Airport Zone

AIRPZ

Airport Zone

Introduction

The purpose of the Airport Zone is to provide for the ongoing management and development of Wellington International Airport in relation to its site and the surrounding environment. The District Plan recognises and protects the Airport's status as regionally significant infrastructure (as identified by the Wellington Regional Policy Statement) and its economic / physical importance as a transport hub. The National Planning Standard 8. Zone Framework Standard describes an The Airport Zone is as 'an area used predominantly for the operation and development of an airport as well as operational areas and facilities, administrative, commercial and industrial activities associated with the airport².

The Airport Zone and associated Infrastructure chapter (sub chapters) recognise and protect the Airport's status as Regionally Significant Infrastructure and its economic and physical importance as a transport hub and facilitator of economic activity at a District, Regional and National level.

Wellington International Airport Limited (WIAL) is the Airport's owner and operator. WIAL undertakes masterplanning as part of its overall business – adopting a planning horizon of twenty years. WIAL's masterplan is a non-statutory document, entirely separate from the District Plan, and it may be subject to change on an ongoing basis. The masterplan highlights WIAL's long term expectations for growth in air traffic and associated implications for physical development at the Airport. The nature, timing and physical extent of development will be driven by diverse local and international factors over the life of this District Plan and beyond.

WIAL is a Requiring Authority for the purposes of Part 8 of the RMA <u>and holds five four designations that</u> <u>broadly apply to the Airport Zone area and its surrounds</u> The WIAL masterplan has informed the Airport company's existing designations (see Part 3 of the District Plan for operative designations). These include:

- 1. Designation WIAL1 (Wellington Airport Obstacle Limitation Surfaces);
- 2. Designation WIAL2 (Wellington Airport Miramar South Area);
- 3. Designation WIAL3 (Wellington Airport Runway End Safety Area);
- 4. Designation WIAL4 (Wellington Airport Main Site Area); and
- 5. Designation WIAL5 (Wellington Airport East Side Area).

Some Airport relevant provisions are set out in other chapters, including Noise, Signs, Earthworks, Light, and Designations.

The Act, and therefore the District Plan, share the same broad definition of 'infrastructure', which includes airports. Notwithstanding that, the Infrastructure Chapter (including sub chapters) of the District Plan specifically excludes activities that fall under the definition of airport activities purposes or airport related activities which occur within the Airport Zone (which are dealt with in the Airport chapter). Any infrastructure within the Airport Zone that is inconsistent with those definitions or any airport or airport related activity located outside of the Airport Zone continue to be is-managed by the provisions of the Infrastructure Chapter (and associated sub chapters).

Airport Precincts

The Airport Zone comprises of eight precincts which reflect the primary function of the areas and/or their environmental context. Described further below and shown on the plan included at the end of this chapter as Figure 1 these precincts include:

- 1. The Airside Precinct;
- 2. The Broadway Precinct;
- 3. <u>The East Side Precinct;</u>
- 4. The Miramar South Precinct.
- 5. The Rongotai Ridge Precinct;
- 6. The South Coast Precinct;
- 7. The Terminal Precinct; and,
- 8. The West Side Precinct;

specific precincts. Six of those precincts are physically contiguous and identified below as: Terminal; Airside; East Side; West Side; Broadway; and South Coast. In addition, there are two physically separate precincts, being Rongotai Ridge and Miramar South. Precinct boundaries are shown by the plan included at the end of this chapter. The boundaries are indicative in locations where they do not follow cadastral boundaries.

Terminal Precinct

For passengers, the Terminal Precinct is the Airport's heart. It comprises the main passenger terminal, access and roading, car parking, and commercial and passenger support services including visitor accommodation and conference facilities. It also contains airside airport facilities such as hangars, aircraft parking stands, and aviation support facilities.

Airside Precinct

The Airside Precinct comprises the runway, north-south taxiways, and associated aprons. <u>It also includes</u> <u>hangars and aircraft parking stands.</u>

East Side Precinct

At the date of District Plan notification (18 July 2022), tThe East Side Precinct is used as the southern part of Miramar Golf Course. Over time, the area will be gradually developed for a limited range of airport activities, until the area is required It will continue to be used as such, until growth in air traffic necessitates its redevelopment for aircraft parking / taxiing purposes. The redevelopment may occur in stages. Until it is fully developed, the precinct may also be used for the temporary relocation of parking where it is displaced by construction activity in other parts of the Airport. The precinct will be largely free of buildings and commercial signage.

West Side Precinct

The West Side Precinct includes the Airport Retail Park on the eastern side of Tirangi Road. It comprises mainly commercial uses and associated parking. It also includes the Airport's flight control tower, fire station, and some aircraft hangars. Urban design 'edge effects' are an important consideration where the land faces adjacent residential zoned land. The precinct is a valuable resource for the Airport, providing a source of income from ground leases which help to support other aspects of the business. In the long term, the land may potentially be used for Airport operational purposes.

Broadway Precinct

The Broadway Precinct is located at the entrance 'gateway' to the Airport. Although much of the nearby area is zoned for residential use, the Broadway Precinct is a 'transitional' location with a mix of land uses. Together with the Miramar South Precinct, it forms an important 'gateway' to both the Airport and suburbs to the east.

South Coast Precinct

The South Coast Precinct partially fronts the southern coastline and the Moa Point wastewater treatment plant. The precinct has airside and landside access and has been identified as a site for a future multi-user freight facility over the longer term. shares a short section of boundary with adjacent residential land. It also abuts land occupied by the Moa Point wastewater treatment plant which is subject to Designation WCC6. The Airport's 2040 masterplan identifies the precinct as the location of a multi-user freight facility.

Rongotai Ridge Precinct

The Rongotai Ridge Precinct comprises land located between Wexford Road and Miramar Avenue and is physically separate from other <u>Airport Zone</u> precincts of the 'Main Site'. <u>Development within large portions of</u> this precinct is constrained by the obstacle limitation surface (OLS) Designation WIAL1. Maupuia Pā, a Site of Significance to Māori, is also located within this precinct. The upper (ridge) part of the precinct has an existing commercial building used for non-Airport purposes but most of the area is predominantly open space. Any further development in the precinct is constrained by the obstacle limitation surface (OLS) designation (WIAL1) which precludes most potential development opportunities.

Miramar South Precinct

Most of the Miramar South Precinct was previously the site of Miramar South School. The precinct is subject to a designation (WIAL2) to allow the development of support services to the Airport, including flight catering, rental car operations, and freight operations. At its Broadway end, the <u>The</u> Miramar South Precinct forms an important 'gateway' to both the Airport and suburbs to the east. With no airside access, the precinct lends itself to the development of support, including flight catering, related vehicle storage, and freight operations.

Airport Noise

The management of noise associated with the Airport's operations is addressed in the District Plan Noise Chapter <u>and Wellington International Airport's designations</u>. Noise is subject to the following interrelated controls:

- 1. District Plan provisions which reference specific noise restrictions.
- 2. <u>Conditions imposed on the Wellington International Airport Designations (which includes the operation of the Airport Noise Management Committee and Airport Noise Management Plan).</u> <u>District Plan provisions</u> which reference the Airport's Noise Management Plan (NMP).
- 3. The NMP, which sits outside of the District Plan.
- The <u>Air Noise overlay (ANO)_65dB Air Noise Boundary (ANB)</u>– which is demarcated on the District Plan maps, and referenced in District Plan provisions and the <u>ANMPNMP</u>. The extent and nature of the <u>ANOANB</u> is guided by the recommendations of New Zealand Standard NZS6805:1992 Airport Noise Management and Land Use Planning.
- <u>The Inner Air Noise Overlay and the Outer Air Noise Overlay, which are used to manage intensity of development by noise sensitive activities (such as residential development). The outer edge of the Inner Noise Overlay approximates the ANB. The outer edge of the Outer Air Noise Boundary-Overlay approximates a 60 db Ldn airnoise noise contour.</u>

Airport Designations

Parts of the Airport and its operations are subject to designations of WIAL and other requiring authorities. The main designations include associated conditions that control the nature of development and the extent of WIAL's authority under relevant provisions of the Resource Management Act.

WIAL designations are included in Part 3 of the District Plan.

Airspace Designation

The purpose of the airspace designation (Designation WIAL1) is to help ensure the safe and efficient operation of the Airport. The designation limits the height of objects, such as new buildings below aircraft flight paths, by imposing an obstacle limitation surface (OLS). The OLS applies to obstacles both within and outside of the Airport Zone.

The OLS restrictions are defined and explained by designation 'WIAL1' and the related 'Conditions 1'. They are illustrated by the maps within Condition 1. Development that breaches the OLS can only occur with the prior written consent of WIAL.

Designations

WIAL has four designations covering different parts of the Airport and surrounding land. The WIAL designations are:

- 1. Designation WIAL2 (Miramar South): Land bordered by Miro, Kauri, Kedah and Broadway streets, enabling its development and use for flight catering, rental car operations, and freight operations. There is a suite of related conditions.
- 2. Designation WIAL3 (RESA): The southern runway end safety area extension.
- 3. Designation WIAL4 (Main Site Area): The main Airport land, including the Terminal, runway / taxiing areas, and the Tirangi Road Retail Park. There is a suite of related conditions.
- 4. Designation WIAL5 (East Side Area): Land adjoining and immediately east of the main Airport land which has historically been the southern part of Miramar golf course. When required by growth air traffic, the designation will enable development and use of the land for the parking and taxiing of aircraft. There is a suite of related conditions.

Other Designations

Other non-WIAL designations which affect the Airport Zone land include:

1. Designation MZNZ4: Meteorological purposes (entirely with the Airport Zone).

2. Designation WCC6: Moa Point Sewage Treatment Plant (partly within the Airport Zone).

Other relevant District Plan provisions

There may be a number of provisions that apply to an activity, building, structure or site. Resource consent may therefore be required under rules in this chapter as well as other chapters. Unless specifically stated in a rule, resource consent is required under each relevant rule. The steps to determine the status of an activity are set out in the General Approach chapter.

Parts of the Airport and its operations are subject to designations held by WIAL and other requiring authorities. The main designations include associated conditions that control the nature of development and the extent of WIAL's authority under relevant provisions of the Resource Management Act. WIAL's designations are included in Part 3 of the District Plan.

Objectives	
AIRPZ-O1 Purpose of the Airport Zone	
Wellington International Airport is recognised and protected as locally, and regionally and nationally significant infrastructure.	
AIRPZ-02	Development of the Airport Zone

The dual character of the Airport Zone as a working environment and a regional / international gateway is balanced, recognising:

- 1. The Airport's role as an air and land transport hub that provides for the safe and efficient movement of people and goods;
- 2. There will be development that reflects the purpose of the Airport Zone, and for airport related purposes that provide the Airport with other forms of support; and
- 3. A higher standard of design may be necessary where large buildings or structures are adjacent to or visible from the public domain adjacent public roads or public open space land; and
- 4. <u>The operational and functional requirements of the airport and its associated buildings and structures may</u> <u>necessitate a specific scale, location or appearance.</u>

1. Compatible effects; 2. Compatible 3. The operation overall urba AIRPZ-O4 The Airport's oper and Airport relate Adverse effects o 1. The need for	d non-airport activities are <u>compatible with</u> : with the efficient operation, maintenance, and upgrading of the Airport and its associated with the efficient and integrated functioning of other transport networks; and on of the Airport is protected from reverse sensitivity effects outside the Airport Zone. The n form and amenity of adjacent zones. Adverse effects generated by activities rational and functional requirements are provided for while ensuring the adverse effects of Airport d activities on the environment are avoided, remedied or mitigated. f activities are guarded, remedied, while recognizing:	
effects; 2. Compatible 3. The operation overall urba AIRPZ-O4 The Airport's oper and Airport relate Adverse effects of 1. The need for	with the efficient and integrated functioning of other transport networks; and on of the Airport is protected from reverse sensitivity effects outside the Airport Zone. The n form and amenity of adjacent zones. Adverse effects generated by activities rational and functional requirements are provided for while ensuring the adverse effects of Airport d activities on the environment are avoided, remedied or mitigated.

and Airport relate Adverse effects o - 1. The need for	d activities on the environment are avoided, remedied or mitigated.	
- 1. The need fo	factivities are evolded, remedied, or mitigated, while recognizing:	
	Adverse effects of activities are avoided, remedied, or mitigated, while recognising:	
 The need for effects management within the Airport Zone, including effects on the amenity of the surrounding area; and The need for effects management in adjacent areas outside the Airport Zone, to avoid or limit effects on 		
	ey and safety of the Airport.	
	Carbon neutrality	
Activities are ena	bled that contribute to carbon neutrality, including:	
 Decarbonisation of the airport and aircraft operations; Significant growth in <u>uptake of</u> integrated low-carbon land transport options to and from the airport; and Generation, storage and use of renewable or low carbon energy for the airport. 		
AIRPZ-O6	Airport resilience	
	the Airport and its supporting infrastructure, including other transport links, is maintained or providing for the Airport's operational and functional requirements.	
Policies		
AIRPZ-P1	Airport purposes activities, buildings and structures	
Enable Airport Pu	rrposes activities, buildings and structures, including but not limited to those that:	
	e transport of people and cargo by aircraft; and y activities or services that provide essential support to the transport function.	
AIRPZ-P2	Airport Related activities, buildings and structures	
	Airport Related activities, buildings and structures elated activities that provide support to airport <u>activities purposes</u> , including but not limited to	
Allow for airport ro those that: 1. Provide servisitors; 2. Support the 3. Support car		
Allow for airport ro those that: 1. Provide servisitors; 2. Support the 3. Significantly	elated activities that provide support to airport <u>activities purposes</u> , including but not limited to vices to passengers, crew, ground staff, airport workers, and other associated workers and economic viability of the Airport; and bon neutral outcomes, including through transport decarbonisation, and renewable or low rgy generation, storage and use.	
Allow for airport re those that: 1. Provide servisitors; 2. Support the 3. Support car carbon enervisitors AIRPZ-P3 Discourage new re 1. Compromise 2. Give rise to 3. Significantly 4. Are incompared	elated activities that provide support to airport <u>activities purposes</u> , including but not limited to vices to passengers, crew, ground staff, airport workers, and other associated workers and economic viability of the Airport; and bon neutral outcomes, including through transport decarbonisation, and renewable or low rgy generation, storage and use. Non-airport activities non-airport related activities that: e the long-term availability of land for airport or airport related activities; adverse effects on the safety and efficiency of the transportation network; compromise the achievement of carbon neutral outcomes in the Airport as a whole; or	

Maintain and enhance <u>public the</u> character <u>at of</u> the zone interface and in publicly accessible parts of zone, including through consideration of:

- 1. The interface of the Airport Zone with adjoining and adjacent land;
- 2. The New Zealand Urban Design Protocol; tThe intent of the Centres and Mixed Use Design Guide;
- 3. Any landscape plan, urban design principles or statement, or integrated design management plan, prepared for an Airport precinct;
- 4. The 'gateway' status of the Broadway, Miramar South and South Coast precincts, with respect to the Airport and adjacent land;
- 5. The visual and landscape significance of the Rongotai Ridge precinct; and
- 6. The visual and landscape significance of the Landscape Buffer Area at the eastern margin of the East Side Precinct (refer to <u>Figure 2 of this chapter Figure 7</u>).

AIRPZ-P5 Management of effects

Manage activity, building and structure effects in the Airport Zone, having regard to:

- 1. Design, scale and location <u>of buildings and structures</u>, and associated public and private effects, including the impacts of construction <u>activity</u>;
- 2. Compatibility with the role and function of the Airport Zone;
- 3. Whether the activity, building or structure is ancillary to and/or supports airport activities;
- 4. Safety, security and resilience of the Airport (and supporting infrastructure) as an air and land transport hub;
- 5. Efficiency and capacity of the Airport and other infrastructure and services;
- 6. Potential conflict with established or permitted activities on adjoining and adjacent land outside the Airport Zone; and
- 7. The need to measure, report and pursue decarbonisation of airport related activities, including embedded emissions from construction, and activity attracted by the Airport (such as public and private transport).

Rules: Land use activities

AIRPZ-R1 Airport activities purposes

1. Activity status: Permitted

Where:

a. The activity is for airport purposes and complies with any relevant requirements of AIRPZ-S3 and <u>AIRPZ-S4</u>.

2. Activity status: Controlled

Where:

a. The activity is land development and construction activity in the East Side Precinct.

Matters of control are:

1. Construction effects, including earthworks, noise, hours of operation, and traffic.

3. Activity status: Restricted Discretionary

Where:

- a. The activity is for airport purposes; and
- b. Any standard The relevant requirements of in AIRPZ-S1, AIRPZ-S2 or AIRPZ-S3 and AIRPZ-S4 is are not met.

Matters of discretion are:

- 1. The extent and effect of non-compliance with any relevant standard as specified in the associated assessment criteria for the infringed standards; and
- 2. Relevant matters listed in policies AIRPZ-P1, AIRPZ-P4 and AIRPZ-P5.
- 4. Activity status: **Discretionary**

Where:

a. The activity is not <u>otherwise</u> a permitted <u>, controlled</u> or restricted discretionary activity under rule AIRPZ-R1.	
AIRPZ-R2 Airport related activities	
1. Activity status: Permitted	
Where:	
 a. <u>The activity is an airport related activity in the Terminal Precinct; The activity is a golf course in the East Side Precinct</u>; and b. Any relevant standard in AIRPZ-S1 <u>AIRPZ-S3</u> is met. 	
- 2. Activity status: Controlled	
Where:	
a. The activity is an airport related activity in the Terminal Precinct; and b. Any relevant standard in AIRPZ-S1 is met.	
Matters of control are:	
 Relevant matters listed in policies AIRPZ-P2, AIRPZ-P4 and AIRPZ-P5; Design, external appearance and siting; 	
3. Lighting; 4. Landscaping;	
5. Parking provision and use; 6. Site access;	
7. Loading and servicing;	
8. Internal traffic circulation; and 9. Traffic effects on the surrounding road network.	
3. Activity status: Restricted Discretionary	
Where:	
 a. The activity is an airport related activity in the Terminal Precinct; and Any relevant standard in AIRPZ-S1 <u>AIRPZ-S3</u> is not met; or b. The activity is an airport related activity in the West Side, Broadway, Miramar South, Rongotai Ridge, or South Coast precincts; and 	
Matters of discretion are:	
 The extent and effect of non-compliance with any relevant standard as specified in the associated assessment criteria for the infringed standards; and Relevant matters listed in policies AIRPZ-P2, AIRPZ-P4 and AIRPZ-P5. 	
4. Activity status: Discretionary	
Where:	
 a. The activity is an airport related activity; and b. The activity is not <u>otherwise a permitted</u>, controlled, <u>or</u> restricted discretionary or non-complying activity under rule AIRPZ-R2. Notification status: An application for resource consent made in respect of this rule may be publicly notified. 	
5. Activity status: Non-complying	
Where:	
a. The activity is an airport related activity; and i. Standard AIRPZ-S3 is not met.	
- Notification Status: An application for resource consent made in respect of this rule will be publicly notified.	
AIRPZ-R3 Non-airport activities	

1. <u>Activity Status</u> : Permitted Where:	
a. The activity is a golf course in the East Side precinct.	
2. Activity status: Restricted Discretionary	
Where:	
a. The activity is a non-airport activity; and <u>The activity is a non-airport activity outside the Airside,</u> Miramar South and East Side Precincts; and	
b. All relevant standards in AIRPZ-S1, AIRPZ-S2 and AIRPZ-S3 and AIRPZ-S4 are met.	
Matters of discretion are:	
1. Relevant matters listed in policies AIRPZ-P3, AIRPZ-P4 and AIRPZ-P5.	
Notification status: An application for resource consent made in respect of this rule may be publicly notified.	
2. Activity status: Non-complying Discretionary	
Where:	
a. The activity is a non-airport activity; and The activity is a non-airport activity in the Airside, Miramar South and or East Side Precincts; or	
b. The activity is not otherwise a <u>Permitted or Restricted</u> Discretionary activity under Rule AIRPZ-R3.	
Notification status: An application for resource consent made in respect of this rule must be publicly notified.	
Rules: Building and structure activities	
AIRPZ-RX Maintenance and repair of buildings and structures	
1. <u>Activity Status: Permitted</u>	
AIRPZ-RX Demolition or removal of buildings and structures	
1. <u>Activity Status: Permitted</u>	
AIRPZ-R4 Construction of, or additions and alterations to, Buildings and structures	
1. Activity status: Permitted	
Where:	
a. A building or structure is for airport purposes; and	
i. Compliance with standards AIRPZ-S1 or AIRPZ-S2 is achieved; and	
ii. <u>The building or structure is outside the East Side Precinct Landscape Buffer.</u> b. A building or structure is for golf course activities in the East Side Precinct; and	
ii. <u>The building or structure is outside the East Side Precinct Landscape Buffer.</u> b. A building or structure is for golf course activities in the East Side Precinct; and i. Any relevant standard in AIRPZ-S1 is met.	
 ii. <u>The building or structure is outside the East Side Precinct Landscape Buffer.</u> b. A building or structure is for golf course activities in the East Side Precinct; and Any relevant standard in AIRPZ-S1 is met. 2. Activity status: Controlled 	
ii. <u>The building or structure is outside the East Side Precinct Landscape Buffer.</u> b. A building or structure is for golf course activities in the East Side Precinct; and i. Any relevant standard in AIRPZ-S1 is met.	
 ii. The building or structure is outside the East Side Precinct Landscape Buffer. b. A building or structure is for golf course activities in the East Side Precinct; and i. Any relevant standard in AIRPZ-S1 is met. 2. Activity status: Controlled Where: 	
 ii. <u>The building or structure is outside the East Side Precinct Landscape Buffer.</u> b. A building or structure is for golf course activities in the East Side Precinct; and Any relevant standard in AIRPZ-S1 is met. 2. Activity status: Controlled Where: <u>A building or structure within the East Side Precinct Landscape Buffer Area (Figure 2) to facilitate public access, amenity, safety or the security of the airport; and</u> <u>Compliance with standard AIRPZ-S1 is achieved.</u> 	
 ii. The building or structure is outside the East Side Precinct Landscape Buffer. b. A building or structure is for golf course activities in the East Side Precinct; and Any relevant standard in AIRPZ-S1 is met. Activity status: Controlled Where: A building or structure within the East Side Precinct Landscape Buffer Area (Figure 2) to facilitate public access, amenity, safety or the security of the airport; and Compliance with standard AIRPZ-S1 is achieved. A building or structure is for an airport related activity in the Terminal Precinct; and 	
 ii. The building or structure is outside the East Side Precinct Landscape Buffer. b. A building or structure is for golf course activities in the East Side Precinct; and Any relevant standard in AIRPZ-S1 is met. Activity status: Controlled Where: A building or structure within the East Side Precinct Landscape Buffer Area (Figure 2) to facilitate public access, amenity, safety or the security of the airport; and Compliance with standard AIRPZ-S1 is achieved. A building or structure is for an airport related activity in the Terminal Precinct; and Compliance with standard AIRPZ-S1 is otherwise achieved; 	
 ii. The building or structure is outside the East Side Precinct Landscape Buffer. b. A building or structure is for golf course activities in the East Side Precinct; and Any relevant standard in AIRPZ-S1 is met. 2. Activity status: Controlled Where: a. A building or structure within the East Side Precinct Landscape Buffer Area (Figure 2) to facilitate public access, amenity, safety or the security of the airport; and b. Compliance with standard AIRPZ-S1 is achieved. c. A building or structure is for an airport related activity in the Terminal Precinct; and i. Does not exceed 12m; and ii. Compliance with standard AIRPZ-S1 is otherwise achieved; d. A building or structure in the Figure 7 - East Side Precinct, Landscape Buffer Area is to facilitate: 	
 ii. The building or structure is outside the East Side Precinct Landscape Buffer. b. A building or structure is for golf course activities in the East Side Precinct; and i. Any relevant standard in AIRPZ-S1 is met. 2. Activity status: Controlled Where: a. A building or structure within the East Side Precinct Landscape Buffer Area (Figure 2) to facilitate public access, amenity, safety or the security of the airport; and b. Compliance with standard AIRPZ-S1 is achieved. c. A building or structure is for an airport related activity in the Terminal Precinct; and i. Does not exceed 12m; and ii. Compliance with standard AIRPZ-S1 is otherwise achieved;

Definitions relevant to the Airport Zone

AIRPORT <u>ACTIVITIES</u> PURPOSES	means the transport of people and cargo by aircraft and any ancillary activity or service that provides essential support to that function. Where a designation of the airport requiring authority exists, it additionally means the activities of the requiring authority described in the Purpose Statement or conditions of that designation.
	Means any activity, wholly or partly, relating to the landing, departure and movement of aircraft and aircraft passengers, including but not limited to:
	 <u>Ground based infrastructure, plant and machinery necessary to assist</u> aircraft operations;
	<u>Emergency service facilities (including police, fire and medical facilities)</u> and aircraft rescue training facilities;
	 <u>Runways, taxiways, aprons and other aircraft movement areas,</u> including their establishment, operation and use;
	<u>Catering activities;</u>
	• <u>Freight activities;</u>
	Vehicle parking and storage, vehicle valet activities, and public transport activities;
	 <u>Navigation and safety aids, lighting and telecommunication facilities;</u>
	Quarantine and incineration activities;
	<u>Border control and immigration activities;</u>
	<u>Infrastructure and servicing;</u>
	 <u>Fuel storage and fuelling activities, facilities for the handling and storage</u> of hazardous substances;
	 Structures to mitigate against the impact of natural hazards;
	<u>Associated administration and office activities</u>
	Ancillary activities related to the above; and
	 <u>Servicing</u>, testing and maintenance activities related to the above.
AIRPORT RELATED ACTIVITIES	 means third-party ancillary activities or services that provide support to the airport, including but not limited to This includes: a. land transport activities; b. rental vehicle activities; b. buildings and structures; c. servicing and infrastructure; d. police stations, fire stations, and medical facilities emergency service facilities; e. educational facilities provided they serve an aviation related purpose; f. retail, and commercial services and industryial activities associated with the needs of Airport passengers, visitors and
	employees and/or aircraft movements and Airport businesses;

administrative offices, provided they are ancillary to an airport or airport related activity. and
 h. <u>hotel / visitor accommodation, conference facilities and</u>

associated services;

Airport Related Activities does not include activities listed in the definition of Airport Activities.

OBSTACLE LIMITATION	means airspace defined around an aerodrome that enables operations at
SURFACE	the aerodrome to be conducted safely and that prevents the aerodrome
	from becoming unusable by the growth of obstacles around the aerodrome.
	Extending out from all edges of the runway, the OLS includes contiguous
	transitional, horizontal, conical, and approach / take off surfaces.
