are met provides certainty and reflects the importance of built heritage to Wellington's identity and character.	Retain HH-P10 (Total demolition of heritage buildings and heritage structures) as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Lucy Harper and Roger Pemberton	401.16	Historical and Cultural Values / Historic Heritage / HH-P10	Support	Supports HH-P10 as it is consistent with the direction of Part 2 of the Act and the direction of the RPS for the Wellington Region to maintain the historic heritage values of the city, while providing for upkeep and maintenance. The policy direction of avoiding demolition of heritage buildings and structures and buildings in heritage areas strongly discourages demolition and the rule structure supports this intention.	Retain HH-P10 (Total demolition of heritage buildings and heritage structures) as notified.
Wellington City Council	266.76	Historical and Cultural Values / Historic Heritage / HH-P11	Amend	Considers amendment of HH-P11 (Height of development in heritage areas) necessary for consistency within other policies in the chapter.	Amend title of HH-P11 (Height of development in heritage areas) as follows: Height of development within heritage areas
WCC Environmental Reference Group	377.74	Historical and Cultural Values / Historic Heritage / HH-P11	Support	This policy is helpful as there are unfortunate examples in Wellington where heritage has been put at risk by over-height adjacent structures.	Retain HH-P11 (Height of development in heritage areas) as notified.
Argosy Property No. 1 Limited	383.40	Historical and Cultural Values / Historic Heritage / HH-P11	Support	Supports this policy to the extent that it recognises that the height of development in heritage areas in the City Centre zone should be considered in the context of the objectives and policies of that zone	Retain HH-P11 (Height of development in heritage areas) as notified.
Kāinga Ora Homes and Communities	391.169	Historical and Cultural Values / Historic Heritage / HH-P11	Support in part	HH-P11 is generally supported as it manages the heights of development within heritage zones to recognise the scale of the heritage areas.	Retain HH-P11 (Height of development in heritage areas) with amendment.
Wellington's Character Charitable Trust	FS82.124	Part 2 / Historical and Cultural Values / Historic Heritage / HH-P11	Oppose	Considers the Residential Design Guide and Heritage Design Guide is a valuable touchstone for testing proposed development and ought to be a statutory criterion.	Disallow
Kāinga Ora Homes and Communities	391.170	Historical and Cultural Values / Historic Heritage / HH-P11	Amend	Considers that HH-P11 should be amended, as the form of development does not relate to the height of the building as this is covered by HH-P13 and HH-P14. In addition, the height of development should be cognisant of the heights that the Zone generally provides for and the existing height of buildings in the area.	Amend HH-P11 (Height of development in heritage areas) as follows: Manage the height of development to recognise and respect the <u>unique setting of the form and scale of heritage areas in conjunction with</u> the City Centre Zone, Centre Zones and the Waterfront Zone <u>in which the development occurs.</u>
Wellington's Character Charitable Trust	FS82.125	Part 2 / Historical and Cultural Values / Historic Heritage / HH-P11	Oppose	Considers the Residential Design Guide and Heritage Design Guide is a valuable touchstone for testing proposed development and ought to be a statutory criterion.	Disallow
LIVE WELLington	FS96.14	Part 2 / Historical and Cultural Values / Historic Heritage / HH-P11	Oppose	We oppose this submission to allow heights in heritage areas in line with the surrounding suburbs. This would run counter to what the heritage areas are trying to achieve and would destroy the sense of heritage in the remaining area	Disallow
Roland Sapsford	FS117.13	Part 2 / Historical and Cultural Values / Historic Heritage / HH-P11	Oppose	Roland Sapsford opposes this submission to allow heights in heritage areas in line with the surrounding suburbs. This would run counter to what the heritage areas are trying to achieve and would destroy the sense of heritage in the remaining area.	Disallow

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Lucy Harper and Roger Pemberton	401.17	Historical and Cultural Values / Historic Heritage / HH-P11	Support	Supports HH-P11 as it is consistent with the direction of Part 2 of the Act and the direction of the RPS for the Wellington Region to maintain the historic heritage values of the city, while providing for upkeep and maintenance. The policy direction of avoiding demolition of heritage buildings and structures and buildings in heritage areas strongly discourages demolition and the rule structure supports this intention. Supports the Doctors Common Heritage area. The submitter considers that the Doctors Common Heritage area is a visible and memorable part of the cityscape because of its buildings, streets (including steps) layout and position on Mt Victoria. The submitter considers that it still has a strong relationship to the early/historical layout of Wellington. The submitters are landowners in the area and support the recognition in the Plan of this area's significance to the city and the provisions that will retain that significance.	Retain HH-P11 (Height of development in heritage areas) as notified.
Willis Bond and Company Limited	416.60	Historical and Cultural Values / Historic Heritage / HH-P11	Support in part	Supports HH-P11 in part. Supports HH-P11's direction to "manage" height in heritage areas, noting that in some instances greater height may be appropriate and consistent with heritage values.	Retain HH-P11 (Height of development in heritage areas), with amendments.
Willis Bond and Company Limited	416.61	Historical and Cultural Values / Historic Heritage / HH-P11	Amend	Considers that HH-P11 needs clarification that the policy only applies within heritage areas.	Amend HH-P11 (Height of development in heritage areas) as follows: Manage the height of development <u>within heritage areas</u> to recognise and respect the unique form and scale of heritage areas in the City Centre Zone, Centre Zones and the Waterfront Zone.
Anna Kemble Welch	434.7	Historical and Cultural Values / Historic Heritage / HH-P11	Amend	Considers that HH-P11 should allow heights of up to 6 storeys in the Newtown Shopping Centre Historic Area, providing the street frontages of the historic buildings are retained while providing for increased height of new structures set back from the street. The provision restricts the development of buildings in the Newtown shopping Centre, which hinders their sustainable long term use and commercial viability. There is a missed opportunity for housing intensification in the heart of the vibrant shopping precinct. These buildings are ideally situated along a main transport route very close to major community amenities including schools, library and hospital. The suburban centre zone and Newtown shopping centre are ideally situated for an increase in housing by allowing for increased height for apartments to be built, as well as set back on the sites to retain the sense of place of the old shops at street level.	Seeks that HH-P11 (Height of development in heritage areas) is amended to allow heights of up to six storeys in the Newtown Shopping Centre Historic Area, providing that the street frontages of historic buildings are retained while providing for increased height of new structures set back from the street.
Heritage New Zealand Pouhere Taonga	FS9.23	Part 2 / Historical and Cultural Values / Historic Heritage / HH-P11	Oppose	The Proposed District Plan includes 12m height limit for the Newtown Heritage Area while also providing for a 21/22m height limit for sites to the rear of the shop frontages. [Inferred reference to submission 434.7]	Disallow / Retain as notified.
WCC Environmental Reference Group	377.75	Historical and Cultural Values / Historic Heritage / HH-P12	Support	This policy will help enhance heritage areas previously compromised by poorly designed adjacent buildings.	Retain HH-P12 (Non-heritage buildings and structures) as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Lucy Harper and Roger Pemberton	401.18	Historical and Cultural Values / Historic Heritage / HH-P12	Support	Supports HH-P12 as it is consistent with the direction of Part 2 of the Act and the direction of the RPS for the Wellington Region to maintain the historic heritage values of the city, while providing for upkeep and maintenance. The policy direction of avoiding demolition of heritage buildings and structures and buildings in heritage areas strongly discourages demolition and the rule structure supports this intention. Supports the Doctors Common Heritage area. The submitter considers that the Doctors Common Heritage area is a visible and memorable part of the cityscape because of its buildings, streets (including steps) layout and position on Mt Victoria. The submitter considers that it still has a strong relationship to the early/historical layout of Wellington. The submitters are landowners in the area and support the recognition in the Plan of this area's significance to the city and the provisions that will retain that significance.	Retain HH-P12 (Non-heritage buildings and structures) as notified.
Wellington City Council	266.77	Historical and Cultural Values / Historic Heritage / HH-P13	Amend	Considers amendments necessary to be consistent in wording between HH-P7 (Additions, alterations and partial demolition of heritage buildings and structures), HH-P8 (New buildings and structures, and modifications to existing non-scheduled buildings on the site of a heritage building or structure), HH-P13 (Additions and alterations to, and partial demolition of buildings and structures within heritage areas) and HH-P14.	Amend HH-P13 (Additions and alterations to and partial demolition of buildings and structures within heritage areas) as follows: 1. (...) d. Is compatible with the scale, form, proportions, <u>design</u> and materials that have been identified as part of the heritage values of the heritage area;
Heritage New Zealand Pouhere Taonga	FS9.24	Part 2 / Historical and Cultural Values / Historic Heritage / HH-P13	Support	HNZPT supports the amendment of HH-P13 as it is important that the scale, form, proportions, design and materials that have been identified are compatible with the heritage values of the heritage area.	Allow
WCC Environmental Reference Group	377.76	Historical and Cultural Values / Historic Heritage / HH-P13	Support	This policy is helpful in that it signals the need for adherence to sensitive design when altering structures in heritage areas, recognising the importance of these areas to Wellington identity and character.	Retain HH-P13 (Additions and alterations to, and partial demolition of buildings and structures within heritage areas) as notified.
Argosy Property No. 1 Limited	383.41	Historical and Cultural Values / Historic Heritage / HH-P13	Amend	Notte Policy HH-P13 is very similar to Policy HH-P7 and replicates some of the matters that consent authorities should have regard to when providing for additions, alterations and partial demolition of heritage buildings and heritage structures. We propose a similar amendment to Policy HH-P13, for the reasons set out above in relation to Policy HH-P7.	Amend HH-P13 (Additions and alterations to and partial demolition of buildings and structures within heritage areas) as follows: Provide for additions and alterations to, and partial demolition of buildings and structures within heritage areas where it can be demonstrated that the work does not detract from the identified heritage values of the heritage area, having regard to: 1. The extent to which the work: a. Supports buildings and structures having a sustainable long term use (<u>including reuse</u>)

Wellington's Character Charitable Trust	FS82.126	Part 2 / Historical and Cultural Values / Historic Heritage / HH-P14	Oppose	Considers the Residential Design Guide and Heritage Design Guide is a valuable touchstone for testing proposed development and ought to be a statutory criterion.	Disallow
Kāinga Ora Homes and Communities	391.172	Historical and Cultural Values / Historic Heritage / HH-P14	Amend	Considers that HH-P14 should be amended to focus on identified heritage values as outlined in the Wellington Heritage Inventory and balanced with the outcomes sought within the Zone the buildings and structures are located within. Blanket reference to the extent to which work fulfils the intent of the Heritage Design Guide is considered unnecessary when the other arms of the Policy provide more than adequate guidance as to which matters need to be considered. The Heritage Design Guide should only be used as a reference document as the detail in the guide is high level and of limited value.	Amend HH-P14 (New buildings and structures within heritage areas) as follows: Provide for new buildings and structures within heritage areas where it can be demonstrated that the works will not detract from the identified heritage values of the heritage area, having regard to: 1. The extent to which the work: a. Respects any valued neighbourhood patterns of the heritage area including any predominant architectural style or design; b. Is compatible with the scale, form, proportions, design and materials of the heritage area <u>and the role and function of the Zone; and</u> c. Is sited to maintain a consistent pattern of front façade alignment; and d. Fulfils the intent of the Heritage Design Guide. <u>Note - Please refer to the Heritage Design Guide for further guidance.</u>
Wellington's Character Charitable Trust	FS82.127	Part 2 / Historical and Cultural Values / Historic Heritage / HH-P14	Oppose	Considers the Residential Design Guide and Heritage Design Guide is a valuable touchstone for testing proposed development and ought to be a statutory criterion.	Disallow
Lucy Harper and Roger Pemberton	401.20	Historical and Cultural Values / Historic Heritage / HH-P14	Support	Supports HH-P14 as it is consistent with the direction of Part 2 of the Act and the direction of the RPS for the Wellington Region to maintain the historic heritage values of the city, while providing for upkeep and maintenance. The policy direction of avoiding demolition of heritage buildings and structures and buildings in heritage areas strongly discourages demolition and the rule structure supports this intention. Supports the Doctors Common Heritage area. The submitter considers that the Doctors Common Heritage area is a visible and memorable part of the cityscape because of its buildings, streets (including steps) layout and position on Mt Victoria. The submitter considers that it still has a strong relationship to the early/historical layout of Wellington. The submitters are landowners in the area and support the recognition in the Plan of this area's significance to the city and the provisions that will retain that significance.	Retain HH-P14 (New buildings and structures within heritage areas) as notified.
Willis Bond and Company Limited	416.62	Historical and Cultural Values / Historic Heritage / HH-P14	Support in part	Supports HH-P14 in part. Supports providing for new buildings and structures within heritage areas and the matters to have regard to, other than the Heritage Design Guide.	Retain HH-P14 (New buildings and structures within heritage areas), with amendments.
Willis Bond and Company Limited	416.63	Historical and Cultural Values / Historic Heritage / HH-P14	Amend	Submitter considers that HH-P14.1.d's reference to having regard to the Heritage Design Guide should be removed.	Amend HH-P14 (New buildings and structures within heritage areas) as follows: Provide for new buildings and structures within heritage areas where it can be demonstrated that the works will not detract from the identified heritage values of the heritage area, having regard to: 1. The extent to which the work: ... d. Fulfils the intent of the Heritage Design Guide.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Heritage New Zealand Pouhere Taonga	70.17	Historical and Cultural Values / Historic Heritage / HH-P15	Oppose in part	Considers that the HH-P15.3 states that 'relocation is considered ... to be a reasonable option' which can be taken to mean that relocation is one reasonable option among other options. Considers that stronger wording is needed to protect heritage values from inappropriate relocation. Relocation should be seen as a 'last resort' to save a building from demolition.	Opposes HH-P15 (Repositioning and relocation of contributing buildings and structures) as notified and seeks amendment.
Onslow Historical Society	FS6.7	Part 2 / Historical and Cultural Values / Historic Heritage / HH-P15	Support	OHS supports robust provisions for protecting historic heritage from inappropriate activities.	Allow
Historic Places Wellington Inc	FS111.6	Part 2 / Historical and Cultural Values / Historic Heritage / HH-P15	Support	HPW supports robust provisions for protecting historic heritage from inappropriate activities.	Allow
Heritage New Zealand Pouhere Taonga	70.18	Historical and Cultural Values / Historic Heritage / HH-P15	Amend	Considers that the HH-P15.3 states that 'relocation is considered ... to be a reasonable option' which can be taken to mean that relocation is one reasonable option among other options. Considers that stronger wording is needed to protect heritage values from inappropriate relocation. Relocation should be seen as a 'last resort' to save a building from demolition.	Amend HH-P15 (Repositioning and relocation of contributing buildings and structures) as follows: ... 3. For relocation outside of the heritage area, alternatives to relocation have been explored and relocation is considered by Council to be a reasonable option <u>to avoid demolition</u>
Onslow Historical Society	FS6.8	Part 2 / Historical and Cultural Values / Historic Heritage / HH-P15	Support	OHS supports robust provisions for protecting historic heritage from inappropriate activities.	Allow
Historic Places Wellington Inc	FS111.7	Part 2 / Historical and Cultural Values / Historic Heritage / HH-P15	Support	HPW supports robust provisions for protecting historic heritage from inappropriate activities.	Allow
Wellington City Council	266.78	Historical and Cultural Values / Historic Heritage / HH-P15	Amend	Considers clarification is needed in title of HH-P15 (Repositioning and relocation of contributing buildings and structures)	Amend HH-P15 (Repositioning and relocation of contributing buildings and structures) title as follows: Repositioning and relocation of contributing buildings and structures <u>within heritage areas</u>
Waka Kotahi	370.168	Historical and Cultural Values / Historic Heritage / HH-P15	Support in part	Supports the direction of policy.	Retain HH-P15 (Repositioning and relocation of contributing buildings and structures) with amendment.
Waka Kotahi	370.169	Historical and Cultural Values / Historic Heritage / HH-P15	Amend	Considers that the wording should be amended to be less subjective – the policy requires an assessment of options and heritage values to be undertaken. Waka Kotahi agree that relocation should only occur if there all alternatives have been explored. The Council officer or decision maker will need to be satisfied that this has been demonstrated – it does therefore not need to be written into the condition.	Amend HH-P15 (Repositioning and relocation of contributing buildings and structures) as follows: ... and relocation is considered by Council to be a reasonable option.
WCC Environmental Reference Group	377.78	Historical and Cultural Values / Historic Heritage / HH-P15	Support	This policy signals a preference for maintaining contributing buildings or structures in heritage areas in situ.	Retain HH-P15 (Repositioning and relocation of contributing buildings and structures) as notified.

WCC Environmental Reference Group	377.80	Historical and Cultural Values / Historic Heritage / HH-P17	Support	This policy will help facilitate knowledge of archaeological sites: an important first step in ensuring their ongoing recognition and protection.	Retain HH-P17 (Information, advocacy and advice) as notified.
WCC Environmental Reference Group	377.81	Historical and Cultural Values / Historic Heritage / HH-P20	Support	This policy will enable activities that increase appreciation of sites whilst protecting them	Retain HH-P20 (Modification of scheduled archaeological sites and earthworks within their extent) as notified.
Waka Kotahi	370.172	Historical and Cultural Values / Historic Heritage / HH-P21	Support	Support policy as worded – demolition of scheduled sites should only occur if it can be demonstrated that there are no reasonable alternatives	Retain HH-P21 (Total demolition of scheduled archaeological sites) as notified.
WCC Environmental Reference Group	377.82	Historical and Cultural Values / Historic Heritage / HH-P21	Support	Avoiding demolition unless specific conditions are met provides certainty and reflects the importance of archaeological sites to our history and identity	Retain HH-P21 (Total demolition of scheduled archaeological sites) as notified.
Fire and Emergency New Zealand	273.93	Historical and Cultural Values / Historic Heritage / HH-R1	Support	Supports the rule as it permits the maintenance and repair of scheduled heritage buildings.	Retain HH-R1 (Maintenance and repair of scheduled heritage buildings and heritage structures) as notified.
WCC Environmental Reference Group	377.83	Historical and Cultural Values / Historic Heritage / HH-R1	Support	HH-R1 is supported as it supports sustainable ongoing use of heritage buildings and structures.	Retain HH-R1 (Maintenance and repair of scheduled heritage buildings and heritage structures) as notified.
Argosy Property No. 1 Limited	383.42	Historical and Cultural Values / Historic Heritage / HH-R1	Support	Supports maintenance and repair of scheduled heritage buildings and buildings in heritage areas being permitted.	Retain HH-R1 (Maintenance and repair of scheduled heritage buildings and heritage structures) as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Lucy Harper and Roger Pemberton	401.23	Historical and Cultural Values / Historic Heritage / HH-R1	Support	Supports HH-R1 as it is consistent with the direction of Part 2 of the Act and the direction of the RPS for the Wellington Region to maintain the historic heritage values of the city, while providing for upkeep and maintenance. The policy direction of avoiding demolition of heritage buildings and structures and buildings in heritage areas strongly discourages demolition and the rule structure supports this intention.	Retain HH-R1 (Maintenance and repair of scheduled heritage buildings and heritage structures) as notified.
Fabric Property Limited	425.20	Historical and Cultural Values / Historic Heritage / HH-R1	Support	Supports maintenance and repair of scheduled heritage buildings being permitted activities.	Retain HH-R1 (Maintenance and repair of scheduled heritage buildings and heritage structures) as notified.
Waka Kotahi	370.173	Historical and Cultural Values / Historic Heritage / HH-R2	Support	Support rule as proposed, as it enables the demolition of non-scheduled buildings and structures.	Retain HH-R2 (Partial and total demolition of non-scheduled buildings and structures on the site of heritage buildings and heritage structures) as notified.
WCC Environmental Reference Group	377.84	Historical and Cultural Values / Historic Heritage / HH-R2	Support	HH-R2 is supported as it facilitates enhancement of heritage.	Retain HH-R2 (Partial and total demolition of non-scheduled buildings and structures on the site of heritage buildings and heritage structures) as notified.
Argosy Property No. 1 Limited	383.43	Historical and Cultural Values / Historic Heritage / HH-R2	Support	Supports demolition of non-scheduled buildings and structures on the site of heritage buildings being permitted.	Retain HH-R2 (Partial and total demolition of non-scheduled buildings and structures on the site of heritage buildings and heritage structures)
Kāinga Ora Homes and Communities	391.173	Historical and Cultural Values / Historic Heritage / HH-R2	Support	HH-R2 is supported as it permits the demolition of non-scheduled heritage buildings on a heritage site when the building has no heritage value.	Retain HH-R2 (Partial and total demolition of non-scheduled buildings and structures on the site of heritage buildings and heritage structures) as notified
Lucy Harper and Roger Pemberton	401.24	Historical and Cultural Values / Historic Heritage / HH-R2	Support	Supports HH-R2 as it is consistent with the direction of Part 2 of the Act and the direction of the RPS for the Wellington Region to maintain the historic heritage values of the city, while providing for upkeep and maintenance. The policy direction of avoiding demolition of heritage buildings and structures and buildings in heritage areas strongly discourages demolition and the rule structure supports this intention.	Retain HH-R2 (Partial and total demolition of non-scheduled buildings and structures on the site of heritage buildings and heritage structure) as notified.
Fabric Property Limited	425.21	Historical and Cultural Values / Historic Heritage / HH-R2	Support	Supports HH-R2 as notified.	Retain HH-R2 (Partial and total demolition of non-scheduled buildings and structures on the site of heritage buildings and heritage structures) as notified.
Precinct Properties New Zealand Limited	139.16	Historical and Cultural Values / Historic Heritage / HH-R3	Support	Supports the Restricted Discretionary activity status provided under HH-R3.2 (Additions, alterations and partial demolition of heritage buildings and structures) where compliance with the requirements of HH-R3.1 cannot be achieved.	Retain the Discretionary Restricted activity status at HH-R3.2 (Additions, alterations and partial demolition of heritage buildings and structures) as notified.
Wellington City Council	266.80	Historical and Cultural Values / Historic Heritage / HH-R3	Amend	Considers it necessary to add HH-P5 (Conservation plans) and HH-P6 (Removal of unreinforced masonry chimneys) to the list of matters of discretion.	Amend HH-R3 (Additions, alterations and partial demolition of non-scheduled buildings and structures on the site of heritage buildings and heritage structures) as follows: 1. Activity status: Restricted Discretionary Where: a. Compliance with the requirements of HH-R3.1 cannot be achieved. Matters of discretion are restricted to: 1. The matters in HH-P4, <u>HH-P5</u> , <u>HH-P6</u> and HH-P7; 2. The extent of compliance with HH-S4.
Heritage New Zealand Pouhere Taonga	FS9.25	Part 2 / Historical and Cultural Values / Historic Heritage / HH-R3	Support	HNZPT supports the amendment of HH-R3 to be a restricted discretionary activity where compliance with the requirements of HH-R3.1 cannot be achieved.	Allow
Fire and Emergency New Zealand	273.94	Historical and Cultural Values / Historic Heritage / HH-R3	Support	Supports this rule as it makes provision for additions and alterations to heritage buildings.	Retain HH-R3 (Additions, alterations and partial demolition of heritage buildings and heritage structures) as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
WCC Environmental Reference Group	377.85	Historical and Cultural Values / Historic Heritage / HH-R3	Support	HH-R3 is supported as it facilitates changing use of heritage buildings whilst safeguarding heritage values.	Retain HH-R3 (Additions, alterations and partial demolition of heritage buildings and heritage structures) as notified.
Argosy Property No. 1 Limited	383.44	Historical and Cultural Values / Historic Heritage / HH-R3	Support	Supports additions, alterations and partial demolition of heritage buildings and buildings in heritage areas being permitted, subject to the comments made in relation to Standard HH-S1.1.b above. Argosy supports the default activity status being restricted discretionary. The provision, subject to the amendments sought to Standard HH-S1.1.b, provide appropriate restrictions on additions, alterations and partial demolition of heritage buildings.	Retain HH-R3 (Additions, alterations and partial demolition of heritage buildings and heritage structures) as notified, subject to amendments to HH-S1.1.b
Lucy Harper and Roger Pemberton	401.25	Historical and Cultural Values / Historic Heritage / HH-R3	Support	Supports HH-R3 as it is consistent with the direction of Part 2 of the Act and the direction of the RPS for the Wellington Region to maintain the historic heritage values of the city, while providing for upkeep and maintenance. The policy direction of avoiding demolition of heritage buildings and structures and buildings in heritage areas strongly discourages demolition and the rule structure supports this intention.	Retain HH-R3 (Additions, alterations and partial demolition of heritage buildings and heritage structures) as notified.
Fabric Property Limited	425.22	Historical and Cultural Values / Historic Heritage / HH-R3	Support	Supports Rule HH-R3 as notified. Fabric supports the default activity status being restricted discretionary.	Retain HH-R3 (Additions, alterations and partial demolition of heritage buildings and heritage structures) as notified.
Precinct Properties New Zealand Limited	139.17	Historical and Cultural Values / Historic Heritage / HH-R4	Support	Supports HH-R4 (New buildings and structures on the site of heritage buildings and heritage structures)	Retain HH-R4 (New buildings and structures on the site of heritage buildings and heritage structure) as notified.
Fire and Emergency New Zealand	273.95	Historical and Cultural Values / Historic Heritage / HH-R4	Support	Supports this rule as it makes provision for new buildings and structures on the site of heritage buildings.	Retain HH-R4 (New buildings and structures on the site of heritage buildings and heritage structures) as notified.
WCC Environmental Reference Group	377.86	Historical and Cultural Values / Historic Heritage / HH-R4	Support	HH-R4 is supported as it enables new activities in heritage areas, whilst ensuring these are done in a way that recognises heritage values.	Retain HH-R4 (New buildings and structures on the site of heritage buildings and heritage structures) as notified.
Argosy Property No. 1 Limited	383.45	Historical and Cultural Values / Historic Heritage / HH-R4	Support	Supports new buildings and structures on the site of heritage buildings and heritage structures and within heritage areas being permitted.	Retain HH-R4 (New buildings and structures on the site of heritage buildings and heritage structures) as notified.
Kāinga Ora Homes and Communities	391.174	Historical and Cultural Values / Historic Heritage / HH-R4	Oppose in part	HH-R4 is opposed as it restricts non-heritage buildings on heritage sites, which will hinder development potential in medium and high density areas where this will not affect built heritage values. HH-R2 permits partial and total demolition of non-scheduled buildings and structures on the site of heritage buildings and heritage structures. By comparison, Rule HH-R4 permits new buildings and structures on the site of heritage buildings and heritage structures where HH-S2 is achieved. HH-S2 only applies to the MDRZ and HDRZ and only allows buildings and structures that are accessory to the primary residential building, located to the rear and less than 10m2. Given that the additional buildings are to the rear of, and accessory to, the primary residential building it is considered that the 10m2 limit should be removed as this will generally avoid the building being visible from the street and interfering with the heritage character. (Option A)	Opposes HH-R4 (New buildings and structures on the site of heritage buildings and heritage structures) and seeks amendment.
Kāinga Ora Homes and Communities	391.175	Historical and Cultural Values / Historic Heritage / HH-R4	Amend	Considers that HH-R4 should be amended to remove compliance with HH-S2. HH-S2 only applies to the MDRZ and HDRZ and only allows buildings and structures that are accessory to the primary residential building, located to the rear and less than 10m2.	Amend HH-R4 (New buildings and structures on the site of heritage buildings and heritage structures) as follows: 1. Activity status: Permitted Where: a. Compliance with HH-S2 is achieved.
Heritage New Zealand Pouhere Taonga	FS9.26	Part 2 / Historical and Cultural Values / Historic Heritage / HH-R4	Oppose	HH-R4 in conjunction with HH-S2 control the addition of buildings on sites of heritage buildings. New buildings on heritage sites have the potential for significant adverse effects on heritage values and it is appropriate that this matter is controlled by district plan rules.	Disallow / Retain as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Lucy Harper and Roger Pemberton	401.26	Historical and Cultural Values / Historic Heritage / HH-R4	Support	Supports HH-R4 as it is consistent with the direction of Part 2 of the Act and the direction of the RPS for the Wellington Region to maintain the historic heritage values of the city, while providing for upkeep and maintenance. The policy direction of avoiding demolition of heritage buildings and structures and buildings in heritage areas strongly discourages demolition and the rule structure supports this intention.	Retain HH-R4 (New buildings and structures on the site of heritage buildings and heritage structures) as notified.
Precinct Properties New Zealand Limited	139.18	Historical and Cultural Values / Historic Heritage / HH-R5	Support	Supports HH-R5 (Additions and alterations to non-scheduled buildings and structures on the site of heritage buildings and structures)	Retain HH-R5 (Additions and alterations to non-scheduled buildings and structures on the site of heritage buildings and structures) as notified.
WCC Environmental Reference Group	377.87	Historical and Cultural Values / Historic Heritage / HH-R5	Support	HH-R5 is supported as it enables new activities in heritage areas, whilst ensuring these are done in a way that recognises heritage values.	Retain HH-R5 (Additions and alterations to non-scheduled buildings and structures on the site of heritage buildings and structures) as notified.
Kāinga Ora Homes and Communities	391.176	Historical and Cultural Values / Historic Heritage / HH-R5	Oppose in part	HH-R5 is opposed as it only allows additions to non-scheduled buildings and structures on the site of a heritage buildings where HH-S3 is achieved. HH-S3 limits modifications to less than 10% and where there are no additional storeys to the existing building. Additions to buildings are covered by other general rules and standards in the Heritage Overlay or underlying Zone so it is considered unnecessary to also control this matter here.	Opposes HH-R5 (Additions and alterations to non-scheduled buildings and structures on the site of heritage buildings and structures) and seeks amendment.
Kāinga Ora Homes and Communities	391.177	Historical and Cultural Values / Historic Heritage / HH-R5	Amend	Considers that HH-R5 should be amended to remove the reference to HH-S3. HH-S3 limits modifications to less than 10% and where there are no additional storeys to the existing building. Additions to buildings are covered by other general rules and standards in the Heritage Overlay or underlying Zone so it is considered unnecessary to also control this matter here.	Amend HH-R5 (Additions and alterations to non-scheduled buildings and structures on the site of heritage buildings and structures) as follows: 1. Activity status: Permitted Where: a. Compliance with HH-S3 is achieved.
Heritage New Zealand Pouhere Taonga	FS9.27	Part 2 / Historical and Cultural Values / Historic Heritage / HH-R5	Oppose	HH-R5 in conjunction with HH-S3 control additions to non-scheduled buildings on sites of heritage buildings. In the same way as new buildings on heritage sites have the potential for significant adverse effects on heritage values, substantial additions likewise have potentially adverse effects.	Disallow / Retain as notified.
Lucy Harper and Roger Pemberton	401.27	Historical and Cultural Values / Historic Heritage / HH-R5	Support	Supports HH-R5 as it is consistent with the direction of Part 2 of the Act and the direction of the RPS for the Wellington Region to maintain the historic heritage values of the city, while providing for upkeep and maintenance. The policy direction of avoiding demolition of heritage buildings and structures and buildings in heritage areas strongly discourages demolition and the rule structure supports this intention.	Retain HH-R5 (Additions and alterations to non-scheduled buildings and structures on the site of heritage buildings and structures) as notified.
WCC Environmental Reference Group	377.88	Historical and Cultural Values / Historic Heritage / HH-R6	Support	HH-R6 is supported as it supports maintaining buildings or structures in heritage areas in situ, recognising that place and position are a key part of heritage value	Retain HH-R6 (Repositioning of heritage buildings and heritage structures on their existing site) as notified.
Argosy Property No. 1 Limited	383.46	Historical and Cultural Values / Historic Heritage / HH-R6	Support	Supports the Proposed Plan enabling heritage buildings to be repositioned.	Retain HH-R6 (Repositioning of heritage buildings and heritage structures on their existing site) as notified.
Lucy Harper and Roger Pemberton	401.28	Historical and Cultural Values / Historic Heritage / HH-R6	Support	Supports HH-R6 as it is consistent with the direction of Part 2 of the Act and the direction of the RPS for the Wellington Region to maintain the historic heritage values of the city, while providing for upkeep and maintenance. The policy direction of avoiding demolition of heritage buildings and structures and buildings in heritage areas strongly discourages demolition and the rule structure supports this intention.	Retain HH-R6 (Repositioning of heritage buildings and heritage structures on their existing site) as notified.
WCC Environmental Reference Group	377.89	Historical and Cultural Values / Historic Heritage / HH-R7	Support	HH-R7 is supported as it will help decrease seismic risk whilst not making it overly difficult for building owners to do so.	Retain HH-R7 (Removal of unreinforced masonry chimneys from built heritage) as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Lucy Harper and Roger Pemberton	401.29	Historical and Cultural Values / Historic Heritage / HH-R7	Support	Supports HH-R7 as it is consistent with the direction of Part 2 of the Act and the direction of the RPS for the Wellington Region to maintain the historic heritage values of the city, while providing for upkeep and maintenance. The policy direction of avoiding demolition of heritage buildings and structures and buildings in heritage areas strongly discourages demolition and the rule structure supports this intention.	Retain HH-R7 (Removal of unreinforced masonry chimneys from built heritage) as notified.
Wellington Heritage Professionals	412.49	Historical and Cultural Values / Historic Heritage / HH-R7	Support in part	Support removal of chimneys to be restricted discretionary but not reference to HH-P6	Retain rule HH-R7 (Removal of unreinforced masonry chimneys from built heritage) with amendments.
Wellington Heritage Professionals	412.50	Historical and Cultural Values / Historic Heritage / HH-R7	Amend	Do not support the matters of discretion at HH-P6.	Amend rule to remove matter of discretion as HH-P6 (Removal of unreinforced masonry chimneys)
Wellington City Council	266.81	Historical and Cultural Values / Historic Heritage / HH-R8	Amend	Considers provision is blank and does not have any related points.	Amend HH-R8 (Relocation of heritage buildings and heritage structures beyond the existing site) as follows: 1. Activity status: Discretionary <u>Section 88 information requirements to accompany applications for the relocation of heritage buildings and structures beyond the existing site:</u> <u>An application under this rule for the relocation of heritage buildings and structures beyond the existing site must be accompanied by:</u> <u>2. A Heritage Impact Assessment of the relocation of the building, notably assessing: a. The heritage values of the building in its current location; and</u> <u>b. The heritage values of the building resulting from its relocation;</u> <u>3. An assessment of alternatives to relocation that have been considered by the applicant, including evidence demonstrating why none of these alternatives are reasonable;</u> <u>4. A Heritage Construction Management Plan notably outlining the measures and methods that will be taken to protect the building before, during, and after the relocation; and</u> <u>5. A Conservation Plan where one exists.</u>
Heritage New Zealand Pouhere Taonga	FS9.28	Part 2 / Historical and Cultural Values / Historic Heritage / HH-R8	Support	HNZPT supports the amendment of HH-R8 as a discretionary activity.	Allow
WCC Environmental Reference Group	377.90	Historical and Cultural Values / Historic Heritage / HH-R8	Support	HH-R8 is supported as it supports maintaining buildings or structures in heritage areas in situ, recognising that place and position are a key part of heritage value.	Retain HH-R8 (Relocation of heritage buildings and heritage structures beyond the existing site) as notified.
Argosy Property No. 1 Limited	383.47	Historical and Cultural Values / Historic Heritage / HH-R8	Support	Supports the Proposed Plan enabling heritage buildings to be relocated.	Retain HH-R8 (Relocation of heritage buildings and heritage structures beyond the existing site) as notified.
Lucy Harper and Roger Pemberton	401.30	Historical and Cultural Values / Historic Heritage / HH-R8	Support	Supports HH-R8 as it is consistent with the direction of Part 2 of the Act and the direction of the RPS for the Wellington Region to maintain the historic heritage values of the city, while providing for upkeep and maintenance. The policy direction of avoiding demolition of heritage buildings and structures and buildings in heritage areas strongly discourages demolition and the rule structure supports this intention.	Retain HH-R8 (Relocation of heritage buildings and heritage structures beyond the existing site) as notified.

Wellington City Council	266.82	Historical and Cultural Values / Historic Heritage / HH-R9	Amend	Considers more information requirements are required to accompany applications for total demolition of heritage buildings and structures. This is based on the need for greater assessment from professionals, and the need to add options for seismic strengthening, adaptive reuse, or restoration.	Amend HH-R9 (Total demolition of heritage buildings and heritage structures) as follows: (...) <u>1. A Heritage Impact Assessment for the demolition of a building;</u> 2.4- A detailed seismic analysis (DSA) where the building is identified as earthquake prone, and a detailed description and methodology of the works required to increase seismic resilience, <u>provided by a suitably qualified structural engineer;</u> <u>3. Where the building is identified as being beyond repair, a condition survey report of the building, provided by a suitably qualified professional;</u> 4.2- Costings of the works required to increase seismic resilience provided by a suitably qualified quantity surveyor; 5.3- Estimates of contributions that are available, including funding, grants, consent fee reimbursement and rates relief; 6.4- An assessment of market demand and pricing for comparable buildings and floor space; 7.5- A valuation of the: a. Building following completion of works; and b. Financial return on investment expected upon completion of the works; i. Depending on the proposal this could be by way of lettable income on floorspace as well as forecast sales price; and 8.6- An assessment of alternatives to total demolition that have been considered by the applicant, including <u>options for seismic strengthening, reuse, or restoration where applicable, and evidence demonstrating why none of these options are reasonable; and</u> <u>9. A Conservation Plan where one exists.</u>
Heritage New Zealand Pouhere Taonga	FS9.29	Part 2 / Historical and Cultural Values / Historic Heritage / HH-R9	Support	HNZPT supports the amendment of HH-R9 for greater assessment from professionals, and the need to add options for seismic strengthening, adaptive reuse or restoration.	Allow
Wellington City Council	266.83	Historical and Cultural Values / Historic Heritage / HH-R9	Amend	Considers clarification is needed on who will undertake the peer review referred to in the final sentence in HH-R9 (Total demolition of heritage buildings and heritage structures)	Amend HH-R9 (Total demolition of heritage buildings and heritage structures) as follows: (...) The Council will obtain a peer review <u>by a suitably qualified professional</u> of the information provided by the applicant.
Heritage New Zealand Pouhere Taonga	FS9.30	Part 2 / Historical and Cultural Values / Historic Heritage / HH-R9	Support	HNZPT supports the amendment for the council to obtain a peer review by a suitably qualified professional of the information provided by the applicant.	Allow
Waka Kotahi	370.174	Historical and Cultural Values / Historic Heritage / HH-R9	Support	Support discretionary activity status for demolition of heritage buildings.	Retain HH-R9 (Total demolition of heritage buildings and heritage structures) as notified.
WCC Environmental Reference Group	377.91	Historical and Cultural Values / Historic Heritage / HH-R9	Support	Avoiding demolition unless specific conditions are met provides certainty and reflects the importance of heritage areas to Wellington's identity and character.	Retain HH-R9 (Total demolition of heritage buildings and heritage structures) as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Argosy Property No. 1 Limited	383.48	Historical and Cultural Values / Historic Heritage / HH-R9	Oppose in part	Supports a consenting pathway for heritage buildings to be demolished as a discretionary activity. While Argosy is not currently intending to demolish any of the scheduled heritage buildings it owns, it opposes Rule HH-R9 in part as set out below. It is unnecessary for HH-R9 to specify a notification status for resource consent applications made under this rule. where it may be appropriate for a resource consent application to be publicly notified, s 95A of the Resource Management Act 1991 (RMA) provides sufficient guidance for the consent authority to use its discretion to decide if public notification is appropriate. We also note that the information requirements under this Rule are potentially onerous and inappropriate. The mandatory considerations under HH-R9 which relate to costs of works, market demand and financial returns do not relate to the protection of historic heritage from inappropriate subdivision, use and development (as required under s 6 of the RMA) and should not be mandatory application requirements.	Amend HH-R9 (Total demolition of heritage buildings and heritage structures) as follows: 1. Activity status: Discretionary Notification status: An application for a resource consent made in respect of HH-R9 must be publicly notified. Section 88 information requirements to accompany applications for total demolition of heritage buildings and structures: An application under this rule for the total demolition of heritage buildings and structures must be accompanied by: 1. A detailed seismic analysis (DSA) where the building is identified as earthquake prone, and a detailed description and methodology of the works required to increase seismic resilience; 2. Costings of the works required to increase seismic resilience provided by a suitably qualified quantity surveyor; 3. Estimates of contributions that are available, including funding, grants, consent fee reimbursement and rates relief; 4. An assessment of market demand and pricing for comparable buildings and floor space; 5. A valuation of the: a. Building following completion of works; and b. Financial return on investment expected upon completion of the works; i. Depending on the proposal this could be by way of lettable income on floorspace as well as forecast sales price; and
Heritage New Zealand Pouhere Taonga	FS9.31	Part 2 / Historical and Cultural Values / Historic Heritage / HH-R9	Oppose	While in general the notification provisions provide the appropriate framework for decisions on notification, there are circumstances where public notification is always appropriate. The information requirements are also appropriate for this sort of application.	Disallow / Retain as notified.
Lucy Harper and Roger Pemberton	401.31	Historical and Cultural Values / Historic Heritage / HH-R9	Support	Supports HH-R9 as it is consistent with the direction of Part 2 of the Act and the direction of the RPS for the Wellington Region to maintain the historic heritage values of the city, while providing for upkeep and maintenance. The policy direction of avoiding demolition of heritage buildings and structures and buildings in heritage areas strongly discourages demolition and the rule structure supports this intention.	Retain HH-R9 (Total demolition of heritage buildings and heritage structures) as notified.
Fabric Property Limited	425.23	Historical and Cultural Values / Historic Heritage / HH-R9	Oppose in part	Supports a consenting pathway for heritage buildings to be demolished as a discretionary activity. Considers that the information requirements under this Rule are potentially onerous and inappropriate. These requirements do not relate to the protection of historic heritage from inappropriate subdivision, use and development (as required under s 6 of the RMA) and should not be mandatory application requirements. Considers that it is unnecessary for HH-R9 to specify a notification status for resource consent applications made under this rule. Where it may be appropriate for a resource consent application to be publicly notified, s 95A of the Resource Management Act 1991 (RMA) provides sufficient guidance for the consent authority to use its discretion to decide if public notification is appropriate.	Opposes HH-R9 (Total demolition of structures) in part and seeks amendments.

WCC Environmental Reference Group	377.92	Historical and Cultural Values / Historic Heritage / HH-R10	Support	HH-R10 is supported as it supports sustainable ongoing use of heritage areas.	Retain HH-R10 (Maintenance and repair of buildings and structures, including non-heritage buildings and structures) as notified.
Argosy Property No. 1 Limited	383.49	Historical and Cultural Values / Historic Heritage / HH-R10	Support	Supports maintenance and repair of scheduled heritage buildings and buildings in heritage areas being permitted.	Retain HH-R10 (Maintenance and repair of buildings and structures including non-heritage buildings and structures) as notified.
Lucy Harper and Roger Pemberton	401.32	Historical and Cultural Values / Historic Heritage / HH-R10	Support	<p>Supports HH-R10 as it is consistent with the direction of Part 2 of the Act and the direction of the RPS for the Wellington Region to maintain the historic heritage values of the city, while providing for upkeep and maintenance. The policy direction of avoiding demolition of heritage buildings and structures and buildings in heritage areas strongly discourages demolition and the rule structure supports this intention.</p> <p>Supports the Doctors Common Heritage area. The submitter considers that the Doctors Common Heritage area is a visible and memorable part of the cityscape because of its buildings, streets (including steps) layout and position on Mt Victoria. The submitter considers that it still has a strong relationship to the early/historical layout of Wellington. The submitters are landowners in the area and support the recognition in the Plan of this area's significance to the city and the provisions that will retain that significance.</p>	Retain HH-R10 (Maintenance and repair of buildings and structures, including non-heritage buildings and structures) as notified.
Fabric Property Limited	425.26	Historical and Cultural Values / Historic Heritage / HH-R10	Support	Supports maintenance and repair of scheduled heritage buildings being permitted activities.	Retain HH-R10 (Maintenance and repair of buildings and structures, including non-heritage buildings and structures) as notified.
Fabric Property Limited	425.27	Historical and Cultural Values / Historic Heritage / HH-R10	Support	Supports HH-R10 as notified and seeks that it is retained.	Retain HH-R10 (Maintenance and repair of buildings) as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Wellington City Council	266.84	Historical and Cultural Values / Historic Heritage / HH-R11	Amend	Considers matters of discretion in HH-R11.2 (Additions, alterations and partial demolition of buildings and structures within a heritage area, including non-heritage buildings and structures) should include HH-P11 (Height of development in heritage areas). Matters of discretion should have an additional point referring to HH-P6 (Removal of unreinforced masonry chimneys) for buildings and structures within a heritage area, except non-heritage buildings and structures.	Amend HH-R11.2 (Additions, alterations and partial demolition of buildings and structures within a heritage area, including non-heritage buildings and structures) as follows: Activity status: Restricted Discretionary (...) Matters of discretion are: 1. The matters in HH-P4, <u>HH-P11</u> and HH-P13; <u>and</u> 2. <u>The matters in HH-P6 for buildings and structures within a heritage area, except non-heritage buildings and structures.</u>
Heritage New Zealand Pouhere Taonga	FS9.32	Part 2 / Historical and Cultural Values / Historic Heritage / HH-R11	Support	HNZPT supports the amendment of HH-R11.2 to a restricted discretionary activity and that consideration should be given to matters of discretion.	Allow
Wellington City Council	266.85	Historical and Cultural Values / Historic Heritage / HH-R11	Amend	Considers HH-P4 (Enabling approach to works) needs to be included in matters of discretion.	Amend HH-R11.3 (Additions, alterations and partial demolition of buildings and structures within a heritage area, including non-heritage buildings and structures) as follows: Activity status: Restricted Discretionary (...) Matters of discretion are: 1. The matters in <u>HH-P4</u> , HH-P11 and HH-P13; <u>and</u> 2. <u>The extent of compliance with HH-S4.</u>
Heritage New Zealand Pouhere Taonga	FS9.33	Part 2 / Historical and Cultural Values / Historic Heritage / HH-R11	Support	HNZPT supports the amendment of HH-R11.3 to a restricted discretionary activity and that consideration should be given to matters of discretion.	Allow
Argosy Property No. 1 Limited	383.50	Historical and Cultural Values / Historic Heritage / HH-R11	Support	Supports additions, alterations and partial demolition of heritage buildings and buildings in heritage areas being permitted, subject to the comments made in relation to Standard HH-S1.1.b above. Argosy supports the default activity status being restricted discretionary. The provision, subject to the amendments sought to Standard HH-S1.1.b, provide appropriate restrictions on additions, alterations and partial demolition of heritage buildings.	Retain HH-R11 (Additions, alterations and partial demolition of buildings and structures within a heritage area, including non-heritage buildings and structures) as notified, subject to amendments to HH-S1.1.b.
Kāinga Ora Homes and Communities	391.178	Historical and Cultural Values / Historic Heritage / HH-R11	Oppose in part	HH-R11 is opposed in part and should be clarified.	Opposes HH-R11 in part (Additions, alterations and partial demolition of buildings and structures within a heritage area, including non-heritage buildings and structures) and seeks amendment.
Kāinga Ora Homes and Communities	391.179	Historical and Cultural Values / Historic Heritage / HH-R11	Amend	Considers that HH-R11 should be amended. HH-S1 only allows minor Internal alterations and states that this Standard does not apply to non heritage buildings. The rule should reflect this to be clear. Accordingly, Kāinga Ora seeks changes to the rule to improve clarity. Consequential changes to restricted discretionary activities should be made to reflect that changes to non-heritage buildings are permitted.	Amend HH-R11 (Additions, alterations and partial demolition of buildings and structures within a heritage area, including non-heritage buildings and structures) as follows: 1. Activity status: Permitted Where: <u>a. Non-heritage buildings and structures are affected; or</u> <u>b. For heritage buildings and structures - Compliance with HH-S1 is achieved.</u>
Heritage New Zealand Pouhere Taonga	FS9.34	Part 2 / Historical and Cultural Values / Historic Heritage / HH-R11	Support	The amendment as proposed by the submitter helps to clarify the intent of this provision.	Allow

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Lucy Harper and Roger Pemberton	401.33	Historical and Cultural Values / Historic Heritage / HH-R11	Support	<p>Supports HH-R11 as it is consistent with the direction of Part 2 of the Act and the direction of the RPS for the Wellington Region to maintain the historic heritage values of the city, while providing for upkeep and maintenance. The policy direction of avoiding demolition of heritage buildings and structures and buildings in heritage areas strongly discourages demolition and the rule structure supports this intention.</p> <p>Supports the Doctors Common Heritage area. WCC Environmental Reference Group	377.95	Historical and Cultural Values / Historic Heritage / HH-R14	Support	HH-R14 is supported as it supports maintaining buildings or structures in heritage areas in situ, recognising that place and position are a key part of heritage value.	Retain HH-R14 (Repositioning of contributing buildings and structures within a heritage area) as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Lucy Harper and Roger Pemberton	401.36	Historical and Cultural Values / Historic Heritage / HH-R14	Support	<p>Supports HH-R14 as it is consistent with the direction of Part 2 of the Act and the direction of the RPS for the Wellington Region to maintain the historic heritage values of the city, while providing for upkeep and maintenance. The policy direction of avoiding demolition of heritage buildings and structures and buildings in heritage areas strongly discourages demolition and the rule structure supports this intention.</p> <p>Supports the Doctors Common Heritage area. The submitter considers that the Doctors Common Heritage area is a visible and memorable part of the cityscape because of its buildings, streets (including steps) layout and position on Mt Victoria. The submitter considers that it still has a strong relationship to the early/historical layout of Wellington. The submitters are landowners in the area and support the recognition in the Plan of this area's significance to the city and the provisions that will retain that significance.</p>	Retain HH-R14 (Relocation of contributing buildings and structures within a heritage area) as notified.
Wellington City Council	266.87	Historical and Cultural Values / Historic Heritage / HH-R15	Amend	Considers the provision is blank and does not have any related points as to what should be included as part of an application for resource consent under this rule. Considers further guidance on accompanying information requirements is appropriate to include for this rule.	<p>Amend HH-R15 (Relocation of contributing buildings and structures to a location outside of a heritage area) as follows:</p> <p>1. Activity status: Discretionary</p> <p><u>Section 88 information requirements to accompany applications for the relocation of heritage buildings and structures beyond the existing site:</u></p> <p><u>An application under this rule for the relocation of heritage buildings and structures beyond the existing site must be accompanied by:</u></p> <p><u>1. A Heritage Impact Assessment of the relocation of the building, notably assessing: a. The heritage values of the heritage area and the contribution of the building in its current location; and b. The heritage values of the heritage area resulting from the relocation of the building;</u></p> <p><u>2. An assessment of alternatives to relocation that have been considered by the applicant, including evidence demonstrating why none of these alternatives are reasonable;</u></p> <p><u>3. A Heritage Construction Management Plan notably outlining the measures and methods that will be taken to protect the building before, during, and after the relocation.</u></p>
Heritage New Zealand Pouhere Taonga	FS9.38	Part 2 / Historical and Cultural Values / Historic Heritage / HH-R15	Support	HNZPT supports the amendment of HH-R15 as a discretionary activity status.	Allow
WCC Environmental Reference Group	377.96	Historical and Cultural Values / Historic Heritage / HH-R15	Support	HH-R15 is supported as it supports maintaining contributing buildings or structures in heritage areas in situ, recognising that place and position are a key part of heritage value.	Retain HH-R15 (Relocation of contributing buildings and structures to a location outside of a heritage area) as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Lucy Harper and Roger Pemberton	401.37	Historical and Cultural Values / Historic Heritage / HH-R15	Support	<p>Supports HH-R15 as it is consistent with the direction of Part 2 of the Act and the direction of the RPS for the Wellington Region to maintain the historic heritage values of the city, while providing for upkeep and maintenance. The policy direction of avoiding demolition of heritage buildings and structures and buildings in heritage areas strongly discourages demolition and the rule structure supports this intention.</p> <p>Supports the Doctors Common Heritage area. The submitter considers that the Doctors Common Heritage area is a visible and memorable part of the cityscape because of its buildings, streets (including steps) layout and position on Mt Victoria. The submitter considers that it still has a strong relationship to the early/historical layout of Wellington. The submitters are landowners in the area and support the recognition in the Plan of this area's significance to the city and the provisions that will retain that significance.</p>	Retain HH-R15 (Relocation of contributing buildings and structures to a location outside of a heritage area) as notified.
Dean Knight and Alan Wendt	265.6	Historical and Cultural Values / Historic Heritage / HH-R16	Amend	Considers that HH-P16 (New buildings and structures within heritage areas) is appropriate with respect to demolition in Salisbury Garden Court (Item 24 of SCHED3 - Heritage Areas)	Retain HH-P16 (Total demolition of contributing buildings and structures) as notified, with respect to Salisbury Garden Court.
Wellington City Council	266.88	Historical and Cultural Values / Historic Heritage / HH-R16	Amend	Considers this provision is blank and does not have any related points as to what should be included as part of an application for resource consent under this rule. Considers further guidance on accompanying information requirements is appropriate to include for this rule.	<p>Amend HH-R16 (Total demolition of contributing buildings and structures) as follows:</p> <p>1. Activity status: Discretionary</p> <p><u>Section 88 information requirements to accompany applications for the total demolition of contributing buildings and structures:</u> <u>An application under this rule for the total demolition of heritage buildings and structures must be accompanied by:</u></p> <ol style="list-style-type: none"> <u>1. A Heritage Impact Assessment of the demolition of the building;</u> <u>2. A detailed seismic analysis (DSA) where the building is identified as earthquake prone, and a detailed description and methodology of the works required to increase seismic resilience, provided by a suitably qualified structural engineer;</u> <u>3. Where the building is identified as being beyond repair, a condition survey report of the building, provided by a suitably qualified professional;</u> <u>4. Costings of the works required to increase seismic resilience provided by a suitably qualified quantity surveyor;</u> <u>5. Estimates of contributions that are available, including funding, grants, consent fee reimbursement and rates relief;</u> <u>6. An assessment of market demand and pricing for comparable buildings and floor space;</u> <u>7. A valuation of the:</u> <ol style="list-style-type: none"> <u>a. Building following completion of works; and</u> <u>b. Financial return on investment expected upon completion of the works;</u> <ol style="list-style-type: none"> <u>i. Depending on the proposal this could be by way of lettable income on floorspace as well as forecast sales price; and</u> <u>8. An assessment of alternatives to total demolition that have been considered by the applicant, including options for seismic strengthening, adaptive reuse, or restoration where applicable, and evidence demonstrating why none of these options are reasonable.</u> <p>The Council will obtain a peer review by a suitably qualified professional of the information provided by the applicant.</p>
Heritage New Zealand Pouhere Taonga	FS9.39	Part 2 / Historical and Cultural Values / Historic Heritage / HH-R16	Support	HNZPT supports the amendment of HH-R16 as a discretionary activity status.	Allow

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
WCC Environmental Reference Group	377.97	Historical and Cultural Values / Historic Heritage / HH-R16	Support	Avoiding demolition unless specific conditions are met provides certainty and reflects the importance of heritage areas to Wellington's identity and character.	Retain HH-R16 (Total demolition of contributing buildings and structures) as notified.
Lucy Harper and Roger Pemberton	401.38	Historical and Cultural Values / Historic Heritage / HH-R16	Support	Supports HH-R16 as it is consistent with the direction of Part 2 of the Act and the direction of the RPS for the Wellington Region to maintain the historic heritage values of the city, while providing for upkeep and maintenance. The policy direction of avoiding demolition of heritage buildings and structures and buildings in heritage areas strongly discourages demolition and the rule structure supports this intention. Supports the Doctors Common Heritage area. The submitter considers that the Doctors Common Heritage area is a visible and memorable part of the cityscape because of its buildings, streets (including steps) layout and position on Mt Victoria. The submitter considers that it still has a strong relationship to the early/historical layout of Wellington. The submitters are landowners in the area and support the recognition in the Plan of this area's significance to the city and the provisions that will retain that significance.	Retain HH-R16 (Total demolition of contributing buildings and structures) as notified.
Peter Fordyce	431.7	Historical and Cultural Values / Historic Heritage / HH-R16	Amend	Considers that Historic Heritage rules governing demolition of pre-1930s buildings should have their coverage increased to more widely cover demolition prevention of pre-1930s dwellings in areas under protection.	Seeks that HH-R16 (Total demolition of contributing buildings and structures) have increased demolition protection coverage for pre-1930s dwellings in Heritage Areas. [Decision requested - submission refers to Historic Heritage provisions]
WCC Environmental Reference Group	377.98	Historical and Cultural Values / Historic Heritage / HH-R18	Support	HH-R18 is supported as it will enable activities that increase appreciation of sites whilst protecting them.	Retain HH-R18 (Modification of a scheduled archaeological site, including earthworks within the mapped extent) as notified.
WCC Environmental Reference Group	377.99	Historical and Cultural Values / Historic Heritage / HH-R19	Support	Avoiding demolition unless specific conditions are met provides certainty and reflects the importance of archaeological sites to our history and identity.	Retain HH-R19 (Total demolition of scheduled archaeological sites) as notified.
Wellington Heritage Professionals	412.53	Historical and Cultural Values / Historic Heritage / HH-R20	Oppose	Opposes the rule enabling alterations to enable building access at ground floor level of 32 the Terrace 'The Braemar building' being permitted as they may have an adverse effect on heritage.	Delete rule HH-R20 (Alterations to enable building access at ground floor level of 32 the Terrace 'The Braemar building')
Argosy Property No. 1 Limited	383.52	Historical and Cultural Values / Historic Heritage / HH-S1	Oppose	Considers standard HH-S1.1.b would restrict internal additions and alterations of heritage buildings and heritage structures which would otherwise be permitted. It is important to encourage and enable the adaptive reuse of heritage buildings to ensure that they are occupied and maintained, this includes the ability to change internal floor layout and height for modern uses	Delete HH-S1.1.b (Permitted additions, alterations, and partial demolition) in its entirety.
Lucy Harper and Roger Pemberton	401.39	Historical and Cultural Values / Historic Heritage / HH-S1	Support	Supports HH-S1 as it is consistent with the direction of Part 2 of the Act and the direction of the RPS for the Wellington Region to maintain the historic heritage values of the city, while providing for upkeep and maintenance. The policy direction of avoiding demolition of heritage buildings and structures and buildings in heritage areas strongly discourages demolition and the rule structure supports this intention.	Retain HH-S1 (Permitted additions, alterations and partial demolition) as notified.
Wellington Heritage Professionals	412.54	Historical and Cultural Values / Historic Heritage / HH-S1	Amend	Considers that as per the current District Plan, structural strengthening which is visible from the exterior of the building should not be a permitted activity as this is likely to have an adverse effect on heritage values.	Amend HH-S1 (Permitted additions, alterations and partial demolition) as follows 1. The works must be internal to built heritage and not: a. Involve buildings where the whole interior, or individual interior elements have been specifically scheduled (and the work affects the scheduled interior or elements; or b. Result in new internal walls, floor levels, or internal structural strengthening visible from the exterior of the building

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Heritage New Zealand Pouhere Taonga	FS9.40	Part 2 / Historical and Cultural Values / Historic Heritage / HH-S1	Support	HNZPT supports the amendment of HH-S1 as internal structural elements have the potential to adversely impact on heritage values.	Allow
Wellington Heritage Professionals	412.55	Historical and Cultural Values / Historic Heritage / HH-S1	Amend	Considers that HH-S1 should apply to non-heritage buildings in heritage areas also as visible strengthening is likely to have an adverse effect on the area.	Seeks that HH-S1 (Permitted additions, alterations and partial demolition) apply to non-heritage buildings in heritage areas.
Fabric Property Limited	425.31	Historical and Cultural Values / Historic Heritage / HH-S1	Support	Supports HH-S1 as notified as it recognises that the standard does not apply to non-heritage buildings in heritage areas.	Retain HH-S1 (Permitted additions, alterations and partial demolition) as notified.
Wharenui Apartments Ltd	358.1	Historical and Cultural Values / Historic Heritage / HH-S2	Oppose in part	HH-S2 is opposed on the grounds that it will prevent development rights to be exercised at the rear of 274 Oriental Parade. The potential heritage listing of the building will not allow the development of the area of approximately 800 square metres. The rear of the site has a pedestrian right from Wilkinson St. The Submitter considers that the heritage listing will make the realisation of the development potential far more difficult to achieve.	Opposes HH-S2 (New buildings and structures on the site of heritage buildings or structures and on sites within heritage areas) as notified and seeks amendment.
Wharenui Apartments Ltd	358.2	Historical and Cultural Values / Historic Heritage / HH-S2	Amend	Considers that wording in HH-S2 should be amended to allow the development of new buildings on sites of heritage buildings.	Amend HH-S2 (New buildings and structures on the site of heritage buildings or structures and on sites within heritage areas) to allow the development of new buildings on heritage building sites.
Kāinga Ora Homes and Communities	391.182	Historical and Cultural Values / Historic Heritage / HH-S2	Oppose in part	HH-S2 is opposed and an amendment is sought.	Opposes HH-S2 (New buildings and structures on the site of heritage buildings or structures and on sites within heritage areas) and seeks amendment.
Hilary Watson	FS74.2	Part 2 / Historical and Cultural Values / Historic Heritage / HH-S2	Oppose	Hilary Watson considers that these points are about removing character precincts from the plan. The precincts are important to protecting and preserving Wellington's townscape and sense of place, and can be retained and increased while still allowing enough realisable development capacity. Hilary Watson support the Council using Character as a Qualifying Matter to modify the permitted building heights and other matters under NPS-UD 2020 or the MDRS.	Disallow
Kāinga Ora Homes and Communities	391.183	Historical and Cultural Values / Historic Heritage / HH-S2	Amend	Considers that HH-S2 should be amended to remove the size and height limits for accessory buildings in order to not restrict development on heritage sites. The Standard restricts non-heritage buildings on heritage sites, which will hinder development potential in high medium and high density areas where this will not affect built heritage values. HH-R2 permits partial and total demolition of non-scheduled buildings and structures on the site of heritage buildings and heritage structures. By comparison, Rule HH-R4 permits new buildings and structures on the site of heritage buildings and heritage structures where HH-S2 is achieved. HH-S2 only applies to the MDRZ and HDRZ and only allows buildings and structures that are accessory to the primary residential building, located to the rear and less than 10m2. Given that the additional buildings are to the rear of, and accessory to, the primary residential building it is considered that the 10m2 limit should be removed as this will generally avoid the building being visible from the street and interfering with the heritage character. (Option B)	Amend HH-S2 (New buildings and structures on the site of heritage buildings or structures and on sites within heritage areas) as follows: Medium Density Residential Zone and High Density Residential Zone: 1. Any new building or structure must be: a. Accessory to the primary residential building; <u>and</u> b. Located to the rear of the primary residential building; <u>and</u> c. Smaller than 10m2. 2. Any new structure (excluding buildings provided for in HH-S2.1) must have a maximum height of 4.5m
Hilary Watson	FS74.3	Part 2 / Historical and Cultural Values / Historic Heritage / HH-S2	Oppose	Hilary Watson considers that these points are about removing character precincts from the plan. The precincts are important to protecting and preserving Wellington's townscape and sense of place, and can be retained and increased while still allowing enough realisable development capacity. Hilary Watson support the Council using Character as a Qualifying Matter to modify the permitted building heights and other matters under NPS-UD 2020 or the MDRS.	Disallow

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Kāinga Ora Homes and Communities	391.184	Historical and Cultural Values / Historic Heritage / HH-S2	Amend	Considers that HH-S2 should be amended to remove the size and height limits for accessory buildings in order to not restrict development on heritage sites. HH-S2 only applies to the MDRZ and HDRZ and only allows buildings and structures that are accessory to the primary residential building, located to the rear and less than 10m2. Given that the additional buildings are to the rear of, and accessory to, the primary residential building it is considered that the 10m2 limit should be removed as this will generally avoid the building being visible from the street and interfering with heritage character. (Option B)	Amend HH-S2 (New buildings and structures on the site of heritage buildings or structures and on sites within heritage areas) as follows: Medium Density Residential Zone and High Density Residential Zone: 3. Any new building or structure must be: a. Accessory to the primary residential building; and b. Located to the rear of the primary residential building; and c. Smaller than 10m2. 4. Any new structure (excluding buildings provided for in HH-S2.1) must have a maximum height of 4.5m
Hilary Watson	FS74.4	Part 2 / Historical and Cultural Values / Historic Heritage / HH-S2	Oppose	Hilary Watson considers that these points are about removing character precincts from the plan. The precincts are important to protecting and preserving Wellington's townscape and sense of place, and can be retained and increased while still allowing enough realisable development capacity. Hillary Watson support the Council using Character as a Qualifying Matter to modify the permitted building heights and other matters under NPS-UD 2020 or the MDRS.	Disallow
Lucy Harper and Roger Pemberton	401.40	Historical and Cultural Values / Historic Heritage / HH-S2	Support	Supports HH-S2 as it is consistent with the direction of Part 2 of the Act and the direction of the RPS for the Wellington Region to maintain the historic heritage values of the city, while providing for upkeep and maintenance. The policy direction of avoiding demolition of heritage buildings and structures and buildings in heritage areas strongly discourages demolition and the rule structure supports this intention.	Retain HH-S2 (New buildings and structures on the site of heritage buildings or structures and on sites within heritage areas) as notified.
Lucy Harper and Roger Pemberton	401.41	Historical and Cultural Values / Historic Heritage / HH-S3	Support	Supports HH-S3 as it is consistent with the direction of Part 2 of the Act and the direction of the RPS for the Wellington Region to maintain the historic heritage values of the city, while providing for upkeep and maintenance. The policy direction of avoiding demolition of heritage buildings and structures and buildings in heritage areas strongly discourages demolition and the rule structure supports this intention.	Retain HH-S3 (Modifications to non-scheduled buildings and structures on the site of a heritage building or structure) as notified.
Parliamentary Service	375.9	Historical and Cultural Values / Historic Heritage / HH-S4	Support in part	HH-S4 is supported due to the differentiation of maximum heights across the Parliament Precinct. However the wording used in this Standard is ambiguous, and does not appear to align with the height controls set out on the Council's interactive maps.	Retain HH-S4 (Minimum and maximum heights for heritage areas in the City Centre Zone, Centre Zones and Waterfront Zone) with amendment.
Parliamentary Service	375.10	Historical and Cultural Values / Historic Heritage / HH-S4	Amend	Considers that the wording in HH-S4 should be amended to avoid any ambiguity about maximum heights allowed at the site. The wording used in this Standard is ambiguous, and does not appear to align with the height controls set out on the Council's interactive maps. The submitter requests that the wording is amended to avoid any ambiguity about maximum heights allowed at the site.	Amend HH-S4 (Minimum and maximum heights for heritage areas in the City Centre Zone, Centre Zones and Waterfront Zone) as follows: Location ... Between Parliament buildings and Museum Street <u>From the front (eastern edge) of Parliament buildings westward to Museum Street</u>
Argosy Property No. 1 Limited	383.53	Historical and Cultural Values / Historic Heritage / HH-S4	Support	Note the maximum height above ground level for the part of the Stout Street Precinct heritage area that includes 15 Stout Street and 143-149 Lambton Quay is 50m. This is appropriate in light of the building heights on the site and in the surrounding area and Argosy supports this height limit. The maximum height above ground level for the sites at 360-366 Lambton Quay is 95m in the airspace above 360-366 Lambton Quay and 8 Wills Street. This is also appropriate in light of the existing building heights and Argosy supports this height limit	Retain HH-S4 (Minimum and maximum heights for heritage areas in the City Centre Zone, Centre Zones and Waterfront Zone) as notified.
Kāinga Ora Homes and Communities	391.185	Historical and Cultural Values / Historic Heritage / HH-S4	Oppose in part	HH-S4 is opposed and amendments are sought.	Opposes HH-S4 (Minimum and maximum heights for heritage areas in the City Centre Zone, Centre Zones and Waterfront Zone) and seeks amendments.

Historical and Cultural Values - Notable Trees

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Kāinga Ora Homes and Communities	391.186	Historical and Cultural Values / Historic Heritage / HH-S4	Amend	Considers that HH-S4 should be amended to align with other relief relating to Zone provisions as the heights of buildings should be comparable with the underlying zone rather than the heritage provisions particularly at the interface with the underlying zone.	Amend HH-S4 (Minimum and maximum heights for heritage areas in the City Centre Zone, Centre Zones and Waterfront Zone) to: - Align height limits with amended Historic Heritage Standards, - Amend underlying zoning according to Appendix 4, - Amend Residential and Centre Zones heights and Heights in relation to boundary standards. [Refer to original submission, including Appendix 4]
Lucy Harper and Roger Pemberton	401.42	Historical and Cultural Values / Historic Heritage / HH-S4	Support	Supports HH-S4 as it is consistent with the direction of Part 2 of the Act and the direction of the RPS for the Wellington Region to maintain the historic heritage values of the city, while providing for upkeep and maintenance. The policy direction of avoiding demolition of heritage buildings and structures and buildings in heritage areas strongly discourages demolition and the rule structure supports this intention.	Retain HH-S4 (Minimum and maximum heights for heritage areas in the City Centre Zone, Centre Zones and Waterfront Zone) as notified.
Lucy Harper and Roger Pemberton	401.43	Historical and Cultural Values / Historic Heritage / HH-S5	Support	Supports HH-S5 as it is consistent with the direction of Part 2 of the Act and the direction of the RPS for the Wellington Region to maintain the historic heritage values of the city, while providing for upkeep and maintenance. The policy direction of avoiding demolition of heritage buildings and structures and buildings in heritage areas strongly discourages demolition and the rule structure supports this intention.	Retain HH-S5 (Grazing of stock) as notified.
Lucy Harper and Roger Pemberton	401.44	Historical and Cultural Values / Historic Heritage / HH-S6	Support	Supports HH-S6 as it is consistent with the direction of Part 2 of the Act and the direction of the RPS for the Wellington Region to maintain the historic heritage values of the city, while providing for upkeep and maintenance. The policy direction of avoiding demolition of heritage buildings and structures and buildings in heritage areas strongly discourages demolition and the rule structure supports this intention.	Retain HH-S6 (Earthworks for the maintenance and repair of existing roads, walking and access tracks, and operation of existing cultivation areas) as notified.
Lucy Harper and Roger Pemberton	401.45	Historical and Cultural Values / Historic Heritage / HH-S7	Support	Supports HH-S7 as it is consistent with the direction of Part 2 of the Act and the direction of the RPS for the Wellington Region to maintain the historic heritage values of the city, while providing for upkeep and maintenance. The policy direction of avoiding demolition of heritage buildings and structures and buildings in heritage areas strongly discourages demolition and the rule structure supports this intention.	Retain HH-S7 (Mowing of lawns, trimming and pruning of trees and vegetation within the extent of a scheduled archaeological site) as notified.
Living Streets Aotearoa	482.44	Historical and Cultural Values / Notable Trees / General TREE	Support	Supports the provisions to protect notable trees. Considers that these are an important part of the quality of the public space and protect genetic resources.	Retain the Notable Trees chapter as notified.
Waka Kotahi	370.176	Historical and Cultural Values / Notable Trees / New TREE	Amend	Proposes a new rule to enable relocation, removal, or destruction of notable trees for maintenance and development of infrastructure. A restricted discretionary activity status is appropriate as it enables Council to assess whether the activity is necessary for the specified purposes, methods, and whether alternatives have been sufficiently explored.	Add a new Rule to the Notable Tree chapter: <u>TREE-RX.</u> <u>Activity status: Restricted Discretionary</u> <u>Where</u> <u>a. The relocation, removal, or destruction of notable trees is for the purposes of maintaining or upgrading infrastructure.</u> <u>Matter of discretion are:</u> <u>a. Methods of relocation, removal, or destruction</u> <u>b. Feasibility of alternatives Public safety and benefit</u>

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Director-General of Conservation	385.34	Historical and Cultural Values / Notable Trees / New TREE	Amend	<p>Considers that that the provisions of the Thames Coromandel District Plan, as they relate to the management of Kauri Dieback disease, should be adopted into the Proposed District Plan where appropriate.</p> <p>Schedule 6 of the Wellington City Proposed District Plan lists several Kauri as Notable Trees and there are likely to be other Kauri within Wellington's boundaries. Kauri Dieback is caused by a pathogen that is easily spread through soil movements, including when it is carried on footwear, equipment, and vehicles. The disease is threatening Kauri with functional extinction and requires collaborative work to manage the disease and control any further spread. Any land disturbance works within three times the radius of the canopy of the dripline of New Zealand Kauri Tree ("the kauri hygiene zone") can cause potential contamination of an uninfected site and spread the disease.</p>	<p>Add provisions to address the management of Kauri Dieback, particularly around earthworks and measures to prevent spread of the disease.</p> <p>Provide clear guidance for the management of Kauri Dieback disease, such as laid out in the Thames Coromandel District Plan.</p>
Royal Forest and Bird Protection Society	345.152	Historical and Cultural Values / Notable Trees / TREE-O1	Oppose in part	Seeks rewording to ensure Notable Trees do not include pest species that are registered weed species as per pest definition of the proposed district plan.	<p>Amend TREE-O1 (Purpose):</p> <p>Notable trees are recognised for their contribution to the city's amenity, history, ecology and sense of place and cultural value to mana whenua <u>and don't include pest species.</u></p>
Argosy Property No. 1 Limited	383.54	Historical and Cultural Values / Notable Trees / TREE-O1	Support	Supports the objectives relating to notable trees to the extent that they provide for maintenance and appropriate modification of notable trees.	Retain TREE-O1 (Purpose) as notified.
Te Rūnanga o Toa Rangatira	488.43	Historical and Cultural Values / Notable Trees / TREE-O1	Support	Supports the recognition of the cultural value of notable trees for mana whenua	Retain Objective TREE-O1 (Purpose) as notified.
Royal Forest and Bird Protection Society	345.153	Historical and Cultural Values / Notable Trees / TREE-O2	Support	Supports TREE-O2.	Retain TREE-O2 (Protecting notable trees) as notified.
Argosy Property No. 1 Limited	383.55	Historical and Cultural Values / Notable Trees / TREE-O2	Support	Supports the objectives relating to notable trees to the extent that they provide for maintenance and appropriate modification of notable trees.	Retain TREE-O2 (Protecting notable trees) as notified.
Royal Forest and Bird Protection Society	345.154	Historical and Cultural Values / Notable Trees / TREE-O3	Support	Supports TREE-O3.	Retain TREE-O3 (Maintaining notable trees) as notified.
Argosy Property No. 1 Limited	383.56	Historical and Cultural Values / Notable Trees / TREE-O3	Support	Supports the objectives relating to notable trees to the extent that they provide for maintenance and appropriate modification of notable trees.	Retain TREE-O3 (Maintaining notable trees) as notified.
Royal Forest and Bird Protection Society	345.155	Historical and Cultural Values / Notable Trees / TREE-P1	Oppose in part	Seeks policy direction to enable further surveys of Notable Trees and provide for the inclusion of additional trees in SCHED6 over the life of the Plan.	<p>Amend TREE-P1 (Identifying notable trees):</p> <p>Identify notable trees having regard to:</p> <ol style="list-style-type: none"> Tree health, condition and ecological value; <u>x. Age, height and irreplaceability;</u> Amenity value and community benefit; Notability and recognition; and Significant cultural and heritage value. <p><u>Provide opportunity to add to SCHED6 by:</u></p> <ol style="list-style-type: none"> <u>requiring assessments of trees for subdivision, development and land use consent applications;</u> <u>supporting survey initiatives;</u> <u>supporting plan change processes to update SCHED6</u>
Argosy Property No. 1 Limited	383.57	Historical and Cultural Values / Notable Trees / TREE-P1	Support	Supports the policies relating to notable trees, except as specified below. It is important that notable trees are identified according to robust criteria and appropriate controls are in place for maintenance and works in proximity to trees	Retain TREE-P1 (Identifying notable trees) as notified.
Royal Forest and Bird Protection Society	345.156	Historical and Cultural Values / Notable Trees / TREE-P2	Support	Generally supports policy TREE-P2.	Retain TREE-P2 (Support for landowners) as notified.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Argosy Property No. 1 Limited	383.58	Historical and Cultural Values / Notable Trees / TREE-P2	Support	Supports the policies relating to notable trees, except as specified below. It is important that notable trees are identified according to robust criteria and appropriate controls are in place for maintenance and works in proximity to trees	Retain TREE-P2 (Support for landowners) as notified.
Royal Forest and Bird Protection Society	345.157	Historical and Cultural Values / Notable Trees / TREE-P3	Support	Generally supports policy TREE-P3.	Retain TREE-P3 (Allowing trimming and pruning of notable trees) as notified.
Waka Kotahi	370.177	Historical and Cultural Values / Notable Trees / TREE-P3	Support	Support policy as worded as it allows for trimming or pruning of notable trees where the works prevent interface with footpaths, property, or network utilities. This will provide for trimming or pruning or notable trees where it is essential for the safe and efficient operation of State Highway infrastructure.	Retain TREE-P3 (Allowing trimming and pruning of notable trees) as notified.
Argosy Property No. 1 Limited	383.59	Historical and Cultural Values / Notable Trees / TREE-P3	Support	Supports TREE-P3, as it reflects that there are circumstances where it is reasonable or necessary to prune notable trees, including to prevent notable trees being damaged where the canopy overhangs footpaths. For example, the notable trees at 7 Waterloo Quay overhang the footpath on Waterloo Quay and pruning is necessary to prevent the trees from becoming a nuisance (and potential safety hazard) to pedestrians	Retain TREE-P3 (Allowing trimming and pruning of notable trees) as notified.
Royal Forest and Bird Protection Society	345.158	Historical and Cultural Values / Notable Trees / TREE-P4	Support	Generally supports policy TREE-P4.	Retain TREE-P4 (Other trimming and pruning) as notified.
Argosy Property No. 1 Limited	383.60	Historical and Cultural Values / Notable Trees / TREE-P4	Support	Supports TREE-P4 as it allows trimming or pruning of notable trees which is consistent with other criteria in which works to notable trees are appropriate. There are practical reasons which may not fit into TREE-P3 but in which works to notable trees are needed, and it is important that these are provided for	Retain TREE-P4 (Other trimming or pruning) as notified.
Royal Forest and Bird Protection Society	345.159	Historical and Cultural Values / Notable Trees / TREE-P5	Support	Generally supports policy TREE-P5.	Retain TREE-P5 (Managing activities in the root protection area) as notified.
Argosy Property No. 1 Limited	383.61	Historical and Cultural Values / Notable Trees / TREE-P5	Support	Supports TREE-P5 which places appropriate considerations for works within the root protection area of a tree. Argosy has also made a submission on the definition for root protection area below	Retain TREE-P5 (Managing activities in the root protection area) as notified.
Royal Forest and Bird Protection Society	345.160	Historical and Cultural Values / Notable Trees / TREE-P6	Support	Generally supports policy TREE-P6.	Retain TREE-P6 (Repositioning and Relocation) as notified.
Waka Kotahi	370.178	Historical and Cultural Values / Notable Trees / TREE-P6	Support	Support policy as worded, as it allows repositioning or relocating of notable trees where necessary to enable development and operation of infrastructure. It is noted that there is no rule to enable repositioning or relocating of notable trees for these purposes. Waka Kotahi submit that a rule be included to enable repositioning, relocation, or destruction for purposes specified in Tree-P6.	Retain TREE-P6 (Repositioning and Relocation) as notified.
Argosy Property No. 1 Limited	383.62	Historical and Cultural Values / Notable Trees / TREE-P6	Support	Supports TREE-P6.	Retain TREE-P6 (Repositioning and relocation) as notified.
Royal Forest and Bird Protection Society	345.161	Historical and Cultural Values / Notable Trees / TREE-P7	Support	Generally supports policy TREE-P7.	Retain TREE-P7 (Destruction) as notified.
Waka Kotahi	370.179	Historical and Cultural Values / Notable Trees / TREE-P7	Support in part	Support policy.	Retain TREE-P7 (Destruction), subject to amendments.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Waka Kotahi	370.180	Historical and Cultural Values / Notable Trees / TREE-P7	Amend	Considers amendments appropriate to enable destruction of a notable tree where necessary for purposes of maintaining or developing infrastructure. It is noted that the policy requires repositioning and relocation to be explored in the first instance. Waka Kotahi also submit that a rule be included in this chapter to enable demolition where is necessary in enabling efficient development and operation of infrastructure	Amend TREE-P7 (Destruction) as follows: Only allow the destruction of notable trees where it can be demonstrated that: 1. The tree poses a serious and imminent threat to the safety of people or property; or 2. The tree is dead, or in a state of terminal decline; or 3. <u>Destruction of the tree is necessary to enable the efficient development and operation of infrastructure</u> 4. There are no reasonable alternatives including: a. Trimming and pruning; and b. Repositioning and relocation.
Argosy Property No. 1 Limited	383.63	Historical and Cultural Values / Notable Trees / TREE-P7	Support in part	Supports TREE-P7 however it is more appropriate to refer to 'removal' rather than 'destruction'.	Amend TREE-P7 (Destruction) to refer to "destruction and removal".
Royal Forest and Bird Protection Society	345.162	Historical and Cultural Values / Notable Trees / TREE-R1	Support	Generally supports TREE-R1.	Retain TREE-R1 (Trimming and pruning of notable trees) as notified.
Waka Kotahi	370.181	Historical and Cultural Values / Notable Trees / TREE-R1	Support	Support permitted activity status for trimming and pruning of notable trees for specified purposes – the permitted activity status enables Waka Kotahi to trim or prune notable trees where necessary to enable maintaining the safety and operation of infrastructure – including provision for emergency works.	Retain TREE-R1 (Trimming and pruning of notable trees) as notified.
Argosy Property No. 1 Limited	383.64	Historical and Cultural Values / Notable Trees / TREE-R1	Support in part	Supports TREE-R1.1 to the extent that it enables trimming and pruning of trees to be permitted in appropriate circumstances, for the reasons set out above. Argosy also supports the default activity status for activities that do not comply with TREE-R1 to be restricted discretionary. However, it is considered that it is also appropriate for trimming and pruning to be permitted where the works will maintain or improve tree health. Policy TREE-P3 recognises that trimming and pruning should be allowed where the works will maintain or improve tree health, but this is not reflected in Rule TREE-R1. This is appropriate to allow for ongoing maintenance to protect the health of notable trees. We've also suggested some amendments for clarity.	Amend TREE-R1 (Trimming and pruning of notable trees) as follows: 1. Activity status: Permitted Where: a. The trimming and pruning is necessary to- i. <u>The trimming and pruning is necessary to</u> comply with the Electricity (Hazards from Trees) Regulations 2003; or ii. The works are necessary to prevent interference with footpaths, buildings, structures or network utilities and are undertaken to the minimum extent required to prevent interference and TREE-S1 is complied with; or iii. The works involve the removal of broken branches, dead wood and diseased vegetation and TREE-S1 is complied with; or iv. <u>The works will maintain or improve tree health and TREE-S1 is complied with; or</u> iv. The works are essential due to a serious and imminent threat to the safety of people or damage to property and TREE-S2 is complied with.
Royal Forest and Bird Protection Society	345.163	Historical and Cultural Values / Notable Trees / TREE-R2	Support	Generally supports TREE-R2.	Retain TREE-R2 (Activity and development within the root protection area of notable trees) as notified.
Waka Kotahi	370.182	Historical and Cultural Values / Notable Trees / TREE-R2	Support	Support permitted activity status as it will enable Waka Kotahi to undertake works within the root zone for the purposes of undergoing maintenance and/or repair of infrastructure.	Retain TREE-R2 (Activity and development within the root protection area of notable trees) as notified.
Argosy Property No. 1 Limited	383.65	Historical and Cultural Values / Notable Trees / TREE-R2	Support in part	Supports rule TREE-R2.1 however considers that it also needs to refer to existing footpaths.	Amend TREE-R2 (Activity and development within the root protection area of notable trees) as follows: b. The works are for the maintenance and repair of existing <u>footpaths</u> , roading, transport or other infrastructure
Jeremy Partridge	102.2	Historical and Cultural Values / Notable Trees / TREE-R3	Amend	Opposes Tree-R3.1.b (Destruction, relocation or removal of notable trees) which allows the removal of a Notable Tree without a consent if it is deemed to be 'in terminal decline' by a Technician Arborist as a permitted activity. Considers that as tree's age they inevitably decline and may develop large cavities, die back and be consumed by decay fungi. Such trees may be safe or can be managed to keep them safe, and may live for another 100 years. Such trees could be classed as veteran and remain very important for their historical, cultural and ecological value.	Delete the ability to remove Notable Trees as a permitted activity in TREE-R3 (Ⓜ) Destruction, relocation or removal of notable trees) if it is deemed to be in terminal decline by a Technician Arborist.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Royal Forest and Bird Protection Society	345.164	Historical and Cultural Values / Notable Trees / TREE-R3	Support	Generally supports TREE-R3.	Retain TREE-R3 (Destruction, relocation or removal of notable trees) as notified.
Waka Kotahi	370.183	Historical and Cultural Values / Notable Trees / TREE-R3	Support	Support the inclusion of emergency works in the permitted activity status for destruction, relocation, or removal of notable trees.	Retain TREE-R3 (Destruction, relocation or removal of notable trees) as notified.
Argosy Property No. 1 Limited	383.66	Historical and Cultural Values / Notable Trees / TREE-R3	Support	Supports the rule as it is recognised that in some instances it will be appropriate for notable trees to be destroyed, relocated or removed.	Retain TREE-R3 (Destruction, relocation, or removal of notable trees) as notified.
Royal Forest and Bird Protection Society	345.165	Historical and Cultural Values / Notable Trees / TREE-R4	Support	Generally supports TREE-R4.	Retain TREE-R4 (All other land use activities) as notified.
Waka Kotahi	370.184	Historical and Cultural Values / Notable Trees / TREE-R4	Support	Support discretionary activity status for all other land use activities as it provides pathway for other relocation, removal, or destruction of notable trees for infrastructure development and maintenance purposes	Retain TREE-R4 (All other land use activities) as notified.
Royal Forest and Bird Protection Society	345.166	Historical and Cultural Values / Notable Trees / TREE-R5	Support	Generally supports TREE-R5.	Retain TREE-R5 (The storage or discharge of any toxic substance within the root protection area of notable trees) as notified.
Royal Forest and Bird Protection Society	345.167	Historical and Cultural Values / Notable Trees / TREE-S1	Support	Generally supports TREE-S1.	Retain TREE-S1 (Certification by works arborist) as notified.
Waka Kotahi	370.185	Historical and Cultural Values / Notable Trees / TREE-S1	Support	Support standards as worded.	Retain TREE-S1 (Certification by works arborist) as notified.
Argosy Property No. 1 Limited	383.67	Historical and Cultural Values / Notable Trees / TREE-S1	Support	Considers this standard is appropriate and should be retained.	Retain TREE-S1 (Certification by works arborist) as notified.
Royal Forest and Bird Protection Society	345.168	Historical and Cultural Values / Notable Trees / TREE-S2	Support	Generally supports TREE-S2.	Retain TREE-S2 (Emergency trimming or pruning work) as notified.
Waka Kotahi	370.186	Historical and Cultural Values / Notable Trees / TREE-S2	Support	Support standards as worded.	Retain TREE-S2 (Emergency trimming or pruning work) as notified.
Argosy Property No. 1 Limited	383.68	Historical and Cultural Values / Notable Trees / TREE-S2	Support in part	Supports enabling emergency trimming or pruning work, is necessary. However, in the case of a true emergency it may be difficult to advise the Council of works at least one hour prior to the works commencing. This is particularly onerous as the activity would otherwise be permitted.	Amend TREE-S2 (Emergency trimming or pruning work) as follows: 1. The works are undertaken or supervised by a works arborist and Council is advised at least 1 hour prior to the work commencing <u>or as soon as practicable after the works have occurred.</u>
Royal Forest and Bird Protection Society	345.169	Historical and Cultural Values / Notable Trees / TREE-S3	Support	Generally supports TREE-S3.	Retain TREE-S3 (Certification that a scheduled notable tree is dead or in terminal decline) as notified.
Waka Kotahi	370.187	Historical and Cultural Values / Notable Trees / TREE-S3	Support	Support standards as worded.	Retain TREE-S3 (Certification that a scheduled notable tree is dead or in terminal decline) as notified.
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	99.62	Historical and Cultural Values / Notable Trees / TREE-S4	Oppose	Standard TREE-S4 should be deleted and relocated from the Notable Trees chapter to the Infrastructure – Other Overlays Sub-Chapter. The current wording is based on the Auckland Unitary Plan and was requested by the telecommunications submitters on the draft plan.	Delete TREE-S4 (Works in the root protection area) in order to relocate the provision in the Infrastructure - Other Overlays sub-chapter.

Historical and Cultural Values - Sites and Areas of Significance to Māori

Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	99.63	Historical and Cultural Values / Notable Trees / TREE-S4	Amend	TREE-S4 should be clarified and amended. A readability edit is recommended to make it clearer how the rule is intended to apply and how it has been interpreted in practice.	Amend TREE-S4 (Works in the root protection area) as follows: ... 2. Excavation must be undertaken by drilling machine at a depth of 1m or greater, hand-digging, air spade, or hydro vac or drilling machine, within the root protection area at a depth of 1m or greater; ...
Jeremy Partridge	102.3	Historical and Cultural Values / Notable Trees / TREE-S4	Amend	Considers that TREE-S4.2 should be amended to remove the ability to use a hydrovac tool to remove soil around a Notable Tree's roots. A hydrovac uses water at high pressure to dislodge and then suck away soil around tree roots. Unfortunately the high pressure also removes outer and inner bark and damages cambium which functionally kills tree roots.	Amend TREE-S4.2 (Works in the root protection area) to remove the ability to use a hydrovac tool to remove soil around a Notable Tree's roots.
Royal Forest and Bird Protection Society	345.170	Historical and Cultural Values / Notable Trees / TREE-S4	Support	Generally supports TREE-S4.	Retain TREE-S4 (Works in the root protection area) as notified.
Waka Kotahi	370.188	Historical and Cultural Values / Notable Trees / TREE-S4	Support	Support standards as worded.	Retain TREE-S4 (Works in the root protection area) as notified.
Argosy Property No. 1 Limited	383.69	Historical and Cultural Values / Notable Trees / TREE-S4	Support in part	Considers the standard is generally appropriate by requires some amendments for clarity. In addition, the area restriction for a single excavation of 1m ² is not necessary when a control is applied of no more than 10% disturbance to the root protection area. Having a single excavation limit may lead to a number of smaller excavation areas to fit within the permitted activity rule, where one large excavation area would be better for the tree.	Amend TREE-S4 (Works in the root protection area) as follows: 2. Excavation must be undertaken by one or a combination of the following methods: a) hand-digging, air excavation spade, hydro excavation vac, and / or b) directional drilling machine within the root protection area at a depth of 1m or greater; 3. The surface area of a single excavation must not exceed 1m²; ... 7. Any excavation machines ...
Chorus New Zealand Limited (Chorus), Spark New Zealand Trading Limited (Spark) and Vodafone New Zealand Limited (Vodafone)	99.64	Historical and Cultural Values / Sites and Areas of Significance to Māori / General SASM	Oppose in part	There are a number of piped awa shown in the SASM mapped overlay. This are located in built up areas of central Wellington. It is unclear if undertaking infrastructure work above these piped awa (e.g., routine work in roads) are considered to impact in this overlay, or if it is only if the piped awa is physically altered. This should be clearly clarified in the rules.	Clarify the Infrastructure - Other Overlays rules relating to SASM as necessary such that it is clarified that work not directly affecting a piped awa (e.g. infrastructure work in roads above) is not affected by the overlay and related rules.
Victoria University of Wellington Students' Association	123.38	Historical and Cultural Values / Sites and Areas of Significance to Māori / General SASM	Support	Supports prioritising mana whenua input into development and design, and design which acknowledges the history of this land, and consider this a much more valuable restoration of history than heritage and character protections.	Not specified.
Historic Places Wellington	182.18	Historical and Cultural Values / Sites and Areas of Significance to Māori / General SASM	Support	Supports the objective of protecting and enhancing heritage values, including heritage of significance to Māori.	Retain Sites and Areas of Significance to Māori provisions as notified. [Inferred decision requested]
Wellington City Youth Council	201.28	Historical and Cultural Values / Sites and Areas of Significance to Māori / General SASM	Not specified	Identifies that Wellington City was built on top of significant sites for tangata whenua such as Te Aro Pā and Pipitea Pā. Considers that the rights of mana whenua to exercise rangatiratanga over their ancestral land are essential.	Seeks that significant sites for tangata whenua are protected.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Tyers Stream Group	221.30	Historical and Cultural Values / Sites and Areas of Significance to Māori / General SASM	Support	Supports Sites and Areas of Significance to Māori chapter as it relates to the Tyers stream catchment.	Retain the Sites and Areas of Significance to Māori chapter as notified. [Inferred decision requested]
Tapu-te-Ranga Trust	297.16	Historical and Cultural Values / Sites and Areas of Significance to Māori / General SASM	Support	Supports the Category C classification as it applies to their land.	Retain the inclusion of Category C in the introduction to the Sites and Areas of Significance to Māori chapter as notified.
Roland Sapsford	305.28	Historical and Cultural Values / Sites and Areas of Significance to Māori / General SASM	Support	Supports provisions which seek to enhance the mana of kaitiaki and to give effect at a local level to the solemn commitment to rangatiratanga contained in Te Tiriti o Waitangi	Retain Tangata Whenua chapter as notified. [Inferred decision requested]
Richard Murcott	322.15	Historical and Cultural Values / Sites and Areas of Significance to Māori / General SASM	Amend	<p>Considers that Tiakiwai Stream's bed is not adequately recorded in the PDP. The stream flowed through a partially surveyed gully across the Thorndon Flat. Stilt foundations, retaining walls and the topography below the houses at 60 & 62 Hobson St are evidence that the houses were built on fill of a gully through which the Tiakiwai Stream flowed. Drainage plans from 1915 as well as the current drainage point on the eastern side of Hobson Street provide further evidence of the former location of the stream. Any qualifying matters that arise from knowing the feature's actual location should be identified.</p> <p>A publication is provided in the submission to show evidence of the stream's accurate location, as well as a map in attachments.</p> <p>[Refer to original submission for full reason, including attachments]</p>	Seeks that the significance of the Tiakiwai Stream to mana whenua is considered.
Te Rūnanga o Toa Rangatira	FS138.21	Part 2 / Historical and Cultural Values / Sites and Areas of Significance to Māori / General SASM	Oppose	The submitter considers that Tiakiwai Stream's bed is not adequately recorded in the PDP. They request for the Sites and Areas of Significance to Māori overlay to be amended to adequately represent the flow bed of the Tiakiwai Stream. They also seek for the significance of Tiakiwai Stream to mana whenua to be considered. They also seek that the chapter should consider any seismic and other vulnerabilities that will arise when building. They consider that the location of the stream, item 60 of SCHED7 (Sites and Areas of Significance to Māori) is more correctly represented. Te Rūnanga o Toa Rangatira oppose this submission as this site is adequately recorded in the PDP, and its significance to mana whenua is considered as it is recorded in the Sites and Areas of Significance to Māori schedule.	Disallow
Richard Murcott	322.16	Historical and Cultural Values / Sites and Areas of Significance to Māori / General SASM	Amend	<p>Considers that Tiakiwai Stream's bed is not adequately recorded in the PDP. Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Te Rūnanga o Toa Rangatira	FS138.22	Part 2 / Historical and Cultural Values / Sites and Areas of Significance to Māori / General SASM	Oppose	The submitter considers that Tiakiwai Stream's bed is not adequately recorded in the PDP. They request for the Sites and Areas of Significance to Māori overlay to be amended to adequately represent the flow bed of the Tiakiwai Stream. They also seek for the significance of Tiakiwai Stream to mana whenua to be considered. They also seek that the chapter should consider any seismic and other vulnerabilities that will arise when building. They consider that the location of the stream, item 60 of SCHED7 (Sites and Areas of Significance to Māori) is more correctly represented. Te Rūnanga o Toa Rangatira oppose this submission as this site is adequately recorded in the PDP, and its significance to mana whenua is considered as it is recorded in the Sites and Areas of Significance to Māori schedule.	Disallow
Kimberley Vermaey	348.9	Historical and Cultural Values / Sites and Areas of Significance to Māori / General SASM	Amend	The Sites of Significance to Maori rule framework should be clarified to be clearer when it relates to a feature such as a stream or piped waterway. It is unclear whether the rules apply to the whole site, or just the portion of the site where the feature passes through a corner of a property.	Clarify the 'Sites of Significance to Maori' chapter to state whether provisions for waterways and streams apply to whole sites of portions where the features pass through.
Greater Wellington Regional Council	351.142	Historical and Cultural Values / Sites and Areas of Significance to Māori / General SASM	Oppose	Considers it to be appropriate requests modification to the MDRS adjacent to Sites and Areas of Significance to Māori, to ensure the values in the Sites and Areas of Significance to Māori are preserved as part of intensification activities. This request gives effect to the relevant Operative RPS Policies, namely: (a) Policy 48 of the RPS, which directs that plans give particular regard to the principles of the Treaty of Waitangi and Waitangi Tribunal reports and settlement decisions relating to the Wellington region; and (b) Policy 49 of the RPS, which directs that plans recognise and provide for the exercise of kaitiakitanga; mauri, particularly in relation to fresh and coastal waters; mahinga kai and areas of natural resources used for customary purposes; and places, sites and areas with significant spiritual or cultural historic heritage value to tangata whenua. (c) Historic heritage policies 21, 22 and 46. Greater Wellington acknowledges that MRZ-P4 recognises that the relationship of Māori and their culture and traditions with their ancestral lands, water, sites, wāhi tapu, and other taonga applies as a qualifying matter. However we do not consider this to go far enough and it should be extended to sites adjacent to Sites and Areas of Significance to Māori. The extent of modification necessary will require a situation-specific impact analysis depending on the nature of the SASM, including the need to avoid adjacent intensification in some instances.	Seeks to modify intensification levels through setbacks and reduced building heights for areas adjacent to Sites and Areas of Significance to Māori to the extent necessary following site-specific analysis, and to only allow intensification on sites adjacent to Sites and Areas of Significance to Māori where the associated buildings and structures will provide for tino rangatiratanga. This includes any necessary consequential amendments to provide this direction.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Greater Wellington Regional Council	351.143	Historical and Cultural Values / Sites and Areas of Significance to Māori / General SASM	Oppose	<p>Considers it to be appropriate requests modification to the MDRS adjacent to Sites and Areas of Significance to Māori, to ensure the values in the Sites and Areas of Significance to Māori are preserved as part of intensification activities.</p> <p>This request gives effect to the relevant Operative RPS Policies, namely: (a) Policy 48 of the RPS, which directs that plans give particular regard to the principles of the Treaty of Waitangi and Waitangi Tribunal reports and settlement decisions relating to the Wellington region; and (b) Policy 49 of the RPS, which directs that plans recognise and provide for the exercise of kaitiakitanga; mauri, particularly in relation to fresh and coastal waters; mahinga kai and areas of natural resources used for customary purposes; and places, sites and areas with significant spiritual or cultural historic heritage value to tangata whenua. Southern Cross Healthcare Limited	380.39	Historical and Cultural Values / Sites and Areas of Significance to Māori / General SASM	Amend	<p>Considers that provisions within the Sites and Areas of Significance to Māori chapter and mapping should be clarified to whether “within a site or area of significance to Māori” applies to only the line, or the entire title subject to the site.</p> <p>The clearest interpretation is that those rules would only apply to the line itself.</p>	Clarify the intention of how sites and areas of significance to Māori represented by lines are to be treated within the Sites and Areas of Significance to Māori chapter.
Southern Cross Healthcare Limited	380.40	Historical and Cultural Values / Sites and Areas of Significance to Māori / General SASM	Amend	<p>Considers that provisions within the Sites and Areas of Significance to Māori chapter and mapping should be clarified to whether “within a site or area of significance to Māori” applies to only the line, or the entire title subject to the site.</p> <p>The clearest interpretation is that those rules would only apply to the line itself.</p>	Clarify the intention of how sites and areas of significance to Māori represented by lines are to be treated within the Sites and Areas of Significance to Māori chapter.
Taranaki Whānui ki te Upoko o te Ika	389.67	Historical and Cultural Values / Sites and Areas of Significance to Māori / General SASM	Support in part	Support for general direction of chapter, with amendments.	Seeks that there are amendments to text to reflect Taranaki Whānui as ahi kā and primary mana whenua especially at Category C.
Te Rūnanga o Toa Rangatira	FS138.53	Part 2 / Historical and Cultural Values / Sites and Areas of Significance to Māori / General SASM	Oppose	The submitter seeks amendments throughout the plan seeking Taranaki Whānui to hold ahi kā and primary mana whenua status throughout Te Whanganui a Tara rohe. Te Rūnanga o Toa Rangatira understand and acknowledge that Taranaki Whānui have a physical presence within Te Whanganui a Tara. However, if this was implemented in the plan this would mean that their ahi kā would extend across the entire extent of the Wellington City Council boundary. Ngāti Toa Rangatira do have a physical presence in Te Whanganui a Tara and sites of significance which are listed in the plan. This means that Ngāti Toa Rangatira still need to be engaged with in terms of resource management and resource consents.	Disallow
Taranaki Whānui ki te Upoko o te Ika	389.68	Historical and Cultural Values / Sites and Areas of Significance to Māori / General SASM	Amend	Considers that new or existing developments of marae should be endorsed by and based on a relationship with Taranaki Whānui.	Seeks that there are amendments to text to reflect Taranaki Whānui as ahi kā and primary mana whenua especially at Category C.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Te Rūnanga o Toa Rangatira	FS138.54	Part 2 / Historical and Cultural Values / Sites and Areas of Significance to Māori / General SASM	Oppose	The submitter seeks amendments throughout the plan seeking Taranaki Whānui to hold ahi kā and primary mana whenua status throughout Te Whanganui a Tara rohe. Te Rūnanga o Toa Rangatira understand and acknowledge that Taranaki Whānui have a physical presence within Te Whanganui a Tara. However, if this was implemented in the plan this would mean that their ahi kā would extend across the entire extent of the Wellington City Council boundary. Ngāti Toa Rangatira do have a physical presence in Te Whanganui a Tara and sites of significance which are listed in the plan. This means that Ngāti Toa Rangatira still need to be engaged with in terms of resource management and resource consents.	Disallow
Taranaki Whānui ki te Upoko o te Ika	389.69	Historical and Cultural Values / Sites and Areas of Significance to Māori / General SASM	Oppose in part	Considers that there is potential for these overlays to significantly restrict future development and opportunities for Taranaki Whānui to exercise tino rangatiratanga over our ancestral lands. Taranaki Whānui support the protection of areas of significant indigenous vegetation as well as landscapes that have cultural, historical, spiritual and traditional significance to Taranaki Whānui, the identification and protection of environmental overlays in previously developed areas is of concern to Taranaki Whānui.	Seeks that the zoning and extent of overlays proposed over Te Motu Kairangi / Miramar Peninsula, Mount Crawford is removed; specifically at Part Lot 1 DP 4741, Section 4 SO 477035, PT LOT 1 DP 4741 - WELLINGTON PRISON, Section 1 SO 477035, Part Section 20 Watts Peninsula DIST.
Laurence Harger & Ingrid Kölle	FS2.7	Part 2 / Historical and Cultural Values / Sites and Areas of Significance to Māori / General SASM	Oppose	Taranaki Whānui has sold the land it owned at Shelly Bay to The Wellington Company for a large development which was consented via the Special Housing Accords Act, thus denying the community any say on the consenting process. Community involvement should be ensured for the future though and the current DP height limit of 11 metres in some areas and the zero height limit in Open Space B land should remain. A recent poll has shown that the wider Wellington public want Shelly Bay included in a National Heritage Park centred on the 76 hectares of Watts Peninsula already designated for a reserve by the Government. Taranaki Whānui have treated Shelly Bay solely as a commercial proposition despite disagreement by a large group of its members (Mau Whenua) who occupied the site and opposed its sale, wanting to uphold their cultural and spiritual connection to the land. Mau Whenua continue to oppose the sale of the land at Shelly Bay and should be included by the council in all decisions taken about its future.	Disallow / Seeks that the provisions relating to Shelly Bay in submission 389 are disallowed.
Laurence Harger & Ingrid Kölle	FS2.19	Part 2 / Historical and Cultural Values / Sites and Areas of Significance to Māori / General SASM	Oppose	76 hectares of Watts Peninsula has been set aside by the government as a reserve focused on protecting iwi and military history sites and retaining the value of the natural landscape of the area. Supports the establishment of such a reserve and would like to see it become part of the National Heritage Park proposed by the Buy Back the Bay group. The zoning and overlays of the Proposed District Plan must be kept if the reserve/heritage park is to be a viable option. Taranaki Whānui's requests would remove many protections that have been longstanding and unopposed for decades, which must surely not occur without extensive community engagement. Watts Peninsula, with its ridges and hill lines visible from all over Wellington, should remain undeveloped, which might very well not be the case if the land is rezoned.	Disallow / Seeks that the part of the submission to remove the proposed zoning and overlays on Watts Peninsula be disallowed.

Submitter Name	Sub No / Point No	Sub-part / Chapter /Provision	Position	Summary of Submission	Decisions Requested
Enterprise Miramar Peninsula Inc	FS26.9	Part 2/ Historical and Cultural Values / Sites and Areas of Significance to Maori / General SASM	Oppose	<p>It is clear Taranaki Whānui want all restrictions removed, and the Corrections land at least rezoned for medium density housing. It is unclear based on the submission exactly how large an area they want to have rezoned.</p> <p>Watts Peninsula is currently zoned Open Space B in the Operative (current) District Plan, both the Corrections and Defence Land have not in the past contested this zoning and the Proposed District Plan keeps Watts Peninsula as open Space, the Ridgelines and Hilltops add to significant Natural Areas (for biodiversity) it has a Special Amenity Landscape which is used by the community and tourists to the enjoyment of being close to a city but with a natural environment.</p> <p>Taranaki Whānui are seeking to amend the zoning in this area to Medium Density Residential or to a Special Purpose Zone – Māori Purpose Zone, without any public engagement. Such changes would have a significant impact on the local community and should not be undertaken without wider consultation and engagement in order to ensure that proposed changes do not have a detrimental effect. As noted above, it is of concern to the businesses, community (ratepayers) of Te Motu Kairangi/Miramar Peninsula and the wider public that the rezoning applied for by Taranaki Whanui (currently open space) to develop a papakainga creates infrastructure issues on an already overloaded roading, flooding and transport links to and from the Peninsula.</p> <p>[Inferred reference to submission 389.69].</p>	Disallow
Mary Varnham and Paul O'Regan	FS40.7	Historical and Cultural Values / Sites and Areas of Significance to Māori / General SASM	Oppose	<p>Taranaki Whanui has sold its holdings at Shelly Bay and are no longer, as claimed, 'significant landowners'. Their possible ownership interest in the peninsula as a whole through Right of First Refusal is confined to the Mt Crawford site as the adjacent 76 hectares of Watts Peninsula has been designated reserve by the government (the current landowner) and WCC since 2011.</p> <p>The local community, despite its active interest in and use of the bay, was shut out of all consultation during the resource consent process. It is critical that it be involved in all future decision making.</p> <p>The current DP height limit of 11 metres in some areas and the zero height limit in Open Space B land is supported not only by the local community but by the wider Wellington public, as evidenced in the independent poll conducted for the group Buy Back the Bay by Research NZ, which showed that 78% of Wellingtonians want Shelly Bay included in a National Heritage Park, which would also include the 76 hectares of Watts Peninsula set aside by the government as a reserve in 2011.</p> <p>Taranaki Whanui have viewed Shelly Bay as a strictly commercial proposition and disavowed any cultural, historical and spiritual connection to the site. A substantial proportion of the iwi (mau whenua) have opposed and continue to oppose the sale of the site, and should be included by the council in all democratic decision making about the future of Shelly Bay.</p>	Disallow

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Mary Varnham and Paul O'Regan	FS40.19	Historical and Cultural Values / Sites and Areas of Significance to Māori / General SASM	Oppose	<p>From 2011 the 76 hectares of Watts Peninsula has been set aside by the government as a reserve, to incorporate and protect iwi (as well as military) sites and history. Submitter supports this as an appropriate and visionary plan for the peninsula.</p> <p>Submitter supports the proposal of Buy Back the Bay group that the area should become a National Heritage Park.</p> <p>Submitter supports a conservancy model for development and management of this park, to include iwi, government, council, the local community, and organisations such as Forest and Bird and Predator Free Miramar.</p> <p>Disallow all proposals by Taranaki Whānui to remove the proposed zoning and overlays. These provisions are vital to protect the natural values, history and landscape of Watts Peninsula, a prominent feature of Te Whanganui-a-Tara.</p> <p>Supports retaining all provisions in the proposed district plan for Open Space B, Ridgelines and Hilltops, Significant Natural Areas and Special Amenity Landscape. We note the magnificent work done by Predator Free Miramar. Protecting and enhancing the huge gains in bringing back birdlife made should be a primary consideration. We also believe the peninsula should see extensive planting and regeneration of native forest.</p>	Disallow
Buy Back the Bay	FS79.6	Part 2 / Historical and Cultural Values / Sites and Areas of Significance to Māori / General SASM	Oppose	<p>Submission 389 states as a Submission Point, that "Taranaki Whānui opposes the zoning and extent of overlays proposed over Te Motu Kairangi / Miramar Peninsula, Mount Crawford."</p> <p>It lists the relevant PDP Chapter as:</p> <ul style="list-style-type: none"> • Planning maps • He Rohe Ahoaho Māori Natural Open Space Zone chapter • Ngā Wāhi Tapu ki te Māori Sites and Areas of Significance to Māori chapter • Ngā Pūnaha Rauropi me te Kanorau Koiora Taketake Ecosystems and Indigenous Biodiversity chapter • Te Ahurei o Ngā Hanga Māori Natural Character chapter • Ngā Hanga Māori me Ngā Nohopae Natural Features and Landscapes chapter • Wawaetanga Subdivision chapter • Taiao Takutai Coastal Environment chapter <p>Opposes in total Submission 389 on these points, which appears to be a wholesale rejection of planning rules in these areas.</p>	Disallow

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Buy Back the Bay	FS79.23	Part 2 / Historical and Cultural Values / Sites and Areas of Significance to Māori / General SASM	Oppose	<p>Submission 389 states: "Taranaki Whānui's RFR [Right of First Refusal] opportunities in Te Motu Kairangi: Taranaki Whānui have a significant interest in Te Motu Kairangi which includes Mount Crawford and Watts Peninsula, these landholdings hold significant interest - culturally, socially, environmentally and commercially to Taranaki Whānui. These opportunities include the Mount Crawford Prison site as well as the 'Watts Peninsula' sites being 75.85 hectares of former Defence Land."</p> <p>Buy Back the Bays notes that the Submission does not include maps however they (Buy Back the Bays) are very concerned to see that Taranaki Whānui appears to be seeking possible commercial development of 75.85 hectares of former defence land on Watts Peninsula. This appears to be the heart of the long-promised Watts Peninsula park and a major part of the proposed national heritage park.</p> <p>Buy Back the Bays strongly oppose rezoning on Watts Peninsula to facilitate any development there that is incompatible with the park plans. More generally, Buy Back the Bays oppose Submission 389's attempt to remove the proposed public interest controls from Watts Peninsula and Mount Crawford. Considers that where Submission 389 states "Illustrated on Figure One below, the following zone and overlays are proposed for Taranaki Whānui's RFR properties in Te Motu Kairangi," Buy Back the Bays oppose the changes it seeks. This includes opposing Submission 389's request for "The proposed zoning over Part Lot 1 DP 4741, Section 4 SO 477035, PT LOT 1 DP 4741 - WELLINGTON PRISON, Section 1 SO 477035, Part Section 20 Watts Peninsula DIST [to be] amended from Natural Open Space Zone to: a. Medium Density Residential; and b. Special Purpose Zone – Māori Purpose Zone."</p>	Disallow
Lance Lones	FS81.7	Part 2/ Historical and Cultural Values / Sites and Areas of Significance to Maori / General SASM	Oppose	<p>Te Motu Kairangi is very nearly an island, and as a result of the amazing work of Predator Free Wellington, is in fact, nearly predator free, and uniquely able to support significant biodiversity. Combined with the Ridgelines and Hilltops Overlay, and the Significant Natural Areas overlay of this space, all citizens of both Wellington, and Aotearoa in general have an incredibly singular opportunity to support the development of native flora and fauna in one nearly contiguous environment, a situation which is unique within Wellington. Attests to the incredible return of many native species of birds to this area, from kererū, to flocks of pīwakawaka and tūi, kārearea hunting on the hillsides and heard ruru calling in the evenings and mornings.</p> <p>To remove the Open Space zoning, Significant Natural Areas and Special Amenity Landscape overlays for a significant portion of this habitat would put these species at risk once again.</p> <p>Presents a unique opportunity to implement the Ministry for the Environment's Proposed National Policy Statement for Indigenous Biodiversity. This policy progressively refers to the concept of Te Rito o te Harakeke.</p> <p>The local community has expressed the desire to work with and develop a master plan for the Watts Peninsula, but this voice has been repeatedly denied by council. Removing the protections put in place by the proposed district plan would once again disempower the greater community with no discussion.</p> <p>[Refer to further submission for full reason]</p>	Disallow / Seeks that the current zoning and overlays as presented in the Proposed District Plan for the northern sections of Te Motu Kairangi / Miramar Peninsula be retained. In particular, that the Open Space zoning, Special Amenity Landscape, Natural Areas, and Ridgelines and Hilltops overlays are retained.

Andy Foster	FS86.15	Part 2 / Historical and Cultural Values / Sites and Areas of Significance to Māori / General SASM	Oppose	<p>The submission from Taranaki Whānui if accepted would remove all protections, many of them long standing and uncontested for decades, from Te Motu Kairangi / Watts Peninsula and make community involvement much less likely, and limit the need for community involvement. On these basis the submitter opposes Taranaki Whānui's submission.</p> <p>Watts Peninsula is currently zoned Open Space B in the Operative (current) District Plan. It has been Open Space B for at least the last 30 years, and nobody has ever contested this. That includes both the Corrections and Defence Land.</p> <p>The Proposed District Plan keeps Watts as Open Space and within the Ridgelines and Hilltops Overlay. It also adds Significant Natural Areas (for biodiversity) and a Special Amenity Landscape (because of its high level of landscape importance) All of these are based on good evidence. Taranaki Whānui want all of those restrictions removed, and the Corrections land at least rezoned for medium density housing. It is unclear exactly how large an area they want to have rezoned.</p> <p>Taranaki Whānui's request to remove the Open Space zoning which has been in place, uncontested by the owners, for at least 30 years. The current Open Space B zoning does not anticipate any built development and therefore there is no legal or reasonable expectation that there should be any development here.</p> <p>[See original Further Submission for full reasoning]. [Inferred reference to submission 389.69]</p>	Disallow
Taranaki Whānui ki te Upoko o te Ika	389.70	Historical and Cultural Values / Sites and Areas of Significance to Māori / General SASM	Amend	<p>Considers that there is potential for these overlays to significantly restrict future development and opportunities for Taranaki Whānui to exercise tino rangatiratanga over our ancestral lands.</p> <p>Taranaki Whānui support the protection of areas of significant indigenous vegetation as well as landscapes that have cultural, historical, spiritual and traditional significance to Taranaki Whānui, the identification and protection of environmental overlays in previously developed areas is of concern to Taranaki Whānui.</p>	Seeks that the objectives, policies, rules and standards in the Ngā Wāhi Tapu ki te Māori - Sites and Areas of Significance to Māori are amended to ensure mana whenua can exercise tino rangatiratanga over Te Motu Kairangi.
Laurence Harger & Ingrid Kölle	FS2.8	Part 2 / Historical and Cultural Values / Sites and Areas of Significance to Māori / General SASM	Oppose	<p>Taranaki Whānui has sold the land it owned at Shelly Bay to The Wellington Company for a large development which was consented via the Special Housing Accords Act, thus denying the community any say on the consenting process. Community involvement should be ensured for the future though and the current DP height limit of 11 metres in some areas and the zero height limit in Open Space B land should remain. A recent poll has shown that the wider Wellington public want Shelly Bay included in a National Heritage Park centred on the 76 hectares of Watts Peninsula already designated for a reserve by the Government.</p> <p>Taranaki Whānui have treated Shelly Bay solely as a commercial proposition despite disagreement by a large group of its members (Mau Whenua) who occupied the site and opposed its sale, wanting to uphold their cultural and spiritual connection to the land. Mau Whenua continue to oppose the sale of the land at Shelly Bay and should be included by the council in all decisions taken about its future.</p>	Disallow / Seeks that the provisions relating to Shelly Bay in submission 389 are disallowed.

Submitter Name	Sub No / Point No	Sub-part / Chapter / Provision	Position	Summary of Submission	Decisions Requested
Laurence Harger & Ingrid Kölle	FS2.20	Part 2 / Historical and Cultural Values / Sites and Areas of Significance to Māori / General SASM	Oppose	76 hectares of Watts Peninsula has been set aside by the government as a reserve focused on protecting iwi and military history sites and retaining the value of the natural landscape of the area. Supports the establishment of such a reserve and would like to see it become part of the National Heritage Park proposed by the Buy Back the Bay group. The zoning and overlays of the Proposed District Plan must be kept if the reserve/heritage park is to be a viable option. Taranaki Whānui's requests would remove many protections that have been longstanding and unopposed for decades, which must surely not occur without extensive community engagement. Watts Peninsula, with its ridges and hill lines visible from all over Wellington, should remain undeveloped, which might very well not be the case if the land is rezoned.	Disallow / Seeks that the part of the submission to remove the proposed zoning and overlays on Watts Peninsula be disallowed.
Mary Varnham and Paul O'Regan	FS40.8	Historical and Cultural Values / Sites and Areas of Significance to Māori / General SASM	Oppose	<p>Taranaki Whānui has sold its holdings at Shelly Bay and are no longer, as claimed, 'significant landowners'. Their possible ownership interest in the peninsula as a whole through Right of First Refusal is confined to the Mt Crawford site as the adjacent 76 hectares of Watts Peninsula has been designated reserve by the government (the current landowner) and WCC since 2011.</p> <p>The local community, despite its active interest in and use of the bay, was shut out of all consultation during the resource consent process. It is critical that it be involved in all future decision making.</p> <p>The current DP height limit of 11 metres in some areas and the zero height limit in Open Space B land is supported not only by the local community but by the wider Wellington public, as evidenced in the independent poll conducted for the group Buy Back the Bay by Research NZ, which showed that 78% of Wellingtonians want Shelly Bay included in a National Heritage Park, which would also include the 76 hectares of Watts Peninsula set aside by the government as a reserve in 2011.</p> <p>Taranaki Whānui have viewed Shelly Bay as a strictly commercial proposition and disavowed any cultural, historical and spiritual connection to the site. A substantial proportion of the iwi (mau whenua) have opposed and continue to oppose the sale of the site, and should be included by the council in all democratic decision making about the future of Shelly Bay.</p>	Disallow
Mary Varnham and Paul O'Regan	FS40.20	Historical and Cultural Values / Sites and Areas of Significance to Māori / General SASM	Oppose	<p>From 2011 the 76 hectares of Watts Peninsula has been set aside by the government as a reserve, to incorporate and protect iwi (as well as military) sites and history. Submitter supports this as an appropriate and visionary plan for the peninsula.</p> <p>Submitter supports the proposal of Buy Back the Bay group that the area should become a National Heritage Park.</p> <p>Submitter supports a conservancy model for development and management of this park, to include iwi, government, council, the local community, and organisations such as Forest and Bird and Predator Free Miramar.</p> <p>Disallow all proposals by Taranaki Whānui to remove the proposed zoning and overlays. These provisions are vital to protect the natural values, history and landscape of Watts Peninsula, a prominent feature of Te Whanganui-a-Tara.</p> <p>Supports retaining all provisions in the proposed district plan for Open Space B, Ridgelines and Hilltops, Significant Natural Areas and Special Amenity Landscape. We note the magnificent work done by Predator Free Miramar. Protecting and enhancing the huge gains in bringing back birdlife made should be a primary consideration. We also believe the peninsula should see extensive planting and regeneration of native forest.</p>	Disallow
