

## **Appendix A: Subdivision Chapter – Tracked Changes**

**Red underline and strike-out**: show additions and deletions to the notified Wawaetanga Subdivision Chapter, as recommended in the section 42A Report dated 3 July 2023.

**Green underline and strike-out**: show further additions and deletions to the s42A Report version of the Wawaetanga Subdivision chapter, as recommended in the Supplementary Planning Evidence dated 25 July 2023.

Parts of this chapter have been notified using either a Part One Schedule 1 process ([P1 Sch1](#)), or as part of an Intensification Planning Instrument using the Intensification Streamlined Planning Process ([ISPP](#)). Please see notations.

This chapter contains provisions that have legal effect. They are identified with a  next to the provision. To see more about what legal effect means please [click here](#).

# Wawaetanga

## Subdivision

SUB	Subdivision
-----	-------------

### P1 Sch1

#### Introduction

The purpose of this chapter is to assist the Council to carry out its functions under the Act relating to the control of subdivision.

Subdivision involves the division of an allotment or building into multiple allotments, or the alteration of existing boundaries. Subdivision often entails a change in land ownership arrangements, and commonly affects future development potential for newly created allotments. In this way, subdivision will play an important role in accommodating 50,000 to 80,000 additional residents in Wellington City to 2050.

Greater housing choice is also desired in the City over the short, medium and long-term. Subdivision controls will need to be flexible enough to facilitate that aim, whilst also ensuring adverse effects on people, communities and the wider environment can be appropriately managed.

In addition to facilitating increased housing supply and choice, subdivision is related to the Council's aims for a more sustainable and resilient future for Wellington. For example, poorly-designed subdivisions can limit neighbourhood connectivity and cohesion, entailing also longer travel times, greater reliance on private vehicle transport and associated increases in greenhouse gas emissions. In contrast, well-connected subdivisions can enhance community values and sense of place, and promote greater uptake of active and public transport modes.

Poorly-designed subdivisions can also lead to greater energy consumption and associated costs for home heating, relative to designs that make better use of solar aspect and other renewable energy opportunities.

When subdivision and related land use activities are assessed concurrently, it enables a comprehensive understanding of the resulting pattern, scale and density of development. For this reason, the Council prefers combined subdivision and land use resource consent applications to be made wherever possible and therefore the District Plan provides a more enabling framework for combined subdivision and land use application. However, it is understood that such an integrated approach is not always practicable or preferable for applicants, for a variety of reasons.<sup>1</sup>

Where buildings and activities are lawfully established prior to subdivision, the subdivision process may be little more than a formalisation of new property or unit boundaries to provide for

<sup>1</sup> Kāinga Ora [391.189]

separate ownership. Where subdivision precedes land use, the resulting development potential needs to be taken into account to ensure newly created allotments and units are of a size, shape and orientation that are fit-for-purpose and sympathetic to the local context.

Subdivisions commonly lead to an increase in intensity of land use activity, and steps need to be taken at subdivision stage to ensure existing and future activities can be serviced for access, water supply, wastewater disposal, stormwater management, telecommunications and power supply.

Subdivision involving certain activities in close proximity to some network utilities also needs to be managed. The provisions in the subdivision chapter work together with provisions in the infrastructure and other chapters to achieve the Plan's aims regarding the operation, maintenance, development and upgrade of infrastructure.

Subdivisions adjacent to surface waterbodies and the CMA afford opportunities for greater access to these features to enhance a range of values. Esplanade reserves and esplanade strips will generally be required by the Council in such circumstances. Esplanades also provide opportunities to maintain or enhance conservation values associated with ecological characteristics of surface water and the coast, as well as natural hazard mitigation.

Subdivision is only permitted in limited circumstances. Under Section 223 of the RMA, a ~~requires that a~~<sup>2</sup> survey plan for such subdivisions may be submitted to Council for approval provided that a certificate of compliance has been obtained for the subdivision and that certificate has not lapsed.

### **Application of rules in this Chapter<sup>3</sup>**

This chapter includes objectives, policies and rules that relate to subdivision generally. It also includes policies and rules that implement objectives in other chapters, specifically as they relate to the management of subdivision.

Rule SUB-R1 relates specifically to subdivision of land for the purpose of the construction and use of residential units in the Medium Density Residential Zone and the High Density Residential Zone.

Subdivisions under Rule SUB-R1 are not subject to Rules SUB-R2 – SUB-R5, but are subject to the area-specific and ~~topic-specific~~ district wide<sup>4</sup> rules where the land also contains a corresponding planning notation or overlay.

With the exception of Rule SUB-R1, the general subdivision objectives, policies and rules apply to all subdivision proposals, including those that affect land subject to other planning map notations, areas, or overlays. To the extent relevant, this includes Objectives SUB-O1 and SUB-O2, Policies SUB-P1 – SUB-P8, and Rules SUB-R2 – SUB-R5.

In addition to those general provisions, the area-specific and ~~topic-specific~~ district wide<sup>5</sup> policies and rules apply to subdivisions affecting land subject to the applicable planning notation or overlay. This includes Policies SUB-P9 – SUB-P26, and Rules SUB-R6 – SUB-R31.

### **Responsibilities**

---

<sup>2</sup> Kāinga Ora [391.189]

<sup>3</sup> Consequential in response to Kāinga Ora [391.189]

<sup>4</sup> Transpower [315.167 and 315.168]

<sup>5</sup> Transpower [315.167 and 315.168]

GWRC has a key role under the RMA in conserving soil, maintaining and enhancing water quality and aquatic ecosystems and avoiding or mitigating natural hazards. In practice, this means that:

1. GWRC have functions and responsibilities for the control relating to that may impact on subdivision;
2. GWRC manages potable water where a connection to Council's reticulated potable systems is not available, and the water supply is from groundwater or a waterbody.
3. GWRC manages wastewater disposal where a connection to Council's reticulated wastewater systems is not available and sewage is to be disposed to ground.
4. GWRC manages stormwater disposal where a connection to Council's reticulated wastewater systems is not available and stormwater is to be disposed to ground or into a waterbody.
5. GWRC also manages disturbance activities in the beds of rivers and lakes.<sup>6</sup>

#### Other relevant District Plan provisions

P1 Sch1

It is important to note that in addition to the provisions in this chapter, a number of other Part 2: District-Wide chapters also contain provisions that may be relevant including:

- **Transport**- The Transport Chapter contains provisions relating to transport matters, including traffic generation.
- **Three Waters – The Three Waters Chapter contains provisions that relate to the management of the Three Waters infrastructure including servicing, hydraulic neutrality, water-sensitive urban design and infrastructure enabled urban development.**<sup>7</sup>
- **Historic Heritage and Sites and Areas of Significance to Māori** - Land subject to subdivision proposals may include archaeological sites and sites and areas of significance to Māori. Specific objectives and policies for the protection of these sites are located in the Sites and Areas of Significance to Māori Chapter and Historic Heritage Chapter.
- **Notable Trees – The Notable Trees Chapter contains provisions that identify and protect certain trees for their significant historic heritage, ecological or amenity values.**<sup>8</sup>
- **Infrastructure** - the subdivision chapter includes rules to implement objectives and policies in the Infrastructure Chapter where ~~certain types of~~ subdivision may have adverse effects, including reverse sensitivity effects, on infrastructure, such as the gas transmission pipeline, national grid, and transport network. are in close proximity to some network utilities.
- **Natural Hazards** - the subdivision chapter includes policies and rules that implement the objectives in the Natural Hazards chapter where subdivision proposals affect land subject to identified natural hazards.
- **Natural Character** – the subdivision chapter contains the rules that implement the objectives in the Natural Character chapter where subdivision proposals affect riparian margins
- **Ecosystems and Indigenous Biodiversity** - the subdivision chapter includes policies and rules that implement the objectives in the Ecosystems and Indigenous Biodiversity chapter where subdivision proposals affect Significant Natural Areas
- **Natural Features and Landscapes** - the subdivision chapter includes policies and rules that implement the objectives in the Natural Features and Landscapes chapter where

<sup>6</sup> Consequential amendment in response to GWRC [351.195]

<sup>7</sup> Consequential amendment in response to Rod Halliday [25.24] and AdamsonShaw [137.5, 137.6, 137.7, and 137.8]

<sup>8</sup> Administrative amendment

subdivision proposals affect Outstanding Natural Features and Landscapes, Special Amenity Landscapes and Ridgelines and Hilltops.

- **Public Access** - the subdivision chapter includes policies and rules that implement the objectives in the Public Access chapter where subdivision proposals affect access to the coast and surface waterbodies
- **Coastal Environment** - the Coastal Environment Chapter contains the objectives and policies relating to the subdivision of land on property that is subject to coastal hazards. The subdivision chapter contains the rules that implement the objectives in the Coastal Environment chapter where subdivision proposals affect land in the Coastal Environment
- **Earthworks** - The Earthworks Chapter manages the adverse effects of earthworks on the environment, including earthworks associated with subdivision proposals.
- **Noise** - The Noise Chapter contains specific controls in relation to noise, including temporary construction noise from subdivision and associated development.

Resource consent may therefore be required under rules in this chapter as well as other chapters. Unless specifically stated in a rule or in this chapter, resource consent is required under each relevant rule. The steps to determine the status of an activity are set out in the General Approach chapter.

**Objectives**

ISPP

<b>SUB-O1</b>	<p><b>Efficient pattern of development</b></p> <p>Subdivision achieves an efficient development pattern that:</p> <ol style="list-style-type: none"> <li>1. Maintains or enhances Wellington’s compact urban form;</li> <li>2. Is compatible with the nature, scale and intensity anticipated for the underlying zone and local context;</li> <li>3. Enables appropriate future development and use of resulting land or buildings; and</li> <li>4. Is supported by development infrastructure and additional infrastructure for existing and anticipated future activities.</li> </ol>
---------------	---

P1 Sch1

<b>SUB-O2</b>	<p><b>Esplanades</b></p> <p>The network of esplanade reserves and esplanade strips in Wellington is progressively increased.</p>
---------------	--

**Policies**

**All subdivision**

ISPP

<b>SUB-P1</b>	<p><b>Recognizing and providing for subdivision</b></p> <p>Recognise the benefits of subdivision in facilitating the supply and variety of new housing, business and other activities that meet the needs of people and communities.</p>
---------------	--

ISPP	SUB-P2	<p><b>Boundary adjustments and amalgamation</b></p> <p>Enable boundary adjustments and site amalgamation to enhance the efficient use of land, provided that the nature and scale of resulting development potential is compatible with the local context.</p>
ISPP	SUB-P3	<p><b>Sustainable design</b></p> <p>Provide for subdivision design and layout that makes efficient use of renewable energy and other natural and physical resources, and delivers well-connected, resilient communities including development patterns that:</p> <ol style="list-style-type: none"> <li>1. Maximise solar gain;</li> <li>2. Incorporate effective water sensitive design;</li> <li>3. Achieve hydraulic neutrality;</li> <li>4. Provide for safe vehicle access;</li> <li>5. Support walking, cycling and public transport opportunities and enhance neighbourhood and network connectivity and safety; and</li> <li>6. Are adaptive to the effects of climate change.</li> </ol>
ISPP	SUB-P4	<p><b>Integration and layout of subdivision and development</b></p> <p>Provide for the efficient integration and layout of subdivision and associated development by:</p> <ol style="list-style-type: none"> <li>1. Encouraging joint applications for subdivision and land use;</li> <li>2. Enabling subdivision around development that has already been lawfully established; <del>and</del></li> <li>3. Ensuring standalone subdivision proposals provide allotments that can be feasibly developed and are fit for the future intended purpose; <del>and</del></li> <li>4. <u>Ensuring enabled land use outcomes will be able to be achieved following subdivision.</u></li> </ol>
ISPP	SUB-P5	<p><b>Subdivision for residential activities</b></p> <p>Provide for flexibility, innovation and choice for future development enabled by subdivision for residential activities, while ensuring allotments are of a size, shape and orientation that is compatible with the nature, scale and intensity anticipated for the underlying zone or activity area.</p>
P1 Sch1	SUB-P6	<p><b>Subdivision in the General Rural Zone</b></p> <p>Require subdivisions in the General Rural Zone to result in allotments of a size, shape and orientation that:</p>

ISPP

	<ol style="list-style-type: none"> <li>1. Preserve the predominant open character of the rural zone and contributes to urban containment;</li> <li>2. Can accommodate a residential unit in a position that manages effects on the privacy and amenity of residential units on neighbouring allotments; and</li> <li>3. Do not increase the risk of reverse sensitivity effects arising on existing lawfully established activities.</li> </ol>
<b>SUB-P7</b>	<p><b>Servicing</b></p> <p>Require all allotments created by any subdivision to be adequately serviced such that:</p> <ol style="list-style-type: none"> <li>1. In urban areas, suitable access, connections to reticulated water supply, wastewater and stormwater management networks are provided in accordance with the Council’s Code of Practice for Land Development;</li> <li>2. Allotments in rural or other areas that are unable to connect to reticulated networks are of sufficient size and shape to accommodate on-site wastewater disposal, stormwater management, and water supply, including water supply for fire-fighting purposes; and</li> <li>3. <u>Suitable connections to telecommunications<sup>9</sup></u> and electricity are supplied.</li> </ol>
<b>SUB-PX</b>	<p><b>Subdivision within the Inner Air Noise Boundary Overlay</b></p> <p><u>Provide for subdivision within the Inner Air Noise Boundary Overlay where the potential future permitted density of noise sensitive activities will avoid adverse reverse sensitivity effects on Wellington International Airport.<sup>10</sup></u></p>

**Historical and Cultural Values**

P1 Sch1

<b>SUB-P10</b>	<p><b>Subdivision of land on which a heritage building or heritage structure is located</b></p> <p>Provide for the subdivision of land on which heritage buildings and heritage structures are located, having regard to:</p> <ol style="list-style-type: none"> <li>1. <u>The extent to which the subdivision and any anticipated development would detract from the identified heritage values;<sup>11</sup></u></li> <li>2. The identified relationship and contribution of the setting and surroundings of the site to the values of the heritage building or heritage structure;</li> <li>3. The extent to which the subdivision would retain an appropriate setting for the heritage building or heritage structure; and</li> <li>4. <del>Whether covenants or consent notices can be imposed on any new allotment to manage any anticipated development.</del></li> </ol>
----------------	--

<sup>9</sup> Wellington Electricity Lines [355.52 and 355.53]

<sup>10</sup> WIAL [406.263]

<sup>11</sup> Wellington City Council [266.97]

		5. <u>Any advice that has been obtained from a suitably qualified heritage professional including Heritage New Zealand Pouhere Taonga where it is listed as a Category 1 or Category 2 Historic Place.</u> <sup>12</sup>
P1 Sch1	<b>SUB-P11</b>	<p><b>Subdivision within heritage areas</b></p> <p>Provide for the subdivision of land within heritage areas, having regard to:</p> <ol style="list-style-type: none"> <li>1. The extent to which the subdivision and any anticipated development would detract from the identified heritage values; and</li> <li><del>2. Whether covenants or consent notices can be imposed on any new allotment to manage any anticipated development.</del></li> <li>3. <u>Any advice that has been obtained from a suitably qualified heritage professional including Heritage New Zealand Pouhere Taonga where it is listed as a Historic Area.</u> <sup>13</sup></li> </ol>
P1 Sch1	<b>SUB-P12</b>	<p><b>Subdivision of land containing a scheduled archaeological site</b></p> <p>Provide for the subdivision of land containing a scheduled archaeological site, having regard to:</p> <ol style="list-style-type: none"> <li>1. The location of site access and new structures in relation to the scheduled archaeological site;</li> <li>2. The extent to which the subdivision and any anticipated development would adversely affect archaeological values;</li> <li>3. The findings of any advice by a suitably qualified heritage professional; <u>and</u></li> <li>4. The outcomes of any consultation with Heritage New Zealand Pouhere Taonga; <del>and</del></li> <li><del>5. Whether controls such as covenants or consent notices can be imposed on any new allotment to manage anticipated development.</del></li> </ol>
P1 Sch1	<b>SUB-P13</b>	<p><b>Subdivision of land containing a notable tree</b></p> <p>Require subdivision of land containing notable trees to support the maintenance of tree health and minimise the potential for interference, having regard to:</p> <ol style="list-style-type: none"> <li>1. The extent to which the location of new boundaries relative to the notable tree and any anticipated development will increase the risk of the interference with property; <u>and</u></li> <li><del>2. Whether controls such as consent notices or covenants can be imposed on any new allotment; and</del></li> <li>3. Whether site access and new utilities can be located outside of the root protection area of the notable tree.</li> </ol>
ISPP	<b>SUB-P9</b>	<p><b>Subdivision of land within a site or area of significance to Māori Category A or B</b></p>

<sup>12</sup> Consequential amendment in response to Wellington Heritage Professionals [412.58]

<sup>13</sup> Consequential amendment in response to Wellington Heritage Professionals [412.61]

	<p>Provide for the subdivision of land within a site or area of significance to Māori Category A or B having regard to:</p> <ol style="list-style-type: none"> <li>1. <del>The extent to which</del> Consultation <del>has been</del><sup>14</sup> undertaken with mana whenua;</li> <li>2. The extent to which the values of mana whenua have been incorporated into the proposal;</li> <li>3. Whether alternative methods, locations or designs are available that would avoid or reduce the impact on the identified site or area of significance;</li> <li>4. Any positive effects of the development for mana whenua or opportunities to enhance the cultural values of the site; and</li> <li>5. The extent to which mana whenua retain access and use of the site or area.</li> </ol>
<b><u>Natural Environment Values</u></b>	
<b>P1 Sch1</b>	<p><b>SUB-P15 Protection of significant natural areas</b></p> <p>Protect the biodiversity values of significant natural areas identified within SCHED8 by requiring subdivision to:</p> <ol style="list-style-type: none"> <li>1. Avoid adverse effects on indigenous biodiversity values where practicable;</li> <li>2. Minimise adverse effects on the biodiversity values where avoidance is not practicable;</li> <li>3. Remedy adverse effects on the biodiversity values where they cannot be avoided or minimised;</li> <li>4. Only consider biodiversity offsetting for any residual adverse effects that cannot otherwise be avoided, minimised or remedied and where the principles of APP2 – Biodiversity Offsetting are met; and</li> <li>5. Only consider biodiversity compensation after first considering biodiversity offsetting and where the principles of APP3 – Biodiversity Compensation are met.</li> </ol>
<b>P1 Sch1</b>	<p><b>SUB-P16 Subdivision in significant natural areas</b></p> <p>Allow for subdivision in significant natural areas listed in SCHED8 where it:</p> <ol style="list-style-type: none"> <li>1. Applies the effects management hierarchy approach in SUB-P15; and</li> <li>2. Demonstrates that it is appropriate by taking into account the: <ol style="list-style-type: none"> <li>a. Findings of an ecological assessment in accordance with APP15; and</li> <li>b. Provision of any proposed protective covenants of the significant natural area; and</li> <li>c. Degree to which fragmentation of the significant natural area is minimised; and</li> </ol> </li> </ol>

<sup>14</sup> Te Rūnanga o Toa Rangatira [488.55 and 488.56]

		<p>d. Extent to which building platforms and vehicle accessways within the new lots are proposed to locate outside the significant natural area or designed to minimize the degree of impact; and</p> <p>e. Extent that the ecological processes, functions and integrity of the significant natural area are maintained.</p>
P1 Sch1	<b>SUB-P14</b>	<p><b>Subdivision within riparian margins</b></p> <p><del>Provide for</del><u>Only allow</u><sup>15</sup> subdivision within riparian margins where:</p> <ol style="list-style-type: none"> <li>1. The natural character is protected; and</li> <li>2. The subdivisions is designed to minimise the adverse effects of future use and development enabled by the subdivision on the natural character.</li> </ol>
P1 Sch1	<b>SUB-P17</b>	<p><b>Subdivision of land within ridgeline and hilltops <u>overlay or within the ridgetop area of the</u> Upper Stebbings <u>and</u> Glenside West Development Area<sup>16</sup></b></p> <p><del>Provide for</del> <u>Only allow</u><sup>17</sup> subdivision of land containing ridgelines and hilltops <u>or within the ridgetop area</u><sup>18</sup> where:</p> <ol style="list-style-type: none"> <li>1. The integrity of the ridgeline is protected; and</li> <li>2. The subdivision is designed to minimise the adverse effects of future use and development on the visual amenity and landscape values.</li> </ol>
P1 Sch1	<b>SUB-P18</b>	<p><b>Subdivision of land within special amenity landscapes</b></p> <p>Manage subdivision of land within identified special amenity landscapes as follows:</p> <ol style="list-style-type: none"> <li>1. Provide for subdivision of land in identified special amenity landscapes outside the coastal environment where: <ol style="list-style-type: none"> <li>a. The subdivision is designed to ensure that adverse effects of future use and development enabled by the subdivision on the identified values are avoided, remedied or mitigated; and</li> <li>b. The identified landscape values and characteristics are maintained.</li> </ol> </li> <li>2. Provide for subdivision of land in identified special amenity landscapes within the coastal environment where: <ol style="list-style-type: none"> <li>a. The subdivision is designed to ensure that significant adverse effects of future use and development enabled by the subdivision on the identified values are avoided; and</li> <li>b. The subdivision is designed to ensure that any other adverse effects of future use and development enabled by the subdivision on the identified values are avoided, remedied or mitigated; and</li> <li>c. The identified landscape values and characteristics are maintained.</li> </ol> </li> </ol>

<p><u>Residential Zones</u><sup>57</sup></p>	<p>3. Activity status: <b>Discretionary</b></p> <p>Where:</p>

<sup>56</sup> All changes in response to FirstGas [304.39 & 304.40]

<sup>57</sup>

		a. Compliance with the requirements of SUB-R29.1.d cannot be achieved.
P1 Sch1	<b>SUB-R<del>3029</del></b>	Subdivision with <u>in</u> the <u>Inner Air Noise Boundary Overlay</u>
	<u>All Zones</u>	1. Activity status: <b>Discretionary</b>  <u>Notification status: For a resource consent application made in respect of Rule SUB-R29, WIAL must be considered to be an affected person in accordance with Section 95E of the RMA.<sup>58</sup></u>
	<b><u>Other subdivision</u></b>	
P1 Sch1	<b>SUB-R<del>3430</del></b>	Any other subdivision
	<u>All Zones</u>	1. Activity status: <b>Discretionary</b>  Where:  a. The subdivision is not otherwise provided for as a permitted activity, controlled activity, restricted discretionary activity, or non-complying activity.
	<b>Standards</b>	
ISPP	<b>SUB-S1</b>	<b>Access</b>
	Every allotment must have practical, physical and legal access directly to a formed legal road or by way of a registered right-of-way.	Assessment criteria where the standard is infringed:  1. Whether the safe, efficient and effective functioning of the transport network is maintained; 2. Whether any alternative access arrangement is located, formed and constructed in a manner that is suited to the development or activity it serves; and 3. Whether the topography, size or shape of the site or the location of any natural or built feature(s) on the site or other requirements such as easements, rights-of-way or restrictive covenants impose constraints that make compliance impracticable.
ISPP	<b>SUB-S2</b>	<b>Water supply</b>
	1. Where a connection to Council's reticulated water supply systems is available, all new allotments must: a. Be provided with a water supply connection at the allotment boundary, that provides the level of service in Chapter 6, Tables 6.1 and 6.2 of the Wellington Water Regional Standard for Water Services May 2019;	Assessment criteria where the standard is infringed:  1. The extent to which the proposed water supply is sufficient for the development or activity it serves; 2. The suitability of the proposed water supply for fire-fighting

<sup>58</sup> WIAL [406.282 and 406.283]

<p>b. Comply with water supply requirements in the New Zealand Fire Service Firefighting Water Supplies Code of Practice SNZ PAS 4509:2008; and</p> <p>2. Where a connection to Council's reticulated water supply systems is not available, all allotments must:</p> <p>a. Be provided with access to a self-sufficient potable water supply with a minimum volume of 10,000L; and</p> <p>b. Comply with the water supply requirements of the New Zealand Fire Service Firefighting Water Supplies Code of Practice SNZ PAS 4509:2008.</p>	<p>purposes, including effects on peoples' health and safety, and on property;</p> <p>3. Where Council's reticulated system is not immediately available but is likely to be in the near future, the appropriateness of temporary systems; and</p> <p>4. Whether any site constraints make compliance impracticable.</p>
---	--

ISPP

<b>SUB-S3</b>	<b>Wastewater disposal</b>
---------------	----------------------------

<p>1. Where a connection to Council's reticulated wastewater systems is available, all new allotments must be provided with a connection at the allotment boundary that provides the level of service in Chapter 5, section 5.2.3 of the Wellington Water Regional Standard for Water Services May 2019;</p> <p>2. Where a connection to Council's reticulated wastewater systems is not available, all allotments must be provided with <u>on-site wastewater systems a septic tank or soakage field</u><sup>59</sup> or an approved alternative means to dispose of sewage in a sanitary manner within the net site area of the allotment in accordance with Section 5.2.6 of the Wellington Water Regional Standard for Water Services May 2019; and</p> <p>3. Where a connection to Council's reticulated wastewater systems is not available and sewage is to be disposed to ground, that area must not be subject to instability or inundation or used for the disposal of stormwater.</p>	<p>Assessment criteria where the standard is infringed:</p> <ol style="list-style-type: none"> <li>1. The extent to which the proposed wastewater disposal solution is sufficient for the development or activity it serves;</li> <li>2. The extent to which the proposed wastewater disposal solution will result in adverse effects on peoples' health and safety;</li> <li>3. Whether the proposed wastewater disposal solution may result in contamination of groundwater or stormwater, including as a result of wet weather overflows;</li> <li>4. Where Council's reticulated system is not immediately available but is likely to be in the near future, the appropriateness of temporary systems; and</li> <li>5. Whether any site constraints make compliance impracticable.</li> </ol>
--	---

ISPP

<b>SUB-S4</b>	<b>Stormwater management</b>
---------------	------------------------------

<p>1. Where a connection to Council's stormwater management systems is available, all new allotments must be provided with a connection at the allotment boundary, that provides the level of service in Chapter 4 Stormwater Table 4.1, Table 4.2 and 4.3 of the Wellington Water Regional Standard for Water Services May 2019;</p> <p>2. All subdivisions must achieve hydraulic neutrality; and</p>	<p>Assessment criteria where the standard is infringed:</p> <ol style="list-style-type: none"> <li>1. The extent to which the proposed stormwater management solution is sufficient for the development or activity it serves;</li> <li>2. The extent to which the proposed stormwater management solution results in adverse effects on peoples' health and safety;</li> </ol>
---	---

<sup>59</sup> GWRC [351.192]

ISPP

<p>3. Where a connection to Council's stormwater systems is not available and the means of stormwater disposal is to ground, that area must not be subject to instability or inundation or be used for the disposal of wastewater.</p>	<p>3. Whether the proposed stormwater management solution results in adverse flooding effects on other property, including on the effective function of Council's reticulated network;</p> <p>4. Where Council's reticulated system is not immediately available but is likely to be in the near future, the appropriateness of temporary systems; and</p> <p>5. Whether any site constraints make compliance impracticable.</p>
--	--

<b>SUB-S5</b>	<b>Telecommunications and power supply</b>
---------------	--

<p>1. All new allotments must have provision for fibre optic cable connections to the legal boundary of the allotments; and</p> <p>2. All new allotments must have provision for electricity connections to the legal boundary of the allotments.</p>	<p>Assessment criteria where the standard is infringed:</p> <p>1. The extent to which the proposed telecommunications and power supply is sufficient for the development or activity it serves;</p> <p>2. Where any reticulated telecommunications and power supply system is not immediately available but is likely to be in the near future, the appropriateness of temporary supply solutions; and</p> <p>3. Whether any site constraints make compliance impracticable.</p>
