Sub-part / Chapter / Provision	Submitter Name	Sub No / Point No	Position	Summary of Submission	Decisions Requested
Commercial and mixed use Zones / Metropolitan Centre Zone / General MCZ	Oliver Sangster	112.12	Support	Considers that Johnsonville Centre has huge development potential as flat sunny land right next to the Johnsonville railway, numerous open space parks and Waitohi library.	Retain upzoning and intensification of the Johnsonville Mall area as notified.
Commercial and mixed use Zones / Metropolitan Centre Zone / General MCZ	Bus Barn Limited	320.1	Support	MCZ provisions are generally supported with respect to the height increase, but some amendments are sought regarding height standards.	Retain the Metropolitan Centre Zone chapter, with amendment.
Commercial and mixed use Zones / Metropolitan Centre Zone / General MCZ	Retirement Villages Association of New Zealand Incorporated	350.269	Amend	Considers policy support for retirement villages in the Metropolitan Centre Zone is required.	<p>Add the following new policies in the Metropolitan Centre Zone chapter and amend current objectives and policies for consistency:</p> <p><u>Provision of housing for an ageing population</u> 1. Provide for a diverse range of housing and care options that are suitable for the particular needs and characteristics of older persons in [add] zone, such as retirement villages. 2. Recognise the functional and operational needs of retirement villages, including that they: a. May require greater density than the planned urban built character to enable efficient provision of services. b. Have unique layout and internal amenity needs to cater for the requirements of residents as they age.</p> <p><u>Changing communities</u> To provide for the diverse and changing residential needs of communities, recognise that the existing character and amenity of the [add] zone will change over time to enable a variety of housing types with a mix of densities.</p> <p><u>Larger sites</u> Recognise the intensification opportunities provided by larger sites within the [add] zone by providing for more efficient use of those sites.</p>
Commercial and mixed use Zones / Metropolitan Centre Zone / General MCZ	Z Energy Limited	361.67	Support	Supports MCZ zoning in Kilbirnie and Johnsonville. The purpose of the Metropolitan Centre Zone (MCZ) is to provide predominantly for a broad range of commercial, community, recreational and residential activities. The zone is a focal point for sub-regional urban catchments and provides significant support to the City Centre Zone by offering key services to the outer suburbs of Wellington City and the wider region. It seeks pleasant and interesting pedestrian environment.	Retain the Metropolitan Centre Zone chapter as notified.
Commercial and mixed use Zones / Metropolitan Centre Zone / General MCZ	Waka Kotahi	370.404	Support	Supports provision for active and public transport, consideration of function of the transport network, the discouragement of carparking visible at street edge along an active frontage and the quality design outcomes.	Retain the Metropolitan Centre Zone chapter as notified.
Commercial and mixed use Zones / Metropolitan Centre Zone / General MCZ	Kāinga Ora Homes and Communities	391.646	Support in part	The use of standards to manage potential adverse effects across the PDP is generally supported, but changes are sought.	Retain the Metropolitan Centre Zone chapter with amendment.
Commercial and mixed use Zones / Metropolitan Centre Zone / General MCZ	Kāinga Ora Homes and Communities	391.647	Amend	<p>Considers that MCZ height controls should be amended to ensure the NPSUD and the Housing Supply Act are effectively and efficiently implemented, that intensification is enabled in areas of high accessibility to commercial amenity, community services and public transport, and that height controls enable a transition of height and density within the urban built form from higher heights and densities in centres.</p> <p>There may be a number of other consequential changes needed to standards to give effect to these height adjustments, such as increasing height in associated wind and daylight standards. These changes should be proportionate to the changes in building height sought to address any transition issues between zones and provide for increased levels of intensification.</p>	Amend the Metropolitan Centre Zone chapter to add a height control of 29m within 400m walkable catchment of a Metropolitan Centre Zone.

Commercial and mixed use Zones / Metropolitan Centre Zone / General MCZ	Kāinga Ora Homes and Communities	391.648	Support in part	Supports the introduction and application of a Metropolitan Centre Zone in the Draft District Plan, but considers that amendments are required to better reflect density and design outcomes anticipated in the NPS-UD.	Retain the introduction text in the Metropolitan Centre Zone and seeks amendment.
Commercial and mixed use Zones / Metropolitan Centre Zone / General MCZ	Kāinga Ora Homes and Communities	391.649	Amend	Supports the introduction and application of a Metropolitan Centre Zone in the Draft District Plan, but considers that amendments are required to better reflect density and design outcomes anticipated in the NPS-UD.	Amend the introduction text in the Metropolitan Centre Zone as follows: ... The Johnsonville and Kilbirnie metropolitan centres will play a critical role in accommodating forecast population growth and have significant development/redevelopment potential. To support and encourage intensification, the Metropolitan Centre Zone provides substantial height limits <u>significant opportunity for building height</u> . Given the significant development potential in the Metropolitan Centre Zones, comprehensive development and the integrated and coordinated development of larger sites is required to act as a catalyst for positive change and demonstrate density done well. High quality building design <u>Achieving well designed buildings is a focus for these centres and criteria are included to deliver this outcome. The building typology</u> and design is encouraged to be significantly different to the existing built form transition to more intensive use in metropolitan centres will result in significant changes to existing amenity values and design in the centres and their surrounds. Redevelopment will be supported by a range of measures to promote good design and environmental outcomes and address amenity issues. Accordingly, most building activities will require a resource consent and an assessment against the Centres and Mixed Use Design Guide. There is an identified need for significant residential intensification within and around the Metropolitan Centres. These centres are subject to the intensification policies 3 (b) and (c) of the National Policy Statement on Urban Development 2020 (NPS-UD). Accordingly, residential activity is permitted above ground floor within the centres and the High Density Residential Zone has been applied within a walkable catchment of the edge of these centres. The cumulative risk from natural hazards in Kilbirnie is that the intensification of this area has been tempered as a qualifying matter under Subpart 6, clause 3.32 of the NPS-UD has been addressed by applying a natural hazards overlay. ...
Commercial and mixed use Zones / Metropolitan Centre Zone / General MCZ	Investore Property Limited	405.87	Support	Supports the recognition of Johnsonville as a Metropolitan Centre of sub-regional importance.	Not specified.
Commercial and mixed use Zones / Metropolitan Centre Zone / General MCZ	Investore Property Limited	405.88	Support in part	Supports the introduction statement except for the statement that most building activities will require resource consent and an assessment against the Centres and Mixed Use design guide.	Retain the introductory text of the Metropolitan Centre Zone chapter and seeks amendment.
Commercial and mixed use Zones / Metropolitan Centre Zone / General MCZ	Investore Property Limited	405.89	Amend	Supports the introduction statement except for the statement that most building activities will require resource consent and an assessment against the Centres and Mixed Use design guide.	Seeks to amend the fourth paragraph of the introductory text of the Metropolitan Centre Zone chapter to: ... High quality building design is a focus for these centres. The transition to more intensive use in metropolitan centres will result in significant changes to existing amenity values and design in the centres and their surrounds. Redevelopment will be supported by a range of measures to promote good design and environmental outcomes and address amenity issues. Accordingly, most building activities will require a resource consent and an assessment against the Centres and Mixed Use Design Guide. ...
Commercial and mixed use Zones / Metropolitan Centre Zone / General MCZ	Investore Property Limited	405.90	Support	Supports the objectives and policies for the Metropolitan Centre zone generally, and specifically supports the recognition of the sub-regional role of these centres, the recognition of high-density development, and the enablement of a wide range of activities. Specific changes are sought to particular provisions.	Retain Metropolitan Centre Zone's objectives and policies with amendments.

Sub-part / Chapter / Provision	Submitter Name	Sub No / Point No	Position	Summary of Submission	Decisions Requested
Commercial and mixed use Zones / Metropolitan Centre Zone / General MCZ	Willis Bond and Company Limited	416.111	Amend	Submitter notes the effect that the more permissive medium density residential standards will have on other zones. The zones supporting higher density development have more restrictive standards than in the MRZ, creating a risk that new development is concentrated in the more permissive MRZ at the exclusion of denser zones where Council wishes to encourage greater development. The PDP should ensure that the restrictions within denser zones are not substantially more restrictive than within the MRZ. [Refer to original submission for full reason].	Seeks that Council consider the relationship between the Medium Density Residential Zone and denser zones (i.e. the High Density Residential Zone, Large Lot Residential Zone, Neighbourhood Centre Zone, Local Centre one, Commercial Zone, Mixed Use Zone, Metropolitan Centre Zone and City Centre Zone) to ensure development is not unduly restricted in denser zones by greater restrictions and Council discretion.
Commercial and mixed use Zones / Metropolitan Centre Zone / General MCZ	Willis Bond and Company Limited	416.112	Amend	Considers the medium density residential standards should apply across the Metropolitan Centre Zone in a similar way to the High Density Residential Zone. This would help encourage more development within Metropolitan Centre Zones. The active frontage controls in MCZ-S6 should still apply, as well as the rule in MCZ-R12 preventing residential at ground level.	Amend Metropolitan Centre Zone chapter to include the equivalent of HRZ-P4 (Medium density residential standards).
Commercial and mixed use Zones / Metropolitan Centre Zone / General MCZ	Willis Bond and Company Limited	416.113	Amend	Considers the medium density residential standards should apply across the Metropolitan Centre Zone in a similar way to the High Density Residential Zone. This would help encourage more development within Metropolitan Centre Zones. The active frontage controls in MCZ-S6 should still apply, as well as the rule in MCZ-R12 preventing residential at ground level.	Amend Metropolitan Centre Zone chapter to incorporate the medium density residential standards (as incorporated in the High Density Residential Zone).
Commercial and mixed use Zones / Metropolitan Centre Zone / General MCZ	Johnsonville Community Association	429.40	Amend	Considers that the key purpose of the Johnsonville Shopping Centre is to provide the range or retail and services required to support surrounding residential areas. Submitter is concerned the WCC emphasis on building residential development within the Johnsonville Shopping Centre will compromise the focus of the centre and possibly further delay redevelopment of the Johnsonville Mall.	Seeks that the statement that residential development is to be a key focus of Metropolitan Centre is amended to be reduced to Residential Developments can also be supported as long as they do not compromise the core purpose of the centre as outlined by the current District Plan.
Commercial and mixed use Zones / Metropolitan Centre Zone / General MCZ	John Wilson	453.12	Not specified	[No specific reason given beyond decision requested - refer to original submission]	Seeks clarification in relation to zoning around Metropolitan Centre Zones - why High Density Residential rules also apply to the Johnsonville centre compared to the Kilbirnie residential centre. [Inferred decision requested]
Commercial and mixed use Zones / Metropolitan Centre Zone / General MCZ	John Wilson	453.13	Oppose	Opposes the provisions in the Plan applying to the "Johnsonville Metropolitan Centre Zone". [Refer to original submission for full reason]	Delete all provisions related to "Johnsonville Metropolitan Centre Zone". [Inferred decision requested]
Commercial and mixed use Zones / Metropolitan Centre Zone / General MCZ	Stride Investment Management Limited	470.23	Support	Supports the Metropolitan Centre Zoning of the Johnsonville Centre.	Retain as notified.
Commercial and mixed use Zones / Metropolitan Centre Zone / General MCZ	Stride Investment Management Limited	470.24	Support in part	Supports in part the introduction.	Retain the introduction as notified, with amendments.
Commercial and mixed use Zones / Metropolitan Centre Zone / General MCZ	Stride Investment Management Limited	470.25	Amend	Seeks to amend part of the introduction. Specifically the statement that most building activities will require resource consent and an assessment against the Centres and Mixed Use design guide. [Refer to original submission for full reason].	Amend the introduction as follows: "...Redevelopment will be supported by a range of measures to promote good design and environmental outcomes and address amenity issues. Accordingly, most building activities will require a resource consent and an assessment against the Centres and Mixed Use Design Guide."
Commercial and mixed use Zones / Metropolitan Centre Zone / General MCZ	Stride Investment Management Limited	470.26	Support in part	Supports the objectives and policies of the Metropolitan Centre Zone. Supports the sub-regional role of these centres, the recognition of high-density development, and the enablement of a wide range of activities.	Retain Metropolitan Centre Zone objectives and policies as notified, with amendments.
Commercial and mixed use Zones / Metropolitan Centre Zone / General MCZ	Foodstuffs North Island	476.39	Support in part	Generally supports the objectives and policies for the Metropolitan Centre Zone, and specifically supports the recognition of medium and high-density development and the enablement of a wide range of activities.	Retain the Metropolitan Centre Zone objectives and policies, with amendments. [Inferred decision requested].

Commercial and mixed use Zones / Metropolitan Centre Zone / New MCZ	Retirement Villages Association of New Zealand Incorporated	350.271	Amend	As currently drafted retirement villages would be a permitted or discretionary activity under the 'residential activities' rule of the Local Centre Zone (LCZ-R10). Considers that the Local Centre Zone should have a retirement village specific rule that provides for retirement villages as a permitted activity (with the construction of the retirement villages being a restricted discretionary activity under LCZ-R18). Permitted activity status recognises retirement villages are residential activities and provide substantial benefit by way of enabling older people to remain in familiar community environments for longer (close to family and support networks), whilst also freeing up a number of dwellings located in surrounding suburbs.	<p>Add new 'Retirement villages' in the Local Centres Zone chapter rule as follows: <u>LCZ-RX Retirement villages</u> 1. Activity status: Permitted</p>
Commercial and mixed use Zones / Metropolitan Centre Zone / New MCZ	KiwiRail Holdings Limited	408.128	Amend	<p>Considers that building setbacks are essential to address significant safety hazards associated with the operational rail corridor. Parts of the KiwiRail network adjoin commercial and mixed use zones that do not currently include provision for boundary setbacks for buildings and structures.</p> <p>KiwiRail seek a boundary setback of 5m from the rail corridor for all buildings and structures, and that the rail corridor be recognised as a qualifying matter in relevant non-residential zones in accordance with section 77(1)(o) of the RMA.</p> <p>Consistent with the amendment requested for the assessment criteria in the residential zones, KiwiRail considers that a matter of discretion directing consideration of impacts on the safety and efficiency of the rail corridor is appropriate in situations where the 5m setback standard is not complied with in all zones adjacent to the railway corridor.</p>	<p>Add new standard as follows: <u>MCZ-SX:</u> <u>Boundary setbacks</u> <u>Buildings or structures must not be located within a 5m setback from a rail corridor boundary.</u></p> <p>AND seeks that as applicable, the following matter of discretion be inserted: <u>Matters of discretion:</u> (X) The location and design of the building as it relates to the ability to safely use, access and maintain buildings without requiring access on, above or over the rail corridor.</p>

Considers that the Metropolitan Centres fulfil a different purpose, and are of an entirely different scale to the City Centre. The City Centre has a scale and centrality which means that activities in Johnsonville and Kilbirnie offer little threat to its long-term sustainability. As such any development in the Metropolitan Centres should be considered in its own right without the additional administrative burden of potentially requiring assessments of effects on the City Centre. The Metropolitan Centre zones are relatively confined, and it is also important to encourage efficient use of this land. It is considered that requiring a mix of medium and high density housing will not achieve this.	Opposes MCZ-P1 (Accommodating growth) and the reference to “undermining” the “ongoing viability, vibrancy and primacy”. Seeks amendment.

Commercial and mixed use Zones / Metropolitan Centre Zone / MCZ-P4	Z Energy Limited	361.75	Support in part	MCZ-P4 is supported for its intent in relation to new activities. Policy MCZ-P4 identifies potentially incompatible activities with the purpose of the MCZ, including yard-based retail, ground level carparking and residential activities, and vacant sites and seeks to only allow these activities where they will not have an adverse effect on its vitality, vibrancy and amenity.	Retain MCZ-P4 (Potentially incompatible activities) with amendment.
Commercial and mixed use Zones / Metropolitan Centre Zone / MCZ-P4	Z Energy Limited	361.76	Amend	Considers that MCZ-P4 is too specific and should be amended. MCZ-P4 is too specific and it will impact on the continued operation, maintenance and upgrade of a range of existing activities. It is considered that some yard-based activities, like service stations, play a key role in providing essential services to enable a well-functioning urban environment.	Amend MCZ-P4 (Potentially incompatible activities) as follows: Only allow <u>new</u> activities that are potentially incompatible with the purpose of the Metropolitan Centre zone, where they will not have an adverse effect on its vibrancy and amenity. Potentially incompatible activities include: a. Carparking visible at street edge along an active frontage or non-residential activity frontage; b. Commercial and mixed use Zones / Metropolitan Centre Zone / MCZ-P6	Kāinga Ora Homes and Communities	391.658	Amend	Generally supports MCZ-P6 but considers that an amendment is required to: (a) recognise the range of housing densities potentially enabled in the zone, and to recognise that tenures and affordability cannot and should not be managed through the District Plan. Considers that the focus should be on providing for the level of the activity and building form that is appropriate for a Metropolitan Centre. And; (b) Clarify that intent of the metropolitan zone is to enable significant intensification and height, and therefore high-density housing is the appropriate scale of development to encourage within the Metropolitan Centre and high-density residential development can provide for a range of housing choices in itself. Considers that this position is consistent with MCZ-P7 and the intent of the MCZ.	Amend MCZ-P6 (Housing choice) as follows: Enable medium and high-density residential development that: 1. Commercial and mixed use Zones / Metropolitan Centre Zone / MCZ-P8	Willis Bond and Company Limited	416.123	Amend	Considers that on-site residential amenity can be provided in a number of ways and should not be prescriptive, acknowledging that mandated types of amenity (such as outdoor space) can increase housing cost and prevent lower income residents living within the city centre. The submitter considers that the policy should acknowledge affordability constraints. The National Policy Statement on Urban Development 2020 (NPS-UD) requires district plans to “enable, in city centre zones, building heights and density of urban form to realise as much development capacity as possible” (Policy 3). Commercial and mixed use Zones / Metropolitan Centre Zone / MCZ-P10	Restaurant Brands Limited	349.161	Oppose	Oppose The Centres and Mixed-Use Design Guide (and the associated policy and matters of discretion linkages), do not recognise or provide for the functional or operational requirements of activities. The Design Guide reads as a set of rules to be complied with, rather than guidelines to inform the assessment of applications for resource consent and will result in an unnecessarily onerous and unreasonable resource consent process. The Design Guide places unreasonable requirements on applicants on matters that are more appropriately dealt with at a national level (for example, reducing travel/shipping costs of materials to reduce carbon emissions, and installing insulation above minimum requirements). The imposition of "thresholds" for certain types of development result in a "pass/fail" assessment being applied and will result in an unnecessarily onerous and unreasonable resource consent process. Commercial and mixed use Zones / Metropolitan Centre Zone / MCZ-P10	Woolworths New Zealand	359.76	Amend	Considers that MCZ-P10 is unclear and should be amended. The policy contains an incorrect reference to the Centres and Mixed Use Design Guide document (should be G97 as opposed to G107). A review of the guideline indicates that G97 City Outcomes Contribution is only triggered for City Centre zone developments (under or over height development comprising 50 or more units or any comprehensive development) and for over height development comprising 25 or more units or any comprehensive development in the Metropolitan Centre zone (MCZ), Neighbourhood Centre zone (NCZ), Local Centre zone (LCZ) and High Density Residential zone (HRZ). Commercial and mixed use Zones / Metropolitan Centre Zone / MCZ-R16	BP Oil New Zealand, Mobil Oil New Zealand Limited and Z Energy Limited (the Fuel Companies)	372.152	Amend	<p>Considers that MCZ-R16 should be amended as the notification requirement is not supported as it may have a range of unintended outcomes. For instance, without clarification, it may require public notification for any operational change, upgrading or maintenance to an existing yard-based activity where public notification would be more appropriately determined through standard notification tests. It may therefore also discourage existing activities from undertaking important maintenance and upgrades, for instance, to meet requirements of HSNO / HSWA legislation, better accord with good practise, introduce new technologies, or necessary changes to meet demand.</p> <p>Ongoing operation, maintenance, and upgrades of existing service stations / yard-based retail activities should not be subject to this notification requirement, which is not appropriate for existing lawful activities.</p> <p>It is considered that an additional exclusion to the notification status is appropriate only where the existing or new activity is located on the edge of the zone or adjacent to an arterial or collector road. These locations and/or interfaces do not have, nor should they expect, the same urban design outcomes and levels of visual amenity compared to a centrally located site in the CCZ for example. A service station, for example, would not impact the function and vitality of a centre zone if it were located on the edge of the zone where it can appropriately transition to the adjoining zone.</p>	<p>Amend MCZ-R16 (Yard-based retailing activities) as follows:</p> <p>Notification Status: An application for resource consent made in respect of rule MCZ-R16 must be publicly notified <u>except</u>:</p> <p><u>a. Commercial and mixed use Zones / Metropolitan Centre Zone / MCZ-R20	Woolworths New Zealand	359.78	Amend	Considers that MCZ-R20.1 should be amended to establish a baseline for supermarket operations within the LCZ that is greater than the current threshold of 100m2 for new buildings on account of the general operational requirements of the stores. This proposed baseline of 2000m2 aligns with the Auckland Unitary Plan provisions in the Local Centre zone and is considered a commensurate response given the typical scale of supermarket buildings in this zone. Commercial and mixed use Zones / Metropolitan Centre Zone / MCZ-S6	Kāinga Ora Homes and Communities	391.680	Amend	<p>Considers that MCZ-S6 should be amended so that active frontage controls only apply where necessary, such as along principal roads/arterials not necessary along connecting streets.
